WTO Analytical Index

The *WTO Analytical Index* is a guide to the legal interpretation and application of the WTO Agreements by the WTO Appellate Body, WTO dispute settlement panels and other WTO bodies. The book assists anyone working with WTO law in identifying the existing jurisprudence and relevant decisions concerning a given provision of any WTO agreement. This is a unique work produced by the Legal Affairs Division of the WTO Secretariat with contributions from other Divisions of the Secretariat and the Appellate Body Secretariat.

The second edition of the *WTO Analytical Index* covers developments in WTO law and practice through to the end of December 2004.

Foreword

The WTO Analytical Index is a guide intended to assist in the legal interpretation and application of findings of WTO dispute settlement panels and the Appellate Body, and of decisions adopted by other WTO bodies. Its principal objective is to make WTO law and jurisprudence more understandable and accessible to the reader by identifying how the legal findings of these WTO adjudicatory bodies and the relevant decisions of the numerous WTO committees relate to any given provision of the various WTO agreements.

This is a unique work produced by the Legal Affairs Division of the WTO Secretariat with important contributions from other Divisions of the Secretariat and from the Appellate Body Secretariat. The material contained in this second edition is inclusive and therefore covers all developments in WTO law and practice from January 1995 through the end of December 2004. Of particular note is that the scope of the chapter on the *Understanding on Rules and Procedures Governing the Settlement of Disputes* has been substantially extended and a number of useful tables containing data on the operation of the dispute settlement system have been added. In addition, greater use of subheadings has been made in this edition in order to facilitate research by readers; this is reflected in each chapter's table of contents. An additional index organised on a case-by-case basis has also been included.

I would like to thank all those who have contributed to the preparation of this publication, but especially María J. Pereyra-Friedrichsen and Siobhan Ackroyd of the division as well as the many talented legal interns who assist the division on an ongoing basis not only with this project but in so many other ways as well. This volume would not have been possible without their hard work.

We hope that this publication will be a useful tool in better understanding WTO law, jurisprudence and practice. We intend to continue updating it on a regular basis.

S. Bruce Wilson
Director
Legal Affairs Division
World Trade Organization

A. AGREEMENTS 2
B. WTO BODIES 3
IV. WTO DOCUMENTS 4
V. GATT DISPUTES 6
VI. WTO DISPUTES 10

I. OVERVIEW OF SCOPE AND ORGANIZATION

A. SCOPE

1. The second edition of the *WTO Analytical Index* provides a guide to the interpretation and application of the *Marrakesh Agreement Establishing the World Trade Organization* ("*WTO Agreement*"), drawing on the jurisprudence of panel, Appellate Body and arbitration reports, and on decisions of WTO bodies. The material covers the period 1 January 1995 to 31 December 2004.

2. Although this volume does not incorporate the material contained in the *GATT Analytical Index*[1], appropriate cross-references are made to this earlier work.

B. ORGANIZATION OF MATERIALS

3. The material is organized into 23 chapters with a separate chapter for each of the Agreements. Within each chapter, there are sections organized on an article by article basis.

4. Each chapter is generally divided into two sections: "A. Text of Article [. . .]" sets out the text of the particular article; and "B. Interpretation and Application of Article [. . .]" provides excerpts, organized in chronological order, of relevant jurisprudence and decisions of WTO bodies. The text of the Understandings relating to specific Articles of the *GATT 1994* are to be found following the text(s) of the Article concerned.

5. Under Section B, excerpts are organized systematically, in chronological order, under the heading "General" and other relevant headings, frequently including words from the particular portion of the text being interpreted. Many chapters also include tables or other descriptive material.

6. This volume does not attempt to set out the drafting history of the *WTO Agreement*. Material on the negotiating history of the Uruguay Round and the transition from the GATT to the WTO can be found in the *GATT Analytical Index*, particularly in the Chapter on "Institutions and Procedure".

II. EDITORIAL CONVENTIONS

A. ABBREVIATIONS

7. This work uses a number of abbreviations, the definitions for which can be found in the tables at the end of this introductory chapter. Abbreviations are provided for the names of the various WTO agreements and the various bodies of the WTO. Abbreviations ("short titles") are also given for panel, Appellate Body and arbitration reports.

B. OTHER CONVENTIONS

8. All excerpts, whether of decisions of WTO bodies or of panel, Appellate Body or arbitration reports, are introduced by short explanatory sentences, setting out the context for including the particular excerpt.

9. Excerpts from decisions of the various WTO bodies are kept to a minimum because the full text of the materials is available in the cited documents and may be accessed on-line through the WTO website (*http://www.wto.org*).

10. Citations to excerpted materials from WTO bodies are generally limited to the relevant document symbol and the paragraph number within that document where the cited text appears. In the case of excerpted material

[1] GATT Analytical Index: Guide to GATT Law and Practice, Updated 6th Edition (1995) ("GATT Analytical Index").

from panel, Appellate Body and arbitration reports, the citations are limited to the name of the adjudicating body, the short title of the case and the paragraph number where the cited text appears, e.g., "Appellate Body Report on *EC – Bananas III*, para. 34". For the first six Appellate Body reports, where paragraph numbering was not used, page numbers for the cited text are used.

11. Full citations for the panel, Appellate Body and arbitration reports are provided in tables at the beginning of each volume of this publication. These full citations reference the WTO-approved published versions of these reports, as found in the *Dispute Settlement Reports ("DSR")*. Where the relevant *DSR* has yet to be published, the document reference from the "*WT/DS*" document series is used.

12. Original footnotes within excerpts are generally omitted except where expressly retained and identified as "(*footnote original*)". Case names in footnotes, other than those found in original footnotes, are changed to the correct short titles as listed in the table at the end of this chapter.

13. Within quoted material, ellipses (". . .") are used to indicate where text within a sentence, a paragraph or larger section has been omitted. Square brackets [ ] are used to indicate editorial changes, all of which have been kept to a strict minimum.

14. Because this work is both for general distribution and for use by Members of the WTO, references are provided to some documents which are still subject to restriction. The rules on document restriction and derestriction are discussed in the Chapter on the *WTO Agreement*.

C. DOCUMENT SERIES, DOCUMENT REFERENCES, AND DOCUMENT SOURCES

15. The various documents series, indicating the document symbols for all the various types of WTO documents, are set out at the end of this chapter.

16. This edition of the *WTO Analytical Index* will be available on CD-ROM and "online" from the WTO website (*http://www.wto.org*). Copies and information on these various sources for the *WTO Analytical Index* may be obtained through the WTO Bookshop or the WTO website or by e-mailing the Publications Office (*publications@wto.org*). The texts of the WTO *Legal Instruments*, *Dispute Settlement Reports* and *Basic Instrument and Selected Documents* series and other WTO publications may also be obtained through the Bookshop or electronically. The contact details of the WTO Bookshop are as follows: WTO, Centre William Rappard, CH-1211 Geneva 21, Switzerland. Telephone +41 22 739 53 08 or +41 22 739 51 05. Fax +41 22 739 54 58. E-mail: publications@wto.org.

17. Set out below are: (i) tables of the full titles, with the title as used in the *WTO Analytical Index*, of agreements and WTO bodies; (ii) the list of WTO document series; and (iii) short titles for dispute cases.

III. MARRAKESH AGREEMENT ESTABLISHING THE WORLD TRADE ORGANIZATION

A. AGREEMENTS

Marrakesh Agreement Establishing the World Trade Organization	WTO Agreement
General Agreement on Tariffs and Trade 1994	GATT 1994[2]
Agreement on Agriculture	Agreement on Agriculture
Agreement on the Application of Sanitary and Phytosanitary Measures	SPS Agreement
Agreement on Textiles and Clothing	ATC
Agreement on Technical Barriers to Trade	TBT Agreement
Agreement on Trade-Related Investment Measures	TRIMs Agreement
Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994	Anti-Dumping Agreement
Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994	Customs Valuation Agreement
Agreement on Preshipment Inspection	PSI Agreement
Agreement on Rules of Origin	Agreement on Rules of Origin
Agreement on Import Licensing Procedures	Licensing Agreement
Agreement on Subsidies and Countervailing Measures	SCM Agreement
Agreement on Safeguards	Agreement on Safeguards

[2] Where reference is made to the General Agreement on Tariffs and Trade 1947, the abbreviation *GATT 1947* is used.

General Agreement on Trade in Services	GATS Agreement
Agreement on Trade-Related Aspects of Intellectual Property Rights	TRIPS Agreement
Understanding on Rules and Procedures Governing the Settlement of Disputes	DSU
Trade Policy Review Mechanism	TPRM
Agreement on Trade in Civil Aircraft	Aircraft Agreement
Agreement on Government Procurement	Agreement on Government Procurement
International Dairy Agreement	International Dairy Agreement
International Bovine Meat Agreement	International Bovine Meat Agreement

B. WTO BODIES

General Council	General Council
– Committee on Trade and Environment	– Committee on Trade and Environment
– Committee on Trade and Development	– Committee on Trade and Development
= Sub-Committee on Least-Developed Countries	= LDC Subcommittee
– Committee on Balance-of-Payments Restrictions	– BOPs Committee
– Committee on Budget, Finance and Administration	– BFA Committee
– Committee on Regional Trade Agreements	– Committee on RTAs or CRTA
– Working Parties on Accession	– Working Parties on Accession
– Working Group on the Relationship between Trade and Investment	– WGTI

Belgium – Income Tax	*Income Tax Practices Maintained by Belgium* Panel Report, adopted 7 December 1981, BISD 23S/127 and 28S/114
Brazil – EEC Milk	*Imposition of Provisional and Definitive Countervailing Duties on Milk Powder and Certain Types of Milk from the European Economic Community* Panel Report, adopted 28 April 1994, BISD 41S/II/467
Brazil – Internal Taxes	*Brazilian Internal Taxes* Working Party Report, adopted 30 June 1949, BISD II/181 and 186
Canada – Eggs	*Canadian Import Quotas on Eggs* Working Party Report, adopted 17 February 1976, BISD 23S/91
Canada – FIRA	*Canada – Administration of the Foreign Investment Review Act* Panel Report, adopted 7 February 1984, BISD 30S/140
Canada – Gold Coins	*Canada – Measures Affecting the Sale of Gold Coins* Panel Report, 17 September 1985, unadopted, L/5863
Canada – Grain Corn	*Panel on Canadian Countervailing Duties on Grain Corn from the United States* Panel Report, adopted 26 March 1992, BISD 39S/411.
Canada – Herring and Salmon	*Canada – Measures Affecting Exports of Unprocessed Herring and Salmon* Panel Report, adopted 22 March 1988, BISD 35S/98
Canada – Ice Cream and Yoghurt	*Canada – Import Restrictions on Ice Cream and Yoghurt* Panel Report, adopted 5 December 1989, BISD 36S/68
Canada – Lead and Zinc	*Canada – Withdrawal of Tariff Concessions (Lead and Zinc)* Panel Report, adopted 17 May 1978, BISD 25S/42
Canada – Manufacturing Beef CVD	*Canada – Imposition of Countervailing Duties on Imports of Manufacturing Beef from the EEC* Panel Report, 13 October 1987, unadopted, SCM/85
Canada – Potatoes	*Exports of Potatoes to Canada* Panel Report, adopted 16 November 1962, BISD 11S/55 and 88
Canada – Provincial Liquor Boards (EEC)	*Canada – Import, Distribution and Sale of Alcoholic Drinks by Canadian Provincial Marketing Agencies* Panel Report, adopted 22 March 1988, BISD 35S/37
Canada – Provincial Liquor Boards (US)	*Canada – Import, Distribution and Sale of Certain Alcoholic Drinks by Provincial Marketing Agencies* Panel Report, adopted 18 February 1992, BISD 39S/27
Cuba – Consular Taxes	*The Phrase "Charges of any Kind" in Article I:1 in Relation to Consular Taxes* Ruling by the Chairman, 24 August 1948, BISD II/12
Cuba – Textiles I	*Report of Working Party 7 on the Cuban Schedule* 13 September 1948, unadopted, GATT/CP.2/43
Cuba – Textiles II	*Report of Working Party 8 on Cuban Textiles* 10 August 1949, unadopted, GATT/CP.3/82
EC – Article XXVIII	*Canada/European Communities – Article XXVIII Rights* Award by the Arbitrator, 16 October 1990, BISD 37S/80
EC – Audio Cassettes	*EC – Anti-Dumping Duties on Audio Tapes in Cassettes Originating in Japan* Panel Report, 28 April 1995, unadopted, ADP/136
EC – Citrus	*European Community – Tariff Treatment on Imports of Citrus Products from Certain Countries in the Mediterranean Region* Panel Report, 7 February 1985, unadopted, L/5776
EC – Sugar Exports (Australia)	*European Communities – Refunds on Exports of Sugar* Panel Report, adopted 6 November 1979, BISD 26S/290
EC – Sugar Exports (Brazil)	*European Communities – Refunds on Exports of Sugar – Complaint by Brazil* Panel Report, adopted 10 November 1980, BISD 27S/69
EEC – Airbus	*German Exchange Rate Scheme for Deutsche Airbus* Panel Report, 4 March 1992, unadopted, SCM/142
EEC – Animal Feed Proteins	*EEC – Measures on Animal Feed Proteins* Panel Report, adopted 14 March 1978, BISD 25S/49

EEC – Apples (US)	*European Economic Community – Restrictions on Imports of Apples – Complaint by the United States* Panel Report, adopted 22 June 1989, BISD 36S/135
EEC – Apples I (Chile)	*EEC Restrictions on Imports of Apples from Chile* Panel Report, adopted 10 November 1980, BISD 27S/98
EEC – Apples II (Chile)	*EEC – Restrictions on Imports of Apples* Panel Report, 20 June 1994, unadopted, DS39/R
EEC (Member States) – Bananas I	*EEC – Member States' Import Regimes for Bananas* Panel Report, 3 June 1993, unadopted, DS32/R
EEC – Bananas II	*EEC – Import Regime for Bananas* Panel Report, 11 February 1994, unadopted, DS38/R
EEC – Canned Fruit	*European Economic Community – Production Aids Granted on Canned Peaches, Canned Pears, Canned Fruit Cocktail and Dried Grapes* Panel Report, 20 February 1985, unadopted, L/5778
EEC – Copper Scrap	*European Economic Community – Restrictions on Exports of Copper Scrap* Panel Report, adopted 20 February 1990, BISD 37S/200
EEC – Cotton Yarn	*European Economic Community – Imposition of Anti-Dumping Duties on Imports of Cotton Yarn from Brazil* Panel Report, adopted 30 October 1995, BISD 42/17
EEC – Dessert Apples	*European Economic Community – Restrictions on Imports of Dessert Apples – Complaint by Chile* Panel Report, adopted 22 June 1989, BISD 36S/93
EEC – Import Restrictions	*EEC – Quantitative Restrictions Against Imports of Certain Products from Hong Kong* Panel Report, adopted 12 July 1983, BISD 30S/129
EEC – Imports of Beef	*European Economic Community – Imports of Beef from Canada* Panel Report, adopted 10 March 1981, BISD 28S/92
EEC – Minimum Import Prices	*EEC – Programme of Minimum Import Prices, Licences and Surety Deposits for Certain Processed Fruits and Vegetables* Panel Report, adopted 18 October 1978, BISD 25S/68
EEC – Newsprint	*Panel on Newsprint* Panel Report, adopted 20 November 1984, BISD 31S/114
EEC – Oilseeds I	*European Economic Community – Payments and Subsidies Paid to Processors and Producers of Oilseeds and Related Animal-Feed Proteins* Panel Report, adopted 25 January 1990, BISD 37S/86
EEC – Oilseeds II	*European Economic Community – Follow-Up on the Panel Report "Payments and Subsidies Paid to Processors and Producers of Oilseeds and Related Animal-Feed Proteins"* Panel Report, 31 March 1992, BISD 39S/91
EEC – Parts and Components	*European Economic Community – Regulation on Imports of Parts and Components* Panel Report, adopted 16 May 1990, BISD 37S/132
EEC – Pasta Subsidies	*European Economic Community – Subsidies on Export of Pasta Products* Panel Report, 19 May 1983, unadopted, SCM/43
EEC – Poultry (US)	*EEC – United Kingdom Application of EEC Directives to Imports of Poultry from the United States* Panel Report, adopted 11 June 1981, BISD 28S/90
EEC – VAT and Threshold	*Panel on Value-Added Tax and Threshold* Panel Report, adopted 16 May 1984, BISD 31S/247
EEC – Wheat Flour Subsidies	*European Economic Community – Subsidies on Export of Wheat Flour* Panel Report, 21 March 1983, unadopted, SCM/42
France – Compensation Tax	*French Special Temporary Compensation Tax on Imports* Contracting Parties Decision, 17 January 1955, BISD 3S/26
France – Import Restrictions	*French Import Restrictions* Panel Report, adopted 14 November 1962, BISD 11S/55 and 94
France – Income Tax	*Income Tax Practices Maintained by France* Panel Report, adopted 7 December 1981, BISD 23S/114 and 28S/114
France – Wheat Exports	*French Assistance to Exports of Wheat and Wheat Flour* Panel Report, adopted 21 November 1958, BISD 7S/46
Germany – Sardines	*Treatment by Germany of Imports of Sardines* Working Party Report, adopted 31 October 1952, BISD 1S/53
Germany – Starch Duties	*German Import Duties on Starch and Potato Flour* Working Party Report, 16 February 1955, unadopted, BISD 3S/77
Greece – Import Duties	*Increase of Import Duties on Products included in Schedule XXV (Greece)* Working Party Report, adopted 3 November 1952, BISD 1S/51

Greece – Import Taxes	*Special Import Taxes Instituted by Greece* Working Party Report, adopted 3 November 1952, BISD 1S/48
Greece – Phonograph Records	*Greece – Increase in Bound Duty* Group of Experts Report, 9 November 1956, unadopted, L/580
Greece – USSR Tariff Quotas	*Greece – Preferential Tariff Quotas to the USSR* Working Party Report, adopted 2 December 1970, BISD 18S/179
India – Tax Rebates	*Application of Article I:1 to Rebates on Internal Taxes* Ruling by the Chairman, 24 August 1948, BISD II/12
Italy – Agricultural Machinery	*Italian Discrimination Against Imported Agricultural Machinery* Panel Report, adopted 23 October 1958, BISD 7S/60
Jamaica – Margins of Preference	*Jamaica – Margins of Preference* Panel Report, adopted 2 February 1971, BISD 18S/183
Japan – Agricultural Products I	*Japan – Restrictions on Imports of Certain Agricultural Products* Panel Report, adopted 2 March 1988, BISD 35S/163
Japan – Alcoholic Beverages I	*Japan – Customs Duties, Taxes and Labelling Practices on Imported Wines and Alcoholic Beverages* Panel Report, adopted 10 November 1987, BISD 34S/83
Japan – Leather (Canada)	*Japan's Measures on Imports of Leather* Panel Report, adopted 10 November 1980, BISD 27S/118
Japan – Leather I (US)	*Japanese Measures on Imports of Leather* Panel Report, adopted 6 November 1979, BISD 26S/320
Japan – Leather II (US)	*Panel on Japanese Measures on Imports of Leather* Panel Report, adopted 15 May 1984, BISD 31S/94
Japan – Semi-Conductors	*Japan – Trade in Semi-Conductors* Panel Report, adopted 4 May 1988, BISD 35S/116
Japan – Silk Yarn	*Japan Measures on Imports of Thrown Silk Yarn* Panel Report, adopted 17 May 1978, BISD 25S/107
Japan – SPF Dimension Lumber	*Canada/Japan – Tariff on Imports of Spruce, Pine, Fir (SPF) Dimension Lumber* Panel Report, adopted 19 July 1989, BISD 36S/167
Japan – Tobacco	*Japanese Restraints on Imports of Manufactured Tobacco from the United States* Panel Report, adopted 11 June 1981, BISD 28S/100
Korea – Beef (Australia)	*Republic of Korea – Restrictions on Imports of Beef – Complaint by Australia* Panel Report, adopted 7 November 1989, BISD 36S/202
Korea – Beef (NZ)	*Republic of Korea – Restrictions on Imports of Beef – Complaint by New Zealand* Panel Report, adopted 7 November 1989, BISD 36S/234
Korea – Beef (US)	*Republic of Korea – Restrictions on Imports of Beef – Complaint by the United States* Panel Report, adopted 7 November 1989, BISD 36S/268
Korea – Resins	*Panel Report on Korea – Anti-Dumping Duties on Imports of Polyacetal Resins from the United States* Panel Report, adopted 27 April 1993, BISD 40S/205
Netherlands – Income Tax	*Income Tax Practices Maintained by the Netherlands* Panel Report, adopted 7 December 1981, BISD 23S/137 and 28S/114
New Zealand – Finnish Transformers	*New Zealand – Imports of Electrical Transformers from Finland* Panel Report, adopted 18 July 1985, BISD 32S/55
Norway – Apples and Pears	*Norway – Restrictions on Imports of Apples and Pears* Panel Report, adopted 22 June 1989, BISD 36S/306
Norway – Textiles	*Norway – Restrictions on Imports of Certain Textile Products* Panel Report, adopted 18 June 1980, BISD 27S/119
Norway – Trondheim Toll Ring	*Panel Report on Norwegian Procurement of Toll Collection Equipment for the City of Trondheim* Panel Report, adopted 13 May 1992, BISD 40S/319
Spain – Soyabean Oil	*Spain – Measures Concerning the Domestic Sale of Soyabean Oil – Recourse to Article XXIII:2 by the United States* Panel Report, 17 June 1981, unadopted, L/5142
Spain – Unroasted Coffee	*Spain – Tariff Treatment of Unroasted Coffee* Panel Report, adopted 11 June 1981, BISD 28S/102
Sweden – AD Duties	*Swedish Anti-Dumping Duties* Working Party Report, adopted 26 February 1955, BISD 3S/81
Thailand – Cigarettes	*Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes* Panel Report, adopted 7 November 1990, BISD 37S/200

UK – Bananas	*United Kingdom Waivers – Application in Respect of Customs Duties on Bananas* Panel Report, 11 April 1962, unadopted, L/1749
UK – Cotton Textiles	*United Kingdom Import Restrictions on Cotton Textiles* Panel Report, adopted 5 February 1973, BISD 20S/237
UK – Dollar Quotas	*United Kingdom – Dollar Area Quotas* Panel Report, adopted 30 July 1973, BISD 20S/230 and 236
UK – Ornamental Pottery	*Article I – United Kingdom Waiver (Ornamental Pottery)* Panel Report, 19 March 1959, unadopted, SECRET/105
Uruguay – Recourse to Article XXIII	*Uruguayan Recourse to Article XXIII* Panel Report, adopted 16 November 1962, BISD 11S/95
US – Canadian Pork	*United States – Countervailing Duties on Fresh, Chilled and Frozen Pork from Canada* Panel Report, adopted 11 July 1991, BISD 38S/30
US – Canadian Tuna	*United States – Prohibition of Imports of Tuna and Tuna Products from Canada* Panel Report, adopted 22 February 1982, BISD 29S/91
US – Cement	*United States – Anti-Dumping Duties on Gray Portland Cement and Cement Clinker from Mexico* Panel Report, 7 September 1992, unadopted, ADP/82
US – Customs User Fee	*United States – Customs User Fee* Panel Report, adopted 2 February 1988, BISD 35S/245
US – CVD (India)	*Panel on United States Countervailing Duties* Panel Report, adopted 3 November 1981, BISD 28S/113
US – DISC	*United States Tax Legislation (DISC)* Panel Report, adopted 7 December 1981, BISD 23S/98 and 28S/114
US – Dried Figs	*Article XIX – Increase in the United States Duty on Dried Figs* Working Party Decision, 8 November 1952, BISD 1S/28
US – Export Restrictions (Czechoslovakia)	*United States Export Restrictions* Contracting Parties Decision, 8 June 1949, BISD II/28
US – Fur Felt Hats	*Report of the Intersessional Working Party on the complaint of Czechoslovakia concerning the Withdrawal by the United States of a Concession under the terms of Article XIX* Report, adopted 22 October 1951, GATT/CP/106

US – Magnesium	*United States – Measures Affecting the Export of Pure and Alloy Magnesium from Canada* Panel Report, 9 August 1993, unadopted, SCM/174
US – Malt Beverages	*United States – Measures Affecting Alcoholic and Malt Beverages* Panel Report, adopted 19 June 1992, BISD 39S/206
US – Manufacturing Clause	*United States Manufacturing Clause* Panel Report, adopted 15 May 1984, BISD 31S/74
US – Margins of Preference	*Margins of Preference* Contracting Parties Decision, 9 August 1949, BISD II/11
US – MFN Footwear	*United States – Denial of Most-Favoured-Nation Treatment as to Non-Rubber Footwear from Brazil* Panel Report, adopted 19 June 1992, BISD 39S/128
US – Nicaraguan Trade	*United States – Trade Measures Affecting Nicaragua* Panel Report, 13 October 1986, unadopted, L/6053
US – Non-Rubber Footwear	*United States – Countervailing Duties on Non-Rubber Footwear from Brazil* Panel Report, adopted 13 June 1995, BISD 42S/208
US – Norwegian Salmon AD	*Imposition of Anti-Dumping Duties on Imports of Fresh and Chilled Atlantic Salmon from Norway* Panel Report, adopted 27April 1994, BISD 41S/I/229
US – Norwegian Salmon CVD	*Imposition of Countervailing Duties on Imports of Fresh and Chilled Atlantic Salmon from Norway* Panel Report, adopted 28 April 1994, BISD 41S/II/576
US – Section 337	*United States Section 337 of the Tariff Act of 1930* Panel Report, adopted 7 November 1989, BISD 36S/345
US – Softwood Lumber I	*Panel on United States Initiation of a Countervailing Duty Investigation into Softwood Lumber Products from Canada* Panel Report, 3 June 1987, unadopted, BISD 34S/194
US – Softwood Lumber II	*Panel on United States – Measures Affecting Imports of Softwood Lumber from Canada* Panel Report, adopted 27 October 1993, BISD 40S/358

US – Sonar Mapping	*United States – Procurement of a Sonar Mapping System* Panel Report, unadopted, GPR.DS1/R
US – Spring Assemblies	*United States – Imports of Certain Automotive Spring Assemblies* Panel Report, adopted 26 May 1983, BISD 30S/107
US – Sugar	*United States – Restrictions on Imports of Sugar* Panel Report, adopted 22 June 1989, BISD 36S/331
US – Sugar Quota	*United States – Imports of Sugar from Nicaragua* Panel Report, adopted 13 March 1984, BISD 31S/67
US – Sugar Waiver	*United States – Restrictions on the Importation of Sugar and Sugar-Containing Products Applied under the 1955 Waiver and under the Headnote to the Schedule of Tariff Concessions* Panel Report, adopted 7 November 1990, BISD 37S/228
US – Superfund	*United States – Taxes on Petroleum and Certain Imported Substances* Panel Report, adopted 17 June 1987, BISD 34S/136
US – Suspension of Obligations	*Netherlands Action Under Article XXIII:2 to Suspend Obligations to the United States* Working Party Report, adopted 8 November 1952, BISD 1S/62
US – Swedish Steel	*United States – Imposition of Anti-Dumping Duties on Imports of Seamless Stainless Steel Hollow Products from Sweden* Panel Report, 29 August 1990, unadopted, ADP/47
US – Swedish Steel Plate	*United States – Anti-Dumping Duties on Imports of Stainless Steel Plate from Sweden* Panel Report, 24 February 1994, unadopted, ADP/117 and Corr.1
US – Taxes on Automobiles	*United States – Taxes on Automobiles* Panel Report, 11 October 1994, unadopted, DS31/R
US – Tobacco	*United States Measures Affecting the Importation, Internal Sale and Use of Tobacco* Panel Report, adopted 4 October 1994, BISD 41S/I/131
US – Tuna (EEC)	*United States – Restrictions on Imports of Tuna* Panel Report, 16 June 1994, unadopted, DS29/R
US – Tuna (Mexico)	*United States – Restrictions on Imports of Tuna* Panel Report, 3 September 1991, unadopted, BISD 39S/155
US – Vitamin B12	*Panel on Vitamins* Panel Report, adopted 1 October 1982, BISD 29S/110
US – Wine and Grape Products	*Panel on United States Definition of Industry Concerning Wine and Grape Products* Panel Report, adopted 28 April 1992, BISD 39S/436
US/EEC– Poultry	*US/EEC – Panel on Poultry* Panel Report, 21 November 1963, unadopted, L/2088

VI. WTO DISPUTES

Argentina – Ceramic Tiles	*Argentina – Definitive Anti-Dumping Measures on Imports of Ceramic Floor Tiles from Italy* Panel Report, WT/DS189/R, adopted 5 November 2001, DSR 2001:XII
Argentina – Footwear (EC)	*Argentina – Safeguard Measures on Imports of Footwear* Panel Report, WT/DS121/R, adopted 12 January 2000, as modified by the Appellate Body Report, WT/DS121/AB/R, DSR 2000:I
Argentina – Hides and Leather	*Argentina – Measures Affecting the Export of Bovine Hides and Import of Finished Leather* Panel Report, WT/DS155/R and Corr.1, adopted 16 February 2001, DSR 2001:II
Argentina – Hides and Leather (Article 21.3)	*Argentina – Measures Affecting the Export of Bovine Hides and Import of Finished Leather – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS155/10, 31 August 2001, DSR 2001:XII
Argentina – Poultry Anti-Dumping Duties	*Argentina – Definitive Anti-Dumping Duties on Poultry from Brazil* Panel Report, WT/DS241/R, adopted 19 May 2003, DSR 2003:V
Argentina – Preserved Peaches	*Argentina – Definitive Safeguard Measure on Imports of Preserved Peaches* Panel Report, WT/DS238/R, adopted 15 April 2003, DSR 2003:III
Argentina – Textiles and Apparel	*Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items* Panel Report, WT/DS56/R, adopted 22 April 1998, as modified by the Appellate Body Report, WT/DS56/AB/R, DSR 1998:III
Australia – Automotive Leather II	*Australia – Subsidies Provided to Producers and Exporters of Automotive Leather* Panel Report, WT/DS126/R, adopted 16 June 1999, DSR 1999:III
Australia – Automotive Leather II (Article 21.5 – US)	*Australia – Subsidies Provided to Producers and Exporters of Automotive Leather – Recourse to Article 21.5 of the DSU by the United States* Panel Report, WT/DS126/RW and Corr.1, adopted 1 February 2000, DSR 2000:III
Australia – Salmon	*Australia – Measures Affecting Importation of Salmon* Panel Report, WTDS18/R and Corr.1, adopted 6 November 1998, as modified by the Appellate Body Report, WT/DS18/AB/R, DSR 1998:VIII

Australia – Salmon (Article 21.3)	*Australia – Measures Affecting Importation of Salmon – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS18/9, 23 February 1999, DSR 1999:I
Australia – Salmon (Article 21.5 – Canada)	*Australia – Measures Affecting Importation of Salmon– Recourse to Article 21.5 of the DSU by Canada* Panel Report, WT/DS18/RW, adopted 20 March 2000, DSR 2000:IV
Brazil – Aircraft	*Brazil – Export Financing Programme for Aircraft* Panel Report, WT/DS46/R, adopted 20 August 1999, as modified by the Appellate Body Report, WT/DS46/AB/R, DSR 1999:III
Brazil – Aircraft (Article 21.5 –Canada)	*Brazil – Export Financing Programme for Aircraft– Recourse by Canada to Article 21.5 of the DSU* Panel Report, WT/DS46/RW, adopted 4 August 2000, as modified by the Appellate Body Report, WT/DS46/AB/RW, DSR 2000:VIII and DSR 2000:IX
Brazil – Aircraft (Article 21.5 – Canada II)	*Brazil – Export Financing Programme for Aircraft* Panel Report, WT/DS46/RW/2, adopted 23 August 2001, DSR 2001:X
Brazil – Aircraft (Article 22.6 – Brazil)	*Brazil – Export Financing Programme for Aircraft – Recourse to Arbitration by Brazil under Article 22.6 of the DSU and Article 4.11 of the SCM Agreement* Decision by the Arbitrators, WT/DS46/ARB, 28 August 2000, DSR 2002:I
Brazil – Desiccated Coconut	*Brazil – Measures Affecting Desiccated Coconut* Panel Report, WT/DS22/R, adopted 20 March 1997, as upheld by the Appellate Body Report, WT/DS22/AB/R, DSR 1997:I
Canada – Aircraft	*Canada – Measures Affecting the Export of Civilian Aircraft* Panel Report, WT/DS70/R, adopted 20 August 1999, as upheld by the Appellate Body Report, WT/DS70/AB/R, DSR 1999:IV
Canada – Aircraft (Article 21.5 – Brazil)	*Canada – Measures Affecting the Export of Civilian Aircraft – Recourse by Brazil to Article 21.5 of the DSU* Panel Report, WT/DS70/RW, adopted 4 August 2000, as upheld by the Appellate Body Report, WT/DS70/AB/RW, DSR 2000:IX
Canada – Aircraft Credits and Guarantees	*Canada – Export Credits and Loan Guarantees for Regional Aircraft* Panel Report, WT/DS222/R and Corr.1, adopted 19 February 2002, DSR 2002:III
Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)	*Canada – Export Credits and Loan Guarantees for Regional Aircraft – Recourse to Arbitration by Canada under Article 22.6 of the DSU and Article 4.11 of the SCM Agreement* Decision by the Arbitrator, WT/DS222/ARB, 17 February 2003, DSR 2003:III
Canada – Autos	*Canada – Certain Measures Affecting the Automotive Industry* Panel Report, WT/DS139/R, WT/DS142/R, adopted 19 June 2000, as modified by the Appellate Body Report, WT/DS139/AB/R, WT/DS142/AB/R, DSR 2000:VI and DSR 2000:VII
Canada – Autos (Article 21.3)	*Canada – Certain Measures Affecting the Automotive Industry – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS139/12, WT/DS142/12, 4 October 2000, DSR 2000:X
Canada – Dairy	*Canada – Measures Affecting the Importation of Milk and the Exportation of Dairy Products* Panel Report, WT/DS103/R, WT/DS113/R, adopted 27 October 1999, as modified by the Appellate Body Report, WT/DS103/AB/R and Corr.1, WT/DS113/AB/R and Corr.1, DSR 1999:V and DSR 1999:VI
Canada – Dairy (Article 21.5 – New Zealand and US)	*Canada – Measures Affecting the Importation of Milk and the Exportation of Dairy Products – Recourse to Article 21.5 of the DSU by New Zealand and the United States* Panel Report, WT/DS103/RW, WT/DS113/RW, adopted 18 December 2001, as reversed by the Appellate Body Report, WT/DS103/AB/RW, WT/DS113/AB/RW, DSR 2001:XIII
Canada – Dairy (Article 21.5 – New Zealand and US II)	*Canada – Measures Affecting the Importation of Milk and the Exportation of Dairy Products – Second Recourse to Article 21.5 of the DSU by New Zealand and the United States* Panel Report, WT/DS103/RW2, WT/DS113/RW2, adopted 18 December 2001, as modified by the Appellate Body Report, WT/DS103/AB/RW2, WT/DS113/AB/RW2, DSR 2003:I
Canada – Patent Term	*Canada – Term of Patent Protection* Panel Report, WT/DS170/R, adopted 12 October 2000, as upheld by the Appellate Body Report, WT/DS170/AB/R, DSR 2000:X and DSR 2000:XI
Canada – Patent Term (Article 21.3)	*Canada – Term of Patent Protection – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS170/10, 28 February 2001, DSR 2001:V

Canada – Periodicals	*Canada – Certain Measures Concerning Periodicals* Panel Report, WT/DS31/R and Corr.1, adopted 30 July 1997, as modified by the Appellate Body Report, WT/DS31/AB/R, DSR 1997:I
Canada – Pharmaceutical Patents	*Canada – Patent Protection of Pharmaceutical Products* Panel Report, WT/DS114/R, adopted 7 April 2000, DSR 2000:V
Canada – Pharmaceutical Patents (Article 21.3)	*Canada – Patent Protection of Pharmaceutical Products – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS114/13, 18 August 2000, DSR 2002:I
Canada – Wheat Exports and Grain Imports	*Canada – Measures Relating to Exports of Wheat and Treatment of Imported Grain* Panel Report, WT/DS276/R, adopted 27 September 2004, as upheld by the Appellate Body Report, WT/DS276/AB/R, DSR 2004:VI
Chile – Alcoholic Beverages	*Chile – Taxes on Alcoholic Beverages* Panel Report, WT/DS87/R, WT/DS110/R, adopted 12 January 2000, as modified by the Appellate Body Report, WT/DS87/AB/R, WT/DS110/AB/R, DSR 2000:I
Chile – Alcoholic Beverages (Article 21.3)	*Chile – Taxes on Alcoholic Beverages Products – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS87/15, WT/DS110/14, 23 May 2000, DSR 2000:V
Chile – Price Band System	*Chile – Price Band System and Safeguard Measures Relating to Certain Agricultural Products* Panel Report, WT/DS207/R, adopted 23 October 2002, as modified by the Appellate Body Report, WT/DS207/AB/R, DSR 2002:VIII
Chile – Price Band System (Article 21.3)	*Chile – Price Band System and Safeguard Measures Relating to Certain Agricultural Products – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS207/13, 17 March 2003, DSR 2003:III
EC – Asbestos	*European Communities – Measures Affecting Asbestos and Asbestos-Containing Products* Panel Report, WT/DS135/R and Add.1, adopted 5 April 2001, as modified by the Appellate Body Report, WT/DS135/AB/R, DSR 2001:VII and DSR 2001:VIII
EC – Bananas III	*European Communities – Regime for the Importation, Sale and Distribution of Bananas* Panel Report, WT/DS27/R/[. . .], adopted 25 September 1997, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Ecuador)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Ecuador* Panel Report, WT/DS27/R/ECU, adopted 25 September 1997, DSR 1997:III, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Ecuador) (Article 22.6 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS27/ARB/ECU, 24 March 2000, DSR 2000:V
EC – Bananas III (Guatemala and Honduras)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Guatemala and Honduras* Panel Report, WT/DS27/R/GTM, WT/DS27/R/HND, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Mexico)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Mexico* Panel Report, WT/DS27/R/MEX, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (US)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by the United States* Panel Report, WT/DS27/R/USA, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (US) (Article 22.6 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS27/ARB, 9 April 1999, DSR 1999:II
EC – Bananas III (Article 21.3)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS27/15, 7 January 1998, DSR 1998:I
EC – Bananas III (Article 21.5 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Article 21.5 of the DSU by the European Communities* Panel Report, WT/DS27/RW/EEC and Corr.1, adopted 6 May 1999, DSR 1999:II
EC – Bananas III (Article 21.5 – Ecuador)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Article 21.5 of the DSU by Ecuador* Panel Report, WT/DS27/RW/ECU, adopted 6 May 1999, DSR 1999:II
EC – Bed Linen	*European Communities – Anti-Dumping Duties on Imports of Cotton-Type Bed Linen from India*

	Panel Report, WT/DS141/R, adopted 12 March 2001, as modified by the Appellate Body Report, WT/DS141/AB/R, DSR 2001:V and DSR 2001:VI
EC – Bed Linen (Article 21.5 – India)	*European Communities – Anti-Dumping Duties on Imports of Cotton-Type Bed Linen from India – Recourse to Article 21.5 of the DSU by India* Panel Report, WT/DS141/RW, adopted 24 April 2003, as modified by the Appellate Body Report, WT/DS141/AB/RW, DSR 2003:III and DSR 2003:IV
EC – Butter	*European Communities – Measures Affecting Butter Products* Panel Report, WT/DS72/R, 24 November 1999
EC – Computer Equipment	*European Communities – Customs Classification of Certain Computer Equipment* Panel Report, WT/DS62/R, WT/DS67/R, WT/DS68/R, adopted 22 June 1998, as modified by the Appellate Body Report, WT/DS62/AB/R, WT/DS67/AB/R, WT/DS68/AB/R, DSR 1998:V
EC – Hormones (Canada)	*EC Measures Concerning Meat and Meat Products (Hormones) – Complaint by Canada* Panel Report, WT/DS48/R/CAN, adopted 13 February 1998, DSR 1998:II, as modified by the Appellate Body Report, WT/DS26/AB/R, WT/DS48/AB/R, DSR 1998:I
EC – Hormones (Canada) (Article 22.6 – EC)	*EC Measures Concerning Meat and Meat Products (Hormones) – Recourse to Arbitration by the European Communities under Article 2.6 of the DSU* Decision by the Arbitrators, WT/DS48/ARB, 12 July 1999, DSR 1999:III
EC – Hormones (US)	*EC Measures Concerning Meat and Meat Products (Hormones) – Complaint by the United States* Panel Report, WT/DS26/R/USA, adopted 13 February 1998, DSR 1998:III, as modified by the Appellate Body Report, WT/DS26/AB/R, WT/DS48/AB/R, DSR 1998:I
EC – Hormones (US) (Article 22.6 – EC)	*EC Measures Concerning Meat and Meat Products (Hormones) – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS26/ARB, 12 July 1999, DSR 1999:III
EC – Hormones (Article 21.3)	*EC Measures Concerning Meat and Meat Products (Hormones) –Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS26/15, WT/DS48/13, 29 May 1998, DSR 1998:V
EC – Poultry	*European Communities – Measures Affecting the Importation of Certain Poultry Products* Panel Report, WT/DS69/R, adopted 23 July 1998, as modified by the Appellate Body Report, WT/DS69/AB/R, DSR 1998:V
EC – Sardines	*European Communities – Trade Description of Sardines* Panel Report, WT/DS231/R and Corr.1, adopted 23 October 2002, as modified by the Appellate Body Report, WT/DS231/AB/R, DSR 2002:VIII
EC – Scallops (Canada)	*European Communities – Trade Description of Scallops – Request by Canada* Panel Report, WT/DS7/R, 5 August 1996, DSR 1996:I
EC – Scallops (Peru and Chile)	*European Communities – Trade Description of Scallops – Requests by Peru and Chile* Panel Report, WT/DS12/R, WT/DS14/R, 5 August 1996, DSR 1996:I
EC – Tariff Preferences	*European Communities – Conditions for the Granting of Tariff Preferences to Developing Countries* Panel Report, WT/DS246/R, adopted 20 April 2004, as modified by the Appellate Body Report, WT/DS246/AB/R, DSR 2004:III
EC – Tariff Preferences (Article 21.3)	*European Communities – Conditions for the Granting of Tariff Preferences to Developing Countries – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS246/14, 20 September 2004, DSR 2004:IX
EC – Tube or Pipe Fittings	*European Communities – Anti-Dumping Duties on Malleable Cast Iron Tube or Pipe Fittings from Brazil* Panel Report, WT/DS219/R, adopted 18 August 2003, as modified by the Appellate Body Report, WT/DS219/AB/R, DSR 2003:VI and DSR:VIII
Egypt – Steel Rebar	*Egypt – Definitive Anti-Dumping Measures on Steel Rebar from Turkey* Panel Report, WT/DS211/R, adopted 1 October 2002, DSR 2002:VII
Guatemala – Cement I	*Guatemala – Anti-Dumping Investigation Regarding Portland Cement from Mexico* Panel Report, WT/DS60/R, adopted 25 November 1998, as modified by the Appellate Body Report, WT/DS60/AB/R, DSR 1998:IX
Guatemala – Cement II	*Guatemala – Definitive Anti-Dumping Measures on Grey Portland Cement from Mexico* Panel Report, WT/DS156/R, adopted 17 November 2000, DSR 2000:XI
India – Autos	*India – Measures Affecting Trade and Investment in the Motor Vehicle Sector* Panel Report, WT/DS146/R and Corr.1, WT/DS175/R and Corr.1, adopted 5 April 2002, Appellate Body Report, WT/DS146/AB/R, WT/DS175/AB/R, DSR 2002:V
India – Patents (EC)	*India – Patent Protection for Pharmaceutical and Agricultural Chemical Products – Complaint by the European Communities* Panel Report, WT/DS79/R, adopted 22 September 1998, DSR 1998:VI

India – Patents (US)	*India – Patent Protection for Pharmaceutical and Agricultural Chemical Products – Complaint by the United States* Panel Report, WT/DS50/R, adopted 16 January 1998, as modified by the Appellate Body Report, WT/DS50/AB/R, DSR 1998:I
India – Quantitative Restrictions	*India – Quantitative Restrictions on Imports of Agricultural, Textile and Industrial Products* Panel Report, WT/DS90/R, adopted 22 September 1999, as upheld by the Appellate Body Report, WT/DS90/AB/R, DSR 1999:V
Indonesia – Autos	*Indonesia – Certain Measures Affecting the Automobile Industry* Panel Report, WT/DS54/R and Corr. 1, 2, 3, 4, WT/DS55/R and Corr. 1, 2, 3, 4, WT/DS59/R and Corr. 1, 2, 3, 4, WT/DS64/R and Corr. 1, 2, 3, 4, adopted 23 July 1998, DSR 1998:VI
Indonesia – Autos (Article 21.3)	*Indonesia – Certain Measures Affecting the Automobile Industry – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS54/15, WT/DS55/14, WT/DS59/13, WT/DS64/12, 7 December 1998, DSR 1998:IX
Japan – Agricultural Products II	*Japan – Measures Affecting Agricultural Products* Panel Report, WT/DS76/R, adopted 19 March 1999, as modified by the Appellate Body Report, WT/DS76/AB/R, DSR 1999:I
Japan – Alcoholic Beverages II	*Japan – Taxes on Alcoholic Beverages* Panel Report, WT/DS8/R, WT/DS10/R, WT/DS11/R, adopted 1 November 1996, as modified by the Appellate Body Report, WT/DS8/AB/R, WT/DS10/AB/R, WT/DS11/AB/R, DSR 1996:I
Japan – Alcoholic Beverages II (Article 21.3)	*Japan – Taxes on Alcoholic Beverages – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS8/15, WT/DS10/15, WT/DS11/13, 14 February 1997, DSR 1997:I
Japan – Apples	*Japan – Measures Affecting the Importation of Apples* Panel Report, WT/DS245/R, adopted 10 December 2003, as upheld by the Appellate Body Report, WT/DS245/AB/R, DSR 2003:IX
Japan – Film	*Japan – Measures Affecting Consumer Photographic Film and Paper* Panel Report, WT/DS44/R, adopted 22 April 1998, DSR 1998:IV
Korea – Alcoholic Beverages	*Korea – Taxes on Alcoholic Beverages* Panel Report, WT/DS75/R, WT/DS84/R, adopted 17 February 1999, as modified by the Appellate Body Report, WT/DS75/AB/R, WT/DS84/AB/R, DSR 1999:I
Korea – Alcoholic Beverages (Article 21.3)	*Korea – Taxes on Alcoholic Beverages– Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS75/16, WT/DS84/14, 4 June 1999, DSR 1999:II
Korea – Dairy	*Korea – Definitive Safeguard Measure on Imports of Certain Dairy Products* Panel Report, WT/DS98/R and Corr.1, adopted 12 January 2000, as modified by the Appellate Body Report, WT/DS98/AB/R, DSR 2000:I
Korea – Procurement	*Korea – Measures Affecting Government Procurement* Panel Report, WT/DS163/R, adopted 19 June 2000, DSR 2000:VIII
Korea – Various Measures on Beef	*Korea – Measures Affecting Imports of Fresh, Chilled and Frozen Beef* Panel Report, WT/DS161/R, WT/DS169/R, adopted 10 January 2001, as modified by the Appellate Body Report, WT/DS161/AB/R, WT/DS169/AB/R, DSR 2001:I
Mexico – Corn Syrup	*Mexico – Anti-Dumping Investigation of High Fructose Corn Syrup (HFCS) from the United States* Panel Report, WT/DS132/R and Corr.1, adopted 24 February 2000, DSR 2000:III
Mexico – Corn Syrup (Article 21.5 – US)	*Mexico – Anti-Dumping Investigation of High Fructose Corn Syrup (HFCS) from the United States – Recourse to Article 21.5 of the DSU by the United States* Panel Report, WT/DS132/RW, adopted 21 November 2001, as upheld by the Appellate Body Report, WT/DS132/AB/RW, DSR 2001:XIII
Mexico – Telecoms	*Mexico – Measures Affecting Telecommunications Services* Panel Report, WT/DS204/R, adopted 1 June 2004, DSR 2004:IV
Thailand – H-Beams	*Thailand – Anti-Dumping Duties on Angles, Shapes and Sections of Iron or Non-Alloy Steel and H-Beams from Poland* Panel Report, WT/DS122/R, adopted 5 April 2001, as modified by the Appellate Body Report, WT/DS122/AB/R, DSR 2001:VII
Turkey – Textiles	*Turkey – Restrictions on Imports of Textile and Clothing Products* Panel Report, WT/DS34/R, adopted 19 November 1999, as modified by the Appellate Body Report, WT/DS34/AB/R, DSR 1999:VI
US – 1916 Act (EC)	*United States – Anti-Dumping Act of 1916 – Complaint by the European Communities* Panel Report, WT/DS136/R and Corr.1, adopted 26 September 2000, as upheld by the Appellate Body Report, WT/DS136/AB/R, WT/DS162/AB/R, DSR 2000:X

US – 1916 Act (Japan)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan* Panel Report, WT/DS162/R and Add.1, adopted 26 September 2000, as upheld by the Appellate Body Report, WT/DS136/AB/R, WT/DS162/AB/R, DSR 2000:X
US – 1916 Act (Article 21.3)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS136/11, WT/DS162/14, 28 February 2001, DSR 2001:V
US – 1916 Act (Article 22.6 – US)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan – Recourse to Arbitration by the United States under Article 22.6) of the DSU* Decision by the Arbitrators, WT/DS136/ARB, 24 February 2004, DSR 2004:IX
US – Carbon Steel	*United States – Countervailing Duties on Certain Corrosion-Resistant Carbon Steel Flat Products from Germany* Panel Report, WT/DS213/R and Corr.1, adopted 19 December 2002, as modified by the Appellate Body Report, WT/DS213/AB/R and Corr.1, DSR 2002:IX
US – Certain EC Products	*United States – Import Measures on Certain Products from the European Communities* Panel Report, WT/DS165/R and Add.1, adopted 10 January 2001, as modified by the Appellate Body Report, WT/DS165/AB/R, DSR 2001:I and DSR 2001:II
US – Corrosion-Resistant Steel Sunset Review	*United States – Sunset Review of Anti-Dumping Duties on Corrosion-Resistant Carbon Steel Flat Products from Japan* Panel Report, WT/DS244/R, adopted 9 January 2004, modified by the Appellate Body Report, WT/DS244/AB/R, DSR 2004:I
US – Cotton Yarn	*United States – Transitional Safeguard Measure on Combed Cotton Yarn from Pakistan* Panel Report, WT/DS192/R, adopted 5 November 2001, as modified by the Appellate Body Report, WT/DS192/AB/R, DSR 2001:XII
US – Countervailing Measures on Certain EC Products	*United States – Countervailing Measures Concerning Certain Products from the European Communities* Panel Report, WT/DS212/R, adopted 8 January 2003, as modified by the Appellate Body Report, WT/DS212/AB/R, DSR 2003:I
US – DRAMS	*United States – Anti-Dumping Duty on Dynamic Random Access Memory Semiconductors (DRAMS) of One Megabit or Above from Korea* Panel Report, WT/DS99/R, adopted 19 March 1999, DSR 1999:II
US – DRAMS (Article 21.5 – Korea)	*United States – Anti-Dumping Duty on Dynamic Random Access Memory Semiconductors (DRAMS) of One Megabit or Above from Korea – Recourse to Article 21.5 of the DSU by Korea* Panel Report, WT/DS99/RW, 7 November 2000
US – Export Restraints	*United States – Measures Treating Export Restraints as Subsidies* Panel Report, WT/DS194/R and Corr.2, adopted on 23 August 2001, DSR 2001:XI

Marrakesh Agreement Establishing the World Trade Organization (WTO Agreement)

I. PREAMBLE 21
A. TEXT OF THE PREAMBLE 21
B. INTERPRETATION AND APPLICATION OF THE PREAMBLE 22
1. Legal relevance of the Preamble 22
(a) Environmental context 22
(b) Integrated WTO system 22
(c) Interpretation of Article XX(g) of the GATT 1994 22
(d) Special needs of developing countries 23
2. Relationship with other WTO Agreements 23
(a) GATT 1994 23
(i) Article XX(g) 23
(ii) Article XXIV 23
(b) SCM Agreement 24

II. ARTICLE I 24
A. TEXT OF ARTICLE I 24
B. INTERPRETATION AND APPLICATION OF ARTICLE I 24
1. Article I 24

III. ARTICLE II 24
A. TEXT OF ARTICLE II 24
B. INTERPRETATION AND APPLICATION OF ARTICLE II 24
1. Article II:2 24
(a) Single undertaking 24
2. Article II:4 25

IV. ARTICLE III 25
A. TEXT OF ARTICLE III 25
B. INTERPRETATION AND APPLICATION OF ARTICLE III 25
1. Article III:1 25
(a) "implementation, administration and operation . . . of the Multilateral Trade Agreements" 25
2. Article III:2 25
(a) "forum for negotiations among its Members" 25
(i) 1996 Singapore Ministerial Conference 25
(ii) 1998 Geneva Ministerial Conference 26
(iii) Doha Ministerial Conference 26
3. Article III:3 26
(a) "Shall administer the Understanding on Rules and Procedures Governing the Settlement of Disputes" 26
4. Article III:4 27
(a) "Shall administer the Trade Policy Review Mechanism" 27
5. Article III:5 27
(a) "The WTO shall cooperate . . . with the IMF and . . . World Bank" 27
(i) General 27
(ii) Observer status 27
(iii) Cooperation agreements do not modify, add to or diminish rights and obligations of Members 27
(iv) No requirement for WTO panels to consult with IMF 28
(b) "with a view to achieving greater coherence in global economic policy-making" 28
(i) General 28
(ii) Annual reports 28

V. ARTICLE IV 28
A. TEXT OF ARTICLE IV 28
B. INTERPRETATION AND APPLICATION OF ARTICLE IV 29
1. Article IV:1 30
(a) "there shall be a Ministerial Conference . . . which shall meet at least once every two years" 30
(i) 1996 Singapore Ministerial Conference 30
(ii) 1998 Geneva Ministerial Conference 30
(iii) 1999 Seattle Ministerial Conference 30
(iv) 2001 Doha Ministerial Conference 30
(v) 2003 Cancun Ministerial Conference 30
(b) "The Ministerial Conference shall carry out the functions of the WTO" 30
(i) Competencies of the Ministerial Conference 30
(ii) Competencies under other Agreements 31
GATS 31
TRIPS 31
GATT 1994 31
(iii) Working parties 31
(c) "Ministerial Conference shall . . . take decisions on all matters under any of the Multilateral Trade Agreements" 31
(d) "in accordance with the specific requirements for decision-making in this Agreement and in the relevant Multilateral Trade Agreements" 31
(e) Rules of procedure 31
2. Article IV:2 32
(a) "there shall be a General Council" 32
(b) "The General Council shall also carry out the functions assigned to it by this Agreement" 32
(i) General 32
Circulation and derestriction of documents 32
(c) "the General Council shall establish its rules of procedure" 32
(d) "the General Council shall . . . approve the rules of procedure for the committees. . ." 32
3. Article IV:3: "the General Council shall convene . . . to discharge the responsibilities of the Dispute Settlement Body (DSB)" 32
(a) General 32
(b) "The DSB . . . shall establish such rules of procedure" 32
(c) Special Session of the Dispute Settlement Body 33

4. Article IV:4: "the General Council shall . . . discharge the responsibilities of the Trade Policy Review Body" 33
(a) Country reviews 33
(b) "the Trade Policy Review Body shall . . . establish such rules of procedure" 33
5. Article IV:5 33
(a) "Council for Trade in Goods" 33
(i) Functions 33
(ii) Rules of procedure 34
(b) "Council for Trade in Services" 34
(i) Functions 34
(ii) Rules of procedure 34
(c) "The Council for Trade-Related Aspects of Intellectual Property Rights (TRIPS)" 34
(i) Functions 34
(ii) Rules of procedure 34
(d) The Councils "shall operate under the general guidance of the General Council" 35
6. Article IV:6 35
(a) "the [Council for Trade in Goods] . . . shall establish subsidiary bodies" 35
(b) Subsidiary bodies shall establish . . . rules of procedure subject to approval of their respective Councils: 35
(c) "the [Council for Trade in Services] . . . shall establish subsidiary bodies as required" 36
(d) "the [TRIPS Council] shall establish subsidiary bodies as required" 36
7. Article IV:7: Committees established by the Ministerial Conference or General Council 36
(a) Committee on Trade and Development 36
(i) Establishment and terms of reference 36
(ii) Rules of procedure and observer status 37
(iii) Reporting 37
(iv) Activities 37
Establishment of the Sub-Committee on Least-Developed Countries 37
Work Programme for Least-Developed Countries 37
Technical cooperation 37
Favourable and more preferential treatment for developing countries 38
(v) Reference to GATT practice 39
(b) Committee on Balance-of-Payments Restrictions 39
(i) Establishment and terms of reference 39
(ii) Rules of procedure 39
(iii) Reporting 39
(iv) Activities 39
(c) Committee on Budget, Finance and Administration 39
(i) *Establishment and terms of reference* 39
(ii) Rules of procedure 40
(iii) Reporting 40
(iv) Activities 40
(d) Committee on Market Access 40
(i) Establishment and terms of reference 40
(ii) Rules of procedure 40
(iii) Reporting 40
(iv) Activities 40
(e) Committee on Trade and Environment 40
(i) Establishment and terms of reference 40
(ii) Rules of procedure 41
(iii) Reporting 41
(iv) Activities 41
(f) Committee on Regional Trade Agreements 41
(i) Establishment and terms of reference 41
(ii) Rules of procedure 41
(iii) Reporting 41
(iv) Activities 42
Procedures for the examination of RTAs 42
(g) Trade Negotiations Committee (TNC) 42
8. Article IV: 8 43
(a) Bodies provided for under Plurilateral Trade Agreements 43
(i) International Dairy Council 43
(ii) International Meat Council 43
(iii) Committee on Trade in Civil Aircraft 43
(iv) Committee on Government Procurement 43

VI. ARTICLE V 43
A. TEXT OF ARTICLE V 43
B. INTERPRETATION AND APPLICATION OF ARTICLE V 43
1. Article V:1 43
(a) "Shall make appropriate arrangements for effective cooperation with other intergovernmental organizations" 43

I. PREAMBLE

A. TEXT OF THE PREAMBLE

The *Parties* to this Agreement,

Recognizing that their relations in the field of trade and economic endeavour should be conducted with a view to raising standards of living, ensuring full employment and a large and steadily growing volume of real income and effective demand, and expanding the production of and trade in goods and services, while allowing for the optimal use of the world's resources in accordance with the objective of sustainable development, seeking both to protect and preserve the environment and to enhance the means for doing so in a manner consistent with their respective needs and concerns at different levels of economic development.

Recognizing further that there is a need for positive efforts designed to ensure that developing countries, and especially the least developed among them, secure a share in the growth of international trade commensurate with the needs of their economic development,

Being desirous of contributing to these objectives by entering into reciprocal and mutually advantageous

arrangements directed to the substantial reduction of tariffs and other barriers to trade and to the eliminations of discriminatory treatment in international trade relations,

Resolved, therefore, to develop an integrated, more viable and durable multilateral trading system encompassing the General Agreement on Tariffs and Trade, the results of past liberalization efforts, and all of the results of the Uruguay Round of Multilateral Trade Negotiations,

Determined to preserve the basic principles and to further the objectives underlying this multilateral trading system,

Agree as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. Legal relevance of the Preamble

(a) Environmental context

1. The Appellate Body on *US – Gasoline* emphasized the importance of the Preamble of the *WTO Agreement* in the context of environmental issues:

"Indeed, in the preamble to the *WTO Agreement* and in the *Decision on Trade and Environment*, there is specific acknowledgement to be found about the importance of coordinating policies on trade and the environment. WTO Members have a large measure of autonomy to determine their own policies on the environment (including its relationship with trade), their environmental objectives and the environmental legislation they enact and implement. So far as concerns the WTO, that autonomy is circumscribed only by the need to respect the requirements of the *General Agreement* and the other covered agreements."[1]

(b) Integrated WTO system

2. The Appellate Body report on *Brazil – Desiccated Coconut* invoked the Preamble in the context of the integrated WTO system that replaced the old GATT 1947:

"The authors of the new WTO regime intended to put an end to the fragmentation that had characterized the previous system. This can be seen from the preamble to the *WTO Agreement* which states, in pertinent part:

Resolved, therefore, to develop an integrated, more viable and durable multilateral trading system encompassing the General Agreement on Tariffs and Trade, the results of past trade liberalization efforts, and all of the results of the Uruguay Round of Multilateral Trade Negotiations."[2]

(c) Interpretation of Article XX(g) of the GATT 1994

3. For the purpose of interpreting the meaning of "exhaustible natural resources" in paragraph (g) of Article XX of the *GATT 1994* in *US – Shrimp*, the Appellate Body referred to the Preamble:

"The words of Article XX(g), 'exhaustible natural resources', were actually crafted more than 50 years ago. They must be read by a treaty interpreter in the light of contemporary concerns of the community of nations about the protection and conservation of the environment. While Article XX was not modified in the Uruguay Round, the preamble attached to the WTO Agreement shows that the signatories to that Agreement were, in 1994, fully aware of the importance and legitimacy of environmental protection as a goal of national and international policy. The preamble of the WTO Agreement – which informs not only the GATT 1994, but also the other covered agreements – explicitly acknowledges 'the objective of *sustainable development*':

'The Parties to this Agreement,

Recognizing that their relations in the field of trade and economic endeavour should be conducted with a view to raising standards of living, ensuring full employment and a large and steadily growing volume of real income and effective demand, and expanding the production of and trade in goods and services, while allowing for the optimal use of the world's resources in accordance with the objective of sustainable development, seeking both to protect and preserve the environment and to enhance the means for doing so in a manner consistent with their respective needs and concerns at different levels of economic development, ...' (emphasis added)

From the perspective embodied in the preamble of the WTO Agreement, we note that the generic term 'natural resources' in Article XX(g) is not 'static' in its content or reference but is rather 'by definition, evolutionary'. . . .

Given the recent acknowledgement by the international community of the importance of concerted bilateral or multilateral action to protect living natural resources, and recalling the explicit recognition by WTO Members of the objective of sustainable development in the preamble of the WTO Agreement, we believe it is too late in the day to suppose that Article XX(g) of the GATT 1994 may be read as referring only to the conservation of exhaustible mineral or other non-living natural resources."[3]

4. On this topic, the Appellate Body on *US – Shrimp* further stated:

"At the end of the Uruguay Round, negotiators fashioned an appropriate preamble for the new WTO Agreement, which strengthened the multilateral trading system by establishing an international organization, inter alia, to facilitate the implementation, administra-

[3] Appellate Body Report on *US – Shrimp*, paras. 129–131.

tion and operation, and to further the objectives, of that Agreement and the other agreements resulting from that Round. In recognition of the importance of continuity with the previous GATT system, negotiators used the preamble of the GATT 1947 as the template for the preamble of the new WTO Agreement. Those negotiators evidently believed, however, that the objective of 'full use of the resources of the world' set forth in the preamble of the GATT 1947 was no longer appropriate to the world trading system of the 1990's. As a result, they decided to qualify the original objectives of the GATT 1947 with the following words:

> . . . while allowing for the optimal use of the world's resources in accordance with the objective of sustainable development, seeking both to protect and preserve the environment and to enhance the means for doing so in a manner consistent with their respective needs and concerns at different levels of economic development, . . .'

We note once more that this language demonstrates a recognition by WTO negotiators that optimal use of the world's resources should be made in accordance with the objective of sustainable development. As this preambular language reflects the intentions of negotiators of the WTO Agreement, we believe it must add colour, texture and shading to our interpretation of the agreements annexed to the WTO Agreement, in this case, the GATT 1994. We have already observed that Article XX(g) of the GATT 1994 is appropriately read with the perspective embodied in the above preamble . . .'.

It is proper for us to take into account, as part of the context of the chapeau, the specific language of the preamble to the WTO Agreement, which, we have said, gives colour, texture and shading to the rights and obligations of Members under the *WTO Agreement*, generally, and under the GATT 1994, in particular."[4]

(d) Special needs of developing countries

5. The Panel on *India – Quantitative Restrictions* invoked the Preamble in the context of recognising the need to address the concerns of developing countries:

> "At the outset, we recall that the Preamble to the WTO Agreement recognizes both (i) the desirability of expanding international trade in goods and services and (ii) the need for positive efforts designed to ensure that developing countries secure a share in international trade commensurate with the needs of their economic development. In implementing these goals, WTO rules promote trade liberalization, but recognize the need for specific exceptions from the general rules to address special concerns, including those of developing countries."[5]

6. The Panel on *Brazil – Aircraft (Article 21.5 – Canada)* referred to the Preamble in reference to Article 27 of the *SCM Agreement* and the interests of developing countries:

> "The preamble to the WTO Agreement recognises
>
> > 'that there is need for positive efforts designed to ensure that developing countries, and especially the least-developed among them, secure a share in the growth in international trade commensurate with the needs of their economic development.'
>
> This overarching concern of the WTO Agreement finds ample reflection in the *SCM Agreement*. Article 27 of that Agreement recognizes that 'subsidies may play an important role in economic development programmes of developing country Members' and provides substantial special and differential treatment for developing countries, including in respect of export subsidies."[6]

2. Relationship with other WTO Agreements

(a) GATT 1994

(i) Article XX(g)

7. See paragraphs 3–4 above.

(ii) Article XXIV

8. The Panel on *Turkey – Textiles* also referred to the Preamble in the context of the discussion regarding GATT Article XXIV stating that it does not constitute a shield from other GATT/WTO prohibitions or the introduction of measures considered to be *ipso facto* incompatible with GATT/WTO:

> "At the conclusion of the Uruguay Round Members reiterated the same general objective and principles in the GATT 1994 Understanding on Article XXIV:
>
> > '*Reaffirming* that the purpose of such agreements should be to facilitate trade between the constituent territories and not to raise barriers to the trade of other Members with such territories; and that in their formation or enlargement the parties to them should to the greatest possible extent avoid creating adverse effects on the trade of other Members;'
>
> and in the Preamble to the WTO Agreement:
>
> > 'Being desirous of contributing to these objectives by entering into reciprocal and mutually advantageous arrangements directed to the substantial reduction of tariffs and other barriers to trade and to the elimination of *discriminatory treatment* in international commerce . . .' (emphasis added)
>
> We also recall the Singapore Ministerial Declaration:
>
> > '7. . . . We reaffirm the primacy of the multilateral trading system, which includes a framework for the development of regional trade agreements, and we renew our commitment to ensure that regional trade

[4] Appellate Body Report on *US – Shrimp*, paras. 152, 153 and 155.
[5] Panel Report on *India – Quantitative Restrictions*, para. 7.2.
[6] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 6.47, fn 49.

agreements are complementary to it and consistent with its rules'

From the above cited provisions, we draw two general conclusions for the present case. Firstly, the objectives of regional trade agreements and those of the GATT and the WTO have always been complementary, and therefore should be interpreted consistently with one another, with a view to increasing trade and not to raising barriers to trade, thereby arguing against an interpretation that would allow, on the occasion of the formation of a customs union, for the introduction of quantitative restrictions. Secondly, we read in these parallel objectives a recognition that the provisions of Article XXIV (together with those of the GATT 1994 Understanding on Article XXIV) do not constitute a shield from other GATT/WTO prohibitions, or a justification for the introduction of measures which are considered generally to be ipso facto incompatible with GATT/WTO. In our view the provisions of Article XXIV on regional trade agreements cannot be considered to exempt constituent members of a customs union from the primacy of the WTO rules."[7]

(b) SCM Agreement

9. See paragraph 6 above.

II. ARTICLE I

A. TEXT OF ARTICLE I

Article I
Establishment of the Organization

The World Trade Organization (hereinafter referred to as "the WTO") is hereby established.

B. INTERPRETATION AND APPLICATION OF ARTICLE I

1. Article I

10. The World Trade Organization (WTO) was established at the conclusion of the Uruguay Round of multilateral trade negotiations. The name "World Trade Organization" was established at the meeting of the Trade Negotiating Committee on 15 December 1993.[8]

11. The World Trade Organization and the World Tourism Organization reached an agreement in order to avoid confusion with respect to the use of the acronym "WTO". According to this agreement, the World Trade Organization will use a distinct logo and will avoid using the acronym in the context of tourism services. The agreement further provides for cooperation between the Secretariats of the two organizations on practical issues arising in this context.[9]

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Scope of the WTO

1. The WTO shall provide the common institutional framework for the conduct of trade relations among its Members in matters related to the agreements and associated legal instruments included in the Annexes to this Agreement.

2. The agreements and associated legal instruments included in Annexes 1, 2 and 3 (hereinafter referred to as "Multilateral Trade Agreements") are integral parts of this Agreement, binding on all Members.

3. The agreements and associated legal instruments included in Annex 4 (hereinafter referred to as "Plurilateral Trade Agreements") are also part of this Agreement for those Members that have accepted them, and are binding on those Members. The Plurilateral Trade Agreements do not create either obligations or rights for Members that have not accepted them.

4. The General Agreement on Tariffs and Trade 1994 as specified in Annex 1A (hereinafter referred to as "GATT 1994") is legally distinct from the General Agreement on Tariffs and Trade, dated 30 October 1947, annexed to the Final Act Adopted at the Conclusion of the Second Session of the Preparatory Committee of the United Nations Conference on Trade and Employment, as subsequently rectified, amended or modified (hereinafter referred to as "GATT 1947").

B. INTERPRETATION AND APPLICATION OF ARTICLE II

1. Article II:2

(a) Single undertaking

12. In *Brazil – Desiccated Coconut*, the Appellate Body referred to Articles II:2 and II:4 and Annex 1A of the *WTO Agreement*, as well as the *DSU* to illustrate the "single undertaking" nature of the *WTO Agreement*[10]: "[t]he single undertaking is further reflected in the provisions of the *WTO Agreement* dealing with original membership, accession, non-application of the Multilateral Trade Agreements between particular Members, acceptance of the *WTO Agreement*, and withdrawal from it.[11] Within this framework, all WTO Members are bound by all the rights and obligations in the *WTO Agreement* and its Annexes 1, 2 and 3."[12]

[7] Panel Report on *Turkey – Textiles*, paras. 9.161–9.163.
[8] GATT doc. MTN.TNC/40.
[9] GATT doc. MTN.TNC/W/146, p. 4.
[10] Appellate Body Report on *Brazil – Desiccated Coconut*, pp. 12–13.
[11] (*footnote original*) *WTO Agreement*, Articles XI, XII, XIII, XIV and XV, respectively.
[12] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 12.

13. In *Argentina – Footwear (EC)*, the Appellate Body also referred to Articles II:2 and II:4 of the *WTO Agreement* as a basis for the following finding:

> "The GATT 1994 and the *Agreement on Safeguards* are both Multilateral Agreements on Trade in Goods contained in Annex 1A of the *WTO Agreement*, and, as such, are both 'integral parts' of the same treaty, the *WTO Agreement*, that are 'binding on all Members'.[13] Therefore, the provisions of Article XIX of the GATT 1994 *and* the provisions of the *Agreement on Safeguards* are *all* provisions of one treaty, the *WTO Agreement*. They entered into force as part of that treaty at the same time. They apply equally and are equally binding on all WTO Members. And, as these provisions relate to the same thing, namely the application by Members of safeguard measures, the Panel was correct in saying that 'Article XIX of GATT and the Safeguards Agreement must *a fortiori* be read as representing an *inseparable package* of rights and disciplines which have to be considered in conjunction.' Yet a treaty interpreter must read all applicable provisions of a treaty in a way that gives meaning to all of them, harmoniously.[14] And, an appropriate reading of this 'inseparable package of rights and disciplines' must, accordingly, be one that gives meaning to *all* the relevant provisions of these two equally binding agreements."[15]

2. Article II:4

14. The Appellate Body on *Brazil – Desiccated* Coconut, see paragraph 2 above, and *Argentina – Footwear (EC)*, see paragraph 13 above, referred to this Article in their rulings.

IV. ARTICLE III

A. TEXT OF ARTICLE III

Article III
Functions of the WTO

1. The WTO shall facilitate the implementation, administration and operation, and further the objectives, of this Agreement and of the Multilateral Trade Agreements, and shall also provide the framework for the implementation, administration and operation of the Plurilateral Trade Agreements.

2. The WTO shall provide the forum for negotiations among its Members concerning their multilateral trade relations in matters dealt with under the agreements in the Annexes to this Agreement. The WTO may also provide a forum for further negotiations among its Members concerning their multilateral trade relations, and a framework for the implementation of the results of such negotiations, as may be decided by the Ministerial Conference.

3. The WTO shall administer the Understanding on Rules and Procedures Governing the Settlement of Disputes (hereinafter referred to as the "Dispute Settlement Understanding" or "*DSU*") in Annex 2 to this Agreement.

4. The WTO shall administer the Trade Policy Review Mechanism (hereinafter referred to as the "TPRM") provided for in Annex 3 to this Agreement.

5. With a view to achieving greater coherence in global economic policy-making, the WTO shall cooperate, as appropriate, with the International Monetary Fund and with the International Bank for Reconstruction and Development and its affiliated agencies.

B. INTERPRETATION AND APPLICATION OF ARTICLE III

1. Article III:1

(a) "implementation, administration and operation . . . of the Multilateral Trade Agreements"

15. As regards facilitating the implementation, administration and operation of the Multilateral Trade Agreements, see the relevant Chapters on the relevant WTO agreements.

2. Article III:2

(a) "forum for negotiations among its Members"

(i) 1996 Singapore Ministerial Conference

16. At the 1996 Singapore Ministerial Conference (see Section V.B.1 below), Ministers adopted the recommendations below as part of their declaration:

> "We, the Ministers, have met in Singapore . . . as called for in Article IV of the Agreement Establishing the World Trade Organization, to further strengthen the WTO as a forum for negotiation, the continuing liberalization of trade within a rule-based system, and the multilateral review and assessment of trade policies, and in particular to:
>
> - assess the implementation of our commitments under the *WTO Agreements* and decisions;
> - review the ongoing negotiations and Work Programme;
> - examine developments in world trade; and
> - address the challenges of an evolving world economy.
>
> . . . Bearing in mind that an important aspect of WTO activities is a continuous overseeing of the implementation of various agreements, a periodic examination and updating of the WTO Work Programme is a key to enable the WTO to fulfil its objectives. In this context, we endorse the reports of the various WTO bodies. A major share of the Work Programme stems from the *WTO*

[13] (*footnote original*) WTO Agreement, Article II:2.
[14] (*footnote original*) We have recently confirmed this principle in our Report in *Korea – Dairy*, para. 81. See also Appellate Body Reports on *US – Gasoline*, p. 23; *Japan – Alcoholic Beverages II*, p. 12; and *India – Patents (US)*, fn. 25.
[15] Appellate Body Report on *Argentina – Footwear (EC)*, para. 81.

Agreement and decisions adopted at Marrakesh. As part of these Agreements and decisions we agreed to a number of provisions calling for future negotiations on Agriculture, Services and aspects of TRIPS, or reviews and other work on Anti-Dumping, Customs Valuation, Dispute Settlement Understanding, Import Licensing, Preshipment Inspection, Rules of Origin, Sanitary and Phyto-Sanitary Measures, Safeguards, Subsidies and Countervailing Measures, Technical Barriers to Trade, Textiles and Clothing, Trade Policy Review Mechanism, Trade-Related Aspects of Intellectual Property Rights and Trade-Related Investment Measures. We agree to a process of analysis and exchange of information, where provided for in the conclusions and recommendations of the relevant WTO bodies, on the Built-in Agenda issues, to allow Members to better understand the issues involved and identify their interests before undertaking the agreed negotiations and reviews. We agree that:

- the time frames established in the Agreements will be respected in each case;
- the work undertaken shall not prejudge the scope of future negotiations where such negotiations are called for; and
- the work undertaken shall not prejudice the nature of the activity agreed upon (i.e. negotiation or review)".[16]

(ii) 1998 Geneva Ministerial Conference

17. At the 1998 Geneva Ministerial Conference (see Section V.B.1 below), Ministers adopted several recommendations to put before the General Council as a part of their declaration:

"We recall that the Marrakesh Agreement Establishing the World Trade Organization states that the WTO shall provide the forum for negotiations among its Members concerning their multilateral trade relations in matters dealt with under the agreements in the Annexes to the Agreement, and that it may also provide a forum for further negotiations among its Members concerning their multilateral trade relations, and a framework for the implementation of the results of such negotiations, as may be decided by the Ministerial Conference. In the light of paragraphs 1–8 above, we decide that a process will be established under the direction of the General Council to ensure full and faithful implementation of existing agreements, and to prepare for the Third Session of the Ministerial Conference. This process shall enable the General Council to submit recommendations regarding the WTO's work programme, including further liberalization sufficiently broad-based to respond to the range of interests and concerns of all Members, within the WTO framework, that will enable us to take decisions at the Third Session of the Ministerial Conference. In this regard, the General Council will meet in special session in September 1998 and periodically thereafter to ensure full and timely completion of its work, fully respecting the principle of decision-making by consensus. The General Council's work programme shall encompass the following:

(a) recommendations concerning:

  (i) the issues, including those brought forward by Members, relating to implementation of existing agreements and decisions;

  (ii) the negotiations already mandated at Marrakesh, to ensure that such negotiations begin on schedule;

  (iii) future work already provided for under other existing agreements and decisions taken at Marrakesh;

(b) recommendations concerning other possible future work on the basis of the work programme initiated at Singapore;

(c) recommendations on the follow-up to the High-Level Meeting on Least-Developed Countries;

(d) recommendations arising from consideration of other matters proposed and agreed to by Members concerning their multilateral trade relations.

The General Council will also submit to the Third Session of the Ministerial Conference, on the basis of consensus, recommendations for decision concerning the further organization and management of the work programme arising from the above, including the scope, structure and time-frames, that will ensure that the work programme is begun and concluded expeditiously.

The above work programme shall be aimed at achieving overall balance of interests of all Members."[17]

(iii) Doha Ministerial Conference

18. At the Doha Ministerial Conference (see Section V.B.1 below), Members adopted a decision to launch a new round of negotiations, known as the "Doha Round".[18] As regards the declarations and decisions adopted at the Doha Ministerial Conference, see paragraph 38 below and Section XXVII below. The Doha Declaration provided general guidelines for the organization of the new Round.

19. On 1 August 2004, the General Council adopted a decision known as the "July Package", which, *inter alia*, amended the scope of the Doha negotiations. The text of the July Package can be found in Section XXVIII below.

3. Article III:3

(a) "Shall administer the Understanding on Rules and Procedures Governing the Settlement of Disputes"

20. As regards the administration of the *DSU*, see Article 2 of the Chapter on the *DSU*. In addition, see the

[16] WT/MIN(96)/DEC paras. 1 and 19.
[17] WT/MIN(98)/DEC/1, paras. 9–11.
[18] WT/MIN(01)/DEC/1

activities of the Special Session of the Dispute Settlement Body in Section XI.B.2 below.[19]

4. Article III:4

(a) "Shall administer the Trade Policy Review Mechanism"

21. Regarding the administration of the *TPRM*, see Section III (paragraph C) of the Chapter on the *TPRM*.

5. Article III:5

(a) "The WTO shall cooperate . . . with the IMF and . . . World Bank"

(i) General

22. At its meeting of 7, 8 and 13 November 1996, the General Council adopted the decision approving agreements with the IMF and the World Bank.[20]

23. The agreement between the WTO and the IMF was signed on 9 December 1996.[21]

24. The agreement between the WTO and the World Bank was signed on 28 April 1997.[22]

(ii) Observer status

25. The IMF and the World Bank have observer status in the WTO as provided for in their respective agreements with the WTO. See also paragraphs 135–137 below.

(iii) Cooperation agreements do not modify, add to or diminish rights and obligations of Members

26. In *Argentina – Textiles and Apparel*, the Appellate Body upheld the Panel's finding "that there is nothing in the Agreement Between the IMF and the WTO, the Declaration on the Relationship of the WTO with the IMF or the Declaration on Coherence which justifies a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the GATT 1994."[23] The Appellate Body explained:

> "The 1994 Declaration on Coherence is a Ministerial decision that articulates the objective of promoting increased cooperation between the WTO and the IMF in order to encourage greater coherence in global economic policy-making. This objective is more explicitly recognized in the treaty language of the *WTO Agreement* in Article III:5, which states:
>
> > 'With a view to achieving greater coherence in global economic policy-making, *the WTO shall cooperate, as appropriate*, with the International Monetary Fund and with the International Bank for Reconstruction and Development and its affiliated agencies.' (emphasis added)
>
> In furtherance of the WTO's mandate to 'cooperate, as appropriate' with the IMF, the *Agreement Between the IMF and the WTO* was concluded in 1996.[24] This Agreement provides for specific means of administrative cooperation between the two organizations. It provides for consultations and the exchange of information between the WTO Secretariat and the staff of the IMF in certain specified circumstances, and grants to each organization observer status in certain of the other's meetings.[25]
>
> The *Agreement Between the IMF and the WTO*, however, does *not* modify, add to or diminish the rights and obligations of Members under the *WTO Agreement*, nor does it modify individual States' commitments to the IMF. It does not provide any substantive rules concerning the resolution of possible conflicts between obligations of a Member under the *WTO Agreement* and obligations under the Articles of Agreement of the IMF or any agreement with the IMF. However, paragraph 10 of the *Agreement Between the IMF and the WTO* contains a direction to the staff of the IMF and the WTO Secretariat to *consult* on 'issues of *possible inconsistency* between *measures under discussion*'.
>
> In the 1994 Declaration on the Relationship of the WTO with the IMF, Ministers reaffirmed that, unless otherwise provided for in the Final Act Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations, 'the relationship of the WTO with the International Monetary Fund, with regard to the areas covered by the Multilateral Trade Agreements in Annex 1A of the *WTO Agreement*, will be based on the provisions that have governed the relationship of the CONTRACTING PARTIES to the GATT 1947 with the International Monetary Fund.' We note that certain provisions of the GATT 1994, such as Articles XII, XIV, XV and XVIII, permit a WTO Member, in certain specified circumstances relating to exchange matters and/or balance of payments, to be excused from certain of its obligations under the GATT 1994. However, Article VIII contains no such exception or permission."[26]

---

[19] See WT/MIN(01)/DEC/1, para. 30; and para. 57 of this Chapter.

[20] WT/GC/M/16, section 7. The text of the decision to approve these Agreements is in WT/L/194. The WTO Director-General issued a report on the implementation of the cooperation agreements with the IMF and the World Bank on 13 November 1997. The text of the report is in WT/GC/W/68.

[21] The text of the Agreement with the International Monetary Fund is in Annex I to WT/L/195.

[22] The text of the Agreement with the World Bank is in Annex II to WT/L/195

[23] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

[24] (*footnote original*) Done at Singapore, 9 December 1996.

[25] (*footnote original*) Excluding the DSB and dispute settlement panels, except where "matters of jurisdictional relevance to the Fund are to be considered". The WTO may invite a member of the staff of the Fund to attend a meeting of DSB "when the WTO, after consultation between the WTO Secretariat and the staff of the Fund, finds that such a presence would be of particular common interest to both organizations." *Agreement Between the IMF and the WTO*, para. 6.

[26] Appellate Body Report on *Argentina – Textiles and Apparel*, paras. 70–73.

(iv) No requirement for WTO panels to consult with IMF

27. In *Argentina – Textiles and Apparel*, rejecting the claim that the Panel did not make "an objective assessment of the matter" as required under Article 11 of the *DSU*, by not acceding to the parties' request to seek information from the IMF so as to obtain its opinion on certain issues, the Appellate Body stated that "[a]s in the *WTO Agreement*, there are no provisions in the *Agreement Between the IMF and the WTO* that *require* a panel to consult with the IMF in a case such as this."[27] On this issue, see the Chapter on the *DSU*, Section XXIII.B.2.

28. The Declaration on the Relationship of the WTO with the IMF is annexed to the *WTO Agreement*, see Section XX below.

(b) "with a view to achieving greater coherence in global economic policy-making"

(i) General

29. The Managing Director of the IMF, the President of the World Bank and the Director-General of the WTO jointly issued a report on Coherence[28] on 21 October 1998, pursuant to paragraph 5 of the Geneva Ministerial Declaration.

30. The General Council authorized the Chairman to hold special informal meetings regarding coherence issues, on 15 and 16 February 1999, pursuant to the request of either the delegations or the Director-General.[29] The General Council held additional meetings on 13 May 2003[30] and 22 October 2004[31] and discussed issues on coherence.

31. For the text of the Declaration on the Contribution of the WTO to Achieving Greater Coherence in Global Economic Policymaking, see Section XIX below.

(ii) Annual reports

32. Pursuant to paragraph 2 of the Declaration of the General Council on "Agreements between the WTO, the IMF and the World Bank", the Director-General issues an annual report to Members on the activities carried out by the WTO under its cooperation agreements with these aforementioned institutions.[32]

V. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV
Structure of the WTO

1. There shall be a Ministerial Conference composed of representatives of all the Members, which shall meet at least once every two years. The Ministerial Conference shall carry out the functions of the WTO and take actions necessary to this effect. The Ministerial Conference shall have the authority to take decisions on all matters under any of the Multilateral Trade Agreements, if so requested by a Member, in accordance with the specific requirements for decision-making in this Agreement and in the relevant Multilateral Trade Agreement.

2. There shall be a General Council composed of representatives of all the Members, which shall meet as appropriate. In the intervals between meetings of the Ministerial Conference, its functions shall be conducted by the General Council. The General Council shall also carry out the functions assigned to it by this Agreement. The General Council shall establish its rules of procedure and approve the rules of procedure for the Committees provided for in paragraph 7.

3. The General Council shall convene as appropriate to discharge the responsibilities of the Dispute Settlement Body provided for in the Dispute Settlement Understanding. The Dispute Settlement Body may have its own chairman and shall establish such rules of procedure as it deems necessary for the fulfilment of those responsibilities.

4. The General Council shall convene as appropriate to discharge the responsibilities of the Trade Policy Review Body provided for in the TPRM. The Trade Policy Review Body may have its own chairman and shall establish such rules of procedure as it deems necessary for the fulfilment of those responsibilities.

5. There shall be a Council for Trade in Goods, a Council for Trade in Services and a Council for Trade-Related Aspects of Intellectual Property Rights (hereinafter referred to as the "Council for TRIPS"), which shall operate under the general guidance of the General Council. The Council for Trade in Goods shall oversee the functioning of the Multilateral Trade Agreements in Annex 1A. The Council for Trade in Services shall oversee the functioning of the General Agreement on Trade in Services (hereinafter referred to as "GATS"). The Council for TRIPS shall oversee the functioning of the Agreement on Trade-Related Aspects of Intellectual Property Rights (hereinafter referred to as the "Agreement on TRIPS"). These Councils shall carry out the functions assigned to them by their respective agreements and by the General Council. They shall establish their respective rules of procedure subject to the approval of the General Council. Membership in these Councils shall be open to representatives of all Members. These Councils shall meet as necessary to carry out their functions.

6. The Council for Trade in Goods, the Council for Trade in Services and the Council for TRIPS shall establish

[27] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 85.
[28] The text of the report can be found in WT/GC/13.
[29] WT/GC/M/35, section 3.

[31] WT/GC/M/89.
[32] WT/TF/COH/S/3–6, 8 and 10.

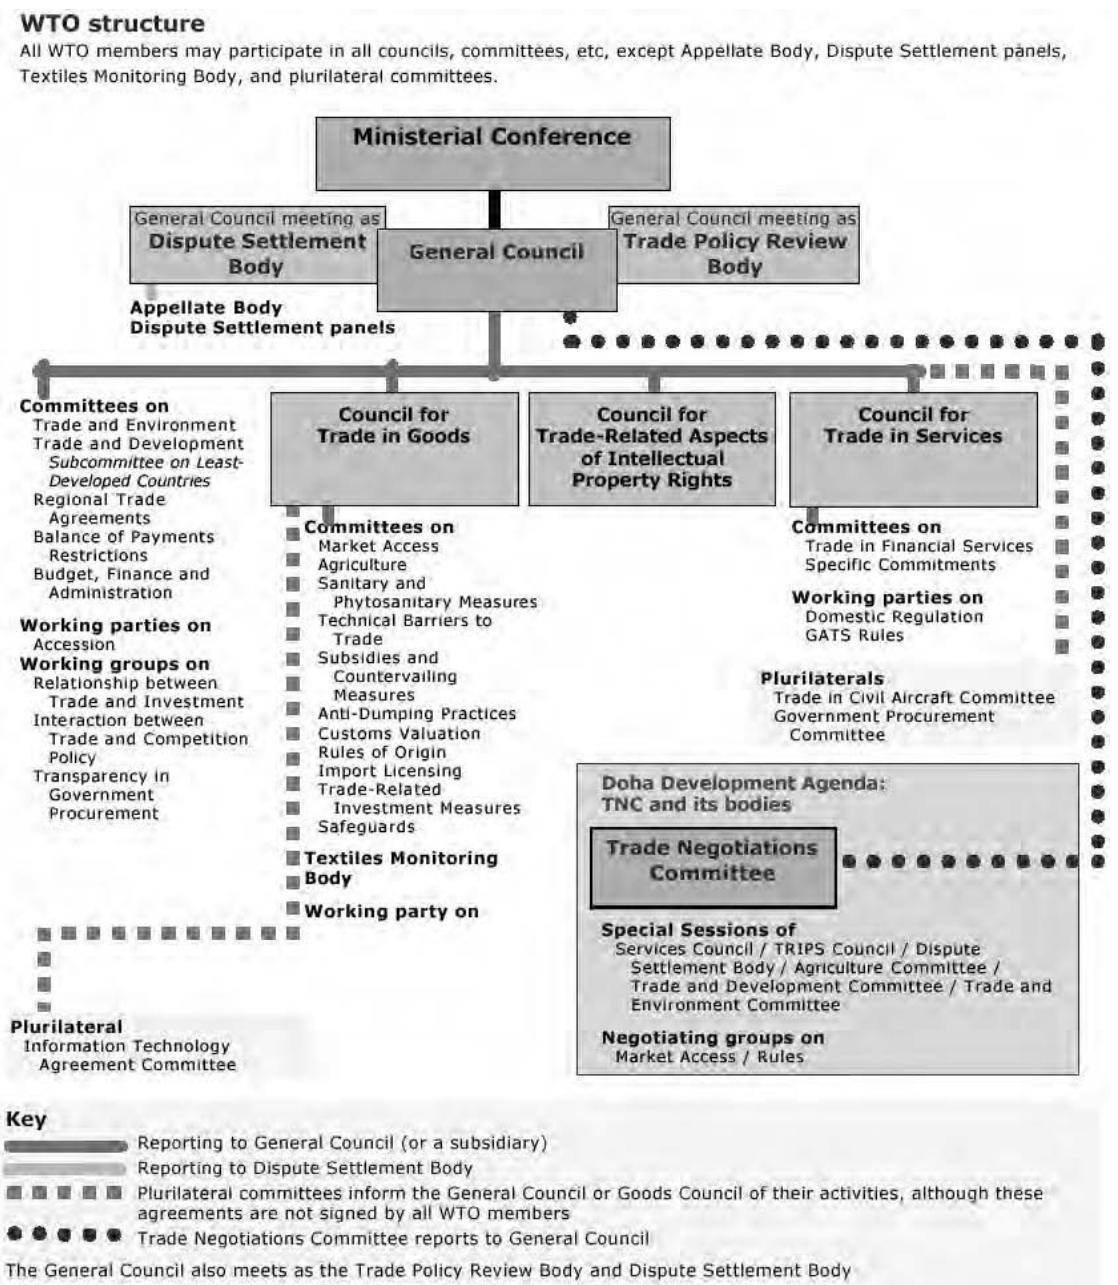
subsidiary bodies as required. These subsidiary bodies shall establish their respective rules of procedure subject to the approval of their respective Councils.

7. The Ministerial Conference shall establish a Committee on Trade and Development, a Committee on Balance-of-Payments Restrictions and a Committee on Budget, Finance and Administration, which shall carry out the functions assigned to them by this Agreement and by the Multilateral Trade Agreements, and any additional functions assigned to them by the General Council, and may establish such additional Committees with such functions as it may deem appropriate. As part of its functions, the Committee on Trade and Development shall periodically review the special provisions in the Multilateral Trade Agreements in favour of the least-developed country Members and report to the General Council for appropriate action. Membership in these Committees shall be open to representatives of all Members.

8. The bodies provided for under the Plurilateral Trade Agreements shall carry out the functions assigned to them under those Agreements and shall operate within the institutional framework of the WTO. These bodies shall keep the General Council informed of their activities on a regular basis.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

33. For an overview of the WTO structure see the flowchart below.



1. Article IV:1

(a) "there shall be a Ministerial Conference . . . which shall meet at least once every two years"

34. Five Ministerial Conferences have been convened between the establishment of the WTO in 1995 and 31 December 2004:

(i) 1996 Singapore Ministerial Conference

35. The First WTO Ministerial Conference was held in Singapore between 9 and 13 December 1996. The *Ministerial Declaration*[33] was adopted on 13 December 1996. In addition, the Conference adopted the *Ministerial Declaration on Trade in Information Technology Products.*[34] The Conference also set up working groups to study the relationship between trade and investment, trade and competition policy, transparency in government procurement, and trade facilitation. These subjects are mainly referred to as the "Singapore issues".

(ii) 1998 Geneva Ministerial Conference

36. The Second Ministerial Conference was held in Geneva, Switzerland, between 18 and 20 May 1998. The *Ministerial Declaration*[35] was adopted on 20 May 1998. Ministers also adopted a *Declaration on Global Electronic Commerce.*[36]

(iii) 1999 Seattle Ministerial Conference

37. The Third Ministerial Conference was held in Seattle, United States, between 30 November and 3 December 1999. Despite intense negotiations with a view to launching a new Millennium Round, consensus was not achieved. Members did not adopt any Ministerial Declaration.[37]

(iv) 2001 Doha Ministerial Conference

38. The Fourth Ministerial Conference was held in Doha, Qatar, between 9 and 14 November 2001. Members launched a new round of negotiations (commonly known as the Doha Round). In addition to the *Ministerial Declaration* (also known as the Doha Declaration)[38], Ministers adopted the declarations and decisions listed below:

- Declaration on the TRIPS Agreement and Public Health[39]
- Decision on "Implementation-Related Issues and Concerns";[40]
- Decision on "Procedures for Extensions under Article 27.4 of the SCM Agreement[41] for Certain Developing Country Members";[42]
- Decision on the "ACP-EC Partnership Agreement";[43]
- Decision on the "Transitional Regime for the EC Autonomous Tariff Rate Quota Regime on Imports of Bananas".[44]

39. The text of the Doha Declaration and related decisions is in Section XXVII below. The text of the Declaration on the TRIPS Agreement and Public Health is in Section LXXVIII of the Chapter on the *TRIPS Agreement.*

(v) 2003 Cancun Ministerial Conference

40. The Fifth Ministerial Conference was held in Cancun, Mexico, between 10 and 14 September 2003. The main task was to take stock of progress in negotiations and other work under the Doha Development Agenda. The Members approved a Ministerial statement on 14 September 2003 instructing Member government officials to continue working on outstanding issues.[45]

(b) "The Ministerial Conference shall carry out the functions of the WTO"

(i) Competencies of the Ministerial Conference

41. In addition to general powers under Article IV:1, the Ministerial Conference has specific powers under other Articles of the *WTO Agreement*, including: the power to appoint a Director-General[46], to adopt an authoritative interpretation of the Multilateral Trade Agreements[47], to grant a waiver[48], to adopt amendments[49], and to decide on accessions.[50]

[48] With respect to waivers, see Section X.B.3 of this Chapter.
[49] With respect to the adoption of amendments, see the provisions of Article X.
[50] With respect to accession, see Section XIII.B.2 of this Chapter.

(ii) Competencies under other Agreements

GATS

42. Articles XII:5(b) and XII:6 gives the Ministerial Conference power to establish certain procedures in connection with balance-of-payments restrictions.[51]

TRIPS

43. Article 64.3 gives the Ministerial Conference power to extend the non-applicability of non-violation complaints to the *TRIPS Agreement* on recommendation of the TRIPS Council.[52]

GATT 1994

44. Paragraph 2(b) provides that powers granted to the CONTRACTING PARTIES acting jointly in the GATT may be allocated to the various WTO organs by decision of the Ministerial Conference. See Articles VII:4(c), XII:5, XV:5, XV:6, XXXVI:1(f) and XXXVI:6 of GATT. With respect to GATT practice concerning Article VII, see GATT Analytical Index, pages 259–265.

(iii) Working parties

45. The Ministerial Conference and General Council have established the following working parties to carry out various functions:

(a) Working Group on the Relationship between Trade and Investment[53];

(b) Working Group on the Interaction between Trade and Competition Policy[54];

(c) Working Group on Transparency in Government Procurement[55];

(d) Working Parties on Accession[56]; and

(e) Working Party on Preshipment Inspection[57];

(f) Working Group on Trade, Debt and Finance[58]; and

(g) Working Group on Trade and the Transfer of Technology.[59]

(c) "Ministerial Conference shall . . . take decisions on all matters under any of the Multilateral Trade Agreements"

46. As of 31 December 2004, the Ministerial Conference had adopted the following decisions (also see Section V.B.1 above:

(a) Ministerial Declaration adopted in Singapore[60];

(b) Ministerial Declaration on Trade in Information Technology Products adopted in Singapore[61];

(c) Ministerial Declaration adopted in Geneva[62];

(d) Ministerial Declaration on electronic commerce adopted in Geneva[63];

(e) Ministerial Declarations adopted in Doha[64];

(f) Ministerial Declaration on the TRIPS Agreement and Public Health adopted in Doha[65];

(g) Decision on Implementation-Related Issues and Concerns, adopted in Doha[66];

(h) Decision on Procedures for Extensions under Article 27.4 of the SCM Agreement for Certain Developing Country Members, adopted in Doha[67];

(i) Decision on the ACP-EC Partnership Agreement, adopted in Doha[68]; and

(j) Decision on Transitional Regime for the EC Autonomous Tariff Rate Quotas on Imports of Bananas, adopted in Doha.[69]

(d) "in accordance with the specific requirements for decision-making in this Agreement and in the relevant Multilateral Trade Agreements"

47. As regards the specific requirements for decision-making, see Section X.B below. Also see the relevant sections of the various Multilateral Trade Agreements.

(e) Rules of procedure

48. The General Council adopted the rules of procedure for the Ministerial Conference at its meeting of 31 January 1995.[70] The General Council amended these rules on 25 July 1996.

The rules of procedure were amended in accordance with the amendment to the guidelines on observer status for international intergovernmental organizations, which is annexed to the Rules of Procedure as Annex 3. The text of the amended Rules of Procedure can be found in WT/L/161.

2. Article IV:2

(a) "there shall be a General Council"

49. The General Council is the WTO's highest-level decision-making body. It meets regularly to carry out the functions of the WTO. It has representatives (usually ambassadors or equivalent) from all Member governments and has the authority to act on behalf of the Ministerial Conference.

(b) "The General Council shall also carry out the functions assigned to it by this Agreement"

(i) General

50. The General Council is charged with the power to form cooperation agreements with intergovernmental organizations and non-governmental organizations[71], adopt staff and financial regulations[72], and adopt the budget.[73]

Circulation and derestriction of documents

51. On 14 May 2002, the General Council adopted a new decision abrogating the decision of 18 July 1996.[74] Paragraph 4 of this decision states that "[t]he Decision of the General Council of 18 July 1996 on Procedures for the Circulation and Derestriction of WTO documents, as contained in WT/L/160/Rev.1, shall be abrogated as of the date of adoption of the present decision, but will remain in effect for documents circulated prior to that date."[75]

(c) "the General Council shall establish its rules of procedure"

52. The General Council adopted its rules of procedure on 31 January 1995 (see paragraph 48 above).[76]

53. The General Council approved the first set of guidelines for appointment of officers to WTO bodies on 31 January 1995. These guidelines were proposed by the Chairman of the GATT 1947 CONTRACTING PARTIES and approved by the Preparatory Committee for the World Trade Organization.[77] These guidelines were reviewed on 11 December 2002.[78]

(d) "the General Council shall . . . approve the rules of procedure for the committees . . ."

54. The General Council adopted the rules of procedure for the following Committees at its meetings on the dates set forth below:

(a) Committee on Trade and Development – 15 November 1995[79];

(b) Committee on Balance-of-Payments Restrictions – 13 and 15 December 1995[80]; and

(c) Committee on Regional Trade Agreements[81] – 2 October 1996.[82]

3. Article IV:3: "the General Council shall convene . . . to discharge the responsibilities of the Dispute Settlement Body (DSB)"

(a) General

55. The General Council, acting as the DSB, discharges the responsibilities enumerated in Article 2.1 of the *DSU*[83], including: the authority to establish panels, to adopt Panel and Appellate Body reports, to maintain surveillance of implementation of rulings and recommendations and authorize suspension of concessions and other obligations under the covered agreements.[84] For the activities of the DSB generally, see Chapter on the *DSU*, in particular, Section II.B.

(b) "The DSB . . . shall establish such rules of procedure"

56. The DSB adopted its own rules of procedure[85] on 10 February 1995. The DSB follows, *mutatis mutandis*, the rules of procedure for the General Council[86] with

---

[75] WT/L/452.
[76] WT/GC/M/1, section 4.I. The text of the adopted rules of procedure can be found in WT/L/28. At its meeting of 3 April 1995, the General Council amended the rules of procedure with regard to Chapter V – Officers, WT/GC/M/3, section 1. On 25 July 1996, the rules of procedure were further amended in accordance with the amendment to the guidelines on observer status for international intergovernmental organizations, which is annexed to the Rules of Procedure as Annex 3. The text of the amended Rules of Procedure can be found in WT/L/161.
[77] WT/GC/M/1, section 4.I(h). The text of the approved guidelines can be found in WT/L/31.
[78] The text of the reviewed guidelines can be found in WT/L/510.
[79] WT/GC/M/8, section 4(c). The text of the adopted rules of procedure can be found in WT/COMTD/6. The rules of procedure follow, *mutatis mutandis*, the rules of procedure established for meetings of the General Council with certain special provisions.
[80] WT/GC/M/9, section 1(b). The text of the adopted rules of procedure can be found in WT/BOP/10. The rules of procedure follow, *mutatis mutandis*, the rules of procedure established for meetings of the General Council with certain special provisions.
[81] With respect to the establishment of the Committee on Regional Trade Agreement under Article IV:7, see para. 117.
[82] WT/GC/M/14, section 3. The text of the adopted rules of procedure can be found in WT/REG/1. The rules of procedure follow, *mutatis mutandis*, the rules of procedure for the General Council with certain special provisions.
[83] See Chapter on the *DSU*, Article 2.1.
[84] The powers referred to are found in Articles 6, 16, 21 and 22 of the *DSU*.
[85] WT/DSB/M/1, section 1.
[86] WT/L/161.

certain exceptions. The DSB adopted Chapter V of the rules of procedure concerning officers on 25 April 1995.[87] For the text of the Rules of Procedure, see Section XXXV of the Chapter on the *DSU*.

(c) Special Session of the Dispute Settlement Body

57. The Trade Negotiations Committee created a Special Session of the Dispute Settlement Body to negotiate improvements and clarifications of the Dispute Settlement Understanding. This negotiation will not be part of the single undertaking. In this respect, see paragraph 47 of the Doha Declaration in Section XXVII below.

4. Article IV:4: "the General Council shall . . . discharge the responsibilities of the Trade Policy Review Body"

(a) Country reviews

58. Country reviews are conducted on a rotational basis, with the frequency of review being determined by reference to each Member's share of world trade in a recent representative period. See Section III.B.2 of the Chapter on the *TPRM*.

59. The TPRB conducted 197 reviews[88] between its formation and 31 December 2004. The reviews covered 114 Members, counting the European Union as one Member.

(b) "the Trade Policy Review Body shall . . . establish such rules of procedure"

60. At its meeting of 6 June 1995, the TPRB adopted the rules of procedure[89] following *mutatis mutandis*, the rules of procedures for the General Council[90] with certain exceptions.

5. Article IV:5

(a) "Council for Trade in Goods"

(i) Functions

61. The Council for Trade in Goods oversees the functioning of the Multilateral Trade Agreements in Annex IA; the Agreements specifically set forth the following:

(a) Understanding on the Interpretation of Article XVII of the *General Agreement on Tariffs and Trade 1994*:

(i) To receive notifications of state trading enterprises – Article 1;

(ii) To receive counter-notifications of state trading enterprises – Article 4;

(iii) To make recommendations with regard to the adequacy of notifications and the need for further information – Article 5; and

(iv) To receive annual reports of the Working Party on State Trading – Article 5;

(b) *Agreement on Textiles and Clothing*

(i) The Council for Trade in Goods conducted a review of the Agreement before the end of each stage of the integration process until all restrictions thereunder terminated on 1 January 2005.

(c) *Agreement on Trade-Related Investment Measures*

(i) To receive notifications of all applied TRIMS and those not in conformity with TRIMS – Article 5.1;

(ii) To extend the transition period for the elimination of TRIMs notified by developing country Members – Article 5.3;

(iii) To receive notifications on any TRIM applied to a new investment – Article 5.5;

(iv) To assign responsibilities to the Committee on TRIMS and receive reports on the operation and implementation of the *TRIMs Agreement* – Article 7; and

(v) To review operation of the *TRIMs Agreement* and as appropriate propose amendments to the text to the Ministerial Conference – Article 9.

(d) *Customs Valuation Agreement*

(i) To receive reviews on developments on the implementation and operation of the Agreement – Article 23; and

(ii) Points 1 and 2 of Annex III of the Custom Valuation Agreement refers to the "Members". This could be the Council for Trade in Goods or the Customs Valuation Committee.

(e) *Agreement on Safeguards*

(i) To review the suspension of substantially equivalent concessions – Article 8.2;

(ii) To receive notifications on results of consultations – Article 12.5; any form of compensation (Article 8.1); proposed suspension of

[87] WT/DSB/M/4, section 1. The text of the adopted rules of procedure can be found in WT/DSB/9.
[88] The minutes of the meetings are numbered WT/TPR/M/1–109.
[89] WT/TPR/6.
[90] WT/L/161.

concessions (Article 8.2) and other obligations; and

(iii) To establish a Committee on Safeguards (Article 13.1) and receive its reports on functioning of agreement.

(f) *GATT 1994*

(i) Moreover, under paragraph 2(b) of GATT 1994 powers granted to the CONTRACTING PARTIES acting jointly in the GATT may be allocated to the various WTO organs by decision of the Ministerial Conference. Such decision has not been taken to date. Under such a decision, the Council for Trade in Goods may well be charged with most of the powers now allocated to CONTRACTING PARTIES acting jointly in the GATT, in conformity with allocating the overseeing function also with respect to GATT 1994 to the Council for Trade in Goods.[91]

62. As regards the activities of the Council for Trade in Goods in the areas enumerated in paragraph 61 above, see the Chapters dealing with the relevant Agreements. The Council for Trade in Goods reports to the General Council on an annual basis.[92]

(ii) Rules of procedure

63. The General Council approved the rules of procedure and the relevant addendum for meetings of the Council for Trade in Goods at its meeting of 31 July 1995.[93]

(b) "Council for Trade in Services"

(i) Functions

64. The Council for Trade in Services[94] oversees the functioning of the *General Agreement on Trade in Services (GATS)*. The Agreement specifically sets forth the following:

(a) Under Article XXIV of the *GATS*, powers "to facilitate the operation of this Agreement and further its objectives", including the power to create subsidiary bodies (a variant of this latter power is in Article VI:4 of GATS); and

(b) Under Article V:7 of the *GATS*, power to make recommendations to parties to economic integration agreements.[95]

65. As regards the activities of the Council for Trade in Services in the areas set out in paragraph 64 above, see the Chapter on the *GATS*. The Council for Trade in Services reports to the General Council on an annual basis.[96]

(ii) Rules of procedure

66. The General Council approved the rules of procedure for the Council on Trade in Services at its meeting of 15 November 1995.[97]

(c) "The Council for Trade-Related Aspects of Intellectual Property Rights (TRIPS)"

(i) Functions

67. The Council for Trade-Related Aspects of Intellectual Property Rights[98] oversees the functioning of the Agreement on Trade-Related Aspects of Intellectual Property Rights; the Agreement specifically sets forth the following:

(a) To keep under review application of the provisions of Section 3 (Geographical Indications) of the Agreement – Article 24.2;

(b) To receive notification on laws and regulations, final judicial decisions and administrative rulings of general application pertaining to the TRIPS agreement made effective by a Member – Article 63.2;

(c) to grant extensions of the implementation period to least-developed countries under Article 66.1; and

(d) to monitor the operation of the Agreement and Members' compliance thereunder, pursuant to Article 68.

68. With respect to the activities of the Council for Trade-Related Aspects of Intellectual Property Rights in the areas described in paragraph 67 above, see Chapter on the *TRIPS Agreement*. See also the annual reports of the Council for Trade-Related Aspects of Intellectual Property Rights to the General Council.[99]

(ii) Rules of procedure

69. The General Council approved the rules of procedure for the Council for Trade-Related Aspects of Intellectual Property Rights on 15 November 1995.[100]

[100] WT/GC/M/8, section 4(b). The text of the adopted rules of procedure can be found in IP/C/1.

(d) The Councils "shall operate under the general guidance of the General Council"

70. The Council for Trade in Goods, see paragraph 62 above, Council for Trade in Services, see paragraph 65 above, and Council for Trade-Related Aspects of Intellectual Property Rights, see paragraph 68 above, all report to the General Council.

6. Article IV:6

(a) "the [Council for Trade in Goods] . . . shall establish subsidiary bodies"

71. The Council for Trade in Goods has established the following working parties as at 31 December 2004, :

(a) Working Party on State Trading Enterprises[101];

(b) Working Group on Notification Obligations and Procedures[102]; and

(c) ten working parties on various regional trade agreements.[103]

72. The Council for Trade in Goods has also established the following committees (all, except (a), under specified provisions):

(a) Committee on Market Access;

(b) Committee on Agriculture[104];

(c) Committee on Sanitary and Phytosanitary Measures[105];

(d) Committee on Technical Barriers to Trade[106];

(e) Committee on Subsidies and Countervailing Measures[107];

(f) Committee on Anti-Dumping Practices[108];

(g) Committee on Customs Valuation[109];

(h) Committee on Rules of Origin[110];

(i) Committee on Import Licensing[111];

(j) Committee on Trade-Related Investment Measures[112];

(k) Committee on Safeguards[113]; and

(l) Committee of Participants on the Expansion of Trade in Information Technology Products.

(b) Subsidiary bodies shall establish . . . rules of procedure subject to approval of their respective Councils:

73. The Council for Trade in Goods approved the rules of procedure for the following subsidiary bodies on the dates set forth below:

(a) Committee on Market Access – 1 December 1995[114];

(b) Committee on Agriculture – 22 May 1996[115];

(c) Committee on Sanitary and Phytosanitary Measures – 11 June 1997[116];

(d) Committee on Technical Barriers to Trade – 1 December 1995[117];

(e) Committee on Subsidies and Countervailing Measures – 22 May 1996[118];

(f) Committee on Anti-Dumping Practices – 22 May 1996[119];

(g) Committee on Customs Valuation – 1 December 1995[120];

(h) Committee on Rules of Origin – 1 December 1995[121];

[119] G/C/M/10, section 1(ii). The text of the approved rules of procedure can be found in G/L/143.

[120] G/C/M/7, section 2. The text of the approved rules of procedure can be found in G/L/146.

[121] G/C/M/7, section 2. The text of the approved rules of procedure can be found in G/L/149.

(i) Committee on Import Licensing – 1 December 1995[122];

(j) Committee on Trade-Related Investment Measures – 1 December 1995[123];

(k) Committee on Safeguards – 22 May 1996.[124]

74. The Rules of Procedure for the Independent Entity are included in Annex III to the decision by the General Council establishing the Independent Entity.[125]

75. No rules of procedure have been adopted for the Working Party on State Trading Enterprises.

(c) "the [Council for Trade in Services] . . . shall establish subsidiary bodies as required"

76. As at 31 December 2004, the Council for Trade in Services has established the following subsidiary bodies:

(a) Committee on Trade in Financial Services;

(b) Committee on Specific Commitments;

(c) Working Party on Domestic Regulation;

(d) Working Party on GATS Rules; and

(e) Working Party on Professional Services.

(d) "the [TRIPS Council] shall establish subsidiary bodies as required"

77. The Council for Trade-Related Aspects of Intellectual Property Rights has not established any subsidiary bodies to date.

7. Article IV:7: Committees established by the Ministerial Conference or General Council

78. The Ministerial Conference and General Council have established the following Committees to date:

(a) Committee on Trade and Development[126];

(b) Committee on Balance-of-Payments Restrictions[127];

(c) Committee on Budget, Finance and Administration[128];

(d) Committee on Market Access[129];

(e) Committee on Trade and Environment[130]; and

(f) Committee on Regional Trade Agreements.[131]

(a) Committee on Trade and Development

(i) Establishment and terms of reference

79. The General Council established the Committee on Trade and Development on 31 January 1995, with the following terms of reference:

"1. To serve as a focal point for consideration and coordination of work on development in the World Trade Organization (WTO) and its relationship to development-related activities in other multilateral agencies.[132]

2. To keep under continuous review the participation of developing country Members in the multilateral trading system and to consider measures and initiatives to assist developing country Members, and in particular the least-developed country Members, in the expansion of their trade and investment opportunities, including support for their measures of trade liberalization.[133]

3. To review periodically, in consultation as appropriate with the relevant bodies of the WTO, the application of special provisions in the Multilateral Trade Agreements and related Ministerial Decisions in favour of developing country Members, and in particular least-developed country Members, and report to the General Council for appropriate action.

4. To consider any questions which may arise with regard to either the application or the use of special provisions in the Multilateral Trade Agreements and related Ministerial Decisions in favour of developing country Members and report to the General Council for appropriate action.

5. To provide guidelines for, and to review periodically, the technical cooperation activities of the WTO[134] as they relate to developing country Members.

6. The Committee will establish a programme of work which may be reviewed as necessary each year."[135]

80. At the Doha Ministerial Conference, Members decided that the Committee on Trade and Development

[132] (*footnote original*) It is understood that matters relating to activities in other multilateral agencies will come under the guidance of the General Council.
[133] (*footnote original*) The Committee would give consideration, *inter alia*, to any report that the Committee on Agriculture may decide to refer to it following paragraph 6 of the "Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries" and Article XVI of the Agreement on Agriculture.
[134] (*footnote original*) The technical cooperation activities referred to in this provision do not include technical assistance for accession negotiations.
[135] WT/L/46. The adopted terms of reference were prepared by the Sub-Committee on Institutional, Procedural and Legal Matters at its meeting of 18 November 1994. PC/IPL/4.

should act as a forum to identify and debate developmental aspects of the new negotiations.[136]

(ii) Rules of procedure and observer status

81. The General Council approved the rules of procedure for the Committee on Trade and Development[137], on 15 November 1995. The rules were adopted by the committee on 5 July 1995.[138]

82. Several intergovernmental organizations have been given observer status in the Committee on Trade and Development and the Sub-Committee on Least Developed Countries (see paragraph 84 below).[139]

(iii) Reporting

83. The Committee on Trade and Development reports to the General Council on an annual basis.[140]

(iv) Activities

Establishment of the Sub-Committee on Least-Developed Countries

84. The Committee on Trade and Development adopted the decision establishing the Sub-Committee on Least-Developed Countries[141] on 5 July 1995 with the following terms of reference:

> "(a) to give particular attention to the special and specific problems of least-developed countries;
>
> (b) to review periodically the operation of the special provisions in the Multilateral Trade Agreements and related Ministerial Decisions in favour of the least-developed country Members;
>
> (c) to consider specific measures to assist and facilitate the expansion of the least-developed countries' trade and investment opportunities, with a view to enabling them to achieve their development objectives;[142] and,
>
> (d) to report to the Committee on Trade and Development for consideration and appropriate action."[143]

85. The Sub-Committee on Least-Developed Countries adopted its rules of procedure on 17 October 1995.[144]

Work Programme for Least-Developed Countries

86. Pursuant to paragraph 42 of the Doha Declaration the Sub-Committee on Least-Developed Countries was mandated to report to the General Council on an agreed work programme for least-developed countries.[145] With respect to the mandate of the Doha Declaration and the negotiations on least-developed countries, see paragraphs 42–43 of the Doha Declaration in Section XXVII.A below. The work programme for least-developed countries was adopted by the Sub-Committee on Least-Developed Countries on 12 February 2002.[146]

Technical cooperation

87. The Committee on Trade and Development adopted the Guidelines for WTO Technical Cooperation on 15 October 1996.[147] On 13 December 1996, the Singapore Ministerial Conference adopted the Comprehensive and Integrated WTO Plan of Action for the Least-Developed Countries[148], prepared by the Committee on Trade and Development. The Plan of Action "offers a comprehensive approach and includes measures relating to the implementation of the Decision in Favour of Least-Developed Countries[149], as well as in the areas of capacity-building and market access from a WTO perspective."[150]

88. Also, on the basis of a recommendation by the Committee on Trade and Development[151], the Singapore Ministerial Conference agreed to "organize a meeting with UNCTAD and the International Trade Centre in 1997, with the participation of aid agencies, multilateral financial institutions and least-developed countries to foster an integrated approach to assist these countries enhance their trading opportunities."[152] On 27–28 October 1997, the High-Level Meeting on Integrated Initiatives for Least-Developed Countries' Trade Development was organized jointly by the WTO, UNCTAD and ITC, with the participation of the IMF, UNDP and World Bank.[153] At this High-Level Meeting, Members

149 This Decision is referenced in Section XXII of this Chapter.
150 WT/MIN(96)/14, para. 3.
151 At its meeting of 15 and 31 October 1996, the Committee on Trade and Development adopted the report to the General Council (WT/COMTD/9) which contains the recommendation to hold such a high-level meeting. WT/COMTD/M/12, Section B. Accordingly, at its meeting of 7, 8 and 13 November 1996, the General Council adopted that report for adoption by the Singapore Ministerial Conference. WT/GC/M/16, Section 8(c)(iv).
152 WT/MIN(96)/DEC, para. 14.
153 The text of the report of this Meeting can be found in WT/LDC/HL/23.

(i) "endorsed the Integrated Framework for Trade-Related Technical Assistance, including for Human and Institutional Capacity Building, to support Least-Developed Countries in Their Trade and Trade-Related Activities",[154] (ii) recommended "all WTO Members to keep under active review all options for improving market access for least-developed countries presented in the Comprehensive and Integrated WTO Plan of Action for the Least-Developed Countries and to monitor the implementation of the commitments made in this regard"[155], and (iii) "took note of the two reports and the recommendations" produced in the two round-table discussions.[156]

89. In 2000, pursuant to the mandate in paragraph 88 above[157], the Sub-Committee on Least-Developed Countries conducted the review of all options for improving market access for least-developed countries presented in the Comprehensive and Integrated WTO Plan of Action for the Least-Developed Countries, and reported it to the Committee on Trade and Development.[158] In addition, pursuant to that mandate, the six core international agencies of the Integrated Framework, i.e. IMF, ITC, UNCTAD, UNDP, World Bank and WTO, conducted the review of the Integrated Framework.[159] In order to implement the decision by the heads of the six core agencies for the Integrated Framework to revamp the Integrated Framework, the Sub-Committee on Least-Developed Countries adopted the Integrated Framework Pilot Scheme.[160] The Pilot Scheme included (i) the recommendation on the establishment of a trust fund[161], and, (ii) the proposal on the establishment of the Integrated Framework Steering Committee and the Inter-Agency Working Group.[162]

90. The Doha Declaration instructed the Director-General to consult with the relevant agencies, bilateral donors and beneficiaries, to identify ways of enhancing and rationalizing the Integrated Framework for Trade-Related Technical Assistance to Least-Developed Countries and the Joint Integrated Technical Assistance Programme (JITAP). The Committee on Budget, Finance and Administration was instructed to develop a plan for adoption by the General Council in December 2001 to ensure long-term funding for WTO technical assistance.[163]

91. On 13 July 2003, the six core agencies issued a joint communiqué that reaffirmed their commitment to providing assistance that would enable the effective integration of least-developed countries into the multilateral trading system.[164]

92. At its meeting of 9–10 February 2004, the Integrated Framework Working Group adopted its work programme in the wake of the second evaluation of the Integrated Framework.[165] The work programme was subsequently approved by the IF Steering Committee at its 11th Session on 13 February 2004.[166] The Integrated Framework Working Group aims to achieve, *inter alia*, the following by 31 December 2005:

> (a) "Encourage effective follow-up to the Diagnostic Trade Integration Study (DTIS) in those countries where the studies have been completed[167], as outlined in document WT/LDC/SWG/IF/13. Bilateral and multilateral development partners are urged to work with committed IF partner governments to respond to the trade-related technical assistance priorities identified in the DTIS and its Action Matrix;
>
> (b) undertake new DTIS in countries that have demonstrated clear and strong commitment to mainstream trade into national development plans . . ."

Favourable and more preferential treatment for developing countries

93. The Comprehensive and Integrated WTO Plan of Action for the Least-Developed Countries (see paragraph 87 above), also includes "provision for taking positive measures, for example duty-free access, on an autonomous basis, aimed at improving their overall capacity to respond to the opportunities offered by the trading system."[168] At the High-Level Meeting referenced in paragraph 88 above, as well as shortly thereafter, 28 Members announced steps taken, or to be taken to enhance market access for imports from LDCs.[169]

94. Paragraph 42 of the Doha Ministerial Declaration commits WTO Members "to the objective of duty-free, quota-free market access for products originating from LDCs" and "to consider additional measures for progressive improvements in market access for LDCs."[170]

95. The Decision on Implementation-Related Issues and Concerns combined with paragraph 12 of the Doha Declaration aimed to provide a two-track solution to the issue faced by developing countries of implementing the WTO agreements.[171]

96. As part of the Work Programme adopted by the Sub-Committee on Least-Developed Countries on 28 February 2002[172], it was agreed that the focus would be on: (i) the identification and examination of market access barriers to products of least-developed countries in desired markets; (ii) annual reviews in the Sub-Committee on Least-Developed Countries of market access improvements, market access measures taken by Members; and (iii) examination of possible additional measures for improvement of market access, including elimination of barriers to exports and further improvement of preferential access schemes such the GSP.[173]

97. As of 31 December 2004, the WTO maintains, beyond the specific provisions contained in the *WTO Agreement*, two additional legal instruments concerning favourable and more preferential treatment for developing countries: (i) the Enabling Clause[174] and (ii) the Waiver on Preferential Tariff Treatment for Least-Developed Countries.[175] With respect to the activities of the Committee on Trade and Development, and the Sub-Committee on Least-Developed Countries concerning the Enabling Clause and the Waiver on Preferential Tariff Treatment for Least-Developed Countries respectively, see Section II.D.3 of the Chapter on the *GATT 1994*.

(v) Reference to GATT practice

98. As regards the Committee on Trade and Development under *GATT 1947*, see relevant sections of the Chapter on the *GATT 1994*.

(b) Committee on Balance-of-Payments Restrictions

(i) Establishment and terms of reference

99. The General Council established the BOPs Committee[176] on 31 January 1995, with the following terms of reference:

> "(a) to conduct consultations, pursuant to Article XII:4, Article XVIII:12 and the Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994, on all restrictive import measures taken or maintained for balance-of-payments purposes and, pursuant to Article XII:5 of the General Agreement on Trade in Services, on all restrictions adopted or maintained for balance-of-payments purposes on trade in services on which specific commitments have been undertaken; and,
>
> (b) to carry out any additional functions assigned to it by the General Council."[177]

(ii) Rules of procedure

100. The General Council approved the rules of procedure for the BOPs Committee at its meeting of 13 and 15 December 1995.[178]

(iii) Reporting

101. The BOPs Committee reports to the General Council on an annual basis.

(iv) Activities

102. With respect to the activities of the BOPs Committee, see Article XVIII:C of the Chapter on the *GATT 1994*.

(c) Committee on Budget, Finance and Administration

(i) Establishment and terms of reference

103. The General Council established the BFA Committee[179] at its meeting of 31 January 1995, with the following terms of reference:

> "(i) To examine any questions arising in connection with the audited accounts, proposals for the budgets of the WTO and [of the International Trade Centre UNCTAD/WTO, and][180] the financing thereof.
>
> (ii) To study any financial and administrative questions which may be referred to it by the Ministerial Conference

177 The adopted terms of reference were agreed for proposal by the Sub-Committee on Institutional, Procedural and Legal Matters at its meeting of 21 October 1994. PC/IPL/3.

178 WT/GC/M/9, section 1(b). The text of the adopted rules of procedure can be found in WT/BOP/10.

179 WT/GC/M/1, section 7.A(1).

180 (*footnote original*) The text in square brackets is being kept pending a decision on the future relationship between the WTO and the ITC, and will be altered in the light of that decision.

or the General Council, or submitted to it by the Director-General, and undertake such other studies as may be assigned to it by the Ministerial Conference or the General Council."[181]

(ii) Rules of procedure

104. At its meeting of 17 February 1995, the Chairman of the General Council suggested that the BFA Committee follow the rules of procedure for the General Council, except for voting procedures. The BFA Committee agreed to work by consensus.[182]

(iii) Reporting

105. The BFA Committee submits annual reports to the General Council.

(iv) Activities

106. With respect to the activities of the BFA Committee, see paragraphs 147–153 below.

(d) Committee on Market Access

(i) Establishment and terms of reference

107. The General Council established the Committee on Market Access[183] on 31 January 1995, with the following terms of reference:

"(a) in relation to market access issues not covered by any other WTO body:

- [to] supervise the implementation of concessions relating to tariffs and non-tariff measures;
- [to] provide a forum for consultation on matters relating to tariffs and non-tariff measures;

(b) [to] oversee the application of procedures for modification or withdrawal of tariff concessions;

(c) [to] ensure that GATT Schedules are kept up-to-date, and that modifications, including those resulting from changes in tariff nomenclature, are reflected;

(d) [to] conduct the updating and analysis of the documentation on quantitative restrictions and other non-tariff measures, in accordance with the timetable and procedures agreed by the CONTRACTING PARTIES in 1984 and 1985 (BISD 31S/227 and 228, and BISD 32S/92 and 93);

(e) [to] oversee the content and operation of, and access to, the Integrated Data Base;

(f) [to] report periodically – and in any case not less than once a year – to the Council on Trade in Goods."[184]

(ii) Rules of procedure

108. On 1 December 1995, the Council for Trade in Goods approved the rules of procedure for meetings of the Committee on Market Access.[185]

(iii) Reporting

109. The Committee on Market Access reports to the Council for Trade in Goods on an annual basis.[186] It also reports to the Council for Trade in Goods on a periodic basis.[187]

(iv) Activities

110. With respect to the activities of the Committee on Market Access, see Sections III.C.1.(d) and XII.C.3 of the Chapter on the *GATT 1994*.

111. With regard to the Integrated Data Base (IDB) and the Consolidated Tariff Schedules (CTS) database, the Committee on Market Access decided that providing broader access to the information in the IDB and the CTS database would contribute to the effective delivery of market access-related technical assistance to developing and least developed countries. In order to achieve this, it adopted a dissemination policy[188] which draws upon the IDB dissemination practices[189] focused on the accessibility of IDB and CTS information via the Internet and on the distribution of CD-ROMs.

(e) Committee on Trade and Environment

(i) Establishment and terms of reference

112. Pursuant to the Marrakesh Ministerial Decision on Trade and Environment, the General Council established the Committee on Trade and Environment on 31 January 1995 with the following terms of reference:

"(a) [T]o identify the relationship between trade measures and environmental measures, in order to promote sustainable development;

(b) [T]o make appropriate recommendations on whether any modifications of the provisions of the multilateral trading system are required, compatible with the open, equitable and non-discriminatory nature of the system, as regards, in particular:

- [T]he need for rules to enhance positive interaction between trade and environmental measures, for the promotion of sustainable development, with special

[181] The adopted terms of reference were agreed for proposal by the Sub-Committee on Institutional, Procedural and Legal Matters at its meeting of 21 October 1994. PC/IPL/2.
[182] WT/BFA/1, para. 4.
[183] WT/GC/M/1, section 7.A(2).
[184] The terms of reference were agreed for proposal by the Subcommittee on Institutional, Procedural and Legal Matters at its meeting of 18 November 1994. PC/IPL/M/9, para. 8.
[185] G/C/M/7. The text of the adopted rules of procedure can be found in G/L/148.
[186] The reports are contained in documents G/L/50, 132, 215, 284, 331, 431 and 486.
[187] The reports are numbered G/MA/1, 4, 57, 58, 59, 60, 61, 62, 71, 107 and 111–116/Corr.1, 117, 149, 151, and 154. .
[188] G/MA/115.
[189] G/MA/IDB/3.

consideration to the needs of developing countries, in particular those of the least developed among them; and

- [T]he avoidance of protectionist trade measures, and the adherence to effective multilateral disciplines to ensure responsiveness of the multilateral trading system to environmental objectives set forth in Agenda 21 and the Rio Declaration, in particular Principle 12; and
- [S]urveillance of trade measures used for environmental purposes, of trade-related aspects of environmental measures which have significant trade effects, and of effective implementation of the multilateral disciplines governing those measures".[190]

113. The Council for Trade in Services, pursuant to the Ministerial Decision on Trade in Services and the Environment, requested the Committee on Trade and Environment to examine and report on the relationship between trade in services and the environment on 1 March 1995. See also Section XVII.B.1(b) of the Chapter on the *GATS*.

(ii) Rules of procedure

114. In practice, the Committee on Trade and Environment follows the rules of procedure adopted by the General Council.[191]

(iii) Reporting

115. The Committee on Trade and Environment reports to the General Council on an annual basis.[192]

(iv) Activities

116. See paragraphs 31–33 of Section XXVII.A below (Doha Declaration). See also the relevant committee reports.[193]

(f) Committee on Regional Trade Agreements

(i) Establishment and terms of reference

117. The General Council established the Committee on Regional Trade Agreements (Committee on RTAs)[194] on 6 February 1996 with the following terms of reference:

"(a) to carry out the examination of agreements in accordance with the procedures and terms of reference adopted by the Council for Trade in Goods, the Council for Trade in Services or the Committee on Trade and Development, as the case may be, and thereafter present its report to the relevant body for appropriate action;[195]

(b) to consider how the required reporting on the operation of such agreements should be carried out and make appropriate recommendations to the relevant body;

(c) to develop, as appropriate, procedures to facilitate and improve the examination process;

(d) to consider the systemic implications of such agreements and regional initiatives for the multilateral trading system and the relationship between them, and make appropriate recommendations to the General Council; and

(e) to carry out any additional functions assigned to it by the General Council."[196]

(ii) Rules of procedure

118. The Committee on RTAs adopted its rules of procedure on 2–3 July 1996,, which provide, *inter alia*, that the rules of procedure for meetings of the General Council shall apply, *mutatis mutandis*, for meetings of the Committee on RTAs, with some exceptions.[197]

(iii) Reporting

119. The Committee on RTAs reports to the General Council on an annual basis.[198]

120. In accordance with recommendations adopted by the Council for Trade in Goods on how to comply with the reporting requirements on the operation of RTAs,[199] the Committee on RTAs presented schedules for the submission of biennial reports at its 20th, 28th and 35th Sessions (respectively in December 1998, February 2001 and December 2003).[200]

---

[190] WT/GC/M/1, section 7.A(3), and MTN.TNC/45(MIN), Annex II. The Marrakesh Ministerial Decision also sets out a ten-point work programme covering the three areas of the WTO, *i.e.* goods, services and intellectual property rights. See MTN.TNC/45(MIN), Annex II.

[191] WT/L/161.

[192] The reports are numbered WT/CTE/1–7, 10 and 11.

[193] WT/CTE/1–11.

[194] WT/GC/M/10, para.11. The text of the decision can be found in WT/L/127.

[195] (*footnote original*) The Committee will also carry out the outstanding work of the working parties already established by the Council for Trade in Goods, the Council for Trade in Services or the Committee on Trade and Development, within the terms of reference defined for those working parties, and report to the appropriate bodies.

[196] WT/L/127, para. 1.

[197] WT/REG/M/2, para. 11. The rules of procedures can be found in WT/REG/1. See also WT/REG/M/2, para. 13.

[198] WT/REG/2, 3, 7, 8, 9, 10, 11, 12, 13 and 14.

[199] Pursuant to paragraph 11 of the Understanding on the Interpretation of Article XXIV of the GATT 1994 and paragraph 1(b) of the CRTA's Terms of Reference. The recommendations are contained in G/L/286.

[200] Respectively WT/REG/W/33, WT/REG/W/42 and WT/REG/W/48. For more detailed information on reports on the operation of regional trade agreements, see the Chapter on the *GATT 1994*, Article XXIV. At its 33rd Session, the CRTA decided to postpone biennial reporting obligations for the year 2003, to the following year in 2004, due to the fact that the Committee was still considering reports for 2001 and this would add to the already burdensome workload of delegations who were preparing for the upcoming Ministerial Conference in Cancun (see WT/REG/M/33, para. 9).

(iv) Activities

121. Under point 1(a) of its terms of reference (see paragraph 117 above), the Councils or the Committee will adopt separate terms of reference for the examination of each regional trade agreement in the Committee on RTAs.[201] With respect to the examination tasks of the Committee on RTAs, see Sections XXV.D(1)(a) and Annexes 1–IV of the Chapter on the *GATT 1994*. Also see Sections VII.B(2) and VII.C-D of the Chapter on the *GATS*.

122. On 20 February 1998, under item 1(b) of its terms of reference, the Committee adopted recommendations to the Council for Trade in Goods, Council for Trade in Services and the Committee on Trade and Development on how the required reporting on the operation of regional trade agreements should be carried out.[202] In November 1998, the relevant bodies acted on these recommendations; see paragraph 120 above and Article I of the Chapter on the *GATT 1994*, for action taken by the Committee on Trade and Development; Article XXIV for action taken by the Council for Trade in Goods; and Article V of the Chapter on the *GATS*, for action taken by the Council for Trade in Services.

123. As regards the number of regional trade agreements notified to the GATT/WTO and under examination in the Committee on RTAs, see Section XXV.D.4 of the Chapter on the *GATT 1994*.

Procedures for the examination of RTAs

124. The following procedures apply to the examination of RTAs notified to the WTO[203]:

- The notification of an agreement (together with its text) is considered by the Council for Trade in Goods (if the RTA is notified under Article XXIV of the GATT 1994), the Council for Trade in Services (if the RTA is notified under GATS Article V) or the Committee on Trade and Development (if the RTA is notified under the Enabling Clause). If examination of the agreement is provided for, the relevant body adopts the terms of reference for the examination and transfers the examination task to the CRTA.[204]
- Initial information on the agreement is distributed as a formal document. That information may either be conveyed by the Parties in the form of a Standard Format or take the form of a factual presentation of the RTA prepared by the Secretariat on its own responsibility, on the basis of an established outline and in consultation with the Parties to the agreement[205] (see paragraph 123 above). This is the initial step of what is called the "factual" examination.
- During (at least one or two) CRTA regular sessions, there is an exchange of oral questions and replies on the examined RTA, as well as more general statements by the parties and other Members. Detailed minutes are produced on each meeting devoted to the RTA examination, and published as formal documents.
- Between each of those meetings, usually a round of additional written questions and replies takes place. These are also published as a formal document.
- Once the CRTA feels that the factual part of the examination has been concluded, the Secretariat is requested to draft a report on the examination, as the basis for consultations among Members.

125. The report by the Committee on RTAs on a given agreement is sent to the WTO body which mandated the examination, for adoption.[206]

(g) Trade Negotiations Committee (TNC)

126. The Doha Ministerial Declaration[207] provided that the overall conduct of the negotiations shall be supervised by the TNC under the authority of the General Council. The TNC was also mandated to establish appropriate negotiating mechanisms as required and supervise the progress of the negotiations.[208] Accordingly, at its first meeting held on 28 January and 1 February 2002[209], and on the basis of proposals made by the Chairman of the General Council, the TNC appointed the Director-General in an *ex officio* capacity to chair the TNC until the deadline established in the Doha Declaration for concluding the negotiations, i.e. 1 January 2005 (see paragraph 45 of the Doha Declaration in Section XXVII.A below).

---

[201] For details on the transfer of competence of GATT 1947 working parties' to WTO working parties, as well as on the procedural aspects of examinations, see the Chapter on the *GATT 1994*, Article XXIV.

[202] WT/REG/M/16, Section B. The text of these recommendations can be found in WT/REG/4–6.

[203] WT/REG/W/15 Guidelines on Procedures to Facilitate and Improve the Examination Process.

[204] Examination is mandatory for RTAs notified under Article XXIV of the GATT 1994. In the case of services agreements and those notified under the Enabling Clause, examination is not automatic but can be decided by Members. By 31 December 2004, decision to submit RTAs to examination was taken for all services agreements notified and considered by the Council for Trade in Services, and for a single RTA notified under the Enabling Clause.

[205] This option has been introduced on an experimental basis.

[206] Since the entry into force of the WTO, that stage of examination has never been attained; thus, since its establishment, the CRTA has been unable to finalize reports on any of the examinations before it.

[207] WT/MIN(01)/DEC/1.

[208] WT/MIN(01)/DEC/1, para. 46.

[209] TN/C/M/1.

127. At the TNC's first meeting, Members also agreed to a comprehensive structure comprising a number of groups and bodies to organize the negotiations. According to this arrangement, each negotiating body would be responsible for the work on one or more[210] of the topics listed in the Work Programme of the Doha Declaration (see paragraphs 12–44 of the Doha Declaration in Section XXVII.A below). The TNC established the following Special Sessions and Negotiating Groups to carry out the work under the Doha mandate:

- Special Session of the Committee on Agriculture[211];
- Special Session of the Council for Trade in Services[212];
- Negotiating Group on Market Access[213];
- Special Session of the Council for TRIPS[214];
- Negotiating Group on Rules[215];
- Special Session of the Dispute Settlement Body[216];
- Special Session of the Committee on Trade and Environment[217];
- Special Session of the Committee on Trade and Development.

8. Article IV: 8

(a) Bodies provided for under Plurilateral Trade Agreements

(i) International Dairy Council

128. As regards the establishment, activities and termination of the International Dairy Council, see Article VII and relevant paragraphs of the Chapter on the *International Dairy Agreement.*

(ii) International Meat Council

129. With respect to the establishment, activities and termination of the International Meat Council, see Article IV and relevant paragraphs of the Chapter on the *International Bovine Meat Agreement.*

(iii) Committee on Trade in Civil Aircraft

130. As regards the establishment and activities of the Committee on Trade in Civil Aircraft, see relevant paragraphs of the Chapter on the *Agreement on Trade in Civil Aircraft.*

131. The Committee on Trade in Civil Aircraft reports to the General Council on an annual basis.[218]

(iv) Committee on Government Procurement

132. Regarding the establishment and activities of the Committee on Government Procurement, see Article XXI and relevant paragraphs of the Chapter on the *Agreement on Government Procurement.*

133. The Committee on Government Procurement reports to the General Council on an annual basis, from its inception in 1996.[219]

VI. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Relations with Other Organizations

1. The General Council shall make appropriate arrangements for effective cooperation with other intergovernmental organizations that have responsibilities related to those of the WTO.

2. The General Council may make appropriate arrangements for consultation and cooperation with non-governmental organizations concerned with matters related to those of the WTO.

B. INTERPRETATION AND APPLICATION OF ARTICLE V

1. Article V:1

(a) "Shall make appropriate arrangements for effective cooperation with other intergovernmental organizations"

134. As of 31 December 2004, the WTO had concluded agreements with the following intergovernmental organizations:

---

[210] See for example, the Negotiating Group on Rules, which deals with: anti-dumping, subsidies and regional trade agreements.

[211] The Committee on Agriculture in Special Session agreed on 19 November 2004 to establish a Sub-Committee on Cotton. As for the Doha mandate with respect to Agriculture, see paragraphs 13–14 of the Doha Declaration.

[212] As regards the respective Doha mandate, see paragraph 15 of the Doha Declaration.

[213] As regards the respective Doha mandate, see paragraph 16 of the Doha Declaration.

[214] As regards the respective Doha mandate, see paragraphs 17–19 of the Doha Declaration.

[215] As regards the respective Doha mandate, see paragraphs 28–29 of the Doha Declaration.

[216] As regards the respective Doha mandate, see paragraph 47 of the Doha Declaration.

[217] As regards the respective Doha mandate, see paragraphs 31–33 of the Doha Declaration.

[218] The reports are numbered WT/L/107, 247, 291, 340, 340/Corr.1, 374, 434, 500, 544, 544/Corr.1 and 591.

[219] The reports are numbered GPA/8, 8/Add.1, 19, 25, 30, 44, 58, 73, 75 and 82.

Intergovernmental organization	Date of entry into force	Date of expiry
United Nations Economic and Social Commission for Asia and the Pacific/Asian Development Bank	8 July 2004	31 December 2006
International Chamber of Commerce/ International Federation of Inspection Agencies	29 March 1996	31 December 2020
International Monetary Fund	9 December 1996	15 December 2020
International Institute for Trade and Development	28 February 2003	28 February 2007
International Telecommunications Union	22 November 2000	15 December 2020
Office International des Epizooties	4 May 1998	15 December 2020
United Nations	29 September 1995	15 December 2020
United Nations Conference on Trade and Development	16 April 2003	16 April 2008
United Nations Development Programme	24 July 2001	31 December 2020
United Nations Environment Programme	29 November 1999	31 December 2008
United Nations Industrial Development Organization	10 September 2003	10 September 2008
World Bank	28 April 1997	31 December 2020
World Intellectual Property Organization	22 December 1995	31 December 2020

(b) Observer status

135. The General Council has allowed some intergovernmental organizations to observe its meetings.[220] In 1995 and 1996, the General Council accorded *ad hoc* observer status to seven international intergovernmental organizations, including: the United Nations, UNCTAD, IMF, the World Bank, FAO, WIPO, and the OECD.[221] Subsequently, the IMF and the World Bank were granted permanent observer status in General Council meetings by the terms of their respective cooperation agreements.[222] In its meetings of 7 February 1997, the General Council granted permanent observer status to the United Nations, UNCTAD, FAO, WIPO, and the OECD.[223] In the General Council meeting of 10 December 1997, the ITC, as a joint technical cooperation agency between the WTO and UNCTAD, was "invited, as appropriate, to attend meetings of those WTO bodies it wished to attend without having to submit a request for observer status".[224]

136. To date, no intergovernmental organizations have been granted permanent observer status in General Council meetings pursuant to the guidelines for "Observer Status for International Intergovernmental Organizations in the WTO" set out in Annex 3 to the "Rules of Procedure for Sessions of the Ministerial Council and Meetings of the General Council."[225] However, consultations have been held concerning the pending requests of intergovernmental organizations for observer status in the General Council.[226]

137. Under Article XXVI of *GATS* a specific power to conclude arrangements with organizations in the area of services has also been allocated to the General Council, whereas under Article 68, *in fine*, of the *TRIPS Agreement*, the TRIPS Council is charged with establishing appropriate arrangements for cooperation with WIPO bodies.

2. Article V:2

(a) "may make appropriate arrangements . . . with non-governmental organizations"

(i) Guidelines for Arrangements on Relations with Non-Governmental Organizations

138. At its meeting of 18 July 1996, and pursuant to Article V:2, the General Council adopted the "Guidelines for Arrangements on Relations with Non-Governmental Organizations".[227] Since the adoption of the Guidelines, the General Council has addressed the issue of external transparency in its meetings.[228]

[220] *See* The Rules of Procedure of the General Council, Chapter IV, Rule 11. Rule 11 of the Rules of Procedure for the General Council provides: "Representatives of international intergovernmental organizations may attend the meetings as observers on the invitation of the General Council in accordance with the guidelines in Annex 3 to these Rules."

[221] WT/GC/M/3, 4, 5, 6, 8, 13, 17. The General Council, upon the recommendation of the Preparatory Committee, extended *ad hoc* observer status to the UN, UNCTAD, IMF and the World Bank for the first General Council meeting. WT/GC/M/1. In subsequent meetings, WIPO, FAO, and the OECD were extended the same invitation. WT/GC/M/3, 4, 5, 6, 8, 13, 17.

[222] With respect to the Agreement with the IMF, see WT/L/195, Annex I, para. 6. Also, with respect to the Agreement with the World Bank, see WT/L/195, Annex II, para. 5.

[223] WT/GC/M/18.

[224] WT/GC/M/25. Note that this was a grant of permanent observer status.

[225] WT/L/161.

[226] WT/GC/M/18, 25, 26, 35, 40/Add.3, 45, 48, 55, 57, 61, 66, 69, 71, 78, 80, 81 and 82. A list of these organizations is provided in Section II of WT/GC/W/51/Rev.9.

[227] WT/GC/M/13, section 9(c). The text of the adopted guidelines can be found in WT/L/162.

[228] WT/GC/M/29, 35, 45, 57.

(ii) Procedure to provide observer capacity

139. The General Council agreed to allow non-governmental organizations to attend the Ministerial Conference as observers at its meeting of 18 July 1996[229], and in subsequent Ministerial Conferences (Geneva, Seattle, Doha and Cancun).[230]

VII. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
The Secretariat

1. There shall be a Secretariat of the WTO (hereinafter referred to as "the Secretariat") headed by a Director-General.

2. The Ministerial Conference shall appoint the Director-General and adopt regulations setting out the powers, duties, conditions of service and term of office of the Director-General.

3. The Director-General shall appoint the members of the staff of the Secretariat and determine their duties and conditions of service in accordance with regulations adopted by the Ministerial Conference.

4. The responsibilities of the Director-General and of the staff of the Secretariat shall be exclusively international in character. In the discharge of their duties, the Director-General and the staff of the Secretariat shall not seek or accept instructions from any government or any other authority external to the WTO. They shall refrain from any action which might adversely reflect on their position as international officials. The Members of the WTO shall respect the international character of the responsibilities of the Director-General and of the staff of the Secretariat and shall not seek to influence them in the discharge of their duties.

B. INTERPRETATION AND APPLICATION OF ARTICLE VI

1. Article VI:1

(a) WTO Secretariat

140. The WTO Secretariat is based in Geneva, Switzerland and is headed by a Director-General. As regards the Headquarters Agreement with the Swiss Confederation, see paragraph 156 below.

2. Article VI: 2

(a) "the Ministerial Conference shall appoint the Director-General"

141. The General Council has appointed the following Director-Generals to date:

(a) Mr Peter Sutherland – from 1 January 1995 to 30 April 1995[231];

(b) Mr Renato Ruggiero – from 1 May 1995 to 30 April 1999[232];

(c) Mr Mike Moore – from 1 September 1999 to 31 August 2002[233]; and

(d) Dr Supachai Panitchpakdi – from 1 September 2002 to 31 August 2005.[234]

(b) "regulations setting out the powers, duties, conditions of service and term of office of the Director-General"

142. At its meeting of 22 July 1999, the General Council resolved that, "in order to improve and strengthen the current rules and procedures [for the appointment of the Director-General], a comprehensive set of rules and procedures for such appointments shall be elaborated and adopted by the end of September 2000."[235] The General Council approved the comprehensive set of procedures[236] for the appointment of the Director-General at its meeting on 10–12 and 20 December 2002.[237] These procedures would apply in their entirety to the appointment of the next Director-General.

3. Article VI:3

(a) "The Director-General shall . . . determine the duties and conditions of service of the WTO Secretariat"

143. On 15 April 1994, the Ministerial Conference adopted a declaration on "Organizational and Financial Consequences Flowing from the Implementation of the Agreement Establishing the World Trade Organization"[238], providing that "the Preparatory Committee shall consider the organizational changes, resource requirements and staff conditions of service proposed

[229] WT/GC/M/13, section 11(b). See WT/L/162 for the text of the guidelines.
[230] WT/GC/M/65, 66, 68 and 78.
[231] Mr Sutherland, as former Director-General to the GATT 1947, served as the first Director-General pursuant to Article XVI:2 of the *WTO Agreement*.
[232] At its meeting on 24 March 1995, the General Council appointed Mr Ruggiero as the Director-General. See WT/GC/M/2, p. 1.
[233] At its meeting of 22 July 1999, the General Council appointed Mr Moore as the Director-General. See WT/GC/M/46, in particular, p. 18. The text of the adopted decision can be found in WT/L/308.
[234] At its meeting of 22 July 1999, the General Council also appointed Dr Panitchpakdi as the Director-General to succeed to Mr Moore. See WT/GC/M/46, in particular, p. 18. The text of the adopted decision can be found in WT/L/308.
[235] WT/L/308, last paragraph.
[236] Issued as WT/GC/W/482 and 482/Rev.1.
[237] WT/GC/M/77. The text of the procedures were subsequently issued as WT/L/509. In addition, the General Council approved modified Conditions of Service issued as WT/GC/67.
[238] MTN.TNC/45(MIN).

in connection with the establishment of the WTO and the implementation of the Uruguay Round agreements and prepare recommendations and take decisions, to the extent necessary, on the adjustments required."[239]

144. The General Council adopted decisions regarding the terms of service applicable to the WTO staff[240] at its meetings of 30 October 1995, 7, 8 and 13 November 1996, 7 February 1997, 30 June–1 July 1997, and 24 April 1998. The General Council agreed to establish the Working Group on Conditions of Service Applicable to the Staff of the WTO Secretariat[241] on 7 February 1997.

145. At its meeting of 14, 16 and 23 October 1998, taking into consideration the report of the Working Group, the General Council decided "to endorse the compensation philosophy and to adopt the Staff Regulations and Staff Rules and the Regulations and Administrative Rules of the WTO Pension Plan, as contained in *Annex 2* of the present Decision . . .".[242]

4. Article VI:4

(a) The responsibilities of the Director-General and the staff of the Secretariat

146. See the Staff Regulations and Staff Rules of the World Trade Organization.[243]

VIII. ARTICLE VII

A. TEXT OF ARTICLE VII

Article VII
Budget and Contributions

1. The Director-General shall present to the Committee on Budget, Finance and Administration the annual budget estimate and financial statement of the WTO. The Committee on Budget, Finance and Administration shall review the annual budget estimate and the financial statement presented by the Director-General and make recommendations thereon to the General Council. The annual budget estimate shall be subject to approval by the General Council.

2. The Committee on Budget, Finance and Administration shall propose to the General Council financial regulations which shall include provisions setting out:

(a) the scale of contributions apportioning the expenses of the WTO among its Members; and

(b) the measures to be taken in respect of Members in arrears.

The financial regulations shall be based, as far as practicable, on the regulations and practices of GATT 1947.

3. The General Council shall adopt the financial regulations and the annual budget estimate by a two-thirds majority comprising more than half of the Members of the WTO.

4. Each Member shall promptly contribute to the WTO its share in the expenses of the WTO in accordance with the financial regulations adopted by the General Council.

B. INTERPRETATION AND APPLICATION OF ARTICLE VII

1. Article VII:1

(a) "the Director-General shall present to the Committee on Budget, Finance and Administration the annual budget estimate and financial statement of the WTO"

147. The Director-General submits budgetary and financial reports to the BFA Committee annually.[244]

(b) "the Committee on Budget, Finance & Administration shall . . . make recommendations"

148. The BFA Committee makes regular recommendations to the General Council on the Director-General's annual budget estimates and the financial statement.[245] These recommendations embody a compromise among the members of the BFA Committee and are presented to the General Council for adoption.[246]

---

2. Article VII:2

(a) "Committee on Budget, Finance and Administration shall propose . . . financial regulations"

149. At its meeting of 15 November 1995, the General Council adopted the WTO Financial Regulations and Financial Rules[247] on the basis of the recommendation of the Joint WTO/GATT Committee on Budget, Finance and Administration.[248] The BFA Committee regularly reviews the scale of contributions assessed to the Members and has made a decision on "inactive Members".[249]

(b) "provisions setting out the scale of contributions"

150. At its meeting of 29 June 1995, the Joint WTO/GATT Committee on Budget, Finance and Administration recommended to the General Council a new methodology[250] for calculation of the assessment of Members' contributions to the WTO budget.[251] The General Council approved the recommendations on 15 November 1995.[252] On 9 August 2000, the BFA Committee submitted draft recommendations modifying the original calculation methodology.[253]

(c) Doha Development Agenda Global Trust Fund

151. Following the guidelines set by the Doha Ministerial Conference[254], the BFA Committee developed a plan to ensure long-term funding for WTO technical assistance at an overall level no lower than that of the year 2001. A draft recommendation was presented on 3 December 2003.[255]

WT/GC/M/13; WT/BFA/28 adopted on 26 November 1996, WT/GC/M/17; WT/BFA/30 adopted on 24 April 1997, WT/GC/M/19; WT/BFA/31 adopted on 16 July 1997, WT/GC/M/21; WT/BFA/32 adopted on 22 October 1997, WT/GC/M/23; WT/BFA/33 adopted on 10 December 1997, WT/GC/M/25; WT/BFA/35 adopted on 24 April 1998, WT/GC/M/28; WT/BFA/36 adopted on 15, 16 and 22 July 1998, WT/GC/M/29; WT/BFA/38 adopted on 9–11 and 18 December 1998, WT/GC/M/32; WT/BFA/39 and 40 adopted on 15 July 1999, WT/GC/M/45; WT/BFA/44 adopted on 17 December 1999, WT/GC/M/52 and Corr.1; WT/BFA/45 adopted on 7 and 8 February 2000, WT/GC/M/53; WT/BFA/46 adopted on 3 and 8 May 2000, WT/GC/M/55; WT/BFA/47 and 48 adopted on 17 and 19 July 2000, WT/GC/M/57; WT/BFA/49 adopted on 10 October 2000, WT/GC/M/58; WT/BFA/51 adopted 7 February 2001, WT/GC/M/61; WT/BFA/52 adopted 2 March 2001, WT/GC/M/63; WT/BFA/53 adopted 10 August 2001, WT/GC/M/66; WT/BFA/54 adopted 26 October WT/GC/M/69; WT/BFA/55 adopted 13 December 2001, WT/GC/M/71; WT/BFA/56 adopted 6 February 2002, WT/GC/M/72; WT/BFA/58–59 adopted 27 September 2002, WT/GC/M/75; WT/BFA/60 adopted 5 November 2002, WT/GC/M/76; WT/BFA/62 adopted 13 February 2003, WT/GC/M/77 ; WT/BFA/63 adopted 18 July 2003, WT/GC/M/80; WT/BFA/64 adopted 28 August 2003,WT/GC/M/81; WT/BFA/67 adopted 13 November 2003, WT/GC/M/82; WT/BFA/70 adopted on 16 December 2003, WT/GC/M/84; WT/BFA/71–2 adopted on 18 May 2004, WT/GC/M/86; WT/BFA/73 adopted on 1 August 2004, WT/GC/M/87; WT/BFA/75 adopted on 13 December 2004, WT/GC/M/90.

247 WT/GC/M/8, section 7(c). The text of the Financial Regulations can be found in WT/L/156 and the text of the Financial Rules can be found in WT/L/157.

248 WT/BFA/13, L/7649, Section VII.

249 In relation to "Inactive Members", on 9 December 1994, the Preparatory Committee for the WTO adopted the following recommendation:

"(a) a Member be designated as an Inactive Member if, at the end of a financial year, the full contributions for three or more years, commencing with the year 1989*, are unpaid;

(b) the list of Inactive Members be notified to the General Council by the Committee on Budget, Finance and Administration at the beginning of each calendar year with a recommendation that these Members be urged to liquidate their arrears;

(c) assessments for Inactive Members for a given year be placed in a separate account and not counted as part of the anticipated revenue of the WTO for that year;

(d) as soon as an appropriate payment is made by an Inactive Member, the General Council be notified immediately of the consequential deletion from the list of Inactive Members;

(e) Inactive Members be denied access to training or technical assistance other than that necessary to meet their WTO Article XIV-2 obligations;

(f) arrears collected from Inactive Members for a given year be placed in the Surplus Account."

PC/7 and L/7578, para. 7. In accordance with (b) above, the Secretariat prepared the list of Inactive Members. See e.g. WT/BFA/52, Section I and WT/BFA/W/108 for the status as at February 2004.

250 The new methodology was based on the following principles: (a) The share to be contributed by each Contracting Party/Member to the annual operating budget of the GATT/WTO shall be established on the basis of that country's (or separate customs territory's) international trade (imports plus exports) in relation to the total international trade of all GATT Contracting Parties/WTO Members; (b) The figures used shall be those for the last three years for which data are available; (c) The statistics used shall relate to trade in goods, services and intellectual property rights as reported in balance-of-payments statistics from the International Monetary Fund (IMF); with regard to services, the statistics shall relate to the definition of commercial services as applied in the WTO; (d) Where IMF data deviate from IMF guidelines and include transactions not related to goods, services or intellectual property rights, adjustments provided to the WTO by the Central Bank or the National Statistical Office of a Contracting Party/Member shall be taken into account by the Secretariat when adequately documented and justified; (e) If IMF data are not available, the WTO Secretariat will use estimates based on the best other available sources; (f) A minimum contribution of 0.03 per cent will be applied to those contracting parties/members whose share in the total international trade of all GATT Contracting Parties/WTO Members is less than 0.03 per cent. WT/BFA/6, L/7633. The BFA Committee subsequently recommended that the minimum percentage contribution be changed to 0.015 per cent. WT/BFA/44. The General Council approved this recommendation at its meeting on 17 December 1999. WT/GC/M/52.

251 WT/BFA/6, L/7633.

252 WT/GC/M/8, section 7(a).

253 WT/BFA/W/50/Rev.2.

254 WT/MIN(01)/DEC/1, para.40.

255 WT/BFA/W/107.

3. Article VII:3

(a) "The General Council shall adopt the financial regulations and the annual budget estimate"

152. The General Council adopted the BFA Committee's proposed financial regulations[256] on 15 November 1995. On 15 December 2000, the General Council approved guidelines[257] with respect to Voluntary Contributions, Gifts, or Donations from Non-Governmental Donors[258] to be reviewed by January 2003.[259] Pursuant to paragraph 9 of the Guidelines, the Committee on Budget, Finance and Administration started the review in October 2002 and continued discussions in the course of 2003. At its meeting of 1 April 2004, the Committee further discussed the item and, on the basis of comments made, decided to revert to an amended text.[260]

4. Article VII:4

(a) "Each Member shall . . . contribute to the WTO . . ."

153. As regards the budget contributions of Members, see paragraph 150 above.

IX. ARTICLE VIII

A. TEXT OF ARTICLE VIII

Article VIII
Status of the WTO

1. The WTO shall have legal personality, and shall be accorded by each of its Members such legal capacity as may be necessary for the exercise of its functions.

2. The WTO shall be accorded by each of its Members such privileges and immunities as are necessary for the exercise of its functions.

3. The officials of the WTO and the representatives of the Members shall similarly be accorded by each of its Members such privileges and immunities as are necessary for the independent exercise of their functions in connection with the WTO.

4. The privileges and immunities to be accorded by a Member to the WTO, its officials, and the representatives of its Members shall be similar to the privileges and immunities stipulated in the Convention on the Privileges and Immunities of the Specialized Agencies, approved by the General Assembly of the United Nations on 21 November 1947.

5. The WTO may conclude a headquarters agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE VIII

1. Article VIII:1, VIII:2 and VIII:3

(a) Genera1

154. Paragraphs 1–3 establish certain principles regarding the legal personality, the privileges and immunities enjoyed by the Organization, its officials and the representatives of its Members, and in particular the functional character of these notions. Privileges and immunities are extended to the staff of the Organization with a view to facilitating the independent exercise of their functions. Officials of the Secretariat are, in turn, required to observe the laws of the host State and to perform their private obligations accordingly. The Director-General may decide, whether, in respect of these obligations, and in the interest of the WTO, an immunity shall be waived.[261]

2. Article VIII:4

155. Under this provision, Members are bound by the obligation to grant "similar" privileges and immunities to the WTO as those laid down in the Convention on the Privileges and Immunities of the Specialized Agencies 1947[262], whether or not the Member in question is a party to that Convention.

3. Article VIII:5

(a) Headquarters Agreement

156. The Headquarters Agreement[263] and the Infrastructure Agreement[264] between the World Trade Organization and the Swiss Confederation was approved by the General Council on 31 May 1995.[265]

---

[256] WT/GC/M/8, section 7(c). The text of the adopted Financial Regulations can be found in WT/L/156.
[257] WT/L/386.
[258] In compliance with these guidelines and in particular with paragraph 4 of WT/L/386, the Secretariat submitted document WT/BFA/W/56 that described a donation from Friedrich-Ebert-Stiftung (FES), a German-based non-profit foundation. The Committee decided that the Director-General could accept the donation in kind from the Friedrich-Ebert-Stiftung (FES) estimated at CHF 115,000 in order to facilitate the participation of developing country journalists in a series of two half-day seminars designed to familiarize these journalists with current WTO issues and build their capacity to write on WTO topics as described in document WT/BFA/W/56. (WT/BFA/53).
[259] WT/L/386, para. 9.
[260] WT/BFA/W/111 and 111/Rev.1.
[261] Staff Regulation 1.6.
[262] See G.A. Res. 179(III) of 21 November 1947, United Nations Treaty Series; 33 U.N.T.S., p. 261.
[263] The text of the Headquarters Agreement can be found in WT/GC/1 and Add.1.
[264] The text of the Infrastructure Agreement can be found in WT/GC/2.
[265] WT/GC/M/4, section 5, and WT/L/69.

(b) Transfer of assets

157. Pursuant to the decision adopted by the Preparatory Committee for the World Trade Organization on 8 December 1994[266], the Preparatory Committee, the CONTRACTING PARTIES to GATT 1947 and the Executive Committee of ICITO entered into the Agreement on the Transfer of Assets, Liabilities, Records, Staff and Functions from the Interim Commission of the International Trade Organization and the GATT to the World Trade Organization.[267]

X. ARTICLE IX

A. TEXT OF ARTICLE IX

Article IX
Decision-Making

1. The WTO shall continue the practice of decision-making by consensus followed under GATT 1947.[1] Except as otherwise provided, where a decision cannot be arrived at by consensus, the matter at issue shall be decided by voting. At meetings of the Ministerial Conference and the General Council, each Member of the WTO shall have one vote. Where the European Communities exercise their right to vote, they shall have a number of votes equal to the number of their member States[2] which are Members of the WTO. Decisions of the Ministerial Conference and the General Council shall be taken by a majority of the votes cast, unless otherwise provided in this Agreement or in the relevant Multilateral Trade Agreement.[3]

(*footnote original*) [1] The body concerned shall be deemed to have decided by consensus on a matter submitted for its consideration, if no Member, present at the meeting when the decision is taken, formally objects to the proposed decision.
(*footnote original*) [2] The number of votes of the European Communities and their member States shall in no case exceed the number of the member States of the European Communities.
(*footnote original*) [3] Decisions by the General Council when convened as the Dispute Settlement Body shall be taken only in accordance with the provisions of paragraph 4 of Article 2 of the Dispute Settlement Understanding.

2. The Ministerial Conference and the General Council shall have the exclusive authority to adopt interpretations of this Agreement and of the Multilateral Trade Agreements. In the case of an interpretation of a Multilateral Trade Agreement in Annex 1, they shall exercise their authority on the basis of a recommendation by the Council overseeing the functioning of that Agreement. The decision to adopt an interpretation shall be taken by a three-fourths majority of the Members. This paragraph shall not be used in a manner that would undermine the amendment provisions in Article X.

3. In exceptional circumstances, the Ministerial Conference may decide to waive an obligation imposed on a Member by this Agreement or any of the Multilateral Trade Agreements, provided that any such decision shall be taken by three fourths[4] of the Members unless otherwise provided for in this paragraph.[268]

(*footnote original*) [4] A decision to grant a waiver in respect of any obligation subject to a transition period or a period for staged implementation that the requesting Member has not performed by the end of the relevant period shall be taken only by consensus.

(a) A request for a waiver concerning this Agreement shall be submitted to the Ministerial Conference for consideration pursuant to the practice of decision-making by consensus. The Ministerial Conference shall establish a time-period, which shall not exceed 90 days, to consider the request. If consensus is not reached during the time-period, any decision to grant a waiver shall be taken by three fourths[4] of the Members.

(b) A request for a waiver concerning the Multilateral Trade Agreements in Annexes 1A or 1B or 1C and their annexes shall be submitted initially to the Council for Trade in Goods, the Council for Trade in Services or the Council for TRIPS, respectively, for consideration during a time-period which shall not exceed 90 days. At the end of the time-period, the relevant Council shall submit a report to the Ministerial Conference.

4. A decision by the Ministerial Conference granting a waiver shall state the exceptional circumstances justifying the decision, the terms and conditions governing the application of the waiver, and the date on which the waiver shall terminate. Any waiver granted for a period of more than one year shall be reviewed by the Ministerial Conference not later than one year after it is granted, and thereafter annually until the waiver terminates. In each review, the Ministerial Conference shall examine whether the exceptional circumstances justifying the waiver still exist and whether the terms and conditions attached to the waiver have been met. The Ministerial Conference, on the basis of the annual review, may extend, modify or terminate the waiver.

5. Decisions under a Plurilateral Trade Agreement, including any decisions on interpretations and waivers, shall be governed by the provisions of that Agreement.

---

[266] The text of the decision can be found in PC/9. At its meeting of 31 January 1995, the General Council endorsed certain provisions of the decision of the Preparatory Committee. WT/GC/M/1, section 4.I(d). The text of the endorsed decision can be found in WT/L/36.

[267] The text of the Agreement can be found in ICITO/1/39.

[268] In respect of waivers, the *WTO Agreement* contains the Understanding in Respect of Waivers of Obligations under the General Agreement on Tariffs and Trade 1994, see Section XXIII of this Chapter.

B. INTERPRETATION AND APPLICATION OF ARTICLE IX

1. Article IX:1

(a) "The WTO shall continue the practice of decision-making by consensus"

158. The General Council adopted the decision on "Decision-Making Procedures Under Articles IX and XII of the *WTO Agreement*" on 15 November 1995.[269] See also paragraph 163 below.

2. Article IX:2

(a) "The Ministerial Conference and the General Council shall have the exclusive authority to adopt interpretations of this Agreement and of the Multilateral Trade Agreements"

(i) Statements by the Appellate Body

159. In *Japan – Alcoholic Beverages II*, the Appellate Body disagreed with the Panel's finding that panel reports adopted by the DSB constitute "subsequent practice" within the meaning of Article 31 of the *Vienna Convention on the Laws of Treaties*.[270] In support of this conclusion, the Appellate Body referred to the exclusive authority of the Ministerial Conference and General Council to adopt interpretations of the *WTO Agreement* under Article IX:2:

> "We do not believe that the CONTRACTING PARTIES, in deciding to adopt a panel report, intended that their decision would constitute a definitive interpretation of the relevant provisions of GATT 1947. Nor do we believe that this is contemplated under GATT 1994. There is specific cause for this conclusion in the *WTO Agreement*. Article IX:2 of the *WTO Agreement* provides: 'The Ministerial Conference and the General Council shall have the exclusive authority to adopt interpretations of this Agreement and of the Multilateral Trade Agreements'. Article IX:2 provides further that such decisions 'shall be taken by a three-fourths majority of the Members'. The fact that such an 'exclusive authority' in interpreting the treaty has been established so specifically in the *WTO Agreement* is reason enough to conclude that such authority does not exist by implication or by inadvertence elsewhere."[271]

160. In *US – Wool Shirts and Blouses*, the Appellate Body, in support of the Panel's exercise of judicial economy referred to the exclusive authority of the Ministerial Conference and the General Council to adopt interpretations of the *WTO Agreement*:

> "As India emphasizes, Article 3.2 of the *DSU* states that the Members of the WTO 'recognize' that the dispute settlement system 'serves to preserve the rights and obligations of Members under the covered agreements, and *to clarify the existing provisions of those agreements* in accordance with customary rules of interpretation of public international law' emphasis added). Given the explicit aim of dispute settlement that permeates the *DSU*, we do not consider that Article 3.2 of the *DSU* is meant to encourage either panels or the Appellate Body to 'make law' by clarifying existing provisions of the *WTO Agreement* outside the context of resolving a particular dispute. A panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute.[272]
>
> We note, furthermore, that Article IX of the *WTO Agreement* provides that the Ministerial Conference and the General Council have the 'exclusive authority' to adopt interpretations of the *WTO Agreement* and the Multilateral Trade Agreements.[273]"[274]

(b) Requests for authoritative interpretations

161. The first request for an authoritative interpretation of the Multilateral Trade Agreements was made on 21 January 1999[275] in relation to Articles 3.7, 21.5, 22.2, 22.6, 22.7 and 23 of the *DSU*. Although the General Council was requested to hold a meeting to deal with these interpretation issues,[276] no such meeting was ever held.[277]

162. The *TRIPS Agreement* has been interpreted in regard to its specific relationship with the public health sector by the Ministerial Conference in Doha although without making reference to Article IX:2. The Declaration on the *TRIPS Agreement* and Public Health[278], adopted on 14 November 2001, states that the *TRIPS Agreement* "does not and should not prevent Members from taking measures to protect public health . . ., in particular, to promote access to medicines for all." For such purpose, the *TRIPS Agreement* provides flexibility in its interpretation.[279]

[279] WT/MIN(01)/DEC/2, para. 5. See also Section LXXVIII of the Chapter on the *TRIPS Agreement*.

3. Article IX:3 and IX:4: Waivers

(a) Decision-making procedures for granting a waiver

163. The General Council adopted the decision on "Decision-Making Procedures Under Articles IX and XII of the *WTO Agreement*" on 15 November 1995. For procedures dealing with requests for waivers or accessions to the WTO under Articles IX or XII of the *WTO Agreement*,[280] the Decision provides as follows:

> "On occasions when the General Council deals with matters related to requests for waivers or accessions to the WTO under Articles IX or XII of the *WTO Agreement* respectively, the General Council will seek a decision in accordance with Article IX:1. Except as otherwise provided, where a decision cannot be arrived at by consensus, the matter at issue shall be decided by voting under the relevant provisions of Articles IX or XII."[281]

(i) Interpretation of waivers

164. In *EC – Bananas III*, the European Communities argued that a certain waiver on its import regime for bananas should be interpreted so as to justify a deviation from Article XIII of the *GATT 1994* although it waived only compliance with Article I of the *GATT 1994* in its terms. The Panel accepted this argument to the extent that "the scope of Article XIII is identical with that of Article I"[282], but the Appellate Body rejected this finding, stating:

> "The wording of the Lomé Waiver is clear and unambiguous. By its precise terms, it waives only 'the provisions of paragraph 1 of Article I of the *General Agreement* . . . to the extent necessary' to do what is 'required' by the relevant provisions of the Lomé Convention. The Lomé Waiver does not refer to, or mention in any way, any other provision of the GATT 1994 or of any other covered agreement. Neither the circumstances surrounding the negotiation of the Lomé Waiver, nor the need to interpret it so as to permit it to achieve its objectives, allow us to disregard the clear and plain wording of the Lomé Waiver by extending its scope to include a waiver from the obligations under Article XIII. Moreover, although Articles I and XIII of the GATT 1994 are both non-discrimination provisions, their relationship is not such that a waiver from the obligations under Article I implies a waiver from the obligations under Article XIII.[283]
>
> The Panel's interpretation of the Lomé Waiver as including a waiver from the GATT 1994 obligations relating to the allocation of tariff quotas is difficult to reconcile with the limited GATT practice in the interpretation of waivers, the strict disciplines to which waivers are subjected under the *WTO Agreement*, the history of the negotiations of this particular waiver and the limited GATT practice relating to granting waivers from the obligations of Article XIII.
>
> There is little previous GATT practice on the interpretation of waivers. In the panel report in *United States – Sugar Waiver*, the panel stated:
>
> > 'The Panel took into account in its examination that waivers are granted according to Article XXV:5 only in 'exceptional circumstances', that they waive obligations under the basic rules of the General Agreement and that their terms and conditions consequently have to be interpreted narrowly.'[284]
>
> Although the WTO Agreement does not provide any specific rules on the interpretation of waivers, Article IX of the WTO Agreement and the Understanding in Respect of Waivers of Obligations under the General Agreement on Tariffs and Trade 1994, which provide requirements for granting and renewing waivers, stress the exceptional nature of waivers and subject waivers to strict disciplines. Thus, waivers should be interpreted with great care.
>
> With regard to the history of the negotiations of the Lomé Waiver, we have already noted that the CONTRACTING PARTIES limited the scope of the waiver by replacing 'preferential treatment *foreseen* by the Lomé Convention' with 'preferential treatment *required* by the Lomé Convention' (emphasis added). This change clearly suggests that the CONTRACTING PARTIES wanted to restrict the scope of the Lomé Waiver.
>
> Finally, we note that between 1948 and 1994, the CONTRACTING PARTIES granted only one waiver of Article XIII of the GATT 1947.[285] In view of the truly exceptional nature of waivers from the non-discrimination obligations under Article XIII, it is all the more difficult to accept the proposition that a waiver that does not explicitly refer to Article XIII would nevertheless waive the obligations of that Article. If the CONTRACTING PARTIES had intended to waive the obligations of the European Communities under Article XIII in the Lomé Waiver, they would have said so explicitly."[286]

165. As regards GATT practice concerning waivers, see Article XXV of the GATT Analytical Index.

(b) Waivers granted

166. The table below lists the waivers currently in force:

---

[280] WT/GC/M/8, section 3. The text of the adopted procedures can be found in WT/L/93.

4. Article IX:5

167. The *International Dairy Agreement* specifically addresses waivers in Article 7.1 of the Annex on Certain Milk Products.

XI. ARTICLE X

A. TEXT OF ARTICLE X

Article X
Amendments

1. Any Member of the WTO may initiate a proposal to amend the provisions of this Agreement or the Multilateral Trade Agreements in Annex 1 by submitting such proposal to the Ministerial Conference. The Councils listed in paragraph 5 of Article IV may also submit to the Ministerial Conference proposals to amend the provisions of the corresponding Multilateral Trade Agreements in Annex 1 the functioning of which they oversee. Unless the Ministerial Conference decides on a longer period, for a period of 90 days after the proposal has been tabled formally at the Ministerial Conference any decision by the Ministerial Conference to submit the proposed amendment to the Members for acceptance shall be taken by consensus. Unless the provisions of paragraphs 2, 5 or 6 apply, that decision shall specify whether the provisions of paragraphs 3 or 4 shall apply. If con-

sensus is reached, the Ministerial Conference shall forthwith submit the proposed amendment to the Members for acceptance. If consensus is not reached at a meeting of the Ministerial Conference within the established period, the Ministerial Conference shall decide by a two-thirds majority of the Members whether to submit the proposed amendment to the Members for acceptance. Except as provided in paragraphs 2, 5 and 6, the provisions of paragraph 3 shall apply to the proposed amendment, unless the Ministerial Conference decides by a three-fourths majority of the Members that the provisions of paragraph 4 shall apply.

2. Amendments to the provisions of this Article and to the provisions of the following Articles shall take effect only upon acceptance by all Members:

Article IX of this Agreement;
Articles I and II of GATT 1994;
Article II:1 of GATS;
Article 4 of the Agreement on TRIPS.

3. Amendments to provisions of this Agreement, or of the Multilateral Trade Agreements in Annexes 1A and 1C, other than those listed in paragraphs 2 and 6, of a nature that would alter the rights and obligations of the Members, shall take effect for the Members that have accepted them upon acceptance by two thirds of the Members and thereafter for each other Member upon acceptance by it. The Ministerial Conference may decide by a three-fourths majority of the Members that any amendment made effective under this paragraph is of such a nature that any Member which has not accepted it within a period specified by the Ministerial Conference in each case shall be free to withdraw from the WTO or to remain a Member with the consent of the Ministerial Conference.

4. Amendments to provisions of this Agreement or of the Multilateral Trade Agreements in Annexes 1A and 1C, other than those listed in paragraphs 2 and 6, of a nature that would not alter the rights and obligations of the Members, shall take effect for all Members upon acceptance by two thirds of the Members.

5. Except as provided in paragraph 2 above, amendments to Parts I, II and III of GATS and the respective annexes shall take effect for the Members that have accepted them upon acceptance by two thirds of the Members and thereafter for each Member upon acceptance by it. The Ministerial Conference may decide by a three-fourths majority of the Members that any amendment made effective under the preceding provision is of such a nature that any Member which has not accepted it within a period specified by the Ministerial Conference in each case shall be free to withdraw from the WTO or to remain a Member with the consent of the Ministerial Conference. Amendments to Parts IV, V and VI of GATS and the respective annexes shall take effect for all Members upon acceptance by two thirds of the Members.

6. Notwithstanding the other provisions of this Article, amendments to the Agreement on TRIPS meeting the requirements of paragraph 2 of Article 71 thereof may be adopted by the Ministerial Conference without further formal acceptance process.

7. Any Member accepting an amendment to this Agreement or to a Multilateral Trade Agreement in Annex 1 shall deposit an instrument of acceptance with the Director-General of the WTO within the period of acceptance specified by the Ministerial Conference.

8. Any Member of the WTO may initiate a proposal to amend the provisions of the Multilateral Trade Agreements in Annexes 2 and 3 by submitting such proposal to the Ministerial Conference. The decision to approve amendments to the Multilateral Trade Agreement in Annex 2 shall be made by consensus and these amendments shall take effect for all Members upon approval by the Ministerial Conference. Decisions to approve amendments to the Multilateral Trade Agreement in Annex 3 shall take effect for all Members upon approval by the Ministerial Conference.

9. The Ministerial Conference, upon the request of the Members parties to a trade agreement, may decide exclusively by consensus to add that agreement to Annex 4. The Ministerial Conference, upon the request of the Members parties to a Plurilateral Trade Agreement, may decide to delete that Agreement from Annex 4.

10. Amendments to a Plurilateral Trade Agreement shall be governed by the provisions of that Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE X

1. Article X:1

(a) "Amendments to this Agreement or the Multilateral Trade Agreements in Annex 1"

168. As of 31 December 2004, no provisions of this Agreement or the Multilateral Trade Agreements in Annex 1 had been amended.

2. Article X:8

(a) Amendments to the Multilateral Trade Agreements in Annexes 2 and 3

(i) Annex 2: Dispute Settlement Understanding

169. The 1994 Marrakesh Ministerial Conference mandated WTO Members to conduct a review of the *DSU* within four years of the entry into force of the *WTO Agreement* (i.e. by 1 January 1999). The DSB started the review in late 1997, and held a series of informal discussions on the basis of proposals and issues that Members identified. The review did not lead to any modification of the *DSU*.

170. The Doha Declaration mandated negotiations on improvements and clarifications of the *DSU* with the aim of reaching an agreement by May 2003.[287] The Declaration states in paragraph 47 that the negotiations on the *DSU* are not part of the single undertaking (see Section XXVII.A below).

171. On 1 February 2002, the TNC established the Special Session of the DSB to conduct the negotiations. As at 31 December 2004, the Special Session of the DSB has met a number of times to carry out negotiations on improvements and clarifications to the *DSU*, in accordance with paragraph 30 of the Doha Declaration.[288]

172. From February 2002 to December 2004 more than 40 proposals had been put forward containing text relating to 24 out of the 27 articles of the *DSU*.[289] In July 2003, the General Council extended until May 2004 the time-frame for conclusion of the negotiations.[290] In May 2004, the Chairman reported to the TNC that further time would be required to complete the work of the DSB Special Session.[291] On 1 August 2004 in the context of the "July Package" the General Council agreed to an extension of the time-frame for conclusion of the negotiations.[292] To date the negotiations have focused on a broad range of issues, including: consultations, panel proceedings, appellate proceedings, issues relating to implementation and the surveillance of implementation, and proposals relating to special and differential treatment.[293]

(ii) Annex 3: TPRM

173. As at 31 December 2004, no provisions of this Agreement had been amended.

3. Article X:9

(a) Additions to Plurilateral Trade Agreements

174. As of 31 December 2004, no Plurilateral Trade Agreements had been added to Annex 4.

(b) Deletions of Plurilateral Trade Agreements

175. The *International Bovine Meat Agreement* and the *International Dairy Agreement* were deleted from Annex 4 by decisions of the General Council. With respect to the deletion of these Agreements, see the Chapters on these Agreements, paragraphs 6 and 12, respectively.

4. Article X:10

(a) "Amendments to a Plurilateral Agreement shall be governed by the provisions of that Agreement"

176. The following provisions govern amendments to the respective Plurilateral Agreements:

(a) *Agreement on Trade in Civil Aircraft* – Article 9.5;

(b) *Agreement on Government Procurement* – Article XXIV:9;

(c) *International Dairy Agreement* – Article VIII:4 (See paragraph 175 above); and

(d) *International Bovine Meat Agreement* – Article VI:4 (See paragraph 175 above).

177. None of the Plurilateral Agreements had been amended as at 31 December 2004.

XII. ARTICLE XI

A. TEXT OF ARTICLE XI

Article XI
Original Membership

1. The contracting parties to GATT 1947 as of the date of entry into force of this Agreement, and the European Communities, which accept this Agreement and the Multilateral Trade Agreements and for which Schedules of Concessions and Commitments are annexed to GATT 1994 and for which Schedules of Specific Commitments are annexed to GATS shall become original Members of the WTO.

2. The least-developed countries recognized as such by the United Nations will only be required to undertake commitments and concessions to the extent consistent with their individual development, financial and trade needs or their administrative and institutional capabilities.

B. INTERPRETATION AND APPLICATION OF ARTICLE XI

1. General

(a) Members

178. On 31 December 2004, the WTO membership stood at 148 Members. See Sections XII.B.2 below and XXV below.

(b) Observers

179. Section XXVI below lists the observers to the WTO as at 31 December 2004.

180. Also see paragraph 135 above on intergovernmental organizations; paragraph 139 above on non-

[287] See also WT/MIN(01)/DEC/1, para. 30.

[291] TN/DS/10.
[293] WT/GC/M/87. (Draft decision contained in WT/GC/W/535 and Corr.1.)
[293] TN/DS/4, para. 6.

governmental organizations; and paragraph 187 below on applicants for accession.

2. Article XI:1

(a) "The contracting parties to GATT 1947 . . . shall become original Members of the WTO"

181. The General Council adopted the decision proposed by the Preparatory Committee for the World Trade Organization concerning the finalization of negotiations on schedules on goods and services of certain contracting parties to *GATT 1947* eligible to be original Members of the WTO[294] on 1 January 1995.

182. Of the 148 Members, 123 are original Members while 25 acceded to the Agreement.[295]

183. The Agreement entered into force for the following 76 original Members on 1 January 1995: Antigua and Barbuda, Argentina, Australia, Austria, Bahrain, Bangladesh, Barbados, Belgium, Belize, Brazil, Brunei Darussalam, Canada, Chile, Costa Rica, Côte d'Ivoire, Czech Republic, Denmark, Dominica, European Communities[296], Finland, France, Gabon, Germany, Ghana, Greece, Guyana, Honduras, Hong Kong[297], Hungary, Iceland, India, Indonesia, Ireland, Italy, Japan, Kenya, Korea, Kuwait, Luxembourg, Macau[298], Malaysia, Malta, Mauritius, Mexico, Morocco, Myanmar, Namibia, Netherlands (for the Kingdom in Europe and for the Netherlands Antilles), New Zealand, Nigeria, Norway, Pakistan, Paraguay, Peru, Philippines, Portugal, Romania, Saint Lucia, Saint Vincent and the Grenadines, Senegal, Singapore, Slovak Republic, South Africa, Spain, Sri Lanka, Suriname, Swaziland, Sweden, Tanzania, Thailand, Uganda, United Kingdom, United States, Uruguay, Venezuela and Zambia.

