> "We are not aware of any GATT/WTO precedent that would require a panel to consider whether legislation is mandatory or discretionary *before* examining the substance of the provisions at issue. To the contrary, we note that a number of panels, in disputes concerning the

[252] Panel Report on *US – DRAMS*, para. 6.53.

[253] Panel Report on *Canada – Aircraft*, paras. 9.127–9.128. See also the Panel in *Canada – Aircraft Credits and Guarantee* which considered that, to prove that a given programme "as such" provides export subsidies, the complainant must establish, on the basis of the pertinent legal instruments, that the programmes at issue "mandate subsidization, in particular, the conferral of a benefit". Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.76–7.77. The Panel further clarified that "to satisfy the 'benefit' element of Article 1 of the *SCM Agreement* for the purposes of a challenge to [the programme at issue] as such, [the complainant] would have to show that the program requires conferral of a benefit, not that it could be used to do so, or even that it is used to do so . . ." Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.107. See also paras. 7.123–7.125 and Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.43 and 5.50.

consistency of legislation, have *not* considered the mandatory/discretionary question in the abstract and as a necessarily threshold issue. Rather, the panels in those cases first resolved any controversy as to the requirements of the GATT/WTO obligations at issue, and only then considered *in light of those findings* whether the defending party had demonstrated adequately that it had sufficient discretion to conform with those rules. That is, the mandatory/discretionary distinction was applied *in a given substantive context.*[254]

We consider such an approach to be appropriate in this case. In particular, identifying and addressing the relevant WTO obligations first will facilitate our assessment of the manner in which the legislation addresses those obligations, and whether any violation is involved. That is, it is after we have considered both the substance of the claims in respect of WTO provisions and the relevant provisions of the legislation at issue that we will be in the best position to determine whether the legislation requires a treatment of export restraints that violates those provisions.

Finally, we note that, whether or not a panel sees the mandatory/discretionary question as a necessarily threshold issue or, as suggested by Canada, as an issue that may arise as part of a panel's examination of the legal claims, it remains true – at least under the classical test which we shall be employing – that legislation as such cannot be found to be inconsistent with a Member's WTO obligations unless it is mandatory in nature. Thus, in any event, the order in which the two issues – the question of the type of legislation and the substance of the case – are addressed would not alter any eventual finding of consistency or lack thereof."[255]

187. In *US – Section 129(c)(1) URAA*, the Panel did not follow the approach of the Panel on *US – Export Restraints*[256] and preferred to analyse first whether the United States' legislation at issue was mandatory, before analysing whether the behaviour mandated would be inconsistent with the relevant WTO provisions.[257]

The relevance of the distinction between mandatory and discretionary legislation in the context of an affirmative defence

188. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel was confronted with the preliminary issue of whether the distinction between mandatory and discretionary legislation was applicable in the context of an affirmative defence. In this particular case, the question presented was whether Brazil was *required* to apply the financing programme in question, PROEX III, which conferred benefits to buyers of Brazilian regional aircraft, in a manner that gave rise to a prohibited export subsidy.[258] Brazil presented an affirmative defence. The Panel actually considered that the distinction between mandatory and discretionary legislation was applicable in this context, even though, in this instance, the Panel was not faced with the issue of conformity with a WTO *obligation*, but rather of conformity with the conditions attached to a WTO *exception*. In its view, this fact alone did not render the GATT/WTO distinction between mandatory and discretionary legislation inapplicable or inappropriate. The Panel recalled:

"The rationale underpinning the traditional GATT/WTO distinction between mandatory and discretionary legislation is that, when the executive branch of a Member is not required to act inconsistently with requirements of WTO law, it should be entitled to a presumption of good faith compliance with those requirements. We consider that that rationale is no less valid in the context of WTO exceptions than it is in the context of WTO obligations. Indeed, were we to take the opposite view, we would,

[254] (*footnote original*) See, e. g., *United States – Superfund:* The scheme in question involved, *inter alia*, a discriminatory penalty tax that would be imposed if required information was not submitted by the importer. The Panel first found that such a penalty tax, if imposed, would violate Article III:2, then went on to find that the Superfund Act did not in fact require imposition of the tax, as the law foresaw the possibility for the United States to adopt regulations that would eliminate the need to impose it (*United States – Taxes on Petroleum and Certain Imported Substances* ("*Superfund*"), Report of the Panel, adopted 17 June 1987, BISD 34S/136, para. 5.2.9); *Thailand – Cigarettes*: After finding that the discriminatory tax rates provided for under the law would violate GATT rules, the Panel went on to find that the Thai authorities both had sufficient regulatory discretion to implement the law consistent with the GATT, and had actually exercised that discretion in that way (*Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes*, Report of the Panel, adopted 7 November 1990, BISD 37S/200, para. 84); *United States – Tobacco*: The US statute mandated that the US Department of Agriculture assess "comparable" inspection fees for imported and domestic tobacco, and the Panel first considered the meaning of the word "comparable" in light of the relevant GATT requirement that such fees be "commensurate" with the cost of services rendered to imported tobacco. The Panel then concluded that the United States had the discretion to interpret "comparable" as "commensurate" (and in practice had done so), i. e., that the legislation did not require a violation (*United States – Measures Affecting the Importation, Internal Sale, and Use of Tobacco*, Report of the Panel, adopted 4 October 1994, BISD 41S/131, para. 123).

[255] Panel Report on *US – Export Restraints*, paras. 8.11–8.13.

[256] The Panel justified the different approach as follows: "We note that the Panel in *United States – Measures Treating Exports Restraints as Subsidies* first considered whether certain action was in conformity with WTO requirements and only then addressed whether the measure at issue mandated such action. . . . In the circumstances of the case at hand, where there is a major *factual* dispute regarding whether section 129(c)(1) requires and/or precludes certain action, we think that a panel is of most assistance to the DSB if it examines the factual issues first. Moreover, we do not see how addressing first whether certain actions identified by Canada would contravene particular WTO provisions would facilitate our assessment of whether section 129(c)(1) mandates the United States to take certain action or not to take certain action. Finally, we have taken into account the fact that, in the present case, our ultimate conclusions with respect to Canada's claims would not differ depending on the order of analysis we decided to follow," Panel Report on *US – Section 129(c)(1) URAA*, footnote 72.

[257] Panel Report on *US – Section 129(c)(1) URAA*, paras. 6.22–6.25.

[258] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.43.

in effect, create a situation where Members would be entitled to a presumption of good faith compliance with their WTO *obligations*, but not with the conditions attached to WTO *exceptions*. Such a situation would, in our view, be unwarranted and contrary to logic.

(. . .) the Member invoking an exception as an affirmative defence has the burden of establishing it. In our view, the allocation of the burden of proof is a procedural issue[259] which is distinct from the substantive standard to be applied in assessing the conformity of legislation with a particular provision of the *WTO Agreement*. Simply put, the allocation of the burden of proof determines *who* must show something. On the other hand, the GATT/WTO distinction between mandatory and discretionary legislation determines *what* somebody must show. We believe the standard to be applied in judging the conformity of a piece of legislation with WTO requirements should be the same irrespective of who has the burden of adducing argument and evidence sufficient to establish a *prima facie* case of conformity."[260]

Rejection of the mandatory versus discretionary distinction

189. The Panel on *US – Section 301 Trade Act* did not accept the distinction between discretionary and mandatory legislation in the context of a claim made pursuant to Article 23 of the *DSU*. In this case, the United States was defending the measure at issue with reference to the traditional doctrine that only mandatory laws can violate GATT law "as such". In contrast, the European Communities argued that certain discretionary legislation could also violate GATT law "as such". The Panel did not accept the United States' argument:

"[W]e believe that resolving the dispute as to which type of legislation, *in abstract*, is capable of violating WTO obligations is not germane to the resolution of the type of claims before us. In our view the appropriate method in cases such as this is to examine with care the nature of the WTO obligation at issue and to evaluate the Measure in question in the light of such examination. The question is then whether, on the correct interpretation of the specific WTO obligation at issue, only mandatory or also discretionary national laws are prohibited. We do not accept the legal logic that there has to be one fast and hard rule covering all domestic legislation. After all, is it so implausible that the framers of the WTO Agreement, in their wisdom, would have crafted some obligations which would render illegal even discretionary legislation and crafted other obligations prohibiting only mandatory legislation?[261] Whether or not Section 304 violates Article 23 depends, thus, first and foremost on the precise obligations contained in Article 23.