184. The following remaining 47 original Members accepted the *WTO Agreement* after the date of the entry into force of the Agreement: Trinidad and Tobago, Zimbabwe, Dominican Republic, Jamaica, Turkey, Tunisia, Cuba, Israel, Colombia, El Salvador, Burkina Faso, Egypt, Botswana, Central African Republic, Djibouti, Guinea Bissau, Lesotho, Malawi, Mali, Maldives, Mauritania, Togo, Poland, Switzerland, Guatemala, Burundi, Sierra Leone, Cyprus, Slovenia, Mozambique, Liechtenstein, Nicaragua, Bolivia, Guinea (Republic of), Madagascar, Cameroon, Fiji, Haiti, Benin, Rwanda, Solomon Islands, Chad, Gambia, Angola, Niger, the Democratic Republic of Congo, the Congo (Republic of).

3. Article XI:2: Least-developed countries

185. Pursuant to the Ministerial Decision on Measures in Favour of Least-Developed Countries, the General Council approved schedules on goods and services of 20 least-developed country Members[299] at its meeting of 31 May 1995. Further, the General Council approved the schedule on goods and services of the Solomon Islands at its meeting of 13 and 15 December 1995.[300] As regards the establishment and activities of the Committee on LDCs, see Section V.B.7(a) above.

XIII. ARTICLE XII

A. TEXT OF ARTICLE XII

Article XII
Accession

1. Any State or separate customs territory possessing full autonomy in the conduct of its external commercial relations and of the other matters provided for in this Agreement and the Multilateral Trade Agreements may accede to this Agreement, on terms to be agreed between it and the WTO. Such accession shall apply to this Agreement and the Multilateral Trade Agreements annexed thereto.

2. Decisions on accession shall be taken by the Ministerial Conference. The Ministerial Conference shall approve the agreement on the terms of accession by a two-thirds majority of the Members of the WTO.

3. Accession to a Plurilateral Trade Agreement shall be governed by the provisions of that Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XII

1. General

186. Ministers adopted the Decision on the Acceptance of Accession to the Agreement Establishing the World Trade Organization at the end of Uruguay negotiations.[301]

(a) Observer status for applicants for accession

187. The General Council decided to grant observer status to governments whose accession process had already begun at its meeting of 31 January 1995[302] as

[294] WT/GC/M/1, section 4.I(f). The text of the adopted decision can be found in WT/L/30.
[295] With respect to the accession, see paras. 187–192 of this Chapter.
[296] Note that the text of the Agreement identifies the original Member as the European Communities.
[297] Since 1 July 1997, when sovereignty over Hong Kong reverted to China, this separate customs territory has been known as "Hong Kong, China".
[298] Since 20 December 1999, when sovereignty over Macau reverted to China, this separate customs territory has been known as "Macau, China".
[299] WT/GC/M/4, section 2. The text of the approval can be found in WT/L/70.
[300] WT/GC/M/9, section 1(i).
[301] MTN.TNC/40
[302] WT/GC/M/1, section 2.

was the practice under GATT.[303] Section XXVI below enumerates observers to WTO bodies as at 31 December 2004.

(b) Accession working parties under GATT 1947

188. The General Council agreed at its meeting of 31 January 1995, that "as and when requests for the WTO accession under Article XII were made by states and separate customs territories for whom a GATT 1947 working party already existed, the existing working parties should continue their work as WTO accession working parties, with standards terms of reference and their respective current chairpersons".[304]

(c) Least-developed countries

189. At the High-Level Meeting on Integrated Initiatives for Least-Developed Countries' Trade Development, of 27–28 October 1997 (see Section V.B.7(a) above), Members recommended that the WTO take steps to assist LDCs in the process of accession.[305]

190. Pursuant to paragraph 42 of the Doha Ministerial Declaration, the Sub-Committee on Least-Developed Countries established a work programme (see Section V.B.7(a) above) which included a mandate from ministers to "facilitate and accelerate negotiations with acceding Least-Developed Countries."[306] On 10 December 2002, the General Council adopted a decision to facilitate and accelerate negotiations for the accession of LDCs through simplified and streamlined procedures. The Decision set down guidelines in the following broad areas: Market Access[307], WTO Rules[308], Process[309] and Trade-Related Technical Assistance and Capacity Building.[310]

2. Article XII:1

(a) "Any State or separate customs territory . . . may accede to this Agreement"

191. Between 1 January 1995 and 31 December 2004, 25 Members acceded to the *WTO Agreement*. See the table in Section XXIV below.

192. For WTO practice on accession procedures, see the Note by the Secretariat, dated 24 March 1995.[311]

3. Article XII:2

(a) Decision-making procedures on accession

193. As regards the decision-making procedures applicable to requests for accessions to the WTO, see paragraph 163 above.

(b) Working parties on accession

(i) Establishment

194. The General Council established working parties on accession on behalf of the Ministerial Conference.[312] Since 1 January 1995, the General Council has established 23 Working Parties[313] on accession for the following applicants: Viet Nam[314], Seychelles[315], Tonga[316], Vanuatu[317], Kazakstan[318], Kyrgyz Republic[319], Oman[320], Georgia[321], Azerbaijan[322], Andorra[323], Laos[324], Samoa[325], Lebanon[326], Bosnia and Herzegovina[327], Bhutan[328], Cape Verde[329], Yemen[330] and the Federal Republic of Yugoslavia[331], Bahamas[332], Tajikistan[333], Former Yugoslav Republic of Macedonia[334], Armenia[335], and Ethiopia[336].

195. Of the working parties on accession carried over from GATT 1947, 19 accessions have been completed as at 31 December 2004, including: Ecuador[337], Bulgaria[338],

[303] See GATT Analytical Index, pp. 1017–1028. .

[327] WT/GC/M/45, section 1(a).
[328] WT/GC/M/48, section 3(a).
[329] WT/GC/M/57, section 3.
[330] WT/GC/M/57, section 4.
[331] WT/GC/M/63, section 2.
[332] WT/GC/M/66, section 3.
[333] WT/GC/M/66, section 4.
[334] WT/GC/M/76, section 1.
[335] WT/GC/M/77, section 1.
[336] WT/GC/M/78, section 2.
[337] WT/GC/M/6. The Working Party was established in October of 1992 and the accession protocol accepted on 31 July 1995. The text of the decision can be found in WT/ACC/ECU/5.
[338] WT/GC/M/14. The Working Party was established in November 1986 and February 1990 and the accession protocol accepted on 2 October 1996. The text of the decision can be found in WT/ACC/BGR/6.

Mongolia[339], Panama[340], Kyrgyz Republic[341], Latvia[342], Estonia[343], Jordan[344], Georgia[345], Albania[346], Oman[347], Croatia[348] and Lithuania,[349] Armenia,[350] Cambodia,[351] Former Yugoslav Republic of Macedonia,[352] Moldova,[353] Nepal,[354] and Chinese Taipei[355]. Seven of the working parties on accession carried over from the GATT 1947 were still active as at 31 December 2004, including: Algeria, Belarus, the Russian Federation, Saudi Arabia, Sudan, Ukraine and Uzbekistan.[356]

(ii) Terms of reference

196. The General Council sets the following terms of reference for a working party on accession: "to examine the application for accession to the WTO under Article XII and to submit to the General Council/Ministerial Conference recommendations which may include a draft Protocol of Accession".[357]

(c) Accession decisions adopted by the WTO

197. The General Council, acting on behalf of the Ministerial Conference, has adopted 24 accession decisions, and thus the *WTO Agreement* has entered into force for: Ecuador[358], Qatar[359], Grenada[360], Saint Kitts and Nevis[361], Papua New Guinea[362], United Arab Emirates[363], Mongolia[364], Republic of Panama[365], Bulgaria[366], Latvia[367], Kyrgyz Republic[368], Estonia[369], Georgia[370], Jordan[371], Albania[372], Croatia[373], Oman[374], Lithuania[375], Moldova[376], China[377], Chinese Taipei[378], Former Yugoslav Republic of Macedonia[379], Armenia[380],

[339] WT/GC/M/13. The Working Party was established in October of 1991 and the accession protocol accepted on 18 July 1996. The text of the decision can be found in WT/ACC/MNG/10.

[340] WT/GC/M/14. The Working Party was established in October of 1991 and the accession protocol accepted on 2 October 1996. The text of the decision can be found in WT/ACC/PAN/20.

[341] WT/GC/M/31. The Working Party was established in April of 1996 and the accession protocol accepted on 14, 16 and 23 October 1998. The text of the decision can be found in WT/ACC/KGZ/28.

[342] WT/GC/M/31. The Working Party was established in December of 1993 and the accession protocol accepted on 14, 16 and 23 October 1998. The text of the decision can be found in WT/ACC/LVA/34.

[343] WT/GC/M/41. The Working Party was established 23 March 1994 and the accession protocol accepted on 21 May 1999. The text of the decision can be found in WT/ACC/EST/29.

[344] WT/GC/M/52. The Working Party was established 25 January 1994 and the accession protocol accepted on 17 December 1999. The text of the decision can be found in WT/ACC/JOR/34.

[345] WT/GC/M/48. The Working Party was established in July of 1996 and the accession protocol accepted on 6 October 1999. The text of the decision can be found in WT/ACC/GEO/32.

[346] WT/GC/M/57. The Working Party was established 10 December 1992 and the accession protocol accepted on 17 and 19 July 2000. The text of the decision can be found in WT/ACC/ALB/52.

[347] WT/GC/M/58. The Working Party was established in June of 1996 and the accession protocol accepted on 10 October 2000. The text of the decision can be found in WT/ACC/OMN/27.

[348] WT/GC/M/57. The Working Party was established 27 October 1993 and the accession protocol accepted on 17 and 19 July 2000. The text of the decision can be found in WT/ACC/HRV/60.

[349] WT/GC/M/61. The Working Party was established in February of 1994 and the accession protocol accepted on 7, 8, 11 and 15 December 2000. The text of the decision can be found in WT/ACC/LTU/53.

[350] WT/GC/M/1. The Working Party was established on 17 December 1993 and the accession protocol accepted on 5 February 2004. The text of the decision can be found in WT/ACC/ARM/23.

[351] WT/ACC/KHM/1/Rev.6. The Working Party was established on 21 December 1994 and the accession protocol accepted on 11 September 2003. The text of the decision can be found in WT/MIN(03)/18.

[352] WT/ACC/807/1/Rev.9. The Working Party was established on 21 December 1994 and the accession protocol accepted on 15 October 2002. The text of the decision can be found in WT/L/494.

and Nepal[381]. Qatar, Saint Kitts and Nevis, Grenada, Papua New Guinea and the United Arab Emirates were GATT contracting parties, but finalized their schedules in 1995, and thus acceded to the WTO instead of becoming original Members.

4. Article XII:3: Accession to a Plurilateral Trade Agreement

(a) Agreement on Government Procurement

198. Article XXIV of the *Agreement on Government Procurement* provides for accession "on terms to be agreed between that government and the Parties".

199. As at 31 December 2004, there were five accessions to the *Agreement on Government Procurement*: the Kingdom of the Netherlands for Aruba[382], Liechtenstein[383], Singapore[384], Hong Kong[385] and Iceland[386].

(b) Other Plurilateral Trade Agreements

200. The *International Bovine Meat Agreement*, the *International Dairy Agreement* and the *Agreement on Civil Aircraft* do not contain accession provisions.

XIV. ARTICLE XIII

A. TEXT OF ARTICLE XIII

Article XIII
Non-Application of Multilateral Trade Agreements between Particular Members

1. This Agreement and the Multilateral Trade Agreements in Annexes 1 and 2 shall not apply as between any Member and any other Member if either of the Members, at the time either becomes a Member, does not consent to such application.

2. Paragraph 1 may be invoked between original Members of the WTO which were contracting parties to GATT 1947 only where Article XXXV of that Agreement had been invoked earlier and was effective as between those contracting parties at the time of entry into force for them of this Agreement.

3. Paragraph 1 shall apply between a Member and another Member which has acceded under Article XII only if the Member not consenting to the application has so notified the Ministerial Conference before the approval of the agreement on the terms of accession by the Ministerial Conference.

4. The Ministerial Conference may review the operation of this Article in particular cases at the request of any Member and make appropriate recommendations.

5. Non-application of a Plurilateral Trade Agreement between parties to that Agreement shall be governed by the provisions of that Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIII

1. Article XIII:1

(a) "This Agreement . . . shall not apply as between any Member and any other Member . . . if either . . . does not consent"

201. As at 31 December 2004, three Members had invoked this Article with respect to other Members. The United States invoked Article XIII:1 with respect to Romania[387], Mongolia[388], Kyrgyz Republic[389], Georgia[390], Moldova[391] and Armenia[392]. As at 31 December 2004, the United States had revoked its invocation with respect to Romania[393], Mongolia[394], the Kyrgyz Republic[395] and Georgia.[396]

202. El Salvador[397] invoked Article XIII with respect to China on 5 November 2001.

203. Turkey[398] invoked Article XIII with respect to Armenia on 29 November 2001.

dance with Article XI of this Agreement. Such acceptance shall apply to this Agreement and the Multilateral Trade Agreements annexed hereto. This Agreement and the Multilateral Trade Agreements annexed hereto shall enter into force on the date determined by Ministers in accordance with paragraph 3 of the Final Act Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations and shall remain open for acceptance for a period of two years following that date unless the Ministers decide otherwise. An acceptance following the entry into force of this Agreement shall enter into force on the 30th day following the date of such acceptance.

2. A Member which accepts this Agreement after its entry into force shall implement those concessions and obligations in the Multilateral Trade Agreements that are to be implemented over a period of time starting with the entry into force of this Agreement as if it had accepted this Agreement on the date of its entry into force.

3. Until the entry into force of this Agreement, the text of this Agreement and the Multilateral Trade Agreements shall be deposited with the Director-General to the CONTRACTING PARTIES to GATT 1947. The Director-General shall promptly furnish a certified true copy of this Agreement and the Multilateral Trade Agreements, and a notification of each acceptance thereof, to each government and the European Communities having accepted this Agreement. This Agreement and the Multilateral Trade Agreements, and any amendments thereto, shall, upon the entry into force of this Agreement, be deposited with the Director-General of the WTO.

4. The acceptance and entry into force of a Plurilateral Trade Agreement shall be governed by the provisions of that Agreement. Such Agreements shall be deposited with the Director-General to the CONTRACTING PARTIES to GATT 1947. Upon the entry into force of this Agreement, such Agreements shall be deposited with the Director-General of the WTO.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIV

1. Transition from GATT 1947 to the WTO

204. The Preparatory Committee for the World Trade Organization adopted Decisions on the transitional coexistence of the *GATT 1947* and the *WTO Agreement*[399] on 8 December 1994. The General Council also adopted a decision to avoid procedural and institutional duplication at its meeting of 31 January 1995.[400]

205. In addition, the Preparatory Committee adopted Decisions to deal with cases of withdrawal from or termination of certain agreements associated with the *GATT 1947*[401] on 8 December 1994. The General Council similarly adopted a decision for invocations of provisions for delayed application and reservations under the *Customs Valuation Agreement* by developing countries.[402]

206. Pursuant to the Decision adopted on 8 December 1994 (see paragraph 204 above)[403], the General Council adopted a Decision on participation of certain signatories of the Final Act (who were eligible to become original Members of the WTO) at its meeting of 31 January 1995.[404] See also Section II on Institutions and Procedure of the GATT Analytical Index.

2. Article XIV:1

(a) Date of entry into force of the WTO Agreement

207. The *WTO Agreement* entered into force on 1 January 1995.[405]

3. Article XIV:3

(a) Notifications of acceptance of the WTO Agreement

(i) Acceptance before 1 January 1995

208. Pursuant to Article XIV:3, the Director-General of the WTO issued notifications of acceptance for the following States and separate customs territories: Antigua and Barbuda[406], Argentina[407], Australia[408], Austria[409], Bahrain[410], Bangladesh[411], Barbados[412], Belgium[413],

[474] Accepted 6 December 1994. The notification was issued 27 January 1995. WT/LET/1.
[475] Accepted 28 December 1994. The notification was issued 27 January 1995. WT/LET/1.

Uganda[476], United Kingdom[477], United States[478], Uruguay[479], Venezuela[480] and Zambia.[481]

(ii) Acceptance after 1 January 1995

209. The notification requirement is the same for countries accepting before or after 1 January 1995. However, under Article XIV:1, acceptances after 1 January 1995 enter into force on the 30th day following the date of such acceptance. Thus, the notifications of acceptance for these countries also indicate the date of entry into force of the Agreement. The following countries accepted the *WTO Agreement* after 1 January 1995: Trinidad and Tobago[482], Zimbabwe[483], Dominican Republic[484], Jamaica[485], Turkey[486], Tunisia[487], Cuba[488], Israel[489], Colombia[490], El Salvador[491], Burkina Faso[492], Egypt[493], Botswana[494], Central African Republic[495], Djibouti[496], Guinea Bissau[497], Lesotho[498], Malawi[499], Mali[500], Maldives[501], Mauritania[502], Togo[503], Poland[504], Switzerland[505], Guatemala[506], Burundi[507], Sierra Leone[508], Cyprus[509], Slovenia[510], Mozambique[511], Liechtenstein[512], Nicaragua[513], Bolivia[514], Guinea[515], Madagascar[516], Cameroon[517], Fiji[518], Haiti[519], Benin[520], Rwanda[521], Solomon Islands[522], Chad[523], the Gambia[524], Angola[525], Niger[526], Zaire[527], the Republic of the Congo[528], Panama[529], Latvia[530], Kyrgyz Republic[531],

[476] Accepted 15 April 1994. The notification was issued 27 January 1995. WT/LET/1.
[477] Accepted 30 December 1994. The notification was issued 27 January 1995. WT/LET/1.
[478] Accepted 30 December 1994. The notification was issued 27 January 1995. WT/LET/1.

[527] Now known as the Democratic Republic of Congo. Accepted 2 December 1996. Entry into force 1 January 1997. The notification was issued 5 December 1996. WT/LET/128.
[528] Accepted 25 February 1997. Entry into force 24 April 1997. The notification was issued 30 April 1997. WT/LET/139.
[529] Accepted 7 August 1997. Entry into force 6 September 1997. The notification was issued 2 October 1996. WT/LET/161.
[530] Accepted 14 October 1998. Entry into force 10 February 1999. The notifications were issued 11 November 1998 and 13 January 1999. WT/LET/246 and WT/LET/281.
[531] Accepted 20 November 1998. Entry into force 20 December 1998. The notifications were issued 11 and 25 November 1998. WT/LET/245 and WT/LET/262.

Estonia[532], Jordan[533], Georgia[534], Albania[535], Croatia[536], Oman[537], Lithuania[538] and Moldova[539], China[540] and Chinese Taipei[541], Armenia[542], Cambodia[543], Former Yugoslav Republic of Macedonia[544], and Nepal[545].

4. Article XIV:4

(a) Acceptance and entry into force of the Plurilateral Trade Agreements

(i) International Dairy Agreement

210. Acceptance of the *International Dairy Agreement* was governed by the provisions of Article VIII of that Agreement.[546] However, the *International Dairy Agreement* was deleted from Annex 4 by a decision of the General Council.[547]

(ii) International Bovine Meat Agreement

211. Acceptance of the *International Bovine Meat Agreement* was governed by the provisions of Article VI of that Agreement.[548] However, the *International Bovine Meat Agreement* was terminated by a decision of the General Council.[549]

(iii) Agreement on Civil Aircraft

212. Acceptance of the *Agreement on Civil Aircraft* is governed by the provisions of Article 9 of that Agreement. It states: "This Agreement shall be open for acceptance by signature or otherwise by governments contracting parties to the GATT and by the European Economic Community".[550]

(iv) Agreement on Government Procurement

213. Acceptance of the *Agreement on Government Procurement* is governed by the provisions of Article XXIV:1 of that Agreement.[551]

XVI. ARTICLE XV

A. TEXT OF ARTICLE XV

Article XV
Withdrawal

1. Any Member may withdraw from this Agreement. Such withdrawal shall apply both to this Agreement and the Multilateral Trade Agreements and shall take effect upon the expiration of six months from the date on which written notice of withdrawal is received by the Director-General of the WTO.

2. Withdrawal from a Plurilateral Trade Agreement shall be governed by the provisions of that Agreement.

[532] Accepted 14 October 1999. Entry into force 13 November 1999. The notification was issued 18 October 1999. WT/LET/313.
[533] Accepted 12 March 2000. Entry into force 11 April 2000. The notifications were issued 12 January and 14 March 2000. WT/LET/323 and WT/LET/333.
[534] Accepted 15 May 2000. Entry into force 14 June 2000. The notification was issued 17 May 2000. WT/LET/341.
[535] Accepted 9 August 2000. Entry into force 8 September 2000. The notifications were issued 19 July and 11 August 2000. WT/LET/347 and WT/LET/353.
[536] Accepted 31 October 2000. Entry into force 30 November 2000. The notifications were issued 19 July and 31 October 2000. WT/LET/348 and WT/LET/359.
[537] Accepted 10 October 2000. Entry into force 9 November 2000. The notification was issued 10 October 2000. WT/LET/357 and WT/LET/369.
[538] Accepted 8 December 2000. Entry into force 31 May 2001. The notifications were issued 1 May 2000 and 31 May 2001. WT/LET/364 and WT/LET/393.
[539] Accepted 26 June 2001. Entry into force 26 July 2001. The notifications were issued 11 May 2001 and 28 June 2001. WT/LET/395 and WT/LET/399.
[540] Accepted 11 November 2001. Entry into force 11 December 2001.The notification was issued 11 November 2001. WT/L/408.
[541] Accepted 11 November 2001. Entry into force 1 January 2002. The notification was issued 12 November 2001. WT/L/409 and WT/LET/411.
[542] Accepted 10 December 2002. Entry into force 5 February 2003. The notification was issued on 19 December 2002. WT/LET/434 and WT/LET/436.
[543] Accepted 11 September 2003. Entry into force 13 October 2004. The notification was issued on 14 October 2003. WT/LET/450 and WT/LET/480.
[544] Accepted 15 October 2002. Entry into force 4 April 2003. The notification was issued on 21 October 2002. WT/LET/430 and WT/LET/439.
[545] Accepted 11 September 2003. Entry into force 23 April 2004. The notification was issued on 14 October 2003. WT/LET/449 and WT/LET/464.
[546] The following governments accepted the *International Dairy Agreement* prior to its deletion from Annex 4: Argentina, Brazil, Bulgaria, Chad, European Community, Finland, Hungary, Japan, New Zealand, Norway, Romania, Sweden, Switzerland and Uruguay.
[547] WT/L/251.
[548] The following governments accepted the *International Bovine Meat Agreement* prior to its deletion from Annex 4: Argentina, Australia, Austria, Brazil, Bulgaria, Canada, Chad, Colombia, the European Community, Finland, Hungary, Japan, New Zealand, Norway, Paraguay, Romania, South Africa, Sweden, Switzerland, Tunisia, the United States and Uruguay.
[549] WT/L/252.
[550] There are 30 Signatories to the Agreement to date (31 December 2004): Bulgaria, Canada, the European Communities, Austria, Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, the United Kingdom, Egypt, Estonia, Georgia, Japan, Latvia, Lithuania, Macau, Malta, Norway, Romania, Switzerland, Chinese Taipei and the United States. Those WTO Members with observer status in the Committee are: Argentina, Australia, Bangladesh, Brazil, Cameroon, China, Colombia, the Czech Republic, Finland, Gabon, Ghana, Hungary, India, Indonesia, Israel, the Republic of Korea, Mauritius, Nigeria, Oman, Poland, Russian Federation, Saudi Arabia, Singapore, the Slovak Republic, Sri Lanka, Trinidad and Tobago, Tunisia and Turkey. In addition, the IMF and UNCTAD are also observers.
[551] As at 31 December 2004, the following governments had accepted the *Agreement on Government Procurement*: Canada, European Communities (including its 25 member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxemburg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, United Kingdom), Hong Kong China, Iceland, Israel, Japan, Korea, Liechtenstein, Netherlands with respect to Aruba, Norway, Singapore, Switzerland and the United States.

B. INTERPRETATION AND APPLICATION OF ARTICLE XV

1. Article XV:1

(a) "Any member may withdraw from this Agreement"

214. No Member has withdrawn from the *WTO Agreement* to date (31 December 2004).

2. Article XV:2

(a) "Withdrawal from a Plurilateral Trade Agreement"

215. No Member has withdrawn from any Plurilateral Agreement to date (31 December 2004).

XVII. ARTICLE XVI

A. TEXT OF ARTICLE XVI

Article XVI
Miscellaneous Provisions

1. Except as otherwise provided under this Agreement or the Multilateral Trade Agreements, the WTO shall be guided by the decisions, procedures and customary practices followed by the CONTRACTING PARTIES to GATT 1947 and the bodies established in the framework of GATT 1947.

2. To the extent practicable, the Secretariat of GATT 1947 shall become the Secretariat of the WTO, and the Director-General to the CONTRACTING PARTIES to GATT 1947, until such time as the Ministerial Conference has appointed a Director-General in accordance with paragraph 2 of Article VI of this Agreement, shall serve as Director-General of the WTO.

3. In the event of a conflict between a provision of this Agreement and a provision of any of the Multilateral Trade Agreements, the provision of this Agreement shall prevail to the extent of the conflict.

4. Each Member shall ensure the conformity of its laws, regulations and administrative procedures with its obligations as provided in the annexed Agreements.

5. No reservations may be made in respect of any provision of this Agreement. Reservations in respect of any of the provisions of the Multilateral Trade Agreements may only be made to the extent provided for in those Agreements. Reservations in respect of a provision of a Plurilateral Trade Agreement shall be governed by the provisions of that Agreement.

6. This Agreement shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVI

1. Article XVI:1

(a) "the WTO shall be guided by the decisions, procedures and customary practices followed by the CONTRACTING PARTIES to GATT 1947"

216. In *Japan – Alcoholic Beverages II*, the Appellate Body referred to Article XVI:1 in the course of examining the legal effect of panel reports adopted by the CONTRACTING PARTIES to *GATT 1947* or the Dispute Settlement Body.[552] The Appellate Body stated:

> "Article XVI:1 of the *WTO Agreement* and paragraph 1(b)(iv) of the language of Annex 1A incorporating the GATT 1994 into the *WTO Agreement* bring the legal history and experience under the GATT 1947 into the new realm of the WTO in a way that ensures continuity and consistency in a smooth transition from the GATT 1947 system. This affirms the importance to the Members of the WTO of the experience acquired by the CONTRACTING PARTIES to the GATT 1947 – and acknowledges the continuing relevance of that experience to the new trading system served by the WTO."[553]

(b) Status of bilateral agreements

217. In *EC – Poultry*, the Appellate Body upheld the Panel's rejection of Brazil's argument that "the MFN principle under Articles I and XIII of GATT does not necessarily apply to TRQs opened as a result of the compensation negotiations under Article XXVIII of GATT". In so doing, the Appellate Body found that the Oilseeds Agreement, which was a bilateral agreement between the European Communities and Brazil under Article XXVIII of the *GATT 1947*, does not constitute part of the "decisions, procedures and customary practices followed by the CONTRACTING PARTIES to GATT 1947" within the meaning of Article XVI:1. The Appellate Body stated: "These 'decisions, procedures and customary practices' include only those taken or followed by the CONTRACTING PARTIES to the GATT 1947 acting *jointly*."[554]

(c) Status of subsequent agreements

218. In *Brazil – Desiccated Coconut*, the Panel examined the legal relevance under Article XVI:1 of the Tokyo Round *SCM Code* and the practice of Code

[552] This issue is related to that of "legitimate expectation". See Section III.B(c)(xii) of the Chapter on the *DSU*.
[553] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 14. In *India – Patents (US)*, the Appellate Body acknowledged the first of the paragraphs cited above, see Appellate Body Report on *India – Patents (US)*, para. 35.
[554] Appellate Body Report on *EC – Poultry*, para. 80.

signatories to the interpretation of GATT Article VI and the *SCM Agreement* and stated:

> "We recognize that the *Pork* Panel had indicated, in passing, that the Tokyo Round SCM Code represents 'practice' under Article VI of GATT 1947. Article 31.3(b) of the Vienna Convention provides that there may be taken into account, when interpreting a treaty, '[a]ny subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation'. Article 31.3 clearly distinguishes between the use of subsequent *agreements* and of subsequent *practice* as interpretive tools. The Tokyo Round SCM Code is, in our view, in the former category and cannot itself reasonably be deemed to represent 'customary practice' of the GATT 1947 CONTRACTING PARTIES. In any event, while the practice of Code signatories might be of some interpretive value in establishing their agreement regarding the interpretation of the Tokyo Round SCM Code (and arguably through Article XVI:1 of the WTO Agreement in interpreting provisions of that Code that were carried over into the successor SCM Agreement), it is clearly not relevant to the interpretation of Article VI of GATT 1994 itself; rather, only practice under Article VI of GATT 1947 is legally relevant to the interpretation of Article VI of GATT 1994."[555]

(d) Status of unadopted panel reports

219. In *Argentina – Textiles and Apparel*, the Appellate Body reversed the Panel's finding that past GATT practice has generally required that once a Member has indicated the type(s) of duties in specifying its bound rate, it must apply such type(s) of duties, and explained the status of GATT panel reports:

> "We are not persuaded that the past GATT practice is clear. The three working party reports cited by the Panel did not arise in the context of dispute settlement cases brought pursuant to Article XXIII of the GATT 1947, unlike some working party reports in GATT history that resulted from complaints made under Article XXIII.[556] We also note that these three working party reports did not result in the CONTRACTING PARTIES giving a ruling or making recommendations, pursuant to Article XXIII:2 of the GATT 1994, on whether a variance in the type of duty applied by a contracting party from the type of duty provided for in its Schedule constituted an infringement of Article II:1 of the GATT 1947.[557] The Panel also referred to the report of the *Panel on Newsprint* that did not, on its facts, deal with the application by a contracting party of a specific duty rather than an *ad valorem* duty provided for in its Schedule.[558] Finally, the Panel relied extensively on the *unadopted* panel report in *Bananas II*. In our Report in *Japan – Taxes on Alcoholic Beverages*[559], we agreed with that panel that '*unadopted* panel reports have no legal status in the GATT or WTO system . . ., although we believe that a panel could nevertheless find useful guidance in the reasoning of an unadopted panel report that it considered to be relevant'. In the case before us, the Panel's use of the *Bananas II* panel report appears to have gone beyond deriving 'useful guidance' from the reasoning employed in that unadopted panel report. The Panel, in fact, *relies* upon the *Bananas II* panel report."[560]

(e) Status of decisions by GATT 1947 Council

220. In *US – FSC*, the Appellate Body examined the legal relevance to the interpretation of the *SCM Agreement* and GATT Article XVI:4 of the 1981 decision by the GATT 1947 Council to adopt the four panel reports on *Belgium – Income Tax*, *US – DISC*, *France – Income Tax* and *Netherlands – Income Tax*, subject to certain understandings. The Appellate Body stated:

> "We recognize that, as 'decisions' within the meaning of Article XVI:1 of the *WTO Agreement*, the adopted panel reports in the *Tax Legislation Cases*, together with the 1981 Council action, could provide 'guidance' to the WTO."[561]

221. In this regard, the Panel on *US – FSC* stated:

> "Article XVI:1 of the *WTO Agreement* on its face is not limited to decisions in the form of 'legal instruments',

---

[555] Panel Report on *Brazil – Desiccated Coconut*, para. 256.

[556] The Appellate Body quoted the Panel Report on *Australia – Ammonium Sulphate*.

[557] (*footnote original*) As the Panel observed in paragraph 6.26 of the Panel Report, we note that the working party report in *Transposition of Schedule XXXVII – Turkey*, BISD 3S/127, stated in paragraph 4:

> "The obligations of contracting parties are established by the rates of duty appearing in the schedules and any change in the rate such as a change from a specific to an ad valorem duty could in some circumstances adversely affect the value of the concessions to other contracting parties. Consequently, any conversion of specific into *ad valorem* rates of duty can be made only under some procedure for the modification of concessions."

This working party report, which examined a proposal by Turkey to change into *ad valorem* duties the specific duties provided for in its Schedule, did not address whether or not such a modification would be inconsistent with Article II of the GATT 1947.

[558] (*footnote original*) We note that the Panel Report on *EEC – Newsprint*, stated in paragraph 50:

> . . . under long-standing GATT practice, even purely formal changes in the tariff schedule of a contracting party, which may not affect the GATT rights of other countries, such as the conversion of a specific to an *ad valorem* duty without an increase in the protective effect of the tariff rate in question, have been considered to require renegotiations.

It should be noted that the issue before the *Panel on Newsprint* was *not* whether a change in the type of customs duty applied by a contracting party from a specific duty to an *ad valorem* duty was consistent with Article II of the GATT 1947, but whether a reduction in a tariff-rate quota from 1.5 million tonnes to 0.5 million tonnes was consistent with Article II of the GATT 1947. For this reason, we consider the above statement to be *obiter*.

[559] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 14–15.

[560] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 43.

[561] Appellate Body Report on *US – FSC*, para. 115.

but rather applies to all decisions by the CONTRACTING PARTIES to GATT 1947 – including decisions to adopt panel reports – as well as to procedures and customary practices of the CONTRACTING PARTIES."[562]

(f) Status of adopted panel reports

222. The Appellate Body on *Japan – Alcoholic Beverages II* noted that the Panel in that case, stated that adopted panel reports "are often considered by subsequent panels" and that "they create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute."[563] The Appellate Body found that adopted panel reports are not binding "except with respect to resolving the particular dispute between the parties to that dispute":

> "Adopted panel reports are an important part of the GATT *acquis*. They are often considered by subsequent panels. They create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute. However, they are not binding, except with respect to resolving the particular dispute between the parties to that dispute.[564] In short, their character and their legal status have not been changed by the coming into force of the *WTO Agreement*.
>
> For these reasons, we do not agree with the Panel's conclusion in paragraph 6.10 of the Panel Report that 'panel reports adopted by the GATT CONTRACTING PARTIES and the WTO Dispute Settlement Body constitute subsequent practice in a specific case' as the phrase 'subsequent practice' is used in Article 31 of the *Vienna Convention*. Further, we do not agree with the Panel's conclusion in the same paragraph of the Panel Report that adopted panel reports in themselves constitute 'other decisions of the CONTRACTING PARTIES to GATT 1947' for the purposes of paragraph 1(b)(iv) of the language of Annex 1A incorporating the GATT 1994 into the *WTO Agreement*.
>
> However, we agree with the Panel's conclusion in that same paragraph of the Panel Report that *unadopted* panel reports 'have no legal status in the GATT or WTO system since they have not been endorsed through decisions by the CONTRACTING PARTIES to GATT or WTO Members'. Likewise, we agree that 'a panel could nevertheless find useful guidance in the reasoning of an unadopted panel report that it considered to be relevant."[565]

(g) Status of panel findings that are not appealed

223. In *Canada – Periodicals*, the Appellate Body stated:

> "[A] panel finding that has not been specifically appealed in a particular case should not be considered to have been endorsed by the Appellate Body. Such a finding may be examined by the Appellate Body when the issue is raised properly in a subsequent appeal."[566]

(i) Relationship with Paragraph 1(b) of GATT 1994

224. In *US – FSC*, with respect to the difference in scope between Article XVI:1 of the *WTO Agreement* and Paragraph 1(b) of the *GATT 1994*, the Panel stated:

> "In our view, the difference between the more particularly defined range of actions falling within the ambit of Article XVI:1 of the *WTO Agreement* and the list of 'legal instruments' that are incorporated into GATT 1994 pursuant to the language in Annex 1A incorporating GATT 1994 into the *WTO Agreement* is explained by the different implications of the two provisions. Inclusion of a decision in the language of Annex 1A means that the decision actually becomes part of GATT 1994 and thus of the *WTO Agreement*. Inclusion of a decision within the scope of Article XVI:1 of the *WTO Agreement*, on the other hand, means that the WTO 'shall be guided' by that decision. A decision which is part of GATT 1994 is legally binding on all WTO Members (to the extent it is not in conflict with a provision of another Annex 1A agreement), while a decision which provides 'guidance' in our view is not legally binding but provides direction to the WTO. It is important to note that, as explained by the Appellate Body, adopted panel reports should be taken into account 'where they are relevant to a dispute'. In our view, this consideration applies equally to any other decision, procedure or customary practice of the CONTRACTING PARTIES to GATT 1947."[567]

225. See also paragraph 216 above, and Section I.B.1of the Chapter on the *GATT 1994*.

2. Article XVI:2

(a) "the Director-General to the CONTRACTING PARTIES to GATT 1947, . . ., shall serve as Director-General of the WTO"

226. Mr Peter Sutherland, Director-General to the *GATT 1947*, served as the first Director-General to the WTO from 1 January 1995 to 30 April 1995. See paragraph 141 above.

---

[562] Panel Report on *US – FSC*, para. 7.77.
[563] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 14.
[564] (*footnote original*) It is worth noting that the Statute of the International Court of Justice has an explicit provision, Article 59, to the same effect. This has not inhibited the development by that Court (and its predecessor) of a body of case law in which considerable reliance on the value of previous decisions is readily discernible.

[567] Panel Report on *US – FSC*, para. 7.78.

227. As regards the procedures governing the appointment of the Director-General, see Section VII.B.2 above.

3. Article XVI:4

(a) "Each Member shall ensure the conformity of its laws, regulations and administrative procedures"

228. In *US – 1916 Act (Japan)*, the Appellate Body upheld the Panel's findings of violation[568] that a breach of any provision of any annexed agreement gives rise to a violation of Article XVI:4 of the *WTO Agreement*.

> "With respect to Article XVI:4 of the Agreement Establishing the WTO, we note that, if some of the terms of Article XVI:4 differ from those of Article 18.4, they are identical and unqualified as far as the basic obligation of ensuring the conformity of laws, regulations and administrative procedures found in both articles is concerned. The same reasoning as for Article 18.4 applies to Article XVI:4 regarding the terms found in both provisions. In other words, if a provision of an 'annexed Agreement' is breached, a violation of Article XVI:4 immediately occurs. GATT 1994 is one of the 'annexed Agreements' within the meaning of Article XVI:4. Since we found that provisions of Article VI of the GATT 1994 have been breached, we conclude that, by violating this provision, the United States violates Article XVI:4 of the *WTO Agreement*."[569]

229. In *US – Section 301 Trade Act*, the Panel described the role of Article XVI as confirming the following "GATT *acquis*":

> "As a general proposition, GATT *acquis*, confirmed in Article XVI:4 of the *WTO Agreement* and recent WTO panel reports, make abundantly clear that legislation as such, independently from its application in specific cases, may breach GATT/WTO obligations:
>
> (a) In GATT jurisprudence, to give one example, legislation providing for tax discrimination against imported products was found to be GATT inconsistent even before it had actually been applied to specific products and thus before any given product had actually been discriminated against.
>
> (b) Article XVI:4 of the *WTO Agreement* explicitly confirms that legislation as such falls within the scope of possible WTO violations. It provides as follows:
>
> > 'Each Member shall ensure the conformity of its *laws, regulations and administrative procedures* with its obligations as provided in the annexed Agreements' (emphasis added).
> >
> > The three types of measures explicitly made subject to the obligations imposed in the *WTO Agreement*s – 'laws, regulations and administrative procedures' – are measures that are applicable generally; not measures taken necessarily in a specific case or dispute. Article XVI:4, though not expanding the material obligations under *WTO Agreement*s, expands the type of measures made subject to these obligations.
>
> (c) Recent WTO panel reports confirm, too, that legislation as such, independently from its application in a specific case, can be inconsistent with WTO rules.
>
> > Legislation my thus breach WTO obligations. This must be true, too, in respect of Article 23 of the *DSU*. This is so, in our view, not only because of the above-mentioned case law and Article XVI:4, but also because of the very nature of obligations under Article 23."[570]

230. The Appellate Body on *US – Hot-Rolled Steel from Japan* upheld the Panel's finding of a violation of Article 9.4 of the *Anti-Dumping Agreement*, and the "consequent findings" that the US acted inconsistently with *inter alia*, Article XVI:4 of the *WTO Agreement*[571].

231. In *US – Countervailing Measures on Certain EC Products*, the Panel concluded that 19 U.S.C. § 1677(5)(F) mandated the United States to act inconsistently with the *SCM Agreement* and with Article XVI:4 of the *WTO Agreement*, and, *as such*, was inconsistent with United States' obligations:

> "[T]he aggregate effect of the legislative history, object and purpose of Section 1677(5)(F), the Statement of Administrative Action, and the determinative interpretation of that legislation by the US Court of Appeals for the Federal Circuit, is to mandate an application of Section 1677(5)(F) that will be inconsistent with Articles 10, 14, 19, and 21 of the *SCM Agreement* since it prohibits the relevant authority from adopting a general rule that in all situations of arm's-length privatizations for fair market value, no benefit from prior financial contributions . . . continues to accrue to the privatized producer, even though Section 1677(5)(F)'s statutory language alone would not mandate a violation of the *SCM Agreement* and the *WTO Agreement*."[572]

232. However, the Appellate Body disagreed and reversed the Panel's finding:[573]

> "We agree with the Panel that privatization at arm's length and at fair market price will *usually* extinguish the remaining part of a benefit bestowed by a prior, non-

---

[569] Panel Report on *US – 1916 Act (Japan)*, paras. 6.287; as regards the Anti-Dumping Agreement see also: Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.93 as confirmed by the respective Appellate Body Report at para. 302.
[570] Panel Report on *US – Section 301 Trade Act*, paras. 7.41–7.42.
[571] Appellate Body Report on *U.S. – Hot-Rolled Steel from Japan*, paras.
[572] Panel Report on *US – Countervailing Measures on Certain EC Products*, para. 7.157.
[573] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, para. 161.

recurring financial contribution. However, we disagree with the Panel that this result will *necessarily* and *always* follow from every privatization at arm's length and for fair market value . . . The Panel's basis for this finding is incorrect."[574]

233. The Appellate Body on *US – Offset Act ("Byrd Amendment")* found that violations of Article 18.1 of the *Anti-Dumping Agreement* and Article 32.1 of the *SCM Agreement* implied a violation of Article XVI:4 of the *WTO Agreement*.[575]

4. Article XVI:5

(a) "Reservations in respect of any of the provisions of the Multilateral Trade Agreements"

234. Exceptions to the "principle of non-reservation" are provided in the following articles:

(a) *Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994* – Article 21 and paragraph 2 of Annex III;

(b) *Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994* – Article 18.2;

(c) *Agreement on Technical Barriers to Trade* – Article 15.1;

(d) *Agreement on Subsidies and Countervailing Measures* – Article 32.2; and

(e) *TRIPS* – Article 72.

235. As of 31 December 2004, no reservation has been made under the provisions noted in paragraph 234 above.

(b) "Reservations in respect of a provision of a Plurilateral Trade Agreement"

236. The following Agreements provide for reservations:

(a) *Agreement on Civil Aircraft* – Article 9.2.1;

(b) *Agreement on Government Procurement* – Article XXIV:4;

(c) *International Dairy Agreement* – Article VIII:1(b); and

(d) *International Bovine Meat Agreement* – Article VI:1(b).

237. As of 31 December 2004, no reservation has been made under any of the Plurilateral Agreements in paragraph 236 above.

5. Article XVI:6

(a) Registration of the Agreement

238. The *WTO Agreement* was registered on 1 June 1995[576] in accordance with Article 102 of the United Nations Charter.[577]

XVIII. EXPLANATORY NOTES

A. TEXT OF EXPLANATORY NOTES

Explanatory Notes

The terms "country" or "countries" as used in this Agreement and the Multilateral Trade Agreements are to be understood to include any separate customs territory Member of the WTO.

In the case of a separate customs territory Member of the WTO, where an expression in this Agreement and the Multilateral Trade Agreements is qualified by the term "national", such expression shall be read as pertaining to that customs territory, unless otherwise specified.

B. INTERPRETATION AND APPLICATION OF THE EXPLANATORY NOTES

No jurisprudence or decision of a competent WTO body.

XIX. DECLARATION ON THE CONTRIBUTION OF THE WORLD TRADE ORGANIZATION TO ACHIEVING GREATER COHERENCE IN GLOBAL ECONOMIC POLICYMAKING

A. TEXT

1. *Ministers recognize* that the globalization of the world economy has led to ever-growing interactions between the economic policies pursued by individual countries, including interactions between the structural, macroeconomic, trade, financial and development aspects of economic policymaking. The task of achieving harmony between these policies falls primarily on

[574] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, paras. 157–158.
[575] Panel Report on *US – Offset Act ("Byrd Amendment")* paras. 300–302.
[576] Registration Number 31874.
[577] Article 102 of the United Nations Charter provides:

"1. Every treaty and every international agreement entered into by any Member of the United Nations after the present Charter comes into effect shall as soon as possible be registered by the Secretariat and published by it.

2. No party to any such treaty or international agreement which has not been registered in accordance with the provisions of paragraph 1 of this Article may invoke that treaty or agreement before any organ of the United Nations."

governments at the national level, but their coherence internationally is an important and valuable element in increasing the effectiveness of these policies at national level. The Agreements reached in the Uruguay Round show that all the participating governments recognize the contribution that liberal trading policies can make to the healthy growth and development of their own economies and of the world economy as a whole.

2. Successful cooperation in each area of economic policy contributes to progress in other areas. Greater exchange rate stability, based on more orderly underlying economic and financial conditions, should contribute towards the expansion of trade, sustainable growth and development, and the correction of external imbalances. There is also a need for an adequate and timely flow of concessional and non-concessional financial and real investment resources to developing countries and for further efforts to address debt problems, to help ensure economic growth and development. Trade liberalization forms an increasingly important component in the success of the adjustment programmes that many countries are undertaking, often involving significant transitional social costs. In this connection, Ministers note the role of the World Bank and the IMF in supporting adjustment to trade liberalization, including support to net food-importing developing countries facing short-term costs arising from agricultural trade reforms.

3. The positive outcome of the Uruguay Round is a major contribution towards more coherent and complementary international economic policies. The results of the Uruguay Round ensure an expansion of market access to the benefit of all countries, as well as a framework of strengthened multilateral disciplines for trade. They also guarantee that trade policy will be conducted in a more transparent manner and with greater awareness of the benefits for domestic competitiveness of an open trading environment. The strengthened multilateral trading system emerging from the Uruguay Round has the capacity to provide an improved forum for liberalization, to contribute to more effective surveillance, and to ensure strict observance of multilaterally agreed rules and disciplines. These improvements mean that trade policy can in the future play a more substantial role in ensuring the coherence of global economic policymaking.

4. *Ministers recognize*, however, that difficulties the origins of which lie outside the trade field cannot be redressed through measures taken in the trade field alone. This underscores the importance of efforts to improve other elements of global economic policymaking to complement the effective implementation of the results achieved in the Uruguay Round.

5. The interlinkages between the different aspects of economic policy require that the international institutions with responsibilities in each of these areas follow consistent and mutually supportive policies. The World Trade Organization should therefore pursue and develop cooperation with the international organizations responsible for monetary and financial matters, while respecting the mandate, the confidentiality requirements and the necessary autonomy in decision-making procedures of each institution, and avoiding the imposition on governments of cross-conditionality or additional conditions. Ministers further invite the Director-General of the WTO to review with the Managing Director of the International Monetary Fund and the President of the World Bank, the implications of the WTO's responsibilities for its cooperation with the Bretton Woods institutions, as well as the forms such cooperation might take, with a view to achieving greater coherence in global economic policymaking.

B. INTERPRETATION AND APPLICATION

239. In *Argentina – Textiles and Apparel*, the Appellate Body upheld the Panel's finding "that there is nothing in the . . . Declaration on Coherence which justifies a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the GATT 1994."[578] Also see paragraph 26 above.

XX. DECLARATION ON THE RELATIONSHIP OF THE WORLD TRADE ORGANIZATION WITH THE INTERNATIONAL MONETARY FUND

A. TEXT

Ministers,

Noting the close relationship between the CONTRACTING PARTIES to the GATT 1947 and the International Monetary Fund, and the provisions of the GATT 1947 governing that relationship, in particular Article XV of the GATT 1947;

Recognizing the desire of participants to base the relationship of the World Trade Organization with the International Monetary Fund, with regard to the areas covered by the Multilateral Trade Agreements in Annex 1A of the WTO Agreement, on the provisions that have governed the relationship of the CONTRACTING PARTIES to the GATT 1947 with the International Monetary Fund;

Hereby reaffirm that, unless otherwise provided for in the Final Act, the relationship of the WTO with the International Monetary Fund, with regard to the areas covered by the Multilateral Trade Agreements in Annex 1A of the WTO Agreement, will be based on the provisions that have governed the relationship of the

[578] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

CONTRACTING PARTIES to the GATT 1947 with the International Monetary Fund.

B. INTERPRETATION AND APPLICATION

240. In *Argentina – Textiles and Apparel*, the Appellate Body upheld the Panel's finding "that there is nothing in the Agreement Between the IMF and the WTO ... which justifies a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the GATT 1994."[579]

XXI. DECISION ON THE ACCEPTANCE OF AND ACCESSION TO THE AGREEMENT ESTABLISHING THE WORLD TRADE ORGANIZATION

A. TEXT

Ministers,

Noting that Articles XI and XIV of the Agreement Establishing the World Trade Organization (hereinafter referred to as "*WTO Agreement*") provide that only contracting parties to the GATT 1947 as of the entry into force of the *WTO Agreement* for which schedules of concessions and commitments are annexed to GATT 1994 and for which schedules of specific commitments are annexed to the General Agreement on Trade in Services (hereinafter referred to as "GATS") may accept the *WTO Agreement*;

Noting further that paragraph 5 of the Final Act Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations (hereinafter referred to as "Final Act" and "Uruguay Round" respectively) provides that the schedules of participants which are not contracting parties to GATT 1947 as of the date of the Final Act are not definitive and shall be subsequently completed for the purpose of their accession to GATT 1947 and their acceptance of the *WTO Agreement*;

Having regard to paragraph 1 of the Decision on Measures in Favour of Least-Developed Countries which provides that the least-developed countries shall be given an additional time of one year from 15 April 1994 to submit their schedules as required in Article XI of the *WTO Agreement*;

Recognizing that certain participants in the Uruguay Round which had applied GATT 1947 on a *de facto* basis and became contracting parties under Article XXVI:5(c) of the GATT 1947 were not in a position to submit schedules to GATT 1994 and the GATS;

Recognizing further that some States or separate customs territories which were not participants in the Uruguay Round may become contracting parties to GATT 1947 before the entry into force of the *WTO Agreement* and that States or customs territories should be given the opportunity to negotiate schedules to GATT 1994 and the GATS so as to enable them to accept the *WTO Agreement*;

Taking into account that some States or separate customs territories which cannot complete the process of accession to GATT 1947 before the entry into force of the *WTO Agreement* or which do not intend to become contracting parties to GATT 1947 may wish to initiate the process of their accession to the WTO before the entry into force of the *WTO Agreement*;

Recognizing that the *WTO Agreement* does not distinguish in any way between WTO Members which accepted that Agreement in accordance with its Articles XI and XIV and WTO Members which acceded to it in accordance with its Article XII and wishing to ensure that the procedures for accession of the States and separate customs territories which have not become contracting parties to the GATT 1947 as of the date of entry into force of the *WTO Agreement* are such as to avoid any unnecessary disadvantage or delay for these States and separate customs territories;

Decide that:

1. (a) Any Signatory of the Final Act

   - to which paragraph 5 of the Final Act applies, or
   - to which paragraph 1 of the Decision on Measures in Favour of Least-Developed Countries applies, or
   - which became a contracting party under Article XXVI:5(c) of the GATT 1947 before 15 April 1994 and was not in a position to establish a schedule to GATT 1994 and the GATS for inclusion in the Final Act, and any State or separate customs territory
   - which becomes a contracting party to the GATT 1947 between 15 April 1994 and the date of entry into force of the *WTO Agreement*

   may submit to the Preparatory Committee for its examination and approval a schedule of concessions and commitments to GATT 1994 and a schedule of specific commitments to the GATS.

   (b) The *WTO Agreement* shall be open for acceptance in accordance with Article XIV of that Agreement by contracting parties to GATT 1947 the schedules of which have been so submitted and approved before the entry into force of the *WTO Agreement*.

   (c) The provisions of subparagraphs (a) and (b) of this paragraph shall be without prejudice to the

[579] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

right of the least-developed countries to submit their schedules within one year from 15 April 1994.

2. (a) Any State or separate customs territory may request the Preparatory Committee to propose for approval by the Ministerial Conference of the WTO the terms of its accession to the *WTO Agreement* in accordance with Article XII of that Agreement. If such a request is made by a State or separate customs territory which is in the process of acceding to GATT 1947, the Preparatory Committee shall, to the extent practicable, examine the request jointly with the Working Party established by the CONTRACTING PARTIES to GATT 1947 to examine the accession of that State or separate customs territory.

(b) The Preparatory Committee shall submit to the Ministerial Conference a report on its examination of the request. The report may include a protocol of accession, including a schedule of concessions and commitments to GATT 1994 and a schedule of specific commitments for the GATS, for approval by the Ministerial Conference. The report of the Preparatory Committee shall be taken into account by the Ministerial Conference in its consideration of any application by the State or separate customs territory concerned to accede to the *WTO Agreement*.

B. INTERPRETATION AND APPLICATION

No jurisprudence or decision of a competent WTO body.

XXII. DECISION ON MEASURES IN FAVOUR OF LEAST-DEVELOPED COUNTRIES

A. TEXT

Ministers,

Recognizing the plight of the least-developed countries and the need to ensure their effective participation in the world trading system, and to take further measures to improve their trading opportunities;

Recognizing the specific needs of the least-developed countries in the area of market access where continued preferential access remains an essential means for improving their trading opportunities;

Reaffirming their commitment to implement fully the provisions concerning the least-developed countries contained in paragraphs 2(d), 6 and 8 of the Decision of 28 November 1979 on Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries;

Having regard to the commitment of the participants as set out in Section B (vii) of Part I of the Punta del Este Ministerial Declaration;

1. Decide that, if not already provided for in the instruments negotiated in the course of the Uruguay Round, notwithstanding their acceptance of these instruments, the least-developed countries, and for so long as they remain in that category, while complying with the general rules set out in the aforesaid instruments, will only be required to undertake commitments and concessions to the extent consistent with their individual development, financial and trade needs, or their administrative and institutional capabilities. The least-developed countries shall be given additional time of one year from 15 April 1994 to submit their schedules as required in Article XI of the Agreement Establishing the World Trade Organization.

2. Agree that:

(i) Expeditious implementation of all special and differential measures taken in favour of least-developed countries including those taken within the context of the Uruguay Round shall be ensured through, inter alia, regular reviews.

(ii) To the extent possible, MFN concessions on tariff and non-tariff measures agreed in the Uruguay Round on products of export interest to the least-developed countries may be implemented autonomously, in advance and without staging. Consideration shall be given to further improve GSP and other schemes for products of particular export interest to least-developed countries.

(iii) The rules set out in the various agreements and instruments and the transitional provisions in the Uruguay Round should be applied in a flexible and supportive manner for the least-developed countries. To this effect, sympathetic consideration shall be given to specific and motivated concerns raised by the least-developed countries in the appropriate Councils and Committees.

(iv) In the application of import relief measures and other measures referred to in paragraph 3(c) of Article XXXVII of GATT 1947 and the corresponding provision of GATT 1994, special consideration shall be given to the export interests of least-developed countries.

(v) Least-developed countries shall be accorded substantially increased technical assistance in the development, strengthening and diversification of their production and export bases including those of services, as well as in trade promotion, to enable them to maximize the benefits from liberalized access to markets.

3. Agree to keep under review the specific needs of the least-developed countries and to continue to seek the adoption of positive measures which facilitate the expansion of trading opportunities in favour of these countries.

B. INTERPRETATION AND APPLICATION

1. Least-Developed Countries (LDCs) in the Doha Round

241. The Doha Declaration[580] launched a comprehensive round of negotiations. The Work Programme for the negotiations includes provisions for LDCs.[581] As regards the Sub-Committee on LDCs, see Section V.B.7(a) above. As regards accession of LDCs, see Section XIII.B.1(c) above.

XXIII. UNDERSTANDING IN RESPECT OF WAIVERS OF OBLIGATIONS UNDER THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

A. TEXT

Members hereby *agree* as follows:

1. A request for a waiver or for an extension of an existing waiver shall describe the measures which the Member proposes to take, the specific policy objectives which the Member seeks to pursue and the reasons which prevent the Member from achieving its policy objectives by measures consistent with its obligations under GATT 1994.

2. Any waiver in effect on the date of entry into force of the WTO Agreement shall terminate, unless extended in accordance with the procedures above and those of Article IX of the WTO Agreement, on the date of its expiry or two years from the date of entry into force of the WTO Agreement, whichever is earlier.

3. Any Member considering that a benefit accruing to it under GATT 1994 is being nullified or impaired as a result of:

(a) the failure of the Member to whom a waiver was granted to observe the terms or conditions of the waiver, or

(b) the application of a measure consistent with the terms and conditions of the waiver

may invoke the provisions of Article XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding.

B. INTERPRETATION AND APPLICATION

242. With respect to the WTO practice on waivers, see Section X.B.3 above.

243. As regards Members' invocation of provisions of Article XXIII (as elaborated and applied by the *DSU*) in response to the nullification or impairments of benefits accruing to Members under *GATT 1994*, see Section XXIV of the Chapter on the *GATT 1994*.

XXVII. DOHA TEXTS

A. DOHA DECLARATION

MINISTERIAL DECLARATION

Adopted on 14 November 2001[583]

1. The multilateral trading system embodied in the World Trade Organization has contributed significantly to economic growth, development and employment throughout the past fifty years. We are determined, particularly in the light of the global economic slowdown, to maintain the process of reform and liberalization of trade policies, thus ensuring that the system plays its full part in promoting recovery, growth and development. We therefore strongly reaffirm the principles and objectives set out in the Marrakesh Agreement Establishing the World Trade Organization, and pledge to reject the use of protectionism.

2. International trade can play a major role in the promotion of economic development and the alleviation of poverty. We recognize the need for all our peoples to benefit from the increased opportunities and welfare gains that the multilateral trading system generates. The majority of WTO Members are developing countries. We seek to place their needs and interests at the heart of the Work Programme adopted in this Declaration. Recalling the Preamble to the Marrakesh Agreement, we shall continue to make positive efforts designed to ensure that developing countries, and especially the least-developed among them, secure a share in the growth of world trade commensurate with the needs of their economic development. In this context, enhanced market access, balanced rules, and well targeted, sustainably financed technical assistance and capacity-building programmes have important roles to play.

3. We recognize the particular vulnerability of the least-developed countries and the special structural difficulties they face in the global economy. We are committed to addressing the marginalization of least-developed countries in international trade and to improving their effective participation in the multilateral trading system. We recall the commitments made by Ministers at our meetings in Marrakesh, Singapore and Geneva, and by the international community at the Third UN Conference on Least-Developed Countries in Brussels, to help least-developed countries secure beneficial and meaningful integration into the multilateral trading system and the global economy. We are determined that the WTO will play its part in building effectively on these commitments under the Work Programme we are establishing.

4. We stress our commitment to the WTO as the unique forum for global trade rule-making and liberalization, while also recognizing that regional trade agreements can play an important role in promoting the liberalization and expansion of trade and in fostering development.

5. We are aware that the challenges Members face in a rapidly changing international environment cannot be addressed through measures taken in the trade field alone. We shall continue to work with the Bretton Woods institutions for greater coherence in global economic policy-making.

6. We strongly reaffirm our commitment to the objective of sustainable development, as stated in the Preamble to the Marrakesh Agreement. We are convinced that the aims of upholding and safeguarding an open and non-discriminatory multilateral trading system, and acting for the protection of the environment and the promotion of sustainable development can and must be mutually supportive. We take note of the efforts by Members to conduct national environmental assessments of trade policies on a voluntary basis. We recognize that under WTO rules no country should be prevented from taking measures for the protection of human, animal or plant life or health, or of the environment at the levels it considers appropriate, subject to the requirement that they are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same

[582] At the time of writing, the General Council had agreed on 15 February 2005 to establish a working party in relation to the accession of Montenegro and a separate working party in relation to the accession of Serbia – WT/GC/M/92.

[583] WT/MIN(01)/DEC/1.

conditions prevail, or a disguised restriction on international trade, and are otherwise in accordance with the provisions of the WTO Agreements. We welcome the WTO´s continued cooperation with UNEP and other inter-governmental environmental organizations. We encourage efforts to promote cooperation between the WTO and relevant international environmental and developmental organizations, especially in the lead-up to the World Summit on Sustainable Development to be held in Johannesburg, South Africa, in September 2002.

7. We reaffirm the right of Members under the General Agreement on Trade in Services to regulate, and to introduce new regulations on, the supply of services.

8. We reaffirm our declaration made at the Singapore Ministerial Conference regarding internationally recognized core labour standards. We take note of work under way in the International Labour Organization (ILO) on the social dimension of globalization.

9. We note with particular satisfaction that this Conference has completed the WTO accession procedures for China and Chinese Taipei. We also welcome the accession as new Members, since our last Session, of Albania, Croatia, Georgia, Jordan, Lithuania, Moldova and Oman, and note the extensive market-access commitments already made by these countries on accession. These accessions will greatly strengthen the multilateral trading system, as will those of the 28 countries now negotiating their accession. We therefore attach great importance to concluding accession proceedings as quickly as possible. In particular, we are committed to accelerating the accession of least-developed countries.

10. Recognizing the challenges posed by an expanding WTO membership, we confirm our collective responsibility to ensure internal transparency and the effective participation of all Members. While emphasizing the intergovernmental character of the organization, we are committed to making the WTO's operations more transparent, including through more effective and prompt dissemination of information, and to improve dialogue with the public. We shall therefore at the national and multilateral levels continue to promote a better public understanding of the WTO and to communicate the benefits of a liberal, rules-based multilateral trading system.

11. In view of these considerations, we hereby agree to undertake the broad and balanced Work Programme set out below. This incorporates both an expanded negotiating agenda and other important decisions and activities necessary to address the challenges facing the multilateral trading system.

WORK PROGRAMME

IMPLEMENTATION-RELATED ISSUES AND CONCERNS

12. We attach the utmost importance to the implementation-related issues and concerns raised by Members and are determined to find appropriate solutions to them. In this connection, and having regard to the General Council Decisions of 3 May and 15 December 2000, we further adopt the Decision on Implementation-Related Issues and Concerns in document WT/MIN(01)/17 to address a number of implementation problems faced by Members. We agree that negotiations on outstanding implementation issues shall be an integral part of the Work Programme we are establishing, and that agreements reached at an early stage in these negotiations shall be treated in accordance with the provisions of paragraph 47 below. In this regard, we shall proceed as follows: (a) where we provide a specific negotiating mandate in this Declaration, the relevant implementation issues shall be addressed under that mandate; (b) the other outstanding implementation issues shall be addressed as a matter of priority by the relevant WTO bodies, which shall report to the Trade Negotiations Committee, established under paragraph 46 below, by the end of 2002 for appropriate action.

AGRICULTURE

13. We recognize the work already undertaken in the negotiations initiated in early 2000 under Article 20 of the Agreement on Agriculture, including the large number of negotiating proposals submitted on behalf of a total of 121 Members. We recall the long-term objective referred to in the Agreement to establish a fair and market-oriented trading system through a programme of fundamental reform encompassing strengthened rules and specific commitments on support and protection in order to correct and prevent restrictions and distortions in world agricultural markets. We reconfirm our commitment to this programme. Building on the work carried out to date and without prejudging the outcome of the negotiations we commit ourselves to comprehensive negotiations aimed at: substantial improvements in market access; reductions of, with a view to phasing out, all forms of export subsidies; and substantial reductions in trade-distorting domestic support. We agree that special and differential treatment for developing countries shall be an integral part of all elements of the negotiations and shall be embodied in the Schedules of concessions and commitments and as appropriate in the rules and disciplines to be negotiated, so as to be operationally effective and to enable developing countries to effectively take account of their development needs, including food security and rural development. We take note of the non-trade concerns reflected in the negotiating proposals submitted by Members and confirm that non-trade concerns will be taken into account in the negotiations as provided for in the Agreement on Agriculture.

14. Modalities for the further commitments, including provisions for special and differential treatment, shall be established no later than 31 March 2003. Participants shall submit their comprehensive draft Schedules based on these modalities no later than the date of the Fifth

Session of the Ministerial Conference. The negotiations, including with respect to rules and disciplines and related legal texts, shall be concluded as part and at the date of conclusion of the negotiating agenda as a whole.

SERVICES

15. The negotiations on trade in services shall be conducted with a view to promoting the economic growth of all trading partners and the development of developing and least-developed countries. We recognize the work already undertaken in the negotiations, initiated in January 2000 under Article XIX of the General Agreement on Trade in Services, and the large number of proposals submitted by Members on a wide range of sectors and several horizontal issues, as well as on movement of natural persons. We reaffirm the Guidelines and Procedures for the Negotiations adopted by the Council for Trade in Services on 28 March 2001 as the basis for continuing the negotiations, with a view to achieving the objectives of the General Agreement on Trade in Services, as stipulated in the Preamble, Article IV and Article XIX of that Agreement. Participants shall submit initial requests for specific commitments by 30 June 2002 and initial offers by 31 March 2003.

MARKET ACCESS FOR NON-AGRICULTURAL PRODUCTS

16. We agree to negotiations which shall aim, by modalities to be agreed, to reduce or as appropriate eliminate tariffs, including the reduction or elimination of tariff peaks, high tariffs, and tariff escalation, as well as non-tariff barriers, in particular on products of export interest to developing countries. Product coverage shall be comprehensive and without *a priori* exclusions. The negotiations shall take fully into account the special needs and interests of developing and least-developed country participants, including through less than full reciprocity in reduction commitments, in accordance with the relevant provisions of Article XXVIII *bis* of GATT 1994 and the provisions cited in paragraph 50 below. To this end, the modalities to be agreed will include appropriate studies and capacity-building measures to assist least-developed countries to participate effectively in the negotiations.

TRADE-RELATED ASPECTS OF INTELLECTUAL PROPERTY RIGHTS

17. We stress the importance we attach to implementation and interpretation of the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement) in a manner supportive of public health, by promoting both access to existing medicines and research and development into new medicines and, in this connection, are adopting a separate Declaration.

18. With a view to completing the work started in the Council for Trade-Related Aspects of Intellectual Property Rights (Council for TRIPS) on the implementation of Article 23.4, we agree to negotiate the establishment of a multilateral system of notification and registration of geographical indications for wines and spirits by the Fifth Session of the Ministerial Conference. We note that issues related to the extension of the protection of geographical indications provided for in Article 23 to products other than wines and spirits will be addressed in the Council for TRIPS pursuant to paragraph 12 of this Declaration.

19. We instruct the Council for TRIPS, in pursuing its work programme including under the review of Article 27.3(b), the review of the implementation of the TRIPS Agreement under Article 71.1 and the work foreseen pursuant to paragraph 12 of this Declaration, to examine, *inter alia*, the relationship between the TRIPS Agreement and the Convention on Biological Diversity, the protection of traditional knowledge and folklore, and other relevant new developments raised by Members pursuant to Article 71.1. In undertaking this work, the TRIPS Council shall be guided by the objectives and principles set out in Articles 7 and 8 of the TRIPS Agreement and shall take fully into account the development dimension.

RELATIONSHIP BETWEEN TRADE AND INVESTMENT

20. Recognizing the case for a multilateral framework to secure transparent, stable and predictable conditions for long-term cross-border investment, particularly foreign direct investment, that will contribute to the expansion of trade, and the need for enhanced technical assistance and capacity-building in this area as referred to in paragraph 21, we agree that negotiations will take place after the Fifth Session of the Ministerial Conference on the basis of a decision to be taken, by explicit consensus, at that Session on modalities of negotiations.

21. We recognize the needs of developing and least-developed countries for enhanced support for technical assistance and capacity building in this area, including policy analysis and development so that they may better evaluate the implications of closer multilateral cooperation for their development policies and objectives, and human and institutional development. To this end, we shall work in cooperation with other relevant intergovernmental organisations, including UNCTAD, and through appropriate regional and bilateral channels, to provide strengthened and adequately resourced assistance to respond to these needs.

22. In the period until the Fifth Session, further work in the Working Group on the Relationship Between Trade and Investment will focus on the clarification of: scope and definition; transparency; non-discrimination; modalities for pre-establishment commitments based on a GATS-type, positive list approach; development provisions; exceptions and balance-of-payments safeguards; consultation and the settlement of disputes between Members. Any framework should reflect in a balanced manner the interests of home and host countries, and take due account of the development policies and objectives of host governments as well as their right to

regulate in the public interest. The special development, trade and financial needs of developing and least-developed countries should be taken into account as an integral part of any framework, which should enable Members to undertake obligations and commitments commensurate with their individual needs and circumstances. Due regard should be paid to other relevant WTO provisions. Account should be taken, as appropriate, of existing bilateral and regional arrangements on investment.

INTERACTION BETWEEN TRADE AND COMPETITION POLICY

23. Recognizing the case for a multilateral framework to enhance the contribution of competition policy to international trade and development, and the need for enhanced technical assistance and capacity-building in this area as referred to in paragraph 24, we agree that negotiations will take place after the Fifth Session of the Ministerial Conference on the basis of a decision to be taken, by explicit consensus, at that Session on modalities of negotiations.

24. We recognize the needs of developing and least-developed countries for enhanced support for technical assistance and capacity building in this area, including policy analysis and development so that they may better evaluate the implications of closer multilateral cooperation for their development policies and objectives, and human and institutional development. To this end, we shall work in cooperation with other relevant intergovernmental organisations, including UNCTAD, and through appropriate regional and bilateral channels, to provide strengthened and adequately resourced assistance to respond to these needs.

25. In the period until the Fifth Session, further work in the Working Group on the Interaction between Trade and Competition Policy will focus on the clarification of: core principles, including transparency, non-discrimination and procedural fairness, and provisions on hardcore cartels; modalities for voluntary cooperation; and support for progressive reinforcement of competition institutions in developing countries through capacity building. Full account shall be taken of the needs of developing and least-developed country participants and appropriate flexibility provided to address them.

TRANSPARENCY IN GOVERNMENT PROCUREMENT

26. Recognizing the case for a multilateral agreement on transparency in government procurement and the need for enhanced technical assistance and capacity building in this area, we agree that negotiations will take place after the Fifth Session of the Ministerial Conference on the basis of a decision to be taken, by explicit consensus, at that Session on modalities of negotiations. These negotiations will build on the progress made in the Working Group on Transparency in Government Procurement by that time and take into account participants' development priorities, especially those of least-developed country participants. Negotiations shall be limited to the transparency aspects and therefore will not restrict the scope for countries to give preferences to domestic supplies and suppliers. We commit ourselves to ensuring adequate technical assistance and support for capacity building both during the negotiations and after their conclusion.

TRADE FACILITATION

27. Recognizing the case for further expediting the movement, release and clearance of goods, including goods in transit, and the need for enhanced technical assistance and capacity building in this area, we agree that negotiations will take place after the Fifth Session of the Ministerial Conference on the basis of a decision to be taken, by explicit consensus, at that Session on modalities of negotiations. In the period until the Fifth Session, the Council for Trade in Goods shall review and as appropriate, clarify and improve relevant aspects of Articles V, VIII and X of the GATT 1994 and identify the trade facilitation needs and priorities of Members, in particular developing and least-developed countries. We commit ourselves to ensuring adequate technical assistance and support for capacity building in this area.

WTO RULES

28. In the light of experience and of the increasing application of these instruments by Members, we agree to negotiations aimed at clarifying and improving disciplines under the Agreements on Implementation of Article VI of the GATT 1994 and on Subsidies and Countervailing Measures, while preserving the basic concepts, principles and effectiveness of these Agreements and their instruments and objectives, and taking into account the needs of developing and least-developed participants. In the initial phase of the negotiations, participants will indicate the provisions, including disciplines on trade distorting practices, that they seek to clarify and improve in the subsequent phase. In the context of these negotiations, participants shall also aim to clarify and improve WTO disciplines on fisheries subsidies, taking into account the importance of this sector to developing countries. We note that fisheries subsidies are also referred to in paragraph 31.

29. We also agree to negotiations aimed at clarifying and improving disciplines and procedures under the existing WTO provisions applying to regional trade agreements. The negotiations shall take into account the developmental aspects of regional trade agreements.

DISPUTE SETTLEMENT UNDERSTANDING

30. We agree to negotiations on improvements and clarifications of the Dispute Settlement Understanding. The negotiations should be based on the work done thus far as well as any additional proposals by Members, and aim to agree on improvements and clarifications not

later than May 2003, at which time we will take steps to ensure that the results enter into force as soon as possible thereafter.

TRADE AND ENVIRONMENT

31. With a view to enhancing the mutual supportiveness of trade and environment, we agree to negotiations, without prejudging their outcome, on:

(i) the relationship between existing WTO rules and specific trade obligations set out in multilateral environmental agreements (MEAs). The negotiations shall be limited in scope to the applicability of such existing WTO rules as among parties to the MEA in question. The negotiations shall not prejudice the WTO rights of any Member that is not a party to the MEA in question;

(ii) procedures for regular information exchange between MEA Secretariats and the relevant WTO committees, and the criteria for the granting of observer status;

(iii) the reduction or, as appropriate, elimination of tariff and non-tariff barriers to environmental goods and services.

We note that fisheries subsidies form part of the negotiations provided for in paragraph 28.

32. We instruct the Committee on Trade and Environment, in pursuing work on all items on its agenda within its current terms of reference, to give particular attention to:

(i) the effect of environmental measures on market access, especially in relation to developing countries, in particular the least-developed among them, and those situations in which the elimination or reduction of trade restrictions and distortions would benefit trade, the environment and development;

(ii) the relevant provisions of the Agreement on Trade-Related Aspects of Intellectual Property Rights; and

(iii) labelling requirements for environmental purposes.

Work on these issues should include the identification of any need to clarify relevant WTO rules. The Committee shall report to the Fifth Session of the Ministerial Conference, and make recommendations, where appropriate, with respect to future action, including the desirability of negotiations. The outcome of this work as well as the negotiations carried out under paragraph 31(i) and (ii) shall be compatible with the open and non-discriminatory nature of the multilateral trading system, shall not add to or diminish the rights and obligations of Members under existing WTO agreements, in particular the Agreement on the Application of Sanitary and Phytosanitary Measures, nor alter the balance of these rights and obligations, and will take into account the needs of developing and least-developed countries.

33. We recognize the importance of technical assistance and capacity building in the field of trade and environment to developing countries, in particular the least-developed among them. We also encourage that expertise and experience be shared with Members wishing to perform environmental reviews at the national level. A report shall be prepared on these activities for the Fifth Session.

ELECTRONIC COMMERCE

34. We take note of the work which has been done in the General Council and other relevant bodies since the Ministerial Declaration of 20 May 1998 and agree to continue the Work Programme on Electronic Commerce. The work to date demonstrates that electronic commerce creates new challenges and opportunities for trade for Members at all stages of development, and we recognize the importance of creating and maintaining an environment which is favourable to the future development of electronic commerce. We instruct the General Council to consider the most appropriate institutional arrangements for handling the Work Programme, and to report on further progress to the Fifth Session of the Ministerial Conference. We declare that Members will maintain their current practice of not imposing customs duties on electronic transmissions until the Fifth Session.

SMALL ECONOMIES

35. We agree to a work programme, under the auspices of the General Council, to examine issues relating to the trade of small economies. The objective of this work is to frame responses to the trade-related issues identified for the fuller integration of small, vulnerable economies into the multilateral trading system, and not to create a subcategory of WTO Members. The General Council shall review the work programme and make recommendations for action to the Fifth Session of the Ministerial Conference.

TRADE, DEBT AND FINANCE

36. We agree to an examination, in a Working Group under the auspices of the General Council, of the relationship between trade, debt and finance, and of any possible recommendations on steps that might be taken within the mandate and competence of the WTO to enhance the capacity of the multilateral trading system to contribute to a durable solution to the problem of external indebtedness of developing and least-developed countries, and to strengthen the coherence of international trade and financial policies, with a view to safeguarding the multilateral trading system from the effects of financial and monetary instability. The General Council shall report to the Fifth Session of the Ministerial Conference on progress in the examination.

TRADE AND TRANSFER OF TECHNOLOGY

37. We agree to an examination, in a Working Group under the auspices of the General Council, of the relationship between trade and transfer of technology, and of any possible recommendations on steps that might be taken within the mandate of the WTO to increase flows of technology to developing countries. The General Council shall report to the Fifth Session of the Ministerial Conference on progress in the examination.

TECHNICAL COOPERATION AND CAPACITY BUILDING

38. We confirm that technical cooperation and capacity building are core elements of the development dimension of the multilateral trading system, and we welcome and endorse the New Strategy for WTO Technical Cooperation for Capacity Building, Growth and Integration. We instruct the Secretariat, in coordination with other relevant agencies, to support domestic efforts for mainstreaming trade into national plans for economic development and strategies for poverty reduction. The delivery of WTO technical assistance shall be designed to assist developing and least-developed countries and low-income countries in transition to adjust to WTO rules and disciplines, implement obligations and exercise the rights of membership, including drawing on the benefits of an open, rules-based multilateral trading system. Priority shall also be accorded to small, vulnerable, and transition economies, as well as to Members and Observers without representation in Geneva. We reaffirm our support for the valuable work of the International Trade Centre, which should be enhanced.

39. We underscore the urgent necessity for the effective coordinated delivery of technical assistance with bilateral donors, in the OECD Development Assistance Committee and relevant international and regional intergovernmental institutions, within a coherent policy framework and timetable. In the coordinated delivery of technical assistance, we instruct the Director-General to consult with the relevant agencies, bilateral donors and beneficiaries, to identify ways of enhancing and rationalizing the Integrated Framework for Trade-Related Technical Assistance to Least-Developed Countries and the Joint Integrated Technical Assistance Programme (JITAP).

40. We agree that there is a need for technical assistance to benefit from secure and predictable funding. We therefore instruct the Committee on Budget, Finance and Administration to develop a plan for adoption by the General Council in December 2001 that will ensure long-term funding for WTO technical assistance at an overall level no lower than that of the current year and commensurate with the activities outlined above.

41. We have established firm commitments on technical cooperation and capacity building in various paragraphs in this Ministerial Declaration. We reaffirm these specific commitments contained in paragraphs 16, 21, 24, 26, 27, 33, 38–40, 42 and 43, and also reaffirm the understanding in paragraph 2 on the important role of sustainably financed technical assistance and capacity-building programmes. We instruct the Director-General to report to the Fifth Session of the Ministerial Conference, with an interim report to the General Council in December 2002, on the implementation and adequacy of these commitments in the identified paragraphs.

LEAST-DEVELOPED COUNTRIES

42. We acknowledge the seriousness of the concerns expressed by the least-developed countries (LDCs) in the Zanzibar Declaration adopted by their Ministers in July 2001. We recognize that the integration of the LDCs into the multilateral trading system requires meaningful market access, support for the diversification of their production and export base, and trade-related technical assistance and capacity building. We agree that the meaningful integration of LDCs into the trading system and the global economy will involve efforts by all WTO Members. We commit ourselves to the objective of duty-free, quota-free market access for products originating from LDCs. In this regard, we welcome the significant market access improvements by WTO Members in advance of the Third UN Conference on LDCs (LDC-III), in Brussels, May 2001. We further commit ourselves to consider additional measures for progressive improvements in market access for LDCs. Accession of LDCs remains a priority for the Membership. We agree to work to facilitate and accelerate negotiations with acceding LDCs. We instruct the Secretariat to reflect the priority we attach to LDCs' accessions in the annual plans for technical assistance. We reaffirm the commitments we undertook at LDC-III, and agree that the WTO should take into account, in designing its work programme for LDCs, the trade-related elements of the Brussels Declaration and Programme of Action, consistent with the WTO's mandate, adopted at LDC-III. We instruct the Sub-Committee for Least-Developed Countries to design such a work programme and to report on the agreed work programme to the General Council at its first meeting in 2002.

43. We endorse the Integrated Framework for Trade-Related Technical Assistance to Least-Developed Countries (IF) as a viable model for LDCs' trade development. We urge development partners to significantly increase contributions to the IF Trust Fund and WTO extra-budgetary trust funds in favour of LDCs. We urge the core agencies, in coordination with development partners, to explore the enhancement of the IF with a view to addressing the supply-side constraints of LDCs and the extension of the model to all LDCs, following the review of the IF and the appraisal of the ongoing Pilot Scheme in selected LDCs. We request the Director-General, following coordination with heads of the other agencies, to provide an interim report to the General Council in December 2002 and a full report to the Fifth Session of the Ministerial Conference on all issues affecting LDCs.

SPECIAL AND DIFFERENTIAL TREATMENT

44. We reaffirm that provisions for special and differential treatment are an integral part of the WTO Agreements. We note the concerns expressed regarding their operation in addressing specific constraints faced by developing countries, particularly least-developed countries. In that connection, we also note that some Members have proposed a Framework Agreement on Special and Differential Treatment (WT/GC/W/442). We therefore agree that all special and differential treatment provisions shall be reviewed with a view to strengthening them and making them more precise, effective and operational. In this connection, we endorse the work programme on special and differential treatment set out in the Decision on Implementation-Related Issues and Concerns.

ORGANIZATION AND MANAGEMENT OF THE WORK PROGRAMME

45. The negotiations to be pursued under the terms of this Declaration shall be concluded not later than 1 January 2005. The Fifth Session of the Ministerial Conference will take stock of progress in the negotiations, provide any necessary political guidance, and take decisions as necessary. When the results of the negotiations in all areas have been established, a Special Session of the Ministerial Conference will be held to take decisions regarding the adoption and implementation of those results.

46. The overall conduct of the negotiations shall be supervised by a Trade Negotiations Committee under the authority of the General Council. The Trade Negotiations Committee shall hold its first meeting not later than 31 January 2002. It shall establish appropriate negotiating mechanisms as required and supervise the progress of the negotiations.

47. With the exception of the improvements and clarifications of the Dispute Settlement Understanding, the conduct, conclusion and entry into force of the outcome of the negotiations shall be treated as parts of a single undertaking. However, agreements reached at an early stage may be implemented on a provisional or a definitive basis. Early agreements shall be taken into account in assessing the overall balance of the negotiations.

48. Negotiations shall be open to:

(i) all Members of the WTO; and

(ii) States and separate customs territories currently in the process of accession and those that inform Members, at a regular meeting of the General Council, of their intention to negotiate the terms of their membership and for whom an accession working party is established.

Decisions on the outcomes of the negotiations shall be taken only by WTO Members.

49. The negotiations shall be conducted in a transparent manner among participants, in order to facilitate the effective participation of all. They shall be conducted with a view to ensuring benefits to all participants and to achieving an overall balance in the outcome of the negotiations.

50. The negotiations and the other aspects of the Work Programme shall take fully into account the principle of special and differential treatment for developing and least-developed countries embodied in: Part IV of the GATT 1994; the Decision of 28 November 1979 on Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries; the Uruguay Round Decision on Measures in Favour of Least-Developed Countries; and all other relevant WTO provisions.

51. The Committee on Trade and Development and the Committee on Trade and Environment shall, within their respective mandates, each act as a forum to identify and debate developmental and environmental aspects of the negotiations, in order to help achieve the objective of having sustainable development appropriately reflected.

52. Those elements of the Work Programme which do not involve negotiations are also accorded a high priority. They shall be pursued under the overall supervision of the General Council, which shall report on progress to the Fifth Session of the Ministerial Conference.

B. DECLARATION ON THE TRIPS AGREEMENT AND PUBLIC HEALTH

244. The text of the Declaration on the TRIPS Agreement and Public Health is annexed to the Chapter on the *TRIPS Agreement.*

C. IMPLEMENTATION-RELATED ISSUES AND CONCERNS

IMPLEMENTATION-RELATED ISSUES AND CONCERNS

Decision of 14 November 2001[584]

The Ministerial Conference,

Having regard to Articles IV.1, IV.5 and IX of the Marrakesh Agreement Establishing the World Trade Organization (WTO);

Mindful of the importance that Members attach to the increased participation of developing countries in the multilateral trading system, and of the need to ensure that the system responds fully to the needs and interests of all participants;

Determined to take concrete action to address issues and concerns that have been raised by many developing-country Members regarding the implementation of some WTO Agreements and Decisions, including the difficulties

[584] WT/MIN(01)/17.

and resource constraints that have been encountered in the implementation of obligations in various areas;

Recalling the 3 May 2000 Decision of the General Council to meet in special sessions to address outstanding implementation issues, and to assess the existing difficulties, identify ways needed to resolve them, and take decisions for appropriate action not later than the Fourth Session of the Ministerial Conference;

Noting the actions taken by the General Council in pursuance of this mandate at its Special Sessions in October and December 2000 (WT/L/384), as well as the review and further discussion undertaken at the Special Sessions held in April, July and October 2001, including the referral of additional issues to relevant WTO bodies or their chairpersons for further work;

Noting also the reports on the issues referred to the General Council from subsidiary bodies and their chairpersons and from the Director-General, and the discussions as well as the clarifications provided and understandings reached on implementation issues in the intensive informal and formal meetings held under this process since May 2000;

Decides as follows:

1. General Agreement on Tariffs and Trade 1994 (GATT 1994)

   1.1 Reaffirms that Article XVIII of the GATT 1994 is a special and differential treatment provision for developing countries and that recourse to it should be less onerous than to Article XII of the GATT 1994.

   1.2 Noting the issues raised in the report of the Chairperson of the Committee on Market Access (WT/GC/50) concerning the meaning to be given to the phrase "substantial interest" in paragraph 2(d) of Article XIII of the GATT 1994, the Market Access Committee is directed to give further consideration to the issue and make recommendations to the General Council as expeditiously as possible but in any event not later than the end of 2002.

2. Agreement on Agriculture

   2.1 Urges Members to exercise restraint in challenging measures notified under the green box by developing countries to promote rural development and adequately address food security concerns.

   2.2 Takes note of the report of the Committee on Agriculture (G/AG/11) regarding the implementation of the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries, and approves the recommendations contained therein regarding (i) food aid; (ii) technical and financial assistance in the context of aid programmes to improve agricultural productivity and infrastructure; (iii) financing normal levels of commercial imports of basic foodstuffs; and (iv) review of follow-up.

   2.3 Takes note of the report of the Committee on Agriculture (G/AG/11) regarding the implementation of Article 10.2 of the Agreement on Agriculture, and approves the recommendations and reporting requirements contained therein.

   2.4 Takes note of the report of the Committee on Agriculture (G/AG/11) regarding the administration of tariff rate quotas and the submission by Members of addenda to their notifications, and endorses the decision by the Committee to keep this matter under review.

3. Agreement on the Application of Sanitary and Phytosanitary Measures

   3.1 Where the appropriate level of sanitary and phytosanitary protection allows scope for the phased introduction of new sanitary and phytosanitary measures, the phrase "longer time-frame for compliance" referred to in Article 10.2 of the Agreement on the Application of Sanitary and Phytosanitary Measures, shall be understood to mean normally a period of not less than 6 months. Where the appropriate level of sanitary and phytosanitary protection does not allow scope for the phased introduction of a new measure, but specific problems are identified by a Member, the Member applying the measure shall upon request enter into consultations with the country with a view to finding a mutually satisfactory solution to the problem while continuing to achieve the importing Member's appropriate level of protection.

   3.2 Subject to the conditions specified in paragraph 2 of Annex B to the Agreement on the Application of Sanitary and Phytosanitary Measures, the phrase "reasonable interval" shall be understood to mean normally a period of not less than 6 months. It is understood that timeframes for specific measures have to be considered in the context of the particular circumstances of the measure and actions necessary to implement it. The entry into force of measures which contribute to the liberalization of trade should not be unnecessarily delayed.

   3.3 Takes note of the Decision of the Committee on Sanitary and Phytosanitary Measures

(G/SPS/19) regarding equivalence, and instructs the Committee to develop expeditiously the specific programme to further the implementation of Article 4 of the Agreement on the Application of Sanitary and Phytosanitary Measures.

3.4 Pursuant to the provisions of Article 12.7 of the Agreement on the Application of Sanitary and Phytosanitary Measures, the Committee on Sanitary and Phytosanitary Measures is instructed to review the operation and implementation of the Agreement on Sanitary and Phytosanitary Measures at least once every four years.

3.5 (i) Takes note of the actions taken to date by the Director-General to facilitate the increased participation of Members at different levels of development in the work of the relevant international standard setting organizations as well as his efforts to coordinate with these organizations and financial institutions in identifying SPS-related technical assistance needs and how best to address them; and

(ii) urges the Director-General to continue his cooperative efforts with these organizations and institutions in this regard, including with a view to according priority to the effective participation of least-developed countries and facilitating the provision of technical and financial assistance for this purpose.

3.6 (i) Urges Members to provide, to the extent possible, the financial and technical assistance necessary to enable least-developed countries to respond adequately to the introduction of any new SPS measures which may have significant negative effects on their trade; and

(ii) urges Members to ensure that technical assistance is provided to least-developed countries with a view to responding to the special problems faced by them in implementing the Agreement on the Application of Sanitary and Phytosanitary Measures.

4. Agreement on Textiles and Clothing

Reaffirms the commitment to full and faithful implementation of the Agreement on Textiles and Clothing, and agrees:

4.1 that the provisions of the Agreement relating to the early integration of products and the elimination of quota restrictions should be effectively utilised.

4.2 that Members will exercise particular consideration before initiating investigations in the context of antidumping remedies on textile and clothing exports from developing countries previously subject to quantitative restrictions under the Agreement for a period of two years following full integration of this Agreement into the WTO.

4.3 that without prejudice to their rights and obligations, Members shall notify any changes in their rules of origin concerning products falling under the coverage of the Agreement to the Committee on Rules of Origin which may decide to examine them.

Requests the Council for Trade in Goods to examine the following proposals:

4.4 that when calculating the quota levels for small suppliers for the remaining years of the Agreement, Members will apply the most favourable methodology available in respect of those Members under the growth-on-growth provisions from the beginning of the implementation period; extend the same treatment to least-developed countries; and, where possible, eliminate quota restrictions on imports of such Members;

4.5 that Members will calculate the quota levels for the remaining years of the Agreement with respect to other restrained Members as if implementation of the growth-on-growth provision for stage 3 had been advanced to 1 January 2000;

and make recommendations to the General Council by 31 July 2002 for appropriate action.

5. Agreement on Technical Barriers to Trade

5.1 Confirms the approach to technical assistance being developed by the Committee on Technical Barriers to Trade, reflecting the results of the triennial review work in this area, and mandates this work to continue.

5.2 Subject to the conditions specified in paragraph 12 of Article 2 of the Agreement on Technical Barriers to Trade, the phrase "reasonable interval" shall be understood to mean normally a period of not less than 6 months, except when this would be ineffective in fulfilling the legitimate objectives pursued.

5.3 (i) Takes note of the actions taken to date by the Director-General to facilitate the increased participation of Members at different levels of development in the work of the relevant international standard setting organizations as well as his

efforts to coordinate with these organizations and financial institutions in identifying TBT-related technical assistance needs and how best to address them; and

(ii) urges the Director-General to continue his cooperative efforts with these organizations and institutions, including with a view to according priority to the effective participation of least-developed countries and facilitating the provision of technical and financial assistance for this purpose.

5.4 (i) Urges Members to provide, to the extent possible, the financial and technical assistance necessary to enable least-developed countries to respond adequately to the introduction of any new TBT measures which may have significant negative effects on their trade; and

(ii) urges Members to ensure that technical assistance is provided to least-developed countries with a view to responding to the special problems faced by them in implementing the Agreement on Technical Barriers to Trade.

6. Agreement on Trade-Related Investment Measures

6.1 Takes note of the actions taken by the Council for Trade in Goods in regard to requests from some developing-country Members for the extension of the five-year transitional period provided for in Article 5.2 of Agreement on Trade-Related Investment Measures.

6.2 Urges the Council for Trade in Goods to consider positively requests that may be made by least-developed countries under Article 5.3 of the TRIMs Agreement or Article IX.3 of the WTO Agreement, as well as to take into consideration the particular circumstances of least-developed countries when setting the terms and conditions including time-frames.

7. Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994

7.1 Agrees that investigating authorities shall examine with special care any application for the initiation of an anti-dumping investigation where an investigation of the same product from the same Member resulted in a negative finding within the 365 days prior to the filing of the application and that, unless this pre-initiation examination indicates that circumstances have changed, the investigation shall not proceed.

7.2 Recognizes that, while Article 15 of the Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 is a mandatory provision, the modalities for its application would benefit from clarification. Accordingly, the Committee on Anti-Dumping Practices is instructed, through its working group on Implementation, to examine this issue and to draw up appropriate recommendations within twelve months on how to operationalize this provision.

7.3 Takes note that Article 5.8 of the Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 does not specify the time-frame to be used in determining the volume of dumped imports, and that this lack of specificity creates uncertainties in the implementation of the provision. The Committee on Anti-Dumping Practices is instructed, through its working group on Implementation, to study this issue and draw up recommendations within 12 months, with a view to ensuring the maximum possible predictability and objectivity in the application of time frames.

7.4 Takes note that Article 18.6 of the Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 requires the Committee on Anti-Dumping Practices to review annually the implementation and operation of the Agreement taking into account the objectives thereof. The Committee on Anti-dumping Practices is instructed to draw up guidelines for the improvement of annual reviews and to report its views and recommendations to the General Council for subsequent decision within 12 months.

8. Agreement on the Implementation of Article VII of the General Agreement on Tariffs and Trade 1994

8.1 Takes note of the actions taken by the Committee on Customs Valuation in regard to the requests from a number of developing-country Members for the extension of the five-year transitional period provided for in Article 20.1 of Agreement on the Implementation of Article VII of the General Agreement on Tariffs and Trade 1994.

8.2 Urges the Council for Trade in Goods to give positive consideration to requests that may be made by least-developed country Members under paragraphs 1 and 2 of Annex III of the Customs Valuation Agreement or under Article IX.3 of the WTO Agreement, as well as

to take into consideration the particular circumstances of least-developed countries when setting the terms and conditions including time-frames.

8.3 Underlines the importance of strengthening cooperation between the customs administrations of Members in the prevention of customs fraud. In this regard, it is agreed that, further to the 1994 Ministerial Decision Regarding Cases Where Customs Administrations Have Reasons to Doubt the Truth or Accuracy of the Declared Value, when the customs administration of an importing Member has reasonable grounds to doubt the truth or accuracy of the declared value, it may seek assistance from the customs administration of an exporting Member on the value of the good concerned. In such cases, the exporting Member shall offer cooperation and assistance, consistent with its domestic laws and procedures, including furnishing information on the export value of the good concerned. Any information provided in this context shall be treated in accordance with Article 10 of the Customs Valuation Agreement. Furthermore, recognizing the legitimate concerns expressed by the customs administrations of several importing Members on the accuracy of the declared value, the Committee on Customs Valuation is directed to identify and assess practical means to address such concerns, including the exchange of information on export values and to report to the General Council by the end of 2002 at the latest.

9. Agreement on Rules of Origin

9.1 Takes note of the report of the Committee on Rules of Origin (G/RO/48) regarding progress on the harmonization work programme, and urges the Committee to complete its work by the end of 2001.

9.2 Agrees that any interim arrangements on rules of origin implemented by Members in the transitional period before the entry into force of the results of the harmonisation work programme shall be consistent with the Agreement on Rules of Origin, particularly Articles 2 and 5 thereof. Without prejudice to Members' rights and obligations, such arrangements may be examined by the Committee on Rules of Origin.

10. Agreement on Subsidies and Countervailing Measures

10.1 Agrees that Annex VII(b) to the Agreement on Subsidies and Countervailing Measures includes the Members that are listed therein until their GNP per capita reaches US $1,000 in constant 1990 dollars for three consecutive years. This decision will enter into effect upon the adoption by the Committee on Subsidies and Countervailing Measures of an appropriate methodology for calculating constant 1990 dollars. If, however, the Committee on Subsidies and Countervailing Measures does not reach a consensus agreement on an appropriate methodology by 1 January 2003, the methodology proposed by the Chairman of the Committee set forth in G/SCM/38, Appendix 2 shall be applied. A Member shall not leave Annex VII(b) so long as its GNP per capita in current dollars has not reached US $1000 based upon the most recent data from the World Bank.

10.2 Takes note of the proposal to treat measures implemented by developing countries with a view to achieving legitimate development goals, such as regional growth, technology research and development funding, production diversification and development and implementation of environmentally sound methods of production as non-actionable subsidies, and agrees that this issue be addressed in accordance with paragraph 13 below. During the course of the negotiations, Members are urged to exercise due restraint with respect to challenging such measures.

10.3 Agrees that the Committee on Subsidies and Countervailing Measures shall continue its review of the provisions of the Agreement on Subsidies and Countervailing Measures regarding countervailing duty investigations and report to the General Council by 31 July 2002.

10.4 Agrees that if a Member has been excluded from the list in paragraph (b) of Annex VII to the Agreement on Subsidies and Countervailing Measures, it shall be re-included in it when its GNP per capita falls back below US$ 1,000.

10.5 Subject to the provisions of Articles 27.5 and 27.6, it is reaffirmed that least-developed country Members are exempt from the prohibition on export subsidies set forth in Article 3.1(a) of the Agreement on Subsidies and Countervailing Measures, and thus have flexibility to finance their exporters, consistent with their development needs. It is understood that the eight-year period in Article 27.5 within which a least-developed country Member must phase out its export subsidies in respect of a product in which it

is export-competitive begins from the date export competitiveness exists within the meaning of Article 27.6.

10.6 Having regard to the particular situation of certain developing-country Members, directs the Committee on Subsidies and Countervailing Measures to extend the transition period, under the rubric of Article 27.4 of the Agreement on Subsidies and Countervailing Measures, for certain export subsidies provided by such Members, pursuant to the procedures set forth in document G/SCM/39. Furthermore, when considering a request for an extension of the transition period under the rubric of Article 27.4 of the Agreement on Subsidies and Countervailing Measures, and in order to avoid that Members at similar stages of development and having a similar order of magnitude of share in world trade are treated differently in terms of receiving such extensions for the same eligible programmes and the length of such extensions, directs the Committee to extend the transition period for those developing countries, after taking into account the relative competitiveness in relation to other developing-country Members who have requested extension of the transition period following the procedures set forth in document G/SCM/39.

11. Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS)

11.1 The TRIPS Council is directed to continue its examination of the scope and modalities for complaints of the types provided for under subparagraphs 1(b) and 1(c) of Article XXIII of GATT 1994 and make recommendations to the Fifth Session of the Ministerial Conference. It is agreed that, in the meantime, Members will not initiate such complaints under the TRIPS Agreement.

11.2 Reaffirming that the provisions of Article 66.2 of the TRIPS Agreement are mandatory, it is agreed that the TRIPS Council shall put in place a mechanism for ensuring the monitoring and full implementation of the obligations in question. To this end, developed-country Members shall submit prior to the end of 2002 detailed reports on the functioning in practice of the incentives provided to their enterprises for the transfer of technology in pursuance of their commitments under Article 66.2. These submissions shall be subject to a review in the TRIPS Council and information shall be updated by Members annually.

12. Cross-cutting Issues

12.1 The Committee on Trade and Development is instructed:

(i) to identify those special and differential treatment provisions that are already mandatory in nature and those that are non-binding in character, to consider the legal and practical implications for developed and developing Members of converting special and differential treatment measures into mandatory provisions, to identify those that Members consider should be made mandatory, and to report to the General Council with clear recommendations for a decision by July 2002;

(ii) to examine additional ways in which special and differential treatment provisions can be made more effective, to consider ways, including improved information flows, in which developing countries, in particular the least-developed countries, may be assisted to make best use of special and differential treatment provisions, and to report to the General Council with clear recommendations for a decision by July 2002; and

(iii) to consider, in the context of the work programme adopted at the Fourth Session of the Ministerial Conference, how special and differential treatment may be incorporated into the architecture of WTO rules.

The work of the Committee on Trade and Development in this regard shall take fully into consideration previous work undertaken as noted in WT/COMTD/W/77/Rev.1. It will also be without prejudice to work in respect of implementation of WTO Agreements in the General Council and in other Councils and Committees.

12.2 Reaffirms that preferences granted to developing countries pursuant to the Decision of the Contracting Parties of 28 November 1979 ("Enabling Clause")[1] should be generalised, non-reciprocal and non-discriminatory.

(*footnote original*) [1] BISD 26S/203.

13. Outstanding Implementation Issues[2]

Agrees that outstanding implementation issues be addressed in accordance with paragraph 12 of the Ministerial Declaration (WT/MIN(01)/DEC/1).

(*footnote original*) [2] A list of these issues is compiled in document Job(01)/152/Rev.1.

14. Final Provisions

Requests the Director-General, consistent with paragraphs 38 to 43 of the Ministerial Declaration (WT/MIN(01)/DEC/1), to ensure that WTO technical assistance focuses, on a priority basis, on assisting developing countries to implement existing WTO obligations as well as on increasing their capacity to participate more effectively in future multilateral trade negotiations. In carrying out this mandate, the WTO Secretariat should cooperate more closely with international and regional intergovernmental organisations so as to increase efficiency and synergies and avoid duplication of programmes.

D. PROCEDURES FOR EXTENSIONS UNDER ARTICLE 27.4 FOR CERTAIN DEVELOPING COUNTRY MEMBERS

PROCEDURES FOR EXTENSIONS UNDER ARTICLE 27.4 FOR CERTAIN DEVELOPING COUNTRY MEMBERS[585]

The Committee on Subsidies and Countervailing Measures ("SCM Committee") shall follow the procedures set forth below in respect of extensions of the transition period under Article 27.4 of the Agreement on Subsidies and Countervailing Measures ("SCM Agreement") for certain developing country Members. The programmes to which these procedures shall apply are those meeting the criteria set forth in 2.

1. Mechanism for extension

(a) A Member that maintains programmes meeting the criteria set forth in 2 and that wishes to make use of these procedures, shall initiate Article 27.4 consultations with the Committee in respect of an extension for its eligible subsidy programmes as referred to in 2, on the basis of documentation to be submitted to the Committee not later than 31 December 2001. This documentation shall consist of (i) an identification by the Member of those programmes for which it is seeking an extension under SCM Article 27.4 pursuant to these procedures; and (ii) a statement that the extension is necessary in the light of the Member's economic, financial and development needs.

(b) Not later than 28 February 2002, the Member seeking an extension shall submit to the SCM Committee an initial notification as referred to in 3(a) providing detailed information about the programmes for which extension is being sought.

(c) Following receipt of the notifications referred to in 1(b), the SCM Committee shall consider those notifications, with an opportunity for Members to seek clarification of the notified information and/or additional detail with a view to understanding the nature and operation of the notified programmes, and their scope, coverage and intensity of benefits, as referred to in 3(b). The purpose of this consideration by the SCM Committee shall be to verify that the programmes are of the type eligible under these procedures as referred to in 2, and that the transparency requirement referred to in 3(a) and 3(b) is fulfilled. Not later than 15 December 2002, Members of the SCM Committee shall grant extensions for calendar year 2003 for those programmes notified pursuant to these procedures, provided that the notified programmes meet the eligibility criteria in 2 and that the transparency requirement is fulfilled. The notified information on the basis of which the extensions are granted, including information provided in response to requests from Members as referred to above, shall form the frame of reference for the annual reviews of the extensions as referred to in 1(d) and 1(e).

(d) As provided for in SCM Article 27.4, the extensions granted by the SCM Committee pursuant to these procedures shall be subject to annual review in the form of consultations between the Committee and the Members receiving the extensions. These annual reviews shall be conducted on the basis of updating notifications from the Members in question, as referred to in 3(a) and 3(b). The purpose of the annual reviews shall be to ensure that the transparency and standstill requirements as set forth in 3 and 4 are being fulfilled.

(e) Through the end of calendar year 2007, subject to annual reviews during that period to verify that the transparency and standstill requirements set forth in 3 and 4 are being fulfilled, Members of the Committee shall agree to continue the extensions granted pursuant to 1(c).

(f) During the last year of the period referred to in 1(e), a Member that has received an extension under these procedures shall have the possibility to seek a continuation of the extension pursuant to SCM Article 27.4, for the programmes in question. The Committee shall consider any such requests at that year's annual review, on the basis of the provisions of SCM Article 27.4, i.e., outside the framework of these procedures.

(g) If a continuation of the extension pursuant to 1(f) is either not requested or not granted, the Member in question shall have the final two

[585] G/SCM/39.

years referred to in the last sentence of SCM Article 27.4.

2. Eligible programmes

Programmes eligible for extension pursuant to these procedures, and for which Members shall therefore grant extensions for calendar year 2003 as referred to in 1(c), are export subsidy programmes (i) in the form of full or partial exemptions from import duties and internal taxes, (ii) which were in existence not later than 1 September 2001, and (iii) which are provided by developing country Members (iv) whose share of world merchandise export trade was not greater than 0.10 per cent[1], (v) whose total Gross National Income ("GNI") for the year 2000 as published by the World Bank was at or below US $ 20 billion,[2] (vi) and who are otherwise eligible to request an extension pursuant to Article 27.4,[3] and (vii) in respect of which these procedures are followed.

(*footnote original*) [1] According to the calculations performed by the WTO Secretariat as reflected in Appendix 3 to the Report of the Chairman (G/SCM/38).
(*footnote original*) [2] The SCM Committee shall consider other appropriate data sources in respect of Members for whom the World Bank does not publish total GNI data.
(*footnote original*) [3] The fact that a Member is listed in Annex VII(b) shall not be deemed to make that Member otherwise ineligible to request an extension pursuant to Article 27.4.

3. Transparency

(a) The initial notification referred to in 1(b), and the updating notifications referred to in 1(d), shall follow the agreed format for subsidy notifications under SCM Article 25 (found in G/SCM/6).

(b) During the SCM Committee's consideration/review of the notifications referred to in 1(c) and 1(d), notifying Members can be requested by other Members to provide additional detail and clarification, with a view to confirming that the programmes meet the criteria set forth in 2, and to establishing transparency in respect of the scope, coverage and intensity of benefits (the "favourability") of the programmes in question.[4] Any information provided in response to such requests shall be considered part of the notified information.

(*footnote original*) [4] The scope, coverage and intensity of the programmes in question will be determined on the basis of the legal instruments underlying the programmes.

4. Standstill

(a) The programmes for which an extension is granted shall not be modified during the period of extension referred to in 1(e) so as to make them more favourable than they were as at 1 September 2001. The continuation of an expiring programme without modification shall not be deemed to violate standstill.

(b) The scope, coverage and intensity of benefits (the "favourability") of the programmes as at 1 September 2001 shall be specified in the initial notification referred to in 1(b), and standstill as referred to in 4(a) shall be verified on the basis of the notified information referred to in 1(d) and 3(b).

5. Product graduation on the basis of export competitiveness

Notwithstanding these procedures, Articles 27.5 and 27.6 shall apply in respect of export subsidies for which extensions are granted pursuant to these procedures.

6. Members listed in Annex VII(b)

(a) A Member listed in Annex VII(b) whose GNP per capita has reached the level provided for in that Annex and whose programme(s) meet the criteria in 2 shall be eligible to make use of these procedures.

(b) A Member listed in Annex VII(b) whose GNP per capita has not reached the level provided for in that Annex and whose programme(s) meet the criteria in 2 may reserve its right to make use of these procedures, as referred to in 6(c), by submitting the documentation referred to in 1(a) not later than 31 December 2001.

(c) If the per capita GNP of a Member referred to in 6(b) reaches the level provided for in that Annex during the period referred to in 1(e), that Member shall be able to make use of these procedures as from the date at which its per capita GNP reaches that level and for the remainder of the period referred to in 1(e), as well as for any additional periods as referred to in 1(f) and 1(g), subject to the remaining provisions of these procedures.

(d) For a Member referred to in 6(b), the effective date for the standstill requirement referred to in 4(a) shall be the year in which that Member's GNP per capita reaches the level provided for in Annex VII(b).

7. Final provisions

(a) The decision by Ministers, these procedures, and the SCM Article 27.4 extensions granted thereunder, are without prejudice to any requests for extensions under Article 27.4 that are not made pursuant to these procedures.

(b) The decision by Ministers, these procedures, and the SCM Article 27.4 extensions granted thereunder, shall not affect any other existing rights and obligations under SCM Article 27.4

or under other provisions of the SCM Agreement.

(c) The criteria set forth in these procedures are solely and strictly for the purpose of determining whether Members are eligible to invoke these procedures. Members of the Committee agree that these criteria have no precedential value or relevance, direct or indirect, for any other purpose.

E. EUROPEAN COMMUNITIES — THE ACP-EC PARTNERSHIP AGREEMENT

EUROPEAN COMMUNITIES – THE ACP-EC PARTNERSHIP AGREEMENT

Decision of 14 November 2001[586]

The Ministerial Conference,

Having regard to paragraphs 1 and 3 of Article IX of the Marrakech Agreement Establishing the World Trade Organisation (the "WTO Agreement"), the Guiding Principles to be followed in considering applications for waivers adopted on 1 November 1956 (BISD 5S/25), the Understanding in Respect to Waivers of Obligations under the General Agreement on Tariffs and Trade 1994, paragraph3 of Article IX of the WTO Agreement, and Decision-Making Procedures under Articles IX and XII of the WTO Agreement agreed by the General Council (WT/L/93);

Taking note of the request of the European Communities (EC) and of the Governments of the ACP States which are also WTO members (hereinafter also the "Parties to the Agreement") for a waiver from the obligations of the European Communities under paragraph 1 of Article I of the General Agreement with respect to the granting of preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the ACP-EC Partnership Agreement (hereinafter also referred to as "the Agreement")[1];

(*footnote original*) [1] As contained in documents G/C/W/187, G/C/W/204, G/C/W/254 and G/C/W/269).

Considering that, in the field of trade, the provisions of the ACP-EC Partnership Agreement requires preferential tariff treatment by the EC of exports of products originating in the ACP States;

Considering that the Agreement is aimed at improving the standard of living and economic development of the ACP States, including the least developed among them;

Considering also that the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement is designed to promote the expansion of trade and economic development of beneficiaries in a manner consistent with the objectives of the WTO and with the trade, financial and development needs of the beneficiaries and not to raise undue barriers or to create undue difficulties for the trade of other members;

Considering that the Agreement establishes a preparatory period extending until 31 December 2007, by the end of which new trading arrangements shall be concluded between the Parties to the Agreement;

Considering that the trade provisions of the Agreement have been applied since 1 March 2000 on the basis of transitional measures adopted by the ACP-EC joint institutions;

Noting the assurances given by the Parties to the Agreement that they will, upon request, promptly enter into consultations with any interested member with respect to any difficulty or matter that may arise as a result of the implementation of the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement;

Noting that the tariff applied to bananas imported in the "A" and "B" quotas shall not exceed 75 €/tonne until the entry into force of the new EC tariff-only regime.

Noting that the implementation of the preferential tariff treatment for bananas may be affected as a result of GATT Article XXVIII negotiations;

Noting the assurances from the Parties to the Agreement that any re-binding of the EC tariff on bananas under the relevant GATT Article XXVIII procedures should result in at least maintaining total market access for MFN banana suppliers and their willingness to accept a multilateral control on the implementation of this commitment.

Considering that, in light of the foregoing, the exceptional circumstances justifying a waiver from paragraph 1 of Article I of the General Agreement exist;

Decides as follows:

1. Subject to the terms and conditions set out hereunder, Article I, paragraph 1 of the General Agreement shall be waived, until 31 December 2007, to the extent necessary to permit the European Communities to provide preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the ACP-EC Partnership Agreement,[2] without being required to extend the same preferential treatment to like products of any other member.

(*footnote original*) [2] Any reference to the Partnership Agreement in this Decision shall also include the period during which the trade provisions of this Agreement are applied on the basis of transitional measures adopted by the ACP-EC joint institutions.

[586] WT/MIN (01)/15

2. The Parties to the Agreement shall promptly notify the General Council of any changes in the preferential tariff treatment to products originating in ACP States as required by the relevant provisions of the Agreement covered by this waiver.

3. The Parties to the Agreement will, upon request, promptly enter into consultations with any interested member with respect to any difficulty or matter that may arise as a result of the implementation of the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement; where a member considers that any benefit accruing to it under the General Agreement may be or is being impaired unduly as a result of such implementation, such consultations shall examine the possibility of action for a satisfactory adjustment of the matter.

3bis With respect to bananas, the additional provisions in the Annex shall apply.

4. Any member which considers that the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement is being applied inconsistently with this waiver or that any benefit accruing to it under the General Agreement may be or is being impaired unduly as a result of the implementation of the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement and that consultations have proved unsatisfactory, may bring the matter before the General Council, which will examine it promptly and will formulate any recommendations that they judge appropriate.

5. The Parties to the Agreement will submit to the General Council an annual report on the implementation of the preferential tariff treatment for products originating in ACP States as required by Article 36.3, Annex V and its Protocols of the Agreement.

6. This waiver shall not preclude the right of affected members to have recourse to Articles XXII and XXIII of the General Agreement.

ANNEX

The waiver would apply for ACP products under the Cotonou Agreement until 31 December 2007. In the case of bananas, the waiver will also apply until 31 December 2007, subject to the following, which is without prejudice to rights and obligations under Article XXVIII.

- The parties to the Cotonou Agreement will initiate consultations with Members exporting to the EU on a MFN basis (interested parties) early enough to finalize the process of consultations under the procedures hereby established at least three months before the entry into force of the new EC tariff only regime.
- No later than 10 days after the conclusion of Article XXVIII negotiations, interested parties will be informed of the EC intentions concerning the rebinding of the EC tariff on bananas. In the course of such consultations, the EC will provide information on the methodology used for such rebinding. In this regard, all EC WTO market-access commitments relating to bananas should be taken into account.
- Within 60 days of such an announcement, any such interested party may request arbitration.
- The arbitrator shall be appointed within 10 days, following the request subject to agreement between the two parties, failing which the arbitrator shall be appointed by the Director-General of the WTO, following consultations with the parties, within 30 days of the arbitration request. The mandate of the arbitrator shall be to determine, within 90 days of his appointment, whether the envisaged rebinding of the EC tariff on bananas would result in at least maintaining total market access for MFN banana suppliers, taking into account the above-mentioned EC commitments.
- If the arbitrator determines that the rebinding would not result in at least maintaining total market access for MFN suppliers, the EC shall rectify the matter. Within 10 days of the notification of the arbitration award to the General Council, the EC will enter into consultations with those interested parties that requested the arbitration. In the absence of a mutually satisfactory solution, the same arbitrator will be asked to determine, within 30 days of the new arbitration request, whether the EC has rectified the matter. The second arbitration award will be notified to the General Council. If the EC has failed to rectify the matter, this waiver shall cease to apply to bananas upon entry into force of the new EC tariff regime. The Article XXVIII negotiations and the arbitration procedures shall be concluded before the entry into force of the new EC tariff only regime on 1 January 2006.

F. EUROPEAN COMMUNITIES – TRANSITIONAL REGIME FOR THE EC AUTONOMOUS TARIFF RATE QUOTAS ON IMPORTS OF BANANAS

EUROPEAN COMMUNITIES – TRANSITIONAL REGIME FOR THE EC AUTONOMOUS TARIFF RATE QUOTAS ON IMPORTS OF BANANAS

Decision of 14 November 2001[587]

The Ministerial Conference,

Having regard to the Guiding Principles to be followed in considering applications for waivers adopted on 1 November 1956, the Understanding in Respect of

[587] WT/MIN(01)/16.

Waivers of Obligations under the General Agreement on Tariffs and Trade 1994, and paragraphs 3 and 4 of Article IX of the Marrakesh Agreement Establishing the World Trade Organization (hereinafter "*WTO Agreement*");

Taking note of the request of the European Communities for a waiver from its obligations under paragraphs 1 and 2 of Article XIII of the GATT 1994 with respect to bananas;

Taking note of the understandings reached by the EC, Ecuador and the United States that identify the means by which the longstanding dispute over the EC's banana regime can be resolved, in particular their provision for a temporary global quota allocation for ACP banana supplying countries under specified conditions;

Taking into account the exceptional circumstances surrounding the resolution of the bananas dispute and the interests of many WTO Members in the EC banana regime;

Recognizing the need to afford sufficient protection to the ACP banana supplying countries, including the most vulnerable, during a limited transition period, to enable them to prepare for a tariff-only regime;

Noting assurances given by the EC that it will, upon request, promptly enter into consultations with any interested member with respect to any difficulty or matter that may arise as a result of the implementation of the tariff rate quota for bananas originating in ACP States;

Considering that, in light of the foregoing, the exceptional circumstances justifying a waiver from paragraphs 1 and 2 of Article XIII of the GATT 1994 with respect to bananas exist;

Decides as follows:

1. With respect to the EC's imports of bananas, as of 1 January 2002, and until 31 December 2005, paragraphs 1 and 2 of Article XIII of the GATT 1994 are waived with respect to the EC's separate tariff quota of 750,000 tonnes for bananas of ACP origin.

2. The EC will, upon request, promptly enter into consultations with any interested member with respect to any difficulty or matter that may arise as a result of the implementation of the separate tariff rate quota for bananas originating in ACP States covered by this waiver; where a Member considers that any benefit accruing to it under the GATT 1994 may be or is being impaired unduly as a result of such implementation, such consultations shall examine the possibility of action for a satisfactory adjustment of the matter.

3. Any Member which considers that the separate tariff rate quota for bananas originating in ACP States covered by this waiver is being applied inconsistently with this waiver or that any benefit accruing to it under the GATT 1994 may be or is being impaired unduly as a result of the implementation of the separate tariff rate quota for bananas originating in ACP States covered by this waiver and that consultations have proved unsatisfactory, may bring the matter before the General Council, which will examine it promptly and will formulate any recommendations that they judge appropriate.

4. This waiver shall not preclude the right of affected members to have recourse to Articles XXII and XXIII of the GATT 1994.

XXVIII. THE JULY PACKAGE

Doha Work Programme

Decision Adopted by the General Council on 1 August 2004[588]

1. The General Council reaffirms the Ministerial Declarations and Decisions adopted at Doha and the full commitment of all Members to give effect to them. The Council emphasizes Members' resolve to complete the Doha Work Programme fully and to conclude successfully the negotiations launched at Doha. Taking into account the Ministerial Statement adopted at Cancún on 14 September 2003, and the statements by the Council Chairman and the Director-General at the Council meeting of 15–16 December 2003, the Council takes note of the report by the Chairman of the Trade Negotiations Committee (TNC) and agrees to take action as follows:

a. **Agriculture**: the General Council adopts the framework set out in Annex A to this document.

b. **Cotton**: the General Council reaffirms the importance of the Sectoral Initiative on Cotton and takes note of the parameters set out in Annex A within which the trade-related aspects of this issue will be pursued in the agriculture negotiations. The General Council also attaches importance to the development aspects of the Cotton Initiative and wishes to stress the complementarity between the trade and development aspects. The Council takes note of the recent Workshop on Cotton in Cotonou on 23–24 March 2004 organized by the WTO Secretariat, and other bilateral and multilateral efforts to make progress on the development assistance aspects and instructs the Secretariat to continue to work with the development community and to provide the Council with periodic reports on relevant developments.

Members should work on related issues of development multilaterally with the international financial institutions, continue their bilateral programmes, and all developed countries are urged to

[588] WT/L/579.

participate. In this regard, the General Council instructs the Director General to consult with the relevant international organizations, including the Bretton Woods Institutions, the Food and Agriculture Organization and the International Trade Centre to direct effectively existing programmes and any additional resources towards development of the economies where cotton has vital importance.

c. Non-agricultural Market Access: the General Council adopts the framework set out in Annex B to this document.

d. Development:

Principles: development concerns form an integral part of the Doha Ministerial Declaration. The General Council rededicates and recommits Members to fulfilling the development dimension of the Doha Development Agenda, which places the needs and interests of developing and least-developed countries at the heart of the Doha Work Programme. The Council reiterates the important role that enhanced market access, balanced rules, and well targeted, sustainably financed technical assistance and capacity building programmes can play in the economic development of these countries.

Special and Differential Treatment: the General Council reaffirms that provisions for special and differential (S&D) treatment are an integral part of the *WTO Agreements*. The Council recalls Ministers' decision in Doha to review all S&D treatment provisions with a view to strengthening them and making them more precise, effective and operational. The Council recognizes the progress that has been made so far. The Council instructs the Committee on Trade and Development in Special Session to expeditiously complete the review of all the outstanding Agreement-specific proposals and report to the General Council, with clear recommendations for a decision, by July 2005. The Council further instructs the Committee, within the parameters of the Doha mandate, to address all other outstanding work, including on the cross-cutting issues, the monitoring mechanism and the incorporation of S&D treatment into the architecture of WTO rules, as referred to in TN/CTD/7 and report, as appropriate, to the General Council.

The Council also instructs all WTO bodies to which proposals in Category II have been referred to expeditiously complete the consideration of these proposals and report to the General Council, with clear recommendations for a decision, as soon as possible and no later than July 2005. In doing so these bodies will ensure that, as far as possible, their meetings do not overlap so as to enable full and effective participation of developing countries in these discussions.

Technical Assistance: the General Council recognizes the progress that has been made since the Doha Ministerial Conference in expanding Trade-Related Technical Assistance (TRTA) to developing countries and low-income countries in transition. In furthering this effort the Council affirms that such countries, and in particular least-developed countries, should be provided with enhanced TRTA and capacity building, to increase their effective participation in the negotiations, to facilitate their implementation of WTO rules, and to enable them to adjust and diversify their economies. In this context the Council welcomes and further encourages the improved coordination with other agencies, including under the Integrated Framework for TRTA for the LDCs (IF) and the Joint Integrated Technical Assistance Programme (JITAP).

Implementation: concerning implementation-related issues, the General Council reaffirms the mandates Ministers gave in paragraph 12 of the Doha Ministerial Declaration and the Doha Decision on Implementation-Related Issues and Concerns, and renews Members' determination to find appropriate solutions to outstanding issues. The Council instructs the Trade Negotiations Committee, negotiating bodies and other WTO bodies concerned to redouble their efforts to find appropriate solutions as a priority. Without prejudice to the positions of Members, the Council requests the Director-General to continue with his consultative process on all outstanding implementation issues under paragraph 12(b) of the Doha Ministerial Declaration, including on issues related to the extension of the protection of geographical indications provided for in Article 23 of the TRIPS Agreement to products other than wines and spirits, if need be by appointing Chairpersons of concerned WTO bodies as his Friends and/or by holding dedicated consultations. The Director-General shall report to the TNC and the General Council no later than May 2005. The Council shall review progress and take any appropriate action no later than July 2005.

Other Development Issues: in the ongoing market access negotiations, recognising the fundamental principles of the WTO and relevant provisions of GATT 1994, special attention shall be given to the specific trade and development related needs and concerns of developing countries, including capacity constraints. These particular concerns of developing countries, including relating to food security, rural development, livelihood, preferences, commodities and net food imports, as well as prior unilateral liberalisation, should be taken into consideration, as appropriate, in the course of the Agriculture and NAMA negotiations. The trade-related issues identified for the fuller integration of small, vulnerable economies into the multilateral trading

system, should also be addressed, without creating a sub-category of Members, as part of a work programme, as mandated in paragraph 35 of the Doha Ministerial Declaration.

Least-Developed Countries: the General Council reaffirms the commitments made at Doha concerning least-developed countries and renews its determination to fulfil these commitments. Members will continue to take due account of the concerns of least-developed countries in the negotiations. The Council confirms that nothing in this Decision shall detract in any way from the special provisions agreed by Members in respect of these countries.

e. **Services**: the General Council takes note of the report to the TNC by the Special Session of the Council for Trade in Services[1] and reaffirms Members' commitment to progress in this area of the negotiations in line with the Doha mandate. The Council adopts the recommendations agreed by the Special Session, set out in Annex C to this document, on the basis of which further progress in the services negotiations will be pursued. Revised offers should be tabled by May 2005.

(*footnote original*) [1] This report is contained in document TN/S/16.

f. Other negotiating bodies:

Rules, Trade & Environment and TRIPS: the General Council takes note of the reports to the TNC by the Negotiating Group on Rules and by the Special Sessions of the Committee on Trade and Environment and the TRIPS Council.[2] The Council reaffirms Members' commitment to progress in all of these areas of the negotiations in line with the Doha mandates.

(*footnote original*) [2] The reports to the TNC referenced in this paragraph are contained in the following documents: Negotiating Group on Rules – TN/RL/9; Special Session of the Committee on Trade and Environment – TN/TE/9; Special Session of the Council for TRIPS – TN/IP/10.

Dispute Settlement: the General Council takes note of the report to the TNC by the Special Session of the Dispute Settlement Body[3] and reaffirms Members' commitment to progress in this area of the negotiations in line with the Doha mandate. The Council adopts the TNC's recommendation that work in the Special Session should continue on the basis set out by the Chairman of that body in his report to the TNC.

(*footnote original*) [3] This report is contained in document TN/DS/10.

g. **Trade Facilitation**: taking note of the work done on trade facilitation by the Council for Trade in Goods under the mandate in paragraph 27 of the Doha Ministerial Declaration and the work carried out under the auspices of the General Council both prior to the Fifth Ministerial Conference and after its conclusion, the General Council decides by explicit consensus to commence negotiations on the basis of the modalities set out in Annex D to this document.

Relationship between Trade and Investment, Interaction between Trade and Competition Policy and Transparency in Government Procurement: the Council agrees that these issues, mentioned in the Doha Ministerial Declaration in paragraphs 20–22, 23–25 and 26 respectively, will not form part of the Work Programme set out in that Declaration and therefore no work towards negotiations on any of these issues will take place within the WTO during the Doha Round.

h. **Other elements of the Work Programme**: the General Council reaffirms the high priority Ministers at Doha gave to those elements of the Work Programme which do not involve negotiations. Noting that a number of these issues are of particular interest to developing-country Members, the Council emphasizes its commitment to fulfil the mandates given by Ministers in all these areas. To this end, the General Council and other relevant bodies shall report in line with their Doha mandates to the Sixth Session of the Ministerial Conference. The moratoria covered by paragraph 11.1 of the Doha Ministerial Decision on Implementation-related Issues and Concerns and paragraph 34 of the Doha Ministerial Declaration are extended up to the Sixth Ministerial Conference.

2. The General Council agrees that this Decision and its Annexes shall not be used in any dispute settlement proceeding under the *DSU* and shall not be used for interpreting the existing WTO Agreements.

3. The General Council calls on all Members to redouble their efforts towards the conclusion of a balanced overall outcome of the Doha Development Agenda in fulfilment of the commitments Ministers took at Doha. The Council agrees to continue the negotiations launched at Doha beyond the timeframe set out in paragraph 45 of the Doha Declaration, leading to the Sixth Session of the Ministerial Conference. Recalling its decision of 21 October 2003 to accept the generous offer of the Government of Hong Kong, China to host the Sixth Session, the Council further agrees that this Session will be held in December 2005.

Annex A
Framework for Establishing Modalities in Agriculture

1. The starting point for the current phase of the agriculture negotiations has been the mandate set out in Paragraph 13 of the Doha Ministerial Declaration. This in turn built on the long-term objective of the Agreement

on Agriculture to establish a fair and market-oriented trading system through a programme of fundamental reform. The elements below offer the additional precision required at this stage of the negotiations and thus the basis for the negotiations of full modalities in the next phase. The level of ambition set by the Doha mandate will continue to be the basis for the negotiations on agriculture.

2. The final balance will be found only at the conclusion of these subsequent negotiations and within the Single Undertaking. To achieve this balance, the modalities to be developed will need to incorporate operationally effective and meaningful provisions for special and differential treatment for developing country Members. Agriculture is of critical importance to the economic development of developing country Members and they must be able to pursue agricultural policies that are supportive of their development goals, poverty reduction strategies, food security and livelihood concerns. Non-trade concerns, as referred to in Paragraph 13 of the Doha Declaration, will be taken into account.

3. The reforms in all three pillars form an interconnected whole and must be approached in a balanced and equitable manner.

4. The General Council recognizes the importance of cotton for a certain number of countries and its vital importance for developing countries, especially LDCs. It will be addressed ambitiously, expeditiously, and specifically, within the agriculture negotiations. The provisions of this framework provide a basis for this approach, as does the sectoral initiative on cotton. The Special Session of the Committee on Agriculture shall ensure appropriate prioritization of the cotton issue independently from other sectoral initiatives. A subcommittee on cotton will meet periodically and report to the Special Session of the Committee on Agriculture to review progress. Work shall encompass all trade-distorting policies affecting the sector in all three pillars of market access, domestic support, and export competition, as specified in the Doha text and this Framework text.

5. Coherence between trade and development aspects of the cotton issue will be pursued as set out in paragraph 1.b of the text to which this Framework is annexed.

DOMESTIC SUPPORT

6. The Doha Ministerial Declaration calls for "substantial reductions in trade-distorting domestic support". With a view to achieving these substantial reductions, the negotiations in this pillar will ensure the following:

- Special and differential treatment remains an integral component of domestic support. Modalities to be developed will include longer implementation periods and lower reduction coefficients for all types of trade-distorting domestic support and continued access to the provisions under Article 6.2.
- There will be a strong element of harmonisation in the reductions made by developed Members. Specifically, higher levels of permitted trade-distorting domestic support will be subject to deeper cuts.
- Each such Member will make a substantial reduction in the overall level of its trade-distorting support from bound levels.
- As well as this overall commitment, Final Bound Total AMS and permitted *de minimis* levels will be subject to substantial reductions and, in the case of the Blue Box, will be capped as specified in paragraph 15 in order to ensure results that are coherent with the long-term reform objective. Any clarification or development of rules and conditions to govern trade distorting support will take this into account.

Overall Reduction: A Tiered Formula

7. The overall base level of all trade-distorting domestic support, as measured by the Final Bound Total AMS plus permitted *de minimis* level and the level agreed in paragraph 8 below for Blue Box payments, will be reduced according to a tiered formula. Under this formula, Members having higher levels of trade-distorting domestic support will make greater overall reductions in order to achieve a harmonizing result. As the first instalment of the overall cut, in the first year and throughout the implementation period, the sum of all trade-distorting support will not exceed 80 per cent of the sum of Final Bound Total AMS plus permitted *de minimis* plus the Blue Box at the level determined in paragraph 15.

8. The following parameters will guide the further negotiation of this tiered formula:

- This commitment will apply as a minimum overall commitment. It will not be applied as a ceiling on reductions of overall trade-distorting domestic support, should the separate and complementary formulae to be developed for Total AMS, *de minimis* and Blue Box payments imply, when taken together, a deeper cut in overall trade-distorting domestic support for an individual Member.
- The base for measuring the Blue Box component will be the higher of existing Blue Box payments during a recent representative period to be agreed and the cap established in paragraph 15 below.

Final Bound Total AMS: A Tiered Formula

9. To achieve reductions with a harmonizing effect:

- Final Bound Total AMS will be reduced substantially, using a tiered approach.
- Members having higher Total AMS will make greater reductions.
- To prevent circumvention of the objective of the Agreement through transfers of unchanged domestic support between different support categories,

product-specific AMSs will be capped at their respective average levels according to a methodology to be agreed.

- Substantial reductions in Final Bound Total AMS will result in reductions of some product-specific support.

10. Members may make greater than formula reductions in order to achieve the required level of cut in overall trade-distorting domestic support.

De Minimis

11. Reductions in *de minimis* will be negotiated taking into account the principle of special and differential treatment. Developing countries that allocate almost all *de minimis* support for subsistence and resource-poor farmers will be exempt.

12. Members may make greater than formula reductions in order to achieve the required level of cut in overall trade-distorting domestic support.

Blue Box

13. Members recognize the role of the Blue Box in promoting agricultural reforms. In this light, Article 6.5 will be reviewed so that Members may have recourse to the following measures:

- Direct payments under production-limiting programmes if:
  - such payments are based on fixed and unchanging areas and yields; or
  - such payments are made on 85% or less of a fixed and unchanging base level of production; or
  - livestock payments are made on a fixed and unchanging number of head.

Or

- Direct payments that do not require production if:
  - such payments are based on fixed and unchanging bases and yields; or
  - livestock payments made on a fixed and unchanging number of head; and
  - such payments are made on 85% or less of a fixed and unchanging base level of production.

14. The above criteria, along with additional criteria will be negotiated. Any such criteria will ensure that Blue Box payments are less trade-distorting than AMS measures, it being understood that:

- Any new criteria would need to take account of the balance of WTO rights and obligations.
- Any new criteria to be agreed will not have the perverse effect of undoing ongoing reforms.

15. Blue Box support will not exceed 5% of a Member's average total value of agricultural production during an historical period. The historical period will be established in the negotiations. This ceiling will apply to any actual or potential Blue Box user from the beginning of the implementation period. In cases where a Member has placed an exceptionally large percentage of its trade-distorting support in the Blue Box, some flexibility will be provided on a basis to be agreed to ensure that such a Member is not called upon to make a wholly disproportionate cut.

Green Box

16. Green Box criteria will be reviewed and clarified with a view to ensuring that Green Box measures have no, or at most minimal, trade-distorting effects or effects on production. Such a review and clarification will need to ensure that the basic concepts, principles and effectiveness of the Green Box remain and take due account of non-trade concerns. The improved obligations for monitoring and surveillance of all new disciplines foreshadowed in paragraph 48 below will be particularly important with respect to the Green Box.

EXPORT COMPETITION

17. The Doha Ministerial Declaration calls for "reduction of, with a view to phasing out, all forms of export subsidies". As an outcome of the negotiations, Members agree to establish detailed modalities ensuring the parallel elimination of all forms of export subsidies and disciplines on all export measures with equivalent effect by a credible end date.

End Point

18. The following will be eliminated by the end date to be agreed:

- Export subsidies as scheduled.
- Export credits, export credit guarantees or insurance programmes with repayment periods beyond 180 days.
- Terms and conditions relating to export credits, export credit guarantees or insurance programmes with repayment periods of 180 days and below which are not in accordance with disciplines to be agreed. These disciplines will cover, *inter alia*, payment of interest, minimum interest rates, minimum premium requirements, and other elements which can constitute subsidies or otherwise distort trade.
- Trade distorting practices with respect to exporting STEs including eliminating export subsidies provided to or by them, government financing, and the underwriting of losses. The issue of the future use of monopoly powers will be subject to further negotiation.
- Provision of food aid that is not in conformity with operationally effective disciplines to be agreed. The objective of such disciplines will be to prevent commercial displacement. The role of international organizations as regards the provision of food aid by

Members, including related humanitarian and developmental issues, will be addressed in the negotiations. The question of providing food aid exclusively in fully grant form will also be addressed in the negotiations.

19. Effective transparency provisions for paragraph 18 will be established. Such provisions, in accordance with standard WTO practice, will be consistent with commercial confidentiality considerations.

Implementation

20. Commitments and disciplines in paragraph 18 will be implemented according to a schedule and modalities to be agreed. Commitments will be implemented by annual instalments. Their phasing will take into account the need for some coherence with internal reform steps of Members.

21. The negotiation of the elements in paragraph 18 and their implementation will ensure equivalent and parallel commitments by Members.

Special and Differential Treatment

22. Developing country Members will benefit from longer implementation periods for the phasing out of all forms of export subsidies.

23. Developing countries will continue to benefit from special and differential treatment under the provisions of Article 9.4 of the Agreement on Agriculture for a reasonable period, to be negotiated, after the phasing out of all forms of export subsidies and implementation of all disciplines identified above are completed.

24. Members will ensure that the disciplines on export credits, export credit guarantees or insurance programs to be agreed will make appropriate provision for differential treatment in favour of least-developed and net food-importing developing countries as provided for in paragraph 4 of the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries. Improved obligations for monitoring and surveillance of all new disciplines as foreshadowed in paragraph 48 will be critically important in this regard. Provisions to be agreed in this respect must not undermine the commitments undertaken by Members under the obligations in paragraph 18 above.

25. STEs in developing country Members which enjoy special privileges to preserve domestic consumer price stability and to ensure food security will receive special consideration for maintaining monopoly status.

Special Circumstances

26. In exceptional circumstances, which cannot be adequately covered by food aid, commercial export credits or preferential international financing facilities, ad hoc temporary financing arrangements relating to exports to developing countries may be agreed by Members. Such agreements must not have the effect of undermining commitments undertaken by Members in paragraph 18 above, and will be based on criteria and consultation procedures to be established.

MARKET ACCESS

27. The Doha Ministerial Declaration calls for "substantial improvements in market access". Members also agreed that special and differential treatment for developing Members would be an integral part of all elements in the negotiations.

The Single Approach: a Tiered Formula

28. To ensure that a single approach for developed and developing country Members meets all the objectives of the Doha mandate, tariff reductions will be made through a tiered formula that takes into account their different tariff structures.

29. To ensure that such a formula will lead to substantial trade expansion, the following principles will guide its further negotiation:

- Tariff reductions will be made from bound rates. Substantial overall tariff reductions will be achieved as a final result from negotiations.
- Each Member (other than LDCs) will make a contribution. Operationally effective special and differential provisions for developing country Members will be an integral part of all elements.
- Progressivity in tariff reductions will be achieved through deeper cuts in higher tariffs with flexibilities for sensitive products. Substantial improvements in market access will be achieved for all products.

30. The number of bands, the thresholds for defining the bands and the type of tariff reduction in each band remain under negotiation. The role of a tariff cap in a tiered formula with distinct treatment for sensitive products will be further evaluated.

Sensitive Products

Selection

31. Without undermining the overall objective of the tiered approach, Members may designate an appropriate number, to be negotiated, of tariff lines to be treated as sensitive, taking account of existing commitments for these products.

Treatment

32. The principle of 'substantial improvement' will apply to each product.

33. 'Substantial improvement' will be achieved through combinations of tariff quota commitments and tariff reductions applying to each product. However, balance in this negotiation will be found only if the final negotiated result also reflects the sensitivity of the product concerned.

34. Some MFN-based tariff quota expansion will be required for all such products. A base for such an expansion will be established, taking account of coherent and equitable criteria to be developed in the negotiations. In order not to undermine the objective of the tiered approach, for all such products, MFN based tariff quota expansion will be provided under specific rules to be negotiated taking into account deviations from the tariff formula.

Other Elements

35. Other elements that will give the flexibility required to reach a final balanced result include reduction or elimination of in-quota tariff rates, and operationally effective improvements in tariff quota administration for existing tariff quotas so as to enable Members, and particularly developing country Members, to fully benefit from the market access opportunities under tariff rate quotas.

36. Tariff escalation will be addressed through a formula to be agreed.

37. The issue of tariff simplification remains under negotiation.

38. The question of the special agricultural safeguard (SSG) remains under negotiation.

Special and differential treatment

39. Having regard to their rural development, food security and/or livelihood security needs, special and differential treatment for developing countries will be an integral part of all elements of the negotiation, including the tariff reduction formula, the number and treatment of sensitive products, expansion of tariff rate quotas, and implementation period.

40. Proportionality will be achieved by requiring lesser tariff reduction commitments or tariff quota expansion commitments from developing country Members.

41. Developing country Members will have the flexibility to designate an appropriate number of products as Special Products, based on criteria of food security, livelihood security and rural development needs. These products will be eligible for more flexible treatment. The criteria and treatment of these products will be further specified during the negotiation phase and will recognize the fundamental importance of Special Products to developing countries.

42. A Special Safeguard Mechanism (SSM) will be established for use by developing country Members.

43. Full implementation of the long-standing commitment to achieve the fullest liberalisation of trade in tropical agricultural products and for products of particular importance to the diversification of production from the growing of illicit narcotic crops is overdue and will be addressed effectively in the market access negotiations.

44. The importance of long-standing preferences is fully recognised. The issue of preference erosion will be addressed. For the further consideration in this regard, paragraph 16 and other relevant provisions of TN/AG/W/1/Rev.1 will be used as a reference.

LEAST-DEVELOPED COUNTRIES

45. Least-Developed Countries, which will have full access to all special and differential treatment provisions above, are not required to undertake reduction commitments. Developed Members, and developing country Members in a position to do so, should provide duty-free and quota-free market access for products originating from least-developed countries.

46. Work on cotton under all the pillars will reflect the vital importance of this sector to certain LDC Members and we will work to achieve ambitious results expeditiously.

RECENTLY ACCEDED MEMBERS

47. The particular concerns of recently acceded Members will be effectively addressed through specific flexibility provisions.

MONITORING AND SURVEILLANCE

48. Article 18 of the Agreement on Agriculture will be amended with a view to enhancing monitoring so as to effectively ensure full transparency, including through timely and complete notifications with respect to the commitments in market access, domestic support and export competition. The particular concerns of developing countries in this regard will be addressed.

OTHER ISSUES

49. Issues of interest but not agreed: sectoral initiatives, differential export taxes, GIs.

50. Disciplines on export prohibitions and restrictions in Article 12.1 of the Agreement on Agriculture will be strengthened.

Annex B

Framework for Establishing Modalities in Market Access for Non-Agricultural Products

1. This Framework contains the initial elements for future work on modalities by the Negotiating Group on Market Access. Additional negotiations are required to reach agreement on the specifics of some of these elements. These relate to the formula, the issues concerning the treatment of unbound tariffs in indent two of paragraph 5, the flexibilities for developing-country participants, the issue of participation in the sectorial tariff component and the preferences. In order to finalize the modalities, the Negotiating Group is instructed to address these issues expeditiously in a manner consistent with the mandate of paragraph 16 of the Doha Ministerial Declaration and the overall balance therein.

2. We reaffirm that negotiations on market access for non-agricultural products shall aim to reduce or as appropriate eliminate tariffs, including the reduction or elimination of tariff peaks, high tariffs, and tariff escalation, as well as non-tariff barriers, in particular on products of export interest to developing countries. We also reaffirm the importance of special and differential treatment and less than full reciprocity in reduction commitments as integral parts of the modalities.

3. We acknowledge the substantial work undertaken by the Negotiating Group on Market Access and the progress towards achieving an agreement on negotiating modalities. We take note of the constructive dialogue on the Chair's Draft Elements of Modalities (TN/MA/W/35/Rev.1) and confirm our intention to use this document as a reference for the future work of the Negotiating Group. We instruct the Negotiating Group to continue its work, as mandated by paragraph 16 of the Doha Ministerial Declaration with its corresponding references to the relevant provisions of Article XXVIII bis of GATT 1994 and to the provisions cited in paragraph 50 of the Doha Ministerial Declaration, on the basis set out below.

4. We recognize that a formula approach is key to reducing tariffs, and reducing or eliminating tariff peaks, high tariffs, and tariff escalation. We agree that the Negotiating Group should continue its work on a non-linear formula applied on a line-by-line basis which shall take fully into account the special needs and interests of developing and least-developed country participants, including through less than full reciprocity in reduction commitments.

5. We further agree on the following elements regarding the formula:

- product coverage shall be comprehensive without *a priori* exclusions;
- tariff reductions or elimination shall commence from the bound rates after full implementation of current concessions; however, for unbound tariff lines, the basis for commencing the tariff reductions shall be [two] times the MFN applied rate in the base year;
- the base year for MFN applied tariff rates shall be 2001 (applicable rates on 14 November);
- credit shall be given for autonomous liberalization by developing countries provided that the tariff lines were bound on an MFN basis in the WTO since the conclusion of the Uruguay Round;
- all non-*ad valorem* duties shall be converted to *ad valorem* equivalents on the basis of a methodology to be determined and bound in *ad valorem* terms;
- negotiations shall commence on the basis of the HS96 or HS2002 nomenclature, with the results of the negotiations to be finalized in HS2002 nomenclature;
- the reference period for import data shall be 1999–2001.

6. We furthermore agree that, as an exception, participants with a binding coverage of non-agricultural tariff lines of less than [35] percent would be exempt from making tariff reductions through the formula. Instead, we expect them to bind [100] percent of non-agricultural tariff lines at an average level that does not exceed the overall average of bound tariffs for all developing countries after full implementation of current concessions.

7. We recognize that a sectorial tariff component, aiming at elimination or harmonization is another key element to achieving the objectives of paragraph 16 of the Doha Ministerial Declaration with regard to the reduction or elimination of tariffs, in particular on products of export interest to developing countries. We recognize that participation by all participants will be important to that effect. We therefore instruct the Negotiating Group to pursue its discussions on such a component, with a view to defining product coverage, participation, and adequate provisions of flexibility for developing-country participants.

8. We agree that developing-country participants shall have longer implementation periods for tariff reductions. In addition, they shall be given the following flexibility:

a) applying less than formula cuts to up to [10] percent of the tariff lines provided that the cuts are no less than half the formula cuts and that these tariff lines do not exceed [10] percent of the total value of a Member's imports; or

b) keeping, as an exception, tariff lines unbound, or not applying formula cuts for up to [5] percent of tariff lines provided they do not exceed [5] percent of the total value of a Member's imports.

We furthermore agree that this flexibility could not be used to exclude entire HS Chapters.

9. We agree that least-developed country participants shall not be required to apply the formula nor participate in the sectorial approach, however, as part of their contribution to this round of negotiations, they are expected to substantially increase their level of binding commitments.

10. Furthermore, in recognition of the need to enhance the integration of least-developed countries into the multilateral trading system and support the diversification of their production and export base, we call upon developed-country participants and other participants who so decide, to grant on an autonomous basis duty-free and quota-free market access for non-agricultural

products originating from least-developed countries by the year [. . .].

11. We recognize that newly acceded Members shall have recourse to special provisions for tariff reductions in order to take into account their extensive market access commitments undertaken as part of their accession and that staged tariff reductions are still being implemented in many cases. We instruct the Negotiating Group to further elaborate on such provisions.

12. We agree that pending agreement on core modalities for tariffs, the possibilities of supplementary modalities such as zero-for-zero sector elimination, sectorial harmonization, and request & offer, should be kept open.

13. In addition, we ask developed-country participants and other participants who so decide to consider the elimination of low duties.

14. We recognize that NTBs are an integral and equally important part of these negotiations and instruct participants to intensify their work on NTBs. In particular, we encourage all participants to make notifications on NTBs by 31 October 2004 and to proceed with identification, examination, categorization, and ultimately negotiations on NTBs. We take note that the modalities for addressing NTBs in these negotiations could include request/offer, horizontal, or vertical approaches; and should fully take into account the principle of special and differential treatment for developing and least-developed country participants.

15. We recognize that appropriate studies and capacity building measures shall be an integral part of the modalities to be agreed. We also recognize the work that has already been undertaken in these areas and ask participants to continue to identify such issues to improve participation in the negotiations.

16. We recognize the challenges that may be faced by non-reciprocal preference beneficiary Members and those Members that are at present highly dependent on tariff revenue as a result of these negotiations on non-agricultural products. We instruct the Negotiating Group to take into consideration, in the course of its work, the particular needs that may arise for the Members concerned.

17. We furthermore encourage the Negotiating Group to work closely with the Committee on Trade and Environment in Special Session with a view to addressing the issue of non-agricultural environmental goods covered in paragraph 31 (iii) of the Doha Ministerial Declaration.

Annex C
Recommendations of the Special Session of the Council for Trade in Services

(a) Members who have not yet submitted their initial offers must do so as soon as possible.

(b) A date for the submission of a round of revised offers should be established as soon as feasible.

(c) With a view to providing effective market access to all Members and in order to ensure a substantive outcome, Members shall strive to ensure a high quality of offers, particularly in sectors and modes of supply of export interest to developing countries, with special attention to be given to least-developed countries.

(d) Members shall aim to achieve progressively higher levels of liberalization with no a priori exclusion of any service sector or mode of supply and shall give special attention to sectors and modes of supply of export interest to developing countries. Members note the interest of developing countries, as well as other Members, in Mode 4.

(e) Members must intensify their efforts to conclude the negotiations on rule-making under GATS Articles VI:4, X, XIII and XV in accordance with their respective mandates and deadlines.

(f) Targeted technical assistance should be provided with a view to enabling developing countries to participate effectively in the negotiations.

(g) For the purpose of the Sixth Ministerial meeting, the Special Session of the Council for Trade in Services shall review progress in these negotiations and provide a full report to the Trade Negotiations Committee, including possible recommendations.

Annex D
Modalities for Negotiations on Trade Facilitation

1. Negotiations shall aim to clarify and improve relevant aspects of Articles V, VIII and X of the GATT 1994 with a view to further expediting the movement, release and clearance of goods, including goods in transit.[1] Negotiations shall also aim at enhancing technical assistance and support for capacity building in this area. The negotiations shall further aim at provisions for effective cooperation between customs or any other appropriate authorities on trade facilitation and customs compliance issues.

(*footnote original*) [1] It is understood that this is without prejudice to the possible format of the final result of the negotiations and would allow consideration of various forms of outcomes.

2. The results of the negotiations shall take fully into account the principle of special and differential treatment for developing and least-developed countries. Members recognize that this principle should extend beyond the granting of traditional transition periods for implementing commitments. In particular, the extent and the timing of entering into commitments shall be related to the implementation capacities of developing and least-developed Members. It is further agreed that those Members would not be obliged to undertake

investments in infrastructure projects beyond their means.

3. Least-developed country Members will only be required to undertake commitments to the extent consistent with their individual development, financial and trade needs or their administrative and institutional capabilities.

4. As an integral part of the negotiations, Members shall seek to identify their trade facilitation needs and priorities, particularly those of developing and least-developed countries, and shall also address the concerns of developing and least-developed countries related to cost implications of proposed measures.

5. It is recognized that the provision of technical assistance and support for capacity building is vital for developing and least-developed countries to enable them to fully participate in and benefit from the negotiations. Members, in particular developed countries, therefore commit themselves to adequately ensure such support and assistance during the negotiations.[2]

(*footnote original*) [2] In connection with this paragraph, Members note that paragraph 38 of the Doha Ministerial Declaration addresses relevant technical assistance and capacity building concerns of Members.

6. Support and assistance should also be provided to help developing and least-developed countries implement the commitments resulting from the negotiations, in accordance with their nature and scope. In this context, it is recognized that negotiations could lead to certain commitments whose implementation would require support for infrastructure development on the part of some Members. In these limited cases, developed-country Members will make every effort to ensure support and assistance directly related to the nature and scope of the commitments in order to allow implementation. It is understood, however, that in cases where required support and assistance for such infrastructure is not forthcoming, and where a developing or least-developed Member continues to lack the necessary capacity, implementation will not be required. While every effort will be made to ensure the necessary support and assistance, it is understood that the commitments by developed countries to provide such support are not open-ended.

7. Members agree to review the effectiveness of the support and assistance provided and its ability to support the implementation of the results of the negotiations.

8. In order to make technical assistance and capacity building more effective and operational and to ensure better coherence, Members shall invite relevant international organizations, including the IMF, OECD, UNCTAD, WCO and the World Bank to undertake a collaborative effort in this regard.

9. Due account shall be taken of the relevant work of the WCO and other relevant international organizations in this area.

10. Paragraphs 45–51 of the Doha Ministerial Declaration shall apply to these negotiations. At its first meeting after the July session of the General Council, the Trade Negotiations Committee shall establish a Negotiating Group on Trade Facilitation and appoint its Chair. The first meeting of the Negotiating Group shall agree on a work plan and schedule of meetings.

General Interpretative Note to Annex 1A

I. GENERAL INTERPRETATIVE NOTE TO ANNEX 1A 99
A. TEXT OF GENERAL INTERPRETATIVE NOTE TO ANNEX 1A 99
B. INTERPRETATION AND APPLICATION OF GENERAL INTERPRETATIVE NOTE TO ANNEX 1A 99
1. General 99
(a) Presumption against conflict 99
(b) Issue of lex specialis/conflict 99

I. GENERAL INTERPRETATIVE NOTE TO ANNEX 1A

A. TEXT OF GENERAL INTERPRETATIVE NOTE TO ANNEX 1A

General Interpretative Note to Annex 1A

In the event of conflict between a provision of the General Agreement on Tariffs and Trade 1994 and a provision of another agreement in Annex 1A to the Agreement Establishing the World Trade Organization (referred to in the agreements in Annex 1A as the "*WTO Agreement*"), the provision of the other agreement shall prevail to the extent of the conflict.

B. INTERPRETATION AND APPLICATION OF GENERAL INTERPRETATIVE NOTE TO ANNEX 1A

1. General

(a) Presumption against conflict

1. In *EC – Bananas III*, given the existence of claims raised under *GATT 1994*, the *Licensing Agreement* and the *TRIMs Agreement*, the Panel was required to consider the interpretative interrelationship of these three agreements. In so doing, it first referred to the *General Interpretative Note to Annex 1A* of the *WTO Agreement*, which provides that in the event of conflict between a provision of the *GATT 1994* and another Agreement of Annex 1A, the provision of the other Agreement prevails. Noting that both the *Licensing Agreement* and the *TRIMs Agreement* are agreements in Annex 1A to *WTO Agreement*, the Panel, in a finding not reviewed by the Appellate Body, concluded that, in the case before it, "no conflicting, i.e. mutually exclusive, obligations arise from the provisions of the three Agreements . . .".[1]

(b) Issue of lex specialis/conflict

2. In *Indonesia – Autos*, Indonesia argued that the measures under examination were subsidies and therefore the *SCM Agreement*, being *lex specialis*, was the only "applicable law" (to the exclusion of other WTO provisions). The Panel recalled that a presumption against conflict existed in public international law:

> "We recall the Panel's finding in *Indonesia – Autos*, a dispute where
>
> > 'In considering Indonesia's defence that there is a general conflict between the provisions of the SCM Agreement and those of Article III of GATT, and consequently that the SCM Agreement is the only applicable law, we recall first that in public international law there is a presumption against conflict. This presumption is especially relevant in the WTO context[2] since all *WTO Agreement*s, including GATT 1994 which was modified by Understandings when judged necessary, were negotiated at the same time, by the same Members and in the same forum. In this context we recall the principle of effective interpretation pursuant to which all provisions of a treaty (and in the WTO system all agreements) must be given meaning, using the ordinary meaning of words'."[3]

3. As regards the order of analysis where two or more provisions from different covered Agreements appear *a priori* to the measure in question, see Section XXXVI.A.1 of the Chapter on the *DSU*.

4. As regards conflicts between provisions of the *GATT 1994* and provisions of other agreements in Annex IA, see relevant Chapters in the WTO Analytical Index.

---

[1] Panel Report on *EC – Bananas III*, paras. 7.157–7.163.

[2] (*footnote original*) In this context we note that the WTO Agreement contains a specific rule on conflicts which is however limited to conflicts between a specific provision of GATT 1994 and a provision of another agreement of Annex 1A. We do not consider this interpretative note in this section of the report because we are dealing with Indonesia's argument that there is a general conflict between Article III and the SCM Agreement, while the note is concerned with specific conflicts between a provision of GATT 1994 and a specific provision of another agreement of Annex 1A.

[3] Panel Report on *Indonesia – Autos*, para. 14.28. See also Panel Report on *Turkey – Textiles*, paras. 9.92–9.95.

I. GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

A. TEXT OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

1. The General Agreement on Tariffs and Trade 1994 ("GATT 1994") shall consist of:

   (a) the provisions in the General Agreement on Tariffs and Trade, dated 30 October 1947, annexed to the Final Act Adopted at the Conclusion of the Second Session of the Preparatory Committee of the United Nations Conference on Trade and Employment (excluding the Protocol of Provisional Application), as rectified, amended or modified by the terms of legal instruments which have entered into force before the date of entry into force of the WTO Agreement;

   (b) the provisions of the legal instruments set forth below that have entered into force under the GATT 1947 before the date of entry into force of the WTO Agreement:

   (i) protocols and certifications relating to tariff concessions;

   (ii) protocols of accession (excluding the provisions (*a*) concerning provisional application and withdrawal of provisional application and (*b*) providing that Part II of GATT 1947 shall be applied provisionally to the fullest extent not inconsistent with legislation existing on the date of the Protocol);

   (iii) decisions on waivers granted under Article XXV of GATT 1947 and still in force on the date of entry into force of the WTO Agreement[1];

(*footnote original*) [1] The waivers covered by this provision are listed in footnote 7 on pages 11 and 12 in Part II of document MTN/FA of 15 December 1993 and in MTN/FA/Corr.6 of 21 March 1994.[1] The Ministerial Conference shall establish at its first session a revised list of waivers covered by this provision that adds any waivers granted under GATT 1947 after 15 December 1993 and before the date of entry into force of the WTO Agreement, and deletes the waivers which will have expired by that time.

   (iv) other decisions of the CONTRACTING PARTIES to GATT 1947;

   (c) the Understandings set forth below:

   (i) Understanding on the Interpretation of Article II:1(b) of the General Agreement on Tariffs and Trade 1994;

   (ii) Understanding on the Interpretation of Article XVII of the General Agreement on Tariffs and Trade 1994;

   (iii) Understanding on Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994;

   (iv) Understanding on the Interpretation of Article XXIV of the General Agreement on Tariffs and Trade 1994;

   (v) Understanding in Respect of Waivers of Obligations under the General Agreement on Tariffs and Trade 1994;

   (vi) Understanding on the Interpretation of Article XXVIII of the General Agreement on Tariffs and Trade 1994; and

   (d) the Marrakesh Protocol to GATT 1994.

2. *Explanatory Notes*

   (a) The references to "contracting party" in the provisions of GATT 1994 shall be deemed to read "Member". The references to "less-developed contracting party" and "developed contracting party" shall be deemed to read "developing country Member" and "developed country Member". The references to "Executive Secretary" shall be deemed to read "Director-General of the WTO".

   (b) The references to the CONTRACTING PARTIES acting jointly in Articles XV:1, XV:2, XV:8, XXXVIII and the Notes *Ad* Article XII and XVIII; and in the provisions on special exchange agreements in Articles XV:2, XV:3, XV:6, XV:7 and XV:9 of GATT 1994 shall be deemed to be references to the WTO. The other functions that the provisions of GATT 1994 assign to the CONTRACTING PARTIES acting jointly shall be allocated by the Ministerial Conference.

   (c) (i) The text of GATT 1994 shall be authentic in English, French and Spanish.

   (ii) The text of GATT 1994 in the French language shall be subject to the rectifications of terms indicated in Annex A to document MTN.TNC/41.

   (iii) The authentic text of GATT 1994 in the Spanish language shall be the text in Volume IV of the Basic Instruments and Selected

[1] By Procés-Verbal of rectification the correct date of document MTN/FA/Corr.6 was noted as 18 March 1994.

Documents series, subject to the rectifications of terms indicated in Annex B to document MTN.TNC/41.

3. (a) The provisions of Part II of GATT 1994 shall not apply to measures taken by a Member under specific mandatory legislation, enacted by that Member before it became a contracting party to GATT 1947, that prohibits the use, sale or lease of foreign-built or foreign-reconstructed vessels in commercial applications between points in national waters or the waters of an exclusive economic zone. This exemption applies to: (*a*) the continuation or prompt renewal of a non-conforming provision of such legislation; and (*b*) the amendment to a non-conforming provision of such legislation to the extent that the amendment does not decrease the conformity of the provision with Part II of GATT 1947. This exemption is limited to measures taken under legislation described above that is notified and specified prior to the date of entry into force of the WTO Agreement. If such legislation is subsequently modified to decrease its conformity with Part II of GATT 1994, it will no longer qualify for coverage under this paragraph.

(b) The Ministerial Conference shall review this exemption not later than five years after the date of entry into force of the WTO Agreement and thereafter every two years for as long as the exemption is in force for the purpose of examining whether the conditions which created the need for the exemption still prevail.

(c) A Member whose measures are covered by this exemption shall annually submit a detailed statistical notification consisting of a five-year moving average of actual and expected deliveries of relevant vessels as well as additional information on the use, sale, lease or repair of relevant vessels covered by this exemption.

(d) A Member that considers that this exemption operates in such a manner as to justify a reciprocal and proportionate limitation on the use, sale, lease or repair of vessels constructed in the territory of the Member invoking the exemption shall be free to introduce such a limitation subject to prior notification to the Ministerial Conference.

(e) This exemption is without prejudice to solutions concerning specific aspects of the legislation covered by this exemption negotiated in sectoral agreements or in other fora.

B. INTERPRETATION AND APPLICATION OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

1. Paragraph 1

(a) Paragraph 1(b)

(i) Item (iv) – "other decisions of the CONTRACTING PARTIES to GATT 1947"

1. In *Japan – Alcoholic Beverages II*, the Appellate Body referred to paragraph 1(b)(iv) in examining the legal effect of the panel reports adopted by the CONTRACTING PARTIES to GATT 1947. The Appellate Body stated:

> "Article XVI:1 of the *WTO Agreement* and paragraph 1(b)(iv) of the language of Annex 1A incorporating the GATT 1994 into the *WTO Agreement* bring the legal history and experience under the GATT 1947 into the new realm of the WTO in a way that ensures continuity and consistency in a smooth transition from the GATT 1947 system. This affirms the importance to the Members of the WTO of the experience acquired by the CONTRACTING PARTIES to the GATT 1947 – and acknowledges the continuing relevance of that experience to the new trading system served by the WTO. Adopted panel reports are an important part of the GATT *acquis*. They are often considered by subsequent panels. They create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute. However, they are not binding, except with respect to resolving the particular dispute between the parties to that dispute.[2] In short, their character and their legal status have not been changed by the coming into force of the *WTO Agreement*.
>
> [W]e do not agree with the Panel's conclusion in the same paragraph of the Panel Report that adopted panel reports in themselves constitute 'other decisions of the CONTRACTING PARTIES to GATT 1947' for the purposes of paragraph 1(b)(iv) of the language of Annex 1A incorporating the GATT 1994 into the *WTO Agreement*."[3]

2. In *EC – Poultry*, the Appellate Body found that the Oilseeds Agreement, concluded between Brazil and the European Communities was not one of the legal instruments enumerated in paragraph 1(b). In the words of the Appellate Body:

---

[2] (*footnote original*) It is worth noting that the Statute of the International Court of Justice has an explicit provision, Article 59, to the same effect. This has not inhibited the development by that Court (and its predecessor) of a body of case law in which considerable reliance on the value of previous decisions is readily discernible.

[3] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 14. In *India – Patents (US)*, the Appellate Body acknowledged the first of the paragraphs cited above. Appellate Body Report on *India – Patents (US)*, para. 50. Also, in *US – FSC*, the Appellate Body endorsed the second paragraph. Appellate Body Report on *US – FSC*, para. 108.

"The Oilseeds Agreement [. . .] is a bilateral agreement negotiated by the European Communities and Brazil under Article XXVIII of the GATT 1947, as part of the resolution of the dispute in *EEC – Oilseeds.*[4] As such, the Oilseeds Agreement is not a 'covered agreement' within the meaning of Articles 1 and 2 of the DSU. Nor is the Oilseeds Agreement part of the multilateral obligations accepted by Brazil and the European Communities pursuant to the *WTO Agreement*, which came into effect on 1 January 1995. The Oilseeds Agreement is not cited in any Annex to the *WTO Agreement*. Although the provisions of certain legal instruments that entered into force under the GATT 1947 were made part of the GATT 1994 pursuant to the language in Annex 1A incorporating the GATT 1994 into the *WTO Agreement*[5], the Oilseeds Agreement is not one of those legal instruments."[6]

3. In *Argentina – Footwear (EC)*, the Appellate Body explained with precision that the GATT 1947 is an integral part of GATT 1994. The Appellate Body held:

"We note that the GATT 1994 is the first agreement that appears in Annex 1A to the *WTO Agreement*, and that it consists of: the provisions of the GATT 1947, as rectified, amended or modified by the terms of legal instruments that entered into force before the entry into force of the *WTO Agreement*; the provisions of certain legal instruments, such as protocols and certifications, decisions on waivers and other decisions of the CONTRACTING PARTIES to the GATT 1947, that entered into force under the GATT 1947 before the entry into force of the *WTO Agreement*; certain Uruguay Round Understandings relating to specific GATT articles; and the Marrakesh Protocol to the GATT 1994 containing Members' Schedules of Concessions."[7]

4. In *Korea – Dairy*, the same conclusion was reiterated with regard to the incorporation of GATT 1947 in the GATT 1994. The Appellate Body stated:

"The GATT 1994 consists of: (a) the provisions of the GATT 1947, as rectified, amended or modified before the entry into force of the *WTO Agreement*; (b) provisions of certain other legal instruments which entered into force under the GATT 1947 and before the date of entry into force of the *WTO Agreement*; (c) a number of Uruguay Round Understandings on the interpretation of certain GATT articles; and (d) the Marrakesh Protocol to GATT 1994."[8]

5. In *US – FSC*, the Appellate Body, in examining whether a certain decision of the GATT 1947 Council to adopt panel reports constituted "other decision" within the meaning of paragraph 1(b)(iv), agreed on the Panel's decision to examine not only the text of the decision but also "the circumstances surrounding the [decision]."[9]

6. In *EC – Tariff Preferences*, the Appellate Body held that the Enabling Clause is one of the "other decisions of the CONTRACTING PARTIES" within the meaning of paragraph 1(b)(iv). On that basis the Appellate Body found that the Enabling Clause is "an integral part of the GATT 1994."[10]

(b) Relationship with Article XVI:1 of the WTO Agreement

7. With respect to the relationship between Article XVI:1 of the *WTO Agreement* and paragraph 1(b), see Chapter on the *WTO Agreement*, Section XVII.B.1(g)(i).

PART I

II. ARTICLE I

A. TEXT OF ARTICLE I

Article I
General Most-Favoured-Nation Treatment

1. With respect to customs duties and charges of any kind imposed on or in connection with importation or exportation or imposed on the international transfer of payments for imports or exports, and with respect to the method of levying such duties and charges, and with respect to all rules and formalities in connection with importation and exportation, and with respect to all matters referred to in paragraphs 2 and 4 of Article III,* any advantage, favour, privilege or immunity granted by any contracting party to any product originating in or destined for any other country shall be accorded immediately and unconditionally to the like product originating in or destined for the territories of all other contracting parties.

2. The provisions of paragraph 1 of this Article shall not require the elimination of any preferences in respect of import duties or charges which do not exceed the levels provided for in paragraph 4 of this Article and which fall within the following descriptions:

(*a*) Preferences in force exclusively between two or more of the territories listed in Annex A, subject to the conditions set forth therein;

(*b*) Preferences in force exclusively between two or more territories which on July 1, 1939, were

[4] (*footnote original*) Adopted 25 January 1990, BISD 37S/86; and DS28/R, 31 March 1992.
[5] (*footnote original*) Those legal instruments are described in paragraph 1(b) of that incorporating language as including certain protocols and certifications relating to tariff concessions, certain protocols of accession, certain decisions on waivers granted under Article XXV of the GATT 1947, and "other decisions of the CONTRACTING PARTIES to GATT 1947".
[6] Appellate Body Report on *EC – Poultry*, para 79.
[7] Appellate Body Report on *Argentina – Footwear (EC)*, para. 80.
[8] Appellate Body Report on *Korea – Dairy*, para 75.
[9] Appellate Body Report on *US – FSC*, para. 111.
[10] Appellate Body Report on *EC – Tariff Preferences*, para 90.
* For the convenience of the reader, asterisks mark the portions of the text which should be read in conjunction with notes and supplementary provisions.

connected by common sovereignty or relations of protection or suzerainty and which are listed in Annexes B, C and D, subject to the conditions set forth therein;

(*c*) Preferences in force exclusively between the United States of America and the Republic of Cuba;

(*d*) Preferences in force exclusively between neighbouring countries listed in Annexes E and F.

3. The provisions of paragraph 1 shall not apply to preferences between the countries formerly a part of the Ottoman Empire and detached from it on July 24, 1923, provided such preferences are approved under paragraph 5[1], of Article XXV which shall be applied in this respect in the light of paragraph 1 of Article XXIX.

(*footnote original*) [1] The authentic text erroneously reads "subparagraph 5 (a)".

4. The margin of preference* on any product in respect of which a preference is permitted under paragraph 2 of this Article but is not specifically set forth as a maximum margin of preference in the appropriate Schedule annexed to this Agreement shall not exceed:

(*a*) in respect of duties or charges on any product described in such Schedule, the difference between the most-favoured-nation and preferential rates provided for therein; if no preferential rate is provided for, the preferential rate shall for the purposes of this paragraph be taken to be that in force on April 10, 1947, and, if no most-favoured-nation rate is provided for, the margin shall not exceed the difference between the most-favoured-nation and preferential rates existing on April 10, 1947;

(*b*) in respect of duties or charges on any product not described in the appropriate Schedule, the difference between the most-favoured-nation and preferential rates existing on April 10, 1947.

In the case of the contracting parties named in Annex G, the date of April 10, 1947, referred to in subparagraph (*a*) and (*b*) of this paragraph shall be replaced by the respective dates set forth in that Annex.

B. TEXT OF *AD* ARTICLE I

Ad Article I
Paragraph 1

The obligations incorporated in paragraph 1 of Article I by reference to paragraphs 2 and 4 of Article III and those incorporated in paragraph 2 *(b)* of Article II by reference to Article VI shall be considered as falling within Part II for the purposes of the Protocol of Provisional Application.

The cross-references, in the paragraph immediately above and in paragraph 1 of Article I, to paragraphs 2 and 4 of Article III shall only apply after Article III has been modified by the entry into force of the amendment provided for in the Protocol Modifying Part II and Article XXVI of the General Agreement on Tariffs and Trade, dated September 14, 1948.[1]

(*footnote original*) [1] This Protocol entered into force on 14 December 1948.

Paragraph 4

The term "margin of preference" means the absolute difference between the most-favoured-nation rate of duty and the preferential rate of duty for the like product, and not the proportionate relation between those rates. As examples:

(1) If the most-favoured-nation rate were 36 per cent *ad valorem* and the preferential rate were 24 per cent *ad valorem*, the margin of preference would be 12 per cent *ad valorem*, and not one-third of the most-favoured-nation rate;

(2) If the most-favoured-nation rate were 36 per cent *ad valorem* and the preferential rate were expressed as two-thirds of the most-favoured-nation rate, the margin of preference would be 12 per cent *ad valorem*;

(3) If the most-favoured-nation rate were 2 francs per kilogramme and the preferential rate were 1.50 francs per kilogramme, the margin of preference would be 0.50 franc per kilogramme.

The following kinds of customs action, taken in accordance with established uniform procedures, would not be contrary to a general binding of margins of preference:

(i) The re-application to an imported product of a tariff classification or rate of duty, properly applicable to such product, in cases in which the application of such classification or rate to such product was temporarily suspended or inoperative on April 10, 1947; and

(ii) The classification of a particular product under a tariff item other than that under which importations of that product were classified on April 10, 1947, in cases in which the tariff law clearly contemplates that such product may be classified under more than one tariff item.

C. INTERPRETATION AND APPLICATION OF ARTICLE I

1. Article I:1

(a) General

(i) Object and purpose

8. In *Canada – Autos*, in support of its interpretation of Article I:1, the Appellate Body explained the object and purpose of Article I:1 as follows:

"Th[e] object and purpose [of Article I] is to prohibit discrimination among like products originating in or destined for different countries. The prohibition of discrimination in Article I:1 also serves as an incentive for concessions, negotiated reciprocally, to be extended to all other Members on an MFN basis."[11]

9. In *EC – Bananas III*, in support of the proposition that Article II of *GATS* prohibits *de facto* discrimination as well as *de jure* discrimination, the Appellate Body noted that in past practice, *GATT* Article I applied to de facto discrimination. See Chapter on the *GATS*, Section III.B.3(a).

(ii) Scope of application

10. In *Canada – Autos*, the Appellate Body reviewed the Panel's finding that the Canadian import duty exemptions granted to motor vehicles originating in certain countries were inconsistent with Article I:1. The Appellate Body found the prohibition of discrimination under Article I:1 to include both *de jure* and de facto discrimination:

"In approaching this question, we observe first that the words of Article I:1 do not restrict its scope only to cases in which the failure to accord an 'advantage' to like products of all other Members appears *on the face* of the measure, or can be demonstrated on the basis of the words of the measure. Neither the words '*de jure*' nor 'de facto' appear in Article I:1. Nevertheless, we observe that Article I:1 does not cover only 'in law', or *de jure*, discrimination. As several GATT panel reports confirmed, Article I:1 covers also 'in fact', or de facto, discrimination.[12] Like the Panel, we cannot accept Canada's argument that Article I:1 does not apply to measures which, on their face, are 'origin-neutral'."[13]

(iii) Order of examination

11. In *Indonesia – Autos*, the Panel explained how to carry out the examination of a measure under Article I:1:

"The Appellate Body, in *Bananas III*, confirmed that to establish a violation of Article I, there must be an advantage, of the type covered by Article I and which is not accorded unconditionally to all 'like products' of all WTO Members. Following this analysis, we shall first examine whether the tax and customs duty benefits are advantages of the types covered by Article I. Second, we shall decide whether the advantages are offered (i) to all like products and (ii) unconditionally."[14]

(b) "any advantage, favour, privilege or immunity granted by any Member"

(i) General

12. In *Canada – Autos*, the Appellate Body came to the conclusion that Canada's import duty exemption accorded to motor vehicles originating in some countries in which affiliates of certain designated manufacturers were present, was inconsistent with Article I:1. The Appellate Body touched on the term "any advantage . . . granted by any Member to any product":

"We note next that Article I:1 requires that '*any advantage*, favour, privilege or immunity granted by any Member to *any product* originating in or destined for any other country shall be accorded immediately and unconditionally to the like product originating in or destined for the territories of *all other Members*.' (emphasis added) The words of Article I:1 refer not to *some* advantages granted 'with respect to' the subjects that fall within the defined scope of the Article, but to '*any advantage*'; not to *some* products, but to '*any product*'; and not to like products from *some* other Members, but to like products originating in or destined for '*all other*' Members."[15]

(ii) Allocation of tariff quotas

13. In *EC – Bananas III*, the European Communities appealed the Panel's finding on the ground that the Panel erred in concluding that the European Communities violated Article I:1 by maintaining the so-called activity function rules. Under these rules, importers of bananas from certain countries qualified for allocation of the tariff quota only if they fulfilled requirements which differed from those imposed on importers of bananas from other countries. The Appellate Body stated:

"On the first issue, the Panel found that the procedural and administrative requirements of the activity function rules for importing third-country and non-traditional ACP bananas differ from, and go significantly beyond,

---

[11] Appellate Body Report on *Canada – Autos*, para. 84.

[12] (*footnote original*) We note, though, that the measures examined in those reports differed from the measure in this case. Two of those reports dealt with "like" product issues: Panel Report on *Spain – Unroasted Coffee*; Panel Report on *Japan – SPF Dimension Lumber*. In this case, as we have noted, there is no dispute that the motor vehicles subject to the import duty exemption are "like" products. Furthermore, two other reports dealt with measures which, on their face, discriminated on a strict "origin" basis, so that, at any given time, either *every* product, or *no* product, of a particular origin was accorded an advantage. See Panel Report on *Belgium – Family Allowances*; Panel Report on *EEC – Imports of Beef*. In this case, motor vehicles imported into Canada are not disadvantaged in that same sense.

[13] Appellate Body Report on *Canada – Autos*, para. 78.

[14] Panel Report on *Indonesia – Autos*, para. 14.138. In *EC – Bananas III*, the Appellate Body stated as follows:

". . . Also, a broad definition has been given to the term "advantage" in Article I:1 of the GATT 1994 by the panel in *United States – Non-Rubber Footwear*. It may well be that there are considerations of EC competition policy at the basis of the activity function rules. This, however, does not legitimize the activity function rules to the extent that these rules discriminate among like products originating from different Members." See Appellate Body Report on *EC – Bananas III*, para. 206.

[15] Appellate Body Report on *Canada – Autos*, para. 79.

those required for importing traditional ACP bananas. This is a factual finding. Also, a broad definition has been given to the term 'advantage' in Article I:1 of the GATT 1994 by the panel in *United States – Non-Rubber Footwear*. It may well be that there are considerations of EC competition policy at the basis of the activity function rules. This, however, does not legitimize the activity function rules to the extent that these rules discriminate among like products originating from different Members. For these reasons, we agree with the Panel that the activity function rules are an 'advantage' granted to bananas imported from traditional ACP States, and not to bananas imported from other Members, within the meaning of Article I:1. Therefore, we uphold the Panel's finding that the activity function rules are inconsistent with Article I:1 of the GATT 1994."[16]

(iii) Reference to GATT practice

14. With respect to the practice under GATT 1947 concerning the term "any advantage, favour, privilege or immunity granted by any contracting party", see GATT Analytical Index, page 31.

(c) "like products"

15. In *Indonesia – Autos*, examining the consistency of the Indonesian National Car Programme with Article I:1, the Panel compared the concepts of "like products" under Articles I and III:

"We have found in our discussion of like products under Article III:2 that certain imported motor vehicles are like the National Car. The same considerations justify a finding that such imported vehicles can be considered like National Cars imported from Korea for the purpose of Article I."[17]

16. For the treatment of this subject-matter under GATT 1947, see GATT Analytical Index, pages 35–40.

(d) "any product originating in or destined for an other country"

17. In *EC – Bananas III*, the Appellate Body reviewed the Panel's finding that the EC import regime for bananas was inconsistent with Article XIII in that the European Communities allocated tariff quota shares to some Members without allocating such shares to other Members. Pointing out that "there [were] two separate EC import regimes for bananas, the preferential regime for traditional ACP bananas and the erga omnes regime for all other imports of bananas", the European Communities appealed that "the non-discrimination obligations of Article I:1, X:3(a) and XIII of GATT 1994 and Article 1.3 of the *Licensing Agreement* apply only *within* each of these separate regimes."[18] The Appellate Body responded as follows:

"The essence of the non-discrimination obligations is that like products should be treated equally, irrespective of their origin. As no participant disputes that all bananas are like products, the non-discrimination provisions apply to *all* imports of bananas, irrespective of whether and how a Member categorizes or subdivides these imports for administrative or other reasons. If, by choosing a different legal basis for imposing import restrictions, or by applying different tariff rates, a Member could avoid the application of the non-discrimination provisions to the imports of like products from different Members, the object and purpose of the non-discrimination provisions would be defeated. It would be very easy for a Member to circumvent the non-discrimination provisions of the GATT 1994 and the other Annex 1A agreements, if these provisions apply only *within* regulatory regimes established by that Member."[19]

(e) "shall be accorded immediately and unconditionally"

(i) General

18. In *Indonesia – Autos*, the Panel found that the exemption of import duties and sales taxes to those automobiles which met certain origin-neutral requirements was inconsistent with Article I:1, because of the existence of a number of "conditions":

"Indeed, it appears that the design and structure of the June 1996 car programme is such as to allow situations where another Member's like product to a National Car imported by PT PTN from Korea will be subject to much higher duties and sales taxes than those imposed on such National Cars. . . . The distinction as to whether one product is subject to 0% duty and the other one is subject to 200% duty or whether one product is subject to 0% sales tax and the other one is subject to a 35% sales tax, depends on whether or not PT TPN had made a 'deal' with that exporting company to produce that National Car, and is covered by the authorization of June 1996 with specifications that correspond to those of the Kia car produced only in Korea. In the GATT/WTO, the right of Members cannot be made dependent upon, conditional on or even affected by, any private contractual obligations in place.[20] The existence of these condi-

[16] Appellate Body Report on *EC – Bananas III*, para. 206.
[17] Panel Report on *Indonesia – Autos*, para. 14.141.
[18] Appellate Body Report on *EC – Bananas III*, para. 189.
[19] Appellate Body Report on *EC – Bananas III*, para. 190.
[20] (*footnote original*) For instance in the *FIRA* case, the Panel rejected Canada's argument that the situation under examination was the consequence of a private contract with an investor: "5.6 The Panel carefully examined the Canadian view that the purchase undertakings should be considered as private contractual obligations of particular foreign investors vis-à-vis the Canadian government. The Panel recognized that investors might have an economic advantage in assuming purchase undertakings, taking into account the other conditions under which the investment was permitted. The Panel felt, however, that even if this were so, private contractual obligations entered into by investors should not adversely affect the rights which contracting parties, including contracting parties not involved in the dispute, possess under Article III:4 of the General Agreement and which they can exercise on behalf of their exporters." See Panel Report on *Canada – FIRA*, para. 5.6.

tions is inconsistent with the provisions of Article I:1 which provides that tax and customs duty benefits accorded to products of one Member (here on Korean products) be accorded to imported like products from other Members 'immediately and unconditionally'.[21]

We note also that under the February 1996 car programme the granting of customs duty benefits to parts and components is conditional to their being used in the assembly in Indonesia of a National Car. The granting of tax benefits is conditional and limited to the only Pioneer company producing National Cars. And there is also a third condition for these benefits: the meeting of certain local content targets. Indeed under all these car programmes, customs duty and tax benefits are conditional on achieving a certain local content value for the finished car. The existence of these conditions is inconsistent with the provisions of Article I:1 which provides that tax and customs duty advantages accorded to products of one Member (here on Korean products) be accorded to imported like products from other Members 'immediately and unconditionally'.

For the reasons discussed above, we consider that the June 1996 car programme which introduced discrimination between imports in the allocation of tax and customs duty benefits based on various conditions and other criteria not related to the imports themselves and the February 1996 car programme which also introduce discrimination between imports in the allocation of customs duty benefits based on various conditions and other criteria not related to the imports themselves, are inconsistent with the provisions of Article I of GATT."[22]

19. In *Canada – Autos*, the Canadian measure at issue was an exemption of import duties granted on certain motor vehicles. The exemption was granted only where an exporter of motor vehicles was affiliated with a manufacturer/importer in Canada that had been designated, contingent on compliance with other requirements which were also claimed to be inconsistent with WTO law, as eligible to import motor vehicles duty-free under the Motor Vehicle Tariff Order (MVTO) 1998 or under a so-called Special Remission Order (SRO). In practice, exporters of motor vehicles affiliated with a manufacturer/importer in Canada were located in a small number of countries. The Panel had found the Canadian measure to be inconsistent with Article I:1. On appeal, the Appellate Body first discussed the concepts of *de jure* and de facto discrimination under Article I:1 (see paragraph 10 above) and then held that, by granting an advantage to some products from some Members and not to others, the measure in question was inconsistent with Article I:1:

"[F]rom both the text of the measure and the Panel's conclusions about the practical operation of the measure, it is apparent to us that '[w]ith respect to customs duties . . . imposed on or in connection with importation . . .,' Canada has granted an 'advantage' to some products from some Members that Canada has not 'accorded immediately and unconditionally' to 'like' products 'originating in or destined for the territories of *all other Members*.' (emphasis added) And this, we conclude, is not consistent with Canada's obligations under Article I:1 of the GATT 1994.[23]

20. The Appellate Body on *Canada – Autos* added that the context and the "pervasive character" of the MFN principle supported its finding:

"The context of Article I:1 within the GATT 1994 supports this conclusion. Apart from Article I:1, several 'MFN-type' clauses dealing with varied matters are contained in the GATT 1994.[24] The very existence of these other clauses demonstrates the pervasive character of the MFN principle of non-discrimination."[25].

21. In the *Canada – Autos* dispute, the Panel further clarified the meaning of the term "unconditionally". With respect to this term, Japan argued that, by making the import duty exemption conditional upon criteria unrelated to the imported product itself, Canada failed to accord the import duty exemption immediately and unconditionally to like products originating in all WTO Members. By "criteria unrelated to the imported products themselves," Japan was referring to the various conditions which confined the eligibility for the exemption to certain motor vehicle manufacturers in Canada. The Panel, in a finding subsequently not reviewed by the Appellate Body, held that the term "unconditionally" could not be "determined independently of an examination of whether it involves discrimination between like products of different countries". The Panel emphasized the "important distinction to be made between, on the one hand, the issue of whether an advantage within the meaning of Article I:1 is subject to conditions, and, on the other, whether an advantage, once it has been granted to the product of any country, is accorded 'unconditionally' to the like product of all other Members":

"[W]e believe that this interpretation of Japan does not accord with the ordinary meaning of the term 'unconditionally' in Article I:1 in its context and in light of the object and purpose of Article I:1. In our view, whether

[21] (*footnote original*) See *Working Party Report on the Accession of Hungary*, BISD 20S/34.