We can express this view in a different way:

(a) Even if we were to operate on the legal assumption that, as argued by the US, only legislation *mandating* a WTO inconsistency or *precluding* WTO consistency, can violate WTO provisions; and

(b) confirm our earlier factual finding in paragraph 7.31(c) that the USTR enjoys full discretion to decide on the content of the determination,

we would still disagree with the US that the combination of (a) and (b) *necessarily* renders Section 304 compatible with Article 23, since Article 23 may prohibit legislation with certain discretionary elements and therefore the very fact of having in the legislation such discretion could, in effect, preclude WTO consistency. In other words, rejecting, as we have, the presumption implicit in the US argument that no WTO provision ever prohibits discretionary legislation does not imply a reversal of the classical test in the pre-existing jurisprudence that only legislation mandating a WTO inconsistency or precluding WTO consistency, could, as such, violate WTO provisions.[262] Indeed that is the very test we shall apply in our analysis. It simply does not follow from this test, as sometimes has been argued, that legislation with discretion could never violate the WTO. If, for example, it is found that the specific obligations in Article 23 prohibit a certain type of legislative discretion, the existence of such discretion in the statutory language of Section 304 would presumptively preclude WTO consistency."[263]

190. In *US – 1916 Act* the Appellate Body, further to referring to GATT practice (see paragraphs 182–183 above), declined to answer the question of whether the mandatory/discretionary distinction continued to be relevant under WTO law:

"We note that answering the question of the continuing relevance of the distinction between mandatory and discretionary legislation for claims brought under the *Anti-Dumping Agreement* would have no impact upon the outcome of these appeals, because the 1916 Act is clearly not discretionary legislation, as that term has been understood for purposes of distinguishing

[259] (*footnote original*) We note the Appellate Body's view that ". . . the burden of proof is a procedural concept which speaks to the fair and orderly management and disposition of a dispute." (Original Appellate Body Report on *Canada – Aircraft*, *supra*, para. 198.)

[260] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.124–5.125.

[261] (*footnote original*) Imagine, for example, legislation providing that all imports, including those from WTO Members, would be subjected to a customs inspection and that the administration would enjoy the right, at its discretion, to impose on all such goods tariffs in excess of those allowed under the schedule of tariff concessions of the Member concerned. Would the fact that under such legislation the national administration would not be mandated to impose tariffs in excess of the WTO obligation, in and of itself exonerate the legislation in question? Would such a conclusion not depend on a careful examination of the obligations contained in specific WTO provisions, say, Article II of GATT and specific schedule of concessions?

[262] (*footnote original*) See paras. 4.173 ff. and 7.51 of this Report.

[263] Panel Report on *US – Section 301 Trade Act*, paras. 7.53–7.54. See also Panel Report on *US – Section 129(c)(1) URAA*, para. 6.22.

between mandatory and discretionary legislation. Therefore, we do not find it necessary to consider, in these cases, whether Article 18.4, or any other provision of the *Anti-Dumping Agreement*, has supplanted or modified the distinction between mandatory and discretionary legislation.[264] For the same reasons, the Panel did not, in the Japan Panel Report, need to opine on this issue.[265]"[266]

191. The Appellate Body on *US – Countervailing Measures on Certain EC Products*, when examining the question whether Section 1677(5)(F) was inconsistent *per se* with the WTO obligations of the United States because it mandated a particular WTO-inconsistent method of determining the existence of a "benefit", clarified in a footnote that: "We are not, by implication, precluding the possibility that a Member could violate its WTO obligations by enacting legislation granting discretion to its authorities to act in violation of its WTO obligation. We make no finding in this respect."[267]

192. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body, in the context of an anti-dumping dispute, for the first time, did not follow the traditional mandatory v. discretionary rule and found that it saw no reason for concluding that, in principle, non-mandatory measures cannot be challenged "as such". In this case, the measure at issue was the United States Sunset Policy Bulletin which the Panel had found not to be challengeable as such because it was not mandatory for the competent authorities. The Appellate Body obviously disagreed:

"We also believe that the provisions of Article 18.4 of the Anti-Dumping Agreement are relevant to the question of the type of measures that may, as such, be submitted to dispute settlement under that Agreement. Article 18.4 contains an explicit obligation for Members to 'take all necessary steps, of a general or particular character' to ensure that their 'laws, regulations and administrative procedures' are in conformity with the obligations set forth in the Anti-Dumping Agreement. Taken as a whole, the phrase 'laws, regulations and administrative procedures' seems to us to encompass the entire body of generally applicable rules, norms and standards adopted by Members in connection with the conduct of anti-dumping proceedings.[268] If some of these types of measure could not, as such, be subject to dispute settlement under the Anti-Dumping Agreement, it would frustrate the obligation of 'conformity' set forth in Article 18.4.

This analysis leads us to conclude that there is no basis, either in the practice of the GATT and the WTO generally or in the provisions of the *Anti-Dumping Agreement*, for finding that only certain types of measure can, as such, be challenged in dispute settlement proceedings under the *Anti-Dumping Agreement*. Hence we see no reason for concluding that, in principle, non-mandatory measures cannot be challenged 'as such'. To the extent that the Panel's findings in paragraphs 7.145, 7.195, and 7.246 of the Panel Report suggest otherwise, we consider them to be in error.

We observe, too, that allowing measures to be the subject of dispute settlement proceedings, whether or not they are of a mandatory character, is consistent with the comprehensive nature of the right of Members to resort to dispute settlement to 'preserve [their] rights and obligations . . . under the covered agreements, and to clarify the existing provisions of those agreements'.[269] As long as a Member respects the principles set forth in Articles 3.7 and 3.10 of the DSU, namely, to exercise their 'judgement as to whether action under these procedures would be fruitful' and to engage in dispute settlement in good faith, then that Member is entitled to request a panel to examine measures that the Member considers nullify or impair its benefits. We do not think that panels are obliged, as a preliminary jurisdictional matter, to examine whether the challenged measure is mandatory. This issue is relevant, if at all, only as part of the panel's assessment of whether the measure is, as such, inconsistent with particular obligations. It is to this issue that we now turn."[270]

193. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body, referring to its previous report in *US – 1916 Act* where it did follow the mandatory/discretionary rule, indicated that it had yet to pronounce itself generally upon the continuing relevance of such a distinction and warned against its "mechanistic application":

"We explained in *US – 1916 Act* that this analytical tool existed prior to the establishment of the WTO, and that a number of GATT panels had used it as a technique for evaluating claims brought against legislation as such.[271]

---

[264] (*footnote original*) We note that in a recent case, a panel found that even discretionary legislation may violate certain WTO obligations. See Panel Report, *United States – Section 301*, *supra*, footnote 23, paras. 7.53–7.54.

[265] (*footnote original*) We note that, in the EC Panel Report, the Panel reached the same results as in the Japan Panel Report without making any finding that the notion of mandatory/discretionary legislation "is no longer relevant".

[266] Appellate Body Report on *US – 1916 Act*, para. 99.

[267] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, footnote 334.

[268] (*footnote original*) We observe that the scope of each element in the phrase "laws, regulations and administrative procedures" must be determined for purposes of WTO law and not simply by reference to the label given to various instruments under the domestic law of each WTO Member. This determination must be based on the content and substance of the instrument, and not merely on its form or nomenclature. Otherwise, the obligations set forth in Article 18.4 would vary from Member to Member depending on each Member's domestic law and practice.

[269] Article 3.2 of the DSU.

[270] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 87–89.

[271] (*footnote original*) Appellate Body Report, *US – 1916 Act*, paras. 61 and 88.

> As the Panel seemed to acknowledge,[272] we have not, as yet, been required to pronounce generally upon the continuing relevance or significance of the mandatory/discretionary distinction.[273] Nor do we consider that this appeal calls for us to undertake a comprehensive examination of this distinction. We do, nevertheless, wish to observe that, as with any such analytical tool, the import of the 'mandatory/discretionary distinction' may vary from case to case. For this reason, we also wish to caution against the application of this distinction in a mechanistic fashion."[274]

Application of tariffs as a measure

194. The Appellate Body on *EC – Computer Equipment* opined that not only measures of general application, but also the application of tariffs by customs authorities were "measures" within the meaning of Article 6.2. The Appellate Body agreed that the request for establishment of the Panel did identify the measures properly:

> "We consider that 'measures' within the meaning of Article 6.2 of the DSU are not only measures of general application, i.e., normative rules, but also can be the application of tariffs by customs authorities. Since the request for the establishment of a panel explicitly refers to the application of tariffs on LAN equipment and PCs with multimedia capability by customs authorities in the European Communities, we agree with the Panel that the measures in dispute were properly identified in accordance with the requirements of Article 6.2 of the DSU."[275]

Anti-dumping measures

195. As regards the scope of a "measure" under the *Anti-Dumping Agreement*, see paragraph 1 and Section XVII.B.5(i) of the Chapter on the *Anti-Dumping Agreement*.

(iii) General practice as a measure

196. In *US – Export Restraints*, Canada claimed that the United States "practice" of treating export restraints as meeting the "financial contribution" requirement of Article 1.1(a)(1)(iv) of the *SCM Agreement* was a measure and could be challenged as such. Canada defined the United States' "practice" as "an institutional commitment to follow declared interpretations or methodologies that is reflected in cumulative determinations" and claimed that this "practice" has an "operational existence in and of itself".[276] The Panel considered whether the alleged United States practice required the United States' authorities to treat export restraints in a certain way and therefore had "independent operational status". The Panel, which concluded that there was no measure in the form of a United States practice, indicated:

> "[W]hile Canada may be right that under US law, 'practice must normally be followed, and those affected by US [CVD] law . . . therefore have reason to expect that it will be',[277] past practice can be departed from as long as a reasoned explanation, which prevents such practice from achieving independent operational status in the sense of *doing* something or *requiring* some particular action [is given]. The argument that expectations are created on the part of foreign governments, exporters, consumers, and petitioners as a result of any particular practice that the DOC 'normally' follows would not be sufficient to accord such a practice an independent operational existence. Nor do we see how the DOC's references in its determinations to its practice gives 'legal effect to that "practice" as determinative of the interpretations and methodologies it applies'.[278] US 'practice' therefore does not appear to have independent operational status such that it could independently give rise to a WTO violation as alleged by Canada."[279]

197. In *US – Steel Plate*, the United States, in reference to the Panel Report on *US – Export Restraints* (see paragraph 196 above), argued that the United States' "practice" (in this case its practice as regards total facts available)[280] could not be the subject of a claim because

---

[272] (*footnote original*) In footnote 95 to para. 7.114, the Panel quoted the following statement from para. 7.88 of the Panel Report in *US – Steel Plate*: "[t]he Appellate Body has recognized the distinction, but has not specifically ruled that it is determinative in consideration of whether a statute is inconsistent with relevant WTO obligations."

[273] (*footnote original*) In our Report in *US – 1916 Act*, we examined the challenged legislation and found that the alleged "discretionary" elements of that legislation were not of a type that, *even under the mandatory/discretionary distinction*, would have led to the measure being classified as "discretionary" and therefore consistent with the *Anti-Dumping Agreement*. In other words, we *assumed* that the distinction could be applied because it did not, in any event, affect the outcome of our analysis. We specifically indicated that it was not necessary, in that appeal, for us to answer "the question of the continuing relevance of the distinction between mandatory and discretionary legislation for claims brought under the *Anti-Dumping Agreement*". (Appellate Body Report, *US – 1916 Act*, para. 99.) We also expressly declined to answer this question in footnote 334 to paragraph 159 of our Report in *US – Countervailing Measures on Certain EC Products*. Furthermore, the appeal in *US – Section 211 Appropriations Act* presented a unique set of circumstances. In that case, in defending the measure challenged by the European Communities, the United States unsuccessfully argued that discretionary regulations, issued under a separate law, cured the discriminatory aspects of the measure at issue.

[278] (*footnote original*) Second Written Submission of Canada, para. 40.

[279] Panel Report on *US – Export Restraints*, para. 8.126.

[280] In *US – Hot-Rolled Steel*, Japan had also challenged the "general" practice of the United States' investigating authorities regarding total facts available. The Panel did not rule on whether a general practice could be challenged separately from the statutory measure on which it is based because it concluded that Japan's claim in this regard was outside its terms of reference. Indeed, the Panel found that there was no mention of such a claim in Japan's request for the establishment of a panel. Panel Report on *US – Hot-Rolled Steel*, para. 7.22.

it did not have "independent operational status" and therefore it was not a "measure".[281] India, on the contrary, claimed that a "practice" becomes a "measure" through repeated similar responses to the same situation.[282] The Panel concluded:

> "That a particular response to a particular set of circumstances has been repeated, and may be predicted to be repeated in the future, does not, in our view transform it into a measure. Such a conclusion would leave the question of what is a measure vague and subject to dispute itself, which we consider an unacceptable outcome. Moreover, we do not consider that merely by repetition, a Member becomes obligated to follow its past practice. . .[283]
>
> [T]he challenged practice in this case is, in our view, no different from that considered in the *US – Export Restraints* case. It can be departed from so long as a reasoned explanation is given. It therefore lacks independent operational status, as it cannot require USDOC to do something, or refrain from doing something."[284]

(iv) Private action as a "measure"

198. The Panel on *Japan – Film* characterized the problem of classifying private action as a governmental "measure" in the following terms:

> "As the WTO Agreement is an international agreement, in respect of which only national governments and separate customs territories are directly subject to obligations, it follows by implication that the term *measure* in Article XXIII:1(b) and Article 26.1 of the DSU, as elsewhere in the WTO Agreement, refers only to policies or actions of governments, not those of private parties. But while this 'truth' may not be open to question, there have been a number of trade disputes in relation to which panels have been faced with making sometimes difficult judgments as to the extent to which what appear on their face to be private actions may nonetheless be attributable to a government because of some governmental connection to or endorsement of those actions."[285]

199. Within the context referred to in paragraph 198 above, the Panel on *Japan – Film* had to determine whether so-called "administrative guidance" in Japan amounted to a governmental "measure". The Panel began by considering the ordinary meaning of the term "measure":

> "The ordinary meaning of *measure* as it is used in Article XXIII:1(b) certainly encompasses a law or regulation enacted by a government. But in our view, it is broader than that and includes other governmental actions short of legally enforceable enactments.[286] At the same time, it is also true that not every utterance by a government official or study prepared by a non-governmental body at the request of the government or with some degree of government support can be viewed as a measure of a Member government.
>
> In Japan, it is accepted that the government sometimes acts through what is referred to as administrative guidance. In such a case, the company receiving guidance from the Government of Japan may not be legally bound to act in accordance with it, but compliance may be expected in light of the power of the government and a system of government incentives and disincentives arising from the wide array of government activities and involvement in the Japanese economy. As noted by the parties, administrative guidance in Japan takes various forms. Japan, for example, refers to what it calls 'regulatory administrative guidance', which it concedes effectively substitutes for formal government action.[287] It also refers to promotional administrative guidance, where companies are urged to do things that are in their interest to do in any event. In Japan's view, this sort of guidance should not be assimilated to a measure in the sense of Article XXIII:1(b). For our purposes, these categories inform, but do not determine the issue before us. Thus, it is not useful for us to try to place specific instances of administrative guidance into one general category or another. It will be necessary for us, as it has been for GATT panels in the past, to examine each alleged 'measure' to see whether it has the particular attributes required of a measure for Article XXIII:1(b) purposes."[288]

200. The Panel on *Japan – Film* subsequently reviewed GATT practice with respect to this subject-matter and defined "sufficient government involvement" as the decisive criterion for whether a private action may be deemed to be a governmental "measure":

> "[P]ast GATT cases demonstrate that the fact that an action is taken by private parties does not rule out the possibility that it may be deemed to be governmental if there is sufficient government involvement with it. It is difficult to establish bright-line rules in this regard, however. Thus, that possibility will need to be examined on a case-by-case basis."[289]

201. In *Canada – Autos*, the Panel examined the GATT-consistency of commitments undertaken by Canadian motor vehicle manufacturers in their letters addressed to the Canadian Government to increase Canadian value added in the production of motor vehi-

[284] Panel Report on *US – Steel Plate*, para. 7.23.
[285] Panel Report on *Japan – Film*, para. 10.52.
[286] (*footnote original*) The two definitions of *measure* relevant to our consideration in the *Concise Oxford Dictionary (Ninth Edition 1995)* are "legislative enactment" and "suitable action to achieve some end".
[287] (*footnote original*) See para. 6.94. [Panel Report on *Japan – Film.*]
[288] Panel Report on *Japan – Film*, paras. 10.43–10.44.
[289] Panel Report on *Japan – Film*, paras. 10.55–10.56.

cles. Referring to the GATT Panel Reports on *Canada – FIRA* and *EEC – Parts and Components*,[290] the Panel analysed whether the action of private parties is subject to Article III:4 as follows:

> "It is evident from the reasoning of the Panel Reports in *Canada – FIRA* and in *EEC – Parts and Components* that these Reports do not attempt to state general criteria for determining whether a commitment by a private party to a particular course of action constitutes a 'requirement' for purposes of Article III:4. While these cases are instructive in that they confirm that both legally enforceable undertakings and undertakings accepted by a firm to obtain an advantage granted by a government can constitute 'requirements' within the meaning of Article III:4, we do not believe that they provide support for the proposition that either legal enforceability or the existence of a link between a private action and an advantage conferred by a government is a necessary condition in order for an action by a private party to constitute a 'requirement.' To qualify a private action as a 'requirement' within the meaning of Article III:4 means that in relation to that action a Member is bound by an international obligation, namely to provide no less favourable treatment to imported products than to domestic products.
>
> A determination of whether private action amounts to a 'requirement' under Article III:4 must therefore necessarily rest on a finding that there is a nexus between that action and the action of a government such that the government must be held responsible for that action. We do not believe that such a nexus can exist only if a government makes undertakings of private parties legally enforceable, as in the situation considered by the Panel on *Canada – FIRA*, or if a government conditions the grant of an advantage on undertakings made by private parties, as in the situation considered by the Panel on *EEC – Parts and Components*. We note in this respect that the word 'requirement' has been defined to mean '1. The action of requiring something; a request. 2. A thing required or needed, a want, a need. Also the action or an instance of needing or wanting something. 3. Something called for or demanded; a condition which must be complied with.' The word 'requirements' in its ordinary meaning and in light of its context in Article III:4 clearly implies government action involving a demand, request or the imposition of a condition but in our view this term does not carry a particular connotation with respect to the legal form in which such government action is taken. In this respect, we consider that, in applying the concept of 'requirements' in Article III:4 to situations involving actions by private parties, it is necessary to take into account that there is a broad variety of forms of government action that can be effective in influencing the conduct of private parties."[291]