[22] Panel Report on *Indonesia – Autos*, paras. 14.145–14.147. Preceding the cited paragraphs, the Panel refers to the GATT Panel Report on *Belgium – Family Allowances*.

[23] Appellate Body Report on *Canada – Autos*, para. 81.

[24] (*footnote original*) These relate to such matters as internal mixing requirements (Article III:7); cinema films (Article IV(b)); transit of goods (Article V:2, 5, 6); marks of origin (Article IX:1); quantitative restrictions (Article XIII:1); measures to assist economic development (Article XVIII:20); and measures for goods in short supply (Article XX(j)).

[25] Appellate Body Report on *Canada – Autos*, para. 82.

an advantage within the meaning of Article I:1 is accorded 'unconditionally' cannot be determined independently of an examination of whether it involves discrimination between like products of different countries.

Article I:1 requires that, if a Member grants any advantage to any product originating in the territory of any other country, such advantage must be accorded 'immediately and unconditionally' to the like product originating in the territories of all other Members. We agree with Japan that the ordinary meaning of 'unconditionally' is 'not subject to conditions'. However, in our view Japan misinterprets the meaning of the word 'unconditionally' in the context in which it appears in Article I:1. The word 'unconditionally' in Article I:1 does not pertain to the granting of an advantage *per se*, but to the obligation to accord to the like products of all Members an advantage which has been granted to any product originating in any country. The purpose of Article I:1 is to ensure unconditional MFN treatment. In this context, we consider that the obligation to accord 'unconditionally' to third countries which are WTO Members an advantage which has been granted to any other country means that the extension of that advantage may not be made subject to conditions with respect to the situation or conduct of those countries. This means that an advantage granted to the product of any country must be accorded to the like product of all WTO Members without discrimination as to origin.

In this respect, it appears to us that there is an important distinction to be made between, on the one hand, the issue of whether an advantage within the meaning of Article I:1 is subject to conditions, and, on the other, whether an advantage, once it has been granted to the product of any country, is accorded "unconditionally" to the like product of all other Members. An advantage can be granted subject to conditions without necessarily implying that it is not accorded "unconditionally" to the like product of other Members. More specifically, the fact that conditions attached to such an advantage are not related to the imported product itself does not necessarily imply that such conditions are discriminatory with respect to the origin of imported products. We therefore do not believe that, as argued by Japan, the word "unconditionally" in Article I:1 must be interpreted to mean that making an advantage conditional on criteria not related to the imported product itself is *per se* inconsistent with Article I:1, irrespective of whether and how such criteria relate to the origin of the imported products.

We thus find that Japan's argument is unsupported by the text of Article I:1."[26]

22. The Panel on *Canada – Autos* rejected Canada's defence that the Canadian import duty exemption, as described in paragraph 19 above, was a permitted exception under Article XXIV because, on the one hand, Canada was not granting the import duty exemption to *all* NAFTA manufacturers and because, on the other hand, manufacturers from countries *other* than the United States and Mexico were being provided duty-free treatment.[27] As this finding of the Panel was not appealed, the Appellate Body concluded:

"The drafters also wrote various exceptions to the MFN principle into the GATT 1947 which remain in the GATT 1994.[28] Canada invoked one such exception before the Panel, relating to customs unions and free trade areas under Article XXIV. This justification was rejected by the Panel, and the Panel's findings on Article XXIV were not appealed by Canada. Canada has invoked no other provision of the GATT 1994, or of any other covered agreement, that would justify the inconsistency of the import duty exemption with Article I:1 of the GATT 1994.

The object and purpose of Article I:1 supports our interpretation. That object and purpose is to prohibit discrimination among like products originating in or destined for different countries. The prohibition of discrimination in Article I:1 also serves as an incentive for concessions, negotiated reciprocally, to be extended to all other Members on an MFN basis."[29]

23. In *US – Certain EC Products*, the United States increased the bonding requirements on imports from the European Communities in order to secure the payment of additional import duties to be imposed in retaliation for certain EC measures. Examining the consistency of the increased bonding requirements with GATT Article I, the Panel stated, with reference to the finding of the Panel on *Indonesia – Autos* referenced in paragraph 18 above:

"We find that the 3 March additional bonding requirements violated the most-favoured-nation clause of Article I of GATT, as it was applicable only to imports from the European Communities, although identical products from other WTO Members were not the subject of such an additional bonding requirements. The regulatory distinction (whether an additional bonding requirement is needed) was not based on any characteristic of the product but depended exclusively on the origin of the product and targeted exclusively some imports from the European Communities.[30]"[31]

24. In *EC – Tariff Preferences*, the Panel interpreted the term "unconditionally" as meaning "not limited by or subjected to any conditions":

[26] Panel Report on *Canada – Autos*, paras 10.22–10.25.
[27] Panel Report on *Canada – Autos*, paras. 10.55–10.56, which is referenced in para. 696 of this Chapter.
[28] (*footnote original*) Such as in Articles XX (general exceptions), XXI (security exceptions) and XXIV (customs unions and free trade areas).
[29] Appellate Body Report on *Canada – Autos*, paras. 83–84.
[30] (*footnote original*) Panel Report on *Indonesia – Autos*, para. 14.147.
[31] Panel Report on *US – Certain EC Products*, para. 6.54.

"In the Panel's view, moreover, the term 'unconditionally' in Article I:1 has a broader meaning than simply that of not requiring compensation. While the Panel acknowledges the European Communities' argument that conditionality in the context of traditional MFN clauses in bilateral treaties may relate to conditions of trade compensation for receiving MFN treatment, the Panel does not consider this to be the full meaning of 'unconditionally' under Article I:1. Rather, the Panel sees no reason not to give that term its ordinary meaning under Article I:1, that is, 'not limited by or subject to any conditions'.[32]

Because the tariff preferences under the Drug Arrangements are accorded only on the condition that the receiving countries are experiencing a certain gravity of drug problems, these tariff preferences are not accorded 'unconditionally' to the like products originating in all other WTO Members, as required by Article I:1. The Panel therefore finds that the tariff advantages under the Drug Arrangements are not consistent with Article I:1 of GATT 1994."[33]

(ii) Reference to GATT practice

25. With respect to the practice concerning the term "shall be accorded immediately and unconditionally" under GATT 1947, see GATT Analytical Index, pages 33–35.

D. EXCEPTIONS TO THE MFN PRINCIPLE

1. Anti-dumping and countervailing duties

(a) Article VI of GATT 1994

(i) Reference to GATT practice

26. With respect to GATT practice concerning anti-dumping and countervailing duties, see GATT Analytical Index, page 47.

2. Frontier traffic and customs unions

(a) Article XXIV of GATT 1994

27. In *Canada – Autos*, Canada invoked an Article XXIV exception with respect to a certain import duty exemption which had been found inconsistent with *GATT* Article I. The Panel rejected this defence, because, on the one hand, Canada was not granting the import duty exemption to *all* NAFTA manufacturers and because, on the other hand, manufacturers from countries *other* than the United States and Mexico were being provided duty-free treatment.[34] Since Canada did not appeal this finding of the Panel, the Appellate Body did not address the issue.

(b) Reference to GATT practice

28. With respect to GATT practice concerning frontier traffic and customs unions, see GATT Analytical Index, page 47.

3. Enabling Clause

(a) Text and adoption of the Enabling Clause

29. On 28 November 1979, the GATT Council adopted the Decision on Differential and More Favourable Treatment Reciprocity and Fuller Participation of Developing Countries (the "Enabling Clause").[35] The text of the Enabling Clause is set out below:

"Following negotiations within the framework of the Multilateral Trade Negotiations, the CONTRACTING PARTIES *decide* as follows:

1. Notwithstanding the provisions of Article I of the General Agreement, contracting parties may accord differential and more favourable treatment to developing countries[36], without according such treatment to other contracting parties.

2. The provisions of paragraph 1 apply to the following:[37]

(a) Preferential tariff treatment accorded by developed contracting parties to products originating in developing countries in accordance with the Generalized System of Preferences,[38]

(b) Differential and more favourable treatment with respect to the provisions of the General Agreement concerning non-tariff measures governed by the provisions of instruments multilaterally negotiated under the auspices of the GATT;

(c) Regional or global arrangements entered into amongst less-developed contracting parties for the mutual reduction or elimination of tariffs and, in accordance with criteria or conditions which may be prescribed by the CONTRACTING PARTIES, for the mutual reduction or elimination of non-tariff measures, on products imported from one another;

(d) Special treatment on the least developed among the developing countries in the context of any general or specific measures in favour of developing countries.

---

[32] (*footnote original*) *The New Shorter Oxford English Dictionary*, 4th Edition, p. 3465.
[33] Panel Report on *EC – Tariff Preferences*, paras. 7.59–7.60.
[34] Panel Report on *Canada – Autos*, paras. 10.55–10.56, which is referenced in para. 696 of this Chapter.
[35] BISD 26S/203.
[36] (*footnote original*) The words "developing countries" as used in this text are to be understood to refer also to developing territories.
[37] (*footnote original*) It would remain open for the CONTRACTING PARTIES to consider on an *ad hoc* basis under the GATT provisions for joint action any proposals for differential and more favourable treatment not falling within the scope of this paragraph.
[38] (*footnote original*) As described in the Decision of the CONTRACTING PARTIES of 25 June 1971, relating to the establishment of "generalized, non-reciprocal and non discriminatory preferences beneficial to the developing countries" (BISD 18S/24).

3. Any differential and more favourable treatment provided under this clause:

(a) shall be designed to facilitate and promote the trade of developing countries and not to raise barriers to or create undue difficulties for the trade of any other contracting parties;

(b) shall not constitute an impediment to the reduction or elimination of tariffs and other restrictions to trade on a most-favoured-nation basis;

(c) shall in the case of such treatment accorded by developed contracting parties to developing countries be designed and, if necessary, modified, to respond positively to the development, financial and trade needs of developing countries.

4. Any contracting party taking action to introduce an arrangement pursuant to paragraphs 1, 2 and 3 above or subsequently taking action to introduce modification or withdrawal of the differential and more favourable treatment so provided shall:[39]

(a) notify the CONTRACTING PARTIES and furnish them with all the information they may deem appropriate relating to such action;

(b) afford adequate opportunity for prompt consultations at the request of any interested contracting party with respect to any difficulty or matter that may arise. The CONTRACTING PARTIES shall, if requested to do so by such contracting party, consult with all contracting parties concerned with respect to the matter with a view to reaching solutions satisfactory to all such contracting parties.

5. The developed countries do not expect reciprocity for commitments made by them in trade negotiations to reduce or remove tariffs and other barriers to the trade of developing countries, i.e., the developed countries do not expect the developing countries, in the course of trade negotiations, to make contributions which are inconsistent with their individual development, financial and trade needs. Developed contracting parties shall therefore not seek, neither shall less-developed contracting parties be required to make, concessions that are inconsistent with the latter's development, financial and trade needs.

6. Having regard to the special economic difficulties and the particular development, financial and trade needs of the least-developed countries, the developed countries shall exercise the utmost restraint in seeking any concessions or contributions for commitments made by them to reduce or remove tariffs and other barriers to the trade of such countries, and the least-developed countries shall not be expected to make concessions or contributions that are inconsistent with the recognition of their particular situation and problems.

7. The concessions and contributions made and the obligations assumed by developed and less-developed contracting parties under the provisions of the General Agreement should promote the basic objectives of the Agreement, including those embodied in the Preamble and in Article XXXVI. Less-developed contracting parties expect that their capacity to make contributions or negotiated concessions or take other mutually agreed action under the provisions and procedures of the General Agreement would improve with the progressive development of their economies and improvement in their trade situation and they would accordingly expect to participate more fully in the framework of rights and obligations under the General Agreement.

8. Particular account shall be taken of the serious difficulty of the least-developed countries in making concessions and contributions in view of their special economic situation and their development, financial and trade needs.

9. The contracting parties will collaborate in arrangements for review of the operation of these provisions, bearing in mind the need for individual and joint efforts by contracting parties to meet the development needs of developing countries and the objectives of the General Agreement."

(b) Generalized System of Preferences

30. Pursuant to the Enabling Clause, notifications on the Generalized System of Preferences (GSP) schemes of developed country Members in favour of least-developed countries are to be sent to the Committee on Trade and Development. In contrast, under the Waiver on Preferential Tariff Treatment for Least-Developed Countries, which is referred to in paragraph 59 below, notifications on steps taken by developing country Members in favour of least-developed countries are to be sent to the Council on Trade in Goods. In order to allow for a unified consideration of both types of measures in one forum, at its meeting of 16 February 2001, the Committee on Trade and Development agreed *ad referendum* that any market access measures taken specifically in favour of the least-developed countries under the Enabling Clause and notified to the Committee be transmitted to the Sub-Committee on Least-developed Countries, for substantive consideration, and that the Sub-Committee report back to the Committee on its discussions.[40] A similar procedure was agreed to in the Council for Trade in Goods with respect to the treatment of notifications under the Waiver on Preferential Tariff Treatment for LDCs, see paragraph 59 below.

31. From the establishment of the WTO until 31 December 2004 the following Members have filed noti-

[39] (*footnote original*) Nothing in these provisions shall affect the rights of contracting parties under the General Agreement.

[40] WT/COMTD/M/32, section J.

fications with the Committee on Trade and Development on their GSP schemes:

(a) Canada[41];

(b) European Communities[42];

(c) Japan[43];

(d) New Zealand[44];

(e) Norway[45];

(f) Switzerland[46];

(g) United States[47];

(h) Iceland[48]; and

(i) Australia.[49]

32. With respect to the GSP schemes notified to the GATT, see GATT Analytical Index, page 50.

(c) Regional trade arrangements among developing country Members

33. To date, the Committee on Trade and Development has received notifications or communications of seven regional trade arrangements among developing country Members:[50]

Agreement	Date of entry into force	Date of notification	WTO document series
Treaty Establishing the Common Market for Eastern and Southern Africa (COMESA)	8-Dec-94	29-Jun-95	WT/COMTD/N/3
Trade Agreement among the Melanesian Spearhead Group (MSG) countries	22-Jul-93	7-Oct-99	WT/COMTD/N/9 WT/COMTD/21
Treaty of West African Economic and Monetary Union (WAEMU)	1-Jan-00	3-Feb-00	WT/COMTD/N/11 WT/COMTD/23
Treaty Establishing the Economic and Monetary Community of Central Africa (CEMAC)	24-Jun-99	29-Sep-00	WT/COMTD/N13 WT/COMTD/24
Treaty for the Establishment of the East African Community (EAC)	7-Jul-00	11-Oct-00	WT/COMTD/N/14 WT/COMTD/25
Free Trade Agreement between the Republic of India and the Democratic Socialist Republic of Sri Lanka	15-Dec-01	27-Jun-02	WT/COMTD/N/16
Framework Agreement on comprehensive economic co-operation between the Association of South East Asian Nations (ASEAN) and the People's Republic of China	1-Jul-03	21-12-04	WT/COMTD/N/20 WT/COMTD/51

34. The Committee on Trade and Development has also received notifications with respect to four other regional trade arrangements which were previously notified to the GATT Committee on Trade and Development:

(a) Southern Common Market Agreement (MERCOSUR)[51], and the Memorandum of Understanding on Closer Relations between Bolivia and MERCOSUR;[52]

(b) Agreement on SAARC[53] Preferential Trading Arrangement (SAPTA)[54];

(c) Latin American Integration Association (LAIA) – the Membership of Cuba[55]; and

(d) Common Effective Preferential Tariffs (CEPT) scheme for the ASEAN[56] Free Trade Area (AFTA).[57]

[50] With respect to the regional trade arrangements notified under the Enabling Clause within the GATT framework, see GATT Analytical Index, Article I, pp. 56–58. Also, with respect to the role of the GATT Committee on Trade and Development in the operation of the Enabling Clause, see GATT Analytical Index, pp. 1048–1049.
[51] The request for circulation of the updated text of this Agreement was given in WT/COMTD/1. The parties to this Agreement are: Argentina, Brazil, Paraguay and Uruguay.
[52] The Memorandum was notified in WT/COMTD/4.
[53] "SAARC" is the abbreviation of "South Asian Association for Regional Cooperation".
[54] This Agreement was notified in WT/COMTD/10. The parties to the Agreement are: Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka.
[55] The status of this arrangement was notified in WT/COMTD/7 and WT/COMTD/11. The membership of Cuba was notified in WT/COMTD/N/10.
[56] "ASEAN" is the abbreviation of Association of South-East Asian Nations, whose members are: Brunei Darussalam, Indonesia, Malaysia, Philippines, Singapore and Thailand.
[57] The information on this scheme was given in WT/COMTD/3.

35. On 30 April 2004, the Committee on Trade and Development received notification of China's accession to the Bangkok Agreement.[58]

36. Under paragraph 4(a) of the Enabling Clause, Members are required to notify arrangements taken under the Enabling Clause, and the modification or withdrawal thereof, to the Committee on Trade and Development. In this regard, in fulfilment of its mandate under item 1(b) of its terms of reference[59], at its meeting on 20 February 1998, the Committee on Regional Trade Agreements (Committee on RTAs) adopted recommendations to the Committee on Trade and Development with respect to how the required reporting on the operation of regional trade agreements, including those under the Enabling Clause, should be carried out.[60] At its meeting of 2 November 1998, the Committee on Trade and Development adopted the recommended procedures, as general guidelines with respect to information on regional trade agreements submitted to it.[61]

37. When an agreement is notified under the Enabling Clause, it is inscribed on the agenda of the Committee on Trade and Development. Subsequent actions of the Committee may include "noting" the agreement, requesting additional information, transferring it to the Committee on RTAs for examination, and reviewing reports made by members on changes to their agreements.

38. At its meeting of 14 September 1995, the Committee on Trade and Development adopted the following terms of reference for the Working Party on MERCOSUR[62]:

> "To examine the Southern Common Market Agreement (MERCOSUR) in the light of the relevant provisions of the Enabling Clause and of the GATT 1994, including Article XXIV, and to transmit a report and recommendations to the Committee on Trade and Development for submission to the General Council, with a copy of the report transmitted as well to the Council for Trade in Goods. The examination in the Working Party will be based on a complete notification and on written questions and answers."[63]

39. The review of MERCOSUR was later taken over by the Committee on RTAs.[64]

(d) Special treatment of the least-developed countries

40. As of 31 December 2004 the Committee on Trade and Development has received notifications under the Enabling Clause from the following Members of their special treatment in respect of the least-developed countries in the context of any general or specific measures in favour of developing countries:

(a) Canada[65];

(b) European Communities[66];

(c) Japan[67];

(d) Republic of Korea[68];

(e) Norway[69];

(f) New Zealand[70];

(g) Switzerland[71];

(h) United States[72];

(i) Iceland[73]; and

(j) Australia.[74]

(e) Interpretation

(i) The relationship between the Enabling Clause and Article I:1 of the GATT 1994

The Enabling Clause as an exception to Article I:1 of the GATT 1994

41. In *EC – Tariff Preferences*, the Appellate Body addressed the relationship between Article I:1 of the GATT 1994 and the Enabling Clause and upheld the Panel's characterization of the Enabling Clause as an exception to Article I:1 based on the ordinary meaning

---

[58] The notification is contained in WT/COMTD/N/19. The Bangkok Agreement entered into force in 1976 as a preferential trading arrangement between developing countries in the Asia-Pacific region and was notified to GATT/WTO pursuant to the Enabling Clause. The five original participating states of the Agreement are Bangladesh, India, the Lao People's Democratic Republic, the Republic of Korea and Sri Lanka.

of paragraph 1 of the Enabling Clause. It also stated that such a characterization does not affect the importance of the policy objectives of the Enabling Clause:

> "By using the word 'notwithstanding', paragraph 1 of the Enabling Clause permits Members to provide 'differential and more favourable treatment' to developing countries 'in spite of' the MFN obligation of Article I:1. Such treatment would otherwise be inconsistent with Article I:1 because that treatment is not extended to all Members of the WTO 'immediately and unconditionally'.[75] Paragraph 1 thus excepts Members from complying with the obligation contained in Article I:1 for the purpose of providing differential and more favourable treatment to developing countries, provided that such treatment is in accordance with the conditions set out in the Enabling Clause. As such, the Enabling Clause operates as an 'exception' to Article I:1.
>
> . . .
>
> In sum, in our view, the characterization of the Enabling Clause as an exception in no way diminishes the right of Members to provide or to receive 'differential and more favourable treatment'. The status and relative importance of a given provision does not depend on whether it is characterized, for the purpose of allocating the burden of proof, as a claim to be proven by the complaining party, or as a defence to be established by the responding party. Whatever its characterization, a provision of the covered agreements must be interpreted in accordance with the 'customary rules of interpretation of public international law', as required by Article 3.2 of the *Understanding on Rules and Procedures Governing the Settlement of Disputes* (the 'DSU').[76] Members' rights under the Enabling Clause are not curtailed by requiring preference-granting countries to establish in dispute settlement the consistency of their preferential measures with the conditions of the Enabling Clause. Nor does characterizing the Enabling Clause as an exception detract from its critical role in encouraging the granting of special and differential treatment to developing-country Members of the WTO."[77]

Order of analysis

42. The Appellate Body stated in *EC – Tariff Preferences* that the Enabling Clause does not exclude the applicability of Article I:1. Rather, it is a more specific rule [on GSP matters] that prevails over Article I:1. According to the Appellate Body, a panel should first examine the consistency of a challenged measure with Article I:1 and then proceed to examine the justifiability of the measure under the Enabling Clause:

> "It is well settled that the MFN principle embodied in Article I:1 is a 'cornerstone of the GATT' and 'one of the pillars of the WTO trading system', which has consistently served as a key basis and impetus for concessions in trade negotiations. However, we recognize that Members are entitled to adopt measures providing 'differential and more favourable treatment' under the Enabling Clause. Therefore, challenges to such measures, brought under Article I:1, cannot succeed where such measures are in accordance with the terms of the Enabling Clause. In our view, this is so because the text of paragraph 1 of the Enabling Clause ensures that, to the extent that there is a conflict between measures under the Enabling Clause and the MFN obligation in Article I:1, the Enabling Clause, as the more specific rule, prevails over Article I:1. In order to determine whether such a conflict exists, however, a dispute settlement panel should, as a first step, examine the consistency of a challenged measure with Article I:1, as the general rule. If the measure is considered at this stage to be inconsistent with Article I:1, the panel should then examine, as a second step, whether the measure is nevertheless justified by the Enabling Clause. It is only at this latter stage that a final determination of consistency with the Enabling Clause or inconsistency with Article I:1 can be made.
>
> In other words, the Enabling Clause 'does not exclude the applicability' of Article I:1 in the sense that, as a matter of procedure (or "order of examination", as the Panel stated), the challenged measure is submitted successively to the test of compatibility with the two provisions. But, as a matter of final determination – or *application* rather than *applicability* – it is clear that only one provision applies at a time . . .".[78]

(ii) Footnote 3 to paragraph 2

"generalized"

43. The Appellate Body addressed the meaning of the term "generalized" as context for the interpretation of the term "non-discriminatory" in *EC – Tariff Preferences* and found that its ordinary meaning is to "apply more generally". The Appellate Body also took note of the historical context leading to this requirement:

> "We continue our interpretive analysis by turning to the immediate context of the term 'non-discriminatory'. We note first that footnote 3 to paragraph 2(a) stipulates that, in addition to being 'non-discriminatory', tariff preferences provided under GSP schemes must be 'generalized'. According to the ordinary meaning of that

[75] (*footnote original*) GATT 1994, Art. I:1.

[76] (*footnote original*) In this regard, we recall the Appellate Body's statement in *EC – Hormones* that:

> . . . merely characterizing a treaty provision as an "exception" does not by itself justify a "stricter" or "narrower" interpretation of that provision than would be warranted by examination of the ordinary meaning of the actual treaty words, viewed in context and in the light of the treaty's object and purpose, or, in other words, by applying the normal rules of treaty interpretation.

(Appellate Body Report, para. 104)

[77] Appellate Body Report on *EC – Tariff Preferences*, paras. 90 and 98.

[78] Appellate Body Report on *EC – Tariff Preferences*, paras. 101–102.

term, tariff preferences provided under GSP schemes must be 'generalized' in the sense that they 'apply more generally; [or] become extended in application'.[79] However, this ordinary meaning alone may not reflect the entire significance of the word "generalized" in the context of footnote 3 of the Enabling Clause, particularly because that word resulted from lengthy negotiations leading to the GSP. In this regard, we note the Panel's finding that, by requiring tariff preferences under the GSP to be "generalized", developed and developing countries together sought to eliminate existing "special" preferences that were granted only to certain designated developing countries.[80] Similarly, in response to our questioning at the oral hearing, the participants agreed that one of the objectives of the 1971 Waiver Decision and the Enabling Clause was to eliminate the fragmented system of special preferences that were, in general, based on historical and political ties between developed countries and their former colonies".[81]

"non-discriminatory"

44. In *EC – Tariff Preferences*, the European Communities appealed the Panel's findings based on the drafting history of the Generalized System of Preferences that the term "non-discriminatory" in footnote 3 to paragraph 2 of the Enabling Clause requires that identical tariff preferences be provided to all developing countries without differentiation, except as regards the implementation of *a priori* limitations.[82] While rejecting the Panel's findings, the Appellate Body interpreted the ordinary meaning of the term "non-discriminatory" as requiring that preference-giving countries make identical tariff preferences available to all similarly-situated beneficiary developing countries:

"[T]he ordinary meanings of 'discriminate' point in conflicting directions with respect to the propriety of according differential treatment. Under India's reading, any differential treatment of GSP beneficiaries would be prohibited, because such treatment necessarily makes a distinction between beneficiaries. In contrast, under the European Communities' reading, differential treatment of GSP beneficiaries would not be prohibited *per se*. Rather, distinctions would be impermissible only where the basis for such distinctions was improper. Given these divergent meanings, we do not regard the term 'non-discriminatory', on its own, as determinative of the permissibility of a preference-granting country according different tariff preferences to different beneficiaries of its GSP scheme.

Nevertheless, at this stage of our analysis, we are able to discern some of the content of the 'non-discrimination' obligation based on the ordinary meanings of that term. Whether the drawing of distinctions is *per se* discriminatory, or whether it is discriminatory only if done on an improper basis, the ordinary meanings of 'discriminate' converge in one important respect: they both suggest that distinguishing among similarly-situated beneficiaries is discriminatory. For example, India suggests that all beneficiaries of a particular Member's GSP scheme are similarly-situated, implicitly arguing that any differential treatment of such beneficiaries constitutes discrimination. . . .

Paragraph 2(a), on its face, does not explicitly authorize or prohibit the granting of different tariff preferences to different GSP beneficiaries. It is clear from the ordinary meanings of 'non-discriminatory', however, that preference-granting countries must make available identical tariff preferences to all similarly-situated beneficiaries."[83]

45. After taking into account the stated objectives of the Preamble to the *WTO Agreement*, Appellate Body stated in *EC – Tariff Preferences* that the interpretation of the term "non-discriminatory" in the Enabling Clause should allow the possibility of additional preferences to be given to developing countries with particular needs:

"We are of the view that the objective of improving developing countries' 'share in the growth in international trade', and their 'trade and export earnings', can be fulfilled by promoting preferential policies aimed at those interests that developing countries have in common, *as well as* at those interests shared by sub-categories of developing countries based on their particular needs. An interpretation of 'non-discriminatory' that does not require the granting of 'identical tariff preferences' allows not only for GSP schemes providing preferential market access to all beneficiaries, but also the possibility of additional preferences for developing countries with particular needs, provided that such additional preferences are not inconsistent with other provisions of the Enabling Clause, including the requirements that such preferences be 'generalized' and 'non-reciprocal'. We therefore consider such an interpretation to be consistent with the object and purpose of the *WTO Agreement* and the Enabling Clause."[84]

46. After considering its ordinary meaning, its context and the object and purpose of the *WTO Agreement*, the Appellate Body found in *EC – Tariff Preferences* that the term "non-discriminatory" in footnote 3 to paragraph 2 of the Enabling Clause requires that identical

[79] (*footnote original*) *Shorter Oxford English Dictionary*, 5th ed., W.R. Trumble, A. Stevenson (eds.) (Oxford University Press, 2002), Vol. 1, p. 1082.

[80] (*footnote original*) Panel Report, paras. 7.135–7.137. The Panel also observed that statements by developed and developing countries indicated the aim of providing GSP schemes with a broad scope, encompassing the granting of preferences by *all* developed countries to *all* developing countries. (*Ibid.*, paras. 7.131–7.132)

[81] Appellate Body Report on *EC – Tariff Preferences*, para.155.

[82] Panel Report on *EC – Tariff Preferences*, paras. 7.126–7.161.

[83] Appellate Body Report on *EC – Tariff Preferences*, paras. 152–154.

[84] Appellate Body Report on *EC – Tariff Preferences*, para. 169.

preference be made available to all similarly situated GSP beneficiaries that have the "development, financial and trade needs" to which the preference is intended to respond:

> "Having examined the text and context of footnote 3 to paragraph 2(a) of the Enabling Clause, and the object and purpose of the *WTO Agreement* and the Enabling Clause, we conclude that the term 'non-discriminatory' in footnote 3 does not prohibit developed-country Members from granting different tariffs to products originating in different GSP beneficiaries, provided that such differential tariff treatment meets the remaining conditions in the Enabling Clause. In granting such differential tariff treatment, however, preference-granting countries are required, by virtue of the term 'non-discriminatory', to ensure that identical treatment is available to all similarly-situated GSP beneficiaries, that is, to all GSP beneficiaries that have the 'development, financial and trade needs' to which the treatment in question is intended to respond."[85]

47. The Appellate Body further found in *EC – Tariff Preferences* that due to the closed nature of the beneficiary list and the lack of objective criteria or standards in its GSP Regulation, the European Communities failed to make its special preferences (i.e., the Drug Arrangements) available to all similarly situated beneficiaries:

> "We recall our conclusion that the term 'non-discriminatory' in footnote 3 of the Enabling Clause requires that identical tariff treatment be available to all similarly-situated GSP beneficiaries. We find that the measure at issue fails to meet this requirement for the following reasons. First, as the European Communities itself acknowledges, according benefits under the Drug Arrangements to countries other than the 12 identified beneficiaries would require an amendment to the Regulation. Such a 'closed list' of beneficiaries cannot ensure that the preferences under the Drug Arrangements are available to all GSP beneficiaries suffering from illicit drug production and trafficking.
>
> Secondly, the Regulation contains no criteria or standards to provide a basis for distinguishing beneficiaries under the Drug Arrangements from other GSP beneficiaries. Nor did the European Communities point to any such criteria or standards anywhere else, despite the Panel's request to do so. As such, the European Communities cannot justify the Regulation under paragraph 2(a), because it does not provide a basis for establishing whether or not a developing country qualifies for preferences under the Drug Arrangements. Thus, although the European Communities claims that the Drug Arrangements are available to all developing countries that are 'similarly affected by the drug problem', because the Regulation does not define the criteria or standards that a developing country must meet to qualify for preferences under the Drug Arrangements, there is no basis to determine whether those criteria or standards are discriminatory or not."[86]

48. The Appellate Body also stated in *EC – Tariff Preferences* that in addition to the non-discriminatory requirement in paragraph 2(a), the Enabling Clause also sets out other conditions in paragraph 3(c) and 3(a) that must be complied with by any particular GSP preference scheme. However, the Appellate Body did not examine *per se* the consistency of the Drug Arrangements with the conditions set out in paragraph 3(c) and 3(a) due to the fact that the Panel had not made findings in this regard:

> "Although paragraph 3(c) informs the interpretation of the term 'non-discriminatory' in footnote 3 to paragraph 2(a), as detailed above, paragraph 3(c) imposes requirements that are separate and distinct from those of paragraph 2(a). We have already concluded that, where a developed-country Member provides additional tariff preferences under its GSP scheme to respond positively to widely-recognized 'development, financial and trade needs' of developing countries within the meaning of paragraph 3(c) of the Enabling Clause, this 'positive response' would not, as such, fail to comply with the 'non-discriminatory' requirement in footnote 3 of the Enabling Clause, even if such needs were not common or shared by all developing countries. We have also observed that paragraph 3(a) requires that any positive response of a preference-granting country to the varying needs of developing countries not impose unjustifiable burdens on other Members. With these considerations in mind, and recalling that the Panel made no finding in this case as to whether the Drug Arrangements are inconsistent with paragraphs 3(a) and 3(c) of the Enabling Clause, we limit our analysis here to paragraph 2(a) and do not examine *per se* whether the Drug Arrangements are consistent with the obligation contained in paragraph 3(c) to 'respond positively to the development, financial and trade needs of developing countries' or with the obligation contained in paragraph 3(a) not to 'raise barriers' or 'create undue difficulties' for the trade of other Members."[87]

(iii) Paragraph 2: "developing countries"

49. Based on its findings on the term "non-discriminatory" in footnote 3 of paragraph 2 and on its discussion of paragraph 3(c), the Appellate Body found in *EC – Tariff Preferences* that the phrase "developing countries" in paragraph 2 of the Enabling Clause does not mean "all developing countries":

---

[85] Appellate Body Report on *EC – Tariff Preferences*, para. 173.
[86] Appellate Body Report on *EC – Tariff Preferences*, paras. 187–188.
[87] Appellate Body Report on *EC – Tariff Preferences*, para. 179. Actually, in this case, India had not challenged the inconsistency of the Drug Arrangements with either paragraph 3(c) or paragraph 3(a) during the proceedings. *See*, Appellate Body Report on *EC – Tariff Preferences*, para. 178.

"We have concluded, contrary to the Panel, that footnote 3 and paragraph 3(c) do *not* preclude the granting of differential tariffs to different sub-categories of GSP beneficiaries, subject to compliance with the remaining conditions of the Enabling Clause. We find, therefore, that the term 'developing countries' in paragraph 2(a) should not be read to mean 'all' developing countries and, accordingly, that paragraph 2(a) does not prohibit preference-granting countries from according different tariff preferences to different sub-categories of GSP beneficiaries."[88]

(iv) Relationship between paragraph 2(a) and 2(d)

50. The Appellate Body stated in *EC – Tariff Preferences* that paragraph 2(d) is not an exception to paragraph 2(a) of the Enabling Clause. Rather, it found that by virtue of paragraph 2(d), preference-giving countries need not establish that the differentiation between developing and the least-developed countries is "non-discriminatory":

"We do not agree with the Panel that paragraph 2(d) is an 'exception' to paragraph 2(a), or that it is rendered redundant if paragraph 2(a) is interpreted as allowing developed countries to differentiate in their GSP schemes between developing countries. To begin with, we note that the terms of paragraph 2 do not expressly indicate that each of the four sub-paragraphs thereunder is mutually exclusive, or that any one is an exception to any other. Moreover, in our view, it is clear from several provisions of the Enabling Clause that the drafters wished to emphasize that least-developed countries form an identifiable sub-category of developing countries with 'special economic difficulties and . . . particular development, financial and trade needs'.[89] When a developed-country Member grants tariff preferences in favour of developing countries under paragraph 2(a), as we have already found, footnote 3 imposes a requirement that such preferences be 'non-discriminatory'. In the absence of paragraph 2(d), a Member granting preferential tariff treatment only to least-developed countries would therefore need to establish, under paragraph 2(a), that this preferential treatment did not 'discriminate' against other developing countries contrary to footnote 3. The inclusion of paragraph 2(d), however, makes clear that developed countries may accord preferential treatment to least-developed countries distinct from the preferences granted to other developing countries under paragraph 2(a). Thus, pursuant to paragraph 2(d), preference-granting countries need not establish that differentiating between developing and least-developed countries is 'non-discriminatory'. This demonstrates that paragraph 2(d) does have an effect that is different and independent from that of paragraph 2(a), even if the term 'non-discriminatory' does not require the granting of 'identical tariff preferences 'to all GSP beneficiaries."[90]

(v) Paragraph 3(a)

51. The Appellate Body found in *EC – Tariff Preferences* although there was a requirement of non-discrimination, this did not mean that identical tariff preferences should be granted to "all" developing countries. The Appellate Body concluded that the Enabling Clause contains sufficient other conditions on the granting of preferences, including those under paragraph 3(a), to guard against such a conclusion:

"It does not necessarily follow, however, that 'non-discriminatory' should be interpreted to require that preference-granting countries provide 'identical' tariff preferences under GSP schemes to 'all' developing countries. In concluding otherwise, the Panel assumed that allowing tariff preferences such as the Drug Arrangements would necessarily 'result [in] the collapse of the whole GSP system and a return back to special preferences favouring selected developing countries'.[91] To us, this conclusion is unwarranted. We observe that the term 'generalized' requires that the GSP schemes of preference-granting countries remain generally applicable.[92] Moreover, unlike the Panel, we believe that the Enabling Clause sets out sufficient conditions on the granting of preferences to protect against such an outcome. As we discuss below[93], provisions such as paragraphs 3(a) and 3(c) of the Enabling Clause impose specific conditions on the granting of different tariff preferences among GSP beneficiaries."[94]

52. The Appellate Body stated in *EC – Tariff Preferences* that paragraph 3(a) requires that any positive response of a preference-giving country to the varying needs of developing countries not impose unjustifiable burdens on other Members:

---

[88] Appellate Body Report on *EC – Tariff Preferences*, para. 175.

[89] (*footnote original*) Enabling Clause, para. 6 (attached as Annex 2 to this Report). Similarly, paragraph 8 of the Enabling Clause refers to the "special economic situation and [the] development, financial and trade needs" of least-developed countries.

[90] Appellate Body Report on *EC – Tariff Preferences*, para. 172.

[91] (*footnote original*) Panel Report, para. 7.102.

[92] (*footnote original*) The European Communities argues in this respect that the GATT Contracting Parties and the WTO Members have granted a number of waivers, as mentioned in the Panel Report, for tariff preferences that are "confined *ab initio* and permanently to a limited number of developing countries located in a certain geographical region". (European Communities' appellant's submission, paras. 184–185 (referring to Panel Report, para. 7.160)) See also, Panel Report, footnote 31 to para. 4.32 (referring to Waiver Decision on the Caribbean Basin Economic Recovery Act, GATT Document L/5779, 15 February 1985, BISD 31S/20, renewed 15 November 1995, WT/L/104; Waiver Decision on CARIBCAN, GATT Document L/6102, 28 November 1986, BISD 33S/97, renewed 14 October 1996, WT/L/185; Waiver Decision on the United States – Andean Trade Preference Act, GATT Document L/6991, 19 March 1992, BISD 39S/385, renewed 14 October 1996, WT/L/184; Waiver Decision on The Fourth ACP-EEC Convention of Lomé, GATT Document L/7604, 9 December 1994, BISD 41S/26, renewed 14 October 1996, WT/L/186; and Waiver Decision on European Communities – The ACP-EC Partnership Agreement, WT/MIN (01)/15), 14 November 2001.

[93] (*footnote original*) *Infra*, paras. 157–168.

[94] Appellate Body Report on *EC – Tariff Preferences*, para. 156.

"Finally, we note that, pursuant to paragraph 3(a) of the Enabling Clause, any 'differential and more favourable treatment . . . shall be designed to facilitate and promote the trade of developing countries and not to raise barriers to or create undue difficulties for the trade of any other contracting parties.' This requirement applies, *a fortiori*, to any preferential treatment granted to one GSP beneficiary that is not granted to another.[95] Thus, although paragraph 2(a) does not prohibit *per se* the granting of different tariff preferences to different GSP beneficiaries[96], and paragraph 3(c) even contemplates such differentiation under certain circumstances[97], paragraph 3(a) requires that any positive response of a preference-granting country to the varying needs of developing countries not impose unjustifiable burdens on other Members."[98]

(vi) Paragraph 3(c) "to respond positively to the development, financial and trade needs of developing countries"

53. The Appellate Body stated in *EC – Tariff Preferences* that in the light of one of the stated objectives of the Preamble to the *WTO Agreement*, the text of paragraph 3(c) authorizes preference-giving countries to treat different developing countries differently:

"[T]he Preamble to the *WTO Agreement*, which informs all the covered agreements including the GATT 1994 (and, hence, the Enabling Clause), explicitly recognizes the 'need for positive efforts designed to ensure that developing countries, and especially the least developed among them, secure a share in the growth in international trade commensurate with the needs of their economic development'. The word 'commensurate' in this phrase appears to leave open the possibility that developing countries may have different needs according to their levels of development and particular circumstances. The Preamble to the *WTO Agreement* further recognizes that Members' 'respective needs and concerns at different levels of economic development' may vary according to the different stages of development of different Members.

In sum, we read paragraph 3(c) as authorizing preference-granting countries to 'respond positively' to 'needs' that are *not* necessarily common or shared by all developing countries. Responding to the 'needs of developing countries' may thus entail treating different developing-country beneficiaries differently."[99]

54. The Appellate Body on *EC – Tariff Preferences* also stated that paragraph 3(c) requires that a response to a particular "development, financial and trade needs" based on objective standard. These standards could be those particular needs as broadly recognized and explicitly set out in the *WTO Agreement* or in multilateral instruments adopted by international organizations. It also stated that in order to make the "response" "positive", sufficient nexus should exist between the preferential treatment and the likelihood of alleviating the relevant need:

"At the outset, we note that the use of the word 'shall' in paragraph 3(c) suggests that paragraph 3(c) sets out obligations for developed-country Members in providing preferential treatment under a GSP scheme to 'respond positively' to the 'needs of developing countries'. . . .

. . .

However, paragraph 3(c) does not authorize *any* kind of response to *any* claimed need of developing countries. First, we observe that the types of needs to which a response is envisaged are limited to 'development, financial and trade needs'. In our view, a 'need' cannot be characterized as one of the specified 'needs of developing countries' in the sense of paragraph 3(c) based merely on an assertion to that effect by, for instance, a preference-granting country or a beneficiary country. Rather, when a claim of inconsistency with paragraph 3(c) is made, the existence of a 'development, financial [or] trade need' must be assessed according to an *objective* standard. Broad-based recognition of a particular need, set out in the *WTO Agreement* or in multilateral instruments adopted by international organizations, could serve as such a standard.

Secondly, paragraph 3(c) mandates that the response provided to the needs of developing countries be 'positive'. 'Positive' is defined as 'consisting in or characterized by constructive action or attitudes'. This suggests that the response of a preference-granting country must be taken with a view to *improving* the development, financial or trade situation of a beneficiary country, based on the particular need at issue. As such, in our view, the expectation that developed countries will 'respond positively' to the 'needs of developing countries' suggests that a sufficient nexus should exist between, on the one hand, the preferential treatment provided under the respective measure authorized by paragraph 2, and, on the other hand, the likelihood of alleviating the relevant 'development, financial [or] trade need'. In the context of a GSP scheme, the particular need at issue must, by its nature, be such that it can be effectively addressed through tariff preferences. Therefore, only if a preference-granting country acts in the 'positive' manner suggested, in 'respon[se]' to a widely-recognized 'development, financial [or] trade need', can such action satisfy the requirements of paragraph 3(c)."[100]

---

[95] (*footnote original*) We note in this respect that the language contained in paragraph 3(a) of the Enabling Clause is reflected in waivers referred to in *supra*, footnote 323.
[96] (*footnote original*) *Supra*, paras. 153–154.
[97] (*footnote original*) *Supra*, paras. 162–165.
[98] Appellate Body Report on *EC – Tariff Preferences*, para. 167.
[99] Appellate Body Report on *EC – Tariff Preferences*, paras. 161–162.
[100] Appellate Body Report on *EC – Tariff Preferences*, paras. 158, 163 and 164.

(vii) Burden of proof under the Enabling Clause

55. The Appellate Body stated in *EC – Tariff Preferences* that as an exception provision, the ultimate burden of proof under the Enabling Clause falls on the respondent party:

> "As a general rule, the burden of proof for an 'exception' falls on the respondent, that is, as the Appellate Body stated in *US – Wool Shirts and Blouses*, on the party 'assert[ing] the affirmative of a particular . . . defence'.[101] From this allocation of the burden of proof, it is normally for the respondent, first, to *raise* the defence and, second, to *prove* that the challenged measure meets the requirements of the defence provision.
>
> We are therefore of the view that the European Communities must *prove* that the Drug Arrangements satisfy the conditions set out in the Enabling Clause. Consistent with the principle of *jura novit curia*, it is not the responsibility of the European Communities to provide us with the legal interpretation to be given to a particular provision in the Enabling Clause; instead, the burden of the European Communities is to adduce sufficient evidence to substantiate its assertion that the Drug Arrangements comply with the requirements of the Enabling Clause."[102]

56. However, the Appellate Body also found in *EC – Tariff Preferences* that the complainant bears the burden of raising the Enabling Clause in its panel request, although the ultimate burden of justifying the challenged measure under the Enabling Clause is with the respondent:

> "In our view, the special status of the Enabling Clause in the WTO system has particular implications for WTO dispute settlement. As we have explained, paragraph 1 of the Enabling Clause enhances market access for developing countries as a means of improving their economic development by authorizing preferential treatment for those countries, 'notwithstanding' the obligations of Article I. It is evident that a Member cannot implement a measure authorized by the Enabling Clause without according an 'advantage' to a developing country's products over those of a developed country. It follows, therefore, that every measure undertaken pursuant to the Enabling Clause would necessarily be inconsistent with Article I, if assessed on that basis alone, but it would be exempted from compliance with Article I because it meets the requirements of the Enabling Clause. Under these circumstances, we are of the view that a complaining party challenging a measure taken pursuant to the Enabling Clause must allege more than mere inconsistency with Article I:1 of the GATT 1994, for to do only that would not convey the 'legal basis of the complaint sufficient to present the problem clearly'. In other words, it is insufficient in WTO dispute settlement for a complainant to allege inconsistency with Article I:1 of the GATT 1994 if the complainant seeks also to argue that the measure is not justified under the Enabling Clause. This is especially so if the challenged measure, like that at issue here, is plainly taken pursuant to the Enabling Clause, as we discuss *infra*.
>
> . . .
>
> The responsibility of the complaining party in such an instance, however, should not be overstated. It is merely to *identify* those provisions of the Enabling Clause with which the scheme is allegedly inconsistent, without bearing the burden of *establishing* the facts necessary to support such inconsistency. That burden, as we concluded above, remains on the responding party invoking the Enabling Clause as a defence."[103]

(f) Reference to GATT practice

57. With respect to GATT practice concerning the Enabling Clause, see GATT Analytical Index, Article I, pages 53–59.

4. Waiver on Preferential Tariff Treatment for Least-Developed Countries

58. At its meeting of 15 June 1999, the General Council adopted a decision concerning the Preferential Tariff Treatment for Least-Developed Countries. This decision waives the provisions of GATT Article I:1[104] in order to provide a means for developing-country Members to offer preferential tariff treatment to products of least-developed countries. The decision sets forth:

> "1. Subject to the terms and conditions set out hereunder, the provisions of paragraph 1 of Article I of the GATT 1994 shall be waived until 30 June 2009, to the extent necessary to allow developing country Members to provide preferential tariff treatment to products of least-developed countries, designated as such by the United Nations, without being required to extend the same tariff rates to like products of any other Member.
>
> 2. Developing country Members wishing to take actions pursuant to the provisions of this Waiver shall notify to the Council on Trade in Goods the list of all products of least-developed countries for which preferential tariff treatment is to be provided on a generalized, non-reciprocal and non-discriminatory basis and the preference margins to be accorded. Subsequent modifications to the preferences shall similarly be notified.

---

[101] (*footnote original*) Appellate Body Report, p. 14, DSR 1997:I, at 335. (See also, Appellate Body Report, *US – FSC (Article 21.5 – EC)*, para. 133; and Appellate Body Report, *India – Quantitative Restrictions*, para. 136)

[102] Appellate Body Report on *EC – Tariff Preferences*, paras. 104–105.

[103] Appellate Body Report on *EC – Tariff Preferences*, paras. 110 and 115.

[104] WT/GC/M/40/Add.3, section 4(d)(i). The text of the adopted decision can be found in WT/L/304. The decision refers to the Comprehensive and Integrated WTO Plan of Action for the Least-Developed Countries. WT/L/304, para. 2. In this regard, see further Chapter on *WTO Agreement*, Section V.B(7)(iv).

3. Any preferential tariff treatment implemented pursuant to this Waiver shall be designed to facilitate and promote the trade of least-developed countries and not to raise barriers or create undue difficulties for the trade of any other Member. Such preferential tariff treatment shall not constitute an impediment to the reduction or elimination of tariffs on a most-favoured-nation basis.

4. In accordance with the provisions of paragraph 4 of Article IX of the WTO Agreement, the General Council shall review annually whether the exceptional circumstances justifying the Waiver still exist and whether the terms and conditions attached to the Waiver have been met.

5. The government of any Member providing preferential tariff treatment pursuant to this Waiver shall, upon request, promptly enter into consultations with any interested Member with respect to any difficulty or any matter that may arise as a result of the implementation of programmes authorized by this Waiver. Where a Member considers that any benefit accruing to it under GATT 1994 may be or is being impaired unduly as a result of such implementation, such consultation shall examine the possibility of action for a satisfactory adjustment of the matter. This Waiver does not affect Members' rights as set forth in the Understanding in Respect of Waivers of Obligations under GATT 1994.

6. This waiver does not affect in any way and is without prejudice to rights of Members in their actions pursuant to the provisions of the 1979 Decision on Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries."[105]

59. Under the Decision on Waiver on Preferential Tariff Treatment for LDCs, which is referred to in paragraph 58 above, notifications on steps taken by developing country Members are to be sent to the Council on Trade in Goods. In contrast, pursuant to the Enabling Clause, which is referred to in paragraph 30 above, notifications on the GSP schemes of developed country Members in favour of LDCs are to be sent to the Committee on Trade and Development. In order to allow for a unified consideration of both types of measures in one forum, at its meeting of 14 March 2001, the Council for Trade in Goods agreed *ad referendum* that any market access measures taken specifically in favour of the least-developed countries under the Waiver on Preferential Tariff Treatment for LDCs and notified to the Council be transmitted to the Sub-Committee on Least-developed Countries, for substantive consideration, and that the Sub-Committee report back to the Council on its discussions.[106] A similar procedure was agreed in the Committee on Trade and Development with respect to the treatment of notifications under the Enabling Clause, see paragraph 30 above.

60. To date, only Morocco has notified its preferential tariff treatment for the least-developed countries to the Council for Trade in Goods.[107] In this regard, the following developing country Members notified their own tariff reduction or duty-free treatment for the least-developed countries to the Committee on Trade and Development, prior to the adoption of the Waiver on Preferential Tariff Treatment for LDCs: (i) Turkey[108]; (ii) Egypt[109]; and (iii) Mauritius.[110]

E. RELATIONSHIP WITH OTHER ARTICLES

1. Article III

61. In *US – Gasoline*, with respect to the relationship between Articles I and III, the Panel considered:

"[The Panel's] findings on treatment under the baseline establishment methods under Articles III:4 and XX (b), (d) and (g) would in any case have made unnecessary the examination of the 75 percent rule under Article I:1."[111]

(a) Reference to GATT practice

62. With respect to GATT practice regarding the relationship between Article I and Article III, see GATT Analytical Index, page 44.

2. Article VI

63. The Panel on *Brazil – Desiccated Coconut* found that because Article VI of the *GATT 1994* did not constitute applicable law for the purposes of the dispute, the claims made under Articles I and II of the *GATT 1994*, which were derived from claims of inconsistency with Article VI of the *GATT 1994*, could not succeed.[112] The Appellate Body on *Brazil – Desiccated Coconut* confirmed this finding.[113]

3. Article XI

64. In *US – Shrimp*, with respect to the relationship between Articles I and XI, the Panel stated:

"Given our conclusion in paragraph 7.17 above that Section 609 violates Article XI:1, we consider that it is not necessary for us to review the other claims of the complainants with respect to Articles I:1 and XIII:1. This is consistent with GATT[114] and WTO[115] panel practice and

[108] WT/COMTD/W/39.
[109] WT/COMTD/W/47.
[110] WT/COMTD/W/53.
[111] Panel Report on *US – Gasoline*, para. 6.19. With respect to judicial economy in general, see Chapter on *DSU*, Section XXXVI.F.
[112] Panel Report on *Brazil – Desiccated Coconut*, para. 281.
[113] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 21.
[114] (*footnote original*) See, e.g., Panel Report on *Canada – FIRA*, para. 5.16.
[115] (*footnote original*) See, e.g., Panel Report on *Brazil – Desiccated Coconut*, para. 293.

has been confirmed by the Appellate Body in its report in the *Wool Shirts* case, where the Appellate Body mentioned that 'A panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute'.[116]

Therefore we do not find it necessary to review the allegations of the complainants with respect to Articles I:1 and XIII:1. On the basis of our finding of violation of Article XI:1, we move to address the defence of the United States under Article XX."[117]

4. Article XIII

65. In *EC – Bananas III*, the European Communities argued that a violation of Article XIII in respect of its tariff regime for bananas was covered by the Lomé waiver, whereby the provisions of Article I:1 of the *GATT 1994* were waived in respect of the allocation of country-specific tariff quotas for bananas to certain countries. The Panel agreed with this argument, however on appeal, the Appellate Body reversed this conclusion, finding that the Lomé waiver waives only the provisions of Article I:1.[118] See Chapter on the *WTO Agreement*, Section X.3(a)(i).

5. Article XXIV

66. In *Canada – Autos*, Canada invoked an Article XXIV exception with respect to a certain import duty exemption, found to be inconsistent with Article I of the *GATT 1994*. The Panel rejected this defence, because, on the one hand, Canada was not granting the import duty exemption to *all* NAFTA manufacturers and because, on the other hand, manufacturers from countries *other* than the United States and Mexico were being provided duty-free treatment.[119] Canada did not appeal this finding of the Panel. In this regard, the Appellate Body noted:

"The drafters also wrote various exceptions to the MFN principle into the GATT 1947 which remain in the GATT 1994.[120] Canada invoked one such exception before the Panel, relating to customs unions and free trade areas under Article XXIV. This justification was rejected by the Panel, and the Panel's findings on Article XXIV were not appealed by Canada. Canada has invoked no other provision of the GATT 1994, or of any other covered agreement, that would justify the inconsistency of the import duty exemption with Article I:1 of the GATT 1994."[121]

6. Article XXVIII

67. In *EC – Poultry*, the Appellate Body addressed a complaint against the allocation of tariff quotas for certain poultry products by the European Communities, and rejected Brazil's appeal that Articles I and XIII of the *GATT 1994* were not applicable to the allocation of tariff quota resulting from negotiations under Article XXVIII of the *GATT 1994*. The Appellate Body first confirmed its finding in *EC – Bananas III* according to which Members may, in their concessions and commitments set out in their schedules annexed to the GATT 1994, yield rights but may not diminish their obligations.[122] The Appellate Body then held that: "[t]herefore, the concessions contained in Schedule LXXX pertaining to the tariff-rate quota for frozen poultry meat must be consistent with Article I and XIII of the GATT 1994."[123]

F. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. SCM Agreement

68. In *Indonesia – Autos*, the Panel rejected Indonesia's argument that the *SCM Agreement* was exclusively applicable to measures involving subsidies and referred to its finding on the relationship between the *SCM Agreement* and Article III of the *GATT 1994*.[124] With respect to the exemption of customs duties and domestic taxes, the Panel indicated:

"The customs duty benefits of the various Indonesian car programmes are explicitly covered by the wording of Article I. As to the tax benefits of these programmes, we note that Article I:1 refers explicitly to 'all matters referred to in paragraphs 2 and 4 of Article III'. We have already decided that the tax discrimination aspects of the National Car programme were matters covered by Article III:2 of GATT. Therefore, the customs duty and tax advantages of the February and June 1996 car programmes are of the type covered by Article I of GATT."[125]

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Schedules of Concessions

1. (*a*) Each contracting party shall accord to the commerce of the other contracting parties treatment no less

[125] Panel Report on *Indonesia – Autos*, para. 14.139.

favourable than that provided for in the appropriate Part of the appropriate Schedule annexed to this Agreement.

(*b*) The products described in Part I of the Schedule relating to any contracting party, which are the products of territories of other contracting parties, shall, on their importation into the territory to which the Schedule relates, and subject to the terms, conditions or qualifications set forth in that Schedule, be exempt from ordinary customs duties in excess of those set forth and provided therein. Such products shall also be exempt from all other duties or charges of any kind imposed on or in connection with the importation in excess of those imposed on the date of this Agreement or those directly and mandatorily required to be imposed thereafter by legislation in force in the importing territory on that date.

(*c*) The products described in Part II of the Schedule relating to any contracting party which are the products of territories entitled under Article I to receive preferential treatment upon importation into the territory to which the Schedule relates shall, on their importation into such territory, and subject to the terms, conditions or qualifications set forth in that Schedule, be exempt from ordinary customs duties in excess of those set forth and provided for in Part II of that Schedule. Such products shall also be exempt from all other duties or charges of any kind imposed on or in connection with importation in excess of those imposed on the date of this Agreement or those directly or mandatorily required to be imposed thereafter by legislation in force in the importing territory on that date. Nothing in this Article shall prevent any contracting party from maintaining its requirements existing on the date of this Agreement as to the eligibility of goods for entry at preferential rates of duty.

2. Nothing in this Article shall prevent any contracting party from imposing at any time on the importation of any product:

(*a*) a charge equivalent to an internal tax imposed consistently with the provisions of paragraph 2 of Article III* in respect of the like domestic product or in respect of an article from which the imported product has been manufactured or produced in whole or in part;

(*b*) any anti-dumping or countervailing duty applied consistently with the provisions of Article VI;*

(*c*) fees or other charges commensurate with the cost of services rendered.

3. No contracting party shall alter its method of determining dutiable value or of converting currencies so as to impair the value of any of the concessions provided for in the appropriate Schedule annexed to this Agreement.

4. If any contracting party establishes, maintains or authorizes, formally or in effect, a monopoly of the importation of any product described in the appropriate Schedule annexed to this Agreement, such monopoly shall not, except as provided for in that Schedule or as otherwise agreed between the parties which initially negotiated the concession, operate so as to afford protection on the average in excess of the amount of protection provided for in that Schedule. The provisions of this paragraph shall not limit the use by contracting parties of any form of assistance to domestic producers permitted by other provisions of this Agreement.*

5. If any contracting party considers that a product is not receiving from another contracting party the treatment which the first contracting party believes to have been contemplated by a concession provided for in the appropriate Schedule annexed to this Agreement, it shall bring the matter directly to the attention of the other contracting party. If the latter agrees that the treatment contemplated was that claimed by the first contracting party, but declares that such treatment cannot be accorded because a court or other proper authority has ruled to the effect that the product involved cannot be classified under the tariff laws of such contracting party so as to permit the treatment contemplated in this Agreement, the two contracting parties, together with any other contracting parties substantially interested, shall enter promptly into further negotiations with a view to a compensatory adjustment of the matter.

6. (*a*) The specific duties and charges included in the Schedules relating to contracting parties members of the International Monetary Fund, and margins of preference in specific duties and charges maintained by such contracting parties, are expressed in the appropriate currency at the par value accepted or provisionally recognized by the Fund at the date of this Agreement. Accordingly, in case this par value is reduced consistently with the Articles of Agreement of the International Monetary Fund by more than twenty per centum, such specific duties and charges and margins of preference may be adjusted to take account of such reduction; *provided* that the CONTRACTING PARTIES (*i.e.*, the contracting parties acting jointly as provided for in Article XXV) concur that such adjustments will not impair the value of the concessions provided for in the appropriate Schedule or elsewhere in this Agreement, due account being taken of all factors which may influence the need for, or urgency of, such adjustments.

(*b*) Similar provisions shall apply to any contracting party not a member of the Fund, as from the date on which such contracting party becomes a member of the Fund or enters into a special exchange agreement in pursuance of Article XV.

7. The Schedules annexed to this Agreement are hereby made an integral part of Part I of this Agreement.

B. TEXT OF *AD* ARTICLE II

Ad Article II

Paragraph 2 (a)

The cross-reference, in paragraph 2 (*a*) of Article II, to paragraph 2 of Article III shall only apply after Article III has been modified by the entry into force of the amendment provided for in the Protocol Modifying Part II and Article XXVI of the General Agreement on Tariffs and Trade, dated September 14, 1948.[1]

(*footnote original*) [1] This Protocol entered into force on 14 December 1948.

Paragraph 2 (b)

See the note relating to paragraph 1 of Article I.

Paragraph 4

Except where otherwise specifically agreed between the contracting parties which initially negotiated the concession, the provisions of this paragraph will be applied in the light of the provisions of Article 31 of the Havana Charter.

C. INTERPRETATION AND APPLICATION OF ARTICLE II

1. Article II:1(a)

(a) Bonding requirements

69. In *US – Certain EC Products*, the Appellate Body reversed the Panel's finding that the United States had acted inconsistently with Article II:1(a) and (b) of GATT 1994, first sentence, by increasing the bonding requirements on certain products imported from the European Communities in order to secure the collection of import duties whose imposition, however, had not yet been determined at the time that the increased bonding requirement was imposed. Referring to the increased bonding requirements as the "3 March Measure", the Panel stated, *inter alia*: "We have found that the bonding requirements should be assessed together with the rights/obligations they purport to protect, being in this case, the right to collect tariffs at bound levels. The 3 March Measure imposed additional bonding requirements to guarantee collection of 100 per cent tariff duty."[126] In contrast, the Appellate Body emphasized the distinction between the imposition of duties and the increased bonding requirements:

> "The task of the Panel . . . was . . . to examine the GATT-1994-consistency of the increased bonding requirements; the Panel's task was not to examine the GATT 1994-consistency of the imposition of 100 per cent duties.
>
> Nevertheless, the Panel examined the GATT 1994-consistency of the increased bonding requirements *in the light of* the GATT 1994–consistency of the imposition of 100 per cent duties, and concluded, on the basis of this examination, that the increased bonding requirements are inconsistent with Articles II:1(a) and II:1(b), first sentence, of the GATT 1994. As the Panel had previously concluded that the imposition of 100 per cent duties and the increased bonding requirements were legally distinct measures, and that the imposition of 100 per cent duties was not in the Panel's terms of reference, the Panel could not, based on this reasoning, have come to the conclusion that the increased bonding requirements are inconsistent with Articles II:1(a) and II:1(b), first sentence, of the GATT 1994."[127]

(b) Qualification in schedules

70. In *Korea – Various Measures on Beef*, the Panel ruled, in a finding not reviewed by the Appellate Body, that pursuant to Article II of the *GATT 1994* any other "terms, conditions or qualifications" that are added to import concessions, must be included in the schedules. The Panel went on to find that "[g]iven that Korea made no such qualification, and that imports of grass-fed beef by the LPMO are thus restricted, the Panel finds that imports of grass-fed beef are accorded less favourable treatment than that is provided for in Korea's Schedule, contrary to Article II:1(a)."[128]

(c) Implementation in WTO Schedules of HS changes

71. On 18 July 2001, the General Council approved new procedures to introduce HS2002 changes to schedules of concessions.[129]

(d) Database for tariffs

(i) Integrated Data Base (IDB) Project

72. At its meeting on 24 June 1997, the Committee on Market Access agreed to the restructuring of the existing Integrated Data Base (IDB) from a mainframe environment to a Personal Computer (PC)-based system, which would utilize new technology to improve the operation of the IDB.[130] At its meeting of 16 July 1997,

---

[126] Panel Report on *US – Certain EC Products*, para. 6.58. On this issue, the following minority view was expressed:

> ". . . Any bonding requirements to cover the payment of tariffs above their bound levels cannot be viewed as a mechanism in place to secure compliance with WTO compatible tariffs and constituted, therefore, import restrictions for which there was no justification. The actual trade effects of the 3 March Measure . . . confirm its restrictive nature and effect. One Panelist found, therefore, that the 3 March Measure constituted a 'restriction', contrary to Article XI of GATT, rather than a duty or charge under Article II.", para. 6.61.

[128] Panel Report on *Korea – Various Measures on Beef*, para. 779.

[129] WT/L/407.

[130] G/MA/M/10, para. 4. The agreement is outlined in G/MA/IDB/1/Rev. 1.

the General Council adopted the Decision on the Supply of Information to the Integrated Data Base for Personal Computers, which was approved and forwarded to the General Council by the Committee on Market Access at its meeting of 24 June 1997.[131] At its meeting of 2 December 1997, the Committee on Market Access further adopted two decisions concerning: (1) the deadlines for IDB submissions, pursuant to the decision adopted by the General Council on 16 July 1997 on the Supply of Information for the Integrated Data Base for Personal Computers, and (2) access to the IDB.[132] At its meeting on 31 May 1999, the Committee on Market Access further adopted the document entitled "Dissemination of the Integrated Data Base".[133] At its meeting of 18 December 2000, the Committee on Market Access adopted, on an *ad referendum* basis, the document entitled "Review of the Operation of the Integrated Data Base (IDB) and Related Technical Assistance Activities" and gave the Indian delegation until 22 January 2001 to provide comments.[134]

73. On 12 June 2002, the Committee on Market Access adopted the dissemination policy of the IDB.[135] Since then several organizations have been granted access to this database.[136]

(ii) Consolidated Tariff Schedule Data Base

74. At its meeting on 22 November 1995, the Committee on Market Access agreed to the establishment of consolidated loose-leaf schedules on the basis of a proposal by the Chairman contained in document G/MA/TAR/W/4/Rev.2.[137] At its meeting on 29 November 1996, the Council for Trade in Goods adopted the Decision on the "Establishment of Consolidated Loose-Leaf Schedules".[138] Earlier, at its meeting on 18 October 1996, the Committee on Market Access had approved the Decision and had agreed to forward it to the Council for Trade in Goods for approval.

75. At its meeting on 26 March 1998, the Committee on Market Access approved the project proposal on the Consolidated Tariff Schedules (CTS) Database.[139]

76. At its meeting on 28 July 2000, the Committee on Market Access adopted the format for inclusion of agricultural commitments into the CTS database on the understanding that the database has no legal basis and that the data contained therein would be available to all delegations at the same time.[140]

77. On 12 June 2002, the Committee on Market Access adopted the dissemination policy of the CTS database.[141] Several organizations have been granted access to this database.[142]

(iii) Review of the Understanding on the Interpretation of Article XXVIII of GATT 1994

78. With respect to the review by the Committee of the Understanding on the Interpretation of Article XXVIII of *GATT 1994*, see paragraph 733 below.

(e) Information technology products

(i) The Ministerial Declaration on Trade in Information Technology Products

79. In December 1996, the Singapore Ministerial Conference adopted the Ministerial Declaration on Trade in Information Technology Products.[143] The Declaration, initially agreed by 29 Members (including the 15 EC member States) and States or separate customs territories in the process of WTO accession, called on its participants to:

> "[B]ind and eliminate customs duties and other duties and charges of any kind, within the meaning of Article II:1(b) of the General Agreement on Tariffs and Trade 1994, with respect to the following:
>
> '(a) all products classified (or classifiable) with Harmonized System (1996) ('HS') headings listed in Attachment A to the Annex to this Declaration; and
>
> (b) all products specified in Attachment B to the Annex to this Declaration, whether or not they are included in Attachment A;'
>
> through equal rate reductions of customs duties beginning in 1997 and concluding in 2000, recognizing that extended staging of reductions and, before implementation, expansion of product coverage may be necessary in limited circumstances."[144]

80. As of 31 December 2004, there were 38 participants (covering 63 Members and States or separate customs territories in the process of acceding to the WTO) representing approximately 97 per cent of world trade in information technology products.[145]

(ii) The Committee of Participants on the Expansion of Trade in Information Technology Products

81. On 26 March 1997, the Participants established the Committee of Participants on the Expansion of Trade in Information Technology Products in order to monitor the provisions of paragraphs 3, 5, 6 and 7 of the Annex to the Declaration.[146]

82. At its meeting of 30 October 1997, the Committee of Participants adopted rules of procedure which are similar to those of other WTO bodies.[147]

83. At its meeting of 26 October 2000, the Committee of Participants agreed, on an *ad referendum* basis, to a Non-Tariff Measures Work Programme, subject to further consultations with capitals by 10 November 2000. Since no comments were received by this date, the Work Programme was deemed approved and issued as a formal document.[148]

2. Article II:1(b)

(a) First sentence

(i) "subject to the terms, conditions or qualifications set forth"

84. In *EC – Bananas III*, addressing the question as to whether the allocation of tariff quotas as inscribed in a Schedule was inconsistent with GATT Article XIII, the Appellate Body addressed the legal status of tariff concessions. The Appellate Body held that "a Member may yield rights and grant benefits, but it cannot diminish its obligations":

> "With respect to concessions contained in the Schedules annexed to the GATT 1947, the panel in *United States – Restrictions on Importation of Sugar* ("*United States – Sugar Headnote*") found that:
>
> '. . . Article II permits contracting parties to incorporate into their Schedules acts yielding rights under the General Agreement but not acts diminishing obligations under that Agreement.[149]'
>
> This principle is equally valid for the market access concessions and commitments for agricultural products contained in the Schedules annexed to the GATT 1994. The ordinary meaning of the term 'concessions' suggests that a Member may yield rights and grant benefits, but it cannot diminish its obligations. This interpretation is confirmed by paragraph 3 of the *Marrakesh Protocol*, which provides:
>
> 'The implementation of the concessions and commitments contained in the schedules annexed to this Protocol shall, upon request, be subject to multilateral examination by the Members. This would be *without prejudice to the rights and obligations of Members under Agreements in Annex 1A of the WTO Agreement*. (emphasis added)'"[150]

85. In *EC – Poultry*, the Appellate Body rejected Brazil's argument that the MFN principle in Articles I and XIII of the *GATT 1994* does not necessarily apply to tariff-rate quotas resulting from compensation negotiations under Article XXVIII of the *GATT 1994*. In so doing, the Appellate Body confirmed its finding in *EC – Bananas III*, cited in paragraph 84 above, and again referred to paragraph 3 of the *Marrakesh Protocol*. The Appellate Body stated:

> "In *United States – Restrictions on Imports of Sugar*[151] the panel stated that Article II of the GATT permits contracting parties to incorporate into their Schedules acts yielding rights under the GATT, but not acts *diminishing* obligations under that Agreement. In our view, this is particularly so with respect to the principle of non-discrimination in Articles I and XIII of the GATT 1994. In *EC – Bananas*, we confirmed the principle that a Member may yield rights but not diminish its obligations and concluded that it is equally valid for the market access concessions and commitments for agricultural products contained in the Schedules annexed to the GATT 1994.[152] The ordinary meaning of the term 'concessions' suggests that a Member may yield or waive some of its own rights and grant benefits to other Members, but that it cannot unilaterally diminish its own obligations. This interpretation is confirmed by paragraph 3 of the *Marrakesh Protocol*, which provides:
>
> 'The implementation of the concessions and commitments contained in the schedules annexed to this Protocol shall, upon request, be subject to multilateral examination by the Members. This would be *without prejudice to the rights and obligations of Members under Agreements in Annex 1A of the WTO Agreement*. (emphasis added)'"[153]

86. In *Canada – Dairy*, Canada's Schedule established a quota of 64,500 tons, under which imports were subject to a certain duty, while out-of-quota imports were subject to a higher duty. Under the heading "Other terms and conditions", the Canadian Schedule stated: "This quantity [64,500] represents the estimated annual

cross-border purchases imported by Canadian consumers." The United States argued that Canada violated Article II:1(b) in restricting access to tariff quotas for fluid milk to cross-border imports by Canadians of (i) consumer packaged milk for personal use, (ii) valued at less than Can$20. The United States argued that with respect to those two conditions, Canada was granting imports of fluid milk treatment less favourable than that provided for in its Schedule. The Panel found the language contained in Canada's Schedule under the heading "Other terms and conditions" to be a *description* of the way the size of the quota was determined, rather than a statement of the *conditions* as to the kind of imports qualified to enter Canada under this quota. The Panel found that ". . . the ordinary meaning of the word "represent" in this context does not, in our view, call to mind the setting out of specific restrictions or conditions".[154] The Panel added that "[e]ven if the phrase could be said to include restrictions on access to the tariff-rate quota, we do not see how the two conditions *at issue in this dispute* could be read into this phrase".[155] As a result, the Panel did not find any restriction to tariff quotas in Canada's relevant Schedule, and thus, agreed with the United States' argument.[156] The Appellate Body disagreed with the Panel's reading of the Schedule and presented the following interpretation of the term "subject to terms, conditions or qualifications" contained in Article II:1(b):

> "Under Article II:1(b) of the GATT 1994, the market access concessions granted by a Member are '*subject to*' the 'terms, conditions or qualifications set forth in [its] Schedule'. (emphasis added) In our view, the ordinary meaning of the phrase 'subject to' is that such concessions are without prejudice to and are *subordinated to*, and are, therefore, *qualified by*, any 'terms, conditions or qualifications' inscribed in a Member's Schedule. We believe that the relationship between the 64,500 tonnes tariff-rate quota and the 'Other Terms and Conditions' set forth in Canada's Schedule is of this nature. The phrase 'terms and conditions' is a composite one which, in its ordinary meaning, denotes the imposition of qualifying restrictions or conditions. A strong presumption arises that the language which is inscribed in a Member's Schedule under the heading, 'Other Terms and Conditions', has some *qualifying* or *limiting* effect on the substantive content or scope of the concession or commitment.[157]
>
> In interpreting the language in Canada's Schedule, the Panel focused on the verb 'represents' and opined that, because of the use of this verb, the notation was no more than a '*description*' of the 'way the size of the quota was determined'.[158] The net consequence of the Panel's interpretation is a failure to give the notation in Canada's Schedule *any* legal effect as a 'term and condition'. If the language is *merely* a 'description' or a 'narration' of how the quantity was arrived at, we do not see what purpose it serves in being inscribed in the Schedule. The Panel, in other words, acted upon the assumption that Canada projected no identifiably necessary or useful qualifying or limiting purpose in inscribing the notation in its Schedule. The Panel thus disregarded the principle of effectiveness in its interpretive effort.
>
> We note that the Panel also adopted an overly literal and narrow view of the words 'cross-border purchases imported by Canadian consumers' in the notation at issue. Moreover, the Panel erred in failing to give meaning to *all* of the words in that notation. On the basis of its ordinary meaning, the Panel stated that the language in the notation could *not* refer only to '*consumer packaged*' milk *'for personal use'*.[159] (emphasis in original) We do not agree that the ordinary meaning of that phrase in the notation is so unequivocal. We do not see anything in the text of the notation which necessarily *precludes* such an interpretation. The notation refers to 'cross-border purchases imported by Canadian consumers'. It seems, to us, that this language may well be taken to refer to imports of fluid milk made by Canadian consumers for personal use in the course of cross-border shopping."[160]

87. After making the findings referenced in paragraph 86 above, the Appellate Body in *Canada – Dairy* found that while the language contained in Canada's Schedule could be said to refer to the requirement of "consumer packaged milk for personal use", it could not refer to the Can$ 50 value limitation. As a result, the Appellate Body found the latter requirement not to be contained in Canada's Schedule and its existence to be inconsistent with Article II:1(b).[161]

88. In *US – Certain EC Products*, one of the issues was the consistency of increased bonding requirements imposed on imports with GATT Article II:1(b), first sentence. See paragraph 69 above.

(ii) Interpretation of tariff concessions in a Schedule

Applicable interpretative rules

89. In *EC – Computer Equipment*, the Appellate Body dealt with the complaint that the reclassification of

[154] Panel Report on *Canada – Dairy*, para.7.151.
[155] Panel Report on *Canada – Dairy*, para. 7.152.
[156] Panel Report on *Canada – Dairy*, paras. 7.151–7.155.
[157] (*footnote original*) The United States contends, on the basis of the panel report in *United States – Restrictions on Imports of Sugar* (*supra*, footnote 52), that "terms and conditions" may encompass "additional concessions". We take no position as to whether "terms and conditions" may encompass "additional concessions"; but we do, however, note that, even assuming that the United States is correct on this point, an "additional concession" may well embody a qualification to a concession by expanding its scope or adding to it.
[158] (*footnote original*) Panel Report, para. 7.151.

[161] Appellate Body Report on *Canada – Dairy*, para. 143.

certain computer equipment was in violation of the relevant tariff concession of the European Communities, and therefore inconsistent with Article II. The Appellate Body set forth the interpretative rules on tariff concessions and, contrary to the Panel which had based its interpretation of the European Communities' tariff commitments on the "legitimate expectations" of the exporting Member[162], it emphasized the *common intentions* of the parties:

> "The purpose of treaty interpretation under Article 31 of the *Vienna Convention* is to ascertain the *common* intentions of the parties. These *common* intentions cannot be ascertained on the basis of the subjective and unilaterally determined 'expectations' of *one* of the parties to a treaty. Tariff concessions provided for in a Member's Schedule – the interpretation of which is at issue here – are reciprocal and result from a mutually-advantageous negotiation between importing and exporting Members. A Schedule is made an integral part of the GATT 1994 by Article II:7 of the GATT 1994. Therefore, the concessions provided for in that Schedule are part of the terms of the treaty. As such, the only rules which may be applied in interpreting the meaning of a concession are the general rules of treaty interpretation set out in the *Vienna Convention*."[163]

Relevance of "legitimate expectations"

90. In *EC – Computer Equipment*, the European Communities appealed against the Panel's finding that "the meaning of the term 'ADP machines' in this context [of Article II:1(b)] may be determined in light of the legitimate expectations of an exporting Member."[164] In addition, the Panel found that the United States "was not required to clarify the scope of the European Communities' tariff concessions".[165] In rejecting the Panel's finding, the Appellate Body stated as follows:

> "Tariff negotiations are a process of reciprocal demands and concessions, of 'give and take'. It is only normal that importing Members define their offers (and their ensuing obligations) in terms which suit their needs. On the other hand, exporting Members have to ensure that their corresponding rights are described in such a manner in the Schedules of importing Members that their export interests, as agreed in the negotiations, are guaranteed. There was a special arrangement made for this in the Uruguay Round. For this purpose, a process of verification of tariff schedules took place from 15 February through 25 March 1994, which allowed Uruguay Round participants to check and control, through consultations with their negotiating partners, the scope and definition of tariff concessions.[166] Indeed, the fact that Members' Schedules are an integral part of the GATT 1994 indicates that, while each Schedule represents the tariff commitments made by *one* Member, they represent a common agreement among *all* Members.
>
> For the reasons stated above, we conclude that the Panel erred in finding that 'the United States was not required to clarify the scope of the European Communities' tariff concessions on LAN equipment'.[167] We consider that any clarification of the scope of tariff concessions that may be required during the negotiations is a task for *all* interested parties."[168]

91. However, despite its rejection, referenced in paragraph 90 above, of the Panel's interpretative approach to the European Communities' tariff commitments, the Appellate Body in *EC – Computer Equipment* stated that "[w]e do not agree that the Panel has created and applied a new rule on the burden of proof. The rules on the burden of proof are those which we clarified in *United States – Shirts and Blouses*.[169]"[170] The Appellate Body opined that the Panel's findings on the "requirement of clarification" were linked to the Panel's reliance on "legitimate expectations" as a means of interpretation of the European Communities' tariff concessions and "serve[d] to complete and buttress the Panel's conclusion that 'the United States was entitled to legitimate expectations that LAN equipment would continue to be accorded tariff treatment as ADP machines in the European Communities'".[171]

Relevance of Harmonized System/WCO practices

92. On the relevance of the Harmonized System in interpreting tariff concessions, the Appellate Body in *EC – Computer Equipment* stated as follows:

> "We note that during the Uruguay Round negotiations, both the European Communities and the United States were parties to the *Harmonized System*. Furthermore, it appears to be undisputed that the Uruguay Round tariff negotiations were held on the basis of the *Harmonized System's* nomenclature and that requests for, and offers of, concessions were normally made in terms of this nomenclature. Neither the European Communities nor the United States argued before the Panel that the *Harmonized System* and its *Explanatory Notes* were

[171] Appellate Body Report on *EC – Computer Equipment*, para. 104.

relevant in the interpretation of the terms of Schedule LXXX. We believe, however, that a proper interpretation of Schedule LXXX should have included an examination of the *Harmonized System* and its *Explanatory Notes*."[172]

93. The Appellate Body also discussed the relevance of decisions of the World Customs Organization ("WCO") for the interpretation of the tariff concessions at issue:

"A proper interpretation also would have included an examination of the existence and relevance of subsequent practice. We note that the United States referred, before the Panel, to the decisions taken by the Harmonized System Committee of the WCO in April 1997 on the classification of certain LAN equipment as ADP machines. Singapore, a third party in the panel proceedings, also referred to these decisions. The European Communities observed that it had introduced reservations with regard to these decisions and that, even if they were to become final as they stood, they would not affect the outcome of the present dispute for two reasons: first, because these decisions could not confirm that LAN equipment was classified as ADP machines in 1993 and 1994; and, second, because this dispute 'was about duty treatment and not about product classification'. We note that the United States agrees with the European Communities that this dispute is not a dispute on the *correct* classification of LAN equipment, but a dispute on whether the tariff treatment accorded to LAN equipment was less favourable than that provided for in Schedule LXXX. However, we consider that in interpreting the tariff concessions in Schedule LXXX, decisions of the WCO may be relevant; and, therefore, they should have been examined by the Panel."[173]

Relevance of prior practice in tariff classification

94. In *EC – Computer Equipment*, in its interpretation of the tariff concessions at issue, the Appellate Body found that the terms of the relevant Schedule were ambiguous. In continuing its analysis, the Appellate Body discussed the relevance of tariff classification practice of Members to the interpretation of tariff concessions as follows:

"In the light of our observations on 'the circumstances of [the] conclusion' of a treaty as a supplementary means of interpretation under Article 32 of the *Vienna Convention*, we consider that the classification practice in the European Communities during the Uruguay Round is part of 'the circumstances of [the] conclusion' of the *WTO Agreement* and may be used as a supplementary means of interpretation within the meaning of Article 32 of the *Vienna Convention*."[174]

95. However, the Appellate Body added the following caveat regarding the relevance of prior practice on tariff classification:

"The purpose of treaty interpretation is to establish the *common* intention of the parties to the treaty. To establish this intention, the prior practice of only *one* of the parties may be relevant, but it is clearly of more limited value than the practice of all parties. In the specific case of the interpretation of a tariff concession in a Schedule, the classification practice of the importing Member, in fact, may be of great importance."[175]

96. Also, the Appellate Body in *EC – Computer Equipment* denied the relevance of inconsistent practice for the interpretation of tariff concessions. In addition, the Appellate Body pointed to the fact that the Panel on *EC – Computer Equipment* had focused on only two member States of the European Communities:

"Consistent prior classification practice may often be significant. Inconsistent classification practice, however, *cannot* be relevant in interpreting the meaning of a tariff concession. . . .

. . . [T]he Panel identified Ireland and the United Kingdom as the 'largest' and 'major' market for LAN equipment exported from the United States. On the basis of this assumption, the Panel gave special importance to the classification practice by customs authorities in these two Member States. However, the European Communities constitutes a customs union, and as such, once goods are imported into any Member State, they circulate freely within the territory of the entire customs union. The export market, therefore, is the European Communities, not an individual Member State."[176]

(iii) "ordinary customs duties"

97. As regards the concept of ordinary customs duty, the Appellate Body in *Chile – Price Band System*, reversed the Panel's interpretation of this concept with respect to Article 4 of the *Agreement on Agriculture* and Article II.1(b) first sentence of *GATT 1994*. See Section V.B.3 of the Chapter on the *Agreement on Agriculture*.

(iv) "in excess of"

Specific import duties under tariff concessions made on an ad valorem basis

98. In *Argentina – Textiles and Apparel*, the measure at issue was a minimum specific import duty (the so-called "DIEM") imposed by Argentina on footwear, textiles and apparel. Argentina's Schedule included a

[172] Appellate Body Report on *EC – Computer Equipment*, para. 89.
[173] Appellate Body Report on *EC – Computer Equipment*, para. 90.
[174] Appellate Body Report on *EC – Computer Equipment*, para. 92. This reasoning was reiterated and followed in *Canada – Dairy*, where the Appellate Body addressed a complaint that Canadian administration of tariff-rate quota on fluid milk was inconsistent with GATT Article II:1(b). Appellate Body Report on *Canada – Dairy*, para. 132.
[175] Appellate Body Report on *EC – Computer Equipment*, para. 93.
[176] Appellate Body Report on *EC – Computer Equipment*, paras. 95–96.

bound rate of duty of 35 per cent *ad valorem* with respect to the above-mentioned goods. In practice, textiles and apparel were subject to the higher of either (i) a 35 per cent *ad valorem* duty or (ii) the minimum specific duty. The Panel found the Argentine specific duty to be a violation of Article II for two reasons: First, the Panel found that Argentina had acted inconsistently with Article II simply by virtue of applying a different *type* of import duty than set out in its Schedule, independently of whether the *ad valorem* equivalent of the specific duty in fact exceeded the bound *ad valorem* rate.[177] In making this finding, the Panel relied on past GATT practice which it found to be "clear".[178] Second, the Panel found a violation of Article II in the fact that the minimum specific import duty in certain cases exceeded the bound 35 per cent *ad valorem* duty.[179] The Appellate Body modified the findings of the Panel. In so doing, the Appellate Body disagreed with the Panel about the clarity of past GATT practice and focused, in its analysis, on the terms of Article II. The Appellate Body first addressed the Panel's finding that merely by applying a *type* of duty different from the *type* provided for in a Member's Schedule, that Member acted inconsistently with Article II:

> "A tariff binding in a Member's Schedule provides an upper limit on the amount of duty that may be imposed, and a Member is permitted to impose a duty that is less than that provided for in its Schedule. The principal obligation in the first sentence of Article II:1(b), as we have noted above, requires a Member to refrain from imposing ordinary customs duties *in excess of* those provided for in that Member's Schedule. However, the text of Article II:1(b), first sentence, does not address whether applying a *type* of duty different from the *type* provided for in a Member's Schedule is inconsistent, in itself, with that provision."[180]

99. After finding that the text of Article II:1(b) did not address the question whether a violation of Article II could result merely from the application a *type* of duty different from the *type* of duty provided for in a Member's Schedule, the Appellate Body in *Argentina – Textiles and Apparel* addressed the question whether Argentina had applied customs duties *in excess of* those provided for in its Schedule:

> "[T]he application of a type of duty different from the type provided for in a Member's Schedule is inconsistent with Article II:1(b), first sentence, of the GATT 1994 to the extent that it results in ordinary customs duties being levied in excess of those provided for in that Member's Schedule. In this case, we find that Argentina has acted inconsistently with its obligations under Article II:1(b), first sentence, of the GATT 1994, because the DIEM regime, by its structure and design, results, with respect to a certain range of import prices in any relevant tariff category to which it applies, in the levying of customs duties in excess of the bound rate of 35 per cent *ad valorem* in Argentina's Schedule."[181]

100. In reaching this conclusion, the Appellate Body in *Argentina – Textiles and Apparel* pointed out the possibility of a price sufficiently low to render the *ad valorem* equivalent of the DIEM greater than 35 per cent:

> "[W]e may generalize that under the Argentine system, whether the amount of the DIEM is determined by applying 35 per cent, or a rate less than 35 per cent, to the representative international price, there will remain the possibility of a price that is sufficiently low to produce an *ad valorem* equivalent of the DIEM that is greater than 35 per cent. In other words, the structure and design of the Argentine system is such that for any DIEM, no matter what *ad valorem* rate is used as the multiplier of the representative international price, the possibility remains that there is a 'break-even' price below which the *ad valorem* equivalent of the customs duty collected is in excess of the bound *ad valorem* rate of 35 per cent.
>
> We note that it is possible, under certain circumstances, for a Member to design a legislative 'ceiling' or 'cap' on the level of duty applied which would ensure that, even if the type of duty applied differs from the type provided for in that Member's Schedule, the *ad valorem* equivalents of the duties actually applied would not exceed the *ad valorem* duties provided for in the Member's Schedule. However, no such "ceiling" exists in this case. The measures at issue here, as we have already noted, specifically and expressly require Argentine customs officials to collect the *greater* of the *ad valorem* or the specific duties applicable, with no upper limit on the level of the *ad valorem* equivalent of the specific duty that may be imposed. Before the Panel, Argentina argued that its domestic challenge procedure (*recurso de impugnación*), in combination with the precedence and direct effect of international treaty obligations in the Argentine national legal system, operated as an effective legislative 'ceiling' to ensure that a duty in excess of the bound rate of 35 per cent *ad valorem* could never actually be imposed. The Panel did not accept this argument, and Argentina has not appealed from that finding of the Panel. In this case, therefore, there is no effective legislative 'ceiling' in the Argentine system which ensures that duties in excess of the bound rate of 35 per cent *ad valorem* will not be applied."[182]

---

[177] Panel Report on *Argentina – Textiles and Apparel*, paras. 6.31–6.32.
[178] Panel Report on *Argentina – Textiles and Apparel*, para. 6.31.
[179] Panel Report on *Argentina – Textiles and Apparel*, para. 6.65.
[180] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 46.
[181] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 55.
[182] Appellate Body Report on *Argentina – Textiles and Apparel*, paras. 53–54.

(b) Article II:1(b) Second sentence

101. The Appellate Body on *Chile – Price Band System* reversed the Panel's finding that the duties resulting from Chile's price band system constituted a violation of the *second* sentence of Article II:1(b), because no claim had been made under that provision, and therefore the Panel had acted inconsistently with Article 11 of the DSU.[183] See Section XI.B(2)(a)(ii) of the Chapter on the *DSU*.

102. The Appellate Body on *Chile – Price Band System*, in examining the concept of ordinary customs duties under Article 4.2 of the Agreement on Agriculture, referred to Article II:1(b) second sentence of the GATT 1994. See Section V.B.2 of the Chapter on the *Agreement on Agriculture*.

3. Relationship between paragraphs 1(a) and 1(b)

103. In *Argentina – Textiles and Apparel*, in addressing the consistency with GATT Article II of certain minimum specific duties imposed on textiles and apparel, the Appellate Body described the relationship between paragraphs (a) and (b) of Article II:1 as follows:

> "The terms of Article II:1(a) require that a Member 'accord to the commerce of the other Members treatment no less favourable than that provided for' in that Member's Schedule. Article II:1(b), first sentence, states, in part: 'The products described in Part I of the Schedule . . . shall, on their importation into the territory to which the Schedule relates, . . . be exempt from ordinary customs duties in excess of those set forth and provided therein.' Paragraph (a) of Article II:1 contains a general prohibition against according treatment less favourable to imports than that provided for in a Member's Schedule. Paragraph (b) prohibits a specific kind of practice that will always be inconsistent with paragraph (a): that is, the application of ordinary customs duties in excess of those provided for in the Schedule. Because the language of Article II:1(b), first sentence, is more specific and germane to the case at hand, our interpretative analysis begins with, and focuses on, that provision."[184]

4. Article II:5

104. In *EC – Computer Equipment*, the Appellate Body rejected the Panel's finding that Article II:5 confirmed the relevance of "legitimate expectations" of the exporting Member for interpreting tariff concessions of the importing Member:

> "[W]e reject the Panel's view that Article II:5 of the GATT 1994 confirms that 'legitimate expectations are a vital element in the interpretation' of Article II:1 of the GATT 1994 and of Members' Schedules. It is clear from the wording of Article II:5 that it does not support the Panel's view. This paragraph recognizes the possibility that the treatment *contemplated* in a concession, provided for in a Member's Schedule, on a particular product, may differ from the treatment *accorded* to that product and provides for a compensatory mechanism to rebalance the concessions between the two Members concerned in such a situation. However, nothing in Article II:5 suggests that the expectations of *only* the exporting Member can be the basis for interpreting a concession in a Member's Schedule for the purposes of determining whether that Member has acted consistently with its obligations under Article II:1. In discussing Article II:5, the Panel overlooked the second sentence of that provision, which clarifies that the 'contemplated treatment' referred to in that provision is the treatment contemplated by *both* Members."[185]

5. Article II:7

105. In *EC – Computer Equipment*, the Appellate Body considered that "[a] Schedule is made an integral part of the GATT 1994 by Article II:7 of the GATT 1994". The Appellate Body thus concluded that "the concessions provided for in that Schedule are part of the terms of the treaty".[186] In this regard, see paragraph 89 above.

D. RELATIONSHIP WITH OTHER ARTICLES

1. General

106. In *EC – Bananas III*, the Appellate Body, discussing whether tariff concessions for agricultural products can deviate from Article XIII of *GATT 1994*, emphasized that in their Schedules, Members may yield their rights, but may not diminish their obligations under *GATT 1994*. See paragraph 84 above.

2. Article III

107. In *EC – Bananas III*, the Appellate Body rejected the argument that Article III:4 of the *GATT 1994* did not cover the EC licensing system for the allocation of tariff quotas for imports of bananas because it was a border measure. See paragraphs 125 and 285 below.

108. In *Korea – Various Measures on Beef*, after finding that the practice of the Korean state trading agency for beef of treating grass-fed beef and grain-fed beef differently was inconsistent with GATT Articles XI and II:1(a), the Panel, in a finding not reviewed by the Appellate Body, did not "find it necessary to address Australia's claims that the same measures also violate Articles III:4 and XVII of GATT."[187]

---

[183] Appellate Body Report on *Chile – Price Band System*, para. 285.
[184] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 45.
[185] Appellate Body Report on *EC – Computer Equipment*, para. 81.
[186] Appellate Body Report on *EC – Computer Equipment*, para. 84.
[187] Panel Report on *Korea – Various Measures on Beef*, para. 780. With respect to judicial economy in general, see Chapter on *DSU*, Section XXXVI.F.

3. Article XI

109. The majority of the Panel on *US – Certain EC Products* decided that the United States' bonding requirements on imports from the European Communities fell within the scope of Article II of *GATT 1994*; in a separate opinion, one panelist, whose identity remained confidential pursuant to Article 14.3 of the *DSU*, expressed the view that the increased bonding requirement was subject to, and inconsistent with, Article XI. The Appellate Body reversed the finding of the Panel. See paragraph 69 above, and footnote 126.

4. Article XIII

110. Following the finding referenced in paragraph 106 above, the Appellate Body in *EC – Bananas III* addressed whether the *Agreement on Agriculture* permits market access concessions on agricultural products to be inconsistent with Article XIII of *GATT 1994*. In so doing, the Appellate Body addressed the relationship between the *Agreement on Agriculture* and *GATT 1994* and found that Article XIII of *GATT 1994* was applicable to such concessions:

> "The question remains whether the provisions of the *Agreement on Agriculture* allow market access concessions on agricultural products to deviate from Article XIII of the GATT 1994. The preamble of the *Agreement on Agriculture* states that it establishes 'a basis for initiating a process of reform of trade in agriculture' and that this reform process 'should be initiated through the negotiation of commitments on support and protection and through the establishment of strengthened and more operationally effective GATT rules and disciplines'. The relationship between the provisions of the GATT 1994 and of the *Agreement on Agriculture* is set out in Article 21.1 of the *Agreement on Agriculture*:
>
> > 'The provisions of GATT 1994 and of other Multilateral Trade Agreements in Annex 1A to the WTO Agreement shall apply subject to the provisions of this Agreement.'
>
> Therefore, the provisions of the GATT 1994, including Article XIII, apply to market access commitments concerning agricultural products, except to the extent that the *Agreement on Agriculture* contains specific provisions dealing specifically with the same matter."[188]

111. In *EC – Bananas III*, the Panel also found that the European Communities' import regime for bananas was inconsistent with Article XIII of *GATT 1994* in that the European Communities allocated tariff quota shares to some Members without allocating such shares to other Members. In doing so, with respect to the relationship between Articles II and XIII, the Panel stated as follows:

> "The panel in the *Sugar Headnote* case found that qualifications on tariff bindings do not override other GATT provisions after an analysis of the wording of Article II, its object, purpose and context, and the drafting history of the provision. Although it made no mention of the Vienna Convention, it seems to have followed closely Articles 31 and 32 thereof. . . .[189]
>
> . . .
>
> We agree with the analysis of the *Sugar Headnote* panel report and note that Article II was not changed in any relevant way as a result of the Uruguay Round. Thus, based on the *Sugar Headnote* case, we conclude that the EC's inclusion of allocations inconsistent with the requirements of Article XIII in its Schedule does not prevent them from being challenged by other Members. We note in this regard that the Uruguay Round tariff schedules were prepared with full knowledge of the *Sugar Headnote* panel report, which was adopted by the GATT CONTRACTING PARTIES in the middle of the Round (June 1989)."[190]

5. Article XVII

112. In *Korea – Various Measures on Beef*, after finding that the practice of the Korean state trading agency for beef of treating grass-fed beef and grain-fed beef differently was inconsistent with GATT Articles XI and II:1(a), the Panel, in a finding not reviewed by the Appellate Body, did not "find it necessary to address Australia's claims that the same measures also violate Article XVII of GATT"[191].

E. EXCEPTIONS AND DEROGATIONS FROM ARTICLE II

1. Waivers

113. A number of waivers of a "collective" or individual nature have been granted to enable Members to implement the HS changes domestically and undertake Article XXVIII negotiations, subsequently, if required. With respect to these waivers, see the Chapter on the *WTO Agreement*.

---

[188] Appellate Body Report on *EC – Bananas III*, para. 155.

[189] Following this paragraph, the Panel cited Panel Report on *US – Sugar*, paras. 5.1–5.7.

[190] Panel Report on *EC – Bananas III*, paras. 7.113–7.114. In support of its finding, the Panel cited Appellate Body Report on *Japan – Alcoholic Beverages II*, p.15, as stating that "[a]dopted panel reports are an important part of the GATT *acquis*. They are often taken into account by subsequent panels. They create legitimate expectations among Members, and, therefore should be taken into account where they are relevant to any dispute".

[191] Panel Report on *Korea – Various Measures on Beef*, para. 780. With respect to judicial economy in general, see Chapter on *DSU*, Section XXXVI.F.

F. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Agreement on Agriculture

114. The Appellate Body on *Chile – Price Band System*, in examining the concept of ordinary customs duties under Article 4.2 of the *Agreement on Agriculture*, referred to Article II:1(b) of *GATT 1994*. See Section V.B.3 of the Chapter on the *Agreement on Agriculture*. The Appellate Body also indicated that if it were to find that Chile's price band system was inconsistent with Article 4.2 of the Agreement of Agriculture, it would not need to make a separate finding on whether Chile's price band system also results in a violation of Article II:1(b) of the GATT 1994 to resolve this dispute.[192]

2. Licensing Agreement

115. In *Canada – Dairy*, the Panel decided not to examine a claim that Canada violated Article 3 of the *Licensing Agreement* in that it restricted access to tariff-rate quotas for imports of fluid milk to Canadians of consumer packaged milk for personal use, valued less than Can$20, after having found the Canadian measure inconsistent with GATT Article II:1(b) (see paragraph 86 above).[193] See Chapter on the *Licensing Agreement*, paragraph 33.

PART II

IV. ARTICLE III

A. TEXT OF ARTICLE III

*Article III**
National Treatment on Internal Taxation and Regulation

1. The contracting parties recognize that internal taxes and other internal charges, and laws, regulations and requirements affecting the internal sale, offering for sale, purchase, transportation, distribution or use of products, and internal quantitative regulations requiring the mixture, processing or use of products in specified amounts or proportions, should not be applied to imported or domestic products so as to afford protection to domestic production.*

2. The products of the territory of any contracting party imported into the territory of any other contracting party shall not be subject, directly or indirectly, to internal taxes or other internal charges of any kind in excess of those applied, directly or indirectly, to like domestic products. Moreover, no contracting party shall otherwise apply internal taxes or other internal charges to imported or domestic products in a manner contrary to the principles set forth in paragraph 1.*

3. With respect to any existing internal tax which is inconsistent with the provisions of paragraph 2, but which is specifically authorized under a trade agreement, in force on April 10, 1947, in which the import duty on the taxed product is bound against increase, the contracting party imposing the tax shall be free to postpone the application of the provisions of paragraph 2 to such tax until such time as it can obtain release from the obligations of such trade agreement in order to permit the increase of such duty to the extent necessary to compensate for the elimination of the protective element of the tax.

4. The products of the territory of any contracting party imported into the territory of any other contracting party shall be accorded treatment no less favourable than that accorded to like products of national origin in respect of all laws, regulations and requirements affecting their internal sale, offering for sale, purchase, transportation, distribution or use. The provisions of this paragraph shall not prevent the application of differential internal transportation charges which are based exclusively on the economic operation of the means of transport and not on the nationality of the product.

5. No contracting party shall establish or maintain any internal quantitative regulation relating to the mixture, processing or use of products in specified amounts or proportions which requires, directly or indirectly, that any specified amount or proportion of any product which is the subject of the regulation must be supplied from domestic sources. Moreover, no contracting party shall otherwise apply internal quantitative regulations in a manner contrary to the principles set forth in paragraph 1.*

6. The provisions of paragraph 5 shall not apply to any internal quantitative regulation in force in the territory of any contracting party on July 1, 1939, April 10, 1947, or March 24, 1948, at the option of that contracting party; *Provided* that any such regulation which is contrary to the provisions of paragraph 5 shall not be modified to the detriment of imports and shall be treated as a customs duty for the purpose of negotiation.

7. No internal quantitative regulation relating to the mixture, processing or use of products in specified amounts or proportions shall be applied in such a manner as to allocate any such amount or proportion among external sources of supply.

8. (*a*) The provisions of this Article shall not apply to laws, regulations or requirements governing the procurement by governmental agencies of products purchased for governmental purposes and not with a view to commercial resale or with a view to use in the production of goods for commercial sale.

[192] Appellate Body Report on *Chile – Price Band System*, para. 190.
[193] Panel Report on *Canada – Dairy*, para. 7.157.

(*b*) The provisions of this Article shall not prevent the payment of subsidies exclusively to domestic producers, including payments to domestic producers derived from the proceeds of internal taxes or charges applied consistently with the provisions of this Article and subsidies effected through governmental purchases of domestic products.

9. The contracting parties recognize that internal maximum price control measures, even though conforming to the other provisions of this Article, can have effects prejudicial to the interests of contracting parties supplying imported products. Accordingly, contracting parties applying such measures shall take account of the interests of exporting contracting parties with a view to avoiding to the fullest practicable extent such prejudicial effects.

10. The provisions of this Article shall not prevent any contracting party from establishing or maintaining internal quantitative regulations relating to exposed cinematograph films and meeting the requirements of Article IV.

B. TEXT OF *AD* ARTICLE III

Ad Article III

Any internal tax or other internal charge, or any law, regulation or requirement of the kind referred to in paragraph 1 which applies to an imported product and to the like domestic product and is collected or enforced in the case of the imported product at the time or point of importation, is nevertheless to be regarded as an internal tax or other internal charge, or a law, regulation or requirement of the kind referred to in paragraph 1, and is accordingly subject to the provisions of Article III.

Paragraph 1

The application of paragraph 1 to internal taxes imposed by local governments and authorities with the territory of a contracting party is subject to the provisions of the final paragraph of Article XXIV. The term "reasonable measures" in the last-mentioned paragraph would not require, for example, the repeal of existing national legislation authorizing local governments to impose internal taxes which, although technically inconsistent with the letter of Article III, are not in fact inconsistent with its spirit, if such repeal would result in a serious financial hardship for the local governments or authorities concerned. With regard to taxation by local governments or authorities which is inconsistent with both the letter and spirit of Article III, the term "reasonable measures" would permit a contracting party to eliminate the inconsistent taxation gradually over a transition period, if abrupt action would create serious administrative and financial difficulties.

Paragraph 2

A tax conforming to the requirements of the first sentence of paragraph 2 would be considered to be inconsistent with the provisions of the second sentence only in cases where competition was involved between, on the one hand, the taxed product and, on the other hand, a directly competitive or substitutable product which was not similarly taxed.

Paragraph 5

Regulations consistent with the provisions of the first sentence of paragraph 5 shall not be considered to be contrary to the provisions of the second sentence in any case in which all of the products subject to the regulations are produced domestically in substantial quantities. A regulation cannot be justified as being consistent with the provisions of the second sentence on the ground that the proportion or amount allocated to each of the products which are the subject of the regulation constitutes an equitable relationship between imported and domestic products.

C. INTERPRETATION AND APPLICATION OF ARTICLE III

1. General

(a) Purpose of Article III

(i) Avoidance of protectionism in the application of internal measures

116. In examining the consistency of the Japanese taxation on liquor products with Article III, the Appellate Body in *Japan – Alcoholic Beverages II* explained the purpose of Article III in the following terms:

> "The broad and fundamental purpose of Article III is to avoid protectionism in the application of internal tax and regulatory measures. More specifically, the purpose of Article III 'is to ensure that internal measures "not be applied to imported or domestic products so as to afford protection to domestic production"'.[194] Toward this end, Article III obliges Members of the WTO to provide equality of competitive conditions for imported products in relation to domestic products.[195] '[T]he intention of the drafters of the Agreement was clearly to treat the imported products in the same way as the like domestic products once they had been cleared through customs. Otherwise indirect protection could be given'.[196]"[197]

117. The Appellate Body repeatedly cited its finding referenced in paragraph 116 above.[198] Further, in *Korea – Alcoholic Beverages*, the Appellate Body added:

---

[194] (*footnote original*) Panel Report on *US – Section 337*, para. 5.10.
[195] (*footnote original*) Panel Reports on *US – Superfund*, para. 5.1.9; and *Japan – Alcoholic Beverages II*, para. 5.5(b).
[196] (*footnote original*) Panel Report on *Italy – Agricultural Machinery*, para. 11.
[197] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 16.
[198] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 119; Appellate Body Report on *Chile – Alcoholic Beverages*, para. 67; and Appellate Body Report on *EC – Asbestos*, para. 97. See also Panel Report on *Indonesia – Autos*, para. 14.108.

"In view of the objectives of avoiding protectionism, requiring equality of competitive conditions and protecting expectations of equal competitive relationships, we decline to take a static view of the term 'directly competitive or substitutable'."[199]

118. Also, in *Canada – Periodicals*, the Appellate Body added:

"The fundamental purpose of Article III of the GATT 1994 is to ensure equality of competitive conditions between imported and like domestic products.[200]"[201]

119. In *Argentina – Hides and Leather*, the Panel referred to the findings of the Appellate Body referenced in paragraphs 116–118 above, and stated that "Article III:2, first sentence, is not concerned with taxes or changes as such or the policy purposes Members pursue with them, but with their economic *impact* on the competitive opportunities of imported and like domestic products."[202] See also paragraph 176 below.

(ii) Protection of tariff commitments under Article III/Relevance of tariff concessions

120. In *Japan – Alcoholic Beverages II*, the Panel held that "one of the main purposes of Article III is to guarantee that WTO Members will not undermine through internal measures their commitments under Article II."[203] Although the Appellate Body agreed about the significance of Article III with respect to tariff concessions, it emphasized that the purpose of Article III was broader:

"The broad purpose of Article III of avoiding protectionism must be remembered when considering the relationship between Article III and other provisions of the *WTO Agreement*. Although the protection of negotiated tariff concessions is certainly one purpose of Article III, the statement in Paragraph 6.13 of the Panel Report that 'one of the main purposes of Article III is to guarantee that WTO Members will not undermine through internal measures their commitments under Article II' should not be overemphasized. The sheltering scope of Article III is not limited to products that are the subject of tariff concessions under Article II. The Article III national treatment obligation is a general prohibition on the use of internal taxes and other internal regulatory measures so as to afford protection to domestic production. This obligation clearly extends also to products not bound under Article II. This is confirmed by the negotiating history of Article III."[204]

(iii) Comparison with competition law

121. In *Korea – Alcoholic Beverages*, the Panel, in a statement subsequently not addressed by the Appellate Body, considered that it is not necessary to use the same criteria for defining markets under Article III:2 as under competition law. The Panel stated:

"While the specifics of the interaction between trade and competition law are still being developed, we concur that the market definitions need not be the same. Trade law generally, and Article III in particular, focuses on the promotion of economic opportunities for importers through the elimination of discriminatory governmental measures which impair fair international trade. Thus, trade law addresses the issue of the potentiality to compete. Antitrust law generally focuses on firms' practices or structural modifications which may prevent or restrain or eliminate competition. It is not illogical that markets be defined more broadly when implementing laws primarily designed to protect competitive opportunities than when implementing laws designed to protect the actual mechanisms of competition. In our view, it can thus be appropriate to utilize a broader concept of markets with respect to Article III:2, second sentence, than is used in antitrust law. We also take note of the developments under European Community law in this regard. For instance, under Article 95 of the Treaty of Rome, which is based on the language of Article III, distilled alcoholic beverages have been considered similar or competitive in a series of rulings by the European Court of Justice ('ECJ').[205] On the other hand, in examining a merger under the European Merger Regulation,[206] the Commission of the European Communities found that whisky constituted a separate market.[207] Similarly, in an Article 95 case, bananas were considered in competition with other fruits.[208] However, under EC competition law, bananas constituted a distinct product market.[209] We are mindful that the Treaty of Rome is different in scope and purpose from the General Agreement, the similarity of Article 95 and Article III, notwithstanding. Nonetheless, we observe that there is relevance in examining how the ECJ has defined markets in similar situations to assist in understanding the relationship between the

analysis of non-discrimination provisions and competition law.[210]"[211]

(iv) Reference to GATT practice

122. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 125–127.

(b) Scope of application – measures imposed at the time or point of importation

123. In *Argentina – Hides and Leather*, the Panel addressed the question whether Argentine fiscal provisions concerning pre-payment of a value added tax, applied to imported goods at the time of their importation, were nevertheless to be considered "internal measures" within the meaning of Article III:2. The Panel addressed in particular Note *Ad* Article III, which sets forth that a measure applied to a product at the time of importation is nevertheless an internal measure within the meaning of Article III if this measure is also imposed on the like domestic product:

> "RG 3431 [the value-added tax measure applicable to imported goods] applies to definitive import transactions, but only if the products imported are subsequently re-sold in the internal Argentinean market. In other words, RG 3431 provides for the pre-payment of the IVA chargeable to an *internal* transaction. It should also be pointed out that the fact that RG 3431 is collected at the time and point of importation does not preclude it from qualifying as an internal tax measure."[212]

124. While the parties to the *Argentina – Hides and Leather* dispute agreed that RG 3543, another Argentine tax measure imposing a collection regime of income taxes with respect to import transactions, was an internal measure within the meaning of Article III, they disagreed with respect to the question whether the same tax regime existed for domestic goods, i.e. whether RG 2784, the income tax measure applicable with respect to domestic transactions, was the "internal analogue" of RG 3431. While RG 3543 established a *collection* regime and defined the *purchaser* as the taxable person, RG 2784 established a *withholding* regime and defined the *seller* as the taxable person. The Panel did not consider these differences significant enough for the Argentine regime to fall outside the scope the Note *Ad* Article III:

> "[I]t is clear that the fact that RG 3543 creates a collection regime and not a withholding regime does not establish, in itself, that RG 2784 is not equivalent to RG 3543. The use of a different method of taxation may be justified by objective reasons. In this regard, it seems logical to us to collect pre-payments of an income tax from the sellers of a product, as indeed RG 2784 envisages. As we understand it, RG 3543 does not do so, *inter alia*, because foreign sellers are not normally subject to income taxation in Argentina. In those circumstances, Argentina apparently saw fit to adjust for the adverse competitive effect of RG 2784 on domestic products by collecting pre-payments from importers in accordance with RG 3543.
>
> . . .
>
> For these reasons, we find that RG 3543 establishes a mechanism for the collection of the IG at the border which is equivalent in nature to the IG withholding mechanism established by RG 2784. In accordance with the Note *Ad* Article III, we therefore conclude that RG 3543 is an internal measure within the meaning of Article III:2."[213]

125. In *EC – Bananas III*, the Appellate Body found the EC import licensing system for bananas inconsistent with Article III:4. The European Communities claimed that Article III:4 was not applicable to the import licensing system because it was a border measure. The Appellate Body replied as follows:

> "At issue in this appeal is not whether *any* import licensing requirement, as such, is within the scope of Article III:4, but whether the EC procedures and requirements for the *distribution* of import licences for imported bananas among eligible operators *within* the European Communities are within the scope of this provision. The EC licensing procedures and requirements include the operator category rules, under which 30 per cent of the import licences for third-country and non-traditional ACP bananas are allocated to operators that market EC or traditional ACP bananas, and the activity function rules, under which Category A and B licences are distributed among operators on the basis of their economic activities as importers, customs clearers or ripeners. These rules go far beyond the mere import licence requirements needed to administer the tariff quota for third-country and non-traditional ACP bananas or Lomé Convention requirements for the importation of bananas. These rules are intended, among other things, to cross-subsidize distributors of EC (and ACP) bananas and to ensure that EC banana ripeners obtain a share of the quota rents. As such, these rules affect 'the internal sale, offering for sale, purchase, . . .' within the meaning of Article III:4, and therefore fall within the scope of this provision. Therefore, we agree with the conclusion of the Panel on this point."[214]

(i) State trading enterprises

126. In *Korea – Various Measures on Beef*, the Panel recognized that where a state trading enterprise has a

[210] (*footnote original*) In finding the relationship of the provisions to each other relevant, we do not intend to imply that we have adopted the market definitions defined in these or other ECJ cases for purposes of this decision.
[211] Panel Report on *Korea – Alcoholic Beverages*, para. 10.81.
[212] Panel Report on *Argentina – Hides and Leather*, para. 11.145.
[213] Panel Report on *Argentina – Hides and Leather*, paras. 11.150 and 11.154.
[214] Appellate Body Report on *EC – Bananas III*, para. 211.

monopoly over both importation and distribution of goods, a blurring may occur of the traditional distinction between measures affecting imported products and measures affecting importation:

> "Based on the panel findings in the Canada – Marketing Agencies (1988) case, the Panel considers that to the extent that LPMO fully controls both the importation and distribution of its 30 per cent share of Korean beef quota, the distinction normally made in the GATT between restrictions affecting the importation of products (i.e. border measures) and restrictions affecting imported products (i.e. internal measures) loses much of its significance."[215]

(ii) Reference to GATT practice

127. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 136–139.

(c) Relevance of policy purpose of internal measures / "aims-and-effects" test

128. With respect to the relevance of policy purposes of subject internal measures, in *Japan – Alcoholic Beverages II*, the Appellate Body stated as follows:

> "Members of the WTO are free to pursue their own domestic goals through internal taxation or regulation so long as they do not do so in a way that violates Article III or any of the other commitments they have made in the WTO Agreement."[216]

129. In this respect, in *Argentina – Hides and Leather*, the Panel stated that "[i]t must be stated ... that the applicability of Article III:2 is not conditional upon the policy purpose of a tax measure.[217]"[218] See also paragraph 119 above.

130. In *Japan – Alcoholic Beverages II*, the Panel, in a finding subsequently upheld by the Appellate Body, explicitly rejected the so-called "aims-and-effects" test. The Panel summarized the parties' arguments for the "aims-and-effects" test as follows:

> "Japan ... essentially argued that the Panel should examine the contested legislation in the light of its aim and effect in order to determine whether or not it is consistent with Article III:2. According to this view, in case the aim and effect of the contested legislation do not operate so as to afford protection to domestic production, no inconsistency with Article III:2 can be established. ... [T]he United States ... essentially argued that, in determining whether two products that were taxed differently under a Member's origin-neutral tax measure were nonetheless 'like products' for the purposes of Article III:2, the Panel should examine not only the similarity in physical characteristics and end-uses, consumer tastes and preferences, and tariff classifications for each product, but also whether the tax distinction in question was 'applied ... so as to afford protection to domestic production': that is, whether the aim and effect of that distinction, considered as a whole, was to afford protection to domestic production. According to this view, if the tax distinction in question is not being applied so as to afford protection to domestic production, the products between which the distinction is drawn are not to be deemed 'like products' for the purpose of Article III:2."[219]

131. In upholding the rejection by the Panel of the "aims-and-effects" test under Article III:2, first sentence, the Appellate Body, in *Japan – Alcoholic Beverages II*, found that the policy purpose of a tax measure (the "aim" of a measure") was not relevant for the purpose of Article III:2, first sentence:

> "Article III:2, first sentence does not refer specifically to Article III:1. There is no specific invocation in this first sentence of the general principle in Article III:1 that admonishes Members of the WTO not to apply measures 'so as to afford protection'. This omission must have some meaning. We believe the meaning is simply that the presence of a protective application need not be established separately from the specific requirements that are included in the first sentence in order to show that a tax measure is inconsistent with the general principle set out in the first sentence. However, this does not mean that the general principle of Article III:1 does not apply to this sentence. To the contrary, we believe the first sentence of Article III:2 is, in effect, an application of this general principle. ... If the imported and domestic products are 'like products', and if the taxes applied to the imported products are 'in excess of' those applied to the domestic like products, then the measure is inconsistent with Article III:2, first sentence."[220]

132. Also, in *EC – Bananas III*, the Appellate Body rejected the "aims-and-effects" test under both Article II and Article XVII of the *GATS*.[221] See Chapter on the *GATS*, Section XXI.B.3.

133. With respect to this topic, see also paragraph 219 below.

(i) Reference to GATT practice

134. With respect to GATT practice on this subject-matter, see GATT Analytical Index, page 127.

(d) Relevance of trade effects

135. In *Japan – Alcoholic Beverages II*, the Appellate Body addressed the relevance of the trade effects of measures falling under the scope of Article III:

---

[215] Panel Report on *Korea – Various Measures on Beef*, para. 766.
[216] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 16.
[217] (*footnote original*) See the Panel Reports on *US – Superfund*, para. 5.2.4, *EEC – Parts and Components*, para. 5.6.
[218] Panel Report on *Argentina – Hides and Leather*, para. 11.144.
[219] Panel Report on *Japan – Alcoholic Beverages II*, para. 6.15.
[220] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 18–19.
[221] Appellate Body Report on *EC – Bananas III*, paras. 216 and 241.

"[I]t is irrelevant that 'the trade effects' of the tax differential between imported and domestic products, as reflected in the volumes of imports, are insignificant or even non-existent; Article III protects expectations not of any particular trade volume but rather of the equal competitive relationship between imported and domestic products.[222]"[223]

136. The Appellate Body reiterated this approach in *Canada – Periodicals*:

"It is a well-established principle that the trade effects of a difference in tax treatment between imported and domestic products do not have to be demonstrated for a measure to be found to be inconsistent with Article III.[224]"[225]

(i) Reference to GATT practice

137. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 128–130.

(e) State trading monopolies

138. In *Korea – Various Measures on Beef*, the Panel addressed the relationship between Article XVII, the provision on state trading enterprises, and Article III. Finding support for its conclusions in GATT practice, the Panel held:

"Article XVII.1(a) establishes the general obligation on state trading enterprises to undertake their activities in accordance with the GATT principles of non-discrimination. The Panel considers that this general principle of non-discrimination includes at least the provisions of Articles I and III of GATT.

. . .

. . . A conclusion that the principle of non-discrimination was violated would suffice to prove a violation of Article XVII."[226]

(i) Reference to GATT practice

139. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 131–133.

2. Article III:1

(a) Relationship between paragraph 1 and paragraphs 2, 4 and 5

140. In *US – Gasoline*, in a finding subsequently not addressed by the Appellate Body, the Panel examined whether a US gasoline regulation treated imported gasoline in a manner inconsistent with Article III:1. In response to the US argument that Article III:1 "could not form the basis of a violation"[227], the Panel answered as follows:

"The Panel examined first whether, after making a finding of inconsistency with Article III:4, it should make a finding under Article III:1. The Panel noted that the panel in the *Malt Beverages* case had examined a claim made under paragraphs 1, 2 and 4 of Article III. That panel had concluded that 'because Article III:1 is a more general provision than either Article III:2 or III:4, it would not be appropriate for the Panel to consider [the complainant's] Article III:1 allegations to the extent that the Panel were to find [the respondent's] measures to be inconsistent with the more specific provisions of Articles III:2 and III:4.'[228] The present Panel agreed with this reasoning, and therefore did not find it necessary to examine the consistency of the Gasoline Rule with Article III:1."[229]

141. In *Japan – Alcoholic Beverages II*, the Appellate Body examined the Panel's finding of inconsistency of the Japanese Liquor Tax Law with both sentences of Article III:2. With respect to the legal status of Article III:1, the Appellate Body invoked the principle of effective treaty interpretation and found that Article III:1 constitutes part of the context for Article III:2:

"The terms of Article III must be given their ordinary meaning – in their context and in the light of the overall object and purpose of the *WTO Agreement*. Thus, the words actually used in the Article provide the basis for an interpretation that must give meaning and effect to all its terms. The proper interpretation of the Article is, first of all, a textual interpretation. Consequently, the Panel is correct in seeing a distinction between Article III:1, which 'contains general principles', and Article III:2, which 'provides for specific obligations regarding internal taxes and internal charges'. Article III:1 articulates a general principle that internal measures should not be applied so as to afford protection to domestic production. This general principle informs the rest of Article III. The purpose of Article III:1 is to establish this general principle as a guide to understanding and interpreting the specific obligations contained in Article III:2 and in the other paragraphs of Article III, while respecting, and not diminishing in any way, the meaning of the words actually used in the texts of those other paragraphs. In short, Article III:1 constitutes part of the context of Article III:2, in the same way that it constitutes part of the context of each of the other paragraphs in Article III. Any other reading of Article III would have the effect of rendering the words of Article III:1 meaningless, thereby violating the fundamental principle of effectiveness in treaty interpretation. Consistent with this principle of effectiveness,

[228] (*footnote original*) *US – Malt Beverages*, para. 5.2.
[229] Panel Report on *US – Gasoline*, para. 6.17.

> and with the textual differences in the two sentences, we believe that Article III:1 informs the first sentence and the second sentence of Article III:2 in different ways."[230]

142. In *EC – Asbestos*, the Appellate Body, in interpreting Article III:4 by comparing its terms with the terms used in Article III:2, referred to Article III:1. See paragraph 234 below.

143. The precise significance of Article III:1 for the interpretation of Article III:2, first sentence, was also addressed by the Panels on *Argentina – Hides and Leather*. See paragraph 154 below.[231]

(i) Reference to GATT practice

144. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 139–140.

3. Article III:2

(a) General

(i) General distinction between first and second sentences

145. In *Japan – Alcoholic Beverages II*, the Appellate Body described the distinction between the first and second sentences of Article III:2 as follows:

> "[T]he second sentence of Article III:2 provides for a separate and distinctive consideration of the protective aspect of a measure in examining its application to a broader category of products that are not 'like products' as contemplated by the first sentence . . .".[232]

146. In *Canada – Periodicals*, the Appellate Body, in reviewing the Panel's finding that the Canadian excise tax on magazines was inconsistent with Article III:2, first sentence, also addressed the distinction between the first and second sentence of Article III:2 :

> "[T]here are two questions which need to be answered to determine whether there is a violation of Article III:2 of the GATT 1994: (a) whether imported and domestic products are like products; and (b) whether the imported products are taxed in excess of the domestic products. If the answers to both questions are affirmative, there is a violation of Article III:2, first sentence. If the answer to one question is negative, there is a need to examine further whether the measure is consistent with Article III:2, second sentence."[233]

147. In *Canada – Periodicals*, the Appellate Body also reiterated its statement from *Japan – Alcoholic Beverages II* that Article III:2, second sentence, contemplates a "broader category of products" than Article III:2, first sentence:

> "Any measure that indirectly affects the conditions of competition between imported and like domestic products would come within the provisions of Article III:2, first sentence, or by implication, second sentence, given the broader application of the latter."[234]

148. Further, in *Canada – Periodicals*, the Appellate Body rejected Canada's argument that the imported and domestic periodicals in question were only imperfectly substitutable with each other and, therefore, did not fall under the term "directly competitive or substitutable product":

> "A case of perfect substitutability would fall within Article III:2, first sentence, while we are examining the broader prohibition of the second sentence."[235]

149. In *Korea – Alcoholic Beverages*, the Appellate Body examined the Panel's finding that Korean tax laws concerning liquor products were inconsistent with Article III:2. In rejecting Korea's appeal that "potential competition" was not enough to find that subject products were "directly competitive or substitutable products", the Appellate Body stated as follows:

> "The first sentence of Article III:2 also forms part of the context of the term. 'Like' products are a subset of directly competitive or substitutable products: all like products are, by definition, directly competitive or substitutable products, whereas not all 'directly competitive or substitutable' products are 'like'.[236] The notion of like products must be construed narrowly[237] but the category of directly competitive or substitutable products is broader.[238] While perfectly substitutable products fall within Article III:2, first sentence, imperfectly substitutable products can be assessed under Article III:2, second sentence.[239]"[240]

(ii) Relationship with paragraph 1

150. With respect to the relationship with paragraph 1, see paragraphs 140–143 above.

(iii) Legal status of Ad Article III

151. In *Japan – Alcoholic Beverages II*, the Appellate Body defined the legal status of Interpretative Note Ad Article III:2 and its relevance for the interpretation of Article III:2, as follows:

---

[230] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 17–18.
[231] With respect to this issue, see also Panel Report on *Japan – Film*, para. 10.371.
[232] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 19.
[233] Appellate Body Report on *Canada – Periodicals*, pp. 22–23.
[234] Appellate Body Report on *Canada – Periodicals*, p. 19.
[235] Appellate Body Report on *Canada – Periodicals*, p. 28.
[236] (*footnote original*) Panel Report on *Japan – Alcoholic Beverages II*, para. 6.22, approved by the Appellate Body at p. 23 of its Report.
[237] (*footnote original*) Appellate Body Reports on *Japan – Alcoholic Beverages II*, p. 20, and *Canada – Periodicals*, p. 21.
[238] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 25.
[239] (*footnote original*) Appellate Body Report on *Canada – Periodicals*, p. 28.
[240] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 118.

"Article III:2, second sentence, and the accompanying *Ad* Article have equivalent legal status in that both are treaty language which was negotiated and agreed at the same time. The *Ad* Article does not replace or modify the language contained in Article III:2, second sentence, but, in fact, clarifies its meaning. Accordingly, the language of the second sentence and the *Ad* Article must be read together in order to give them their proper meaning."[241]

(b) Paragraph 2, first sentence

(i) General

Test under Article III:2, first sentence

152. In *Japan – Alcoholic Beverages II*, the Appellate Body clarified the two elements contained in the first sentence of Article III:2 – "like products" and "in excess of". The Appellate Body established that these requirements constitute, in and of themselves, an application of the general principle contained in Article III:1 and that, consequently, the presence of a protective application need not be established separately from the specific criteria of Article III:2, first sentence:

"Article III:1 informs Article III:2, first sentence, by establishing that if imported products are taxed in excess of like domestic products, then that tax measure is inconsistent with Article III. Article III:2, first sentence does not refer specifically to Article III:1. There is no specific invocation in this first sentence of the general principle in Article III:1 that admonishes Members of the WTO not to apply measures so as to afford protection'. This omission must have some meaning. We believe the meaning is simply that the presence of a protective application need not be established separately from the specific requirements that are included in the first sentence in order to show that a tax measure is inconsistent with the general principle set out in the first sentence. However, this does not mean that the general principle of Article III:1 does not apply to this sentence. To the contrary, we believe the first sentence of Article III:2 is, in effect, an application of this general principle. The ordinary meaning of the words of Article III:2, first sentence leads inevitably to this conclusion. Read in their context and in the light of the overall object and purpose of the *WTO Agreement*, the words of the first sentence require an examination of the conformity of an internal tax measure with Article III by determining, first, whether the taxed imported and domestic products are 'like' and, second, whether the taxes applied to the imported products are 'in excess of' those applied to the like domestic products. If the imported and domestic products are 'like products', and if the taxes applied to the imported products are 'in excess of' those applied to the like domestic products, then the measure is inconsistent with Article III:2, first sentence.

This approach to an examination of Article III:2, first sentence, is consistent with past practice under the GATT 1947. Moreover, it is consistent with the object and purpose of Article III:2, which the panel in the predecessor to this case dealing with an earlier version of the Liquor Tax Law, *Japan – Customs Duties, Taxes and Labelling Practices on Imported Wines and Alcoholic Beverages* . . ., rightly stated as 'promoting non-discriminatory competition among imported and like domestic products [which] could not be achieved if Article III:2 were construed in a manner allowing discriminatory and protective internal taxation of imported products in excess of like domestic products'."[242]

153. In *Canada – Periodicals*, the Appellate Body reiterated this two-tiered test:

"[T]here are two questions which need to be answered to determine whether there is a violation of Article III:2 of the GATT 1994: (a) whether imported and domestic products are like products; and (b) whether the imported products are taxed in excess of the domestic products. If the answers to both questions are affirmative, there is a violation of Article III:2, first sentence."[243]

154. In *Argentina – Hides and Leather*, Argentina, citing the finding of the Appellate Body in *Japan – Alcoholic Beverages II* referenced in paragraph 131 above, argued that the existence of a protective application must be determined together with the other specific requirements contained in Article III:2. The Panel rejected this argument:

"We are unable to agree with Argentina's interpretation of the Appellate Body's statement. As we understand it, the presence of a protective application need be established neither separately nor together with the specific requirements contained in Article III:2, first sentence. The quoted passage from the Appellate Body report in *Japan – Alcoholic Beverages II* makes clear that Article III:2, first sentence, is, in effect, an application of the general principle stated in Article III:1. Accordingly, whenever imported products from one Member's territory are subject to taxes in excess of those applied to like domestic products in the territory of another Member, this is deemed to 'afford protection to domestic production' within the meaning of Article III:1. It follows that, in applying Article III:2, first sentence, recourse to the general principle of Article III:1 is neither necessary nor appropriate.[244] The only requirements that need to be

---

[241] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 24. Two panels cited this finding and stated that "*Ad* Article III has equal stature under international law as the GATT language to which it refers, pursuant to Article XXXIV." Panel Report on *Korea – Alcoholic Beverages*, footnote. 346; and Panel Report on *Chile – Alcoholic Beverages*, footnote. 349.

[242] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 18–19.

[243] Appellate Body Report on *Canada – Periodicals*, pp. 22–23.

[244] (*footnote original*) We find further support for our view in the following statement made by the Appellate Body in its report on *EC – Bananas III*, *supra*, at para. 216:

"Article III:4 does *not* specifically refer to Article III:1. Therefore, a determination of whether there has been a

demonstrated by the complaining party are those contained in Article III:2, first sentence, itself.[245]"[246]

Burden of proof

155. In *Japan – Alcoholic Beverages II*, in a finding subsequently not addressed by the Appellate Body, the Panel stated that "complainants have the burden of proof to show first that products are like and second, that foreign products are taxed in excess of domestic ones."[247]

156. With respect to the issue of the burden of proof in general, see Section XXXVI.D of the Chapter on the *DSU*.

(ii) "like domestic products"

Relationship between "like products" and "directly competitive products" under Article III:2

157. In *Japan – Alcoholic Beverages II*, the Appellate Body analysed the scope of the first sentence of Article III:2 in relation to the second sentence of this Article. It held that the term "like products" in Article III:2, first sentence, should be construed narrowly. Subsequently, it considered the basic GATT approach for interpreting "like products" generally in the various provisions of the GATT 1947:

> "Because the second sentence of Article III:2 provides for a separate and distinctive consideration of the protective aspect of a measure in examining its application to a broader category of products that are not 'like products' as contemplated by the first sentence, we agree with the Panel that the first sentence of Article III:2 must be construed narrowly so as not to condemn measures that its strict terms are not meant to condemn. Consequently, we agree with the Panel also that the definition of 'like products' in Article III:2, first sentence, should be construed narrowly.
>
> How narrowly is a matter that should be determined separately for each tax measure in each case. We agree with the practice under the GATT 1947 of determining whether imported and domestic products are 'like' on a case-by-case basis. The Report of the Working Party on *Border Tax Adjustments*, adopted by the CONTRACTING PARTIES in 1970, set out the basic approach for interpreting 'like or similar products' generally in the various provisions of the GATT 1947:
>
> > '. . . the interpretation of the term should be examined on a case-by-case basis. This would allow a fair assessment in each case of the different elements that constitute a "similar" product. Some criteria were suggested for determining, on a case-by-case basis, whether a product is "similar": the product's end-uses in a given market; consumers' tastes and habits, which change from country to country; the product's properties, nature and quality'.[248]
>
> This approach was followed in almost all adopted panel reports after *Border Tax Adjustments*.[249] This approach should be helpful in identifying on a case-by-case basis the range of 'like products' that fall within the narrow limits of Article III:2, first sentence in the GATT 1994. Yet this approach will be most helpful if decision makers keep ever in mind how narrow the range of 'like products' in Article III:2, first sentence is meant to be as opposed to the range of 'like' products contemplated in some other provisions of the GATT 1994 and other Multilateral Trade Agreements of the *WTO Agreement*. In applying the criteria cited in *Border Tax Adjustments* to the facts of any particular case, and in considering other criteria that may also be relevant in certain cases, panels can only apply their best judgement in determining whether in fact products are 'like'. This will always involve an unavoidable element of individual, discretionary judgement. We do not agree with the Panel's observation in paragraph 6.22 of the Panel Report that distinguishing between 'like products' and 'directly competitive or substitutable products' under Article III:2 is 'an arbitrary decision'. Rather, we think it is a discretionary decision that must be made in considering the various characteristics of products in individual cases."[250]

158. The consequence of the determination whether two products are or are not like was stated by the Appellate Body in *Japan – Alcoholic Beverages II*:

> "If imported and domestic products are not 'like products' for the narrow purposes of Article III:2, first sentence, then they are not subject to the strictures of that sentence and there is no inconsistency with the requirements of that sentence. However, depending on their

violation of Article III:4 does *not* require a separate consideration of whether a measure 'afford[s] protection to domestic production'."

While this statement relates to Article III:4 of the GATT, which is not at issue in the present case, it nevertheless provides useful clarification for purposes of analysing Argentina's argument in respect of Article III:2, first sentence. It clearly emerges from this statement that not only is there no requirement separately to establish the presence of a protective application, but that there is not even a requirement separately to consider whether there is a protective application.

[245] (*footnote original*) We note Argentina's contention that the GATT 1947 panel reports on *Japan – Alcoholic Beverages I*; *US – Section 337*, and *US – Malt Beverages*, lend support to its view that the presence of a protective application must be established for purposes of a claim under Article III:2, first sentence. See paras. 8.228 *et seq.* of this report. Since all of the aforementioned reports pre-date the Appellate Body reports on *Japan – Alcoholic Beverages II* and *EC – Bananas III* and since those Appellate Body reports directly address the issue before us, we see no need to further consider the GATT 1947 reports in this regard.

[246] Panel Report on *Argentina – Hides and Leather*, para. 11.137.

[247] Panel Report on *Japan – Alcoholic Beverages II*, para. 6.14.

[248] (*footnote original*) Report of the Working Party on *Border Tax Adjustments*, BISD 18S/97, para. 18.

[250] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 19–21.

nature, and depending on the competitive conditions in the relevant market, those same products may well be among the broader category of 'directly competitive or substitutable products' that fall within the domain of Article III:2, second sentence."[251]

159. With respect to the nature of like products as a subset of the category of "directly competitive or substitutable products", see also paragraph 149 above.

Relationship with "like products" in Article III:4

160. In *EC – Asbestos*, the Appellate Body discussed the relationship between the term "like products" in Article III:4, and that in the first sentence of Article III:2. See paragraphs 237 and 239 below.

161. In *Japan – Alcoholic Beverages II*, the Panel discussed whether the term "like products" can be interpreted differently between GATT provisions, with a focus on the relationship between Article III:2, first sentence and Article III:4:

"The Panel noted that the term 'like product' appears in various GATT provisions. The Panel further noted that it did not necessarily follow that the term had to be interpreted in a uniform way. In this respect, the Panel noted the discrepancy between Article III:2, on the one hand, and Article III:4 on the other: while the former referred to Article III:1 and to like, as well as to directly competitive or substitutable products (see also Article XIX of GATT), the latter referred only to like products. If the coverage of Article III:2 is identical to that of Article III:4, a different interpretation of the term 'like product' would be called for in the two paragraphs. Otherwise, if the term 'like product' were to be interpreted in an identical way in both instances, the scope of the two paragraphs would be different. This is precisely why, in the Panel's view, its conclusions reached in this dispute are relevant only for the interpretation of the term 'like product' as it appears in Article III:2."[252]

Relationship with "like products" in other GATT provisions

162. In *Japan – Alcoholic Beverages II*, the Appellate Body explained the possible differences in the scope of "like products" depending on provisions. To illustrate that the term "like products" will vary between different provisions of the WTO Agreement, the Appellate Body evoked the image of an accordion:

"No one approach to exercising judgement will be appropriate for all cases. The criteria in *Border Tax Adjustments* should be examined, but there can be no one precise and absolute definition of what is 'like'. The concept of 'likeness' is a relative one that evokes the image of an accordion. The accordion of 'likeness' stretches and squeezes in different places as different provisions of the *WTO Agreement* are applied. The width of the accordion in any one of those places must be determined by the particular provision in which the term 'like' is encountered as well as by the context and the circumstances that prevail in any given case to which that provision may apply. We believe that, in Article III:2, first sentence of the GATT 1994, the accordion of 'likeness' is meant to be narrowly squeezed."[253]

Hypothetical "like products"

163. In *Canada – Periodicals*, the Panel found that the Canadian excise tax on magazines was inconsistent with Article III:2. Upon appeal, Canada argued that the Panel erred in basing its comparison upon a hypothetical example of periodicals. The Appellate Body endorsed the Panel's recourse to a hypothetical example of imported products:

"As Article III:2, first sentence, normally requires a comparison between imported products and like domestic products, and as there were no imports of split-run editions of periodicals because of the import prohibition in Tariff Code 9958, which the Panel found (and Canada did not contest on appeal) to be inconsistent with the provisions of Article XI of the GATT 1994, hypothetical imports of split-run periodicals have to be considered. As the Panel recognized, the proper test is that a determination of 'like products' for the purposes of Article III:2, first sentence, must be construed narrowly, on a case-by-case basis, by examining relevant factors including:

(i) the product's end-uses in a given market;

(ii) consumers' tastes and habits; and

(iii) the product's properties, nature and quality.[254]"[255]

164. In *Indonesia – Autos*, the Panel examined the consistency with Article III of measures contained in the Indonesian National Car Programme, including the luxury tax exemption given to certain domestically produced cars. On the issue of hypothetical "like products", the Panel referred to the finding of the Appellate Body in *Canada – Periodicals*, referenced in paragraph 163 above, and emphasized the significance of the fact that the Indonesian car programme distinguished between the products at issue on the grounds of nationality of the producer or the origin of the parts and components of the product:

"In *Periodicals*, the Appellate Body recognized the possibility of using hypothetical imports to determine whether a measure violates Article III:2, although in that case the Appellate Body rejected the hypothetical exam-

[251] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 25.
[252] Panel Report on *Japan – Alcoholic Beverages II*, para. 6.20.
[253] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 21.
[254] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 20.
[255] Appellate Body Report on *Canada – Periodicals*, pp. 20–21.

ple used by the Panel.[256] But this case is different. Under the Indonesian car programmes the distinction between the products for tax purposes is based on such factors as the nationality of the producer or the origin of the parts and components contained in the product. Appropriate hypotheticals are therefore easily constructed. An imported motor vehicle alike in all aspects relevant to a likeness determination would be taxed at higher rate simply because of its origin or lack of sufficient local content. Such vehicles certainly can exist (and, as demonstrated above, do in fact exist). In our view, such an origin-based distinction in respect of internal taxes suffices in itself to violate Article III:2, without the need to demonstrate the existence of actually traded like products. This is directly in accord with the broad purposes of Article III:2, as outlined by the Appellate Body . . .".[257]

165. In *Argentina – Hides and Leather*, referring to the finding of the Panel on *Indonesia – Autos* referenced in paragraph 164 above. The Panel reiterated this standard of varying "quantum and nature of the evidence" required for a finding under Article III:2, first sentence, depending on the "structure and design" of the measure at issue:

> "In the case before us, the European Communities has neither compared specific products nor addressed the criteria relevant to determining likeness. The European Communities considers that it is not incumbent upon it to do so. We agree. In circumstances such as those confronting us in this case no comparison of specific products is required. Logically, no examination of the various criteria relevant to determining likeness is then called for either.
>
> We consider that in the specific context of a claim under Article III:2, first sentence, the quantum and nature of the evidence required for a complaining party to discharge its burden of establishing a violation is dependent, above all, on the structure and design of the measure in issue.[258] The structure and design of RG 3431 and RG 3543 and their domestic counterparts RG 3337 and RG 2784 are such that the level of tax pre-payment is not determined by the physical characteristics or end-uses of the products subject to these resolutions, but instead is determined by factors which are not relevant to the definition of likeness, such as whether a particular product is definitively imported into Argentina or sold domestically as well as the characteristics of the seller or purchaser of the product.[259] It is therefore inevitable, in our view, that like products will be subject to RG 3431 and its domestic counterpart, RG 3337. The same holds true for RG 3543 and its domestic counterpart, RG 2784.[260] The European Communities has demonstrated this to our satisfaction, and, in our view, this is all it needs to establish in the present case as far as the 'like product' requirement contained in Article III:2, first sentence, is concerned.
>
> This view is consistent with that adopted by the panel in *Indonesia – Autos*. That panel was of the view that:
>
> '. . . an origin-based distinction in respect of internal taxes suffices in itself to violate Article III:2, without the need to demonstrate the existence of actually traded like products.'[261]"[262]

Relevant factors for the determination of "likeness"

General

166. In *Japan – Alcoholic Beverages II*, the Appellate Body was called upon to examine the Panel's finding of inconsistency of the Japanese Liquor Tax Law with Article III:2. The Appellate Body analysed what factors to take into consideration in deciding whether two products in question were "like products":

> "We agree with the practice under the GATT 1947 of determining whether imported and domestic products are 'like' on a case-by-case basis. The Report of the Working Party on *Border Tax Adjustments,* adopted by the CONTRACTING PARTIES in 1970, set out the basic approach for interpreting 'like or similar products' generally in the various provisions of the GATT 1947:
>
> > . . . the interpretation of the term should be examined on a case-by-case basis. This would allow a fair assessment in each case of the different elements that constitute a 'similar' product. Some criteria were suggested for determining, on a case-by-case basis, whether a product is 'similar': the product's end-uses in a given market; consumers' tastes and habits, which change from country to country; the product's properties, nature and quality.[263]

---

[256] (*footnote original*) Appellate Body Report on *Canada – Periodicals*, pp. 20–21.

[257] Panel Report on *Indonesia – Autos*, para. 14.113.

[258] (*footnote original*) As the Appellate Body has stated in *US – Wool Shirts and Blouses*, p. 14:

> "In the context of the GATT 1994 and the *WTO Agreement*, precisely how much and precisely what kind of evidence will be required to establish such a presumption will necessarily vary from measure to measure, provision to provision, and case to case."

[259] (*footnote original*) In our view, the mere fact that a product is of non-Argentinean origin or that it is being definitively imported into Argentina does not, *per se*, distinguish it – in terms of its physical characteristics and end-uses – from a product of Argentinean origin or a product which is being sold inside Argentina. Nor does likeness turn on whether the sellers or purchasers of the products under comparison qualify as registered or non-registered taxable persons or as *agentes de percepción* under Argentinean tax law.

[260] (*footnote original*) This view is unaffected by the fact that, according to the Appellate Body, the term "like products", as it appears in Article III:2, first sentence, is to be construed narrowly and on a case-by-case basis. See the Appellate Body Report on *Japan – Alcoholic Beverages*, pp. 19–20.

[261] (*footnote original*) Panel Report on *Indonesia – Autos*, para. 14.113. See also the Panel Reports on *Korea – Various Measures on Beef*, para. 627 (with respect to Article III:4 of the GATT 1994) and *US – Certain EC Products*, para. 6.54 (with respect to Article I:1 of the GATT 1994).

[262] Panel Report on *Argentina – Hides and Leather*, paras. 11.168–11.170.

[263] The Appellate Body cited Report of the Working Party on *Border Tax Adjustments*, BISD 18S/97, para. 18.

This approach was followed in almost all adopted panel reports after *Border Tax Adjustments*. This approach should be helpful in identifying on a case-by-case basis the range of 'like products' that fall within the narrow limits of Article III:2, first sentence in the GATT 1994."[264]

167. In *Canada – Periodicals*, the Appellate Body reiterated the aforementioned finding in *Japan – Alcoholic Beverages II*:

"[T]he proper test is that a determination of 'like products' for the purposes of Article III:2, first sentence, must be construed narrowly, on a case-by-case basis, by examining relevant factors including:

(i) the product's end-uses in a given market;

(ii) consumers' tastes and habits; and

(iii) the product's properties, nature and quality."[265]

168. With respect to the criteria of likeness, see also the Panel Report on *Argentina – Hides and Leather*, where the Panel referred to the Appellate Body's finding in *Canada – Periodicals* referenced in paragraph 167 above.[266]

Relevance of tariff classifications and bindings

169. In *Japan – Alcoholic Beverages II*, the Appellate Body addressed the relevance of tariff classification for establishing the "likeness" of products:

"A uniform tariff classification of products can be relevant in determining what are 'like products'. If sufficiently detailed, tariff classification can be a helpful sign of product similarity. Tariff classification has been used as a criterion for determining 'like products' in several previous adopted panel reports.[267] For example, in the *1987 Japan – Alcohol* Panel Report, the panel examined certain wines and alcoholic beverages on a 'product-by-product basis' by applying the criteria listed in the Working Party Report on *Border Tax Adjustments*,

> . . . as well as others recognized in previous GATT practice (see BISD 25S/49, 63), such as the Customs Cooperation Council Nomenclature (CCCN) for the classification of goods in customs tariffs which has been accepted by Japan.[268]"[269]

170. In *Japan – Alcoholic Beverages II*, in addition to tariff *classification*, the Appellate Body also examined the relevance of tariff *bindings* for the determination of "like products". In contrast to tariff classification, the Appellate Body expressed reservations about the reliability of tariff bindings as a criterion in establishing "likeness":

"Uniform classification in tariff nomenclatures based on the Harmonized System (the 'HS') was recognized in GATT 1947 practice as providing a useful basis for confirming 'likeness' in products. However, there is a major difference between tariff classification nomenclature and tariff bindings or concessions made by Members of the WTO under Article II of the GATT 1994. There are risks in using tariff bindings that are too broad as a measure of product 'likeness'. Many of the least-developed country Members of the WTO submitted schedules of concessions and commitments as annexes to the GATT 1994 for the first time as required by Article XI of the *WTO Agreement*. Many of these least-developed countries, as well as other developing countries, have bindings in their schedules which include broad ranges of products that cut across several different HS tariff headings. For example, many of these countries have very broad uniform bindings on non-agricultural products. This does not necessarily indicate similarity of the products covered by a binding. Rather, it represents the results of trade concessions negotiated among Members of the WTO.

It is true that there are numerous tariff bindings which are in fact extremely precise with regard to product description and which, therefore, can provide significant guidance as to the identification of 'like products'. Clearly enough, these determinations need to be made on a case-by-case basis. However, tariff bindings that include a wide range of products are not a reliable criterion for determining or confirming product 'likeness' under Article III:2."[270]

171. With respect to the purpose of Article III as it relates to tariff bindings, see paragraph 120 above.

Reference to GATT practice

172. With respect to the interpretation of the "like products" under Article III:2, see also GATT Analytical Index, pages 155–159.

(iii) "internal tax or other internal charge of any kind"

173. In *Argentina – Hides and Leather*, the Panel examined whether the measures at issue, establishing a mechanism for the collection of certain taxes, were covered by Article III:2. The Panel found that the measures provide for the imposition of charges and create a liability and, as such, fall under the scope of Article III:2:

"We consider that RG 3431 and RG 3543 are properly viewed not as taxes in their own right, but as mecha-

---

[270] Appellate Body Report on *Japan – Alcoholic Beverages II*, p.22.

nisms for the collection of the IVA [value-added tax] and IG [income tax]. What is special, however, about RG 3431 and RG 3543 as mechanisms for the collection of the IVA and IG is that they provide for the imposition of charges. We recall that Article III:2 covers 'charges *of any kind*' (emphasis added). The term 'charge' denotes, *inter alia*, a 'pecuniary burden' and a 'liability to pay money laid on a person . . .'. There can be no doubt, in our view, that both RG 3431 and RG 3543 impose a pecuniary burden and create a liability to pay money. Moreover, the charges provided for in RG 3431 and RG 3543 represent advance payments of the IVA and IG. RG 3431 and RG 3543 in effect impose on importers part of their definitive IVA and IG liability. It is clear to us, therefore, that the charges in question qualify as tax measures. As such, they fall to be assessed under Article III:2.

With regard to Argentina's argument that RG 3431 and RG 3543 are measures designed to achieve efficient tax administration and collection and as such do not fall under Article III:2, it should be noted that Argentina has provided no support for this argument, except to say that it is up to Members to decide how best to achieve efficient tax administration. We agree that Members are free, within the outer bounds defined by such provisions as Article III:2, to administer and collect internal taxes as they see fit. However, if, as here, such 'tax administration' measures take the form of an internal charge and are applied to products, those measures must, in our view, be in conformity with Article III:2. There is nothing in the provisions of Article III:2 to suggest a different conclusion. If it were accepted that 'tax administration' measures are categorically excluded from the ambit of Article III:2, this would create a potential for abuse and circumvention of the obligations contained in Article III:2. It must be stated, moreover, that the applicability of Article III:2 is not conditional upon the policy purpose of a tax measure.[271] On that basis, we cannot agree with Argentina that charges intended to promote efficient tax administration or collection *a priori* fall outside the scope of Article III:2."[272]

Reference to GATT practice

174. With respect to practice on this subject-matter under GATT, see GATT Analytical Index, pages 141–150.

(iv) "in excess of those applied"

General

175. In *Japan – Alcoholic Beverages II*, the Appellate Body established a strict standard for the term "in excess of" under Article III:2, first sentence:

"The only remaining issue under Article III:2, first sentence, is whether the taxes on imported products are 'in excess of' those on like domestic products. If so, then the Member that has imposed the tax is not in compliance with Article III. Even the smallest amount of 'excess' is too much. 'The prohibition of discriminatory taxes in Article III:2, first sentence, is not conditional on a "trade effects test" nor is it qualified by a *de minimis* standard.'"[273]

Methodology of comparison – "individual import transactions" basis

176. In *Argentina – Hides and Leather*, the Panel explained the method of comparison, for the purposes of Article III:1, first sentence, of the tax burdens imposed on imports and on domestic like products. In the case before it, the Panel emphasized that Article III:2, first sentence, requires a comparison of *actual* tax burdens rather than merely of *nominal* tax burdens:

"[I]t is necessary to recall the purpose of Article III:2, first sentence, which is to ensure 'equality of competitive conditions between imported and like domestic products'[274]. Accordingly, Article III:2, first sentence, is not concerned with taxes or charges as such or the policy purposes Members pursue with them, but with their economic impact on the competitive opportunities of imported and like domestic products. It follows, in our view, that what must be compared are the tax burdens imposed on the taxed products.

We consider that Article III:2, first sentence, requires a comparison of actual tax burdens rather than merely of nominal tax burdens. Were it otherwise, Members could easily evade its disciplines. Thus, even where imported and like domestic products are subject to identical tax rates, the actual tax burden can still be heavier on imported products. This could be the case, for instance, where different methods of computing tax bases lead to a greater actual tax burden for imported products. In this regard, the GATT 1947 panel in *Japan – Alcoholic Beverages I* has stated that:

> . . . in assessing whether there is tax discrimination, account is to be taken not only of the rate of the applicable internal tax but also of the taxation methods (e.g. different kinds of internal taxes, direct taxation of the finished product or indirect taxation by taxing the raw materials used in the product during the various stages of its production) and of the rules for the tax collection (e.g. basis of assessment).[275]

It may thus be stated, in more general terms, that a determination of whether an infringement of Article

[271] (*footnote original*) See the Panel Reports on *US – Superfund*, para. 5.2.4, *EEC – Parts and Components*, para. 5.6.

[272] Panel Report on *Argentina – Hides and Leather*, paras. 11.143–11.144.

[273] Appellate Body Report on *Japan – Alcoholic Beverages II*, p.23. This finding was followed by the Panel on *Argentina – Hides and Leather*. Panel Report on *Argentina – Hides and Leather*, para. 11.243.

[274] (*footnote original*) Appellate Body Report on *Canada – Periodicals*, p. 18.

[275] (*footnote original*) Panel Report on *Japan – Alcoholic Beverages I*, para. 5.8.

III:2, first sentence, exists must be made on the basis of an overall assessment of the actual tax burdens imposed on imported products, on the one hand, and like domestic products, on the other hand."[276]

177. In *Argentina – Hides and Leather*, the measure at issue was, *inter alia*, an income tax provision under which customs authorities collected a certain amount of tax when foreign goods were definitively *imported* into Argentina. The normal applicable tax rate was 3 per cent. The corresponding provision for *internal* sales provided for a withholding rate of 2 or 4 per cent, depending on whether the payment, on which the tax was being withheld, was made to a registered or non-registered taxpayer. Argentina argued that the measure applicable to imported goods was consistent with Article III:2, first sentence because, "the 3 percent rate applicable to imports is lower than the 4 percent rate applicable to like domestic products". The Panel explained:

"Article III:2, first sentence, is applicable to each individual import transaction. It does not permit Members to balance more favourable tax treatment of imported products in some instances against less favourable tax treatment of imported products in other instances.[277]"[278]

178. In *Canada – Periodicals*, the Appellate Body also addressed the issue of "balancing more favourable treatment in some instances against less favourable treatment in other instances" under Article III:2, second sentence. See paragraph 217 below.

179. With respect to the methodology of comparison used to examine the requirement of "no less favourable treatment" under Article III:4, see paragraphs 270–275 below.[279]

Relevance of duration of tax differentials

180. In *Argentina – Hides and Leather*, the measure at issue provided for the pre-payment of taxes on import sales, while exempting certain types of internal sales from such pre-payment; thus, although a tax liability would arise for every sale, certain internal sales were not subject to the tax *pre-payment* requirement. The Panel held that the loss of interest on the part of the taxpayer due to the pre-payment requirement constituted a tax differential (even if the same nominal tax rates were imposed). The Panel then rejected Argentina's justification that the tax burden differential was limited to a 30–day period and therefore was *de minimis*:

"The terms of Article III:2, first sentence, prohibit tax burden differentials irrespective of whether they are of limited duration. Moreover, since we have found above that even the smallest tax burden differential is in violation of Article III:2, first sentence, it would be inconsistent for us to allow tax burden differentials on the basis that their impact is limited to a 30–day period."[280]

Relevance of differences among sellers of goods

181. In *Argentina – Hides and Leather*, the Panel addressed Argentina's tax collection mechanism which required the pre-payment of taxes only with respect to internal sales made by certain taxable persons, so-called *agentes de percepción*, whilst in respect of import transactions, a pre-payment obligation would arise without regard to who made them. See also paragraph 180 above. Finding this mechanism inconsistent with Article III:2, first sentence, the Panel stated:

"As a further consideration, we add that, in the context of an inquiry under Article III:2, first sentence, the mere fact that a domestic product is sold by a non-*agente de percepción* does not, in our view, render a product which is otherwise like an imported product 'unlike' that product.[281]

. . .

The identity and circumstances of the persons involved in sales transactions cannot, in our view, serve as a justification for tax burden differentials.[282]"[283]

Relevance of distinction based upon nationality of producers or parts and components

182. In *Indonesia – Autos*, the Panel found that tax differences are necessarily inconsistent with Article III:2, first sentence, if they are based only upon the nationality of producers or the origin of the parts and components contained in the products:

---

[276] Panel Report on *Argentina – Hides and Leather*, paras. 11.182–11.184.

[277] (*footnote original*) See Panel Report on *US – Tobacco*, para. 98. For reports with respect to Article III:4 of the GATT 1994, see the Panel Reports on *US – Section 337*, para. 5.14; *US – Gasoline*, para. 6.14.

[278] Panel Report on *Argentina – Hides and Leather*, para. 11.260.

[279] Further, with respect to the methodology of comparison in identifying "directly competitive and substitutable products" under the second sentence of Article III:2, see paras. 194–210 of this Chapter.

[280] Panel Report on *Argentina – Hides and Leather*, para. 11.245.

[281] (*footnote original*) See also the Panel Reports on *US – Gasoline*, *supra*, para. 6.11; *United States – Alcoholic Beverages*, para. 5.19. These panels held that differential regulatory or tax treatment of imported and like domestic products cannot be maintained, consistently with Article III, on the basis that the characteristics and circumstances of the producers of those products are different. The same logic must apply, in our view, to cases where tax distinctions between like imported and domestic products are based on the characteristics and circumstances of the sellers or purchasers of those products.

[282] (*footnote original*) See the Panel Reports on *US – Gasoline*, para. 6.11; *United States – Alcoholic Beverages*, para. 5.19. See also footnote 499 of this report. The disciplines of Article III:2, first sentence, are of course subject to whatever exceptions a Member may justifiably invoke.

[283] Panel Report on *Argentina – Hides and Leather*, paras. 11.210 and 11.220.

"[B]ecause of the structure of the tax regime under examination, any imported like products would necessarily be taxed in excess of domestic like products. In considering the broader arguments put forward by the complainants that the tax measures in dispute violate Article III:2 because they discriminate not on the basis of factors affecting the properties, nature, qualities or end use of the products, but on origin-related criteria, we recall that the Appellate Body decisions in *Alcoholic Beverages (1996)* and *Periodicals* suggest that the term 'like products' as used in Article III:2 should be interpreted narrowly.[284] We note, however, that in this case the 'like products' issue is not the same as the 'like products' issue in the *Alcoholic Beverages (1996)* case. There, the internal tax imposed on domestic shochu was the same as that imposed on imported shochu; the higher tax imposed on imported vodka was also imposed on domestic vodka. Identical products (not considering brand differences) were taxed identically. The issue was whether the differences between the two products shochu and vodka, as defined for tax purposes, were so minor that shochu and vodka should be considered to be like products and therefore subject to the requirement of Article III:2, first sentence, that one should not be taxed in excess of the other. Here, the situation is quite different. The distinction between the products, which results in different levels of taxation, is not based on the products *per se*, but rather on such factors as the nationality of the producer or the origin of the parts and components contained in the product. As such, an imported product identical in all respects to a domestic product, except for its origin or the origin of its parts and components or other factors not related to the product itself, would be subject to a different level of taxation."[285]

Reference to GATT practice

183. With respect to the interpretation of "in excess of those applied" under Article III:2, see also GATT Analytical Index, pages 150–155.

Relevance of regulatory objectives

184. In *Japan – Alcoholic Beverages II*, the Appellate Body made a general statement on the relevance of regulatory objectives of a measure at issue, finding that Members may pursue, through their tax measures, any given policy objective, provided they do so in compliance with Article III:2. See paragraph 128 above.

185. In *Argentina – Hides and Leather*, the Panel rejected Argentina's argument that the measures in question were designed to achieve efficient tax administration and collection and as such did not fall under Article III:2. The Panel stated:

"We agree that Members are free, within the outer bounds defined by such provisions as Article III:2, to administer and collect internal taxes as they see fit. However, if, as here, such 'tax administration' measures take the form of an internal charge and are applied to products, those measures must, in our view, be in conformity with Article III:2. There is nothing in the provisions of Article III:2 to suggest a different conclusion. If it were accepted that 'tax administration' measures are categorically excluded from the ambit of Article III:2, this would create a potential for abuse and circumvention of the obligations contained in Article III:2."[286]

186. With respect to the relevance of regulatory objectives in relation to the "aims-and-effect" test, see paragraphs 128–132 above.

(v) Applied, "directly or indirectly", to like domestic products

187. In *Canada – Periodicals*, the Appellate Body reviewed the Panel's finding that the Canadian excise tax on magazines was inconsistent with Article III:2. The Panel had found that the relevant tax provision was a measure affecting the trade in goods, as it applied to so-called split-run editions of periodicals which were distinguished from foreign non-split-run editions by virtue of their advertising content directed at the Canadian market. Canada argued that its measure regulated trade in services (advertising) "in their own right", therefore did not "indirectly" affect imported products and, as a result, was subject to GATS and *not* to GATT 1994. The Appellate Body rejected Canada's argument:

"An examination of Part V.1 of the Excise Tax Act demonstrates that it is an excise tax which is applied on a good, a split-run edition of a periodical, on a 'per issue' basis. By its very structure and design, it is a tax on a periodical. It is the publisher, or in the absence of a publisher resident in Canada, the distributor, the printer or the wholesaler, who is liable to pay the tax, not the advertiser.

Based on the above analysis of the measure, which is essentially an excise tax imposed on split-run editions of periodicals, we cannot agree with Canada's argument that this internal tax does not 'indirectly' affect imported products."[287]

188. In *Argentina – Hides and Leather*, Argentina argued that, since an income tax is not a tax on products, its measure establishing the collection regime for such a tax ("RG 3543") could not be subject to the provisions of Article III:2. Citing the finding of the Appellate Body in *Canada – Periodicals* as support[288], the Panel rejected this argument:

---

[284] The footnote to this sentence refers to Appellate Body Report on *Alcoholic Beverages*, pp. 19–20; Appellate Body Report on *Canada – Periodicals*, p. 22.
[285] Panel Report on *Indonesia – Autos*, para. 14.112.
[286] Panel Report on *Argentina – Hides and Leather*, para. 11.144.
[287] Appellate Body Report on *Canada – Periodicals*, p. 18.
[288] Panel Report on *Argentina – Hides and Leather*, para. 11.160, which refers to the Appellate Body Report on *Canada – Periodicals*, p. 20.

"We . . . agree that income taxes, because they are taxes not normally directly levied on products, are generally considered not to be subject to Article III:2.[289] It is not obvious to us, however, how the fact that the IG is an income tax outside the scope of Article III:2 logically leads to the conclusion that RG 3543 does not fall within the ambit of Article III:2, even though RG 3543 is a tax measure applied to products. Not only do we see nothing in the provisions of Article III:2 which would preclude the applicability of these provisions to RG 3543 merely because of the latter's linkage to the IG. Were we to accept Argentina's argument, it would also not be difficult for Members to introduce measures designed to circumvent the disciplines of Article III:2."[290]

Reference to GATT practice

189. With respect to the practice on this subject-matter, see GATT Analytical Index, page 141.

(c) Paragraph 2, second sentence

(i) General

Legal status of *Ad* Article III:2

190. In *Japan – Alcoholic Beverages II*, the Appellate Body discussed the legal status of Note *Ad Article III:2* in the interpretation of Article III:2 and held that the Note must always be read together with Article III. See paragraph 151 above.

Test under Article III:2, second sentence

191. In *Japan – Alcoholic Beverages II*, the Appellate Body explained the test to be used under Article III:2, second sentence, and distinguished this test from the test applicable under the first sentence. This distinction, in the view of the Appellate Body, is a result of the explicit reference to Article III:1 in the second sentence of Article III:2:

"Unlike that of Article III:2, first sentence, the language of Article III:2, second sentence, specifically invokes Article III:1. The significance of this distinction lies in the fact that whereas Article III:1 acts implicitly in addressing the two issues that must be considered in applying the first sentence, it acts explicitly as an entirely separate issue that must be addressed along with two other issues that are raised in applying the second sentence. Giving full meaning to the text and to its context, three separate issues must be addressed to determine whether an internal tax measure is inconsistent with Article III:2, second sentence. These three issues are whether:

(1) the imported products and the domestic products are *'directly competitive or substitutable products'* which are in competition with each other;

(2) the directly competitive or substitutable imported and domestic products are *'not similarly taxed'*; and

(3) the dissimilar taxation of the directly competitive or substitutable imported domestic products *is 'applied . . . so as to afford protection to domestic production'*.

Again, these are three separate issues. Each must be established separately by the complainant for a panel to find that a tax measure imposed by a Member of the WTO is inconsistent with Article III:2, second sentence."[291]

Burden of proof

192. In *Japan – Alcoholic Beverages II*, the Panel, in a finding not expressly addressed by the Appellate Body, allocated the burden of proof under Article III:2, second sentence, to the complaining party:

"[T]he complainants have the burden of proof to show first, that the products concerned are directly competitive or substitutable and second, that foreign products are taxed in such a way so as to afford protection to domestic production".[292]

193. In *Korea – Alcoholic Beverages*, the Panel followed the approach to the allocation of burden of proof according to the standard set out by the Panel on *Japan – Alcoholic Beverages II*, referred to in paragraph 192 above. The Appellate Body rejected Korea's appeal against this allocation of the burden of proof:

"[T]he Panel properly understood and applied the rules on allocation of the burden of proof. First, the Panel insisted that it could make findings under Article III:2, second sentence, only with respect to products for which a *prima facie* case had been made out on the basis of evidence presented. Second, it declined to establish a presumption concerning all alcoholic beverages within HS 2208. Such a presumption would be inconsistent with the rules on the burden of proof because it would prematurely shift the burden of proof to the defending party. The Panel, therefore, did not consider alleged violations of Article III:2, second sentence, concerning products for which evidence was not presented. Thus, the Panel examined tequila because evidence was presented for it, but did not examine mescal and certain other alcoholic beverages included in HS 2208 for which no evidence was presented. Third, contrary to Korea's assertions, the Panel did consider the evidence presented by Korea in rebuttal, but concluded that there was 'sufficient *unrebutted* evidence'

[289] (*footnote original*) See the Working Party Report on Border Tax Adjustments, adopted on 2 December 1970, BISD 18S/97, at para. 14.
[290] Panel Report on *Argentina – Hides and Leather*, para. 11.159.
[291] Appellate Body Report on *Japan – Alcoholic Beverages II*, p.24. This part has been later cited and endorsed by the Appellate Body, in Appellate Body Report on *Canada – Periodicals*, pp. 24–25, and in Appellate Body Report on *Chile – Alcoholic Beverages*, para. 47.
[292] Panel Report on *Japan – Alcoholic Beverages II*, para. 6.28.

for it to make findings of inconsistency."[293] (emphasis added)

(ii) "directly competitive or substitutable products"

Relevance of market competition/cross-price elasticity

General

194. In interpreting the term "directly competitive or substitutable" products, the Appellate Body in *Japan – Alcoholic Beverages II* found that it was "not inappropriate" to consider the competitive conditions in the relevant market, as manifested in the cross-price elasticity in particular:

> "The GATT 1994 is a commercial agreement, and the WTO is concerned, after all, with markets. It does not seem inappropriate to look at competition in the relevant markets as one among a number of means of identifying the broader category of products that might be described as 'directly competitive or substitutable'.
>
> Nor does it seem inappropriate to examine elasticity of substitution as one means of examining those relevant markets. The Panel did not say that cross-price elasticity of demand is '*the* decisive criterion' for determining whether products are 'directly competitive or substitutable'."[294]

195. The Appellate Body developed this finding – contained in *Japan – Alcoholic Beverages II* – in the *Korea – Alcoholic Beverages dispute:*

> "We observe that studies of cross-price elasticity, which in our Report in *Japan – Alcoholic Beverages* were regarded as one means of examining a market,[295] involve an assessment of latent demand. Such studies attempt to predict the change in demand that would result from a change in the price of a product following, *inter alia*, from a change in the relative tax burdens on domestic and imported products."[296]

196. In its approach to cross-price elasticity between domestic and imported products, the Panel on *Korea – Alcoholic Beverages* emphasized the "quality" or "nature" of competition, rather than the "quantitative overlap of competition". Upon appeal, Korea argued that through its reliance on the "nature of competition" the Panel had created a "vague and subjective element" not found in Article III:2, second sentence. The Appellate Body, however, shared the Panel's scepticism towards reliance upon the "quantitative overlap of competition":

> "In taking issue with the use of the term 'nature of competition', Korea, in effect, objects to the Panel's sceptical attitude to quantification of the competitive relationship between imported and domestic products. For the reasons set above, we share the Panel's reluctance to rely unduly on quantitative analyses of the competitive relationship.[297] In our view, an approach that focused solely on the quantitative overlap of competition would, in essence, make cross-price elasticity *the* decisive criterion in determining whether products are 'directly competitive or substitutable'."[298]

Relevance of the market situation in other countries

197. In *Korea – Alcoholic Beverages*, the Appellate Body addressed whether the market situation in *other* Members should be taken into consideration in evaluating whether subject products are directly competitive or substitutable products. The Appellate Body held that although not every other market would be relevant, evidence from other markets may nevertheless be pertinent to the analysis of the market at issue:

> "It is, of course, true that the 'directly competitive or substitutable' relationship must be present in the market at issue[299], in this case, the Korean market. It is also true that consumer responsiveness to products may vary from country to country.[300] This does not, however, preclude consideration of consumer behaviour in a country other than the one at issue. It seems to us that evidence from other markets may be pertinent to the examination of the market at issue, particularly when demand on that market has been influenced by regulatory barriers to trade or to competition. Clearly, not every other market will be relevant to the market at issue. But if another market displays characteristics similar to the market at issue, then evidence of consumer demand in that other market may have some relevance to the market at issue. This, however, can only be determined on a case-by-case basis, taking account of all relevant facts."[301]

"directly competitive or substitutable"

198. In *Korea – Alcoholic Beverages*, the Appellate Body considered the "object and purpose" of Article III in its interpretation of the term "directly competitive or substitutable":

> "[T]he object and purpose of Article III is the maintenance of equality of competitive conditions for imported and domestic products. It is, therefore, not only legitimate, but even necessary, to take account of this

[301] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 137.

purpose in interpreting the term 'directly competitive or substitutable product'."[302]

Latent, extant and potential demand

199. In *Korea – Alcoholic Beverages*, the Appellate Body considered that competition in the market place is a dynamic, evolving process and thus the concept of "directly competitive or substitutable" implies that "the competitive relationship between products is *not* to be analyzed *exclusively* by reference to *current* consumer preferences". Following this line of argumentation, the Appellate Body concluded that the term "directly competitive or substitutable" may include the analysis of *latent* as well as *extant* demand:

> "The term 'directly competitive or substitutable' describes a particular type of relationship between two products, one imported and the other domestic. It is evident from the wording of the term that the essence of that relationship is that the products are in competition. This much is clear both from the word 'competitive' which means 'characterized by competition', and from the word 'substitutable' which means 'able to be substituted'. The context of the competitive relationship is necessarily the marketplace since this is the forum where consumers choose between different products. Competition in the market place is a dynamic, evolving process. Accordingly, the wording of the term 'directly competitive or substitutable' implies that the competitive relationship between products is *not* to be analyzed *exclusively* by reference to *current* consumer preferences. In our view, the word 'substitutable' indicates that the requisite relationship *may* exist between products that are not, at a given moment, considered by consumers to be substitutes but which are, nonetheless, *capable* of being substituted for one another.
>
> Thus, according to the ordinary meaning of the term, products are competitive or substitutable when they are interchangeable[303] or if they offer, as the Panel noted, 'alternative ways of satisfying a particular need or taste'. Particularly in a market where there are regulatory barriers to trade or to competition, there may well be latent demand."[304] The words 'competitive or substitutable' are qualified in the *Ad* Article by the term 'directly'. In the context of Article III:2, second sentence, the word 'directly' suggests a degree of proximity in the competitive relationship between the domestic and the imported products. The word 'directly' does not, however, prevent a panel from considering both latent and extant demand."[305]

200. In support of its proposition that the term "directly competitive or substitutable" required a dynamic interpretation of both latent and extant demand, the Appellate Body in *Korea – Alcoholic Beverages* rejected an attempt by one of the parties to read a prohibition of considering "potential competition" into the text of Note *Ad* Article III:

> "Our reading of the ordinary meaning of the term 'directly competitive or substitutable' is supported by its context as well as its object and purpose. As part of the context, we note that the *Ad* Article provides that the second sentence of Article III:2 is applicable 'only in cases where competition *was* involved'. (emphasis added) According to Korea, the use of the past indicative 'was' prevents a panel taking account of 'potential' competition. However, in our view, the use of the word 'was' does not have any necessary significance in defining the temporal scope of the analysis to be carried out. The *Ad* Article describes the circumstances in which a hypothetical tax '*would* be considered to be inconsistent with the provisions of the second sentence'. (emphasis added) The first part of the clause is cast in the conditional mood ('would') and the use of the past indicative simply follows from the use of the word 'would'. It does not place any limitations on the temporal dimension of the word 'competition'."[306]

201. The Appellate Body subsequently referred to the context of Article III:2 to support its dynamic approach to the notion of "directly competitive or substitutable":

> "The context of Article III:2, second sentence, also includes Article III:1 of the GATT 1994. As we stated in our Report in *Japan – Alcoholic Beverages*, Article III:1 informs Article III:2 through specific reference.[307] Article III:1 sets forth the principle 'that internal taxes . . . should not be applied to imported or domestic products so as to afford protection to domestic production.' It is in the light of this principle, which embodies the object and purpose of the whole of Article III, that the term 'directly competitive and substitutable' must be read. As we said in *Japan – Alcoholic Beverages*:
>
> > 'The broad and fundamental purpose of Article III is to *avoid protectionism* in the application of internal tax and regulatory measures. . . . Toward this end, Article III obliges Members of the WTO to *provide equality of competitive conditions* for imported products in relation to domestic products. . . . Moreover, it is irrelevant that the "trade effects" of the tax differential between imported and domestic products, as reflected in the volumes of imports, are insignificant or even non-existent; Article III *protects expectations* not of any particular trade volume but rather of the *equal competitive relationship* between imported and domestic products.' (emphasis added)."[308]

[306] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 117.
[307] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, footnote 20.
[308] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 119.

202. The Panel on *Japan – Alcoholic Beverages II* held that "a tax system that discriminates against imports has the consequence of creating and even freezing preferences for domestic goods. In the Panel's view, this meant that consumer surveys in a country with such a tax system would likely understate the degree of potential competitiveness between substitutable products."[309] The Appellate Body on *Korea – Alcoholic Beverages* confirmed this approach and emphasized the importance of an analysis of "latent" or "potential" demand by pointing out that current consumer behaviour itself could be influenced by protectionist taxation. It concluded that if only "current instances of substitution" could be taken into account, Article III:2 would, in effect, be confirming the very protective taxation it aims to prohibit:

> "In view of the objectives of avoiding protectionism, requiring equality of competitive conditions and protecting expectations of equal competitive relationships, we decline to take a static view of the term 'directly competitive or substitutable'. The object and purpose of Article III confirms that the scope of the term 'directly competitive or substitutable' cannot be limited to situations where consumers *already* regard products as alternatives. If reliance could be placed only on current instances of substitution, the object and purpose of Article III:2 could be defeated by the protective taxation that the provision aims to prohibit. Past panels have, in fact, acknowledged that consumer behaviour might be influenced, in particular, by protectionist internal taxation. Citing the panel in *Japan – Customs Duties, Taxes and Labelling Practices on Imported Wines and Alcoholic Beverages* . . .[310], the panel in *Japan – Alcoholic Beverages* observed that 'a tax system that discriminates against imports has the consequence of creating and even freezing preferences for domestic goods'.[311] The panel in *Japan – Alcoholic Beverages* also stated that 'consumer surveys in a country with . . . a [protective] tax system would likely understate the degree of *potential* competitiveness between substitutable products'.[312] (emphasis added) Accordingly, in some cases, it may be highly relevant to examine latent demand."[313]

203. The Appellate Body on *Korea – Alcoholic Beverages* concluded its analysis of why "latent" demand had to be considered in the interpretation of "directly competitive or substitutable products" by emphasizing the need for such an analysis particularly in the product sector in the case before it:

> "We note, however, that actual consumer demand may be influenced by measures other than internal taxation. Thus, demand may be influenced by, *inter alia*, earlier protectionist taxation, previous import prohibitions or quantitative restrictions. Latent demand can be a particular problem in the case of 'experience goods', such as food and beverages, which consumers tend to purchase because they are familiar with them and with which consumers experiment only reluctantly.
>
> [T]he term 'directly competitive or substitutable' does not prevent a panel from taking account of evidence of latent consumer demand as one of a range of factors to be considered when assessing the competitive relationship between imported and domestic products under Article III:2, second sentence, of the GATT 1994."[314]

204. In *Canada – Periodicals*, the Appellate Body reiterated the need for the consideration of latent demand in assessing whether products are "directly competitive or substitutable". In this dispute, the Appellate Body rejected Canada's argument that the market shares of foreign and domestic magazines on the Canadian periodicals market had remained constant over an extended period of time and that this fact pointed to a lack of competition or substitutability between domestic and foreign periodicals:

> "We are not impressed either by Canada's argument that the market share of imported and domestic magazines has remained remarkably constant over the last 30–plus years, and that one would have expected some variation if competitive forces had been in play to the degree necessary to meet the standard of 'directly competitive' goods. This argument would have weight only if Canada had not protected the domestic market of Canadian periodicals through, among other measures, the import prohibition of Tariff Code 9958 and the excise tax of Part V.1 of the Excise Tax Act."[315]

205. In *Korea – Alcoholic Beverages*, the Panel elaborated on the meaning of the term "*directly* competitive or substitutable products":

> "[W]e must first decide how the term 'directly competitive or substitutable' should be interpreted. . . .
>
> The Appellate Body on *Japan – Taxes on Alcoholic Beverages II* stated that 'like product' should be narrowly construed for purposes of Article III:2. It then noted that directly competitive or substitutable is a broader category, saying: 'How much broader that category of "directly competitive or substitutable products" may be in a given case is a matter for the panel to determine based on all the relevant facts in that case.'[316] Article 32

of the Vienna Convention provides that it is appropriate to refer to the negotiating history of a treaty provision in order to confirm the meaning of the terms as interpreted pursuant to the application of Article 31. A review of the negotiating history of Article III:2, second sentence and the *Ad* Article III language confirms that the product categories should not be so narrowly construed as to defeat the purpose of the anti-discrimination language informing the interpretation of Article III. The Geneva session of the Preparatory Committee provided an explanation of the language of the second sentence by noting that apples and oranges could be directly competitive or substitutable. Other examples provided were domestic linseed oil and imported tung oil and domestic synthetic rubber and imported natural rubber. There was discussion of whether such products as tramways and busses or coal and fuel oil could be considered as categories of directly competitive or substitutable products. There was some disagreement with respect to these products.

This negotiating history illustrates the key question in this regard. It is whether the products are *directly* competitive or substitutable. Tramways and busses, when they are not directly competitive, may still be indirectly competitive as transportation systems. Similarly even if most power generation systems are set up to utilize either coal or fuel oil, but not both, these two products could still compete indirectly as fuels. Thus, the focus should not be exclusively on the quantitative extent of the competitive overlap, but on the methodological basis on which a panel should assess the competitive relationship.

At some level all products or services are at least indirectly competitive. Because consumers have limited amounts of disposable income, they may have to arbitrate between various needs such as giving up going on a vacation to buy a car or abstaining from eating in restaurants to buy new shoes or a television set. However, an assessment of whether there is a direct competitive relationship between two products or groups of products requires evidence that consumers consider or could consider the two products or groups of products as alternative ways of satisfying a particular need or taste."[317]

Factors relevant to "directly competitive or substitutable"

206. In *Japan – Alcoholic Beverages II*, the Appellate Body agreed with the Panel's illustrative enumeration of the factors to be considered in deciding whether two subject products are "directly competitive or substitutable"; for example, the nature of the compared products, and the competitive conditions in the relevant market, in addition to their physical characteristics, common end-use, and tariff classifications.[318]

207. In *Korea – Alcoholic Beverages*, the Panel evaluated whether the subject products were "directly competitive or substitutable products" by discussing the various characteristics of the products. The Appellate Body implicitly endorsed this approach in the context of upholding the Panel's approach of grouping certain products into categories:[319]

"We next will consider the various characteristics of the products to assess whether there is a competitive or substitutable relationship between the imported and domestic products and draw conclusions as to whether the nature of any such relationship is direct. We will review the physical characteristics, end-uses including evidence of advertising activities, channels of distribution, price relationships including cross-price elasticities, and any other characteristics."[320]

208. With respect to the "grouping" methodology, see also paragraph 209 below:

Methodology of comparison – grouping of products

209. In *Korea – Alcoholic Beverages*, the Appellate Body agreed with the Panel's comparison method of domestic and imported products, where under both types of *soju* (Korean traditional liquor), i.e. distilled and diluted *soju*, were compared with imported liquor products on a group basis, rather than on an item-by-item basis. The Appellate Body rejected Korea's appeal of this methodology :

"We consider that Korea's argument raises two distinct questions. The first question is whether the Panel erred in its 'analytical approach'. The second is whether, on the facts of this case, the Panel was entitled to group the products in the manner that it did. Since the second question involves a review of the way in which the Panel assessed the evidence, we address it in our analysis of procedural issues.

The Panel describes 'grouping' as an 'analytical tool'. It appears to us, however, that whatever else the Panel may have seen in this 'analytical tool', it used this 'tool' as a practical device to minimize repetition when examining the competitive relationship between a large number of differing products. Some grouping is almost always necessary in cases arising under Article III:2, second sentence, since generic categories commonly include products with *some* variation in composition, quality, function and price, and thus commonly give rise to sub-categories. From a slightly different perspective, we note that 'grouping' of products involves at least a preliminary characterization by the treaty interpreter that certain products are sufficiently similar as to, for instance, composition, quality, function and price, to warrant treating them as a group for convenience in analysis. But, the use of such 'analytical tools' does not

[317] Panel Report on *Korea – Alcoholic Beverages*, paras. 10.37–10.40.
[318] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 25.
[319] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 144.
[320] Panel Report on *Korea – Alcoholic Beverages*, para. 10.61.

relieve a panel of its duty to make an objective assessment of whether the components of a group of imported products are directly competitive or substitutable with the domestic products. We share Korea's concern that, in certain circumstances, such 'grouping' of products *might* result in individual product characteristics being ignored, and that, in turn, *might* affect the outcome of a case. However, as we will see below, the Panel avoided that pitfall in this case.

Whether, and to what extent, products can be grouped is a matter to be decided on a case-by-case basis. In this case, the Panel decided to group the imported products at issue on the basis that:

> . . . on balance, all of the imported products specifically identified by the complainants have sufficient common characteristics, end-uses and channels of distribution and prices. . . .[321]

As the Panel explained in the footnote attached to this passage, the Panel's subsequent analysis of the physical characteristics, end-uses, channels of distribution and prices of the imported products confirmed the correctness of its decision to group the products for analytical purposes. Furthermore, where appropriate, the Panel did take account of individual product characteristics. It, therefore, seems to us that the Panel's grouping of imported products, complemented where appropriate by individual product examination, produced the same outcome that individual examination of each imported product would have produced.[322] We, therefore, conclude that the Panel did not err in considering the imported beverages together."[323]

210. In *Argentina – Hides and Leather*, the Panel discussed the methodology of comparison to be applied with respect to the term "in excess of those applied" under the first sentence of Article III:2. See paragraphs 176–177 above. See also the Appellate Body's finding in *Canada – Periodicals* on the methodology of comparison for "dissimilar taxation". See paragraph 217 below. Also, with respect to the methodology of comparison applicable to the term "no less favourable treatment" under Article III:4, see paragraphs 270–275 below.

Like products as a subset of directly competitive or substitutable products

211. In *Korea – Alcoholic Beverages*, the Appellate Body defined "like products" as a subset of "directly competitive or substitutable" products:

> "The first sentence of Article III:2 also forms part of the context of the term. 'Like' products are a subset of directly competitive or substitutable products: all like products are, by definition, directly competitive or substitutable products, whereas not all 'directly competitive or substitutable' products are 'like'.[324] The notion of like products must be construed narrowly[325] but the category of directly competitive or substitutable products is broader.[326] While perfectly substitutable products fall within Article III:2, first sentence, imperfectly substitutable products can be assessed under Article III:2, second sentence.[327]"[328]

Reference to GATT practice

212. With respect to the interpretation of "directly competitive or substitutable products" under GATT, see also GATT Analytical Index, pages 159–161.

Relationship with "like products"

213. In *Japan – Alcoholic Beverages II* and *Korea – Alcoholic Beverages*, the Appellate Body compared the term "like products" with the term "directly competitive or substitutable products". See paragraphs 157–159 above.