202. In *Argentina – Hides and Leather*, the European Communities claimed that an Argentine resolution, which authorized the presence of representatives of the Argentine domestic leather tanning industry during customs clearance of exports of hides and leather, operated as a de facto export restriction in violation of Article XI:1 of *GATT 1994*. The European Communities admitted that the Argentine measure did not expressly limit exports; however, the European Communities claimed that the presence of the industry associations during the export clearance process allowed access to exporters' confidential business information, which was subsequently used – by virtue of the existence of a tanners' cartel in the Argentine market – to exercise pressure on hides and leather producers not to export their products. The Panel ultimately rejected the European Communities' arguments on the basis of a lack of evidence:

> "We agree with the view expressed by the panel in *Japan – Film.* However, we do not think that it follows either from that panel's statement or from the text or context of Article XI:1 that Members are under an obligation to exclude any possibility that governmental measures may enable private parties, directly or indirectly, to restrict trade, where those measures themselves are not trade-restrictive.[292]
>
> . . .
>
> The European Communities acknowledges that the representatives of the tanning industry do not have the *de jure* ability to halt bovine hide exports. However, according to the European Communities, having such representatives present during the export clearance process in itself restricts exports in the context of the facts of the case. The European Communities has advanced several reasons why this might be so. The European Communities refers to the GATT dispute of *Japan – Semiconductors* for the proposition that there can be export restrictions without overt actions by the government to physically stop exports. According to the European Communities, in that case it was sufficient for the government to set up a system where peer pressure was used to discourage exports. . . .
>
> . . .
>
> [I]t is possible that a government could implement a measure which operated to restrict exports because of its interaction with a private cartel. Other points would need to be argued and proved (such as whether there was or needed to be knowledge of the cartel practices on the part of the government) or, to put it as mentioned

[290] GATT Panel Reports on *Canada – FIRA*, para. 5.4 and *EEC – Parts and Components*, para. 5.21.

[291] Panel Report on *Canada – Autos*, paras. 10.106–10.107.

[292] (*footnote original*) As we understand it, Article XI:1 does not incorporate an obligation to exercise "due diligence" in the introduction and maintenance of governmental measures beyond the need to ensure the conformity with Article XI:1 of those measures taken alone.

above, it would need to be established that the actions are properly attributed to the Argentinean government under the rules of state responsibility."[293]

(v) Standard for sufficient "identification"

Identification of measure

203. In *EC – Bananas III*, the "basic EC regulation at issue" was identified in the request for establishment of the Panel. In addition, the request referred in general terms to "subsequent EC legislation, regulations and administrative measures . . . which implement, supplement and amend [the EC banana] regime". The Panel found that for purposes of Article 6.2 this reference was sufficient to cover all European Communities legislation dealing with the importation, sale and distribution of bananas because the measures that the complainants were contesting were "adequately identified", even though they were not explicitly listed.[294] The Appellate Body agreed that the panel request "contains sufficient identification of the measures at issue to fulfil the requirements of Article 6.2".[295]

204. In *Japan – Film*, Japan requested the Panel to exclude eight measures from consideration because they were not set forth in either the request for consultations or the request for the establishment of a panel. Although the measures in question had not been "explicitly described" in the panel request, the Panel considered those measures to be within its terms of reference because they were "implementing measures" based on a basic framework law, specifically identified in the Panel request, which specified the form and circumscribed the possible content and scope of such implementing measures. The Panel established a "clear relationship" standard:

> "The question thus becomes whether the ordinary meaning of the terms of Article 6.2, i.e., that 'the specific measures at issue' be identified in the panel request, can be met if a 'measure' is not explicitly described in the request. To fall within the terms of Article 6.2, it seems clear that a 'measure' not explicitly described in a panel request must have a clear relationship to a 'measure' that is specifically described therein, so that it can be said to be 'included' in the specified 'measure'. In our view, the requirements of Article 6.2 would be met in the case of a 'measure' that is subsidiary or so closely related to a 'measure' specifically identified, that the responding party can reasonably be found to have received adequate notice of the scope of the claims asserted by the complaining party. The two key elements – close relationship and notice – are inter-related: only if a 'measure' is subsidiary or closely related to a specifically identified 'measure' will notice be adequate. For example, we consider that where a basic framework law dealing with a narrow subject matter that provides for implementing 'measures' is specified in a panel request, implementing 'measures' might be considered in appropriate circumstances as effectively included in the panel request as well for purposes of Article 6.2. Such circumstances include the case of a basic framework law that specifies the form and circumscribes the possible content and scope of implementing 'measures'."[296]

205. The Panel on *Argentina – Footwear (EC)* found that "it is the identification of [the] measures (rather than merely the numbers of the resolutions and the places of their promulgation in the Official Journal) which is primarily relevant for the purposes of Article 6.2 of the DSU":

> "[W]e consider that the EC's request primarily and unambiguously identifies the provisional and definitive measures (rather than only the cited resolutions and promulgations as such). In our view, it is the identification of these measures (rather than merely the numbers of the resolutions and the places of their promulgation in the Official Journal) which is primarily relevant for purposes of Article 6.2 of the DSU. Therefore, we consider that it is the provisional and definitive measures in their substance rather than the legal acts in their original or modified legal forms that are most relevant for our terms of reference. In our view, this is consistent with the Appellate Body's findings in the *Guatemala – Cement* case."[297]

206. The Panel on *US – Carbon Steel* noted the above findings of the Panel on *Japan – Film* and indicated that the expedited review procedure concerned was not a "measure" that was "subsidiary" or "closely related" to "any of the measures specifically identified":

> "The United States explains that, upon automatic initiation by the DOC of a sunset review within five years of the date of publication of a CVD order, a review can follow one of three basic paths: (i) revocation of the order; (ii) an expedited sunset review; and (iii) a full sunset review. We do not consider that the European Communities' general discussion of the automatic initiation of sunset reviews by the DOC is sufficient to put the United States – as well as other Members – on notice that the expedited review procedure was also under challenge. We note that the European Communities' request refers to 'certain aspects of the sunset review procedure which led to [the DOC decision not to revoke the CVDs on carbon steel]'. The challenge is thus apparently to those aspects of the sunset review procedure that have some relevance to the carbon steel case, which is not true of the expedited review procedure, because the carbon steel case involved a full, not expedited,

[297] Panel Report on *Argentina – Footwear (EC)*, para. 8.40.

review. We do not consider the expedited review procedure to be 'a "measure" that is subsidiary, or so closely related to' any of the measures specifically identified, 'that the responding party can reasonably be found to have received adequate notice of the scope of the claims asserted by the complaining party'. We, therefore, find that the expedited review procedure is not sufficiently related to a measure or measures that are specifically identified in the request for establishment as to properly bring it within our terms of reference.[298]"[299]

207. As regards the identification of anti-dumping measures, see paragraphs 1 and XVII.B.5(i) of the Chapter on the *Anti-Dumping Agreement.*

Identification of products

208. The Appellate Body on *EC – Computer Equipment* considered whether the measures in dispute and the products affected by such measures were identified with sufficient specificity by the United States in its request for the establishment of a panel. The United States' request for the establishment of panel referred to "all types of LAN equipment" and "PCs with multimedia capability". The Appellate Body considered whether these terms sufficiently defined the products at issue:

"Article 6.2 of the DSU does *not* explicitly require that the products to which the 'specific measures at issue' apply be identified. However, with respect to certain WTO obligations, in order to identify 'the specific measures at issue', it may also be necessary to identify the products subject to the measures in dispute.

LAN equipment and PCs with multimedia capacity are both generic terms. Whether these terms are sufficiently precise to 'identify the specific measure at issue' under Article 6.2 of the DSU depends, in our view, upon whether they satisfy the purposes of the requirements of that provision.

. . .

The European Communities argues that the lack of precision of the term, LAN equipment, resulted in a violation of its right to due process which is implicit in the DSU. We note, however, that the European Communities does not contest that the term, LAN equipment, is a commercial term which is readily understandable in the trade. The disagreement between the European Communities and the United States concerns its exact definition and its precise product coverage. We also note that the term, LAN equipment, was used in the consultations between the European Communities and the United States prior to the submission of the request for the establishment of a panel and, in particular, in an 'Information Fiche' provided by the European Communities to the United States during informal consultations in Geneva in March 1997. We do not see how the alleged lack of precision of the terms, LAN equipment and PCs with multimedia capability, in the request for the establishment of a panel affected the rights of defence of the European Communities *in the course* of the panel proceedings. As the ability of the European Communities to defend itself was not prejudiced by a lack of knowing the measures at issue, we do not believe that the fundamental rule of due process was violated by the Panel."[300, 301]

209. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling with respect to the specificity of the panel requests of the complainants, in this case, the European Communities and the United States. Korea considered that the phrases used by the European Communities ("certain alcoholic beverages falling within HS heading 2208") and the United States ("other distilled spirits such as whisky, brandy, vodka, gin and ad-mixtures") were not specific enough to satisfy Article 6.2. Korea sought this preliminary ruling in order to limit the products at issue in the dispute. The Panel disagreed with Korea:

"The question of whether a panel request satisfies the requirements of Article 6.2 is to be determined on a case by case basis with due regard to the wording of Article 6.2 . . ., the question is whether Korea is put on sufficient notice as to the parameters of the case it is defending . . .