(iii) "not similarly taxed"

General

"de minimis" standard

214. In *Japan – Alcoholic Beverages II*, the Appellate Body interpreted the term "not similarly taxed" as requiring excessive taxation more than "*de minimis*":

> "To give due meaning to the distinctions in the wording of Article III:2, first sentence, and Article III:2, second sentence, the phrase 'not similarly taxed' in the *Ad* Article to the second sentence must not be construed so as to mean the same thing as the phrase 'in excess of' in the first sentence. On its face, the phrase 'in excess of' in the first sentence means *any* amount of tax on imported products 'in excess of' the tax on domestic 'like products'. The phrase 'not similarly taxed' in the *Ad* Article to the second sentence must therefore mean something else. It requires a different standard, just as 'directly competitive or substitutable products' requires a different standard as compared to 'like products' for these same interpretive purposes."[329]

215. The Appellate Body found support for the above approach in *Japan – Alcoholic Beverages II* also in the

---

[321] (*footnote original*) Panel Report on *Korea – Alcoholic Beverages*, para. 10.60.
[322] (*footnote original*) We note that the panels in *Japan – Alcohol Beverages I* and in *Japan – Alcoholic Beverages II*, followed the same approach. This approach was implicitly approved in our Report on *Japan – Alcoholic Beverages II*.
[323] Appellate Body Report on *Korea – Alcoholic Beverages*, paras. 141–144.
[324] (*footnote original*) Panel Report on *Japan – Alcoholic Beverages II*, footnote 16, approved by the Appellate Body at p. 23 of its Report.
[325] (*footnote original*) Appellate Body Reports on *Japan – Alcoholic Beverages II*, footnote 20, and *Canada – Periodicals*, footnote 91.
[326] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, footnote 20.
[327] (*footnote original*) Appellate Body Report on *Canada – Periodicals*, footnote 91.
[328] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 118.
[329] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 26.

distinction between "like products" in the first sentence and "directly competitive or substitutable products" in Note *Ad* Article III:

> "Reinforcing this conclusion is the need to give due meaning to the distinction between 'like products' in the first sentence and 'directly competitive or substitutable products' in the *Ad* Article to the second sentence. If 'in excess of' in the first sentence and 'not similarly taxed' in the *Ad* Article to the second sentence were construed to mean one and the same thing, then 'like products' in the first sentence and 'directly competitive or substitutable products' in the *Ad* Article to the second sentence would also mean one and the same thing. This would eviscerate the distinctive meaning that must be respected in the words of the text.
>
> To interpret 'in excess of' and 'not similarly taxed' identically would deny any distinction between the first and second sentences of Article III:2. Thus, in any given case, there may be some amount of taxation on imported products that may well be 'in excess of' the tax on domestic 'like products' but may not be so much as to compel a conclusion that 'directly competitive or substitutable' imported and domestic products are 'not similarly taxed' for the purposes of the *Ad* Article to Article III:2, second sentence. In other words, there may be an amount of excess taxation that may well be more of a burden on imported products than on domestic 'directly competitive or substitutable products' but may nevertheless not be enough to justify a conclusion that such products are 'not similarly taxed' for the purposes of Article III:2, second sentence. We agree with the Panel that this amount of differential taxation must be more than *de minimis* to be deemed 'not similarly taxed' in any given case. And, like the Panel, we believe that whether any particular differential amount of taxation is *de minimis* or is not *de minimis* must, here too, be determined on a case-by-case basis. Thus, to be 'not similarly taxed', the tax burden on imported products must be heavier than on 'directly competitive or substitutable' domestic products, and that burden must be more than *de minimis* in any given case."[330]

Distinction from "so as to afford protection"

216. With respect to the distinction between "not similarly taxed" and "so as to afford protection" by the Appellate Body in *Japan – Alcoholic Beverages II*, see paragraphs 219–227 below.

Methodology of comparison – treatment of dissimilar taxation of some imported products

217. In *Canada – Periodicals*, referring to its Report on *Japan – Alcoholic Beverages II*[331], the Appellate Body stated:

> "[D]issimilar taxation of even some imported products as compared to directly competitive or substitutable domestic products is inconsistent with the provisions of the second sentence of Article III:2. In *United States – Section 337*, the panel found:
>
> > . . . that the 'no less favourable' treatment requirement of Article III:4 has to be understood as applicable to each individual case of imported products. The Panel rejected any notion of balancing more favourable treatment of some imported products against less favourable treatment of other imported products.[332]"[333]

218. The issue of balancing more favourable treatment of some imported products against less favourable treatment of other imported products was also addressed by the Panel on *Argentina – Hides and Leather* with respect to Article III:2, first sentence (see paragraphs 176–177 above, and by the Panel on *US – Gasoline* (see paragraph 275 below).[334]

(iv) "so as to afford protection to domestic production"

General

Relationship with Ad Article – distinction from "not similarly taxed"

219. In *Japan – Alcoholic Beverages II*, the Appellate Body drew a distinction between the term "not similarly taxed" and the term "so as to afford protection to domestic production" as follows:

> "[T]he Panel erred in blurring the distinction between that issue and the entirely separate issue of whether the tax measure in question was applied 'so as to afford protection'. Again, these are separate issues that must be addressed individually. If 'directly competitive or substitutable products' are *not* 'not similarly taxed', then there is neither need nor justification under Article III:2, second sentence, for inquiring further as to whether the tax has been applied 'so as to afford protection'. But if such products are 'not similarly taxed', a further inquiry must necessarily be made."[335]

---

[330] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 26–27. This "*de minimis*" standard was endorsed by the Appellate Body in *Canada – Periodicals* (Appellate Body Report on *Canada – Periodicals*, p. 29); in *Chile – Alcoholic Beverages* (Appellate Body Report on *Chile – Alcoholic Beverages*, para. 49.). Also, the Panel on *Indonesia Autos* followed it. Panel Report on *Indonesia – Auto*, para. 14.115.

[331] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 27.

[333] Appellate Body Report on *Canada – Periodicals*, p. 29.

[334] Further, with respect to the methodology of comparison in identifying "directly competitive and substitutable products" under the second sentence of Article III:2, see paras. 194–210 of this Chapter. Also with respect to this issue under Article III:4, see paras. 242–247 of this Chapter.

[335] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 27.

Relevant factors

General

220. In *Japan – Alcoholic Beverages II*, the Appellate Body indicated as follows:

> "As in [GATT Panel Report on *Japan – Customs Duties, Taxes and Labelling Practices on Imported Wines and Alcoholic Beverages*, BISD 34S/83], we believe that an examination in any case of whether dissimilar taxation has been applied so as to afford protection requires a comprehensive and objective analysis of the structure and application of the measure in question on domestic as compared to imported products. We believe it is possible to examine objectively the underlying criteria used in a particular tax measure, its structure, and its overall application to ascertain whether it is applied in a way that affords protection to domestic products.
>
> Although it is true that the aim of a measure may not be easily ascertained, nevertheless its protective application can most often be discerned from the design, the architecture, and the revealing structure of a measure."[336]

Relevance of tax differentials

221. In *Japan – Alcoholic Beverages II*, the Appellate Body held that the very magnitude of the tax differentials may be evidence of the protective application of a national fiscal measure:

> "The very magnitude of the dissimilar taxation in a particular case may be evidence of such a protective application, as the Panel rightly concluded in this case. Most often, there will be other factors to be considered as well. In conducting this inquiry, panels should give full consideration to all the relevant facts and all the relevant circumstances in any given case.
>
> . . .
>
> . . . The dissimilar taxation must be more than *de minimis*. It may be so much more that it will be clear from that very differential that the dissimilar taxation was applied 'so as to afford protection'. In some cases, that may be enough to show a violation. In this case, the Panel concluded that it was enough. Yet in other cases, there may be other factors that will be just as relevant or more relevant to demonstrating that the dissimilar taxation at issue was applied 'so as to afford protection'. In any case, the three issues that must be addressed in determining whether there is such a violation must be addressed clearly and separately in each case and on a case-by-case basis. And, in every case, a careful, objective analysis, must be done of each and all relevant facts and all the relevant circumstances in order to determine 'the existence of protective taxation'.[337]"[338]

222. The Appellate Body on *Japan – Alcoholic Beverages II* supported its interpretation of the various elements of Article III:2, second sentence, by emphasizing the consistency of its analysis with the customary rules of interpretation of public international law:

> "Our interpretation of Article III is faithful to the 'customary rules of interpretation of public international law'. WTO rules are reliable, comprehensible and enforceable. WTO rules are not so rigid or so inflexible as not to leave room for reasoned judgements in confronting the endless and ever-changing ebb and flow of real facts in real cases in the real world. They will serve the multilateral trading system best if they are interpreted with that in mind. In that way, we will achieve the 'security and predictability' sought for the multilateral trading system by the Members of the WTO through the establishment of the dispute settlement system'."[339]

Relevance of tariffs on subject products

223. The Panel's approach in *Japan – Alcoholic Beverages II* reveals the possible roles of tariffs in a finding that a national measure has been applied "so as to afford protection to domestic production". The Appellate Body agreed with the following finding of the Panel:[340]

> "The Panel took note, in this context, of the statement by Japan that the 1987 Panel Report erred when it concluded that shochu is essentially a Japanese product. The Panel accepted the evidence submitted by Japan according to which a shochu-like product is produced in various countries outside Japan, including the Republic of Korea, the People's Republic of China and Singapore. The Panel noted, however, that Japanese import duties on shochu are set at 17.9 per cent. At any rate what is at stake, in the Panel's view, is the market share of the domestic shochu market in Japan that was occupied by Japanese-made shochu. The high import duties on foreign-produced shochu resulted in a significant share of the Japanese shochu market held by Japanese shochu producers. Consequently, in the Panel's view, the combination of customs duties and internal taxation in Japan has the following impact: on the one hand, it makes it difficult for foreign-produced shochu to penetrate the Japanese market and, on the other, it does not guarantee equality of competitive conditions between shochu and the rest of 'white' and 'brown' spirits. Thus, through a combination of high import duties and differentiated internal taxes, Japan manages to 'isolate' domestically produced shochu from foreign competition, be it foreign produced shochu or any other of the mentioned white and brown spirits."[341]

[341] Panel Report on *Japan – Alcoholic Beverages II*, para. 6.35.

Relevance of the intent of legislators/regulators

224. In *Japan – Alcoholic Beverages II*, the Appellate Body considered that the subjective intent of legislators and regulators in the drafting and the enactment of a particular measure is irrelevant for ascertaining whether a measure is applied "so as to afford protection to domestic production":

> "This third inquiry under Article III:2, second sentence ['so as to afford protection'], must determine whether 'directly competitive or substitutable products' are 'not similarly taxed' in a way that affords protection. This is not an issue of intent. It is not necessary for a panel to sort through the many reasons legislators and regulators often have for what they do and weigh the relative significance of those reasons to establish legislative or regulatory intent. If the measure is applied to imported or domestic products so as to afford protection to domestic production, then it does not matter that there may not have been any desire to engage in protectionism in the minds of the legislators or the regulators who imposed the measure. It is irrelevant that protectionism was not an intended objective if the particular tax measure in question is nevertheless, to echo Article III:*1, 'applied* to imported or domestic products so as to afford protection to domestic production'. This is an issue of how the measure in question is *applied*."[342]

225. In contrast to its statements in *Japan – Alcoholic Beverages II*, the Appellate Body in *Canada – Periodicals* did ascribe some significance to the statements of representatives of the Canadian executive about the policy objectives of the part of the Excise Tax Act at issue. The Appellate Body did so after finding that "the magnitude of the dissimilar taxation between imported split-run periodicals and domestic non-split-run periodicals is beyond excessive, indeed, it is prohibitive" and that "[t]here is also ample evidence that the very design and structure of the measure is such as to afford protection to domestic periodicals":[343]

> "The Canadian policy which led to the enactment of Part V.1 of the Excise Tax Act had its origins in the *Task Force Report*. It is clear from reading the *Task Force Report* that the design and structure of Part V.1 of the Excise Tax Act are to prevent the establishment of split-run periodicals in Canada, thereby ensuring that Canadian advertising revenues flow to Canadian magazines. Madame Monique Landry, Minister Designate of Canadian Heritage at the time the *Task Force Report* was released, issued the following statement summarizing the Government of Canada's policy objectives for the Canadian periodical industry:
>
> 'The Government reaffirms its commitment to protect the economic foundations of the Canadian periodical industry, which is a vital element of Canadian cultural expression. To achieve this objective, the Government will continue to use policy instruments that encourage the flow of advertising revenues to Canadian magazines and discourage the establishment of split-run or "Canadian" regional editions with advertising aimed at the Canadian market. We are committed to ensuring that Canadians have access to Canadian ideas and information through genuinely Canadian magazines, while not restricting the sale of foreign magazines in Canada.'
>
> Furthermore, the Government of Canada issued the following response to the *Task Force Report*:
>
> 'The Government reaffirms its commitment to the long-standing policy of protecting the economic foundations of the Canadian periodical industry. To achieve this objective, the Government uses policy instruments that encourage the flow of advertising revenues to Canadian periodicals, since a viable Canadian periodical industry must have a secure financial base.'
>
> During the debate of Bill C-103, An Act to Amend the Excise Tax Act and the Income Tax Act, the Minister of Canadian Heritage, the Honourable Michel Dupuy, stated the following:
>
> '. . . the reality of the situation is that we must protect ourselves against split-runs coming from foreign countries and, in particular, from the United States.'
>
> Canada also admitted that the objective and structure of the tax is to insulate Canadian magazines from competition in the advertising sector, thus leaving significant Canadian advertising revenues for the production of editorial material created for the Canadian market. With respect to the actual application of the tax to date, it has resulted in one split-run magazine, Sports Illustrated, to move its production for the Canadian market out of Canada and back to the United States. Also, Harrowsmith Country Life, a Canadian-owned split-run periodical, has ceased production of its United States' edition as a consequence of the imposition of the tax."[344]

226. In *Korea – Alcoholic Beverages*, Korea appealed the Panel's finding that the Korea tax measures were inconsistent with Article III:2, second sentence, on the ground that the Panel ignored the explanation provided by Korea of the structure of the subject Korean taxation on liquor products. The Appellate Body rejected Korea's argument and expressed its agreement with the Panel's approach:

> "Although [the Panel] considered that the magnitude of the tax differences was sufficiently large to support a finding that the contested measures afforded protection to domestic production, the Panel also considered

[342] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 27–28.
[343] Appellate Body Report on *Canada – Periodicals*, p. 32.
[344] Appellate Body Report on *Canada – Periodicals*, pp. 30–32.

the structure and design of the measures. In addition, the Panel found that, in practice, '[t]here is virtually no imported soju so the beneficiaries of this structure are almost exclusively domestic producers'. In other words, the tax operates in such a way that the lower tax brackets cover almost exclusively domestic production, whereas the higher tax brackets embrace almost exclusively imported products. In such circumstances, the reasons given by Korea as to *why* the tax is structured in a particular way do not call into question the conclusion that the measures are applied 'so as to afford protection to domestic production'. Likewise, the reason why there is very little imported soju in Korea does not change the pattern of application of the contested measures."[345]

227. In *Chile – Alcoholic Beverages*, the Appellate Body examined Chile's claim that the subject taxation on alcoholic beverages was aimed at, among others, reducing the consumption of alcoholic beverages with higher alcohol content. The Appellate Body again refused to accept explanations of policy objectives which were not ascertainable from the objective design, architecture and structure of the measure and supported the Panel's attempts to "relate the observable structural features of the measure with its declared purposes":

"We recall once more that, in *Japan – Alcoholic Beverages*, we declined to adopt an approach to the issue of 'so as to afford protection' that attempts to examine 'the many reasons legislators and regulators often have for what they do'.[346] We called for examination of the design, architecture and structure of a tax measure precisely to permit identification of a measure's objectives or purposes as revealed or objectified in the measure itself. Thus, we consider that a measure's purposes, objectively manifested in the design, architecture and structure of the measure, *are* intensely pertinent to the task of evaluating whether or not that measure is applied so as to afford protection to domestic production. In the present appeal, Chile's explanations concerning the structure of the New Chilean System – including, in particular, the truncated nature of the line of progression of tax rates, which effectively consists of two levels (27 per cent *ad valorem* and 47 per cent *ad valorem*) separated by only 4 degrees of alcohol content – might have been helpful in understanding what *prima facie* appear to be anomalies in the progression of tax rates. The conclusion of protective application reached by the Panel becomes very difficult to resist, in the absence of countervailing explanations by Chile. The mere statement of the four objectives pursued by Chile does not constitute effective rebuttal on the part of Chile.

At the same time, we agree with Chile that it would be inappropriate, under Article III:2, second sentence, of the GATT 1994, to examine whether the tax measure is *necessary* for achieving its stated objectives or purposes. The Panel did use the word 'necessary' in this part of its reasoning. Nevertheless, we do not read the Panel Report as showing that the Panel did, in fact, conduct an examination of whether the measure is necessary to achieve its stated objectives. It appears to us that the Panel did no more than try to relate the observable structural features of the measure with its declared purposes, a task that is unavoidable in appraising the application of the measure as protective or not of domestic production."[347]

Reference to GATT practice

228. For GATT practice on this subject-matter, see also GATT Analytical Index, pages 139–140.

4. Article III:4

(a) General

(i) Test under paragraph 4

229. In *Korea – Various Measures on Beef*, the Appellate Body explained the three elements of a violation of Article III:4:

"For a violation of Article III:4 to be established, three elements must be satisfied: that the imported and domestic products at issue are 'like products'; that the measure at issue is a 'law, regulation, or requirement affecting their internal sale, offering for sale, purchase, transportation, distribution, or use'; and that the imported products are accorded 'less favourable' treatment than that accorded to like domestic products."[348]

230. In *EC – Bananas III*, the Appellate Body reviewed the Panel's finding that the EC's allocation method of tariff quota for bananas was inconsistent with Article III:4. The Appellate Body considered that an independent consideration of the phrase "so as [to] afford protection to domestic production" is not necessary under Article III:4:

"Article III:4 does *not* specifically refer to Article III:1. Therefore, a determination of whether there has been a violation of Article III:4 does *not* require a separate consideration of whether a measure 'afford[s] protection to domestic production'."[349]

(ii) Burden of proof

231. In *Japan – Film*, the Panel allocated the burden of proof under Article III:4 according to the general

[345] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 150.
[346] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, fn. 20.
[347] Appellate Body Report on *Chile – Alcoholic Beverages*, paras. 71–72.
[348] Appellate Body Report on *Korea – Various Measures on Beef*, para. 133.
[349] Appellate Body Report on *EC – Bananas III*, para. 216. In this regard, see Panel Report on *Canada – Periodicals*, para. 5.38, where the Panel examined whether a measure at issue "afford[ed] protection to domestic production."

principle that it is for the party asserting a fact or claim to bear the burden of proving this fact or claim:

> "As for the burden of proof . . . we note that it is for the party asserting a fact, claim or defence to bear the burden of providing proof thereof. Once that party has put forward sufficient evidence to raise a presumption that what is claimed is true, the burden of producing evidence shifts to the other party to rebut the presumption.[350] Thus, in this case, including the claims under Articles III . . ., it is for the United States to bear the burden of proving its claims. Once it has raised a presumption that what it claims is true, it is for Japan to adduce sufficient evidence to rebut any such presumption."[351]

232. The Appellate Body confirmed this approach by the Panel on *Japan – Film* to the allocation of the burden of proof in its report in *EC – Asbestos*. In so doing, the Appellate Body referred to its finding on *US – Wool Shirts and Blouses*:[352]

> "Applying these rules, it is our opinion that Canada, as the complaining party, should normally provide sufficient evidence to establish a presumption that there are grounds for each of its claims. If it does so, it will then be up to the EC to adduce sufficient evidence to rebut the presumption. When the EC puts forward a particular method of defence in the affirmative, it is up to them to furnish sufficient evidence, just as Canada must do for its own claims. If both parties furnish evidence that meets these requirements, it is the responsibility of the Panel to assess these elements as a whole. Where the evidence concerning a claim or a particular form of defence is, in general, equally balanced, a finding has to be made against the party on which the burden of proof relating to this claim or this form of defence is incumbent."[353]

(iii) Relationship with other paragraphs of Article III

Relationship with paragraph 1

233. With respect to the relationship between Paragraphs 1 and 4 of Article III, see paragraphs 140–143 above. Also, in *EC – Bananas III*, the Appellate Body touched on this issue in discussing whether the independent consideration of "so as to afford protection to domestic production" is necessary under Article III:4. See paragraph 230 above. Further, this issue was touched upon by the Appellate Body in *EC – Asbestos* in relation to the interpretation of the term "like products" under paragraph 4. See paragraphs 237 and 239 below.

Relationship with paragraph 2

234. In *EC – Asbestos*, the Appellate Body considered that Article III:2 constitutes part of the context of Article III:4, and examined the relationship between these paragraphs. However, the Appellate Body concluded that Article III:1, rather than Article III:2, had "particular contextual significance" for the interpretation of Article III:4:

> "To begin to resolve these [interpretative] issues, we turn to the relevant context of Article III:4 of the GATT 1994. In that respect, we observe that Article III:2 of the GATT 1994, which deals with the internal tax treatment of imported and domestic products, prevents Members, through its first sentence, from imposing internal taxes on imported products 'in excess of those applied . . . to *like* domestic products.' (emphasis added) In previous Reports, we have held that the scope of 'like' products in this sentence is to be construed 'narrowly'.[354] This reading of 'like' in Article III:2 might be taken to suggest a similarly narrow reading of 'like' in Article III:4, since both provisions form part of the same Article. However, both of these paragraphs of Article III constitute specific expressions of the overarching, 'general principle', set forth in Article III:1 of the GATT 1994.[355] As we have previously said, the 'general principle' set forth in Article III:1 'informs' the rest of Article III and acts 'as a guide to understanding and interpreting the specific obligations contained' in the other paragraphs of Article III, including paragraph 4.[356] Thus, in our view, Article III:1 has particular contextual significance in interpreting Article III:4, as it sets forth the 'general principle' pursued by that provision. Accordingly, in interpreting the term 'like products' in Article III:4, we must turn, first, to the 'general principle' in Article III:1, rather than to the term 'like products' in Article III:2."[357]

235. After emphasizing the significance of Article III:1 for the interpretation of Article III:4, the Appellate Body in *EC – Asbestos* considered the different respective structures of Articles III:2 and III:4:

> "In addition, we observe that, although the obligations in Articles III:2 and III:4 both apply to 'like products', the text of Article III:2 differs in one important respect from the text of Article III:4. Article III:2 contains *two separate* sentences, each imposing *distinct* obligations: the first lays down obligations in respect of 'like products', while the second lays down obligations in respect of 'directly competitive or substitutable' products.[358] By contrast,

---

[353] Panel Report on *EC – Asbestos*, para. 8.79. With respect to burden of proof in general, see Chapter on the *DSU*, Section XXXVI.D.
[354] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 112 and 113. See, also, Appellate Body Report on *Canada – Periodicals*, p. 473.
[355] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 111.
[356] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 111.
[357] Appellate Body Report on *EC – Asbestos*, para. 94.
[358] (*footnote original*) The meaning of the second sentence of Article III:2 is elaborated upon in the Interpretative Note to that provision. This note indicates that the second sentence of Article III:2 applies to "directly competitive or substitutable product[s]".

Article III:4 applies only to 'like products' and does not include a provision equivalent to the second sentence of Article III:2. We note that, in this dispute, the Panel did not examine, at all, the significance of this textual difference between paragraphs 2 and 4 of Article III."[359]

236. The Appellate Body on *EC – Asbestos* also recalled its report in *Japan – Alcoholic Beverages II*, where it had emphasized the need to interpret the two sentences of Article III:2 and the separate obligations contained therein in the light of the structure of Article III:2:

"For us, this textual difference between paragraphs 2 and 4 of Article III has considerable implications for the meaning of the term 'like products' in these two provisions. In *Japan – Alcoholic Beverages,* we concluded, in construing Article III:2, that the two separate obligations in the two sentences of Article III:2 must be interpreted in a harmonious manner that gives meaning to *both* sentences in that provision. We observed there that the interpretation of one of the sentences necessarily affects the interpretation of the other. Thus, the scope of the term 'like products' in the first sentence of Article III:2 affects, and is affected by, the scope of the phrase 'directly competitive or substitutable' products in the second sentence of that provision. We said in *Japan – Alcoholic Beverages*:

> 'Because the second sentence of Article III:2 provides for a separate and distinctive consideration of the protective aspect of a measure in examining its application to a broader category of products that are not 'like products' as contemplated by the first sentence, we agree with the Panel that the first sentence of Article III:2 must be construed narrowly so as not to condemn measures that its strict terms are not meant to condemn. Consequently, we agree with the Panel also that the definition of 'like products' in Article III:2, first sentence, should be construed narrowly.'[360]

In construing Article III:4, the same interpretive considerations do not arise, because the 'general principle' articulated in Article III:1 is expressed in Article III:4, not through two distinct obligations, as in the two sentences in Article III:2, but instead through a single obligation that applies solely to 'like products'. Therefore, the harmony that we have attributed to the two sentences of Article III:2 need not and, indeed, cannot be replicated in interpreting Article III:4. Thus, we conclude that, given the textual difference between Articles III:2 and III:4, the 'accordion' of 'likeness' stretches in a different way in Article III:4."[361]

(b) "like products"

(i) General

Relationship with "like products" under Article III:2, first sentence

237. In *EC – Asbestos*, the Appellate Body interpreted the term "like" in Article III:4 by comparing the same term as used in Article III:2. The Appellate Body emphasized the need for consistency between the general principle of Article III, contained in paragraph 1, and the interpretation of Article III:4. The Appellate Body then interpreted the term "like products" to refer to products which are in a competitive relationship:

"[T]here must be consonance between the objective pursued by Article III, as enunciated in the 'general principle' articulated in Article III:1, and the interpretation of the specific expression of this principle in the text of Article III:4. This interpretation must, therefore, reflect that, in endeavouring to ensure 'equality of competitive conditions', the 'general principle' in Article III seeks to prevent Members from applying internal taxes and regulations in a manner which affects the competitive relationship, in the marketplace, *between the domestic and imported products involved*, 'so as to afford protection to domestic production.'

As products that are in a competitive relationship in the marketplace could be affected through treatment of *imports* 'less favourable' than the treatment accorded to *domestic* products, it follows that the word 'like' in Article III:4 is to be interpreted to apply to products that are in such a competitive relationship. Thus, a determination of 'likeness' under Article III:4 is, fundamentally, a determination about the nature and extent of a competitive relationship between and among products. In saying this, we are mindful that there is a spectrum of degrees of 'competitiveness' or 'substitutability' of products in the marketplace, and that it is difficult, if not impossible, in the abstract, to indicate precisely where on this spectrum the word 'like' in Article III:4 of the GATT 1994 falls. We are not saying that *all* products which are in *some* competitive relationship are 'like products' under Article III:4. In ruling on the measure at issue, we also do not attempt to define the precise scope of the word 'like' in Article III:4. Nor do we wish to decide if the scope of 'like products' in Article III:4 is co-extensive with the combined scope of 'like' and 'directly competitive or substitutable' products in Article III:2. However, we recognize that the relationship between these two provisions is important, because there is no sharp distinction between fiscal regulation, covered by Article III:2, and non-fiscal regulation, covered by Article III:4. Both forms of regulation can often be used to achieve the same ends. It would be incongruous if, due to a significant difference in the product scope of these two provisions, Members were prevented from using one form of regulation – for instance, fiscal – to protect domestic production of certain products, but were able to use another form of regulation – for instance, non-fiscal – to achieve those ends. This would frustrate a consistent application of the 'general principle' in Article III:1. For

[359] Appellate Body Report on *EC – Asbestos*, para. 94.
[360] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 112 and 113.
[361] Appellate Body Report on *EC – Asbestos*, paras. 95–96.

these reasons, we conclude that the scope of 'like' in Article III:4 is broader than the scope of 'like' in Article III:2, first sentence. Nonetheless, we note, once more, that Article III:2 extends not only to 'like products', but also to products which are 'directly competitive or substitutable', and that Article III:4 extends only to 'like products'. In view of this different language, and although we need not rule, and do not rule, on the precise product scope of Article III:4, we do conclude that the product scope of Article III:4, although broader than the *first* sentence of Article III:2, is certainly *not* broader than the *combined* product scope of the *two* sentences of Article III:2 of the GATT 1994."[362]

238. The Appellate Body acknowledged that its interpretation resulted in giving Article III:4 "a relatively broad product scope". Nevertheless the Appellate Body pointed out that mere "likeness" of products and distinctions between "like products" in and of themselves would not lead to inconsistency with Article III:4; rather, "less favourable treatment" would also have to be established in order to find a violation of Article III:4:

"We recognize that, by interpreting the term 'like products' in Article III:4 in this way, we give that provision a relatively broad product scope – although no broader than the product scope of Article III:2. In so doing, we observe that there is a second element that must be established before a measure can be held to be inconsistent with Article III:4. Thus, even if two products are 'like', that does not mean that a measure is inconsistent with Article III:4. A complaining Member must still establish that the measure accords to the group of 'like' *imported* products 'less favourable treatment' than it accords to the group of 'like' *domestic* products. The term 'less favourable treatment' expresses the general principle, in Article III:1, that internal regulations 'should not be applied . . . so as to afford protection to domestic production'. If there is 'less favourable treatment' of the group of 'like' imported products, there is, conversely, 'protection' of the group of 'like' domestic products. However, a Member may draw distinctions between products which have been found to be 'like', without, for this reason alone, according to the group of 'like' *imported* products 'less favourable treatment' than that accorded to the group of 'like' *domestic* products. In this case, we do not examine further the interpretation of the term 'treatment no less favourable' in Article III:4, as the Panel's findings on this issue have not been appealed or, indeed, argued before us."[363]

239. Further, in *EC – Asbestos*, the Appellate Body also referred to the Report of the Working Party on *Border Tax Adjustment*. It confirmed that the criteria listed in this Report provide a framework for analysing the "likeness" of products on a case-by-case basis. However, the Appellate Body emphasized that these criteria were not treaty language nor did they constitute a "closed list" and that "the adoption of a particular framework to aid in the examination of evidence does not dissolve the duty or the need to examine, in each case, *all* of the pertinent evidence":

"We turn to consideration of how a treaty interpreter should proceed in determining whether products are 'like' under Article III:4. As in Article III:2, in this determination, '[n]o one approach . . . will be appropriate for all cases.'[364] Rather, an assessment utilizing 'an unavoidable element of individual, discretionary judgement'[365] has to be made on a case-by-case basis. The Report of the Working Party on *Border Tax Adjustments* outlined an approach for analyzing 'likeness' that has been followed and developed since by several panels and the Appellate Body.[366] This approach has, in the main, consisted of employing four general criteria in analyzing 'likeness': (i) the properties, nature and quality of the products; (ii) the end-uses of the products; (iii) consumers' tastes and habits – more comprehensively termed consumers' perceptions and behaviour – in respect of the products; and (iv) the tariff classification of the products.[367] We note that these four criteria comprise four categories of 'characteristics' that the products involved might share: (i) the physical properties of the products; (ii) the extent to which the products are capable of serving the same or similar end-uses; (iii) the extent to which consumers perceive and treat the products as alternative means of performing particular functions in order to satisfy a particular want or demand; and (iv) the international classification of the products for tariff purposes.

These general criteria, or groupings of potentially shared characteristics, provide a framework for analyzing the 'likeness' of particular products on a case-by-case basis. These criteria are, it is well to bear in mind, simply tools to assist in the task of sorting and examining the relevant evidence. They are neither a treaty-mandated nor a closed list of criteria that will determine the legal characterization of products. More important, the adoption of a particular framework to aid in the examination of evidence does not dissolve the duty or the need to examine, in each case, *all* of the pertinent evidence. In addition, although each criterion addresses, in principle, a different aspect of the products involved, which should be examined separately, the different criteria are interre-

[362] Appellate Body Report on *EC – Asbestos*, paras. 98–99.
[363] Appellate Body Report on *EC – Asbestos*, para. 100.
[364] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 114.
[365] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 113.
[366] (*footnote original*) See, further, Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 113 and, in particular, fn. 46 See, also, Panel Report on *US – Gasoline*, para. 6.8, where the approach set forth in the *Border Tax Adjustment* case was adopted in a dispute concerning Article III:4 of the GATT 1994 by a panel. This point was not appealed in that case.
[367] (*footnote original*) The fourth criterion, tariff classification, was not mentioned by the Working Party on *Border Tax Adjustments*, but was included by subsequent panels (see, for instance, [Panel Reports on] *EEC – Animal Proteins*, para. 4.2, and *Japan – Alcoholic Beverages I*, para. 5.6).

lated. For instance, the physical properties of a product shape and limit the end-uses to which the products can be devoted. Consumer perceptions may similarly influence – modify or even render obsolete – traditional uses of the products. Tariff classification clearly reflects the physical properties of a product.

The kind of evidence to be examined in assessing the 'likeness' of products will, necessarily, depend upon the particular products and the legal provision at issue. When all the relevant evidence has been examined, panels must determine whether that evidence, as a whole, indicates that the products in question are 'like' in terms of the legal provision at issue. We have noted that, under Article III:4 of the GATT 1994, the term 'like products' is concerned with competitive relationships between and among products. Accordingly, whether the *Border Tax Adjustments* framework is adopted or not, it is important under Article III:4 to take account of evidence which indicates whether, and to what extent, the products involved are – or could be – in a competitive relationship in the marketplace."[368]

240. In *Japan – Alcoholic Beverages II*, the Appellate Body found that the term "like product" evoked the image of an accordion whose width would vary depending on the provision under which the term was being interpreted. See paragraph 162 above.

Relationship with "like products" in other GATT provisions

241. With respect to the interpretation of "like products" under GATT Article I, see paragraphs 15–16 above.

(ii) Relevant factors

General

242. In *EC – Asbestos*, the Appellate Body reviewed the Panel's approach to its "likeness" analysis, and criticised the Panel for not taking into account *all* of the relevant criteria:

"It is our view that, having adopted an approach based on the four criteria set forth in *Border Tax Adjustments*, the Panel should have examined the evidence relating to *each* of those four criteria and, then, weighed *all* of that evidence, along with any other relevant evidence, in making an *overall* determination of whether the products at issue could be characterized as 'like'. Yet, the Panel expressed a 'conclusion' that the products were 'like' after examining only the *first* of the four criteria. The Panel then repeated that conclusion under the second criterion – without further analysis – before dismissing altogether the relevance of the third criterion and also before rejecting the differing tariff classifications under the fourth criterion. In our view, it was inappropriate for the Panel to express a 'conclusion' after examining only one of the four criteria. By reaching a 'conclusion' without examining all of the criteria it had decided to examine, the Panel, in reality, expressed a conclusion after examining only some of the evidence. Yet, a determination on the 'likeness' of products cannot be made on the basis of a partial analysis of the evidence, after examination of just one of the criteria the Panel said it would examine. For this reason, we doubt whether the Panel's overall approach has allowed the Panel to make a proper characterization of the 'likeness' of the fibres at issue."[369]

243. In *EC – Asbestos*, the Appellate Body also disagreed with the Panel's findings with respect to the examination of the first criteria of likeness – product properties. More specifically, the Appellate Body held that toxicity was a physical difference to be taken into account in the determination of "likeness" and linked this criterion to the criterion of competitive relationship between the products at issue:

"Panels must examine fully the physical properties of products. In particular, panels must examine those physical properties of products that are likely to influence the competitive relationship between products in the marketplace. . . .

. . .

This carcinogenicity, or toxicity, constitutes, as we see it, a defining aspect of the physical properties of chrysotile asbestos fibres. The evidence indicates that PCG fibres, in contrast, do not share these properties, at least to the same extent. We do not see how this highly significant physical difference *cannot* be a consideration in examining the physical properties of a product as part of a determination of "likeness" under Article III:4 of the GATT 1994."[370]

244. Also, in *EC – Asbestos*, with respect to the criteria of end-use and consumer tastes and habits, the Appellate Body again established an explicit link to the criterion of a competitive relationship between products:

"Before examining the Panel's findings under the second and third criteria, we note that these two criteria involve certain of the key elements relating to the competitive relationship between products: first, the extent to which products are capable of performing the same, or similar, functions (end-uses), and, second, the extent to which consumers are willing to use the products to perform these functions (consumers' tastes and habits). Evidence of this type is of particular importance under Article III of the GATT 1994, precisely because that provision is concerned with competitive relationships in the marketplace.

[368] Appellate Body Report on *EC – Asbestos*, paras. 101–103.
[369] Appellate Body Report on *EC – Asbestos*, para. 109.
[370] Appellate Body Report on *EC – Asbestos*, para. 114. In this regard, see also para. 278 of this Chapter. With respect to the minority's opinion on this point, see Appellate Body Report on *EC – Asbestos*, paras. 151–154.

> If there is – or could be – *no* competitive relationship between products, a Member cannot intervene, through internal taxation or regulation, to protect domestic production. Thus, evidence about the extent to which products can serve the same end-uses, and the extent to which consumers are – or would be – willing to choose one product instead of another to perform those end-uses, is highly relevant evidence in assessing the 'likeness' of those products under Article III:4 of the GATT 1994."[371]

245. After having found that the (degree of) toxicity of a product was a physical characteristic to be taken into account for the determination of likeness under Article III:4, the Appellate Body emphasized the significance of the toxicity of a subject product also in relation to consumers' behaviour:

> "In this case especially, we are also persuaded that evidence relating to consumers' tastes and habits would establish that the health risks associated with chrysotile asbestos fibres influence consumers' behaviour with respect to the different fibres at issue.[372] We observe that, as regards *chrysotile asbestos and PCG fibres*, the consumer of the fibres is a *manufacturer* who incorporates the fibres into another product, such as cement-based products or brake linings. We do not wish to speculate on what the evidence regarding these consumers would have indicated; rather, we wish to highlight that consumers' tastes and habits regarding *fibres*, even in the case of commercial parties, such as manufacturers, are very likely to be shaped by the health risks associated with a product which is known to be highly carcinogenic. A manufacturer cannot, for instance, ignore the preferences of the ultimate consumer of its products. If the risks posed by a particular product are sufficiently great, the ultimate consumer may simply cease to buy that product. This would, undoubtedly, affect a manufacturer's decisions in the marketplace. Moreover, in the case of products posing risks to human health, we think it likely that manufacturers' decisions will be influenced by other factors, such as the potential civil liability that might flow from marketing products posing a health risk to the ultimate consumer, or the additional costs associated with safety procedures required to use such products in the manufacturing process."[373]

246. In *EC – Asbestos*, the Appellate Body rejected Canada's argument that consumers' tastes and habits were irrelevant in this dispute because "the existence of the measure has disturbed normal conditions of competition between the products":[374]

> "In our Report in *Korea – Alcoholic Beverages*, we observed that, '[p]articularly in a market where there are regulatory barriers to trade or to competition, there may well be latent demand' for a product.[375] We noted that, in such situations, 'it may be highly relevant to examine latent demand' that is suppressed by regulatory barriers.[376] In addition, we said that 'evidence from other markets may be pertinent to the examination of the market at issue, particularly when demand on that market has been influenced by regulatory barriers to trade or to competition.'[377] We, therefore, do not accept Canada's contention that, in markets where normal conditions of competition have been disturbed by regulatory or fiscal barriers, consumers' tastes and habits cease to be relevant. In such situations, a Member may submit evidence of latent, or suppressed, consumer demand in that market, or it may submit evidence of substitutability from some relevant third market. In making this point, we do not wish to be taken to suggest that there *is* latent demand for chrysotile asbestos fibres. Our point is simply that the existence of the measure does not render consumers' tastes and habits irrelevant, as Canada contends."[378]

247. Further, in *EC – Asbestos*, the Appellate Body acknowledged that an analysis of the various criteria for establishing "likeness" can produce "conflicting indications"; however, it emphasized that the fact that the analysis of a particular criterion may produce an unclear result does not relieve a panel of its duty to inquire into the relevant evidence:

> "In many cases, the evidence will give conflicting indications, possibly within each of the four criteria. For instance, there may be some evidence of similar physical properties and some evidence of differing physical properties. Or the physical properties may differ completely, yet there may be strong evidence of similar end-uses and a high degree of substitutability of the products from the perspective of the consumer. A panel cannot decline to inquire into relevant evidence simply because it suspects that evidence may not be 'clear' or, for that matter, because the parties agree that certain evidence is not relevant. In any event, we have difficulty seeing how the Panel could conclude that an examination of consumers' tastes and habits 'would not provide clear results', given that the Panel did not examine *any* evidence relating to this criterion."[379]

"the situation of the parties dealing in [subject products]"

248. In *US – Gasoline*, the Panel addressed the respondent's argument that with respect to the treatment of the imported and domestic products, the situation of the parties dealing in gasoline must be taken into consideration:

> "The Panel observed first that the United States did not argue that imported gasoline and domestic gasoline were not like *per se*. It had argued rather that with respect to the treatment of the imported and domestic products, the situation of the parties dealing in the gasoline must be taken into consideration. The Panel, recalling its previous discussion of the factors to be taken into account in the determination of like product, noted that chemically-identical imported and domestic gasoline by definition have exactly the same physical characteristics, end-uses, tariff classification, and are perfectly substitutable. The Panel found therefore that chemically-identical imported and domestic gasoline are like products under Article III:4."[380]

Likeness of products when origin is the sole distinctive criterion

249. In *India – Autos*, the Panel declared that, when origin is the sole distinguishing criterion, it is correct to treat products as "alike" within the meaning of Article III:4:

> "The Panel notes that the only factor of distinction under the 'indigenization' condition between products which contribute to fulfilment of the condition and products which do not, is the origin of the product as either imported or domestic. India has not disputed the likeness of the relevant automotive parts and components of domestic or foreign origin for the purposes of Article III:4 of the GATT 1994. Origin being the sole criterion distinguishing the products, it is correct to treat such products as like products within the meaning of Article III:4."[381]

250. The Panel on *Canada – Wheat Exports and Grain Imports* confirmed this jurisprudence relying also on the Panel report in *Argentina – Hides and Leather*:

> "In *Argentina – Hides and Leather*, in dealing with a claim under Article III:2 of the GATT 1994, the panel found that where a Member draws an origin-based distinction in respect of internal taxes, a comparison of specific products is not required and, consequently, it is not necessary to examine the various likeness criteria. . . . While this finding is pertained to Article III:2, we consider that the same reasoning is applicable in this case *mutatis mutandi*."[382]

(iii) Reference to GATT practice

251. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 171–172.

(c) "laws, regulations or requirements"

(i) Differences from "measures" under Article XXIII:1(b)

252. In *Japan – Film*, the Panel examined the relationship between the term "laws, regulations or requirements" under Article III:4 and the term "measures" under Article XXIII:1(b). The Panel opined that the concept of "measure" for the purposes of Article XXIII:1(b) is "equally applicable to the definitional scope of 'all laws, regulations and requirements' in Article III:4:

> "A literal reading of the words *all laws, regulations and requirements* in Article III:4 could suggest that they may have a narrower scope than the word *measure* in Article XXIII:1(b). However, whether or not these words should be given as broad a construction as the word *measure*, in view of the broad interpretation assigned to them in the cases cited above, we shall assume for the purposes of our present analysis that they should be interpreted as encompassing a similarly broad range of government action and action by private parties that may be assimilated to government action. In this connection, we consider that our previous discussion of GATT cases on administrative guidance in relation to what may constitute a 'measure' under Article XXIII:1(b), specifically the panel reports on *Japan – Semi-conductors* and *Japan – Agricultural Products*, is equally applicable to the definitional scope of "all laws, regulations and requirements" in Article III:4."[383]

(ii) Non-mandatory measures

253. In *Canada – Autos*, the Panel, in a finding subsequently not addressed by the Appellate Body, held that a measure can be subject to Article III:4 even if its compliance is not mandatory, and noted as follows:

> "We note that it has not been contested in this dispute that, as stated by previous GATT and WTO panel and appellate body reports, Article III:4 applies not only to mandatory measures but also to conditions that an enterprise accepts in order to receive an advantage,[384] including in cases where the advantage is in the form of a benefit with respect to the conditions of importation of a product.[385] The fact that compliance with the CVA

[384] The footnote to this sentence refers to, as an example, Panel Report on *EEC – Parts and Components*, para. 5.21.
[385] (*footnote original*) See, e.g., Appellate Body Report on *EC – Bananas III*, para. 211.

requirements is not mandatory but a condition which must be met in order to obtain an advantage consisting of the right to import certain products duty-free therefore does not preclude application of Article III:4."[386]

254. In *Canada – Wheat Exports and Grain Imports*, Canada argued that the measure at issue could only be found inconsistent if it mandated or required less favourable treatment. Making reference to the Appellate Body Report in *US – Corrosion-Resistant Steel Sunset Review*[387], the Panel made the following finding which was not challenged on appeal:

"Canada is of the view that since the United States in this case is challenging Section 57(c), as such, Section 57(c) would, under GATT/WTO practice, be inconsistent with Article III:4 only if it mandated, or required, less favourable treatment of foreign grain. Canada is referring here to the so-called "mandatory/discretionary" distinction which has been applied by numerous GATT and WTO panels. The United States did not specifically address this point. We note that the Appellate Body has not, as yet, expressed a view on whether the mandatory/discretionary distinction is a legally appropriate analytical tool for panels to use. In this case, our ultimate conclusion with respect to the United States' challenge to Section 57(c) does not depend on whether or not the mandatory/discretionary distinction is valid. This said we will continue on the assumption that Section 57(c) is inconsistent with Article III:4 only if it mandates, or requires, less favourable treatment of imported grain."[388]

(iii) Action of private parties

255. In *Canada – Autos*, the Panel examined the GATT-consistency of commitments undertaken by Canadian motor vehicle manufacturers in their letters addressed to the Canadian Government to increase Canadian value added in the production of motor vehicles. Referring to the GATT Panel Reports on *Canada – FIRA* and *EEC – Parts and Components*[389], the Panel analysed whether the action of private parties is subject to Article III:4. The Panel found that "[n]either legal enforceability [n]or the existence of a link between a private action and an advantage conferred by a government is a necessary condition in order for an action by a private party to constitute a 'requirement'":

"It is evident from the reasoning of the Panel Reports in *Canada – FIRA* and in *EEC – Parts and Components* that these Reports do not attempt to state general criteria for determining whether a commitment by a private party to a particular course of action constitutes a 'requirement' for purposes of Article III:4. While these cases are instructive in that they confirm that both legally enforceable undertakings and undertakings accepted by a firm to obtain an advantage granted by a government can constitute 'requirements' within the meaning of Article III:4, we do not believe that they provide support for the proposition that either legal enforceability or the existence of a link between a private action and an advantage conferred by a government is a necessary condition in order for an action by a private party to constitute a 'requirement.' To qualify a private action as a 'requirement' within the meaning of Article III:4 means that in relation to that action a Member is bound by an international obligation, namely to provide no less favourable treatment to imported products than to domestic products.

A determination of whether private action amounts to a 'requirement' under Article III:4 must therefore necessarily rest on a finding that there is a nexus between that action and the action of a government such that the government must be held responsible for that action. We do not believe that such a nexus can exist only if a government makes undertakings of private parties legally enforceable, as in the situation considered by the Panel on *Canada – FIRA*, or if a government conditions the grant of an advantage on undertakings made by private parties, as in the situation considered by the Panel on *EEC – Parts and Components*. We note in this respect that the word 'requirement' has been defined to mean '1. The action of requiring something; a request. 2. A thing required or needed, a want, a need. Also the action or an instance of needing or wanting something. 3. Something called for or demanded; a condition which must be complied with.' The word 'requirements' in its ordinary meaning and in light of its context in Article III:4 clearly implies government action involving a demand, request or the imposition of a condition but in our view this term does not carry a particular connotation with respect to the legal form in which such government action is taken. In this respect, we consider that, in applying the concept of 'requirements' in Article III:4 to situations involving actions by private parties, it is necessary to take into account that there is a broad variety of forms of government of action that can be effective in influencing the conduct of private parties."[390]

(iv) The term "requirement"

256. In *India – Autos*, the Panel analysed the notion of "requirement" within Article III:4:

"An ordinary meaning of the term 'requirement', as articulated in the New Shorter Oxford Dictionary, is 'Something called for or demanded; a condition which

[386] Panel Report on *Canada – Autos*, para. 10.73.

[387] In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body, in the context of an anti-dumping dispute, had expressly abstained from pronouncing generally on the continuing relevance or significance of the mandatory/discretionary distinction. Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 93.

[388] Panel Report on *Canada – Wheat Exports and Grain Imports*, para 6.184.

[389] GATT Panel Reports on *Canada – FIRA*, para. 5.4 and *EEC – Parts and Components*, para. 5.21.

[390] Panel Report on *Canada – Autos*, paras. 10.106–10.107.

must be complied with'. The *Canada – FIRA* panel further suggested that there must be a distinction between 'regulations' and 'requirements' and that requirements could not be assumed to mean the same, i.e. 'mandatory rules applying across the board'."[391]

257. In *India – Autos*, the Panel recalled that GATT jurisprudence "suggests two distinct situations which would satisfy the term 'requirement' in Article III:4: (i) obligations which an enterprise is 'legally bound to carry out'; [and (ii)] those which an enterprise voluntarily accepts in order to obtain an advantage from the government." It therefore stated that:

"A binding enforceable condition seems to fall squarely within the ordinary meaning of the word 'requirement', in particular as 'a condition which must be complied with'.[392] The enforceability of the measure in itself, independently of the means actually used or not to enforce it, is a sufficient basis for a measure to constitute a requirement under Article III:4 . . ."[393]

(v) Reference to GATT practice

258. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 173–174.

(d) "affecting the internal sale, offering for sale, purchase . . ."

259. In *EC – Bananas III*, the Appellate Body upheld the Panel's finding that the EC import licensing requirements concerning import quotas for bananas were inconsistent with Article III:4. The Panel had found that in answering the question whether Article III:4 was applicable to the EC import licensing requirements, it was important to distinguish between, on the one hand, the mere requirement to present a licence upon importation of a product as such and, on the other hand, the procedures applied by the European Communities in the context of the licence allocation. The latter procedures, in the view of the Panel, were internal laws, regulations and requirements affecting the internal sale of imported products.[394] In this context, the Panel opined that the scope of application of Articles I and III was not necessarily mutually exclusive.[395] The Appellate Body, in examining whether the measure at issue was subject to Article III:4, attached significance to the fact that the measure at issue went beyond "mere import licence requirements" and that the "intention" of the measure was to "cross-subsidize distributors of [certain] bananas":

"At issue in this appeal is not whether *any* import licensing requirement, as such, is within the scope of Article III:4, but whether the EC procedures and requirements for the *distribution* of import licences for imported bananas among eligible operators *within* the European Communities are within the scope of this provision. . . . These rules go far beyond the mere import licence requirements needed to administer the tariff quota for third-country and non-traditional ACP bananas or Lomé Convention requirements for the importation of bananas. These rules are intended, among other things, to cross-subsidize distributors of EC (and ACP) bananas and to ensure that EC banana ripeners obtain a share of the quota rents. As such, these rules affect 'the internal sale, offering for sale, purchase, . . .' within the meaning of Article III:4, and therefore fall within the scope of this provision."[396]

260. In *Canada – Autos*, the Panel, in a finding subsequently not addressed by the Appellate Body, interpreted the term "affecting" as having a broad scope of application and as referring to measures which have an effect on imported goods:

"With respect to whether the CVA requirements affect the 'internal sale, . . . or use' of products, we note that, as stated by the Appellate Body, the ordinary meaning of the word 'affecting' implies a measure that has 'an effect on' and thus indicates a broad scope of application.[397] The word 'affecting' in Article III:4 of the GATT has been interpreted to cover not only laws and regulations which directly govern the conditions of sale or purchase but also any laws or regulations which might adversely modify the conditions of competition between domestic and imported products.[398]

. . .

The idea that a measure which distinguishes between imported and domestic products can be considered to affect the internal sale or use of imported products only if such a measure is shown to have an impact under current circumstances on decisions of private firms with respect to the sourcing of products is difficult to reconcile with the concept of the 'no less favourable treatment' obligation in Article III:4 as an obligation addressed to governments to ensure effective equality of competitive opportunities between domestic and imported products, and with the principle that a showing of trade effects is not necessary to establish a violation of this obligation. In this respect, it should be emphasized that, contrary to what has been argued by Canada, the present case does not involve 'the possibility of a future change in circumstances creating the potential for discrimination' or 'discrimination that

[391] Panel Report on *India – Autos*, para. 7.174.
[392] (*footnote original*) New Oxford English Dictionary, as cited above.
[393] Panel Report on *India – Autos*, paras. 7.190–7.191.
[394] Panel Report on *EC – Bananas III*, para. 7.181.
[395] Panel Report on *EC – Bananas III*, para. 7.176.
[396] Appellate Body Report on *EC – Bananas III*, para. 211.
[397] (*footnote original*) Appellate Body Report on *EC – Bananas III*, para. 220.
[398] (*footnote original*) Panel Report on *Italy – Agricultural Machinery*, para. 12.

might exist after a change in circumstances that could occur at some unspecified time in the future.' Rather, the present case clearly involves formally different treatment of imported and domestic products albeit that the actual trade effects of this different treatment may be minimal under current circumstances. We therefore disagree with Canada's assertion that the CVA requirements do not entail a 'current potential for discrimination under present circumstances.' As a consequence, whether or not in practice motor vehicle manufacturers can easily meet the CVA requirements of the MVTO 1998 and the SROs on the basis of labour costs alone does not alter our finding that the CVA requirements affect the internal sale or use of products. We therefore do not consider it necessary to examine the factual issues raised by the parties in support of their different views on this matter.

In light of the foregoing considerations, we find that the CVA requirements affect the internal sale or use in Canada of imported parts, materials and non-permanent equipment for use in the production of motor vehicles. We further consider that the CVA requirements accord less favourable treatment within the meaning of Article III:4 to imported parts, materials and non-permanent equipment than to like domestic products because, by conferring an advantage upon the use of domestic products but not upon the use of imported products, they adversely affect the equality of competitive opportunities of imported products in relation to like domestic products."[399]

261. In the *Canada – Autos* case, the Panel found that the Canadian value added requirements, which stipulated that the amount of Canadian value added in the manufacturer's local production of motor vehicles must be equal to or greater than the amount of Canadian value added in the production of motor vehicles, by the same manufacturer, during an earlier reference period, were in violation of Article III:4 of GATT 1994. The Panel also addressed another aspect of the Canadian measures, the so-called "ratio requirements". Under these measures, the ratio of the net sales value of the vehicles *produced* in Canada to the net sales value of the vehicles *sold* for consumption in Canada during the relevant period had to be at least equal to the ratio in a reference year. The Panel found that the "ratio requirements" did not affect the sale of imported products:

"For purposes of Article III, the manner in which the ratio requirements affect the treatment accorded to motor vehicles with respect to the conditions of their importation is irrelevant. That there is a limitation on the net sales value of vehicles which can be imported duty-free therefore cannot constitute a grounds for finding a violation of Article III:4. The fact that internal sales of domestic vehicles are not subject to a 'similar' limitation is also without relevance. By definition, a violation of Article III cannot be established on the basis of a comparison between the conditions of internal sale of domestic products with the conditions of importation of imported products."[400]

262. In *India – Autos*, the Panel considered that, in order to rule on whether certain "indigenization" requirements were inconsistent with Article III:4 of GATT 1994, it had to determine, *inter alia*, whether the measures "affected" the "internal sale, purchase, transportation, distribution or use" of the products concerned. In that regard, the Panel recalled that the ordinary meaning of the term "affecting" has been understood to imply "a measure that has an effect on". It went on to state that:

"[T]he fact that the measure applies only to imported products need not [be], in itself, an obstacle to its falling within the purview of Article III.[401] For example, an internal tax, or a product standard conditioning the sale of the imported but not of the like domestic product, could nonetheless 'affect' the conditions of the imported product on the market and could be a source of less favorable treatment. Similarly, the fact that a requirement is imposed as a condition on importation is not necessarily in itself an obstacle to its falling within the scope of Article III:4.[402]"[403]

263. In *US – FSC (Article 21.5 – EC)*, the Appellate Body shared the view that the word "affecting" in Article III:4 of the GATT 1994 has a "broad scope of application":

"We observe that the clause in which the word 'affecting' appears – 'in respect of all laws, regulations and requirements *affecting* their internal sale, offering for sale, purchase, transportation, distribution or use' – serves to define the scope of application of Article III:4. (emphasis added) Within this phrase, the word 'affecting' operates as a link between identified types of gov-

[399] Panel Report on *Canada – Autos*, paras. 10.80 and 10.84–10.85.

[400] Panel Report on *Canada – Autos*, para. 10.149.

[401] (*footnote original*) Article III:1 refers to the application of measures "to imported *or* domestic products", which suggests that application to both is not necessary.

[402] (*footnote original*) Thus, the "advantage" to be obtained could consist in a right to import a product. See for instance, the Report of the second GATT panel on *EC – Bananas II* as cited and endorsed in *EC – Bananas III*, WT/DS27/R/USA, adopted on 25 September 1997, as modified by the Appellate Body Report, para. 4.385 (DSR 1997:II, 943:

"The Panel further noted that previous panels had found consistently that this obligation applies to any requirement imposed by a contracting party, including requirements 'which an enterprise voluntarily accepts to obtain an advantage from the government.' In the view of the Panel, a requirement to purchase a domestic product in order to obtain the right to import a product at a lower rate of duty under a tariff quota is therefore a requirement affecting the purchase of a product within the meaning of Article III:4."

[403] Panel Report on *India – Autos*, para. 7.306.

ernment action ('laws, regulations and requirements') and specific transactions, activities and uses relating to products in the marketplace ('internal sale, offering for sale, purchase, transportation, distribution or use'). It is, therefore, not *any* 'laws, regulations and requirements' which are covered by Article III:4, but only those which '*affect*' the specific transactions, activities and uses mentioned in that provision. Thus, the word 'affecting' assists in defining the types of measure that must conform to the obligation not to accord 'less favourable treatment' to like imported products, which is set out in Article III:4.

The word 'affecting' serves a similar function in Article I:1 of the *General Agreement on Trade in Services* (the 'GATS'), where it also defines the types of measure that are subject to the disciplines set forth elsewhere in the GATS but does not, in itself, impose any obligation.[404] In *EC – Bananas III*, we considered the meaning of the word 'affecting' in that provision of GATS. We stated:

> [t]he ordinary meaning of the word 'affecting' implies a measure that has 'an effect on', which indicates a *broad scope of application*. This interpretation is further reinforced by the conclusions of previous panels that the term 'affecting' in the context of Article III of the GATT is wider in scope than such terms as 'regulating' or 'governing'.[405] (emphasis added, footnote omitted)."[406]

(i) Reference to GATT practice

264. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 175–182.

(e) "treatment no less favourable"

(i) General

Equality of competitive opportunities

265. In *US – Gasoline*, the Panel, in a finding subsequently not addressed by the Appellate Body, found that the measure in question afforded to imported products less favourable treatment than that afforded to domestic products because sellers of domestic gasoline were authorized to use an individual baseline, while sellers of imported gasoline had to use the more onerous statutory baseline:

> "The Panel observed that domestic gasoline benefited in general from the fact that the seller who is a refiner used an individual baseline, while imported gasoline did not. This resulted in less favourable treatment to the imported product, as illustrated by the case of a batch of imported gasoline which was chemically-identical to a batch of domestic gasoline that met its refiner's individual baseline, but not the statutory baseline levels. In this case, sale of the imported batch of gasoline on the first day of an annual period would require the importer over the rest of the period to sell on the whole cleaner gasoline in order to remain in conformity with the Gasoline Rule. On the other hand, sale of the chemically-identical batch of domestic gasoline on the first day of an annual period would not require a domestic refiner to sell on the whole cleaner gasoline over the period in order to remain in conformity with the Gasoline Rule. The Panel also noted that this less favourable treatment of imported gasoline induced the gasoline importer, in the case of a batch of imported gasoline not meeting the statutory baseline, to import that batch at a lower price. This reflected the fact that the importer would have to make cost and price allowances because of its need to import other gasoline with which the batch could be averaged so as to meet the statutory baseline. Moreover, the Panel recalled an earlier panel report which stated that 'the words "treatment no less favourable" in paragraph 4 call for effective equality of opportunities for imported products in respect of laws, regulations and requirements affecting the internal sale, offering for sale, purchase, transportation, distribution or use of products.'[407] The Panel found therefore that since, under the baseline establishment methods, imported gasoline was effectively prevented from benefitting from as favourable sales conditions as were afforded domestic gasoline by an individual baseline tied to the producer of a product, imported gasoline was treated less favourably than domestic gasoline."[408]

266. In *Japan – Film*, the Panel reiterated the standard of equality of competitive conditions as a benchmark for establishing "no less favourable treatment":

> "Recalling the statement of the Appellate Body in *Japan – Alcoholic Beverages* that 'Article III obliges Members of the WTO to provide equality of competitive conditions for imported products in relation to domestic products'[409], we consider that this standard of effective equality of competitive conditions on the internal market is the standard of national treatment that is required, not only with regard to Article III generally, but also more particularly with regard to the 'no less favourable treatment' standard in Article III:4. We note in this regard that the interpretation of equal treatment in terms of effective equality of competitive opportunities, first clearly enunciated by the panel on *US – Section 337*[410], has been followed consistently in subsequent GATT and

[404] (*footnote original*) Article I:1 of the GATS provides that "[t]his Agreement applies to measures by Members *affecting* trade in services." (emphasis added)

[405] (*footnote original*) Appellate Body Report, *supra*, footnote 47, para. 220. We made the same statement regarding the word "affecting" in Article I:1 of the GATS in our Report in *Canada – Autos, supra*, footnote 56, para. 150.

[406] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 208.

[407] (*footnote original*) Panel Report on *US – Section 337*, para. 5.11.

[408] Panel Report on *US – Gasoline*, para. 6.10.

[409] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 16, citing Panel Reports on *US – Superfund*, para. 5.1.9 and *Japan – Alcoholic Beverages I*, para. 5.5(b).

[410] (*footnote original*) Panel Report on *US – Section 337*, para. 5.11.

WTO panel reports.[411] The panel report on *US – Section 337* explains the test in very clear terms, noting that

> 'the "no less favourable" treatment requirement set out in Article III:4, is unqualified. These words are to be found throughout the General Agreement and later Agreements negotiated in the GATT framework as *an expression of the underlying principle of equality of treatment* of imported products as compared to the treatment given either to other foreign products, under the most favoured nation standard, or to domestic products, under the national treatment standard of Article III. The words "treatment no less favourable" in paragraph 4 call for *effective equality of opportunities* for imported products in respect of the application of laws, regulations and requirements affecting the internal sale, offering for sale, purchase transportation, distribution or use of products. This clearly sets a minimum permissible standard as a basis' (emphasis added).[412]"[413]

267. In *Korea – Various Measures on Beef*, the measure at issue established a dual retail distribution system for the sale of beef. *Inter alia*, imported beef was to be sold either in specialized stores selling only imported beef or, in the case of larger department stores, in separate sales. The Appellate Body first held that such different treatment of imported products did not necessarily lead to less favourable treatment:

> "We observe . . . that Article III:4 requires only that a measure accord treatment to imported products that is 'no less favourable' than that accorded to like domestic products. A measure that provides treatment to imported products that is *different* from that accorded to like domestic products is not necessarily inconsistent with Article III:4, as long as the treatment provided by the measure is 'no less favourable'. According 'treatment no less favourable' means, as we have previously said, according *conditions of competition* no less favourable to the imported product than to the like domestic product.[414]
>
> This interpretation, which focuses on the *conditions of competition* between imported and domestic like products, implies that a measure according formally *different* treatment to imported products does not *per se*, that is, necessarily, violate Article III:4. In *United States – Section 337*, this point was persuasively made. In that case, the panel had to determine whether United States patent enforcement procedures, which were formally different for imported and for domestic products, violated Article III:4. That panel said:
>
> > 'On the one hand, contracting parties may apply to imported products *different* formal legal requirements if doing so would accord imported products more favourable treatment. On the other hand, it also has to be recognised that there may be cases where the application of formally *identical* legal provisions would in practice accord less favourable treatment to imported products and a contracting party might thus have to apply different legal provisions to imported products to ensure that the treatment accorded them is in fact no less favourable. For these reasons, the mere fact that imported products are subject under Section 337 to legal provisions that are different from those applying to products of national origin is in itself not conclusive in establishing inconsistency with Article III:4.'[415] (emphasis added)
>
> A formal difference in treatment between imported and like domestic products is thus neither necessary, nor sufficient, to show a violation of Article III:4. Whether or not imported products are treated 'less favourably' than like domestic products should be assessed instead by examining whether a measure modifies the *conditions of competition* in the relevant market to the detriment of imported products."[416]

268. In *EC – Asbestos*, the Appellate Body interpreted the term "no less favourable treatment" as requiring that the *group* of imported products not be accorded less favourable treatment than that accorded to the *group* of domestic like products:

> "A complaining Member must still establish that the measure accords to the group of 'like' *imported* products 'less favourable treatment' than it accords to the group of 'like' *domestic* products. The term 'less favourable treatment' expresses the general principle, in Article III:1, that internal regulations 'should not be applied . . . so as to afford protection to domestic production'. If there is 'less favourable treatment' of the group of 'like' imported products, there is, conversely, 'protection' of the group of 'like' domestic products. However, a Member may draw distinctions between products which have been found to be 'like', without, for this reason alone, according to the group of 'like' *imported* products

[411] (*footnote original*) See e.g. Panel Report on *Canada – Provincial Liquor Boards*, paras. 5.12–5.14 and 5.30–5.31; and Panel Report on *US – Malt Beverages*, para. 5.30; Panel Report on *US – Gasoline*, para. 6.10; Panel Report on *Canada – Periodicals*, p. 75; and Panel Report on *EC – Bananas III*, paras. 7.179–7.180.

[412] (*footnote original*) Panel Report on *US – Section 337*, paras. 5.11.

[413] Panel Report on *Japan – Film*, para. 10.379.

[414] This statement of the Appellate Body was made with respect to the following finding of the Panel:

> "Any regulatory distinction that is based exclusively on criteria relating to the nationality or the origin of the products is incompatible with Article III and this conclusion can be reached even in the absence of any imports (as hypothetical imports can be used to reach this conclusion) confirming that there is no need to demonstrate the actual and specific trade effects of a measure for it to be found in violation of Article III. The object of Article III:4 is, thus, to guarantee effective market access to imported products and to ensure that the latter are offered the same market opportunities as domestic products."

Panel Report on *Korea – Various Measures on Beef*, para. 627.

[415] (*footnote original*) Panel Report on *US – Section 337*, para. 5.11.

[416] Appellate Body Report on *Korea – Various Measures on Beef*, paras. 135–137.

'less favourable treatment' than that accorded to the group of 'like' *domestic* products. In this case, we do not examine further the interpretation of the term 'treatment no less favourable' in Article III:4, as the Panel's findings on this issue have not been appealed or, indeed, argued before us."[417]

Relationship with "upsetting the competitive relationship" under Article XXIII:1(b)

269. In *Japan – Film*, the Panel equated the standards of "upsetting effective equality of competitive opportunities" under Article III:4 and "upsetting the competitive relationship" under Article XXIII:1(b).

(ii) Methodology of comparison

Relevance of formal differences between imported and domestic products in legal requirements

270. In *Korea – Various Measures on Beef*, the Appellate Body addressed the relevance of formal regulatory differences between domestic and imported products and held that formally different treatment of imported and domestic goods did not, in and of itself, necessarily lead to less favourable treatment. See paragraph 267 above.

271. The Panel on *US – Gasoline* examined the consistency with Article III:4 of a United States environmental regulation on gasoline and its potential to result in formally different regulation for imported and domestic products. The Panel stated as follows:

"Although such a scheme could result in formally different regulation for imported and domestic products, the Panel noted that previous panels had accepted that this could be consistent with Article III:4.[418] The requirement under Article III:4 to treat an imported product no less favourably than the like domestic product is met by granting formally different treatment to the imported product, if that treatment results in maintaining conditions of competition for the imported product no less favourable than those of the like domestic product."[419]

272. In *EC – Bananas III*, the Appellate Body agreed with the Panel's finding that the EC allocation method of tariff quota for bananas was inconsistent with Article III:4. The Appellate Body addressed, among other things, so-called hurricane licences, which authorize operators who include or represent European Communities' and African, Caribbean and Pacific (ACP) producers, or producer organizations "to import in compensation third-country bananas and non-traditional ACP bananas for the benefit of the operators who directly suffered damage as a result of the impossibility of the supplying the Community market with bananas originating in affected producer regions"[420] because of the impact of tropical storms:

"Although [the] issuance [of subject import licences] results in increased exports from those countries, we note that hurricane licences are issued exclusively to EC producers and producer organizations, or to operators including or directly representing them. We also note that, as a result of the EC practice relating to hurricane licences, these producers, producer organizations or operators can expect, in the event of a hurricane, to be compensated for their losses in the form of 'quota rents' generated by hurricane licences. Thus, the practice of issuing hurricane licences constitutes an incentive for operators to market EC bananas to the exclusion of third-country and non-traditional ACP bananas. This practice therefore affects the competitive conditions in the market in favour of EC bananas. We do not dispute the right of WTO Members to mitigate or remedy the consequences of natural disasters. However, Members should do so in a manner consistent with their obligations under the GATT 1994 and the other covered agreements."[421]

273. In *US – FSC (Article 21.5 – EC)*, the Appellate Body declared that the examination of whether a measure involves "less favourable treatment" of imported products within the meaning of Article III:4 cannot rest on simple assertion, but must be founded on a careful analysis of the contested measure and of its implications in the marketplace:

"The examination of whether a measure involves 'less favourable treatment' of imported products within the meaning of Article III:4 of the GATT 1994 must be grounded in close scrutiny of the 'fundamental thrust and effect of the measure itself'.[422] This examination cannot rest on simple assertion, but must be founded on a careful analysis of the contested measure and of its implications in the marketplace. At the same time, however, the examination need not be based on the *actual effects* of the contested measure in the marketplace.[423]

. . .

In our view, the above conclusion is not nullified by the fact that the fair market value rule will not give rise to less favourable treatment for like imported products in each and every case . . . Even so, the fact remains that in an indefinite number of other cases, the fair market value rule operates, by its terms, as a significant constraint upon the use of imported input products. We are not entitled to disregard that fact."[424]

Relevance of "treatment accorded to similarly situated domestic parties"

274. In *US – Gasoline*, the Panel, in a finding subsequently not addressed by the Appellate Body, "rejected the US argument that the requirements of Article III:4 are met because imported gasoline is treated similarly to domestic gasoline from *similarly situated* domestic parties".[425] In addition to pointing out that "[the] wording [of Article III:4] does not allow less favourable treatment dependent on the characteristics of the producer and the nature of the data held by it"[426], the Panel held that even if the approach of the United States were followed, there would be great uncertainty and indeterminacy of the basis of treatment:

> "Apart from being contrary to the ordinary meaning of the terms of Article III:4, any interpretation of Article III:4 in this manner would mean that the treatment of imported and domestic goods concerned could no longer be assured on the objective basis of their likeness as products. Rather, imported goods would be exposed to a highly subjective and variable treatment according to extraneous factors. This would thereby create great instability and uncertainty in the conditions of competition as between domestic and imported goods in a manner fundamentally inconsistent with the object and purpose of Article III.
>
> [E]ven if the US approach were to be followed, under any approach based on similarly situated parties' the comparison could just as readily focus on whether imported gasoline from an identifiable *foreign* refiner was treated more or less favourably than gasoline from an identifiable US refiner. There were ... many key respects in which these refineries could be deemed to be the relevant similarly situated parties, and the Panel could find no inherently objective criteria by means of which to distinguish which of the many factors were relevant in making a determination that any particular parties were 'similarly situated'. Thus, although these refineries were similarly situated, the Gasoline Rule treated the products of these refineries differently by allowing only gasoline produced by the domestic entity to benefit from the advantages of an individual baseline. This consequential uncertainty and indeterminacy of the basis of treatment underlined ... the rationale of remaining within the terms of the clear language, object and purpose of Article III:4 as outlined above ...".[427]

Relevance of "more favourable treatment of some imported products"

275. In *US – Gasoline*, the Panel rejected the US argument that the subject regulation treated imported products "equally overall"[428], stating as follows:

> "The Panel noted that, in these circumstances, the argument that on average the treatment provided was equivalent amounted to arguing that less favourable treatment in one instance could be offset provided that there was correspondingly more favourable treatment in another. This amounted to claiming that less favourable treatment of particular imported products in some instances would be balanced by more favourable treatment of particular products in others."[429]

Relationship with other methodologies of comparison

276. With respect to the methodology of comparison for "in excess of those applied" under the first sentence of Article III:2, see paragraphs 175–186 above. With respect to the methodology of comparison in identifying "directly competitive or substitutable products" under the second sentence of Article III:2, see paragraph 209 above. With respect to the methodology of comparison in examining the "dissimilar taxation" under the second sentence of Article III:2, see paragraphs 217–218 above.

(f) Relationship with other GATT provisions

(i) Relationship with Article XX

277. In *US – Gasoline*, the Appellate Body discussed the relationship between Article III:4 and Article XX in interpreting Article XX(g). The Appellate Body stated:

> "Article XX(g) and its phrase, 'relating to the conservation of exhaustible natural resources,' need to be read in context and in such a manner as to give effect to the purposes and objects of the *General Agreement*. The context of Article XX(g) includes the provisions of the rest of the *General Agreement*, including in particular Articles I, III and XI; conversely, the context of Articles I and III and XI includes Article XX. Accordingly, the phrase 'relating to the conservation of exhaustible natural resources' may not be read so expansively as seriously to subvert the purpose and object of Article III:4. Nor may Article III:4 be given so broad a reach as effectively to emasculate Article XX(g) and the policies and interests it embodies. The relationship between the affirmative commitments set out in, *e.g.*, Articles I, III and XI, and the policies and interests embodied in the 'General Exceptions' listed in Article XX, can be given meaning within the framework of the *General Agreement* and its object and purpose by a treaty interpreter only on a case-to-case basis, by careful scrutiny of the factual and legal context in a given dispute, without disregarding the words actually used by the WTO Members themselves to express their intent and purpose."[430]

[428] Panel Report on *US – Gasoline*, para. 6.14.
[429] Panel Report on *US – Gasoline*, para. 6.14. In support of its proposition, the Panel cited GATT Panel Report on *US – Section 337*, BISD 36S/345, para. 5.14.
[430] Appellate Body Report on *US – Gasoline*, p. 18.

278. In *EC – Asbestos*, the Appellate Body found that "carcinogenicity, or toxicity, constitutes ... a defining aspect of the physical properties of [the subject products]". See paragraph 243 above. The Appellate Body disagreed with the Panel's finding that considering the health risks associated with a product under Article III:4 would negate the effect of Article XX(b):

> "We do not agree with the Panel that considering evidence relating to the health risks associated with a product, under Article III:4, nullifies the effect of Article XX(b) of the GATT 1994. Article XX(b) allows a Member to 'adopt and enforce' a measure, *inter alia*, necessary to protect human life or health, even though that measure is inconsistent with another provision of the GATT 1994. Article III:4 and Article XX(b) are distinct and independent provisions of the GATT 1994 each to be interpreted on its own. The scope and meaning of Article III:4 should not be broadened or restricted beyond what is required by the normal customary international law rules of treaty interpretation, simply because Article XX(b) exists and may be available to justify measures inconsistent with Article III:4. The fact that an interpretation of Article III:4, under those rules, implies a less frequent recourse to Article XX(b) does not deprive the exception in Article XX(b) of *effet utile*. Article XX(b) would only be deprived of *effet utile* if that provision could *not* serve to allow a Member to 'adopt and enforce' measures 'necessary to protect human ... life or health'. Evaluating evidence relating to the health risks arising from the physical properties of a product does not prevent a measure which is inconsistent with Article III:4 from being justified under Article XX(b). We note, in this regard, that, different inquiries occur under these two very different Articles. Under Article III:4, evidence relating to health risks may be relevant in assessing the *competitive relationship in the marketplace* between allegedly 'like' products. The same, or similar, evidence serves a different purpose under Article XX(b), namely, that of assessing whether a *Member* has a sufficient basis for 'adopting or enforcing' a WTO-inconsistent measure on the grounds of human health."[431]

(ii) Relationship with Article XXIII:1(b)

279. In *Japan – Film*, the Panel did not find a significant distinction between the standard it had set out for Article XXIII:1(b) and the standard of "upsetting effective equality of competitive opportunities" under Article III:4:

> "We recall our earlier findings that none of the eight distribution 'measures' cited by the United States had been shown to discriminate against imported products, either in terms of a *de jure* discrimination (a measure that discriminates *on its face* as to the origin of products) or in terms of a *de facto* discrimination (a measure that in its application upsets the relative competitive position between domestic and imported products, as it existed at the time when a relevant tariff concession was granted). In this connection, it could be argued that the standard we enunciated and applied under Article XXIII:1(b) – that of 'upsetting the competitive relationship' – may be different from the standard of 'upsetting effective equality of competitive opportunities' applicable to Article III:4. However, we do not see any significant distinction between the two standards apart from the fact that this Article III:4 standard calls for no less favourable treatment for imported products in general, whereas the Article XXIII:1(b) standard calls for a comparison of the competitive relationship between foreign and domestic products at two specific points in time, i.e., when the concession was granted and currently."[432]

(g) Reference to GATT practice

280. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 162–171.

5. Article III:8

(a) Item (b)

(i) "the payment of subsidies exclusively to domestic producers"

281. In the *Canada – Periodicals* dispute, one of the measures at issue related to postal rates charged by the Canadian Post Corporation, a Crown Corporation controlled by the Canadian Government. Canada Post applied reduced postal rates to Canadian-owned and Canadian-controlled periodicals meeting certain requirements. These lower postal rates were funded by the Department of Canadian Heritage, which provided funds to Canada Post so that this agency could in turn offer the reduced postal rates to eligible Canadian periodicals. Canada argued that the reduced postal rate was exempted from the strictures of Article III:4 by virtue of Article III:8(b), because the reduced postal rate represented "payment of subsidies exclusively to domestic producers". The Panel agreed with Canada and found that the funds provided by the Department of Canadian Heritage passed through Canada Post directly to the eligible Canadian publishers and that therefore, Canada's funded rate scheme on periodicals qualified under Article III:8 (b). The Appellate Body reversed the Panel's finding and found that Article III:8(b) applied only to the payment of subsidies which involves the expenditure of revenue by a government:

> "In examining the text of Article III:8(b), we believe that the phrase, 'including payments to domestic producers derived from the proceeds of internal taxes or charges applied consistently with the provisions of this Article and subsidies effected through governmental purchases

[431] Appellate Body Report on *EC – Asbestos*, para. 115.
[432] Panel Report on *Japan – Film*, para. 10.380.

of domestic products' helps to elucidate the types of subsidies covered by Article III:8(b) of the GATT 1994. It is not an exhaustive list of the kinds of programmes that would qualify as 'the payment of subsidies exclusively to domestic producers', but those words exemplify the kinds of programmes which are exempted from the obligations of Articles III:2 and III:4 of the GATT 1994.

Our textual interpretation is supported by the context of Article III:8(b) examined in relation to Articles III:2 and III:4 of the GATT 1994. Furthermore, the object and purpose of Article III:8(b) is confirmed by the drafting history of Article III. In this context, we refer to the following discussion in the Reports of the Committees and Principal Sub-Committees of the Interim Commission for the International Trade Organization concerning the provision of the Havana Charter for an International Trade Organization that corresponds to Article III:8(b) of the GATT 1994:

> 'This sub-paragraph was redrafted in order to make it clear that nothing in Article 18 could be construed to sanction the exemption of domestic products from internal taxes imposed on like imported products or the remission of such taxes. At the same time the Sub-Committee recorded its view that nothing in this sub-paragraph or elsewhere in Article 18 would override the provisions of Section C of Chapter IV.'[433]

We do not see a reason to distinguish a reduction of tax rates on a product from a reduction in transportation or postal rates. Indeed, an examination of the text, context, and object and purpose of Article III:8(b) suggests that it was intended to exempt from the obligations of Article III only the payment of subsidies which involves the expenditure of revenue by a government."[434]

282. In *Indonesia – Autos*, the Panel examined the consistency of certain tax exemption to domestically produced automobiles. The Panel rejected Indonesia's argument that tax exemptions are excluded from the scope of Article III by virtue of Article III:8(b), stating:

> "In line with its two previous arguments, Indonesia maintains the view that 'the payment of subsidies' in Article III:8(b) of GATT must refer to all subsidies identified in Article 1 of the SCM Agreement, not merely to the subset of 'direct' subsidies. Under this approach, any measure which constitutes a subsidy within the meaning of the SCM Agreement would not be subject to Article III of GATT. In Indonesia's view, only this interpretation avoids rendering the SCM Agreement meaningless.
>
> . . .
>
> We consider that the purpose of Article III:8(b) is to confirm that subsidies to producers do not violate Article III, so long as they do not have any component that introduces discrimination between imported and domestic products. In our view the wording 'payment of subsidies exclusively to domestic producers' exists so as to ensure that only subsidies provided to producers, and not tax or other forms of discrimination on products, be considered subsidies for the purpose of Article III:8(b) of GATT. This is in line with previous GATT panels[435] and WTO Appellate Body[436] reports.
>
> We recall also that the type of interpretation sought by Indonesia was explicitly excluded by the drafters of Article III:8(b) when they rejected a proposal by Cuba at the Havana Conference to amend the Article so as to read:
>
> > 'The provisions of this Article shall not preclude the exemption of domestic products from internal taxes as a means of indirect subsidization in the cases covered under Article [XVI]'.[437]
>
> The arguments submitted by Indonesia that its measures are only governed by the SCM Agreement clearly do not find any support in the wording of Article III:8(b) of GATT. On the contrary, Article III:8(b) confirms that the obligations of Article III and those of Article XVI (and the SCM Agreement) are different and complementary: subsidies to producers are subject to the national treatment provisions of Article III when they discriminate between imported and domestic products."[438]

(b) Reference to GATT practice

283. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 194–197.

D. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

284. The Panel on *US – Gasoline* did not examine a claim under GATT Article I, considering that it was unnecessary in view of the findings it had reached on the violation of Article III:4 for the subject measure.[439]

2. Article II

285. In *EC – Bananas III*, the Appellate Body found the EC import licensing system for bananas inconsistent with Article III:4. The European Communities claimed that Article III:4 was not applicable to the import licens-

---

[433] (*footnote original*) The Appellate Body cited Interim Commission for the International Trade Organization, Reports of the Committees and Principal Sub-Committees: ICITO I/8, Geneva, September 1948, p. 66. Article 18 and Section C of Chapter IV of the Havana Charter for an International Trade Organization correspond, respectively, to Article III and Article XVI of the GATT 1947.

[439] Panel Report on *US – Gasoline*, para. 6.19.

ing system because it was a border measure. The Appellate Body noted the existence of the "operator category rules" and the "activity function rules", which both affected the allocation of licences. The Appellate Body held that "these rules go far beyond the mere import licence requirements needed to administer the tariff quota . . . and therefore fall within the scope of [Article III:4]". See paragraph 125 above.

286. Exercising judicial economy, the Panel on *Korea – Various Measures on Beef* did not examine claims regarding a certain practice of the Korean state trading agency for beef under Articles III:4 and XVII after having found a violation of Articles XI and II:1(a) for that practice. See paragraph 477 below.

(a) Reference to GATT practice

287. With respect to GATT practice on this subject, see also GATT Analytical Index, pages 198–202.

3. Article VI

288. In *US – 1916 Act (EC)*, exercising judicial economy, the Panel found that the subject United States act was inconsistent with *GATT* Article VI and did not examine the EC claim that it was also inconsistent with *GATT* Article III. The Appellate Body did not address the issue upon appeal. The Panel first stated that Article VI was, with respect to the 1916 Act, the more specific provision, such that it had to be addressed first:

> "It is a general principle of international law that, when applying a body of norms to a given factual situation, one should consider that factual situation under the norm which most specifically addresses it.[440] As a result, one way to reply to the question above is to determine which article more specifically addresses the 1916 Act. We agree that this will require us to touch upon the substance of the case, but we recall that this test is used here for purely procedural reasons, that is to determine the order of our review. Such a *prima facie* analysis is, of course, without prejudice to the final findings on the issue of the applicability of Articles III:4 and VI, to be reached after a more detailed review of the scope of each provision, as necessary.
>
> As mentioned above, our understanding is that Article III:4 and Article VI are based on two different premises. The applicability of Article III:4 seems to depend primarily on whether the measure applied pursuant to the law at issue is an internal measure or not. In contrast, the applicability of Article VI seems to be based on the nature of the trade practice which is addressed. Under Article VI, the type of sanction eventually applied does not seem to be relevant for a measure to be considered as an anti-dumping measure, or not. We note in this respect that, for the EC, the fact that the 1916 Act imposes other sanctions than duties is insufficient to make that law fall outside the scope of Article VI and, for the United States, under Article VI, dumping does not have to be counteracted exclusively with duties. Consequently, it seems to us that the fact that a law imposes measures that can be qualified as 'internal measures', such as fines, damages or imprisonment, does not appear to be sufficient to conclude that Article VI is not applicable to that law.
>
> We also note that the parties agree that the 1916 Act deals with transnational price discrimination. Furthermore, the United States argues that it does not merely address dumping, and that other requirements under the 1916 Act make that law fall outside the scope of Article VI. We note that Article III:4 states that imported products
>
> > 'shall be accorded treatment no less favourable than that accorded to like products of national origin in respect of laws, regulations and requirements affecting their internal sale, offering for sale, purchase, transportation, distribution or use.'"[441]

289. The Panel held that damages, fines or imprisonment could theoretically accord less favourable treatment to imported products, but opined that the terms of Article III:4 were less specific than Article VI with respect to the case before it:

> "Determining that damages, fines or imprisonment, which are imposed on persons, may accord less favourable treatment to imported products with respect to their internal sale, offering for sale, purchase, transportation, distribution or use, is not *a priori* impossible and has actually been done by previous panels. However, a preliminary examination of the scope of application of Article III:4 (i.e. internal sale, offering for sale, purchase, transportation, distribution or use) would tend to show that the terms of Article III:4 are less specific than those of Article VI when it comes to the notion of transnational price discrimination.
>
> In application of the principle recalled by the Appellate Body *in European Communities – Bananas* and by the Permanent Court of International Justice in the *Serbian Loans* case, there would be reasons to reach the preliminary conclusion that we should review the applicability of Article VI to the 1916 Act in priority, as that article apparently applies to the facts at issue more specifically. This preliminary conclusion is based on our understanding of the arguments of the parties and on a preliminary review of the terms of Articles III:4 and VI. Since the fact

[440] (*footnote original*) See Appellate Body Report on *EC – Bananas III*, para. 204, and the judgement of the Permanent Court of International Justice in the *Serbian Loans* case (1929), where the PCIJ stated that "the special words, according to elementary principles of interpretation, control the general expression" (PCIJ, Series A, No. 20/21, at p. 30). See also György Haraszti, *Some Fundamental Problems of the Law of Treaties* (1973), p. 191.

[441] Panel Report on *US – 1916 Act (EC)*, paras. 6.76–6.78; Panel Report on *US – 1916 Act (Japan)*, paras. 6.75–6.76.

that the 1916 Act provides for the imposition of internal measures does not seem to be sufficient as such to differentiate the scope of application of Article III:4 and that of Article VI, we had to consider the other terms of these articles."[442]

290. The Panel on *US – 1916 Act (EC)* then held, after finding that the 1916 Act fell under the scope, and was in violation of, Article VI, that it was no longer necessary to consider whether some elements of the 1916 Act could also be subject to Article III:4:

"We recall that we decided to proceed first with a review of whether Article VI applied to the 1916 Act because Article VI seemed to address more specifically the terms of the 1916 Act. We found that the 1916 Act, because it targets 'dumping' within the meaning of Article VI of the GATT 1994, was fully subject to the provisions of Article VI of the GATT 1994 and the Anti-Dumping Agreement and could not evade the disciplines of Article VI by the mere fact that it had anti-trust objectives or included requirements of an anti-trust nature. We therefore find it unnecessary to determine whether some elements of the 1916 Act could be subject to Article III:4.

We also found that the 1916 Act violates the provisions of Article VI and certain provisions of the Anti-Dumping Agreement. We consider these findings sufficiently complete to enable the DSB to make sufficiently precise recommendations and rulings so as to allow for prompt compliance 'in order to ensure effective resolution of disputes to the benefit of all Members.'[443] Therefore, we are entitled to exercise judicial economy in accordance with WTO panel and Appellate Body practice and decide not to review the EC claims under Article III:4."[444]

291. The Panel on *US – 1916 Act (Japan)* further elaborated on the precise relationship between Article VI and Article III:

"When we considered the relationship between Article VI and Article III:4 of the GATT 1994, we noted that Article VI seemed to address the basic feature of the 1916 Act (i.e. transnational price discrimination) more directly than Article III:4. In our findings, we concluded that Article VI applies to a measure whenever that measure objectively addresses a situation of transnational price discrimination, as defined in Article VI:1. Thus, we found that the 1916 Act was *fully* subject to the provisions of Article VI of the GATT 1994 and the Anti-Dumping Agreement and could not escape the disciplines of Article VI by the mere fact that it had anti-trust objectives, did not address *injurious dumping* as such, included additional requirements of an anti-trust nature or led to the imposition of measures other than anti-dumping duties that were not border adjustment measures.

However, even though we considered that Article VI deals specifically with the type of price discrimination at issue, we did not address the question whether Article VI applied to the 1916 Act *to the exclusion* of Article III:4. In this regard, we recall that, in its report on *European Communities – Bananas*, the Appellate Body noted that:

'Although Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures. If the Panel had done so, then there would have been no need for it to address the alleged inconsistency with Article X:3(a) of the GATT 1994.'[445]"[446]

292. After recalling the findings of the Appellate Body in *EC – Bananas III*, the Panel on *US – 1916 Act* went on to distinguish the subject-matter at issue in that case from the case before it. The Appellate Body did not address the finding of the Panel that it was entitled to exercise judicial economy with respect to the claims under Article III:4:

"We are mindful of the fact that Article X:3(a) of the GATT 1994 deals with the way domestic trade laws in general should be applied, whereas Article 1.3 of the Agreement on Import Licensing Procedures deals with the way rules should be applied in the specific sector of import licensing. In contrast, it may be said that Articles III:4 and VI do not share the same purpose. However, we view the Appellate Body statement as applying the general principle of international law *lex specialis derogat legi generali*. This is particularly clear from its remark that the *Agreement* on Import Licensing Procedures 'deals specifically, and in detail, with the administration of import licensing procedures'. In our opinion, Article VI and the Anti-Dumping Agreement 'deals specifically, and in detail, with the administration of' anti-dumping. In the present case, the question of the applicability of Article III:4 was essentially raised by the type of measures imposed under the 1916 Act. On the basis of the reasoning of the Appellate Body, we conclude that, even assuming that Article III:4 is applicable, in light of our findings under Article VI and the Anti-Dumping Agreement, we do not need to make findings under Article III:4 of the GATT 1994.

We nevertheless recall that, as stated by the Appellate Body in its report on *Australia – Measures Affecting Importation of Salmon*,[447] our findings must be complete enough to enable the DSB to make sufficiently pre-

[442] Panel Report on *US – 1916 Act (EC)*, paras. 6.78–6.79; Panel Report on *US – 1916 Act (Japan)*, paras. 6.76–6.77. With respect to judicial economy in general, see Chapter on *DSU*, Section XXXVI.F.

[447] (*footnote original*) Appellate Body Report on *Australia – Salmon*, para. 223.

cise recommendations and rulings so as to allow for prompt compliance 'in order to ensure effective resolution of disputes to the benefit of all Members.'

Having regard to our findings under Article VI and the Anti-Dumping Agreement, and keeping in mind that, in our view, Article VI and the Anti-Dumping Agreement deal specifically and in detail with laws addressing dumping as such, we do not consider that making *additional* findings under Article III:4 is necessary in order to enable the DSB to make sufficiently precise recommendations and rulings so as to allow prompt compliance by the United States in order to ensure an effective resolution of this dispute.

Therefore, we find that we are entitled to exercise judicial economy and decide not to review the claims of Japan under Article III:4 of the GATT 1994."[448]

4. Article XI

293. Exercising judicial economy, the Panel on *Korea – Various Measures on Beef* did not examine claims regarding a certain practice of the Korean state trading agency for beef under Articles III:4 and XVII after having found a violation of Articles XI and II:1(a) for that practice. See paragraph 477 below.

294. In *EC – Asbestos*, the Panel rejected Canada's argument that the French ban on the manufacture, imports and exports, and domestic sales and transfer of certain asbestos and asbestos-containing products was not covered by *Note Ad Article III*, and thus, subject to Article XI:1 as well as Article III:4.[449] See paragraphs 401–402 below.

295. In *India – Autos*, the Panel recalled the Panel Report on *Canada – FIRA* when it stated that Articles III and XI of GATT 1994 have distinct scopes of application. It quoted from that Panel that "the General Agreement distinguishes between measures affecting the 'importation' of products, which are regulated in Article XI:1, and those affecting 'imported products', which are dealt with in Article III. If Article XI:1 were interpreted broadly to cover also internal requirements, Article III would be partly superfluous.[450]"[451]

296. In *India – Autos*, the Panel did, however, consider that under certain circumstances, specific measures may have an impact upon both the importation of products (Article XI) and the competitive conditions of imported products on the internal market (Article III):

"[I]t therefore cannot be excluded *a priori* that different aspects of a measure may affect the competitive opportunities of imports in different ways, making them fall within the scope either of Article III (where competitive opportunities on the domestic market are affected) or of Article XI (where the opportunities for importation itself, i.e. entering the market, are affected), or even that there may be, in perhaps exceptional circumstances, a potential for overlap between the two provisions, as was suggested in the case of state trading. . .

. . .

. . . there may be circumstances in which specific measures may have a range of effects. In appropriate circumstances they may have an impact both in relation to the conditions of importation of a product and in respect of the competitive conditions of imported products on the internal market within the meaning of Article III:4.[452] This is also in keeping with the well established notion that different aspects of the same measure may be covered by different provisions of the covered Agreements."[453]

297. With respect to GATT practice on this subject-matter, see also GATT Analytical Index, pages 201–204.

5. Article XVII

298. The Panel on *Korea – Various Measures on Beef* discussed the relationship between GATT Articles III and XVII. See paragraphs 138 above and 477 below.

(a) Reference to GATT practice

299. With respect to GATT practice, see GATT Analytical Index, page 204.

E. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. General

300. In *Japan – Alcoholic Beverages II*, in discussing the purpose of Article III, the Appellate Body stated:

"The broad purpose of Article III of avoiding protectionism must be remembered when considering the relationship between Article III and other provisions of the *WTO Agreement*."[454]

2. SPS Agreement

301. In *EC – Hormones (US)*, the Panel examined the consistency of certain sanitary measures of the European

[448] Panel Report on *US – 1916 Act (Japan)*, paras. 6.269–6.272.
[449] Panel Report on *EC – Asbestos*, para. 8.91.
[450] (*footnote original*) Panel Report, L/5504, adopted on 7 February 1987, para. 5.14.
[451] Panel Report on *India – Autos*, para. 7.220.
[452] (*footnote original*) The Panel notes that the TRIMS Agreement Illustrative List envisages measures relating to export requirements both in the context of Article XI:1, as noted above in the context of our analysis under Article XI:1, and in the context of Article III:4 of the GATT 1994, by listing as inconsistent with that provision measures which require "that an enterprise's purchases or use of imported products be limited to an amount related to the volume or value of local products that it exports" TRIMS Illustrative List, Item 1 (b).
[453] Panel Report on *India – Autos*, paras. 7.224 and 7.296.
[454] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 16.

Communities with Articles I and III of the *GATT 1994* and certain provisions of the *SPS Agreement*. With respect to the relationship between Article III of the *GATT 1994* and *SPS Agreement*, the Panel, in a finding subsequently not addressed by the Appellate Body, stated as follows:

> "Since we have found that the EC measures in dispute are inconsistent with the requirements of the SPS Agreement, we see no need to further examine whether the EC measures in dispute are also inconsistent with Article I or III of GATT.
>
> As noted above in paragraph 8.42, if we were to find an inconsistency with Article I or III of GATT, we would then need to examine whether this inconsistency could be justified, as argued by the European Communities, under Article XX(b) of GATT and would thus necessarily need to revert to the SPS Agreement under which we have already found inconsistencies. Since the European Communities has not invoked any defence under GATT other than Article XX(b), an inconsistency with Article I or III of GATT would, therefore, in any event, not be justifiable."[455]

3. TBT Agreement

302. In *EC – Sardines*, the Panel considered that, in this case, the analysis of the claims under the *TBT Agreement* would precede any examination of the claims under Article III:4 of *GATT 1994*. In doing so, the Panel recalled the Appellate Body's statement in *EC – Bananas III* which declared "that the panel 'should' have applied the Licensing Agreement first because this agreement deals 'specifically, and in detail' with the administration of import licensing procedures". In the Panel's view, the Appellate Body is suggesting that where two agreements apply simultaneously, a panel should normally consider the more specific agreement before the more general agreement."[456] Using that same rationale, the Panel concluded that since "[a]rguably, the TBT Agreement deals 'specifically, and in detail' with technical regulations", and considering the parties claims, "then the analysis under the TBT Agreement would precede any examination under [Article III:4 of] the GATT 1994."[457]

4. SCM Agreement

303. In *Indonesia – Autos*, the Panel examined the consistency with Article III of measures contained in the Indonesian National Car Programme, including a luxury tax exemptions given to certain domestically produced cars. Indonesia argued that the challenged measures were subsidies, which were exclusively governed by Article XVI of GATT and the *SCM Agreement*. Referring to the finding of the Appellate Body in *Japan – Alcoholic Beverages II* referenced in paragraph 300 above[458], the Panel concluded that there is no general conflict between Article III and the *SCM Agreement* for the following reasons:

> "[W]e think that Article III of GATT 1994 and the WTO rules on subsidies remain focused on different problems. Article III continues to prohibit discrimination between domestic and imported products in respect of internal taxes and other domestic regulations, including local content requirements. It does not 'proscribe' nor does it 'prohibit' the provision of any subsidy *per se*. By contrast, the SCM Agreement prohibits subsidies which are conditional on export performance and on meeting local content requirements, provides remedies with respect to certain subsidies where they cause adverse effects to the interests of another Member and exempts certain subsidies from actionability under the SCM Agreement. In short, Article III prohibits discrimination between domestic and imported products while the SCM Agreement regulates the provision of subsidies to enterprises.
>
> Contrary to what Indonesia claims, the fact that a government gives a subsidy to a firm does not imply that the subsidy itself will necessarily discriminate between imported and domestic products in contravention of Article III of GATT. Article III:8(b) of GATT makes clear that a government may use the proceeds of taxes collected equally on all imported and domestic products in order to provide a subsidy to domestic producers (to the exclusion of producers abroad).
>
> Finally, the fact that, as a result of the Uruguay Round, the SCM Agreement to some extent covers subject matters that were already covered by other GATT disciplines is not unique. This situation is similar to the relationship between GATT 1994 and GATS. In *Periodicals* and in *Bananas III*, the defending parties argued that since a set of rules on services exists now in GATS, the provisions of Article III:4 of GATT on distribution and transportation have ceased to apply. Twice the Appellate Body has ruled that the scope of Article III:4 was not reduced by the fact that rules on trade in services are found in GATS: 'The entry into force of the GATS, as Annex 1B of the WTO Agreement, does not diminish the scope of application of the GATT 1994.'
>
> Accordingly, we consider that Article III and the SCM Agreement have, generally, different coverage and do not impose the same type of obligations.[459] Thus there

[455] Panel Report on *EC – Hormones (US)*, paras. 8.272–8.273; Panel Report on *EC – Hormones (Canada)*, paras. 8.275–8.276.
[456] Panel Report on *EC – Sardines*, para. 7.15.
[457] Panel Report on *EC – Sardines*, para. 7.16.
[458] Panel Report on *Indonesia – Autos*, para. 14.28.
[459] (*footnote original*) This conclusion is confirmed, amongst other provisions, by the footnote to Article 32.1 of the SCM Agreement which recognizes that actions against subsidies remain possible under GATT 1994. Article 32.1 of the SCM Agreement reads as follows: "No specific action against a subsidy of another Member can be taken except in accordance with the provisions of GATT 1994, as interpreted by this Agreement". The footnote 56 to this Article reads as follows: "This paragraph is not intended to preclude action under other relevant provisions of GATT 1994, where appropriate".

is no general conflict between these two sets of provisions."[460]

304. The Panel on *Indonesia – Autos*, in the context of discussing the relationship between Article III and the *SCM Agreement*, considered in which manner "direct" taxes (taxes on individuals and economic entities) and "indirect" taxes (taxes on products) are covered by Article III of *GATT 1994*:

> "When subsidies to producers result from exemptions or reductions of indirect taxes on products, Article III:2 of GATT is relevant. In contrast, subsidies granted in respect of direct taxes are generally not covered by Article III:2, but may infringe Article III:4 to the extent that they are linked to other conditions which favour the use, purchase, etc. of domestic products."[461]

305. The Panel on *Indonesia – Autos* also rejected Indonesia's argument that if Article III applied to the subject measures, the *SCM Agreement* would be reduced to "inutility":

> "This is to say that the only subsidies that would be affected by the provisions of Article III are those that would involve discrimination between domestic and imported products. While Article III of GATT and the SCM Agreement may appear to overlap in respect of certain measures, the two sets of provisions have different purposes and different coverage. Indeed, they also offer different remedies, different dispute settlement time limits and different implementation requirements. Thus, we reject Indonesia's argument that the application of Article III to subsidies would reduce the SCM Agreement to 'inutility'.
>
> We note further that Indonesia's argument would imply that every time a measure involves tax discrimination in respect of products, that measure should be considered a subsidy governed exclusively by the SCM Agreement to the exclusion of Article III:2. It appears to us that this line of argument would reduce Article III:2 to 'inutility', since the very explicit (and arguably only) purpose of Article III:2 is to deal with tax discrimination in respect of products."[462]

306. In *Indonesia – Autos*, the Panel also addressed the significance of Article III:8(b) in the context of the relationship between Article III and the *SCM Agreement*. See paragraph 282 above.

5. TRIMs Agreement

307. The Panel on *Indonesia – Autos* addressed claims that certain Indonesian local content requirements for import duty exemptions to automobiles and their parts and components were inconsistent with the *TRIMs Agreement* and Article III:4 of the *GATT 1994*:

> "The complainants have claimed that the local content requirements under examination, and which we find are inconsistent with the TRIMs Agreement, also violate the provisions of Article III:4 of GATT. Under the principle of judicial economy,[463] a panel only has to address the claims that must be addressed to resolve a dispute or which may help a losing party in bringing its measures into conformity with the WTO Agreement. The local content requirement aspects of the measures at issue have been addressed pursuant to the claims of the complainants under the TRIMs Agreement. We consider therefore that action to remedy the inconsistencies that we have found with Indonesia's obligations under the TRIMs Agreement would necessarily remedy any inconsistency that we might find with the provisions of Article III:4 of GATT. We recall our conclusion that non applicability of Article III would not affect as such the application of the TRIMs Agreement. We consider therefore that we do not have to address the claims under Article III:4, nor any claim of conflict between Article III:4 of GATT and the provisions of the SCM Agreement."[464]

308. In *Canada – Autos*, following the finding of a violation of Article III:4, the Panel opined that a finding under the *TRIMs Agreement* was not necessary. The Appellate Body did not address this issue:

> "[W]e do not consider it necessary to make a specific ruling on whether the CVA requirements provided for in the MVTO 1998 and the SROs are inconsistent with Article 2.1 of the TRIMs Agreement. We believe that the Panel's reasoning in *EC – Bananas III* as to why it did not make a finding under the TRIMs Agreement after it had found that certain aspects of the EC' licensing procedures were inconsistent with Article III:4 of the GATT also applies to the present case.[465] Thus, on the one hand, a finding in the present case that the CVA requirements are not trade-related investment measures for the purposes of the TRIMs Agreement would not affect our finding in respect of the inconsistency of these requirements with Article III:4 of the GATT since the scope of that provision is not limited to trade-related investment measures. On the other hand, steps taken by Canada to bring these measures into conformity with Article III:4 would also eliminate the alleged inconsistency with obligations under the TRIMs Agreement."[466]

309. In *India – Autos*, the Panel was dealing with separate claims under both the GATT 1994 and the TRIMs Agreement. It noted that previous panels confronted with concurrent claims concerning these two agreements had taken differing approaches to the choice of order of analysis of such claims. The Panel recognized

[461] Panel Report on *Indonesia – Autos*, para. 14.38. As to the context of this paragraph, see paras. 303–306 of this Chapter.
[462] Panel Report on *Indonesia – Autos*, paras. 14.39–14.40.
[463] (*footnote original*) Appellate Body Report on *US – Shirts and Blouses*, pp. 17–20.
[464] Panel Report on *Indonesia – Autos*, para. 14.93.
[465] (*footnote original*) Panel Report on *EC – Bananas III*, para. 7.186.
[466] Panel Report on *Canada – Autos*, para. 10.91.

that, in some circumstances, there may be a practical significance in determining a particular order for the examination of claims based on the TRIMS and GATT 1994; for example if a party claimed as a defence that a measure had been notified under the TRIMs Agreement. Since that was not the case in this dispute, the Panel did not find any particular reason to start its examination on any particular order, nor did it consider that the end result would be affected by either determination of order of analysis. In fact, the Panel was not persuaded that, as a general matter, the TRIMs Agreement could inherently be characterized as more specific than the relevant GATT provisions, and stated:

> "As a general matter, even if there was some guiding principle to the effect that a specific covered Agreement might appropriately be examined before a general one where both may apply to the same measure, it might be difficult to characterize the TRIMs Agreement as necessarily more 'specific' than the relevant GATT provisions. Although the TRIMS Agreement 'has an autonomous legal existence', independent from the relevant GATT provisions, as noted by the *Indonesia – Autos* panel,[467] the substance of its obligations refers directly to Articles III and XI of the GATT, and clarifies their meaning, *inter alia*, through an Illustrative list. On one view, it simply provides additional guidance as to the identification of certain measures considered to be inconsistent with Articles III:4 and XI:1 of the GATT 1994. On the other hand, the TRIMs Agreement also introduces rights and obligations that are specific to it, through its notification mechanism and related provisions. An interpretative question also arises in relation to the TRIMs Agreement as to whether a complainant must separately prove that the measure in issue is a 'trade-related investment measure'. For either of these reasons, the TRIMs Agreement might be arguably more specific in that it provides additional rules concerning the specific measures it covers.[468] The Panel is therefore not convinced that, as a general matter, the TRIMs Agreement could inherently be characterized as more specific than the relevant GATT provisions."[469]

310. The Panel on *India – Autos* ultimately decided to examine the GATT claims first, since both complainants had addressed their claims under GATT 1994 prior to their claims under the TRIMS Agreement, and the order selected for examination of the claims could have an impact on the potential to apply judicial economy. In effect, the Panel stated:

> "It seems that an examination of the GATT provisions in this case would be likely to make it unnecessary to address the TRIMs claims, but not vice-versa. If a violation of the GATT claims was found, it would be justifiable to refrain from examining the TRIMs claims under the principle of judicial economy. Even if no violation was found under the GATT claims, that also seems an efficient starting point since it would be difficult to imagine that if no violation has been found of Articles III or XI, a violation could be found of Article 2 of the TRIMs Agreement, which refers to the same provisions. Conversely, if no violation of the TRIMs Agreement were found, this would not necessarily preclude the existence of a violation of GATT Articles III:4 or XI:1 because the scope of the GATT provisions is arguably broader if India's argument was accepted that there is a need to prove that a measure is an investment measure and its assertion that this is not the case with the measures before this Panel."[470]

6. GATS

311. In *Canada – Periodicals*, the Appellate Body examined the Panel's finding that Canada was in violation of Article III:2 in imposing an excise tax on split-run editions of periodicals, i.e. those editions which "contain[...] an advertisement that is primarily directed to a market in Canada and that does not appear in identical form in all editions of that issue of the periodical[s] that were distributed in the periodical[s'] country of origin."[471] Canada claimed that the excise tax was subject to the *GATS*, and thus, not subject to Article III:2 of the *GATT 1994*.[472] Rejecting this argument, the Appellate Body stated:

> "The entry into force of the GATS, as Annex 1B of the *WTO Agreement*, does not diminish the scope of application of the GATT 1994. . . .
>
> We agree with the Panel's statement:
>
> > 'The ordinary meaning of the texts of GATT 1994 and GATS as well as Article II:2 of the WTO Agreement, taken together, indicates that obligations under GATT 1994 and GATS can co-exist and that one does not override the other.'"[473]

312. In *EC – Bananas III*, the Appellate Body also addressed the question of "whether the GATS and the GATT 1994 are mutually exclusive agreements", as follows:

---

[467] (*footnote original*) Panel Report on *Indonesia – Autos*, WT/DS54/R, WT/DS55/R, WT/DS59/R, WT/DS64/R, para. 14.63 (DSR 1998:VI, 2201).

[468] (*footnote original*) To say, for instance, that the TRIMs Agreement is more specific because it contains a specific criterion of the presence or absence of a trade-related investment measure depends upon whether that is a distinct criterion and whether the lack of such a criterion in Articles III and XI of GATT 1994 makes these provisions more general as opposed to merely having a broader range of coverage on the same criteria. The only practical difference and potential advantage in looking at the TRIMs agreement first in this instance seems to be the possible utilization of the Illustrative List, to the extent that it would be relevant to the claims at issue and may facilitate the identification of a violation of Articles III:4 or XI:1 of GATT 1994.

[469] Panel Report on *India – Autos*, para. 7.157.

[470] Panel Report on *India – Autos*, para. 7.161.

[471] Panel Report on *Canada – Periodicals*, para. 2.2.

[472] Appellate Body Report on *Canada – Periodicals*, p. 17.

[473] Appellate Body Report on *Canada – Periodicals*, p. 19.

"The GATS was not intended to deal with the same subject matter as the GATT 1994. The GATS was intended to deal with a subject matter not covered by the GATT 1994, that is, with trade in services. Thus, the GATS applies to the supply of services. It provides, *inter alia*, for both MFN treatment and national treatment for services and service suppliers. Given the respective scope of application of the two agreements, they may or may not overlap, depending on the nature of the measures at issue. Certain measures could be found to fall exclusively within the scope of the GATT 1994, when they affect trade in goods as goods. Certain measures could be found to fall exclusively within the scope of the GATS, when they affect the supply of services as services. There is yet a third category of measures that could be found to fall within the scope of both the GATT 1994 and the GATS. These are measures that involve a service relating to a particular good or a service supplied in conjunction with a particular good. In all such cases in this third category, the measure in question could be scrutinized under both the GATT 1994 and the GATS. However, while the same measure could be scrutinized under both agreements, the specific aspects of that measure examined under each agreement could be different. Under the GATT 1994, the focus is on how the measure affects the goods involved. Under the GATS, the focus is on how the measure affects the supply of the service or the service suppliers involved. Whether a certain measure affecting the supply of a service related to a particular good is scrutinized under the GATT 1994 or the GATS, or both, is a matter that can only be determined on a case-by-case basis. This was also our conclusion in the Appellate Body Report in *Canada – Periodicals.*[474]"[475]

313. The finding that the scope of application of *GATT* and *GATS*, respectively, may or may not overlap, was reiterated by the Appellate Body in *Canada – Autos.*[476]

V. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV
Special Provisions relating to Cinematograph Films

If any contracting party establishes or maintains internal quantitative regulations relating to exposed cinematograph films, such regulations shall take the form of screen quotas which shall conform to the following requirements:

(*a*) Screen quotas may require the exhibition of cinematograph films of national origin during a specified minimum proportion of the total screen time actually utilized, over a specified period of not less than one year, in the commercial exhibition of all films of whatever origin, and shall be computed on the basis of screen time per theatre per year or the equivalent thereof;

(*b*) With the exception of screen time reserved for films of national origin under a screen quota, screen time including that released by administrative action from screen time reserved for films of national origin, shall not be allocated formally or in effect among sources of supply;

(*c*) Notwithstanding the provisions of subparagraph (*b*) of this Article, any contracting party may maintain screen quotas conforming to the requirements of subparagraph (*a*) of this Article which reserve a minimum proportion of screen time for films of a specified origin other than that of the contracting party imposing such screen quotas; *Provided* that no such minimum proportion of screen time shall be increased above the level in effect on April 10, 1947;

(*d*) Screen quotas shall be subject to negotiation for their limitation, liberalization or elimination.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

314. With respect to GATT practice concerning Article IV, see GATT Analytical Index, page 210.

VI. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Freedom of Transit

1. Goods (including baggage), and also vessels and other means of transport, shall be deemed to be in transit across the territory of a contracting party when the passage across such territory, with or without transshipment, warehousing, breaking bulk, or change in the mode of transport, is only a portion of a complete journey beginning and terminating beyond the frontier of the contracting party across whose territory the traffic passes. Traffic of this nature is termed in this article "traffic in transit".

2. There shall be freedom of transit through the territory of each contracting party, via the routes most convenient for international transit, for traffic in transit to or from the territory of other contracting parties. No

[474] (*footnote original*) Appellate Body Report on *Canada – Periodicals*, p. 19.
[475] Appellate Body Report on *EC – Bananas III*, para. 221.
[476] Appellate Body Report on *Canada – Autos*, para. 159.

distinction shall be made which is based on the flag of vessels, the place of origin, departure, entry, exit or destination, or on any circumstances relating to the ownership of goods, of vessels or of other means of transport.

3. Any contracting party may require that traffic in transit through its territory be entered at the proper custom house, but, except in cases of failure to comply with applicable customs laws and regulations, such traffic coming from or going to the territory of other contracting parties shall not be subject to any unnecessary delays or restrictions and shall be exempt from customs duties and from all transit duties or other charges imposed in respect of transit, except charges for transportation or those commensurate with administrative expenses entailed by transit or with the cost of services rendered.

4. All charges and regulations imposed by contracting parties on traffic in transit to or from the territories of other contracting parties shall be reasonable, having regard to the conditions of the traffic.

5. With respect to all charges, regulations and formalities in connection with transit, each contracting party shall accord to traffic in transit to or from the territory of any other contracting party treatment no less favourable than the treatment accorded to traffic in transit to or from any third country.*

6. Each contracting party shall accord to products which have been in transit through the territory of any other contracting party treatment no less favourable than that which would have been accorded to such products had they been transported from their place of origin to their destination without going through the territory of such other contracting party. Any contracting party shall, however, be free to maintain its requirements of direct consignment existing on the date of this Agreement, in respect of any goods in regard to which such direct consignment is a requisite condition of eligibility for entry of the goods at preferential rates of duty or has relation to the contracting party's prescribed method of valuation for duty purposes.

7. The provisions of this Article shall not apply to the operation of aircraft in transit, but shall apply to air transit of goods (including baggage).

315. With respect to GATT practice concerning Article V, see GATT Analytical Index, pages 214–217.

VII. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
Anti-dumping and Countervailing Duties

1. The contracting parties recognize that dumping, by which products of one country are introduced into the commerce of another country at less than the normal value of the products, is to be condemned if it causes or threatens material injury to an established industry in the territory of a contracting party or materially retards the establishment of a domestic industry. For the purposes of this Article, a product is to be considered as being introduced into the commerce of an importing country at less than its normal value, if the price of the product exported from one country to another

(*a*) is less than the comparable price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country, or,

(*b*) in the absence of such domestic price, is less than either

(i) the highest comparable price for the like product for export to any third country in the ordinary course of trade, or

(ii) the cost of production of the product in the country of origin plus a reasonable addition for selling cost and profit.

Due allowance shall be made in each case for differences in conditions and terms of sale, for differences in taxation, and for other differences affecting price comparability.*

2. In order to offset or prevent dumping, a contracting party may levy on any dumped product an anti-dumping duty not greater in amount than the margin of dumping in respect of such product. For the purposes of this Article, the margin of dumping is the price difference determined in accordance with the provisions of paragraph 1.*

3. No countervailing duty shall be levied on any product of the territory of any contracting party imported into the territory of another contracting party in excess of an amount equal to the estimated bounty or subsidy determined to have been granted, directly or indirectly,

on the manufacture, production or export of such product in the country of origin or exportation, including any special subsidy to the transportation of a particular product. The term "countervailing duty" shall be understood to mean a special duty levied for the purpose of offsetting any bounty or subsidy bestowed, directly, or indirectly, upon the manufacture, production or export of any merchandise.*

4. No product of the territory of any contracting party imported into the territory of any other contracting party shall be subject to anti-dumping or countervailing duty by reason of the exemption of such product from duties or taxes borne by the like product when destined for consumption in the country of origin or exportation, or by reason of the refund of such duties or taxes.

5. No product of the territory of any contracting party imported into the territory of any other contracting party shall be subject to both anti-dumping and countervailing duties to compensate for the same situation of dumping or export subsidization.

6. (*a*) No contracting party shall levy any anti-dumping or countervailing duty on the importation of any product of the territory of another contracting party unless it determines that the effect of the dumping or subsidization, as the case may be, is such as to cause or threaten material injury to an established domestic industry, or is such as to retard materially the establishment of a domestic industry.

(*b*) The CONTRACTING PARTIES may waive the requirement of subparagraph (*a*) of this paragraph so as to permit a contracting party to levy an anti-dumping or countervailing duty on the importation of any product for the purpose of offsetting dumping or subsidization which causes or threatens material injury to an industry in the territory of another contracting party exporting the product concerned to the territory of the importing contracting party. The CONTRACTING PARTIES shall waive the requirements of subparagraph (*a*) of this paragraph, so as to permit the levying of a countervailing duty, in cases in which they find that a subsidy is causing or threatening material injury to an industry in the territory of another contracting party exporting the product concerned to the territory of the importing contracting party.*

(*c*) In exceptional circumstances, however, where delay might cause damage which would be difficult to repair, a contracting party may levy a countervailing duty for the purpose referred to in subparagraph (*b*) of this paragraph without the prior approval of the CONTRACTING PARTIES; *Provided* that such action shall be reported immediately to the CONTRACTING PARTIES and that the countervailing duty shall be withdrawn promptly if the CONTRACTING PARTIES disapprove.

7. A system for the stabilization of the domestic price or of the return to domestic producers of a primary commodity, independently of the movements of export prices, which results at times in the sale of the commodity for export at a price lower than the comparable price charged for the like commodity to buyers in the domestic market, shall be presumed not to result in material injury within the meaning of paragraph 6 if it is determined by consultation among the contracting parties substantially interested in the commodity concerned that:

(*a*) the system has also resulted in the sale of the commodity for export at a price higher than the comparable price charged for the like commodity to buyers in the domestic market, and

(*b*) the system is so operated, either because of the effective regulation of production, or otherwise, as not to stimulate exports unduly or otherwise seriously prejudice the interests of other contracting parties.

B. TEXT OF *AD* ARTICLE VI

Ad Article VI
Paragraph 1

1. Hidden dumping by associated houses (that is, the sale by an importer at a price below that corresponding to the price invoiced by an exporter with whom the importer is associated, and also below the price in the exporting country) constitutes a form of price dumping with respect to which the margin of dumping may be calculated on the basis of the price at which the goods are resold by the importer.

2. It is recognized that, in the case of imports from a country which has a complete or substantially complete monopoly of its trade and where all domestic prices are fixed by the State, special difficulties may exist in determining price comparability for the purposes of paragraph 1, and in such cases importing contracting parties may find it necessary to take into account the possibility that a strict comparison with domestic prices in such a country may not always be appropriate.

Paragraphs 2 and 3

1. As in many other cases in customs administration, a contracting party may require reasonable security (bond or cash deposit) for the payment of anti-dumping or countervailing duty pending final determination of the facts in any case of suspected dumping or subsidization.

2. Multiple currency practices can in certain circumstances constitute a subsidy to exports which may be met by countervailing duties under paragraph 3 or can constitute a form of dumping by means of a partial depreciation of a country's currency which may be met by action under paragraph 2. By "multiple currency practices" is meant practices by governments or sanctioned by governments.

Paragraph 6 (b)

Waivers under the provisions of this subparagraph shall be granted only on application by the contracting party proposing to levy an anti-dumping or countervailing duty, as the case may be.

C. INTERPRETATION AND APPLICATION OF ARTICLE VI

1. Scope of Article VI

(a) Investigation initiated before entry into force of *WTO Agreement*

316. In *Brazil – Desiccated Coconut*, the Appellate Body upheld the Panel's finding that Article VI of *GATT 1994* does not apply to countervailing duty measures imposed as a result of an investigation initiated pursuant to an application made before the entry into force of the *WTO Agreement*. Having found that pursuant to Article 28 of the Vienna Convention on the Law of Treaties, "[a]bsent a contrary intention, a treaty cannot apply to acts or facts which took place, or situations which ceased to exist, before the date of its entry into force", the Appellate Body based its finding on the interpretation of Article 32.3 of the *SCM Agreement*, which sets forth that "the provisions of this Agreement shall apply to investigations . . . initiated pursuant to applications have been made on or after the date of entry into force for a WTO Agreement of the WTO Agreement". The Appellate Body stated that "[i]f Article 32.3 is read in conjunction with Articles 10 and 32.1 of the *SCM Agreement*, it becomes clear that the term 'this Agreement' in Article 32.3 means 'this [SCM] Agreement and Article VI of the GATT 1994'."[477] With reference to Articles 10 and 32.1 of the SCM Agreement, the Appellate Body went on to state:

> "From reading Article 10, it is clear that countervailing duties may only be imposed in accordance with Article VI of the GATT 1994 and the *SCM Agreement*. A countervailing duty being a specific action against a subsidy of another WTO Member, pursuant to Article 32.1, it can only be imposed 'in accordance with the provisions of GATT 1994, as interpreted by this Agreement'. The ordinary meaning of these provisions taken in their context leads us to the conclusion that the negotiators of the *SCM Agreement* clearly intended that, under the integrated *WTO Agreement*, countervailing duties may only be imposed in accordance with the provisions of Part V of the *SCM Agreement* and Article VI of the GATT 1994, taken together."[478]

317. After making the finding quoted in paragraph 316 above, the Appellate Body referred to the omission of note 2 to the preamble of the Tokyo Round SCM Code, which states "[w]herever in this Agreement there is reference to 'the terms of this Agreement' or the 'articles' or 'provisions of this Agreement' it shall be taken to mean, as the context requires, the provisions of the General Agreement as interpreted and applied by this Agreement", from the *SCM Agreement*. The Preamble, together with footnote 2, had not been retained in the new *SCM Agreement*. The Philippines argued that this omission was evidence that the term "this Agreement" in Article 32.3 was to be understood to refer only to the *SCM Agreement*. The Appellate Body was unconvinced:

> "This note related to a provision in the preamble to the *Tokyo Round SCM Code* which demonstrated the Tokyo Round signatories' desire 'to apply fully and to interpret the provisions of Articles VI, XVI and XXIII' of the GATT 1947. The preamble was not retained in the new text of the *SCM Agreement*. Consequently, the note also disappeared. The *SCM Agreement* contains a set of rights and obligations that go well beyond merely applying and interpreting Articles VI, XVI and XXIII of the GATT 1947. The title to the *SCM Agreement* was also modified in this respect. Like the Panel, 'we do not consider that the exclusion of this provision from the SCM Agreement sheds much light on the question before us'.[479]"[480]

318. In further support of its view that the term "this Agreement" referred to both the *SCM Agreement* and Article VI of the *GATT 1994*, the Appellate Body cited the following finding of the Panel, with the understanding that "the Panel's reference to '*SCM Agreements*' in this paragraph referred to the *SCM Agreement* and the Tokyo Round SCM Code":[481]

> "Article VI of GATT 1947 and the Tokyo Round SCM Code represent, as among Code signatories, a package of rights and obligations regarding the use of countervailing measures, and Article VI of GATT 1994 and the SCM Agreement represent a new and different package of rights and obligations, as among WTO Members, regarding the use of countervailing duties. Thus, Article VI and the respective SCM Agreements impose obligations on a potential user of countervailing duties, in the form of conditions that have to be fulfilled in order to impose a duty, but they also confer the right to impose a countervailing duty when those conditions are satisfied. The SCM Agreements do not merely impose additional substantive and procedural obligations on a potential user of countervailing measures. Rather, the SCM Agreements and Article VI together define, clarify and in some cases modify the whole package of rights

[477] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 17. Appellate Body later noted that Article 18.3 of the *Anti-Dumping Agreement* is an identical provision to Article 32.3 of the *SCM Agreement*. Appellate Body Report on *Brazil – Desiccated Coconut*, fn. 23.
[478] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 16.
[479] (*footnote original*) Panel Report on *Brazil – Desiccated Coconut*, fn. 62.
[480] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 17.
[481] Appellate Body Report on *Brazil – Desiccated Coconut*, fn. 21.

and obligations of a potential user of countervailing measures."[482]

319. In this regard, the Appellate Body noted that "[t]he fact that Article VI of the GATT 1947 could be invoked independently of the Tokyo Round SCM Code under the previous GATT system[483] does not mean that Article VI of GATT 1994 can be applied independently of the *SCM Agreement* in the context of the WTO."[484] The Appellate Body went on to state that "[t]he authors of the new WTO regime intended to put an end to the fragmentation that had characterized the previous system"[485], referring to the preamble and Article II:2 of the Marrakesh Agreement. Further, the Appellate Body stated that "... the Uruguay Round negotiators expressed an explicit intention to draw the line of application of the new *WTO Agreement* to countervailing duty investigations and reviews[486] at a different point in time from that for other general measures.[487]"[488]

320. In addition, the Appellate Body rejected the Philippines' argument that that "the transitional decisions[489] [of the Tokyo Round SCM Code signatories] recognize the right of WTO Members to invoke WTO norms even in situations involving elements that occurred prior to the entry into force of the *WTO Agreement*."[490] The Appellate Body opined that "[a]t the time the *Tokyo Round SCM Code* signatories agreed to these decisions, they were fully cognizant of the implications of the operation of Article 32.3 of the *SCM Agreement*."[491]

321. Lastly, the Appellate Body noted that its finding on the scope of Article VI of *GATT 1994* would not result in leaving Members without a right of action against those countervailing duty measures which are not covered by Article 32.3 of the *SCM Agreement*.[492] Rather, the Decision on Consequences of Withdrawal from or Termination of the Tokyo Round SCM Code, adopted by the Tokyo Round Subsidies and Countervailing Measures Committee, extended dispute settlement under the Tokyo Round SCM Code for two years, one year beyond the legal termination of the Tokyo Round SCM Code which occurred on 31 December 1995.

(b) Anti-dumping measures other than anti-dumping duties

322. In *US – 1916 Act*, the Appellate Body reviewed the Panels' finding that the United States' 1916 Antidumping Act was inconsistent with Article VI, and rejected the United States' appeal to the Panels' finding that the Act was to counteract "dumping" and thus, fell under the scope of Article VI. The Appellate Body considered that the issue depended on "whether Article VI regulates all possible measures Members can take in response to dumping."[493] In answering this question, the Appellate Body noted that "Article VI of the GATT 1994 must be read together with the provisions of the *Anti-Dumping Agreement*"[494] and referred to the text of Article 1 of the *Anti-Dumping Agreement*; specifically, the Appellate Body stated that "[s]ince 'an anti-dumping measure' must, according to Article 1 of the *Anti-Dumping Agreement*, be consistent with Article VI of the GATT 1994 and the provisions of the *Anti-Dumping Agreement*, it seems to follow that Article VI would apply to 'an anti-dumping measure', i.e., a measure against dumping."[495] The Appellate Body went on to state that "the scope of application of Article VI is clarified, in particular, by Article 18.1 of the *Anti-Dumping Agreement*"[496], and indicated that "... Article VI is applicable to any 'specific action against dumping' of exports, i.e., action

[492] Appellate Body Report on *Brazil – Desiccated Coconut*, pp. 20–21.
[493] Appellate Body Report on *US – 1916 Act*, para. 109.
[494] Appellate Body Report on *US – 1916 Act*, para. 118.
[495] Appellate Body Report on *US – 1916 Act*, para. 120.
[496] Appellate Body Report on *US – 1916 Act*, para. 121.

that is taken in response to situations presenting the constituent elements of 'dumping'":

> "[T]he ordinary meaning of the phrase 'specific action against dumping' of exports within the meaning of Article 18.1 is action that is taken in response to situations presenting the constituent elements of 'dumping'. 'Specific action against dumping' of exports must, at a minimum, encompass action that may be taken *only* when the constituent elements of 'dumping' are present. Since intent is not a constituent element of 'dumping', the *intent* with which action against dumping is taken is not relevant to the determination of whether such action is 'specific action against dumping' of exports within the meaning of Article 18.1 of the *Anti-Dumping Agreement*.
>
> Footnote 24 to Article 18.1 of the *Anti-Dumping Agreement* states:
>
> > 'This is not intended to preclude action under other relevant provisions of GATT 1994, as appropriate.'
>
> We note that footnote 24 refers generally to 'action' and not, as does Article 18.1, to 'specific action against dumping' of exports. 'Action' within the meaning of footnote 24 is to be distinguished from 'specific action against dumping' of exports, which is governed by Article 18.1 itself.
>
> Article 18.1 of the *Anti-Dumping Agreement* contains a prohibition on the taking of any 'specific action against dumping' of exports when such specific action is not 'in accordance with the provisions of GATT 1994, as interpreted by this Agreement'. Since the only provisions of the GATT 1994 'interpreted' by the *Anti-Dumping Agreement* are those provisions of Article VI concerning dumping, Article 18.1 should be read as requiring that any 'specific action against dumping' of exports from another Member be in accordance with the relevant provisions of *Article VI* of the GATT 1994, as interpreted by the *Anti-Dumping Agreement*.
>
> We recall that footnote 24 to Article 18.1 refers to '*other* relevant provisions of GATT 1994' (emphasis added). These terms can only refer to provisions other than the provisions of Article VI concerning dumping. Footnote 24 thus confirms that the 'provisions of GATT 1994' referred to in Article 18.1 are in fact the provisions of Article VI of the GATT 1994 concerning dumping.
>
> We have found that Article 18.1 of the *Anti-Dumping Agreement* requires that any 'specific action against dumping' be in accordance with the provisions of Article VI of the GATT 1994 concerning dumping, as those provisions are interpreted by the *Anti-Dumping Agreement*. It follows that Article VI is applicable to any 'specific action against dumping' of exports, i.e., action that is taken in response to situations presenting the constituent elements of 'dumping'."[497]

323. The Appellate Body on *US – 1916 Act* rejected the United States' argument that the term "may" in Article VI:2 indicates that Members may choose to impose other types of anti-dumping measures than anti-dumping duties, in which case they are not bound by the rules of Article VI, stating as follows:

> "[I]t is not obvious to us, based on the wording of Article VI:2 alone, that the verb 'may' also implies that a Member is permitted to impose a measure other than an anti-dumping duty.
>
> We believe that the meaning of the word 'may' in Article VI:2 is clarified by Article 9 of the *Anti-Dumping Agreement* on the 'Imposition and Collection of Anti-dumping Duties'. Article VI of the GATT 1994 and the *Anti-Dumping Agreement* are part of the same treaty, the *WTO Agreement*. As its full title indicates, the *Anti-Dumping Agreement* is an 'Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994'. Accordingly, Article VI must be read in conjunction with the provisions of the *Anti-Dumping Agreement*, including Article 9.
>
> . . .
>
> In light of this provision, the verb 'may' in Article VI:2 of the GATT 1994 is, in our opinion, properly understood as giving Members a choice between imposing an anti-dumping duty *or not*, as well as a choice between imposing an anti-dumping duty equal to the dumping margin or imposing a lower duty. We find no support in Article VI:2, read in conjunction with Article 9 of the *Anti-Dumping Agreement*, for the United States' argument that the verb 'may' indicates that Members, to counteract dumping, are permitted to take measures other than the imposition of anti-dumping duties."[498]

324. The Appellate Body further elaborated upon this jurisprudence in *US – Offset Act (Byrd Amendment)*. With regard to the term "specific" in the phrase "specific action against dumping or a subsidy", the Appellate Body made reference to its report in *US – 1916 Act* (see paragraph 322 above) and further specified that "the measure must be inextricably linked to, or have a strong correlation with, the constituent elements of dumping or of a subsidy. Such link or correlation may, as in the 1916 Act, be derived from the text of the measure itself."[499] With regard to the specific measure at issue in *US – Offset Act (Byrd Amendment)*, the Appellate Body agreed with the Panel's finding that the Offset Act was a

---

[497] Appellate Body Report on *US – 1916 Act*, paras. 122–126. In addition to the foregoing reasoning of the Appellate Body, the Panel, which reached the same conclusion on the scope of Article VI:2, discussed the object and purpose of the *GATT 1994*, of the *Anti-Dumping Agreement*, or of the *WTO Agreement*, and the preparatory work for Article VI:2. Panel Report on *US – 1916 Act (Japan)*, paras. 6.223–6.229 *See also* Panel Report on *US – 1916 Act (EC)*, paras. 6.200–6.203.

[498] Appellate Body Report on *US – 1916 Act*, paras. 113–116.

[499] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, paras. 238–239.

specific action related to dumping as defined in Article VI:1 of the *GATT 1994* and Article 18.1 of the *Anti-Dumping Agreement*:

> "It is clear from the text of the CDSOA [the Offset Act], in particular from Section 754(a) of the Tariff Act[500], that the CDSOA offset payments are inextricably linked to, and strongly correlated with, a determination of dumping, as defined in Article VI:1 of the GATT 1994 and in the *Anti-Dumping Agreement*, or a determination of a subsidy, as defined in the *SCM Agreement*. The language of the CDSOA is unequivocal. *First*, CDSOA offset payments can be made *only* if anti-dumping duties or countervailing duties have been collected. *Second*, such duties can be collected *only* pursuant to an anti-dumping duty order or countervailing duty order. *Third*, an anti-dumping duty order can be imposed *only* following a determination of dumping, as defined in Article VI:1 of the GATT 1994 and in the *Anti-Dumping Agreement*. *Fourth*, a countervailing duty order can be imposed only following a determination that exports have been subsidized, according to the definition of a subsidy in the *SCM Agreement*. In the light of the above elements, we agree with the Panel that 'there is a clear, direct and unavoidable connection between the determination of dumping and CDSOA offset payments', and we believe the same to be true for subsidization. In other words, it seems to us unassailable that CDSOA offset payments can be made only following a determination that the constituent elements of dumping or subsidization are present. Therefore, consistent with the test established in *US – 1916 Act*, we find that the CDSOA is 'specific action' related to dumping or a subsidy within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*."[501]

325. In *US – Offset Act (Byrd Amendment)*, the Appellate Body further rejected the United States' argument, that an action that falls within the scope of footnote 24 of the *Anti-Dumping Agreement* cannot be characterized as a "specific action" within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and therefore would not be prohibited. The Appellate Body made reference to its interpretation of footnote 24 in *US – 1916 Act (*see paragraph 322 above), where it found that "action" in the sense of footnote 24 has to be distinguished from "specific action against dumping" as in Article 18.1 of the *Anti-Dumping Agreement*[502] and continued to say:

> "The United States' reasoning is tantamount to treating footnotes 24 [of the *Anti-Dumping Agreement*] and 56 [of the *SCM Agreement*] as the primary provisions, while according Articles 18.1 [of the *Anti-Dumping Agreement*] and 32.1 [of the *SCM Agreement*] residual status. This not only turns the normal approach to interpretation on its head, but it also runs counter to our finding in *US – 1916 Act*. In that case, we provided guidance for determining whether an action is specific to dumping (or to a subsidy): an action is specific to dumping (or a subsidy) when it may be taken *only* when the constituent elements of dumping (or a subsidy) are present, or, put another way, when the measure is inextricably linked to, or strongly correlates with, the constituent elements of dumping (or of a subsidy). This approach is based on the *texts* of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*, and not on the accessory footnotes. Footnotes 24 and 56 are clarifications of the main provisions, added to avoid ambiguity; they confirm what is implicit in Article 18.1 of the *Anti-Dumping Agreement* and in Article 32.1 of the *SCM Agreement*, namely, that an action that is *not* 'specific' within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*, but is nevertheless related to dumping or subsidization, is not prohibited by Article 18.1 of the *Anti-Dumping Agreement* or Article 32.1 of the *SCM Agreement*."[503]

326. With regard to the term "against" in the phrase "specific action against dumping or a subsidy", the Appellate Body agreed with the Panel that "there is no requirement that the measure must come into direct contact with the imported product, or entities connected to, or responsible for, the imported good such as the importer, exporter or foreign producer" and further agreed with the Panel that the test should focus on dumping or subsidization "as *practices*". The Appellate Body further specified that for determining the meaning of "against" in the present context:

> "[I]t is necessary to assess whether the design and structure of a measure is such that the measure is 'opposed to', has an adverse bearing on, or, more specifically, has the effect of dissuading the practice of dumping or the practice of subsidization, or creates an incentive to terminate such practices. In our view, the CDSOA [Offset Act] has exactly those effects because of its design and structure. The CDSOA effects a transfer of financial resources from the producers/exporters of dumped or subsidized goods to their domestic competitors. This is demonstrated by the following elements of the CDSOA regime. *First*, the CDSOA offset payments are financed from the anti-dumping or countervailing duties paid by the foreign producers/exporters. *Second*, the CDSOA

[500] (*footnote original*) Section 754(a) of the Tariff Act provides:

> "Duties assessed pursuant to a countervailing duty order, an anti-dumping duty order, or a finding under the Antidumping Act of 1921 shall be distributed on an annual basis under this section to the affected domestic producers for qualifying expenditures. Such distribution shall be known as the "continued dumping and subsidy offset."

[501] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 242.

[502] See above, para. 322.

[503] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 262.

offset payments are made to an 'affected domestic producer', defined in Section 754(b) of the Tariff Act as 'a petitioner or interested party in support of the petition with respect to which an anti-dumping duty order, a finding under the Antidumping Act of 1921, or a countervailing duty order has been entered' and that 'remains in operation'. In response to our questioning at the oral hearing, the United States confirmed that the 'affected domestic producers' which are eligible to receive payments under the CDSOA, are necessarily competitors of the foreign producers/exporters subject to an anti-dumping or countervail order. *Third*, under the implementing regulations issued by the United States Commissioner of Customs ('Customs') on 21 September 2001, the 'qualifying expenditures' of the affected domestic producers, for which the CDSOA offset payments are made, 'must be related to the production of the same product that is the subject of the related order or finding, with the exception of expenses incurred by associations which must relate to a specific case.' *Fourth*, Customs has confirmed that there is no statutory or regulatory requirement as to how a CDSOA offset payment to an affected domestic producer is to be spent, thus indicating that the recipients of CDSOA offset payments are entitled to use this money to bolster their competitive position *vis-à-vis* their competitors, including the foreign competitors subject to anti-dumping or countervailing duties. All these elements lead us to conclude that the CDSOA has an adverse bearing on the foreign producers/exporters in that the imports into the United States of the dumped or subsidized products (besides being subject to anti-dumping or countervailing duties) result in the financing of United States competitors – producers of like products – through the transfer to the latter of the duties collected on those exports. Thus, foreign producers/exporters have an incentive not to engage in the practice of exporting dumped or subsidized products or to terminate such practices. Because the CDSOA has an adverse bearing on, and, more specifically, is designed and structured so that it dissuades the practice of dumping or the practice of subsidization, and because it creates an incentive to terminate such practices, the CDSOA is undoubtedly an action 'against' dumping or a subsidy, within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*."

327. The Appellate Body on *US – Offset Act (Byrd Amendment)* rejected the United States' argument that contrary to *US – 1916 Act*, the language of the Offset Act does not refer to the constituent elements of dumping and clarified that the finding in *US – 1916 Act* was not to be interpreted as to "*require* that the language of the measure include the constituent elements of dumping". On the contrary, the test established in *US – 1916 Act* "is met not only when constituent elements of dumping are 'explicitly built into' the actions at issue, but also where . . . they are implicit in the express conditions for taking such action."[504]

2. Reference to GATT practice

328. With respect to the further treatment of this subject-matter under GATT 1947, see GATT Analytical Index, pages 237–238.

3. Interpretative materials

(a) Tokyo Round Agreements

329. In *Brazil – Desiccated Coconut*, the Panel considered that Article VI of *GATT 1994* does not apply, in isolation from the *SCM Agreement*, to countervailing duty cases where the investigation has been initiated pursuant to an application made before the entry into force of the *WTO Agreement*. The Panel's finding and reasoning were subsequently upheld by the Appellate Body. See paragraphs 316–321 above. The Appellate Body, however, found it unnecessary to address one particular reason the Panel had given for its finding, namely that if Article VI were to apply independently from the *SCM Agreement*, Members might be subject to "a package of rights and obligations that were potentially more onerous than those to which they were subject under Article VI in conjunction with the Tokyo Round SCM Code when they initiated the investigation."[505] The Panel noted that the Tokyo Round SCM Code did not only impose additional *obligations* on a contracting party imposing countervailing duties, but also clarified and added some *rights* for such contracting party, such that certain obligations imposed by Article VI in conjunction with either the Tokyo Round SCM Code or the *SCM Agreement* were less stringent and easier to meet than obligations imposed by Article VI in isolation.[506] In this regard, the Panel also rejected the argument by the Philippines that Article VI of *GATT 1994*, as opposed to Article VI of *GATT 1947*, could be interpreted in the light of the Tokyo Round SCM Code and practice of the Code signatories; the Philippines were arguing that this interpretation would avoid the risk that Members would, through the application of Article VI of *GATT 1994* in isolation, be subject to obligations beyond those imposed by Article VI of *GATT 1947* in

[504] Appellate Body Report on *United States – Offset Act (Byrd Amendment)*, para. 244 quoting the European Communities', India's, Indonesia's and Thailand's appellee's submission at para. 14.

[505] Panel Report on *Brazil – Desiccated Coconut*, para. 253. The Appellate Body upheld the Panel's conclusion on the applicability of Article VI of GATT 1994 to this dispute, however, on different grounds, and thus, stated that "it is not necessary to determine whether applying Article VI of the GATT 1994 independently of the *SCM Agreement* would be more onerous than applying them together." Appellate Body Report on *Brazil – Desiccated Coconut*, p. 21.

[506] Panel Report on *Brazil – Desiccated Coconut*, paras. 246–253.

conjunction with the Tokyo Round SCM Code. The Panel noted:

> "[W]e do not consider that it would be appropriate to interpret Article VI of GATT 1994 in light of the Tokyo Round SCM Code. Article 31:3(a) of the Vienna Convention on the Law of Treaties ('the Vienna Convention'), which is generally held to reflect customary principles of international law regarding treaty interpretation, provides that 'any subsequent agreement between the parties to a treaty regarding its interpretation or the application of its provisions' may be taken into account when interpreting a treaty. The Tokyo Round SCM Code may constitute such a subsequent agreement among Tokyo Round SCM Code signatories regarding the interpretation of Article VI of GATT 1947. However, Article II:4 of the WTO Agreement provides that the GATT 1994 is 'legally distinct' from the GATT 1947. While GATT 1994 consists of, *inter alia*, 'decisions of the CONTRACTING PARTIES to GATT 1947,' the Tokyo Round SCM Code is not a 'decision' of the CONTRACTING PARTIES. Thus, the Tokyo Round SCM Code does not represent a subsequent agreement regarding interpretation of Article VI of GATT 1994. For the Panel to conclude to the contrary would in effect convert that Code into a 'covered agreement' under Appendix 1 of the DSU. If such an approach were followed, WTO Members that were Tokyo Round Code signatories would find that their Code obligations were now enforceable under the WTO dispute settlement system.
>
> Article XVI:1 of the WTO Agreement provides that, '[e]xcept as otherwise provided under this Agreement or the Multilateral Trade Agreements, the WTO shall be guided by the decisions, procedures and customary practices followed by the CONTRACTING PARTIES to GATT 1947 and the bodies established in the framework of GATT 1947'. We recognize that the Pork [i.e. *US – Canadian Pork*] Panel had indicated, in passing, that the Tokyo Round SCM Code represents 'practice' under Article VI of GATT 1947. Article 31.3(b) of the Vienna Convention provides that there may be taken into account, when interpreting a treaty, '[a]ny subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation'. Article 31.3 clearly distinguishes between the use of subsequent agreements and of subsequent practice as interpretive tools. The Tokyo Round SCM Code is, in our view, in the former category and cannot itself reasonably be deemed to represent 'customary practice' of the GATT 1947 CONTRACTING PARTIES. In any event, while the practice of Code signatories might be of some interpretive value in establishing their agreement regarding the interpretation of the Tokyo Round SCM Code (and arguably through Article XVI:1 of the WTO Agreement in interpreting provisions of that Code that were carried over into the successor SCM Agreement), it is clearly not relevant to the interpretation of Article VI of GATT 1994 itself; rather, only practice under Article VI of GATT 1947 is legally relevant to the interpretation of Article VI of GATT 1994."[507]

330. The relationships between Article VI, and the Tokyo Round SCM Agreement and the *SCM Agreement* were discussed by the Appellate Body in *Brazil – Desiccated Coconut*. See paragraphs 316–319 above.

(b) Anti-Dumping Agreement

331. In *US – 1916 Act (EC)*, the Panel examined whether the US 1916 Antidumping Act was consistent with Article VI, and emphasized the "close link" between Article VI and the *Anti-Dumping Agreement*:

> "The official title of the Anti-Dumping Agreement is 'Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994'. This agreement is essential for the interpretation of Article VI. Articles 1 and 18.1 confirm the close link between Article VI and the Anti-Dumping Agreement. Moreover, as was recalled by the Appellate Body in the *Brazil – Coconut* case, the WTO Agreement is a single treaty instrument which was accepted by the WTO Members as a single undertaking. As a result, Article 18.1 of the Anti-Dumping Agreement is part of the context of Article VI since Article 31.2 of the Vienna Convention provides that 'the context for the purpose of the interpretation of a treaty shall comprise, [. . .] the text [of the treaty], including its preamble and annexes . . .'. We are therefore not only entitled to consider Articles 1 and 18.1 of the Anti-Dumping Agreement even though the European Communities did not mention those provisions as part of its claims in its request for establishment of a panel, but we are also *required* to do so under the general principles of interpretation of public international law.[508]"[509]

332. With respect to the finding of the Appellate Body in *Brazil – Desiccated Coconut* concerning the relationship between the *SCM Agreement* and GATT Article VI as referenced in paragraph 316 above, see the Chapter on the *WTO Agreement*, Section III.B.1(a), which deals with the issue of the "single undertaking".

(c) SCM Agreement

333. In *Brazil – Desiccated Coconut*, the Appellate Body referred to the *SCM Agreement* in the context of clarifying the scope of Article VI. See the excerpts referenced in paragraphs 316 and 318 above.

---

[507] Panel Report on *Brazil – Desiccated Coconut*, paras. 255–256.

[508] (*footnote original*) Like the panel in *India – Quantitative Restrictions*, our intention is not to make findings under Articles 1 and 18.1 of the Anti-Dumping Agreement in this context. As a result, the requirements of Article 6.2 and 7 of the DSU are not relevant in that situation.

[509] Panel Report on *US – 1916 Act (EC)*, para. 6.195.

4. Challenge against a law as such under Article VI

334. In *US – 1916 Act*, the Appellate Body rejected the United States' argument that the Panels had no jurisdiction to consider the claims that the Act as such was inconsistent with Article VI. Noting that the complainants had brought their claims of inconsistency with Article VI of the *GATT 1994* and the *Anti-Dumping Agreement* pursuant to Article XXIII of the *GATT 1994* and Article 17 of the *Anti-Dumping Agreement*, the Appellate Body explained:

> "Articles XXII and XXIII of the GATT 1994 serve as the basis for consultations and dispute settlement under the GATT 1994 and, through incorporation by reference, under most of the other agreements in Annex 1A to the *WTO Agreement*.[510] According to Article XXIII:1(a) of the GATT 1994, a Member can bring a dispute settlement claim against another Member when it considers that a benefit accruing to it under the GATT 1994 is being nullified or impaired, or that the achievement of any objective of the GATT 1994 is being impeded, as a result of the failure of that other Member to carry out its obligations under that Agreement.
>
> Prior to the entry into force of the *WTO Agreement*, it was firmly established that Article XXIII:1(a) of the GATT 1947 allowed a Contracting Party to challenge legislation as such, independently from the application of that legislation in specific instances. While the text of Article XXIII does not expressly address the matter, panels consistently considered that, under Article XXIII, they had the *jurisdiction* to deal with claims against legislation as such.[511] In *examining* such claims, panels developed the concept that mandatory and discretionary legislation should be distinguished from each other, reasoning that only legislation that mandates a violation of GATT obligations can be found as such to be inconsistent with those obligations. We consider the application of this distinction to the present cases in section IV(B) below.
>
> Thus, that a Contracting Party could challenge legislation as such before a panel was well-settled under the GATT 1947. We consider that the case law articulating and applying this practice forms part of the GATT *acquis* which, under Article XVI:1 of the *WTO Agreement,* provides guidance to the WTO and, therefore, to panels and the Appellate Body. Furthermore, in Article 3.1 of the DSU, Members affirm 'their adherence to the principles for the management of disputes heretofore applied under Articles XXII and XXIII of GATT 1947'. We note that, since the entry into force of the *WTO Agreement*, a number of panels have dealt with dispute settlement claims brought against a Member on the basis of its legislation as such, independently from the application of that legislation in specific instances.[512]"[513]

335. In this connection, in *US – 1916 Act*, the Appellate Body examined whether challenge against a law as such is permissible under the Anti-Dumping Agreement. See the Chapter on the *Anti-Dumping Agreement*, Section XVII.B.1(b).

336. In *Guatemala – Cement I*, the Appellate Body discussed the specificity requirements for the terms of reference under Article 17.4 of the Anti-Dumping Agreement. See the Chapter on the *Anti-Dumping Agreement*, Section XVII.B.5(a).

5. Article VI:1

(a) Elements of Paragraph 1

337. In *US – 1916 Act*, in discussing the United States' appeal to the Panels' finding that the Act was to counteract "dumping" and thus, fell under the scope of Article VI, the Appellate Body noted as follows:

> "[U]nder Article VI:1 of the GATT 1994 and Article 2 of the *Anti-Dumping Agreement*, neither the intent of the persons engaging in 'dumping' nor the injurious effects that 'dumping' may have on a Member's domestic industry are constituent elements of 'dumping'."[514]

(b) Material injury

338. In *US – 1916 Act (EC)*, the Panel stated that "Article VI:1 of the GATT 1994 requires the establishment of material injury or a threat thereof."[515]

6. Paragraph 2

(a) Permissible responses to dumping

339. In *US – 1916 Act*, the Appellate Body interpreted Article VI:2 in addressing the question of whether Members may choose to impose other types of anti-dumping measures than anti-dumping duties. The

---

[510] (*footnote original*) We note, however, that, as discussed in our Report in *Guatemala – Cement I*, the *Anti-Dumping Agreement* does not incorporate by reference Articles XXII and XXIII of the GATT 1994: Appellate Body Report on *Guatemala – Cement I*, para. 64 and footnote 43.

[511] (*footnote original*) See, for example, Panel Report on *US – Superfund*; Panel Report on *US – Section 337*; Panel Report on *Thailand – Cigarettes*; Panel Report on *US – Malt Beverages*; and Panel Report on *US – Tobacco*. See also Panel Report on *US – Wine and Grape Products*, examining this issue in the context of a claim brought under the Tokyo Round Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement of Tariffs and Trade.

[512] (*footnote original*) See, for example, Panel Report on *Japan – Alcoholic Beverages II*, as modified by the Appellate Body Report; Panel Report on *Canada – Periodicals*, as modified by the Appellate Body Report; Panel Report on *EC – Hormones*, as modified by the Appellate Body Report; Panel Report on *Korea – Alcoholic Beverages*, as modified by the Appellate Body Report; Panel Report on *Chile – Alcoholic Beverages*, as modified by the Appellate Body Report; Panel Report on *US – FSC*, as modified by the Appellate Body Report; and Panel Report on *US – Section 110(5) Copyright Act*.

[513] Appellate Body Report on *US – 1916 Act*, paras. 59–61.

[514] Appellate Body Report on *US – 1916 Act*, para. 107.

[515] Panel Report on *US – 1916 Act (EC)*, para. 6.180. See also Panel Report on *US – 1916 Act (Japan)*, para. 6.252.

Appellate Body stated that "Article VI, and, in particular, Article VI:2, read in conjunction with the *Anti-Dumping Agreement*, limit the permissible responses to dumping to definitive anti-dumping duties, provisional measures and price undertakings."[516] See also paragraph 323 above, with respect to the discussion concerning the term "may" contained in Article VI:2. Further, the Panel on *US – 1916 Act (Japan)* discussed this issue taking into consideration preparatory works of the WTO Agreement.[517]

(b) Methodology of investigation

340. In *EC – Tube or Pipe Fittings* the issue arose whether Article VI:2 of the *GATT 1994* prescribes a certain methodology for the investigation of dumping under the *Anti-Dumping Agreement*. In this particular case, the European Communities used a period of investigation of one year in its investigation of imports from Brazil. Towards the end of this year, the Brazilian Real was devalued by 42 per cent. Brazil argued that the devaluation of the Real had "eliminated dumping by the Brazilian exporter" and that the Commission had failed to consider whether dumping existed "in the present". The Panel concluded that events occurring during the period of investigation did not require investigation authorities to reassess a determination. The Appellate Body upheld the Panel's finding and rejected Brazil's argument that Article VI:2 of the *GATT 1994* required investigation authorities to "anticipate the level of anti-dumping duty that is strictly necessary to prevent dumping in the future [by making] a reasonable assumption for the future on the basis of the data collected in the [Period of Investigation]". According to the Appellate Body, the words "in order to offset or prevent dumping" in Article VI:2 of the *GATT 1994* do not prescribe the selection of a particular methodology in the anti-dumping investigation.

> "We are unable to see an obligation flowing from the opening phrase of Article VI:2 of the GATT 1994 to Article 2 of the *Anti-Dumping Agreement* that the determination of dumping must be based on the standard of a 'reasonable assumption for the future', or that this, in turn, would require that a particular methodology be chosen under Article 2.4.2."[518]

D. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

341. The Panel on *Brazil – Desiccated Coconut* found that because Article VI of *GATT 1994* did not constitute applicable law for the purposes of the dispute, the claims made under Article I (and II) of *GATT 1994*, which were derived from claims of inconsistency with Article VI of *GATT 1994*, could not succeed.[519] The Appellate Body on *Brazil – Desiccated Coconut* confirmed this finding.[520]

2. Article II

342. The Panel on *Brazil – Desiccated Coconut* found that because Article VI of *GATT 1994* did not constitute applicable law for the purposes of the dispute, the claims made under Article II (and I) of *GATT 1994*, which were derived from claims of inconsistency with Article VI of *GATT 1994*, could not succeed.[521] The Appellate Body on *Brazil – Desiccated Coconut* confirmed this finding.[522]

3. Article III

343. In *US – 1916 Act (EC)* and *US – 1916 (Japan)*, exercising judicial economy, the Panel found that the United States' 1916 Act was inconsistent with Article VI of the *GATT 1994*. However, the Panel did not also examine the EC claim that it was inconsistent with Article III of *GATT 1994*. See paragraph 288 above.

4. Article XI

344. In *US – 1916 Act (Japan)*, exercising judicial economy, the Panel did not examine a claim under Article XI of *GATT 1994*, after having found a violation of Article VI. See paragraph 420 below.

E. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Anti-Dumping Agreement

345. As the complainant had not established a *prima facie* case of a violation of Articles 2.1 and 2.2 of the *Anti-Dumping Agreement*, the Panel on *US – 1916 Act (EC)* stated that "[t]he fact that we found a violation of Article VI:1 of the GATT 1994 is not as such sufficient to conclude that Articles 2.1 and 2.2 of the Anti-Dumping Agreement have been breached, in the absence of more specific arguments and evidence."[523]

346. In *US – 1916 Act (Japan)*, the Panel was faced with the question whether it could make findings under Article VI, without, at the same time, making a finding under a provision of the *Anti-Dumping Agreement* or whether "the link between Article VI and the Anti-Dumping Agreement is such as to make impossible a finding under Article VI only". The Panel referred

[516] Appellate Body Report on *US – 1916 Act*, para. 137.
[517] Panel Report on *US – 1916 Act (Japan)*, paras. 6.226–6.229.
[518] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 76. For further arguments to in support of this finding see paras. 78 – 82.
[519] Panel Report on *Brazil – Desiccated Coconut*, para. 281.
[520] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 21.
[521] Panel Report on *Brazil – Desiccated Coconut*, para. 281.
[522] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 21.
[523] Panel Report on *US – 1916 Act (EC)*, para. 6.209.

to the findings of the Panel on *India – Quantitative Restrictions* and of the Appellate Body in *Brazil – Desiccated Coconut* and distinguished these two cases from the issue before it. The Panel then concluded that it could "make findings under Article VI without, at the same time, having to make findings under the provisions of the Anti-Dumping Agreement, and *vice-versa*":

> "Regarding the relationship between Article VI and the Anti-Dumping Agreement and, in particular, the question whether we could make findings regarding Article VI independently from the Anti-Dumping Agreement, we note that the issue addressed by the panel and the Appellate Body in *Brazil – Desiccated Coconut*, to which the United States refers, must be differentiated from the one before us. In *Brazil – Desiccated Coconut*, the question was one of application of Article VI of the GATT when the WTO Agreement on Subsidies and Countervailing Measures did not apply. In the present case, the issue is whether the Panel can make findings in relation to Article VI only or whether the link between Article VI and the Anti-Dumping Agreement is such as to make impossible a finding under Article VI only.
>
> We note that the panel in the *India – Quantitative Restrictions on Imports of Agricultural, Textile and Industrial Products*[524] case did not make findings under Article XVIII:11 of the GATT 1994 in isolation from the Understanding on Balance-of-Payments Provisions of the GATT 1994. Likewise, we have no intention to address Article VI in isolation from the Anti-Dumping Agreement. In the present case, the complainant has made claims based on the violation of provisions of Article VI and the Anti-Dumping Agreement. In our opinion, if the panel in *Brazil – Desiccated Coconut* confirmed that Article VI and the Agreement on Subsidies and Countervailing Measures were an 'inseparable package of rights and obligations', this is because the solution proposed by the complainant would have led to apply Article VI in total disregard of the Agreement on Subsidies and Countervailing Measures. Such a solution cannot even be considered in our case. Article VI and the Anti-Dumping Agreement are part of the same treaty: the WTO Agreement. In application of the customary rules of interpretation of international law, we are bound to interpret Article VI of the GATT 1994 as part of the WTO Agreement and, pursuant to Article 31 of the Vienna Convention, the Anti-Dumping Agreement forms part of the context of Article VI. This implies that we must look at Article VI and the Anti-Dumping Agreement as part of an 'inseparable package of rights and obligations' and that Article VI should not be interpreted in a way that would deprive either Article VI or the Anti-Dumping Agreement of meaning.[525] However, this obligation does not prevent us from making findings in relation to Article VI only, as the panel did in its report on *India – Quantitative Restrictions*.
>
> We conclude that we can make findings under Article VI without, at the same time, having to make findings under the provisions of the Anti-Dumping Agreement, and *vice-versa*. However, the fact that Article VI and the Anti-Dumping Agreement represent an inseparable package of rights and disciplines requires that we interpret each of the provisions invoked by Japan in its claims in conjunction with the other relevant provisions of this 'inseparable package', so as to give meaning to all of them."[526]

347. Also, the Panel on *US – 1916 Act (EC)* explained its exercise of judicial economy with respect to Article 3 as follows:

> "Since we found above that the 1916 Act violated Article VI:1 by not providing for an injury test compatible with the terms of that Article and since Article 3 simply addresses in more detail the requirement of 'material injury' contained in Article VI:1, we do not find it necessary to make specific findings under Article 3 and therefore exercise judicial economy, as we are entitled to do under GATT panel practice and WTO panel and Appellate Body practice."[527]

2. Tokyo Round Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade

348. The Panel on *Brazil – Desiccated Coconut* discussed the legal relevance of the Tokyo Round Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade to Article VI of the *GATT 1994*. See paragraphs 317–321 above.

3. SCM Agreement

349. In the *Brazil – Desiccated Coconut* dispute, the Panel was faced with the question "whether Article VI creates rules which are separate and distinct from those of the SCM Agreement, and which can be applied without reference to that Agreement, or whether Article VI of GATT 1994 and the SCM Agreement represent an inseparable package of rights and disciplines that must be considered in conjunction."[528] In phrasing this issue, the Panel on *Brazil – Desiccated Coconut* made clear that the *SCM Agreement* did not supersede Article VI of *GATT 1994* as the basis for the WTO discipline of countervailing measures. The Panel stated:

---

[524] (*footnote original*) Panel Report on *India – Quantitative Restrictions*, paras. 5.18–5.19.
[525] (*footnote original*) Appellate Body Report on *Brazil – Desiccated Coconut*, paras. 74 and 81–83.
[526] Panel Report on *US – 1916 Act (Japan)*, paras. 6.92–6.94.
[527] Panel Report on *US – 1916 Act (EC)* para. 6.211. See also Panel Report on *US – 1916 Act (Japan)*, para. 6.254.
[528] Panel Report on *Brazil – Desiccated Coconut*, para. 227.

"It is evident that both Article VI of GATT 1994 and the SCM Agreement have force, effect, and purpose within the WTO Agreement. That GATT 1994 has not been superseded by other Multilateral Agreements on Trade in Goods . . . is demonstrated by a general interpretive note to Annex 1A of the WTO Agreement. The fact that certain important provisions of Article VI of GATT 1994 are neither replicated nor elaborated in the SCM Agreement further demonstrates this point. Thus, the question for consideration is not whether the SCM Agreement supersedes Article VI of GATT 1994."[529]

350. The Appellate Body on *Brazil – Desiccated Coconut* confirmed the statement by the Panel that the *SCM Agreement* did not supersede Article VI of *GATT 1994*[530], and stated:

"The relationship between the GATT 1994 and the other goods agreements in Annex 1A is complex and must be examined on a case-by-case basis. Although the provisions of the GATT 1947 were incorporated into, and became a part of the GATT 1994, they are not the sum total of the rights and obligations of WTO Members concerning a particular matter. For example, with respect to subsidies on agricultural products, Articles II, VI and XVI of the GATT 1994 alone do not represent the total rights and obligations of WTO Members. The *Agreement on Agriculture* and the *SCM Agreement* reflect the latest statement of WTO Members as to their rights and obligations concerning agricultural subsidies. The general interpretative note to Annex 1A was added to reflect that the other goods agreements in Annex 1A, in many ways, represent a substantial elaboration of the provisions of the GATT 1994, and to the extent that the provisions of the other goods agreements conflict with the provisions of the GATT 1994, the provisions of the other goods agreements prevail. This does not mean, however, that the other goods agreements in Annex 1A, such as the *SCM Agreement*, supersede the GATT 1994."[531]

351. The Appellate Body on *Brazil – Desiccated Coconut*, in addressing the issue of the scope of Article VI of the *GATT 1994*, noted that "[t]he relationship between the *SCM Agreement* and Article VI of *GATT 1994* is set out in Articles 10 and 32.1 of the *SCM Agreement*."[532] See paragraph 316 above. With respect to the Appellate Body's other findings on this issue, see the excerpts referenced in the Chapter on the *SCM Agreement*, Section X.B.3.

352. In *Brazil – Desiccated Coconut*, the Appellate Body further touched on the relationship between Article VI of the *GATT 1994* and the *SCM Agreement* in clarifying the scope of Article VI. See paragraphs 318–319 above.

VIII. ARTICLE VII

A. TEXT OF ARTICLE VII

Article VII
Valuation for Customs Purposes

1. The contracting parties recognize the validity of the general principles of valuation set forth in the following paragraphs of this Article, and they undertake to give effect to such principles, in respect of all products subject to duties or other charges* or restrictions on importation and exportation based upon or regulated in any manner by value. Moreover, they shall, upon a request by another contracting party review the operation of any of their laws or regulations relating to value for customs purposes in the light of these principles. The CONTRACTING PARTIES may request from contracting parties reports on steps taken by them in pursuance of the provisions of this Article.

2. (*a*) The value for customs purposes of imported merchandise should be based on the actual value of the imported merchandise on which duty is assessed, or of like merchandise, and should not be based on the value of merchandise of national origin or on arbitrary or fictitious values.*

(*b*) "Actual value" should be the price at which, at a time and place determined by the legislation of the country of importation, such or like merchandise is sold or offered for sale in the ordinary course of trade under fully competitive conditions. To the extent to which the price of such or like merchandise is governed by the quantity in a particular transaction, the price to be considered should uniformly be related to either (i) comparable quantities, or (ii) quantities not less favourable to importers than those in which the greater volume of the merchandise is sold in the trade between the countries of exportation and importation.*

(*c*) When the actual value is not ascertainable in accordance with subparagraph (*b*) of this paragraph, the value for customs purposes should be based on the nearest ascertainable equivalent of such value.*

3. The value for customs purposes of any imported product should not include the amount of any internal tax, applicable within the country of origin or export, from which the imported product has been exempted or has been or will be relieved by means of refund.

4. (*a*) Except as otherwise provided for in this paragraph, where it is necessary for the purposes of paragraph 2 of this Article for a contracting party to convert into its own currency a price expressed in the currency of another country, the conversion rate of exchange to be used shall be based, for each currency involved, on the

[529] Panel Report on *Brazil – Desiccated Coconut*, para. 227.
[530] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 14.
[531] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 14.
[532] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 16.

par value as established pursuant to the Articles of Agreement of the International Monetary Fund or on the rate of exchange recognized by the Fund, or on the par value established in accordance with a special exchange agreement entered into pursuant to Article XV of this Agreement.

(*b*) Where no such established par value and no such recognized rate of exchange exist, the conversion rate shall reflect effectively the current value of such currency in commercial transactions.

(*c*) The CONTRACTING PARTIES, in agreement with the International Monetary Fund, shall formulate rules governing the conversion by contracting parties of any foreign currency in respect of which multiple rates of exchange are maintained consistently with the Articles of Agreement of the International Monetary Fund. Any contracting party may apply such rules in respect of such foreign currencies for the purposes of paragraph 2 of this Article as an alternative to the use of par values. Until such rules are adopted by the Contracting Parties, any contracting party may employ, in respect of any such foreign currency, rules of conversion for the purposes of paragraph 2 of this Article which are designed to reflect effectively the value of such foreign currency in commercial transactions.

(*d*) Nothing in this paragraph shall be construed to require any contracting party to alter the method of converting currencies for customs purposes which is applicable in its territory on the date of this Agreement, if such alteration would have the effect of increasing generally the amounts of duty payable.

5. The bases and methods for determining the value of products subject to duties or other charges or restrictions based upon or regulated in any manner by value should be stable and should be given sufficient publicity to enable traders to estimate, with a reasonable degree of certainty, the value for customs purposes.

B. TEXT OF *AD* ARTICLE VII

Ad Article VII
Paragraph 1

The expression "or other charges" is not to be regarded as including internal taxes or equivalent charges imposed on or in connection with imported products.

Paragraph 2

1. It would be in conformity with Article VII to presume that "actual value" may be represented by the invoice price, plus any non-included charges for legitimate costs which are proper elements of "actual value" and plus any abnormal discount or other reduction from the ordinary competitive price.

2. It would be in conformity with Article VII, paragraph 2 *(b)*, for a contracting party to construe the phrase "in the ordinary course of trade . . . under fully competitive conditions", as excluding any transaction wherein the buyer and seller are not independent of each other and price is not the sole consideration.

3. The standard of "fully competitive conditions" permits a contracting party to exclude from consideration prices involving special discounts limited to exclusive agents.

4. The wording of subparagraphs *(a)* and *(b)* permits a contracting party to determine the value for customs purposes uniformly either (1) on the basis of a particular exporter's prices of the imported merchandise, or (2) on the basis of the general price level of like merchandise.

C. INTERPRETATION AND APPLICATION OF ARTICLE VII

No jurisprudence or decision of a relevant WTO body.

1. Reference to GATT practice

353. With respect to GATT practice concerning Article VII, see GATT Analytical Index, pages 259–265.

IX. ARTICLE VIII

A. TEXT OF ARTICLE VIII

Article VIII
*Fees and Formalities connected with Importation and Exportation**

1. (*a*) All fees and charges of whatever character (other than import and export duties and other than taxes within the purview of Article III) imposed by contracting parties on or in connection with importation or exportation shall be limited in amount to the approximate cost of services rendered and shall not represent an indirect protection to domestic products or a taxation of imports or exports for fiscal purposes.

(*b*) The contracting parties recognize the need for reducing the number and diversity of fees and charges referred to in subparagraph (*a*).

(*c*) The contracting parties also recognize the need for minimizing the incidence and complexity of import and export formalities and for decreasing and simplifying import and export documentation requirements.*

2. A contracting party shall, upon request by another contracting party or by the CONTRACTING PARTIES, review the operation of its laws and regulations in the light of the provisions of this Article.

3. No contracting party shall impose substantial penalties for minor breaches of customs regulations or procedural requirements. In particular, no penalty in respect of any omission or mistake in customs documentation which is easily rectifiable and obviously made without

fraudulent intent or gross negligence shall be greater than necessary to serve merely as a warning.

4. The provisions of this Article shall extend to fees, charges, formalities and requirements imposed by governmental authorities in connection with importation and exportation, including those relating to:

(*a*) consular transactions, such as consular invoices and certificates;

(*b*) quantitative restrictions;

(*c*) licensing;

(*d*) exchange control;

(*e*) statistical services;

(*f*) documents, documentation and certification;

(*g*) analysis and inspection; and

(*h*) quarantine, sanitation and fumigation.

B. TEXT OF *AD* ARTICLE VIII

Ad Article VIII

1. While Article VIII does not cover the use of multiple rates of exchange as such, paragraphs 1 and 4 condemn the use of exchange taxes or fees as a device for implementing multiple currency practices; if, however, a contracting party is using multiple currency exchange fees for balance of payments reasons with the approval of the International Monetary Fund, the provisions of paragraph 9 *(a)* of Article XV fully safeguard its position.

2. It would be consistent with paragraph 1 if, on the importation of products from the territory of a contracting party into the territory of another contracting party, the production of certificates of origin should only be required to the extent that is strictly indispensable.

C. INTERPRETATION AND APPLICATION OF ARTICLE VIII

1. Article VIII:1(a)

354. In *Argentina – Textiles and Apparel*, the Panel addressed an Argentine *ad valorem* tax on imports of 3 per cent, called a "statistical tax", described by Argentina as designed to cover the cost of providing a statistical service in the form of a reliable database for foreign trade operators. The Panel found that this statistical tax was inconsistent with the substantive requirements of Article VIII:1(a) of *GATT 1994*. (Argentina subsequently did not appeal this finding, but claimed that the Panel had failed to take properly into account a relevant obligation by Argentina towards the IMF.) The Panel emphasized that an *ad valorem* tax, by its very design, is not "limited in amount to the approximate cost of services rendered", as required by Article VIII:1(a):

> "The meaning of Article VIII was examined in detail in the Panel Report on *United States – Customs User Fee*.[533] The panel found that Article VIII's requirement that the charge be 'limited in amount to the approximate cost of services rendered' is 'actually a dual requirement, because the charge in question must first involve a "service" rendered, and then the level of the charge must not exceed the approximate cost of that "service"'.[534] According to the panel report, the term 'services rendered' means 'services rendered to the individual importer in question'.[535] In the present case Argentina states that the service is not rendered to the individual importer, or to the specific importer associated with a particular operation, but to foreign trade operators in general and foreign trade as an activity per se.
>
> An *ad valorem* duty with no fixed maximum fee, by its very nature, is not 'limited in amount to the approximate cost of services rendered'. For example, high-price items necessarily will bear a much greater tax burden than low-price goods, yet the service accorded to both is essentially the same. An unlimited *ad valorem* charge on imported goods violates the provisions of Article VIII because such a charge cannot be related to the cost of the service rendered. For example, in the *Customs User Fee* report, the panel examined the consistency with Article VIII of 0.22 and 0.17 per cent *ad valorem* customs merchandise processing fees with no upper limits. The panel concluded that 'the term "cost of services rendered" . . . in Article VIII:1(a) must be interpreted to refer to the cost of the customs processing for the individual entry in question and accordingly that the *ad valorem* structure of the United States merchandise processing fee was inconsistent with Article VIII:1(a) to the extent that it caused fees to be levied in excess of such costs'[536]."[537]

355. In support of its finding that an *ad valorem* tax could not be said to be commensurate with the "cost of services rendered", the Panel on *Argentina – Textiles and Apparel* refered to the Report of the Working Party on *Accession of the Democratic Republic of the Congo*.[538] The Panel also rejected Argentina's argument that its tax had been enacted for "fiscal purposes":

> "Argentina's statistical tax is levied on an *ad valorem* basis with no ceiling. As described in paragraph 6.70 above, Argentina's tax is clearly not related to the cost of a service rendered to the specific importers concerned. The tax as assessed on many goods is not in proportion

[533] (*footnote original*) Panel Report on *US – Customs User Fee*.
[534] (*footnote original*) Panel Report on *US – Customs User Fee*, para. 69.
[535] (*footnote original*) Panel Report on *US – Customs User Fee*, para. 80.
[536] (*footnote original*) Panel Report on *US – Customs User Fee*, para. 86.
[537] Panel Report on *Argentina – Textiles and Apparel*, paras. 6.74–6.75.
[538] (*footnote original*) Adopted on 29 June 1971, BISD 18S/89, para. 5.

to the cost of any service rendered. The tax purportedly raises revenue for the purpose of financing customs activities related to the registration, computing and data processing of information on both imports and exports. While the gathering of statistical information concerning imports may benefit traders in general, Article VIII bars the levying of any tax or charge on importers to support the related costs 'for the individual entry in question' since it will also benefit exports and exporters.[539]

As to Argentina's argument that it was collecting this tax for 'fiscal' purposes in the context of its undertakings with the IMF, we note that not only does Article VIII of GATT expressly prohibit such measures for fiscal purposes but that clearly a measure for fiscal purposes will normally lead to a situation where the tax results in charges being levied in excess of the approximate costs of the statistical services rendered."[540]

356. Argentina did not appeal the findings of the Panel on *Argentina – Textiles and Apparel*, quoted in paragraphs 354–355 above. However, before the Appellate Body, Argentina argued that the Panel erred in law in failing to take account Argentina's obligations to the IMF in the Panel's interpretation of Article VIII. Specifically, Argentina claimed that a "Memorandum of Understanding" between Argentina and the IMF included an "undertaking" or an "obligation" on the part of Argentina to collect a specified amount in the form of a statistical tax. Argentina pointed to a statement in the aforementioned memorandum according to which the fiscal measures to be adopted by Argentina include ". . . increases in import duties, including a temporary 3 per cent surcharge on imports". Argentina also argued that paragraph 10 of the Agreement between the IMF and the WTO[541] and paragraph 5 of the so-called Declaration on Coherence[542] require that the imposition on governments of "cross-conditionality or additional conditions" must be avoided. The Appellate Body found that Argentina had failed to demonstrate an "irreconcilable conflict between its 'Memorandum of Understanding' with the IMF and its obligations under Article VIII of GATT":

"[T]the Panel does not appear to have been convinced that Argentina had a legally binding agreement with the IMF at all. From the panel record in this case, it does not appear possible to determine the precise legal nature of this Memorandum on Economic Policy, nor the extent to which commitments undertaken by Argentina in this Memorandum constitute legally binding obligations. We note that page 7 of the Memorandum on Economic Policy refers to "a temporary 3 percent surcharge on imports", which is not necessarily the same thing as the 3 per cent statistical tax levied on imports. Argentina did not show an irreconcilable conflict between the provisions of its "Memorandum of Understanding" with the IMF and the provisions of Article VIII of the GATT 1994. We thus agree with the Panel's implicit finding that Argentina failed to demonstrate that it had a legally binding commitment to the IMF that would somehow supersede Argentina's obligations under Article VIII of the GATT 1994."[543]

357. The Panel on *US – Certain EC Products* examined the consistency with several GATT provisions of the increased bonding requirements imposed by the United States on imports from the European Communities in order to secure the collection of additional import duties that were only later authorized by the DSB. The Panel considered that the costs relating to the bonding requirements upon importation could not constitute the "approximate cost of services rendered" in the sense of Article VIII:

"The meaning of Article VIII was examined in the adopted Panel Report on *United States – Customs Users Fee*[544] and in the adopted Appellate Body and Panel Reports on *Argentina – Textiles*. It was found that Article VIII's requirement that the charge be 'limited in amount to the approximate cost of services rendered' is 'actually a dual requirement, because the charge in question must first involve a "service" rendered, and then the level of the charge must not exceed the approximate cost of that "service".'[545] The term 'services rendered' means 'services rendered to the individual importer in question.'[546]

Although very briefly in its rebuttals, the United States argued that bonding requirements could be viewed as a form of fee for services rendered (the services being the 'early release of merchandise') and therefore should benefit from the carve-out of Article II:2(c) of GATT, the United States has not submitted any data on the second requirement. There is no evidence that what was required from importers represented any such approximate costs of any service. It is also difficult to understand why the costs of such service would have suddenly increased on 3 March (did the United States provide more services to importers on 3 March?), and then only for listed imports from the European Communities."[547]

2. Reference to GATT practice

358. With respect to GATT practice concerning Article VIII:1, see GATT Analytical Index, pages 268–281.

D. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. WTO Agreement

359. In *Argentina – Textiles and Apparel*, the Appellate Body agreed that that there is nothing in the Agreement between the IMF and the WTO, the Declaration on the Relationship of the World Trade Organization with the International Monetary Fund or the so-called Declaration on Coherence[548] which justifies a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the GATT 1994.[549] See Chapter on the *WTO Agreement*, Section IV.B.5(iii).

2. Agreement between the IMF and the WTO

360. In *Argentina – Textiles and Apparel*, the Appellate Body agreed that that there is nothing in the Agreement between the IMF and the WTO, the Declaration on the Relationship of the World Trade Organization with the International Monetary Fund which justifies a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the GATT 1994.[550] See Chapter on the *WTO Agreement*, Section IV.B.5(iii).

3. Declaration on Coherence

361. In *Argentina – Textiles and Apparel*, the Appellate Body agreed that that there is nothing in the Declaration on the Contribution of the World Trade Organization to Achieving Greater Coherence in Global Economic Policymaking (Declaration on Coherence) which would justify a conclusion that a Member's commitments to the IMF shall prevail over its obligations under Article VIII of the *GATT 1994*.[551] See Chapter on the *WTO Agreement*, Section IV.B.5(iii).

X. ARTICLE IX

A. TEXT OF ARTICLE IX

Article IX
Marks of Origin

1. Each contracting party shall accord to the products of the territories of other contracting parties treatment with regard to marking requirements no less favourable than the treatment accorded to like products of any third country.

2. The contracting parties recognize that, in adopting and enforcing laws and regulations relating to marks of origin, the difficulties and inconveniences which such measures may cause to the commerce and industry of exporting countries should be reduced to a minimum, due regard being had to the necessity of protecting consumers against fraudulent or misleading indications.

3. Whenever it is administratively practicable to do so, contracting parties should permit required marks of origin to be affixed at the time of importation.

4. The laws and regulations of contracting parties relating to the marking of imported products shall be such as to permit compliance without seriously damaging the products, or materially reducing their value, or unreasonably increasing their cost.

5. As a general rule, no special duty or penalty should be imposed by any contracting party for failure to comply with marking requirements prior to importation unless corrective marking is unreasonably delayed or deceptive marks have been affixed or the required marking has been intentionally omitted.

6. The contracting parties shall co-operate with each other with a view to preventing the use of trade names in such manner as to misrepresent the true origin of a product, to the detriment of such distinctive regional or geographical names of products of the territory of a contracting party as are protected by its legislation. Each contracting party shall accord full and sympathetic consideration to such requests or representations as may be made by any other contracting party regarding the application of the undertaking set forth in the preceding sentence to names of products which have been communicated to it by the other contracting party.

B. INTERPRETATION AND APPLICATION OF ARTICLE IX

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT Practice

362. With respect to GATT practice concerning Article VIII:1, see GATT Analytical Index, pages 288–289.

XI. ARTICLE X

A. TEXT OF ARTICLE X

Article X
Publication and Administration of Trade Regulations

1. Laws, regulations, judicial decisions and administrative rulings of general application, made effective by any contracting party, pertaining to the classification or the valuation of products for customs purposes, or to rates of duty, taxes or other charges, or to requirements,

[548] With respect to the Declaration on the Contribution of the World Trade Organization to Achieving Greater Coherence in Global Economic Policy-making, see Chapter on *WTO Agreement*, Section XIX

[549] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

[550] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

[551] Appellate Body Report on *Argentina – Textiles and Apparel*, para. 70.

restrictions or prohibitions on imports or exports or on the transfer of payments therefor, or affecting their sale, distribution, transportation, insurance, warehousing inspection, exhibition, processing, mixing or other use, shall be published promptly in such a manner as to enable governments and traders to become acquainted with them. Agreements affecting international trade policy which are in force between the government or a governmental agency of any contracting party and the government or governmental agency of any other contracting party shall also be published. The provisions of this paragraph shall not require any contracting party to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

2. No measure of general application taken by any contracting party effecting an advance in a rate of duty or other charge on imports under an established and uniform practice, or imposing a new or more burdensome requirement, restriction or prohibition on imports, or on the transfer of payments therefor, shall be enforced before such measure has been officially published.

3. (*a*) Each contracting party shall administer in a uniform, impartial and reasonable manner all its laws, regulations, decisions and rulings of the kind described in paragraph 1 of this Article.

(*b*) Each contracting party shall maintain, or institute as soon as practicable, judicial, arbitral or administrative tribunals or procedures for the purpose, *inter alia*, of the prompt review and correction of administrative action relating to customs matters. Such tribunals or procedures shall be independent of the agencies entrusted with administrative enforcement and their decisions shall be implemented by, and shall govern the practice of, such agencies unless an appeal is lodged with a court or tribunal of superior jurisdiction within the time prescribed for appeals to be lodged by importers; *Provided* that the central administration of such agency may take steps to obtain a review of the matter in another proceeding if there is good cause to believe that the decision is inconsistent with established principles of law or the actual facts.

(*c*) The provisions of subparagraph (*b*) of this paragraph shall not require the elimination or substitution of procedures in force in the territory of a contracting party on the date of this Agreement which in fact provide for an objective and impartial review of administrative action even though such procedures are not fully or formally independent of the agencies entrusted with administrative enforcement. Any contracting party employing such procedures shall, upon request, furnish the CONTRACTING PARTIES with full information thereon in order that they may determine whether such procedures conform to the requirements of this subparagraph.