. . .

Korea argues that each imported product must be specifically identified in order to be within the scope of the panel proceeding. The complainants argue that the appropriate imported product is all distilled beverages. They claim, in fact, that for purposes of Article III, there is only one category in issue. They claim to have identified specific examples of such distilled alcoholic beverages for purposes of illustration, not as limits to the category.

The issue of the appropriate categories of products to compare is important to this case. In our view, however, it is one that requires a weighing of evidence. As such it is not an issue appropriate for a preliminary ruling in this case. This is particularly so in light of the Appellate Body's opinion in *Japan – Taxes on Alcoholic Beverages II*,[302]

---

[298] (*footnote original*) Having concluded that the European Communities has not identified the expedited review procedure as a specific measure at issue in its request for establishment, we need not, and do not, consider whether the European Communities has provided "a brief summary of the legal basis of the complaint sufficient to present the problem clearly" in that request for establishment (paras. 8.5–8.6, *supra*).

[299] Panel Report on *US – Carbon Steel*, para. 8.11.

[300] Appellate Body Report on *EC – Computer Equipment*, paras. 67–68 and 70.

[301] See also Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.40, where the Panel found that the term "export credits" was "readily understandable" in the context of a dispute under Article 3.1(a) of the *SCM Agreement.*

[302] (*footnote original*) Appellate Body Report on *Japan – Taxes on Alcoholic Beverages* (*Japan – Taxes on Alcoholic Beverages II*), adopted on 1 November 1996, WT/DS8/AB/R, WT/DS10/AB/R, WT/DS11/AB/R, at pp. 26, 32.

that all imported distilled alcoholic beverages were discriminated against. That element of the decision is not controlling on the ultimate resolution of other cases involving other facts; however, it cannot be considered inappropriate for complainants to follow it in framing their request for a panel in a dispute involving distilled alcoholic beverages. While it is possible that in some cases, the complaint could be considered so vague and broad that a respondent would not have adequate notice of the actual nature of the alleged discrimination, it is difficult to argue that such notice was not provided here in light of the identified tariff heading and the Appellate Body decision in the *Japan – Taxes on Alcoholic Beverages II*. Furthermore, we note that the Appellate Body recently found that a panel request based on a broader grouping of products was sufficiently specific for purposes of Article 6.2.[303] We find therefore, that the complainants' requests for a panel satisfied the requirements of Article 6.2 of the DSU."[304]

210. In *US – FSC*, the United States argued that the European Communities request for the establishment of a panel failed to identify specific measures at issue because the European Communities did not identify the specific products in question as "the nature of export subsidy obligations imposed by the Agreement on Agriculture differ depending on the products at issue and commitments made by the United States thereunder".[305] The Panel found that the request for the establishment satisfied the requirements of Article 6.2 of the *DSU* and stated:

"In its request for establishment of a panel, the European Communities states that in its view the FSC is an export subsidy and that 'the United States has declared that the [FSC] Scheme is not taken into account for the purpose of compliance with their commitments under the AA . . . .' Accordingly, given the inherently all-encompassing nature of this claim, it constitutes a claim that the FSC could give rise to violations of the Agreement on Agriculture with respect to any agricultural product. Consequently, and in the absence of any specification as to the products at issue, this request puts the United States and third parties on notice that the European Communities asserts the existence of violations of the Agreement on Agriculture with respect to all agricultural products."[306]

Identification of industry

211. In *Canada – Aircraft*, Canada asserted before the Panel that the term "civil aircraft industry" was too broad for the purposes of Article 6.2 of the *DSU* because "[i]t includes firms ranging from machine shops and metal treatment facilities to those involved in advanced instrumentation and communications equipment".[307] The Panel ruled:

"We do not consider that the mere fact that the scope of a measure is identified in the request for establishment by reference to a broad product or industry grouping necessarily renders that request for establishment inconsistent with Article 6.2 of the DSU. We believe that the Appellate Body was of a similar opinion in *LAN Equipment,* where it shared the US concern that:

'if the EC arguments on specificity of product definition are accepted, there will inevitably be long drawn-out procedural battles at the early stage of the panel process in every proceeding. The parties will contest every product definition, and the defending party in each case will seek to exclude all products that the complaining parties may have identified by grouping, but not spelled out in "sufficient" detail.'[308]

Although the Appellate Body's remarks were made in the context of a reference to a broad product grouping in the complaining party's request for establishment, we can see no basis for not adopting a similar approach when the request for establishment refers to a broad industry sector, such as the 'civil aircraft industry'. If a complaining party believes that a measure affects a broad industry sector, in our view that complaining party should be entitled to challenge that measure insofar as it affects the totality of the industry concerned, without having to spell out the individual components of that industry, and without running afoul of Article 6.2 of the DSU."[309]

(vi) Measures falling within/outside the panel's terms of reference

212. As regards the scope of measures from the point of view of the scope of the panel's terms of reference and, in particular, the issues surrounding terminated, amended or vague measures, see Section VII.B.2(a)(ii) below.

(d) "a brief summary of the legal basis of the complaint . . . sufficient to present the problem clearly"

(i) Concept of "claim"

213. In *Korea – Dairy*, when distinguishing between claims and arguments, the Appellate Body emphasized that "By '*claim*' we mean a claim that the respondent party has violated, or nullified or impaired the benefits arising from, an identified provision of a particular agreement."[310]

[303] (*footnote original*) Appellate Body Report on *European Communities – Customs Classification of Certain Computer Equipment*, adopted on 22 June 1998 (WT/DS62/AB/R, WT/DS67/AB/R), at paras. 58–73.

[308] (*footnote original*) The Panel referred to para. 71.
[309] Panel Report on *Canada – Aircraft*, paras. 9.36–9.37.
[310] Appellate Body Report on *Korea – Dairy*, para. 139.

(ii) Two-stage test

214. In *EC – Bed Linen*, the Panel analysed the above conclusions of the Appellate Body in *Korea – Dairy* (see paragraphs 219–220 below) and considered that they set "a two-stage test to determine the sufficiency of a panel request under Article 6.2 of the DSU: first, examination of the text of the request for establishment itself, in light of the nature of the legal provisions in question; secondly, an assessment of whether the respondent has been prejudiced by the formulation of claims in the request for establishment, given the actual course of the panel proceedings".[311]

(iii) Identification of the claims

General

215. In *EC – Bananas III*, the Panel indicated that references to a WTO agreement without mentioning any provisions or to unidentified "other" provisions would be insufficient to meet the requirements of Article 6.2:

> "The panel request alleges an inconsistency with the requirements of the Agreement on Agriculture, without specifying any provision thereof. It also states that 'the EC's measures are inconsistent with the following Agreements and provisions *among others*', suggesting that there may be inconsistencies with unspecified agreements and inconsistencies with unspecified provisions of the specified agreements. In these two situations, it is not possible at the panel request stage, even in the broadest generic terms, to describe what legal 'problem' is asserted. While a reference to a specific provision of a specific agreement may not be essential if the problem or legal claim is otherwise clearly described, in the absence of some description of the problem, a mere reference to an entire agreement or simply to 'other' unspecified agreements or provisions is inadequate under the terms of Article 6.2. Accordingly, we find that references to a WTO agreement without mentioning any provisions or to unidentified 'other' provisions are too vague to meet the standards of Article 6.2 of the DSU."[312]

216. The Panel on *EC – Bananas III* also held that "[a] request [for the establishment of a panel] is sufficiently specific to comply with the minimum standards established by the terms of Article 6.2 of the DSU", if it lists the provisions of the specific agreements which the complaining party alleges to have been violated. The Appellate Body agreed:

> "We accept the Panel's view that it was sufficient for the Complaining Parties to list the provisions of the specific agreements alleged to have been violated without setting out detailed arguments as to which specific aspects of the measures at issue relate to which specific provisions of those agreements. In our view, there is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the DSU, and the *arguments* supporting those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties."[313]

217. In *India – Patents (US)*, India argued that the Panel exceeded its authority under the *DSU* by ruling on the United States' subsidiary claim under Article 63 of the *TRIPS Agreement* after having first accepted the principal claim by the United States of a violation of Article 70.8 of the *TRIPS Agreement*. The request for the establishment of the panel by the United States reads in pertinent part: "India's legal regime appears to be inconsistent with the obligations of the *TRIPS Agreement*, including but not necessarily limited to Articles 27, 65 and 70." The Appellate Body accepted India's claim that the phrase "including but not necessarily limited to" could not "identify the specific measures at issue", as required by Article 6.2 of the *DSU*:

> "[A] claim *must* be included in the request for establishment of a panel in order to come within a panel's terms of reference in a given case.
>
> With respect to Article 63, the convenient phrase, 'including but not necessarily limited to', is simply not adequate to 'identify the specific measures at issue and provide a brief summary of the legal basis of the complaint sufficient to present the problem clearly' as required by Article 6.2 of the DSU. If this phrase incorporates Article 63, what Article of the *TRIPS Agreement* does it not incorporate? Therefore, this phrase is not sufficient to bring a claim relating to Article 63 within the terms of reference of the Panel."[314]

218. In *India – Patents (US)*, the Appellate Body stressed the importance of the parties' duty to be "fully forthcoming" and to clearly state their claims:

> "All parties engaged in dispute settlement under the DSU must be fully forthcoming from the very beginning both as to the claims involved in a dispute and as to the facts relating to those claims. Claims must be stated clearly."[315]

219. In *Korea – Dairy*, Korea argued before the Appellate Body in its appeal that the mere listing of four articles of the *Agreement on Safeguards* alleged to have been breached does not provide a brief summary of the legal basis of the complaint sufficient to present the problem

[311] Panel Report on *EC – Bed Linen*, para. 6.26. See also Panel Report on *Egypt – Steel Rebar*, para. 7.25.
[312] Panel Report on *EC – Bananas III (Guatemala and Honduras)*, para. 7.30.
[313] Appellate Body Report on *EC – Bananas III*, para. 141.
[314] Appellate Body Report on *India – Patents (US)*, paras. 89–90.
[315] Appellate Body Report on *India – Patents (US)*, para. 94.

clearly. The Appellate Body confirmed its finding in *EC – Bananas III*, but augmented it by establishing the standard of whether "the ability of the respondent to defend itself was prejudiced, given the actual course of the panel proceedings, by the fact that the panel request simply listed the provisions claimed to have been violated". In its analysis, the Appellate Body identified the necessary requirements for providing a "summary" under Article 6.2:

> "Article 6.2 demands only a summary – and it may be a brief one – of the legal basis of the complaint; but the summary must, in any event, be one that is 'sufficient to present the problem clearly'. It is not enough, in other words, that 'the legal basis of the complaint' is summarily identified; the identification must 'present the problem clearly'."[316]

220. The Appellate Body on *Korea – Dairy* confirmed its finding in *EC – Bananas III*, but cautioned that this finding represented only the minimum requirements under Article 6.2 and that the "mere listing of the articles of an agreement alleged to have been breached" may not necessarily be sufficient for the purposes of Article 6.2. The Appellate Body opined that the latter case may arise "where the articles listed establish not one single, distinct obligation, but rather multiple obligations. In such a situation, the listing of articles of an agreement, in and of itself, may fall short of the standard of Article 6.2." Ultimately, the Appellate Body set forth the standard of "ability of the respondent to defend itself":

> "[W]e did not purport in *European Communities – Bananas* to establish the mere listing of the articles of an agreement alleged to have been breached as a standard of precision, observance of which would *always* constitute sufficient compliance with the requirements of Article 6.2, *in each and every case*, without regard to the particular circumstances of such cases. If we were in fact attempting to construct such a rule in that case, there would have been little point to our enjoining panels to examine a request for a panel '*very carefully to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU*'. Close scrutiny of what we in fact said in *European Communities – Bananas* shows that we, firstly, restated the reasons why precision is necessary in a request for a panel; secondly, we stressed that claims, not detailed arguments, are what need to be set out with sufficient clarity; and thirdly, we agreed with the conclusion of the panel that, in that case, the listing of the articles of the agreements claimed to have been violated satisfied the *minimum* requirements of Article 6.2 of the DSU. In view of all the circumstances surrounding that case, we concurred with the panel that the European Communities had not been misled as to what claims were in fact being asserted against it as respondent.
>
> Identification of the treaty provisions claimed to have been violated by the respondent is always necessary both for purposes of defining the terms of reference of a panel and for informing the respondent and the third parties of the claims made by the complainant; such identification is a minimum prerequisite if the legal basis of the complaint is to be presented at all.[317] But it may not always be enough. There may be situations where the simple listing of the articles of the agreement or agreements involved may, in the light of attendant circumstances, suffice to meet the standard of *clarity* in the statement of the legal basis of the complaint. However, there may also be situations in which the circumstances are such that the mere listing of treaty articles would not satisfy the standard of Article 6.2. This may be the case, for instance, where the articles listed establish not one single, distinct obligation, but rather multiple obligations. In such a situation, the listing of Articles of an agreement, in and of itself, may fall short of the standard of Article 6.2.
>
> . . .
>
> . . . we consider that whether the mere listing of the articles claimed to have been violated meets the standard of Article 6.2 must be examined on a case-by-case basis. In resolving that question, we take into account whether the ability of the respondent to defend itself was prejudiced, given the actual course of the panel proceedings, by the fact that the panel request simply listed the provisions claimed to have been violated."[318]

221. In *EC – Tube or Pipe Fittings*, the European Communities requested the Panel to make a preliminary ruling that certain of Brazil's claims were not within its

---

[316] Appellate Body Report on *Korea – Dairy*, para. 120.

[317] (*footnote original*) See Appellate Body Reports on *Brazil – Desiccated Coconut*, p. 22; *EC – Bananas III*, paras. 145 and 147; and *India – Patents*, paras. 89, 92 and 93.

[318] Appellate Body Report on *Korea – Dairy*, paras. 123–124 and 127. In *Argentina – Ceramic Tiles*, Argentina raised as a defence the concept of harmless error and argued that the complainant, the European Communities, had failed to demonstrate that the exporters concerned were prejudiced by the failure to determine an individual dumping margin. Argentina defined the concept of harmless error as "an error that does not cause injury or affect the rights of one of the parties" and contended that this concept has been accepted in WTO law through the Report of the Appellate Body in *Korea – Dairy* (see para. 98 of this Chapter). The Panel noted "however, that the Appellate Body Report in the *Korea – Dairy Safeguards* case, to which Argentina refers in support of its argument, dealt with the question of whether the request for establishment met the requirements of Article 6.2 of the DSU. The issue before the Appellate Body was whether Article 6.2 of the DSU was complied with or not. The Appellate Body, in deciding that question, concluded that one element to be considered was whether the defending Member was prejudiced in its ability to defend itself by a lack of clarity or specificity in the request for establishment. The Appellate Body did not address the question whether, once it had been established that a provision of the Agreement is violated, it needs in addition to be demonstrated that this violation had prejudiced the rights of the complaining party. Thus, we do not agree that this Appellate Body decision supports Argentina's argument that the concept of harmless error has been accepted in WTO law." Panel Report on *Argentina – Ceramic Tiles*, paras. 6.102–6.103.

terms of reference. The Panel noted that among the said claims were several provisions cited by Brazil in its first written submission that were not mentioned in its request for establishment. The Panel, in a finding not reviewed by the Appellate Body, considered that Brazil's claims under those provisions were not within its terms of reference. The Panel cautioned against the use of the expression "especially, but not exclusively" when identifying the claims in a request for establishment of a panel:

> "We note that the Panel request refers generally to the Articles of the *Anti-Dumping Agreement* in question (i.e. Articles 6, 9 and 12) and contains the phrase 'especially (but not exclusively)' when enumerating selective provisions (not including the provisions concerned here) under these Articles. However, we do not view such a general reference as sufficiently clear to identify the specific provisions at issue. This is particularly so in view of the fact that Articles 6, 9 and 12 of the *Anti-Dumping Agreement* contain multiple and diverse obligations, which relate to different subject-matters than the obligations contained in the specific provisions that are cited in the Panel request.[7] The phrase 'especially, but not exclusively' may be convenient, but is inadequate to 'identify the specific measures at issue and provide a brief summary of the legal basis of the complaint sufficient to present the problem clearly' as required by Article 6.2 of the *DSU*. Furthermore, even assuming *arguendo* that the obligations in these provisions may be 'inter-linked' with or 'dependent' upon a provision that is identified in the Panel request, we do not consider that this consideration is relevant here. The mere fact that a claim may be legally dependent upon another claim does not mean that it is subsumed within, or encompassed by, that claim. If a claim is not identified in the Panel request, the fact that it may be 'inter-linked' with an identified claim is not determinative."[319]

222. As regards the other claims, the European Communities had requested the Panel to find that they were not within its terms of reference. The Panel on *EC – Tube or Pipe Fittings* considered, in a finding not reviewed by the Appellate Body, that the European Communities had failed to demonstrate any prejudice to its interests by the way these "claims" appeared in the Panel request:

> "We consider that it is not necessary for us to rule on whether these allegations constitute 'claims' or 'arguments'. If they are arguments, there would be no need for them to be set out in the Panel request. Even assuming that all of the allegations identified above are 'claims' in respect of which the text of the Panel request may be somewhat deficient in describing the nature of the complaint, the European Communities has failed in any event to demonstrate to us any prejudice to its interests throughout the course of these Panel proceedings by the way these 'claims' appeared in the Panel request. . .
>
> . . . it was evident to us from the participation of the European Communities in asserting its views in various phases of these Panel proceedings, including in its first written submission and in the first Panel meeting and in the exchanges between the parties preceding the first Panel meeting on preliminary issues, that the EC's ability to defend itself had not been prejudiced over the course of these Panel proceedings."[320]

Distinction between claims and arguments

223. After agreeing with the Panel that the request for the establishment of the panel contained sufficient identification of the specific measures at issue to fulfil the requirements of Article 6.2 of the *DSU*, the Appellate Body in *EC – Bananas III* set out the difference between claims and arguments, and furthermore rejected the notion of "curing" a faulty panel request where claims had not been included in the panel request:

> "In our view, there is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the DSU, and the *arguments* supporting those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties.
>
> Article 6.2 of the DSU requires that the *claims*, but not the *arguments*, must all be specified sufficiently in the request for the establishment of a panel in order to allow the defending party and any third parties to know the legal basis of the complaint. If a *claim* is not specified in the request for the establishment of a panel, then a faulty request cannot be subsequently 'cured' by a complaining party's argumentation in its first written submission to the panel or in any other submission or statement made later in the panel proceeding."[321]

224. In *EC – Hormones*, the European Communities argued on appeal that since the Panel was not entitled to make findings beyond what had been requested by the parties, it had erred by basing the main part of its reasoning on Article 5.5 of the *SPS Agreement* on a claim that the complainants had not made. The Appellate Body rejected the European Communities' argument and emphasized the distinction between claims and arguments:

---

[319] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.14.