B. INTERPRETATION AND APPLICATION OF ARTICLE X

1. General

363. In *EC – Poultry*, the Appellate Body rejected Brazil's claim that the retroactive application of transitional safeguard measures under the Agreement on Textiles and Clothing was prohibited by Article X. The Appellate Body briefly discussed the scope of Article X as follows:

> "Article X relates to the *publication* and *administration* of 'laws, regulations, judicial decisions and administrative rulings of general application', rather than to the *substantive content* of such measures.[552] . . .
>
> Thus, to the extent that Brazil's appeal relates to the *substantive content* of the EC rules themselves, and not to their *publication* or *administration*, that appeal falls outside the scope of Article X of the GATT 1994."[553]

2. Article X:1

(a) "of general application"

(i) Interpretation

364. In *US – Hot-Rolled Steel*, the Panel was confronted with an alleged violation of Article X:3(a). However, before addressing this question the Panel ruled, in a preliminary finding not reviewed by the Appellate Body, that the anti-dumping measure did not constitute a measure "of general application" within the meaning of Article X:1. The Panel held:

> "[F]inally, we have been presented with arguments alleging violation of Article X:3(a) of GATT 1994 which relate to the actions of the United States in the context of a single anti-dumping investigation. We doubt whether the final anti-dumping measure before us in this dispute can be considered a measure of 'general application'. In this context, we note that Japan has not even alleged, much less established, a pattern of decision-making with respect to the specific matters it is raising which would suggest a lack of uniform, impartial and reasonable administration of the US anti-dumping law. While it is not inconceivable that a Member's actions in a single instance might be evidence of lack of uniform, impartial, and reasonable administration of its laws, regulations, decisions and rulings, we consider that the actions in question would have to have a significant impact on the overall administration of the law, and not simply on the outcome in the single case in question. Moreover, we consider it unlikely that such a conclusion could be reached where the actions in the single case in question were, themselves, consistent

[552] Following this sentence, the Appellate Body cited the Appellate Body Report on *EC – Bananas III*, para. 200, which is referenced in para. 373 of this Chapter.

[553] Appellate Body Report on *EC – Poultry*, para. 115.

with more specific obligations under other WTO Agreements."[554]

365. In *US – Underwear*, the Appellate Body agreed with the following finding of the Panel on the term "of general application":[555]

> "We note that Article X:1 of GATT 1994, which also uses the language 'of general application', includes 'administrative rulings' in its scope. The mere fact that the restraint at issue was an administrative order does not prevent us from concluding that the restraint was a measure of general application. Nor does the fact that it was a country-specific measure exclude the possibility of it being a measure of general application. If, for instance, the restraint was addressed to a specific company or applied to a specific shipment, it would not have qualified as a measure of general application. However, to the extent that the restraint affects an unidentified number of economic operators, including domestic and foreign producers, we find it to be a measure of general application."[556]

366. In *EC – Poultry*, the Appellate Body reviewed the Panel's finding that certain import licensing of the European Communities on certain poultry products was not inconsistent with Article X because "the information which Brazil claims the EC should have made available concerns a specific shipment, which is outside the scope of Article X of GATT."[557] In upholding the Panel's finding, the Appellate Body discussed the term "of general application" as follows:

> "Article X:1 of the GATT 1994 makes it clear that Article X does not deal with specific transactions, but rather with rules 'of general application'. It is clear to us that the EC rules pertaining to import licensing set out in Regulation 1431/94 are rules 'of general application'. . . .
>
> . . .
>
> . . . Although it is true, as Brazil contends, that any measure of general application will always have to be applied in specific cases, nevertheless, the particular treatment accorded to each individual shipment cannot be considered a measure 'of general application' within the meaning of Article X. The Panel cited the following passage from the panel report in *United States – Restrictions on Imports of Cotton and Man-made Fibre Underwear*:
>
> > 'The mere fact that the restraint at issue was an administrative order does not prevent us from concluding that the restraint was a measure of general application. Nor does the fact that it was a country-specific measure exclude the possibility of it being a measure of general application. If, for instance, the restraint was addressed to a specific company or applied to a specific shipment, it would not have qualified as a measure of general application. However, to the extent that the restraint affects an unidentified number of economic operators, including domestic and foreign producers, we find it to be a measure of general application.'"[558]
>
> We agree with the Panel that "conversely, licences issued to a specific company or applied to a specific shipment cannot be considered to be a measure 'of general application' within the meaning of Article X."[559]

367. In *Japan – Film*, the Panel, referring to the Panel Report on *US – Underwear* referenced in paragraph 364 above, interpreted the term "of general application" as follows:

> "[I]t stands to reason that inasmuch as the Article X:1 requirement applies to all administrative rulings of general application, it also should extend to administrative rulings in individual cases where such rulings establish or revise principles or criteria applicable in future cases. At the same time, we consider that it is incumbent upon the United States in this case to clearly demonstrate the existence of such unpublished administrative rulings in individual matters which establish or revise principles applicable in future cases."[560]

(ii) Reference to GATT practice

368. For GATT practice on this subject-matter, see GATT Analytical Index, pages 294–295.

3. Article X:2

(a) General

369. In *US – Underwear*, the Appellate Body described the policy underlying Article X:2 as pertaining to transparency and due process:

> "Article X:2, *General Agreement*, may be seen to embody a principle of fundamental importance – that of promoting full disclosure of governmental acts affecting Members and private persons and enterprises, whether of domestic or foreign nationality. The relevant policy principle is widely known as the principle of transparency and has obviously due process dimensions. The essential implication is that Members and other persons affected, or likely to be affected, by governmental measures imposing restraints, requirements and other burdens, should have a reasonable opportunity to acquire authentic information about such measures and accordingly to protect and adjust their activities or alternatively to seek modification of such measures."[561]

---

[554] Panel Report on *US – Hot-Rolled Steel*, para. 7.268.
[555] Appellate Body Report on *US – Underwear*, p. 21.
[556] Panel Report on *US – Underwear*, para. 7.65.
[557] Panel Report on *EC – Poultry*, para. 269.
[558] (*footnote original*) Panel Report on *US – Underwear*, para. 7.65. In that case, we agreed with the panel's finding that the safeguard measure restraint imposed by the United States was "a measure of general application" within the contemplation of Article X:2 of the GATT 1994. See Appellate Body Report on *US – Underwear*, p. 21.
[559] Appellate Body Report on *EC – Poultry*, paras. 111 and 113.
[560] Panel Report on *Japan – Film*, para. 10.388.
[561] Appellate Body Report on *US – Underwear*, p. 21.

370. The Panel on *US – Underwear* was called on to find whether a Member is entitled, when taking transitional safeguard measures under Article 6 of the ATC, to backdate the application of such measures to the date of publication of its request for consultations. The Panel opined that Article 6.10 of the ATC, the relevant provision, was "silent" as to this question and turned to Article X of the GATT. The Panel concluded that "if the importing country publishes the proposed restraint period and restraint level after the request for consultations, it can later set the initial date of the restraint period as the date of the publication of the proposed restraint".[562] Upon review, the Appellate Body disagreed with the Panel's finding that Article 6.10 of the ATC was "silent" as to whether a transitional safeguard measure could be backdated or not and found that Article 6.10 prohibited such backdating. With respect to the Panel's finding that Article X of GATT permitted such backdating, the Appellate Body held that prior publication of a measure, as required under Article X of GATT, could not, in and of itself, justify the retroactive effect of a restrictive governmental measure:

> "[W]e are bound to observe that Article X:2 of the *General Agreement*, does not speak to, and hence does not resolve, the issue of permissibility of giving retroactive effect to a safeguard restraint measure. The presumption of prospective effect only does, of course, relate to the basic principles of transparency and due process, being grounded on, among other things, these principles. But prior publication is required for all measures falling within the scope of Article X:2, not just *ATC* safeguard restraint measures sought to be applied retrospectively. Prior publication may be an autonomous condition for giving effect at all to a restraint measure. Where no authority exists to give retroactive effect to a restrictive governmental measure, that deficiency is not cured by publishing the measure sometime before its actual application. The necessary authorization is not supplied by Article X:2 of the *General Agreement*."[563]

4. Article X:3

(a) General

371. In *US – Shrimp*, the Appellate Body ruled that that the lack of transparency of the disputed legislation was contrary to the spirit of Article X:3. The Appellate Body held:

> "[T]he provision of Article X:3 of the GATT 1994 bear upon this matter. In our view, Section 609 falls within the "laws, regulations, judicial decisions and administrative rulings of general application" described in Article X:1. Inasmuch there are due process requirements generally for measures that are otherwise imposed in compliance with WTO obligations, it is only reasonable that rigorous compliance with the fundamental requirements of due process should be required in the application and administration of a measure which purports to be an exception to the treaty obligations of the member imposing the measure and which effectively results in a suspension *pro hac vice* of the treaty rights of other members.
>
> It is also clear to us that Article X:3 of the GATT 1994 establishes certain minimum standards for transparency and procedural fairness in the administration of trade regulations which, in our view, are not met here. The non-transparent and ex parte nature of the internal governmental procedures applied by the competent officials in the Office of Marine Conservation, the Department of State, and the United States National Marine Fisheries Service throughout the certification processes under Section 609, as well as the fact that countries whose applications are denied do not receive formal notice of such denial, nor of the reasons for the denial, and the fact, too, that there is no formal legal procedure for review of, or appeal from, a denial of an application, are all contrary to the spirit, if not the letter, of Article X:3 of the GATT 1994."[564]

(i) Scope of paragraph 3

372. In *EC – Bananas III*, the Panel rejected the EC argument that Article X:3 applies only to internal measures, but not to licensing regulations for tariff quotas. In its finding, the Panel referred to Article X:1 and held that it "defines the coverage of Article X:3(a)".[565]

(b) Article X:3(a)

(i) Scope of Article X:3(a)

373. In *EC – Bananas III*, the Appellate Body examined the European Communities' appeal against the Panel's finding that the imposition of different import licensing systems on like products imported from different Members was inconsistent with Article X:3(a). In upholding the Panel's finding, the Appellate Body defined the scope of paragraph 3(a) by drawing a distinction between laws, regulations, decisions and rulings *themselves* and their *administration*:

> "The text of Article X:3(a) clearly indicates that the requirements of 'uniformity, impartiality and reasonableness' do not apply to the laws, regulations, decisions and rulings *themselves*, but rather to the *administration* of those laws, regulations, decisions and rulings. The context of Article X:3(a) within Article X, which is entitled 'Publication and Administration of Trade Regulations', and a reading of the other paragraphs of Article X, make it clear that Article X applies to the *administration* of

[562] Panel Report on *US – Underwear*, para. 7.69.
[563] Appellate Body Report on *US – Underwear*, p. 21.
[564] (Original footnote omitted) Appellate Body Report on *US – Shrimp*, paras. 182 – 183.
[565] Panel Report on *EC – Bananas III*, para. 7.206. Also, Panel Report on *EC – Bananas III*, para. 7.225.

laws, regulations, decisions and rulings. To the extent that the laws, regulations, decisions and rulings themselves are discriminatory, they can be examined for their consistency with the relevant provisions of the GATT 1994."[566]

374. The Appellate Body on *EC – Poultry* confirmed the above line of interpretation and found that "to the extent that Brazil's appeal relates to the *substantive content* of the EC rules themselves, and not to their *publication* or *administration*, that appeal falls outside the scope of Article X of the GATT 1994. The WTO-consistency of such substantive content must be determined by reference to provisions of the covered agreements other than Article X of the GATT 1994."[567]

375. The Panel on *Argentina – Hides and Leather* rejected Argentina's argument that Article X:3(a) only applies in situations when there is discrimination in treatment with respect to, for example, exports to two or more Members. The Panel stated:

"In our view, there is no requirement that Article X:3(a) be applied only in situations where it is established that a Member has applied its Customs laws and regulations in an inconsistent manner with respect to the imports of or exports to two or more Members.

Furthermore, Article X:3(a), by its terms, calls for a uniform, impartial and reasonable administration of trade-related regulations. Nowhere does it refer to Members or products originating in or destined for certain Members' territories, as is explicitly contained in other GATT 1994 Articles such as I, II and III. Indeed, Article X:1 requires the prompt publication of trade-related regulations 'so as to enable governments and *traders* to become acquainted with them.' Similarly, Article X:3(b) requires Members to provide for domestic review procedures relating to customs matters to which normally only private traders, not Members would have access.[568] These references undercut Argentina's argument that Article X can only apply in situations where there is discrimination between WTO *Members*."[569]

376. Further, in *Argentina – Hides and Leather*, the Panel disagreed with Argentina's argument that a violation of Article X:3(a) can be found not in the substance of a regulation but in its administration. The Panel was reviewing an Argentine measure which authorized the presence of representatives of certain industrial associations during customs controls of bovine raw hides and certain other hides before export. The Panel found that Article X:3(a) applied to the measure at issue, because it did not contain "substantive Customs rules for enforcement of export laws", but rather "provide[d] for a certain manner of applying those substantive rules":

"If the substance of a rule could not be challenged, even if the rule was administrative in nature, it is unclear what could ever be challenged under Article X. First, there is no requirement in Article X:3(a) that it apply only to 'unwritten' rules. Again, this would be contrary to that provision's own language linking it to Article X:1. Second, such an approach would also likely run counter to the other aspect of the Appellate Body's holding in *European Communities – Poultry* regarding Article X, to the effect that it applies to rules of general application and not to specific shipments.[570] Looking only to individual Customs officers' enforcement actions, rather than measures such as Resolution 2235, as Argentina implies, would almost certainly require a review of a specific instance of abuse rather than the general rule applicable.[571] This would effectively write Article X:3(a) out of existence, which we cannot agree with.[572]

Thus, we are left with a situation where we have a written provision, Resolution 2235, and we need to determine whether this Resolution is substantive or administrative. In our view it is administrative in nature and therefore properly subject to review under Article X:3(a). Resolution 2235 does not establish substantive Customs rules for enforcement of export laws. Argentina has pointed out that those are contained primarily in the Customs Code (Law No. 22415), Resolution (ANA) No. 1284/95 and Resolution (ANA) No. 125/97.[573] Rather, Resolution 2235 provides for a means to involve private persons in assisting Customs officials in the application and enforcement of the substantive rules, namely, the rules on classification and export duties. Resolution 2235 does not create the classification requirements; it does not provide for export refunds; it does not impose export duties. It merely provides for a certain manner of applying those substantive rules. This measure clearly is administrative in nature."[574]

377. In *US – Corrosion-Resistant Steel Sunset Review*, Japan argued that the United States' sunset review laws were administrative in nature and consequently could be challenged under Article X:3(a) of the *GATT 1994*.

[566] Appellate Body Report on *EC – Bananas*, para. 200. See also Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.289.

[567] Appellate Body Report on *EC – Poultry*, para. 115.

[568] (*footnote original*) In fact, Article X:3(b), in its second sentence, uses the word "importer".

[569] Panel Report on *Argentina – Hides and Leather*, paras. 11.67–11.68.

[570] (*footnote original*) In *EC – Poultry*, the Appellate Body further stated that Article X is relevant only to measures "of general application" and not to the particular treatment of each individual shipment. See Appellate Body Report on *EC – Poultry*, paras. 111 and 113.

[571] (*footnote original*) We make this statement *arguendo* and do not imply agreement with Argentina's implicit assumption of no violation in such instances.

[572] (*footnote original*) See Appellate Body Reports on *US – Gasoline*, p. 23; *Japan – Alcoholic Beverages II*, p. 12; *Argentina – Footwear (EC)*, para. 81.

[573] (*footnote original*) Even some of these provisions arguably are procedural in nature.

[574] Panel Report on *Argentina – Hides and Leather*, paras. 11.71–11.72.

Japan had asserted that the United States' administration of its sunset review laws was inconsistent with Article X:3(a) as the United States legislation mandated self-initiation of sunset reviews without sufficient evidence. Japan also claimed that the United States' administration of sunset review laws was not uniform with different approaches with regard to Article 11.2 reviews and sunset reviews being taken. The Panel ruled, in a finding not reviewed by the Appellate Body, that Japan's allegations under Article X:3(a) related to United States laws and regulations rather than its administration and accordingly was not within the scope of Article X:3(a):

"On the first point, i.e. self-initiation of sunset reviews without any, or sufficient, evidence, Japan argues that the US statute and regulations, which mandate such self-initiation, are 'unreasonable' because they allow the DOC to disregard the substantive requirements for the initiation. Japan further submits that such self-initiation renders the administration of US law 'partial' because it favours the US domestic industry. We note that Japan made a substantive claim challenging both the US law as such and its application in this particular sunset review regarding self-initiation of sunset reviews without sufficient evidence. We recall our finding above that self-initiation of sunset reviews under Article 11.3 is not subject to the evidentiary requirements of Article 5.6. This indicates that the substantive content of this aspect of US law, i.e. evidentiary standards applicable to the self-initiation of sunset reviews, can be, and in fact has in this case been, challenged by Japan. Therefore, deriving guidance from the ruling of the Appellate Body, in *EC – Poultry*, we find that this aspect of US law cannot be challenged under Article X:3(a) of GATT 1994 because it relates to the *substance* rather than the administration of US law.

With regard to the second 'as such' allegation of Japan, i.e., different approaches taken by the United States regarding Article 11.2 and 11.3 reviews, even assuming that this argument legitimately falls within the scope of application of Article X:3(a), we understand that Japan has based its "as such" allegations here exclusively upon the Sunset Policy Bulletin. We have found above that the Sunset Policy Bulletin is not challengeable as such under the *WTO Agreement*. We therefore examine no further Japan's 'as such' allegations relying solely on the Sunset Policy Bulletin.

We therefore conclude that the administration of the US sunset review law as such was not inconsistent with Article X:3(a) of GATT 1994."[575]

378. In *US – Corrosion-Resistant Steel Sunset Review* Japan argued that the application of the US laws and regulations with regard to the sunset reviews was unreasonable and partial, and hence inconsistent with Article X:3(a). Japan based its contention on that less information was required from United States domestic producers compared with exporters. The Panel recalled WTO case law that matters relating to the substantive nature of laws and regulations go beyond the scope of Article X:3(a):

"Japan further argues that the fact that not as much information is requested from domestic producers renders the administration of US law partial.

The nature and quantity of the information that will be in the possession of foreign exporters and producers will necessarily differ from the information possessed by the domestic industry, and this information will be used for different purposes by the investigating authority. This is because generally, in investigations (and reviews), foreign exporters will be the main source of information regarding the dumping, or likelihood of continuation or recurrence of dumping, component of the determination that must be made, while domestic producers will possess more information relevant to the injury component of the determination that must be made. Consequently, we find that this aspect of Japan's claim also falls outside the scope of Article X:3(a)."[576]

379. In *US – Hot-Rolled Steel*, the Panel pointed out that, for a Member's action to violate Article X:3(a) that action should have a significant impact on the overall administration of that Member's law and not simply on the outcome of the single case in question.[577]

(ii) "administer in a uniform, impartial and reasonable manner"

380. In *Argentina – Hides and Leather*, the Panel explained the nature of the obligation under Article X:3(a) by distinguishing between transparency between WTO Members and transparency with respect to individual traders:

"In applying these tests, it is important to recall that we are not to duplicate the substantive rules of the GATT 1994. Thus, for example, the test generally will not be whether there has been discriminatory treatment in favor of exports to one Member relative to another. Indeed, the focus is on the treatment accorded by government authorities to the traders in question. This is explicit in Article X:1 which requires, *inter alia*, that all provisions 'shall be published promptly in such a manner as to enable governments and *traders* to become acquainted with them.' (emphasis added). While it is normal that the GATT 1994 should require this sort of transparency between Members, it is significant that Article X:1 goes further and specifically refer-

[575] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 7.293–7.295.
[576] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 7.305–7.306.
[577] Panel Report on *US – Hot-Rolled Steel*, para. 7.268. See also, Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.307.

ences the importance of transparency to individual traders."[578]

381. In *Argentina – Hides and Leather*, the Panel addressed the concept of "uniformity" with respect to the requirement in Article X:3(a) that laws and regulations shall be administered "in a uniform, impartial and reasonable manner". The Panel opined "that this provision should not be read as a broad anti-discrimination provision." Rather, the Panel read this requirement to stipulate "uniform administration of Customs laws and procedures between individual shippers and even with respect to the same person at different times and different places":

"The term 'uniform' appears in the GATT 1994 only with respect to administration of Customs laws. Article VII:2(b) provides that when assessing Customs valuation on the basis of 'actual value' variations may exist based on quantities provided that such prices are uniformly related to quantities in other transactions.

In addition to the term appearing in paragraph 3(a) of Article X, it also appears in paragraph 2 of that Article requiring uniform practices for certain changes in applying Customs laws. Finally, *Ad* Article I, paragraph 4, provides for uniform practices in re-application of tariff classifications and imposition of certain new classifications at the time of the provisional applications of the GATT 1947.

It is obvious from these uses of the terms that it is meant that Customs laws should not vary, that every exporter and importer should be able to expect treatment of the same kind, in the same manner both over time and in different places and with respect to other persons. Uniform administration requires that Members ensure that their laws are applied consistently and predictably and is not limited, for instance, to ensuring equal treatment with respect to WTO Members. That would be a substantive violation properly addressed under Article I. This is a requirement of uniform administration of Customs laws and procedures between individual shippers and even with respect to the same person at different times and different places.

We are of the view that this provision should not be read as a broad anti-discrimination provision. We do not think this provision should be interpreted to require all products be treated identically. That would be reading far too much into this paragraph which focuses on the day to day application of Customs laws, rules and regulations. There are many variations in products which might require differential treatment and we do not think this provision should be read as a general invitation for a panel to make such distinctions."[579]

382. In *Argentina – Hides and Leather*, the Panel addressed an argument put forward by the European Communities based on the interpretation of the terms "impartial", contained in Article X:3(a). The European Communities argued that the Argentine measure authorizing the presence of representatives of domestic industrial associations at customs controls of bovine raw hides and certain other hides before export, persons which according to the European Communities were "partial and interested", was not an impartial application of the relevant custom rules. The Panel agreed with the European Communities:

"Much as we are concerned in general about the presence of private parties with conflicting commercial interests in the Customs process, in our view the requirement of impartial administration in this dispute is not a matter of mere presence of representatives [of the relevant industrial associations] in such processes. It all depends on what that person is permitted to do. In our view, the answer to this question is related directly to the question of access to information as part of the product classification process as discussed in the previous Section. Our concern here is focussed on the need for safeguards to prevent the inappropriate flow of one private person's confidential information to another as a result of the administration of the Customs laws, in this case the implementing Resolution 2235.

Whenever a party with a contrary commercial interest, but no relevant legal interest, is allowed to participate in an export transaction such as this, there is an inherent danger that the Customs laws, regulations and rules will be applied in a partial manner so as to permit persons with adverse commercial interests to obtain confidential information to which they have no right.

While this situation could be remedied by adequate safeguards, we do not consider that such safeguards presently are in place. Therefore, Resolution 2235 cannot be considered an impartial administration of the Customs laws, regulations and rules described in Article X:1 and, thus, is inconsistent with Article X:3(a) of the GATT 1994.[580]

383. With respect to the same Argentine measure, described in paragraph 381 above, the European Communities was also claiming that the requirement of "reasonableness" under Article X:3(a) was infringed. The Panel on *Argentina – Hides and Leather* again agreed with the European Communities:

"[W]e must conclude that a process aimed at assuring the proper classification of products, but which inherently contains the possibility of revealing confidential business information, is an unreasonable manner of administering the laws, regulations and rules identified in Article X:1 and therefore is inconsistent with Article X:3(a)."[581]

[578] Panel Report on *Argentina – Hides and Leather*, para. 11.76.
[579] Panel Report on *Argentina – Hides and Leather*, paras. 11.81–11.84.
[580] Panel Report on *Argentina – Hides and Leather*, para. 11.99–11.101.
[581] Panel Report on *Argentina – Hides and Leather*, para. 11.94.

384. In *US – Stainless Steel*, the Panel rejected Korea's claim that the United States violated Article X:3(a) by departing from its own established policy with respect to the determination of the prices of local sales which are to be compared to alleged dumping exports. The Panel held that Article X:3(a) was not "intended to function as a mechanism to test the consistency of a Member's particular decisions or rulings with the Member's own domestic law and practice":

> "We note at the outset of our examination that we have grave doubts as to whether Article X:3(a) can or should be used in the manner advocated by Korea. As the United States correctly points out, the WTO dispute settlement system 'serves to preserve the rights and obligations of Members under the covered agreements, and to clarify the existing provisions of those agreements'.[582] It was not in our view intended to function as a mechanism to test the consistency of a Member's particular decisions or rulings with the Member's own domestic law and practice; that is a function reserved for each Member's domestic judicial system,[583] and a function WTO panels would be particularly ill-suited to perform. An incautious adoption of the approach advocated by Korea could however effectively convert every claim that an action is inconsistent with domestic law or practice into a claim under the *WTO Agreement*.
>
> In any event, we do not consider that the DOC in this investigation committed the 'unprecedented departure' from 'established policy' alleged by Korea such that its behaviour was either non-uniform or unreasonable. In our view, the requirement of uniform administration of laws and regulations must be understood to mean uniformity of treatment in respect of persons similarly situated; it cannot be understood to require identical results where relevant facts differ. Nor do we consider that the requirement of reasonable administration of laws and regulations is violated merely because, in the administration of those laws and regulations, different conclusions were reached based upon differences in the relevant facts."[584]

(iii) Reference to GATT practice

385. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 297–298.

(c) Article X:3(c)

(i) "the date of this Agreement"

386. With respect to GATT practice concerning the phrase "the date of this Agreement", see GATT Analytical Index, page 298.

C. RELATIONSHIP WITH OTHER ARTICLES

1. General

387. In *EC – Bananas III*, the Appellate Body explained the relationship between Article X and other GATT provisions. See the excerpt referenced in paragraph 373 above. This finding of the Appellate Body was also cited by the Panel on *Argentina – Hides and Leather*.[585]

2. Article I

388. In *Indonesia – Autos*, the Panel examined whether a series of measures taken by Indonesia to develop its domestic automobile industry was inconsistent with Article X as well as Articles I and III. After having found that the Indonesian National Car Programme violated "the provisions of Article I and/or Article III of GATT", the Panel did not consider it necessary to examine Japan's claims under Article X of GATT.[586]

389. In *Argentina – Hides and Leather*, the Panel rejected Argentina's argument that Article X:3(a) only applies in situations when there is discrimination in treatment with respect to, for example, exports to two or more Members. See the excerpt referenced in paragraph 374 above.

3. Article III

390. In *Indonesia – Autos*, the Panel discussed the relationship between Articles III and X. See the excerpt referenced in paragraph 388 above.

4. Reference to GATT practice

391. With respect to GATT practice in the context of the relationship between Article X of GATT and other Articles, see GATT Analytical Index, pages 298–299.

D. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Licensing Agreement

392. In *EC – Bananas III*, the Appellate Body reviewed the Panel's finding that the EC import licensing system on imports of bananas was in violation of Article X as well as Article 1.3 of the *Licensing Agreement*. The Appellate Body stated that "the provisions of Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* have identical coverage":

---

[582] (*footnote original*) *DSU* Article 3.2.

[583] (*footnote original*) It is for this reason that both Article X:3(b) of *GATT 1994* and Article 13 of the *AD Agreement* require Members to maintain appropriate judicial, arbitral or administrative tribunals or procedures.

[584] Panel Report on *US – Stainless Steel*, paras. 6.50–6.51.

[585] Panel Report on *Argentina – Hides and Leather*, para. 11.60. The Panel went on to state:

> "See also the Appellate Body Report on *European Communities – Poultry*, *supra*, at para. 115, wherein the Appellate Body emphasized that to the extent Brazil's appeal related to the substantive content of the EC rules rather than to their publication or administration, it fell outside of Article X."

Panel Report on *Argentina – Hides and Leather*, fn. 366.

[586] Panel Report on *Indonesia – Autos*, para. 14.152.

"Article X:3(a) of the GATT 1994 applies to all 'laws, regulations, decisions and rulings of the kind described in paragraph 1' of Article X, which includes those, *inter alia*, 'pertaining to . . . requirements, restrictions or prohibitions on imports . . .'. The EC import licensing procedures are clearly regulations pertaining to requirements on imports and, therefore, are within the scope of Article X:3(a) of the GATT 1994. As we have concluded, the *Licensing Agreement* also applies to the EC import licensing procedures. We agree, therefore, . . . that *both* the *Licensing Agreement* and the relevant provisions of the GATT 1994, in particular, Article X:3(a), apply to the EC import licensing procedures. In comparing the language of Article 1.3 of the *Licensing Agreement* and of Article X:3(a) of the GATT 1994, we note that there are distinctions between these two articles. The former provides that 'the rules for import licensing procedures shall be neutral in application and administered in a fair and equitable manner'. The latter provides that each Member shall 'administer in a uniform, impartial and reasonable manner all its laws, regulations, decisions or rulings of the kind described in paragraph 1 of [Article X]'.

We attach no significance to the difference in the phrases 'neutral in application and administered in a fair and equitable manner' in Article 1.3 of the *Licensing Agreement* and 'administer in a uniform, impartial and reasonable manner' in Article X:3(a) of the GATT 1994. In our view, the two phrases are, for all practical purposes, interchangeable. We agree, therefore, . . . that the provisions of Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* have identical coverage.

Although Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures. If the Panel had done so, then there would have been no need for it to address the alleged inconsistency with Article X:3(a) of the GATT 1994."[587]

2. Anti-Dumping Agreement

393. In *US – DRAMS*, Korea, the complainant, claimed that a particular United States anti-dumping duty order was in violation of Article X of GATT as well as several Articles of the *Anti-Dumping Agreement*. Having already found a violation of Article 11.2 of the *Anti-Dumping Agreement*, the Panel exercised judicial economy with respect to Articles I and X of the *GATT 1994*.[588]

394. In *US – Stainless Steel*, Korea, the complainant, argued that the United States violated Article X:3(a) of GATT as well as Article 2.4.1 of the *Anti-Dumping Agreement* by performing an unnecessary "double conversion" in calculating the prices of certain local sales which are to be compared to the alleged dumping exports. After having found a violation of Article 2.4.1 in this regard, the Panel exercised judicial economy with respect to Korea's claim under Article X:3(a).[589]

XII. ARTICLE XI

A. TEXT OF ARTICLE XI

*Article XI**
General Elimination of Quantitative Restrictions

1. No prohibitions or restrictions other than duties, taxes or other charges, whether made effective through quotas, import or export licences or other measures, shall be instituted or maintained by any contracting party on the importation of any product of the territory of any other contracting party or on the exportation or sale for export of any product destined for the territory of any other contracting party.

2. The provisions of paragraph 1 of this Article shall not extend to the following:

(*a*) Export prohibitions or restrictions temporarily applied to prevent or relieve critical shortages of foodstuffs or other products essential to the exporting contracting party;

(*b*) Import and export prohibitions or restrictions necessary to the application of standards or regulations for the classification, grading or marketing of commodities in international trade;

(*c*) Import restrictions on any agricultural or fisheries product, imported in any form,* necessary to the enforcement of governmental measures which operate:

(i) to restrict the quantities of the like domestic product permitted to be marketed or produced, or, if there is no substantial domestic production of the like product, of a domestic product for which the imported product can be directly substituted; or

(ii) to remove a temporary surplus of the like domestic product, or, if there is no substantial domestic production of the like product, of a domestic product for which the imported product can be directly substituted, by making the surplus available to certain groups of domestic consumers free of charge or at prices below the current market level; or

[587] Appellate Body Report on *EC – Bananas III*, paras. 203–204.
[588] Panel Report on *US – DRAMS*, para. 6.92.
[589] Panel Report on *US – Stainless Steel*, para. 6.55.

(iii) to restrict the quantities permitted to be produced of any animal product the production of which is directly dependent, wholly or mainly, on the imported commodity, if the domestic production of that commodity is relatively negligible.

Any contracting party applying restrictions on the importation of any product pursuant to subparagraph (c) of this paragraph shall give public notice of the total quantity or value of the product permitted to be imported during a specified future period and of any change in such quantity or value. Moreover, any restrictions applied under (i) above shall not be such as will reduce the total of imports relative to the total of domestic production, as compared with the proportion which might reasonably be expected to rule between the two in the absence of restrictions. In determining this proportion, the contracting party shall pay due regard to the proportion prevailing during a previous representative period and to any special factors* which may have affected or may be affecting the trade in the product concerned.

B. TEXT OF *AD* ARTICLE XI

Ad Articles XI, XII, XIII, XIV and XVIII

Throughout Articles XI, XII, XIII, XIV and XVIII, the terms "import restrictions" or "export restrictions" include restrictions made effective through state-trading operations.

Ad Article XI
Paragraph 2 (c)

The term "in any form" in this paragraph covers the same products when in an early stage of processing and still perishable, which compete directly with the fresh product and if freely imported would tend to make the restriction on the fresh product ineffective.

Paragraph 2, last subparagraph

The term "special factors" includes changes in relative productive efficiency as between domestic and foreign producers, or as between different foreign producers, but not changes artificially brought about by means not permitted under the Agreement.

C. INTERPRETATION AND APPLICATION OF ARTICLE XI

1. General

(a) Status of Article XI in GATT

395. The Panel on *Turkey – Textiles*, in a finding not reviewed by the Appellate Body, elaborated on the systemic significance of Article XI in the GATT framework. The Panel first stressed that Article XI was a reflection of the preference of the GATT system for tariffs over quotas among forms of border protection; it then considered the historical evolution of quantitative restrictions since the early years of GATT and emphasized the effort of the Uruguay Round to establish mechanisms to phase-out quantitative restrictions in the sectors of agriculture and textiles and clothing:

"The prohibition on the use of quantitative restrictions forms one of the cornerstones of the GATT system. A basic principle of the GATT system is that tariffs are the preferred and acceptable form of protection. Tariffs, to be reduced through reciprocal concessions, ought to be applied in a non-discriminatory manner independent of the origin of the goods (the 'most-favoured-nation' (MFN) clause). Article I, which requires MFN treatment, and Article II, which specifies that tariffs must not exceed bound rates, constitute Part I of GATT. Part II contains other related obligations, *inter alia* to ensure that Members do not evade the obligations of Part I. Two fundamental obligations contained in Part II are the national treatment clause and the prohibition against quantitative restrictions. The prohibition against quantitative restrictions is a reflection that tariffs are GATT's border protection 'of choice'. Quantitative restrictions impose absolute limits on imports, while tariffs do not. In contrast to MFN tariffs which permit the most efficient competitor to supply imports, quantitative restrictions usually have a trade distorting effect, their allocation can be problematic and their administration may not be transparent.

Notwithstanding this broad prohibition against quantitative restrictions, GATT contracting parties over many years failed to respect completely this obligation. From early in the GATT, in sectors such as agriculture, quantitative restrictions were maintained and even increased to the extent that the need to restrict their use became central to the Uruguay Round negotiations. In the sector of textiles and clothing, quantitative restrictions were maintained under the Multifibre Agreement (further discussed below). Certain contracting parties were even of the view that quantitative restrictions had gradually been tolerated and accepted as negotiable and that Article XI could not be and had never been considered to be, a provision prohibiting such restrictions irrespective of the circumstances specific to each case. This argument was, however, rejected in an adopted panel report *EEC – Imports from Hong Kong*.[590]

Participants in the Uruguay Round recognized the overall detrimental effects of non-tariff border restrictions (whether applied to imports or exports) and the need to favour more transparent price-based, i.e. tariff-based, measures; to this end they devised mechanisms to phase-out quantitative restrictions in the sectors of agriculture and textiles and clothing. This recognition is reflected in the GATT 1994 Understanding on Balance-

[590] (*footnote original*) Panel Report on *EEC – Imports Restrictions*.

of-Payments Provisions[591], the Agreement on Safeguards [592], the Agreement on Agriculture where quantitative restrictions were eliminated[593] and the Agreement on Textiles and Clothing (further discussed below) where MFA derived restrictions are to be completely eliminated by 2005."[594]

(b) Burden of proof

396. In *India – Quantitative Restrictions*, the Panel examined whether the Indian import licensing system was inconsistent with Article XI and, in case of inconsistency, whether it was justified by Article XVIII. Referring to the Appellate Body Report on *US – Wool Shirts and Blouses* and the Appellate Body Report on *EC – Hormones*, the Panel stated on the issue of the burden of proof under Article XI:

"In all instances, each party has to provide evidence in support of each of its particular assertions. This implies that the United States has to prove any of its claims in relation to the alleged violation of Article XI:1 and XVIII:11. Similarly, India has to support its assertion that its measures are justified under Article XVIII:B. We also view the rules stated by the Appellate Body as requiring that the United States as the complainant cannot limit itself to stating its claim. It must present a *prima facie* case that the Indian balance-of-payments measures are not justified by reference to Articles XI:1 and XVIII:11 of GATT 1994.[595] Should the United States do so, India would have to respond in order to rebut the claim."[596]

(c) Reference to GATT practice

397. With respect to GATT practice on this subject-matter, see the GATT Analytical Index, pages 317–319.

2. Article XI:1

(a) General

398. In *Canada – Periodicals*, the Panel found a complete ban on imports of a certain product to be inconsistent with Article XI:1 of GATT:

"Since the importation of certain foreign products into Canada is completely denied under Tariff Code 9958, it appears that this provision by its terms is inconsistent with Article XI:1 of GATT 1994."[597]

399. In *India – Autos*, India had argued that since Article XI of the *GATT 1994* dealt with border measures and the disputed Public Notice No. 60 did not deal with any such measure, it could not violate Article XI. However, the Panel found that as it required acceptance of the so-called "trade balancing condition" it imposed a restriction on imports and therefore was inconsistent with Article XI:1 of the *GATT 1994*:

"[I]n determining whether Public Notice No. 60 is inconsistent with Article XI:1 of the GATT 1994, the Panel recalls its earlier analysis of the trade balancing condition as contained in the previous section.

First, it recalls its conclusion that Public Notice No. 60, as a governmental measure requiring manufacturers to accept certain conditions in order to be allowed to import restricted automotive kits and components, constituted a 'measure' within the meaning of Article XI:1. This conclusion remains relevant to this analysis and the Panel confirms its earlier conclusion in this respect.

Second, in order to establish whether Public Notice No. 60, in itself, can be considered to be inconsistent with Article XI:1, it has to be established that it constitutes a 'restriction . . . on importation' within the meaning of that provision. The Panel recalls in this respect its earlier conclusion that the trade balancing condition, as contained both in Public Notice No. 60 and in the MOUs signed thereunder, constituted a restriction on importation contrary to Article XI:1 in that it effectively limits the amount of imports that a manufacturer may make by linking imports to commitment to undertake a certain amount of exports. Under such circumstance, an importer is not free to import as many restricted kits or components as he otherwise might so long as there is a finite limit to the amount of possible exports.

. . .

The Panel therefore concludes that Public Notice No. 60 in itself, to the extent that it requires the acceptance of the trade balancing condition in order to gain the advantage of importing the restricted products, imposes a restriction on imports and is inconsistent with Article XI:1 of the GATT 1994."[598]

---

[591] As an example, the footnote to this sentence refers to paras. 2 and 3 of the GATT 1994 Understanding on the Balance-of-Payments Provisions, which both, according to the Panel, "provide that Members shall seek to avoid the imposition of new quantitative restrictions for balance-of-payments purposes."

[592] (*footnote original*) The Agreement on Safeguards also evidences a preference for the use of tariffs. Article 6 provides that provisional safeguard measures "should take the form of tariff increases" and Article 11 prohibits the use of voluntary export restraints.

[593] (*footnote original*) Under the Agreement on Agriculture, notwithstanding the fact that contracting parties, for over 48 years, had been relying a great deal on import restrictions and other non-tariff measures, the use of quantitative restrictions and other non-tariff measures was prohibited and Members had to proceed to a "tariffication" exercise to transform quantitative restrictions into tariff based measures.

[595] (*footnote original*) Appellate Body Report on *Australia – Salmon*, paras. 257–259.

[596] Panel Report on *India – QR*, para. 5.119. The Panel on *US – Shrimp* also allocated the burden of proof to the complainant, referring to the Appellate Body Report on *US – Wool Shirts and Blouses*. Panel Report on *US – Shrimp*, para. 7.14. Further, the Panel on *Argentina – Hides and Leather* followed this practice. Panel Report on *Argentina – Hides and Leather*, paras. 11.11–11.14.

[597] Panel Report on *Canada – Periodicals*, para. 5.5.

[598] Panel Report on *India – Autos*, 7.318 – 7.322.

(b) "prohibitions or restrictions . . . on the importation of any product"

(i) Scope

400. The Panel on *US – Shrimp* found that the United States violated Article XI by imposing an import ban on shrimp and shrimp products harvested by vessels of foreign nations where such exporting country had not been certified by United States' authorities as using methods not leading to the incidental killing of sea turtles above certain levels. The Panel stated with reference to the term "prohibitions or restrictions" as follows:

> "[T]he US statutory provision in question] expressly requires the imposition of an import ban on imports from non-certified countries. We further note that in its judgement of December 1995, the CIT directed the US Department of State to prohibit, no later that 1 May 1996, the importation of shrimp or products of shrimp wherever harvested in the wild with commercial fishing technology which may affect adversely those species of sea turtles the conservation of which is the subject of regulations of the Secretary of Commerce. Furthermore, the CIT ruled that the US Administration has to apply the import ban, *including to TED-caught shrimp*, as long as the country concerned has not been certified. In other words, the United States bans imports of shrimp or shrimp products from any country not meeting certain policy conditions. We finally note that previous panels have considered similar measures restricting imports to be 'prohibitions or restrictions' within the meaning of Article XI.[599]"[600]

401. The Panel on *EC – Asbestos* examined the WTO-consistency of a French ban on the manufacture, import and export, and domestic sales and transfer of certain asbestos and asbestos-containing products. In this context, the question arose whether the French measure fell under the scope of Article III or Article XI. The Panel's findings on this issue were not appealed and thus were not reviewed by the Appellate Body. The complainant, Canada, argued that this case was not addressed by the interpretative Note *Ad Article III*. Specifically, Canada was arguing that the interpretative Note *Ad Article III* only applies if the measure is applicable to the imported product and to the domestic product. However, in Canada's view, the explicit import ban did not apply to the domestic product because the domestic product was of course not imported. Moreover, since France neither produced nor mined asbestos fibres on its territory, the ban on manufacturing, processing, selling and domestic marketing was, in practical terms, equivalent to a ban on importing chrysotile asbestos fibres. The Panel first indicated, contrary to Canada's claim, that the Note *Ad Article III* applied to this case, stating:

> "[T]he word 'comme' in the French text of Note *Ad Article III* ['and' in the English text] implies in the first place that the measure applies to the imported product and to the like domestic product.[601] The Panel notes in this connection that the fact that France no longer produces asbestos or asbestos-containing products does not suffice to make the Decree a measure falling under Article XI:1. It is in fact because the Decree prohibits the manufacture and processing of asbestos fibres that there is no longer any French production. The cessation of French production is the consequence of the Decree and not the reverse. Consequently, the Decree is a measure which 'applies to an imported product and to the like domestic product' within the meaning of Note *Ad Article III*.
>
> Secondly, the Panel notes that the words 'any law, regulation or requirement [. . .] which applies to an imported product and ['comme' in the French text] to the like domestic product' in the Note *Ad Article III* could also mean that the same regime must apply to the imported product and the domestic product.[602] In this case, under the Decree, the domestic product may not be sold, placed on the domestic market or transferred under any title, possessed for sale, offered or exported. If we follow Canada's reasoning, products from third countries are subject to a different regime because, as they cannot be imported, they cannot be sold, placed on the domestic market, transferred under any title, possessed for sale or offered. Firstly, the regulations applicable to domestic products and foreign products lead to the same result: the halting of the spread of asbestos and asbestos-containing products on French territory. In practice, in one case (domestic products), they cannot be placed on the domestic market because they cannot be transferred under any title. In the other (imported products), the import ban also prevents their marketing."[603]

402. In this regard, the Panel rejected Canada's argument that an *identical* measure must be applied to the

---

[599] (*footnote original*) *See* Panel Report on *US – Tuna (EEC)*, para. 5.17–5.18, and Panel Report on *US – Tuna (Mexico)*, para. 5.10. Speaking of the relevance for panels of previous reports, the Appellate Body has stated, with respect to adopted panel reports:

> "Adopted panel reports are an important part of the GATT *acquis*. They are often considered by subsequent panels. They create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute". (Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 14)

Regarding unadopted panel reports, the Appellate Body agreed with the panel in the same case that:

> "a panel could nevertheless find useful guidance in the reasoning of an unadopted panel report that it considered to be relevant". (Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 15)

[600] Panel Report on *US – Shrimp*, para 7.16.

[601] (*footnote original*) Le Nouveau Petit Robert, op. cit., p. 411.

[602] (*footnote original*) "In the same way as", "to the same extent as" are among the alternative meanings for the word "comme" in the French text (Le Nouveau Petit Robert, op. cit., p. 411). [In the English text the word is "and"].

[603] Panel Report on *EC – Asbestos*, paras. 8.91–8.92.

domestic product and the like imported product if the measure applicable to the imported product is to fall under Article III:

> "We note that the relevant part of the English text of Note *Ad Article III* reads as follows: 'Any [. . .] law, regulation or requirement [. . .] which applies to an imported product *and* to the like domestic product'.[604] The word 'and' does not have the same meaning as 'in the same way as', which can be another meaning for the word 'comme' in the French text. We therefore consider that the word 'comme' cannot be interpreted as requiring an identical measure to be applied to imported products and domestic products if Article III is to apply.
>
> We note that our interpretation is confirmed by practice under the GATT 1947. In *United States – Section 337 of the Tariff Act of 1930*[605], the Panel had to examine measures specifically applicable to imported products suspected of violating an American patent right. In this case, referring to Note *Ad Article III*, the Panel considered that the provisions of Article III:4 did apply to the special procedures prescribed for imported products suspected of violating a patent protected in the United States because these procedures were considered to be 'laws, regulations and requirements' affecting the internal sale of the imported products, within the meaning of Article III of the GATT. It should be noted that in this case the procedures examined were not the same as the equivalent procedures applicable to domestic products.[606]"[607]

403. In the context of the issue whether the French asbestos ban fell under Article III or Article XI, Canada cited the GATT Panel Report on *Canada – Provincial Liquor Boards (EEC)*. Canada quoted this report in support of its proposition that even if the French measure was an internal measure within the meaning of Article III and Note *Ad Article* III, this did not prevent the French decree from also falling under the scope of Article XI. Specifically, Canada pointed out that in the aforementioned case, the Panel had refrained from making a ruling on Article III:4; Canada argued that this confirmed the non-applicability of Article III:4 to the part of an internal measure dealing with the treatment of imported products. The Panel was unconvinced by this argument and pointed out that the case quoted by Canada concerned restrictions made effective through state-trading operations:

> "We note that in paragraph 4.24 of the Report, the Panel [*Canada – Provincial Liquor Boards (EEC)]* considered that according to the Note *Ad Articles* XI, XII, XIII, XIV and XVIII, restrictions made effective through state-trading operations were 'import restrictions' or 'export restrictions'. It considered that, in the case of enterprises enjoying a monopoly of both importation and distribution in the domestic market, the distinction normally made between restrictions affecting the importation of products and restrictions affecting imported products lost much of its significance since both types of restriction could be made effective through decision by the monopoly. In this case, the Decree did not institute a monopoly on the import or distribution of asbestos and like products, so the Note *Ad Articles* XI, XII, XIII, XIV and XVIII is not relevant to settlement of this matter.
>
> As regards Canada's reference to paragraph 4.26 of the aforementioned report[608], we consider that it does not substantiate Canada's position in this case either. In this paragraph, the Panel refrains from ruling on a violation of Article III:4. It appears to do so, however, for reasons of legal economy because it simultaneously recognizes that Article III:4 could apply to state-trading transactions. Contrary to Canada's assertion, this paragraph does not confirm the non-applicability of Article III:4 to the part of an internal measure dealing with the treatment of imported products. At the most, it could confirm the application of both provisions. Nevertheless, as explained in the preceding paragraph, the Panel found that Article XI:1 applied, referring to the Note *Ad Articles* XI, XII, XIII, XIV and XVIII. This Note only applies to state-trading transactions. In the present case, however, there is no question of a measure applied in the context of state-trading activities."[609]

---

[604] (*footnote original*) Emphasis added. In the place of "and" and "comme", the Spanish version uses the conjunction "y" ("et" in French).

[605] (*footnote original*) See the Report of the Panel in *US – Section 337*.

[606] (*footnote original*) The Panel gave the grounds for its decision in para. 5.10 as follows:

> "The fact that Section 337 is used as a means for the enforcement of United States Patent Law at the border does not provide an escape from the applicability of Article III:4; the interpretative Note to Article III states that any law, regulation or requirement affecting the internal sale of products that is enforced in the case of the imported product at the time or point of importation is nevertheless subject to the provisions of Article III. Nor could the applicability of Article III:4 be denied on the ground that most of the procedures in the case before the Panel are applied to persons rather than products, since the factor determining whether persons might be susceptible to Section 337 proceedings or federal district court procedures is the source of the challenged products, that is whether they are of United States origin or imported. For these reasons, the Panel found that the procedures under Section 337 come within the concept of 'laws, regulations and requirements' affecting the internal sale of imported products, as set out in Article III of the General Agreement."

[607] Panel Report on *EC – Asbestos*, paras. 8.94–8.95.

[608] (*footnote original*) "The Panel considered that it was not necessary to decide in this particular case whether the practices complained of were contrary to Article III:4 because it had already found that they were inconsistent with Article XI. However, the Panel saw great force in the argument that Article III:4 was also applicable to state-trading enterprises at least when the monopoly of the importation and monopoly of the distribution in the domestic markets were combined, as was the case of the provincial liquor boards in Canada. This interpretation was confirmed *a contrario* by the wording of Article III:8(a)."

[609] Panel Report on *EC – Asbestos*, paras. 8.97–8.98.

(c) "prohibitions or restrictions . . . on the exportation or sale for export of any product"

404. In *Argentina – Hides and Leather*, the European Communities argued that Argentina's measure was inconsistent with Article XI:1 by authorizing the presence of domestic tanners' representatives in the customs inspection procedures for hides destined for export operations, and thus, imposing *de facto* restrictions on exports of hides.[610] The Panel noted:

> "There can be no doubt, in our view, that the disciplines of Article XI:1 extend to restrictions of a *de facto* nature.[611] It is also readily apparent that Resolution 2235, if indeed it makes effective a restriction, fits in the broad residual category, specifically mentioned in Article XI:1, of 'other measures'."[612]

405. Citing the Panel Report on *Japan – Film*, the Panel on *Argentina – Hides and Leather* went on to state:

> "It is well-established in GATT/WTO jurisprudence that only governmental measures fall within the ambit of Article XI:1. This said, we recall the statement of the panel in *Japan – Measures Affecting Consumer Photographic Film and Paper* to the effect that:
>
> > '[P]ast GATT cases demonstrate that the fact that an action is taken by private parties does not rule out the possibility that it may be deemed governmental if there is sufficient governmental involvement with it. It is difficult to establish bright-line rules in this regard, however. Thus, that possibility will need to be examined on a case-by-case basis.'[613]
>
> We agree with the view expressed by the panel in *Japan – Film*. However, we do not think that it follows either from that panel's statement or from the text or context of Article XI:1 that Members are under an obligation to exclude any possibility that governmental measures may enable private parties, directly or indirectly, to restrict trade, where those measures themselves are not trade-restrictive.[614]"[615]

406. The Panel on *Argentina – Hides and Leather* had to determine, *inter alia*, whether the presence of representatives of the domestic hide tanning industry in the Argentine customs inspection procedures for hides destined for export was an export restriction. The Panel discussed the relevance of the actual trade effect of the measure and found that although actual trade effects did not have to be proven in order to establish a violation of Article XI:1, trade effects carried weight, as an evidentiary matter, for establishing the existence of a *de facto* restriction

> "[A]s to whether Resolution 2235 makes effective a restriction, it should be recalled that Article XI:1, like Articles I, II and III of the GATT 1994, protects competitive opportunities of imported products, not trade flows.[616] In order to establish that Resolution 2235 infringes Article XI:1, the European Communities need not prove actual trade effects. However, it must be borne in mind that Resolution 2235 is alleged by the European Communities to make effective a *de facto* rather than a *de jure* restriction. In such circumstances, it is inevitable, as an evidentiary matter, that greater weight attaches to the actual trade impact of a measure.
>
> Even if it emerges from trade statistics that the level of exports is unusually low, this does not prove, in and of itself, that that level is attributable, in whole or in part, to the measure alleged to constitute an export restriction. Particularly in the context of an alleged *de facto* restriction and where, as here, there are possibly multiple restrictions,[617] it is necessary for a complaining party to establish a causal link between the contested measure and the low level of exports.[618] In our view, whatever else it may involve, a demonstration of causation must consist of a persuasive explanation of precisely how the measure at issue causes or contributes to the low level of exports."[619]

(d) "restrictions made effective through state-trading operations "

407. The Panel on *India – Quantitative Restrictions*, in examining the contested Indian measures, addressed the phrase "restrictions made effective through state-trading operations". In its analysis, which was subsequently not reviewed by the Appellate Body, the Panel

---

[610] With respect to this measure in the light of Article X, see para. 382 of this Chapter.

[611] (*footnote original*) See the Panel Report on *Japan – Semi-Conductors*, paras. 105–109. In other contexts, see the Appellate Body Report on *EC – Bananas III*, paras. 232–234, citing *EEC – Imports of Beef*; *Spain – Unroasted Coffee*, and *Japan – SPF Dimension Lumber*.

[612] Panel Report on *Argentina – Hides and Leather*, para. 11.17.

[613] (*footnote original*) Panel Report on *Japan – Film*, para. 10.56.

[614] (*footnote original*) As we understand it, Article XI:1 does not incorporate an obligation to exercise "due diligence" in the introduction and maintenance of governmental measures beyond the need to ensure the conformity with Article XI:1 of those measures taken alone.

[615] Panel Report on *Argentina – Hides and Leather*, para. 11.18.

[616] (*footnote original*) See the Appellate Body Reports on *Japan – Alcoholic Beverages II*, at p.16; *Korea – Alcoholic Beverages*, at paras. 119–120 and 127.

[617] (*footnote original*) For example, it will be recalled that in the present case there is an export duty on raw hides which has not been challenged.

[618] (*footnote original*) The Appellate Body in *EC – Poultry* similarly required of the complaining party in that case a demonstration of a causal relationship between the imposition of an EC licensing procedure and the alleged trade distortion. See the Appellate Body Report on *EC – Poultry*, at paras. 126–127. While this interpretation related to a claim under the Agreement on Import Licensing Procedures, it is not apparent why the logic should be any different in the case of a claim under Article XI:1 of the GATT 1994.

[619] Panel Report on *Argentina – Hides and Leather*, paras. 11.20–11.21. In this line, the Panel did not find an export restriction made effective by the measure at issue. See Panel Report on *Argentina – Hides and Leather*, paras. 11.22–11.55.

emphasized that the fact that imports were effected through state-trading operations did not *per se* mean that imports were being restricted:

> "In analyzing the US claim, we note that violations of Article XI:1 can result from restrictions made effective through state trading operations. This is made very clear in the Note Ad Articles XI, XII, XIII, XIV and XVIII, which provides that 'Throughout Article XI, XII; XIII; XIV; and XVIII, the terms "import restrictions" or "export restrictions" include restrictions made effective through state-trading operations.' It should be noted however, that the mere fact that imports are effected through state trading enterprises would not in itself constitute a restriction. Rather, for a restriction to be found to exist, it should be shown that the operation of this state trading entity is such as to result in a restriction.[620]
>
> As noted above, the United States has shown in some instances that there have been zero imports of products reserved to state trading enterprises by India. We note, however, that canalization *per se* will not necessarily result in the imposition of quantitative restrictions within the meaning of Article XI:1, since an absence of importation of a given product may not always be the result of the imposition of a prohibitive quantitative restriction. For instance, the absence of importation of snow ploughs into a tropical island cannot be taken as sufficient evidence of the existence of import restrictions, even if the right to import those products is granted to an entity with exclusive or special privileges."[621]

408. The Panel on *Korea – Various Measures on Beef*, in a finding not reviewed by the Appellate Body, examined various practices of the Korean state trading agency for beef – an agency which held both an importation and a distribution monopoly – and discussed the *Ad Note* to Article XI in the following terms:

> "[I]n the special case where a state-trading enterprise possesses an import monopoly *and* a distribution monopoly, any restriction it imposes on the distribution of imported products will *lead to a restriction on importation* of the particular product over which it has a monopoly. In other words, the effective control over both importation and distribution channels by a state-trading enterprise means that the imposition of any restrictive measure, including internal measures, will have an adverse effect on the importation of the products concerned. The *Ad Note* to Article XI therefore prohibits a state-trading enterprise enjoying monopoly right over both importation and distribution from imposing any internal restriction against such imported products."[622]

409. In *EC – Asbestos*, the Panel referred to Note *Ad Articles* XI, XII, XIII, XIV and XVIII in its rejection of Canada's argument that the measure at issue was subject to Article XI:1 as well as Article III:4. See paragraph 403 above.

(e) Bonding requirements

410. In *US – Certain EC Products*, the measures at issue were increased bonding requirements imposed by the United States on imports from the European Communities. The increased bonding requirements were imposed in order to secure the future collection of additional import duties which were only later authorized by the Dispute Settlement Body under Article 22.6 of the DSU. While the majority of the Panel found that this bonding requirement constituted a duty or charge under Article II, one panelist found that this measure fell under Article XI of GATT:

> "Any bonding requirements to cover the payment of tariffs above their bound levels cannot be viewed as a mechanism in place to secure compliance with WTO compatible tariffs and constituted, therefore, import restrictions for which there was no justification. The actual trade effects of the 3 March Measure, which are reflected on the charts contained in paragraph 2.37 of this Panel Report, confirm its restrictive nature and effect. One Panelist found, therefore, that the 3 March Measure constituted a 'restriction', contrary to Article XI of GATT, rather than a duty or charge under Article II."[623]

(f) Licensing requirements

411. In *India – Quantitative Restrictions*, the Panel, in a finding not reviewed by the Appellate Body, held that Article XI:1 had a broad scope and covered discretionary or non-automatic import licensing requirements:

> "[T]he text of Article XI:1 is very broad in scope, providing for a general ban on import or export restrictions or prohibitions 'other than duties, taxes or other charges'. As was noted by the panel in *Japan – Trade in Semiconductors*, the wording of Article XI:1 is comprehensive: it applies 'to all measures instituted or maintained by a [Member] prohibiting or restricting the importation, exportation, or sale for export of products other than measures that take the form of duties, taxes or other charges.'[624] The scope of the term 'restriction' is also broad, as seen in its ordinary meaning, which is 'a limitation on action, a limiting condition or regulation'.
>
> Under the GATT 1947, panels have examined whether import and export licensing systems are restrictions

[620] (*footnote original*) Panel Report on *Korea – Various Measures on Beef*, para 115: "The mere existence of producer-controlled import monopolies could not be considered as a separate import restriction inconsistent with the General Agreement. The Panel noted, however, that the activities of such enterprises had to conform to a number of rules contained in the General Agreement, including those of Article XVII and Article XI:1".

[621] Panel Report on *India – Quantitative Restrictions*, paras. 5.134–5.135.

[622] Panel Report on *Korea – Various Measures on Beef*, para. 751.

[623] Panel Report on *US – Certain EC Products*, para. 6.61.

[624] (*footnote original*) GATT Panel Report on *Japan – Semi-Conductors*, para. 104.

under Article XI:1. For example, in a case involving a so-called 'SLQ' regime, which concerned products subject in principle to quantitative restrictions, but for which no quota amount had been set either in quantity or value, permit applications being granted upon request, the panel noted 'that the SLQ regime was an import licensing procedure which would amount to a quantitative restriction unless it provided for the *automatic* issuance of licences'.[625] A similar conclusion was reached in the above-cited *Japan – Trade in Semi-conductors*, where the panel found that 'export licensing practices by Japan, leading to delays of up to three months in the issuing of licences for semi-conductors destined for contracting parties other than the United States, had been non-automatic and constituted restrictions on the exportation of such products inconsistent with Article XI'.[626] These reports are consistent with the ordinary meaning noted above, as discretionary or non-automatic licensing systems by their very nature operate as limitations on action since certain imports may not be permitted. Thus, in light of the terms of Article XI:1 and these adopted panel reports, we conclude that a discretionary or non-automatic import licensing requirement is a restriction prohibited by Article XI:1."[627]

412. In *Korea – Various Measures on Beef*, the Panel, in a finding not reviewed by the Appellate Body, rejected the United States' claim that "Korea's regulatory regime [on beef imports], and thus its licensing system, by granting exclusive authority to [certain Korean agencies] to import beef, effectively establishes a non-automatic import licensing system in violation of Article XI:1 . . .". The Panel held that discretionary licensing used in conjunction with a quantitative restriction does not necessarily provide an additional level of restriction to the quantitative restriction:

"[W]here a quota is in place, the use of a discretionary licensing system need not necessarily result in any additional restriction. Where a discretionary licensing system is implemented in conjunction with other restrictions, such as in the present dispute, the manner in which the discretionary licensing system is operated may create additional restrictions independent of those imposed by the principal restriction. Since this issue was not considered in the *India – Quantitative Restrictions* report, that case does not provide authority for the proposition that a discretionary licensing system, used in conjunction with a quantitative restriction, necessarily provides some additional level of restriction over and above the inherent restriction on access created through the imposition of a quantitative restriction."[628]

(g) Reference to GATT practice

413. For GATT practice on this subject-matter, see the GATT Analytical Index, pages 315–325.

3. Notification requirements

414. At its meeting on 31 October 1995, the Committee on Market Access adopted two Decisions relating to non-tariff measures: (1) Notification procedures of quantitative restrictions, and (2) Reverse notification on non-tariff measures.[629] At its meeting on 24 June 1997, the Committee further adopted a format for the submissions of notifications of quantitative restrictions.[630]

D. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

415. In *US – Shrimp*, exercising judicial economy, the Panel did not examine a claim under Article I (and Article XIII) after having found a violation of Article XI. See paragraphs 421 and 446 below.

2. Article II

416. In *US – Certain EC Products*, the majority of the Panel found the increased bonding requirements imposed on imports in order to secure the collection of additional import duties to be a duty or charge under Article II. One panelist found the measure at issue to be a restriction within the meaning and scope of Article XI. See paragraph 410 above.

3. Article III

417. In *Korea – Various Measures on Beef*, the Panel examined the United States' claim that the prohibition of cross-trading between end-users in respect of beef was inconsistent with *GATT* Articles III and XI. After finding that this prohibition was contrary to Article III:4 of *GATT*, the Panel exercised judicial economy with respect to the claim that the same measure also violated Article XI of *GATT*.[631]

418. In *EC – Asbestos*, the Panel rejected Canada's argument that the French ban on the manufacture, importation and exportation, and domestic sales and transfer of certain asbestos products was subject to Article XI:1 as well as Article III:4. See paragraphs 401–403 above.

419. In *India – Autos*, the Panel recalled the Panel Report on *Canada – FIRA* regarding the differing scopes

[625] (*footnote original*) GATT Panel Report on *EEC – Import Restrictions*, para. 31. See also Panel Report on *EEC – Minimum Import Prices*, para. 4.9.

[627] Panel Report on *India – Quantitative Restrictions*, paras. 5.129–5.130.
[628] Panel Report on *Korea – Various Measures on Beef*, para. 782.
[629] G/MA/M/3, para. 3. The text of the adopted decisions can be found in G/L/59 and G/L/60.
[630] G/MA/M/10, para. 3. The text of the approved format can be found in G/MA/NTM/QR/2.
[631] Panel Report on *Korea – Various Measures on Beef*, para. 705.

of Article III and XI of GATT 1994. See paragraphs 295–296 above.

4. Article VI

420. In *US – 1916 Act (Japan)*, after finding a violation of Article VI, the Panel held that in the case before it, Article VI addressed the "basic feature" of the measure at issue more directly that Article XI; however, the Panel stated explicitly that this did not mean that Article VI applied to the exclusion of Article XI:1. Nevertheless, the Panel found that it was entitled to exercise judicial economy and decided not to review the claims of Japan under Article XI.[632]

5. Article XIII

421. The Panel on *US – Shrimp*, in an exercise of judicial economy, did not examine a claim under GATT Articles I and XIII after having found a violation of Article XI. See paragraph 446 below. Also, in *India – Quantitative Restrictions*, exercising judicial economy, the Panel did not examine a claim under *GATT* Article XIII after having found a violation of Article XI. See paragraph 447 below.

6. Article XVII

422. Exercising judicial economy, the Panel on *Korea – Various Measures on Beef* did not examine claims regarding certain practices of the Korean state trading agency for beef under Articles III:4 and XVII, after it had found that this practice was inconsistent with Articles XI and II:1(a). See paragraph 481 below.

423. The interpretation and application of Note *Ad* Article XI, XII, XIII, XIV and XVIII, which clarifies that the terms "import restrictions" or "export restrictions" used in these Articles include "restrictions made effective through state-trading operations", was discussed in *India – Quantitative Restrictions* and *Korea – Various Measures on Beef*. See the excerpt(s) referenced in paragraphs 407–408 above.

7. Reference to GATT practice

424. With respect to GATT practice on this subject-matter, see the GATT Analytical Index, page 348.

E. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. SPS Agreement

425. In *Australia – Salmon*, the Panel examined the Canadian claim that the import prohibition of uncooked salmon was inconsistent with Article XI of the *GATT* as well as with several provisions of the *SPS Agreement*. After finding that the Australian measure was inconsistent with the requirements of the *SPS Agreement*, the Panel did not find it necessary to also examine the measure in the light of Article XI.[633]

2. Anti-Dumping Agreement

426. The Panel on *US – 1916 Act (Japan)*, after finding that the measure at issue was inconsistent with provisions of the *Anti-Dumping Agreement* (and Article VI of the *GATT*), did not find it necessary to address the same measure also in the light of Article XI. See also paragraph 420 above.

XIII. ARTICLE XII

A. TEXT OF ARTICLE XII

*Article XII**
Restrictions to Safeguard the Balance of Payments

1. Notwithstanding the provisions of paragraph 1 of Article XI, any contracting party, in order to safeguard its external financial position and its balance of payments, may restrict the quantity or value of merchandise permitted to be imported, subject to the provisions of the following paragraphs of this Article.

2. (a) Import restrictions instituted, maintained or intensified by a contracting party under this Article shall not exceed those necessary:

(i) to forestall the imminent threat of, or to stop, a serious decline in its monetary reserves, or

(ii) in the case of a contracting party with very low monetary reserves, to achieve a reasonable rate of increase in its reserves.

Due regard shall be paid in either case to any special factors which may be affecting the reserves of such contracting party or its need for reserves, including, where special external credits or other resources are available to it, the need to provide for the appropriate use of such credits or resources.

(b) Contracting parties applying restrictions under sub-paragraph (a) of this paragraph shall progressively relax them as such conditions improve, maintaining them only to the extent that the conditions specified in that sub-paragraph still justify their application. They shall eliminate the restrictions when conditions would no longer justify their institution or maintenance under that sub-paragraph.

3. (a) Contracting parties undertake, in carrying out their domestic policies, to pay due regard to the need for maintaining or restoring equilibrium in their balance of

[632] Panel Report on *US – 1916 Act (Japan)*, para. 6.281
[633] Panel Report on *Australia – Salmon*, para. 8.185. With respect to judicial economy in general, see Chapter on the *DSU*, Section XXXVI.F.

payments on a sound and lasting basis and to the desirability of avoiding an uneconomic employment of productive resources. They recognize that, in order to achieve these ends, it is desirable so far as possible to adopt measures which expand rather than contract international trade.

(b) Contracting parties applying restrictions under this Article may determine the incidence of the restrictions on imports of different products or classes of products in such a way as to give priority to the importation of those products which are more essential.

(c) Contracting parties applying restrictions under this Article undertake:

(i) to avoid unnecessary damage to the commercial or economic interests of any other contracting party;*

(ii) not to apply restrictions so as to prevent unreasonably the importation of any description of goods in minimum commercial quantities the exclusion of which would impair regular channels of trade; and

(iii) not to apply restrictions which would prevent the importations of commercial samples or prevent compliance with patent, trade mark, copyright, or similar procedures.

(d) The contracting parties recognize that, as a result of domestic policies directed towards the achievement and maintenance of full and productive employment or towards the development of economic resources, a contracting party may experience a high level of demand for imports involving a threat to its monetary reserves of the sort referred to in paragraph 2 (a) of this Article. Accordingly, a contracting party otherwise complying with the provisions of this Article shall not be required to withdraw or modify restrictions on the ground that a change in those policies would render unnecessary restrictions which it is applying under this Article.

4. (a) Any contracting party applying new restrictions or raising the general level of its existing restrictions by a substantial intensification of the measures applied under this Article shall immediately after instituting or intensifying such restrictions (or, in circumstances in which prior consultation is practicable, before doing so) consult with the CONTRACTING PARTIES as to the nature of its balance of payments difficulties, alternative corrective measures which may be available, and the possible effect of the restrictions on the economies of other contracting parties.

(b) On a date to be determined by them,* the CONTRACTING PARTIES shall review all restrictions still applied under this Article on that date. Beginning one year after that date, contracting parties applying import restrictions under this Article shall enter into consultations of the type provided for in sub-paragraph (a) of this paragraph with the CONTRACTING PARTIES annually.

(c) (i) If, in the course of consultations with a contracting party under sub-paragraph (a) or (b) above, the CONTRACTING PARTIES find that the restrictions are not consistent with provisions of this Article or with those of Article XIII (subject to the provisions of Article XIV), they shall indicate the nature of the inconsistency and may advise that the restrictions be suitably modified.

(ii) If, however, as a result of the consultations, the CONTRACTING PARTIES determine that the restrictions are being applied in a manner involving an inconsistency of a serious nature with the provisions of this Article or with those of Article XIII (subject to the provisions of Article XIV) and that damage to the trade of any contracting party is caused or threatened thereby, they shall so inform the contracting party applying the restrictions and shall make appropriate recommendations for securing conformity with such provisions within the specified period of time. If such contracting party does not comply with these recommendations within the specified period, the CONTRACTING PARTIES may release any contracting party the trade of which is adversely affected by the restrictions from such obligations under this Agreement towards the contracting party applying the restrictions as they determine to be appropriate in the circumstances.

(d) The CONTRACTING PARTIES shall invite any contracting party which is applying restrictions under this Article to enter into consultations with them at the request of any contracting party which can establish a prima facie case that the restrictions are inconsistent with the provisions of this Article or with those of Article XIII (subject to the provisions of Article XIV) and that its trade is adversely affected thereby. However, no such invitation shall be issued unless the CONTRACTING PARTIES have ascertained that direct discussions between the contracting parties concerned have not been successful. If, as a result of the consultations with the CONTRACTING PARTIES, no agreement is reached and they determine that the restrictions are being applied inconsistently with such provisions, and that damage to the trade of the contracting party initiating the procedure is caused or threatened thereby, they shall recommend the withdrawal or modification of the restrictions. If the restrictions are not withdrawn or modified within such time as the CONTRACTING PARTIES may prescribe, they may release the contracting party initiating the procedure from such obligations under this Agreement towards the contracting party applying the restrictions as they determine to be appropriate in the circumstances.

(e) In proceeding under this paragraph, the CONTRACTING PARTIES shall have due regard to any special

external factors adversely affecting the export trade of the contracting party applying the restrictions.*

(f) Determinations under this paragraph shall be rendered expeditiously and, if possible, within sixty days of the initiation of the consultations.

5. If there is a persistent and widespread application of import restrictions under this Article, indicating the existence of a general disequilibrium which is restricting international trade, the CONTRACTING PARTIES shall initiate discussions to consider whether other measures might be taken, either by those contracting parties the balance of payments of which are under pressure or by those the balance of payments of which are tending to be exceptionally favourable, or by any appropriate intergovernmental organization, to remove the underlying causes of the disequilibrium. On the invitation of the CONTRACTING PARTIES, contracting parties shall participate in such discussions.

B. TEXT OF *AD* ARTICLE XII

Ad Article XII

The CONTRACTING PARTIES shall make provision for the utmost secrecy in the conduct of any consultation under the provisions of this Article.

Paragraph 3 (c)(i)

Contracting parties applying restrictions shall endeavour to avoid causing serious prejudice to exports of a commodity on which the economy of a contracting party is largely dependent.

Paragraph 4 (b)

It is agreed that the date shall be within ninety days after the entry into force of the amendments of this Article effected by the Protocol Amending the Preamble and Parts II and III of this Agreement. However, should the CONTRACTING PARTIES find that conditions were not suitable for the application of the provisions of this subparagraph at the time envisaged, they may determine a later date; Provided that such date is not more than thirty days after such time as the obligations of Article VIII, Sections 2, 3 and 4, of the Articles of Agreement of the International Monetary Fund become applicable to contracting parties, members of the Fund, the combined foreign trade of which constitutes at least fifty per centum of the aggregate foreign trade of all contracting parties.

Paragraph 4 (e)

It is agreed that paragraph 4 (e) does not add any new criteria for the imposition or maintenance of quantitative restrictions for balance of payments reasons. It is solely intended to ensure that all external factors such as changes in the terms of trade, quantitative restrictions, excessive tariffs and subsidies, which may be contributing to the balance of payments difficulties of the contracting party applying restrictions, will be fully taken into account.

C. UNDERSTANDING ON THE BALANCE-OF-PAYMENTS PROVISIONS OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

[The text of the Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994 can be found at Section C following the text of Article XVIII below.]

D. INTERPRETATION AND APPLICATION OF ARTICLE XII

1. BOP Understanding

427. With respect to the interpretation and application of the Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994, see paragraphs 508–509 and 515–516 below.

E. RELATIONSHIP WITH OTHER ARTICLES

1. Article XVII

428. The interpretation and application of the note *Ad* Article XI, XII, XIII, XIV and XVIII, which clarifies that the terms "import restrictions" or "export restrictions" used in these Articles include "restrictions made effective through state-trading operations", was discussed by the Panels on *India – Quantitative Restrictions* and on *Korea – Various Measures on Beef*. See paragraphs 407–408 above.

2. Article XVIII

429. In *India – Quantitative Restrictions*, the Panel explained the relationship between Articles XII and XVIII:B in clarifying the function of Article XVIII:B. See paragraph 488 below.

3. Reference to GATT practice

430. With respect to GATT practice on Article XII, see GATT Analytical Index, pages 356–392.

XIV. ARTICLE XIII

A. TEXT OF ARTICLE XIII

*Article XIII**

Non-discriminatory Administration of Quantitative Restrictions

1. No prohibition or restriction shall be applied by any contracting party on the importation of any product of the territory of any other contracting party or on the exportation of any product destined for the territory of any other contracting party, unless the importation of the like product of all third countries or the exportation of the like product to all third countries is similarly prohibited or restricted.

2. In applying import restrictions to any product, contracting parties shall aim at a distribution of trade in such

product approaching as closely as possible the shares which the various contracting parties might be expected to obtain in the absence of such restrictions and to this end shall observe the following provisions:

(*a*) Wherever practicable, quotas representing the total amount of permitted imports (whether allocated among supplying countries or not) shall be fixed, and notice given of their amount in accordance with paragraph 3 (*b*) of this Article;

(*b*) In cases in which quotas are not practicable, the restrictions may be applied by means of import licences or permits without a quota;

(*c*) Contracting parties shall not, except for purposes of operating quotas allocated in accordance with subparagraph (*d*) of this paragraph, require that import licences or permits be utilized for the importation of the product concerned from a particular country or source;

(*d*) In cases in which a quota is allocated among supplying countries the contracting party applying the restrictions may seek agreement with respect to the allocation of shares in the quota with all other contracting parties having a substantial interest in supplying the product concerned. In cases in which this method is not reasonably practicable, the contracting party concerned shall allot to contracting parties having a substantial interest in supplying the product shares based upon the proportions, supplied by such contracting parties during a previous representative period, of the total quantity or value of imports of the product, due account being taken of any special factors which may have affected or may be affecting the trade in the product. No conditions or formalities shall be imposed which would prevent any contracting party from utilizing fully the share of any such total quantity or value which has been allotted to it, subject to importation being made within any prescribed period to which the quota may relate.*

3. (*a*) In cases in which import licences are issued in connection with import restrictions, the contracting party applying the restrictions shall provide, upon the request of any contracting party having an interest in the trade in the product concerned, all relevant information concerning the administration of the restrictions, the import licences granted over a recent period and the distribution of such licences among supplying countries; *Provided* that there shall be no obligation to supply information as to the names of importing or supplying enterprises.

(*b*) In the case of import restrictions involving the fixing of quotas, the contracting party applying the restrictions shall give public notice of the total quantity or value of the product or products which will be permitted to be imported during a specified future period and of any change in such quantity or value. Any supplies of the product in question which were *en route* at the time at which public notice was given shall not be excluded from entry; *Provided* that they may be counted so far as practicable, against the quantity permitted to be imported in the period in question, and also, where necessary, against the quantities permitted to be imported in the next following period or periods; and *Provided* further that if any contracting party customarily exempts from such restrictions products entered for consumption or withdrawn from warehouse for consumption during a period of thirty days after the day of such public notice, such practice shall be considered full compliance with this subparagraph.

(*c*) In the case of quotas allocated among supplying countries, the contracting party applying the restrictions shall promptly inform all other contracting parties having an interest in supplying the product concerned of the shares in the quota currently allocated, by quantity or value, to the various supplying countries and shall give public notice thereof.

4. With regard to restrictions applied in accordance with paragraph 2 (*d*) of this Article or under paragraph 2 (*c*) of Article XI, the selection of a representative period for any product and the appraisal of any special factors* affecting the trade in the product shall be made initially by the contracting party applying the restriction; *Provided* that such contracting party shall, upon the request of any other contracting party having a substantial interest in supplying that product or upon the request of the CONTRACTING PARTIES, consult promptly with the other contracting party or the CONTRACTING PARTIES regarding the need for an adjustment of the proportion determined or of the base period selected, or for the reappraisal of the special factors involved, or for the elimination of conditions, formalities or any other provisions established unilaterally relating to the allocation of an adequate quota or its unrestricted utilization.

5. The provisions of this Article shall apply to any tariff quota instituted or maintained by any contracting party, and, in so far as applicable, the principles of this Article shall also extend to export restrictions.

B. TEXT OF *AD* ARTICLE XIII

Ad Article XIII
Paragraph 2 (d)

No mention was made of "commercial considerations" as a rule for the allocation of quotas because it was considered that its application by governmental authorities might not always be practicable. Moreover, in cases where it is practicable, a contracting party could apply these considerations in the process of seeking

agreement, consistently with the general rule laid down in the opening sentence of paragraph 2.

Paragraph 4

See note relating to "special factors" in connection with the last subparagraph of paragraph 2 of Article XI.

C. INTERPRETATION AND APPLICATION OF ARTICLE XIII

1. General

(a) Scope of application

431. In *EC – Bananas III*, the Appellate Body reviewed the Panel's finding that the EC import regime for bananas was inconsistent with Article XIII in that the European Communities allocated tariff quota shares to some Members without allocating such shares to other Members. The European Communities claimed that "there [were] two separate EC import regimes for bananas, the preferential regime for traditional ACP bananas and the *erga omnes* regime for all other imports of bananas" and argued that "the non-discrimination obligations of Article I:1, X:3(a) and XIII of GATT 1994 and Article 1.3 of the *Licensing Agreement* apply only *within* each of these separate regimes."[634] Rejecting this argument, the Appellate Body applied Article XIII to the whole import regime as follows:

> "The essence of the non-discrimination obligations is that like products should be treated equally, irrespective of their origin. As no participant disputes that all bananas are like products, the non-discrimination provisions apply to *all* imports of bananas, irrespective of whether and how a Member categorizes or subdivides these imports for administrative or other reasons. If, by choosing a different legal basis for imposing import restrictions, or by applying different tariff rates, a Member could avoid the application of the non-discrimination provisions to the imports of like products from different Members, the object and purpose of the non-discrimination provisions would be defeated. It would be very easy for a Member to circumvent the non-discrimination provisions of the GATT 1994 and the other Annex 1A agreements, if these provisions apply only *within* regulatory regimes established by that Member."[635]

(b) Object and purpose

432. In *EC – Bananas III*, the Panel, in a finding not reviewed by the Appellate Body, held that the object and purpose of Article XIII:2 is to minimize the impact of quantitative restrictions on trade flows:

> "In light of the terms of Article XIII, it can be said that the object and purpose of Article XIII:2 is to minimize the impact of a quota or tariff quota regime on trade flows by attempting to approximate under such measures the trade shares that would have occurred in the absence of the regime. In interpreting the terms of Article XIII, it is important to keep their context in mind. Article XIII is basically a provision relating to the administration of restrictions authorized as exceptions to one of the most basic GATT provisions-the general ban on quotas and other non-tariff restrictions contained in Article XI."[636]

2. Article XIII:1

433. In *EC – Bananas III*, the Appellate Body found a violation of Article XIII:1 in the European Communities' import regime for bananas, stating as follows:

> "[A]llocation to Members not having a substantial interest must be subject to the basic principle of non-discrimination. When this principle of non-discrimination is applied to the allocation of tariff quota shares to Members not having a substantial interest, it is clear that a Member cannot, whether by agreement or by assignment, allocate tariff quota shares to some Members not having a substantial interest while not allocating shares to other Members who likewise do not have a substantial interest. To do so is clearly inconsistent with the requirement in Article XIII:1 that a Member cannot restrict the importation of any product from another Member unless the importation of the like product from all third countries is 'similarly' restricted."[637]

434. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 399–400.

3. Article XIII:2

(a) Chapeau

435. In *US – Line Pipe*, the Panel established that because the safeguard measure investigation was not based on historical trade patterns, and did not reflect an intent of approaching the shares that the members could have been expected to obtain in the absence of the measure, there was a violation of the chapeau of Article XIII:2. The Panel held:

> "[I]n our view, Korea is correct to argue that a Member would violate the general rule set forth in the chapeau of Article XIII:2 if it imposes safeguard measures without respecting traditional trade patterns (at least in the absence of any evidence indicating that the shares a Member might be expected to obtain in the future differ, as a result of changed circumstances, from its historical share). Trade flows before the imposition of a safeguard measure provide an objective, factual basis for projecting what might have occurred in the absence of that measure.
>
> There is nothing in the record before the Panel to suggest that the line pipe measure was based in any way on

[634] Appellate Body Report on *EC – Bananas III*, para. 189.
[635] Appellate Body Report on *EC – Bananas III*, para. 190.
[636] Panel Report on *EC – Bananas III*, para. 7.68.
[637] Appellate Body Report on *EC – Bananas III*, para. 161.

historical trade patterns in line pipe, or that the United States otherwise 'aim[ed] at a distribution of trade . . . approaching as closely as possible the shares which the various Members might be expected to obtain in the absence of' the line pipe measure. Instead, as noted by Korea, 'the in-quota import volume originating from Korea, the largest supplier historically to the US market, was reduced to the same level as the smallest – or even then non-existent – suppliers to the US market (9,000 short tons)'.[638] For this reason, we find that the line pipe measure is inconsistent with the general rule contained in the chapeau of Article XIII:2."[639]

436. In *EC – Bananas III*, the Appellate Body found a violation of Article XIII:2 in respect of the European Communities' import regime for bananas and, more specifically, in respect of the treatment granted to countries which had concluded with the European Communities the so-called Banana Framework Agreement (BFA). A quota share not utilized by one of the BFA countries could, at the joint request of all BFA countries, be transferred to another BFA country. No equivalent regulation existed with respect to banana exporting countries that were not part of the BFA. The Panel found that this aspect of the measure was inconsistent with the requirement to approximate, in the administration of a quantitative restriction, the relative trade flows which would exist in the absence of the measure at issue:

"Pursuant to these reallocation rules, a portion of a tariff quota share not used by the BFA country to which that share is allocated may, at the joint request of the BFA countries, be reallocated to the other BFA countries. . . . [T]he reallocation of unused portions of a tariff quota share exclusively to other BFA countries, and not to other non-BFA banana-supplying Members, does not result in an allocation of tariff quota shares which approaches 'as closely as possible the shares which the various Members might be expected to obtain in the absence of the restrictions'. Therefore, the tariff quota reallocation rules of the BFA are also inconsistent with the chapeau of Article XIII:2 of the GATT 1994."[640]

437. In *EC – Poultry*, Brazil challenged the European Communities' calculation of the tariff quota shares because imports from China – at that time not a Member of the WTO – had been included in this allocation of tariff quota shares. The Panel, in a finding expressly endorsed by the Appellate Body[641], found that nothing in Article XIII required the calculation of tariff quota shares only on the basis of imports from WTO Members:

"We note that Article XIII carefully distinguishes between Members ('contracting parties' in the original text of GATT 1947) and 'supplying countries' or 'source'. There is nothing in Article XIII that obligates Members to calculate tariff quota shares on the basis of imports from Members only.[642] If the purpose of using past trade performance is to approximate the shares in the absence of the restrictions as required under the chapeau of Article XIII:2, exclusion of a non-Member, particularly if it is an efficient supplier, would not serve that purpose.

This interpretation is also confirmed by the use in Article XIII:2(d) of the term 'of the total quantity or value of imports of the product' without limiting the total quantity to imports from Members.

The conclusion above is not affected by the fact that the TRQ in question was opened as compensatory adjustment under Article XXVIII because Article XIII is a general provision regarding the non-discriminatory administration of import restrictions applicable to any TRQs regardless of their origin."[643]

(b) Article XIII:2(a)

438. Regarding the question of whether tariff quotas were subject to the disciplines set out in Article XIII:2(a), the Panel on *US – Line Pipe*, in a finding not reviewed by the Appellate Body, held that they do constitute "quotas" within the meaning of Article XIII:2(a):

"Irrespective of whether or not tariff quotas constitute 'quotas' within the meaning of Article XIII:2(a), tariff quotas are necessarily subject to the disciplines contained in Article XIII:2(a) as a result of the express language of Article XIII:5. Thus, Article XIII:2(a) must have meaning in the context of tariff quotas. We believe that, in respect of tariff quotas, Article XIII:2(a) requires Members to fix, wherever practicable, the total amount of imports permitted at the lower tariff rate.[644]"[645]

---

[638] Korea's first written submission, para. 155.
[639] Panel Report on *US – Pipe Line*, paras. 7.53–7.55.
[640] Appellate Body Report on *EC – Bananas III*, para. 163.
[641] Appellate Body Report on *EC – Poultry*, para. 106.
[642] (*footnote original*) We note in this regard that in the *Banana III* case, the panel made the following observation (which was not affected by the subsequent appeal): "The consequence of the foregoing analysis is that Members may be effectively required to use a general 'others' category for all suppliers other than Members with a substantial interest in supplying the product. The fact that in this situation tariff quota shares are allocated to some Members, notably those having a substantial interest in supplying the product, but not to others that do not have a substantial interest in supplying the product, would not necessarily be in conflict with Article XIII:1. While the requirement of Article XIII:2(d) is not expressed as an exception to the requirements of Article XIII:1, it may be regarded, to the extent that its practical application is inconsistent with it, as *lex specialis* in respect of Members with a substantial interest in supplying the product concerned". See Panel Reports on *EC – Bananas III*, para. 7.75. The quoted passage, particularly the use of the phrase "*all suppliers* other than Members with a substantial interest in supplying the product" (emphasis added), indicates that the *Banana III* panel did not take the view that allocation of quota shares to non-Members under Article XIII:2(d) was not permitted.
[643] Panel Report on *EC – Poultry*, paras. 230–232.
[644] (*footnote original*) The obligation cannot extend to fixing the total amount of permitted imports at the higher tariff rate, because that would effectively undermine the distinction between tariff quotas and quantitative restrictions.
[645] Panel Report on *US – Line Pipe*, para. 7.58.

(c) Article XIII:2(d)

(i) Allocation of import quotas to Members who have no "substantial interest"

439. The Panel on *EC – Bananas III* addressed the question whether country-specific shares can also be allocated to Members that do not have a substantial interest in supplying the product and, if so, what the specific method of allocation should be. The Panel, in an finding not addressed by the Appellate Body, answered this question in the affirmative, but emphasized that any allocation to Members not having a substantial interest in supplying the product at issue would have to comply with the principle of non-discrimination:

> "As to the first point, we note that the first sentence of Article XIII:2(d) refers to allocation of a quota 'among supplying countries'. This could be read to imply that an allocation may also be made to Members that do not have a substantial interest in supplying the product. If this interpretation is accepted, any such allocation must, however, meet the requirements of Article XIII:1 and the general rule in the chapeau to Article XIII:2(d). Therefore, if a Member wishes to allocate shares of a tariff quota to some suppliers without a substantial interest, then such shares must be allocated to all such suppliers. Otherwise, imports from Members would not be similarly restricted as required by Article XIII:1.[646] As to the second point, in such a case it would be required to use the same method as was used to allocate the country-specific shares to the Members having a substantial interest in supplying the product, because otherwise the requirements of Article XIII:1 would also not be met.
>
> . . .
>
> In so far as this in practice results in the use of an 'others' category for all Members not having a substantial interest in supplying the product, it comports well with the object and purpose of Article XIII, as expressed in the general rule to the chapeau to Article XIII:2. When a significant share of a tariff quota is assigned to 'others', the import market will evolve with the minimum amount of distortion. Members not having a substantial supplying interest will be able, if sufficiently competitive, to gain market share in the 'others' category and possibly achieve 'substantial supplying interest' status which, in turn, would provide them the opportunity to receive a country-specific allocation by invoking the provisions of Article XIII:4. New entrants will be able to compete in the market, and likewise have an opportunity to gain 'substantial supplying interest' status. For the share of the market allocated to Members with a substantial interest in supplying the product, the situation may also evolve in light of adjustments following consultations under Article XIII:4. In comparison to a situation where country-specific shares are allocated to all supplying countries, including Members with minor market shares, this result is less likely to lead to a long-term freezing of market shares. This is, in our view, consistent with the terms, object and purpose, and context of Article XIII."[647]

440. The Panel on *EC – Bananas III* (*Article 21.5 – Ecuador*) examined the consistency with Article XIII of the European Communities' regime for imports of bananas, as revised by the European Communities in response to the DSB's recommendation. In this revised regime, bananas could be imported under the MFN tariff-rate quota on the basis of past trade performance by exporting countries during the past representative period from 1994 to 1996, while bananas from traditional ACP supplier countries could be imported up to a collective amount which was originally set to reflect the overall amount of the pre-1991 best-ever export by individual traditional ACP suppliers. The Panel found the revised regime to be inconsistent with Article XIII:2(d):

> "[F]or traditional ACP supplier countries the average exports during the three-year period from 1994 to 1996 were collectively at a level of approximately 685,000 tonnes, which is only about 80 per cent of the 857,700 tonnes reserved for traditional ACP imports under the previous as well as under the revised regime. In contrast, the MFN tariff quota of 2.2 million tonnes (autonomously increased by 353,000 tonnes) has been virtually filled since its creation (over 95 per cent) and there have been some out-of-quota imports. Thus, the allocation of an 857,700 tonne tariff quota for traditional banana imports from ACP States is inconsistent with the requirements of Article XIII:2(d) because the EC regime clearly does not aim at a distribution of trade approaching as closely as possible the shares which various Members might be expected to obtain in the absence of restrictions."[648]

---

[646] (*footnote original*) In this regard, we note with approval the statement by the 1980 *Chilean Apples* panel:

> "[I]n keeping with normal GATT practice, the Panel considered it appropriate to use as a 'representative period' a three-year period previous to 1979, the year in which the EC measures were in effect. Due to the existence of restrictions in 1976, the Panel held that that year could not be considered as representative, and that the year immediately preceding 1976 should be used instead. The Panel thus chose the years 1975, 1977, 1978 as a 'representative period'".

Panel Report on "EEC Restrictions on Imports of Dessert Apples – Complaint by Chile", adopted on 10 November 1980, BISD 27S/98, 113, para. 4.8. In the report of the "Panel on Poultry", issued on 21 November 1963, GATT Doc. L/2088, para. 10, the panel stated: "[T]he shares in the reference period of the various exporting countries in the Swiss market, which was free and competitive, afforded a fair guide as to the proportion of the increased German poultry consumption likely to be taken up by United States exports". See also Panel Report on "Japan – Restrictions on Imports of Certain Agricultural Products", adopted on 22 March 1988, BISD 35S/163, 226–227, para. 5.1.3.7.

[647] Panel Report on *EC – Bananas III (Article 21.5 – Ecuador)*, paras. 7.73 and 7.76.

[648] Panel Report on *EC – Bananas III*, para. 6.28.

(ii) Allocation of tariff/import quotas to non-Members

441. In *EC – Poultry*, the Appellate Body upheld the Panel's finding that the European Communities acted consistently with Article XIII in calculating a tariff-rate quota share for a Member based upon the total quantity of imports including those from non-Members.[649] See also paragraph 437 above. Brazil claimed upon appeal that the Panel had also made a finding with respect to the *allocation* of tariff-rate quota shares to a non-Member, and the *participation of non-Members in the* "*others*" *category* of a tariff-rate quota. Brazil claimed that the Panel erred because it had failed to recognize that the allocation of quota shares is always intended exclusively for Members. The Appellate Body found that the Panel statements which Brazil claimed to constitute the findings it was appealing did not amount to findings or developed legal interpretations on these two issues. As a result, the Appellate Body concluded that a consideration of these questions would be outside its mandate under Article 17.6 of the DSU. In regard to the two aforementioned issues, the Panel had stated:

> "We note in this regard that in the *Banana III* case, the panel made the following observation (which was not affected by the subsequent appeal): 'The consequence of the foregoing analysis is that Members may be effectively required to use a general "others" category for all suppliers other than Members with a substantial interest in supplying the product. The fact that in this situation tariff quota shares are allocated to some Members, notably those having a substantial interest in supplying the product, but not to others that do not have a substantial interest in supplying the product, would not necessarily be in conflict with Article XIII:1. While the requirement of Article XIII:2(d) is not expressed as an exception to the requirements of Article XIII:1, it may be regarded, to the extent that its practical application is inconsistent with it, as *lex specialis* in respect of Members with a substantial interest in supplying the product concerned'. See panel reports on *European Communities – Regime for the Importation, Sale and Distribution of Bananas*, *op. cit.*, para. 7.75. The quoted passage, particularly the use of the phrase '*all suppliers* other than Members with a substantial interest in supplying the product' (emphasis added), indicates that the *Banana III* panel did not take the view that allocation of quota shares to non-Members under Article XIII:2(d) was not permitted."[650]

442. The Panel on *EC – Bananas III*, in a finding not addressed by the Appellate Body, examined how the accession to the WTO of a supplying country impacted upon the consistency of a pre-existing quantitative restriction with Article XIII:2.

> "The general rule in the chapeau to Article XIII:2 indicates that the aim of Article XIII:2 is to give to Members the share of trade that they might be expected to obtain in the absence of a tariff quota. There is no requirement that a Member allocating shares of a tariff quota negotiate with non-Members, but when such countries accede to the WTO, they acquire rights, just as any other Member has under Article XIII whether or not they have a substantial interest in supplying the product in question.
>
> [A]lthough the EC reached an agreement with all Members who had a substantial interest in supplying the product at one point in time, under the consultation provisions of Article XIII:4, the EC would have to consider the interests of a new Member who had a substantial interest in supplying the product if that new Member requested it to do so.[651] The provisions on consultations and adjustments in Article XIII:4 mean in any event that the BFA could not be invoked to justify a permanent allocation of tariff quota shares. Moreover, while new Members cannot challenge the EC's agreements with Colombia and Costa Rica in the BFA on the grounds that the EC failed to negotiate and reach agreement with them, they otherwise have the same rights as those Complainants who were GATT contracting parties at the time the BFA was negotiated to challenge its consistency with Article XIII. Generally speaking, all Members benefit from all WTO rights."[652]

443. With respect to GATT practice concerning the allocation of quota, see GATT Analytical Index, pages 401–402.[653]

---

[649] Appellate Body Report on *EC – Poultry*, para. 108.

[650] Panel Report on *EC – Poultry*, para. 230, footnote 140.

[651] (*footnote original*) While the provisions of Article XIII:4 on consultations and adjustments seem to be primarily aimed at adjustments to quota shares allocated pursuant to Article XIII:2(d), second sentence, they also apply in the case where agreements were reached pursuant to Article XIII:2(d), first sentence, with Members having a substantial interest in supplying the product concerned. In addition, in so far as a new Member has a substantial interest in supplying that product, its share of the "others" category can be viewed, for purposes of Article XIII:4, as a provision established unilaterally relating to the allocation of an adequate quota.

[652] Panel Report on *EC – Bananas III*, paras. 7.91–7.92.

[653] In this regard, in *EC – Poultry*, Brazil argued that the EC allocation of licences to imports of poultry products from East European countries was inconsistent with Article XIII, citing GATT Panel Report on *EEC – Newsprint*. The Panel rejected this argument, stating as follows:

> "There is some similarity between the *Newsprint* case and the present case regarding this specific issue. As in the *Newsprint* case, the purpose of the poultry TRQ is to allow specified quantities (15,500 tonnes) of imports into the EC duty-free which would otherwise be dutiable. However, there are three important factual differences. First, in the *Newsprint* case, EFTA suppliers were accorded duty-free access to the EEC market without restriction. In the present case, imports from Hungary and Poland under the Interim Agreements are still dutiable. Second, in the *Newsprint* case, the level of the MFN duty-free quota was reduced in order to make room for preferential access while in the present case no such reduction has occurred. Third, in the *Newsprint* case, the EFTA agreement was concluded after the opening of the MFN quota whereas in this case the Interim Agreements preceded the opening of the poultry TRQ.
>
> Thus, the present case lacks the basis that led to the conclusion by the *Newsprint* panel. We also note that before making the

D. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

444. In *EC – Bananas III*, the European Communities argued that even though the Lomé waiver mentioned explicitly only *GATT* Article I:1 in respect of the allocation of country-specific tariff quotas for bananas to certain countries, a violation of Article XIII in respect of its tariff regime for bananas was also covered by the Lomé waiver, due to the inherent substantive link between Articles I and XIII. While the Panel agreed with the European Communities' argument, the Appellate Body rejected it.[654] See the Chapter on the *WTO Agreement*, Section X.B.3(i).

2. Article II

445. The Panel on *EC – Bananas III* discussed the relationship between *GATT* Articles II and XIII. See paragraphs 110–111 above.

3. Article XI

446. The Panel on *US – Shrimp* found that the United States violated Article XI by imposing an import ban on shrimps and shrimp products harvested by vessels of foreign nations, where such exporting country had not been certified by United States' authorities as using methods not leading to the incidental killing of sea turtles above a certain level. The Panel, in a finding not reviewed by the Appellate Body, then exercised judicial economy with respect to the claim concerning Article XIII.[655]

447. The Panel on *India – Quantitative Restrictions*, in a finding not reviewed by the Appellate Body, stated that "[w]ith regard to the claim of violation of Article XIII of *GATT 1994*, since the resolution of the claims under Articles XI and XVIII:B may make it unnecessary to resolve that claim, we will defer consideration of this issue."[656] The Panel ultimately did not address Article XIII.

4. Article XXVIII

448. In *EC – Poultry*, the Appellate Body addressed a complaint against the allocation of tariff quotas for certain poultry products by the European Communities, and rejected Brazil's appeal that Articles I and XIII of *GATT* were not applicable to the allocation of tariff quota resulting from the negotiation under *GATT* Article XXVIII. The Appellate Body, after having confirmed its finding in *EC – Bananas III*[657], stated that "the concessions contained in Schedule LXXX pertaining to the tariff-rate quota for frozen poultry meat must be consistent with Article I and XIII of the GATT 1994."[658] The Appellate Body opined that Article XXVIII does not dispense with the non-discrimination principle inscribed in Articles I and XIII of *GATT 1994*, and considered the negotiating history of Article XXVIII:

> "We see nothing in Article XXVIII to suggest that compensation negotiated within its framework may be exempt from compliance with the non-discrimination principle inscribed in Articles I and XIII of the GATT 1994. As the Panel observed, this interpretation is, furthermore, supported by the negotiating history of Article XXVIII. Regarding the provision which eventually became Article XXVIII:3, the Chairman of the Tariff Agreements Committee at Geneva in 1947, concluded:
>
> > 'It was agreed that there was no intention to interfere in any way with the operation of the most-favoured-nation clause. This Article is headed 'Modification of Schedules'. It refers throughout to concessions negotiated under paragraph 1 of Article II, the Schedules, and there is no reference to Article I, which is the Most-Favoured-Nation Clause. Therefore, I think the intent is clear: that in no way should this Article interfere with the operation of the Most-Favoured-Nation Clause.'[659]
>
> Although this statement refers specifically to the MFN clause in Article I of the GATT, logic requires that it applies equally to the non-discriminatory administration of quotas and tariff-rate quotas under Article XIII of the GATT 1994."[660]

5. Reference to GATT practice

449. With respect to GATT practice concerning the relationship of Article XIII with other Articles, see GATT Analytical Index, pages 410–411.

E. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Agreement on Agriculture

450. In *EC – Bananas III*, the European Communities argued that, in light of the meaning and intent of

---

statement cited in paragraph 237 above, the *Newsprint* panel stated that 'the Panel could find no GATT specific provision forbidding such action'. If Brazil had intended to claim a violation of Article XIII:2 on this specific issue, at a minimum, it should have elaborated on the nature of preferences accorded to poultry products imported from East Europe and should have tied it to *inter alia* 'any special factors which may have or may be affecting the trade in the product' referred to in Article XIII:2(d). It has not done so."

Panel Report on *EC – Poultry*, paras. 238–239.

654 Appellate Body Report on *EC – Bananas III*, paras. 183–187.

655 Panel Report on *US – Shrimp*, para. 7.22. With respect to judicial economy in general, see Chapter on the *DSU*, Section XXXVI.F.

656 Panel Report on *India – Quantitative Restrictions*, para. 5.17.

657 Appellate Body Report on *EC – Poultry*, para. 98, citing Appellate Body Report on *EC – Bananas III*, para. 154, which is referenced in para. 84 of this Chapter.

658 Appellate Body Report on *EC – Poultry*, para. 99.

659 (*footnote original*) EPCT/TAC/PV/18, p. 46.

660 Appellate Body Report on *EC – Poultry*, para. 100.

Articles 4.1 and 21.1 of the *Agreement on Agriculture*, it was permitted, with respect to market access concessions, to act inconsistently with the requirements of Article XIII of the *GATT* 1994. The Panel concluded that the *Agreement on Agriculture* did not permit the European Communities to act inconsistently with Article XIII. The Appellate Body confirmed the Panel's finding:

> "[W]e do not see anything in Article 4.1 to suggest that market access concessions and commitments made as a result of the Uruguay Round negotiations on agriculture can be inconsistent with the provisions of Article XIII of the GATT 1994. There is nothing in Articles 4.1 or 4.2, or in any other article of the *Agreement on Agriculture*, that deals specifically with the allocation of tariff quotas on agricultural products. If the negotiators had intended to permit Members to act inconsistently with Article XIII of the GATT 1994, they would have said so explicitly. The *Agreement on Agriculture* contains several specific provisions dealing with the relationship between articles of the *Agreement on Agriculture* and the GATT 1994. For example, Article 5 of the *Agreement on Agriculture* allows Members to impose special safeguards measures that would otherwise be inconsistent with Article XIX of the GATT 1994 and with the *Agreement on Safeguards*. In addition, Article 13 of the *Agreement on Agriculture* provides that, during the implementation period for that agreement, Members may not bring dispute settlement actions under either Article XVI of the GATT 1994 or Part III of the *Agreement on Subsidies and Countervailing Measures* for domestic support measures or export subsidy measures that conform fully with the provisions of the *Agreement on Agriculture*. With these examples in mind, we believe it is significant that Article 13 of the *Agreement on Agriculture* does not, by its terms, prevent dispute settlement actions relating to the consistency of market access concessions for agricultural products with Article XIII of the GATT 1994. As we have noted, the negotiators of the *Agreement on Agriculture* did not hesitate to specify such limitations elsewhere in that agreement; had they intended to do so with respect to Article XIII of the GATT 1994, they could, and presumably would, have done so. We note further that the *Agreement on Agriculture* makes no reference to the *Modalities* document[661] or to any 'common understanding' among the negotiators of the *Agreement on Agriculture* that the market access commitments for agricultural products would not be subject to Article XIII of the GATT 1994."[662]

2. Agreement on Safeguards

451. The Panel on *US – Line Pipe* held, in a statement not reviewed by the Appellate Body, that Article XIII does apply to tariff quota safeguard measures. In the Panel's view, if this were not the case, quantitative criteria regarding the availability of lower tariff rates could be introduced in a discriminatory manner inconsistently with the objectives set out in the preamble of the Safeguards Agreement:

> "[I]t is the paucity of disciplines governing the application of tariff quota safeguard measures in Article 5 of the Safeguards Agreement[663] that supports our interpretation of Article XIII. If Article XIII did not apply to tariff quota safeguard measures, such safeguard measures would escape the majority of the disciplines set forth in Article 5. This is an important consideration, given the quantitative aspect of a tariff quota. For example, if Article XIII did not apply, quantitative criteria regarding the availability of lower tariff rates could be introduced in a discriminatory manner, without any consideration to prior quantitative performance.[664] In our view, the potential for such discrimination is contrary to the object and purpose of both the Safeguards Agreement, and the WTO Agreement. In this regard, the preamble of the Safeguards Agreement refers to the 'need to clarify and reinforce the disciplines of GATT 1994' in the context of safeguards. We consider that the 'disciplines of GATT 1994' surely include those providing for non-discrimination. In any event 'the elimination of discriminatory treatment in international trade relations' is referred to explicitly in the preamble to the WTO Agreement. We further note that the preamble of the Safeguards Agreement also mentions that one of the objectives of the Safeguards Agreement is to 'establish multilateral control over safeguards and eliminate measures that escape such control'. We are of the view that non-application of Article XIII in the context of safeguards would result in tariff quota safeguard measures partially escaping the control of multilateral disciplines. This result would be contrary to the objectives set out in the preamble of the Safeguards Agreement."[665]

452. The Panel on *US – Line Pipe*, in a statement not reviewed by the Appellate Body, highlighted the importance of respecting traditional trade patterns when imposing safeguards measures:

> "In our view, Korea is correct to argue that a Member would violate the general rule set forth in the chapeau of Article XIII:2 if it imposes safeguard measures without respecting traditional trade patterns (at least in the absence of any evidence indicating that the shares a Member might be expected to obtain in the future differ, as a result of changed circumstances, from its historical share). Trade flows before the imposition of a safeguard measure provide an objective, factual basis for project-

[661] *Modalities for the Establishment of Specific Binding Commitments Under the Reform Programme*, MTN.GNG/MA/W/24, 20 December 1993.
[662] Appellate Body Report on *EC – Bananas III*, para. 157.
[663] (*footnote original*) See section below.
[664] (*footnote original*) The same concern does not arise in respect of tariff measures – which also appear not to be covered by all Article 5 disciplines – because tariff measures affect all exporting Members equally.
[665] Panel Report on *US – Line Pipe*, para. 7.49

ing what might have occurred in the absence of that measure."[666]

XV. ARTICLE XIV

A. TEXT OF ARTICLE XIV

*Article XIV**
Exceptions to the Rule of Non-discrimination

1. A contracting party which applies restrictions under Article XII or under Section B of Article XVIII may, in the application of such restrictions, deviate from the provisions of Article XIII in a manner having equivalent effect to restrictions on payments and transfers for current international transactions which that contracting party may at that time apply under Article VIII or XIV of the Articles of Agreement of the International Monetary Fund, or under analogous provisions of a special exchange agreement entered into pursuant to paragraph 6 of Article XV.*

2. A contracting party which is applying import restrictions under Article XII or under Section B of Article XVIII may, with the consent of the CONTRACTING PARTIES, temporarily deviate from the provisions of Article XIII in respect of a small part of its external trade where the benefits to the contracting party or contracting parties concerned substantially outweigh any injury which may result to the trade of other contracting parties.*

3. The provisions of Article XIII shall not preclude a group of territories having a common quota in the International Monetary Fund from applying against imports from other countries, but not among themselves, restrictions in accordance with the provisions of Article XII or of Section B of Article XVIII on condition that such restrictions are in all other respects consistent with the provisions of Article XIII.

4. A contracting party applying import restrictions under Article XII or under Section B of Article XVIII shall not be precluded by Articles XI to XV or Section B of Article XVIII of this Agreement from applying measures to direct its exports in such a manner as to increase its earnings of currencies which it can use without deviation from the provisions of Article XIII.

5. A contracting party shall not be precluded by Articles XI to XV, inclusive, or by Section B of Article XVIII, of this Agreement from applying quantitative restrictions:

(*a*) having equivalent effect to exchange restrictions authorized under Section 3 (*b*) of Article VII of the Articles of Agreement of the International Monetary Fund, or

(*b*) under the preferential arrangements provided for in Annex A of this Agreement, pending the outcome of the negotiations referred to therein.

B. TEXT OF *AD* ARTICLE XIV

Ad Article XIV
Paragraph 1

The provisions of this paragraph shall not be so construed as to preclude full consideration by the CONTRACTING PARTIES, in the consultations provided for in paragraph 4 of Article XII and in paragraph 12 of Article XVIII, of the nature, effects and reasons for discrimination in the field of import restrictions.

Paragraph 2

One of the situations contemplated in paragraph 2 is that of a contracting party holding balances acquired as a result of current transactions which it finds itself unable to use without a measure of discrimination.

C. INTERPRETATION AND APPLICATION OF ARTICLE XIV

No jurisprudence or decision of a competent WTO body.

D. RELATIONSHIP WITH OTHER ARTICLES

1. Article XVII

453. The interpretation and application of *Ad* Articles XI, XII, XIII, XIV and XVIII, which clarifies that the terms "import restrictions" or "export restrictions" used in these Articles include "restrictions made effective through state-trading operations", was discussed by the Panels on *India – Quantitative Restrictions* and *Korea – Various Measures on Beef*. See paragraphs 407–408 above.

2. Reference to GATT practice

454. With respect to GATT practice on Article XIV, see GATT Analytical Index, pages 418–424.

XVI. ARTICLE XV

A. TEXT OF ARTICLE XV

Article XV
Exchange Arrangements

1. The CONTRACTING PARTIES shall seek co-operation with the International Monetary Fund to the end that the CONTRACTING PARTIES and the Fund may pursue a co-ordinated policy with regard to exchange questions within the jurisdiction of the Fund and questions of quantitative restrictions and other trade measures within the jurisdiction of the CONTRACTING PARTIES.

2. In all cases in which the CONTRACTING PARTIES are called upon to consider or deal with problems concerning monetary reserves, balances of payments or foreign

[666] Panel Report on *US – Line Pipe*, para. 7.54.

exchange arrangements, they shall consult fully with the International Monetary Fund. In such consultations, the CONTRACTING PARTIES shall accept all findings of statistical and other facts presented by the Fund relating to foreign exchange, monetary reserves and balances of payments, and shall accept the determination of the Fund as to whether action by a contracting party in exchange matters is in accordance with the Articles of Agreement of the International Monetary Fund, or with the terms of a special exchange agreement between that contracting party and the CONTRACTING PARTIES. The CONTRACTING PARTIES in reaching their final decision in cases involving the criteria set forth in paragraph 2 (*a*) of Article XII or in paragraph 9 of Article XVIII, shall accept the determination of the Fund as to what constitutes a serious decline in the contracting party's monetary reserves, a very low level of its monetary reserves or a reasonable rate of increase in its monetary reserves, and as to the financial aspects of other matters covered in consultation in such cases.

3. The CONTRACTING PARTIES shall seek agreement with the Fund regarding procedures for consultation under paragraph 2 of this Article.

4. Contracting parties shall not, by exchange action, frustrate* the intent of the provisions of this Agreement, nor, by trade action, the intent of the provisions of the Articles of Agreement of the International Monetary Fund.

5. If the CONTRACTING PARTIES consider, at any time, that exchange restrictions on payments and transfers in connection with imports are being applied by a contracting party in a manner inconsistent with the exceptions provided for in this Agreement for quantitative restrictions, they shall report thereon to the Fund.

6. Any contracting party which is not a member of the Fund shall, within a time to be determined by the CONTRACTING PARTIES after consultation with the Fund, become a member of the Fund, or, failing that, enter into a special exchange agreement with the CONTRACTING PARTIES. A contracting party which ceases to be a member of the Fund shall forthwith enter into a special exchange agreement with the CONTRACTING PARTIES. Any special exchange agreement entered into by a contracting party under this paragraph shall thereupon become part of its obligations under this Agreement.

7. (*a*) A special exchange agreement between a contracting party and the CONTRACTING PARTIES under paragraph 6 of this Article shall provide to the satisfaction of the CONTRACTING PARTIES that the objectives of this Agreement will not be frustrated as a result of action in exchange matters by the contracting party in question.

(*b*) The terms of any such agreement shall not impose obligations on the contracting party in exchange matters generally more restrictive than those imposed by the Articles of Agreement of the International Monetary Fund on members of the Fund.

8. A contracting party which is not a member of the Fund shall furnish such information within the general scope of section 5 of Article VIII of the Articles of Agreement of the International Monetary Fund as the CONTRACTING PARTIES may require in order to carry out their functions under this Agreement.

9. Nothing in this Agreement shall preclude:

(*a*) the use by a contracting party of exchange controls or exchange restrictions in accordance with the Articles of Agreement of the International Monetary Fund or with that contracting party's special exchange agreement with the CONTRACTING PARTIES, or

(*b*) the use by a contracting party of restrictions or controls in imports or exports, the sole effect of which, additional to the effects permitted under Articles XI, XII, XIII and XIV, is to make effective such exchange controls or exchange restrictions.

B. TEXT OF *AD* ARTICLE XV

Ad Article XV
Paragraph 4

The word "frustrate" is intended to indicate, for example, that infringements of the letter of any Article of this Agreement by exchange action shall not be regarded as a violation of that Article if, in practice, there is no appreciable departure from the intent of the Article. Thus, a contracting party which, as part of its exchange control operated in accordance with the Articles of Agreement of the International Monetary Fund, requires payment to be received for its exports in its own currency or in the currency of one or more members of the International Monetary Fund will not thereby be deemed to contravene Article XI or Article XIII. Another example would be that of a contracting party which specifies on an import licence the country from which the goods may be imported, for the purpose not of introducing any additional element of discrimination in its import licensing system but of enforcing permissible exchange controls.

C. INTERPRETATION AND APPLICATION OF ARTICLE XV

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

455. With respect to GATT practice concerning Article XV, see GATT Analytical Index, pages 429–441.

XVII. ARTICLE XVI

A. TEXT OF ARTICLE XVI

*Article XVI**
Subsidies

Section A – Subsidies in General

1. If any contracting party grants or maintains any subsidy, including any form of income or price support, which operates directly or indirectly to increase exports of any product from, or to reduce imports of any product into, its territory, it shall notify the CONTRACTING PARTIES in writing of the extent and nature of the subsidization, of the estimated effect of the subsidization on the quantity of the affected product or products imported into or exported from its territory and of the circumstances making the subsidization necessary. In any case in which it is determined that serious prejudice to the interests of any other contracting party is caused or threatened by any such subsidization, the contracting party granting the subsidy shall, upon request, discuss with the other contracting party or parties concerned, or with the CONTRACTING PARTIES, the possibility of limiting the subsidization.

Section B – Additional Provisions on Export Subsidies*

2. The contracting parties recognize that the granting by a contracting party of a subsidy on the export of any product may have harmful effects for other contracting parties, both importing and exporting, may cause undue disturbance to their normal commercial interests, and may hinder the achievement of the objectives of this Agreement.

3. Accordingly, contracting parties should seek to avoid the use of subsidies on the export of primary products. If, however, a contracting party grants directly or indirectly any form of subsidy which operates to increase the export of any primary product from its territory, such subsidy shall not be applied in a manner which results in that contracting party having more than an equitable share of world export trade in that product, account being taken of the shares of the contracting parties in such trade in the product during a previous representative period, and any special factors which may have affected or may be affecting such trade in the product.*

4. Further, as from 1 January 1958 or the earliest practicable date thereafter, contracting parties shall cease to grant either directly or indirectly any form of subsidy on the export of any product other than a primary product which subsidy results in the sale of such product for export at a price lower than the comparable price charged for the like product to buyers in the domestic market. Until 31 December 1957 no contracting party shall extend the scope of any such subsidization beyond that existing on 1 January 1955 by the introduction of new, or the extension of existing, subsidies.*

5. The CONTRACTING PARTIES shall review the operation of the provisions of this Article from time to time with a view to examining its effectiveness, in the light of actual experience, in promoting the objectives of this Agreement and avoiding subsidization seriously prejudicial to the trade or interests of contracting parties.

B. TEXT OF *AD* ARTICLE XVI

Ad Article XVI

The exemption of an exported product from duties or taxes borne by the like product when destined for domestic consumption, or the remission of such duties or taxes in amounts not in excess of those which have accrued, shall not be deemed to be a subsidy.

Section B

1. Nothing in Section B shall preclude the use by a contracting party of multiple rates of exchange in accordance with the Articles of Agreement of the International Monetary Fund.

2. For the purposes of Section B, a "primary product" is understood to be any product of farm, forest or fishery, or any mineral, in its natural form or which has undergone such processing as is customarily required to prepare it for marketing in substantial volume in international trade.

Paragraph 3

1. The fact that a contracting party has not exported the product in question during the previous representative period would not in itself preclude that contracting party from establishing its right to obtain a share of the trade in the product concerned.

2. A system for the stabilization of the domestic price or of the return to domestic producers of a primary product independently of the movements of export prices, which results at times in the sale of the product for export at a price lower than the comparable price charged for the like product to buyers in the domestic market, shall be considered not to involve a subsidy on exports within the meaning of paragraph 3 if the CONTRACTING PARTIES determine that:

(a) the system has also resulted, or is so designed as to result, in the sale of the product for export at a price higher than the comparable price charged for the like product to buyers in the domestic market; and

(b) the system is so operated, or is designed so to operate, either because of the effective regulation of production or otherwise, as not to stimulate exports unduly or otherwise seriously to prejudice the interests of other contracting parties.

Notwithstanding such determination by the CONTRACTING PARTIES, operations under such a system shall be subject to the provisions of paragraph 3 where they are wholly or partly financed out of government funds in addition to the funds collected from producers in respect of the product concerned.

Paragraph 4

The intention of paragraph 4 is that the contracting parties should seek before the end of 1957 to reach agreement to abolish all remaining subsidies as from 1 January 1958; or, failing this, to reach agreement to extend the application of the standstill until the earliest date thereafter by which they can expect to reach such agreement.

C. INTERPRETATION AND APPLICATION OF ARTICLE XVI

1. Article XVI:4

456. In *US – FSC*, the Appellate Body discussed the relationship between Article XVI:4 of *GATT 1994* and the *SCM Agreement* in interpreting Article 3.1(a) of the *SCM Agreement*. See Chapter on the *SCM Agreement*, Section II.B.9(a).

2. SCM Agreement

457. With respect to WTO jurisprudence and materials produced by competent WTO bodies concerning subsidies, see Chapter on the *SCM Agreement*.

3. Reference to GATT practice

458. With respect to GATT practice on Article XVI, see GATT Analytical Index, pages 445–463.

XVIII. ARTICLE XVII

A. TEXT OF ARTICLE XVII

Article XVII
State Trading Enterprises

1* (a) Each contracting party undertakes that if it establishes or maintains a State enterprise, wherever located, or grants to any enterprise, formally or in effect, exclusive or special privileges,* such enterprise shall, in its purchases or sales involving either imports or exports, act in a manner consistent with the general principles of non-discriminatory treatment prescribed in this Agreement for governmental measures affecting imports and exports by private traders.

(b) The provisions of subparagraph (a) of this paragraph shall be understood to require that such enterprises shall, having due regard to the other provisions of this Agreement, make any such purchases or sales solely in accordance with commercial considerations,* including price, quality, availability, marketability, transportation and other conditions of purchase or sale, and shall afford the enterprises of the other contracting parties adequate opportunity, in accordance with customary business practice, to compete for participation in such purchases or sales.

(c) No contracting party shall prevent any enterprise (whether or not an enterprise described in subparagraph (a) of this paragraph) under its jurisdiction from acting in accordance with the principles of subparagraphs (a) and (b) of this paragraph.

2. The provisions of paragraph 1 of this Article shall not apply to imports of products for immediate or ultimate consumption in governmental use and not otherwise for resale or use in the production of goods* for sale. With respect to such imports, each contracting party shall accord to the trade of the other contracting parties fair and equitable treatment.

3. The contracting parties recognize that their enterprises of the kind described in paragraph 1 (a) of this article might be operated so as to create serious obstacles to trade; thus negotiations on a reciprocal and mutually advantageous basis designed to limit or reduce such obstacles are of importance to the expansion of international trade.*

4. (a) Contracting parties shall notify the CONTRACTING PARTIES of the products which are imported into or exported from their territories by enterprises of the kind described in paragraph 1 (a) of this article.

(b) A contracting party establishing, maintaining or authorizing an import monopoly of a product, which is not the subject of a concession under Article II, shall, on the request of another contracting party having a substantial trade in the product concerned, inform the CONTRACTING PARTIES of the import mark-up* on the product during a recent representative period, or when it is not possible to do so, of the price charged on the resale of the product.

(c) The CONTRACTING PARTIES may, at the request of a contracting party which has reason to believe that its interest under this Agreement are being adversely affected by the operations of an enterprise of the kind described in paragraph 1 (a), request the contracting party establishing, maintaining or authorizing such enterprise to supply information about its operations related to the carrying out of the provisions of this Agreement.

(d) The provisions of this paragraph shall not require any contracting party to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises.

B. TEXT OF *AD* ARTICLE XVII

Ad Article XVII

Paragraph 1

The operations of Marketing Boards, which are established by contracting parties and are engaged in purchasing or selling, are subject to the provisions of sub-paragraphs (a) and (b).

The activities of Marketing Boards which are established by contracting parties and which do not purchase or sell but lay down regulations covering private trade are governed by the relevant Articles of this Agreement.

The charging by a state enterprise of different prices for its sales of a product in different markets is not precluded by the provisions of this Article, provided that such different prices are charged for commercial reasons, to meet conditions of supply and demand in export markets.

Paragraph 1 (a)

Governmental measures imposed to ensure standards of quality and efficiency in the operation of external trade, or privileges granted for the exploitation of national natural resources but which do not empower the government to exercise control over the trading activities of the enterprise in question, do not constitute "exclusive or special privileges".

Paragraph 1(b)

A country receiving a "tied loan" is free to take this loan into account as a "commercial consideration" when purchasing requirements abroad.

Paragraph 2

The term "goods" is limited to products as understood in commercial practice, and is not intended to include the purchase or sale of services.

Paragraph 3

Negotiations which contracting parties agree to conduct under this paragraph may be directed towards the reduction of duties and other charges on imports and exports or towards the conclusion of any other mutually satisfactory arrangement consistent with the provisions of this Agreement. (See paragraph 4 of Article II and the note to that paragraph.)

Paragraph 4 (b)

The term "import mark-up" in this paragraph shall represent the margin by which the price charged by the import monopoly for the imported product (exclusive of internal taxes within the purview of Article III, transportation, distribution, and other expenses incident to the purchase, sale or further processing, and a reasonable margin of profit) exceeds the landed cost.

C. UNDERSTANDING ON THE INTERPRETATION OF ARTICLE XVII OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

Members,

Noting that Article XVII provides for obligations on Members in respect of the activities of the state trading enterprises referred to in paragraph 1 of Article XVII, which are required to be consistent with the general principles of non-discriminatory treatment prescribed in GATT 1994 for governmental measures affecting imports or exports by private traders;

Noting further that Members are subject to their GATT 1994 obligations in respect of those governmental measures affecting state trading enterprises;

Recognizing that this Understanding is without prejudice to the substantive disciplines prescribed in Article XVII;

Hereby *agree* as follows:

1. In order to ensure the transparency of the activities of state trading enterprises, Members shall notify such enterprises to the Council for Trade in Goods, for review by the working party to be set up under paragraph 5, in accordance with the following working definition:

"Governmental and non-governmental enterprises, including marketing boards, which have been granted exclusive or special rights or privileges, including statutory or constitutional powers, in the exercise of which they influence through their purchases or sales the level or direction of imports or exports."

This notification requirement does not apply to imports of products for immediate or ultimate consumption in governmental use or in use by an enterprise as specified above and not otherwise for resale or use in the production of goods for sale.

2. Each Member shall conduct a review of its policy with regard to the submission of notifications on state trading enterprises to the Council for Trade in Goods, taking account of the provisions of this Understanding. In carrying out such a review, each Member should have regard to the need to ensure the maximum transparency possible in its notifications so as to permit a clear appreciation of the manner of operation of the enterprises notified and the effect of their operations on international trade.

3. Notifications shall be made in accordance with the questionnaire on state trading adopted on 24 May 1960 (BISD 9S/184–185), it being understood that Members shall notify the enterprises referred to in paragraph 1 whether or not imports or exports have in fact taken place.

4. Any Member which has reason to believe that another Member has not adequately met its notification

obligation may raise the matter with the Member concerned. If the matter is not satisfactorily resolved it may make a counter-notification to the Council for Trade in Goods, for consideration by the working party set up under paragraph 5, simultaneously informing the Member concerned.

5. A working party shall be set up, on behalf of the Council for Trade in Goods[1], to review notifications and counter-notifications. In the light of this review and without prejudice to paragraph 4(c) of Article XVII, the Council for Trade in Goods may make recommendations with regard to the adequacy of notifications and the need for further information. The working party shall also review, in the light of the notifications received, the adequacy of the above-mentioned questionnaire on state trading and the coverage of state trading enterprises notified under paragraph 1. It shall also develop an illustrative list showing the kinds of relationships between governments and enterprises, and the kinds of activities, engaged in by these enterprises, which may be relevant for the purposes of Article XVII. It is understood that the Secretariat will provide a general background paper for the working party on the operations of state trading enterprises as they relate to international trade. Membership of the working party shall be open to all Members indicating their wish to serve on it. It shall meet within a year of the date of entry into force of the WTO Agreement and thereafter at least once a year. It shall report annually to the Council for Trade in Goods.

(*footnote original*) [1] The activities of this working party shall be coordinated with those of the working group provided for in Section III of the Ministerial Decision on Notification Procedures adopted on 15 April 1994.

D. INTERPRETATION AND APPLICATION OF ARTICLE XVII

1. General

(a) Relationship between paragraphs 1(a) and 1(b) of Article XVII

459. In *Canada – Wheat Exports and Grain Imports*, the Panel found that the disputed export regime was inconsistent with the principles in subparagraph (b) of Article XVII:1. Canada (the respondent) alleged that the Panel had established that a violation of subparagraph (b) was sufficient to establish a breach of Article XVII:1 and also that the Panel had failed to consider the proper relationship between subparagraphs (a) and (b) of Article XVII:1. The Appellate Body held that a failure to identify discriminatory conduct prior to determining the consistency of a state trading enterprise's (STE) conduct with subparagraph (b) of Article XVII:1 would constitute an error of law. The Appellate Body held:

"[I]n this case, we have already determined that the two subparagraphs of Article XVII:1 are closely interrelated. As we have said, a panel faced with a claim of inconsistency with Article XVII:1(a) and (b) will, in most if not all cases, need to analyze and apply *both* provisions in order to assess the consistency of the measure at issue. Subparagraph (b) sets forth two specific conditions with which an STE must comply if allegedly discriminatory conduct falling, *prima facie*, within the scope of subparagraph (a) is to be found consistent with Article XVII:1. Yet, in order to know whether the conditions in (b) are satisfied, a panel must know *what* constitutes the conduct alleged to be inconsistent with the principles of non-discriminatory treatment in the GATT 1994. A panel will need to identify at least the differential treatment at issue. The outcome of an assessment under subparagraph (b) of whether the differential treatment is consistent with commercial considerations may depend, in part, upon whether the alleged discrimination relates to pricing, quality, or conditions of sale, and whether it is discrimination between export markets or some other form of discrimination.

It follows that, logically, a panel cannot assess whether particular practices of an allegedly discriminatory nature accord with commercial considerations without first identifying the key elements of the alleged discrimination. We emphasize that we are *not* suggesting that panels are always obliged to make specific factual and legal findings with respect to each element of a claim of discrimination under subparagraph (a) before undertaking *any* analysis under subparagraph (b). Rather, because a panel's analysis and application of subparagraph (b) to the facts of the case is, like subparagraph (b) itself, dependent on the obligation set forth in subparagraph (a), panels must identify the differential treatment alleged to be discriminatory under subparagraph (a) in order to ensure that they are undertaking a proper inquiry under subparagraph (b).

For these reasons, we are of the view that a failure to identify *any* conduct alleged to constitute discrimination contrary to the general principles of the GATT 1994 for governmental measures affecting imports or exports by private traders *before* undertaking an analysis of the consistency of an STE's conduct with subparagraph (b) of Article XVII:1 would constitute an error of law. Had the Panel in this case simply *ignored* the issue of possible discrimination within the meaning of Article XVII:1(a) and passed immediately to its analysis under subparagraph (b), we would have no difficulty – based on our analysis above of the relationship between the two provisions – concluding that the Panel erred in its interpretative approach. Yet this does not appear to us to be what the Panel did. We set out in the next sub-section our understanding of how the Panel conducted its analysis in this case."[667]

[667] Appellate Body Report on *Canada – Wheat Exports and Grain Imports*, paras. 110–112. In this case, the Appellate Body found that the Panel had not ignored subparagraph (a) of Article XVII and therefore had not erred.

460. The Panel on *Korea – Various Measures on Beef* found that despite domestic demand for imported beef, the Korean state trading agency for beef imports had suspended its tenders for beef of foreign origin, and had refused to sell imported beef from its stock, during a certain period of time. In examining the consistency of this practice of the Korean state trading agency with Articles III, XI and XVII, the Panel addressed the relationship between paragraphs 1(a) and 1(b) of Article XVII. Referring to the Panel Report on *Canada – FIRA*[668], the Panel, in a finding not reviewed by the Appellate Body, held that the violation of one of these two paragraphs would suffice to show a violation of the other paragraph:

> "In other words the terms 'general principle of non-discrimination treatment prescribed in this Agreement' (Art. XVII:1(a)) should be equated with 'make any such purchases or sales solely in accordance with commercial considerations' (Art. XVII:1(b)). The list of variables that can be used to assess whether a state-trading action is based on commercial consideration (prices, availability etc. . .) are to be used to facilitate the assessment whether the state-trading enterprise has acted in respect of the general principles of non-discrimination. A conclusion that the principle of non-discrimination was violated would suffice to prove a violation of Article XVII; similarly, a conclusion that a decision to purchase or buy was not based on 'commercial considerations', would also suffice to show a violation of Article XVII."[669]

461. Further, noting that the Korean state trading agency had exclusive rights of import for its 30 per cent share of Korea's beef import quotas, the Panel on *Korea – Various Measures on Beef*, in a statement not reviewed by the Appellate Body, stated:

> "Based on the panel findings in the *Canada – Marketing Agencies (1988)* case, the Panel considers that to the extent that LPMO fully controls both the importation and distribution of its 30 per cent share of Korean beef quota, the distinction normally made in the GATT between restrictions affecting the *importation* of products (i.e. border measures) and restrictions affecting *imported* products (i.e. internal measures) loses much of its significance."[670]

(b) *Ad* Note Articles XI, XII, XIII, XIV and XVIII

462. The Note *Ad* Articles XI, XII, XIII, XIV and XVIII, which clarifies that the terms "import restrictions" or "export restrictions" used in these Articles include "restrictions made effective through state-trading operations", was discussed by the Panels on *India – Quantitative Restrictions* and *Korea – Various Measures on Beef*. See paragraphs 407–408 above.

2. Article XVII:1(a)

463. The Panel on *Korea – Various Measures on Beef*, in a finding not reviewed by the Appellate Body, described the legal status of Article XVII:1(a) in the GATT framework in the following terms:

> "Article XVII.1(a) establishes the general obligation on state trading enterprises to undertake their activities in accordance with the GATT principles of non-discrimination. The Panel considers that this general principle of non-discrimination includes at least the provisions of Articles I and III of GATT."[671]

(a) Reference to GATT practice

464. With respect to GATT practice under Article XVII:1, see the GATT Analytical Index, pages 473–479.

3. Article XVII:1(b)

465. In *Korea – Various Measures on Beef*, the Panel discussed the general character of Article XVII:1(b). See paragraph 459 above.

(a) Reference to GATT practice

466. With respect to GATT practice under Article XVII:1, see the GATT Analytical Index, pages 473–479.

4. Article XVII:4

(a) Notification requirements

467. At its meeting of 20 February 1995, the Council for Trade in Goods decided that "all new and full notifications dealt with under Article XVII of *GATT 1994* and Paragraph 1 of the Understanding on the Interpretation of Article XVII of *GATT 1994*, should be submitted not later than 30 June in every third year after 1995 and that the updating notifications due in each of the two intervening years should be submitted not later than 30 June of the respective year."[672] The Council for Trade in Goods, however, clarified that the deadlines for future notifications would be established by the Working Party itself.[673]

468. With respect to the questionnaire used for as a basis for notifications, see paragraph 471 below.

---

[668] Panel Report on *Canada – FIRA*, para. 5.16.
[669] Panel Report on *Korea – Various Measures on Beef*, para. 757.
[670] Panel Report on *Korea – Various Measures on Beef*, para. 766.
[671] Panel Report on *Korea – Various Measures on Beef*, para. 753. In support of its proposition, the Panel went on to refer to the following two GATT Panel Reports: (i) Panel Report on *Canada – Provincial Liquor Board (EC)*, para. 4.26; and Panel Report on *Canada – Provincial Liquor Board (US)*, para. 5.15.
[672] G/C/M/1, paras. 5.6–5.7.
[673] G/C/M/1, para.5.5. The Working Party accordingly set forth the following deadlines: (i) 30 June 1995 for the 1995 notifications (G/STR/N/1); (ii) 30 September 1998 for the 1998 new and full notifications (G/STR/N/4); and (iii) 29 June 2001 for the 2001 new and full notifications (G/STR/N/7).

(b) Reference to GATT practice

469. With respect to GATT practice regarding notifications of state trading, see GATT Analytical Index, pages 481–482.

5. Understanding on the Interpretation of Article XVII of the General Agreement on Tariffs and Trade 1994

(a) Paragraph 1

470. With respect to the notification requirements set forth in paragraph 1 of the Understanding, see paragraph 467 above.

(b) Paragraph 3

471. At its meeting of 21 April 1998, the Council for Trade in Goods approved a revised questionnaire proposed by the Working Party, which is to be used as a basis for notifications on state trading.[674]

(c) Paragraph 5

(i) Working Party on State Trading Enterprises

472. Pursuant to paragraph 5 of the Understanding, the Council for Trade in Goods established a Working Party on State Trading Enterprises at its meeting of 20 February 1995, "to carry out the tasks described in paragraph 5 of the Understanding on the Interpretation of Article XVII of GATT 1994".[675]

473. With respect to the establishment of the Working Party, see also the Chapter on the *WTO Agreement*, Section V.B.6(a).

(ii) "an illustrative list"

474. At its meeting of 15 October 1999, upon a proposal of the Working Party, the Council for Trade in Goods adopted "an illustrative list showing the kinds of relationships between governments and enterprises, and the kinds of activities, engaged in by these enterprises, which may be relevant for the purposes of Article XVII".[676] The illustrative list states that "[t]his list in no way affects the rights and obligations of Members under the Understanding and under Article XVII of GATT 1994 and its Interpretive Notes."[677]

(iii) "general background paper"

475. At its meeting of 6 April 1995, the Working Party established guidelines on the contents and the sources to be used in the preparation of the general background paper to be prepared by the Secretariat on the operation of the state trading enterprises as required under Paragraph 5 of the Understanding.[678] On 26 October 1995, the Secretariat accordingly prepared and issued a background paper entitled "Operations of State Trading Enterprises as they Relate to International Trade."[679]

E. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

476. The Panel on *Korea – Various Measures on Beef* touched on the relationship between Articles I and XVII. See paragraph 463 above.

2. Article II

477. In *Korea – Various Measures on Beef*, after finding that the practice of the Korean state trading agency for beef of according different treatment to grass-fed beef and grain-fed beef was inconsistent with *GATT* Articles II:1(a) and XI, the Panel exercised judicial economy with respect to claims concerning the consistency of that practice with Articles III:4 and XVII.[680]

(a) Reference to GATT practice

478. With respect to GATT practice on this issue, see the GATT Analytical Index, page 483.

3. Article III

479. The Panel on *Korea – Various Measures on Beef* discussed the relationship between Articles III and XVII. See paragraph 463 above.

(a) Reference to GATT practice

480. With respect to GATT practice on this issue, see the GATT Analytical Index, pages 483–484.

4. Article XI

481. Exercising judicial economy, the Panel on *Korea – Various Measures on Beef* did not examine claims regarding certain practices of the Korean state trading agency for beef under Articles III:4 and XVII, after it had found a violation of Articles XI and II:1(a) with respect to that practice. See also paragraph 477 above.

482. In *Korea – Various Measures on Beef*, the Panel addressed the practice of the Korean state trading agency which controlled a 30 per cent share of Korea's import quotas for certain products. See paragraph 461 above.

483. With respect to the Note *Ad* Articles XI, XII, XIII, XIV and XVIII, see paragraph 462 above.

(a) Reference to GATT practice

484. With respect to GATT practice on this issue, see the GATT Analytical Index, pages 484–485.

5. Articles XII, XIII, XIV and XVIII

485. With respect to the Note *Ad* Articles XI, XII, XIII, XIV and XVIII, see paragraph 462 above.

(a) Reference to GATT practice

486. With respect to GATT practice on the Note *Ad* Articles XII and XVIII, see the GATT Analytical Index, page 485.

F. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Agreement on Agriculture

487. Footnote 1 to Article 4.2 of the *Agreement on Agriculture* sets forth that "any measures of the kind which have been required to be converted into ordinary customary duties" under that Agreement, include "quantitative import restrictions, variable import levies, minimum import prices, discretionary import licensing, non-tariff measures maintained through state-trading enterprises . . .". In *Korea – Various Measures on Beef*, the Panel found, and the Appellate Body agreed, that Korea was in violation of Article 4.2 of the *Agreement of Agriculture* and Article XI of the *GATT* in that despite the demand for imported beef, the Korean state trading agency for beef imports suspended its tenders for beef of foreign origin, and refused to sell imported beef from its stock, during a certain period of time. See Chapter on the *Agreement on Agriculture*, Section V.B.3. In this context, the Appellate Body stated:

> "Since the Panel has already reached the conclusion that the above measures are inconsistent with Article XI and the Ad Note to Articles XI, XII, XIII, XIV and XVIII relating to state-trading enterprises, the same measures are necessarily inconsistent with Article 4.2 of *the Agreement on Agriculture* and its footnote referring to non-tariff measures maintained through state-trading enterprises."[681]

XIX. ARTICLE XVIII

A. TEXT OF ARTICLE XVIII

*Article XVIII**
Governmental Assistance to Economic Development

1. The contracting parties recognize that the attainment of the objectives of this Agreement will be facilitated by the progressive development of their economies, particularly of those contracting parties the economies of which can only support low standards of living* and are in the early stages of development.*

2. The contracting parties recognize further that it may be necessary for those contracting parties, in order to implement programmes and policies of economic development designed to raise the general standard of living of their people, to take protective or other measures affecting imports, and that such measures are justified in so far as they facilitate the attainment of the objectives of this Agreement. They agree, therefore, that those contracting parties should enjoy additional facilities to enable them (*a*) to maintain sufficient flexibility in their tariff structure to be able to grant the tariff protection required for the establishment of a particular industry* and (*b*) to apply quantitative restrictions for balance of payments purposes in a manner which takes full account of the continued high level of demand for imports likely to be generated by their programmes of economic development.

3. The contracting parties recognize finally that, with those additional facilities which are provided for in Sections A and B of this Article, the provisions of this Agreement would normally be sufficient to enable contracting parties to meet the requirements of their economic development. They agree, however, that there may be circumstances where no measure consistent with those provisions is practicable to permit a contracting party in the process of economic development to grant the governmental assistance required to promote the establishment of particular industries* with a view to raising the general standard of living of its people. Special procedures are laid down in Sections C and D of this Article to deal with those cases.

4. (*a*) Consequently, a contracting party, the economy of which can only support low standards of living* and is in the early stages of development,* shall be free to deviate temporarily from the provisions of the other Articles of this Agreement, as provided in Sections A, B and C of this Article.

(*b*) A contracting party, the economy of which is in the process of development, but which does not come within the scope of subparagraph (*a*) above, may submit applications to the CONTRACTING PARTIES under Section D of this Article.

5. The contracting parties recognize that the export earnings of contracting parties, the economies of which are of the type described in paragraph 4 (*a*) and (*b*) above and which depend on exports of a small number of primary commodities, may be seriously reduced by a decline in the sale of such commodities. Accordingly, when the exports of primary commodities by such a contracting party are seriously affected by measures taken by another contracting party, it may have resort to the consultation provisions of Article XXII of this Agreement.

[681] Panel Report on *Korea – Various Measures on Beef*, para. 768.

6. The CONTRACTING PARTIES shall review annually all measures applied pursuant to the provisions of Sections C and D of this Article.

Section A

7. (*a*) If a contracting party coming within the scope of paragraph 4 (*a*) of this Article considers it desirable, in order to promote the establishment of a particular industry* with a view to raising the general standard of living of its people, to modify or withdraw a concession included in the appropriate Schedule annexed to this Agreement, it shall notify the CONTRACTING PARTIES to this effect and enter into negotiations with any contracting party with which such concession was initially negotiated, and with any other contracting party determined by the CONTRACTING PARTIES to have a substantial interest therein. If agreement is reached between such contracting parties concerned, they shall be free to modify or withdraw concessions under the appropriate Schedules to this Agreement in order to give effect to such agreement, including any compensatory adjustments involved.

(*b*) If agreement is not reached within sixty days after the notification provided for in subparagraph (*a*) above, the contracting party which proposes to modify or withdraw the concession may refer the matter to the CONTRACTING PARTIES which shall promptly examine it. If they find that the contracting party which proposes to modify or withdraw the concession has made every effort to reach an agreement and that the compensatory adjustment offered by it is adequate, that contracting party shall be free to modify or withdraw the concession if, at the same time, it gives effect to the compensatory adjustment. If the CONTRACTING PARTIES do not find that the compensation offered by a contracting party proposing to modify or withdraw the concession is adequate, but find that it has made every reasonable effort to offer adequate compensation, that contracting party shall be free to proceed with such modification or withdrawal. If such action is taken, any other contracting party referred to in subparagraph (*a*) above shall be free to modify or withdraw substantially equivalent concessions initially negotiated with the contracting party which has taken the action.*

Section B

8. The contracting parties recognize that contracting parties coming within the scope of paragraph 4 (*a*) of this Article tend, when they are in rapid process of development, to experience balance of payments difficulties arising mainly from efforts to expand their internal markets as well as from the instability in their terms of trade.

9. In order to safeguard its external financial position and to ensure a level of reserves adequate for the implementation of its programme of economic development, a contracting party coming within the scope of paragraph 4 (*a*) of this Article may, subject to the provisions of paragraphs 10 to 12, control the general level of its imports by restricting the quantity or value of merchandise permitted to be imported; *Provided* that the import restrictions instituted, maintained or intensified shall not exceed those necessary:

(*a*) to forestall the threat of, or to stop, a serious decline in its monetary reserves, or

(*b*) in the case of a contracting party with inadequate monetary reserves, to achieve a reasonable rate of increase in its reserves.

Due regard shall be paid in either case to any special factors which may be affecting the reserves of the contracting party or its need for reserves, including, where special external credits or other resources are available to it, the need to provide for the appropriate use of such credits or resources.

10. In applying these restrictions, the contracting party may determine their incidence on imports of different products or classes of products in such a way as to give priority to the importation of those products which are more essential in the light of its policy of economic development; *Provided* that the restrictions are so applied as to avoid unnecessary damage to the commercial or economic interests of any other contracting party and not to prevent unreasonably the importation of any description of goods in minimum commercial quantities the exclusion of which would impair regular channels of trade; and *Provided* further that the restrictions are not so applied as to prevent the importation of commercial samples or to prevent compliance with patent, trade mark, copyright or similar procedures.

11. In carrying out its domestic policies, the contracting party concerned shall pay due regard to the need for restoring equilibrium in its balance of payments on a sound and lasting basis and to the desirability of assuring an economic employment of productive resources. It shall progressively relax any restrictions applied under this Section as conditions improve, maintaining them only to the extent necessary under the terms of paragraph 9 of this Article and shall eliminate them when conditions no longer justify such maintenance; *Provided* that no contracting party shall be required to withdraw or modify restrictions on the ground that a change in its development policy would render unnecessary the restrictions which it is applying under this Section.*

12. (*a*) Any contracting party applying new restrictions or raising the general level of its existing restrictions by a substantial intensification of the measures applied under this Section, shall immediately after instituting or intensifying such restrictions (or, in circumstances in which prior consultation is practicable, before doing so) consult with the CONTRACTING PARTIES as to the nature of its balance of payments difficulties, alternative corrective measures which may be available, and the

possible effect of the restrictions on the economies of other contracting parties.

(*b*) On a date to be determined by them* the CONTRACTING PARTIES shall review all restrictions still applied under this Section on that date. Beginning two years after that date, contracting parties applying restrictions under this Section shall enter into consultations of the type provided for in subparagraph (*a*) above with the CONTRACTING PARTIES at intervals of approximately, but not less than, two years according to a programme to be drawn up each year by the CONTRACTING PARTIES; *Provided* that no consultation under this subparagraph shall take place within two years after the conclusion of a consultation of a general nature under any other provision of this paragraph.

(*c*) (i) If, in the course of consultations with a contracting party under subparagraph (*a*) or (*b*) of this paragraph, the CONTRACTING PARTIES find that the restrictions are not consistent with the provisions of this Section or with those of Article XIII (subject to the provisions of Article XIV), they shall indicate the nature of the inconsistency and may advise that the restrictions be suitably modified.

(ii) If, however, as a result of the consultations, the CONTRACTING PARTIES determine that the restrictions are being applied in a manner involving an inconsistency of a serious nature with the provisions of this Section or with those of Article XIII (subject to the provisions of Article XIV) and that damage to the trade of any contracting party is caused or threatened thereby, they shall so inform the contracting party applying the restrictions and shall make appropriate recommendations for securing conformity with such provisions within a specified period. If such contracting party does not comply with these recommendations within the specified period, the CONTRACTING PARTIES may release any contracting party the trade of which is adversely affected by the restrictions from such obligations under this Agreement towards the contracting party applying the restrictions as they determine to be appropriate in the circumstances.

(*d*) The CONTRACTING PARTIES shall invite any contracting party which is applying restrictions under this Section to enter into consultations with them at the request of any contracting party which can establish a *prima facie* case that the restrictions are inconsistent with the provisions of this Section or with those of Article XIII (subject to the provisions of Article XIV) and that its trade is adversely affected thereby. However, no such invitation shall be issued unless the CONTRACTING PARTIES have ascertained that direct discussions between the contracting parties concerned have not been successful. If, as a result of the consultations with the CONTRACTING PARTIES no agreement is reached and they determine that the restrictions are being applied inconsistently with such provisions, and that damage to the trade of the contracting party initiating the procedure is caused or threatened thereby, they shall recommend the withdrawal or modification of the restrictions. If the restrictions are not withdrawn or modified within such time as the CONTRACTING PARTIES may prescribe, they may release the contracting party initiating the procedure from such obligations under this Agreement towards the contracting party applying the restrictions as they determine to be appropriate in the circumstances.

(*e*) If a contracting party against which action has been taken in accordance with the last sentence of subparagraph (*c*) (ii) or (*d*) of this paragraph, finds that the release of obligations authorized by the CONTRACTING PARTIES adversely affects the operation of its programme and policy of economic development, it shall be free, not later than sixty days after such action is taken, to give written notice to the Executive Secretary[1] to the CONTRACTING PARTIES of its intention to withdraw from this Agreement and such withdrawal shall take effect on the sixtieth day following the day on which the notice is received by him.

(*footnote original*) [1] By the Decision of 23 March 1965, the CONTRACTING PARTIES changed the title of the head of the GATT secretariat from "Executive Secretary" to "Director-General".

(*f*) In proceeding under this paragraph, the CONTRACTING PARTIES shall have due regard to the factors referred to in paragraph 2 of this Article. Determinations under this paragraph shall be rendered expeditiously and, if possible, within sixty days of the initiation of the consultations.

Section C

13. If a contracting party coming within the scope of paragraph 4 (*a*) of this Article finds that governmental assistance is required to promote the establishment of a particular industry* with a view to raising the general standard of living of its people, but that no measure consistent with the other provisions of this Agreement is practicable to achieve that objective, it may have recourse to the provisions and procedures set out in this Section.*

14. The contracting party concerned shall notify the CONTRACTING PARTIES of the special difficulties which it meets in the achievement of the objective outlined in paragraph 13 of this Article and shall indicate the specific measure affecting imports which it proposes to introduce in order to remedy these difficulties. It shall not introduce that measure before the expiration of the time-limit laid down in paragraph 15 or 17, as the case may be, or if the measure affects imports of a product which is the subject of a concession included in the appropriate Schedule annexed to this Agreement, unless it has secured the concurrence of the CONTRACTING PARTIES in accordance with provisions of paragraph 18; *Provided* that, if the industry receiving assistance has

already started production, the contracting party may, after informing the CONTRACTING PARTIES, take such measures as may be necessary to prevent, during that period, imports of the product or products concerned from increasing substantially above a normal level.*

15. If, within thirty days of the notification of the measure, the CONTRACTING PARTIES do not request the contracting party concerned to consult with them,* that contracting party shall be free to deviate from the relevant provisions of the other Articles of this Agreement to the extent necessary to apply the proposed measure.

16. If it is requested by the CONTRACTING PARTIES to do so, *the contracting party concerned shall consult with them as to the purpose of the proposed measure, as to alternative measures which may be available under this Agreement, and as to the possible effect of the measure proposed on the commercial and economic interests of other contracting parties. If, as a result of such consultation, the CONTRACTING PARTIES agree that there is no measure consistent with the other provisions of this Agreement which is practicable in order to achieve the objective outlined in paragraph 13 of this Article, and concur* in the proposed measure, the contracting party concerned shall be released from its obligations under the relevant provisions of the other Articles of this Agreement to the extent necessary to apply that measure.

17. If, within ninety days after the date of the notification of the proposed measure under paragraph 14 of this Article, the CONTRACTING PARTIES have not concurred in such measure, the contracting party concerned may introduce the measure proposed after informing the CONTRACTING PARTIES.

18. If the proposed measure affects a product which is the subject of a concession included in the appropriate Schedule annexed to this Agreement, the contracting party concerned shall enter into consultations with any other contracting party with which the concession was initially negotiated, and with any other contracting party determined by the CONTRACTING PARTIES to have a substantial interest therein. The CONTRACTING PARTIES shall concur* in the measure if they agree that there is no measure consistent with the other provisions of this Agreement which is practicable in order to achieve the objective set forth in paragraph 13 of this Article, and if they are satisfied:

(*a*) that agreement has been reached with such other contracting parties as a result of the consultations referred to above, or

(*b*) if no such agreement has been reached within sixty days after the notification provided for in paragraph 14 has been received by the CONTRACTING PARTIES, that the contracting party having recourse to this Section has made all reasonable efforts to reach an agreement and that the interests of other contracting parties are adequately safeguarded.*

The contracting party having recourse to this Section shall thereupon be released from its obligations under the relevant provisions of the other Articles of this Agreement to the extent necessary to permit it to apply the measure.

19. If a proposed measure of the type described in paragraph 13 of this Article concerns an industry the establishment of which has in the initial period been facilitated by incidental protection afforded by restrictions imposed by the contracting party concerned for balance of payments purposes under the relevant provisions of this Agreement, that contracting party may resort to the provisions and procedures of this Section; *Provided* that it shall not apply the proposed measure without the concurrence* of the CONTRACTING PARTIES.*

20. Nothing in the preceding paragraphs of this Section shall authorize any deviation from the provisions of Articles I, II and XIII of this Agreement. The provisos to paragraph 10 of this Article shall also be applicable to any restriction under this Section.

21. At any time while a measure is being applied under paragraph 17 of this Article any contracting party substantially affected by it may suspend the application to the trade of the contracting party having recourse to this Section of such substantially equivalent concessions or other obligations under this Agreement the suspension of which the CONTRACTING PARTIES do not disapprove;* *Provided* that sixty days' notice of such suspension is given to the CONTRACTING PARTIES not later than six months after the measure has been introduced or changed substantially to the detriment of the contracting party affected. Any such contracting party shall afford adequate opportunity for consultation in accordance with the provisions of Article XXII of this Agreement.

Section D

22. A contracting party coming within the scope of subparagraph 4 (*b*) of this Article desiring, in the interest of the development of its economy, to introduce a measure of the type described in paragraph 13 of this Article in respect of the establishment of a particular industry* may apply to the CONTRACTING PARTIES for approval of such measure. The CONTRACTING PARTIES shall promptly consult with such contracting party and shall, in making their decision, be guided by the considerations set out in paragraph 16. If the CONTRACTING PARTIES concur* in the proposed measure the contracting party concerned shall be released from its obligations under the relevant provisions of the other Articles of this Agreement to the extent necessary to permit it to apply the measure. If the proposed measure affects a product which is the subject of a concession included in the appropriate Schedule annexed to this Agreement, the provisions of paragraph 18 shall apply.*

23. Any measure applied under this Section shall comply with the provisions of paragraph 20 of this Article.

B. TEXT *AD* ARTICLE XVIII

Ad Article XVIII

The CONTRACTING PARTIES and the contracting parties concerned shall preserve the utmost secrecy in respect of matters arising under this Article.

Paragraphs 1 and 4

1. When they consider whether the economy of a contracting party "can only support low standards of living", the CONTRACTING PARTIES shall take into consideration the normal position of that economy and shall not base their determination on exceptional circumstances such as those which may result from the temporary existence of exceptionally favourable conditions for the staple export product or products of such contracting party.

2. The phrase "in the early stages of development" is not meant to apply only to contracting parties which have just started their economic development, but also to contracting parties the economies of which are undergoing a process of industrialization to correct an excessive dependence on primary production.

Paragraphs 2, 3, 7, 13 and 22

The reference to the establishment of particular industries shall apply not only to the establishment of a new industry, but also to the establishment of a new branch of production in an existing industry and to the substantial transformation of an existing industry, and to the substantial expansion of an existing industry supplying a relatively small proportion of the domestic demand. It shall also cover the reconstruction of an industry destroyed or substantially damaged as a result of hostilities or natural disasters.

Paragraph 7 (b)

A modification or withdrawal, pursuant to paragraph 7 *(b)*, by a contracting party, other than the applicant contracting party, referred to in paragraph 7 *(a)*, shall be made within six months of the day on which the action is taken by the applicant contracting party, and shall become effective on the thirtieth day following the day on which such modification or withdrawal has been notified to the CONTRACTING PARTIES.

Paragraph 11

The second sentence in paragraph 11 shall not be interpreted to mean that a contracting party is required to relax or remove restrictions if such relaxation or removal would thereupon produce conditions justifying the intensification or institution, respectively, of restrictions under paragraph 9 of Article XVIII.

Paragraph 12 (b)

The date referred to in paragraph 12 *(b)* shall be the date determined by the CONTRACTING PARTIES in accordance with the provisions of paragraph 4 *(b)* of Article XII of this Agreement.

Paragraphs 13 and 14

It is recognized that, before deciding on the introduction of a measure and notifying the CONTRACTING PARTIES in accordance with paragraph 14, a contracting party may need a reasonable period of time to assess the competitive position of the industry concerned.

Paragraphs 15 and 16

It is understood that the CONTRACTING PARTIES shall invite a contracting party proposing to apply a measure under Section C to consult with them pursuant to paragraph 16 if they are requested to do so by a contracting party the trade of which would be appreciably affected by the measure in question.

Paragraphs 16, 18, 19 and 22

1. It is understood that the CONTRACTING PARTIES may concur in a proposed measure subject to specific conditions or limitations. If the measure as applied does not conform to the terms of the concurrence it will to that extent be deemed a measure in which the CONTRACTING PARTIES have not concurred. In cases in which the CONTRACTING PARTIES have concurred in a measure for a specified period, the contracting party concerned, if it finds that the maintenance of the measure for a further period of time is required to achieve the objective for which the measure was originally taken, may apply to the CONTRACTING PARTIES for an extension of that period in accordance with the provisions and procedures of Section C or D, as the case may be.

2. It is expected that the CONTRACTING PARTIES will, as a rule, refrain from concurring in a measure which is likely to cause serious prejudice to exports of a commodity on which the economy of a contracting party is largely dependent.

Paragraphs 18 and 22

The phrase "that the interests of other contracting parties are adequately safeguarded" is meant to provide latitude sufficient to permit consideration in each case of the most appropriate method of safeguarding those interests. The appropriate method may, for instance, take the form of an additional concession to be applied by the contracting party having recourse to Section C or D during such time as the deviation from the other Articles of the Agreement would remain in force or of the temporary suspension by any other contracting party referred to in paragraph 18 of a concession substantially equivalent to the impairment due to the introduction of the measure in question. Such contracting party would

have the right to safeguard its interests through such a temporary suspension of a concession; *Provided* that this right will not be exercised when, in the case of a measure imposed by a contracting party coming within the scope of paragraph 4 *(a)*, the CONTRACTING PARTIES have determined that the extent of the compensatory concession proposed was adequate.

Paragraph 19

The provisions of paragraph 19 are intended to cover the cases where an industry has been in existence beyond the "reasonable period of time" referred to in the note to paragraphs 13 and 14, and should not be so construed as to deprive a contracting party coming within the scope of paragraph 4 *(a)* of Article XVIII, of its right to resort to the other provisions of Section C, including paragraph 17, with regard to a newly established industry even though it has benefited from incidental protection afforded by balance of payments import restrictions.

Paragraph 21

Any measure taken pursuant to the provisions of paragraph 21 shall be withdrawn forthwith if the action taken in accordance with paragraph 17 is withdrawn or if the CONTRACTING PARTIES concur in the measure proposed after the expiration of the ninety-day time limit specified in paragraph 17.

C. UNDERSTANDING ON THE BALANCE-OF-PAYMENTS PROVISIONS OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

Members,

Recognizing the provisions of Articles XII and XVIII:B of GATT 1994 and of the Declaration on Trade Measures Taken for Balance-of-Payments Purposes adopted on 28 November 1979 (BISD 26S/205–209, referred to in this Understanding as the "1979 Declaration") and in order to clarify such provisions[1].

(*footnote original*) [1] Nothing in this Understanding is intended to modify the rights and obligations of Members under Articles XII or XVIII:B of GATT 1994. The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding may be invoked with respect to any matters arising from the application of restrictive import measures taken for balance-of-payments purposes.

Hereby *agree* as follows :

Application of Measures

1. Members confirm their commitment to announce publicly, as soon as possible, time-schedules for the removal of restrictive import measures taken for balance-of-payments purposes. It is understood that such time-schedules may be modified as appropriate to take into account changes in the balance-of-payments situation. Whenever a time-schedule is not publicly announced by a Member, that Member shall provide justification as to the reasons therefor.

2. Members confirm their commitment to give preference to those measures which have the least disruptive effect on trade. Such measures (referred to in this Understanding as "price-based measures") shall be understood to include import surcharges, import deposit requirements or other equivalent trade measures with an impact on the price of imported goods. It is understood that, notwithstanding the provisions of Article II, price-based measures taken for balance-of-payments purposes may be applied by a Member in excess of the duties inscribed in the Schedule of that Member. Furthermore, that Member shall indicate the amount by which the price-based measure exceeds the bound duty clearly and separately under the notification procedures of this Understanding.

3. Members shall seek to avoid the imposition of new quantitative restrictions for balance-of-payments purposes unless, because of a critical balance-of-payments situation, price-based measures cannot arrest a sharp deterioration in the external payments position. In those cases in which a Member applies quantitative restrictions, it shall provide justification as to the reasons why price-based measures are not an adequate instrument to deal with the balance-of-payments situation. A Member maintaining quantitative restrictions shall indicate in successive consultations the progress made in significantly reducing the incidence and restrictive effect of such measures. It is understood that not more than one type of restrictive import measure taken for balance-of-payments purposes may be applied on the same product.

4. Members confirm that restrictive import measures taken for balance-of-payments purposes may only be applied to control the general level of imports and may not exceed what is necessary to address the balance-of-payments situation. In order to minimize any incidental protective effects, a Member shall administer restrictions in a transparent manner. The authorities of the importing Member shall provide adequate justification as to the criteria used to determine which products are subject to restriction. As provided in paragraph 3 of Article XII and paragraph 10 of Article XVIII, Members may, in the case of certain essential products, exclude or limit the application of surcharges applied across the board or other measures applied for balance-for-payments purposes. The term "essential products" shall be understood to mean products which meet basic consumption needs or which contribute to the Member's effort to improve its balance-of-payments situation, such as capital goods or inputs needed for production. In the administration of quantitative restrictions, a Member shall use discretionary licensing only when unavoidable and shall phase it out progressively. Appropriate justification shall be provided as to the criteria used to determine allowable import quantities or values.

Procedures for Balance-of-Payments Consultations

5. The Committee on Balance-of-Payments Restrictions (referred to in this Understanding as the "Committee") shall carry out consultations in order to review all restrictive import measures taken for balance-of-payments purposes. The membership of the Committee is open to all Members indicating their wish to serve on it. The Committee shall follow the procedures for consultations on balance-of-payments restrictions approved on 28 April 1970 (BISD 18S/48–53, referred to in this Understanding as "full consultation procedures"), subject to the provisions set out below.

6. A Member applying new restrictions or raising the general level of its existing restrictions by a substantial intensification of the measures shall enter into consultations with the Committee within four months of the adoption of such measures. The Member adopting such measures may request that a consultation be held under paragraph 4(a) of Article XII or paragraph 12(a) of Article XVIII as appropriate. If no such request has been made, the Chairman of the Committee shall invite the Member to hod such a consultation. Factors that may be examined in the consultation would include, inter alia, the introduction of new types of restrictive measures for balance-of-payments purposes, or an increase in the level or product coverage of restrictions.

7. All restrictions applied for balance-of-payments purposes shall be subject to periodic review in the Committee under paragraph 4(b) of Article XII or under paragraph 12(b) of Article XVIII, subject to the possibility of altering the periodicity of consultations in agreement with the consulting Member or pursuant to any specific review procedure that may be recommended by the General Council.

8. Consultations may be held under the simplified procedures approved on 19 December 1972 (BISD 20S/47–49, referred to in this Understanding as "simplified consultation procedures") in the case of least-developed country Members or in the case of developing country Members which are pursuing liberalization efforts in conformity with the schedule presented to the Committee in previous consultations. Simplified consultations procedures may also be used when the Trade Policy Review of a developing country Member is scheduled for the same calendar year as the date fixed for the consultations. In such cases the decision as to whether full consultation procedures should be used will be made on the basis of the factors enumerated in paragraph 8 of the 1979 Declaration. Except in the case of least-developed country Members, no more than two successive consultations may be held under simplified consultation procedures.

Notification and Documentation

9. A Member shall notify to the General Council the introduction of or any changes in the application of restrictive import measures taken for balance-of-payments purposes, as well as any modifications in time-schedules for the removal of such measures as announced under paragraph 1. Significant changes shall be notified to the General Council prior to or not later than 30 days after their announcement. On a yearly basis, each Member shall make available to the Secretariat a consolidated notification, including all changes in laws, regulations, policy statements or public notices, for examination by Members. Notifications shall include full information, as far as possible, at the tariff-line level, on the type of measures applied, the criteria used for their administration, product coverage and trade flows affected.

10. At the request of any Member, notifications may be reviewed by the Committee. Such reviews would be limited to the clarification of specific issues raised by a notification or examination of whether a consultation under paragraph 4(a) of Article XII or paragraph 12(a) of Article XVIII is required. Members which have reasons to believe that a restrictive import measure applied by another Member was taken for balance-of-payments purposes may bring the matter to the attention of the Committee. The Chairman of the Committee shall request information on the measure and make it available to all Members. Without prejudice to the right of any member of the Committee to seek appropriate clarifications in the course of consultations, questions may be submitted in advance for consideration by the consulting Member.

11. The consulting Member shall prepare a Basic Document for the consultations which, in addition to any other information considered to be relevant, should include: (a) an overview of the balance-of-payments situation and prospects, including a consideration of the internal and external factors having a bearing on the balance-of-payments situation and the domestic policy measures taken in order to restore equilibrium on a sound and lasting basis; (b) a full description of the restrictions applied for balance-of-payments purposes, their legal basis and steps taken to reduce incidental protective effects; (c) measures taken since the last consultation to liberalize import restrictions, in the light of the conclusions of the Committee; (d) a plan for the elimination and progressive relaxation of remaining restrictions. References may be made, when relevant, to the information provided in other notifications or reports made to the WTO. Under simplified consultation procedures, the consulting Member shall submit a written statement containing essential information on the elements covered by the Basic Document.

12. The Secretariat shall, with a view to facilitating the consultations in the Committee, prepare a factual background paper dealing with the different aspects of the plan for consultations. In the case of developing country Members, the Secretariat document shall include relevant background and analytical material on the

incidence of the external trading environment on the balance-of-payments situation and prospects of the consulting Member. The technical assistance services of the Secretariat shall, at the request of a developing country Member, assist in preparing the documentation for the consultations.

Conclusions of Balance-of-Payments Consultations

13. The Committee shall report on its consultations the General Council. When full consultation procedures have been used, the report should indicate the Committee's conclusions on the different elements of the plan for consultations, as well as the facts and reasons on which they are based. The Committee shall endeavour to include in its conclusions proposals for recommendations aimed at promoting the implementation of Articles XII and XVIII:B, the 1979 Declaration and this Understanding. In those cases in which a time-schedule has been presented for the removal of restrictive measures taken for balance-of-payments purposes, the General Council may recommend that, in adhering to such a time-schedule, a Member shall be deemed to be in compliance with its GATT 1994 obligations. Whenever the General Council has made specific recommendations, the rights and obligations of Members shall be assessed in the light of such recommendations. In the absence of specific proposals for recommendations by the General Council, the Committee's conclusions should record the different views expressed in the Committee. When simplified consultation procedures have been used, the report shall include a summary of the main elements discussed in the Committee and a decision on whether full consultation procedures are required."

D. INTERPRETATION AND APPLICATION OF ARTICLE XVIII

1. Article XVIII:B

(a) General

488. The Panel on *India – Quantitative Restrictions*, in a finding not addressed by the Appellate Body, explained the function of Article XVIII:B within the *GATT* framework. The Panel distinguished the conditions for taking balance-of-payments measures under Article XVIII from those applicable under Article XII of *GATT* and considered paragraphs 2, 9 and 11 of Article XVIII:

> "It is clear from these provisions that Article XVIII, which allows developing countries to maintain, under certain conditions, temporary import restrictions for balance-of-payments purposes, is premised on the assumption that it 'may be necessary' for them to adopt such measures in order to implement economic development programmes. It allows them to 'deviate temporarily from the provisions of the other Articles' of GATT 1994, as provided for in, *inter alia*, Section B. These provisions reflect an acknowledgement of the specific needs of developing countries in relation to measures taken for balance-of-payments purposes. Article XVIII:B of GATT 1994 thus embodies the special and differential treatment foreseen for developing countries with regard to such measures. In our analysis, we take due account of these provisions. In particular, the conditions for taking balance-of-payments measures under Article XVIII are clearly distinct from the conditions applicable to developed countries under Article XII of GATT 1994.[682]
>
> We also find that while Article XVIII:2 foresees the possibility that it 'may' be 'necessary' for developing countries to take restrictions for balance-of-payments purposes, such measures might not always be required. These restrictions must be adopted within specific conditions 'as provided in' Section B of Article XVIII. The specific conditions to be respected for the institution and maintenance of such measures include Article XVIII:9, which specifies the circumstances under which such measures may be instituted and maintained, and Article XVIII:11 which sets out the requirements for progressive relaxation and elimination of balance-of-payments measures."

(b) Jurisdiction of panels

489. In *India – Quantitative Restrictions*, the Appellate Body reviewed the Panel's finding that India's import restrictions for balance-of-payments reasons were inconsistent with Article XI:1 and that India was not entitled to maintain these balance-of-payments restrictions under the terms of Note *Ad* Article XVIII:11. India argued that panels have no authority to examine Members' justifications of balance-of-payments restrictions, because footnote 1 to the *Understanding on the Balance-of-Payments Provision* of the *GATT 1994* (the "*BOP Understanding*") provides that the *DSU* may be invoked in respect of matters relating to the specific use or purpose of a balance-of-payments measure or to the manner in which a balance-of-payments measure is *applied* in a particular case, but not with respect to the question of balance-of-payment *justification* of these measures. Rejecting this argument, the Appellate Body stated as follows:

> "Any doubts that may have existed in the past as to whether the dispute settlement procedures under Article XXIII were available for disputes relating to balance-of-payments restrictions have been removed by the second sentence of footnote 1 to the *BOP Understanding*, . . .

[682] (*footnote original*) In particular, the conditions to be met for the institution of balance-of-payments measures are different in Article XVIII:9 and Article XII, and an Ad Note which applies to the conditions for progressive relaxation and elimination of restrictions under Article XVIII:11 has no analogue in Article XII.

> In our opinion, this provision makes it clear that the dispute settlement procedures under Article XXIII, as elaborated and applied by the DSU, *are* available for disputes relating to *any* matters concerning balance-of-payments restrictions.
>
> . . .
>
> We note India's arguments relating to the negotiating history of the *BOP Understanding*. However, in the absence of a record of the negotiations on footnote 1 to the *BOP Understanding*, we find it difficult to give weight to these arguments. . . .
>
> Therefore, in light of footnote 1 to the *BOP Understanding*, a dispute relating to the justification of balance-of-payments restrictions is clearly within the scope of matters to which the dispute settlement provisions of Article XXIII of the GATT 1994, as elaborated and applied by the DSU, are applicable."[683]

490. With reference to the competence of the BOP Committee and the General Council under *GATT* Article XVIII and the *Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994*, the Appellate Body considered that this competence would not be rendered redundant if panels were permitted to review the justification of balance-of-payments restrictions:

> "Recourse to the dispute settlement procedures does not call into question either the availability or the utility of the procedures under Article XVIII:12 and the BOP Understanding. On the contrary, if panels refrained from reviewing the justification of balance-of-payments restrictions, they would diminish the explicit procedural rights of Members under Article XXIII and footnote 1 to the *BOP Understanding*, as well as their substantive rights under Article XVIII:11.
>
> We are cognisant of the competence of the BOP Committee and the General Council with respect to balance-of-payments restrictions under Article XVIII:12 of the GATT 1994 and the *BOP Understanding*. However, we see no conflict between that competence and the competence of panels. Moreover, we are convinced that, in considering the justification of balance-of-payments restrictions, panels should take into account the deliberations and conclusions of the BOP Committee, as did the panel in *Korea – Beef*.
>
> We agree with the Panel that the review by panels of the justification of balance-of-payments restrictions would not render redundant the competence of the BOP Committee and the General Council. The Panel correctly pointed out that the BOP Committee and panels have different functions, and that the BOP Committee procedures and the dispute settlement procedures differ in nature, scope, timing and type of outcome."[684]

491. Further, in response to India's argument that while panels did not lack jurisdiction with respect to balance-of-payments restrictions, they should nevertheless exercise judicial restraint, the Appellate Body stated:

> "India clarified its claim of legal error by stating that although panels, in principle, have competence to review any matters relating to balance-of-payments restrictions, they should exercise *judicial restraint* with respect to these matters. . . .
>
> . . .
>
> [W]e note that, if the exercise of judicial restraint were to lead *in practice*, as India seems to suggest, to panels refraining from considering disputes regarding the justification of balance-of-payments restrictions, such exercise of judicial restraint would, as discussed above, be inconsistent with Article XXIII of the GATT 1994, as elaborated and applied by the DSU, and footnote 1 to the *BOP Understanding*."[685]

(c) Right to maintain balance-of-payments measures

492. In *India – Quantitative Restrictions*, India argued before the Panel that it had the right to maintain balance-of-payment measures until the BOP Committee or the General Council advised it to modify these measures under Article XVIII:12 or established a time-period for their removal under paragraph 13 of the BOP Understanding. The Panel, in a finding not specifically addressed by the Appellate Body, disagreed:

> "We note at the outset that there is no explicit statement in Article XVIII:B or the 1994 Understanding that authorizes a Member to maintain its balance-of-payments measures in effect until the General Council or BOP Committee acts under one of the aforementioned provisions. Article XVIII:B, however, addresses the issue of the extent to which balance-of-payments measures may be maintained. Article XVIII:11, which is analyzed in more detail in Part G below, specifies that a Member:
>
> > 'shall progressively relax any restrictions applied under this Section [i.e., Article XVIII:B] as conditions improve, maintaining them only to the extent necessary under the terms of paragraph 9 of this Article [XVIII] and shall eliminate them when conditions no longer justify their maintenance.'

---

[683] Appellate Body Report on *India – Quantitative Restrictions*, paras. 87–88 and 94–95. Following these paragraphs, in support of this finding, the Appellate Body referred to Panel Report on *Korea – Beef (US)*, paras. 117–118. Also, the Appellate Body rejected the argument that India presented referring to Panel Reports on *EC – Citrus*; *EC – Bananas I*; and *Korea – Beef (US)*. Appellate Body Report on *India – Quantitative Restrictions*, para. 100.

[684] Appellate Body Report on *India – Quantitative Restrictions*, paras. 102–104. In this regard, see also the Panel's finding referenced in para. 492 of this Chapter.

[685] Appellate Body Report on *India – Quantitative Restrictions*, paras. 106 and 108.

> The obligation of Article XVIII:11 is not conditioned on any BOP Committee or General Council decision. If we were to interpret Article XVIII:11 to be so conditioned, we would be adding terms to Article XVIII:11 that it does not contain.
>
> Moreover, the obligation in Article XVIII:11 requires action by the individual Member. It is qualified only by a proviso and Ad Note (which we discuss in Part G and which are not relevant here) and it is not made subject to the accomplishment of other procedures. In light of the unqualified nature of the Article XVIII:11 obligation, it would be inconsistent with the principle *pacta sunt servanda* to conclude that a WTO Member has a right to maintain balance-of-payments measures, even if unjustified under Article XVIII:B, in the absence of a Committee or General Council decision in respect thereof. Thus, we find that India does not have a right to maintain its balance-of-payments measures until the General Council advises it to modify them under Article XVIII:12 or establishes a time-period for their removal under paragraph 13 of the 1994 Understanding."[686]

493. In *India – Quantitative Restrictions*, India argued that a Member invoking a balance-of-payments justification is entitled to maintain the measures until the General Council, following a recommendation from the BOP Committee, requires it to modify or remove them under Article XVIII:12(c)(i) or (ii). As referenced in paragraph 492 above, the Panel rejected this argument. However, India further argued that Article XVIII:12(c)(i) or (ii) confirms the existence of a "right to a phase-out" for measures which no longer meet the criteria set out in Article XVIII:9, by providing for a "specified period of time" to be granted to secure compliance with the relevant provisions when an inconsistency has been identified. In this context, India also claimed that paragraphs 1 and 13 of the Understanding provide an incentive for Members to present a time-schedule for removal even when there are no current balance-of-payments difficulties within the meaning of Article XVIII:9, thereby confirming the existence of a "right" to a phase-out even in the absence of current balance-of-payments difficulties within the meaning of Article XVIIII:9. The Panel rejected India's arguments:

> "The text of paragraph 13 of the Understanding itself does not specify whether the balance-of-payments difficulties which justified the imposition of the measures should still be in existence when a time schedule is presented for their elimination. However, the notion of presentation of a time-schedule, starting when the balance-of-payments difficulties still exist, is consistent with the temporary nature of balance-of-payments measures and with the requirement for their gradual elimination. Also, the time-schedules referred to in paragraphs 1 and 13 of the 1994 Understanding are the same and paragraph 1 specifies that 'such time-schedules may be modified as appropriate to take into account changes in the balance-of-payments situation.' This suggests that a time-schedule would have to be presented before the balance-of-payments difficulties disappear, otherwise, the reference to 'take into account changes in the balance-of-payments situation' would become redundant.
>
> This does not mean that the General Council has no margin of discretion in deciding whether or not to accept or not a time-schedule that would provide protection to the Member concerned. We have seen that the Ad Note suggests also that measures could, under certain circumstances, be maintained for a time when balance-of-payments difficulties which initially justified their institution are no longer in existence. In addition, paragraph 13 of the 1994 Understanding provides that 'the General Council may recommend that, in adhering to such a time-schedule, a Member *may be deemed* to be in compliance with its GATT 1994 obligations' (emphasis added). There is no clear evidence that this phrase has to be interpreted as covering only situations under which a phase-out period would exactly coincide with the gradual disappearance of balance-of-payments difficulties.
>
> In light of the above, we conclude that the procedure for submission and approval of a time-schedule incorporated in the 1994 Understanding, which is specific to the Committee consultations, does not give WTO Members a 'right' to a phase-out period which a panel would have to protect in the absence of balance-of-payments difficulties in the sense of Article XVIII:B.[687] Even assuming that such a 'right' could be recognised under paragraph 13 of the 1994 Understanding, such a recognition would in any case require a prior decision of the General Council."[688]

(d) Reference to GATT practice

494. With respect to GATT practice concerning Article XVIII:B, see the GATT Analytical Index, pages 501–508.

2. Article XVIII:9

(a) General

495. In *India – Quantitative Restrictions*, the Panel decided that in its evaluation of the situation of India's monetary reserves under Article XVIII:9, it would need to examine the facts existing on the date of its establishment. The Panel gave both legal and practical reasons for not focusing on the situation existing at a later point in time:

---

[686] Panel Report on *India – Quantitative Restrictions*, paras. 5.78–5.80.

[687] (*footnote original*) As we note in our suggestions for implementation, a phase-out period typically has been negotiated (see text accompanying footnotes 366–368).

[688] Panel Report on *India – Quantitative Restrictions*, paras. 5.233–5.235.

"With respect to the date at which India's balance-of-payments and reserve situation is to be assessed, we note that practice, both prior to the WTO and since its entry into force, limits the claims which panels address to those raised in the request for establishment of the panel, which is typically the basis of the panel's terms of reference (as is the case here).[689] In our opinion, this has consequences for the determination of the facts that can be taken into account by the Panel, since the complainant obviously bases the claims contained in its request for establishment of the panel on a given set of facts existing when it presents its request to the DSB.

In the present situation, the United States primarily seeks a finding that, at the latest on the date of establishment of the Panel (18 November 1997), the measures at issue were not compatible with the WTO Agreement and were not justified under Article XVIII:11 of GATT 1994. Therefore, it would seem consistent with such a request and logical in the light of the constraints imposed by the Panel's terms of reference to limit our examination of the facts to those existing on the date the Panel was established.

This result is also dictated by practical considerations. The determination of whether balance-of-payments measures are justified is tied to a Member's reserve situation as of a certain date. In fixing that date, it is important to consider that the relevant economic and reserve data will be available only with some time-lag, which may vary by type of data. This is unlikely to be a problem if the date of assessment is the date the panel is established, since the first written submission is typically filed at least two (and often more) months after establishment of a panel. However, using the first or second panel meetings as the assessment date is more problematic since data might not be available and, if the date of the second panel meeting were chosen, it could significantly reduce the utility of the first meeting.

We note that, in the case on *Korea – Beef*, the panel relied on the conclusions of the BOP Committee reached before its establishment, but also considered 'all available information', including information related to periods after the establishment of the panel.[690] In this case, the parties and the IMF have supplied information concerning the evolution of India's balance-of-payments and reserve situation until June 1998. To the extent that such information is relevant to our determination of the consistency of India's balance-of-payments measures with GATT rules as of the date of establishment of the Panel, we take it into account.[691]"[692]

(b) Article XVIII:9(a)

496. In *India – Quantitative Restrictions*, the Panel examined whether the Indian balance-of-payments measure met with the conditions set out in subparagraph (a) of Article XVIII:9. The Panel first made a general statement about its analytical approach and then held that it would consider the "adequacy" of India's reserves for the purposes of both Article XVIII:9(a) and XVIII:9(b):

"The issue to be decided under Article XVIII:9 (a) is whether India's balance-of-payments measures exceeded those 'necessary . . . to forestall the threat of, or to stop, a serious decline in monetary reserves'. In deciding this issue, we must weigh the evidence favouring India against that favouring the United States and determine whether on the basis of all evidence before the Panel, the United States has established its claim under Article XVIII:11 that India does not meet the conditions specified in Article XVIII:9(a).

. . .

The question before us is whether India was facing a serious decline or threat thereof in its reserves (Article XVIII:9(a)) or had inadequate reserves (Article XVIII:9(b)). In analyzing India's situation in terms of Article XVIII:9(a), it is important to bear in mind that the issue is whether India was facing or threatened with a *serious* decline in its monetary reserves. Whether or not a decline of a given size is serious or not must be related to the initial state and adequacy of the reserves. A large decline need not necessarily be a serious one if the reserves are more than adequate. Accordingly, it is appropriate to consider the adequacy of India's reserves for purposes of Article XVIII:9(a), as well as for Article XVIII:9(b)."[693]

497. The Panel on *India – Quantitative Restrictions* then considered information supplied by the International Monetary Fund (IMF), which indicated the level of reserves which could be considered "adequate" for India:

"In this connection, we recall that the IMF reported that India's reserves as of 21 November 1997 were US$ 25.1 billion and that an adequate level of reserves at that date would have been US$ 16 billion. While the Reserve Bank of India did not specify a precise level of what would constitute adequacy, it concluded only three months earlier in August 1997 that India's reserves were 'well above the thumb rule of reserve adequacy' and although the Bank did not accept that thumb rule as the only measure of adequacy, it also found that '[b]y any criteria, the level of foreign exchange reserves appears comfortable'. It

[689] (*footnote original*) Appellate Body Report on *EC – Bananas III*, para. 143 and Appellate Body Report on *India – Patent (US)*, paras. 87–89.

[690] (*footnote original*) Panel Report on *Korea – Beef (US)*, paras. 122–123.

[691] (*footnote original*) We note for instance that such information might be relevant to an examination of the existence of a threat of serious decline in monetary reserves under Article XVIII:9 or to an examination of the conditions contemplated in the Note Ad Article XVIII:11.

[692] Panel Report on *India – Quantitative Restrictions*, paras. 5.160–5.163.

[693] Panel Report on *India – Quantitative Restrictions*, paras. 5.169 and 5.173.

also stated that 'the reserves would be adequate to withstand both cyclical and unanticipated shocks'.

. . .

Turning now to the question of whether India was facing a serious decline or threat thereof in its reserves, it is appropriate to consider the evolution of its reserves in the period prior to November 1997. As noted above, as of 31 March 1996, India's reserves were US$17 billion; as of 31 March 1997, India's reserves were US$22.4 billion. We note that at the time of the BOP Committee's consultations with India in January and June 1997, the IMF reported that India did not face a serious decline in its reserves or a threat thereof. As of 21 November 1997, India's reserves had risen to US$25.1 billion and the IMF continued to be of the view that India did not face a serious decline in its reserves or a threat thereof. In our view, in light of the foregoing evidence, and taking into account the provisions of Article XV:2, as of the date of establishment of the Panel, India was not facing a serious decline or a threat of a serious decline in monetary reserves as those terms are used in Article XVIII:9(a). In the event that it might be deemed relevant to add support to our findings concerning India's reserves as of November 1997, we have also examined the evolution of India's reserves after November 1997. We note that India's reserves fluctuated around the November level in subsequent months, falling to a low of US$23.9 billion in December 1997 and rising to a high of US$26.2 billion in April 1998. They were US$24.1 billion as of the end of June 1998."[694]

3. Article XVIII:11

(a) Burden of proof

498. In *India – Quantitative Restrictions*, citing its statement in *US – Wool Shirts and Blouses*[695], the Appellate Body agreed with the Panel that it is for the responding party to demonstrate that the complaining party violated its obligation not to require the responding party to change its development policy:

"The proviso precludes a Member, which is challenging the consistency of balance-of-payments restrictions, from arguing that such restrictions would be unnecessary if the developing country Member maintaining them were to change its development policy. In effect, the proviso places an obligation on Members not to require a developing country Member imposing balance-of-payments restrictions to change its development policy.

. . .