[320] Panel Report on *EC – Tube or Pipe Fittings*, paras. 7.22–7.23. See also paras. 7.26–7.27.

[321] Appellate Body Report on *EC – Bananas III*, paras. 141–143. See also Appellate Body Report on *US – Lead and Bismuth II*, paras. 72 and 73.

"Considering that in its request for the establishment of a panel in the proceeding initiated by the United States, as well as in the proceeding started by Canada, both complainants have included a claim that the European Communities ban is inconsistent with Article 5 of the *SPS Agreement*, we believe that the objection of the European Communities overlooks the distinction between legal claims made by the complainant and arguments used by the complainant to sustain its legal claims. . . . Panels are inhibited from addressing legal claims falling outside their terms of reference. However, nothing in the *DSU* limits the faculty of a panel freely to use arguments submitted by any of the parties – or to develop its own legal reasoning – to support its own findings and conclusions on the matter under its consideration. A panel might well be unable to carry out an objective assessment of the matter, as mandated by Article 11 of the *DSU*, if in its reasoning it had to restrict itself solely to arguments presented by the parties to the dispute. Given that in this particular case both complainants claimed that the European Communities measures were inconsistent with Article 5.5 of the *SPS Agreement*, we conclude that the Panel did not make any legal finding beyond those requested by the parties."[322]

225. In *India – Patents (US)*, on the issue of claims and arguments, the Appellate Body stated:

"[T]here is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the DSU, and the *arguments* supporting those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions, and the first and second panel meetings with the parties as a case proceeds."[323]

226. In *Korea – Dairy*, Korea argued in its appeal that the Panel had erred by failing to consider Korea's argument that parties to a dispute settlement procedure cannot introduce new claims at, or subsequent to, the rebuttal stage. The Appellate Body emphasized the difference between claims and arguments as follows:

"[W]e agree with Korea that a party to a dispute settlement proceeding may not introduce a new claim during or after the rebuttal stage. Indeed, any claim that is not asserted in the request for the establishment of a panel may not be submitted at any time after submission and acceptance of that request.[324] By '*claim*' we mean a claim that the respondent party has violated, or nullified or impaired the benefits arising from, an identified provision of a particular agreement. Such a *claim of violation* must, as we have already noted, be distinguished from the *arguments* adduced by a complaining party to demonstrate that the responding party's measure does indeed infringe upon the identified treaty provision.[325] Arguments supporting a claim are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties.[326] In *European Communities – Hormones*, we emphasized the substantial latitude enjoyed by panels in treating the *arguments* presented by either of the parties and said:

> '. . . Panels are inhibited from addressing legal claims falling outside their terms of reference. However, nothing in the DSU limits the faculty of a panel freely to use arguments submitted by any of the parties – or to develop its own legal reasoning – to support its own findings and conclusions on the matter under its consideration.'[327]

---

[322] Appellate Body Report on *EC – Hormones*, para. 156. In *US – Certain EC Products*, the Appellate Body ruled that "the Panel was not obliged to limit its legal reasoning in reaching a finding to arguments presented by the [complainant]". See Appellate Body Report on *US – Certain EC Products*, para. 123. In *Chile – Price Band System*, Chile had asked the Appellate Body to reverse the Panel's finding on the inconsistency of Chile's price band system with Article II:1(b) second sentence on the ground that Argentina had not actually made a claim under that second sentence. Argentina referred to paragraph 156 of the Appellate Body Report on *EC – Hormones* in support of its argument that "Even if none of the parties had advanced arguments regarding the second sentence of Article II:1(b) of the GATT 1994, the Panel would have had the *right*, indeed the *duty*, to develop its own legal reasoning to support the proper resolution of Argentina's claim." The Appellate Body considered that, in this case, the Panel "had neither a 'right' nor a 'duty' to develop its own legal reasoning to support a claim under the second sentence" and stressed that "the Panel was not entitled to make a claim for Argentina, or to develop its own legal reasoning on a provision that was not at issue":

> "In *EC – Hormones*, and in *US – Certain EC Products*, we affirmed the capacity of panels to develop their own legal reasoning in a context in which it was clear that the complaining party had made a claim on the matter before the panel. It was also clear, in both those cases, that the complainant had advanced arguments in support of the finding made by the panel – even though the arguments in support of the claim were not the same as the interpretation eventually adopted by the Panel. The situation in this appeal is altogether different. No claim was properly made by Argentina under the *second* sentence of Article II:1(b). No legal arguments were advanced by Argentina under the *second* sentence of Article II:1(b). Therefore, those rulings have no relevance to the situation here.
>
> Contrary to what Argentina argues, given our finding that Argentina has not made a *claim* under the *second* sentence of Article II:1(b), the Panel in this case had neither a 'right' nor a 'duty' to develop its own legal reasoning to support a claim under the second sentence. The Panel was not entitled to make a claim for Argentina, or to develop its own legal reasoning on a provision that was not at issue."

Appellate Body Report on *Chile – Price Band System*, paras. 166–168. See also paras. 286–287 of this Chapter regarding the need for a claim to be specific.

[323] Appellate Body Report on *India – Patents (US)*, para. 88.

[324] (*footnote original*) Appellate Body Report on *EC – Bananas III*, para. 143.

[325] (*footnote original*) See also Appellate Body Report on *India – Patents I*, para. 88; and *EC – Hormones*, para. 156.

[326] (*footnote original*) Appellate Body Report on *India – Patents I*, para. 88.

[327] (*footnote original*) Appellate Body Report on *EC – Hormones*, para. 156.

> Both 'claims' and 'arguments' are distinct from the 'evidence' which the complainant or respondent presents to support its assertions of fact and arguments."[328]

227. In *Canada – Autos*, the Panel considered whether Japan's claim that it could "[reserve] its right to elaborate during the course of the panel deliberations" had prejudiced Canada's ability to defend itself. The Panel indicated that Canada had suffered no prejudice:

> "First, the Panel does not consider that this is a situation where, as argued by Canada, the complaining party is permitted 'to eke out its claims incrementally during the various stages of the case'. In making this argument, Canada refers to the Appellate Body decision in *European Communities – Regime for the Importation, Sale and Distribution of Bananas* (*EC – Bananas III)*. However, the situation here is unlike that in *EC – Bananas III*, where the Appellate Body stated that 'Article 6.2 of the DSU requires that the *claims*, but not the *arguments*, must all be specified sufficiently in the request for the establishment of a panel in order to allow the defending party and any third parties to know the legal basis of the complaint' (WT/DS27/AB/R, para. 143). In the case before us there is no Article 6.2 issue of specificity of the measures identified in the panel request. Japan in this dispute has not attempted to reserve a right to present a new claim at a later stage of the proceedings; rather, it appears that Japan has simply indicated that it may wish to further elaborate its arguments as to claims already set out in the panel request and in its initial arguments. As such, the Panel does not consider, at this stage, that Canada is likely to be prejudiced in its ability to defend itself in this action.[329]
>
> Second, to the extent any issue of procedural fairness should arise, for example, as to the right of rebuttal by Canada should Japan wait until a later stage of these proceedings to develop its arguments as to its GATT Article III:4 and TRIMS Article 2.1 claims with respect to the "manufacturing requirement" (production-to-sales ratio requirement), the Panel will ensure such procedural fairness by providing Canada with adequate opportunity to respond to any such further elaboration by Japan of its arguments under these claims.
>
> Third, in addition to ensuring procedural fairness, it is of course necessary to set a cut-off date beyond which no new argumentation as to the claims in issue may be accepted, except upon a showing of good cause. In the instant case, the Panel considers that no new argumentation should be introduced beyond the second panel meeting with the parties, except in response to any questions posed by the Panel or otherwise upon a showing of good cause."[330]

228. The Panel on *EC – Bed Linen (Article 21.5 – India)* noted the distinction drawn by the Appellate Body between claims and arguments and indicated that there existed "no obligation on a party to limit its arguments to only those treaty provisions about which claims have been identified in the request for establishment".[331]

(iv) Claims falling within/outside the panel's terms of reference

229. As regards the inclusion or exclusion of claims in the panel's terms of reference, see Section VII.B.2(a)(iii) below.