We consider that the invocation of the proviso to Article XVIII:11 does not give rise to a burden of proof issue insofar as it relates to the interpretation of what policies may constitute a 'development policy' within the meaning of the proviso. However, we do not exclude the possibility that a situation might arise in which an assertion regarding development policy does involve a burden of proof issue. Assuming that the complaining party has successfully established a *prima facie* case of inconsistency with Article XVIII:11 and the Ad Note, the responding party may, in its defence, either rebut the evidence adduced in support of the inconsistency or invoke the proviso. In the latter case, it would have to demonstrate that the complaining party violated its obligation not to require the responding party to change its development policy. This is an assertion with respect to which the responding party must bear the burden of proof. We, therefore, agree with the Panel that the burden of proof with respect to the proviso is on India."[696]

499. On the issue of the allocation of the burden of proof with respect to the *Ad* Note to the United States, India argued that the Panel had not applied the rules in accordance with the principles laid down by the Appellate Body in *EC – Hormones*.[697] Specifically, India objected to the fact that the Panel had taken into account the responses of India in its assessment regarding whether the United States had made a prima facie case. The Appellate Body did not share India's view:

"We do not interpret the . . . statement as requiring a panel to conclude that a *prima facie* case is made before it considers the views of the IMF or any other experts that it consults. Such consideration may be useful in order to determine whether a *prima facie* case has been made. Moreover, we do not find it objectionable that the Panel took into account, in assessing whether the United States had made a *prima facie* case, the responses of India to the arguments of the United States. This way of proceeding does not imply, in our view, that the Panel shifted the burden of proof to India."[698]

---

[694] Panel Report on *India – Quantitative Restrictions*, paras. 5.174 and 5.177.

[695] Appellate Body Report on *US – Wool Shirts and Blouses* p.14. With respect to burden of proof in general, see Chapter on *DSU*, Section XXXVI.D.

[696] Appellate Body Report on *India – Quantitative Restrictions*, paras. 134 and 136.

[697] India cited the following finding:

> "In accordance with our ruling in *United States – Shirts and Blouses*, the Panel should have begun the analysis of each legal provision by examining whether the United States and Canada had presented evidence and legal instruments sufficient to demonstrate that the EC measures were inconsistent with the obligations assumed by the European Communities under each article of the *SPS Agreement* addressed by the Panel. . . . Only after such a *prima facie* determination had been made by the Panel may the onus be shifted to the European Communities to bring forward evidence and arguments to disprove the complaining party's claim."

Appellate Body Report on *EC – Hormones*, para. 109.

[698] Appellate Body Report on *India – Quantitative Restrictions*, para. 142. With respect to the burden of proof in general, see also the Chapter on *DSU*, Section XXXVI.D.

(b) Note *Ad* Article XVIII:11

(i) General

500. The Panel on *India – Quantitative Restrictions*, in a finding not reviewed by the Appellate Body, addressed the question whether Note *Ad* Article XVIII:11 permitted India to maintain balance-of-payments restrictions which did not meet the requirements of Article XVIII:9. India argued that it should not be required to remove its quantitative restrictions immediately, even if it were found that it currently did not experience balance-of-payments difficulties within the meaning of Article XVIII:9, because immediate removal would create the conditions for their reinstitution within the meaning of Note *Ad* Article XVIII:11. The Panel held that three questions had to be addressed in this context: namely (a) whether the Ad Note covered situations where the conditions of Article XVIII:9 were no longer met; (b) what conditions must be met in order to allow for the maintenance of measures under the *Ad* Note; and (c) whether these conditions were met in the present case. With respect to the first question – namely, whether the *Ad* Note covered situations where the conditions of Article XVIII:9 were no longer met – the Panel considered the wording of the *Ad* Note:

> "It seems clear to us that the use of the word 'respectively' in this provision allows the sentence to be read to refer to two situations, so that the second sentence of paragraph 11 should not be interpreted to mean (i) that a Member is required to relax restrictions if such relaxation would thereupon produce conditions justifying the intensification of restrictions under paragraph 9 of Article XVIII or (ii) that a Member is required to remove restrictions if such removal would thereupon produce conditions justifying the institution of restrictions under paragraph 9 of Article XVIII.
>
> The ordinary meaning of the words therefore suggests that the Ad Note could cover situations where the conditions of Article XVIII:9 are no longer met but are threatened. This would make it possible for a developing country having validly instituted measures for balance-of-payments purposes and whose situation has sufficiently improved so that the conditions of Article XVIII:9 are no longer fulfilled, not to eliminate the remaining measures if this would result in the reoccurrence of the conditions which had justified their institution in the first place."[699]

501. Having found that the ordinary meaning of the words of Note *Ad* Article XVIII:11 could extend to situations where the conditions of Article XVIII:9 no longer exist, but are threatened, the Panel considered also the context of the Ad Note and the notion of "gradual relaxation":

> "This appears consistent with the context of the provision, in particular with the general requirement of gradual relaxation of measures as balance-of-payments conditions improve, under Article XVIII:11. The notion of 'gradual relaxation' contained in Article XVIII:11 should itself be read in context, together with Article XVIII:9. Article XVIII:9 requires that the measures taken shall not 'exceed those necessary' to address the balance-of-payments situation justifying them. The institution and maintenance of balance-of-payments measures is only justified at the level necessary to address the concern, and cannot be more encompassing. Paragraph 11, in this context, confirms this requirement that the measures be limited to what is necessary and addresses more specifically the conditions of evolution of the measures as balance-of-payments conditions improve: at any given time, the restrictions should not exceed those necessary. This implies that as conditions improve, measures must be relaxed in proportion to the improvements. The logical conclusion of the process is that the measures will be eliminated when conditions no longer justify them.
>
> The Ad Note clarifies that the relaxation or removal should not result in a worsening of the balance-of-payments situation such as to justify strengthened or new measures. It thus seeks to avoid a situation where a developing country would be required to remove the measures, foreseeing that in doing so, it will create the conditions for their reinstitution. In light also of the need to restore equilibrium of the balance-of-payments on a sound and lasting basis, acknowledged in the first sentence of Article XVIII:11, it appears that removal should be made when the conditions actually allow for it. In this sense, we can agree with India that the developing country Member applying the measures is not required to follow a 'stop-and-go' policy. It is worth noting, however, that in circumstances where the balance-of-payments situation has gradually improved, if measures have been gradually relaxed as conditions improved under the terms of Article XVIII:11 and maintained only to the extent necessary under the terms of Article XVIII:9, it could be anticipated that only a minor portion of the measures initially instituted would remain to be removed by the time the balance-of-payments conditions have improved to the extent that the country faces neither a serious decline in monetary reserves or a threat thereof, or inadequate reserves. The elimination of these measures would thus constitute the final stage of a gradual relaxation and elimination.
>
> We therefore conclude that the Note Ad Article XVIII:11 could apply to both situations where balance-of-payments difficulties still exist and when they have ceased to exist but are threatened to return. It is therefore possible for India to invoke the existence of such risk in order to justify the maintenance of the measures. However, this possibility is available only to the extent that the conditions foreseen in the Ad Note are fulfilled. We must therefore determine what these conditions are

[699] Panel Report on *India – Quantitative Restrictions*, paras. 5.188–5.189.

before examining whether they are fulfilled in this instance."[700]

502. Having answered the first of the three questions listed in paragraph 500 above, the Panel then turned to the second question, namely which conditions had to be satisfied for a measure to be justified in the light of Note *Ad* Article XVIII:11, although the conditions under Article XVIII:9 were no longer met. The Panel gave the following overview:

"Three elements thus appear to be contemplated in this text:

(i) that conditions justifying the intensification or institution, respectively, of restrictions under paragraph 9 of Article XVIII would occur

(ii) that the relaxation or removal of the measures *would produce* occurrence of these conditions

(iii) that the relaxation or removal would *thereupon* produce these conditions."[701]

(ii) "would produce"

503. In its analysis of the conditions which a balance-of-payment measure, imposed by a developing country, had to comply with in the light of Note *Ad* Article XVIII:11, the Panel on *India – Quantitative Restrictions* first addressed the term "would . . . produce":

"We agree with the Panel that the Ad Note, and, in particular, the words 'would thereupon produce', require a *causal link of a certain directness* between the removal of the balance-of-payments restrictions and the recurrence of one of the three conditions referred to in Article XVIII:9. As pointed out by the Panel, the Ad Note demands more than a mere possibility of recurrence of one of these three conditions and allows for the maintenance of balance-of-payments restrictions on the basis only of clearly identified circumstances. In order to meet the requirements of the Ad Note, the probability of occurrence of one of the conditions would have to be clear."[702]

(iii) "thereupon"

504. With respect to the term "thereupon" in the phrase "would thereupon produce", the Appellate Body in *India – Quantitative Restrictions* rejected India's argument that the Panel had erred in interpreting the term "thereupon" contained in Note Ad Article XVIII:11 to signify "immediately":

"We also agree with the Panel that the Ad Note and, in particular, the word 'thereupon', expresses a *notion of temporal sequence* between the removal of the balance-of-payments restrictions and the recurrence of one of the conditions of Article XVIII:9. We share the Panel's view that the purpose of the word 'thereupon' is to ensure that measures are not maintained because of some distant possibility that a balance-of-payments difficulty may occur.

. . .

We recall that balance-of-payments restrictions may be maintained under the Ad Note if their removal or relaxation would thereupon produce: (i) a threat of a serious decline in monetary reserves; (ii) a serious decline in monetary reserves; *or* (iii) inadequate monetary reserves. With regard to the first of these conditions, we agree with the Panel that the word 'thereupon' means 'immediately'.

. . .

We agree with the Panel that it would be unrealistic to require that [the two other conditions, i.e.] a serious decline or inadequacy in monetary reserves should actually occur within days or weeks following the relaxation or removal of the balance-of-payments restrictions. The Panel was, therefore, correct to qualify its understanding of the word 'thereupon' with regard to these two conditions. While not explicitly stating so, the Panel in fact interpreted the word 'thereupon' for these two conditions as meaning 'soon after'. This is also one of the possible dictionary meanings of the word 'thereupon'. We are of the view that instead of using the word 'immediately', the Panel should have used the words 'soon after' to express the temporal sequence required by the word 'thereupon'."[703]

(c) Proviso to Article XVIII:11

505. In *India – Quantitative Restrictions*, the Appellate Body rejected India's argument that, contrary to the proviso to Article VIII:11, the Panel required India to change its development policy by holding that India could manage its balance-of-payments situation using macroeconomic policy instruments alone, without maintaining quantitative restrictions:

"[W]e are of the opinion that the use of macroeconomic policy instruments is not related to any particular development policy, but is resorted to by all Members regardless of the type of development policy they pursue. The IMF statement that India can manage its balance-of-payments situation using macroeconomic policy instruments alone does not, therefore, imply a change in India's development policy.

. . .

We believe structural measures are different from macroeconomic instruments with respect to their rela-

[700] Panel Report on *India – Quantitative Restrictions*, paras. 5.190–5.192.
[701] Panel Report on *India – Quantitative Restrictions*, para. 5.194.
[702] Appellate Body Report on *India – Quantitative Restrictions*, para. 114.
[703] Appellate Body Report on *India – Quantitative Restrictions*, paras. 115, 117 and 119.

tionship to development policy. If India were asked to implement agricultural reform or to scale back reservations on certain products for small-scale units as indispensable policy changes in order to overcome its balance-of-payments difficulties, such a requirement would probably have involved a change in India's development policy."[704]

4. Article XVIII:12

(a) Article XVIII:12(c)

506. The Panel on *India – Quantitative Restrictions* discussed Article XVIII:12(c)(i) and (ii) in rejecting India's argument that panels have no authority to evaluate Members' balance-of-payments justifications. See the excerpt referenced in paragraph 492 above.[705]

507. Further, the Panel rejected India's argument that Article XVIII:12(c)(ii) confirms the existence of a right to a phase-out for measures no longer justified by current balance-of-payments difficulties, stating as follows:

"We note that Article XVIII.12(c)(ii), provides a specific mechanism in order for the BOP Committee to address possible violations of the provisions of, *inter alia*, Article XVIII:B and provides for a period of time to be granted to the Member in order to implement the requirement to remove or modify the inconsistent measures. In the situation envisaged by Article XVIII:12(c)(ii), a period of time is granted when an inconsistency with the provisions of either Article XVIII:B or Article XIII has been identified. The period of time which is allocated to the Member in order to bring its measures into conformity is thus comparable, but not identical, to an implementation period of the sort provided for in Article 21.3 of the DSU. However, this specific mode of determination of the 'implementation' period applies to procedures initiated under Article XVIII:12(c), which is not the procedure under which this Panel is acting. We consider the issue of whether a phase-out would be appropriate in this case in our suggestions in respect of implementation, where we note this provision of Article XVIII:12(c)(ii)."[706]

5. Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994

(a) General

508. The Panel on *India – Quantitative Restrictions*, in a finding not addressed by the Appellate Body, explained the legal status of the BOP Understanding in relation to Articles XII and XVIII of *GATT 1994*:

"[The text of Article XVIII:B] should now be read in light of the 1994 Understanding, which clarifies the provisions of Articles XII and XVIII:B and of the 1979 Decision. The 1994 Understanding, which refers to the procedures for balance-of-payments consultations adopted in 1970 ('full consultation procedures') and 1972 ('simplified consultation procedures') as well as the 1979 Decision, contains provisions on the application of balance-of-payments measures, as well as provisions relating to the procedures for balance-of-payments consultations and their conclusion, but it does not explicitly refer to Articles XVIII:12(c) and (d)."[707]

(b) Footnote 1

509. The Appellate Body, in *India – Quantitative Restrictions*, referred to footnote 1 of the BOP Understanding in considering a panel's authority to examine the conformity with the *WTO Agreement* of Members' measures taken for balance-of-payments purposes. See the excerpts referenced in paragraphs 489–491 above.

(c) Paragraph 1

510. In *India – Quantitative Restrictions*, India argued that paragraphs 1 and 13 of the Understanding provide an incentive for Members to present a time-schedule for removal even when there are no current balance-of-payments difficulties within the meaning of Article XVIII:9, thereby confirming the existence of a "right" to a phase-out even in the absence of current balance-of-payments difficulties within the meaning of Article XVIIII:9. The Panel rejected this argument. See the excerpt referenced in paragraph 493 above.

(d) Paragraph 5

(i) Committee on Balance-of-Payments Restrictions

Establishment of Committee

511. At its meeting of 31 January 1995, the General Council established the WTO Committee on Balance-of-Payments Restrictions.[708]

Terms of reference

512. At its meeting of 31 January 1995, the General Council adopted the following terms of reference for the Committee on the Balance-of-Payments Restrictions:

"(a) to conduct consultations, pursuant to Article XII:4, Article XVIII:12 and the Understanding on the Balance-of-Payments Provisions of the General Agreement on Tariffs and Trade 1994, on all restrictive import measures taken or maintained for balance-of-payments purposes and, pursuant to Article XII:5 of the General Agreement

[704] Appellate Body Report on *India – Quantitative Restrictions*, paras. 126 and 128.
[705] With respect to the relevant finding of the Appellate Body in *India – Quantitative Restrictions*, see the excerpts referenced in para. 489 of this Chapter.
[706] Panel Report on *India – Quantitative Restrictions*, para. 5.227.
[707] Panel Report on *India – Quantitative Restrictions*, para. 5.48.
[708] WT/GC/M/1, section 7.A.(1).

on Trade in Services, on all restrictions adopted or maintained for balance-of-payments purposes on trade in services on which specific commitments have been undertaken; and

(b) to carry out any additional functions assigned to it by the General Council."[709]

Rules of procedure

513. At its meeting of 13 and 15 December 1995, the General Council approved the rules of procedure adopted by the Committee on the Balance-of-Payments Restrictions.[710]

Observer status

514. At its meeting of 13 and 15 December 1995, the General Council took a decision with respect to participation in the meetings of the Committee on the Balance-of-Payments Restrictions.[711]

(e) Paragraph 9

515. At its meeting of 21 October 1996, the Committee on the Balance-of-Payments Restrictions adopted the format for the annual notification mandated under Paragraph 9 of the Understanding.[712] In order for the Committee on the Balance-of-Payments Restrictions to have a basis for the following year's schedule of consultations, it was proposed that notifications be completed and submitted to the Secretariat annually by 15 November.[713]

(f) Paragraph 13

(i) Interpretation

516. In *India – Quantitative Restrictions*, India argued that paragraphs 1 and 13 of the Understanding provide an incentive for Members to present a time-schedule for removal even when there are no current balance-of-payments difficulties within the meaning of Article XVIII:9, thereby confirming the existence of a "right" to a phase-out even in the absence of current balance-of-payments difficulties within the meaning of Article XVIIII:9. The Panel rejected this argument. See the excerpt referenced in paragraph 493 above.

(ii) Reporting procedures

517. At its meeting of 15 November 1995, the General Council adopted, *inter alia*, the following procedure for reporting for the Committee on Balance-of-Payment Restrictions to the General Council:

"The Committees on Budget, Finance and Administration and on Balance-of-Payments Restrictions will also submit, in addition to reports submitted during the course of the year on specific issues, a short factual report at the end of the year."[714]

E. RELATIONSHIP WITH OTHER ARTICLES

1. Articles XI, XIII, XIV and XVII

518. The interpretation and application of Note *Ad* Article XI, XII, XIII, XIV and XVIII, which clarifies that the terms "import restrictions" or "export restrictions" as used in these Articles include "restrictions made effective through state-trading operations", was discussed by the Panels on *India – Quantitative Restrictions* and *Korea – Various Measures on Beef*. See paragraphs 407–408 above.

2. Article XII

519. In *India – Quantitative Restrictions*, the Panel explained the relationship between Articles XII and XVIII:B in clarifying the function of Article XVIII:B. See paragraph 488 above.

3. Reference to GATT practice

520. With respect to GATT practice on this subject-matter, see the GATT Analytical Index, page 511.

XX. ARTICLE XIX

A. TEXT OF ARTICLE XIX

Article XIX
Emergency Action on Imports of Particular Products

1. (*a*) If, as a result of unforeseen developments and of the effect of the obligations incurred by a contracting party under this Agreement, including tariff concessions, any product is being imported into the territory of that contracting party in such increased quantities and under such conditions as to cause or threaten serious injury to domestic producers in that territory of like or directly competitive products, the contracting party shall be free, in respect of such product, and to the extent and for such time as may be necessary to prevent or remedy such injury, to suspend the obligation in whole or in part or to withdraw or modify the concession.

(*b*) If any product, which is the subject of a concession with respect to a preference, is being imported into the territory of a contracting party in the circumstances set forth in subparagraph (*a*) of this paragraph, so as to cause or threaten serious injury to domestic producers of like or directly competitive products in the territory of a contracting party which receives or received such preference, the importing contracting party shall be

[709] WT/GC/M/1, section 7.A.(1). The adopted terms of reference can be found in WT/L/45.
[710] WT/GC/M/1, section 4. I. (a). The approved rules of procedure can be found in WT/BOP/10.
[711] WT/GC/M/1, section 2.
[712] WT/BOP/14.
[713] WT/BOP/14.
[714] WT/L/105, section 2.

free, if that other contracting party so requests, to suspend the relevant obligation in whole or in part or to withdraw or modify the concession in respect of the product, to the extent and for such time as may be necessary to prevent or remedy such injury.

2. Before any contracting party shall take action pursuant to the provisions of paragraph 1 of this Article, it shall give notice in writing to the CONTRACTING PARTIES as far in advance as may be practicable and shall afford the CONTRACTING PARTIES and those contracting parties having a substantial interest as exporters of the product concerned an opportunity to consult with it in respect of the proposed action. When such notice is given in relation to a concession with respect to a preference, the notice shall name the contracting party which has requested the action. In critical circumstances, where delay would cause damage which it would be difficult to repair, action under paragraph 1 of this Article may be taken provisionally without prior consultation, on the condition that consultation shall be effected immediately after taking such action.

3. (*a*) If agreement among the interested contracting parties with respect to the action is not reached, the contracting party which proposes to take or continue the action shall, nevertheless, be free to do so, and if such action is taken or continued, the affected contracting parties shall then be free, not later than ninety days after such action is taken, to suspend, upon the expiration of thirty days from the day on which written notice of such suspension is received by the CONTRACTING PARTIES, the application to the trade of the contracting party taking such action, or, in the case envisaged in paragraph 1 (*b*) of this Article, to the trade of the contracting party requesting such action, of such substantially equivalent concessions or other obligations under this Agreement the suspension of which the CONTRACTING PARTIES do not disapprove.

(*b*) Notwithstanding the provisions of subparagraph (*a*) of this paragraph, where action is taken under paragraph 2 of this Article without prior consultation and causes or threatens serious injury in the territory of a contracting party to the domestic producers of products affected by the action, that contracting party shall, where delay would cause damage difficult to repair, be free to suspend, upon the taking of the action and throughout the period of consultation, such concessions or other obligations as may be necessary to prevent or remedy the injury.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIX

1. General

(a) Application of Article XIX

521. In *Argentina – Footwear (EC)* and *Korea – Dairy*[715], the Appellate Body held that "any safeguard measure[716] imposed after the entry into force of the *WTO Agreement* must comply with the provisions of *both* the *Agreement on Safeguards and* Article XIX of the GATT 1994".[717] As regards the relationship between Article XIX and the *Agreement on Safeguards*, see paragraphs 566–572 below.

522. In *Korea – Dairy*, the Appellate Body concluded that safeguard measures were "intended by the drafters of the GATT to be matters out of the ordinary, and to be matters of urgency, to be, in short, 'emergency actions'"[718].

523. The Appellate Body on *Argentina – Footwear (EC)* noted that the remedy provided by Article XIX is of an emergency character and is to be "invoked only in situations when, as a result of obligations incurred under the *GATT 1994*, a Member finds itself confronted with developments it had not "foreseen" or "expected" when it incurred that obligation":

> "As part of the context of paragraph 1(a) of Article XIX, we note that the title of Article XIX is: '*Emergency Action on Imports of Particular Products*'. The words 'emergency action' also appear in Article 11.1(a) of the *Agreement on Safeguards*. We note once again, that Article XIX:1(a) requires that a product be imported '*in such increased quantities* and *under such conditions* as *to cause or threaten serious injury* to domestic producers'. (emphasis added) Clearly, this is not the language of ordinary events in routine commerce. In our view, the text of Article XIX:1(a) of the GATT 1994, read in its ordinary meaning and in its context, demonstrates that safeguard measures were intended by the drafters of the GATT to be matters out of the ordinary, to be matters of urgency, to be, in short, 'emergency actions.' And, such 'emergency actions' are to be invoked only in situations when, as a result of obligations incurred under the GATT 1994, a Member finds itself confronted with developments it had not 'foreseen' or 'expected' when it incurred that obligation. The remedy that Article XIX:1(a) allows in this situation is temporarily to 'suspend the obligation in whole or in part or to withdraw or modify the concession'. Thus, Article XIX is clearly, and in every way, an extraordinary remedy."[719]

524. After finding support for its approach in the context of the relevant provisions, the Appellate Body in *Argentina – Footwear (EC)* held that the object and purpose of Article XIX also confirmed its interpretation:

---

[715] Both Reports were adopted on the same date, 12 July 2000

[716] (*footnote original*) With the exception of special safeguard measures taken pursuant to Article 5 of the *Agreement on Agriculture* or Article 6 of the *Agreement on Textiles and Clothing*.

[717] Appellate Body Report on *Argentina – Footwear (EC)*, para. 84 and Appellate Body Report on *Korea – Dairy*, paras. 76–77. See also Chapter on *Agreement on Safeguards*, paras. 4–7.

[718] Appellate Body Report on *Korea – Dairy*, para. 86.

[719] Appellate Body Report on *Argentina – Footwear (EC)*, para. 93. See also Appellate Body Report on *Korea – Dairy*, para. 86.

"This reading of these phrases is also confirmed by the object and purpose of Article XIX of the GATT 1994. The object and purpose of Article XIX is, quite simply, to allow a Member to re-adjust temporarily the balance in the level of concessions between that Member and other exporting Members when it is faced with 'unexpected' and, thus, 'unforeseen' circumstances which lead to the product 'being imported' in 'such increased quantities and under such conditions as to cause or threaten serious injury to domestic producers of like or directly competitive products'. In perceiving and applying this object and purpose to the interpretation of this provision of the *WTO Agreement*, it is essential to keep in mind that a safeguard action is a 'fair' trade remedy. The application of a safeguard measure does not depend upon 'unfair' trade actions, as is the case with anti-dumping or countervailing measures. Thus, the import restrictions that are imposed on products of exporting Members when a safeguard action is taken must be seen, as we have said, as extraordinary. And, when construing the prerequisites for taking such actions, their extraordinary nature must be taken into account."[720]

525. In *US – Line Pipe*, the Appellate Body emphasized that the balance struck by WTO Members in reconciling the natural tension relating to safeguard measures is found in the provisions of the *Agreement on Safeguards*. The Appellate Body further articulated on this tension:

"[P]art of the *raison d'être* of Article XIX of the GATT 1994 and the *Agreement on Safeguards* is, unquestionably, that of *giving a WTO Member the possibility*, as trade is liberalized, of resorting to an effective remedy in an extraordinary emergency situation *that, in the judgement of that Member, makes it necessary to protect a domestic industry temporarily*.[721] (emphasis added)

There is, therefore, a natural tension between, on the one hand, defining the appropriate and legitimate scope of the right to apply safeguard measures and, on the other hand, ensuring that safeguard measures are not applied against 'fair trade' beyond what is necessary to provide extraordinary and temporary relief. A WTO Member seeking to apply a safeguard measure will argue, correctly, that the *right* to apply such measures must be respected in order to maintain the *domestic* momentum and motivation for ongoing trade liberalization. In turn, a WTO Member whose trade is affected by a safeguard measure will argue, correctly, that the *application* of such measures must be limited in order to maintain the *multilateral* integrity of ongoing trade concessions. *The balance struck by the WTO Members in reconciling this natural tension relating to safeguard measures is found in the provisions of the Agreement on Safeguards.*" (emphasis added)[722]

(b) Standard of review

526. In *US – Steel Safeguards*, the Panel, in a finding upheld by the Appellate Body[723], recalled the standard of review for claims of violation of the unforeseen developments requirement of Article XIX of the *GATT 1994* was that provided for in Article 11 of the *DSU*. The Panel articulated the standard in the following terms:

"[T]he role of this Panel in the present dispute is not to conduct a *de novo* review of the USITC's determination. Rather, the Panel must examine whether the United States respected the provisions of Article XIX of GATT 1994 and of the Agreement on Safeguards, including Article 3.1. As further developed below, the Panel must examine whether the United States demonstrated in its published report, through a reasoned and adequate explanation, that unforeseen developments and the effects of tariff concessions resulted in increased imports causing or threatening to cause serious injury to the relevant domestic producers."[724]

527. The Appellate Body on *US – Steel Safeguards* rejected the United States argument that Article 11 of the *DSU* was not applicable to claims of violation of Article XIX of the *GATT 1994* and added:

"We explained in *US – Lamb*, in the context of a claim under Article 4.2(a) of the *Agreement on Safeguards*, that the competent authorities must provide a '*reasoned and adequate explanation* of how the facts support their determination'.[725] More recently, in *US – Line Pipe*, in the context of a claim under Article 4.2(b) of the *Agreement on Safeguards*, we said that the competent authorities must, similarly, provide a '*reasoned and adequate explanation*, that injury caused by factors other than increased imports is not attributed to increased imports'.[726] Our findings in those cases did not purport to address *solely* the standard of review that is appropriate for claims arising under Article 4.2 of the *Agreement on Safeguards*. We see no reason not to apply the same standard generally to the obligations under the *Agreement on Safeguards* as well as to the obligations in Article XIX of the GATT 1994."[727]

528. The Appellate Body on *US – Steel Safeguards* emphasized that "to the extent that the Panel looked for a 'reasoned and adequate explanation' that was 'explicit' in the sense that it was 'clear and unambiguous' and 'did not merely imply or suggest an explanation', the Panel was, in our view, correctly articulating the appropriate standard of review to be applied in assessing compliance

with Article XIX of the GATT 1994 and the *Agreement on Safeguards*."[728]

2. Article XIX:1

(a) Article XIX:1(a): *as a result of unforeseen developments*

(i) Concept of unforeseen developments

529. In *Argentina – Footwear (EC)*, the Appellate Body pronounced on the meaning of the phrase "as a result of unforeseen developments" which, although not contained in the Agreement on Safeguards, is set forth in Article XIX:1(a). The Appellate Body held that "the developments which led to a product being imported in such increased quantities and under such conditions as to cause or threaten to cause serious injury to domestic producers must have been 'unexpected'":

> "To determine the meaning of the clause – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .' – in sub-paragraph (a) of Article XIX:1, we must examine these words in their ordinary meaning, in their context and in light of the object and purpose of Article XIX.[729] We look first to the ordinary meaning of these words. As to the meaning of 'unforeseen developments', we note that the dictionary definition of 'unforeseen', particularly as it relates to the word 'developments', is synonymous with 'unexpected'.[730] 'Unforeseeable', on the other hand, is defined in the dictionaries as meaning 'unpredictable' or 'incapable of being foreseen, foretold or anticipated'.[731] Thus, it seems to us that the ordinary meaning of the phrase 'as a result of unforeseen developments' requires that the developments which led to a product being imported in such increased quantities and under such conditions as to cause or threaten to cause serious injury to domestic producers must have been 'unexpected'".[732]

530. The Panel on *Argentina – Preserved Peaches* emphasized that increased quantities of imports should not be equated with unforeseen developments.[733] The Panel considered that the competent authority had indicated that "the entry of the imports, or the way in which they were being imported, was unforeseen, but there is no mention that the alleged developments themselves were unforeseen." Therefore the Panel concluded that "a statement that the increase in imports, or the way in which they were being imported, was unforeseen, does not constitute a demonstration as a matter of fact of the existence of unforeseen *developments*."[734]

(ii) Requirement to demonstrate "unforeseen developments"

531. In *Argentina – Footwear (EC)* and *Korea – Dairy*, one of the issues considered by the Panel was the omission of the criterion of "unforeseen developments", contained in Article XIX:1(a) of *GATT 1994*, from the *Agreement on Safeguards*, most notably from Article 2.1. The Panel on *Argentina – Footwear (EC)* found that "the *express omission* of the criterion of unforeseen developments in the [Agreement on Safeguards], (which otherwise transposes, reflects and refines in great detail the essential conditions for the imposition of safeguard measures provided for in Article XIX of GATT), must . . . have meaning".[735] The Panel, in a finding rejected by the Appellate Body, concluded that "safeguard investigations conducted and safeguard measures imposed after the entry into force of the WTO agreements which meet the requirements of the new Safeguards Agreement satisfy the requirements of Article XIX of GATT."[736] The Panel on *Korea – Dairy* reached the same conclusion.[737] The Appellate Body held that the Panel's view was inconsistent with the principles of effective treaty interpretation[738] and with the ordinary meaning of Articles 1 and 11.1(a) of the *Agreement on Safeguards*. See paragraph 569 below.

[731] (*footnote original*) *Ibid.*

[732] Appellate Body Report on *Argentina – Footwear (EC)*, para. 91. See also Appellate Body Report on *Korea – Dairy*, para. 84.

[733] Panel Report on *Argentina – Preserved Peaches*, para. 7.18.

[734] Panel Report on *Argentina – Preserved Peaches*, para. 7.24. In addition the Panel did not agree with "the statement by the Appellate Body in *Argentina – Footwear (EC)* that 'the increased quantities of imports should have been "unforeseen" or "unexpected"'." (See original footnote 484). The Panel was of the view that "the text of Article XIX:1(a), together with the Appellate Body's own discussion of it and earlier conclusion regarding the logical connection between the circumstances in the first clause of Article XIX:1(a) – including unforeseen developments – and the conditions in the second clause – including an increase in imports – show that this is not a requirement for the imposition of a safeguard measure." See Panel Report on *Argentina – Preserved Peaches*, para. 7.24. However, it should be noted here that in *US – Steel Safeguards*, the Appellate Body reaffirmed its statement and concluded that "because the 'increased imports' must be 'as a result' of an event that was 'unforeseen' or 'unexpected', it follows that the increased imports must also be 'unforeseen' or 'unexpected'." See Appellate Body Report on *US – Steel Safeguards*, para. 350.

[737] Panel Report on *Korea – Dairy*, para. 7.48.

[738] With respect to treaty interpretation in general, see Chapter on the *DSU*, Section III.B.1.

532. In *US – Lamb*, the Appellate Body ruled that the existence of "unforeseen developments" is a "pertinent issue of fact and law" under Article 3.1 of the *Agreement on Safeguards*, and "it follows that the published report of the competent authorities, under that Article, must contain a 'finding' or 'reasoned conclusion' on unforeseen developments"[739]:

> "[W]e observe that Article 3.1 requires competent authorities to set forth findings and reasoned conclusions on 'all pertinent issues of fact and law' in their published report. As Article XIX:1(a) of the GATT 1994 requires that 'unforeseen developments' must be demonstrated as a matter of fact for a safeguard measure to be applied the existence of 'unforeseen developments' is, in our view, a 'pertinent issue[] of fact and law', under Article 3.1, for the application of a safeguard measure, and it follows that the published report of the competent authorities, under that Article, must contain a 'finding' or 'reasoned conclusion' on 'unforeseen developments.'"[740]

533. In *Chile – Price Band System*, the Panel referred to the Appellate Body's conclusions in *US – Lamb* that "unforeseen developments" is a circumstance whose existence must be demonstrated as a matter of fact and must feature in the published report of the investigating authorities.[741] The Panel also ruled that an *ex post facto* explanation cannot cure the importing Member's failure to meet the requirement of demonstrating "unforeseen development".[742]

534. In *Argentina – Preserved Peaches*, the Panel concluded that in order to satisfy the requirement to demonstrate "unforeseen developments", "as a minimum, some discussion should be done by the competent authorities as to why they were unforeseen at the appropriate time, and why conditions in the second clause of Article XIX:1(a) occurred 'as a result' of circumstances in the first clause."[743]

535. In *Argentina – Preserved Peaches*, the competent investigating authority had referred to unforeseen developments only in its final conclusion, the Panel held that this was insufficient:

> "A mere phrase in a conclusion, without supporting analysis of the existence of unforeseen developments, is not a substitute for a demonstration of fact. The failure of the competent authorities to demonstrate that certain alleged developments were unforeseen in the foregoing section of their report is not cured by the concluding phrase."[744]

536. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, reiterated that unforeseen developments must be demonstrated in a report before the measure is actually applied:

> "Given that the demonstration of unforeseen developments is a prerequisite for the application of a safeguard measure[745], it cannot take place after the date as of which the safeguard measure is applied. This has been confirmed by the Appellate Body, which noted, in *US – Lamb,* that although Article XIX provides no express guidance on where and when the demonstration of unforeseen developments is to be made, it is nonetheless a prerequisite, and 'it follows that this demonstration must be made *before* the safeguard measure is applied. Otherwise, the legal basis for the measure is flawed.'[746] Any demonstration made after the start of the application of a safeguard measure would have to be disregarded automatically as it cannot afford legal justification for that measure."[747]
>
> "[S]uch a reasoned and adequate explanation of how unforeseen developments resulted in increased imports causing serious injury must form part of the overall reported explanation by the competent authority that it has satisfied all the WTO prerequisites for the imposition of a safeguard measure. Since the demonstration of unforeseen developments must be included in the published report of the competent authorities it is necessary to look for the demonstration of unforeseen developments in the 'report of the competent authority', completed and published prior to the application of the safeguard measures."[748]

537. The Appellate Body on *US – Steel Safeguards* pointed out that the competent authority must provide a "reasoned and adequate explanation" of how the facts support its determination for those prerequisites, including "unforeseen developments" under Article XIX:1(a) of the *GATT 1994*:

> "We do not see how a panel could examine objectively the consistency of a determination with Article XIX of the GATT 1994 if the competent authority had not set out an explanation supporting its conclusions on 'unforeseen developments'. Indeed, to enable a panel to determine whether there was compliance with the prerequisites that must be demonstrated before the application of a safeguard measure, the competent authority must provide a 'reasoned and adequate explanation' of how the facts support its determination for those prerequisites, including 'unforeseen developments' under Article XIX:1(a) of the GATT 1994."[749]

[747] Panel Report on *US – Steel Safeguards*, para. 10.52
[748] Panel Report on *US – Steel Safeguards*, para. 10.53
[749] Appellate Body Report on *US – Steel Safeguards*, para. 279.

538. The Appellate Body on *US – Steel Safeguards*, upheld the Panel's finding that each challenged measure must have been the object of a specific unforeseen development demonstration and also that the factual demonstration of unforeseen developments must also relate to the specific product(s) covered by the specific measure(s) at issue:

> "To trigger the right to apply a safeguard measure, the development must be such as to *result* in increased imports of *the product* ('such product') that is subject to the safeguard measure. Moreover, *any* product, as Article XIX:1(a) provides, may, potentially, be subject to that safeguard measure, provided that the alleged 'unforeseen developments' *result* in increased imports of that *specific product* ('such product'). We, therefore, agree with the Panel that, with respect to the specific products subject to the respective determinations, the competent authorities are required by Article XIX:1(a) of the GATT 1994 to demonstrate that the 'unforeseen developments identified . . . have resulted in increased imports [of the specific products subject to] . . . each safeguard measure at issue.'[750]"[751]
>
> "For this reason, when an importing Member wishes to apply safeguard measures on imports of several products, it is not sufficient merely to demonstrate that 'unforeseen developments' resulted in increased imports of a broad category of products that included the specific products subject to the respective determinations by the competent authority. If that could be done, a Member could make a determination and apply a safeguard measure to a broad category of products even if imports of one or more of those products did not increase and did not result from the 'unforeseen developments' at issue. Accordingly, we agree with the Panel that such an approach does not meet the requirements of Article XIX:1(a), and that the demonstration of 'unforeseen developments' must be performed for *each* product subject to a safeguard measure.[752]"[753]

539. In *US – Steel Safeguards*, the Appellate Body agreed with the Panel that "with respect to the specific products subject to the respective determinations, the competent authorities are required by Article XIX:1(a) of the GATT 1994 to demonstrate that the 'unforeseen developments identified . . . have resulted in increased imports [of the specific products subject to] . . . each safeguard measure at issue.'[754]"[755] The Appellate Body further concluded:

> "[W]hen an importing Member wishes to apply safeguard measures on imports of several products, it is not sufficient merely to demonstrate that 'unforeseen developments' resulted in increased imports of a broad category of products that included the specific products subject to the respective determinations by the competent authority. If that could be done, a Member could make a determination and apply a safeguard measure to a broad category of products even if imports of one or more of those products did not increase and did not result from the 'unforeseen developments' at issue. Accordingly, we agree with the Panel that such an approach does not meet the requirements of Article XIX:1(a), and that the demonstration of 'unforeseen developments' must be performed for *each* product subject to a safeguard measure. (Emphasis original)"[756]

540. In *US – Steel Safeguards*, the Appellate Body was of view that it was for competent authorities not for panels to provide a "reasoned conclusion" on "unforeseen developments":

> "A 'reasoned conclusion' is not one where the conclusion does not even refer to the facts that may support that conclusion. As the United States itself acknowledges, 'Article 3.1 thus assigns the competent authorities – not the panel – the obligation to "publish a report setting forth *their* findings and reasoned conclusions reached on all pertinent issues of fact and law".' A competent authority has an obligation under Article 3.1 to provide reasoned conclusions; it is not for panels to find

[750] (*footnote original*) Panel Reports, para. 10.44. (underlining added) In the same vein, we further note that, as China argues in paragraph 49 of its appellee's submission, the USTR had, in fact, asked the USITC in its letter dated 3 January 2002, to identify "for each affirmative determination . . . any unforeseen developments that led to the relevant steel products being imported into the United States in such increased quantities as to be a substantial cause of serious injury." (Letter of the USTR to the USITC dated 3 January 2002, question 1). (underlining added)

[751] Appellate Body Report on *US – Steel Safeguards*, para. 316.

[752] (*footnote original*) We note that the United States also alleges that the Panel "mistakenly indicated that a competent authority had to 'differentiate the impact' of various unforeseen developments on the individual industries and even economies of other countries." (United States' appellant's submission, para. 85, referring to Panel Reports, paras. 10.127–10.128). Based on our review of the Panel Reports, we do not understand the Panel to have imposed such a requirement. Instead, as we see it, the Panel merely observed, in paragraph 10.127, that the Asian and Russian crises affected some countries more than others, to support its view that the USITC was required to "explain how the increased imports of the specific steel products subject to the investigation *were linked to and resulted from* the confluence of unforeseen developments." (emphasis added) Previously, in paragraph 10.123 of the Panel Reports, the Panel had stated that "even if 'large volumes of foreign steel production were displaced from foreign consumption', this [did] not, in itself, imply that *imports to the United States* increased as a result of unforeseen developments." (emphasis added)

[753] Appellate Body Report on *US – Steel Safeguards*, para. 319.

[754] (*footnote original*) Panel Reports, para. 10.44. (underlining added) In the same vein, we further note that, as China argues in paragraph 49 of its appellee's submission, the USTR had, in fact, asked the USITC in its letter dated 3 January 2002, to identify "for each affirmative determination . . . any unforeseen developments that led to the relevant steel products being imported into the United States in such increased quantities as to be a substantial cause of serious injury." (Letter of the USTR to the USITC dated 3 January 2002, question 1). (underlining added)

[755] Appellate Body Report on *US – Steel Safeguards*, paras. 316.

[756] Appellate Body Report on *US – Steel Safeguards*, paras. 319.

support for such conclusions by cobbling together disjointed references scattered throughout a competent authority's report."[757]

Unforeseen developments as describing a set of circumstances

541. The Appellate Body, in *Argentina – Footwear (EC)*, then held that the requirement of "unforeseen developments" did not establish a separate "condition" for the imposition of safeguard measures, but described a certain set of "circumstances":

"When we examine this clause – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .' – in its immediate context in Article XIX:1(a), we see that it relates directly to the second clause in that paragraph – 'If, . . ., any product is being imported into the territory of that Member in such increased quantities and under such conditions as to cause or threaten serious injury to domestic producers in that territory of like or directly competitive products . . .'. The latter, or second, clause in Article XIX:1(a) contains the three *conditions* for the application of safeguard measures. These *conditions*, which are reiterated in Article 2.1 of the *Agreement on Safeguards*[758], are that: (1) a product is being imported 'in such quantities and under such conditions'; (2) 'as to cause'; (3) serious injury or the threat of serious injury to domestic producers. The first clause in Article XIX:1(a) – 'as a result of unforeseen developments and of the obligations incurred by a Member under the Agreement, including tariff concessions . . .' – is a dependent clause which, in our view, is linked grammatically to the verb phrase 'is being imported' in the second clause of that paragraph. Although we do not view the first clause in Article XIX:1(a) as establishing independent *conditions* for the application of a safeguard measure, additional to the *conditions* set forth in the second clause of that paragraph, we do believe that the first clause describes certain *circumstances* which must be demonstrated as a matter of fact in order for a safeguard measure to be applied consistently with the provisions of Article XIX of the GATT 1994. In this sense, we believe that there is a logical connection between the circumstances described in the first clause – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .' – and the conditions set forth in the second clause of Article XIX:1(a) for the imposition of a safeguard measure."[759]

542. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, concluded that the legal standard used to determine what constitutes an unforeseen development may be both subjective and objective:

"The legal standard that is used to determine what constitutes an unforeseen development is, as agreed by the parties, at least in part, subjective. This is supported by the Appellate Body, who stated in *Korea – Dairy* that safeguard measures "are to be invoked only in situations when . . . an importing Member finds itself confronted with developments *it had not 'foreseen' or 'expected'* when *it* incurred [its] obligation [under GATT 1994]. (emphasis added)[760]

What was 'unforeseen' when the contracting parties negotiated their first tariff concessions in all likelihood differs from what can be considered to be unforeseen today. The Panel notes that after 50 years of GATT, tariffs have, for many products, disappeared or reached very low levels. Further, what constitutes 'unforeseen developments' for an importing Member will vary depending on the context and the circumstances. Nevertheless, the subjectivity of the standard does not take away from the fact that the unexpectedness of a development[761] for an importing Member is something that must be demonstrated through a reasoned and adequate explanation.

In addition, the standard for unforeseen developments may also be said to have an objective element. The appropriate focus is on what should or could have been foreseen in light of the circumstances. The standard is not what the specific negotiators had in mind but rather what they could (reasonably) have had in mind. This was recognized early in GATT by the *US – Fur Felt Hats* decision, which characterized unforeseen developments as 'developments [. . .] which it would not be reasonable to expect that the negotiators of the country making the concession could and should have foreseen at the time when the concession was negotiated'.[762]"[763]

Confluence of developments to form the basis of an unforeseen development

543. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, concluded that the confluence of several events can unite to form the basis of an unforeseen development:

"The United States argues that the robustness of the US dollar was a development which combined with the other developments, namely, the currency crises in Asia and the former USSR and the continued growth in steel

[757] *Ibid.*
[758] (*footnote original*) We note that the title of Article 2 of the *Agreement on Safeguards* is: "*Conditions*".

[760] (*footnote original*) Appellate Body Report, *Korea – Dairy*, para. 86 and Appellate Body Report, *Argentina – Footwear (EC)*, para. 93 (emphasis added).
[761] Appellate Body Report, *Argentina – Footwear (EC)*, para. 91; Appellate Body Report, *Korea – Dairy*, para. 84.
[762] (*footnote original*) *US – Fur Felt Hats*, para. 9, cited with approval in Appellate Body Report, *Argentina – Footwear (EC)*, para. 96; Appellate Body Report, *Korea – Dairy*, para. 89.
[763] Panel Report on *US – Steel Safeguards*, paras. 10.39 and 10.41–10.43.

demand in the United States' market as other markets declined, lead to increased imports.

The Panel has already accepted that the Russian and the Southeast Asian financial crises, at least conceptually, could be considered unforeseen developments that did not exist at the end of the Uruguay Round. We have also found that the USITC did not consider the strength of the United States' economy and the appreciation of the US dollar as unforeseen developments *per se;* it had referred to these factors in relation to other unforeseen developments, which *together* had resulted in increased imports causing or threatening to cause injury.

Article XIX does not preclude consideration of the confluence of a number of developments as 'unforeseen developments'. Accordingly, the Panel believes that confluence of developments can form the basis of 'unforeseen developments' for the purposes of Article XIX of GATT 1994. The Panel is of the view, therefore, that it is for each Member to demonstrate that a confluence of circumstances that it considers were unforeseen at the time it concluded its tariff negotiations resulted in increased imports causing serious injury.

To the complainants' argument that the changes in steel markets were much more pronounced in 1991 following the dissolution of the former Soviet Union than later on and could not, therefore, be unforeseen after 1994, the Panel notes that the fact that the dissolution of the USSR and its overall effects may have constituted an unforeseen development in 1991 does not mean that a subsequent financial crisis also resulting somehow from the dissolution of the USSR, cannot, with other developments, be considered part of a 'confluence of unforeseen developments' in 1997 for the purpose of Article XIX of GATT 1994."[764]

(iii) Logical connection between "unforeseen developments" and "the condition for imposition of a safeguard measure"

544. The Panel on *US – Steel Safeguards*, in a finding upheld by the Appellate Body, held that the phrase "as a result of" implies a "logical connection" between "unforeseen developments and the effects of tariffs concessions and obligations" and "the condition for imposition of a safeguard measure":

"The Appellate Body has interpreted the phrase 'as a result of' in Article XIX:1(a) of GATT 1994 as a logical connection that exists between the first two clauses of that Article. In other words, a logical connection must be demonstrated to have existed between the elements of the first clause of Article XIX:1(a) – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions' – and the conditions set forth in the second clause of that Article – 'increased imports causing serious injury' – for the imposition of a safeguard measure.[765]

. . .

The Panel agrees with New Zealand that it would be improper to reduce to a nullity the obligation to explain how 'unforeseen developments' resulted in increased imports causing or threatening to cause serious injury. In some cases, the explanation may be as simple as bringing two sets of facts together. However, in other situations, it may require much more detailed analysis in order to make clear the relationship that exists between the unforeseen developments and the increased imports that are causing or threatening to cause serious injury. The nature of the facts, including their complexity, will dictate the extent to which the relationship between the unforeseen developments and increased imports causing injury needs to be explained. The timing of the explanation, its extent and its quality are all factors that can affect whether a explanation is reasoned and adequate."[766]

545. The Appellate Body on *US – Steel Safeguards* confirmed that the "unforeseen developments" must result in increased imports of the product that is subject to a safeguard measure:

"Turning to the term 'as a result of' that is also found in Article XIX:1(a), we note that the ordinary meaning of 'result' is, as defined in the dictionary, 'an effect, issue, or outcome *from* some action, process or design'.[767] The increased imports to which this provision refers must therefore be an 'effect, or outcome' of the 'unforeseen developments'. Put differently, the 'unforeseen developments' must 'result' in increased imports of the product ('such product') that is subject to a safeguard measure."[768]

546. In *US – Steel Safeguards*, the Appellate Body clarified the relationship between unforeseen developments and increased imports and concluded that in situations of unforeseen developments, the increased imports must also be unforeseen:

"In a similar vein, we said in *Argentina – Footwear (EC)* that 'the increased quantities of imports should have been 'unforeseen' or 'unexpected'.'[769] In doing so, we were referring to the fact that the increased imports must, under Article XIX:1(a), result from 'unforeseen

[769] (*footnote original*) Appellate Body Report, *Argentina – Footwear (EC)*, para. 131.

developments' in order to justify the application of a safeguard measure. Because the 'increased imports' must be 'as a result' of an event that was 'unforeseen' or 'unexpected', it follows that the increased imports must also be 'unforeseen' or 'unexpected'. Thus, the 'extraordinary nature' of the domestic response to increased imports does not depend on the absolute or relative quantities of the product being imported. Rather, it depends on the fact that the increased imports were unforeseen or unexpected."[770]

Point in time where the developments were unforeseen

547. The Appellate Body on *Argentina – Footwear (EC)* noted a GATT Panel Report, which confirmed that the development must have been unforeseen at the time of the tariff negotiation:

"In addition, we note that our reading of the clause – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .' – in Article XIX:1(a) is also consistent with the one GATT 1947 case that involved Article XIX, the so-called '*Hatters' Fur*' case.[771] Members of the Working Party in that case, in 1951, stated:

> . . . 'unforeseen developments' should be interpreted to mean developments occurring after the negotiation of the relevant tariff concession which it would not be reasonable to expect that the negotiators of the country making the concession could and should have foreseen at the time when the concession was negotiated.[772]"[773]

548. In *Korea – Dairy*, the Appellate Body held that unforeseen developments are developments not foreseen or expected when Members incurred that obligation:

"[S]uch 'emergency actions' [safeguard measures] are to be invoked only in situations when, as a result of obligations incurred under the GATT 1994, an importing Member finds itself confronted with developments it had not 'foreseen' or 'expected' when it incurred that obligation."[774]

549. In *Argentina – Preserved Peaches*, the Panel agreed with the approach advanced by both parties that the developments should have been unforeseen by the negotiators at the time they granted the relevant concession:

"There is the issue of the point in time at which Article XIX:1(a) requires that developments should have been unforeseen. Chile stated that the developments should have been unforeseen by a Member at the time it incurred the relevant obligation.[775] In response to questions posed by the Panel, both parties submitted basically that developments should have been unforeseen by the negotiators at the time at which they granted the relevant concession.[776]

. . .

We will apply this interpretation and determine whether the competent authorities assessed whether the developments which they identified were unforeseen as at the time the relevant obligation was negotiated. We emphasize that we are not now discussing the time at which the competent authorities must demonstrate the existence of unforeseen developments in order to adopt a safeguard measure."[777]

Judicial economy

550. In *Argentina – Footwear (EC)*, the European Communities appealed the Panel's finding on judicial economy as regards the absence of findings by the Panel on the European Communities claim on unforeseen developments. The Appellate Body upheld the Panel's findings that the safeguards investigation at issue was inconsistent with the requirements of Articles 2 and 4 of the *Agreement on Safeguards* and concluded that, since such an inconsistency deprived the measure of legal basis, "there was no need to go further and examine whether, in addition, the measure was also inconsistent with Article XIX:1(a) of GATT 1994".[778] As regards the obligation to apply Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of *GATT 1994* cumulatively, including the requirement to demonstrate "unforeseen developments", see paragraph 531 above.

551. In *US – Wheat Gluten*, the Appellate Body reiterated the above conclusion, stating that, given the lack of legal basis of the safeguard measure at issue, the Panel was entitled to decline to examine the claim regarding unforeseen developments.[779]

---

[770] Appellate Body Report on *US – Steel Safeguards*, para. 350. Note that a previous panel report on *Argentina – Preserved Peaches*, para. 7.24 had reached the opposite conclusion.

(iv) "as a result . . . of the effect of the obligations incurred by a Member"

552. With respect to the clause "of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . ." the Appellate Body held in *Argentina – Footwear (EC):*

> "[W]e believe that this phrase simply means that it must be demonstrated, as a matter of fact, that the importing Member has incurred obligations under the GATT 1994, including tariff concessions. Here, we note that the Schedules annexed to the GATT 1994 are made an integral part of Part I of that Agreement, pursuant to paragraph 7 of Article II of the GATT 1994. Therefore, any concession or commitment in a Member's Schedule is subject to the obligations contained in Article II of the GATT 1994."[780]

553. [In *Argentina – Footwear (EC)*, the Appellate Body described the requirement "as a result . . . of the effect of the obligations incurred by a Member" as setting forth "certain *circumstances* which must be demonstrated as a matter of fact in order for a safeguard measure to be applied consistently with the provisions of Article XIX of the GATT 1994". See paragraph 541 above.

554. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, held that "the logical connection between tariff concessions and increased imports causing serious injury is proven once there is evidence that the importing Member has tariff concessions for the relevant product."[781]

555. With respect to the significance of the context and object and purpose of Article XIX for the interpretation of the term "as a result . . . of the effect of the obligations incurred by a Member", see paragraph 541. With respect to a GATT Panel Report on this issue, see paragraph 547 above.

556. As regards the interpretation of the element "unforeseen developments" under Article XIX and the *Agreement on Safeguards*, see the Chapter on the *Agreement on Safeguards*, Section II.B.1(b).

(v) "being imported in such increased quantities . . ."

557. Concerning the interpretation of the phrase "in such increased quantities" under Article 2.1 of the *Agreement on Safeguards*, see the Chapter on the *Agreement on Safeguards*, Section III.B.2(c).

(vi) "under such conditions"

558. As to the interpretation of the phrase "under such conditions" under Article 2.1 of the *Agreement on Safeguards*, see Chapter on the *Agreement on Safeguards*, Section III.B.2(d).

(vii) "as to cause or threaten serious injury to domestic producers"

559. As regards the interpretation of the phrase "serious injury" under Article 2.1 of the *Agreement on Safeguards*, see Chapter on the *Agreement on Safeguards*, Section III.B.2(h).

560. With respect to the interpretation of the element of "serious injury" under Article 4.1 of the *Agreement on Safeguards*, see Chapter on the *Agreement on Safeguards*, Sections V.B.1–V.B.2.

561. Concerning the interpretation of the element "serious injury" under Article 4.2(a) of the *Agreement on Safeguards*, see Chapter on the *Agreement on Safeguards*, Section V.B.4.

562. As to the causation test to be applied in relating "increased imports" to "serious injury", see Chapter on the *Agreement on Safeguards*, Section V.B.5(a).

3. Article XIX:2

(a) "shall give notice in writing to the Contracting Parties as far as in advance as may be practicable"

563. With regard to the notification requirements and particularly to the interpretation of the phrase "shall immediately notify" under Article 12.1 of the *Agreement on Safeguards*, see the Chapter on the *Agreement on Safeguards*, Section XIII.B.1–2.

(b) "an opportunity to consult"

564. With respect to the interpretation of "opportunity for prior consultations" under Article 12.3 of the *Agreement on Safeguards*, see the Chapter on the *Agreement on Safeguards*, XIII.B.4(a)

4. Reference to GATT practice

565. Regarding GATT practice on Article XIX, see GATT Analytical Index, pages 516–529.

C. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Agreement on Safeguards

566. In *Korea – Dairy*, the Appellate Body examined the relationship between Article XIX of *GATT 1994* and the *Agreement on Safeguards* in light of, on the one hand, Article II of the WTO Agreement[782], and, on the other hand, Articles 1 and 11.1(a) of the *Agreement on*

[780] Appellate Body Report on *Argentina – Footwear (EC)*, para. 91. See also Appellate Body Report on *Korea – Dairy*, para. 84.
[781] Panel Report on *US – Steel Safeguards*, paras. 10.140.
[782] For the Appellate Body's analysis under Article II of the *WTO Agreement*, see Chapter on the *WTO Agreement*, Section III.B.1.

Safeguards.[783] The Appellate Body concluded that any safeguard measure imposed after the entry into force of the WTO Agreement must comply with the provisions of both Article XIX and the *Agreement on Safeguards*:

> "The specific relationship between Article XIX of the GATT 1994 and the *Agreement on Safeguards* within the WTO Agreement is set forth in Articles 1 and 11.1(a) of the *Agreement on Safeguards*:
>
> . . .
>
> Article 1 states that the purpose of the *Agreement on Safeguards* is to establish 'rules for the application of safeguard measures which shall be understood to mean those measures provided for in Article XIX of GATT 1994.' . . . The ordinary meaning of the language in Article 11.1(a) – 'unless such action conforms with the provisions of that Article applied in accordance with this Agreement' – is that any safeguard action must conform with the provisions of Article XIX of the GATT 1994 as well as with the provisions of the *Agreement on Safeguards*. Thus, any safeguard measure[784] imposed after the entry into force of the WTO Agreement must comply with the provisions of both the *Agreement on Safeguards* and Article XIX of the GATT 1994."[785]

567. In *US – Line Pipe*, the Panel, in a finding not reviewed by the Appellate Body, did not examine whether Korea's claim under Article XIX:1(a) was justified on the basis that it had already rejected Korea's claims under the *Agreement on Safeguards*:

> "In the context of its claims under Articles 5.1 (first sentence) and 7.1 concerning the extent and duration of the line pipe measure, Korea also alleged an infringement of Article XIX:1(a). This provision authorizes the imposition of safeguard measures "to the extent and for such time as may be necessary to prevent or remedy" injury caused by increased imports. Korea's Article XIX:1(a) claim is based on the same arguments advanced in support of its Article 5.1 (first sentence) and 7.1 claims. Since we have already rejected those claims, we also reject Korea's Article XIX:1(a) claim regarding the duration and extent of the line pipe measure."[786]

568. In *Argentina – Footwear (EC)*, the Appellate Body reversed a conclusion by the Panel that "safeguard investigations and safeguard measures imposed after the entry into force of the WTO agreements which meet the requirements of the new *Safeguards Agreement* satisfy the requirements of Article XIX of GATT."[787] The Appellate Body noted that Articles 1 and 11.1(a) of the *Agreement on Safeguards* described the precise nature of the relationship between Article XIX of *GATT 1994* and the *Agreement on Safeguards* within the *WTO Agreement*[788], and then observed:

> "We see nothing in the language of either Article 1 or Article 11.1(a) of the *Agreement on Safeguards* that suggests an intention by the Uruguay Round negotiators to *subsume* the requirements of Article XIX of the GATT 1994 within the *Agreement on Safeguards* and thus to render those requirements no longer applicable. Article 1 states that the purpose of the *Agreement on Safeguards* is to establish 'rules for the application of safeguard measures which shall be understood to mean *those measures provided for* in Article XIX of GATT 1994.' . . . This suggests that Article XIX continues in full force and effect, and, in fact, establishes certain prerequisites for the imposition of safeguard measures. Furthermore, in Article 11.1(a), the ordinary meaning of the language 'unless such action *conforms with the provisions of that Article applied in accordance with this Agreement*' . . . clearly is that any safeguard action must *conform with* the provisions of Article XIX of the GATT 1994 *as well as* with the provisions of the *Agreement on Safeguards*. Neither of these provisions states that any safeguard action taken after the entry into force of the *WTO Agreement* need only conform with the provisions of the *Agreement on Safeguards*.[789]"[790]

569. The Appellate Body on *Argentina – Footwear (EC)* further rejected the conclusion of the Panel that because the clause "[i]f, as a result of unforeseen developments ... concessions"[791] in Article XIX:1(a) had been expressly omitted from Article 2.1 of the *Agreement on Safeguards*, safeguard measures that meet the requirements of the *Agreement on Safeguards* will automatically also satisfy the requirements of Article XIX. The Appellate Body considered this conclusion of the Panel as inconsistent with the principles of effective treaty interpretation[792] and with the ordinary meaning

---

[783] The issue of the relationship between Article XIX of the *GATT 1994* and the *Agreement on Safeguards* arose in these disputes in connection with claims raised regarding a failure to examine whether the import trends of the products under investigation were the result of "unforeseen developments" within the meaning of Article XIX:1(a) of the *GATT 1994*. For the interpretation of the phrase "If, as a result of unforeseen developments . . . concessions" in Article XIX:1(a) of the *GATT 1994*, see Section XX.B.2 of this Chapter.

[784] (*footnote original*) With the exception of special safeguard measures taken pursuant to Article 5 of the *Agreement on Agriculture* or Article 6 of the *Agreement on Textiles and Clothing*.

[785] Appellate Body Report on *Korea – Dairy*, paras. 76–77. See also Appellate Body Report on *Argentina – Footwear (EC)*, para. 84.

[786] Panel Report on *US – Line Pipe*, para 7.115.

[787] Panel Report on *Argentina – Footwear (EC)*, para. 8.69.

[788] Appellate Body Report on *Argentina – Footwear (EC)*, para. 82.

[789] (*footnote original*) We note that the provisions of Article 11.1(a) of the *Agreement on Safeguards* are significantly different from the provisions of Article 2.4 of the *Agreement on the Application of Sanitary and Phytosanitary Measures*, which state:

> "Sanitary or phytosanitary measures *which conform to* the relevant provisions of this Agreement *shall be presumed to be in accordance with* the obligations of the Members under the provisions of GATT 1994 which relate to the use of sanitary or phytosanitary measures, in particular the provisions of Article XX(b)." (emphasis added)

[790] Appellate Body Report on *Argentina – Footwear (EC)*, para. 83.

[791] The discussion on "unforeseen developments" can be found in Section XX.B.2(a)of this Chapter.

[792] With respect to treaty interpretation in general, see Chapter on the *DSU*, Section III.B.1.

of Articles 1 and 11.1(a) of the *Agreement on Safeguards*:

> "[I]t is clear from Articles 1 and 11.1(a) of the *Agreement on Safeguards* that the Uruguay Round negotiators did not intend that the *Agreement on Safeguards* would entirely replace Article XIX. Instead, the ordinary meaning of Articles 1 and 11.1(a) of the *Agreement on Safeguards* confirms that the intention of the negotiators was that the provisions of Article XIX of the GATT 1994 and of the *Agreement on Safeguards* would apply *cumulatively*, except to the extent of a conflict between specific provisions . . . We do not see this as an issue involving a conflict between specific provisions of two Multilateral Agreements on Trade in Goods. Thus, we are obliged to apply the provisions of Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994 *cumulatively*, in order to give meaning, by giving legal effect, to all the applicable provisions relating to safeguard measures."[793]

570. The Panel on *US – Lamb*, referring to the statements by the Appellate Body in *Argentina – Footwear (EC)* and *Korea – Dairy*, on the relationship between the *Agreement on Safeguards* and Article XIX of the *GATT 1994*, observed:

> "Thus the Appellate Body explicitly rejected the idea that those requirements of GATT Article XIX which are not reflected in the *Safeguards Agreement* could have been superseded by the requirements of the latter and stressed that all of the relevant provisions of the *Safeguards Agreement* and GATT Article XIX must be given meaning and effect."[794]

571. The Appellate Body Report in *US – Lamb* reiterated the conclusions drawn by the Appellate Body in *Argentina – Footwear (EC)* and in *Korea – Dairy* on the relationship between the *Agreement on Safeguards* and Article XIX of the *GATT 1994* and observed:

> "[A]rticles 1 and 11.1(a) of the Agreement on Safeguards express the full and continuing applicability of Article XIX of the GATT 1994, which no longer stands in isolation, but has been clarified and reinforced by the Agreement on Safeguards."[795]

572. Concerning the possibility of resorting to judicial economy as regards claims of unforeseen developments in cases where it has found that the requirements of Article 2 and 4 of the *Agreement on Safeguards* have not been met, see paragraphs 550–551 above.

XXI. ARTICLE XX

A. TEXT OF ARTICLE XX

Article XX
General Exceptions

Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail, or a disguised restriction on international trade, nothing in this Agreement shall be construed to prevent the adoption or enforcement by any contracting party of measures:

(*a*) necessary to protect public morals;

(*b*) necessary to protect human, animal or plant life or health;

(*c*) relating to the importations or exportations of gold or silver;

(*d*) necessary to secure compliance with laws or regulations which are not inconsistent with the provisions of this Agreement, including those relating to customs enforcement, the enforcement of monopolies operated under paragraph 4 of Article II and Article XVII, the protection of patents, trade marks and copyrights, and the prevention of deceptive practices;

(*e*) relating to the products of prison labour;

(*f*) imposed for the protection of national treasures of artistic, historic or archaeological value;

(*g*) relating to the conservation of exhaustible natural resources if such measures are made effective in conjunction with restrictions on domestic production or consumption;

(*h*) undertaken in pursuance of obligations under any intergovernmental commodity agreement which conforms to criteria submitted to the CONTRACTING PARTIES and not disapproved by them or which is itself so submitted and not so disapproved;*

(*i*) involving restrictions on exports of domestic materials necessary to ensure essential quantities of such materials to a domestic processing industry during periods when the domestic price of such materials is held below the world price as part of a governmental stabilization plan; *Provided* that such restrictions shall not operate to increase the exports of or the protection afforded to such domestic industry, and

[793] Appellate Body Report on *Argentina – Footwear (*EC), para. 89.
[794] Panel Report on *US – Lamb*, para. 7.11.
[795] Appellate Body Report on *US – Lamb*, para. 70.

shall not depart from the provisions of this Agreement relating to non-discrimination;

(*j*) essential to the acquisition or distribution of products in general or local short supply; *Provided* that any such measures shall be consistent with the principle that all contracting parties are entitled to an equitable share of the international supply of such products, and that any such measures, which are inconsistent with the other provisions of the Agreement shall be discontinued as soon as the conditions giving rise to them have ceased to exist. The CONTRACTING PARTIES shall review the need for this sub-paragraph not later than 30 June 1960.

B. TEXT OF *AD* ARTICLE XX

Ad Article XX
Subparagraph (h)

The exception provided for in this subparagraph extends to any commodity agreement which conforms to the principles approved by the Economic and Social Council in its resolution 30 (IV) of 28 March 1947.

C. INTERPRETATION AND APPLICATION OF ARTICLE XX

1. General

(a) Nature and purpose of Article XX

573. In *US – Gasoline*, in discussing the preambular language (the "chapeau") of Article XX, the Appellate Body stated:

> "[T]he chapeau says that '*nothing in this Agreement* shall be construed to prevent the adoption or enforcement by any contracting party of measures . . .' The exceptions listed in Article XX thus relate to all of the obligations under the *General Agreement*: the national treatment obligation and the most-favoured-nation obligation, of course, but others as well."[796]

574. In *US – Shrimp*, the Appellate Body examined the GATT-consistency of the import ban on shrimp and shrimp products from exporting nations not certified by United States authorities. Such certification could be obtained, *inter alia*, where the foreign country could demonstrate that shrimp or shrimp products were being caught using methods which did not lead to incidental killing of turtles beyond a certain level. The Panel had found that the measure at issue could not be justified under Article XX, because Article XX could not serve to justify "measures conditioning access to its market for a given product upon the adoption by the exporting Members of certain policies". The Appellate Body disagreed with this interpretation of the scope of Article XX and stated:

> "[C]onditioning access to a Member's domestic market on whether exporting Members comply with, or adopt, a policy or policies unilaterally prescribed by the importing Member may, to some degree, be a common aspect of measures falling within the scope of one or another of the exceptions (a) to (j) of Article XX. Paragraphs (a) to (j) comprise measures that are recognized as *exceptions to substantive obligations* established in the GATT 1994, because the domestic policies embodied in such measures have been recognized as important and legitimate in character. It is not necessary to assume that requiring from exporting countries compliance with, or adoption of, certain policies (although covered in principle by one or another of the exceptions) prescribed by the importing country, renders a measure *a priori* incapable of justification under Article XX. Such an interpretation renders most, if not all, of the specific exceptions of Article XX inutile, a result abhorrent to the principles of interpretation we are bound to apply."[797]

575. In *US – Shrimp*, interpreting the chapeau of Article XX, the Appellate Body described the nature and purpose of Article XX as a balance of rights and duties:

> "[A] balance must be struck between the *right* of a Member to invoke an exception under Article XX and the *duty* of that same Member to respect the treaty rights of the other Members.
>
> The task of interpreting and applying the chapeau is, hence, essentially the delicate one of locating and marking out a line of equilibrium between the right of a Member to invoke an exception under Article XX and the rights of the other Members under varying substantive provisions (e.g., Article XI) of the GATT 1994, so that neither of the competing rights will cancel out the other and thereby distort and nullify or impair the balance of rights and obligations constructed by the Members themselves in that Agreement. The location of the line of equilibrium, as expressed in the chapeau, is not fixed and unchanging; the line moves as the kind and the shape of the measures at stake vary and as the facts making up specific cases differ."[798]

576. In *US – Gasoline*, the Appellate Body concluded its analysis by emphasizing the function of Article XX with respect to national measures taken for environmental protection:

> "It is of some importance that the Appellate Body point out what this does *not* mean. It does not mean, or imply, that the ability of any WTO Member to take measures to control air pollution or, more generally, to protect the environment, is at issue. That would be to ignore the fact that Article XX of the *General Agreement* contains provisions designed to permit important state interests – including the protection of human health, as well as the

[797] Appellate Body Report on *US – Shrimp*, para. 121.
[798] Appellate Body Report on *US – Shrimp*, paras. 156 and 159.

conservation of exhaustible natural resources – to find expression. The provisions of Article XX were not changed as a result of the Uruguay Round of Multilateral Trade Negotiations. Indeed, in the preamble to the *WTO Agreement* and in the *Decision on Trade and Environment*,[799] there is specific acknowledgement to be found about the importance of coordinating policies on trade and the environment. WTO Members have a large measure of autonomy to determine their own policies on the environment (including its relationship with trade), their environmental objectives and the environmental legislation they enact and implement. So far as concerns the WTO, that autonomy is circumscribed only by the need to respect the requirements of the *General Agreement* and the other covered agreements."[800]

(b) Structure of Article XX

(i) Two-tier test

577. In *US – Gasoline*, the Appellate Body examined the Panel's findings that the United States regulation concerning the quality of gasoline was inconsistent with GATT Article III:4 and not justified under either paragraph (b), (d) or (g) of Article XX. The Appellate Body presented a two-tiered test under Article XX:

> "In order that the justifying protection of Article XX may be extended to it, the measure at issue must not only come under one or another of the particular exceptions – paragraphs (a) to (j) – listed under Article XX; it must also satisfy the requirements imposed by the opening clauses of Article XX. The analysis is, in other words, two-tiered: first, provisional justification by reason of characterization of the measure under XX(g); second, further appraisal of the same measure under the introductory clauses of Article XX."[801]

578. In *US – Shrimp*, the Appellate Body reviewed the Panel's finding concerning an import ban on shrimp and shrimp products harvested by foreign vessels. The ban applied to shrimp and shrimp products where the exporting country had not been certified by United States authorities as using methods not leading to incidental killing of sea turtles above a certain level. The Panel found a violation of Article III and held that the United States measure was not within the scope of measures permitted under the chapeau of Article XX. As a result of its finding that the United States measure could not be justified under the terms of the chapeau, the Panel did not examine the import ban in the light of Articles XX (b) and XX(g). The Appellate Body referred to its finding in *US – Gasoline*, cited in paragraph 577 above, and emphasized the need to follow the sequence of steps as set out in that Report:

> "The sequence of steps indicated above in the analysis of a claim of justification under Article XX reflects, not inadvertence or random choice, but rather the fundamental structure and logic of Article XX. The Panel appears to suggest, albeit indirectly, that following the indicated sequence of steps, or the inverse thereof, does not make any difference. To the Panel, reversing the sequence set out in *United States – Gasoline* 'seems equally appropriate.'[802] We do not agree.
>
> The task of interpreting the chapeau so as to prevent the abuse or misuse of the specific exemptions provided for in Article XX is rendered very difficult, if indeed it remains possible at all, where the interpreter (like the Panel in this case) has not first identified and examined the specific exception threatened with abuse. The standards established in the chapeau are, moreover, necessarily broad in scope and reach: the prohibition of the *application* of a measure 'in a manner which would constitute a means of *arbitrary* or *unjustifiable discrimination* between countries where the same conditions prevail' or 'a *disguised restriction* on international trade.'(emphasis added) When applied in a particular case, the actual contours and contents of these standards will vary as the kind of measure under examination varies."[803]

(ii) Language of paragraphs (a) to (i)

579. In *US – Gasoline*, the Appellate Body compared the terms used in paragraphs (a) to (i) of Article XX, emphasizing that different terms are used in respect of the different categories of measures described in paragraphs (a) to (i):

> "Applying the basic principle of interpretation that the words of a treaty, like the *General Agreement*, are to be given their ordinary meaning, in their context and in the light of the treaty's object and purpose, the Appellate Body observes that the Panel Report failed to take adequate account of the words actually used by Article XX in its several paragraphs. In enumerating the various categories of governmental acts, laws or regulations which WTO Members may carry out or promulgate in pursuit of differing legitimate state policies or interests outside the realm of trade liberalization, Article XX uses different terms in respect of different categories:
>
> > 'necessary' – in paragraphs (a), (b) and (d); 'essential' – in paragraph (j); 'relating to' – in paragraphs (c), (e) and (g); 'for the protection of' – in paragraph (f); 'in pursuance of' – in paragraph (h); and 'involving' – in paragraph (i).
>
> It does not seem reasonable to suppose that the WTO Members intended to require, in respect of each and every category, the same kind or degree of connection or relationship between the measure under appraisal

[799] (*footnote original*)Adopted by Ministers at the Meeting of the Trade Negotiations Committee in Marrakesh on 14 April 1994.
[800] Appellate Body Report on *US – Gasoline*, pp. 30–31.
[801] Appellate Body Report on *US – Gasoline*, p. 22.

[803] Appellate Body Report on *US – Shrimp*, paras. 119–120.

and the state interest or policy sought to be promoted or realized."[804]

(c) Burden of proof

580. In *US – Gasoline*, the Appellate Body differentiated between the burden of proof under the individual paragraphs of Article XX on the one hand, and under the chapeau of Article XX on the other:

> "The burden of demonstrating that a measure provisionally justified as being within one of the exceptions set out in the individual paragraphs of Article XX does not, in its application, constitute abuse of such exception under the chapeau, rests on the party invoking the exception. That is, of necessity, a heavier task than that involved in showing that an exception, such as Article XX(g), encompasses the measure at issue."[805]

581. The Panel on *EC – Asbestos*, in a statement not reviewed by the Appellate Body, elaborated on the burden of proof under Article XX in the context of a defence based on Article XX(b):

> "We consider that the reasoning of the Appellate Body in *United States – Shirts and Blouses from India*[806] is applicable to Article XX, inasmuch as the invocation of that Article constitutes a 'defence' in the sense in which that word is used in the above-mentioned report. It is therefore for the European Communities to submit in respect of this defence a prima facie case showing that the measure is justified. Of course, as the Appellate Body pointed out in *United States – Gasoline*, the burden on the European Communities could vary according to what has to be proved. It will then be for Canada to rebut that prima facie case, if established.
>
> If we mention this working rule at this stage, it is because it could play a part in our assessment of the evidence submitted by the parties. Thus, the fact that a party invokes Article XX does not mean that it does not need to supply the evidence necessary to support its allegation. Similarly, it does not release the complaining party from having to supply sufficient arguments and evidence in response to the claims of the defending party. Moreover, we are of the opinion that it is not for the party invoking Article XX to prove that the arguments put forward in rebuttal by the complaining party are incorrect until the latter has backed them up with sufficient evidence.[807]"[808]

582. The Panel on *EC – Asbestos*, in a finding not addressed by the Appellate Body, further discussed the burden of proof specifically regarding the scientific aspect of the measure at issue. The Panel chose to confine itself to the provisions of the GATT 1994 and to the criteria defined by the practice relating to the application of GATT Article XX rather than to extend the principles of the *SPS Agreement* to examination under Article XX:[809]

> "[I]n relation to the scientific information submitted by the parties and the experts, the Panel feels bound to point out that it is not its function to settle a scientific debate, not being composed of experts in the field of the possible human health risks posed by asbestos. Consequently, the Panel does not intend to set itself up as an arbiter of the opinions expressed by the scientific community.
>
> Its role, taking into account the burden of proof, is to determine whether there is sufficient scientific evidence to conclude that there exists a risk for human life or health and that the measures taken by France are necessary in relation to the objectives pursued. The Panel therefore considers that it should base its conclusions with respect to the existence of a public health risk on the scientific evidence put forward by the parties and the comments of the experts consulted within the context of the present case. The opinions expressed by the experts we have consulted will help us to understand and evaluate the evidence submitted and the arguments advanced by the parties.[810] The same approach will be adopted with respect to the necessity of the measure concerned."[811]

2. Preamble of Article XX (the "chapeau")

(a) Scope

583. In *US – Gasoline*, the Appellate Body held that the chapeau has been worded so to prevent the abuse of the exceptions under Article XX:

> "The chapeau by its express terms addresses, not so much the questioned measure or its specific contents as such, but rather the manner in which that measure is applied.[812]

---

[804] Appellate Body Report on *US – Gasoline*, pp. 17.

[805] Appellate Body Report on *US – Gasoline*, p. 22.

[806] (*footnote original*) Appellate Body Report on *US – Wool Shirts and Blouses*, pp. 15–16:

> "We acknowledge that several GATT 1947 and WTO panels have required such proof of a party invoking a defence such as those found in Article XX or Article XI:2(c)(i), to a claim of violation of a GATT obligation, such as those found in Articles I:1, II:1, III or XI:1. Articles XX and XI:2(c)(i) are limited exceptions from obligations under certain other provisions of the GATT 1994, not positive rules establishing obligations in themselves. They are in the nature of affirmative defences. It is only reasonable that the burden of establishing such a defence should rest on the party asserting it."

[807] (*footnote original*) See Report of the Appellate Body in *EC – Hormones*, para. 104.

[810] (*footnote original*) Report of the Appellate Body in *Japan – Agricultural Products*, para. 129. At this point, we recall that the experts were selected in consultation with the parties and that the latter did not challenge the appointment of any of them, although they reserved the right to comment on their statements. . . .

[811] Panel Report on *EC – Asbestos*, paras. 8.181–8.182. See also para. 611 of this Chapter. With respect to burden of proof in general, see the Chapter on *DSU*, Section XXXVI.D.

[812] The footnote to this sentence refers to Panel Report on *US – Spring Assemblies*, BISD 30S/107, para. 56.

> It is, accordingly, important to underscore that the purpose and object of the introductory clauses of Article XX is generally the prevention of 'abuse of the exceptions of [what was later to become] Article [XX].'[813] This insight drawn from the drafting history of Article XX is a valuable one. The chapeau is animated by the principle that while the exceptions of Article XX may be invoked as a matter of legal right, they should not be so applied as to frustrate or defeat the legal obligations of the holder of the right under the substantive rules of the *General Agreement*. If those exceptions are not to be abused or misused, in other words, the measures falling within the particular exceptions must be applied reasonably, with due regard both to the legal duties of the party claiming the exception and the legal rights of the other parties concerned."[814]

584. In *US – Shrimp*, the Appellate Body elaborated on the notion of preventing abuse or misuse of the exceptions under Article XX. The Appellate Body found that "a balance must be struck between the *right* of a Member to invoke an exception under Article XX and the *duty* of that same Member to respect the treaty rights of the other Members"[815], as referenced in paragraph 575 above, and went on to state:

> "In our view, the language of the chapeau makes clear that each of the exceptions in paragraphs (a) to (j) of Article XX is a *limited and conditional* exception from the substantive obligations contained in the other provisions of the GATT 1994, that is to say, the ultimate availability of the exception is subject to the compliance by the invoking Member with the requirements of the chapeau.[816] This interpretation of the chapeau is confirmed by its negotiating history.[817] The language initially proposed by the United States in 1946 for the chapeau of what would later become Article XX was unqualified and unconditional.[818] Several proposals were made during the First Session of the Preparatory Committee of the United Nations Conference on Trade and Employment in 1946 suggesting modifications.[819] In November 1946, the United Kingdom proposed that "in order to prevent abuse of the exceptions of Article 32 [which would subsequently become Article XX]", the chapeau of this provision should be qualified.[820] This proposal was generally accepted, subject to later review of its precise wording. Thus, the negotiating history of Article XX confirms that the paragraphs of Article XX set forth *limited and conditional* exceptions from the obligations of the substantive provisions of the GATT. Any measure, to qualify finally for exception, must also satisfy the requirements of the chapeau. This is a fundamental part of the balance of rights and obligations struck by the original framers of the GATT 1947."[821]

585. The Appellate Body then linked the balance of rights and obligations under the chapeau of Article XX to the general principle of good faith:

> "The chapeau of Article XX is, in fact, but one expression of the principle of good faith. This principle, at once a general principle of law and a general principle of international law, controls the exercise of rights by states. One application of this general principle, the application widely known as the doctrine of *abus de droit*, prohibits the abusive exercise of a state's rights and enjoins that whenever the assertion of a right "impinges on the field covered by [a] treaty obligation, it must be exercised

[813] The footnote to this sentence refers to EPCT/C.11/50, p. 7.

[814] Appellate Body Report on *US – Gasoline*, p. 22

[815] Appellate Body Report on *US – Shrimp*, para. 156.

[816] (*footnote original*) This view is consistent with the approach taken by the panel in *US – Section 337*, which stated:

> "Article XX is entitled 'General Exceptions' and . . . the central phrase in the introductory clause reads: 'nothing in this Agreement shall be construed to prevent the adoption or enforcement . . . of measures . . .'. Article XX(d) thus provides *a limited and conditional exception from obligations under other provisions*." (emphasis added) Adopted 7 November 1989, BISD 365/345, para. 5.9.

[817] (*footnote original*) Article 32 of the Vienna Convention permits recourse to "supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when interpretation according to article 31: (a) leaves the meaning ambiguous or obscure; or (b) leads to a result which is manifestly absurd or unreasonable." Here, we refer to the negotiating history of Article XX to confirm the interpretation of the chapeau we have reached from applying Article 31 of the Vienna Convention.

[818] (*footnote original*) The chapeau of Article 32 of the United States Draft Charter for an International Trade Organization, which formed the basis for discussions at the First Session of the Preparatory Committee of the United Nations Conference on Trade and Employment in late 1946, read, in relevant part:

> "Nothing in Chapter IV of this Charter shall be construed to prevent the adoption or enforcement by any member of measures: . . ."

[819] (*footnote original*) For example, the Netherlands, Belgium and Luxembourg stated that the exceptions should be qualified in some way:

> "Indirect protection is an undesirable and dangerous phenomenon. . . . Many times, the stipulations to 'protect animal or plant life or health' are misused for indirect protection. It is recommended to insert a clause which prohibits expressly to direct such measures that they constitute an indirect protection or, in general, to use these measures to attain results, which are irreconsiliable [*sic*] with the aim of chapters IV, V and VI." E/PC/T/C.II/32, 30 October 1946

[820] (*footnote original*) The United Kingdom's proposed text for the chapeau read:

> "The undertaking in Chapter IV of this Charter relating to import and export restrictions shall not be construed to prevent the adoption or enforcement by any member of measures for the following purposes, provided that they are not applied in such a manner as to constitute a means of arbitrary discrimination between countries where the same conditions prevail, or a disguised restriction on international trade." E/PC/T/C.II/50, pp. 7 and 9; E/PC/T/C.II/54/Rev.1, 28 November 1946, p. 36.

[821] Appellate Body Report on *US – Shrimp*, para. 157.

bona fide, that is to say, reasonably."[822] An abusive exercise by a Member of its own treaty right thus results in a breach of the treaty rights of the other Members and, as well, a violation of the treaty obligation of the Member so acting. Having said this, our task here is to interpret the language of the chapeau, seeking additional interpretative guidance, as appropriate, from the general principles of international law.

The task of interpreting and applying the chapeau is, hence, essentially the delicate one of locating and marking out a line of equilibrium between the right of a Member to invoke an exception under Article XX and the rights of the other Members under varying substantive provisions (e.g., Article XI) of the GATT 1994, so that neither of the competing rights will cancel out the other and thereby distort and nullify or impair the balance of rights and obligations constructed by the Members themselves in that Agreement. The location of the line of equilibrium, as expressed in the chapeau, is not fixed and unchanging; the line moves as the kind and the shape of the measures at stake vary and as the facts making up specific cases differ."[823]

586. In *US – Shrimp*, before elaborating on the general significance of the chapeau of Article XX, as quoted in paragraphs 584–585 above, the Appellate Body discussed the significance of the Preamble of the *WTO Agreement* for its interpretative approach to the chapeau:

"[The language of the WTO Preamble] demonstrates a recognition by WTO negotiators that optimal use of the world's resources should be made in accordance with the objective of sustainable development. As this preambular language reflects the intentions of negotiators of the *WTO Agreement*, we believe it must add colour, texture and shading to our interpretation of the agreements annexed to the *WTO Agreement*, in this case, the GATT 1994. We have already observed that Article XX(g) of the GATT 1994 is appropriately read with the perspective embodied in the above preamble.

We also note that since this preambular language was negotiated, certain other developments have occurred which help to elucidate the objectives of WTO Members with respect to the relationship between trade and the environment. The most significant, in our view, was the Decision of Ministers at Marrakesh to establish a permanent Committee on Trade and Environment (the 'CTE').

. . .

[W]e must fulfill our responsibility in this specific case, which is to interpret the existing language of the chapeau of Article XX by examining its ordinary meaning, in light of its context and object and purpose in order to determine whether the United States measure at issue qualifies for justification under Article XX. It is proper for us to take into account, as part of the context of the chapeau, the specific language of the preamble to the *WTO Agreement*, which, we have said, gives colour, texture and shading to the rights and obligations of Members under the *WTO Agreement*, generally, and under the GATT 1994, in particular."[824]

(b) "arbitrary or unjustifiable discrimination between countries where the same conditions prevail"

(i) Constitutive elements

587. The Appellate Body on *US – Shrimp* provided an overview regarding the three constitutive elements of the concept of "arbitrary or unjustifiable discrimination between countries where the same conditions prevail":

"In order for a measure to be applied in a manner which would constitute 'arbitrary or unjustifiable discrimination between countries where the same conditions prevail', three elements must exist. First, the application of the measure must result in *discrimination*. As we stated in *United States – Gasoline*, the nature and quality of this discrimination is different from the discrimination in the treatment of products which was already found to be inconsistent with one of the substantive obligations of the GATT 1994, such as Articles I, III or XI.[825] Second, the discrimination must be *arbitrary* or *unjustifiable* in character. We will examine this element of *arbitrariness* or *unjustifiability* in detail below. Third, this discrimination must occur *between countries where the same conditions prevail*. In *United States – Gasoline*, we accepted the assumption of the participants in that appeal that such discrimination could occur not only between different exporting

[822] (*footnote original*) B. Cheng, *General Principles of Law as applied by International Courts and Tribunals* (Stevens and Sons, Ltd., 1953), Chapter 4, in particular, p. 125 elaborates:

> . . . A reasonable and bona fide exercise of a right in such a case is one which is appropriate and necessary for the purpose of the right (*i.e.*, in furtherance of the interests which the right is intended to protect). It should at the same time be *fair and equitable as between the parties* and not one which is calculated to procure for one of them an unfair advantage in the light of the obligation assumed. A reasonable exercise of the right is regarded as compatible with the obligation. But the exercise of the right in such a manner as to prejudice the interests of the other contracting party arising out of the treaty is unreasonable and is considered as inconsistent with the bona fide execution of the treaty obligation, and a breach of the treaty. . . .(emphasis added)

Also see, for example, Jennings and Watts (eds.), *Oppenheim's International Law*, 9th ed, Vol. I (Longman's, 1992), pp. 407–410, *Border and Transborder Armed Actions Case*, (1988) I.C.J. Rep. 105; *Rights of Nationals of the United States in Morocco Case*, (1952) I.C.J. Rep. 176; *Anglo-Norwegian Fisheries Case*, (1951) I.C.J. Rep. 142.

[823] Appellate Body Report on *US – Shrimp*, paras. 158–159.

[824] Appellate Body Report on *US – Shrimp*, paras. 153–155. In this context, the Appellate Body pointed out that the Decision refers to the Rio Declaration on Environment and Development, and Agenda 21.

[825] (*footnote original*) In *US – Gasoline*, p. 23, we stated: "The provisions of the chapeau cannot logically refer to the same standard(s) by which a violation of a substantive rule has been determined to have occurred."

Members, but also between exporting Members and the importing Member concerned.[826]"[827]

(ii) Type of discrimination covered by the chapeau

588. With respect to the phrase "between countries where the same conditions prevail", the question arose whether the notion of discrimination under the chapeau of Article XX referred to conditions in importing or exporting countries (i.e. discrimination between a foreign country or foreign countries on the one hand and the home country on the other) or only to conditions in various exporting countries. The Appellate Body on *US – Gasoline* indicated that it considered both types of discrimination covered by the chapeau:

"[The United States] was asked whether the words incorporated into the first two standards 'between countries where the same conditions prevail' refer to conditions in importing and exporting countries, or only to conditions in exporting countries. The reply of the United States was to the effect that it interpreted that phrase as referring to both the exporting countries and importing countries and as between exporting countries. . . . At no point in the appeal was that assumption challenged by Venezuela or Brazil. . . .

The assumption on which all the participants proceeded is buttressed by the fact that the chapeau says that '*nothing in this Agreement* shall be construed to prevent the adoption or enforcement by any contracting party of measures . . .' The exceptions listed in Article XX thus relate to all of the obligations under the *General Agreement*: the national treatment obligation and the most-favoured-nation obligation, of course, but others as well. Effect is more easily given to the words 'nothing in this Agreement', and Article XX as a whole including its chapeau more easily integrated into the remainder of the *General Agreement*, if the chapeau is taken to mean that the standards it sets forth are applicable to all of the situations in which an allegation of a violation of a substantive obligation has been made and one of the exceptions contained in Article XX has in turn been claimed.

[W]e see no need to decide the matter of the field of application of the standards set forth in the chapeau nor to make a ruling at variance with the common understanding of the participants.[828]"[829]

589. In *US – Shrimp*, the Appellate Body confirmed its finding in *US – Gasoline* on the type of discrimination covered by the chapeau Article XX:

"In *United States – Gasoline*, we accepted the assumption of the participants in that appeal that such discrimination could occur not only between different exporting Members, but also between exporting Members and the importing Member concerned."[830]

(iii) Standard of discrimination

590. The Appellate Body on *US – Gasoline* considered the appropriate discrimination standard relevant under the chapeau Article XX and held that this standard must be different from the standard applied under Article III:4:

"The enterprise of applying Article XX would clearly be an unprofitable one if it involved no more than applying the standard used in finding that the baseline establishment rules were inconsistent with Article III:4. That would also be true if the finding were one of inconsistency with some other substantive rule of the *General Agreement*. The provisions of the chapeau cannot logically refer to the same standard(s) by which a violation of a substantive rule has been determined to have occurred. To proceed down that path would be both to empty the chapeau of its contents and to deprive the exceptions in paragraphs (a) to (j) of meaning. Such recourse would also confuse the question of whether inconsistency with a substantive rule existed, with the further and separate question arising under the chapeau of Article XX as to whether that inconsistency was nevertheless justified. One of the corollaries of the 'general rule of interpretation' in the *Vienna Convention* is that interpretation must give meaning and effect to all the terms of a treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility.

The chapeau, it will be seen, prohibits such application

---

[826] (*footnote original*) Appellate Body Report on *US – Gasoline*, pp. 23–24.

[827] Appellate Body Report on *US – Shrimp*, para. 150.

[828] (*footnote original*) We note in this connection that two previous panels had occasion to apply the chapeau. In *US – Spring Assemblies*, the panel had before it a ban on imports, and an exclusion order of the United States International Trade Commission, of certain automotive spring assemblies which the Commission had found, under Section 337 of the Tariff Act of 1930, to have infringed valid United States patents. The panel there held that the exclusion order had *not* been applied in a manner which would constitute a means of "arbitrary or unjustifiable discrimination against countries where the same conditions prevail," because that order was directed against imports of infringing assemblies "from all foreign sources, and not just from Canada." At the same time, the same order was also examined and found *not* to be "a disguised restriction on international trade." Id., paras. 54–56. See also *US – Tuna (EEC)*, para. 4.8.

It may be observed that the term "countries" in the chapeau is textually unqualified; it does not say "foreign countries", as did Article 4 of the 1927 League of Nations *International Convention for the Abolition of Import and Export Prohibitions and Restrictions*, 97 L.N.T.S. 393. Neither does the chapeau say "third countries" as did, *e.g.*, bilateral trade agreements negotiated by the United States under the 1934 *Reciprocal Trade Agreements Act*; *e.g.* the *Trade Agreement between the United States of America and Canada*, 15 November 1935, 168 L.N.T.S. 356 (1936). These earlier treaties are here noted, not as pertaining to the *travaux preparatoires* of the *General Agreement*, but simply to show how in comparable treaties, a particular intent was expressed with words not found in printer's ink in the *General Agreement*.

[829] Appellate Body Report on *US – Gasoline*, pp. 23–24.

[830] Appellate Body Report on *US – Shrimp*, para. 150.

of a measure at issue (otherwise falling within the scope of Article XX(g)) as would constitute

(a) 'arbitrary discrimination' (between countries where the same conditions prevail);

(b) 'unjustifiable discrimination' (with the same qualifier); or

(c) 'disguised restriction' on international trade.

The text of the chapeau is not without ambiguity, including one relating to the field of application of the standards its contains: the arbitrary or unjustifiable discrimination standards and the disguised restriction on international trade standard. It may be asked whether these standards do not have different fields of application."[831]

591. After noting that "[t]he enterprise of applying Article XX would clearly be an unprofitable one if it involved no more than applying the standard used in finding that the baseline establishment rules were inconsistent with Article III:4" as referenced in paragraph 590 above, the Appellate Body on *US – Gasoline* examined the United States conduct with respect to other Members' governments and its failure to consider the costs imposed by its measures upon foreign refiners. The Appellate Body then held that these "two omissions go well beyond what was necessary for the Panel to determine that a violation of Article III:4 had occurred in the first place":

"We have above located two omissions on the part of the United States: to explore adequately means, including in particular cooperation with the governments of Venezuela and Brazil, of mitigating the administrative problems relied on as justification by the United States for rejecting individual baselines for foreign refiners; and to count the costs for foreign refiners that would result from the imposition of statutory baselines. In our view, these two omissions go well beyond what was necessary for the Panel to determine that a violation of Article III:4 had occurred in the first place. The resulting discrimination must have been foreseen, and was not merely inadvertent or unavoidable. In the light of the foregoing, our conclusion is that the baseline establishment rules in the Gasoline Rule, in their application, constitute 'unjustifiable discrimination' and a 'disguised restriction on international trade.' We hold, in sum, that the baseline establishment rules, although within the terms of Article XX(g), are not entitled to the justifying protection afforded by Article XX as a whole."[832]

592. In *US – Shrimp*, the Appellate Body listed three elements of "arbitrary or unjustifiable discrimination" within the meaning of the chapeau of Article XX. See also paragraph 587 above. In respect of the first element, it reiterated its findings from *US – Gasoline* concerning the difference in discrimination under the chapeau of Article XX and other GATT provisions:

"As we stated in *United States – Gasoline*, the nature and quality of this discrimination is different from the discrimination in the treatment of products which was already found to be inconsistent with one of the substantive obligations of the GATT 1994, such as Articles I, III or XI.[833]"[834]

(iv) Examples of arbitrary and unjustifiable discrimination

593. In *US – Shrimp*, in analysing the United States measure at issue in the light of the chapeau of Article XX, the Appellate Body noted the "intended and actual coercive effect on other governments" to "adopt *essentially the same* policy" as the United States:

"Perhaps the most conspicuous flaw in this measure's application relates to its intended and actual coercive effect on the specific policy decisions made by foreign governments, Members of the WTO. Section 609, in its application, is, in effect, an economic embargo which requires *all other exporting Members*, if they wish to exercise their GATT rights, to adopt *essentially the same* policy (together with an approved enforcement program) as that applied to, and enforced on, United States domestic shrimp trawlers."[835]

594. The Appellate Body on *US – Shrimp* acknowledged that "the United States ... applie[d] a uniform standard throughout its territories regardless of the particular conditions existing in certain parts of the country"[836], but held that such a uniform standard cannot be permissible in international trade relations. The Appellate Body held that "discrimination exists", *inter alia*, "when the application of the measure at issue does not allow for any inquiry into the appropriateness of the regulatory programme for the conditions prevailing in those exporting countries":

"It may be quite acceptable for a government, in adopting and implementing a domestic policy, to adopt a single standard applicable to all its citizens throughout that country. However, it is not acceptable, in international trade relations, for one WTO Member to use an economic embargo to *require* other Members to adopt essentially the same comprehensive regulatory program, to achieve a certain policy goal, as that in force within that Member's territory, *without* taking into consideration different conditions which may occur in the territories of those other Members.

[831] Appellate Body Report on *US – Gasoline*, p. 23.
[832] Appellate Body Report on *US – Gasoline*, pp. 28–29.
[833] (*footnote original*) In *US – Gasoline*, p. 23, we stated: "The provisions of the chapeau cannot logically refer to the same standard(s) by which a violation of a substantive rule has been determined to have occurred."
[834] Appellate Body Report on *US – Shrimp*, para. 150.
[835] Appellate Body Report on *US – Shrimp*, para. 161.
[836] Appellate Body Report on *US – Shrimp*, para. 164.

> Furthermore, when this dispute was before the Panel and before us, the United States did not permit imports of shrimp harvested by commercial shrimp trawl vessels using TEDs comparable in effectiveness to those required in the United States if those shrimp originated in waters of countries not certified under Section 609. In other words, *shrimp caught using methods identical to those employed in the United States* have been excluded from the United States market solely because they have been caught in waters of *countries that have not been certified by the United States*. The resulting situation is difficult to reconcile with the declared policy objective of protecting and conserving sea turtles. This suggests to us that this measure, in its application, is more concerned with effectively influencing WTO Members to adopt essentially the same comprehensive regulatory regime as that applied by the United States to its domestic shrimp trawlers, even though many of those Members may be differently situated. We believe that discrimination results not only when countries in which the same conditions prevail are differently treated, but also when the application of the measure at issue does not allow for any inquiry into the appropriateness of the regulatory program for the conditions prevailing in those exporting countries."[837]

595. The Appellate Body on *US – Shrimp* further criticised the "single, rigid and unbending requirement" that countries applying for certification – required under the United States measure at issue in order to import shrimps into the United States – were faced with. The Appellate Body also noted a lack of flexibility in how officials were making the determination for certification:

> "Section 609, in its application, imposes a single, rigid and unbending requirement that countries applying for certification under Section 609(b)(2)(A) and (B) adopt a comprehensive regulatory program that is essentially the same as the United States program, without inquiring into the appropriateness of that program for the conditions prevailing in the exporting countries. Furthermore, there is little or no flexibility in how officials make the determination for certification pursuant to these provisions. In our view, this rigidity and inflexibility also constitute 'arbitrary discrimination' within the meaning of the chapeau."[838]

596. Another aspect which the Appellate Body on *US – Shrimp* considered in determining whether the United States measure at issue constituted "arbitrary or unjustifiable discrimination between countries where the same conditions prevail" was the concept of "due process". The Appellate Body found that the procedures under which United States authorities were granting the certification which foreign countries were required to obtain in order for their nationals to import shrimps into the United States were "informal" and "casual" and not "transparent" and "predictable:

> "[W]ith respect to neither type of certification under [the measure at issue requiring certification] is there a transparent, predictable certification process that is followed by the competent United States government officials. The certification processes under Section 609 consist principally of administrative *ex parte* inquiry or verification by staff of the Office of Marine Conservation in the Department of State with staff of the United States National Marine Fisheries Service. With respect to both types of certification, there is no formal opportunity for an applicant country to be heard, or to respond to any arguments that may be made against it, in the course of the certification process before a decision to grant or to deny certification is made. Moreover, no formal written, reasoned decision, whether of acceptance or rejection, is rendered on applications for either type of certification, whether under Section 609(b)(2)(A) and (B) or under Section 609(b)(2)(C). Countries which are granted certification are included in a list of approved applications published in the Federal Register; however, they are not notified specifically. Countries whose applications are denied also do not receive notice of such denial (other than by omission from the list of approved applications) or of the reasons for the denial. No procedure for review of, or appeal from, a denial of an application is provided.
>
> The certification processes followed by the United States thus appear to be singularly informal and casual, and to be conducted in a manner such that these processes could result in the negation of rights of Members. There appears to be no way that exporting Members can be certain whether the terms of Section 609, in particular, the 1996 Guidelines, are being applied in a fair and just manner by the appropriate governmental agencies of the United States. It appears to us that, effectively, exporting Members applying for certification whose applications are rejected are denied basic fairness and due process, and are discriminated against, *vis-à-vis* those Members which are granted certification."[839]

597. The Panel on *EC – Tariff Preferences* analysed whether the European Communities' Drug Arrangements were justified under Article XX(b). As one of the steps in assessing this, the Panel examined whether the measure was applied in a manner consistent with the chapeau of Article XX. Specifically, the Panel looked at the inclusion of Pakistan, as of 2002, as a beneficiary of the Drug Arrangements preference scheme and the exclusion of Iran, and found that no objective criteria could be discerned in the selection process. Consequently, the Panel was not satisfied that conditions in the 12 beneficiary countries were the same or similar and that they were not the same with those prevailing in other countries:

---

[837] Appellate Body Report on *US – Shrimp*, paras. 164–165.
[838] Appellate Body Report on *US – Shrimp*, para. 177.
[839] Appellate Body Report on *US – Shrimp*, paras. 180–181.

"First, the Panel notes the European Communities' argument that the assessment of the gravity of the drug issue is based on available statistics on the production and/or trafficking of drugs in each country. The Panel notes, however, from the statistics provided by the European Communities itself in support of its argument that the 12 beneficiaries are the most seriously drug-affected countries, that the seizures of opium and of heroin in Iran are substantially higher than, for example, the seizures of these drugs in Pakistan throughout the period 1994–2000.[840] Iran is not covered as a beneficiary under the Drug Arrangements. Such treatment of Iran, and possibly of other countries, in the view of the Panel, is discriminatory. Bearing in mind the well-established rule that it is for the party invoking Article XX to demonstrate the consistency of its measure with the chapeau, the Panel notes that the European Communities has not provided any justification for such discriminatory treatment *vis-à-vis* Iran. Moreover, the European Communities has not shown that such discrimination is not arbitrary and not unjustifiable as between countries where the same conditions prevail.

Second, the Panel also notes, based upon statistics provided by the European Communities, that seizures of opium in Pakistan were 14,663 kilograms in 1994, as compared to 8,867 kilograms in 2000. Seizures of heroin in Pakistan were 6,444 kilograms in 1994 and 9,492 kilograms in 2000. The overall drug problem in Pakistan in 1994 and thereafter was no less serious than in 2000. The Panel considers that the conditions in terms of the seriousness of the drug problem prevailing in Pakistan in 1994 and thereafter were very similar to those prevailing in Pakistan in the year 2000. Accordingly, the Panel fails to see how the application of the same claimed objective criteria justified the exclusion of Pakistan prior to 2002 and, at the same time, its inclusion as of that year. And, given that the Panel cannot discern any change in the criteria used for the selection of beneficiaries under the Drug Arrangements since 1990, the Panel cannot conclude that the criteria applied for the inclusion of Pakistan are objective or non-discriminatory. Moreover, the European Communities has provided no evidence on the existence of any such criteria.

. . .

Given the European Communities' unconvincing explanations as to why it included Pakistan in the Drug Arrangements in 2002 and the fact that Iran was not included as a beneficiary, the Panel is unable to identify the specific criteria and the objectivity of such criteria the European Communities has applied in its selection of beneficiaries under the Drug Arrangements.

. . .

The Panel finds no evidence to conclude that the conditions in respect of drug problems prevailing in the 12 beneficiary countries are the same or similar, while the conditions prevailing in other drug-affected developing countries not covered by any other preferential tariff schemes are *not* the same as, or sufficiently similar to, the prevailing conditions in the 12 beneficiary countries."[841]

(c) "disguised restriction on international trade"

598. In *US – Gasoline*, the Appellate Body held that the concepts of "arbitrary or unjustifiable discrimination" and "disguised restriction on international trade" were related concepts which "imparted meaning to one another":

> "'Arbitrary discrimination', 'unjustifiable discrimination' and 'disguised restriction' on international trade may, accordingly, be read side-by-side; they impart meaning to one another. It is clear to us that 'disguised restriction' includes disguised *discrimination* in international trade. It is equally clear that *concealed* or *unannounced* restriction or discrimination in international trade does *not* exhaust the meaning of 'disguised restriction.' We consider that 'disguised restriction', whatever else it covers, may properly be read as embracing restrictions amounting to arbitrary or unjustifiable discrimination in international trade taken under the guise of a measure formally within the terms of an exception listed in Article XX. Put in a somewhat different manner, the kinds of considerations pertinent in deciding whether the application of a particular measure amounts to 'arbitrary or unjustifiable discrimination', may also be taken into account in determining the presence of a 'disguised restriction' on international trade. The fundamental theme is to be found in the purpose and object of avoiding abuse or illegitimate use of the exceptions to substantive rules available in Article XX."[842]

599. See also the excerpt from the report of the Appellate Body in *US – Gasoline* referenced in paragraph 591 above.

(d) Reference to GATT practice

600. With respect to GATT practice on the Preamble of Article XX, see GATT Analytical Index, pages 563–565.

3. Paragraph (b)

(a) Three-tier test

(i) General

601. The Panel on *US – Gasoline*, in a finding not reviewed by the Appellate Body, presented the following three-tier test in respect of Article XX(b):

---

[840] First written submission of the European Communities, para. 123. In this regard, the Panel recalls that, according to the European Communities, its inclusion of Pakistan in the Drug Arrangements is due to the seriousness of drug trafficking, based on statistics of drug seizures, not of drug production. First written submission of the European Communities, para. 136.

[841] Panel Report on *EC – Tariff Preferences*, paras. 7.228–7.229, 7.232 and 7.234.

[842] Appellate Body Report on *US – Gasoline*, p. 25.

"[A]s the party invoking an exception the United States bore the burden of proof in demonstrating that the inconsistent measures came within its scope. The Panel observed that the United States therefore had to establish the following elements:

(1) that the *policy* in respect of the measures for which the provision was invoked fell within the range of policies designed to protect human, animal or plant life or health;

(2) that the inconsistent measures for which the exception was being invoked were *necessary* to fulfil the policy objective; and

(3) that the measures were applied in conformity with the requirements of the *introductory clause* of Article XX.

In order to justify the application of Article XX(b), all the above elements had to be satisfied."[843]

602. In *EC – Asbestos*, the Panel followed the approach used by the Panel on *US – Gasoline* and indicated that it "must first establish whether the policy in respect of the measure for which the provisions of Article XX(b) were invoked falls within the range of policies designed to protect human life or health".[844]

603. The Panel on *EC – Tariff Preferences* also followed the same approach as the Panels on *US – Gasoline* and *EC – Asbestos*:

"In *EC – Asbestos*, the panel followed the same approach as used in *US – Gasoline*: 'We must first establish whether the policy in respect of the measure for which the provisions of Article XX(b) were invoked falls within the range of policies designed to protect human life or health'.[845]

Following this jurisprudence, the Panel considers that, in order to determine whether the Drug Arrangements are justified under Article XX(b), the Panel needs to examine: (i) whether the policy reflected in the measure falls within the range of policies designed to achieve the objective of or, put differently, or whether the policy objective is for the purpose of, 'protect[ing] human . . . life or health'. In other words, whether the measure is one designed to achieve that health policy objective; (ii) whether the measure is 'necessary' to achieve said objective; and (iii) whether the measure is applied in a manner consistent with the chapeau of Article XX."[846]

(ii) Policy objective of the measure at issue

604. In determining whether the policy objective of the European Communities' Drug Arrangements was the protection of human life or health, the Panel on *EC – Tariff Preferences* analysed the design and the structure of the GSP Regulation. However, it found no references to the alleged policy objective of protection of human life and health:

"Examining the design and structure of Council Regulation 2501/2001 and the Explanatory Memorandum of the Commission, the Panel finds nothing in either of these documents relating to a policy objective of protecting the health of European Communities citizens. The only objectives set out in the Council Regulation (in the second preambular paragraph) are 'the objectives of development policy, in particular the eradication of poverty and the promotion of sustainable development in the developing countries'. The Explanatory Memorandum states that '[t]hese objectives are to favour sustainable development, so as to improve the conditions under which the beneficiary countries are combatting drug production and trafficking'.[847]

Examining the structure of the Regulation, the Panel notes that Title I provides definitions of 'beneficiary countries' and the scope of product coverage for various categories of beneficiaries. Title II then specifies the methods and levels of tariff cuts for the various preference schemes set out in the Regulation, including for the General Arrangements, Special Incentive Arrangements, Special Arrangements for Least Developed Countries and Special Arrangements to Combat Drug Production and Trafficking. Title II also provides Common Provisions on graduation. Title III deals with conditions for eligibility for special arrangements on labour rights and the environment. Title IV provides only that the European Communities should monitor and evaluate the effects of the Drug Arrangements on drug production and trafficking in the beneficiary countries. There are other titles dealing with temporary withdrawal and safeguard provisions, as well as procedural requirements. From an examination of the whole design and structure of this Regulation, the Panel finds nothing linking the preferences to the protection of human life or health in the European Communities."[848]

605. In addressing European Communities' argument that providing market access is a necessary component of the United Nations' comprehensive international strategy to fight drug problem by promoting alternative development, the Panel on *EC – Tariff Preferences* stated that while alternative development is one component of that strategy, providing market access is not itself a significant component of the comprehensive strategy. The Panel went on to state that even if it were assumed that market access was an important component of the international strategy, the European Communities had not established a link between the market access improvement and the protection of human health in the European Communities:

[843] Panel Report on *US – Gasoline*, para. 6.20.
[844] Panel Report on *EC – Asbestos*, para. 8.184.
[845] Panel Report, *EC – Asbestos*, para. 8.184.(*footnote original*)
[846] Panel Report on EC tariff preferences, paras. 7.198–7.199.
[847] (*footnote original*) Explanatory Memorandum, para. 35, Exhibit India-7.
[848] Panel Report on *EC – Tariff Preferences*, paras. 7.201–202.

> "From its examination of these international instruments, including the 1988 Convention and the 1998 Action Plan, the Panel understands that alternative development is one component of the comprehensive strategy of the UN to combat drugs. The Panel has no doubt that market access plays a supportive role in relation to alternative development, but considers that market access is not itself a significant component of this comprehensive strategy. As the Panel understands it, the alternative development set out in the Action Plan depends more on the long-term political and financial commitment of both the governments of the affected countries and the international community to supporting integrated rural development, than on improvements in market access.
>
> Even assuming that market access is an important component of the international strategy to combat the drug problem, there was no evidence presented before the Panel to suggest that providing improved market access is aimed at protecting human life or health in drug importing countries. Rather, all the relevant international conventions and resolutions suggest that alternative development, including improved market access, is aimed at helping the countries seriously affected by drug production and trafficking to move to sustainable development alternatives."[849]

(iii) "necessary"

Aspect of measure to be justified as "necessary"

606. In *US – Gasoline*, the Panel addressed the question of which specific aspect of a measure under scrutiny should be justified as "necessary" within the meaning of paragraph (b) of Article XX. The Panel held that "it was not the necessity of the policy goal that was to be examined, but whether or not it was necessary that imported gasoline be effectively prevented from benefiting from as favourable sales conditions as were afforded by an individual baseline tied to the producer of a product". The Appellate Body did not address the Panel's findings on paragraph (b). However, in addressing the Panel's findings on paragraph (g), more specifically the Panel's statements concerning the terms "relating to" and "primarily aimed at", the Appellate Body was critical that "the Panel [had] asked itself whether the 'less favourable treatment' of imported gasoline was 'primarily aimed at' the conservation of natural resources, rather than whether the 'measure', i.e. the baseline establishment rules, were 'primarily aimed at' conservation of clean air." The Appellate Body found that "the Panel . . . was in error in referring to its legal conclusion on Article III:4 instead of the measure in issue."[850]

607. In *EC – Tariff Preferences*, the Panel, in considering the extent to which the European Communities' Drug Arrangements were necessary in achieving the European Communities' stated health objective, referred to the approach used by the Appellate Body on *Korea – Various Measures on Beef*. The Panel found that the GSP benefits decreased during the period 1 July 1999 to 31 December 2001 and that the continuing contribution of the Drug Arrangements to the EC's health objective was therefore doubtful:

> "The Panel recalls the Appellate Body ruling in *Korea – Various Measures on Beef* that 'the term "necessary" refers, in our view, to a range of degrees of necessity. At one end of this continuum lies 'necessary' understood as 'indispensable'; at the other end, is 'necessary' taken to mean as 'making a contribution to'. We consider that a 'necessary' measure is, in this continuum, located significantly closer to the pole of 'indispensable' than to the opposite pole of simply 'making a contribution to'.[851] In order to determine where the Drug Arrangements are situated along this continuum between 'contribution to' and 'indispensable', the Panel is of the view that it should determine the extent to which the Drug Arrangements contribute to the European Communities' health objective. This requires the Panel to assess the benefits of the Drug Arrangements in achieving the objective of protecting life or health in the European Communities.
>
> The Panel notes the Report of the Commission pursuant to Article 31 of Council Regulation No. 2820/98 of 21 December 1998 applying a multiannual scheme of generalized tariff preferences for the period 1 July 1999 to 31 December 2001. The assessment of the effects of the Drug Arrangements in this report reveals that the product coverage under the Drug Arrangements decreased by 31 per cent from 1999 through 2001. It also shows that the volume of imports from the beneficiary countries under the Drug Arrangements decreased during the same period. As the Panel understands it, this decrease in product coverage and in imports from the beneficiaries is due to the reduction to zero – or close to zero – of the MFN bound duty rates on certain products, including coffee products.
>
> The Panel considers that the above-referenced decreases in product coverage and depth of tariff cuts reflect a long-term trend of GSP benefits decreasing as Members reduce their import tariffs towards zero in the multilateral negotiations. Given this decreasing trend of GSP benefits, the contribution of the Drug Arrangements to the realization of the European Communities' claimed health objective is insecure for the future. To the Panel, it is difficult to deem such measure as 'necessary' in the sense of Article XX(b). Moreover, given that the benefits under the Drug Arrangements themselves are decreasing, the Panel cannot come out to the conclusion that

[849] Panel Report on *EC – Tariff Preferences*, paras. 7.206–7.207.
[850] Appellate Body Report on *US – Gasoline*, p. 16.
[851] (*footnote original*) Appellate Body Report, *Korea – Various Measures on Beef*, para. 161.

the 'necessity' of the Drug Arrangements is closer to the pole of 'indispensable' than to that of 'contributing to' in achieving the objective of protecting human life or health in the European Communities."[852]

608. The Panel on *EC – Tariff Preferences* also considered the temporary suspension mechanism in the EC's GSP Regulation as well as its application to Myanmar and found that with one or more drug- producing or trafficking countries outside of the scheme, the Drug Arrangements are not contributing sufficiently to the reduction of drug supply to the EC's market:

"Assuming a beneficiary country under the Drug Arrangements was not ensuring sufficient customs controls on export of drugs, or was infringing the objectives of an international fisheries conservation convention, the European Communities could then suspend the tariff preferences under the Drug Arrangements to this country, for reasons unrelated to protecting human life or health. Given that this beneficiary would be a seriously drug-affected country, the suspension of the tariff preferences would arrest the European Communities' support to alternative development in that beneficiary and therefore also stop efforts to reduce the supply of illicit drugs into the European Communities. The whole design of the EC Regulation does not support the European Communities' contention that it is 'necessary' to the protection of human life and health in the European Communities, because such design of the measure does not contribute sufficiently to the achievement of the health objective.

The European Communities confirms that while Myanmar is one of the world's leading producers of opium, it is not necessary to separately include this country under the Drug Arrangements since it is already accorded preferential tariff treatment as a least-developed country. The Panel notes that the European Communities has suspended tariff preferences for Myanmar. . . .

Recalling that the European Communities confirms that it is required to continue its suspension of tariff preferences for Myanmar through the expiration of the EC Regulation on 31 December 2004, the Panel notes that any of the 12 beneficiaries is also potentially subject to similar suspension under the same Regulation, regardless of the seriousness of the drug problems in that country. With one or more of the main drug-producing or trafficking countries outside the scheme, it is difficult to see how the Drug Arrangements are in fact contributing sufficiently to the reduction of drug supply into the European Communities' market to qualify as a measure necessary to achieving the European Communities' health objective."[853]

Treatment of scientific data and risk assessment

609. In *EC – Asbestos*, the Panel found that the measure at issue, a French ban on the manufacture, importation and exportation, and domestic sale and transfer of certain asbestos products including products containing chrysotile fibres, was inconsistent with *GATT* Article III:4, but justified under Article XX(b) in light of the underlying policy of prohibiting chrysotile asbestos in order to protect human life and health. The Appellate Body rejected Canada's argument under Article XX(b) that the Panel erred in law by deducing that chrysotile-cement products pose a risk to human life or health. The Appellate Body referred to Article 11 of the DSU and its reports on *US – Wheat Gluten*[854] and *Korea – Alcoholic Beverages*[855], and stated:

"The Panel enjoyed a margin of discretion in assessing the value of the evidence, and the weight to be ascribed to that evidence. The Panel was entitled, in the exercise of its discretion, to determine that certain elements of evidence should be accorded more weight than other elements – that is the essence of the task of appreciating the evidence."[856]

610. Further, in *EC – Asbestos*, Canada argued that Article 11 of the *DSU* requires that the scientific data must be assessed in accordance with the principle of the balance of probabilities, and that in particular where the evidence is divergent or contradictory, a Panel must take a position as to the respective weight of the evidence by virtue of the principle of the preponderance of the evidence. The Appellate Body rejected this argument, pointing out:

"As we have already noted, '[w]e cannot second-guess the Panel in appreciating either the evidentiary value of . . . studies or the consequences, if any, of alleged defects in [the evidence]'.[857] And, as we have already said, in this case, the Panel's appreciation of the evidence remained well within the bounds of its discretion as the trier of facts.

In addition, in the context of the *SPS Agreement*, we have said previously, in *European Communities – Hormones,* that 'responsible and representative governments may act in good faith on the basis of what, at a given time, may be a *divergent* opinion coming from qualified and respected sources.'[858] (emphasis added) In justifying a measure under Article XX(b) of the GATT 1994, a Member may also rely, in good faith, on scientific sources which, at that time, may represent a divergent,

[852] Panel Report on *EC – Tariff Preferences*, paras. 7.211–7.213.
[853] Panel Report on *EC – Tariff Preferences*, paras. 7.216–7.218.
[854] The Appellate Body cited Appellate Body Report on *US – Wheat Gluten*, para. 151.
[855] The Appellate Body cited Appellate Body Report on *Korea – Alcoholic Beverages*, para. 161.
[856] Appellate Body Report on *EC – Asbestos*, para. 161. With respect to the standard of review in general, see Article 11 of the Chapter on the *DSU*.
[857] (*footnote original*) Appellate Body Report on *Korea – Alcoholic Beverages*, para. 161.
[858] (*footnote original*) Appellate Body Report on *EC – Hormones*, para. 194.

but qualified and respected, opinion. A Member is not obliged, in setting health policy, automatically to follow what, at a given time, may constitute a majority scientific opinion. Therefore, a panel need not, necessarily, reach a decision under Article XX(b) of the GATT 1994 on the basis of the 'preponderant' weight of the evidence."[859]

611. In *EC – Asbestos*, the Appellate Body also rejected Canada's argument that in examining whether the French ban on manufacture, sale and imports of certain asbestos products including chrysotile-cement products was justified under *GATT* Article XX(b), the Panel should have quantified the risk associated with chrysotile-cement products:

"As for Canada's second argument, relating to 'quantification' of the risk, we consider that, as with the *SPS Agreement*, there is no requirement under Article XX(b) of the GATT 1994 to *quantify*, as such, the risk to human life or health.[860] A risk may be evaluated either in quantitative or qualitative terms. In this case, contrary to what is suggested by Canada, the Panel assessed the nature and the character of the risk posed by chrysotile-cement products. The Panel found, on the basis of the scientific evidence, that 'no minimum threshold of level of exposure or duration of exposure has been identified with regard to the risk of pathologies associated with chrysotile, except for asbestosis.' The pathologies which the Panel identified as being associated with chrysotile are of a very serious nature, namely lung cancer and mesothelioma, which is also a form of cancer. Therefore, we do not agree with Canada that the Panel merely relied on the French authorities' 'hypotheses' of the risk."[861]

612. The Appellate Body also rejected Canada's argument that the Panel erroneously postulated that the level of health protection inherent in the measure was a halt to the spread of asbestos-related health risks, because it did not take into consideration the risk associated with the use of substitute products without a framework for controlled use. The Appellate Body stated:

"[W]e note that it is undisputed that WTO Members have the right to determine the level of protection of health that they consider appropriate in a given situation. France has determined, and the Panel accepted, that the chosen level of health protection by France is a 'halt' to the spread of *asbestos*-related health risks. By prohibiting all forms of amphibole asbestos, and by severely restricting the use of chrysotile asbestos, the measure at issue is clearly designed and apt to achieve that level of health protection. Our conclusion is not altered by the fact that PCG fibres might pose a risk to health. The scientific evidence before the Panel indicated that the risk posed by the PCG fibres is, in any case, *less* than the risk posed by chrysotile asbestos fibres, although that evidence did *not* indicate that the risk posed by PCG fibres is non-existent. Accordingly, it seems to us perfectly legitimate for a Member to seek to halt the spread of a highly risky product while allowing the use of a less risky product in its place."[862]

"Reasonably available" alternatives

613. In *EC – Asbestos*, the Appellate Body confirmed that a measure is "necessary" within the meaning of *GATT* Article XX(b) "if an alternative measure which [a Member] could reasonably be expected to employ and which is not inconsistent with other GATT provisions is [not] available to it." The Appellate Body on *EC – Asbestos* then considered Canada's claim that the Panel had erroneously found that "controlled use" was not a reasonably available alternative to the measure at issue. In this connection, Canada argued that the Appellate Body itself had held in *US – Gasoline* that an alternative measure can only be ruled out if it is shown to be impossible to implement. The Appellate Body rejected Canada's argument, but began its analysis by acknowledging that "administrative difficulties" did not render a measure not "reasonably available":

"We certainly agree with Canada that an alternative measure which is impossible to implement is not 'reasonably available'. But we do not agree with Canada's reading of either the panel report or our report in *United States – Gasoline*. In *United States – Gasoline*, the panel held, in essence, that an alternative measure did not *cease* to be 'reasonably' available simply because the alternative measure involved *administrative difficulties* for a Member.[863] The panel's findings on this point were not appealed, and, thus, we did not address this issue in that case."

614. The Appellate Body then found that "several factors must be taken into account" in ascertaining whether a suggested alternative measure is "reasonably available". In this context, the Appellate Body mentioned, *inter alia*, the importance of the value pursued by the measure at issue:

"Looking at this issue now, we believe that, in determining whether a suggested alternative measure is 'reasonably available', several factors must be taken into account, besides the difficulty of implementation. In *Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes*, the panel made the following observations on the applicable standard for evaluating whether a measure is 'necessary' under Article XX(b):

[859] Appellate Body Report on *EC – Asbestos*, paras. 177–178.
[860] (*footnote original*) Appellate Body Report on *EC – Hormones*, para. 186.
[861] Appellate Body Report on *EC – Asbestos*, para. 167.
[862] Appellate Body Report on *EC – Asbestos*, para. 168.
[863] (*footnote original*) See Panel Report on *US – Gasoline*, paras. 6.26 and 6.28.

> 'The import restrictions imposed by Thailand could be considered to be "necessary" in terms of Article XX(b) only if there were no alternative measure consistent with the General Agreement, or less inconsistent with it, which Thailand could *reasonably be expected to employ to achieve its health policy objectives*.'[864] (emphasis added)

In our Report in *Korea – Beef*, we addressed the issue of 'necessity' under Article XX(d) of the GATT 1994.[865] In that appeal, we found that the panel was correct in following the standard set forth by the panel in *United States – Section 337 of the Tariff Act of 1930*:

> 'It was clear to the Panel that a contracting party cannot justify a measure inconsistent with another GATT provision as 'necessary' in terms of Article XX(d) if an alternative measure which it could reasonably be expected to employ and which is not inconsistent with other GATT provisions is available to it. By the same token, in cases where a measure consistent with other GATT provisions is not reasonably available, a contracting party is bound to use, among the measures reasonably available to it, that which entails the least degree of inconsistency with other GATT provisions.'[866]

We indicated in *Korea – Beef* that one aspect of the 'weighing and balancing process . . . comprehended in the determination of whether a WTO-consistent alternative measure' is reasonably available is the extent to which the alternative measure 'contributes to the realization of the end pursued'.[867] In addition, we observed, in that case, that '[t]he more vital or important [the] common interests or values' pursued, the easier it would be to accept as 'necessary' measures designed to achieve those ends.[868] In this case, the objective pursued by the measure is the preservation of human life and health through the elimination, or reduction, of the well-known, and life-threatening, health risks posed by asbestos fibres. The value pursued is both vital and important in the highest degree."[869]

615. The Appellate Body then examined the remaining question of "whether there is an alternative measure that would achieve the same end and that is less restrictive of trade than a prohibition,"[870] i.e. "whether France could reasonably be expected to employ 'controlled use' practices to achieve its chosen level of health protection – a halt in the spread of asbestos-related health risks":[871]

> "In our view, France could not reasonably be expected to employ any alternative measure if that measure would involve a continuation of the very risk that the Decree seeks to 'halt'. Such an alternative measure would, in effect, prevent France from achieving its chosen level of health protection. On the basis of the scientific evidence before it, the Panel found that, in general, the efficacy of 'controlled use' remains to be demonstrated. Moreover, even in cases where 'controlled use' practices are applied 'with greater certainty', the scientific evidence suggests that the level of exposure can, in some circumstances, still be high enough for there to be a 'significant residual risk of developing asbestos-related diseases.' The Panel found too that the efficacy of 'controlled use' is particularly doubtful for the building industry and for DIY enthusiasts, which are the most important users of cement-based products containing chrysotile asbestos.[872] Given these factual findings by the Panel, we believe that 'controlled use' would not allow France to achieve its chosen level of health protection by halting the spread of asbestos-related health risks. 'Controlled use' would, thus, not be an alternative measure that would achieve the end sought by France."[873]

(b) Reference to GATT practice

616. With respect to GATT practice under Article XX(b), see GATT Analytical Index, pages 565–573.

4. Paragraph (d)

(a) General

617. In *Korea – Various Measures on Beef*, the Appellate Body examined Korea's argument that the prohibition of retail sales of both domestic and imported beef products (the dual retail system) was designed to secure compliance with a consumer protection law, and thus, although in violation of Article III:4, nevertheless justified by Article XX(d). Referring to its Report on *US – Gasoline*, the Appellate Body set forth the following two elements for paragraph (d):

> "For a measure, otherwise inconsistent with GATT 1994, to be justified provisionally under paragraph (d) of Article XX, two elements must be shown. First, the measure must be one designed to 'secure compliance' with laws or regulations that are not themselves inconsistent with some provision of the GATT 1994. Second, the measure must be 'necessary' to secure such compliance. A Member who invokes Article XX(d) as a justification has the burden of demonstrating that these two requirements are met."[874]

(b) "necessary"

618. In *Argentina – Hides and Leather*, the disputed measures were certain collection and withholding mechanisms that Argentina had adopted to secure compliance with certain tax laws and to combat tax evasion. The disputing parties, Argentina and the European Communities had different views with regard to how the provision "necessary" in Article XX(d) should be interpreted. The European Communities claimed that a measure can only be "necessary" if there is no alternative, whereas Argentina argued that the Member claiming the "necessity" of a measure should be entitled a certain degree of discretion in that determination. The Panel refused to resolve this interpretative dispute[875], but taking into account *inter alia* the "general design and structure" of the measures, the Panel found that the arguments advanced by Argentina raised a presumption, not rebutted by the European Communities and accordingly held that the measures were "necessary":

> "[W]e are satisfied that Argentina has adduced argument and evidence sufficient to raise a presumption that the contested measures, in their general design and structure, are 'necessary' even on the European Communities' reading of that term. Argentina stresses the fact that tax evasion is common in its territory and that, against this background of low levels of tax compliance, tax authorities cannot expect to improve tax collection primarily through the pursuit of repressive enforcement strategies (e.g. aggressive criminal prosecution of tax offenders). In those circumstances, Argentina maintains, tax authorities must direct their efforts towards preventing tax evasion from occurring in the first place. According to Argentina, this is precisely what RG 3431 and RG 3543 are designed to accomplish.[876]
>
> The European Communities does not dispute that, in the circumstances of the present case, collection and withholding mechanisms are necessary to combat tax evasion.[877] Nor has the European Communities submitted other arguments or evidence which would rebut the presumption raised by Argentina in respect of the 'necessity' of RG 3431 and RG 3543.[878]
>
> In light of the foregoing, we conclude that, in view of their general design and structure, RG 3431 and RG 3543 are 'necessary' measures within the meaning of Article XX(d).
>
> Since it has thus been established that RG 3431 and RG 3543 satisfy all of the requirements set forth in Article XX(d), we further conclude that they enjoy provisional justification under the terms of Article XX(d)."[879]

619. In *Korea – Various Measures on Beef*, the Appellate Body attempted to situate the meaning of the term "necessary" within the context of Article XX(d) on a "continuum" stretching from "indispensable/of absolute necessity" to "making a contribution to". Furthermore, the Appellate Body emphasized the context in which the term "necessary" is found in Article XX(d) and held that in "assessing a measure claimed to be necessary to secure compliance of a WTO-consistent law or regulation [a treaty interpreter] may, in appropriate cases, take into account the relative importance of the common interests or values that the law or regulation to be enforced is intended to protect":

> "We believe that, as used in the context of Article XX(d), the reach of the word 'necessary' is not limited to that which is 'indispensable' or 'of absolute necessity' or 'inevitable'. Measures which are indispensable or of absolute necessity or inevitable to secure compliance certainly fulfil the requirements of Article XX(d). But other measures, too, may fall within the ambit of this exception. As used in Article XX(d), the term 'necessary' refers, in our view, to a range of degrees of necessity. At one end of this continuum lies 'necessary' understood as 'indispensable'; at the other end, is 'necessary' taken to mean as 'making a contribution to'. We consider that a 'necessary' measure is, in this continuum, located significantly closer to the pole of 'indispensable' than to the opposite pole of simply 'making a contribution to'.[880]
>
> In appraising the 'necessity' of a measure in these terms, it is useful to bear in mind the context in which 'necessary' is found in Article XX(d). The measure at stake has

[875] Panel Report on *Argentina – Hides and Leather*, para. 11.304.

[876] (*footnote original*) In our view, the presumption raised by Argentina of the existence of a relationship of necessity between Argentina's declared objective of securing compliance with the IVA Law and IG Law and the general design of RG 3431 and RG 3543 is not affected by the inconsistency of these measures with Article III:2, first sentence.

[877] (*footnote original*) See para. 8.258 of this report.

[878] (*footnote original*) It is true that the European Communities disputes that the higher rates applied to imported products pursuant to RG 3431 and RG 3543 are "necessary" in order to secure compliance with the IVA Law and IG Law. See e.g. EC First Oral Statement, at paras. 79, 82 and 84. We consider that this contention goes to the question of whether Argentina makes improper use of the exception set out in Article XX(d) and not to the question of whether RG 3431 and RG 3543, in light of their general design and structure, fall within the terms of Article XX(d). We therefore address the justifiability of applying higher rates to imported products when we appraise RG 3431 and RG 3543 under the chapeau of Article XX. This approach is in accordance with that followed by the Appellate Body in *United States – Gasoline*. See the Appellate Body Report on *United States – Gasoline*, *supra*, at pp. 19 and 25–29.

[879] Panel Report on *Argentina – Hides and Leather*, paras. 11.306 – 11.308.

[880] (*footnote original*) We recall that we have twice interpreted Article XX(g), which requires a measure "*relating* to the conservation of exhaustible natural resources". (emphasis added). This requirement is more flexible textually than the "necessity" requirement found in Article XX(d). We note that, under the more flexible "*relating to*" standard of Article XX(g), we accepted in *United States – Gasoline* a measure because it presented a "*substantial* relationship", (emphasis added) i.e., *a close and genuine* relationship of ends and means, with the conservation of clean air. *Supra*, footnote 98, p.19. In *United States – Shrimp* we accepted a measure because it was "*reasonably related*" to the protection and conservation of sea turtles. *Supra*, footnote 98, at para. 141.

to be 'necessary to ensure compliance with laws and regulations . . ., *including* those relating to customs enforcement, the enforcement of [lawful] monopolies …, the protection of patents, trade marks and copyrights, and the prevention of deceptive practices'. (emphasis added) Clearly, Article XX(d) is susceptible of application in respect of a wide variety of 'laws and regulations' to be enforced. It seems to us that a treaty interpreter assessing a measure claimed to be necessary to secure compliance of a WTO-consistent law or regulation may, in appropriate cases, take into account the relative importance of the common interests or values that the law or regulation to be enforced is intended to protect. The more vital or important those common interests or values are, the easier it would be to accept as 'necessary' a measure designed as an enforcement instrument.

. . .

In sum, determination of whether a measure, which is not 'indispensable', may nevertheless be 'necessary' within the contemplation of Article XX(d), involves in every case a process of weighing and balancing a series of factors which prominently include the contribution made by the compliance measure to the enforcement of the law or regulation at issue, the importance of the common interests or values protected by that law or regulation, and the accompanying impact of the law or regulation on imports or exports."[881]

620. In *Korea – Various Measures on Beef*, the Panel, in a finding upheld by the Appellate Body, did not accept Korea's argument for invoking an exception under Article XX(d) to justify a violation of Article III:4. Korea argued that it was "necessary to have domestic and imported beef sold through separate stores in order to counteract fraudulent practices prohibited by the *Unfair Competition Act*", the dual retail system.[882] Korea argued that due to the fact that imported beef was cheaper than domestic beef, "traders have a strong incentive to sell imported beef as domestic beef since by doing so they can profit from the higher sales price."[883] Korea adopted and implemented the dual retail system in 1990 and decided to abrogate the previous simultaneous sales system which had been in place since 1988 when imports of beef first resumed. Korea claimed further that, in view of the substantial costs to the government, it was not sustainable from an economic aspect to maintain continuous policing of the shops. When evaluating whether the adoption of the *Unfair Competition Act* fulfilled the "necessity" criterion in Article XX(d) the Panel stated the following:

"To demonstrate that the dual retail system is 'necessary', Korea has to convince the Panel that, contrary to what was alleged by Australia and the United States, no alternative measure consistent with the WTO Agreement is reasonably available at present in order to deal with misrepresentation in the retail beef market as to the origin of beef. The Panel considers that Korea has not discharged this burden for two inter-related reasons. First, Korea has not found it 'necessary' to establish 'dual retail systems' in order to prevent similar cases of misrepresentation of origin from occurring in other sectors of its domestic economy. Second, Korea has not shown to the satisfaction of the Panel that measures, other than a dual retail system, compatible with the WTO Agreement, are not sufficient to deal with cases of misrepresentation of origin involving imported beef."[884]

621. The Appellate Body on *Korea – Various Measures on Beef* further stated that a determination of whether a measure is necessary under Article XX(d), when that measure is not actually indispensable in achieving compliance with the law or regulation at issue, involves weighing and balancing different factors:

"In sum, determination of whether a measure, which is not 'indispensable', may nevertheless be 'necessary' within the contemplation of Article XX(d), involves in every case a process of weighing and balancing a series of factors which prominently include the contribution made by the compliance measure to the enforcement of the law or regulation at issue, the importance of the common interests or values protected by that law or regulation, and the accompanying impact of the law or regulation on imports or exports."[885]

622. In keeping with this interpretation, the Panel on *Canada – Wheat Exports and Grain Imports* undertook the weighing and balancing of various factors in the following manner:

"In applying the 'weighing and balancing' test, the Appellate Body in *Korea – Various Measures on Beef* and, subsequently, in *EC Asbestos* considered the importance of the value or interest pursued by the laws with which the challenged measure sought to secure compliance, whether the objective pursued by the challenged measure contributed to the end that was sought to be realized and whether a reasonably available alternative measure existed. We apply the same approach here in determining whether Section 57(c) of the *Canada Grain Act* is 'necessary' for the purposes of Article XX(d) of the GATT 1994.

With respect to the importance of the interests or values that the statutory and other provisions with which, according to Canada, Section 57(c) secures compliance

[881] Appellate Body Report on *Korea – Various Measures on Beef*, paras. 161–162 and 164. Following these paragraphs, the Appellate Body cited Panel Report on *US – Section 337*, para. 5.26.
[882] Panel Report on *Korea – Various Measures on Beef*, para. 645.
[883] Panel Report on *Korea – Various Measures on Beef*, para. 645.
[884] Panel Report on *Korea – Various Measures on Beef*, para. 659.
[885] Appellate Body Report on *Korea – Various Measures on Beef*, para. 164.

are intended to protect, Canada has indicated that those objectives are to ensure the quality of Canadian grain, maintain the integrity of the Canadian grading system, protect consumers against misrepresentation and preserve and enforce the CWB monopoly. In other words, the relevant provisions are said to essentially help maintain the integrity of Canada's grading and quality assurance system and of the CWB's exclusive right to sell Western Canadian grain for domestic sale or export and, thereby, to preserve the reputation of Canadian grain notably in export markets. It is clear that these interests, which appear to be essentially commercial in nature, are important. It seems equally clear, however, that these interests are not as important as, for instance, the protection of human life and health against a lifethreatening health risk, an interest which the Appellate Body in *EC – Asbestos* characterized as 'vital and important in the highest degree.'"[886]

(c) Aspect of measure to be justified as "necessary"

623. The Panel on *US – Gasoline* held that "maintenance of discrimination between imported and domestic gasoline contrary to Article III:4 under the baseline establishment methods did not 'secure compliance' with the baseline system. These methods were not an enforcement mechanism." While the Appellate Body did not address the Panel's findings on Article XX(d), it criticised that, in the context of Article XX(g), "the Panel asked itself whether the 'less favourable treatment' of imported gasoline was 'primarily aimed at' the conservation of natural resources, rather than whether the 'measure', i.e. the baseline establishment rules, were 'primarily aimed at' conservation of clean air." The Appellate Body found that "the Panel ... was in error in referring to its legal conclusion on Article III:4 instead of the measure in issue."[887] See also paragraphs 606 above and 629 below.

(d) "Reasonably available" alternatives

624. In *Canada – Wheat Exports and Grain Imports*, the Panel made reference to the Appellate Body report on *EC – Asbestos* regarding "reasonably available" alternatives in the context of Article XX(b) (see paragraph 613 above) and to the Appellate Body report on *Korea – Various Measures on Beef* (see paragraph 618 above) in addressing "reasonably available" alternatives in the context of Article XX(d):

> "Therefore, the question remains as to whether there is an alternative measure to Section 57(c) that is reasonably available. The Appellate Body has indicated that relevant factors for determining whether an alternative measure is 'reasonably available' are: (i) the extent to which the alternative measure 'contributes to the realization of the end pursued'; (ii) the difficulty of implementation311; and (iii) the trade impact of the alternative measure compared to that of the measure for which justification is claimed under Article XX. The Appellate Body has also stated that, in addition to being 'reasonably available', the alternative measure must also achieve the level of compliance sought. In this regard, the Appellate Body has recognized that 'Members of the WTO have the right to determine for themselves the level of enforcement of their WTO-consistent laws and regulations'."[888]

(e) Reference to GATT practice

625. With respect to GATT practice under Article XX(d), see GATT Analytical Index, pages 573–583.

5. Paragraph (g): "relating to the conservation of exhaustible natural resources"

(a) "the conservation of exhaustible natural resources"

(i) Jurisdictional limitations

626. In *US – Shrimp*, the Appellate Body reviewed the Panel's finding concerning a United States measure which banned imports of shrimps and shrimp products harvested by vessels of foreign nations, where such exporting country had not been certified by United States authorities as using methods not leading to the incidental killing of sea turtles above certain levels. The Panel had found that the United States could not justify its measure under Article XX(g). Noting that sea turtles migrate to, or traverse waters subject to the jurisdiction of the United States, the Appellate Body indicated as follows:

> "We do not pass upon the question of whether there is an implied jurisdictional limitation in Article XX(g), and if so, the nature or extent of that limitation. We note only that in the specific circumstances of the case before us, there is a sufficient nexus between the migratory and endangered marine populations involved and the United States for purposes of Article XX(g)."[889]

(ii) meaning of "exhaustible natural resources"

627. In *US – Shrimp*, the Appellate Body addressed the meaning of the term "exhaustible natural resources" contained in Article XX(g). The Appellate Body emphasized the need for a dynamic rather than a static interpretation of the term "exhaustible", noting the need to interpret this term "in the light of contemporary concerns of the community of nations about the protection

---

[886] Panel Report on *Canada – Wheat Exports and Grain Imports*, paras. 6.223–6.224.
[887] Appellate Body Report on *US – Gasoline*, p. 16.
[888] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.226.
[889] Appellate Body Report on *US – Shrimp*, para. 133.

and conservation of the environment". In its interpretative approach, the Appellate Body also took into consideration non-WTO law:

> "Textually, Article XX(g) is *not* limited to the conservation of 'mineral' or 'non-living' natural resources. The complainants' principal argument is rooted in the notion that 'living' natural resources are 'renewable' and therefore cannot be 'exhaustible' natural resources. We do not believe that 'exhaustible' natural resources and 'renewable' natural resources are mutually exclusive. One lesson that modern biological sciences teach us is that living species, though in principle, capable of reproduction and, in that sense, 'renewable', are in certain circumstances indeed susceptible of depletion, exhaustion and extinction, frequently because of human activities. Living resources are just as 'finite' as petroleum, iron ore and other non-living resources.[890]
>
> The words of Article XX(g), 'exhaustible natural resources', were actually crafted more than 50 years ago. They must be read by a treaty interpreter in the light of contemporary concerns of the community of nations about the protection and conservation of the environment. While Article XX was not modified in the Uruguay Round, the preamble attached to the *WTO Agreement* shows that the signatories to that Agreement were, in 1994, fully aware of the importance and legitimacy of environmental protection as a goal of national and international policy. The preamble of the *WTO Agreement* – which informs not only the GATT 1994, but also the other covered agreements – explicitly acknowledges 'the objective of *sustainable development* . . .':
>
> . . .
>
> From the perspective embodied in the preamble of the *WTO Agreement*, we note that the generic term 'natural resources' in Article XX(g) is not 'static' in its content or reference but is rather 'by definition, evolutionary'.[891] It is, therefore, pertinent to note that modern international conventions and declarations make frequent references to natural resources as embracing both living and non-living resources.[892] . . .
>
> . . .
>
> Given the recent acknowledgement by the international community of the importance of concerted bilateral or multilateral action to protect living natural resources, and recalling the explicit recognition by WTO Members of the objective of sustainable development in the preamble of the *WTO Agreement*, we believe it is too late in the day to suppose that Article XX(g) of the GATT 1994 may be read as referring only to the conservation of exhaustible mineral or other non-living natural resources.[893] Moreover, two adopted GATT 1947 panel reports previously found fish to be an 'exhaustible natural resource' within the meaning of Article XX(g).[894] We hold that, in line with the principle of effectiveness in treaty interpretation, measures to conserve exhaustible natural resources, whether *living* or *non-living*, may fall within Article XX(g)."[895]

(iii) Reference to GATT practice

628. With respect to GATT practice on the term "exhaustible natural resources" under Article XX(g), see GATT Analytical Index, pages 585–586.

(b) "relating to"

(i) Aspect of the measure to be justified as "relating to"

629. The Panel on *US – Gasoline* held that the United States measure at issue could not be justified in the light of Article XX(g) as a measure "relating to the conservation of exhaustible natural resources". More specifically, the Panel held that it "saw no direct connection between less favourable treatment of imported gasoline that was chemically identical to domestic gasoline, and the United States objective of improving air quality in the United States" and that "the less favourable baseline establishments methods at issue in this case were not primarily aimed at the conservation of natural resources".[896] The Appellate Body reversed the Panel's finding and held that the United States measure was justified under Article XX(g), although it ultimately found that the measure was inconsistent with the chapeau of

---

[890] (*footnote original*) We note, for example, that the World Commission on Environment and Development stated: "The planet's species are under stress. There is growing scientific consensus that species are disappearing at rates never before witnessed on the planet . . . ." World Commission on Environment and Development, *Our Common Future* (Oxford University Press, 1987), p. 13.

[891] (*footnote original*) See *Namibia (Legal Consequences) Advisory Opinion* (1971) I.C.J. Rep., p. 31. The International Court of Justice stated that where concepts embodied in a treaty are "by definition, evolutionary", their "interpretation cannot remain unaffected by the subsequent development of law . . . . Moreover, an international instrument has to be interpreted and applied within the framework of the entire legal system prevailing at the time of the interpretation." See also *Aegean Sea Continental Shelf Case*, (1978) I.C.J. Rep., p. 3; Jennings and Watts (eds.), *Oppenheim's International Law*, 9th ed., Vol. I (Longman's, 1992), p. 1282 and E. Jimenez de Arechaga, "International Law in the Past Third of a Century", (1978–I) 159 *Recueil des Cours* 1, p. 49.

[892] Following this sentence, the Appellate Body refers to 1982 United Nations Convention on the Law of the Sea, done at Montego Bay, 10 December 1982, UN Doc. A/CONF.62/122; 21 International Legal Materials 1261, Arts. 56, 61 and 62; Agenda 21, adopted by the United Nations Conference on Environment and Development, 14 June 1992, UN Doc. A/CONF. 151/26/Rev.1. See, for example, para. 17.70, ff; and Final Act of the Conference to Conclude a Convention on the Conservation of Migratory Species of Wild Animals, done at Bonn, 23 June 1979, 19 International Legal Materials 11, p. 15.

[893] (*footnote original*) Furthermore, the drafting history does not demonstrate an intent on the part of the framers of the GATT 1947 *to exclude* "living" natural resources from the scope of application of Article XX(g).

[894] (*footnote original*) Panel Reports on *US – Canadian Tuna*, para. 4.9; and *Canada – Herring and Salmon*, para. 4.4.

[895] Appellate Body Report on *US – Shrimp*, paras. 128–131.

[896] Panel Report on *US – Gasoline*, para. 6.40.

Article XX. See also paragraph 591 above. The Appellate Body held that the Panel was in error in searching for a link between the *discriminatory aspect* of the United States measure (rather than the *measure itself*) and the policy goal embodied in Article XX(g):

> "[The] problem with the reasoning in that paragraph is that the Panel asked itself whether the 'less favourable treatment' of imported gasoline was 'primarily aimed at' the conservation of natural resources, rather than whether the 'measure', i.e. the baseline establishment rules, were 'primarily aimed at' conservation of clean air. In our view, the Panel here was in error in referring to its legal conclusion on Article III:4 instead of the measure in issue. The result of this analysis is to turn Article XX on its head. Obviously, there had to be a finding that the measure provided 'less favourable treatment' under Article III:4 before the Panel examined the 'General Exceptions' contained in Article XX. That, however, is a conclusion of law. The chapeau of Article XX makes it clear that it is the 'measures' which are to be examined under Article XX(g), and not the legal finding of 'less favourable treatment.'"[897]

(ii) Meaning of "relating to" and "primarily aimed at"

630. In interpreting the term "relating to" under Article XX(g), the Appellate Body noted that all the parties and participants to the appeal agreed that the term "relating to" was equivalent to "primarily aimed at":

> "All the participants and the third participants in this appeal accept the propriety and applicability of the view of the *Herring and Salmon* report and the Panel Report that a measure must be 'primarily aimed at' the conservation of exhaustible natural resources in order to fall within the scope of Article XX(g).[898] Accordingly, we see no need to examine this point further, save, perhaps, to note that the phrase 'primarily aimed at' is not itself treaty language and was not designed as a simple litmus test for inclusion or exclusion from Article XX(g)."[899]

631. The Panel on *US – Gasoline* found that "being consistent with the obligation to provide no less favourable treatment would not prevent the attainment of the desired level of conservation of natural resources under the Gasoline Rule. Accordingly, it could not be said that the baseline establishment methods that afforded less favourable treatment to imported gasoline were primarily aimed at the conservation of natural resources." The Appellate Body criticised the Panel analysis which had focused on whether the discriminatory aspect of the United States measure was related to the stated policy goal. See paragraph 629 above. The Appellate Body then opined that the Panel had transposed the concept of "necessary" from Article XX(b) into its analysis under Article XX(g):

> "[T]he Panel Report appears to have utilized a conclusion it had reached earlier in holding that the baseline establishment rules did not fall within the justifying terms of Articles XX(b); i.e. that the baseline establishment rules were not 'necessary' for the protection of human, animal or plant life. The Panel Report, it will be recalled, found that the baseline establishment rules had not been shown by the United States to be 'necessary' under Article XX(b) since alternative measures either consistent or less inconsistent with the *General Agreement* were reasonably available to the United States for achieving its aim of protecting human, animal or plant life.[900] In other words, the Panel Report appears to have applied the 'necessary' test not only in examining the baseline establishment rules under Article XX(b), but also in the course of applying Article XX(g)."[901]

632. In reversing the Panel's findings on Article XX(g), the Appellate Body began by recalling the principles of treaty interpretation and comparing the terms used in each paragraph of Article XX. See the quote referenced in paragraph 579 above. The Appellate Body subsequently considered the relationship between Article III:4 and Article XX:

> "Article XX(g) and its phrase, 'relating to the conservation of exhaustible natural resources,' need to be read in context and in such a manner as to give effect to the purposes and objects of the *General Agreement*. The context of Article XX(g) includes the provisions of the rest of the *General Agreement*, including in particular Articles I, III and XI; conversely, the context of Articles I and III and XI includes Article XX. Accordingly, the phrase 'relating to the conservation of exhaustible natural resources' may not be read so expansively as seriously to subvert the purpose and object of Article III:4. Nor may Article III:4 be given so broad a reach as effectively to emasculate Article XX(g) and the policies and interests it embodies. The relationship between the affirmative commitments set out in, *e.g.*, Articles I, III and XI, and the policies and interests embodied in the 'General Exceptions' listed in Article XX, can be given meaning within the framework of the *General Agreement* and its object and purpose by a treaty interpreter only on a case-to-case basis, by careful scrutiny of the factual and legal context in a given dispute, without disregarding the words actually used by the WTO Members themselves to express their intent and purpose."[902]

633. The Appellate Body on *US – Gasoline* finally examined whether the United States baseline establish-

[897] Appellate Body Report on *US – Gasoline*, p. 16. See also paragraphs 606 and 623 of this Chapter.
[898] (*footnote original*) We note that the same interpretation has been applied in two recent unadopted panel reports: *US – Tuna (EEC)*; *US – Taxes on Automobiles*.
[899] Appellate Body Report on *US – Gasoline*, p. 18.
[900] (*footnote original*), Panel Report, paras. 6.25–6.28.
[901] Appellate Body Report on *US – Gasoline*, p. 16.
[902] Appellate Body Report on *US – Gasoline*, p. 18.

ment rules were appropriately regarded as "primarily aimed at" the conservation of natural resources within the meaning of Article XX(g). The Appellate Body answered this question in the affirmative:

> "The baseline establishment rules, taken as a whole (that is, the provisions relating to establishment of baselines for domestic refiners, along with the provisions relating to baselines for blenders and importers of gasoline), need to be related to the 'non-degradation' requirements set out elsewhere in the Gasoline Rule. Those provisions can scarcely be understood if scrutinized strictly by themselves, totally divorced from other sections of the Gasoline Rule which certainly constitute part of the context of these provisions. The baseline establishment rules whether individual or statutory, were designed to permit scrutiny and monitoring of the level of compliance of refiners, importers and blenders with the 'non-degradation' requirements. Without baselines of some kind, such scrutiny would not be possible and the Gasoline Rule's objective of stabilizing and preventing further deterioration of the level of air pollution prevailing in 1990, would be substantially frustrated. The relationship between the baseline establishment rules and the 'non-degradation' requirements of the Gasoline Rule is not negated by the inconsistency, found by the Panel, of the baseline establishment rules with the terms of Article III:4. We consider that, given that substantial relationship, the baseline establishment rules cannot be regarded as merely incidentally or inadvertently aimed at the conservation of clean air in the United States for the purposes of Article XX(g)."[903]

634. In *US – Shrimp*, in holding that the United States measure was "primarily aimed at" the conservation of natural resources, the Appellate Body opined that the measure was not a "simple, blanket prohibition" and that a reasonable "means and ends relationship" existed between the measure and the policy of natural resource conservation:

> "In its general design and structure, therefore, Section 609 is not a simple, blanket prohibition of the importation of shrimp imposed without regard to the consequences (or lack thereof) of the mode of harvesting employed upon the incidental capture and mortality of sea turtles. Focusing on the design of the measure here at stake, it appears to us that Section 609, *cum* implementing guidelines, is not disproportionately wide in its scope and reach in relation to the policy objective of protection and conservation of sea turtle species. The means are, in principle, reasonably related to the ends. The means and ends relationship between Section 609 and the legitimate policy of conserving an exhaustible, and, in fact, endangered species, is observably a close and real one.
>
> In our view, therefore, Section 609 is a measure 'relating to' the conservation of an exhaustible natural resource within the meaning of Article XX(g) of the GATT 1994."[904]

635. With respect to GATT practice on the term "relating to" under Article XX(g), see GATT Analytical Index, pages 583–585.

(c) "measures made effective in conjunction with"

636. In *US – Gasoline*, the Appellate Body described the term "measures made effective in conjunction with" as a "requirement of *even-handedness* in the imposition of restrictions":

> "Viewed in this light, the ordinary or natural meaning of 'made effective' when used in connection with a measure – a governmental act or regulation -may be seen to refer to such measure being 'operative', as 'in force', or as having 'come into effect.' Similarly, the phrase 'in conjunction with' may be read quite plainly as 'together with' or 'jointly with.' Taken together, the second clause of Article XX(g) appears to us to refer to governmental measures like the baseline establishment rules being promulgated or brought into effect together with restrictions on domestic production or consumption of natural resources. Put in a slightly different manner, we believe that the clause 'if such measures are made effective in conjunction with restrictions on domestic product or consumption' is appropriately read as a requirement that the measures concerned impose restrictions, not just in respect of imported gasoline but also with respect to domestic gasoline. The clause is a requirement of *even-handedness* in the imposition of restrictions, in the name of conservation, upon the production or consumption of exhaustible natural resources."[905]

637. The Appellate Body made clear that the "requirement of even-handedness" embodied in Article XX(g) did not amount to a requirement of "identity of treatment":

> "There is, of course, no textual basis for requiring identical treatment of domestic and imported products. Indeed, where there is identity of treatment – constituting real, not merely formal, equality of treatment – it is difficult to see how inconsistency with Article III:4 would have arisen in the first place. On the other hand, if *no* restrictions on domestically-produced like products are imposed at all, and all limitations are placed upon imported products *alone*, the measure cannot be accepted as primarily or even substantially designed for implementing conservationist goals. The measure would simply be naked discrimination for protecting locally-produced goods.
>
> In the present appeal, the baseline establishment rules affect both domestic gasoline and imported gasoline,

[903] Appellate Body Report on *US – Gasoline*, p. 19.
[904] Appellate Body Report on *US – Shrimp*, paras. 141–142.
[905] Appellate Body Report on *US – Gasoline*, p. 20.

providing for – generally speaking – individual baselines for domestic refiners and blenders and statutory baselines for importers. Thus, restrictions on the consumption or depletion of clean air by regulating the domestic production of 'dirty' gasoline are established jointly with corresponding restrictions with respect to imported gasoline. That imported gasoline has been determined to have been accorded 'less favourable treatment' than the domestic gasoline in terms of Article III:4, is not material for purposes of analysis under Article XX(g). It might also be noted that the second clause of Article XX(g) speaks disjunctively of 'domestic production *or* consumption.'"[906]

638. The Appellate Body further rejected the argument that the term "made effective" was designed to require an "empirical effects test" and that the measure at issue had to produce some measurable "positive effects":

"We do not believe . . . that the clause 'if made effective in conjunction with restrictions on domestic production or consumption' was intended to establish an empirical 'effects test' for the availability of the Article XX(g) exception. In the first place, the problem of determining causation, well-known in both domestic and international law, is always a difficult one. In the second place, in the field of conservation of exhaustible natural resources, a substantial period of time, perhaps years, may have to elapse before the effects attributable to implementation of a given measure may be observable. The legal characterization of such a measure is not reasonably made contingent upon occurrence of subsequent events. We are not, however, suggesting that consideration of the predictable effects of a measure is never relevant. In a particular case, should it become clear that realistically, a specific measure cannot in any possible situation have any positive effect on conservation goals, it would very probably be because that measure was not designed as a conservation regulation to begin with. In other words, it would not have been 'primarily aimed at' conservation of natural resources at all."[907]

639. Citing its own finding in *US – Gasoline* that the phrase "if such measures are made effective in conjunction with restrictions on domestic product or consumption" in Article XX(g) was a "requirement of *even-handedness*" (see paragraph 636 above), the Appellate Body in *US – Shrimp* held that the United States measure at issue was justified under Article XX(g):

"We earlier noted that Section 609, enacted in 1989, addresses the mode of harvesting of imported shrimp only. However, two years earlier, in 1987, the United States issued regulations pursuant to the Endangered Species Act requiring all United States shrimp trawl vessels to use approved TEDs, or to restrict the duration of tow-times, in specified areas where there was significant incidental mortality of sea turtles in shrimp trawls. These regulations became fully effective in 1990 and were later modified. They now require United States shrimp trawlers to use approved TEDs 'in areas and at times when there is a likelihood of intercepting sea turtles', with certain limited exceptions. Penalties for violation of the Endangered Species Act, or the regulations issued thereunder, include civil and criminal sanctions. The United States government currently relies on monetary sanctions and civil penalties for enforcement. The government has the ability to seize shrimp catch from trawl vessels fishing in United States waters and has done so in cases of egregious violations. We believe that, in principle, Section 609 is an even-handed measure.

Accordingly, we hold that Section 609 is a measure made effective in conjunction with the restrictions on domestic harvesting of shrimp, as required by Article XX(g)."[908]

(d) Reference to GATT practice

640. With respect to GATT practice on the term "measures made effective in conjunction with" under Article XX(g), see GATT Analytical Index, pages 586–587.

XXII. ARTICLE XXI

A. TEXT OF ARTICLE XXI

Article XXI
Security Exceptions

Nothing in this Agreement shall be construed

(*a*) to require any contracting party to furnish any information the disclosure of which it considers contrary to its essential security interests; or

(*b*) to prevent any contracting party from taking any action which it considers necessary for the protection of its essential security interests

(i) relating to fissionable materials or the materials from which they are derived;

(ii) relating to the traffic in arms, ammunition and implements of war and to such traffic in other goods and materials as is carried on directly or indirectly for the purpose of supplying a military establishment;

(iii) taken in time of war or other emergency in international relations; or

(*c*) to prevent any contracting party from taking any action in pursuance of its obligations under the United Nations Charter for the maintenance of international peace and security.

[906] Appellate Body Report on *US – Gasoline*, p. 21.
[907] Appellate Body Report on *US – Gasoline*, p. 21.
[908] Appellate Body Report on *US – Shrimp*, paras. 144–145.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXI

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

XXIII. ARTICLE XXII

A. TEXT OF ARTICLE XXII

Article XXII
Consultation

1. Each contracting party shall accord sympathetic consideration to, and shall afford adequate opportunity for consultation regarding, such representations as may be made by another contracting party with respect to any matter affecting the operation of this Agreement.

2. The CONTRACTING PARTIES may, at the request of a contracting party, consult with any contracting party or parties in respect of any matter for which it has not been possible to find a satisfactory solution through consultation under paragraph 1.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXII

642. The following table lists the disputes, up to 31 December 2004, in which panel and/or Appellate Body reports have been adopted where Article XXII of the *GATT 1994* was invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Gasoline*	WT/DS2	XXII:1
2	*Japan – Alcoholic Beverages II*	WT/DS8, WT/DS10, WT/DS11	XXII
3	*EC – Hormones*	WT/DS26, WT/DS48	XXII
4	*Indonesia – Autos*	WT/DS54, WT/DS55, WT/DS59, WT/DS64	XXII:1 XXII
5	*Argentina – Textiles and Apparel*	WT/DS56	XXII:1
6	*US – Shrimp*	WT/DS58	XXII:1
7	*EC – Computer Equipment*	WT/DS62, WT/DS67, WT/DS68	XXII:1

643. Concerning how the requirement of consultations has been applied under other WTO agreements, see for example, Article 4 of the Chapter on the *DSU*, Article 6.11 of the Chapter on the *ATC*, Article 17 of the Chapter on the *Anti-Dumping Agreement.*

XXIV. ARTICLE XXIII

A. TEXT OF ARTICLE XXIII

Article XXIII
Nullification or Impairment

1. If any contracting party should consider that any benefit accruing to it directly or indirectly under this Agreement is being nullified or impaired or that the attainment of any objective of the Agreement is being impeded as the result of

(*a*) the failure of another contracting party to carry out its obligations under this Agreement, or

(*b*) the application by another contracting party of any measure, whether or not it conflicts with the provisions of this Agreement, or

(*c*) the existence of any other situation,

the contracting party may, with a view to the satisfactory adjustment of the matter, make written representations or proposals to the other contracting party or parties which it considers to be concerned. Any contracting party thus approached shall give sympathetic consideration to the representations or proposals made to it.

2. If no satisfactory adjustment is effected between the contracting parties concerned within a reasonable time, or if the difficulty is of the type described in paragraph 1 (*c*) of this Article, the matter may be referred to the CONTRACTING PARTIES. The CONTRACTING PARTIES shall promptly investigate any matter so referred to them and shall make appropriate recommendations to the contracting parties which they consider to be concerned, or give a ruling on the matter, as appropriate. The CONTRACTING PARTIES may consult with contracting parties, with the Economic and Social Council of the United Nations and with any appropriate intergovernmental organization in cases where they consider such consultation necessary. If the CONTRACTING PARTIES consider that the circumstances are serious enough to justify such action, they may authorize a contracting party or parties to suspend the application to any other contracting party or parties of such concessions or other obligations under this Agreement as they determine to be appropriate in the circumstances. If the application to any contracting party of any concession or other obligation is in fact suspended, that contracting party shall then be free, not later than sixty days after such action is taken, to give written notice to the Executive Secretary[1] to the Contracting Parties of its intention to withdraw from this Agreement and such withdrawal shall take effect upon the sixtieth day following the day on which such notice is received by him.

(*footnote original*) [1] By the Decision of 23 March 1965, the CONTRACTING PARTIES changed the title of the head of the GATT secretariat from "Executive Secretary" to "Director-General".

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIII

1. General

(a) Relationship between Articles XXIII:1(a) and XXIII:1(b)

644. In *EC – Asbestos*, Canada claimed that the French ban on the sale and imports of products containing asbestos nullified or impaired benefits accruing to it under Article XXIII:1(b). In response, the European Communities raised preliminary objections, arguing on two grounds that the measure fell outside the scope of application of Article XXIII:1(b). The Panel rejected both objections. In addressing the European Communities appeal against the Panel's rejection of these preliminary objections, the Appellate Body explained the relationship between Articles XXIII:1(a) and XXIII:1(b):

> "Article XXIII:1(a) sets forth a cause of action for a claim that a Member has failed to carry out one or more of its obligations under the GATT 1994. A claim under Article XXIII:1(a), therefore, lies when a Member is alleged to have acted inconsistently with a provision of the GATT 1994. Article XXIII:1(b) sets forth a separate cause of action for a claim that, through the application of a measure, a Member has 'nullified or impaired' 'benefits' accruing to another Member, 'whether or not that measure conflicts with the provisions' of the GATT 1994. Thus, it is not necessary, under Article XXIII:1(b), to establish that the measure involved is inconsistent with, or violates, a provision of the GATT 1994. Cases under Article XXIII:1(b) are, for this reason, sometimes described as 'non-violation' cases; we note, though, that the word 'non-violation' does not appear in this provision. The purpose of this rather unusual remedy was described by the panel in *European Economic Community – Payments and Subsidies Paid to Processors and Producers of Oilseeds and Related Animal-Feed Proteins* . . . in the following terms:
>
> > 'The idea underlying [the provisions of Article XXIII:1(b)] is that the improved competitive opportunities that can legitimately be expected from a tariff concession can be frustrated not only by measures proscribed by the General Agreement but also by measures consistent with that Agreement. In order to encourage contracting parties to make tariff concessions they must therefore be given a right of redress when a reciprocal concession is impaired by another contracting party as a result of the application of any measure, whether or not it conflicts with the General Agreement.[909] (emphasis added)'"[910]

[909] Panel Report on *EEC – Oilseeds I*, para. 144.
[910] Appellate Body Report on *EC – Asbestos*, para. 185.

2. Article XXIII:1(b)

(a) Overview of the non-violation complaint

645. In *EC – Asbestos*, Canada claimed that the French ban on the sale and import of products containing asbestos nullified or impaired benefits accruing to it under Article XXIII:1(b). The Appellate Body stated that "[l]ike the panel in [*Japan – Film*], we consider that the remedy in Article XXIII:1(b) 'should be approached with caution and should remain an exceptional remedy.'"[911] The Appellate Body went on to refer to the Panel's finding in *Japan – Film* referenced in paragraph 646 below.

646. In *Japan – Film*, the United States argued, under Article XIII:1(b) of GATT 1994, that certain Japanese "measures", relating to commercial distribution of photographic film and paper, large retail stores and sales promotion techniques nullified or impaired benefits accruing to the United States based on tariff concessions made by Japan in the course of three rounds of multilateral trade negotiations. In addressing the United States' claims, the Panel made a general statement about the significance of the non-violation remedy within the WTO/GATT legal framework, holding that "the non-violation nullification or impairment remedy should be approached with caution and treated as an exceptional concept":

> "Although the non-violation remedy is an important and accepted tool of WTO/GATT dispute settlement and has been 'on the books' for almost 50 years, we note that there have only been eight cases in which panels or working parties have substantively considered Article XXIII:1(b) claims.[912] This suggests that both the GATT contracting parties and WTO Members have approached this remedy with caution and, indeed, have treated it as an exceptional instrument of dispute settlement. We note in this regard that both the European Communities and the United States in the *EEC – Oilseeds* case, and the two parties in this case, have confirmed that the non-violation nullification or impairment remedy should be approached with caution and treated as an exceptional concept.[913] The reason for this caution is straightforward. Members negotiate the rules that they agree to follow and only exceptionally would expect to be challenged for actions not in contravention of those rules."[914]

(b) Purpose

647. The Panel on *Japan – Film* elaborated upon the purpose of Article XXIII:1(b) as follows:

> "[The purpose of Article XXIII:1(b) is] to protect the balance of concessions under GATT by providing a means to redress government actions not otherwise regulated by GATT rules that nonetheless nullify or impair a Member's legitimate expectations of benefits from tariff negotiations.[915]"[916]

(c) Scope

648. In *EC – Asbestos*, the Appellate Body rejected the European Communities argument that Article XXIII:1(b) only applies to measures which do not otherwise fall under other provisions of the *GATT 1994*. The Appellate Body emphasized the phrase, contained in Article XXIII:1(b), "whether or not [the measure] conflicts with the provisions of this Agreement":

> "The text of Article XXIII:1(b) stipulates that a claim under that provision arises when a 'benefit' is being 'nullified or impaired' through the 'application . . . of any measure, *whether or not it conflicts with the provisions of this Agreement*'. (emphasis added) The wording of the provision, therefore, clearly states that a claim may succeed, under Article XXIII:1(b), *even if the measure 'conflicts' with some substantive provisions of the GATT 1994*. It follows that a measure may, *at one and the same time*, be inconsistent with, or in breach of, a provision of the GATT 1994 *and*, nonetheless, give rise to a cause of action under Article XXIII:1(b). Of course, if a measure 'conflicts' with a provision of the GATT 1994, that measure must actually fall within the scope of application of that provision of the GATT 1994. We agree with the Panel that this reading of Article XXIII:1(b) is consistent with the panel reports in *Japan – Film and* EEC – *Oilseeds*, which both support the view that Article XXIII:1(b) applies to measures which simultaneously fall within the scope of application of other provisions of the GATT 1994.[917] Accordingly, we decline the European Communities' first ground of appeal under Article XXIII:1(b) of the GATT 1994."[918]

649. In *EC – Asbestos*, the Appellate Body further rejected the European Communities argument that it is possible to have "legitimate expectations" only in

---

[911] Appellate Body Report on *EC – Asbestos*, para. 186.

[912] (*footnote original*) Report of the Working Party on *Australia – Ammonium Sulphate*; Panel Report on *Germany – Sardines*; [Panel Report on] *Uruguay – Recourse to Article XXIII*, ; Panel Report on *EC – Citrus* ; Panel Report on *EEC – Canned Fruit*; [Panel Report on] *Japan – Semi-Conductors*; *EEC – Oilseeds I*; [Panel Report on] *US – Sugar Waiver*.

[913] (*footnote original*) In *EEC – Oilseeds I*, the United States stated that it "concurred in the proposition that non-violation nullification or impairment should remain an exceptional concept. Although this concept had been in the text of Article XXIII of the General Agreement from the outset, a cautious approach should continue to be taken in applying the concept". *EEC – Oilseeds I*, para. 114. The EEC in that case stated that "recourse to the 'non-violation' concept under Article XXIII:1(b) should remain exceptional, since otherwise the trading world would be plunged into a state of precariousness and uncertainty". Ibid, para. 113.

[918] Appellate Body Report on *EC – Asbestos*, para. 187.

connection with a purely "commercial measure" unlike the measure at issue, which had allegedly been taken to protect human life or health. The Appellate Body stated that "the text [of Article XXIII:1(b)] does not distinguish between, or exclude, certain types of measures" and that such distinctions would be "very difficult in practice"

> "[W]e look to the text of Article XXIII:1(b), which provides that 'the application by another Member of *any measure*' may give rise to a cause of action under that provision. The use of the word 'any' suggests that measures of all types may give rise to such a cause of action. The text does not distinguish between, or exclude, certain types of measure. Clearly, therefore, the text of Article XXIII:1(b) contradicts the European Communities' argument that certain types of measure, namely, those with health objectives, are excluded from the scope of application of Article XXIII:1(b).
>
> In any event, an attempt to draw the distinction suggested by the European Communities between so-called health and commercial measures would be very difficult in practice. By definition, measures which affect trade in goods, and which are subject to the disciplines of the GATT 1994, have a commercial impact. At the same time, the health objectives of many measures may be attainable only by means of commercial regulation. Thus, in practice, clear distinctions between health and commercial measures may be very difficult to establish. Nor do we see merit in the argument that, previously, only 'commercial' measures have been the subject of Article XXIII:1(b) claims, as that does not establish that a claim *cannot* be made under Article XXIII:1(b) regarding a 'non-commercial' measure."[919]

(d) Test under Article XXIII:1(b)

650. In *Japan – Film*, the Panel summarized the elements of a non-violation case:

> "The text of Article XXIII:1(b) establishes three elements that a complaining party must demonstrate in order to make out a cognizable claim under Article XXIII:1(b): (1) application of a measure by a WTO Member; (2) a benefit accruing under the relevant agreement; and (3) nullification or impairment of the benefit as the result of the application of the measure."[920]

651. In *EC – Asbestos*, the Panel followed the three part test of the *Japan – Film* Panel.[921] The Appellate Body did not deal with the Panel's ultimate finding on the substance of the claim under Article XXIII:1(b).

(e) Burden of proof

652. The Panel on *Japan – Film* explained that the burden of proof under Article XXIII:1(b) falls upon the complaining party:

> "Consistent with the explicit terms of the DSU and established WTO/GATT jurisprudence, and recalling the Appellate Body ruling that 'precisely how much and precisely what kind of evidence will be required to establish . . . a presumption [that what is claimed is true] will necessarily vary from . . . provision to provision', we thus consider that the United States, with respect to its claim of non-violation nullification or impairment under Article XXIII:1(b), bears the burden of providing a detailed justification for its claim in order to establish a presumption that what is claimed is true. It will be for Japan to rebut any such presumption."[922]

653. In *EC – Asbestos*, Canada claimed that the French ban on the sale and imports of products containing asbestos nullified or impaired benefits accruing to it under Article XXIII:1(b). The Panel's finding on the burden of proof, which was not appealed, was that "with respect to its claims of non-violation, Canada bears the primary burden of presenting a detailed justification for its claims.[923]"[924] In support of its proposition, with reference to Article 26.1 of the DSU, the Panel cited the finding of the panel on *Japan – Film* referenced in paragraph 652 above.[925]

654. In *EC – Asbestos*, Canada argued, citing the Appellate Body Report on *India – Patent (US)*[926] and the Panel Report on *Japan – Film*[927], that when a complainant proves that it enjoys a tariff concession and the respondent subsequently adopts a measure that affects the value of this concession, the complainant benefits from the presumption that it could not reasonably anticipate that this concession would be nullified or otherwise impaired by this measure. The Panel, in a finding not reviewed by the Appellate Body, rejected this argument, stating that the introduction of a measure affecting the value of the concession is only one of the elements of a non-violation claim and added that "the special situation of measures justified under Article XX, insofar as they concern non-commercial interests whose importance has been recognized *a priori* by Members, requires special treatment" and that "situations that fall under Article XX justify a stricter burden of proof being applied in this context to the party invoking Article XXIII:1(b), particularly with regard to the existence of legitimate expectations":

> "We do not consider that Canada has correctly interpreted the Panel report in *Japan – Film*. First of all, the presumption to which the Panel refers is that, if it is

[919] Appellate Body Report on *EC – Asbestos*, paras. 188–189.
[920] Panel Report on *Japan – Film*, para. 10.41. See also Panel Report on *Korea – Procurement*, para. 7.85.
[921] Panel Report on *EC – Asbestos*, para. 8.283.
[922] Panel Report on *Japan – Film*, para. 10.32.
[923] Previous Panels have not defined the precise scope of the concept of detailed justification.
[924] Panel Report on *EC – Asbestos*, para. 8.278.
[925] Panel Report on *EC – Asbestos*, para. 8.277.
[926] Appellate Body Report on *India – Patents (US)*, para. 41.
[927] Panel Report on *Japan – Film*, para. 10.79.

shown that a measure has been introduced after the conclusion of the tariff negotiations in question, then the complainant should not be considered as having anticipated that measure, which is only one of the tests applied by the Panel. Moreover, if the interpretation of the burden of proof suggested by Canada were followed, the obligation to present a detailed justification for which Article 26.1(a) provides might in certain cases be evaded. Accordingly, we do not follow the interpretation proposed by Canada but the rule laid down in *Japan – Film*.

Furthermore, in the light of our reasoning in paragraph 8.272 above, we consider that the special situation of measures justified under Article XX, insofar as they concern non-commercial interests whose importance has been recognized *a priori* by Members, requires special treatment. By creating the right to invoke exceptions in certain circumstances, Members have recognized *a priori* the possibility that the benefits they derive from certain concessions may eventually be nullified or impaired at some future time for reasons recognized as being of overriding importance. This situation is different from that in which a Member takes a measure of a commercial or economic nature such as, for example, a subsidy or a decision organizing a sector of its economy, from which it expects a purely economic benefit. In this latter case, the measure remains within the field of international trade. Moreover, the nature and importance of certain measures falling under Article XX can also justify their being taken at any time, which militates in favour of a stricter treatment of actions brought against them on the basis of Article XXIII:1(b).

Consequently, the Panel concludes that because of the importance conferred on them *a priori* by the GATT 1994, as compared with the rules governing international trade, situations that fall under Article XX justify a stricter burden of proof being applied in this context to the party invoking Article XXIII:1(b), particularly with regard to the existence of legitimate expectations and whether or not the initial Decree could be reasonably anticipated."[928]

655. Further, the Panel stated that the burden of proof for a claim concerning a concession which had been made a long time previously "must be all the heavier inasmuch as the intervening period has been so long":

"[W]e consider that in view of the time that elapsed between those concessions and the adoption of the Decree (between 50 and 35 years), Canada could not assume that, over such a long period, there would not be advances in medical knowledge with the risk that one day a product would be banned on health grounds. For this reason, too, we also consider that the presumption applied in *Japan – Film* cannot be applied to the concessions granted in 1947 and 1962. Any other interpretation would extend the scope of the concept of non-violation nullification well beyond that envisaged by the Panel in *Japan – Film*. On the contrary, it is for Canada to present detailed evidence showing why it could legitimately expect the 1947 and 1962 concessions not to be affected and could not reasonably anticipate that France might adopt measures restricting the use of all asbestos products 50 and 35 years, respectively, after the negotiation of the concessions concerned. In the present case, the burden of proof must be all the heavier inasmuch as the intervening period has been so long. Indeed, it is very difficult to anticipate what a Member will do in 50 years time. It would therefore be easy for a Member to establish that he could not reasonably anticipate the adoption of a measure if the burden of proof were not made heavier."[929]

(f) "measure"

656. In the Panel on *Japan – Film*, Japan argued that a measure, in order to be classified as such, must provide a benefit or impose a legally binding obligation. The Panel stated that even non-binding actions "can potentially have adverse effects on competitive conditions of market access":

"[A] government policy or action need not necessarily have a substantially binding or compulsory nature for it to entail a likelihood of compliance by private actors in a way so as to nullify or impair legitimately expected benefits within the purview of Article XXIII:1(b). Indeed, it is clear that non-binding actions, which include sufficient incentives or disincentives for private parties to act in a particular manner, can potentially have adverse effects on competitive conditions of market access. For example, a number of non-violation cases have involved subsidies, receipt of which requires only voluntary compliance with eligibility criteria."[930]

657. The Panel on *Japan – Film* noted that the *WTO Agreement* is an international agreement signed by national governments and customs territories. According to the Panel, the term "measure" in Article XXIII:1(b) and Article 26.1 of the DSU "refers only to policies or actions of governments, not those of private parties."[931]

658. The Panel on *Japan – Film* held that the non-violation remedy is limited to measures that are currently being applied and found confirmation for this finding in GATT/WTO precedent:

"The text of Article XXIII:1(b) is written in the present tense, viz. 'If any Member should consider that any benefit *accruing* to it directly or indirectly under this Agreement *is* being nullified or impaired . . . as the result of . . . (b) the application by another Member of any measure,

[928] Panel Report on *EC – Asbestos*, paras. 8.280–8.282.
[929] Panel Report on *EC – Asbestos*, para. 8.292.
[930] Panel Report on *Japan – Film*, para. 10.49.
[931] Panel Report on *Japan – Film*, para. 10.52.

whether or not it *conflicts* with the provisions of this Agreement'. It thus stands to reason that, given that the text contemplates nullification or impairment in the present tense, caused by application of a measure, 'whether or not it conflicts' (also in the present tense), the ordinary meaning of this provision limits the non-violation remedy to measures that are currently being applied.

Moreover, GATT/WTO precedent in other areas, including in respect of virtually all panel cases under Article XXIII:1(a), confirms that it is not the practice of GATT/WTO panels to rule on measures which have expired or which have been repealed or withdrawn.[932] In only a very small number of cases, involving very particular situations, have panels proceeded to adjudicate claims involving measures which no longer exist or which are no longer being applied. In those cases, the measures typically had been applied in the very recent past.[933]

[W]e do not rule out the possibility that *old* 'measures' that were never officially revoked may continue to be applied through continuing administrative guidance. Similarly, even if measures were officially revoked, the underlying policies may continue to be applied through continuing administrative guidance. However, the burden is on the United States to demonstrate clearly that such guidance does in fact exist and that it is currently nullifying or impairing benefits."[934]

(g) "benefit"

659. In *Japan – Film*, the Panel examined whether the benefits legitimately expected by a Member can be derived from successive rounds of tariff negotiations. The Panel recalled that in all GATT cases dealing with Article XXIII:1(b), except one, the claimed benefit was that of legitimate expectations of improved market-access opportunities arising out of relevant tariff concessions.[935] The Panel referred to Article 1(b)(i) of the *GATT 1994* and went on to state that "[t]he conclusion that benefits accruing from concessions granted during successive rounds of tariff negotiations may separately give rise to reasonable expectations of improved market access is consistent with past panel reports":

"GATT 1994 incorporates both 'protocols and certifications relating to tariff concessions' under paragraph 1(b)(i) and 'the Marrakesh Protocol to GATT 1994' under paragraph 1(d). The ordinary meaning of the text of paragraphs 1(b)(i) and 1(d) of GATT 1994, read together, clearly suggests that all protocols relating to tariff concessions, both those predating the Uruguay Round and the Marrakesh Protocol to GATT 1994, are incorporated into GATT 1994 and continue to have legal existence under the WTO Agreement.

Where tariff concessions have been progressively improved, the benefits – expectations of improved market access – accruing directly or indirectly under different tariff concession protocols incorporated in GATT 1994 can be read in harmony. This approach is in accordance with general principles of legal interpretation which, as the Appellate Body reiterated in *US – Gasoline*, teach that one should endeavour to give legal effect to all elements of a treaty and not reduce them to redundancy or inutility.

The conclusion that benefits accruing from concessions granted during successive rounds of tariff negotiations may separately give rise to reasonable expectations of improved market access is consistent with past panel reports.[936] The panel in *EEC – Canned Fruit* found that the United States had a reasonable expectation arising from the EEC's 1974 tariff concessions pursuant to Article XXIV:6 negotiations and 1979 Tokyo Round tariff concessions (even though the panel separately found that the United States could have anticipated certain subsidies in respect of the Tokyo Round tariff concessions).[937] And the *EEC – Oilseeds* panel found that the United States had a reasonable expectation arising from the EEC's 1962 Dillon Round tariff concessions.[938] As the United States points out, these findings would not have been possible if subsequent multilateral tariff agreements or enlargement agreements were deemed to extinguish wholesale the tariff concessions in prior tariff schedules."[939]

---

[932] (*footnote original*) See Panel Report on *US – Gasoline*, para. 6.19, where the panel observed that "it had not been the usual practice of a panel established under the General Agreement to rule on measures that, at the time the panel's terms of reference were fixed, were not and would not become effective". See also Panel Report on *Argentina – Footwear, Textiles and Apparel*, pp. 84–86.

[933] (*footnote original*) See, e.g., Panel Report on *US – Wool Shirts and Blouses*, where the panel ruled on a measure that was revoked after the interim review but before issuance of the final report to the parties; Panel Report on *EEC – Measure on Animal Feed Proteins*, where the panel ruled on a discontinued measure, but one that had terminated after the terms of reference of the panel had already been agreed; Panel Report on *United States – Prohibitions on Imports of Tuna and Tuna Products from Canada*, para. 4.3., where the panel ruled on the GATT consistency of a withdrawn measure but only in light of the two parties' agreement to this procedure; Panel Report on *EEC – Restrictions on Imports of Apples from Chile*, where the panel ruled on a measure which had terminated before agreement on the panel's terms of reference but where the terms of reference specifically included the terminated measure and, given its seasonal nature, there remained the prospect of its reintroduction.

[934] Panel Report on *Japan – Film*, paras. 10.57–10.59.

[935] Panel Report on *Japan – Film*, para. 10.62. The Panel cited GATT Panel Reports on *Australia – Ammonium Sulphate*; *Germany – Sardines*; *Uruguay – Recourse to Article XXIII*,; *EC – Citrus*; *EEC – Canned Fruit*; *Japan – Semi-Conductors*; *EEC – Oilseeds I*; *US – Sugar Waiver*, The Panel then stated as follows:

> "Only in *EC – Citrus Products* did the complaining party claim that the benefit denied was not improved market access from tariff concessions granted under GATT Article II, but rather GATT Article I:1 ('most-favoured-nation') treatment with respect to unbound tariff preferences granted by the EC to certain Mediterranean countries."

[936] (*footnote original*) See Panel Reports on *EEC – Canned Fruit*; and *EEC – Oilseeds I*.

[937] (*footnote original*) Panel Report on *EEC – Canned Fruit*, para. 54.

[938] (*footnote original*) Panel Report on *EEC – Oilseeds I*, paras. 144–146.

[939] Panel Report on *Japan – Film*, paras. 10. 64–10.66.

660. After making the finding referenced in paragraph 659 above, the Panel on *Japan – Film* then quoted with approval the following excerpt from the GATT Panel Report on *EEC – Oilseeds I*:

> "In these circumstances, the partners of the Community in the successive renegotiations under Article XXIV:6 could legitimately assume, in the absence of any indications to the contrary, that the offer to continue a tariff commitment by the Community was an offer not to change the balance of concessions previously attained. The Panel noted that nothing in the material submitted to it indicated that the Community had made it clear to its negotiating partners that the withdrawal and reinstitution of the tariff concessions for oilseeds as part of the withdrawal of the whole of the Community Schedule meant that the Community was seeking a new balance of concessions with respect to these items. There is in particular no evidence that the Community, in the context of these negotiations, offered to compensate its negotiating partners for any impairment of the tariff concessions through production subsidies or that it accepted compensatory tariff withdrawals by its negotiating partners to take into account any such impairment. The balance of concessions negotiated in 1962 in respect of oilseeds was thus not altered in the successive Article XXIV:6 negotiations. The Panel therefore found that the benefits accruing to the United States under the oilseed tariff concessions resulting from the Article XXIV:6 negotiations of 1986/87 include the protection of reasonable expectations the United States had when these concessions were initially negotiated in 1962."[940]

661. The Panel on *Japan – Film* ultimately reached the following conclusion:

> "We consider, therefore, that reasonable expectations may in principle be said to continue to exist with respect to tariff concessions given by Japan on film and paper in successive rounds of Article XXVIII*bis* negotiations."[941]

662. The Panel on *EC – Asbestos* held, in a statement not reviewed by the Appellate Body:

> "[T]he Panel in *Japan – Film* recalled that, with only one exception, in all the previous cases in which Article XXIII:1(b) was invoked the benefit claimed consisted in the legitimate expectation of improved market access opportunities resulting from the relevant tariff concessions. We first need to know what benefit Canada could legitimately have expected from the Community concessions on chrysotile asbestos. We note, however, that previous panels approached the question differently, insofar as they appear to have assumed the existence of a benefit in the form of improved market access opportunities and then considered whether a party could have had a *legitimate expectation* of a given benefit."[942]

(h) Legitimate expectations

663. In *Japan – Film*, the Panel examined whether the United States could not have anticipated that the benefits related to improved market access would be offset by the subsequent application of a measure by Japan. The Panel held that if measures were anticipated, no legitimate expectations of improved market access could exist with respect to the impairment caused by these anticipated measures:

> "As suggested by the 1961 report,[943] in order for expectations of a benefit to be legitimate, the challenged measures must not have been reasonably anticipated at the time the tariff concession was negotiated. If the measures were anticipated, a Member could not have had a legitimate expectation of improved market access to the extent of the impairment caused by these measures.
>
> Thus, under Article XXIII:1(b), the United States may only claim impairment of benefits related to improved market access conditions flowing from relevant tariff concessions by Japan to the extent that the United States could not have reasonably anticipated that such benefits would be offset by the subsequent application of a measure by the Government of Japan."[944]

664. The Panel on *Japan – Film* then considered the standard by which to ascertain the existence of "reasonable anticipation". Where measures had been introduced after tariff negotiations had taken place, the Panel held that a presumption would exist that the United States, the complaining party, should not be held to have anticipated these measures:

> "We consider that the issue of reasonable anticipation should be approached in respect of specific 'measures' in light of the following guidelines. First, in the case of measures shown by the United States to have been introduced subsequent to the conclusion of the tariff negotiations at issue, it is our view that the United States has raised a presumption that it should not be held to have anticipated these measures and it is then for Japan to rebut that presumption. Such a rebuttal might be made, for example, by establishing that the measure at issue is so clearly contemplated in an earlier measure that the United States should be held to have anticipated it. However, there must be a clear connection shown. In our view, it is not sufficient to claim that a *specific* measure should have been anticipated because it is consistent with or a continuation of a past *general* government policy. As in the

[940] Panel Report on *EC – Oilseeds I*, para. 146, quoted in Panel Report on *Japan – Film*, para. 10.67.
[941] Panel Report on *Japan – Film*, para. 10.70.
[942] Panel Report on *EC – Asbestos*, para. 8.285.
[943] The "1961 report" referenced to is the GATT Panel Report on *Operation of the Provisions of Article XVI*, adopted on 21 November 1961, BISD 10S/201.
[944] Panel Report on *Japan – Film*, paras. 10.76–10.77.

EEC – Oilseeds case[945], we do not believe that it would be appropriate to charge the United States with having reasonably anticipated all GATT-consistent measures, such as 'measures' to improve what Japan describes as the inefficient Japanese distribution sector. Indeed, if a Member were held to anticipate all GATT-consistent measures, a non-violation claim would not be possible. Nor do we consider that as a general rule the United States should have reasonably anticipated Japanese measures that are similar to measures in other Members' markets. In each such instance, the issue of reasonable anticipation needs to be addressed on a case-by-case basis."[946]

665. After holding that "the issue of reasonable anticipation needs to be addressed on a case-by-case basis" and that it was "not sufficient to claim that a *specific* measure should have been anticipated because it is consistent with or a continuation of a past *general* government policy", the Panel on *Japan – Film* held that with respect to measures introduced prior to the conclusion of the tariff negotiations at issue, a presumption would exist that the complaining party "should be held to have anticipated those measures":

"[I]n the case of measures shown by Japan to have been introduced prior to the conclusion of the tariff negotiations at issue, it is our view that Japan has raised a presumption that the United States should be held to have anticipated those measures and it is for the United States to rebut that presumption. In this connection, it is our view that the United States is charged with knowledge of Japanese government measures as of the date of their publication. We realize that knowledge of a measure's existence is not equivalent to understanding the impact of the measure on a specific product market. For example, a vague measure could be given substance through enforcement policies that are initially unexpected or later changed significantly. However, where the United States claims that it did not know of a measure's relevance to market access conditions in respect of film or paper, we would expect the United States to clearly demonstrate why initially it could not have reasonably anticipated the effect of an existing measure on the film or paper market and when it did realize the effect. Such a showing will need to be tied to the relevant points in time (i.e., the conclusions of the Kennedy, Tokyo and Uruguay Rounds) in order to assess the extent of the United States' legitimate expectations of benefits from these three Rounds. A simple statement that a Member's measures were so opaque and informal that their impact could not be assessed is not sufficient. While it is true that in most past non-violation cases, one could easily discern a clear link between a product-specific action and the effect on the tariff concession that it allegedly impaired, one can also discern a link between general measures affecting the internal sale and distribution of products, such as rules on advertising and premiums, and tariff concessions on products in general."[947]

666. In *EC – Asbestos*, in examining a non-violation claim by Canada, the Panel decided to assess whether the measure in question could reasonably have been anticipated, as referenced in paragraph 654 above. With regard to what factors should *not* be taken into account to answer this question, the Panel considered, in a finding subsequently not reviewed by the Appellate Body:

"[P]revious panels found that a number of elements were not relevant. We consider it necessary to assess their applicability in relation to the circumstances of the present case.

(a) First of all, we note that the reports in *Japan – Film* and *EEC – Oilseeds* concluded that a specific measure could not be considered foreseeable solely because it was consistent with or a continuation of a past general government policy. However, we note that, in contrast to the two cases mentioned above, France had already developed a specific policy in response to the health problems created by asbestos before the adoption of the Decree. This factor must certainly be taken into account in our analysis.[948]

(b) The Panel in *Japan – Film,* also concluded that it would not be appropriate to charge the United States with having reasonably anticipated all GATT-consistent measures. Consequently, we do not consider that Canada reasonably anticipated all GATT-consistent measures, or even possible measures justifiable under Article XX.

(c) Finally, insofar as the Decree postdates the most recent tariff negotiations, we could apply the presumption applied by the Panel in *Japan – Film,* according to which normally Canada should not be considered to have anticipated a measure introduced after the tariff concession had been negotiated. However, we do not consider such a presumption to be consistent with the standard of proof that we found to be applicable in paragraph 8.272 above in the case of an allegation of non-violation nullification concerning measures falling under Article XX of the GATT 1994."[949]

667. After listing some of the elements which it considered should not be taken into account when deter-

[945] (*footnote original*) Panel Report on *EEC – Oilseeds I*, paras. 147 and 148.
[946] Panel Report on *Japan – Film*, para. 10.79.
[947] Panel Report on *Japan – Film*, paras. 10.76–10.77 and 10.79–10.80.
[948] (*footnote original*) In our opinion, there is a difference between, on the one hand, an import ban following upon a series of national measures gradually reinforcing, since 1977, the measures taken to protect public health against the effects of asbestos and, on the other, the relationship which the EC tried to establish in *EEC – Oilseeds* between the existence in 1962 of oilseeds subsidies in certain member States of the European Communities and the development of a subsidy programme insulating oil-seed producers from competition from imports (see para. 149 of the panel report).
[949] Panel Report on *EC – Asbestos*, para. 8.291.

mining the existence of legitimate expectations, the Panel on *EC – Asbestos* distinguished the case before it from that in *Japan – Film*:

> "Moreover, the circumstances of the present case seem to us to be different from the situation envisaged in *Japan – Film*. In that case, the measures in question concerned the organization of the Japanese domestic market. They were therefore economic measures of a kind that a third country might find surprising and, accordingly, difficult to anticipate. Here, it is a question of measures to protect public health under Article XX(b), that is to say, measures whose adoption is expressly envisaged by the GATT 1994. We therefore consider that the presumption applied in *Japan – Film* is not applicable to the present case."[950]

668. Following the finding referenced in paragraphs 666–667 above, in deciding that Canada had no legitimate expectations of maintaining or even developing its exports of certain asbestos products at the conclusion of the Uruguay Round, the Panel on *EC – Asbestos* noted that the increasing evidence showing the hazardous nature of asbestos and the growing number of international and Community decisions concerning the use of asbestos "could not do other than create a *climate* which should have led Canada to anticipate a change in the attitude of the importing countries, especially in view of the long-established trend towards ever tighter restrictions on the use of asbestos":

> "As we have found . . . the presumption applied by the Panel in *Japan – Film* cannot be applied to the present case.[951] Unlike Canada, which claims that no recent scientific development could have made the measure foreseeable, we consider that there is evidence to show that regulations restricting the use of asbestos could have been anticipated. First of all, the hazardous nature of chrysotile has long been known. . . .
>
> Moreover, in the light of the information submitted by the parties and the experts, we consider that the study of the diseases associated with the inhalation of asbestos is a field of science in which any possible conclusion would appear to be based on the observation of pathological cases day by day. . . .
>
> On the other hand, the accumulation of international and Community decisions concerning the use of asbestos, even if it did not necessarily make it certain that the use of asbestos would be banned by France, could not do other than create a *climate* which should have led Canada to anticipate a change in the attitude of the importing countries, especially in view of the long-established trend towards ever tighter restrictions on the use of asbestos. We also note that the use of chrysotile asbestos was banned by Members of the WTO well before it was banned by France. Admittedly, in *Japan – Film* the Panel considered that the adoption in other Members' markets of measures similar to the measures in question could not make the latter foreseeable. However, here again it was a question of commercial measures. We consider that in the present case the situation is different since it concerns public health and the competent international organizations have already taken a position on the question. The adoption, in an already restrictive context, of public health measures by other States, faced with a social and economic situation similar to that in France, creates an environment in which the adoption of similar measures by France, is no longer unforeseeable.
>
> Moreover, as noted above, at the end of the Uruguay Round France already had in place a number of measures regulating the use of asbestos. These included, in particular, measures relating to the exposure of workers taken after asbestos was recognized as a carcinogen by the IARC (Decree 77–949 of 17 August 1977) and the adoption of ILO Convention 162, as well as for the purpose of implementing Community directives applicable. The Panel also notes that Decree 88–466 of 28 April 1988 on products containing asbestos had prohibited the use of chrysotile asbestos in the manufacture of certain products.[952]"[953]

669. The Panel on *Korea – Procurement*, referring to the finding of the Appellate Body in *EC – Computer Equipment*, discussed the relevance of negotiation history in addressing issues of reasonable or legitimate expectation in cases relating to non-violation:

> "At the outset of our analysis of this issue, we must address some relevant issues relating to use of negotiating history which arose in the *European Communities – Computer Equipment* dispute. In that dispute, the Appellate Body specifically found that the standard of reasonable expectation or legitimate expectation existing with respect to non-violation cases had no role in reviewing negotiating history in order to aid in resolving the issues pertaining to a violation case. One of the reasons is that in a non-violation case the relevant question is what was the reasonable expectation of the complaining party. However, if it is necessary to go beyond the text in a violation case, the relevant question is to assess the objective evidence of the mutual understanding of the negotiating parties.[954] This involves not just the complaining and responding parties, but also involves possibly other parties to the negotiations. It is

[950] Panel Report on *EC – Asbestos*, para. 8.291.
[951] (*footnote original*) Even if it were applicable, we consider that the EC rebutted this presumption by their references to the systems established at international and Community level concerning the use of asbestos.
[952] (*footnote original*) See Annex II, reply of the European Communities to the Panel's question No. 4 at the Second Meeting with the Parties, paras. 254 to 261.
[953] Panel Report on *EC – Asbestos*, paras. 8.295–8.298.
[954] (*footnote original*) Appellate Body Report on *EC – Computer Equipment* at paragraphs 81–84, 93.

also important to note that there is a difference in perspectives of the reasonable expectations of one party as opposed to the mutual understanding of all the parties. The information available at the time of the negotiations may be available to some parties but not all. In other words, the evidence before the panel may be different in the two analyses and the weighting and probative value may also differ."[955]

670. With respect to the issue of legitimate expectations in the context of violation complaints, see Chapter on the *DSU*, Section XXIII.B.2.

(i) "nullified or impaired"

671. In *Japan – Film*, the Panel examined the third element required for a claim of non-violation, i.e. "nullification and impairment". The Panel equated "nullification and impairment" with "upsetting the competitive relationship" between domestic and imported products and held that the complaining party "must show a clear correlation between the measures and the adverse effect on the relevant competitive relationships":

"[I]t must be demonstrated that the competitive position of the imported products subject to and benefitting from a relevant market access (tariff) concession is being *upset by* ('nullified or impaired . . . as the result of') the application of a measure not reasonably anticipated. The equation of 'nullification or impairment' with 'upsetting the competitive relationship' established between domestic and imported products as a result of tariff concessions has been consistently used by GATT panels examining non-violation complaints. For example, the *EEC – Oilseeds* panel, in describing its findings, stated that it had 'found . . . that the subsidies concerned had impaired the tariff concession because they *upset the competitive relationship between domestic and imported oilseeds*, not because of any effect on trade flows'.[956] The same language was used in the *Australian Subsidy* and *Germany – Sardines* cases. Thus, in this case, it is up to the United States to prove that the governmental measures that it cites have upset the competitive relationship between domestic and imported photographic film and paper in Japan to the detriment of imports. In other words, the United States must show a clear correlation between the measures and the adverse effect on the relevant competitive relationships."

672. The Panel on *Japan – Film* then sub-divided the issue of "causality" into four separate issues: the degree of causation, original-neutrality of the measure at issue, the relevance of intent with respect to causality and "the extent to which measures may be considered collectively in an analysis of causation":

"As to the first issue . . . Japan should be responsible for what is caused by measures attributable to the Japanese Government as opposed, for example, to what is caused by restrictive business conduct attributable to private economic actors. At this stage of the proceeding, the issue is whether such a measure has caused nullification or impairment, i.e., whether it has made more than a *de minimis* contribution to nullification or impairment.

In respect of the second issue . . . even in the absence of *de jure* discrimination (measures which on their face discriminate as to origin), it may be possible for the United States to show *de facto* discrimination (measures which have a disparate impact on imports). However, in such circumstances, the complaining party is called upon to make a detailed showing of any claimed disproportionate impact on imports resulting from the origin-neutral measure. And, the burden of demonstrating such impact may be significantly more difficult where the relationship between the measure and the product is questionable.

We note that WTO/GATT case law on the issue of *de facto* discrimination is reasonably well-developed, both in regard to the principle of most-favoured-nation treatment under GATT Article I[957] and in regard to that of national treatment under GATT Article II[958] . . . We consider that despite the fact that these past cases dealt with GATT provisions other than Article XXIII:1(b), the reasoning contained therein appears to be equally applicable in addressing the question of *de facto* discrimination with respect to claims of non-violation nullification or impairment, subject, of course, to the caveat, that in an Article XXIII:1(b) case the issue is not whether equality of competitive conditions exists but whether the relative conditions of competition which existed between domestic and foreign products as a consequence of the relevant tariff concessions have been upset.

The third issue is the relevance of intent to causality. . . . We note . . . that Article XXIII:1(b) does not require a proof of intent of nullification or impairment of benefits by a government adopting a measure. What matters for purposes of establishing causality is the impact of a measure, i.e. whether it upsets competitive relationships. Nonetheless, intent may not be irrelevant. In our view, if a measure that appears on its face to be origin-neutral in its effect on domestic and imported products is nevertheless shown to have been intended to restrict imports, we may be more inclined to find a causal relationship in specific cases, bearing in mind that intent is not determinative where it in fact exists.

---

[955] Panel Report on *Korea – Procurement*, para. 7.75.

[956] (*footnote original*) Follow-up on the GATT Panel Report on *EEC – Oilseeds*, BISD 39S/91, para. 77 (emphasis added).

[957] (*footnote original*) See, e.g., Panel Report on *European Economic Community – Imports of Beef from Canada*, paras. 4.2, 4.3.

[958] (*footnote original*) See Panel Reports on *US – Section 337*, para. 5.11; *Canada – Import, Distribution and Sale of Certain Alcoholic Drinks by Provincial Marketing Agencies*, paras. 5.12–5.14 and 5.30–5.31; *US – Malt Beverages*, para. 5.30; and Panel Reports on *US – Gasoline*, para. 6.10; *Japan – Alcoholic Beverages II*, para. 6.33; and *EC – Bananas III*, paras. 7.179–7.180.

> Finally, as for the US position that the Panel should examine the impact of the measures *in combination* as well as individually (a position contested by Japan), we do not reject the possibility of such an impact. It is not without logic that a measure, when analyzed in isolation, may have only very limited impact on competitive conditions in a market, but may have a more significant impact on such conditions when seen in the context of – in combination with – a larger set of measures. Notwithstanding the logic of this theoretical argument, however, we are sensitive to the fact that the technique of engaging in a combined assessment of measures so as to determine causation is subject to potential abuse and therefore must be approached with caution and circumscribed as necessary."[959]

673. In *EC – Asbestos*, Canada claimed that the French ban on the sale and imports of products containing asbestos nullified or impaired benefits accruing to it under Article XXIII:1(b). In this regard, the Panel stated:

> "[T]he Panel finds it appropriate to consider that in view of the type of measure in question the 'upsetting of the competitive relationship' can be assumed. By its very nature, an import ban constitutes a denial of any opportunity for competition, whatever the import volume that existed before the introduction of the ban. We will therefore concentrate on the question of whether the measure could reasonably have been anticipated by the Canadian Government at the time that it was negotiating the various tariff concessions covering the products concerned."[960]

(j) Non-violation complaints in relation to the Agreement on Government Procurement

674. In *Korea – Procurement*, the Panel noted the three requirements enunciated by the Panel on *Japan – Film* as necessary for a claim of non-violation under Article XXIII:1(b). The Panel observed that the key difference between a traditional non-violation case and the case involving the *Agreement on Government Procurement* before it was that the question of "reasonable expectation" in a traditional non-violation case is whether or not it was reasonable to be expected that the benefit under an existing concession would be impaired by the measures, but in the instant case, the question was "whether or not there was a reasonable expectation of an entitlement to a benefit that had accrued pursuant to the negotiation rather than pursuant to a concession." The Panel continued:

> "[T]he non-violation remedy as it has developed in GATT/WTO jurisprudence should not be viewed in isolation from general principles of customary international law. As noted above, the basic premise is that Members should not take actions, even those consistent with the letter of the treaty, which might serve to undermine the reasonable expectations of negotiating partners. This has traditionally arisen in the context of actions which might undermine the value of negotiated tariff concessions. In our view, this is a further development of the principle of *pacta sunt servanda* in the context of Article XXIII:1(b) of the GATT 1947 and disputes that arose thereunder, and subsequently in the WTO Agreements, particularly in Article 26 of the DSU. The principle of *pacta sunt servanda* is expressed in Article 26 of the *Vienna Convention*[961] in the following manner:
>
> > 'Every treaty in force is binding upon the parties to it and must be performed by them in good faith.'"[962]

675. The Panel on *Korea – Procurement* then addressed the issue of "error in treaty negotiation":

> "One of the issues that arises in this dispute is whether the concept of non-violation can arise in contexts other than the traditional approach represented by *pacta sunt servanda*. Can, for instance the question of error in treaty negotiation be addressed under Article 26 of the DSU and Article XXII:2 of the GPA? We see no reason why it cannot. Parties have an obligation to negotiate in good faith just as they must implement the treaty in good faith."[963]

676. The Panel on *Korea – Procurement* explained its decision to review the claim of nullification or impairment within the framework of principles of international law which are generally applicable not only to the performance of treaties but also to treaty negotiation as follows:

> "[W]e will review the claim of nullification or impairment raised by the United States within the framework of principles of international law which are generally applicable not only to performance of treaties but also to treaty negotiation.[964] To do otherwise potentially would leave a gap in the applicability of the law generally to WTO disputes and we see no evidence in the language of the WTO Agreements that such a gap was intended. If the non-violation remedy were deemed not to provide a relief for such problems as have arisen in the present case regarding good faith and error in the negotiation of GPA commitments (and one might add, in tariff and services commitments under other WTO Agreements), then

[960] Panel Report on *EC – Asbestos*, para. 8.289.
[961] (*footnote original*) A reference to the rule of *pacta sunt servanda* also appears in the preamble to the Vienna Convention.
[962] Panel Report on *Korea – Procurement*, para. 7.93.
[963] Panel Report on *Korea – Procurement*, para. 7.100.
[964] (*footnote original*) We note that DSU Article 7.1 requires that the relevant covered agreement be cited in the request for a panel and reflected in the terms of reference of a panel. That is not a bar to a broader analysis of the type we are following here, for the GPA would be the referenced covered agreement and, in our view, we are merely fully examining the issue of non-violation raised by the United States. We are merely doing it within the broader context of customary international law rather than limiting it to the traditional analysis that accords with the extended concept of *pacta sunt servanda*. The purpose of the terms of reference is to properly identify the claims of the party and therefore the scope of a panel's review. We do not see any basis for arguing that the terms of reference are meant to *exclude* reference to the broader rules of customary international law in interpreting a claim properly before the Panel.

nothing could be done about them within the framework of the WTO dispute settlement mechanism if general rules of customary international law on good faith and error in treaty negotiations were ruled not to be applicable. As was argued above, that would not be in conformity with the normal relationship between international law and treaty law or with the WTO Agreements."[965]

(k) Relationship with other WTO Agreements

(i) Anti-Dumping Agreement

677. With respect to the relationship between Article XXIII of the *GATT 1994* and Article 17 of the *Anti-Dumping Agreement*, see the excerpts from the reports of the panels and Appellate Body referenced in the Chapter on the *Anti-Dumping Agreement*.

3. Article XXIII:1(c)

No jurisprudence or decision of a competent WTO body.

4. Article XXIII:2

678. The following table lists the disputes, up to 31 December 2004, in which panel and/or Appellate Body reports have been adopted where the provisions of the *GATT 1994* were invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Gasoline*	WT/DS2	Articles I, III and XX
2	*Japan – Alcoholic Beverages II*	WT/DS8, WT/DS10, WT/DS11	Articles III, III:1 and III:2
3	*Australia – Salmon*	WT/DS18	Articles XI
4	*Brazil – Desiccated Coconut*	WT/DS22	Articles I, II, VI:3, VI:6
5	*US – Underwear*	WT/DS24	Article X:2
6	*EC – Hormones*	WT/DS26, WT/DS48	Articles III and XX
7	*EC – Bananas III*	WT/DS27	Articles I, II, III, X, XI, XIII and XVIII
8	*Canada – Periodicals*	WT/DS31	Articles III and XI
9	*US – Wool Shirts and Blouses*	WT/DS33	Article XXIII:1(a)
10	*Turkey – Textiles*	WT/DS34	Articles XI, XIII and XXIV
11	*Japan – Film*	WT/DS44	Articles III:1, III:4, X:1, X:3 and XXIII:1(b)
12	*India – Patents (US)*	WT/DS50	Article XXXIII
13	*Indonesia – Autos*	WT/DS54, WT/DS55, WT/DS59, WT/DS64	Articles I:1, III:2, III:4, III:7, X:1 and X:3(a)
14	*Argentina – Textiles and Apparel*	WT/DS56	Articles II, and VIII
15	*US – Shrimp*	WT/DS58	Articles I, XI, XIII and XX
16	*Guatemala – Cement I*	WT/DS60	Article VI
17	*EC – Computer Equipment*	WT/DS62, WT/DS67, WT/DS68	Article II
18	*EC – Poultry*	WT/DS69	Articles II, X and XIII
19	*Korea – Alcoholic Beverages*	WT/DS75, WT/DS84	Article III:2 and XX(d)
20	*Chile – Alcoholic Beverages*	WT/DS87, WT/DS110	Article III:2
21	*India – Quantitative Restrictions*	WT/DS90	Articles XI:1, XIII and XVIII:11
22	*Korea – Dairy*	WT/DS98	Article XIX
23	*US – DRAMS*	WT/DS99	Article X
24	*US – FSC*	WT/DS108	Article III:4
25	*Canada – Dairy*	WT/DS103, WT/DS113	Article II
26	*Argentina – Footwear (EC)*	WT/DS121	Articles XIX and XXIV
27	*Thailand – H-Beams*	WT/DS122	Article VI
28	*EC – Asbestos*	WT/DS135	Articles III, XI, XXIII:1(b) and XX(b)
29	*US – 1916 Act (EC)*	WT/DS136	Article VI
30	*Canada – Autos*	WT/DS139, WT/DS142	Articles I:1, III:4 and XXIV
31	*India – Autos*	WT/DS146, WT/DS175	Articles III:4 and XI:1
32	*Argentina – Hides and Leather*	WT/DS155	Articles III:2, XI:1 and X:3(a)
33	*Guatemala – Cement II*	WT/DS156	Article VI
34	*Korea – Various Measures on Beef*	WT/DS161, WT/DS169	Articles II, XI, XVII and XX
35	*US – 1916 Act (EC)*	WT/DS162	Articles III:4, VI and XI
36	*Korea – Procurement*	WT/DS163	Article XXIII
37	*US – Certain EC Products*	WT/DS165	Articles I, II, VIII and XI
38	*US – Wheat Gluten*	WT/DS166	Article XXIV
39	*US – Stainless Steel*	WT/DS179	Article X:3
40	*US – Lamb*	WT/DS177, WT/DS178	Articles I, II and XIX
41	*US – Hot-Rolled Steel*	WT/DS184	Articles VI and X
42	*US – Cotton Yarn*	WT/DS192	Article III
43	*US – Line Pipe*	WT/DS202	Articles XIII:2, XIII2:(a) and XIX
44	*US – Steel Plate*	WT/DS206	Article VI:1, VI:2

[965] Panel Report on *Korea – Procurement*, para. 7.101.

Table (*cont.*)

	Case Name	Case Number	Invoked Articles
45	*Chile – Price Band System*	WT/DS207	Articles II:1(b) and XIX:1(a)
46	*Egypt – Steel Rebar*	WT/DS211	Article X:3
47	*US – Offset Act (Byrd Amendment)*	WT/DS217, WT/DS234	Articles VI and X:3(a)
48	*EC – Tube or Pipe Fittings*	WT/DS219	Articles I and VI
49	*US – Section 129(c)(1)URAA*	WT/DS221	Articles VI:2, VI:3 and VI:6(a)
50	*EC – Sardines*	WT/DS231	Articles I, III and XI:1
51	*US – Softwood Lumber III*	WT/DS236	Article VI:3
52	*Argentina – Preserved Peaches*	WT/DS238	Article XIX:1
53	*US – Corrosion-Resistant Steel Sunset Review*	WT/DS244	Articles VI and X
54	*Japan – Apples*	WT/DS245	Article XI
55	*EC – Tariff Preferences*	WT/DS246	Article I:1
56	*US – Steel Safeguards*	WT/DS248, WT/DS249, WT/DS251, WT/DS252, WT/DS253, WT/DS254, WT/DS258, WT/DS259	Articles I, II, X:3, XIII and XIX
57	*US – Softwood Lumber IV*	WT/DS257	Articles VI and X:3(a)
58	*US – Softwood Lumber V*	WT/DS264	Articles VI:1, VI:2 and X:3
59	*Canada – Wheat Exports and Grain Imports*	WT/DS276	Articles III:4 and XVII
60	*US – Softwood Lumber VI*	WT/DS277	Article VI:6(a)

680. With respect to GATT practice on Article XXIII, see GATT Analytical Index, pages 612–619.

PART III

XXV. ARTICLE XXIV

A. TEXT OF ARTICLE XXIV

Article XXIV

Territorial Application – Frontier Traffic – Customs Unions and Free-trade Areas

1. The provisions of this Agreement shall apply to the metropolitan customs territories of the contracting parties and to any other customs territories in respect of which this Agreement has been accepted under Article XXVI or is being applied under Article XXXIII or pursuant to the Protocol of Provisional Application. Each such customs territory shall, exclusively for the purposes of the territorial application of this Agreement, be treated as though it were a contracting party; *Provided* that the provisions of this paragraph shall not be construed to create any rights or obligations as between two or more customs territories in respect of which this Agreement has been accepted under Article XXVI or is being applied under Article XXXIII or pursuant to the Protocol of Provisional Application by a single contracting party.

2. For the purposes of this Agreement a customs territory shall be understood to mean any territory with respect to which separate tariffs or other regulations of commerce are maintained for a substantial part of the trade of such territory with other territories.

3. The provisions of this Agreement shall not be construed to prevent:

(*a*) Advantages accorded by any contracting party to adjacent countries in order to facilitate frontier traffic;

(*b*) Advantages accorded to the trade with the Free Territory of Trieste by countries contiguous to that territory, provided that such advantages are not in conflict with the Treaties of Peace arising out of the Second World War.

4. The contracting parties recognize the desirability of increasing freedom of trade by the development, through voluntary agreements, of closer integration between the economies of the countries parties to such agreements. They also recognize that the purpose of a customs union or of a free-trade area should be to facilitate trade between the constituent territories and not to raise barriers to the trade of other contracting parties with such territories.

5. Accordingly, the provisions of this Agreement shall not prevent, as between the territories of contracting parties, the formation of a customs union or of a free-trade area or the adoption of an interim agreement necessary for the formation of a customs union or of a free-trade area; *Provided* that:

(*a*) with respect to a customs union, or an interim agreement leading to a formation of a customs union, the duties and other regulations of commerce imposed at the institution of any such union or interim agreement in respect of trade with contracting parties not parties to such union or agreement shall not on the

whole be higher or more restrictive than the general incidence of the duties and regulations of commerce applicable in the constituent territories prior to the formation of such union or the adoption of such interim agreement, as the case may be;

(*b*) with respect to a free-trade area, or an interim agreement leading to the formation of a free-trade area, the duties and other regulations of commerce maintained in each of the constituent territories and applicable at the formation of such free-trade area or the adoption of such interim agreement to the trade of contracting parties not included in such area or not parties to such agreement shall not be higher or more restrictive than the corresponding duties and other regulations of commerce existing in the same constituent territories prior to the formation of the free-trade area, or interim agreement as the case may be; and

(*c*) any interim agreement referred to in subparagraphs (*a*) and (*b*) shall include a plan and schedule for the formation of such a customs union or of such a free-trade area within a reasonable length of time.

6. If, in fulfilling the requirements of subparagraph 5 (*a*), a contracting party proposes to increase any rate of duty inconsistently with the provisions of Article II, the procedure set forth in Article XXVIII shall apply. In providing for compensatory adjustment, due account shall be taken of the compensation already afforded by the reduction brought about in the corresponding duty of the other constituents of the union.

7. (*a*) Any contracting party deciding to enter into a customs union or free-trade area, or an interim agreement leading to the formation of such a union or area, shall promptly notify the CONTRACTING PARTIES and shall make available to them such information regarding the proposed union or area as will enable them to make such reports and recommendations to contracting parties as they may deem appropriate.

(*b*) If, after having studied the plan and schedule included in an interim agreement referred to in paragraph 5 in consultation with the parties to that agreement and taking due account of the information made available in accordance with the provisions of subparagraph (*a*), the CONTRACTING PARTIES find that such agreement is not likely to result in the formation of a customs union or of a free-trade area within the period contemplated by the parties to the agreement or that such period is not a reasonable one, the CONTRACTING PARTIES shall make recommendations to the parties to the agreement. The parties shall not maintain or put into force, as the case may be, such agreement if they are not prepared to modify it in accordance with these recommendations.

(*c*) Any substantial change in the plan or schedule referred to in paragraph 5 (*c*) shall be communicated to the CONTRACTING PARTIES, which may request the contracting parties concerned to consult with them if the change seems likely to jeopardize or delay unduly the formation of the customs union or of the free-trade area.

8. For the purposes of this Agreement:

(*a*) A customs union shall be understood to mean the substitution of a single customs territory for two or more customs territories, so that

(i) duties and other restrictive regulations of commerce (except, where necessary, those permitted under Articles XI, XII, XIII, XIV, XV and XX) are eliminated with respect to substantially all the trade between the constituent territories of the union or at least with respect to substantially all the trade in products originating in such territories, and,

(ii) subject to the provisions of paragraph 9, substantially the same duties and other regulations of commerce are applied by each of the members of the union to the trade of territories not included in the union;

(*b*) A free-trade area shall be understood to mean a group of two or more customs territories in which the duties and other restrictive regulations of commerce (except, where necessary, those permitted under Articles XI, XII, XIII, XIV, XV and XX) are eliminated on substantially all the trade between the constituent territories in products originating in such territories.

9. The preferences referred to in paragraph 2 of Article I shall not be affected by the formation of a customs union or of a free-trade area but may be eliminated or adjusted by means of negotiations with contracting parties affected.* This procedure of negotiations with affected contracting parties shall, in particular, apply to the elimination of preferences required to conform with the provisions of paragraph 8 (*a*)(i) and paragraph 8 (*b*).

10. The CONTRACTING PARTIES may by a two-thirds majority approve proposals which do not fully comply with the requirements of paragraphs 5 to 9 inclusive, provided that such proposals lead to the formation of a customs union or a free-trade area in the sense of this Article.

11. Taking into account the exceptional circumstances arising out of the establishment of India and Pakistan as independent States and recognizing the fact that they have long constituted an economic unit, the contracting parties agree that the provisions of this Agreement shall not prevent the two countries from entering into special arrangements with respect to the trade between them,

pending the establishment of their mutual trade relations on a definitive basis.*

12. Each contracting party shall take such reasonable measures as may be available to it to ensure observance of the provisions of this Agreement by the regional and local governments and authorities within its territories.

B. TEXT OF *AD* ARTICLE XXIV

Ad Article XXIV

Paragraph 9

It is understood that the provisions of Article I would require that, when a product which has been imported into the territory of a member of a customs union or free-trade area at a preferential rate of duty is re-exported to the territory of another member of such union or area, the latter member should collect a duty equal to the difference between the duty already paid and any higher duty that would be payable if the product were being imported directly into its territory.

Paragraph 11

Measures adopted by India and Pakistan in order to carry out definitive trade arrangements between them, once they have been agreed upon, might depart from particular provisions of this Agreement, but these measures would in general be consistent with the objectives of the Agreement.

C. UNDERSTANDING ON THE INTERPRETATION OF ARTICLE XXIV OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

Members,

Having regard to the provisions of Article XXIV of GATT 1994;

Recognizing that customs unions and free trade areas have greatly increased in number and importance since the establishment of GATT 1947 and today cover a significant proportion of world trade;

Recognizing the contribution to the expansion of world trade that may be made by closer integration between the economies of the parties to such agreements;

Recognizing also that such contribution is increased if the elimination between the constituent territories of duties and other restrictive regulations of commerce extends to all trade, and diminished if any major sector of trade is excluded;

Reaffirming that the purpose of such agreements should be to facilitate trade between the constituent territories and not to raise barriers to the trade of other Members with such territories; and that in their formation or enlargement the parties to them should to the greatest possible extent avoid creating adverse effects on the trade of other Members;

Convinced also of the need to reinforce the effectiveness of the role of the Council for Trade in Goods in reviewing agreements notified under Article XXIV, by clarifying the criteria and procedures for the assessment of new or enlarged agreements, and improving the transparency of all Article XXIV agreements;

Recognizing the need for a common understanding of the obligations of Members under paragraph 12 of Article XXIV;

Hereby *agree* as follows:

1. Customs unions, free-trade areas, and interim agreements leading to the formation of a customs union or free-trade area, to be consistent with Article XXIV, must satisfy, *inter alia*, the provisions of paragraphs 5, 6, 7 and 8 of that Article.

Article XXIV:5

2. The evaluation under paragraph 5(a) of Article XXIV of the general incidence of the duties and other regulations of commerce applicable before and after the formation of a customs union shall in respect of duties and charges be based upon an overall assessment of weighted average tariff rates and of customs duties collected. This assessment shall be based on import statistics for a previous representative period to be supplied by the customs union, on a tariff-line basis and in values and quantities, broken down by WTO country of origin. The Secretariat shall compute the weighted average tariff rates and customs duties collected in accordance with the methodology used in the assessment of tariff offers in the Uruguay Round of Multilateral Trade Negotiations. For this purpose, the duties and charges to be taken into consideration shall be the applied rates of duty. It is recognized that for the purpose of the overall assessment of the incidence of other regulations of commerce for which quantification and aggregation are difficult, the examination of individual measures, regulations, products covered and trade flows affected may be required.

3. The "reasonable length of time" referred to in paragraph 5(c) of Article XXIV should exceed 10 years only in exceptional cases. In cases where Members parties to an interim agreement believe that 10 years would be insufficient they shall provide a full explanation to the Council for Trade in Goods of the need for a longer period.

Article XXIV:6

4. Paragraph 6 of Article XXIV establishes the procedure to be followed when a Member forming a customs union proposes to increase a bound rate of duty. In this regard Members reaffirm that the procedure set forth in Article XXVIII, as elaborated in the guidelines adopted on 10 November 1980 (BISD 27S/26–28) and in the Understanding on the Interpretation of Article XXVIII of GATT 1994, must be commenced before tariff concessions are modified or withdrawn upon the formation of a customs

union or an interim agreement leading to the formation of a customs union.

5. These negotiations will be entered into in good faith with a view to achieving mutually satisfactory compensatory adjustment. In such negotiations, as required by paragraph 6 of Article XXIV, due account shall be taken of reductions of duties on the same tariff line made by other constituents of the customs union upon its formation. Should such reductions not be sufficient to provide the necessary compensatory adjustment, the customs union would offer compensation, which may take the form of reductions of duties on other tariff lines. Such an offer shall be taken into consideration by the Members having negotiating rights in the binding being modified or withdrawn. Should the compensatory adjustment remain unacceptable, negotiations should be continued. Where, despite such efforts, agreement in negotiations on compensatory adjustment under Article XXVIII as elaborated by the Understanding on the Interpretation of Article XXVIII of GATT 1994 cannot be reached within a reasonable period from the initiation of negotiations, the customs union shall, nevertheless, be free to modify or withdraw the concessions; affected Members shall then be free to withdraw substantially equivalent concessions in accordance with Article XXVIII.

6. GATT 1994 imposes no obligation on Members benefiting from a reduction of duties consequent upon the formation of a customs union, or an interim agreement leading to the formation of a customs union, to provide compensatory adjustment to its constituents.

Review of Customs Unions and Free-Trade Areas

7. All notifications made under paragraph 7(a) of Article XXIV shall be examined by a working party in the light of the relevant provisions of GATT 1994 and of paragraph 1 of this Understanding. The working party shall submit a report to the Council for Trade in Goods on its findings in this regard. The Council for Trade in Goods may make such recommendations to Members as it deems appropriate.

8. In regard to interim agreements, the working party may in its report make appropriate recommendations on the proposed time-frame and on measures required to complete the formation of the customs union or free-trade area. It may if necessary provide for further review of the agreement.

9. Members parties to an interim agreement shall notify substantial changes in the plan and schedule included in that agreement to the Council for Trade in Goods and, if so requested, the Council shall examine the changes.

10. Should an interim agreement notified under paragraph 7(a) of Article XXIV not include a plan and schedule, contrary to paragraph 5(c) of Article XXIV, the working party shall in its report recommend such a plan and schedule. The parties shall not maintain or put into force, as the case may be, such agreement if they are not prepared to modify it in accordance with these recommendations. Provision shall be made for subsequent review of the implementation of the recommendations.

11. Customs unions and constituents of free-trade areas shall report periodically to the Council for Trade in Goods, as envisaged by the CONTRACTING PARTIES to GATT 1947 in their instruction to the GATT 1947 Council concerning reports on regional agreements (BISD 18S/38), on the operation of the relevant agreement. Any significant changes and/or developments in the agreements should be reported as they occur.

Dispute Settlement

12. The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding may be invoked with respect to any matters arising from the application of those provisions of Article XXIV relating to customs unions, free-trade areas or interim agreements leading to the formation of a customs union or free-trade area.

Article XXIV:12

13. Each Member is fully responsible under GATT 1994 for the observance of all provisions of GATT 1994, and shall take such reasonable measures as may be available to it to ensure such observance by regional and local governments and authorities within its territory.

14. The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding may be invoked in respect of measures affecting its observance taken by regional or local governments or authorities within the territory of a Member. When the Dispute Settlement Body has ruled that a provision of GATT 1994 has not been observed, the responsible Member shall take such reasonable measures as may be available to it to ensure its observance. The provisions relating to compensation and suspension of concessions or other obligations apply in cases where it has not been possible to secure such observance.

15. Each Member undertakes to accord sympathetic consideration to and afford adequate opportunity for consultation regarding any representations made by another Member concerning measures affecting the operation of GATT 1994 taken within the territory of the former.

D. INTERPRETATION AND APPLICATION OF ARTICLE XXIV

1. General

(a) Committee on Regional Trade Agreements

681. Pursuant to Article IV:7 of the *WTO Agreement*, on 6 February 1996, the General Council decided to establish the Committee on Regional Trade Agree-

ments.[966] With respect to the establishment of the Committee, its rules of procedure and activities, including reports to the General Council, see the Chapter on the *WTO Agreement*, Section V.B.7(f).[967] Also, with respect to the activities of the Committee concerning the examination of agreements notified under Article XXIV of the *GATT 1994*, see Section V.B.7(f)(iv).

(b) Enabling Clause

682. In 1979, the GATT Council adopted the Decision on Differential and More Favourable Treatment Reciprocity and Fuller Participation of Developing Countries (the "Enabling Clause") to waive Article I of the GATT for certain arrangements, with respect to, *inter alia*, "[r]egional or global arrangements entered into amongst less-developed contracting parties for the mutual reduction or elimination of tariffs". For the text of the Enabling Clause, see paragraph 29 above.

(c) Reference to GATT practice

683. With respect to GATT practice on this subject, see GATT Analytical Index, pages 53–59.

2. Article XXIV:4

(a) Relationship between paragraph 4 and paragraphs 5 to 9

684. In *Turkey – Textiles*, the Appellate Body reviewed the Panel's finding that Article XXIV did not justify the imposition by Turkey of quantitative restrictions on imports of certain textile and clothing products from India upon the formation of a customs union with the European Communities. Although the key provision in this dispute was paragraph 5 of Article XXIV, the Appellate Body held that "paragraph 4 of Article XXIV constitutes an important element of the context of the chapeau of paragraph 5"[968]:

> "According to paragraph 4, the purpose of a customs union is 'to facilitate trade' between the constituent members and 'not to raise barriers to the trade' with third countries. This objective demands that a balance be struck by the constituent members of a customs union. A customs union should facilitate trade within the customs union, but it should *not* do so in a way that raises barriers to trade with third countries. We note that [the preamble of] the *Understanding on Article XXIV* explicitly reaffirms this purpose of a customs union, and states that in the formation or enlargement of a customs union, the constituent members should 'to the greatest possible extent avoid creating adverse affects on the trade of other Members'. Paragraph 4 contains purposive, and not operative, language. It does not set forth a separate obligation itself but, rather, sets forth the overriding and pervasive purpose for Article XXIV which is manifested in operative language in the specific obligations that are found elsewhere in Article XXIV. Thus, the purpose set forth in paragraph 4 informs the other relevant paragraphs of Article XXIV, including the chapeau of paragraph 5."[969]

(b) "not to raise barriers to the trade of other contracting parties"

685. On the issue of whether parties to a regional trade agreement are required not to increase the barriers overall or rather not to raise any barrier, the Appellate Body identified paragraph 4 as an important element in the context of interpreting the text of the chapeau of paragraph 5, and it stated:

> "According to paragraph 4, the purpose of a customs union is 'to facilitate trade' between the constituent members and 'not to raise barriers to the trade' with third countries. This objective demands that a balance be struck by the constituent members of a customs union. A customs union should facilitate trade within the customs union, but it should *not* do so in a way that raises barriers to trade with third countries."[970]

(c) Reference to GATT practice

686. With respect to GATT practice on this subject, see GATT Analytical Index, page 796.

3. Article XXIV:5

(a) Chapeau

(i) Interpretation: the necessity test

687. The Panel on *Turkey – Textiles* had found that Turkey could not justify a violation of Article XI by invoking Article XXIV:5, because Article XXIV:5, in the view of the Panel, does not apply to *specific measures* adopted on the occasion of the formation of a new customs union. Rather, the Panel found that Article XXIV:5 focuses on the *overall effect* of a regional agreement. As a result, the Panel concluded that there is no legal basis in Article XXIV:5(a) for the justification of individual quantitative restrictions which are otherwise incompatible with WTO law. Although the Appellate Body ultimately upheld the Panel's finding that Turkey's measures could not be justified under Article XXIV, it modified the Panel's reasoning on Article XXIV:5. The Appellate Body began by emphasizing that the chapeau of Article XXIV:5 states that the provisions of GATT 1994 "shall not prevent" the formation of a customs union and that this meant "that the provisions of the

[966] WT/GC/M/10, para.11. The decision can be found in WT/L/127.
[967] WT/REG/M/2, para. 11. The text of the rules of procedures can be found in WT/REG/1. See also WT/REG/M/2, para. 12.
[968] Appellate Body Report on *Turkey – Textiles*, para. 56.
[969] Appellate Body Report on *Turkey – Textiles*, para. 57.
[970] WT/DS34/AB/R, paras. 55–56.

GATT 1994 *shall not make impossible* the formation of a customs union":

> "[I]n examining the text of the chapeau to establish its ordinary meaning, we note that the chapeau states that the provisions of the GATT 1994 '*shall not prevent*' the formation of a customs union. We read this to mean that the provisions of the GATT 1994 *shall not make impossible* the formation of a customs union. Thus, the chapeau makes it clear that Article XXIV may, under certain conditions, justify the adoption of a measure which is inconsistent with certain other GATT provisions, and may be invoked as a possible 'defence' to a finding of inconsistency.[971]
>
> Second, in examining the text of the chapeau, we observe also that it states that the provisions of the GATT 1994 shall not prevent '*the formation of a customs union*'. This wording indicates that Article XXIV can justify the adoption of a measure which is inconsistent with certain other GATT provisions only if the measure is introduced upon the formation of a customs union, and only to the extent that the formation of the customs union would be prevented if the introduction of the measure were not allowed."[972]

688. The Appellate Body then indicated the two conditions under which a measure, otherwise incompatible with WTO law, could be justified by virtue of Article XXIV:

> "[I]n a case involving the formation of a customs union, this 'defence' is available only when two conditions are fulfilled. First, the party claiming the benefit of this defence must demonstrate that the measure at issue is introduced upon the formation of a customs union that fully meets the requirements of sub-paragraphs 8(a) and 5(a) of Article XXIV. And, second, that party must demonstrate that the formation of that customs union would be prevented if it were not allowed to introduce the measure at issue. Again, *both* these conditions must be met to have the benefit of the defence under Article XXIV.
>
> We would expect a panel, when examining such a measure, to require a party to establish that both of these conditions have been fulfilled. It may not always be possible to determine whether the second of the two conditions has been fulfilled without initially determining whether the first condition has been fulfilled. In other words, it may not always be possible to determine whether not applying a measure would prevent the formation of a customs union without first determining whether there *is* a customs union."[973]

689. The Appellate Body reiterated its findings from *Turkey – Textiles*, referenced in paragraphs 687–688 above, in its Report on *Argentina – Footwear (EC)*, when it examined the Panel's finding that Argentina had violated Article 2 of the *Agreement on Safeguards* by including imports from all sources in its investigation of "increased imports" of footwear products into its territory but excluding other MERCOSUR member States from the application of the safeguard measures.[974]

(ii) Reference to GATT practice

690. With respect to GATT practice on this subject, see GATT Analytical Index, page 798.

(b) Paragraph 5(a)

(i) Link with the chapeau

691. In *Turkey – Textiles*, the Appellate Body held that "Article XXIV can . . . only be invoked as a defence . . . to the extent that the measure [at issue] is introduced upon the formation of a customs union which meets the requirement in sub-paragraph 5(a)":

> "[I]n examining the text of the chapeau of Article XXIV:5, we note that the chapeau states that the provisions of the GATT 1994 shall not prevent the formation of a customs union '*Provided that*'. The phrase '*provided that*' is an essential element of the text of the chapeau. In this respect, for purposes of a 'customs union', the relevant proviso is set out immediately following the chapeau, in Article XXIV:5(a). . . .
>
> Given this proviso, Article XXIV can, in our view, only be invoked as a defence to a finding that a measure is inconsistent with certain GATT provisions to the extent that the measure is introduced upon the formation of a customs union which meets the requirement in sub-

[971] (*footnote original*) We note that legal scholars have long considered Article XXIV to be an "exception" or a possible "defence" to claims of violation of GATT provisions. An early treatise on GATT law stated: "[Article XXIV] establishes an *exception to GATT obligations* for regional arrangements that meet a series of detailed and complex criteria." (emphasis added) J. Jackson, *World Trade and the Law of GATT* (The Bobbs-Merrill Company, 1969), p. 576. See also J. Allen, *The European Common Market and the GATT* (The University Press of Washington, D.C., 1960), p. 2; K. Dam, "Regional Economic Arrangements and the GATT: The Legacy of Misconception", *University of Chicago Law Review*, 1963, p. 616; and J. Huber, "The Practice of GATT in Examining Regional Arrangements under Article XXIV", *Journal of Common Market Studies*, 1981, p. 281. We note also the following statement in the unadopted panel report in *EEC – Member States' Import Regimes for Bananas*, DS32/R, 3 June 1993, para. 358: "The Panel noted that Article XXIV:5 to 8 permitted the contracting parties to *deviate from their obligations under other provisions of the General Agreement* for the purpose of forming a customs union . . .". (emphasis added)
The chapeau of paragraph 5 refers only to the provisions of the GATT 1994. It does not refer to the provisions of the *ATC*. However, Article 2.4 of the *ATC* provides that "[n]o new restrictions . . . shall be introduced *except under* the provisions of this Agreement or *relevant GATT 1994 provisions*." (emphasis added) In this way, Article XXIV of the GATT 1994 is incorporated in the *ATC* and may be invoked as a defence to a claim of inconsistency with Article 2.4 of the *ATC*, provided that the conditions set forth in Article XXIV for the availability of this defence are met.

[972] Appellate Body Report on *Turkey – Textiles*, paras. 45–46.

[973] Appellate Body Report on *Turkey – Textiles*, paras. 58–59.

[974] Appellate Body Report on *Argentina – Footwear (EC)*, para. 109.

paragraph 5(a) of Article XXIV relating to the 'duties and other regulations of commerce' applied by the constituent members of the customs union to trade with third countries."[975]

(ii) "General incidence" of duties

692. With respect to the requirements for a WTO-compatible customs union, the Appellate Body in *Turkey – Textiles* noted that the term "general incidence" of duties referred to the applied rates of duties:

"With respect to 'duties', Article XXIV:5(a) requires that the duties applied by the constituent members of the customs union *after* the formation of the customs union 'shall *not* on the whole be *higher* . . . than the *general incidence*' of the duties that were applied by each of the constituent members before the formation of the customs union. Paragraph 2 of the *Understanding on Article XXIV* requires that the evaluation under Article XXIV:5(a) of the *general incidence of the duties* applied before and after the formation of a customs union 'shall . . . be based upon an overall assessment of weighted average tariff rates and of customs duties collected.'[976] Before the agreement on this Understanding, there were different views among the GATT Contracting Parties as to whether one should consider, when applying the test of Article XXIV:5(a), the *bound* rates of duty or the *applied* rates of duty. This issue has been resolved by paragraph 2 of the *Understanding on Article XXIV*, which clearly states that the *applied* rate of duty must be used."[977]

(iii) "Other regulations of commerce"

693. With respect to the term "other regulations of commerce", the Appellate Body held in *Turkey – Textiles*:

"With respect to 'other regulations of commerce', Article XXIV:5(a) requires that those applied by the constituent members *after* the formation of the customs union 'shall *not* on the whole be . . . *more restrictive* than the *general incidence*' of the regulations of commerce that were applied by each of the constituent members *before* the formation of the customs union. Paragraph 2 of the *Understanding on Article XXIV* explicitly recognizes that the quantification and aggregation of regulations of commerce other than duties may be difficult, and, therefore, states that 'for the purpose of the overall assessment of the incidence of other regulations of commerce for which quantification and aggregation are difficult, the examination of individual measures, regulations, products covered and trade flows affected may be required.'[978]"[979]

(iv) "Economic test"

694. On the issue of increase of barriers *vis-à-vis* third parties, the Panel in the *Turkey – Textiles* case found that:

"What paragraph 5(a) provides, in short, is that the effects of the resulting trade measures and policies of the new regional agreement shall not be more trade restrictive, overall, than were the constituent countries' previous trade policies and that paragraph 5(a) provided for an '"economic" test' for assessing compatibility."[980]

695. The Appellate Body on *Turkey – Textiles* agreed with the Panel that the test for assessing whether a specific customs union is compatible with Article XXIV is an economic one:

"We agree with the Panel that the terms of Article XXIV:5(a), as elaborated and clarified by paragraph 2 of the *Understanding on Article XXIV*, provide:

'. . . that the effects of the resulting trade measures and policies of the new regional agreement shall not be more trade restrictive, overall, than were the constituent countries' previous trade policies.'

and we also agree that this is:

'an "economic" test for assessing whether a specific customs union is compatible with Article XXIV.'"[981]

696. In *Canada – Autos*, Canada invoked an Article XXIV exception with respect to a certain import duty exemption, which was found inconsistent with GATT Article I. The Panel, in a finding not reviewed by the Appellate Body, rejected this defence, noting that the import duty exemption was not granted to all products imported from the United States and Mexico and that it was also granted to products from countries other than the United States and Mexico:

"We recall that in our analysis of the impact of the conditions under which the import duty exemption is accorded, we have found that these conditions entail a distinction between countries depending upon whether there are capital relationships of producers in those countries with eligible importers in Canada. Thus, the measure not only grants duty-free treatment in respect of products imported from the United States and Mexico by manufacturer-beneficiaries; it also grants duty-free treatment in respect of products imported from third countries not parties to a customs union or free-trade area with Canada. The notion that the import duty exemption involves the granting of duty-free treatment

[975] Appellate Body Report on *Turkey – Textiles*, paras. 51–52.
[976] Paragraph 2 of the *Understanding on Article XXIV* further states that "this assessment shall be based on import statistics for a previous representative period to be supplied by the customs union, on a tariff-line basis and in values and quantities, broken down by WTO country of origin."
[977] Appellate Body Report on *Turkey – Textiles*, para. 53.
[978] (*footnote original*) In paragraph 43 of its appellant's submission, Turkey argues that this provision must be interpreted as allowing the constituent members of a customs union to introduce GATT/WTO inconsistent quantitative restrictions upon the formation of the customs union. We see no basis for such an interpretation.
[979] Appellate Body Report on *Turkey – Textiles*, para. 54.
[980] WT/DS34/R, para. 9.121.
[981] Appellate Body Report on *Turkey – Textiles*, para. 55.

of imports from the United States and Mexico does not capture this aspect of the measure. In our view, Article XXIV clearly cannot justify a measure which grants WTO-inconsistent duty-free treatment to products originating in third countries not parties to a customs union or free trade agreement.

We further note that the import duty exemption does not provide for duty-free importation of all like products originating in the United States or Mexico and that whether such products benefit from the exemption depends upon whether they are imported by certain motor vehicle manufacturers in Canada who are eligible for the exemption. While in view of the particular foreign affiliation of these manufacturers, the exemption will mainly benefit products of the United States and Mexico, products of certain producers in these countries who have no relationship with such manufacturers are unlikely to benefit from the exemption. Thus, in practice the import duty exemption does not apply to some products that would be entitled to duty-free treatment if such treatment were dependant solely on the fact that the products originated in the United States or Mexico. We thus do not believe that the import duty exemption is properly characterized as a measure which provides for duty-free treatment of imports of products of parties to a free-trade area."[982]

(c) Reference to GATT practice

697. With respect to GATT practice on this subject-matter, see GATT Analytical Index, Article XXIV, pages 798–810.

4. Article XXIV:7

(a) "Any contracting party . . . shall promptly notify the CONTRACTING PARTIES"

698. As of 31 December 2004, 310 regional trade agreements (RTAs) had been notified to the GATT/WTO[983]. Of these, 253 RTAs were notified under Article XXIV of the *GATT 1947* or *GATT 1994*; 21 under the Enabling Clause[984] (see paragraph 682 above); and 36 under Article V of the *GATS*. By that same date, 160 agreements were in force (with the following breakdown, respectively: 111/21/28).[985] [986]

(b) Examination of agreements

699. Up to the establishment of the Committee on Regional Trade Agreements in February 1996, the examination of RTAs in accordance with paragraph 7 of Article XXIV of the *GATT 1994* and of the Understanding on the Interpretation of Article XXIV of the GATT 1994 was carried out by individual working parties. As of the entry into force of the WTO, 14 working parties of the GATT 1947 were in existence;[987] from January 1995 up to February 1996, 12 additional working parties were established by either the Council for Trade in Goods or the Council for Trade in Services.[988]

700. With respect to the *GATT 1947* working parties, the decision adopted by the General Council on 31 January 1995 on the Avoidance of Procedural and Institutional Duplication states:

"2. The coordination procedures set out in paragraphs 3 and 4 below shall apply in the relations between the bodies referred to in sub-paragraphs (a) to (d) below:

. . .

(c) The Working Parties established under the GATT 1947 to examine a regional agreement or arrangement shall coordinate their activities with Working Parties of the WTO that examine the same regional agreement or arrangement.[989]

. . .

3. The bodies established under the GATT 1947 or a Tokyo Round Agreement that are referred to in paragraph 2 above shall hold their meetings jointly or consecutively, as appropriate, with the corresponding WTO bodies. In meetings held jointly the rules of procedure to be applied by the WTO body shall be followed. The reports on joint meetings shall be submitted to the competent bodies established under the GATT 1947, the Tokyo Round Agreements and the WTO Agreement.

4. The coordination of activities in accordance with paragraph 3 above shall be conducted in a manner

[982] Panel Report on *Canada – Autos*, paras. 10.55–10.56.
[983] This figure corresponds to notifications of new RTAs, as well as accessions to existing RTAs.
[984] *Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries*, Decision of the GATT 1947 CONTRACTING PARTIES of 28 November 1979.
[985] The trade-related aspects of a considerable number of RTAs previously in force were abrogated in 2004 as a consequence of the enlargement of the European Union to include ten new Member States on 1 May 2004.
[986] Updated figures on the basis of WT/REG/14, Report (2004) of the Committee on RTAs.
[987] Working Parties established to examine the following 14 regional trade agreements: Interim Agreements between the European Communities and the Czech Republic, Slovak Republic, Hungary and Poland (in one single WP); Free-Trade Agreements between the EFTA States and Israel, Romania, Bulgaria, Poland and Hungary; Free-Trade Agreements between Switzerland and Estonia, Latvia and Lithuania; MERCOSUR; the Central European Free-Trade Agreement; the North American Free-Trade Agreement; and the Free-Trade Agreements between Slovenia and the Czech Republic and the Slovak Republic.
[988] The Council for Trade in Goods established ten Working Parties to examine the following agreements: European Communities and Bulgaria, Estonia, Faroe Islands, Latvia, Lithuania, Romania and Turkey; Enlargement of the European Communities (EC-15); Hungary-Slovenia; and EFTA-Slovenia. The Council for Trade in Services established two Working Parties to examine the North American Free-Trade Agreement and the Enlargement of the European Communities. See WT/GC/W/125 and G/L/134.
[989] (*footnote original*) The Working Parties of the WTO include Working Parties originating from decisions of the CONTRACTING PARTIES to the GATT 1947 that were adopted before the entry into force of the WTO Agreement and therefore form part of the GATT 1994.

which ensures that the enjoyment of the rights and the performance of the obligations under the GATT 1947, the Tokyo Round Agreements and the WTO Agreement and the exercise of the competence of the CONTRACTING PARTIES to the GATT 1947, the Committees established under the Tokyo Round Agreements and the bodies of the WTO are unaffected."[990]

701. At its meeting on 11 July 1995, the General Council modified the terms or reference for those working parties established under the *GATT 1947* so that agreements would be examined in the light of the relevant provisions of the *GATT 1994*, and that examination reports would be submitted to the Council for Trade in Goods.[991] Similarly, the Committee on Trade and Development modified the terms of reference for the examination of MERCOSUR at its meeting on 14 September 1995, so that the examination be carried out in the light of the relevant provisions of the Enabling Clause and the *GATT 1994*. The Decision stated that the examination report would be transmitted to the Committee on Trade and Development for submission to the General Council, with a copy of the report transmitted as well to the Council for Trade in Goods.[992]

702. The first terms of reference under the WTO for the examination of a regional trade agreement – Enlargement of the European Communities (accession of Austria, Finland and Sweden) – was adopted by the Council for Trade in Goods on 20 February 1995, along with an understanding read out by the Chairman at that meeting.[993] Since then, these terms of reference and Chairman's understanding have been standard for the examination of all regional trade agreements notified under Article XXIV of the GATT 1994.

703. On 6 February 1996, the General Council established the Committee on RTAs.[994] Under its terms of reference, the Committee is mandated, *inter alia*, to carry out the examination of agreements in accordance with the procedures and terms of reference adopted by the Council for Trade in Goods, the Council for Trade in Services and the Committee on Trade and Development, as the case may be.[995] With respect to the establishment, terms of reference and rules of procedure of the Committee, see the Chapter on the *WTO Agreement*, Section V.B.7(f). With respect to procedures for the examination of regional trade agreements, see the Chapter on the *WTO Agreement*, Section V.B.7(f)(iv).

704. On 31 December 2004, the Committee on RTAs had under examination a total of 112 RTAs, of which 86 were in the area of trade in goods and 26 in trade in services.[996] By that same date, the Committee had already completed the factual examination for 40 of these RTAs; 38 RTAs were undergoing factual examination; for the remaining 34 RTAs, the factual examination had not yet started (see, respectively, Annex I-Annex III for the lists of RTAs notified under Article XXIV of the *GATT 1994*, and the Chapter on the *GATS*, for the lists of RTAs notified under Article V of the *GATS*).[997] At that same date, an additional ten agreements notified under Article XXIV of the *GATT 1994*, Article V of the *GATS* and the Enabling Clause were yet to be considered by the relevant Councils or Committee (see Annex IV below for those RTAs notified under Article XXIV of the *GATT 1994* or under *GATT 1947*, and the Chapter on the *GATS*, for those RTAs notified under Article V of the *GATS*).

705. During 2004, the Committee on RTAs was informed that 65 RTAs previously in force and notified to the GATT/WTO had been terminated as a consequence of the enlargement of the European Union to include ten new member States on 1 May 2004 (see Annex V below for those RTAs notified under Article XXIV of the *GATT 1994* or under *GATT 1947*, and the Chapter on the *GATS*, for those RTAs notified under Article V of the *GATS*)[998], and that the ten acceding countries had become, or were in the process of becoming, parties to European Communities' free trade agreements and customs unions with third parties. At its 38th session held on 11 November 2004, the Committee agreed to terminate the examination process for these agreements.[999]

"The Committee on Regional Trade Agreement has conducted a series of informal consultations regarding the examination of regional trade agreements concluded by WTO Members with non-Members."[1000]

(c) Absence of recommendation pursuant to Article XXIV:7

706. In *Turkey – Textiles*, Turkey argued before the Panel that as no Article XXIV:7 recommendation had ever been made to parties to a customs union to change or abolish any import restrictions and, in particular, that such recommendation had never been made in respect of previous Turkey/EC trade agreements, this

[1000] WT/REG/14, para. 9. A list of those RTAs is included in document WT/REG/14/Corr.1/Rev.1.

indicated that its measures were WTO-compatible. Recalling that a similar argument had been made before the GATT Panel in *EEC – Imports from Hong Kong*, the Panel cited approvingly the findings of the GATT Panel in this case:

> "[I]t would be erroneous to interpret the fact that a measure had not been subject to Article XXIII over a number of years, as tantamount to its tacit acceptance by contracting parties."[1001]

(d) "Any substantial change in the plan and schedule . . . shall be communicated to the CONTRACTING PARTIES"

707. See paragraph 715 below.

5. Article XXIV:8

(a) Article XXIV:8(a)(i)

708. In *Turkey – Textiles*, the Appellate Body addressed the internal trade aspect of a customs union, as set forth in Article XXIV:8(a)(i):

> "Sub-paragraph 8(a)(i) of Article XXIV establishes the standard for the *internal trade* between constituent members in order to satisfy the definition of a 'customs union'. It requires the constituent members of a customs union to eliminate 'duties and other restrictive regulations of commerce' with respect to 'substantially all the trade' between them. Neither the GATT CONTRACTING PARTIES nor the WTO Members have ever reached an agreement on the interpretation of the term 'substantially' in this provision. It is clear, though, that 'substantially all the trade' is not the same as *all* the trade, and also that 'substantially all the trade' is something considerably more than merely *some* of the trade. We note also that the terms of sub-paragraph 8(a)(i) provide that members of a customs union may maintain, where necessary, in their internal trade, certain restrictive regulations of commerce that are otherwise permitted under Articles XI through XV and under Article XX of the GATT 1994. Thus, we agree with the Panel that the terms of sub-paragraph 8(a)(i) offer 'some flexibility' to the constituent members of a customs union when liberalizing their internal trade in accordance with this sub-paragraph. Yet we caution that the degree of 'flexibility' that sub-paragraph 8(a)(i) allows is limited by the requirement that 'duties and other restrictive regulations of commerce' be 'eliminated with respect to substantially all' internal trade."[1002]

709. In *Turkey – Textiles*, the Appellate Body set out a two-prong test for assessing whether Article XXIV may justify a measure inconsistent with other WTO provisions: "First, the party claiming the benefit of this defence must demonstrate that the measure at issue is introduced upon the formation of a customs union that fully meets the requirements of sub-paragraphs 8(a) and 5(a) of Article XXIV. And, second, that party must demonstrate that the formation of a customs union would be prevented if it were not allowed to introduce the measure at issue".[1003] With respect to the second condition, Turkey argued that "had it not introduced the quantitative restrictions on textile and clothing products from India that are at issue, the European Communities would have 'exclud[ed] these products from free trade within the Turkey/EC customs union'".[1004] The Appellate Body found that Turkey was not required to introduce the quantitative restrictions at issue:

> "As the Panel observed, there are other alternatives available to Turkey and the European Communities to prevent any possible diversion of trade, while at the same time meeting the requirements of sub-paragraph 8(a)(i). For example, Turkey could adopt rules of origin for textile and clothing products that would allow the European Communities to distinguish between those textile and clothing products originating in Turkey, which would enjoy free access to the European Communities under the terms of the customs union, *and* those textile and clothing products originating in third countries, including India. . . . A system of certificates of origin would have been a reasonable alternative until the quantitative restrictions applied by the European Communities are required to be terminated under the provisions of the *ATC*. Yet no use was made of this possibility to avoid trade diversion. Turkey preferred instead to introduce the quantitative restrictions at issue.
>
> For this reason, we conclude that Turkey was not, in fact, required to apply the quantitative restrictions at issue in this appeal in order to form a customs union with the European Communities."[1005]

710. In *Turkey – Textiles*, the Panel did not agree with the argument that a WTO right pertaining to a constituent member prior to the formation of a customs union could be "passed" or "extended" to other constituent members:

> "[E]ven if the formation of a customs union may be the occasion for the constituent member(s) to adopt, to the greatest extent possible, similar policies, the specific circumstances which serve as the legal basis for one Member's exercise of such a specific right cannot suddenly be considered to exist for the other constituent members. We also consider that the right of Members to form a customs union is to be exercised in such a way so

[1001] Panel Report on *EEC – Quantitative Restrictions against Imports of certain Products from Hong Kong*, adopted on 12 July 1983 (BISD 30S/129), para. 28, and Panel Report on *Turkey – Textiles*, adopted on 19 November 1999 (WT/DS34/R), paras. 9.172–9.174.
[1002] Appellate Body Report on *Turkey – Textiles*, para. 48.
[1003] Appellate Body Report on *Turkey – Textiles*, para. 58.
[1004] Appellate Body Report on *Turkey – Textiles*, para. 61.
[1005] Appellate Body Report on *Turkey – Textiles*, paras. 62–63.

as to ensure that the WTO rights and obligations of third country Members (and the constituent Members) are respected, consistent with the primacy of the WTO, as reiterated in the Singapore Declaration."[1006]

(b) Reference to GATT practice

711. With respect to GATT practice on this subject-matter, see GATT Analytical Index, pages 820 and 824.

(c) Article XXIV:8(a)(ii)

(i) Interpretation

712. In *Turkey – Textiles*, the Appellate Body addressed the requirement contained in Article XXIV:8(a)(ii) that constituent members of a customs union apply "substantially the same" duties and other regulations of commerce to their external trade with third countries. The Appellate Body agreed with the Panel that the term "substantially the same" has both "qualitative and quantitative components":

"Sub-paragraph 8(a)(ii) establishes the standard for the trade of constituent members *with third countries* in order to satisfy the definition of a 'customs union'. It requires the constituent members of a customs union to apply 'substantially the same' duties and other regulations of commerce to external trade with third countries. The constituent members of a customs union are thus required to apply a common external trade regime, relating to both duties and other regulations of commerce. However, sub-paragraph 8(a)(ii) does *not* require each constituent member of a customs union to apply *the same* duties and other regulations of commerce as other constituent members with respect to trade with third countries; instead, it requires that *substantially the same* duties and other regulations of commerce shall be applied. We agree with the Panel that:

> '[t]he ordinary meaning of the term "substantially" in the context of sub-paragraph 8(a) appears to provide for both qualitative and quantitative components. The expression "substantially the same duties and other regulations of commerce are applied by each of the Members of the [customs] union" would appear to encompass both quantitative and qualitative elements, the quantitative aspect more emphasized in relation to duties.'[1007]"[1008]

713. The Appellate Body on *Turkey – Textiles* further agreed with the Panel that the phrase "substantially the same" in Article XXIV:8(a)(ii) offered a "certain degree of flexibility". However, the Appellate Body objected to the standard of "comparable trade regulations having similar effects" developed by the Panel and held that this standard did not rise to the required standard of "sameness":

"We also believe that the Panel was correct in its statement that the terms of sub-paragraph 8(a)(ii), and, in particular, the phrase 'substantially the same' offer a certain degree of 'flexibility' to the constituent members of a customs union in 'the creation of a common commercial policy.'[1009] Here too we would caution that this 'flexibility' is limited. It must not be forgotten that the word 'substantially' qualifies the words 'the same'. Therefore, in our view, something closely approximating 'sameness' is required by Article XXIV:8(a)(ii).[1010] We do not agree with the Panel that:

> . . . as a general rule, a situation where constituent members have 'comparable' trade regulations having similar effects with respect to the trade with third countries, would generally meet the qualitative dimension of the requirements of sub-paragraph 8(a)(ii).[1011]

Sub-paragraph 8(a)(ii) requires the constituent members of a customs union to adopt 'substantially the same' trade regulations. In our view, 'comparable trade regulations having similar effects' do not meet this standard. A higher degree of 'sameness' is required by the terms of sub-paragraph 8(a)(ii)."[1012]

(ii) Reference to GATT practice

714. With respect to GATT practice on this subject-matter, see GATT Analytical Index, page 827.

6. Understanding on the Interpretation of Article XXIV of the General Agreement on Tariffs and Trade 1994

(a) Notification and reporting requirements in accordance with paragraphs 9 and 11 of the Understanding

715. In November 1998, the Council for Trade in Goods approved the recommendations adopted by the Committee on RTAs with respect to the required reporting on the operation of regional trade agreements, any significant changes and/or developments in the agreement or substantial changes in the plan and schedule of interim agreements.[1013]

[1006] WT/DS34/R, paras. 9.183–184.

[1007] (*footnote original*) Panel Report on *Turkey – Textiles*, para. 9.148.

[1008] Appellate Body Report on *Turkey – Textiles*, para. 49.

[1009] (*footnote original*) Panel Report on *Turkey – Textiles*, para. 9.148.

[1010] The Appellate Body rejected the following finding of the Panel, para. 9.151 of its report:

> . . . as a general rule, a situation where constituent members have "comparable" trade regulations having similar effects with respect to the trade with third countries, would generally meet the qualitative dimension of the requirements of sub-paragraph 8(a)(ii).

[1011] (*footnote original*) Panel Report on *Turkey – Textiles*, para. 9.151.

[1012] Appellate Body Report on *Turkey – Textiles*, para. 50.

[1013] G/L/286. The text of the adopted Committee's recommendation can be found in WT/REG/6.

716. Schedules for the submission of biennial reports were presented to the Committee on RTAs in December 1998, February 2001 and December 2003[1014] (see Annex below).

(b) Paragraph 12 on dispute settlement

717. With reference to the question of a panel's jurisdiction to assess the compatibility of regional trade agreements with WTO rules, the Appellate Body, in *Turkey – Textiles*, stated:

> "More specifically, with respect to the first condition, the Panel, in this case, did not address the question of whether the regional trade arrangement between Turkey and the European Communities is, in fact, a 'customs union' which meets the requirements of paragraphs 8(a) and 5(a) of Article XXIV. The Panel maintained that 'it is arguable' that panels do not have jurisdiction to assess the overall compatibility of a customs union with the requirements of Article XXIV. We are not called upon in this appeal to address this issue, but we note in this respect our ruling in *India – Quantitative Restrictions on Imports of Agricultural, Textile and Industrial Products* on the jurisdiction of panels to review the justification of balance-of-payments restrictions under Article XVIII:B of the GATT 1994. The Panel also considered that, on the basis of the principle of judicial economy, it was not necessary to assess the compatibility of the regional trade arrangement between Turkey and the European Communities with Article XXIV in order to address the claims of India. Based on this reasoning, the Panel assumed *arguendo* that the arrangement between Turkey and the European Communities is compatible with the requirements of Article XXIV:8(a) and 5(a) and limited its examination to the question of whether Turkey was permitted to introduce the quantitative restrictions at issue. The assumption by the Panel that the agreement between Turkey and the European Communities is a 'customs union' within the meaning of Article XXIV was not appealed. Therefore, the issue of whether this arrangement meets the requirements of paragraphs 8(a) and 5(a) of Article XXIV is not before us."[1015]

718. In *Turkey – Textiles*, the Panel recalled the well-established WTO rules on burden of proof, whereby "... (b) it is for the party invoking an exception or an affirmative defense to prove that the conditions contained therein are met and ... (c) it is for the party asserting a fact to prove it", noting a third party's argument that "since Article XXIV was an exception invoked by Turkey, it was for Turkey to bear the burden of proof".[1016] In the same case, the Appellate Body stated:

> "[W]e would expect a panel, when examining such a measure [taken by a party to a customs union], to require *a party* to establish that both of these conditions [the customs union fully meets the requirements of XXIV:8(a) and 5(a) and that without such measure that customs union could not be formed] have been fulfilled." (emphasis added)[1017]

E. RELATIONSHIP WITH OTHER ARTICLES

1. Article I

719. On the major question of whether Article XXIV should be considered as a derogation from the MFN obligation under Article I of the *GATT 1994* only, or from other *GATT 1994* provisions as well, the Appellate Body on *Turkey – Textiles* stated:

> "Article XXIV may justify a measure which is inconsistent with certain other GATT provisions. However, in a case involving the formation of a customs union, this 'defence' is available only when two conditions are fulfilled. First, the party claiming the benefit of this defence must demonstrate that the measure at issue is introduced upon the formation of a customs union that fully meets the requirements of sub-paragraphs 8(a) and 5(a) of Article XXIV. And, second, that party must demonstrate that the formation of that customs union would be prevented if it were not allowed to introduce the measure at issue. Again, *both* these conditions must be met to have the benefit of the defence under Article XXIV."[1018]

2. Article XI

720. In *Turkey – Textiles*, the Panel found that the quantitative restrictions imposed by Turkey on imports from India of a number of textile and clothing products were inconsistent with Articles XI and XIII of *GATT 1994* (and consequently with Article 2.4 of the *Agreement on Textiles and Clothing)*. The Panel rejected Turkey's defence that Article XXIV:5(a) of *GATT 1994* authorizes Members forming a customs union to deviate from the prohibitions contained in Articles XI and XIII of the GATT 1994 (and Article 2.4 of the *Agreement on Textiles and Clothing*).[1019] The Appellate Body upheld the Panel's conclusion that "Article XXIV does not allow Turkey to adopt, upon the formation of a customs union with the European Communities, quantitative restrictions ... which were found inconsistent with Articles XI and XIII of *GATT 1994* and Article 2.4 of the ATC".[1020] However, the Appellate Body stressed that it was only finding that Turkey's quantitative restrictions at issue were not justified by Article XXIV but that it was not making a "finding on the issue of whether quantita-

[1020] Appellate Body Report on *Turkey – Textiles*, para. 64.

tive restrictions will *ever* be justified by Article XXIV".[1021] See paragraphs 708–709 above.

3. Article XIII

721. See paragraph 720 above.

F. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Agreement on Safeguards

(a) Footnote 1 to Article 2.1

722. In *Argentina – Footwear (EC)*, the Panel found that Argentina violated Article 2 of the *Agreement on Safeguards* by including imports from all sources in its investigation of "increased imports" of footwear products into its territory but excluding other MERCOSUR member States from the application of the safeguard measures. The Appellate Body reversed the Panel's finding, holding that footnote 1 to Article 2.1 of the *Agreement on Safeguards* applied to the facts of the case before it. The Appellate Body opined that "the footnote only applies when a customs union applies a safeguard measure 'as a single unit or on behalf of a member State'"; in the case before it, the Appellate Body found, MERCOSUR had not applied the safeguards measures at issue (the measures had been imposed by the Argentine authorities).[1022]

723. In *US – Wheat Gluten*, the Panel found that the United States had acted inconsistently with Articles 2.1 and 4.2 of the *Agreement on Safeguards* by *including* imports from all sources in its *investigation*, but *excluding* imports from Canada from the *application* of the safeguard measure. On appeal, the United States argued, *inter alia*, that the Panel erred in failing to assess the legal relevance of footnote 1 to the *Agreement on Safeguards*, and Article XXIV of the GATT 1994 to this issue. The Appellate Body held:

> "In this case, the Panel determined that this dispute does not raise the issue of whether, as a general principle, a member of a free-trade area can exclude imports from other members of that free-trade area from the application of a safeguard measure. The Panel also found that it could rule on the claim of the European Communities without having recourse to Article XXIV or footnote 1 to the *Agreement on Safeguards*. We see no error in this approach, and make no findings on these arguments."[1023]

(b) Article 2.2

724. The Appellate Body on *US – Line Pipe* avoided ruling on whether Article 2.2 of the *Agreement on Safeguards* "permits a Member to exclude imports originating in member states of a free-trade area from the scope of a safeguard measure". Nevertheless, the Appellate Body asserted that the latter question becomes relevant in two circumstances:

> "The question of whether Article XXIV of the GATT 1994 serves as an exception to Article 2.2 of the *Agreement on Safeguards* becomes relevant in only two possible circumstances. One is when, in the investigation by the competent authorities of a WTO Member, the imports that are exempted from the safeguard measure *are not considered* in the determination of serious injury. The other is when, in such an investigation, the imports that are exempted from the safeguard measure *are considered* in the determination of serious injury, *and* the competent authorities have *also* established explicitly, through a reasoned and adequate explanation, that imports from sources outside the free-trade area, alone, satisfied the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2."[1024]

2. Agreement on Textiles and Clothing

725. In *Turkey – Textiles*, the Panel found that the quantitative restrictions imposed by Turkey on imports from India of a number of textile and clothing products were inconsistent with Articles XI and XIII of the *GATT 1994* and consequently with Article 2.4 of the *Agreement on Textiles and Clothing*. The Panel rejected Turkey's defence that Article XXIV:5(a) of the *GATT 1994* authorizes Members forming a customs union to deviate from the prohibitions contained in Article 2.4 of the *Agreement on Textiles and Clothing* (and Articles XI and XIII of the *GATT 1994*).[1025] The Appellate Body upheld the Panel's conclusion that "Article XXIV does not allow Turkey to adopt, upon the formation of a customs union with the European Communities, quantitative restrictions ... which were found inconsistent with Articles XI and XIII of the *GATT 1994* and Article 2.4 of the ATC".[1026] However, the Appellate Body stressed that it was only finding that Turkey's quantitative restrictions at issue were not justified by Article XXIV but that it was not making a "finding on the issue of whether quantitative restrictions will *ever* be justified by Article XXIV".[1027] In this regard, the Appellate Body recalled that Article 2.4 of the *Agreement on Textiles and Clothing* refers to the "*relevant GATT 1994 provisions*" as an exception to the prohibition of new restrictions to trade and that, therefore, "Article XXIV of *GATT 1994* is incorporated in the *ATC* and may be invoked as a defence to a claim of inconsistency of Article 2.4 of the *ATC*, provided that the conditions set forth in Article XXIV for the availability of this defence are met."[1028]

G. ANNEX I

1. List of RTAs notified under Article XXIV of the GATT 1994 for which factual examination has been completed

Agreement	Date of Notification	Terms of Reference for the Examination	WTO Document series
Free Trade Agreement between Chile and Costa Rica	14-May-02	WT/REG136/2	WT/REG136
Agreement between New Zealand and Singapore on a Closer Economic Partnership	19-Sep-01	WT/REG127/2	WT/REG127
Free Trade Agreement between the EFTA States and Mexico	22-Aug-01	WT/REG126/2	WT/REG126
Free Trade Agreement between Chile and Mexico	8-Mar-01	WT/REG125/2	WT/REG125
Free Trade Agreement between Israel and Mexico	8-Mar-01	WT/REG124/2	WT/REG124
Free Trade Area between the EFTA States and the Former Yugoslav Republic of Macedonia	31-Jan-01	WT/REG117/2 and Corr.1	WT/REG117
Free Trade Agreement between Turkey and the Former Yugoslav Republic of Macedonia	22-Jan-01	WT/REG115/2 and Corr.1	WT/REG115
Euro-Mediterranean Agreement between the European Communities and Israel	7-Nov-00	WT/REG110/2 and Corr.1	WT/REG110
Free Trade Agreement between EFTA and Morocco	18-Feb-00	WT/REG91/2	WT/REG91
Free Trade Agreement between Bulgaria and the Former Yugoslav Republic of Macedonia	18-Feb-00	WT/REG90/2	WT/REG90
Free Trade Agreement between the Kyrgyz Republic and Moldova	15-Jun-99	WT/REG76/2	WT/REG76
Free Trade Agreement between Turkey and Bulgaria	4-May-99	WT/REG72/2	WT/REG72
Central European Free Trade Agreement – Accession of Bulgaria	24-Mar-99	WT/REG11/11	WT/REG11
Euro-Mediterranean Agreement between the European Communities and Tunisia	23-Mar-99	WT/REG69/3	WT/REG69
Free Trade Agreement between Turkey and Israel	18-May-98	WT/REG60/2	WT/REG60
Free Trade Agreement between Turkey and Romania	18-May-98	WT/REG59/2	WT/REG59
Customs Union between the European Community and the Principality of Andorra	9-Mar-98	WT/REG53/2	WT/REG53
Central European Free Trade Agreement – Accession of Romania	8-Jan-98	WT/REG11/8	WT/REG11
Free Trade Agreement between Romania and the Republic of Moldova	24-Sep-97	WT/REG44/3	WT/REG44
Free Trade Agreement between Canada and Chile	26-Aug-97	WT/REG38/3	WT/REG38
Free Trade Agreement between the Government of Canada and the Government of the State of Israel	23-Jan-97	WT/REG31/3	WT/REG31
Agreement between the Government of Denmark and the Home Government of the Faroe Islands, on the one part, and the Government of Norway, on the other part	13-Mar-96	WT/REG25/2	WT/REG25
Agreement between the Government of Denmark and the Home Government of the Faroe Islands, on the one part, and the Government of Switzerland, on the other part	8-Mar-96	WT/REG24/2	WT/REG24
Agreement between the Government of Denmark and the Home Government of the Faroe Islands, on the one part, and the Government of Iceland, on the other part	23-Jan-96	WT/REG23/2	WT/REG23
Enlargement of the European Union – Accession of Austria, Finland and Sweden	20-Jan-95	WT/REG3/1 L/7614/Add.1	WT/REG3
Interim Agreement between Bulgaria and the European Communities	23-Dec-94	WT/REG1/2	WT/REG1
Interim Agreement between Romania and the European Communities	23-Dec-94	WT/REG2/2 and Corr. 1	WT/REG2
Central European Free Trade Agreement (CEFTA)	30-Jun-94	WT/REG11/1	WT/REG11
EFTA – Bulgaria Free Trade Agreement	7-Jul-93	WT/REG12/1	WT/REG12
EFTA – Romania Free Trade Agreement	24-May-93	WT/REG16/1	WT/REG16
North American Free Trade Agreement	1-Feb-93	WT/REG4/2	WT/REG4
EFTA – Israel Free Trade Agreement	1-Dec-92	WT/REG14/1	WT/REG14

H. ANNEX II

1. List of RTAs notified under Article XXIV of the GATT 1994 under factual examination

Agreement	Date of Notification	Terms of Reference for the Examination	WTO Document series
Singapore-Australia Free Trade Agreement	1-Oct-03	WT/REG158/2	WT/REG158
Free Trade Agreement between Turkey and Croatia	8-Sep-03	WT/REG156/2	WT/REG156
Free Trade Agreement between the EFTA States and Singapore	24-Jan-03	WT/REG148/2	WT/REG148
Free Trade Agreement between Canada and Costa Rica	17-Jan-03	WT/REG147/2	WT/REG147
European Communities – Croatia Interim Agreement	20-Dec-02	WT/REG142/2	WT/REG142
European Communities – Jordan Euro-Mediterranean Agreement	20-Dec-02	WT/REG141/2	WT/REG141
Agreement between Japan and Singapore for a New-Age Economic Partnership	14-Nov-02	WT/REG140/2	WT/REG140
Free Trade Agreement between the United States and Jordan	5-Mar-02	WT/REG134/2	WT/REG134
Free Trade Agreement between the EFTA States and Jordan	22-Jan-02	WT/REG133/2	WT/REG133
Free Trade Agreement between the EFTA States and Croatia	22-Jan-02	WT/REG132/2	WT/REG132
Interim Agreement between the European Community and the Former Yugoslav Republic of Macedonia	21-Nov-01	WT/REG129/2	WT/REG129
Free Trade Agreement between Georgia and Armenia	21-Feb-01	WT/REG119/2 and Corr.1	WT/REG119
Free Trade Agreement between Georgia and Azerbaijan	21-Feb-01	WT/REG120/2 and Corr.1	WT/REG120
Free Trade Agreement between Georgia and Kazakhstan	21-Feb-01	WT/REG123/2 and Corr.1	WT/REG123
Free Trade Agreement between Georgia and the Russian Federation	21-Feb-01	WT/REG118/2 and Corr.1	WT/REG118
Free Trade Agreement between Georgia and Turkmenistan	21-Feb-01	WT/REG122/2 and Corr.1	WT/REG122
Free Trade Agreement between Georgia and Ukraine	21-Feb-01	WT/REG121/2 and Corr.1	WT/REG121
Free Trade Agreement between the Kyrgyz Republic and Armenia	4-Jan-01	WT/REG114/2 and Corr.1	WT/REG114
Euro-Mediterranean Agreement between the European Communities and Morocco	8-Nov-00	WT/REG112/2	WT/REG112
Free Trade Agreement between the European Communities and Mexico	1-Aug-00	WT/REG109/2	WT/REG109
Free Trade Agreement between Azerbaijan, Armenia, Belarus, Georgia, Moldova, Kazakhstan, Russian Federation, Ukraine, Uzbekistan Tajikistan and Kyrgyz Rep.	1-Oct-99	WT/REG82/2	WT/REG82
Free Trade Agreement between the Kyrgyz Republic and Kazakhstan	29-Sep-99	WT/REG81/2	WT/REG81
Free Trade Agreement between the Kyrgyz Republic and the Russian Federation	15-Jun-99	WT/REG73/2	WT/REG73
Free Trade Agreement between the Kyrgyz Republic and Ukraine	15-Jun-99	WT/REG74/2	WT/REG74
Free Trade Agreement between the Kyrgyz Republic and Uzbekistan	15-Jun-99	WT/REG75/2	WT/REG75
Agreement on Customs Union and Single Economic Area between the Kyrgyz Republic, the Russian Federation, the Republic of Belarus, the Republic of Kazakhstan and the Republic of Tajikistan	21-Apr-99	WT/REG71/3/Rev.1	WT/REG71
Agreement between the European Community on the one part and the Government of Denmark and the Home Government of the Faroe Islands on the other part	19-Feb-97	WT/REG21/2	WT/REG21
Customs Union between Turkey and the European Community	22-Dec-95	WT/REG22/4	WT/REG22

I. ANNEX III

1. List of RTAs notified under Article XXIV of the GATT 1994 for which factual examination has not yet commenced

Agreement	Date of Notification	Terms of Reference for the Examination	WTO Document series
Free Trade Agreement between Albania and Serbia Montenegro	19-Oct-04	WT/REG178/2	WT/REG178
Euro-Mediterranean Association Agreement between the European Community and Egypt	4-Oct-04	WT/REG177/2	WT/REG177
Southern African Development Community Free Trade Area	9-Aug-04	WT/REG176/3	WT/REG176
Free Trade Agreement between Armenia and Turkmenistan	27-Jul-04	WT/REG175/2	WT/REG175
Free Trade Agreement between Armenia and Russian Federation	27-Jul-04	WT/REG174/2	WT/REG174
Free Trade Agreement between Armenia and Moldova	27-Jul-04	WT/REG173/2	WT/REG173
Free Trade Agreement between Armenia and Kazakhstan	27-Jul-04	WT/REG172/2	WT/REG172
Free Trade Agreement between Armenia and Ukraine	27-Jul-04	WT/REG171/2	WT/REG171
Enlargement of the European Union	30-Apr-04	WT/REG170/1	WT/REG170
Free Trade Agreement between the Republic of Korea and Chile	19-Apr-04	WT/REG169/2	WT/REG169
Free Trade Agreement between Albania and the United Nations Interim Administration Mission in Kosovo (UNMIK)	8-Apr-04	WT/REG168/2	WT/REG168
Free Trade Agreement between Albania and Bulgaria	31-Mar-04	WT/REG167/2	WT/REG167
Free Trade Agreement between Croatia and Albania	31-Mar-04	WT/REG166/2	WT/REG166
Central European Free Trade Agreement – Accession of the Republic of Croatia	3-Mar-04	WT/REG11/13	WT/REG11
EC – Chile Interim Agreement	18-Feb-04	WT/REG164/3	WT/REG164
Free-Trade Agreement between Chile and El Salvador	16-Feb-04	WT/REG165/3	WT/REG165
Closer Economic Partnership Arrangement between China and Macao, China	12-Jan-04	WT/REG163/2	WT/REG163
Closer Economic Partnership Arrangement between China and Hong Kong, China	12-Jan-04	WT/REG162/2	WT/REG162
Free Trade Agreement between the United States and Singapore	19-Dec-03	WT/REG161/2	WT/REG161
Free Trade Agreement between the United States and Chile	19-Dec-03	WT/REG160/2	WT/REG160
Free Trade Agreement between Croatia and Bosnia and Herzegovina	6-Oct-03	WT/REG159/2	WT/REG159
Free Trade Agreement between Turkey and Bosnia and Herzegovina	8-Sep-03	WT/REG157/2	WT/REG157
EC – Lebanon Interim Agreement	4-Jun-03	WT/REG153/2	WT/REG153
Free Trade Agreement between Bulgaria and Israel	14-Apr-03	WT/REG150/2	WT/REG150
Trade, Development and Cooperation Agreement between the European Community and South Africa	21-Nov-00	WT/REG113/2	WT/REG113
Interim Agreement between the EFTA states and the Palestine Liberation Organization for the benefit of the Palestinian Authority	21-Sep-99	WT/REG79/2	WT/REG79
Euro-Mediterranean Interim Association Agreement on Trade and Co-operation between the European Community and the Palestine Liberation Organization for the benefit of the Palestinian Authority of the West Bank and Gaza Strip	30-Jun-97	WT/REG43/2	WT/REG43

J. ANNEX IV

1. List of RTAs notified under Article XXIV of the GATT 1994 which have not yet been considered by the Council for Trade in Goods

Agreement	Date of Notification	WTO Document series
Free Trade Agreement between the United States and Australia	23-Dec-04	WT/REG184
Free Trade Agreement between Albania and Moldova	20-Dec-04	WT/REG183
Free Trade Agreement between Albania and FYROM	14-Dec-04	WT/REG182
Free Trade Agreement between Albania and Bosnia and Herzegovina	14-Dec-04	WT/REG181
Free Trade Agreement between Albania and Romania	14-Dec-04	WT/REG180
Free Trade Agreement between the EFTA States and Chile	10-Dec-04	WT/REG179

K. ANNEX V

1. RTAs notified under Article XXIV of the GATT 1994 which have been terminated following the Enlargement of the European Union on 1 May 2004

Agreement	Terms of Reference for the Examination	Notification of Termination	WTO Document series
Free Trade Agreement between the Czech Republic and the Republic of Estonia	WT/REG62/3	WT/REG/GEN/N/3	WT/REG62
Free Trade Agreement between the Czech Republic and the Republic of Latvia	WT/REG45/2	WT/REG/GEN/N/3	WT/REG45
Free Trade Agreement between the Czech Republic and the Republic of Lithuania	WT/REG46/1	WT/REG/GEN/N/3	WT/REG46
Free Trade Agreement between the Czech Republic and Israel	WT/REG56/3	WT/REG/GEN/N/3	WT/REG56
Free Trade Agreement between Turkey and the Czech Republic	WT/REG67/3	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG67
Free Trade Agreement between Turkey and Estonia	WT/REG70/3	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG70
Free Trade Agreement between Estonia and the Faroe Islands	WT/REG64/2	WT/REG/GEN/N/3	WT/REG64
Interim Agreement between the European Communities and Czech Republic	WT/REG18/1	WT/REG/GEN/N/3	WT/REG18
Free Trade Agreement between Estonia and the European Communities	WT/REG8/2	WT/REG/GEN/N/3	WT/REG8/2
Interim Agreement between the European Communities and Hungary	WT/REG18/1	WT/REG/GEN/N/3	WT/REG18
Free Trade Agreement between Latvia and the European Communities	WT/REG7/2	WT/REG/GEN/N/3	WT/REG7
Free Trade Agreement between Lithuania and the European Communities	WT/REG9/2	WT/REG/GEN/N/3	WT/REG9
Interim Agreement between the European Communities and Poland	WT/REG18/1	WT/REG/GEN/N/3	WT/REG18
Interim Agreement between the European Communities and Slovak Republic	WT/REG18/1	WT/REG/GEN/N/3	WT/REG18
Interim Agreement between the European Communities and the Republic of Slovenia	WT/REG32/3	WT/REG/GEN/N/3	WT/REG32
Free Trade Agreement between the EFTA States and Estonia	WT/REG28/3	WT/REG/GEN/N/3	WT/REG28
EFTA – Hungary Free Trade Agreement	WT/REG13/1	WT/REG/GEN/N/3	WT/REG13
Free Trade Agreement between the EFTA States and Latvia	WT/REG29/3	WT/REG/GEN/N/3	WT/REG29
Free Trade Agreement between the EFTA States and Lithuania	WT/REG30/3	WT/REG/GEN/N/3	WT/REG30
EFTA – Poland Free Trade Agreement	WT/REG15/1	WT/REG/GEN/N/3	WT/REG15
EFTA – Slovenia Free Trade Agreement	WT/REG20/3	WT/REG/GEN/N/3	WT/REG20
Free Trade Agreement between Bulgaria and Estonia	WT/REG149/2	WT/REG/GEN/N/3	WT/REG149
Agreements between Estonia, Latvia and Lithuania	WT/REG77/2	WT/REG/GEN/N/3	WT/REG77
Free Trade Agreement between Estonia and Ukraine	WT/REG108/2	WT/REG/GEN/N/3	WT/REG108

Table (*cont.*)

Agreement	Terms of Reference for the Examination	Notification of Termination	WTO Document series
Free Trade Agreement between Hungary and Estonia	WT/REG128/2	WT/REG/GEN/N/3	WT/REG128
Free Trade Agreement between Hungary and Latvia	WT/REG84/2	WT/REG/GEN/N/3	WT/REG84
Free Trade Agreement between Hungary and Lithuania	WT/REG83/2	WT/REG/GEN/N/3	WT/REG83
Free Trade Agreement between Hungary and Israel	WT/REG54/2	WT/REG/GEN/N/3	WT/REG54
Free Trade Agreement between Turkey and Hungary	WT/REG58/2	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG58
Free Trade Agreement between Bulgaria and Latvia	WT/REG151/2	WT/REG/GEN/N/3	WT/REG151
Free Trade Agreement between Turkey and Latvia	WT/REG116/2 and Corr.1	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG116
Free Trade Agreement between Bulgaria and Lithuania	WT/REG152/2	WT/REG/GEN/N/3	WT/REG152
Free Trade Agreement between Turkey and Lithuania	WT/REG61/2	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG61
Agreement between Poland and the Government of Denmark and the Home Government of the Faroe Islands	WT/REG78/2	WT/REG/GEN/N/3	WT/REG78
Free Trade Agreement between Poland and Latvia	WT/REG80/2	WT/REG/GEN/N/3	WT/REG80
Free Trade Agreement between Poland and the Republic of Lithuania	WT/REG49/2	WT/REG/GEN/N/3	WT/REG49
Free Trade Agreement between Israel and Poland	WT/REG65/2	WT/REG/GEN/N/3	WT/REG65
Free Trade Agreement between Turkey and Poland	WT/REG107/2	WT/REG/GEN/N/2 WT/REG/GEN/N/3	WT/REG107
Free Trade Agreement between the Slovak Republic and the Republic of Estonia	WT/REG63/3	WT/REG/GEN/N/3	WT/REG63
Free Trade Agreement between the Slovak Republic and the Republic of Latvia	WT/REG47/2	WT/REG/GEN/N/3	WT/REG47
Free Trade Agreement between the Slovak Republic and the Republic of Lithuania	WT/REG48/2	WT/REG/GEN/N/3	WT/REG48
Free Trade Agreement between Israel and the Slovak Republic	WT/REG57/3	WT/REG/GEN/N/3	WT/REG57

XXVI. ARTICLE XXV

A. TEXT OF ARTICLE XXV

Article XXV
Joint Action by the Contracting Parties

1. Representatives of the contracting parties shall meet from time to time for the purpose of giving effect to those provisions of this Agreement which involve joint action and, generally, with a view to facilitating the operation and furthering the objectives of this Agreement. Wherever reference is made in this Agreement to the contracting parties acting jointly they are designated as the CONTRACTING PARTIES.

2. The Secretary-General of the United Nations is requested to convene the first meeting of the CONTRACTING PARTIES, which shall take place not later than March 1, 1948.

3. Each contracting party shall be entitled to have one vote at all meetings of the CONTRACTING PARTIES.

4. Except as otherwise provided for in this Agreement, decisions of the CONTRACTING PARTIES shall be taken by a majority of the votes cast.

5. In exceptional circumstances not elsewhere provided for in this Agreement, the CONTRACTING PARTIES may waive an obligation imposed upon a contracting party by this Agreement; *Provided* that any such decision shall be approved by a two-thirds majority of the votes cast and that such majority shall comprise more than half of the contracting parties. The CONTRACTING PARTIES may also by such a vote

(i) define certain categories of exceptional circumstances to which other voting requirements shall apply for the waiver of obligations, and

(ii) prescribe such criteria as may be necessary for the application of this paragraph[1].

(*footnote original*) [1] The authentic text erroneously reads "subparagraph".

727. With respect to GATT practice on this subject-matter, see GATT Analytical Index, Article XXV, pages 874–888.

XXVII. ARTICLE XXVI

A. TEXT OF ARTICLE XXVI

Article XXVI
Acceptance, Entry into Force and Registration

1. The date of this Agreement shall be 30 October 1947.

2. This Agreement shall be open for acceptance by any contracting party which, on 1 March 1955, was a contracting party or was negotiating with a view to accession to this Agreement.

3. This Agreement, done in a single English original and a single French original, both texts authentic, shall be deposited with the Secretary-General of the United Nations, who shall furnish certified copies thereof to all interested governments.

4. Each government accepting this Agreement shall deposit an instrument of acceptance with the Executive Secretary[5] to the Contracting Parties, who will inform all interested governments of the date of deposit of each instrument of acceptance and of the day on which this Agreement enters into force under paragraph 6 of this Article.

(*footnote original*) [5] By the Decision of 23 March 1965, the CONTRACTING PARTIES changed the title of the head of the GATT secretariat from "Executive Secretary" to "Director-General".

5. (*a*) Each government accepting this Agreement does so in respect of its metropolitan territory and of the other territories for which it has international responsibility, except such separate customs territories as it shall notify to the Executive Secretary[5] to the CONTRACTING PARTIES at the time of its own acceptance.

(*b*) Any government, which has so notified the Executive Secretary[5] under the exceptions in subparagraph (*a*) of this paragraph, may at any time give notice to the Executive Secretary[5] that its acceptance shall be effective in respect of any separate customs territory or territories so excepted and such notice shall take effect on the thirtieth day following the day on which it is received by the Executive Secretary.[5]

(*c*) If any of the customs territories, in respect of which a contracting party has accepted this Agreement, possesses or acquires full autonomy in the conduct of its external commercial relations and of the other matters provided for in this Agreement, such territory shall, upon sponsorship through a declaration by the responsible contracting party establishing the above-mentioned fact, be deemed to be a contracting party.

6. This Agreement shall enter into force, as among the governments which have accepted it, on the thirtieth day following the day on which instruments of acceptance have been deposited with Executive Secretary[6] to the Contracting Parties on behalf of governments

named in Annex H, the territories of which account for 85 per centum of the total external trade of the territories of such governments, computed in accordance with the applicable column of percentages set forth therein. The instrument of acceptance of each other government shall take effect on the thirtieth day following the day on which such instrument has been deposited.

(*footnote original*) [6] By the Decision of 23 March 1965, the CONTRACTING PARTIES changed the title of the head of the GATT secretariat from "Executive Secretary" to "Director-General".

7. The United Nations is authorized to effect registration of this Agreement as soon as it enters into force.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXVI

728. With respect to acceptance, entry into force and deposit under the *WTO Agreement*, see Chapter on the *WTO Agreement*, Section XV.B.

XXVIII. ARTICLE XXVII

A. TEXT OF ARTICLE XXVII

Article XXVII
Withholding or Withdrawal of Concessions

Any contracting party shall at any time be free to withhold or to withdraw in whole or in part any concession, provided for in the appropriate Schedule annexed to this Agreement, in respect of which such contracting party determines that it was initially negotiated with a government which has not become, or has ceased to be, a contracting party. A contracting party taking such action shall notify the CONTRACTING PARTIES and, upon request, consult with contracting parties which have a substantial interest in the product concerned.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXVII

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

730. With respect to GATT practice on this subject-matter, see GATT Analytical Index, Article XXVII, pages 927–930.

XXIX. ARTICLE XXVIII

A. TEXT OF ARTICLE XXVIII

*Article XXVIII**
Modification of Schedules

1. On the first day of each three-year period, the first period beginning on 1 January 1958 (or on the first day of any other period* that may be specified by the CONTRACTING PARTIES by two-thirds of the votes cast) a contracting party (hereafter in this Article referred to as the "applicant contracting party") may, by negotiation and agreement with any contracting party with which such concession was initially negotiated and with any other contracting party determined by the CONTRACTING PARTIES to have a principal supplying interest* (which two preceding categories of contracting parties, together with the applicant contracting party, are in this Article hereinafter referred to as the "contracting parties primarily concerned"), and subject to consultation with any other contracting party determined by the CONTRACTING PARTIES to have a substantial interest* in such concession, modify or withdraw a concession* included in the appropriate schedule annexed to this Agreement.

2. In such negotiations and agreement, which may include provision for compensatory adjustment with respect to other products, the contracting parties concerned shall endeavour to maintain a general level of reciprocal and mutually advantageous concessions not less favourable to trade than that provided for in this Agreement prior to such negotiations.

3. (*a*) If agreement between the contracting parties primarily concerned cannot be reached before 1 January 1958 or before the expiration of a period envisaged in paragraph 1 of this Article, the contracting party which proposes to modify or withdraw the concession shall, nevertheless, be free to do so and if such action is taken any contracting party with which such concession was initially negotiated, any contracting party determined under paragraph 1 to have a principal supplying interest and any contracting party determined under paragraph 1 to have a substantial interest shall then be free not later than six months after such action is taken, to withdraw, upon the expiration of thirty days from the day on which written notice of such withdrawal is received by the CONTRACTING PARTIES, substantially equivalent concessions initially negotiated with the applicant contracting party.

(*b*) If agreement between the contracting parties primarily concerned is reached but any other contracting party determined under paragraph 1 of this Article to have a substantial interest is not satisfied, such other contracting party shall be free, not later than six months after action under such agreement is taken, to withdraw, upon the expiration of thirty days from the day on which written notice of such withdrawal is received by the

CONTRACTING PARTIES, substantially equivalent concessions initially negotiated with the applicant contracting party.

4. The CONTRACTING PARTIES may, at any time, in special circumstances, authorize* a contracting party to enter into negotiations for modification or withdrawal of a concession included in the appropriate Schedule annexed to this Agreement subject to the following procedures and conditions:

(*a*) Such negotiations* and any related consultations shall be conducted in accordance with the provisions of paragraph 1 and 2 of this Article.

(*b*) If agreement between the contracting parties primarily concerned is reached in the negotiations, the provisions of paragraph 3 (*b*) of this Article shall apply.

(*c*) If agreement between the contracting parties primarily concerned is not reached within a period of sixty days* after negotiations have been authorized, or within such longer period as the CONTRACTING PARTIES may have prescribed, the applicant contracting party may refer the matter to the CONTRACTING PARTIES.

(*d*) Upon such reference, the CONTRACTING PARTIES shall promptly examine the matter and submit their views to the contracting parties primarily concerned with the aim of achieving a settlement. If a settlement is reached, the provisions of paragraph 3 (*b*) shall apply as if agreement between the contracting parties primarily concerned had been reached. If no settlement is reached between the contracting parties primarily concerned, the applicant contracting party shall be free to modify or withdraw the concession, unless the CONTRACTING PARTIES determine that the applicant contracting party has unreasonably failed to offer adequate compensation.* If such action is taken, any contracting party with which the concession was initially negotiated, any contracting party determined under paragraph 4 (*a*) to have a principal supplying interest and any contracting party determined under paragraph 4 (*a*) to have a substantial interest, shall be free, not later than six months after such action is taken, to modify or withdraw, upon the expiration of thirty days from the day on which written notice of such withdrawal is received by the CONTRACTING PARTIES, substantially equivalent concessions initially negotiated with applicant contracting party.

5. Before 1 January 1958 and before the end of any period envisaged in paragraph 1 a contracting party may elect by notifying the CONTRACTING PARTIES to reserve the right, for the duration of the next period, to modify the appropriate Schedule in accordance with the procedures of paragraph 1 to 3. If a contracting party so elects, other contracting parties shall have the right, during the same period, to modify or withdraw, in accordance with the same procedures, concessions initially negotiated with that contracting party.

B. TEXT OF *AD* ARTICLE XXVIII

Ad Article XXVIII

The CONTRACTING PARTIES and each contracting party concerned should arrange to conduct the negotiations and consultations with the greatest possible secrecy in order to avoid premature disclosure of details of prospective tariff changes. The CONTRACTING PARTIES shall be informed immediately of all changes in national tariffs resulting from recourse to this Article.

Paragraph 1

1. If the CONTRACTING PARTIES specify a period other than a three-year period, a contracting party may act pursuant to paragraph 1 or paragraph 3 of Article XXVIII on the first day following the expiration of such other period and, unless the CONTRACTING PARTIES have again specified another period, subsequent periods will be three-year periods following the expiration of such specified period.

2. The provision that on 1 January 1958, and on other days determined pursuant to paragraph 1, a contracting party "may . . . modify or withdraw a concession" means that on such day, and on the first day after the end of each period, the legal obligation of such contracting party under Article II is altered; it does not mean that the changes in its customs tariff should necessarily be made effective on that day. If a tariff change resulting from negotiations undertaken pursuant to this Article is delayed, the entry into force of any compensatory concessions may be similarly delayed.

3. Not earlier than six months, nor later than three months, prior to 1 January 1958, or to the termination date of any subsequent period, a contracting party wishing to modify or withdraw any concession embodied in the appropriate Schedule, should notify the CONTRACTING PARTIES to this effect. The CONTRACTING PARTIES shall then determine the contracting party or contracting parties with which the negotiations or consultations referred to in paragraph 1 shall take place. Any contracting party so determined shall participate in such negotiations or consultations with the applicant contracting party with the aim of reaching agreement before the end of the period. Any extension of the assured life of the Schedules shall relate to the Schedules as modified after such negotiations, in accordance with paragraphs 1, 2, and 3 of Article XXVIII. If the CONTRACTING PARTIES are arranging for multilateral tariff

negotiations to take place within the period of six months before 1 January 1958, or before any other day determined pursuant to paragraph 1, they shall include in the arrangements for such negotiations suitable procedures for carrying out the negotiations referred to in this paragraph.

4. The object of providing for the participation in the negotiation of any contracting party with a principle supplying interest, in addition to any contracting party with which the concession was originally negotiated, is to ensure that a contracting party with a larger share in the trade affected by the concession than a contracting party with which the concession was originally negotiated shall have an effective opportunity to protect the contractual right which it enjoys under this Agreement. On the other hand, it is not intended that the scope of the negotiations should be such as to make negotiations and agreement under Article XXVIII unduly difficult nor to create complications in the application of this Article in the future to concessions which result from negotiations thereunder. Accordingly, the CONTRACTING PARTIES should only determine that a contracting party has a principal supplying interest if that contracting party has had, over a reasonable period of time prior to the negotiations, a larger share in the market of the applicant contracting party than a contracting party with which the concession was initially negotiated or would, in the judgement of the CONTRACTING PARTIES, have had such a share in the absence of discriminatory quantitative restrictions maintained by the applicant contracting party. It would therefore not be appropriate for the CONTRACTING PARTIES to determine that more than one contracting party, or in those exceptional cases where there is near equality more than two contracting parties, had a principal supplying interest.

5. Notwithstanding the definition of a principal supplying interest in note 4 to paragraph 1, the CONTRACTING PARTIES may exceptionally determine that a contracting party has a principal supplying interest if the concession in question affects trade which constitutes a major part of the total exports of such contracting party.

6. It is not intended that provision for participation in the negotiations of any contracting party with a principal supplying interest, and for consultation with any contracting party having a substantial interest in the concession which the applicant contracting party is seeking to modify or withdraw, should have the effect that it should have to pay compensation or suffer retaliation greater than the withdrawal or modification sought, judged in the light of the conditions of trade at the time of the proposed withdrawal or modification, making allowance for any discriminatory quantitative restrictions maintained by the applicant contracting party.

7. The expression "substantial interest" is not capable of a precise definition and accordingly may present difficulties for the CONTRACTING PARTIES. It is, however, intended to be construed to cover only those contracting parties which have, or in the absence of discriminatory quantitative restrictions affecting their exports could reasonably be expected to have, a significant share in the market of the contracting party seeking to modify or withdraw the concession.

Paragraph 4

1. Any request for authorization to enter into negotiations shall be accompanied by all relevant statistical and other data. A decision on such request shall be made within thirty days of its submission.

2. It is recognized that to permit certain contracting parties, depending in large measure on a relatively small number of primary commodities and relying on the tariff as an important aid for furthering diversification of their economies or as an important source of revenue, normally to negotiate for the modification or withdrawal of concessions only under paragraph 1 of Article XXVIII, might cause them at such time to make modifications or withdrawals which in the long run would prove unnecessary. To avoid such a situation the CONTRACTING PARTIES shall authorize any such contracting party, under paragraph 4, to enter into negotiations unless they consider this would result in, or contribute substantially towards, such an increase in tariff levels as to threaten the stability of the Schedules to this Agreement or lead to undue disturbance of international trade.

3. It is expected that negotiations authorized under paragraph 4 for modification or withdrawal of a single item, or a very small group of items, could normally be brought to a conclusion in sixty days. It is recognized, however, that such a period will be inadequate for cases involving negotiations for the modification or withdrawal of a larger number of items and in such cases, therefore, it would be appropriate for the CONTRACTING PARTIES to prescribe a longer period.

4. The determination referred to in paragraph 4 *(d)* shall be made by the CONTRACTING PARTIES within thirty days of the submission of the matter to them unless the applicant contracting party agrees to a longer period.

5. In determining under paragraph 4 *(d)* whether an applicant contracting party has unreasonably failed to offer adequate compensation, it is understood that the CONTRACTING PARTIES will take due account of the special position of a contracting party which has bound a high proportion of its tariffs at very low rates of duty and to this extent has less scope than other contracting parties to make compensatory adjustment.

C. UNDERSTANDING ON THE INTERPRETATION OF ARTICLE XXVIII OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

Members hereby *agree* as follows:

1. For the purposes of modification or withdrawal of a concession, the Member which has the highest ratio of exports affected by the concession (i.e. exports of the product to the market of the Member modifying or withdrawing the concession) to its total exports shall be deemed to have a principal supplying interest if it does not already have an initial negotiating right or a principal supplying interest as provided for in paragraph 1 of Article XXVIII. It is however agreed that this paragraph will be reviewed by the Council for Trade in Goods five years from the date of entry into force of the WTO Agreement with a view to deciding whether this criterion has worked satisfactorily in securing a redistribution of negotiating rights in favour of small and medium-sized exporting Members. If this is not the case, consideration will be given to possible improvements, including, in the light of the availability of adequate data, the adoption of a criterion based on the ratio of exports affected by the concession to exports to all markets of the product in question.

2. Where a Member considers that it has a principal supplying interest in terms of paragraph 1, it should communicate its claim in writing, with supporting evidence, to the Member proposing to modify or withdraw a concession, and at the same time inform the Secretariat. Paragraph 4 of the "Procedures for Negotiations under Article XXVIII" adopted on 10 November 1980 (BISD 27S/26–28) shall apply in these cases.

3. In the determination of which Members have a principal supplying interest (whether as provided for in paragraph 1 above or in paragraph 1 of Article XXVIII) or substantial interest, only trade in the affected product which has taken place on an MFN basis shall be taken into consideration. However, trade in the affected product which has taken place under non-contractual preferences shall also be taken into account if the trade in question has ceased to benefit from such preferential treatment, thus becoming MFN trade, at the time of the negotiation for the modification or withdrawal of the concession, or will do so by the conclusion of that negotiation.

4. When a tariff concession is modified or withdrawn on a new product (i.e. a product for which three years' trade statistics are not available) the Member possessing initial negotiating rights on the tariff line where the product is or was formerly classified shall be deemed to have an initial negotiating right in the concession in question. The determination of principal supplying and substantial interests and the calculation of compensation shall take into account, *inter alia,* production capacity and investment in the affected product in the exporting Member and estimates of export growth, as well as forecasts of demand for the product in the importing Member. For the purposes of this paragraph, "new product" is understood to include a tariff item created by means of a breakout from an existing tariff line.

5. Where a Member considers that it has a principal supplying or a substantial interest in terms of paragraph 4, it should communicate its claim in writing, with supporting evidence, to the Member proposing to modify or withdraw a concession, and at the same time inform the Secretariat. Paragraph 4 of the above-mentioned "Procedures for Negotiations under Article XXVIII" shall apply in these cases.

6. When an unlimited tariff concession is replaced by a tariff rate quota, the amount of compensation provided should exceed the amount of the trade actually affected by the modification of the concession. The basis for the calculation of compensation should be the amount by which future trade prospects exceed the level of the quota. It is understood that the calculation of future trade prospects should be based on the greater of:

(a) the average annual trade in the most recent representative three-year period, increased by the average annual growth rate of imports in that same period, or by 10 per cent, whichever is the greater; or

(b) trade in the most recent year increased by 10 per cent.

In no case shall a Member's liability for compensation exceed that which would be entailed by complete withdrawal of the concession.

7. Any Member having a principal supplying interest, whether as provided for in paragraph 1 above or in paragraph 1 of Article XXVIII, in a concession which is modified or withdrawn shall be accorded an initial negotiating right in the compensatory concessions, unless another form of compensation is agreed by the Members concerned.

D. INTERPRETATION AND APPLICATION OF ARTICLE XXVIII

1. Legal relevance of Article XXVIII negotiations in interpretation of GATT Articles

731. In *EC – Poultry*, Brazil claimed that the MFN principle in Articles I and XIII did not apply to tariff-rate quotas resulting from compensation negotiations under Article XXVIII of the *GATT*. The Panel rejected this argument and held:

"[I]f a preferential treatment of a particular trading partner not elsewhere justified is permitted under the pretext

of 'compensatory adjustment' under Article XXVIII:2, it would create a serious loophole in the multilateral trading system. Such a result would fundamentally alter the overall balance of concessions Article XXVIII is designed to achieve."[1029]

732. The Panel concluded that a tariff-rate quota which resulted from negotiations under Article XXVIII of the *GATT 1947*, and which was incorporated into a Member's Uruguay Round Schedule, must be administered in a non-discriminatory manner consistent with Article XIII of the *GATT 1994*.[1030] The Appellate Body agreed:

"We see nothing in Article XXVIII to suggest that compensation negotiated within its framework may be exempt from compliance with the non-discrimination principle inscribed in Articles I and XIII of the GATT 1994. As the Panel observed, this interpretation is, furthermore, supported by the negotiating history of Article XXVIII. Regarding the provision which eventually became Article XXVIII:3, the Chairman of the Tariff Agreements Committee at Geneva in 1947, concluded:

'It was agreed that there was no intention to interfere in any way with the operation of the most-favoured-nation clause. This Article is headed "Modification of Schedules". It refers throughout to concessions negotiated under paragraph 1 of Article II, the Schedules, and there is no reference to Article I, which is the Most-Favoured-Nation Clause. Therefore, I think the intent is clear: that in no way should this Article interfere with the operation of the Most-Favoured-Nation Clause.'[1031]

Although this statement refers specifically to the MFN clause in Article I of the GATT, logic requires that it applies equally to the non-discriminatory administration of quotas and tariff-rate quotas under Article XIII of the GATT 1994."[1032]

2. Review of the Understanding on the Interpretation of Article XXVIII of the GATT 1994

733. On 24 January 2000, the Council for Trade in Goods requested the Committee on Market Access to conduct the review envisaged in paragraph 1 of the Understanding on the Interpretation of Article XXVIII of the *GATT 1994*.[1033] On 12 October 2000, the Committee on Market Access agreed to report to the Council for Trade in Goods that the review had been carried out as mandated by that body and that, at that stage, there was no basis to change the criterion contained in paragraph 1 of the aforementioned Understanding, with a reservation that in the future any Member would be free to raise this matter when necessary.[1034]

3. Reference to GATT practice

734. With respect to GATT practice under Article XXVIII, see GATT Analytical Index, pages 933–984.

XXX. ARTICLE XXVIII *BIS*

A. TEXT OF ARTICLE XXVIII *BIS*

Article XXVIII bis
Tariff Negotiations

1. The contracting parties recognize that customs duties often constitute serious obstacles to trade; thus negotiations on a reciprocal and mutually advantageous basis, directed to the substantial reduction of the general level of tariffs and other charges on imports and exports and in particular to the reduction of such high tariffs as discourage the importation even of minimum quantities, and conducted with due regard to the objectives of this Agreement and the varying needs of individual contracting parties, are of great importance to the expansion of international trade. The CONTRACTING PARTIES may therefore sponsor such negotiations from time to time.

2. (*a*) Negotiations under this Article may be carried out on a selective product-by-product basis or by the application of such multilateral procedures as may be accepted by the contracting parties concerned. Such negotiations may be directed towards the reduction of duties, the binding of duties at then existing levels or undertakings that individual duties or the average duties on specified categories of products shall not exceed specified levels. The binding against increase of low duties or of duty-free treatment shall, in principle, be recognized as a concession equivalent in value to the reduction of high duties.

(*b*) The contracting parties recognize that in general the success of multilateral negotiations would depend on the participation of all contracting parties which conduct a substantial proportion of their external trade with one another.

3. Negotiations shall be conducted on a basis which affords adequate opportunity to take into account:

(*a*) the needs of individual contracting parties and individual industries;

(*b*) the needs of less-developed countries for a more flexible use of tariff protection to assist their economic development and the special

needs of these countries to maintain tariffs for revenue purposes; and

(c) all other relevant circumstances, including the fiscal,* developmental, strategic and other needs of the contracting parties concerned.

B. TEXT OF *AD* ARTICLE XXVIII *BIS*

Ad Article XXVIII bis
Paragraph 3

It is understood that the reference to fiscal needs would include the revenues aspect of duties and particularly duties imposed primarily for revenue purpose, or duties imposed on products which can be substituted for products subject to revenue duties to prevent the avoidance of such duties.

C. INTERPRETATION AND APPLICATION OF ARTICLE XXVIII *BIS*

No jurisprudence or decision of a competent WTO body.

XXXI. ARTICLE XXIX

A. TEXT OF ARTICLE XXIX

Article XXIX
The Relation of this Agreement to the Havana Charter

1. The contracting parties undertake to observe to the fullest extent of their executive authority the general principles of Chapters I to VI inclusive and of Chapter IX of the Havana Charter pending their acceptance of it in accordance with their constitutional procedures.*

2. Part II of this Agreement shall be suspended on the day on which the Havana Charter enters into force.

3. If by September 30, 1949, the Havana Charter has not entered into force, the contracting parties shall meet before December 31, 1949, to agree whether this Agreement shall be amended, supplemented or maintained.

4. If at any time the Havana Charter should cease to be in force, the CONTRACTING PARTIES shall meet as soon as practicable thereafter to agree whether this Agreement shall be supplemented, amended or maintained. Pending such agreement, Part II of this Agreement shall again enter into force; *Provided* that the provisions of Part II other than Article XXIII shall be replaced, *mutatis mutandis,* in the form in which they then appeared in the Havana Charter; and *Provided* further that no contracting party shall be bound by any provisions which did not bind it at the time when the Havana Charter ceased to be in force.

5. If any contracting party has not accepted the Havana Charter by the date upon which it enters into force, the CONTRACTING PARTIES shall confer to agree whether, and if so in what way, this Agreement in so far as it affects relations between such contracting party and other contracting parties, shall be supplemented or amended. Pending such agreement the provisions of Part II of this Agreement shall, notwithstanding the provisions of paragraph 2 of this Article, continue to apply as between such contracting party and other contracting parties.

6. Contracting parties which are Members of the International Trade Organization shall not invoke the provisions of this Agreement so as to prevent the operation of any provision of the Havana Charter. The application of the principle underlying this paragraph to any contracting party which is not a Member of the International Trade Organization shall be the subject of an agreement pursuant to paragraph 5 of this Article.

B. TEXT OF *AD* ARTICLE XXIX

Ad Article XXIX
Paragraph 1

Chapters VII and VIII of the Havana Charter have been excluded from paragraph 1 because they generally deal with the organization, functions and procedures of the International Trade Organization.

C. INTERPRETATION AND APPLICATION OF ARTICLE XXIX

No jurisprudence or decision of a competent WTO body.

XXXII. ARTICLE XXX

A. TEXT OF ARTICLE XXX

Article XXX
Amendments

1. Except where provision for modification is made elsewhere in this Agreement, amendments to the provisions of Part I of this Agreement or the provisions of Article XXIX or of this Article shall become effective upon acceptance by all the contracting parties, and other amendments to this Agreement shall become effective, in respect of those contracting parties which accept them, upon acceptance by two-thirds of the contracting parties and thereafter for each other contracting party upon acceptance by it.

2. Any contracting party accepting an amendment to this Agreement shall deposit an instrument of acceptance with the Secretary-General of the United Nations within such period as the CONTRACTING PARTIES may specify. The CONTRACTING PARTIES may decide that any amendment made effective under this Article is of such a nature that any contracting party which has not accepted it within a period specified by the CONTRACTING PARTIES shall be free to withdraw from this Agreement, or to remain a contracting party with the consent of the CONTRACTING PARTIES.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXX

735. With respect to amendments to the *WTO Agreement*, see Chapter on the *WTO Agreement*, Section XI.B.

1. Reference to GATT practice

736. With respect to GATT practice under Article XXX, see GATT Analytical Index, pages 1002–1008.

XXXIII. ARTICLE XXXI

A. TEXT OF ARTICLE XXXI

Article XXXI
Withdrawal

Without prejudice to the provisions of paragraph 12 of Article XVIII, of Article XXIII or of paragraph 2 of Article XXX, any contracting party may withdraw from this Agreement, or may separately withdraw on behalf of any of the separate customs territories for which it has international responsibility and which at the time possesses full autonomy in the conduct of its external commercial relations and of the other matters provided for in this Agreement. The withdrawal shall take effect upon the expiration of six months from the day on which written notice of withdrawal is received by the Secretary-General of the United Nations.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXI

737. With respect to withdrawal from the WTO, see Chapter on the *WTO Agreement*, Section XVI.B.

1. Reference to GATT practice

738. With respect to GATT practice under Article XXXI, see GATT Analytical Index, pages 1011–1012.

XXXIV. ARTICLE XXXII

A. TEXT OF ARTICLE XXXII

Article XXXII
Contracting Parties

1. The contracting parties to this Agreement shall be understood to mean those governments which are applying the provisions of this Agreement under Articles XXVI or XXXIII or pursuant to the Protocol of Provisional Application.

2. At any time after the entry into force of this Agreement pursuant to paragraph 6 of Article XXVI, those contracting parties which have accepted this Agreement pursuant to paragraph 4 of Article XXVI may decide that any contracting party which has not so accepted it shall cease to be a contracting party.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXII

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

739. With respect to GATT practice under Article XXXII, see GATT Analytical Index, pages 1013–1014.

XXXV. ARTICLE XXXIII

A. TEXT OF ARTICLE XXXIII

Article XXXIII
Accession

A government not party to this Agreement, or a government acting on behalf of a separate customs territory possessing full autonomy in the conduct of its external commercial relations and of the other matters provided for in this Agreement, may accede to this Agreement, on its own behalf or on behalf of that territory, on terms to be agreed between such government and the CONTRACTING PARTIES. Decisions of the CONTRACTING PARTIES under this paragraph shall be taken by a two-thirds majority.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXIII

740. With respect to accession to the WTO, see Chapter on the *WTO Agreement*, Section XIII.B.

1. Reference to GATT practice

741. With respect to GATT practice under Article XXXIII, see GATT Analytical Index, pages 1017–1028.

XXXVI. ARTICLE XXXIV

A. TEXT OF ARTICLE XXXIV

Article XXXIV
Annexes

The annexes to this Agreement are hereby made an integral part of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXIV

742. See Chapter on the *WTO Agreement*, Section III.B.

1. Reference to GATT practice

743. With respect to GATT practice under Article XXXIV, see GATT Analytical Index, page 1029.

XXXVII. ARTICLE XXXV

A. TEXT OF ARTICLE XXXV

Article XXXV
Non-application of the Agreement between Particular Contracting Parties

1. This Agreement, or alternatively Article II of this Agreement, shall not apply as between any contracting party and any other contracting party if:

(*a*) the two contracting parties have not entered into tariff negotiations with each other, and

(*b*) either of the contracting parties, at the time either becomes a contracting party, does not consent to such application.

2. The CONTRACTING PARTIES may review the operation of this Article in particular cases at the request of any contracting party and make appropriate recommendations.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXV

744. With respect to the non-application of the Multilateral Trade Agreements between particular Members, see Chapter on the *WTO Agreement*, Section XIV.B.

1. Reference to GATT practice

745. With respect to GATT practice under Article XXXV, see GATT Analytical Index, pages 1031–1038.

PART IV*
TRADE AND DEVELOPMENT

XXXVIII. ARTICLE XXXVI

A. TEXT OF ARTICLE XXXVI

Article XXXVI
Principles and Objectives

1.* The contracting parties,

(*a*) recalling that the basic objectives of this Agreement include the raising of standards of living and the progressive development of the economies of all contracting parties, and considering that the attainment of these objectives is particularly urgent for less-developed contracting parties;

(*b*) considering that export earnings of the less-developed contracting parties can play a vital part in their economic development and that the extent of this contribution depends on the prices paid by the less-developed contracting parties for essential imports, the volume of their exports, and the prices received for these exports;

(*c*) noting, that there is a wide gap between standards of living in less-developed countries and in other countries;

(*d*) recognizing that individual and joint action is essential to further the development of the economies of less-developed contracting parties and to bring about a rapid advance in the standards of living in these countries;

(*e*) recognizing that international trade as a means of achieving economic and social advancement should be governed by such rules and procedures – and measures in conformity with such rules and procedures – as are consistent with the objectives set forth in this Article;

(*f*) noting that the CONTRACTING PARTIES may enable less-developed contracting parties to use special measures to promote their trade and development;

agree as follows.

2. There is need for a rapid and sustained expansion of the export earnings of the less-developed contracting parties.

3. There is need for positive efforts designed to ensure that less-developed contracting parties secure a share in the growth in international trade commensurate with the needs of their economic development.

4. Given the continued dependence of many less-developed contracting parties on the exportation of a limited range of primary products,* there is need to provide in the largest possible measure more favourable and acceptable conditions of access to world markets for these products, and wherever appropriate to devise measures designed to stabilize and improve conditions of world markets in these products, including in particular measures designed to attain stable, equitable and remunerative prices, thus permitting an expansion of world trade and demand and a dynamic and steady growth of the real export earnings of these countries so as to provide them with expanding resources for their economic development.

5. The rapid expansion of the economies of the less-developed contracting parties will be facilitated by a diversification* of the structure of their economies and the avoidance of an excessive dependence on the export of primary products. There is, therefore, need for increased access in the largest possible measure to markets under favourable conditions for processed and manufactured products currently or potentially of particular export interest to less-developed contracting parties.

6. Because of the chronic deficiency in the export proceeds and other foreign exchange earnings of less-

developed contracting parties, there are important interrelationships between trade and financial assistance to development. There is, therefore, need for close and continuing collaboration between the CONTRACTING PARTIES and the international lending agencies so that they can contribute most effectively to alleviating the burdens these less-developed contracting parties assume in the interest of their economic development.

7. There is need for appropriate collaboration between the CONTRACTING PARTIES, other intergovernmental bodies and the organs and agencies of the United Nations system, whose activities relate to the trade and economic development of less-developed countries.

8. The developed contracting parties do not expect reciprocity for commitments made by them in trade negotiations to reduce or remove tariffs and other barriers to the trade of less-developed contracting parties.*

9. The adoption of measures to give effect to these principles and objectives shall be a matter of conscious and purposeful effort on the part of the contracting parties both individually and jointly.

B. TEXT OF *AD* ARTICLE XXXVI

Ad Article XXXVI
Paragraph 1

This Article is based upon the objectives set forth in Article I as it will be amended by Section A of paragraph 1 of the Protocol Amending Part I and Articles XXIX and XXX when that Protocol enters into force.[1]

(*footnote original*) [1] This Protocol was abandoned on 1 January 1968.

Paragraph 4

The term "primary products" includes agricultural products, *vide* paragraph 2 of the note *ad* Article XVI, Section B.

Paragraph 5

A diversification programme would generally include the intensification of activities for the processing of primary products and the development of manufacturing industries, taking into account the situation of the particular contracting party and the world outlook for production and consumption of different commodities.

Paragraph 8

It is understood that the phrase "do not expect reciprocity" means, in accordance with the objectives set forth in this Article, that the less-developed contracting parties should not be expected, in the course of trade negotiations, to make contributions which are inconsistent with their individual development, financial and trade needs, taking into consideration past trade developments.

This paragraph would apply in the event of action under Section A of Article XVIII, Article XXVIII, Article XXVIII *bis* (Article XXIX after the amendment set forth in Section A of paragraph 1 of the Protocol Amending Part I and Articles XXIX and XXX shall have become effective[2]), Article XXXIII, or any other procedure under this Agreement.

(*footnote original*) [2] This Protocol was abandoned on 1 January 1968.

C. INTERPRETATION AND APPLICATION OF ARTICLE XXXVI

746. With respect to the issue of trade and development under the *WTO Agreement*, see the Chapter on the *WTO Agreement*, paragraphs V.B.7. Also, with respect to special and preferential treatment for developing country Members, see V.B.7(a)(iv).

1. Reference to GATT practice

747. With respect to GATT practice under Article XXXVI, see GATT Analytical Index, pages 1055–1058.

XXXIX. ARTICLE XXXVII

A. TEXT OF ARTICLE XXXVII

Article XXXVII
Commitments

1. The developed contracting parties shall to the fullest extent possible – that is, except when compelling reasons, which may include legal reasons, make it impossible – give effect to the following provisions:

(*a*) accord high priority to the reduction and elimination of barriers to products currently or potentially of particular export interest to less-developed contracting parties, including customs duties and other restrictions which differentiate unreasonably between such products in their primary and in their processed forms;*

(*b*) refrain from introducing, or increasing the incidence of, customs duties or non-tariff import barriers on products currently or potentially of particular export interest to less-developed contracting parties; and

(*c*) (i) refrain from imposing new fiscal measures, and

(ii) in any adjustments of fiscal policy accord high priority to the reduction and elimination of fiscal measures, which would hamper, or which hamper, significantly the growth of consumption of primary products, in raw or processed form, wholly or mainly produced in the territories of less-

developed contracting parties, and which are applied specifically to those products.

2. (*a*) Whenever it is considered that effect is not being given to any of the provisions of subparagraph (*a*), (*b*) or (*c*) of paragraph 1, the matter shall be reported to the CONTRACTING PARTIES either by the contracting party not so giving effect to the relevant provisions or by any other interested contracting party.

(b) (i) The CONTRACTING PARTIES shall, if requested so to do by any interested contracting party, and without prejudice to any bilateral consultations that may be undertaken, consult with the contracting party concerned and all interested contracting parties with respect to the matter with a view to reaching solutions satisfactory to all contracting parties concerned in order to further the objectives set forth in Article XXXVI. In the course of these consultations, the reasons given in cases where effect was not being given to the provisions of subparagraph (*a*), (*b*) or (*c*) of paragraph 1 shall be examined.

(ii) As the implementation of the provisions of subparagraph (a), (b) or (c) of paragraph 1 by individual contracting parties may in some cases be more readily achieved where action is taken jointly with other developed contracting parties, such consultation might, where appropriate, be directed towards this end.

(iii) The consultations by the CONTRACTING PARTIES might also, in appropriate cases, be directed towards agreement on joint action designed to further the objectives of this Agreement as envisaged in paragraph 1 of Article XXV.

3. The developed contracting parties shall:

(*a*) make every effort, in cases where a government directly or indirectly determines the resale price of products wholly or mainly produced in the territories of less-developed contracting parties, to maintain trade margins at equitable levels;

(*b*) give active consideration to the adoption of other measures* designed to provide greater scope for the development of imports from less-developed contracting parties and collaborate in appropriate international action to this end;

(*c*) have special regard to the trade interests of less-developed contracting parties when considering the application of other measures permitted under this Agreement to meet particular problems and explore all possibilities of constructive remedies before applying such measures where they would affect essential interests of those contracting parties.

4. Less-developed contracting parties agree to take appropriate action in implementation of the provisions of Part IV for the benefit of the trade of other less-developed contracting parties, in so far as such action is consistent with their individual present and future development, financial and trade needs taking into account past trade developments as well as the trade interests of less-developed contracting parties as a whole.

5. In the implementation of the commitments set forth in paragraph 1 to 4 each contracting party shall afford to any other interested contracting party or contracting parties full and prompt opportunity for consultations under the normal procedures of this Agreement with respect to any matter or difficulty which may arise.

B. TEXT OF *AD* ARTICLE XXXVII

Ad Article XXXVII
Paragraph 1 (a)

This paragraph would apply in the event of negotiations for reduction or elimination of tariffs or other restrictive regulations of commerce under Articles XXVIII, XXVIII *bis* (XXIX after the amendment set forth in Section A of paragraph 1 of the Protocol Amending Part I and Articles XXIX and XXX shall have become effective[13]), and Article XXXIII, as well as in connection with other action to effect such reduction or elimination which contracting parties may be able to undertake.

(*footnote original*) [13] This Protocol was abandoned on 1 January 1968.

Paragraph 3 (b)

The other measures referred to in this paragraph might include steps to promote domestic structural changes, to encourage the consumption of particular products, or to introduce measures of trade promotion.

C. INTERPRETATION AND APPLICATION OF ARTICLE XXXVII

748. With respect to the issue of trade and development under the *WTO Agreement*, see the Chapter on the *WTO Agreement*, Section V.B.7. Also, with respect to special and preferential treatment for developing country Members, see Section V.B.7(a)(iv).

1. Reference to GATT practice

749. With respect to GATT practice under Article XXXVII, see GATT Analytical Index, pages 1061–1068.

XL. ARTICLE XXXVIII

A. TEXT OF ARTICLE XXXVIII

Article XXXVIII
Joint Action

1. The contracting parties shall collaborate jointly, with the framework of this Agreement and elsewhere, as

appropriate, to further the objectives set forth in Article XXXVI.

2. In particular, the CONTRACTING PARTIES shall:

(*a*) where appropriate, take action, including action through international arrangements, to provide improved and acceptable conditions of access to world markets for primary products of particular interest to less-developed contracting parties and to devise measures designed to stabilize and improve conditions of world markets in these products including measures designed to attain stable, equitable and remunerative prices for exports of such products;

(*b*) seek appropriate collaboration in matters of trade and development policy with the United Nations and its organs and agencies, including any institutions that may be created on the basis of recommendations by the United Nations Conference on Trade and Development;

(*c*) collaborate in analysing the development plans and policies of individual less-developed contracting parties and in examining trade and aid relationships with a view to devising concrete measures to promote the development of export potential and to facilitate access to export markets for the products of the industries thus developed and, in this connection, seek appropriate collaboration with governments and international organizations, and in particular with organizations having competence in relation to financial assistance for economic development, in systematic studies of trade and aid relationships in individual less-developed contracting parties aimed at obtaining a clear analysis of export potential, market prospects and any further action that may be required;

(*d*) keep under continuous review the development of world trade with special reference to the rate of growth of the trade of less-developed contracting parties and make such recommendations to contracting parties as may, in the circumstances, be deemed appropriate;

(*e*) collaborate in seeking feasible methods to expand trade for the purpose of economic development, through international harmonization and adjustment of national policies and regulations, through technical and commercial standards affecting production, transportation and marketing, and through export promotion by the establishment of facilities for the increased flow of trade information and the development of market research; and

(*f*) establish such institutional arrangements as may be necessary to further the objectives set forth in Article XXXVI and to give effect to the provision of this Part.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXXVIII

750. With respect to the issue of trade and development under the *WTO Agreement*, see the Chapter on the *WTO Agreement*, Section V.B.7. Also, with respect to special and preferential treatment for developing country Members, see V.B.7.(a)(iv).

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Having decided to establish a basis for initiating a process of reform of trade in agriculture in line with the objectives of the negotiations as set out in the Punta del Este Declaration;

Recalling that their long-term objective as agreed at the Mid-Term Review of the Uruguay Round "is to establish a fair and market-oriented agricultural trading system and that a reform process should be initiated through the negotiation of commitments on support and protection and through the establishment of strengthened and more operationally effective GATT rules and disciplines";

Recalling further that "the above-mentioned long-term objective is to provide for substantial progressive reductions in agricultural support and protection sustained over an agreed period of time, resulting in correcting and preventing restrictions and distortions in world agricultural markets";

Committed to achieving specific binding commitments in each of the following areas: market access; domestic support; export competition; and to reaching an agreement on sanitary and phytosanitary issues;

Having agreed that in implementing their commitments on market access, developed country Members would take fully into account the particular needs and conditions of developing country Members by providing for a greater improvement of opportunities and terms of access for agricultural products of particular interest to these Members, including the fullest liberalization of trade in tropical agricultural products as agreed at the Mid-Term Review, and for products of particular importance to the diversification of production from the growing of illicit narcotic crops;

Noting that commitments under the reform programme should be made in an equitable way among all Members, having regard to non-trade concerns, including food security and the need to protect the environment; having regard to the agreement that special and differential treatment for developing countries is an integral element of the negotiations, and taking into account the possible negative effects of the implementation of the reform programme on least-developed and net food-importing developing countries;

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. "objectives of the negotiations as set out in the Punta del Este Declaration"

1. The objectives of the Uruguay Round negotiations in the agriculture sector are set out in the Ministerial Declaration on the Uruguay Round.[1]

2. Long-term objective of the reform process and the Mid-Term Review

2. At the Mid-Term Review of the Uruguay Round, Ministers agreed on the long-term objective of the Uruguay Round negotiations in the agriculture sector.[2]

PART I

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Definition of Terms

In this Agreement, unless the context otherwise requires:

(a) "Aggregate Measurement of Support" and "AMS" mean the annual level of support, expressed in monetary terms, provided for an agricultural product in favour of the producers of the basic agricultural product or non-product-specific support provided in favour of agricultural producers in general, other than support provided under programmes that qualify as exempt from reduction under Annex 2 to this Agreement, which is:

(i) with respect to support provided during the base period, specified in the relevant tables of supporting material incorporated by reference in Part IV of a Member's Schedule; and

(ii) with respect to support provided during any year of the implementation period and thereafter, calculated in accordance with the provisions of Annex 3 of this Agreement and taking into account the constituent data and methodology used in the tables of supporting material

[1] BISD 33S/19, Part I, Section D.
[2] MTN.TNC/11, pp. 6–7.

incorporated by reference in Part IV of the Member's Schedule;

(b) "basic agricultural product" in relation to domestic support commitments is defined as the product as close as practicable to the point of first sale as specified in a Member's Schedule and in the related supporting material;

(c) "budgetary outlays" or "outlays" includes revenue foregone;

(d) "Equivalent Measurement of Support" means the annual level of support, expressed in monetary terms, provided to producers of a basic agricultural product through the application of one or more measures, the calculation of which in accordance with the AMS methodology is impracticable, other than support provided under programmes that qualify as exempt from reduction under Annex 2 to this Agreement, and which is:

(i) with respect to support provided during the base period, specified in the relevant tables of supporting material incorporated by reference in Part IV of a Member's Schedule; and

(ii) with respect to support provided during any year of the implementation period and thereafter, calculated in accordance with the provisions of Annex 4 of this Agreement and taking into account the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule;

(e) "export subsidies" refers to subsidies contingent upon export performance, including the export subsidies listed in Article 9 of this Agreement;

(f) "implementation period" means the six-year period commencing in the year 1995, except that, for the purposes of Article 13, it means the nine-year period commencing in 1995;

(g) "market access concessions" includes all market access commitments undertaken pursuant to this Agreement;

(h) "Total Aggregate Measurement of Support" and "Total AMS" mean the sum of all domestic support provided in favour of agricultural producers, calculated as the sum of all aggregate measurements of support for basic agricultural products, all non-product-specific aggregate measurements of support and all equivalent measurements of support for agricultural products, and which is:

(i) with respect to support provided during the base period (i.e. the "Base Total AMS") and the maximum support permitted to be provided during any year of the implementation period or thereafter (i.e. the "Annual and Final Bound Commitment Levels"), as specified in Part IV of a Member's Schedule; and

(ii) with respect to the level of support actually provided during any year of the implementation period and thereafter (i.e. the "Current Total AMS"), calculated in accordance with the provisions of this Agreement, including Article 6, and with the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule;

(i) "year" in paragraph (f) above and in relation to the specific commitments of a Member refers to the calendar, financial or marketing year specified in the Schedule relating to that Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1(a)(ii)

3. The Panel on *Korea – Various Measures on Beef*, in a finding later reversed by the Appellate Body[3], agreed with the complainants that Korea had provided domestic support to its beef industry in excess of its commitment levels for 1997 and 1998. In its notifications, Korea had determined that its Current AMS for beef was below the *de minimis* threshold as set out in Article 6.4; as a result, Korea argued, this domestic support item did not have to be included in the calculation of its Current Total AMS. The Panel found that Korea's calculations in this respect were in error. Korea argued that its calculation was correct, because it was based on the "constituent data and methodology" used in its Schedule, in accordance with Articles 1(a)(ii) and 1(h)(ii) of the *Agreement on Agriculture*. The Appellate Body, with respect to the calculation of the Current AMS, first recalled the wording of Article 1(a)(ii) of the *Agreement on Agriculture* which contains the definition of the term "Current AMS" stating:

> "To determine whether Korea's Current AMS for beef exceeds 10 per cent of total value of beef production, we refer again to Article 1(a)(ii) of the *Agreement on Agriculture*, which defines Current AMS. Under this provision, Current AMS is to be
>
> 'calculated *in accordance with* the provisions of Annex 3 of this Agreement and *taking into account* the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule; . . . (emphasis added)'

Article 1(a)(ii) contains two express requirements for calculating Current AMS. First, Current AMS is to be

[3] See Appellate Body Report on *Korea – Various Measures on Beef*, paras. 126, 127 and 129.

'calculated *in accordance with* the provisions of Annex 3 of this Agreement'. The ordinary meaning of 'accordance' is 'agreement, conformity, harmony'.[4] Thus, Current AMS must be calculated in 'conformity' with the provisions of Annex 3. Second, Article 1(a)(ii) provides that the calculation of Current AMS is to be made while 'taking into account the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule.' 'Take into account' is defined as 'take into consideration, notice'.[5] Thus, when Current AMS is calculated, the 'constituent data and methodology' in a Member's Schedule must be 'taken into account', that is, it must be 'considered'.[6]"[7]

4. The Appellate Body subsequently held that Article 1(a)(ii) accorded "higher priority" to the provisions of Annex 3 than to "constituent data and methodology" contained in a Member's Schedule, but noted that in the case before it, it was not necessary to decide a conflict between the two, because there was no specific Korean "constituent data and methodology". As a result, the Current AMS was to be calculated in accordance with the provisions of Annex 3:

"Looking at the wording of Article 1(a)(ii) itself, it seems to us that this provision attributes higher priority to 'the provisions of Annex 3' than to the 'constituent data and methodology'. From the viewpoint of ordinary meaning, the term 'in accordance with' reflects a more rigorous standard than the term 'taking into account'.

We note, however, that the Panel did not base its reasoning on this apparent hierarchy as between 'the provisions of Annex 3' and the 'constituent data and methodology'.[8] Instead, the Panel considered that where no support was included in the base period calculation for a given product, there is no 'constituent data or methodology' to refer to, so that the only means available for calculating domestic support is that provided in Annex 3. As beef had not been included in Supporting Table 6 of Korea's Schedule LX, Part IV, Section I, the Panel concluded that Annex 3 alone is applicable for the purposes of calculating current non-exempt support in respect of Korean beef.

In the circumstances of the present case, it is not necessary to decide how a conflict between 'the provisions of Annex 3' and the 'constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule' would have to be resolved in principle. As the Panel has found, in this case, there simply are no constituent data and methodology for beef.[9] Assuming *arguendo* that one would be justified – in spite of the wording of Article 1(a)(ii) – to give priority to constituent data and methodology used in the tables of supporting material over the guidance of Annex 3, for products entering into the calculation of the Base Total AMS, such a step would seem to us to be unwarranted in calculating Current AMS for a product which did *not* enter into the Base Total AMS calculation. We do not believe that the *Agreement on Agriculture* would sustain such an extrapolation. We, therefore, agree with the Panel that, in this case, Current AMS for beef has to be calculated in accordance with the provisions of Annex 3, and with these provisions alone."[10]

5. Further, in *Korea – Various Measures on Beef*, the Panel held that Korea had calculated its Current AMS for beef on the basis of a fixed external reference price for the period 1989–1991, rather than the period 1986–88, as set forth in paragraph 9 of Annex 3. Korea argued that its use of the period 1989–1991 was justified, because this period was referred to in the constituent data and methodology (used with respect to products other than beef) contained in a table of supporting material incorporated in its Schedule. The Appellate Body agreed with the Panel and recalled its findings referenced in paragraph 4 above:

"The Panel found that in both 1997 and 1998 Korea miscalculated its fixed external reference price, contrary to Article 6 and paragraph 9 of Annex 3, by using a fixed external reference price based on data for 1989–1991. Korea justifies this choice by invoking the 'constituent data and methodology' used in its Supporting Table 6 for all products other than rice, i.e., for barley, soybean, maize (corn) and rape seeds. In Supporting Table 6, all these products use the period 1989–1991 for the fixed external reference price.

We have already explained above that we share the Panel's view with respect to Korea's argument on 'constituent data and methodology' used in the table of supporting material. We agree with the Panel that, in this case, Current AMS for beef has to be calculated in accordance with Annex 3. According to Annex 3, '[t]he fixed external reference price shall be based on the years 1986

[4] (*footnote original*) *The New Shorter Oxford English Dictionary*, (Clarendon Press, 1993), Vol. I, p. 15.
[5] (*footnote original*) *Ibid.*
[6] (*footnote original*) We note that this difference is not reflected in the wording of the definition of Current Total AMS in Article 1(h). Article 1(h)(ii) provides that Current Total AMS is to be calculated "in accordance with the provisions of this Agreement, including Article 6, *and* with the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule". (emphasis added)
[7] Appellate Body Report on *Korea – Various Measures on Beef*, para. 111.
[8] (*footnote original*) On the contrary, the Panel opines that the "constituent data and methodology" has an important role to play in ensuring that the calculation of support to any given product is calculated in subsequent years consistently with support calculated in the base period. Panel Report, para. 811.
[9] (*footnote original*) . . . In other words, there is no *data* (product) in respect of which the *methodology* of Schedule LX of Korea (that is, the use of figures for the years 1989–1991) could be applied, in so far as beef is concerned.
[10] Appellate Body Report on *Korea – Various Measures on Beef*, paras. 112–114.

to 1988'. We, therefore, also agree with the Panel that in calculating the product specific AMS for beef for the years 1997 and 1998, Korea should have used an external reference price based on data for 1986–1988, instead of data for 1989–1991."[11]

2. Article 1(e)

(a) Definition of the term "subsidy"

6. In *Canada – Dairy*, the Appellate Body recalled its finding in *Canada – Aircraft* where it had stated that a subsidy "arises where the grantor makes a 'financial contribution' which confers a 'benefit' on the recipient, as compared with what would have been otherwise available to the recipient in the marketplace".[12]

7. In *US – FSC*, the Appellate Body, noting "that the *Agreement on Agriculture* does not contain a definition of the terms 'subsidy' or 'subsidies'"[13], reiterated the approach it followed in *Canada – Dairy* as follows:

> "Therefore, in this case, we will consider, first, whether the FSC measure involves a transfer of economic resources by the grantor, which in this dispute is the government of the United States, and, second, whether any transfer of economic resources involves a benefit to the recipient."[14]

8. As regards the definition of a subsidy under the *SCM Agreement*, see Section I.B.2(a) of the Chapter on the *SCM Agreement*.

(b) "contingent upon export performance"

9. In *US – FSC*, the Appellate Body interpreted the requirement of export contingency also with reference to the *SCM Agreement*, stating that:

> "We see no reason, and none has been pointed out to us, to read the requirement of 'contingent upon export performance' in the *Agreement on Agriculture* differently from the same requirement imposed by the *SCM Agreement*. The two Agreements use precisely the same words to define 'export subsidies'. Although there are differences between the export subsidy disciplines established under the two Agreements, those differences do not, in our view, affect the common substantive requirement relating to export contingency. Therefore, we think it appropriate to apply the interpretation of export contingency that we have adopted under the *SCM Agreement* to the interpretation of export contingency under the *Agreement on Agriculture*."[15]

10. As regards the concept of export contingency under the *SCM Agreement*, see Section III.B.1 of the Chapter on the *SCM Agreement*.

3. Article 1(h)

11. In *Korea – Various Measures on Beef*, the Panel and the Appellate Body addressed Korea's argument that its method for calculation of domestic support was justifiable because it was based upon "the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule", although it was not consistent with the methodology set out in Annex 3 to the *Agreement on Agriculture*. See paragraphs 3–5 above.

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Product Coverage

This Agreement applies to the products listed in Annex 1 to this Agreement, hereinafter referred to as agricultural products.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

No jurisprudence or decision of a competent WTO body.

PART II

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Incorporation of Concessions and Commitments

1. The domestic support and export subsidy commitments in Part IV of each Member's Schedule constitute commitments limiting subsidization and are hereby made an integral part of GATT 1994.

2. Subject to the provisions of Article 6, a Member shall not provide support in favour of domestic producers in excess of the commitment levels specified in Section I of Part IV of its Schedule.

3. Subject to the provisions of paragraphs 2(b) and 4 of Article 9, a Member shall not provide export subsidies listed in paragraph 1 of Article 9 in respect of the agricultural products or groups of products specified in Section II of Part IV of its Schedule in excess of the budgetary outlay and quantity commitment levels specified therein and shall not provide such subsidies in respect of any agricultural product not specified in that Section of its Schedule.

[12] Appellate Body Report on *Canada – Dairy*, para. 87.
[13] Appellate Body Report on *US – FSC*, para. 136.
[14] Appellate Body Report on *US – FSC*, para. 137.
[15] Appellate Body Report on *US – FSC*, para. 141. This was confirmed in the Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras 192–195.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.2

12. In *Korea – Various Measures on Beef*, examining whether Korea's domestic support to its cattle industry was consistent with Articles 3, 6 and 7 of the *Agreement on Agriculture*, the Panel indicated, in a statement subsequently not reviewed by the Appellate Body:

> "It is, therefore, clear that Article 3 provides that support in favour of domestic producers (and here explicit reference is made to '*subject to* Article 6') cannot exceed the level of support provided for in a Member's schedule. So, when assessing the WTO compatibility of domestic support, two parameters are indicated: first the provisions of Article 6 which refer to the object of those same 'commitments' on domestic support; and second, Section I of Part IV of a Member's schedule."[16]

2. Article 3.3

13. With respect to Members' export subsidy commitments and related waivers, see also paragraphs 54–80 below.

14. In *US – FSC*, the Appellate Body explained the obligations set forth in Article 3.3 by distinguishing two distinct types of "commitments":

> "Under Article 3, Members have undertaken two different types of 'export subsidy commitments'. Under the first clause of Article 3.3, Members have made a commitment that they will not 'provide export subsidies listed in paragraph 1 of Article 9 in respect of the agricultural products or groups of products specified in Section II of Part IV of its Schedule in excess of the budgetary outlay and quantity commitments levels specified therein'. This is the commitment for *scheduled* agricultural products.
>
> . . .
>
> Under the second clause of Article 3.3, Members have committed *not* to provide *any* export subsidies, *listed in Article 9.1*, with respect to *unscheduled* agricultural products. This clause clearly also involves 'export subsidy commitments' within the meaning of Article 10.1. Our interpretation of this term is confirmed by the title of Article 9, which is '*Export Subsidy Commitments*'. Consistently with our reading of that term, Article 9.1 relates *both* to (1) the commitments made for *scheduled* agricultural products, under the first clause of Article 3.3, and to (2) the general prohibition, in the second clause of Article 3.3, against providing export subsidies listed in Article 9.1 to *unscheduled* agricultural products."[17]

15. The Appellate Body on *US – FSC* further stated that with regard to unscheduled products, Members are prohibited from providing any export subsidies, while in respect of scheduled agricultural products the "nature of the commitment made under the first clause of Article 3.3 is different":

> "With respect to *unscheduled* agricultural products, Members are *prohibited* under Article 3.3 from providing *any* export subsidies as listed in Article 9.1. Article 10.1 prevents the application of export subsidies which '*results in*, or which *threatens to lead to*, *circumvention*' of that prohibition. Members would certainly have 'found a way round', a way to 'evade', this prohibition if they could transfer, through tax exemptions, the very same economic resources that they are prohibited from providing in other forms under Articles 3.3 and 9.1. Thus, with respect to the *prohibition* against providing subsidies listed in Article 9.1 on *unscheduled* agricultural products, we believe that the FSC measure involves the application of export subsidies, *not* listed in Article 9.1, in a manner that, at the very least, '*threatens* to lead to circumvention' of that 'export subsidy commitment' in Article 3.3.
>
> With respect to *scheduled* agricultural products, the nature of the commitment made under the first clause of Article 3.3 is different. Members are not subject to a general prohibition against providing export subsidies as listed in Article 9.1; rather, there is a *limited authorization* for Members to provide such subsidies up to the level of the reduction commitments specified in their Schedule.
>
> . . .
>
> As regards *scheduled* products, when the specific reduction commitment levels have been reached, the *limited authorization* to provide export subsidies as listed in Article 9.1 is transformed, effectively, into a *prohibition* against the provision of those subsidies.
>
> . . .
>
> In our view, Members would have found 'a way round', a way to 'evade', their commitments under Articles 3.3 and 9.1, if they could transfer, through tax exemptions, the very same economic resources that they were, *at that time*, prohibited from providing through other methods under the first clause of Article 3.3 and under 9.1."[18]

PART III

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Market Access

1. Market access concessions contained in Schedules relate to bindings and reductions of tariffs, and to other market access commitments as specified therein.

[16] Panel Report on *Korea – Various Measures on Beef*, para. 803.
[17] Appellate Body Report on *US – FSC*, paras. 145–146.
[18] Appellate Body Report on *US – FSC*, paras. 150–152.

2. Members shall not maintain, resort to, or revert to any measures of the kind which have been required to be converted into ordinary customs duties[1], except as otherwise provided for in Article 5 and Annex 5.

(*footnote original*) [1] These measures include quantitative import restrictions, variable import levies, minimum import prices, discretionary import licensing, non-tariff measures maintained through state-trading enterprises, voluntary export restraints, and similar border measures other than ordinary customs duties, whether or not the measures are maintained under country-specific derogations from the provisions of GATT 1947, but not measures maintained under balance-of-payments provisions or under other general, non-agriculture-specific provisions of GATT 1994 or of the other Multilateral Trade Agreements in Annex 1A to the WTO Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. General

(a) Purpose of Article 4

16. In *Chile – Price Band System*, the Appellate Body explained the background of the negotiations which produced the text of Article 4, "which is the main provision of Part III of the *Agreement on Agriculture*", and indicated that Article 4 "is appropriately viewed as the legal vehicle for requiring the conversion into ordinary customs duties of certain market access barriers affecting imports of agricultural products":

> "[W]e turn now to Article 4, which is the main provision of Part III of the *Agreement on Agriculture*. As its title indicates, Article 4 deals with 'Market Access'.[19] During the course of the Uruguay Round, negotiators identified certain border measures which have in common that they restrict the volume or distort the price of imports of agricultural products. The negotiators decided that these border measures should be converted into ordinary customs duties, with a view to ensuring enhanced market access for such imports. Thus, they envisioned that ordinary customs duties would, in principle, become the only form of border protection. As ordinary customs duties are more transparent and more easily quantifiable than non-tariff barriers, they are also more easily compared between trading partners, and thus the maximum amount of such duties can be more easily reduced in future multilateral trade negotiations. The Uruguay Round negotiators agreed that market access would be improved – both in the short term and in the long term – through bindings and reductions of tariffs and minimum access requirements, which were to be recorded in Members' Schedules.
>
> Thus, Article 4 of the *Agreement on Agriculture* is appropriately viewed as the legal vehicle for requiring the conversion into ordinary customs duties of certain market access barriers affecting imports of agricultural products . . ."[20]

(b) Notification requirements

17. With respect to the notification requirements concerning tariff quotas and other quotas, see paragraph 116 below.[21]

2. Article 4.1

18. In *EC – Bananas III*, the Appellate Body upheld the Panel's finding that Article 4.1 cannot be interpreted so as to allow an inconsistency with GATT Article XIII of the European Communities import scheme for bananas. See paragraph 126 below.

3. Article 4.2

(a) "any measures which have been required to be converted into ordinary customs duties"

(i) Interpretation

Ordinary meaning in its context and in light of its object and purpose

19. In *Chile – Price Band System*, the Appellate Body interpreted the ordinary meaning of the phrase "measures which have been required to be converted into ordinary customs duties", in its context and in light of its object and purpose.[22] The Appellate Body first focussed on the present perfect tense in that phrase ("have been required") and considered that "Article 4.2 was drafted in the present perfect tense to ensure that measures that were required to be converted as a result of the Uruguay Round – but that had not been converted – could not be maintained, by virtue of that Article, from the date of the entry into force of the *WTO Agreement* on 1 January 1995". The Appellate Body therefore concluded that this phrase could not be interpreted as limiting the obligation "only to those measures which were *actually* converted, or were *requested* to be converted, into ordinary customs duties by the end of the Uruguay Round":

> "Article 4.2 of the *Agreement on Agriculture* should be interpreted in a way that gives meaning to the use of the present perfect tense in that provision – particularly in the light of the fact that most of the other obligations in the *Agreement on Agriculture* and in the other covered agreements are expressed in the present, and not in the present perfect, tense. In general, requirements expressed in the present perfect tense impose obligations that came into being in the past, but may continue

[19] (*footnote original*) Part III contains only one other provision, namely, Article 5, which provides for a special safeguard mechanism that may be used to derogate from the requirements of Article 4 when certain conditions are met. We will discuss Article 5 later in this section.

[20] Appellate Body Report on *Chile – Price Band System*, paras. 200–201.

[21] G/AG/2, pp. 2–4.

[22] See Section III.B.1 of the Chapter on the *DSU*.

to apply at present.[23] As used in Article 4.2, this temporal connotation relates to the date *by which* Members had to convert measures covered by Article 4.2 into ordinary customs duties, as well as to the date *from which* Members had to refrain from maintaining, reverting to, or resorting to, measures prohibited by Article 4.2. The conversion into ordinary customs duties of measures within the meaning of Article 4.2 began *during* the Uruguay Round multilateral trade negotiations, because ordinary customs duties that were to 'compensate' for and replace converted border measures were to be recorded in Members' draft WTO Schedules by the *conclusion* of those negotiations. These draft Schedules, in turn, had to be verified before the signing of the *WTO Agreement* on 15 April 1994. Thereafter, there was no longer an option to replace measures covered by Article 4.2 with ordinary customs duties in excess of the levels of previously bound tariff rates. Moreover, as of the date of entry into force of the *WTO Agreement* on 1 January 1995, Members are required not to 'maintain, revert to, or resort to' measures covered by Article 4.2 of the *Agreement on Agriculture*.

If Article 4.2 were to read 'any measures of the kind which *are* required to be converted', this would imply that if a Member – for whatever reason – had failed, by the end of the Uruguay Round negotiations, to convert a measure within the meaning of Article 4.2, it could, *even today*, replace that measure with ordinary customs duties in excess of bound tariff rates.[24] But, as Chile and Argentina have agreed, this is clearly not so. (footnote omitted) It seems to us that Article 4.2 was drafted in the present perfect tense to ensure that measures that were required to be converted as a result of the Uruguay Round – but were not converted – could not be maintained, by virtue of that Article, from the date of the entry into force of the *WTO Agreement* on 1 January 1995.

Thus, contrary to what Chile argues, giving meaning and effect to the use of the present perfect tense in the phrase 'have been required' does not suggest that the scope of the phrase 'any measures of the kind which have been required to be converted into ordinary customs duties' must be limited only to those measures which were *actually* converted, or were *requested* to be converted, into ordinary customs duties by the end of the Uruguay Round. Indeed, in our view, such an interpretation would fail to give meaning and effect to the word '*any*' and the phrase '*of the kind*', which are descriptive of the word 'measures' in that provision. A plain reading of these words suggests that the drafters intended to cover a broad category of measures. We do not see how proper meaning and effect could be accorded to the word 'any' and the phrase 'of the kind' in Article 4.2 if that provision were read to include only those specific measures that were singled out to be converted into ordinary customs duties by negotiating partners in the course of the Uruguay Round."[25]

Footnote 1

20. The Appellate Body on *Chile – Price Band System*, referred to the wording of footnote 1 to the *Agreement on Agriculture* as confirmation of its interpretation of the phrase "measures which have been required to be converted into ordinary customs duties" (see paragraph 19 above):

> "The wording of footnote 1 to the *Agreement on Agriculture* confirms our interpretation. The footnote imparts meaning to Article 4.2 by enumerating examples of 'measures of the kind which have been required to be converted', and which Members must not maintain, revert to, or resort to, from the date of the entry into force of the *WTO Agreement*. Specifically, and as both participants agree (footnote omitted), the use of the word 'include' in the footnote indicates that the list of measures is illustrative, not exhaustive. And, clearly, the existence of footnote 1 suggests that there will be 'measures of the kind which have been required to be converted' that were *not* specifically identified during the Uruguay Round negotiations. Thus, in our view, the illustrative nature of this list lends support to our interpretation that the measures covered by Article 4.2 are not limited only to those that were *actually* converted, or were requested to be converted, into ordinary customs duties during the Uruguay Round.
>
> Footnote 1 also refers to a residual category of 'similar border measures other than ordinary customs duties', which indicates that the drafters of the Agreement did not seek to identify all 'measures which have been required to be converted' during the Uruguay Round negotiations. The existence of this residual category confirms our interpretation that Article 4.2 covers more than merely the measures that had been specifically identified or challenged by other negotiating partners in the course of the Uruguay Round."[26]

Article 5 as context for Article 4.2 interpretation

21. The Appellate Body on *Chile – Price Band System* further indicated that the context of Article 4.2 confirms its interpretation (see paragraph 19 above). In this regard, the Appellate Body referred to Article 5.1 as an illustration that "where the drafters of the *Agreement on Agriculture* wanted to limit the application of a rule to measures that have *actually* been converted, they used specific language expressing that limitation":

---

[23] (*footnote original*) G. Leech and J. Svartvik, *A Communicative Grammar of English*, (Longman, 1979), paras 112–119. R. Quirk and S. Greenbaum, *A University Grammar of English*, (Longman, 1979), paras. 328–330.

[24] (*footnote original*) Bound tariffs could, however, be renegotiated pursuant to Article XXVIII of the GATT 1994.

[25] Appellate Body Report on *Chile – Price Band System*, paras. 206–208.

[26] Appellate Body Report on *Chile – Price Band System*, paras. 209–210.

"[T]he context of Article 4.2 confirms our interpretation. Article 5.1 of the *Agreement on Agriculture*, the only provision in addition to Article 4 that is included in Part III of that Agreement, specifies that a Member may, under certain conditions, impose a special safeguard on imports of an agricultural product 'in respect of which measures referred to in [Article 4.2] *have been converted* into an ordinary customs duty'. (emphasis added) In our view, the phrase 'have been required to be converted' in Article 4.2 has a broader connotation than the phrase 'have been converted' in Article 5.1.[27] Therefore, it is perfectly apt that Article 5.1 speaks of such special safeguards only with respect to those agricultural products for which measures covered by Article 4.2 'have been converted' – that is, have in fact already been converted – into ordinary customs duties. Article 5.1 illustrates that, where the drafters of the *Agreement on Agriculture* wanted to limit the application of a rule to measures that have *actually* been converted, they used specific language expressing that limitation."[28]

22. The Appellate Body on *Chile – Price Band System* further considered that Article 5 lends contextual support to its interpretation of Article 4.2 (see paragraph 19 above) since "the existence of a market access exemption in the form of a special safeguard provision under Article 5 implies that Article 4.2 should *not* be interpreted in a way that permits Members to maintain measures that a Member would not be permitted to maintain *but for* Article 5":

"Article 5, also found in Part III of the *Agreement on Agriculture* on 'Market Access', lends contextual support to our interpretation of Article 4.2. In our view, the existence of a market access exemption in the form of a special safeguard provision under Article 5 implies that Article 4.2 should *not* be interpreted in a way that permits Members to maintain measures that a Member would not be permitted to maintain *but for* Article 5, and, much less, measures that are even more trade-distorting than special safeguards. In particular, if Article 4.2 were interpreted in a way that allowed Members to maintain measures that operate in a way similar to a special safeguard within the meaning of Article 5 – but without respecting the conditions set out in that provision for invoking such measures – it would be difficult to see how proper meaning and effect could be given to those conditions set forth in Article 5.[29]"[30]

Subsequent practice

23. In *Chile – Price Band System*, Chile had argued that, in interpreting this Article 4.2 phrase, it was "highly relevant" that no country that had a price band system in place before the conclusion of the Uruguay Round had actually converted it into ordinary customs duties. The Appellate Body looked into the possibility that this practice could be considered "subsequent practice"[31] pursuant to Article 31(3)(b) of the *Vienna Convention* and therefore a practice relevant to the interpretation of Article 4.2. The Appellate Body referred to its definition of "subsequent practice" in its Report in *Japan – Alcoholic Beverages*[32] and noted that neither the Panel record nor the submissions of the parties suggested that there was a discernible pattern of acts or pronouncements implying an agreement among WTO Members on the interpretation of Article 4.2. The Appellate Body thus concluded that this practice of some Members alleged by Chile did not amount to a "subsequent practice" within the meaning of Article 31(3)(b) of the *Vienna Convention*.[33]

(ii) "converted"

24. In *Chile – Price Band System*, the Appellate Body looked at the meaning of "converted" in the phrase "any measures which have been required to be converted into ordinary customs duties" and concluded, on the basis of the dictionary meanings of "convert" and "converted" that those measures "had to be transformed into something they were not – namely, ordinary customs duties". In this case, Chile had argued that its price band system was not a measure of the kind which had been required to be converted, but rather a system for determining the level of the resulting ordinary customs duties. The Appellate Body considered that the "mere fact that ... measures result in the payment of duties does not exonerate a Member from the requirement not to maintain, resort to, or revert to those measures":

"Article 4.2 speaks of 'measures of the kind which have been required to be *converted* into ordinary customs duties'. The word 'convert' means 'undergo transformation'.[34] The word 'converted' connotes 'changed in their nature', 'turned into something different'.[35] Thus, 'measures which have been required to be converted into ordinary customs duties' had to be transformed into something they were not – namely, ordinary customs duties. The following example illustrates this point.

---

[27] (*footnote original*) In this context, we note that a special safeguard can be imposed only on those agricultural products for which a Member has reserved its right to do so in its Schedule.

[28] Appellate Body Report on *Chile – Price Band System*, para. 211.

[29] (*footnote original*)We note that Chile has not reserved, in it Schedule, the right to apply special safeguards. In response to questioning at the oral hearing, no participant suggested that the interpretation of Article 4.2 should be different depending on whether or not a Member reserved such a right.

[30] Appellate Body Report on *Chile – Price Band System*, para. 217.

[31] See Section III.B.1(iii)(c) of the Chapter on the *DSU*.

[32] "... a 'concordant, common and consistent' sequence of acts or pronouncements which is sufficient to establish a discernible pattern implying the agreement of the parties [to a treaty] regarding its interpretation." Appellate Body Report on *Japan – Alcoholic Beverages*, para. 107.

[33] Appellate Body Report on *Chile – Price Band System*, paras. 213–214.

[34] (*footnote original*) *The New Shorter Oxford Dictionary*, L. Brown (ed.) (Clarendon Press), 1993, Vol. I, p. 502.

[35] (*footnote original*) *Ibid.*

> The application of a 'variable import levy', or a 'minimum import price', as the terms are used in footnote 1, can result in the levying of a specific duty equal to the difference between a reference price and a target price, or minimum price. These resulting levies or specific duties take the same *form* as ordinary customs duties. However, the mere fact that a duty imposed on an import at the border is in the same *form* as an ordinary customs duty, does not mean that it is *not* a 'variable import levy' or a 'minimum import price'. Clearly, as measures listed in footnote 1, 'variable import levies' and 'minimum import prices' had to be *converted into* ordinary customs duties by the end of the Uruguay Round. The mere fact that such measures result in the payment of duties does not exonerate a Member from the requirement not to maintain, resort to, or revert to those measures."[36]

(iii) "ordinary customs duties"

25. In *Chile – Price Band System*, the Appellate Body reversed the Panel's definition of "ordinary customs duty". The Panel had found that "[a]ll 'ordinary' customs duties may . . . be said to take the form of *ad valorem* or specific duties (or combinations thereof)".[37] The Panel further found that the term "ordinary customs duty" has a "normative connotation".[38] The Appellate Body disagreed:

> "We do not agree with the Panel's reasoning that, necessarily, '[a]s a *normative* matter, . . . those scheduled duties always relate to either the value of the imported goods, in the case of *ad valorem* duties, or the volume of the imported goods, in the case of specific duties.'[39] (emphasis in original, underlining added) Indeed, the Panel came to this conclusion by interpreting the French and Spanish versions of the term 'ordinary customs duty' to mean something *different* from the ordinary meaning of the English version of that term. It is difficult to see how, in doing so, the Panel took into account the rule of interpretation codified in Article 33(4) of the *Vienna Convention* whereby 'when a comparison of the authentic texts discloses a difference of meaning . . ., the meaning which best *reconciles* the texts . . . shall be adopted.' (emphasis added).
>
> We also find it difficult to understand how the Panel could find 'normative' support for its reasoning by examining the Schedules of WTO Members. We have observed in a previous case that '[t]he ordinary meaning of the term "concessions" suggests that a Member may yield rights and grant benefits, but it cannot diminish its obligations'.[40] A Member's Schedule imposes obligations on the Member who has made the concessions. The Schedule of one Member, and even the scheduling practice of a number of Members, is not relevant in interpreting the meaning of a treaty provision, unless that practice amounts to 'subsequent practice in the application of the treaty' within the meaning of Article 31(3)(b) of the *Vienna Convention*.[41] In this case the Panel Report contains no support for the conclusion that the scheduling activity of WTO Members amounts to 'subsequent practice'.
>
> [N]ot each and every duty that is calculated on the basis of the *value* and/or *volume* of imports is necessarily an 'ordinary customs duty'. For example, in the case at hand, the *ad valorem* duty is calculated on the *value* of the imports. The calculation of the *specific* duty resulting from Chile's price band system is, on the other hand, based, not only on the difference between the lower threshold of the price band and the applicable reference price, but also on the *volume* per unit of the imports."[42]

26. The Appellate Body on *Chile – Price Band System* also disagreed and thus reversed the Panel's finding that the term "ordinary customs duty", as used in Article 4.2 of the *Agreement on Agriculture*, is to be understood as "referring to a customs duty which is not applied to factors of an exogenous nature":[43]

> "Surely Members will ordinarily take into account the interests of domestic consumers and domestic producers in setting their *applied* tariff rates at a certain level. In doing so, they will doubtless take into account factors such as world market prices and domestic price developments. These are *exogenous* factors, as the Panel used that term. According to the Panel, duties that are calculated on the basis of such *exogenous* factors are *not* ordinary customs duties. This would imply that such duties be *prohibited* under Article II:1(b) of the GATT unless recorded in the "other duties or charges" column

---

[36] Appellate Body Report on *Chile – Price Band System*, para. 216.

[37] The Panel found that "[a]s an *empirical* matter, we observe that Members, in regular practice, invariably express commitments in the ordinary customs duty column of their Schedules as *ad valorem* or specific duties, or combinations thereof. All 'ordinary' customs duties may therefore be said to take the form of ad valorem or specific duties (or combinations thereof)." Panel Report on *Chile – Price Band System*, para. 7.52.

[38] The Panel had found that "[a]s a *normative* matter, we observe that those scheduled duties always relate to either the value of the imported goods, in the case of *ad valorem* duties, or the volume of imported goods, in the case of specific duties." Panel Report on *Chile – Price Band System*, para. 7.52.

[39] (*footnote original*) *Ibid.*, para. 7.52.

[40] (*footnote original*) Appellate Body Report, *EC – Bananas III, supra*, footnote 58, para. 154. Panel Report in *United States Restrictions on Imports of Sugar*, adopted 22 June 1989, BISD 36S/331, para. 5.2.

[41] (*footnote original*) Appellate Body Report, *European Communities – Customs Classification of Certain Computer Equipment*, WT/DS62/AB/R, WT/DS67/AB/R, WT/DS68/AB/R, adopted 22 June 1998, DSR 1998:V, 1851, paras. 84, 90 and 93. See also our paras. 213–214 of this Report.

[42] Appellate Body Report on *Chile – Price Band System*, paras. 271, 272 and 274.

[43] The Panel had found that "for the purpose of Article II:1(b), first sentence, of GATT 1994 and Article 4.2 of the Agreement on Agriculture, an 'ordinary' customs duty, that is, a customs duty *senso strictu*, is to be understood as referring to a customs duty which is not applied on the basis of factors of an exogenous nature". Panel Report on *Chile – Price Band System*, para. 7.52.

of a Member's Schedule. We see no legal basis for such a conclusion.[44]"[45]

27. The Appellate Body on *Chile – Price Band System* further noted that "in examining Article 4.2 of the *Agreement on Agriculture*, the *second* sentence of Article II:1(b) of the *GATT 1994*, does *not* specify what form 'other duties or charges' must take to qualify as such within the meaning of that sentence":

> "We further note, in examining Article 4.2 of the *Agreement on Agriculture*, that the *second* sentence of Article II:1(b) of the GATT 1994, does *not* specify what form 'other duties or charges' must take to qualify as such within the meaning of that sentence. The Panel's own approach of reviewing Members' Schedules reveals that many, if not most, 'other duties or charges' are expressed in *ad valorem* and/or specific terms, which does not, of course, make them 'ordinary customs duties' under the first sentence of Article II:1(b)."[46]

28. The Appellate Body on *Chile – Price Band System*, pointed to Article II:2 of the *GATT 1994* and Annex 5 to the *Agreement on Agriculture* as contextual support for interpreting the term "ordinary customs duties":

> "As context for this phrase in Article 4.2 of the Agreement on Agriculture, we observe that Article II:2 of the GATT 1994 sets out examples of measures that do not qualify as either 'ordinary customs duties' or 'other duties or charges'. These measures include charges equivalent to internal taxes, anti-dumping and countervailing duties, and fees or other charges commensurate with the cost of services rendered. They too may be based on the value and/or volume of imports, and yet Article II:2 distinguishes them from 'ordinary customs duties' by providing that '[n]othing in [Article II] shall prevent any Member from imposing' them 'at any time on the importation of any product'.
>
> Contextual support for interpreting the term 'ordinary customs duties' also appears in Annex 5 to the *Agreement on Agriculture*. Annex 5, read together with the Attachment to Annex 5 ('*Guidelines for the Calculation of Tariff Equivalents for the Specific Purpose Specified in Paragraphs 6 and 10 of this Annex*'), contemplates the calculation of 'tariff equivalents' in a way that would result in ordinary customs duties 'expressed as *ad valorem* or specific rates'. We do not find an obligation in either of those provisions that would require Members to refrain from basing their duties on what the Panel calls 'exogenous factors'. Rather, all that is required is that 'ordinary customs duties' be expressed in the *form* of '*ad valorem* or specific rates'."[47]

Measure resulting in ordinary customs duties

29. In *Chile – Price Band System*, Argentina had argued before the Panel that Chile's price band system was a measure "of the kind which has been required to be converted into ordinary customs duties" and which, by the terms of Article 4.2 of the *Agreement on Agriculture*, Members are required not to maintain. Chile had refuted such an allegation and claimed that the duties resulting from its price band system were "ordinary customs duties" and that its price band system was merely a system for determining the level of those duties and, therefore, consistent with Article 4.2. The Appellate Body agreed with the Panel as regards the inconsistency of Chile's price band system with Article 4.2 (although not as regards the Panel's reasoning) and found that "the fact that the *duties* that result from the application of Chile's price band system take the same form as 'ordinary customs duties' does not imply that the underlying measure is consistent with Article 4.2 of the *Agreement on Agriculture*."[48]

(iv) Timing of the obligation

30. The Appellate Body on *Chile – Price Band System* concluded that "the obligation in Article 4.2 not to 'maintain, resort to, or revert to any measures of the kind which have been required to be converted into ordinary customs duties' applies from the date of the entry into force of the *WTO Agreement* – regardless of whether or not a Member converted any such measures into ordinary customs duties before the conclusion of the Uruguay Round".[49]

(b) Relation with Article XI of GATT and its *Ad Note*

31. The Panel on *Korea – Various Measures on Beef*, in a statement not reviewed by the Appellate Body, held with respect to a certain practice of the Korean state trading agency for beef imports:

> "[W]hen dealing with measures relating to agricultural products which should have been converted into tariffs or tariff-quotas, a violation of Article XI of GATT and its *Ad Note* relating to state-trading operations would necessarily constitute a violation of Article 4.2 of the *Agreement on Agriculture* and its footnote which refers to non-tariff measures maintained through state-trading enterprises."[50]

---

[44] (*footnote original*) We stated in *Argentina – Textiles and Apparel*, *supra*, footnote 55, para. 46, that "a tariff binding in a Member's Schedule provides an upper limit on the amount of duty that may be imposed, and a Member is permitted to apply a rate of duty that is less than that provided for in its Schedule." Thus, the fact that the "cap" (recorded in the "ordinary customs duty" column of a schedule) is a specific or an *ad valorem* duty does not mean that a Member will not apply a tariff at a lower rate, or that the rate it applies will not be based on what the Panel calls "*exogenous*" factors. Indeed, as we noted above, it is difficult to conceive that a Member would ever make changes to its applied tariff rate except based on *exogenous* factors such as the interests of domestic consumers or producers.

(c) Special treatment

32. With respect to the special treatment in connection with paragraph 2 of Article 4, see Article 5, Section VI below, and Annex 5, Section XXVII below.

4. Footnote 1

(a) "variable import levies"

33. In *Chile – Price Band System*, the Appellate Body, which overturned the Panel's interpretation of this term[51], noted that the "WTO Members have not chosen to define [this] 'term of art' in the *Agreement on Agriculture* or anywhere else in the *WTO Agreement*".[52], The Appellate Body concluded that a variable import duty requires the presence of both a formula causing automatic and continuous variability of duties and additional features that undermine the object and purpose of Article 4 because they include a lack of transparency and a lack of predictability in the level of duties that will result from such measures:

> "In examining the ordinary meaning of the term '*variable import levies*' as it appears in footnote 1, we note that a 'levy' is a duty, tax, charge, or other exaction usually imposed or raised by legal execution or process.[53] An 'import' levy is, of course, a duty assessed upon importation. A levy is 'variable' when it is 'liable to vary'.[54] This feature alone, however, is not conclusive as to what constitutes a 'variable import levy' within the meaning of footnote 1. An 'ordinary customs duty' could also fit this description. A Member may, fully in accordance with Article II of the GATT 1994, exact a duty upon importation and periodically change the rate at which it applies that duty (provided the changed rates remain *below* the tariff rates bound in the Member's Schedule).[55] This change in the *applied* rate of duty could be made, for example, through an act of a Member's legislature or executive at any time. Moreover, it is clear that the term 'variable import levies' as used in footnote 1 must have a meaning different from 'ordinary customs duties', because 'variable import levies' must be *converted into* 'ordinary customs duties'. Thus, the mere fact that an import duty can be varied cannot, alone, bring that duty within the category of 'variable import levies' for purposes of footnote 1.
>
> To determine *what kind* of variability makes an import levy a 'variable import levy', we turn to the immediate context of the other words in footnote 1. The term 'variable import levies' appears after the introductory phrase '[t]hese *measures* include'. Article 4.2 – to which the footnote is attached – also speaks of '*measures*'. This suggests that at least one feature of 'variable import levies' is the fact that the *measure* itself – as a mechanism – must impose the *variability* of the duties. Variability is inherent in a measure if the measure incorporates a scheme or formula that causes and ensures that levies change automatically and continuously. Ordinary customs duties, by contrast, are subject to discrete changes in applied tariff rates that occur independently, and unrelated to such an underlying scheme or formula. The level at which ordinary customs duties are applied can be *varied* by a legislature, but such duties will not be automatically and continuously *variable*. To vary the applied rate of duty in the case of ordinary customs duties will always require *separate* legislative or administrative action, whereas the ordinary meaning of the term 'variable' implies that *no* such action is required.
>
> However, in our view, the presence of a formula causing automatic and continuous variability of duties is a *necessary,* but by no means a *sufficient,* condition for a particular measure to be a 'variable import levy' within the meaning of footnote 1. *(footnote omitted)* 'Variable import levies' have additional features that undermine the object and purpose of Article 4, which is to achieve improved market access conditions for imports of agricultural products by permitting only the application of ordinary customs duties. These additional features include a lack of transparency and a lack of predictability in the level of duties that will result from such measures. This lack of transparency and this lack of predictability are liable to restrict the volume of imports. . . . an exporter is less likely to ship to a market if that exporter does not know and cannot reasonably predict what the amount of duties will be. (i) This lack of transparency and predictability will also contribute to distorting the prices of imports by impeding the transmission of international prices to the domestic market."[56]

34. As regards the question whether a measure ceases to be similar to a "variable import levy" because it is subject to a tariff cap, see paragraphs 38–39 below.

(b) "minimum import prices"

35. In *Chile – Price Band System*, unlike with the definition of "variable import levies" (see paragraph 33 above), the Appellate Body did not overturn the Panel's interpretation of the term "minimum import price" and

---

[51] The Panel had concluded that it could not develop an interpretation of the term "variable import levies" solely on the basis of the methods of interpretation codified in Article 31 of the *Vienna Convention*. and decided, therefore, to have recourse to "supplementary means of interpretation" within the meaning of Article 32 of that Convention. This led to the Panel's identification of what it described as "fundamental characteristics" of "variable import levies". Panel Report on *Chile – Price Band System*, paras. 7.35–7.36. The Appellate Body, nevertheless, upheld the Panel's finding, in para. 7.47 of the Panel Report, that Chile's price band system is a "border measure similar to 'variable import levies' and 'minimum import prices' within the meaning of footnote 1 and Article 4.2 of the *Agreement on Agriculture*". Appellate Body Report on *Chile – Price Band System*, para. 262.

[52] Appellate Body Report on *Chile – Price Band System*, para. 229.

[53] (*footnote original*) *The New Shorter Oxford English Dictionary*, *supra*, footnote 190, p. 1574.

[54] (*footnote original*) *Ibid.*, p. 3547.

[55] (*footnote original*) Appellate Body Report, *Argentina – Textiles and Apparel*, *supra*, footnote 55, para. 46.

[56] Appellate Body Report on *Chile – Price Band System*, paras. 232–234.

simply noted that the parties did not disagree with it.[57] The Appellate Body, after indicating that the "term 'minimum import price' refers generally to the lowest price at which imports of a certain product may enter a Member's domestic market" and that "no definition has been provided by the drafters of the *Agreement on Agriculture*", quoted the Panel's description of "minimum import prices" as follows:

> "The term 'minimum import price' refers generally to the lowest price at which imports of a certain product may enter a Member's domestic market. Here, too, no definition has been provided by the drafters of the *Agreement on Agriculture*. However, the Panel described 'minimum import prices' as follows:
>
> > '[these] schemes generally operate in relation to the actual transaction value of the imports. If the price of an individual consignment is below a specified minimum import price, an additional charge is imposed corresponding to the difference.[58]'
>
> The Panel also said that minimum import prices 'are generally not dissimilar from variable import levies in many respects, including in terms of their protective and stabilization effects, but that their mode of operation is generally less complicated.'[59] The main difference between minimum import prices and variable import levies is, according to the Panel, that 'variable import levies are generally based on the difference between the *governmentally determined threshold* and the lowest world market offer price for the product concerned, while minimum import price schemes generally operate in relation to the *actual transaction value* of the imports.'[60] (emphasis added)
>
> . . . the participants said they do not object to the Panel's definition of a 'minimum import price'. . ."[61]

(c) "similar border measures"

(i) Concept of similarity

36. In *Chile – Price Band System*, the Appellate Body agreed with the Panel's definition of the term "similar" as "having a resemblance or likeness", "of the same nature or kind", and "having characteristics in common". The Appellate Body, however, disagreed with the Panel's emphasis on the degree to which measures share characteristics of a "fundamental" nature.[62] The Appellate Body found that the appropriate approach to determine similarity was to ask "whether two or more things have likeness or resemblance sufficient to be similar to each other". The Appellate Body further considered that, for a measure to be "similar" to a border measure, it must have "sufficient 'resemblance or likeness to', or be 'of the same nature or kind' as, *at least one* of the specific categories of measures listed in footnote 1":

> "We agree with the first part of the Panel's definition of the term 'similar' as 'having a resemblance or likeness', 'of the same nature or kind', and 'having characteristics in common'.[63] However, in our view, the Panel went unnecessarily far in focusing on the degree to which two measures share characteristics of a 'fundamental' nature. We see no basis for determining similarity by relying on characteristics of a 'fundamental' nature. The Panel seems to substitute for the task of defining the term 'similar' that of defining the term 'fundamental'. This merely complicates matters, because it raises the question of how to distinguish 'fundamental' characteristics from those of a *less than* 'fundamental' nature. The better and appropriate approach is to determine similarity by asking the question whether two or more things have likeness or resemblance sufficient to be similar to each other. In our view, the task of determining whether something is similar to something else must be approached on an empirical basis.
>
> . . . To be 'similar', Chile's price band system – in its specific factual configuration – must have, to recall the dictionary definitions we mentioned, sufficient 'resemblance or likeness to', or be 'of the same nature or kind' as, *at least one* of the specific categories of measures listed in footnote 1."[64]

37. The Appellate Body on *Chile – Price Band System* stressed that "any examination of similarity presupposes a *comparative* analysis" and therefore, to determine whether a measure is "similar" within the meaning of footnote 1, it is necessary to "identify *with which categories* that [measure] must be compared".[65]

(ii) Relevance of tariff caps in the similarity analysis

38. In *Chile – Price Band System*, Chile had argued that the Panel had failed to take proper account of the fact that the total amount of duties that may be levied as a result of Chile's price band system was "capped" at

---

[57] Appellate Body Report on *Chile – Price Band System*, para. 238.
[58] (*original footnote*) Panel Report, para. 7.36(e).
[59] (*footnote original*) *Ibid.*
[60] (*footnote original*) *Ibid.*
[61] Appellate Body Report on *Chile – Price Band System*, paras. 236–238.
[62] The Panel's reasoning was the following: "First, as regards the term 'similar', dictionaries define this term as 'having a resemblance or likeness', 'of the same nature or kind', and 'having characteristics in common'. Two measures are in our view 'similar' if they share some, but not all, of their fundamental characteristics. If two measures share all of their fundamental characteristics, they are identical rather than similar. A border measure should therefore have *some* fundamental characteristics in common with one or more of the measures explicitly listed in footnote 1. It is then a matter of weighing the evidence to determine whether the characteristics are sufficiently close to be considered 'similar'." Panel Report on *Chile – Price Band System*, para. 7.26.
[63] (*footnote original*) *The New Shorter Oxford English Dictionary*, *supra*, [], p. 2865.
[64] Appellate Body Report on *Chile – Price Band System*, paras. 226–227.
[65] Appellate Body Report on *Chile – Price Band System*, para. 228. In this case, Chile's price band system was compared to and found to be sufficiently similar to a "variable import levy" and "minimum import price" to make it a "similar border measure". Para. 252.

the level of the tariff rate of 31.5 per cent *ad valorem* bound in Chile's Schedule. The Appellate Body thus considered whether Chile's price band system ceases to be similar to a "variable import levy" because it is subject to a cap. The Appellate Body concluded:

> "[W]e find nothing in Article 4.2 to suggest that a measure prohibited by that provision would be rendered consistent with it if applied with a cap. Before the conclusion of the Uruguay Round, a measure could be recognized as a 'variable import levy' even if the products to which the measure applied were subject to tariff bindings.[66] And, there is nothing in the text of Article 4.2 to indicate that a measure, which was recognized as a 'variable import levy' before the Uruguay Round, is exempt from the requirements of Article 4.2 simply because tariffs on some, or all, of the products to which that measure *now* applies were bound as a result of the Uruguay Round."[67]

39. The Appellate Body on *Chile – Price Band System*, found support for this view in the context of Article 4.2. which includes the *Guidelines for the Calculation of Tariff Equivalents for the Specific Purpose Specified in Paragraph 6 and 10 of this Annex ("Guidelines")*, which are an Attachment to *Annex 5 on Special Treatment with respect to Paragraph 2 of Article 4.* and Articles II and XI of the GATT 1994.

> "The context of Article 4.2 lends support to this interpretation. That context includes the Guidelines for the Calculation of Tariff Equivalents for the Specific Purpose Specified in Paragraph 6 and 10 of this Annex ('Guidelines'), which are an Attachment to Annex 5 on Special Treatment with respect to Paragraph 2 of Article 4. Both the Attachment and the Annex form part of the Agreement on Agriculture. Paragraph 6 of the Guidelines[68] envisages that tariff equivalents resulting from conversion of measures within the meaning of Article 4.2 may exceed previous bound rates. This implies that, even if the product to which that measure applied was in fact subject to a tariff binding before the Uruguay Round, conversion of that measure may nevertheless have been required. Therefore, a measure cannot be excluded per se from the scope of Article 4.2 simply because the products to which that measure applies are subject to a tariff binding.
>
> Relevant context can also be found in Articles II and XI of the GATT 1994. If Members were free to apply a measure with a 'cap' – which, in the absence of that 'cap', would be a prohibited 'variable import levy' – Article 4.2 would, in our view, add little to the longstanding requirements of Articles II:1(b) and XI:1 of the GATT 1947. In fact, Chile concedes that the scope of measures prohibited by Article 4.2 extends beyond the tariffs in excess of bound rates that are prohibited by Article II and the 'restrictions other than taxes, duties and charges' that are prohibited by Article XI:1. (*footnote omitted*) In any event, it is difficult to see why Uruguay Round negotiators would 'compensate' Members for converting prohibited measures by permitting them to raise tariffs on certain products, while permitting those Members to retain those measures and, at the same time, impose those higher tariffs on those same products. It is not clear why, if this were so, a Member would ever have converted a measure. All that a Member would have had to do to comply with Article 4.2 would have been to adopt a tariff binding – even at a higher level – on the products covered by the original measure. Had this been the intention of the Uruguay Round negotiators, there would have been no need to list price-based measures in footnote 1 among the categories of measures prohibited by Article 4.2. The drafters of the *Agreement on Agriculture* simply could have adopted a requirement that all tariffs on agricultural products be bound."[69]

(iii) Common features of border measures

40. In *Chile – Price Band System*, the Appellate Body noted that trade distortive objectives and effects are common to all border measures:

> "[W]e note that *all* of the border measures listed in footnote 1 have in common the object and effect of restricting the volumes, and distorting the prices, of imports of agricultural products in ways different from the ways that ordinary customs duties do. Moreover, *all* of these measures have in common also that they disconnect domestic prices from international price developments, and thus impede the transmission of world market prices to the domestic market."[70]

(d) Relation with Article 4.2

41. The Appellate Body on *Chile – Price Band System*, referred to the wording of footnote 1 to the *Agreement on Agriculture* as confirmation of its interpretation[71] of the phrase "measures which have been required to be converted into ordinary customs duties" of Article 4.2. See paragraph 20 above.

---

[66] (*footnote original*) In this respect, we note that, as illustrated by documents from GATT 1947, Contracting Parties to GATT 1947 regarded import levies which were applied to products subject to a tariff binding as variable import levies in spite of the existence of that binding:

> The General Agreement contains no provision on the use of "variable import levies". It is obvious that *if any such duty or levy is imposed on a 'bound' item*, the rate must not be raised in excess of what is permitted by Article II . . . . (emphasis added)

See Note by the Executive Secretary on "Questions relating to Bilateral Agreements, discrimination and Variable Taxes", dated 21 November 1961, GATT document L/1636, paras. 7–8.

[67] Appellate Body Report on *Chile – Price Band System*, para. 254.

[68] (*footnote original*) Paragraph 6 provides:

> Where a tariff equivalent resulting from these guidelines is negative or lower than the *current bound rate*, the initial tariff equivalent may be established at the *current bound rate* or on the basis of national offers for that product. (emphasis added)

[69] Appellate Body Report on *Chile – Price Band System*, paras. 255–256.

[70] Appellate Body Report on *Chile – Price Band System*, para. 227.

[71] For this interpretation, see para. 19. of this Chapter.

C. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. GATT 1994

42. The Appellate Body on *Chile – Price Band System*, in examining the concept of ordinary customs duties under Article 4.2 of the *Agreement on Agriculture*, referred to Article II:1(b) of the *GATT 1994*. See paragraphs 24–28 above. The Appellate Body also indicated that if it were to find that Chile's price band system was inconsistent with Article 4.2 of the *Agreement of Agriculture*, it would not need to make a separate finding on whether Chile's price band system also results in a violation of Article II:1(b) of the *GATT 1994* to resolve this dispute.[72]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Special Safeguard Provisions

1. Notwithstanding the provisions of paragraph 1(b) of Article II of GATT 1994, any Member may take recourse to the provisions of paragraphs 4 and 5 below in connection with the importation of an agricultural product, in respect of which measures referred to in paragraph 2 of Article 4 of this Agreement have been converted into an ordinary customs duty and which is designated in its Schedule with the symbol "SSG" as being the subject of a concession in respect of which the provisions of this Article may be invoked, if:

(a) the volume of imports of that product entering the customs territory of the Member granting the concession during any year exceeds a trigger level which relates to the existing market access opportunity as set out in paragraph 4; or, but not concurrently:

(b) the price at which imports of that product may enter the customs territory of the Member granting the concession, as determined on the basis of the c.i.f. import price of the shipment concerned expressed in terms of its domestic currency, falls below a trigger price equal to the average 1986 to 1988 reference price[2] for the product concerned.

(*footnote original*) [2] The reference price used to invoke the provisions of this subparagraph shall, in general, be the average c.i.f. unit value of the product concerned, or otherwise shall be an appropriate price in terms of the quality of the product and its stage of processing. It shall, following its initial use, be publicly specified and available to the extent necessary to allow other Members to assess the additional duty that may be levied.

2. Imports under current and minimum access commitments established as part of a concession referred to in paragraph 1 above shall be counted for the purpose of determining the volume of imports required for invoking the provisions of subparagraph 1(a) and paragraph 4, but imports under such commitments shall not be affected by any additional duty imposed under either subparagraph 1(a) and paragraph 4 or subparagraph 1(b) and paragraph 5 below.

3. Any supplies of the product in question which were *en route* on the basis of a contract settled before the additional duty is imposed under subparagraph 1(a) and paragraph 4 shall be exempted from any such additional duty, provided that they may be counted in the volume of imports of the product in question during the following year for the purposes of triggering the provisions of subparagraph 1(a) in that year.

4. Any additional duty imposed under subparagraph 1(a) shall only be maintained until the end of the year in which it has been imposed, and may only be levied at a level which shall not exceed one third of the level of the ordinary customs duty in effect in the year in which the action is taken. The trigger level shall be set according to the following schedule based on market access opportunities defined as imports as a percentage of the corresponding domestic consumption[3] during the three preceding years for which data are available:

(*footnote original*) [3] Where domestic consumption is not taken into account, the base trigger level under subparagraph 4(a) shall apply.

(a) where such market access opportunities for a product are less than or equal to 10 percent, the base trigger level shall equal 125 percent;

(b) where such market access opportunities for a product are greater than 10 percent but less than or equal to 30 percent, the base trigger level shall equal 110 percent;

(c) where such market access opportunities for a product are greater than 30 percent, the base trigger level shall equal 105 percent.

In all cases the additional duty may be imposed in any year where the absolute volume of imports of the product concerned entering the customs territory of the Member granting the concession exceeds the sum of (*x*) the base trigger level set out above multiplied by the average quantity of imports during the three preceding years for which data are available and (*y*) the absolute volume change in domestic consumption of the product concerned in the most recent year for which data are available compared to the preceding year, provided that the trigger level shall not be less than 105 percent of the average quantity of imports in (*x*) above.

5. The additional duty imposed under subparagraph 1(b) shall be set according to the following schedule:

[72] Appellate Body Report on Chile – Price Band Systems, para. 190.

(a) if the difference between the c.i.f. import price of the shipment expressed in terms of the domestic currency (hereinafter referred to as the "import price") and the trigger price as defined under that subparagraph is less than or equal to 10 percent of the trigger price, no additional duty shall be imposed;

(b) if the difference between the import price and the trigger price (hereinafter referred to as the "difference") is greater than 10 percent but less than or equal to 40 percent of the trigger price, the additional duty shall equal 30 percent of the amount by which the difference exceeds 10 percent;

(c) if the difference is greater than 40 percent but less than or equal to 60 percent of the trigger price, the additional duty shall equal 50 percent of the amount by which the difference exceeds 40 percent, plus the additional duty allowed under (b);

(d) if the difference is greater than 60 percent but less than or equal to 75 percent, the additional duty shall equal 70 percent of the amount by which the difference exceeds 60 percent of the trigger price, plus the additional duties allowed under (b) and (c);

(e) if the difference is greater than 75 percent of the trigger price, the additional duty shall equal 90 percent of the amount by which the difference exceeds 75 percent, plus the additional duties allowed under (b), (c) and (d).

6. For perishable and seasonal products, the conditions set out above shall be applied in such a manner as to take account of the specific characteristics of such products. In particular, shorter time periods under subparagraph 1(a) and paragraph 4 may be used in reference to the corresponding periods in the base period and different reference prices for different periods may be used under subparagraph 1(b).

7. The operation of the special safeguard shall be carried out in a transparent manner. Any Member taking action under subparagraph 1(a) above shall give notice in writing, including relevant data, to the Committee on Agriculture as far in advance as may be practicable and in any event within 10 days of the implementation of such action. In cases where changes in consumption volumes must be allocated to individual tariff lines subject to action under paragraph 4, relevant data shall include the information and methods used to allocate these changes. A Member taking action under paragraph 4 shall afford any interested Members the opportunity to consult with it in respect of the conditions of application of such action. Any Member taking action under subparagraph 1(b) above shall give notice in writing, including relevant data, to the Committee on Agriculture within 10 days of the implementation of the first such action or, for perishable and seasonal products, the first action in any period. Members undertake, as far as practicable, not to take recourse to the provisions of subparagraph 1(b) where the volume of imports of the products concerned are declining. In either case a Member taking such action shall afford any interested Members the opportunity to consult with it in respect of the conditions of application of such action.

8. Where measures are taken in conformity with paragraphs 1 through 7 above, Members undertake not to have recourse, in respect of such measures, to the provisions of paragraphs 1(a) and 3 of Article XIX of GATT 1994 or paragraph 2 of Article 8 of the Agreement on Safeguards.

9. The provisions of this Article shall remain in force for the duration of the reform process as determined under Article 20.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Article 5.1(b)

43. In *EC – Poultry*, Brazil argued that the European Communities had failed to comply with Article 5 of the *Agreement on Agriculture* in the implementation of the special safeguard measures for imports of poultry meat outside tariff quotas. The European Communities contested the finding of the Panel that the phrase in Article 5.1(b) "on the basis of the c.i.f. import price" referred to the c.i.f. price *plus* import duties. Reversing the Panel's findings on Article 5.1(b), the Appellate Body first explored the circumstances in which this specific question could become relevant and then went on to distinguish between an entry into the customs territory on the one hand, and an entry into the domestic market on the other:

> "This dispute has no practical significance if both the c.i.f. import price and the c.i.f. import price plus customs duties fall above or below the trigger price. If both prices are above the trigger price, then additional duties cannot be imposed. And, if both prices fall below the trigger price, then additional duties may be imposed regardless of which definition of the relevant import price is adopted. However, the practical significance of this dispute becomes apparent whenever the trigger price falls between the other two prices, that is, when the trigger price is greater than the c.i.f. import price but smaller than the c.i.f. import price plus customs duties. . . . [I]f the relevant price is defined as the c.i.f. import price plus customs duties, additional duties may not be imposed since the relevant price is well above the trigger price. If, on the other hand, it is defined as the c.i.f. import price only (that is, without customs duties), additional duties may be imposed because the relevant price is below the trigger price. Thus, to adopt one definition, rather than

another, will determine whether or not an importing Member may impose additional safeguard duties.

. . .

The relevant import price in Article 5.1(b) is described as 'the price at which imports of that product *may enter the customs territory* of the Member granting the concession, as determined on the basis of the c.i.f. import price of the shipment concerned'. It is noteworthy that the drafters of the *Agreement on Agriculture* chose to use as the relevant import price the entry price into the *customs territory*, rather than the entry price into the *domestic market*. This suggests that they had in mind the point of time *just before* the entry of the product concerned into the customs territory, and certainly before entry into the domestic market, of the importing Member. The ordinary meaning of these terms in Article 5.1(b) supports the view that the 'price at which that product may enter the customs territory' of the importing Member should be construed to mean just that – the price at which the product may enter the *customs territory*, not the price at which the product may enter the *domestic market* of the importing Member. And that price is a price that does not include customs duties and internal charges. It is upon entry of a product into the customs territory, but before the product enters the domestic market, that the obligation to pay customs duties and internal charges accrues."[73]

44. The Appellate Body on *EC – Poultry* then noted that the *Agreement on Agriculture* does not define the term "c.i.f. import price", but considered the customary usage of this term in international trade:

"Article 5.1(b) also states that the relevant import price is to be 'as determined *on the basis of* the c.i.f. import price of the shipment concerned'. (emphasis added) The Panel interprets this phrase to mean 'that the market entry price is something that has to be constructed using the c.i.f. price as one of the parameters.'[74] We disagree. In the light of our construction of the preceding phrase 'the price at which imports of the product may enter the customs territory of the Member granting the concession', we conclude that the phrase 'as determined *on the basis of* the c.i.f. import price of the shipment concerned' in Article 5.1(b) refers simply to the c.i.f. price without customs duties and taxes. There is no definition of the term 'c.i.f. import price' in the *Agreement on Agriculture* or in any of the other covered agreements. However, in customary usage in international trade, the c.i.f. import price does not include any taxes, customs duties, or other charges that may be imposed on a product by a Member upon entry into its customs territory.[75] We think it significant also that ordinary customs duties are not mentioned as a component of the relevant import price in the text of Article 5.1(b). Article 5.1(b) does not state that the relevant import price is 'the c.i.f. price plus ordinary customs duties'. Accordingly, to read the inclusion of customs duties into the definition of the c.i.f. import price in Article 5.1(b) would require us to read words into the text of that provision that simply are not there."[76]

45. The Appellate Body on *EC – Poultry* found support for its finding referenced in paragraph 44 above in the context of Article 5.1(b):

"This reading of the text of Article 5.1(b) is supported by our reading of the context of that provision in accordance with Article 31 of the *Vienna Convention*, which specifies that the ordinary meaning of the terms of a treaty should be interpreted in their context.

We look first to the rest of Article 5.1. In considering when additional special safeguard duties under Article 5.1(b) may be imposed, the relevant import price must be compared with a trigger price. According to Article 5.1(b), this trigger price is 'equal to the average 1986 to 1988 reference price for the product concerned'. Footnote 2 to Article 5.1(b) states:

> The reference price used to invoke the provisions of this subparagraph shall, in general, be the average c.i.f. unit value of the product concerned, or otherwise shall be an appropriate price in terms of the quality of the product and its stage of processing. It shall, following its initial use, be publicly specified and available to the extent necessary to allow other Members to assess the additional duty that may be levied.

Thus, the reference price with which the relevant price is compared under Article 5.1 does *not* include ordinary customs duties. It is simply the average c.i.f. import price of the product concerned during the reference period, 1986–1988. Given this definition of the reference price, it could not have been the intention of the drafters to compare a c.i.f. price exclusive of customs duties for the reference period with a c.i.f. price inclusive of such duties today.

Paragraph 5 of Article 5 is also part of the context of Article 5.1(b). This provision establishes a link between the amount of the additional duty to be imposed and the difference between the c.i.f. import price of the shipment and the trigger price. According to the schedule contained in paragraph 5, when the difference between the c.i.f. import price of the shipment and the trigger price is not greater than 10 per cent, no additional duty shall be imposed. When the difference is greater than 10 per

---

[73] Appellate Body Report on *EC – Poultry*, paras. 143 and 145.

[74] (*footnote original*) Panel Report, para. 278.

[75] (*footnote original*) We note that the *Incoterms 1990* of the International Chamber of Commerce explains what the acronym "c.i.f." means "cost, insurance and freight", but does not give a definition of "c.i.f. import price". However, according to customary usage in international trade, c.i.f. import price, or simply c.i.f. price, is equal to the price of the product in the exporting country plus additional costs, insurance and freight to the importing country. This definition may also be inferred from paragraph 2 of the *Attachment to Annex 5 of the Agreement on Agriculture*.

[76] Panel Report on *EC – Poultry*, para. 146.

cent, additional duties may be imposed. The amount of the additional safeguard duties increases as the difference in the two prices increases. We see no reference in paragraph 5 to 'c.i.f. import price *plus* ordinary customs duties'. The price used to determine when the special safeguard may be triggered and the price used to calculate the amount of the additional duties must be one and the same."[77]

46. The Appellate Body on *EC – Poultry*, after making the findings referenced in paragraphs 43–45 above, considered what it termed two "anomalies" which would arise under the interpretation given to Article 5.1(b) by the Panel:

"Certain anomalies would arise from the interpretation adopted by the majority of the Panel. One of these anomalies was cited in the opinion of the dissenting member of the Panel.[78] If tariffication of non-tariff barriers on a certain product took the form of specific duties that were greater than the trigger price, then an importing Member may never be able to invoke Article 5.1(b). The truth of this observation is evident from the fact that the c.i.f. import price plus customs duties may never fall below the trigger price. This consequence is not limited to the case of specific duties that exceed the trigger price. It could also occur in cases where tariffication takes the form of *ad valorem* duties. We know that tariffication has resulted in tariffs which are, in a large number of cases, very high. The probability is strong, therefore, that the *ad valorem* duties could exceed the percentage decrease in the c.i.f. import price by a substantial margin. In such cases, the decrease in the c.i.f. price would have to be very deep before the relevant import price would fall below the trigger price. Thus, the provisions of Article 5.1(b) would not be operational in many cases. It is doubtful that this was intended by the drafters of the 'Special Safeguard Provisions'.

Another anomaly that would arise from defining the relevant import price as the c.i.f. import price *plus* ordinary customs duties would be that the right of Members to invoke the provisions of Article 5.1(b) would depend on the level of tariffs resulting from tariffication. Faced with a certain decline in the c.i.f. price – say, 20 per cent – some Members would find themselves in a situation where they could not invoke the price safeguard; others would have the right to do so. The first category would comprise those Members with a relatively high level of tariffied duties; the second would be those with a relatively moderate level. Thus, the rights of Members would ultimately depend on the level of their tariffied duties. It is doubtful, too, that this was intended by the drafters of the 'Special Safeguard Provisions'."[79]

47. As a result of the reasoning referenced in paragraphs 43–46 above, the Appellate Body in *EC – Poultry* concluded:

"[W]e interpret the 'price at which the product concerned may enter the customs territory of the Member granting the concession, as determined on the basis of the c.i.f. import price' in Article 5.1(b) as the c.i.f. import price not including ordinary customs duties."[80]

2. Article 5.5

48. Regarding Article 5.5, in *EC – Poultry*, the Appellate Body examined whether it was permissible for the importing Member to offer the importer a choice between the use of the c.i.f price of the shipment as provided in that provision, and another method of calculation which departs from this principle. Under the relevant regulation, the European Communities calculated a periodic representative price, based, *inter alia*, in part on prices in third-country markets and prices at various stages of marketing within the European Communities. The Commission, in its determination of the trigger price for the purposes of the special safeguard provision, would use this "representative price", unless the importer specifically requested the use of the c.i.f. price, conditional upon the presentation of certain documents and the lodging of a security by the importer. The Appellate Body held as follows:

"[N]either the text nor the context of Article 5.5 of the *Agreement on Agriculture* permits us to conclude that the additional duties imposed under the special safeguard mechanism in Article 5 of the *Agreement on Agriculture* may be established by any method other than a comparison of the *c.i.f. price of the shipment* with the trigger price."[81]

3. Article 5.7

(a) Notification requirements

49. With respect to notification requirements concerning the special safeguard provisions, see paragraphs 116–118 below.

PART IV

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Domestic Support Commitments

1. The domestic support reduction commitments of each Member contained in Part IV of its Schedule shall apply to all of its domestic support measures in favour of

[77] Appellate Body Report on *EC – Poultry*, paras. 147–150.
[78] (*footnote original*) Panel Report, para. 291.
[79] Appellate Body Report on *EC – Poultry*, paras. 151–152.
[80] Appellate Body Report on *EC – Poultry*, para. 153.
[81] Appellate Body Report on *EC – Poultry*, para. 168.

agricultural producers with the exception of domestic measures which are not subject to reduction in terms of the criteria set out in this Article and in Annex 2 to this Agreement. The commitments are expressed in terms of Total Aggregate Measurement of Support and "Annual and Final Bound Commitment Levels".

2. In accordance with the Mid-Term Review Agreement that government measures of assistance, whether direct or indirect, to encourage agricultural and rural development are an integral part of the development programmes of developing countries, investment subsidies which are generally available to agriculture in developing country Members and agricultural input subsidies generally available to low-income or resource-poor producers in developing country Members shall be exempt from domestic support reduction commitments that would otherwise be applicable to such measures, as shall domestic support to producers in developing country Members to encourage diversification from growing illicit narcotic crops. Domestic support meeting the criteria of this paragraph shall not be required to be included in a Member's calculation of its Current Total AMS.

3. A Member shall be considered to be in compliance with its domestic support reduction commitments in any year in which its domestic support in favour of agricultural producers expressed in terms of Current Total AMS does not exceed the corresponding annual or final bound commitment level specified in Part IV of the Member's Schedule.

4. (a) A Member shall not be required to include in the calculation of its Current Total AMS and shall not be required to reduce:

(i) product-specific domestic support which would otherwise be required to be included in a Member's calculation of its Current AMS where such support does not exceed 5 percent of that Member's total value of production of a basic agricultural product during the relevant year; and

(ii) non-product-specific domestic support which would otherwise be required to be included in a Member's calculation of its Current AMS where such support does not exceed 5 percent of the value of that Member's total agricultural production.

(b) For developing country Members, the *de minimis* percentage under this paragraph shall be 10 percent.

5. (a) Direct payments under production-limiting programmes shall not be subject to the commitment to reduce domestic support if:

(i) such payments are based on fixed area and yields; or

(ii) such payments are made on 85 percent or less of the base level of production; or

(iii) livestock payments are made on a fixed number of head.

(b) The exemption from the reduction commitment for direct payments meeting the above criteria shall be reflected by the exclusion of the value of those direct payments in a Member's calculation of its Current Total AMS.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Notification requirements

50. With respect to the notification requirements concerning domestic support, see paragraphs 116–118 below.

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
General Disciplines on Domestic Support

1. Each Member shall ensure that any domestic support measures in favour of agricultural producers which are not subject to reduction commitments because they qualify under the criteria set out in Annex 2 to this Agreement are maintained in conformity therewith.

2. (a) Any domestic support measure in favour of agricultural producers, including any modification to such measure, and any measure that is subsequently introduced that cannot be shown to satisfy the criteria in Annex 2 to this Agreement or to be exempt from reduction by reason of any other provision of this Agreement shall be included in the Member's calculation of its Current Total AMS.

(b) Where no Total AMS commitment exists in Part IV of a Member's Schedule, the Member shall not provide support to agricultural producers in excess of the relevant *de minimis* level set out in paragraph 4 of Article 6.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

51. No jurisprudence or decision of a competent WTO body.

1. Relationship with Annex 2

52. In order to consult the criteria established in Annex 2, see Section XXIV below.

PART V

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Export Competition Commitments

Each Member undertakes not to provide export subsidies otherwise than in conformity with this Agreement and with the commitments as specified in that Member's Schedule.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. General

53. With respect to Members' export subsidy commitments, see paragraphs 14–15 above and paragraphs 54–80 below.

2. Waivers from export subsidy commitments

54. On 22 October 1997, the General Council decided to grant a waiver from the export subsidy commitments to Hungary, in accordance with Article IX of the *WTO Agreement*.[82] See Chapter on the *WTO Agreement*, Section X.B.3 for a list of the waivers currently in force.

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Export Subsidy Commitments

1. The following export subsidies are subject to reduction commitments under this Agreement:

(a) the provision by governments or their agencies of direct subsidies, including payments-in-kind, to a firm, to an industry, to producers of an agricultural product, to a cooperative or other association of such producers, or to a marketing board, contingent on export performance;

(b) the sale or disposal for export by governments or their agencies of non-commercial stocks of agricultural products at a price lower than the comparable price charged for the like product to buyers in the domestic market;

(c) payments on the export of an agricultural product that are financed by virtue of governmental action, whether or not a charge on the public account is involved, including payments that are financed from the proceeds of a levy imposed on the agricultural product concerned or on an agricultural product from which the exported product is derived;

(d) the provision of subsidies to reduce the costs of marketing exports of agricultural products (other than widely available export promotion and advisory services) including handling, upgrading and other processing costs, and the costs of international transport and freight;

(e) internal transport and freight charges on export shipments, provided or mandated by governments, on terms more favourable than for domestic shipments;

(f) subsidies on agricultural products contingent on their incorporation in exported products.

2. (a) Except as provided in subparagraph (b), the export subsidy commitment levels for each year of the implementation period, as specified in a Member's Schedule, represent with respect to the export subsidies listed in paragraph 1 of this Article:

(i) in the case of budgetary outlay reduction commitments, the maximum level of expenditure for such subsidies that may be allocated or incurred in that year in respect of the agricultural product, or group of products, concerned; and

(ii) in the case of export quantity reduction commitments, the maximum quantity of an agricultural product, or group of products, in respect of which such export subsidies may be granted in that year.

(b) In any of the second through fifth years of the implementation period, a Member may provide export subsidies listed in paragraph 1 above in a given year in excess of the corresponding annual commitment levels in respect of the products or groups of products specified in Part IV of the Member's Schedule, provided that:

(i) the cumulative amounts of budgetary outlays for such subsidies, from the beginning of the implementation period through the year in question, does not exceed the cumulative amounts that would have resulted from full compliance with the relevant annual outlay commitment levels specified in the Member's Schedule by more than 3 percent of the base period level of such budgetary outlays;

(ii) the cumulative quantities exported with the benefit of such export subsidies, from

[82] WT/L/238.

the beginning of the implementation period through the year in question, does not exceed the cumulative quantities that would have resulted from full compliance with the relevant annual quantity commitment levels specified in the Member's Schedule by more than 1.75 percent of the base period quantities;

(iii) the total cumulative amounts of budgetary outlays for such export subsidies and the quantities benefiting from such export subsidies over the entire implementation period are no greater than the totals that would have resulted from full compliance with the relevant annual commitment levels specified in the Member's Schedule; and

(iv) the Member's budgetary outlays for export subsidies and the quantities benefiting from such subsidies, at the conclusion of the implementation period, are no greater than 64 percent and 79 percent of the 1986–1990 base period levels, respectively. For developing country Members these percentages shall be 76 and 86 percent, respectively.

3. Commitments relating to limitations on the extension of the scope of export subsidization are as specified in Schedules.

4. During the implementation period, developing country Members shall not be required to undertake commitments in respect of the export subsidies listed in subparagraphs (d) and (e) of paragraph 1 above, provided that these are not applied in a manner that would circumvent reduction commitments.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

1. General

(a) Notification requirements

55. With respect to notification requirements concerning export subsidies, see paragraphs 116–118 below.

2. Article 9.1(a)

(a) "direct subsidies, including payments-in-kind"

56. The Panel on *Canada – Dairy* held that "'payments-in-kind' are a form of direct subsidy" and that "a determination in the instant matter that '*payments-in-kind*' exist *would also be* a determination of the existence of a *direct subsidy*." (Emphasis added)[83] The Appellate Body disagreed and held, *inter alia*, that "[w]here the recipient gives full consideration in return for a 'payment-in-kind' there can be no 'subsidy', for the recipient is paying market-rates for what it receives":

> "In our view, the term 'payments-in-kind' describes one of the *forms* in which 'direct subsidies' may be granted. Thus, Article 9.1(a) applies to 'direct subsidies', *including* 'direct subsidies' granted in the form of 'payments-in-kind'. We believe that, in its ordinary meaning, the word 'payments', in the term 'payments-in-kind', denotes a transfer of economic resources, in a form other than money, from the grantor of the payment to the recipient. However, the fact that a 'payment-in-kind' has been made provides no indication as to the economic *value* of the transfer effected, either from the perspective of the grantor of the payment or from that of the recipient. A 'payment-in-kind' may be made in exchange for full or partial consideration or it may be made gratuitously. Correspondingly, a 'subsidy' involves a transfer of economic resources from the grantor to the recipient for less than full consideration. As we said in our Report in *Canada – Aircraft*, a 'subsidy', within the meaning of Article 1.1 of the *SCM Agreement*, arises where the grantor makes a 'financial contribution' which confers a 'benefit' on the recipient, as compared with what would have been otherwise available to the recipient in the marketplace. Where the recipient gives full consideration in return for a 'payment-in-kind' there can be no 'subsidy', for the recipient is paying market-rates for what it receives. It follows, in our view, that the mere fact that a 'payment-in-kind' has been made does not, *by itself*, imply that a 'subsidy', 'direct' or otherwise, has been granted.
>
> [T]he Panel erred in finding that 'a determination in the instant matter that "payments-in-kind" exist would also be a determination of the existence of a direct subsidy.' The Panel should have considered whether the particular 'payment-in-kind' that it found existed was a 'direct subsidy'. Instead, because the Panel assumed that a 'payment-in-kind' is necessarily a 'direct subsidy', it did not address specifically either the meaning of the term 'direct subsidies' or the question whether the provision of milk to processors for export under Special Classes 5(d) and 5(e) constitutes 'direct subsidies'."[84]

(b) "governments or their agencies"

57. In *Canada – Dairy*, the Appellate Body addressed the phrase "governments or their agencies" and held that the fact that such an agency enjoys a "degree of discretion" does not remove its quality of being a government agency:

> "According to *Black's Law Dictionary*, 'government' means, *inter alia*, '[t]he *regulation*, *restraint*, *supervision*, or *control* which is exercised upon the individual

[83] Panel Report on *Canada – Dairy*, para. 7.43.
[84] Appellate Body Report on *Canada – Dairy*, paras. 87–88.

members of an organized jural society *by those invested with authority*'. (emphasis added) This is similar to meanings given in other dictionaries. The essence of 'government' is, therefore, that it enjoys the effective power to 'regulate', 'control' or 'supervise' individuals, or otherwise 'restrain' their conduct, through the exercise of lawful authority. This meaning is derived, in part, from the *functions* performed by a government and, in part, from the government having the *powers* and *authority* to perform those functions. A 'government agency' is, in our view, an entity which exercises powers vested in it by a 'government' for the purpose of performing functions of a 'governmental' character, that is, to 'regulate', 'restrain', 'supervise' or 'control' the conduct of private citizens. As with any agency relationship, a 'government agency' may enjoy a degree of discretion in the exercise of its functions."[85]

3. Article 9.1(c)

(a) "payments"

(i) A payment includes a payment-in-kind

58. In *Canada – Dairy*, the Appellate Body interpreted the term "payments" to include a transfer of resources other than money, including a "payment in kind":

> "We have found that the word 'payments', in the term 'payments-in-kind' in Article 9.1(a), denotes a transfer of economic resources.[86] We believe that the same holds true for the word 'payments' in Article 9.1(c). The question which we now address is whether, under Article 9.1(c), the economic resources that are transferred by way of a 'payment' must be in the form of money, or whether the resources transferred may take other forms. As the Panel observed, the dictionary meaning of the word 'payment' is not limited to payments made in monetary form. In support of this, the Panel cited the *Oxford English Dictionary*, which defines 'payment' as 'the remuneration of a person with money *or its equivalent*'.[87] (emphasis added) Similarly, the *Shorter Oxford English Dictionary* describes a 'payment' as a 'sum of money (*or other thing*) paid'.[88] (emphasis added) Thus, according to these meanings, a 'payment' could be made in a form, other than money, that confers value, such as by way of goods or services. A 'payment' which does not take the form of money is commonly referred to as a 'payment in kind'.
>
> We agree with the Panel that the ordinary meaning of the word 'payments' in Article 9.1(c) is consistent with the dictionary meaning of the word. Under Article 9.1(c), 'payments' are 'financed by virtue of governmental action' and they may or may not involve 'a charge on the public account'. Neither the word 'financed' nor the term 'a charge' suggests that the word 'payments' should be interpreted to apply solely to money payments. A payment made in the form of goods or services is also 'financed' in the same way as a money payment, and, likewise, 'a charge on the public account' may arise as a result of a payment, or a legally binding commitment to make payment by way of goods or services, or as a result of revenue foregone."[89]

59. The Appellate Body on *Canada – Dairy* considered that the context of Article 9.1(c) also supported a reading of the word "payments" that covered "payments-in-kind".

> "The context of Article 9.1(c) also supports a reading of the word 'payments' that embraces 'payments-in-kind'. That context includes the other sub-paragraphs of Article 9.1. As the Panel explained, *none* of the export subsidies listed in Article 9.1 is restricted to grants made solely in money form and several expressly involve subsidies granted in a form other than money.[90] Under Article 9.1(a), 'payments-in-kind' are specifically included as a form of 'direct subsidies'. Similarly, under Articles 9.1(b), the export subsidy identified may involve the disposal of agricultural goods *at less than domestic price*. Under Article 9.1(e), the provision of transport services for export shipments at *prices lower than the price charged for domestic shipments* is also an export subsidy. Thus, each of these three sub-paragraphs of Article 9.1 specifically contemplates that the export subsidy may be granted in a form other than a money payment.
>
> The context, in our view, also includes Article 1(c) of the *Agreement on Agriculture*. In terms of that provision, 'revenue foregone' is to be taken into account in determining whether 'budgetary outlay' commitments, made with respect to export subsidies as listed in Article 9.1, have been exceeded. In our view, the foregoing of revenue usually does not involve a monetary payment. Thus, if a restrictive reading of the words 'payments' were adopted, such that 'payments' under Article 9.1(c) had to be monetary, no account could be taken, under Article 9.1(c), of 'revenue foregone'. This would, we believe, prevent a proper assessment of the commitments made by WTO Members under Article 9.2, as envisaged by Article 1(c) of the *Agreement on Agriculture*. We, therefore, prefer a reading of Article 9.1(c) that allows full account to be taken of 'revenue foregone'. The contrary view would, in our opinion, elevate form over substance and permit Members to circumvent the subsidy disciplines set forth in Article 9 of the *Agreement on Agriculture*."[91]

60. The Appellate Body on *Canada – Dairy* acknowledged that Article 9.1(c) did not refer explicitly to

[91] Appellate Body Report on *Canada – Dairy*, paras. 109–110.

"payments-in-kind", unlike other provisions of the *Agreement on Agriculture*, but held that the purpose of its express inclusion was "to counter any suggestion that the ordinary meaning of the terms '*direct* subsidies' and '*direct* payments' does *not* include 'payments-in-kind'":

> "It is true, as Canada argues, that Article 9.1(c) does not expressly include 'payments-in-kind' within its scope, whereas Article 9.1(a) and paragraph 5 of Annex 2 to the *Agreement on Agriculture* do. However, we do not regard the express inclusion of 'payments-in-kind' in these two provisions as necessarily implying the exclusion of 'payments-in-kind' under Article 9.1(c). In Article 9.1(a) and in paragraph 5 of Annex 2, the term 'payments-in-kind' is used in conjunction with the words '*direct* subsidies' and '*direct* payments', respectively. We believe that reference is made to 'payments-in-kind' in these two provisions to counter any suggestion that the ordinary meaning of the terms '*direct* subsidies' and '*direct* payments' does *not* include 'payments-in-kind'. By contrast, since the ordinary meaning of the word 'payments' in Article 9.1(c) includes 'payments-in-kind', there was no need for 'payments-in-kind' to be expressly provided for. Moreover, if 'payments-in-kind' are *included* in the qualified concept of 'direct payments' under Annex 2, paragraph 5, it would be incongruous to *exclude* them from the broader concept of 'payments' in Article 9.1(c)."[92]

61. The Appellate Body on *Canada – Dairy* consequently agreed with the Panel that the ordinary meaning of the word "payments" in Article 9.1(c) encompassed "payments" in forms other than money, including revenue foregone:

> "In our view, the provision of milk at discounted prices to processors for export under Special Classes 5(d) and 5(e) constitutes 'payments', in a form other than money, within the meaning of Article 9.1(c). If goods or services are supplied to an enterprise, or a group of enterprises, at reduced rates (that is, at below market-rates), 'payments' are, in effect, made to the recipient of the portion of the price that is not charged. Instead of receiving a monetary payment equal to the revenue foregone, the recipient is paid in the form of goods or services. But, as far as the recipient is concerned, the economic value of the transfer is precisely the same.
>
> We, therefore, uphold the Panel's finding, in paragraph 7.101 of the Panel Report, that the provision of discounted milk to processors or exporters under Special Classes 5(d) and 5(e) involves 'payments' within the meaning of Article 9.1(c) of the *Agreement on Agriculture*."[93] [94]

(ii) Benchmark to be applied when assessing payments

62. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* explained the importance of a benchmark when assessing if the measure at issue involves "payments" under Article 9.1(c):

> "Thus, the determination of whether 'payments' are involved requires a comparison between the price actually charged by the provider of the goods or services – the prices of CEM in this case – and some objective standard or benchmark which reflects the proper value of the goods or services to their provider – the milk producer in this case. We do not accept Canada's argument that as the producer negotiates freely the price with the processor, and CEM prices are, therefore, market-determined, it is not necessary to compare these prices with an objective standard.
>
> Article 9.1(c) of the *Agreement on Agriculture* does not expressly identify any standard for determining when a measure involves 'payments' in the form of payments-in-kind. The absence of an express standard in Article 9.1(c) may be contrasted with several other provisions involving export subsidies which do provide an express standard. Thus, for instance, even within Article 9.1 itself, sub-paragraphs (b) and (e) expressly provide that the domestic market constitutes the appropriate basis for comparison.[95]
>
> We believe that it is significant that Article 9.1(c) of the *Agreement on Agriculture* does not expressly identify a standard or benchmark for determining whether a measure involves 'payments'. It is clear that the notion of 'payments' encompasses a diverse range of practices involving a transfer of resources, either monetary or in-kind. Moreover, the 'payments' may take place in many different factual and regulatory settings. Accordingly, we believe that it is necessary to scrutinize carefully the facts and circumstances of a disputed measure, including the regulatory framework surrounding that measure, to determine the appropriate basis for comparison in assessing whether the measure involves 'payments' under Article 9.1(c)."[96]

---

[92] Appellate Body Report on *Canada – Dairy*, para. 111.

[93] Appellate Body Report on *Canada – Dairy*, paras. 113–114.

[94] The Panel on *Canada – Dairy (Article 21.5 – New Zealand and US II)* recalled that, as found by the Panel (Panel Report on *Canada – Dairy*, para.7.101) and confirmed by the Appellate Body (Appellate Body Report on *Canada – Dairy*, para.112) in the original *Canada – Dairy* case, a payment under Article 9.1(c) includes a "payment-in-kind." This finding had been reaffirmed by the Panel (Panel Report on *Canada - Dairy (Article 21.5 – New Zealand and US)*, para. 6.12*)* and Appellate Body (Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, paras.71 and 76*)* in the first *Canada – Dairy* compliance case. The point had not been re-argued by the parties before The Panel on the second *Canada – Dairy* compliance case*:* Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, para. 5.26.

[95] (*footnote original*) *See also*, items (c), (d), (f), (g), (h), (j) and (k) of the Illustrative List of the *SCM Agreement*, each of which expressly identifies one or more benchmarks to be used as a basis for comparison in determining whether a measure involves export subsidies. *See further*, paragraphs 8 and 13 of Annex 3, and paragraph 2 of Annex 4, of the *Agreement on Agriculture*, which expressly identify one or more benchmarks for calculating the amount of domestic support.

[96] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, paras. 74–76.

63. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* rejected the Panel's suggestion that the domestic market provided the "right benchmark" for the dispute.

> "The domestic price in this case is an administered price fixed by the Canadian government as part of the regulatory framework established by it for managing the supply of milk destined for consumption in the domestic market. As with administered prices in general, this price expresses a government policy choice based, not only on economic considerations, but also on other social objectives. The Canadian regulatory framework for managing domestic milk supply, including the establishment of the administered price, is not in dispute in this case. There can be little doubt, however, that the administered price is a price that is favourable to the domestic producers. Consequently, sale of CEM by the producer at less than the administered domestic price does not, necessarily, imply that the producer has foregone a portion of the proper value of the milk to it. In the situation where the producer, rather than the government, chooses to produce and sell CEM in the marketplace at a price it freely negotiates, we do not believe it is appropriate to use, as a basis for comparison, a domestic price that is fixed by the government."[97]

64. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* also rejected an alternative "benchmark" which relied on world market prices.

> "The alternative 'benchmark' which the Panel relied upon to determine whether CEM prices involve 'payments' was the terms and conditions on which alternative supplies are available to processors on world markets, through IREP.[98] In reviewing this benchmark, we recall that, in these proceedings, the standard used to determine whether there are 'payments' under Article 9.1(c) must be based on the proper value of the milk to the producer, in order to determine whether the producer foregoes a portion of this value. If a producer wishes to sell milk for export processing, it is obvious that the price of the milk to the processor must be competitive with world market prices. If it is not, the processor will not buy the milk, as it will not be able to produce a final product that is competitive in export markets. Accordingly, the range of world market prices determines the price which the producer can charge for milk destined for export markets.[99] World market prices do, therefore, provide one possible measure of the value of the milk to the producer.
>
> However, world market prices do not provide a valid basis for determining whether there are 'payments', under Article 9.1(c) of the *Agreement on Agriculture*, for, it remains possible that the reason CEM can be sold at prices competitive with world market prices is precisely because sales of CEM involve subsidies that make it competitive. Thus, a comparison between CEM prices and world market prices gives no indication on the crucial question, namely, whether Canadian export production has been given an advantage. Furthermore, if the basis for comparison were world market prices, it would be possible for WTO Members to subsidize domestic inputs for export processing, while taking care to maintain the price of these inputs to the processors at a level which equalled or marginally exceeded world market prices. There would then be no 'payments' under Article 9.1(c) of the *Agreement on Agriculture* and WTO Members could easily defeat the export subsidy commitments that they have undertaken in Article 3 of the *Agreement on Agriculture*.[100]
>
> We do not, therefore, accept that world market prices are an appropriate basis for determining whether sales of CEM by producers involve 'payments' under Article 9.1(c) of the *Agreement on Agriculture*."[101]

65. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* indicated that a number of possible measures for assessing the value of milk existed:

> "We turn now to determine the appropriate standard for assessing whether sales of CEM by producers involve 'payments' under Article 9.1(c) of the *Agreement on Agriculture*. We reiterate that the standard must be objective and based on the value of the milk to the producer.
>
> Although the proceeds from sales at domestic or world market prices represent two possible measures of the value of milk to the producer, we do not see these as the

---

[97] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para.81

[98] (*footnote original*) Panel Report, paras. 6.22 ff. *See*, *supra*, para. 67. We note that, in examining the terms and conditions on which IREP is available, the Panel focused exclusively on the requirements to obtain a discretionary permit and to pay an administrative fee. In assessing whether alternative sources of supply are available on more favourable terms, we consider that panels should take account of all the factors which affect the relative "attractiveness" in the marketplace of the different goods or services. The primary consideration must be price, while the importance of administrative formalities will depend on their nature and characteristics. For instance, if an import permit were granted to importers as a matter of course, in the context of straightforward import procedures, and if import fees were only administrative charges to cover expenses, these formalities would be unlikely, on their own, to mean that imports were available on less favourable terms and conditions.

[99] (*footnote original*) New Zealand acknowledged, before the Panel, that the price of CEM "will be essentially world market prices". (New Zealand's first submission to the Panel, para. 4.05) Canada also argued that the processor offers producers a price for CEM that is based on world market conditions. (Canada's first submission to the Panel, para. 37; Canada's second submission to the Panel, para. 13; Canada's oral statement before the Panel, paras. 21, 30, 49 and 51; Canada's appellant's submission, para. 39 and footnote 32 thereto.)

[100] (*footnote original*) We note that none of the participants in these proceedings argued that world market prices are the appropriate benchmark for determining whether supplies of CEM involve "payments" within the meaning of Article 9.1(c) of the *Agreement on Agriculture*. *See also*, *supra*, footnote 43.

[101] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)* paras. 83–85.

only possible measures of this value. For any economic operator, the production of goods or services involves an investment of economic resources. In the case of a milk producer, production requires an investment in fixed assets, such as land, cattle and milking facilities, and an outlay to meet variable costs, such as labour, animal feed and health-care, power and administration. These fixed and variable costs are the total amount which the producer must spend in order to produce the milk and the total amount it must recoup, in the long-term, to avoid making losses. To the extent that the producer charges prices that do not recoup the total cost of production, over time, it sustains a loss which must be financed from some other source, possibly 'by virtue of governmental action."[102]

66. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US II*) considered that the average total cost of production benchmark should be an industry-wide average:

"We believe that the standard for determining the existence of 'payments', under Article 9.1(c), should reflect the fact that the obligation at issue is an international obligation imposed on Canada. The question is not whether one or more individual milk producers, efficient or not, are selling CEM at a price above or below their individual costs of production. The issue is whether Canada, on a national basis, has respected its WTO obligations and, in particular, its commitment levels. It, therefore, seems to us that the benchmark should be a single, industry-wide cost of production figure, rather than an indefinite number of cost of production figures for each individual producer. The industry-wide figure enables cost of production data for producers, as a whole, to be aggregated into a single, national standard that can be used to assess Canada's compliance with its international obligations.

By contrast, if the benchmark were to operate at the level of each individual producer, there would be a proliferation of standards, requiring individual-level inquiry and application of Article 9.1(c), as if the obligations under the *Agreement on Agriculture* involved rights and obligations of individual producers, rather than WTO Members."[103]

67. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US II*) agreed with the Panel that certain imputed costs and selling costs should be included in the cost of production benchmark:

"We, therefore, find that the COP standard for determining whether 'payments' exist, under Article 9.1(c) of the *Agreement on Agriculture*, includes all monetary and non-monetary economic costs of production, such as the costs of family labour and management, and of owner's equity.

. . .

Accordingly, we find that any transport, marketing, and administrative costs are to be included in the COP standard applied under Article 9.1(c), as are any costs of acquiring and retaining quota."[104]

(b) "financed by virtue of governmental action"

(i) Meaning of governmental action

68. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* considered the meaning of the term "governmental action" under Article 9.1(c):

"We recall that, in the original proceedings, the role of the government in managing the supply of milk for export was manifest. We stated that:

> '[G]overnmental action' is not simply involved; it is, in fact, *indispensable* to enable the supply of milk to processors for export, and hence the transfer of resources, to take place. In the regulatory framework, 'government agencies' stand so completely between the producers of the milk and the processors or the exporters that we have no doubt that the transfer of resources takes place 'by virtue of governmental action'.[105] (emphasis added)

Although the phrase 'financed by virtue of governmental action' must be understood as a whole, it is useful to consider separately the meaning of the different parts of this phrase. Taking the words 'governmental action' first, we observe that the text of Article 9.1(c) does not place any qualifications on the types of 'governmental action' which may be relevant under Article 9.1(c). In the original proceedings, we stated that '[t]he essence of "government" is . . . that it enjoys the effective power to "regulate", "control" or "supervise" individuals, or otherwise "restrain" their conduct, through the exercise of lawful authority.'[106] In our opinion the word 'action' embraces the full-range of these activities, including governmental action regulating the supply and price of milk in the domestic market."[107]

(ii) Meaning of "financed"

69. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* considered the meaning of this term under Article 9.1(c):

"[I]t will not be sufficient simply to demonstrate that a payment occurs as a consequence of governmental action because the word 'financed', in Article 9.1(c), must also be given meaning.

---

[102] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, paras. 86–87.
[103] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*,paras. 95–96.
[104] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, paras. 110 and 116.
[105] (*footnote original*) Appellate Body Report, *Canada – Dairy*, *supra*, footnote 2, para. 120.
[106] (*footnote original*) *Ibid.*, para. 97.
[107] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US*), paras. 111 and 112.

> The word 'financed' might be given a rather specific meaning such that it would be confined to the financing of 'payments' in monetary form or to the funding of 'payments' from government resources. However, we have already recalled that 'payments', under Article 9.1(c), include payments-in-kind, so the word 'financed' needs to cover both the financing of monetary payments and payments-in-kind.[108] In addition, Article 9.1(c) explicitly excludes a reading of the word 'financed' whereby payments must be funded from government resources, as the provision states that payments can be financed by virtue of governmental action 'whether or not a charge on the public account is involved'. Thus, under Article 9.1(c), it is not necessary that the economic resources constituting the 'payment' actually be paid by the government or even that they be paid from government resources. Accordingly, although the words 'by virtue of' render governmental action essential, Article 9.1(c) contemplates that payments may be financed by virtue of governmental action even though significant aspects of the financing might not involve government."[109]

(iii) Link between governmental action and the financing of payments

70. When examining the link required between governmental action and the financing of payments under Article 9.1(c), the Panel on *Canada – Dairy (Article 21.5 – New Zealand and US)* considered that governmental action should be "indispensable" to the financing of payments, and "establish[es] the conditions which ensure that the payment . . . takes place."[110] Further, the Panel indicated that for the "by virtue of" test of Article 9.1(c) to be met "it must be established that a payment would not be financed . . . but for governmental action."[111] This "but for" standard would be met if the following two requirements were established:

> "[T]hat governmental action, *de jure* or *de facto*: (i) prevents Canadian milk producers from selling more milk on the regulated domestic market, at a higher price, than to the extent of the quota allocated to them; and (ii) obliges Canadian milk processors to export all milk contracted as lower priced commercial export milk, and, accordingly, penalizes the diversion by processors of milk contracted as commercial export milk to the domestic market. As explained below,[112] only if both those requirements were to be met, governmental action could be said to be indispensable for the transfer of resources to take place: the lower priced commercial export milk would not have been available to Canadian processors for export *but for* these governmental actions, taken together."[113]

71. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* confirmed that mere governmental action would not be sufficient for a finding that an export subsidy existed under Article 9.1(c) and expanded on the meaning of the words "by virtue of":

> "The words 'by virtue of' indicate that there must be a demonstrable link between the *governmental action* at issue and the *financing* of the payments, whereby the payments are, in some way, financed as a result of, or as a consequence of, the governmental action."[114] (emphasis added)

72. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* indicated that establishing such a link would be more difficult in cases involving payments-in-kind.

> "[T]he link between governmental action and the financing of payments will be more difficult to establish, as an evidentiary matter, when the payment is in the form of a payment-in-kind rather than in monetary form, and all the more so when the payment-in-kind is made, not by the government, but by an independent economic operator."[115]

73. Further, the Appellate Body in *Canada – Dairy (Article 21.5 – New Zealand and US)* indicated that it disagreed with the Panel's findings that governmental action had "oblige[d]" or "drive[n]" producers to sell commercial export milk ("CEM").[116] However, the Appellate Body did not make any further findings on the meaning of "financed by governmental action" at that stage of the proceedings.

74. In *Canada – Dairy (Article 21.5 – New Zealand and US II)* the Appellate Body considered the meaning of "financed by government action" in light of the ordinary meaning of the word "financing" but, on the other hand, the fact that Article 9.1(c) expressly states that "payments" need not involve "a charge on the public account". It summed up as follows:

> "Accordingly, even if government does not fund the payments itself, it must play a sufficiently important part in the process by which a private party funds 'payments', such that the requisite nexus exists between 'governmental action' and 'financing'."[117]

[117] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, para. 133.

75. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US II)* considered the facts of the dispute and agreed with the Panel that a significant percentage of producers were likely to finance sales of commercial export milk ("CEM") at below the costs of production as a result of participation in the domestic market and, further, that payments made through the supply of CEM at below the costs of production were financed by virtue of "governmental action" within the meaning of Article 9.1(c) of the *Agreement on Agriculture*:

> "It falls now to consider the role of the Canadian government in financing payments made on the sale of CEM. We have agreed with the Panel that a significant percentage of producers are likely to finance sales of CEM at below the costs of production as a result of participation in the domestic market. Canadian 'governmental action' controls virtually every aspect of domestic milk supply and management. [footnote omitted] In particular, government agencies fix the price of domestic milk that renders it highly remunerative to producers. Government action also controls the supply of domestic milk through quota, thereby protecting the administered price. The imposition by government of financial penalties on processors that divert CEM into the domestic market is another element of governmental control over the supply of milk. Further, the degree of government control over the domestic market is emphasized by the fact that government pools, allocates, and distributes revenues to producers from all domestic sales. Finally, governmental action also protects the domestic market from import competition through tariffs. [footnote omitted]
>
> In our view, the effect of these different governmental actions is to secure a highly remunerative price for sales of domestic milk by producers. In turn, it is due to this price that a significant proportion of producers covers their fixed costs in the domestic market and, as a result, has the resources profitably to sell export milk at prices that are below the costs of production."[118]

76. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US II)* dismissed an objection that this reasoning brings "cross-subsidization" under Article 9.1(c) of the *Agreement on Agriculture*:

> "We have explained that the text of Article 9.1(c) applies to any 'governmental action' which 'finances' export 'payments'. The text does not exclude from the scope of the provision any particular governmental action, such as regulation of domestic markets, to the extent that this action may become an instrument for granting export subsidies. Nor does the text exclude any particular form of financing, such as 'cross-subsidization'. Moreover, the text focuses on the consequences of governmental action ('by virtue of which') and not the intent of government. Thus, the provision applies to governmental action that finances export payments, even if this result is not intended. As stated in our Report in the first Article 21.5 proceedings, this reading of Article 9.1(c) serves to preserve the legal 'distinction between the domestic support and export subsidies disciplines of the *Agreement on Agriculture*'.[119] Subsidies may be granted in both the domestic and export markets, provided that the disciplines imposed by the Agreement on the levels of subsidization are respected. If governmental action in support of the domestic market could be applied to subsidize export sales, without respecting the commitments Members made to limit the level of export subsidies, the value of these commitments would be undermined. Article 9.1(c) addresses this possibility by bringing, in some circumstances, governmental action in the domestic market within the scope of the 'export subsidies' disciplines of Article 3.3."[120]

77. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US II)* considered that the "payments" at issue were not financed "by virtue of" another form of governmental action in the dispute, which was an exemption for processors from paying the higher domestic price for milk when they purchased commercial export milk:

> "We do not believe that this action influences the 'financing' of payments by the producer. Certainly, this action explains why the *processor* of CEM is not *required* to pay the higher domestic price for CEM. However, the mere fact that the processor is not obliged to buy CEM at the domestic price does not demonstrate a link between this exemption and the financing of payments by the *producer* on the sale of CEM. The exemption is, in short, not linked to the mechanism by which the producer funds the payments."[121]

4. Article 9.1(d)

(a) "costs of marketing"

78. In *US – FSC*, the measure at issue created a reduction of income tax liability for certain United States' corporations, provided, *inter alia*, that these corporations incurred a certain portion of their marketing expenses abroad. The Panel found that the United States' measure constituted a subsidy to "reduce the costs of marketing exports", within the meaning of paragraph 1(d).[122] The Appellate Body disagreed and held, *inter alia*, that "income tax liability under the FSC measure arises only when goods are actually sold for

[118] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, paras. 144–145.
[119] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 90.
[120] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, para. 148.
[121] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, para. 149.
[122] Panel Report on *US – FSC*, para. 7.155.

export, that is, *when they have been the subject of successful marketing*. Such liability arises *because* goods have, in fact, been sold, and not as *part of the process* of marketing them".[123] (Emphasis original) The Appellate Body ultimately concluded that "if income tax liability arising from export sales can be viewed as among the 'costs of marketing exports', then so too can virtually any other cost incurred by a business engaged in exporting":

> "We turn, first, to the word 'marketing' in Article 9.1(d), which is at the heart of the phrase 'to reduce the costs of *marketing* exports' in Article 9.1(d). Taken alone, that word can have, as the Panel indicated, a range of meanings. The Panel noted the *Webster's Dictionary* meaning, according to which 'marketing' is the 'aggregate of functions involved in transferring title and in moving goods from producer to consumer including among others buying, selling, storing, transporting, standardizing, financing, risk bearing and supplying market information'. . . . *The New Shorter Oxford Dictionary* provides a similar meaning: 'The action, business, or process of promoting and selling a product . . .'. However, we must look beyond dictionary meanings, because, as we have said before, 'dictionary meanings leave many interpretive questions open.'
>
> The text of Article 9.1(d) lists 'handling, upgrading and other processing costs, and the costs of international transport and freight' as examples of 'costs of marketing'. The text also states that 'export promotion and advisory services' are covered by Article 9.1(d), provided that they are not 'widely available'. These are not examples of just *any* 'cost of doing business' that 'effectively reduce[s] the cost of marketing' products. Rather, they are specific types of costs that are incurred *as part of* and *during* the process of selling a product. They differ from general business costs, such as administrative overhead and debt financing costs, which are not specific to the process of putting a product on the market, and which are, therefore, related to the marketing of exports only in the broadest sense.
>
> . . .
>
> Income tax liability under the FSC measure arises only when goods are actually sold for export, that is, *when they have been the subject of successful marketing*. Such liability arises *because* goods have, in fact, been sold, and not as *part of the process* of marketing them. Furthermore, at the time goods are sold, the costs associated with putting them on the market – costs such as handling, promotion and distribution costs – have already been incurred and the amount of these costs is not altered by the income tax, the amount of which is calculated by reference to the sale price of the goods. In our view, if income tax liability arising from export sales can be viewed as among the 'costs of marketing exports', then so too can virtually any other cost incurred by a business engaged in exporting."[124]

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Prevention of Circumvention of Export Subsidy Commitments

1. Export subsidies not listed in paragraph 1 of Article 9 shall not be applied in a manner which results in, or which threatens to lead to, circumvention of export subsidy commitments; nor shall non-commercial transactions be used to circumvent such commitments.

2. Members undertake to work toward the development of internationally agreed disciplines to govern the provision of export credits, export credit guarantees or insurance programmes and, after agreement on such disciplines, to provide export credits, export credit guarantees or insurance programmes only in conformity therewith.

3. Any Member which claims that any quantity exported in excess of a reduction commitment level is not subsidized must establish that no export subsidy, whether listed in Article 9 or not, has been granted in respect of the quantity of exports in question.

4. Members donors of international food aid shall ensure:

(a) that the provision of international food aid is not tied directly or indirectly to commercial exports of agricultural products to recipient countries;

(b) that international food aid transactions, including bilateral food aid which is monetized, shall be carried out in accordance with the FAO "Principles of Surplus Disposal and Consultative Obligations", including, where appropriate, the system of Usual Marketing Requirements (UMRs); and

(c) that such aid shall be provided to the extent possible in fully grant form or on terms no less concessional than those provided for in Article IV of the Food Aid Convention 1986.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. Article 10.1

(a) Export subsidy commitments

79. In *US – FSC*, the Appellate Body interpreted the term "export subsidy commitments" to have "a wider reach [than reduction commitments] that covers commitments and obligations relating to *both* scheduled and unscheduled agricultural products":

[123] Appellate Body Report on *US – FSC*, para. 131.
[124] Appellate Body Report on *US – FSC*, paras. 129–131.

"The word 'commitments' generally connotes 'engagements' or 'obligations'. Thus, the term 'export subsidy *commitments*' refers to commitments or obligations relating to export subsidies assumed by Members under provisions of the *Agreement on Agriculture*, in particular, under Articles 3, 8 and 9 of that Agreement.

. . .

We also find support for this interpretation of the term 'export subsidy commitments' in Article 10 itself, which draws a distinction, in sub-paragraphs 1 and 3, between 'export subsidy commitments' and '*reduction commitment levels*'. In our view, the terms 'export subsidy commitments' and 'reduction commitments' have different meanings. '*Reduction* commitments' is a narrower term than 'export subsidy commitments' and refers only to commitments made, under the first clause of Article 3.3, with respect to *scheduled* agricultural products. It is only with respect to *scheduled* products that Members have undertaken, under Article 9.2(b)(iv) of the *Agreement on Agriculture*, to *reduce* the level of export subsidies, as listed in Article 9.1, during the implementation period of the *Agreement on Agriculture*. The term 'export subsidy commitments' has a wider reach that covers commitments and obligations relating to *both* scheduled and unscheduled agricultural products."[125]

(b) "applied in a manner which results in, or which threatens to lead to circumvention"

80. In *US – FSC*, the Appellate Body made a number of observations relevant to the interpretation of the phrase "applied in a manner which results in, or which threatens to lead to, circumvention":

"We turn next to whether the subsidies under the FSC measure are 'applied in a manner which *results in*, or which *threatens to lead to*, *circumvention* of export subsidy commitments'. (emphasis added) The verb 'circumvent' means, *inter alia*, 'find a way round, evade . . .'. Article 10.1 is designed to prevent Members from circumventing or 'evading' their 'export subsidy commitments'. This may arise in many different ways. We note, moreover, that, under Article 10.1, it is not necessary to demonstrate *actual* 'circumvention' of 'export subsidy commitments'. It suffices that 'export subsidies' are 'applied in a manner which . . . *threatens to lead to circumvention* of export subsidy commitments'.

. . .

Article 10.1 prevents the application of export subsidies which '*results in*, or which *threatens to lead to*, *circumvention*' of that prohibition. Members would certainly have 'found a way round', a way to 'evade', this prohibition if they could transfer, through tax exemptions, the very same economic resources that they are prohibited from providing in other forms under Articles 3.3 and 9.1.

. . .

Given that the nature of the 'export subsidy commitment' differs as between scheduled and unscheduled products, we believe that what constitutes 'circumvention' of those commitments, under Article 10.1, may also differ.

As regards *scheduled* products, when the specific reduction commitment levels have been reached, the *limited authorization* to provide export subsidies as listed in Article 9.1 is transformed, effectively, into a *prohibition* against the provision of those subsidies. However, as we have seen, the FSC measure allows for the provision of an unlimited amount of FSC subsidies, and scheduled agricultural products may, therefore, benefit from those subsidies when the reduction commitment levels specified in the United States' Schedule for those agricultural products have been reached. In our view, Members would have found 'a way round', a way to 'evade', their commitments under Articles 3.3 and 9.1, if they could transfer, through tax exemptions, the very same economic resources that they were, *at that time*, prohibited from providing through other methods under the first clause of Article 3.3 and under 9.1."[126]

81. The Panel on *US – FSC (Article 21.5 – EC)* indicated that the Act concerned contained subsidies contingent on export performance under Article 1(e) of the *Agreement on Agriculture*. The United States was found to have acted inconsistently with Article 10.1 for "applying the export subsidies, with respect to both scheduled and unscheduled agricultural products, in a manner that, at the very least, threaten[ed] to circumvent its export subsidy commitments under Article 3.3 of the *Agreement on Agriculture*":

"Turning to the issue of whether the export subsidies are 'applied in a manner which results in, or which threatens to lead to, circumvention of export subsidy commitments' within the meaning of Article 10.1 of the *Agreement on Agriculture*, we derive guidance from the approach of the Appellate Body in the original dispute and consider the structure and other characteristics of the measure.[127] We recall that the term 'export subsidy commitments', defining the obligations that are to be protected under Article 10.1 of the *Agreement on Agriculture*, '. . . covers commitments and obligations relating to *both* scheduled and unscheduled agricultural products'.[128]

We note that the Act creates a legal entitlement for recipients to receive export subsidies, not listed in Article 9.1[129], with respect to both scheduled and unscheduled

[125] Appellate Body Report on *US – FSC*, paras. 144 and 147.
[126] Appellate Body Report on *US – FSC*, paras. 148–152. This was confirmed by the Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.117–8.122.
[127] (*footnote original*) Original Appellate Body Report, *supra*, note 1, para. 149.
[128] (*footnote original*) Original Appellate Body Report, *supra*, note 1, paras. 144–147.
[129] (*footnote original*) See *supra*, note 219.

agricultural products. Upon fulfilment by the taxpayer of the conditions stipulated in the Act, the United States government must provide the tax exclusion. As there is no limitation on the amount of extraterritorial income, and thus on the amount of qualifying foreign trade income, that may be claimed in respect of eligible transactions, the amount of export subsidies is unqualified.[130]

Thus, with respect to *unscheduled* agricultural products, we believe that the Act involves the application of export subsidies, *not* listed in Article 9.1, in a manner that, at the very least, 'threatens to lead to circumvention' of that 'export subsidy commitment' in Article 3.3.

With respect to *scheduled* agricultural products, we observe that the measure allows for the provision of an unlimited amount of subsidies, and scheduled agricultural products may, therefore, benefit from those subsidies even after the reduction commitment levels specified in the United States' Schedule for those agricultural products have been reached. Thus, we find that the Act is applied in a manner that, at the very least, threatens to lead to circumvention of the export subsidy commitments made by the United States, under the first clause of Article 3.3, with respect to scheduled agricultural products.[131]

We note that, in these proceedings, the United States does not contest that, if the measure gives rise to subsidies contingent upon export performance under the *Agreement on Agriculture*, then these subsidies would violate its obligations under Articles 10.1 and 8 of the *Agreement on Agriculture*.

We therefore conclude that the United States has acted inconsistently with its obligations under Article 10.1 of the *Agreement on Agriculture* by applying the export subsidies, with respect to both scheduled and unscheduled agricultural products, in a manner that, at the very least, threatens to circumvent its export subsidy commitments under Article 3.3 of the *Agreement on Agriculture*. Furthermore, by acting inconsistently with Article 10.1, the United States has acted inconsistently with its obligation under Article 8 of the *Agreement on Agriculture* 'not to provide export subsidies otherwise than in conformity with this Agreement . . .'."[132]

2. Article 10.2

82. At its meeting of 18 October 2000, the General Council agreed to instruct the Committee on Agriculture to include an item on the implementation of Article 10.2 of the *Agreement on Agriculture* in the agenda of the regular meetings of the Committee on Agriculture.[133]

83. At its meeting of 18 October 2000, the General Council also stated that:

"[I]n pursuing their work on export credits in accordance with Article 10.2, Members will of course take into account the provisions of paragraph 4 of the Marrakesh Decision on net food-importing countries, in which Ministers had agreed that any agreement on export credits should ensure appropriate provision for differential treatment in favour of least-developed and net food-importing developing countries.[134]"

84. At the Doha WTO Ministerial, Members approved the following recommendations, which had been submitted to the Committee on Agriculture for their consideration:

"a) That the focus of the work in the regular Committee meetings would be on the implementation of Article 10.2 and the disciplines foreseen therein, whereas the Special Session negotiations would focus on the proposals tabled or to be tabled on export credit practices;

b) that, without prejudice to further work to be undertaken in the regular meetings of the Committee as provided for in subparagraph (l) above, in the event that a Sector Understanding on agricultural export credits is concluded at the OEC, the Committee would, as envisaged in the report of the Committee on Agriculture to the Singapore WTO Ministerial (G/L/131, paragraph 11), consider how any such understanding could be multilateralized within the framework of the Agreement on Agriculture and how the provisions of paragraph 4 of the Marrakesh NFIDC Decision have been taken into account; and

c) that the Committee on Agriculture should submit a report to the General Council on this subject following its regular September 2002 meeting.[135]"

85. Pursuant to the above implementation agenda, the Committee in its regular meetings under the provisions of Article 18.6 while considering the development of internationally agreed disciplines to govern the provision of export credits, export credit guarantees or insurance programmes, took into account the provisions of paragraph 4 of the NFIDC Decision.[136]

86. With respect to the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries (the "NFIDC Decision"), see Section XXIX below.

[135] WT/MIN(01)/17, para. 2.3. The text of the recommendations is contained in document G/AG/11, paras. 1–4.
[136] G/L/719, para.4 (i).

3. Article 10.3

(a) Export credits, export credit guarantees and insurance programmes

87. With respect to the different treatment of developing Members in respect of agricultural export credits, export credit guarantees or insurance programmes, see paragraph 103 below.

(b) Burden of proof

88. In *Canada – Dairy (Article 21.5 – New Zealand and US II)*, the Appellate Body explained that Article 10.3 of the *Agreement on Agriculture* provides a special rule for proof of export subsidies that applies in certain disputes under Articles 3, 8, 9 and 10 of the *Agreement on Agriculture*. Article 10.3 partially reverses the usual rules on burden of proof as follows:

> "Under the usual rules on burden of proof, the complaining Member would bear the burden of proving both parts of the claim. However, Article 10.3 of the *Agreement on Agriculture* partially alters the usual rules. The provision cleaves the complaining Member's claim in two, allocating to different parties the burden of proof with respect to the two parts of the claim we have described.
>
> Consistent with the usual rules on burden of proof, it is for the complaining Member to prove the first part of the claim, namely that the responding Member has exported an agricultural product in quantities that exceed the responding Member's quantity commitment level.
>
> If the complaining Member succeeds in proving the quantitative part of the claim, and the responding Member contests the export subsidization aspect of the claim, then, under Article 10.3, the responding Member '*must establish* that no export subsidy . . . has been granted' in respect of the excess quantity exported." (emphasis added)

89. With respect to the export subsidization part of the claim, the complaining Member, therefore, is relieved of its burden, under the usual rules, to establish a *prima facie* case of export subsidization of the excess quantity, provided that this Member has established the quantitative part of the claim.[137]

4. Article 10.4

90. With respect to international food aid, see Article 16 and paragraphs 3(i) and (ii) of the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries (the "NFIDC Decision"). Section XVII below and paragraph 131 below.

91. The Chairman of the General Council referred a proposal by the African Group to the Committee on Agriculture for its consideration.[138] On 14 July 2003 he submitted a report to the General Council on the status of the proposal and the progress made with regards to it.[139] In the proposal it was suggested that developed country Members undertake in their schedule of commitments to make contributions towards a revolving fund for normal levels of food imports, providing food aid in fully grant form, and maintaining food aid levels consistently with recommendations and rules under the Food Aid Convention.

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Disciplines on Export Prohibitions and Restrictions

1. Where any Member institutes any new export prohibition or restriction on foodstuffs in accordance with paragraph 2(a) of Article XI of GATT 1994, the Member shall observe the following provisions:

(a) the Member instituting the export prohibition or restriction shall give due consideration to the effects of such prohibition or restriction on importing Members' food security;

(b) before any Member institutes an export prohibition or restriction, it shall give notice in writing, as far in advance as practicable, to the Committee on Agriculture comprising such information as the nature and the duration of such measure, and shall consult, upon request, with any other Member having a substantial interest as an importer with respect to any matter related to the measure in question. The

PART VII

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Due restraint

During the implementation period, notwithstanding the provisions of GATT 1994 and the Agreement on Subsidies and Countervailing Measures (referred to in this Article as the "Subsidies Agreement"):

(a) domestic support measures that conform fully to the provisions of Annex 2 to this Agreement shall be:

(i) non-actionable subsidies for purposes of countervailing duties[4];

(*footnote original*) [4] "Countervailing duties" where referred to in this Article are those covered by Article VI of GATT 1994 and Part V of the Agreement on Subsidies and Countervailing Measures.

(ii) exempt from actions based on Article XVI of GATT 1994 and Part III of the Subsidies Agreement; and

(iii) exempt from actions based on non-violation nullification or impairment of the benefits of tariff concessions accruing to another Member under Article II of GATT 1994, in the sense of paragraph 1(b) of Article XXIII of GATT 1994;

(b) domestic support measures that conform fully to the provisions of Article 6 of this Agreement including direct payments that conform to the requirements of paragraph 5 thereof, as reflected in each Member's Schedule, as well as domestic support within de minimis levels and in conformity with paragraph 2 of Article 6, shall be:

(i) exempt from the imposition of countervailing duties unless a determination of injury or threat thereof is made in accordance with Article VI of GATT 1994 and Part V of the Subsidies Agreement, and due restraint shall be shown in initiating any countervailing duty investigations;

(ii) exempt from actions based on paragraph 1 of Article XVI of GATT 1994 or Articles 5 and 6 of the Subsidies Agreement, provided that such measures do not grant support to a specific commodity in excess of that decided during the 1992 marketing year; and

(iii) exempt from actions based on non-violation nullification or impairment of the benefits of tariff concessions accruing to another Member under Article II of GATT 1994, in the sense of paragraph 1(b) of Article XXIII of GATT 1994, provided that such measures do not grant support to a specific commodity in excess of that decided during the 1992 marketing year;

(c) export subsidies that conform fully to the provisions of Part V of this Agreement, as reflected in each Member's Schedule, shall be:

(i) subject to countervailing duties only upon a determination of injury or threat thereof based on volume, effect on prices, or consequent impact in accordance with Article VI of GATT 1994 and Part V of the Subsidies Agreement, and due restraint shall be shown in initiating any countervailing duty investigations; and

(ii) exempt from actions based on Article XVI of GATT 1994 or Articles 3, 5 and 6 of the Subsidies Agreement.

XVI. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15

Special and Differential Treatment

1. In keeping with the recognition that differential and more favourable treatment for developing country Members is an integral part of the negotiation, special and differential treatment in respect of commitments shall be provided as set out in the relevant provisions of this Agreement and embodied in the Schedules of concessions and commitments.

2. Developing country Members shall have the flexibility to implement reduction commitments over a period of up to 10 years. Least-developed country Members shall not be required to undertake reduction commitments.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

93. At the Doha Ministerial Conference, a recommendation was adopted that "[u]rges Members to exercise restraint in challenging measures notified under the green box by developing countries to promote rural development and adequately address food security concerns".[140]

94. With respect to the notification obligation for developing countries, see paragraph 118 below.

95. As regards the green box, see Annex 2, in Section XXIV below.

XVII. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16

Least-Developed and Net Food-Importing Developing Countries

1. Developed country Members shall take such action as is provided for within the framework of the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries.[141]

2. The Committee on Agriculture shall monitor, as appropriate, the follow-up to this Decision.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16

1. Article 16.1

(a) The Singapore Ministerial Conference

96. In the light of the Committee's discussions on the follow-up to the Marrakesh Ministerial Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries (NFIDC Decision), the Committee on Agriculture submitted the following recommendations for consideration by the Singapore Ministerial Conference, which were approved by Ministers:

"(i) that, in anticipation of the expiry of the current Food Aid Convention in June 1998 and in preparation for the renegotiation of the Food Aid Convention, action be initiated in 1997 within the framework of the Food Aid Convention, under arrangements for participation by all interested countries and by relevant international organizations as appropriate, to develop recommendations with a view towards establishing a level of food aid commitments, covering as wide a range of donors and donable foodstuffs as possible, which is sufficient to meet the legitimate needs of developing countries during the reform programme. These recommendations should include guidelines to ensure that an increasing proportion of food aid is provided to least-developed and net food-importing developing countries in fully grant form and/or on appropriate concessional terms in line with Article IV of the current Food Aid Convention, as well as means to improve the effectiveness and positive impact of food aid;[142]

(ii) that developed country WTO Members continue to give full consideration in the context of their aid programmes to requests for the provision of technical and financial assistance to least-developed and net food-importing developing countries to improve their agricultural productivity and infrastructure;

(iii) that the provisions of paragraph 4 of the Marrakesh Ministerial Decision, whereby Ministers agreed to ensure that any agreement relating to agricultural export credits makes appropriate provision for differential treatment in favour of least-developed and net food-importing developing countries, be taken fully into account in the agreement to be negotiated on agricultural export credits;

(iv) that WTO Members, in their individual capacity as members of relevant international financial institutions, take appropriate steps to encourage the institutions concerned, through their respective governing bodies, to further consider the scope for establishing new facilities or enhancing existing facilities for developing countries experiencing Uruguay Round-related difficulties in

[140] WT/MIN(01)/17, para. 2.1.

[141] The Decision adopted by the Ministerial Conference at Marrakesh is referenced in Section XXIX of this Chapter.

[142] The Food Aid Convention 1999 was adopted under the auspices of the United Nations on 24 March 1999. It provisionally entered into force on 1 July 1999 for an initial duration of three years. At that stage it was agreed to extend the Convention by one year and it was subsequently further extended to 30 June 2005 (Footnote not in the original document.)

financing normal levels of commercial imports of basic foodstuffs."[143]

(b) The Doha Ministerial Conference

97. The Committee's recommendations in the area of food aid in the context of the Marrakesh NFIDC Decision that were approved by the Doha Ministerial Conference provide as follows:

"(a) that early action be taken within the framework of the Food Aid Convention 1999 (which unless extended, with or without a decision regarding its renegotiation, would expire on 30 June 2002) and of the UN World Food Programme by donors of food aid to review their food aid contributions with a view to better identifying and meeting the food aid needs of least-developed and WTO net food-importing developing countries;

(b) WTO Members which are donors of food aid shall, within the framework of their food aid policies, statutes, programmes and commitments, take appropriate measures aimed at ensuring: (i) that to the maximum extent possible their levels of food aid to developing countries are maintained during periods in which trends in world market prices of basic foodstuffs have been increasing; and (ii) that all food aid to least developed countries is provided in fully grant form and, to the maximum extent possible, to WTO net food-importing developing countries as well."[144]

98. The Committee's recommendations in the area of technical and financial assistance in the context of aid programmes to improve agricultural productivity and infrastructure approved by the Doha Ministerial Conference provide:

"(a) that developed country WTO Members should continue to give full and favourable consideration in the context of their aid programmes to requests for the provision of technical and financial assistance by least-developed and net food-importing developing countries to improve their agricultural productivity and infrastructure;

(b) that, in support of the priority accorded by least-developed and net food-importing developing countries to the development of their agricultural productivity and infrastructure, the WTO General Council call upon relevant international development organisations, including the World Bank, the FAO, IFAD, the UNDP and the Regional Development Banks to enhance their provision of, and access to, technical and financial assistance to least-developed and net food-importing developing countries, on terms and conditions conducive to the better use of such facilities and resources, in order to improve agricultural productivity and infrastructure in these countries under existing facilities and programmes, as well as under such facilities and programmes as may be introduced."[145]

99. The Committee's recommendations in the area of financing difficulties of imports of basic foodstuffs in the context of the Marrakesh NFIDC Decision that were approved by the Doha Ministerial Conference state:

"(a) that the provisions of paragraph 4 of the Marrakesh Ministerial Decision, which provide for differential treatment in favour of least-developed and WTO net food-importing developing countries, shall be taken fully into account in any agreement to be negotiated on disciplines on agricultural export credits pursuant to Article 10.2 of the Agreement on Agriculture;

(b) that an inter-agency panel of financial and commodity experts be established, with the requested participation of the World Bank, the IMF, the FAO, the International Grains Council and the UNCTAD, to explore ways and means for improving access by least-developed and WTO net food-importing developing countries to multilateral programs and facilities to assist with short term difficulties in financing normal levels of commercial imports of basic foodstuffs, as well as the concept and feasibility of the proposal for the establishment of a revolving fund in G/AG/W/49 and Add.1and Corr.1. The detailed terms of reference, drawing on the Marrakesh NFIDC Decision, should be submitted by the Vice-Chairman of the WTO Committee on Agriculture, following consultations with Members, to the General Council for approval by not later than 31 December 2001. The inter-agency panel shall submit its recommendations to the General Council by not later than 30 June 2002."

100. In light of the above recommendation in the area of financing difficulties of imports of basic foodstuffs in the context of the Marrakesh NFIDC Decision an Inter-Agency Panel on Short-Term Difficulties in Financing Normal Levels of Commercial Imports of Basic Foodstuffs was established and detailed terms of reference of the Panel were approved by the General Council.[146]

(c) List of least-developed and net food-importing developing countries

101. At its meeting of 21 November 1995, the Committee on Agriculture adopted a decision relating to the establishment of a list of WTO net food-importing developing countries, setting out the criteria for the inclusion.[147]

---

[143] G/L/125, adopted by the Singapore Ministerial Conference, WT/MIN(96)/DEC, para. 13.

[144] G/AG/11, Section B-I.

[145] G/AG/11, Section B-II.

[146] G/AG/12.

[147] G/AG/3. The decision settled on two criteria for the selection of the Members which became beneficiaries of the measures provided for in the decision:

"a) Least developed countries as recognised by the Economic and Social Council of the United Nations."

Under the first criterion, 48 least-developed countries defined as such by the United Nations are automatically contained in the list. Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of Congo (formerly

102. The decision to establish this list was taken on the understanding that:

> "[B]eing listed would not as such confer automatic benefits since, under the mechanisms covered by the Marrakesh Ministerial Decision, donors and the institutions concerned would have a role to play."[148]

(d) Differential treatment within the framework of an agreement on agricultural export credits

103. In 1997, the Singapore Ministerial Conference decided as follows:

> "[T]he provisions of paragraph 4 of the Marrakesh Ministerial Decision, whereby Ministers agreed to ensure that any agreement relating to agricultural export credits makes appropriate provision for differential treatment in favour of least-developed and net food-importing developing countries, be taken fully into account in the agreement to be negotiated on agricultural export credits."[149]

2. Article 16.2

(a) Notification requirements

104. For notification requirements and formats concerning the follow-up to the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries, see paragraphs 116–118 below.

(b) Opportunities for consultation

105. Paragraph 18 of the Organization of Work and Working Procedures of the Committee on Agriculture[150] states:

> "There shall be an opportunity at any regular meeting of the Committee to raise any matter relating to the Decision on Measures concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries."[151]

(c) Effectiveness

106. At its meeting on 15 December 2000, the General Council decided that:

> "The Committee on Agriculture shall examine possible means of improving the effectiveness of the implementation of the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries and report to the General Council at the second regular meeting of the Council in 2001.[152]"

107. Pursuant to this mandate, the Committee on Agriculture submitted seven recommendations that were adopted by the Doha Ministerial Conference.[153] The recommendations concerned: (i) food aid; (ii) technical and financial assistance in the context of aid programmes to improve agricultural productivity and infrastructure; (iii) financing normal levels of commercial imports of basic foodstuff; and (iv) review of follow-up. See Section XXIX below.

108. In its report submitted to the General Council on 4 July 2003, the Committee on Agriculture stated that it would continue to explore options and solutions within the framework of the Marrakesh NFIDC Decision to address short-term difficulties of LDCs and WTO NFIDCs in financing commercial imports of basic foodstuffs.[154] Pursuant to this the Committee further considered a pending proposal by the WTO Africa Group regarding the NFIDC Decision that was referred to the Committee by the Chairman of the General Council in the context of the review of all special and differential treatment provisions by the Committee on Trade and Development in Special Session.[155]

109. In the report of 4 July 2003 the Committee on Agriculture, while examining the possible means of improving the effectiveness of the implementation of paragraph 5 of the Marrakesh NFIDC Decision, forwarded the following recommendations for approval by the General Council:

> "(a) that in the context of the current review of the Poverty Reduction and Growth Facility and the Compensatory Financing Facility of the IMF, WTO Members, in their capacity as members of the IMF, consider the concerns by LDCs and WTO NFIDCs concerning short-term difficulties in financing commercial imports of basic foodstuffs; and

---

Zaire), Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea Bissau, Haiti, Kiribati, Lao People's Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Sierra Leone, Solomon Islands, Somalia, Sudan, Togo, Tuvalu, Uganda, United Republic of Tanzania, Vanuatu, Yemen and Zambia.

> "b) Any developing country Member of the WTO which was a net importer of basic foodstuffs in any three years of the most recent five-year period for which data are available and which notifies the Committee of its decision to be listed as a Net Food-Importing Developing Country for the purpose of the decision"

The list currently includes the following countries: Barbados, Botswana, Côte d'Ivoire, Cuba, Dominica, Dominican Republic, Egypt, Gabon, Honduras, Jamaica, Jordan, Kenya, Mauritius, Morocco, Namibia, Pakistan, Peru, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Senegal, Sri Lanka, Trinidad and Tobago, Tunisia and Venezuela. G/AG/5/Rev. 7.

148 G/AG/R/4, para. 17.

149 G/L/125. No such agreement has been reached as of 30 June 2001.

150 With respect to the adoption of the document, see para. 114 of this Chapter.

151 G/AG/1, para. 18.

152 WT/L/384, para. 1.2.

154 G/AG/16, para.4.

155 TN/CTD/W/3/Rev.2, para.52.

(b) that the General Council invite the World Bank and other relevant international organizations to report on the feasibility and effectiveness of commodity price risk management instruments for use by LDCs and WTO NFIDCs as part of strategies to address short-term difficulties in financing commercial imports of basic foodstuffs, in particular during phases of rising world market prices; and

(c) that, building on the work already undertaken, including the WTO roundtable of 19 May 2003, the Committee will continue to explore, as a matter of priority and on the basis of proposals submitted by Members, options and solutions within the framework of the Marrakesh NFIDC Decision to address short-term difficulties of LDCs and WTO NFIDCs in financing commercial imports of basic foodstuffs."[156]

110. The annual monitoring exercise on the follow-up to the NFIDC Decision as a whole was undertaken at the November meeting of the Committee, on the basis, *inter alia*, of Table NF:1 notifications by donor Members as well as contributions by the observer organizations.[157]

XVIII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17
Committee on Agriculture:

A Committee on Agriculture is hereby established.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

1. Committee on Agriculture

(a) Terms of reference

111. At its meeting on 31 January 1995 the General Council adopted the following terms of reference for the Committee on Agriculture:

"The Committee shall oversee the implementation of the Agreement on Agriculture. The Committee shall afford members the opportunity of consulting on any matter relating to the implementation of the provisions of the Agreement."[158]

(b) Rules of procedure

112. At its meeting of 22 May 1996, the Council for Trade in Goods adopted the rules of procedure for the Committee on Agriculture.[159]

(c) Activities

113. With respect to the initiation of the further negotiations on agriculture in February 2000, see paragraph 125 below.

XIX. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Review of the Implementation of Commitments

1. Progress in the implementation of commitments negotiated under the Uruguay Round reform programme shall be reviewed by the Committee on Agriculture.

2. The review process shall be undertaken on the basis of notifications submitted by Members in relation to such matters and at such intervals as shall be determined, as well as on the basis of such documentation as the Secretariat may be requested to prepare in order to facilitate the review process.

3. In addition to the notifications to be submitted under paragraph 2, any new domestic support measure, or modification of an existing measure, for which exemption from reduction is claimed shall be notified promptly. This notification shall contain details of the new or modified measure and its conformity with the agreed criteria as set out either in Article 6 or in Annex 2.

4. In the review process Members shall give due consideration to the influence of excessive rates of inflation on the ability of any Member to abide by its domestic support commitments.

5. Members agree to consult annually in the Committee on Agriculture with respect to their participation in the normal growth of world trade in agricultural products within the framework of the commitments on export subsidies under this Agreement.

6. The review process shall provide an opportunity for Members to raise any matter relevant to the implementation of commitments under the reform programme as set out in this Agreement.

7. Any Member may bring to the attention of the Committee on Agriculture any measure which it considers ought to have been notified by another Member.

---

[156] G/AG/16, para.19
[157] G/L/719, para.7.
[158] These terms of reference are those agreed by the Sub-Committee on Institutional, Procedural and Legal Matters of the Preparatory Committee for the World Trade Organization at its meeting on 7 October 1994 (PC/IPL/1), WT/L/43 (17 February 1995).
[159] G/C/M/10, section 1(i). The text of the adopted rules of procedure can be found in G/L/142.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

1. Article 18.2

(a) Review procedure

(i) General

114. At its first meeting on 27–28 March 1995, the Committee on Agriculture adopted the Organization of Work and Working Procedures.[160] The Committee decided, *inter alia*, that it:

> "Shall meet at regular intervals to review progress in the implementation of the Uruguay Round reform programme under Article 18:1 and 2 of the Agreement (the 'review process') and generally to carry out such other tasks as are provided for in the Agreement or which may be required to be dealt with."[161]

(ii) Transitional Review Mechanism under Paragraph 18 of the Protocol of Accession of the People's Republic of China

115. In accordance with the mandate of paragraph 2 of the Organization of Work and Working Procedures adopted by the Committee on Agriculture, the Committee was also to periodically review China's progress with regard to its commitments under the Agreement of Agriculture, as stated in the Transitional Review Mechanism of the Protocol of the Accession of the People's Republic of China.[162] At its regular meeting held on 23 September 2004[163] the Committee on Agriculture held its third annual Transitional Review under the Protocol of the Accession of the People's Republic of China, and submitted a report to the Council of Trade in Goods on China's transitional review.[164]

(b) Notification requirements

(i) General

116. At its meeting on 8 June 1995, the Committee on Agriculture adopted a document setting out the requirements and formats for notifications under Article 18:2 and other relevant provisions of the *Agreement on Agriculture.*[165] The document covers five areas: market access[166], domestic support[167], export subsidies[168], export prohibitions and restrictions[169], and the follow-up to the Decision on Measures Concerning the Possible Negative Effects of the Reform Programme on Least-Developed and Net Food-Importing Developing Countries.[170] In 1995, the Committee also adopted a list of "significant exporters". Those Members with significant exporters status are required to notify annually their total exports in respect of the products identified on the list.[171]

117. In its report of 19 November 2004 to the General Council on the regular meetings of the Committee on Agriculture, the, status of Member notifications issued for 1999–2003 as well as the outstanding notifications for the implementing years 1995–1998 were laid out.[172]

(ii) Developing countries

118. In the context of the General Council's consideration of implementation-related issues and concerns, the General Council decided, *inter alia*:[173]:

> "Members shall ensure that their tariff rate quotas regimes (TRQs) are administered in a transparent, equitable and non-discriminatory manner. In the context, they shall ensure that the notifications they provide to the Committee on Agriculture contain all the relevant information including details on guidelines and procedures on the allotment of TRQs. Members administering TRQs shall submit addenda to their notifications to the Committee on Agriculture (Table MA:1) by the time of the second regular meeting of the Committee in 2001. The understanding was that this decision should not place undue new burdens on developing countries (WT/GC/M/62, paragraph 14, refers)."[174]

2. Article 18.5

(a) Annual consultations

119. According to the Committee's Organization of Work and Working Procedures[175], these consultations are to be undertaken at the November meetings of the Committee.[176] In practice, these annual consultations have been based on annually updated statistical background notes provided by the Secretariat.[177]

120. Data is made available on not only those members who have made export subsidy reduction commitments[178] with respect to a particular product, but also Members that have been identified in the list of

"significant exporters" for the purpose of the Committee's notification requirements on export subsidy commitments. Those Members and Observers have also been included who have emerged as major exporters for a particular product during the period covered.

3. Article 18.6

121. In respect of the review process envisaged under Article 18.6, the Organization of Work and Working Procedures of the Committee[179] states, *inter alia*:

> "A Member raising a matter relevant to the implementation commitments under Article 18:6, may request the Member to which the matter in question relates, through the Chairperson of the Committee, to provide in writing specific information, or an explanation of the relevant facts or circumstances, regarding the matter that has been raised. The role of the Chairperson shall be to ensure that there are reasonable grounds for the request and that as far as possible duplication and unduly burdensome requests are avoided. The information or explanation thus requested should normally be provided to the Committee by the Member to which the request is addressed within 30 days."[180]

4. Article 18.7

(a) Counter notifications

122. The Organization of Work and Working Procedures[181] states, *inter alia*, that "counter notifications, shall be considered by the Committee at the earliest opportunity."[182]

XX. ARTICLE 19

A. TEXT OF ARTICLE 19

Article 19
Consultation and Dispute Settlement

The provisions of Articles XXII and XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding, shall apply to consultations and the settlement of disputes under this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 19

123. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *Agreement on Agriculture* were invoked:

	Case Name	Case Number	Invoked Articles
1	*EC – Poultry*	WT/DS69	Articles 4 and 5(1)(b)
2	*India – Quantitative Restrictions*	WT/DS90	Article 4.2
3	*Canada – Dairy*	WT/DS103, WT/DS113	Articles 1(e), 9.1(a), 9.1(c), 3.3, 8 and 10
4	*Canada – Dairy (Article 21.5 – New Zealand and US)*	WT/DS103, WT/DS113	Articles 3.3, 8, 9.1(c) and 10.1
5	*Canada – Dairy (Article 21.5 – New Zealand and US II)*	WT/DS103, WT/DS113	Articles 3.3, 8, 9.1(c), 10.1 and 10.3
6	*US – FSC*	WT/DS108	Articles 3, 3.8, 9.1 and 10.1
7	*US – FSC (Article 21.5 – EC)*	WT/DS108	Articles 3.3, 8 and 10.1
8	*Korea – Various Measures on Beef*	WT/DS161, WT/DS169	Articles 3, 4.2, 6, 7 and Annex 3
9	*Chile – Price Band System*	WT/DS207	Article 4.2 and Footnote 1

PART XII

XXI. ARTICLE 20

A. TEXT OF ARTICLE 20

Article 20
Continuation of the Reform Process

Recognizing that the long-term objective of substantial progressive reductions in support and protection resulting in fundamental reform is an ongoing process, Members agree that negotiations for continuing the process will be initiated one year before the end of the implementation period, taking into account:

(a) the experience to that date from implementing the reduction commitments;

(b) the effects of the reduction commitments on world trade in agriculture;

(c) non-trade concerns, special and differential treatment to developing country Members, and the objective to establish a fair and market-oriented agricultural trading system, and the other objectives and concerns mentioned in the preamble to this Agreement; and

(d) what further commitments are necessary to achieve the above mentioned long-term objectives.

[179] With respect to the adoption of the document, see para. 114 of this Chapter.
[180] G/AG/1, para. 12.
[181] See para. 114 of this Chapter.
[182] G/AG/1, para. 11.

B. INTERPRETATION AND APPLICATION OF ARTICLE 20

1. Decision of the Singapore Ministerial Conference

124. The Singapore Ministerial Conference decided as follows:

> "Bearing in mind that an important aspect of WTO activities is a continuous overseeing of the implementation of various agreements, a periodic examination and updating of the WTO Work Programme is a key to enable the WTO to fulfil its objectives. In this context, we endorse the reports of the various WTO bodies. A major share of the Work Programme stems from the WTO Agreement and decisions adopted at Marrakesh. As part of these Agreements and decisions we agreed to a number of provisions calling for future negotiations on Agriculture, ... We agree to a process of analysis and exchange of information, where provided for in the conclusions and recommendations of the relevant WTO bodies, on the Built-in Agenda issues, to allow Members to better understand the issues involved and identify their interests before undertaking the agreed negotiations and reviews. We agree that: the time frames established in the Agreements will be respected in each case."[183]

2. Decision to launch negotiations on agriculture

125. At its meeting of 7 and 8 February 2000, the General Council decided to launch a new negotiation round on agriculture, stating as follows:

> "[U]nder Article 20 of the Agreement on Agriculture, Members had agreed that negotiations for continuing the reform process would be initiated one year before the end of the implementation period, i.e. 1 January 2000. [. . .] However, a number of procedural matters remained to be settled before the work could start in practice. In this regard, and in the light of wide and intensive consultations with and among Members on the structure of the negotiations, [the Chairman] proposed that the negotiations be conducted in the Committee on Agriculture meeting in Special Sessions. Progress in the negotiations would be reported directly to the General Council on a regular basis."[184]

PART XIII

XXII. ARTICLE 21

A. TEXT OF ARTICLE 21

Article 21
Final Provisions

1. The provisions of GATT 1994 and of other Multilateral Trade Agreements in Annex 1A to the WTO Agreement shall apply subject to the provisions of this Agreement.

2. The Annexes to this Agreement are hereby made an integral part of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 21

126. In *EC – Bananas III*, the Panel rejected the European Communities argument that Articles 4.1 and 21.1 of the *Agreement on Agriculture* provided a justification for an inconsistency of the European Communities import scheme for bananas with Article XIII of *GATT 1994*.[185] The Appellate Body agreed with the Panel, stating:

> "The preamble of the *Agreement on Agriculture* states that it establishes 'a basis for initiating a process of reform of trade in agriculture' and that this reform process 'should be initiated through the negotiation of commitments on support and protection and through the establishment of strengthened and more operationally effective GATT rules and disciplines'. The relationship between the provisions of the GATT 1994 and of the *Agreement on Agriculture* is set out in Article 21.1 of the *Agreement on Agriculture*:
>
> . . .
>
> Therefore, the provisions of the GATT 1994, including Article XIII, apply to market access commitments concerning agricultural products, except to the extent that the *Agreement on Agriculture* contains specific provisions dealing specifically with the same matter.
>
> . . .
>
> In our view, Article 4.1 does more than merely indicate where market access concessions and commitments for agricultural products are to be found. Article 4.1 acknowledges that significant, new market access concessions, in the form of new bindings and reductions of tariffs as well as other market access commitments (i.e. those made as a result of the tariffication process), were made as a result of the Uruguay Round negotiations on agriculture and included in Members' GATT 1994 Schedules. These concessions are fundamental to the agricultural reform process that is a fundamental objective of the *Agreement on Agriculture*."[186]

[186] Appellate Body Report on *EC – Bananas III*, paras. 155–156.

XXIII. ANNEX 1

A. TEXT OF ANNEX 1

Annex 1
Product Coverage

1. This Agreement shall cover the following products:

(i) HS Chapters 1 to 24 less fish and fish products, plus*

(ii)	HS Code	2905.43	(mannitol)
	HS Code	2905.44	(sorbitol)
	HS Heading	33.01	(essential oils)
	HS Headings	35.01 to 35.05	(albuminoidal substances, modified starches, glues)
	HS Code	3809.10	(finishing agents)
	HS Code	3823.60	(sorbitol n.e.p.)
	HS Headings	41.01 to 41.03	(hides and skins)
	HS Heading	43.01	(raw furskins)
	HS Headings	50.01 to 50.03	(raw silk and silk waste)
	HS Headings	51.01 to 51.03	(wool and animal hair)
	HS Headings	52.01 to 52.03	(raw cotton, waste and cotton carded or combed)
	HS Heading	53.01	(raw flax)
	HS Heading	53.02	(raw hemp)

2. The foregoing shall not limit the product coverage of the Agreement on the Application of Sanitary and Phytosanitary Measures.

*The product descriptions in round brackets are not necessarily exhaustive.

B. INTERPRETATION AND APPLICATION OF ANNEX 1

No jurisprudence or decision of a competent WTO body.

XXIV. ANNEX 2

A. TEXT OF ANNEX 2

Annex 2
Domestic Support: The Basis for Exemption from the Reduction Commitments

1. Domestic support measures for which exemption from the reduction commitments is claimed shall meet the fundamental requirement that they have no, or at most minimal, trade-distorting effects or effects on production. Accordingly, all measures for which exemption is claimed shall conform to the following basic criteria:

(a) the support in question shall be provided through a publicly-funded government programme (including government revenue foregone) not involving transfers from consumers; and,

(b) the support in question shall not have the effect of providing price support to producers;

plus policy-specific criteria and conditions as set out below.

Government Service Programmes

2. General services

Policies in this category involve expenditures (or revenue foregone) in relation to programmes which provide services or benefits to agriculture or the rural community. They shall not involve direct payments to producers or processors. Such programmes, which include but are not restricted to the following list, shall meet the general criteria in paragraph 1 above and policy-specific conditions where set out below:

(a) research, including general research, research in connection with environmental programmes, and research programmes relating to particular products;

(b) pest and disease control, including general and product-specific pest and disease control measures, such as early-warning systems, quarantine and eradication;

(c) training services, including both general and specialist training facilities;

(d) extension and advisory services, including the provision of means to facilitate the transfer of information and the results of research to producers and consumers;

(e) inspection services, including general inspection services and the inspection of particular products for health, safety, grading or standardization purposes;

(f) marketing and promotion services, including market information, advice and promotion relating to particular products but excluding expenditure for unspecified purposes that could be used by sellers to reduce their selling price or confer a direct economic benefit to purchasers; and

(g) infrastructural services, including: electricity reticulation, roads and other means of transport, market and port facilities, water supply facilities, dams and drainage schemes, and infrastructural works associated with environmental programmes. In all cases the expenditure shall be directed to the provision or construction of capital works only, and shall

exclude the subsidized provision of on-farm facilities other than for the reticulation of generally available public utilities. It shall not include subsidies to inputs or operating costs, or preferential user charges.

3. Public stockholding for food security purposes[5]

(*footnote original*) [5] For the purposes of paragraph 3 of this Annex, governmental stockholding programmes for food security purposes in developing countries whose operation is transparent and conducted in accordance with officially published objective criteria or guidelines shall be considered to be in conformity with the provisions of this paragraph, including programmes under which stocks of foodstuffs for food security purposes are acquired and released at administered prices, provided that the difference between the acquisition price and the external reference price is accounted for in the AMS.

Expenditures (or revenue foregone) in relation to the accumulation and holding of stocks of products which form an integral part of a food security programme identified in national legislation. This may include government aid to private storage of products as part of such a programme.

The volume and accumulation of such stocks shall correspond to predetermined targets related solely to food security. The process of stock accumulation and disposal shall be financially transparent. Food purchases by the government shall be made at current market prices and sales from food security stocks shall be made at no less than the current domestic market price for the product and quality in question.

4. Domestic food aid[6]

(*footnote original*) [5 & 6] For the purposes of paragraphs 3 and 4 of this Annex, the provision of foodstuffs at subsidized prices with the objective of meeting food requirements of urban and rural poor in developing countries on a regular basis at reasonable prices shall be considered to be in conformity with the provisions of this paragraph.

Expenditures (or revenue foregone) in relation to the provision of domestic food aid to sections of the population in need.

Eligibility to receive the food aid shall be subject to clearly-defined criteria related to nutritional objectives. Such aid shall be in the form of direct provision of food to those concerned or the provision of means to allow eligible recipients to buy food either at market or at subsidized prices. Food purchases by the government shall be made at current market prices and the financing and administration of the aid shall be transparent.

5. Direct payments to producers

Support provided through direct payments (or revenue foregone, including payments in kind) to producers for which exemption from reduction commitments is claimed shall meet the basic criteria set out in paragraph 1 above, plus specific criteria applying to individual types of direct payment as set out in paragraphs 6 through 13 below. Where exemption from reduction is claimed for any existing or new type of direct payment other than those specified in paragraphs 6 through 13, it shall conform to criteria (b) through (e) in paragraph 6, in addition to the general criteria set out in paragraph 1.

6. Decoupled income support

(a) Eligibility for such payments shall be determined by clearly-defined criteria such as income, status as a producer or landowner, factor use or production level in a defined and fixed base period.

(b) The amount of such payments in any given year shall not be related to, or based on, the type or volume of production (including livestock units) undertaken by the producer in any year after the base period.

(c) The amount of such payments in any given year shall not be related to, or based on, the prices, domestic or international, applying to any production undertaken in any year after the base period.

(d) The amount of such payments in any given year shall not be related to, or based on, the factors of production employed in any year after the base period.

(e) No production shall be required in order to receive such payments.

7. Government financial participation in income insurance and income safety-net programmes

(a) Eligibility for such payments shall be determined by an income loss, taking into account only income derived from agriculture, which exceeds 30 per cent of average gross income or the equivalent in net income terms (excluding any payments from the same or similar schemes) in the preceding three-year period or a three-year average based on the preceding five-year period, excluding the highest and the lowest entry. Any producer meeting this condition shall be eligible to receive the payments.

(b) The amount of such payments shall compensate for less than 70 per cent of the producer's income loss in the year the producer becomes eligible to receive this assistance.

(c) The amount of any such payments shall relate solely to income; it shall not relate to the type or volume of production (including livestock units) undertaken by the producer; or to the prices, domestic or international, applying to such production; or to the factors of production employed.

(d) Where a producer receives in the same year payments under this paragraph and under paragraph 8 (relief from natural disasters), the total of such payments shall be less than 100 per cent of the producer's total loss.

8. Payments (made either directly or by way of government financial participation in crop insurance schemes) for relief from natural disasters

(a) Eligibility for such payments shall arise only following a formal recognition by government authorities that a natural or like disaster (including disease outbreaks, pest infestations, nuclear accidents, and war on the territory of the Member concerned) has occurred or is occurring; and shall be determined by a production loss which exceeds 30 per cent of the average of production in the preceding three-year period or a three-year average based on the preceding five-year period, excluding the highest and the lowest entry.

(b) Payments made following a disaster shall be applied only in respect of losses of income, livestock (including payments in connection with the veterinary treatment of animals), land or other production factors due to the natural disaster in question.

(c) Payments shall compensate for not more than the total cost of replacing such losses and shall not require or specify the type or quantity of future production.

(d) Payments made during a disaster shall not exceed the level required to prevent or alleviate further loss as defined in criterion (b) above.

(e) Where a producer receives in the same year payments under this paragraph and under paragraph 7 (income insurance and income safety-net programmes), the total of such payments shall be less than 100 per cent of the producer's total loss.

9. Structural adjustment assistance provided through producer retirement programmes

(a) Eligibility for such payments shall be determined by reference to clearly defined criteria in programmes designed to facilitate the retirement of persons engaged in marketable agricultural production, or their movement to non-agricultural activities.

(b) Payments shall be conditional upon the total and permanent retirement of the recipients from marketable agricultural production.

10. Structural adjustment assistance provided through resource retirement programmes

(a) Eligibility for such payments shall be determined by reference to clearly defined criteria in programmes designed to remove land or other resources, including livestock, from marketable agricultural production.

(b) Payments shall be conditional upon the retirement of land from marketable agricultural production for a minimum of three years, and in the case of livestock on its slaughter or definitive permanent disposal.

(c) Payments shall not require or specify any alternative use for such land or other resources which involves the production of marketable agricultural products.

(d) Payments shall not be related to either the type or quantity of production or to the prices, domestic or international, applying to production undertaken using the land or other resources remaining in production.

11. Structural adjustment assistance provided through investment aids

(a) Eligibility for such payments shall be determined by reference to clearly-defined criteria in government programmes designed to assist the financial or physical restructuring of a producer's operations in response to objectively demonstrated structural disadvantages. Eligibility for such programmes may also be based on a clearly-defined government programme for the reprivatization of agricultural land.

(b) The amount of such payments in any given year shall not be related to, or based on, the type or volume of production (including livestock units) undertaken by the producer in any year after the base period other than as provided for under criterion (e) below.

(c) The amount of such payments in any given year shall not be related to, or based on, the prices, domestic or international, applying to any production undertaken in any year after the base period.

(d) The payments shall be given only for the period of time necessary for the realization of the investment in respect of which they are provided.

(e) The payments shall not mandate or in any way designate the agricultural products to be produced by the recipients except to require them not to produce a particular product.

(f) The payments shall be limited to the amount required to compensate for the structural disadvantage.

12. Payments under environmental programmes

(a) Eligibility for such payments shall be determined as part of a clearly-defined government

environmental or conservation programme and be dependent on the fulfilment of specific conditions under the government programme, including conditions related to production methods or inputs.

(b) The amount of payment shall be limited to the extra costs or loss of income involved in complying with the government programme.

13. Payments under regional assistance programmes

(a) Eligibility for such payments shall be limited to producers in disadvantaged regions. Each such region must be a clearly designated contiguous geographical area with a definable economic and administrative identity, considered as disadvantaged on the basis of neutral and objective criteria clearly spelt out in law or regulation and indicating that the region's difficulties arise out of more than temporary circumstances.

(b) The amount of such payments in any given year shall not be related to, or based on, the type or volume of production (including livestock units) undertaken by the producer in any year after the base period other than to reduce that production.

(c) The amount of such payments in any given year shall not be related to, or based on, the prices, domestic or international, applying to any production undertaken in any year after the base period.

(d) Payments shall be available only to producers in eligible regions, but generally available to all producers within such regions.

(e) Where related to production factors, payments shall be made at a degressive rate above a threshold level of the factor concerned.

(f) The payments shall be limited to the extra costs or loss of income involved in undertaking agricultural production in the prescribed area.

B. INTERPRETATION AND APPLICATION OF ANNEX 2

No jurisprudence or decision of a competent WTO body.

XXV. ANNEX 3

A. TEXT OF ANNEX 3

Annex 3

Domestic Support: Calculation of Aggregate Measurement of Support

1. Subject to the provisions of Article 6, an Aggregate Measurement of Support (AMS) shall be calculated on a product-specific basis for each basic agricultural product receiving market price support, non-exempt direct payments, or any other subsidy not exempted from the reduction commitment ("other non-exempt policies"). Support which is non-product specific shall be totalled into one non-product-specific AMS in total monetary terms.

2. Subsidies under paragraph 1 shall include both budgetary outlays and revenue foregone by governments or their agents.

3. Support at both the national and sub-national level shall be included.

4. Specific agricultural levies or fees paid by producers shall be deducted from the AMS.

5. The AMS calculated as outlined below for the base period shall constitute the base level for the implementation of the reduction commitment on domestic support.

6. For each basic agricultural product, a specific AMS shall be established, expressed in total monetary value terms.

7. The AMS shall be calculated as close as practicable to the point of first sale of the basic agricultural product concerned. Measures directed at agricultural processors shall be included to the extent that such measures benefit the producers of the basic agricultural products.

8. Market price support: market price support shall be calculated using the gap between a fixed external reference price and the applied administered price multiplied by the quantity of production eligible to receive the applied administered price. Budgetary payments made to maintain this gap, such as buying-in or storage costs, shall not be included in the AMS.

9. The fixed external reference price shall be based on the years 1986 to 1988 and shall generally be the average f.o.b. unit value for the basic agricultural product concerned in a net exporting country and the average c.i.f. unit value for the basic agricultural product concerned in a net importing country in the base period. The fixed reference price may be adjusted for quality differences as necessary.

10. Non-exempt direct payments: non-exempt direct payments which are dependent on a price gap shall be calculated either using the gap between the fixed reference price and the applied administered price multiplied by the quantity of production eligible to receive the administered price, or using budgetary outlays.

11. The fixed reference price shall be based on the years 1986 to 1988 and shall generally be the actual price used for determining payment rates.

12. Non-exempt direct payments which are based on factors other than price shall be measured using budgetary outlays.

13. Other non-exempt measures, including input subsidies and other measures such as marketing-cost

reduction measures: the value of such measures shall be measured using government budgetary outlays or, where the use of budgetary outlays does not reflect the full extent of the subsidy concerned, the basis for calculating the subsidy shall be the gap between the price of the subsidized good or service and a representative market price for a similar good or service multiplied by the quantity of the good or service.

B. INTERPRETATION AND APPLICATION OF ANNEX 3

127. In *Korea – Various Measures on Beef*, the Panel and the Appellate Body addressed Korea's argument that its method for calculation of domestic support was justifiable because it was based upon "the constituent data and methodology used in the tables of supporting material incorporated by reference in Part IV of the Member's Schedule", although it was not consistent with the methodology set out in Annex 3 to the *Agreement on Agriculture*. See paragraphs 3–5 above.

128. Further, in *Korea – Various Measures on Beef*, the Appellate Body agreed with the Panel that in determining its market price support for beef, Korea had used the quantity of cattle actually purchased, in contravention of paragraph 8 of Annex 3. The Appellate Body stated:

> "We share the Panel's view that the words 'production *eligible* to receive the applied administered price' in paragraph 8 of Annex 3 have a different meaning in ordinary usage from 'production *actually purchased*'. The ordinary meaning of 'eligible' is 'fit or *entitled* to be chosen'.[187] Thus, 'production eligible' refers to production that is 'fit or entitled' to be purchased rather than production that was actually purchased. In establishing its program for future market price support, a government is able to define and to limit 'eligible' production. Production actually purchased may often be less than eligible production."[188]

XXVI. ANNEX 4

A. TEXT OF ANNEX 4

Annex 4
Domestic Support: Calculation of Equivalent Measurement of Support

1. Subject to the provisions of Article 6, equivalent measurements of support shall be calculated in respect of all basic agricultural products where market price support as defined in Annex 3 exists but for which calculation of this component of the AMS is not practicable. For such products the base level for implementation of the domestic support reduction commitments shall consist of a market price support component expressed in terms of equivalent measurements of support under paragraph 2 below, as well as any non-exempt direct payments and other non-exempt support, which shall be evaluated as provided for under paragraph 3 below. Support at both national and sub-national level shall be included.

2. The equivalent measurements of support provided for in paragraph 1 shall be calculated on a product-specific basis for all basic agricultural products as close as practicable to the point of first sale receiving market price support and for which the calculation of the market price support component of the AMS is not practicable. For those basic agricultural products, equivalent measurements of market price support shall be made using the applied administered price and the quantity of production eligible to receive that price or, where this is not practicable, on budgetary outlays used to maintain the producer price.

3. Where basic agricultural products falling under paragraph 1 are the subject of non-exempt direct payments or any other product-specific subsidy not exempted from the reduction commitment, the basis for equivalent measurements of support concerning these measures shall be calculations as for the corresponding AMS components (specified in paragraphs 10 through 13 of Annex 3).

4. Equivalent measurements of support shall be calculated on the amount of subsidy as close as practicable to the point of first sale of the basic agricultural product concerned. Measures directed at agricultural processors shall be included to the extent that such measures benefit the producers of the basic agricultural products. Specific agricultural levies or fees paid by producers shall reduce the equivalent measurements of support by a corresponding amount.

B. INTERPRETATION AND APPLICATION OF ANNEX 4

No jurisprudence or decision of a competent WTO body.

XXVII. ANNEX 5

A. TEXT OF ANNEX 5

Annex 5
Special Treatment with Respect to Paragraph 2 of Article 4

Section A

1. The provisions of paragraph 2 of Article 4 shall not apply with effect from the entry into force of the WTO Agreement to any primary agricultural product and its worked and/or prepared products ("designated products") in respect of which the following conditions are

[187] (*footnote original*) *The Concise Oxford English Dictionary*, (Clarendon Press, 1995), p. 438.
[188] Appellate Body Report on *Korea – Various Measures on Beef*, para. 120.

complied with (hereinafter referred to as "special treatment"):

(a) imports of the designated products comprised less than 3 per cent of corresponding domestic consumption in the base period 1986–1988 ("the base period");

(b) no export subsidies have been provided since the beginning of the base period for the designated products;

(c) effective production-restricting measures are applied to the primary agricultural product;

(d) such products are designated with the symbol "ST-Annex 5" in Section I-B of Part I of a Member's Schedule annexed to the Marrakesh Protocol, as being subject to special treatment reflecting factors of non-trade concerns, such as food security and environmental protection; and

(e) minimum access opportunities in respect of the designated products correspond, as specified in Section I-B of Part I of the Schedule of the Member concerned, to 4 per cent of base period domestic consumption of the designated products from the beginning of the first year of the implementation period and, thereafter, are increased by 0.8 per cent of corresponding domestic consumption in the base period per year for the remainder of the implementation period.

2. At the beginning of any year of the implementation period a Member may cease to apply special treatment in respect of the designated products by complying with the provisions of paragraph 6. In such a case, the Member concerned shall maintain the minimum access opportunities already in effect at such time and increase the minimum access opportunities by 0.4 per cent of corresponding domestic consumption in the base period per year for the remainder of the implementation period. Thereafter, the level of minimum access opportunities resulting from this formula in the final year of the implementation period shall be maintained in the Schedule of the Member concerned.

3. Any negotiation on the question of whether there can be a continuation of the special treatment as set out in paragraph 1 after the end of the implementation period shall be completed within the time-frame of the implementation period itself as a part of the negotiations set out in Article 20 of this Agreement, taking into account the factors of non-trade concerns.

4. If it is agreed as a result of the negotiation referred to in paragraph 3 that a Member may continue to apply the special treatment, such Member shall confer additional and acceptable concessions as determined in that negotiation.

5. Where the special treatment is not to be continued at the end of the implementation period, the Member concerned shall implement the provisions of paragraph 6. In such a case, after the end of the implementation period the minimum access opportunities for the designated products shall be maintained at the level of 8 per cent of corresponding domestic consumption in the base period in the Schedule of the Member concerned.

6. Border measures other than ordinary customs duties maintained in respect of the designated products shall become subject to the provisions of paragraph 2 of Article 4 with effect from the beginning of the year in which the special treatment ceases to apply. Such products shall be subject to ordinary customs duties, which shall be bound in the Schedule of the Member concerned and applied, from the beginning of the year in which special treatment ceases and thereafter, at such rates as would have been applicable had a reduction of at least 15 per cent been implemented over the implementation period in equal annual instalments. These duties shall be established on the basis of tariff equivalents to be calculated in accordance with the guidelines prescribed in the attachment hereto.

Section B

7. The provisions of paragraph 2 of Article 4 shall also not apply with effect from the entry into force of the WTO Agreement to a primary agricultural product that is the predominant staple in the traditional diet of a developing country Member and in respect of which the following conditions, in addition to those specified in paragraph 1(a) through 1(d), as they apply to the products concerned, are complied with:

(a) minimum access opportunities in respect of the products concerned, as specified in Section I-B of Part I of the Schedule of the developing country Member concerned, correspond to 1 per cent of base period domestic consumption of the products concerned from the beginning of the first year of the implementation period and are increased in equal annual instalments to 2 per cent of corresponding domestic consumption in the base period at the beginning of the fifth year of the implementation period. From the beginning of the sixth year of the implementation period, minimum access opportunities in respect of the products concerned correspond to 2 per cent of corresponding domestic consumption in the base period and are increased in equal annual instalments to 4 per cent of corresponding domestic consumption in the base period until the beginning of the 10th year. Thereafter, the level of minimum access opportunities resulting from this formula in the 10th year shall be maintained in the Schedule of the developing country Member concerned;

(b) appropriate market access opportunities have been provided for in other products under this Agreement.

8. Any negotiation on the question of whether there can be a continuation of the special treatment as set out in paragraph 7 after the end of the 10th year following the beginning of the implementation period shall be initiated and completed within the time-frame of the 10th year itself following the beginning of the implementation period.

9. If it is agreed as a result of the negotiation referred to in paragraph 8 that a Member may continue to apply the special treatment, such Member shall confer additional and acceptable concessions as determined in that negotiation.

10. In the event that special treatment under paragraph 7 is not to be continued beyond the 10th year following the beginning of the implementation period, the products concerned shall be subject to ordinary customs duties, established on the basis of a tariff equivalent to be calculated in accordance with the guidelines prescribed in the attachment hereto, which shall be bound in the Schedule of the Member concerned. In other respects, the provisions of paragraph 6 shall apply as modified by the relevant special and differential treatment accorded to developing country Members under this Agreement.

Attachment to Annex 5

Guidelines for the Calculation of Tariff Equivalents for the Specific Purpose Specified in Paragraphs 6 and 10 of this Annex

1. The calculation of the tariff equivalents, whether expressed as ad valorem or specific rates, shall be made using the actual difference between internal and external prices in a transparent manner. Data used shall be for the years 1986 to 1988. Tariff equivalents:

(a) shall primarily be established at the four-digit level of the HS;

(b) shall be established at the six-digit or a more detailed level of the HS wherever appropriate;

(c) shall generally be established for worked and/or prepared products by multiplying the specific tariff equivalent(s) for the primary agricultural product(s) by the proportion(s) in value terms or in physical terms as appropriate of the primary agricultural product(s) in the worked and/or prepared products, and take account, where necessary, of any additional elements currently providing protection to industry.

2. External prices shall be, in general, actual average c.i.f. unit values for the importing country. Where average c.i.f. unit values are not available or appropriate, external prices shall be either:

(a) appropriate average c.i.f. unit values of a near country; or

(b) estimated from average f.o.b. unit values of (an) appropriate major exporter(s) adjusted by adding an estimate of insurance, freight and other relevant costs to the importing country.

3. The external prices shall generally be converted to domestic currencies using the annual average market exchange rate for the same period as the price data.

4. The internal price shall generally be a representative wholesale price ruling in the domestic market or an estimate of that price where adequate data is not available.

5. The initial tariff equivalents may be adjusted, where necessary, to take account of differences in quality or variety using an appropriate coefficient.

6. Where a tariff equivalent resulting from these guidelines is negative or lower than the current bound rate, the initial tariff equivalent may be established at the current bound rate or on the basis of national offers for that product.

7. Where an adjustment is made to the level of a tariff equivalent which would have resulted from the above guidelines, the Member concerned shall afford, on request, full opportunities for consultation with a view to negotiating appropriate solutions.

B. INTERPRETATION AND APPLICATION OF ANNEX 5

No jurisprudence or decision of a competent WTO body.

XXVIII. RELATIONSHIP WITH OTHER WTO AGREEMENTS

A. SCM AGREEMENT

129. The Appellate Body, in *Canada – Dairy* and *US – FSC*, referred to the *SCM Agreement*, in defining the term "subsidy" under the *Agreement on Agriculture*. See paragraph 6 above.[189]

130. Also, the Appellate Body, in *US – FSC*, referred to the *SCM Agreement*, in interpreting the concept of export contingency under the *Agreement on Agriculture*. See paragraph 9 above.[190]

[189] See also Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 187–196.

[190] See also Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 187–196.

XXIX. DECISION ON MEASURES CONCERNING THE POSSIBLE NEGATIVE EFFECTS OF THE REFORM PROGRAMME ON LEAST-DEVELOPED AND NET FOOD-IMPORTING DEVELOPING COUNTRIES (THE "NFIDC DECISION")

A. TEXT OF THE DECISION

1. *Ministers recognize* that the progressive implementation of the results of the Uruguay Round as a whole will generate increasing opportunities for trade expansion and economic growth to the benefit of all participants.

2. *Ministers recognize* that during the reform programme leading to greater liberalization of trade in agriculture least-developed and net food-importing developing countries may experience negative effects in terms of the availability of adequate supplies of basic foodstuffs from external sources on reasonable terms and conditions, including short-term difficulties in financing normal levels of commercial imports of basic foodstuffs.

3. *Ministers* accordingly *agree* to establish appropriate mechanisms to ensure that the implementation of the results of the Uruguay Round on trade in agriculture does not adversely affect the availability of food aid at a level which is sufficient to continue to provide assistance in meeting the food needs of developing countries, especially least-developed and net food-importing developing countries. To this end *Ministers agree*:

(i) to review the level of food aid established periodically by the Committee on Food Aid under the Food Aid Convention 1986 and to initiate negotiations in the appropriate forum to establish a level of food aid commitments sufficient to meet the legitimate needs of developing countries during the reform programme;

(ii) to adopt guidelines to ensure that an increasing proportion of basic foodstuffs is provided to least-developed and net food-importing developing countries in fully grant form and/or on appropriate concessional terms in line with Article IV of the Food Aid Convention 1986;

(iii) to give full consideration in the context of their aid programmes to requests for the provision of technical and financial assistance to least-developed and net food-importing developing countries to improve their agricultural productivity and infrastructure.

4. *Ministers* further *agree* to ensure that any agreement relating to agricultural export credits makes appropriate provision for differential treatment in favour of least-developed and net food-importing developing countries.

5. *Ministers recognize* that as a result of the Uruguay Round certain developing countries may experience short-term difficulties in financing normal levels of commercial imports and that these countries may be eligible to draw on the resources of international financial institutions under existing facilities, or such facilities as may be established, in the context of adjustment programmes, in order to address such financing difficulties. In this regard Ministers take note of paragraph 37 of the report of the Director-General to the CONTRACTING PARTIES to GATT 1947 on his consultations with the Managing Director of the International Monetary Fund and the President of the World Bank (MTN.GNG/NG14/W/35).

6. The provisions of this Decision will be subject to regular review by the Ministerial Conference, and the follow-up to this Decision shall be monitored, as appropriate, by the Committee on Agriculture.

B. INTERPRETATION AND APPLICATION OF THE DECISION

1. Paragraph 3

(a) Paragraphs 3(i) and (ii)

131. In accordance with the mandate in paragraphs 3(i) and (ii), the Doha Ministerial Conference adopted the following recommendations, submitted by the Committee on Agriculture[191]:

"(a) That early action be taken within the framework of the Food Aid Convention 1999 (which unless extended, with or without a decision regarding its renegotiation, would expire on 30 June 2002) and of the UN World Food Programme by donors of food aid to review their food aid contributions with a view to better identifying and meeting the food aid needs of least-developed and WTO net food-importing developing countries;

(b) WTO Members which are donors of food aid shall, within the framework of their food aid policies, statues, programmes and commitments, take appropriate measures aimed at ensuring: (i) that to the maximum extent possible their levels of food aid to developing countries are maintained during periods in which trends in world market prices of basic foodstuffs have been increasing; and (ii) that all food aid to least developed countries is provided in fully grant form and, to the maximum extent possible to WTO net food-importing developing countries as well."[192]

(i) Extension of the Food Aid Convention

132. With regard to the recommendation in paragraph (a) above, which noted that the Food Aid

[191] Document G/AG/11.
[192] WT/MIN(01)/17, para. 2.2.

Convention,1999, was due to expire on 30 June 2002, the meeting of the Food Aid Committee in December 2002, agreed in principle to a two-year extension of the Convention from 1 July 2003. The further extension of the Convention to 30 June 2005 was decided by the Food Aid Committee at its Session on 23 June 2003.[193]

(b) Paragraph 3(iii)

133. The mandate in paragraph 3(iii) was developed by the following two recommendations on Technical and Financial Assistance in the Context of Aid Programmes to Improve Agricultural Productivity and Infrastructure, adopted at the Doha Ministerial Conference:

"(a) . . . developed country WTO Members should continue to give full and favourable consideration in the context of their aid programmes to requests for the provision of technical and financial assistance by least-developed and net food-importing developing countries to improve their agricultural productivity and infrastructure;

(b) . . . in support of the priority accorded by least-developed and net food-importing developing countries to the development of their agricultural productivity and infrastructure, the WTO General Council call upon relevant international developed organisations, including the World Bank, the FAO, IFAD, the UNDP and the Regional Development Banks to enhance their provision of, and access to, technical and financial assistance to least-developed and net food-importing developing countries, on terms and conditions conducive to the better use of such facilities and resources, in order to improve agricultural productivity and infrastructure in these countries under existing facilities and programmes, as well as under such facilities and programmes as may be introduced."[194]

2. Paragraph 4

134. In relation to paragraph 4, the Doha Ministerial Conference adopted the following recommendation:

"(a) that the provision of paragraph 4 of the Marrakesh Ministerial Decision, which provide for differential treatment in favour of least-developed and WTO net food-importing developing countries, shall be taken fully into account in any agreement to be negotiated on disciplines on agricultural export credits pursuant to Article 10.2 of the Agreement on Agriculture;"[195]

3. Paragraph 5

(a) The Inter-Agency Panel

135. In relation to paragraph 5 and in order to counter the difficulties in financing normal levels of commercial imports of basic foodstuff faced by certain developing countries, Members at the Doha Ministerial Conference adopted the recommendation, submitted by the Committee on Agriculture, to establish an Inter-Agency Panel on Short-Term Difficulties in Financing Normal Levels of Commercial Imports of Basic Foodstuffs ("Inter-Agency Panel"):

"(b) That an inter-agency panel of financial and commodity experts be established, with the requested participation of the World Bank, the IMF, the FAO, the International Grains Council and the UNCTAD, to explore ways and means for improving access by least-developed and WTO net food-importing developing countries to multilateral programs and facilities to assist with short term difficulties in financing normal levels of commercial imports of basic foodstuffs, as well as the concept and feasibility of the proposal for the establishment of a revolving fund in G/AG/W/49 and Add.1 and Corr.1. The detailed terms of reference, drawing on the Marrakesh NFIDC Decision, should be submitted by the Vice-Chairman of the WTO Committee on Agriculture, following consultations with Members, to the General Council for approval by not later than 31 December 2001. The inter-agency panel shall submit its recommendation to the General Council by not later than 30 June 2002."[196]

136. In accordance with the recommendations adopted by the Doha Ministerial Conference, the General Council at its meeting on 19 and 20 December 2001 adopted the following terms of reference for the Inter-Agency Panel within the framework of the NFIDC Decision:[197]

"1. To examine the terms and conditions of existing facilities of the international financial institutions (namely: IMF and the World Bank) to which the least-developed and WTO net food-importing developing countries could have recourse in order to address short-term difficulties in financing normal levels of commercial imports of basic foodstuffs, principally cereals, rice, basic dairy products, pulses, vegetable oils and sugar, during periods of rising world prices for such basic foodstuffs, including, as appropriate, other relevant sources of concessional financing; this examination shall take into account, *inter alia*, such submissions as may be submitted to the Panel by least-developed and WTO net food-importing developing countries, donors and the relevant international financial institutions, by no later than end-March 2002;

[193] G/AG/16.
[194] WT/MIN(01)/17, para. 2.2. The text of the adopted recommendations can be found in G/AG/11.
[195] WT/MIN(01)/17, para. 2.2. The text of the adopted recommendation can be found in G/AG/11.
[196] WT/MIN(01)/17, para. 2.2. The text of the adopted document can be found in G/AG/11.
[197] WT/GC/70, (para. j).

2. To examine the concept and feasibility of the proposal for the establishment of a revolving fund in documents G/AG/W/49 and Add.1 and Corr.1, together with any further elaboration of those proposals as may be submitted to the Panel by the sponsoring Members concerned before the end of March 2002;

3. In the light of its review and examination under paragraphs (1) and (2) above and having regard to the Marrakesh NFIDC Decision, to make such recommendations for the consideration of the WTO General Council as the Panel considers appropriate regarding: ways and means for improving access by least-developed and WTO net food-importing developing countries to multilateral programmes and facilities to assist with short-term difficulties in financing normal levels of commercial imports of basic foodstuffs;

4. In carrying out its task the Panel may consult with such bodies or institutions as it considers appropriate;

5. The Panel shall submit its report and recommendations to the WTO General Council by no later than 30 June 2002."[198]

137. The Inter-Agency Panel submitted its report to the General Council on 28 June 2002.[199] In its Report, the Inter-Agency Panel made four recommendations:

"[C]oncerning ways and means for improving access by LDCs and NFIDCs to multilateral programme and facilities to assist with short-term difficulties in financing normal levels of commercial imports of basic foodstuffs:

(a) that in the context of the impending review of the CFF of the IMF, consideration be given by member governments to

  (i) extending the product coverage of the facility to cover all basic foodstuffs,

  (ii) clarifying access in the context of an existing arrangement with the IMF,

  (iii) providing a greater degree of automaticity without requiring an IMF-supported programme,

  (iv) reviewing the procedures and timeliness of disbursements, as well as encouraging governments to come forward with purchase requests;

(b) that in the light of the limited potential usefulness of an ex-post revolving fund to support food imports in time of need, the feasibility of an ex-ante financing mechanism aimed at food importers be explored;

(c) that the terms of reference of the Diagnostic Trade Integration Studies to be undertaking in the context of the Integrated Framework include, as appropriate and if requested by the beneficiary country, the items of

  (i) food security implications of trade development strategies,

  (ii) availability of, and access to, adequate financing, in particular by the private sector, to support food imports;

(d) that strategies of commodity price risk management from the perspective of developing country food importers be addressed by the Commodity Price Risk Management Group of the World Bank."[200]

138. At its meeting on 15 October 2002 the General Council approved these four recommendations, with the amendments proposed by the Committee on Agriculture:

"[W]ith regard to the recommendations in Paragraphs 168 (a), (c) and (d), that the General Council authorize him, as Chairman [of the General Council], to write to the IMF, World Bank and the Integrated Framework Agencies requesting them to review the Panel report as it related to the issue within their competence. Finally, with regard to the recommendation in Paragraph 168 (b), he proposed that the General Council approve to the recommendation of the Committee on Agriculture that the question on feasibility of an ex-ante financing mechanism aimed at food importers be pursued by Committee, on the understanding that a proposal regarding the establishment of an ex-ante financing mechanism would be submitted by the WTO net food-importing developing countries, and follow-up report concerning the discussion of the proposal be submitted to the General Council following the regular meeting of the Committee in November."[201]

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Reaffirming that no Member should be prevented from adopting or enforcing measures necessary to protect human, animal or plant life or health, subject to the requirement that these measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between Members where the same conditions prevail or a disguised restriction on international trade;

Desiring to improve the human health, animal health and phytosanitary situation in all Members;

Noting that sanitary and phytosanitary measures are often applied on the basis of bilateral agreements or protocols;

Desiring the establishment of a multilateral framework of rules and disciplines to guide the development, adoption and enforcement of sanitary and phytosanitary measures in order to minimize their negative effects on trade;

Recognizing the important contribution that international standards, guidelines and recommendations can make in this regard;

Desiring to further the use of harmonized sanitary and phytosanitary measures between Members, on the basis of international standards, guidelines and recommendations developed by the relevant international organizations, including the Codex Alimentarius Commission, the International Office of Epizootics, and the relevant international and regional organizations operating within the framework of the International Plant Protection Convention, without requiring Members to change their appropriate level of protection of human, animal or plant life or health;

Recognizing that developing country Members may encounter special difficulties in complying with the sanitary or phytosanitary measures of importing Members, and as a consequence in access to markets, and also in the formulation and application of sanitary or phytosanitary measures in their own territories, and desiring to assist them in their endeavours in this regard;

Desiring therefore to elaborate rules for the application of the provisions of GATT 1994 which relate to the use of sanitary or phytosanitary measures, in particular the provisions of Article XX(b)[1];

(*footnote original*) [1] In this Agreement, reference to Article XX(b) includes also the chapeau of that Article.

Hereby agree as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. "international standards, guidelines and recommendations"

1. In 1995, the Codex Alimentarius Commission, the International Office of Epizootics, and the Secretariat of the International Plant Protection Convention provided the SPS Committee with lists of international standards they had adopted.[1]

2. The precautionary principle

(a) Status in international law

2. With respect to the "precautionary principle" invoked by the European Communities in support of its claim in *EC – Hormones* that it had complied with Article 5.1 of the *SPS Agreement*, the Appellate Body declined to take a position on the status of the precautionary principle in international law:

> "The status of the precautionary principle in international law continues to be the subject of debate among academics, law practitioners, regulators and judges. The precautionary principle is regarded by some as having crystallized into a general principle of customary international *environmental* law. Whether it has been widely accepted by Members as a principle of *general* or *customary international law* appears less than clear. We consider, however, that it is unnecessary, and probably imprudent, for the Appellate Body in this appeal to take a position on this important, but abstract, question. We note that the Panel itself did not make any definitive finding with regard to the status of the precautionary principle in international law and that the precautionary principle, at least outside the field of international environmental law, still awaits authoritative formulation."[2]

(b) Relationship with the SPS Agreement

3. As regards the relationship between the "precautionary principle" and the *SPS Agreement*, the Appellate Body noted the following four elements, one of which concerns the Preamble to the *SPS Agreement*:

[1] G/SPS/W/18 and Corr.1 (Codex); G/SPS/W/21 (OIE) and G/SPS/W/23 (IPPC). See also G/SPS/W/107/Rev.1, G/SPS/GEN/177, G/SPS/GEN/185, G/SPS/GEN/266, G/SPS/GEN/271, G/SPS/GEN/282 and G/SPS/GEN/327.
[2] Appellate Body Report on *EC – Hormones*, para. 123.

"First, the principle has not been written into the *SPS Agreement* as a ground for justifying SPS measures that are otherwise inconsistent with the obligations of Members set out in particular provisions of that Agreement . . . It is reflected also in the sixth paragraph of the preamble . . . These explicitly recognize the right of Members to establish their own appropriate level of sanitary protection, which level may be higher (i.e., more cautious) than that implied in existing international standards, guidelines and recommendations . . . Lastly, however, the precautionary principle does not, by itself, and without a clear textual directive to that effect, relieve a panel from the duty of applying the normal (i.e. customary international law) principles of treaty interpretation in reading the provisions of the *SPS Agreement*".[3]

4. See also paragraph 22 below.

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
General Provisions

1. This Agreement applies to all sanitary and phytosanitary measures which may, directly or indirectly, affect international trade. Such measures shall be developed and applied in accordance with the provisions of this Agreement.

2. For the purposes of this Agreement, the definitions provided in Annex A[4] shall apply.

3. The annexes are an integral part of this Agreement.

4. Nothing in this Agreement shall affect the rights of Members under the Agreement on Technical Barriers to Trade with respect to measures not within the scope of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1.1

(a) Scope of the SPS Agreement

(i) General

5. The Panel on *EC – Hormones* identified two elements in order for a measure to fall under the *SPS Agreement*:

"According to Article 1.1 of the *SPS Agreement*, two requirements need to be fulfilled for the *SPS Agreement* to apply: (i) the measure in dispute is a sanitary or phytosanitary measure; and (ii) the measure in dispute may, directly or indirectly, affect international trade".[5]

(ii) Applicable to all SPS measures in force

6. In *EC – Hormones*, in discussing the applicability of the *SPS Agreement* to a measure which was enacted before the entry into force of the Agreement, the Appellate Body held that the *SPS Agreement* would apply to situations or measures that had not ceased to exist, unless the *SPS Agreement* revealed a contrary intention. Furthermore, the Appellate Body noted that certain measures of the *SPS Agreement* "expressly contemplate applicability to SPS measures that already existed on 1 January 1995":

"We addressed the issue of temporal application in our Report in *Brazil – Measures Affecting Desiccated Coconut* and concluded on the basis of Article 28 of the *Vienna Convention* that:

> Absent a contrary intention, a treaty cannot apply to acts or facts which took place, or situations which ceased to exist, before the date of its entry into force.

We agree with the Panel that the *SPS Agreement* would apply to situations or measures that did not cease to exist, such as the 1981 and 1988 Directives, unless the *SPS Agreement* reveals a contrary intention. We also agree with the Panel that the *SPS Agreement* does not reveal such an intention. The *SPS Agreement* does not contain any provision limiting the temporal application of the *SPS Agreement*, or of any provision thereof, to SPS measures adopted after 1 January 1995. In the absence of such a provision, it cannot be assumed that central provisions of the *SPS Agreement*, such as Articles 5.1 and 5.5, do not apply to measures which were enacted before 1995 but which continue to be in force thereafter. If the negotiators had wanted to exempt the very large group of SPS measures in existence on 1 January 1995 from the disciplines of provisions as important as Articles 5.1 and 5.5, it appears reasonable to us to expect that they would have said so explicitly. Articles 5.1 and 5.5 do not distinguish between SPS measures adopted before 1 January 1995 and measures adopted since; the relevant implication is that they are intended to be applicable to both. Furthermore, other provisions of the *SPS Agreement*, such as Articles 2.2, 2.3, 3.3 and 5.6, expressly contemplate applicability to SPS measures that already existed on 1 January 1995."[6]

(b) Article 1.2: Reference to Annex A

7. As regards the interpretation of Annex A, see Section XVI.B below.

[3] Appellate Body Report on *EC – Hormones*, para. 124.

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Basic Rights and Obligations

1. Members have the right to take sanitary and phytosanitary measures necessary for the protection of human, animal or plant life or health, provided that such measures are not inconsistent with the provisions of this Agreement.

2. Members shall ensure that any sanitary or phytosanitary measure is applied only to the extent necessary to protect human, animal or plant life or health, is based on scientific principles and is not maintained without sufficient scientific evidence, except as provided for in paragraph 7 of Article 5.

3. Members shall ensure that their sanitary and phytosanitary measures do not arbitrarily or unjustifiably discriminate between Members where identical or similar conditions prevail, including between their own territory and that of other Members. Sanitary and phytosanitary measures shall not be applied in a manner which would constitute a disguised restriction on international trade.

4. Sanitary or phytosanitary measures which conform to the relevant provisions of this Agreement shall be presumed to be in accordance with the obligations of the Members under the provisions of GATT 1994 which relate to the use of sanitary or phytosanitary measures, in particular the provisions of Article XX(b).

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. Article 2.2

(a) "maintained without sufficient scientific evidence"

(i) General

8. In *EC – Hormones*, the Appellate Body referred to the requirement of "sufficient scientific evidence" under Article 2.2. as part of the negotiated balance contained in the *SPS Agreement* between the promotion of international trade and the protection of human life and health.[7]

(ii) "Sufficient"

Meaning

9. In *Japan – Agricultural Products II*, with respect to the term "sufficient" in Article 2.2, the Appellate Body required an adequate relationship between the SPS measure and the scientific evidence:

> "The ordinary meaning of 'sufficient' is 'of a quantity, extent, or scope adequate to a certain purpose or object'. From this, we can conclude that 'sufficiency' is a relational concept. 'Sufficiency' requires the existence of a sufficient or adequate relationship between two elements, *in casu,* between the SPS measure and the scientific evidence".[8]

Context

10. The Appellate Body on *Japan – Agricultural Products II* also stated that "[t]he context of the word 'sufficient' or, more generally, the phrase 'maintained without sufficient scientific evidence' in Article 2.2, includes Article 5.1 as well as Articles 3.3 and 5.7 of the *SPS Agreement*".[9]

"Patent insufficiency" standard

11. After an examination of the context of the term "sufficient", the Appellate Body on *Japan – Agricultural Products II* disagreed with Japan on the notion of a standard of "patent insufficiency":

> "We do not agree with Japan's proposition that direct application of Article 2.2 of the *SPS Agreement* should be limited to situations in which the scientific evidence is 'patently' insufficient, and that the issue raised in this dispute should have been dealt with under Article 5.1 of the *SPS Agreement*. There is nothing in the text of either Articles 2.2 or 5.1, or any other provision of the *SPS Agreement*, that requires or sanctions such limitation of the scope of Article 2.2".[10]

(iii) "Scientific evidence"

12. In addition to the meaning of the term "sufficient" under Article 2.2, the Panel on *Japan – Apples* looked into the meaning of "scientific evidence" – i.e. the nature of the evidence that should be considered – and concluded that Article 2.2 excludes not only insufficiently substantiated information, but also a non-demonstrated hypothesis:

> "We consider that . . . we must give full meaning to the term 'scientific' and conclude that, in the context of Article 2.2, the evidence to be considered should be evidence gathered through scientific methods, excluding by the same token information not acquired through a scientific method. We further note that scientific evidence may include evidence that a particular risk may occur . . . as well as evidence that a particular requirement may reduce or eliminate that risk . . . .
>
> Likewise, the use of the term 'evidence' must also be given full significance. Negotiators could have used the

[7] Appellate Body Report on *EC – Hormones*, para. 177. See the discussion on the precautionary principle in *EC – Hormones* in para. 3 above.
[8] Appellate Body Report on *Japan – Agricultural Products II*, paras. 73.
[9] Appellate Body Report on *Japan – Agricultural Products II*, paras. 74.
[10] Appellate Body Report on *Japan – Agricultural Products II*, para. 82.

term 'information', as in Article 5.7, if they considered that any material could be used. By using the term 'scientific evidence', Article 2.2 excludes in essence not only insufficiently substantiated information, but also such things as a non-demonstrated hypothesis.

. . .

[R]equiring 'scientific evidence' does not limit the field of scientific evidence available to Members to support their measures. 'Direct' or 'indirect' evidence may be equally considered. The only difference is not one of scientific quality, but one of probative value within the legal meaning of the term, since it is obvious that evidence which does not directly prove a fact might not have as much weight as evidence directly proving it, if it is available."[11]

(iv) A rational and objective relationship

13. The Appellate Body on *Japan – Agricultural Products II* established that Article 2.2 requires a rational or objective relationship between the SPS measure and the scientific evidence:

"[W]e agree with the Panel that the obligation in Article 2.2 that an SPS measure not be maintained without sufficient scientific evidence requires that there be a rational or objective relationship between the SPS measure and the scientific evidence. Whether there is a rational relationship between an SPS measure and the scientific evidence is to be determined on a case-by-case basis and will depend upon the particular circumstances of the case, including the characteristics of the measure at issue and the quality and quantity of the scientific evidence."[12]

(v) Case-by-case methodology

14. In *Japan – Agricultural Products II*, the Appellate Body considered that the determination whether there is a rational relationship between the SPS measure and the scientific evidence must be conducted on a case-by-case basis. In this regard, see paragraph 12 above.

15. The Panel on *Japan – Apples* had come up with its own methodology to assess whether a measure was maintained without sufficient scientific evidence. The Panel considered both the risk of transmission of fire blight inherent in mature, symptomless apples and the risk associated with apples other than mature, symptomless apples that might enter Japanese territory as a result of human/technical errors in the sorting of apples or illegal actions.[13] On appeal, the Appellate Body emphasized that whether a given approach or methodology used to assess 'sufficient scientific evidence' within the meaning of Article 2.2 is appropriate should be determined on a case-by-case basis. The Appellate Body upheld the Panel's methodology as appropriate to the particular circumstances of the case before it:

"We emphasize, following the Appellate Body's statement in *Japan – Agricultural Products II*, that whether a given approach or methodology is appropriate in order to assess whether a measure is maintained 'without sufficient scientific evidence', within the meaning of Article 2.2, depends on the 'particular circumstances of the case', and must be 'determined on a case-by-case basis'.[14] Thus, the approach followed by the Panel in this case – disassembling the sequence of events to identify the risk and comparing it with the measure – does not exhaust the range of methodologies available to determine whether a measure is maintained 'without sufficient scientific evidence' within the meaning of Article 2.2. Approaches different from that followed by the Panel in this case could also prove appropriate to evaluate whether a measure is maintained without sufficient scientific evidence within the meaning of Article 2.2. Whether or not a particular approach is appropriate will depend on the 'particular circumstances of the case'.[15] The methodology adopted by the Panel was appropriate to the particular circumstances of the case before it and, therefore, we see no error in the Panel's reliance on it."[16]

(vi) Measure to be proportionate to risk

16. Based on its conclusion that all the individual requirements contained in the measure should be treated altogether as the phytosanitary measure at issue in the case, the Panel on *Japan – Apples* considered that a measure as a whole should be considered to be maintained 'without sufficient scientific evidence' if one or more of its elements are not justified by the relevant scientific evidence addressing the risk at issue. The Appellate Body found that the Panel's approach was appropriate in the circumstances:

"[W]e concluded, on the basis of the elements before us, that there was *not sufficient scientific evidence* to support the view that apples are likely to serve as a pathway for the entry, establishment or spread of fire blight within Japan. Given the negligible risk identified on the basis of the scientific evidence and the nature of the elements composing the phytosanitary measure at issue, the measure on the face of it is disproportionate to that risk.

More particularly, . . ., we have found that the following requirements are instances of elements of the measure at issue which are most obviously 'maintained without sufficient scientific evidence', either as such or when applied in cumulation with others, . . .

[11] Panel Report on *Japan – Apples*, paras. 8.92–8.93, 8.98.
[12] Appellate Body Report on *Japan – Agricultural Products II*, para. 84.
[13] Panel Report on *Japan – Apples*, paras. 8.119–8.121.
[14] (*footnote original*) Appellate Body Report on *Japan – Agricultural Products II*, para. 84.
[15] (*footnote original*) Appellate Body Report on *Japan – Agricultural Products II*, para. 84.
[16] Appellate Body Report on *Japan – Apples*, para. 164.

For the reasons mentioned above, we conclude that the phytosanitary measure at issue is clearly disproportionate to the risk identified on the basis of the scientific evidence available. . . ."[17]

(b) Burden of proof

(i) Presumption of "no relevant studies or report"

17. The Panel on *Japan – Agricultural Products II* had limited its finding of violation of Article 2.2 to only four of the eight products at issue on the grounds that in respect of the other four products, the United States had not adduced sufficient evidence to raise a *prima facie* case. The Appellate Body agreed with the Panel and rejected the United States' claim that the Panel had imposed on it an erroneous burden of proof:

"[W]e disagree with the United States that the Panel imposed on the United States an impossible and, therefore, erroneous burden of proof by requiring it to prove a negative, namely, that there are no relevant studies and reports which support Japan's varietal testing requirement. In our view, it would have been sufficient for the United States to raise a presumption that there are no relevant studies or reports. Raising a presumption that there are no relevant studies or reports is not an impossible burden. The United States could have requested Japan, pursuant to Article 5.8 of the *SPS Agreement*, to provide 'an explanation of the reasons' for its varietal testing requirement, in particular, as it applies to apricots, pears, plums and quince. Japan would, in that case, be obliged to provide such explanation. The failure of Japan to bring forward scientific studies or reports in support of its varietal testing requirement as it applies to apricots, pears, plums and quince, would have been a strong indication that there are no such studies or reports. The United States could also have asked the Panel's experts specific questions as to the existence of relevant scientific studies or reports or it could have submitted to the Panel the opinion of experts consulted by it on this issue. The United States, however, did not submit any evidence relating to apricots, pears, plums and quince".[18]

18. Applying the same reasoning, the Panel on *Japan – Apples* said that the United States had to raise a presumption that there were no relevant scientific studies or reports to prove that the measure at issue imposed by Japan was not supported by sufficient scientific evidence:

"Japan argues, that, in order for the Untied States to establish a prima facie case under Article 2.2, it has to positively prove the 'insufficiency' of scientific evidence. The United States claims that there is simply no scientific evidence supporting the measure at issue. Under these circumstances, and in application of the reasoning of the Appellate Body in *Japan – Agricultural Products II*, we consider that the Untied States should raise a presumption that there are no *relevant* scientific studies or reports in order to demonstrate that the measure at issue is not supported by sufficient scientific evidence.[19] If Japan submits elements to rebut that presumption, we would have to weigh the evidence before us."[20]

(ii) Allocation of burden of proof

19. On the allocation of the burden of proof, the Appellate Body on *Japan – Apples* said that although the complaining party bears the burden of proving its case, the responding party is responsible for proving the case it seeks to make in response:

"In this case, the United States seeks a finding that Japan's measure is inconsistent with Article 2.2 of the *SPS Agreement*. Therefore, the initial burden lies with the United States to establish a *prima facie* case that the measure is inconsistent with Article 2.2. . . . Following the Appellate Body's ruling in *EC – Hormones*, if this *prima facie* case is made, it would be for Japan to counter or refute the claim that the measure is 'maintained without sufficient scientific evidence'.

That said, the Appellate Body's statement in *EC – Hormones* does not imply that the complaining party is responsible for providing proof of all facts raised in relation to the issue of determining whether a measure is consistent with a given provision of a covered agreement. In other words, although the complaining party bears the burden of proving its case, the responding party must prove the case it seeks to make in response. In *US – Wool Shirts and Blouses*, the Appellate Body stated

> '. . . *the party who asserts a fact, whether the claimant or the respondent, is responsible for providing proof thereof*.'[21]

In this case, the United States made a series of allegations of fact relating to mature, symptomless apples as a possible pathway for fire blight, and sought to substantiate these allegations. Japan sought to counter the case made by the United States . . . Japan was thus responsible for providing proof of the allegations of fact it advanced in relation to apples other than mature, symptomless apples being exported to Japan as a result of errors of handling or illegal actions. . . ."[22]

(iii) Establishing prima facie case of inconsistency

20. Regarding the concept of *prima facie*, the Appellate Body further explained in *Japan – Apples* that the complainant could establish a *prima facie* case of

[17] Panel Report on *Japan – Apples*, paras. 8.179, 8.182 and 8.198.
[18] Appellate Body Report on *Japan – Agricultural Products II*, para. 137.
[19] (*footnote original*) Appellate Body Report on *Japan – Agricultural Products II*, para. 137.
[20] Panel Report on *Japan – Apples*, para. 8.106.
[21] (*footnote original*) Appellate Body Report on *US – Wool Shirts and Blouses*, p.14, DSR 1997:I, 323, at 335.
[22] Appellate Body Report on *Japan – Apples*, paras. 153–156.

inconsistency with Article 2.2 of the *SPS Agreement* even though it confined its arguments to a claim asserted by it:

> "Japan . . . submits that, 'in order to establish a *prima facie* case of insufficient scientific evidence under Article 2.2 of the *SPS Agreement*, the complaining party must establish that there is not sufficient evidence for *any* of the perceived risks underlying the measure.' . . . We find no basis for the approach advocated by Japan. . . . In the present case, the Panel appears to have concluded that in order to demonstrate a *prima facie* case that Japan's measure is maintained without sufficient scientific evidence, it sufficed for the United States to address only the question of whether mature, symptomless apples could serve as a pathway for fire blight.
>
> The Panel's conclusion seems appropriate to us for the following reasons. First, the claim pursued by the United States was that Japan's measure is maintained without sufficient scientific evidence to the extent that it applies to mature, symptomless apples exported from the United States to Japan. What is required to demonstrate a *prima facie* case is necessarily influenced by the nature and the scope of the claim pursued by the complainant. A complainant should not be required to prove a claim it does not seek to make. Secondly, the Panel found that mature, symptomless apple fruit is the commodity 'normally exported' by the United States to Japan.[23] The Panel indicated that the risk that apples fruit other than mature, symptomless apples may actually be imported into Japan would seem to arise primarily as a result of human or technical error, or illegal actions[24], and noted that the experts characterized errors of handling and illegal actions as 'small' or 'debatable' risks.[25] Given the characterization of these risks, in our opinion it was legitimate for the Panel to consider that the United States could demonstrate a *prima facie* case of inconsistency with Article 2.2 of the *SPS Agreement* through argument based solely on mature, symptomless apples. Thirdly, the record contains no evidence to suggest that apples other than mature, symptomless ones have ever been exported to Japan from the United States as a result of errors of handling or illegal actions. . . ."[26]

21. As regards the burden of proof in general, see Section XXXVI(D) of the Chapter on the *DSU*.

(c) Standard of review

(i) Panel to take into account the prudence commonly exercised by governments

22. In *EC – Hormones*, the Appellate Body, while addressing the relationship between the precautionary principle and the *SPS Agreement* in the context of its analysis of whether a measure was maintained without sufficient scientific evidence, noted that the Panel should take into account in its examination the prudence commonly exercised by governments in the event of irreversible risks:

> "[A] panel charged with determining, for instance, whether 'sufficient scientific evidence' exists to warrant the maintenance by a Member of a particular SPS measure may, of course, and should, bear in mind that responsible, representative governments commonly act from perspectives of prudence and precaution where risks of irreversible, e.g. life-terminating, damage to human health are concerned".[27]

(ii) Panel not to conduct own risk assessment

23. The Panel on *Japan – Agricultural Products II* emphasized that in reviewing whether the measure at issue was being maintained without sufficient scientific evidence, it would not conduct its own risk assessment:

> "To determine whether or not the varietal testing requirement is maintained without sufficient scientific evidence . . . we need to refer to the opinions we received from the experts advising the Panel. We recall that these expert opinions are opinions on the evidence submitted by the parties. We are not empowered, nor are the experts advising the Panel, to conduct our own risk assessment".[28]

(iii) Panel to assess relevant allegations of fact

24. The Appellate Body on *Japan – Apples* also found that the Panel acted within the limits of its investigative authority when the Panel assessed relevant allegations of fact asserted by Japan as the respondent:

> "Japan also contends that the Panel did not have the authority to make certain findings of fact[29] and, in support of this contention, refers to the Appellate Body's statement in *Japan – Agricultural Products II:*

---

[23] (*footnote original*) Panel Report, para. 8.141. The Panel also found that "the importation of immature, infected apples may only occur as a result of a handling error or an illegal action". (*Ibid.*, footnote 2275 to para. 8.121).

[24] (*footnote original*) Panel Report, para. 8.174.

[25] (*footnote original*) Panel Report, para. 8.161.

[26] Appellate Body Report on *Japan – Apples*, paras. 158–160.

[27] Appellate Body Report on *EC – Hormones*, para.124. See also paras. 2–4 above.

[28] Panel Report on *Japan – Agricultural Products II*, para. 8.32. For the same statement made in the context of Article 5, see paras. 94–95 below.

[29] (*footnote original*) Japan refers to the following findings of the Panel:

> [W]e are of the opinion that the prohibition of imported apples from any orchard (whether or not it is free of fire blight) should fire blight be detected within a 500–meter buffer zone surrounding such orchard is not supported by sufficient scientific evidence; [and]
>
> [W]e are of the opinion that the requirement that export orchards be inspected at least three times yearly (at blossom, fruitlet, and harvest stages) for the presence of fire blight is not supported by sufficient scientific evidence. (footnotes omitted)
>
> (Japan's appellant's submission, para. 35, quoting Panel Report, paras. 8.185 and 8.195)

> Article 13 of the DSU and Article 11.2 of the *SPS Agreement* suggest that panels have a significant investigative authority. However, this authority cannot be used by a panel to rule in favour of a complaining party which has not established a *prima facie* case of inconsistency based on specific legal claims asserted by it.[30]

We disagree with Japan. We note first that we are not persuaded that the findings of the Panel, identified by Japan in relation to this argument, relate specifically to, or address apples other than mature, symptomless apples, as Japan seems to assume. Also, the Appellate Body's finding in *Japan – Agricultural Products II* does not support Japan's argument that the Panel was barred from making findings of fact in connection with apples other than mature, symptomless apples. Those findings were relevant to the claim pursued by the United States under Article 2.2 of the *SPS Agreement*, and were responsive to relevant allegations of fact advanced by Japan in the context of its rebuttal of the United States' claim. The Panel acted within the limits of its investigative authority because it did nothing more than assess relevant allegations of fact asserted by Japan, in the light of the evidence submitted by the parties and the opinions of the experts".[31]

(iv) Panel to take into account views of experts while evaluating scientific evidence

25. The Appellate Body on *Japan – Apples* held that the Panel was entitled to take into account the views of the experts in assessing whether the United States had established a *prima facie* case, recalling the similar approaches taken in other cases involving the evaluation of scientific evidence:

> "In order to assess whether the United States had established a *prima facie* case, the Panel was entitled to take into account the view of the experts. Indeed, in *India – Quantitative Restrictions,* the Appellate Body indicated that it may be useful for a panel to consider the views of the experts it consults in order to determine whether a *prima facie* case has been made.[32] Moreover, on several occasions, including disputes involving the evaluation of scientific evidence, the Appellate Body has stated that panels enjoy discretion as the trier of facts[33]; they enjoy 'a margin of discretion in assessing the value of the evidence, and the weight to be ascribed to that evidence.'[34] Requiring panels, in their assessment of the evidence before them, to give precedence to the importing Member's evaluation of scientific evidence and risk is not compatible with this well-established principle."[35]

(v) Panel not obliged to give precedence to importing Member's approach to scientific evidence and risk

26. The Appellate Body on *Japan – Apples* held that a panel was not obliged to give precedence to the *importing* Member's approach to scientific evidence and risk over the views of the experts when analyzing and assessing scientific evidence to determine whether a complainant established a *prima facie* case under Article 2.2. On appeal, the Appellate Body rejected Japan's argument that the Panel erred in the application of Article 2.2 by focusing on the experts' views rather than according a "certain degree of discretion" to the importing Member in the manner in which it chooses, weighs, and evaluates scientific evidence:

> "Regarding Japan's contention that the Panel should have made its assessment under Article 2.2 in light of Japan's approach to risk and scientific evidence, we recall that, in *EC – Hormones*, the Appellate Body addressed the question of the standard of review that a panel should apply in the assessment of scientific evidence submitted in proceedings under the *SPS Agreement*. It stated that Article 11 of the DSU sets out the applicable standard, requiring panels to make an 'objective assessment of the facts'. It added that, as regards fact-finding by panels and the appreciation of scientific evidence, total deference to the findings of the national authorities would not ensure an objective assessment as required by Article 11 of the DSU.[36] In our view, Japan's submission that the Panel was obliged to favour Japan's approach to risk and scientific evidence over the view of experts conflicts with the Appellate Body's articulation of the standard of 'objective assessment' of fact.
>
> . . . For these reasons, we reject the contention that, under Article 2.2, a panel is obliged to give precedence to the importing Member's approach to scientific evidence and risk when analyzing and assessing scientific evidence. Consequently, we disagree with Japan that the Panel erred in assessing whether the United States had established a *prima facie* case when it did so from a perspective different from that inherent in Japan's approach to scientific evidence and risk. . . ."[37]

27. As regards the panels' standard of review in general, see Article XI of the Chapter on the *DSU*.

(d) Relationship with other Articles

(i) Article 1.1

28. As regards applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 6 above.

(ii) Article 4

29. The Panel on *Japan – Apples* rejected Japan's argument that the Panel should consider Article 4 of the *SPS Agreement* in its assessment of Article 2.2:

> "[W]e agree that other provisions of the *SPS Agreement* are part of the context of Article 2.2, as recalled by the Appellate Body in *Japan – Agricultural Products II*[38]. Article 4 deals with the specific question of the recognition of equivalence of measures. Unlike Article 3.3, 5.1 and 5.7, the purpose of Article 4 is clearly different from that of Article 2.2. We also note that the United States did not raise any claim under Article 4 and that this Article is not a defence against violations of other provisions of the *SPS Agreement*. As a result, we see no other reason to consider Japan's arguments regarding Article 4 in our assessment of Article 2.2, other than to the extent that Article 4 might form part of the relevant context in the interpretation of Article 2.2."[39]

(iii) Article 5

Article 5.1

30. In *EC – Hormones*, the Appellate Body stated that Articles 2.2 and 5.1 should "constantly be read together":

> "[T]he Panel considered that Article 5.1 may be viewed as a specific application of the basic obligations contained in Article 2.2 of the *SPS Agreement*, which reads as follows: . . .
>
> We agree with this general consideration and would also stress that Articles 2.2 and 5.1 should constantly be read together. Article 2.2 informs Article 5.1: the elements that define the basic obligation set out in Article 2.2 impart meaning to Article 5.1."[40]

31. The Appellate Body on *Japan – Agricultural Products II also* considered it useful in interpreting Article 2.2, and, in particular, the meaning of the word "sufficient", to recall its statement on Article 5.1 in its Report on *EC – Hormones*.[41]

32. In *Australia – Salmon*, the Appellate Body concluded that a violation of Article 5.1 also implied an inconsistency with Article 2.2 (see paragraph 128 below):

> "[B]y maintaining an import prohibition on fresh, chilled or frozen ocean-caught Pacific salmon, in violation of Article 5.1, Australia has, by implication, also acted inconsistently with Article 2.2 of the *SPS Agreement*."[42]

Articles 5.4 and 5.6

33. On the relationship between Articles 5.4 to 5.6 and Article 2.2, the Panel on *EC – Hormones*, in a statement not reviewed by the Appellate Body, noted:

> "Articles 5.4 to 5.6 may be viewed as specific applications of the basic obligations provided for in Article 2.2 which, *inter alia*, states that 'Members shall ensure that any sanitary or phytosanitary measure is *applied only to the extent necessary to protect* human, animal or plant life or health' (emphasis added) and Article 2.3 which provides that 'Members shall ensure that their sanitary and phytosanitary measures do *not arbitrarily or unjustifiably discriminate between Members* where identical or similar conditions prevail . . .' and that 'Sanitary and phytosanitary measures *shall not be applied in a manner which would constitute a disguised restriction* on international trade' (emphasis added)."[43]

34. The Panel on *Japan – Apples* emphasized that the requirement not to maintain a measure without sufficient scientific under Article 2.2 should not be confused with the requirement of Article 5.6:

> "[W]e should also be careful not to confuse the requirement that a measure is not maintained without sufficient scientific evidence with the requirement of Article 5.6 of the *SPS Agreement* that the measure is 'not more trade-restrictive than required to achieve [Japan's] appropriate level of . . . phytosanitary protection'. In other words, while we might find that some specific requirements of the measure at issue are not supported by sufficient scientific evidence, our findings should be limited to Article 2.2."[44]

Article 5.7

35. The Panel on *Japan – Agricultural Products II* stated that a measure consistent with Article 5.7 cannot be found inconsistent with Article 2.2:

> "[B]efore we can find . . . whether or not Article 2.2 is violated in this dispute – we recall that Article 2.2 provides that 'Members shall ensure that any . . . phytosanitary measure . . . is not maintained without sufficient scientific evidence, *except as provided for in paragraph 7 of Article 5*' (emphasis added). We note that Japan invokes Article 5.7 in support of its varietal testing requirement. We therefore need to examine next whether the varietal testing requirement is a measure meeting the requirements in Article 5.7. If the varietal

[38] (*footnote original*) Appellate Body Report in *Japan – Agricultural Products II*, para. 74.
[39] Panel Report on *Japan – Apples*, para. 8.107.
[40] Appellate Body Report on *EC – Hormones*, para. 180.
[41] (*footnote original*) *European Communities – Hormones*, *supra*, footnote 12, para. 194.
[42] Appellate Body Report on *Australia – Salmon*, para. 138.
[43] Panel Report on *EC – Hormones (Canada)*, para. 8.99; Panel Report on *EC – Hormones (US)*, para. 8.96.
[44] Panel Report on *Japan – Apples*, para. 8.78.

testing requirement meets these requirements, we cannot find that it violates Article 2.2."[45]

36. In *Japan – Agricultural Products II*, the Appellate Body addressed the relationship between the requirement of sufficient scientific evidence under Article 2.2 and Article 5.7 and considered that Article 5.7 operates as a qualified exemption from the obligation under Article 2.2:

> "[I]t is clear that Article 5.7 of the *SPS Agreement,* to which Article 2.2 explicitly refers, is part of the context of the latter provision and should be considered in the interpretation of the obligation not to maintain an SPS measure without sufficient scientific evidence. Article 5.7 allows Members to adopt provisional SPS measures '[i]n cases where relevant scientific evidence is insufficient' and certain other requirements are fulfilled. Article 5.7 operates as a *qualified* exemption from the obligation under Article 2.2 not to maintain SPS measures without sufficient scientific evidence. An overly broad and flexible interpretation of that obligation would render Article 5.7 meaningless."[46]

37. The Panel on *Japan – Apples* also followed the approach by the Panel on *Japan – Agricultural Products II* and refrained from making final findings with respect to the consistency of the measure at issue with Article 2.2 until the Panel had completed its analysis under Article 5.7. The Panel further stated that the only situation where it would not need to address Article 5.7 after the examination of the Article 2.2 claim would be if the measure was found to be "not maintained without sufficient scientific evidence" within the meaning of Article 2.2:

> "[W]e believe it appropriate to follow, in this case too, the approach of the panel in *Japan – Agricultural Products II*. There is only one situation where it may not be necessary to address Article 5.7. This is if we find that the measure or measures as a whole is/are 'not maintained without sufficient scientific evidence' within the meaning of Article 2.2. If we were to find, however, that part or all of the measure or measures at issue is/are maintained without sufficient scientific evidence, we would suspend our final conclusion on the consistency of the measure(s) at issue with that provision until we have completed our examination under Article 5.7 of the *SPS Agreement*."[47]

2. Article 2.3

(a) Elements of violation

38. The Panel on *Australia – Salmon (Article 21.5 – Canada)* identified three elements necessary to find a violation of Article 2.3:

> "[T]hree elements, cumulative in nature, are required for a violation of this provision:
>
> (1) the measure discriminates between the territories of Members other than the Member imposing the measure, or between the territory of the Member imposing the measure and that of another Member;
>
> (2) the discrimination is arbitrary or unjustifiable; and
>
> (3) identical or similar conditions prevail in the territory of the Members compared."[48]

(b) Scope of discrimination

39. In *Australia – Salmon (Article 21.5 – Canada)*, while the Panel found no violation of Article 2.3[49], it also stated that Article 2.3 prohibits not only discrimination between similar products, but also between different products:

> "[W]e are of the view that discrimination in the sense of Article 2.3, first sentence, may also include discrimination between *different* products, e.g. not only discrimination between Canadian salmon and New Zealand salmon, or Canadian salmon and Australian salmon; but also discrimination between Canadian salmon and Australian fish including non-salmonids".[50]

(c) Relationship with other Articles

(i) Article 1.1

40. On the the applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 6 above.

(ii) Article 5.5

41. In *EC – Hormones* the Appellate Body noted the close relationship between Articles 2.3 and 5.5:

> "Article 5.5 must be read in context. An important part of that context is Article 2.3 of the *SPS Agreement*, . . . When read together with Article 2.3, Article 5.5 may be seen to be marking out and elaborating a particular route leading to the same destination set out in Article 2.3."[51]

42. In the context of examining the European Communities' measure at issue in the light of Article 5.5, the Appellate Body on *EC – Hormones* made the following statement with respect to Article 2.3:

---

[45] Panel Report on *Japan – Agricultural Products II*, para. 8.48; Panel Report on *Japan – Apples*, para. 8.200.
[46] Appellate Body Report on *Japan – Agricultural Products II*, para. 80.
[47] Panel Report on *Japan – Agricultural Products II*, para. 8.4.
[48] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, para. 7.111.
[49] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.113–7–114.
[50] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, para. 7.112.
[51] Appellate Body Report on *EC – Hormones*, para. 212.

"It is well to bear in mind that, after all, the difference in levels of protection that is characterizable as arbitrary or unjustifiable is only an element of (indirect) proof that a Member may actually be applying an SPS measure in a manner that discriminates between Members or constitutes a disguised restriction on international trade, prohibited by the basic obligations set out in Article 2.3 of the *SPS Agreement*".[52]

43. The Appellate Body on *EC – Hormones* further discussed the relationship between Articles 2.3 and 5.5 with respect to the Panel's decision to examine the claim under Articles 3 and 5 that under Article 2:

"We recall the reading that we have given above to Articles 2 and 5 . . . and that similarly Article 2.3 informs Article 5.5 – but believe that further analysis of their relationship should await another case."[53]

44. The Panel on *Australia – Salmon*, in a finding upheld by the Appellate Body[54], held that a violation of Article 5.5 implied a violation of Article 2.3:

"Indeed, even though Article 5.5 deals with arbitrary or unjustifiable *distinctions in levels of protection* imposed by one WTO Member for different situations and Article 2.3 addresses, rather, sanitary measures which (1) arbitrary or unjustifiably *discriminate between* WTO Members or (2) are applied in a manner which would constitute a *disguised restriction* on trade; the third element under Article 5.5 also requires that the *measure* in dispute results in discrimination or a disguised restriction on trade. We conclude, therefore, that if we were to find that all three elements under Article 5.5 – including, in particular, the third element – are fulfilled and that, therefore, the more specific Article 5.5 is violated, such finding can be presumed to imply a violation of the more general Article 2.3. We do recognize, at the same time, that, given the more general character of Article 2.3, not all violations of Article 2.3 are covered by Article 5.5."[55]

45. In *Australia – Salmon*, the Appellate Body elaborated on the relationship between Articles 2.3 and 5.5 and considered that a finding of violation of Article 5.5 necessarily implies a violation of Article 2.3:

"We recall that the third – and decisive – element of Article 5.5, discussed above, requires a finding that the SPS measure which embodies arbitrary or unjustifiable restrictions in levels of protection results in 'discrimination or a disguised restriction on international trade'. Therefore, a finding of violation of Article 5.5 will necessarily imply a violation of Article 2.3, first sentence, or Article 2.3, second sentence. Discrimination 'between Members, including their own territory and that of others Members' within the meaning of Article 2.3, first sentence, can be established by following the complex and indirect route worked out and elaborated by Article 5.5. However, it is clear that this route is not the only route leading to a finding that an SPS measure constitutes arbitrary or unjustifiable discrimination according to Article 2.3, first sentence. Arbitrary or unjustifiable discrimination in the sense of Article 2.3, first sentence, can be found to exist without any examination under Article 5.5."[56]

3. Relationship with other Articles

(a) Articles 3 and 5

46. In *EC – Hormones*, with respect to the Panel's decision to examine a claim under Articles 3 and 5 before a claim under Article 2[57], the Appellate Body indicated a preference for beginning the analysis with Article 2:

"We are, of course, surprised by the fact that the Panel did not begin its analysis of this whole case by focusing on Article 2 that is captioned 'Basic Rights and Obligations', an approach that appears logically attractive."[58]

47. In *Australia – Salmon*, where Articles 2, 3 and 5 were at issue, the Panel decided to commence its analysis under Article 5, because (1) Canada, the complaining party, focused initially on this provision with respect to its claims and (2) the provisions under Article 5 "provide for more specific and detailed rights and obligations" than Article 2. The Appellate Body did not address this issue:

"[E]ven if we were to start our examination of this dispute under Article 3, we would in any event be referred to and thus still need to address Articles 2 and 5. To conduct our examination of this case in the most efficient manner, we shall, therefore, first address Articles 2 and 5 . . . Since in this particular case, (1) Canada itself first presents its claims under Article 5, before addressing those under Article 2, and (2) the provisions invoked by Canada under Article 5 (i.e., Articles 5.1, 5.2, 5.5 and 5.6) all provide for more specific and detailed rights and obligations than the 'Basic Rights and Obligations' set out in rather broad wording in the provisions invoked by Canada under Article 2 (i.e., Articles 2.2 and 2.3), we consider it more appropriate in the circumstances of this dispute to first deal with Canada's claims under Article 5".[59]

48. In *Australia – Salmon (Article 21.5 – Canada)*, Canada alleged the violation of Articles 2, 5, 6 and 8. Similarly to the original Panel, the Article 21.5 Panel started its examination with Article 5.[60]

[57] Panel Report on *EC – Hormones (Canada)*, paras. 8.41–8.43 and 8.254; Panel Report on *EC – Hormones (US)*, paras. 8.45–8.47 and 8.251.
[58] Appellate Body Report on *EC – Hormones*, para. 250.
[59] Panel Report on *Australia – Salmon*, paras. 8.47–8.48.
[60] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, para. 7.38.

(b) Articles 5, 6, 7 and 8

49. In *Japan – Agricultural Products II*, where claims were made under Articles 2, 5, 7 and 8, the Panel began its examination with Article 2. The Appellate Body did not address this issue.[61]

50. See also paragraph 48 above.

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Harmonization

1. To harmonize sanitary and phytosanitary measures on as wide a basis as possible, Members shall base their sanitary or phytosanitary measures on international standards, guidelines or recommendations, where they exist, except as otherwise provided for in this Agreement, and in particular in paragraph 3.

2. Sanitary or phytosanitary measures which conform to international standards, guidelines or recommendations shall be deemed to be necessary to protect human, animal or plant life or health, and presumed to be consistent with the relevant provisions of this Agreement and of GATT 1994.