(v) "presenting the problem clearly"

General

230. In *US – Oil Country Tubular Goods Sunset Review*, the Appellate Body, further to referring to its previous reports on *Thailand – H-Beams* and *Korea – Dairy*, considered that a request for establishment "must plainly connect the challenged measure(s) with the provision(s) of the covered agreements claimed to have been infringed" in order to present the problem clearly:

> "[I]n order for a panel request to 'present the problem clearly', it must plainly connect the challenged measure(s) with the provision(s) of the covered agreements claimed to have been infringed, so that the respondent party is aware of the basis for the alleged nullification or impairment of the complaining party's benefits. Only by such connection between the measure(s) and the relevant provision(s) can a respondent 'know what case it has to answer, and . . . begin preparing its defence'.[332]"[333]

Relevance of presenting the problem clearly

231. In *Thailand – H-Beams*, the Appellate Body explained the due process objectives behind the requirement for sufficient clarity in a panel request:

> "Article 6.2 of the DSU calls for sufficient clarity with respect to the legal basis of the complaint, that is, with respect to the 'claims' that are being asserted by the complaining party. A defending party is entitled to know what case it has to answer, and what violations have been alleged so that it can begin preparing its defence. Likewise, those Members of the WTO who intend to participate as third parties in panel proceedings must be

[329] (*footnote original*) See the Appellate Body Report on *EC – Bananas III*, *supra* note 49, para. 141, where the Appellate Body states that, in its view, "there is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the DSU, and the *arguments* supporting those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties".

[330] Panel Report on *Canada – Autos*, paras. 4.11–4.13.

[331] Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.63.

[332] (*footnote original*) Appellate Body Report, *Thailand – H-Beams*, para. 88.

[333] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Review*, para. 162.

informed of the legal basis of the complaint. This requirement of due process is fundamental to ensuring a fair and orderly conduct of dispute settlement proceedings."[334]

232. Also, in *Thailand – H-Beams*, the Appellate Body explained further how claims of prejudice should be assessed (commenting particularly on the timing of challenging the sufficiency of a Panel request):

"Thailand argues that it was prejudiced by the lack of clarity of Poland's panel request. The fundamental issue in assessing claims of prejudice is whether a defending party was made aware of the claims presented by the complaining party, sufficient to allow it to defend itself. In assessing Thailand's claims of prejudice, we consider it relevant that, although Thailand asked the Panel for a preliminary ruling on the sufficiency of Poland's panel request with respect to Articles 5 and 6 of the *Anti-Dumping Agreement* at the time of filing of its first written submission, it did not do so at that time with respect to Poland's claims under Articles 2 and 3 of that Agreement. We must, therefore, conclude that Thailand did not feel at that time that it required additional clarity with respect to these claims, particularly as we note that Poland had further clarified its claims in its first written submission. This is a strong indication to us that Thailand did not suffer any prejudice on account of any lack of clarity in the panel request."[335]

233. In *Chile – Price Band System*, the Appellate Body ruled that "[t]he requirements of due process and orderly procedure dictate that claims must be made explicitly in WTO dispute settlement":

"Argentina appears to suggest that a claim may be made implicitly, and need not be made explicitly. We do not agree. The requirements of due process and orderly procedure dictate that claims must be made explicitly in WTO dispute settlement. Only in this way will the panel, other parties, and third parties understand that a specific claim has been made, be aware of its dimensions, and have an adequate opportunity to address and respond to it. WTO Members must not be left to wonder what specific claims have been made against them in dispute settlement. . ."[336]

234. In *US – Oil Country Tubular Goods Sunset Reviews*, the United States had made a request for a number of preliminary rulings regarding both the clarity of the request for establishment and the scope of the terms of reference of the Panel. The Panel, after declining all preliminary rulings, clarified that it had undertaken a textual analysis of the Panel request and that, therefore, it did not need to enter into the issue of whether the United States had been prejudiced in its right to defend itself due to the alleged inconsistencies in Argentina's panel request:

"[W]e note that as our analysis with respect to the totality of the United States' request for preliminary rulings was based on a textual analysis of Argentina's panel request, we did not need to inquire into the issue of whether the United States had been prejudiced in its right to defend itself in the present proceedings due to the alleged inconsistencies in the panel request. We nevertheless note that the United States has not shown to the Panel that it had been prejudiced in its right to defend itself in these proceedings due to these alleged inconsistencies in Argentina's panel request. In several instances, the United States argued that it did not know what case it had to answer because of the lack of precision with respect to certain parts of Argentina's panel request.[337] However, we consider that without supporting arguments, this simple allegation can not be taken to establish prejudice.[338]"[339]

(vi) Clarity of claims in written submissions

235. In *EC – Tube or Pipe Fittings*, the European Communities had requested the Panel to refuse to consider certain of Brazil's claims on the grounds that these claims were defective as they were too vaguely defined in Brazil's first written submission. In the view of the European Communities, admission of these claims would constitute an infringement of the European Communities' rights of defence and a departure from the good faith standard in Article 3.10 *DSU* and from the due process requirement that underlies the *DSU*. The Panel, in a preliminary ruling, rejected the European Communities' request on the grounds that the opportunity would still exist for Brazil to provide further supporting evidence and argumentation in its subsequent submissions with a view to clarifying those allegations in the course of the Panel proceedings:

"To the extent the European Communities is arguing that the first submission is determinative for the clarity of the claims for the purpose of the entire proceeding – in the sense that if a claim is not clearly stated there, no further opportunity exists for clarification over any of the remain-

[334] Appellate Body Report on *Thailand – H-Beams*, para. 88.
[335] Appellate Body Report on *Thailand – H-Beams*, para. 95. See also the Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.43, where the Panel also considered whether a lack of specificity in a panel request had prejudiced the respondent.
[336] Appellate Body Report on *Chile – Price Band System*, para. 164.
[337] (*footnote original*) See, for instance, First Written Submission of the United States, para. 110; Second Oral Submission of the United States, para. 41.
[338] (*footnote original*) We find support for this approach in the Appellate Body decision in *Korea – Dairy* and the panel decision in *HFCS*. See Appellate Body Report, *Korea – Definitive Safeguard Measure on Imports of Certain Dairy Products* ("*Korea – Dairy*"), WT/DS98/AB/R, adopted 12 January 2000, DSR 2000:I, 3, para. 131; Panel Report, *Mexico – Anti-Dumping Investigation of High Fructose Corn Syrup (HFCS) from the United States* ("*Mexico – Corn Syrup*"), WT/DS132/R and Corr.1, adopted 24 February 2000, DSR 2000:III, 1345, para. 7.17.
[339] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7.71.

ing portion of the proceedings – we cannot accept this argument. In our view, it is in the nature of the Panel process that the claims made by a party may be progressively clarified and refined throughout the proceeding.[340] This may occur through the submission of supporting evidence and argumentation by the parties, commencing with their first written submission, and followed by a round of rebuttal submissions, supplemented by oral statements and answers to questions. It is, of course, clear that this process of progressive clarification would not allow a party to add additional claims (which were not included in the request for establishment of the Panel) during the course of the proceedings. The fundamental due process rights of the parties are thereby preserved.

In the case before us, we consider that even if we were to agree with the European Communities that, at this stage, some of the allegations it identified in Brazil's first submission may be vague, the opportunity would still exist for Brazil to provide further supporting evidence and argumentation in its subsequent submissions with a view to clarifying those allegations in the course of the Panel proceedings (recalling, of course, that the working procedures we have adopted for these panel proceedings provide that the parties shall submit all factual evidence to the Panel no later than during the first substantive meeting, except with respect to evidence necessary for purposes of rebuttal submissions or answers to questions). In this regard we note, for example, that Brazil has already submitted, in response to the EC request, clarifications with regard to each of the claims identified by the European Communities as being 'overly vague'. Through the Panel process, the claims that the European Communities now considers to be vague may therefore become clear at a subsequent stage in these proceedings, including through submissions and through responses by Brazil to questions that the Panel and the European Communities may pose. However, if, subsequently in the course of these proceedings, the European Communities considers that Brazil's claims remain insufficiently clear or that these claims have finally become clear at such a late stage that the European Communities considers that it has not had an opportunity properly to respond, it may bring this situation to the attention of the Panel. The Panel will then consider the situation, keeping in mind the due process rights of the European Communities.

We find support for our ruling in the statement by the Appellate Body in its report on *US – FSC* that the 'procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes'.[341]"[342]

(e) Demonstration of compliance with Article 6.2 requirements

236. The Appellate Body stated in *US – Carbon Steel* that "compliance with the requirements of Article 6.2 must be demonstrated on the face of the request for the establishment of a panel".[343]

(f) Importance of timing of a specificity objection

237. In *EC – Bananas III*, the Appellate Body considered that the panel request specificity issue was a matter which could be dealt with early on in a case:

> "[T]his kind of issue could be decided early in panel proceedings, without causing prejudice or unfairness to any party or third party, if panels had detailed, standard working procedures that allowed, *inter alia*, for preliminary rulings."[344]

(i) Distinction between sufficiency of a panel request and establishing a prima facie case of violation

238. The Panel on *Thailand – H-Beams* stressed the importance of this distinction when dealing with Thailand's arguments concerning the alleged insufficiency of a panel request:

> "Thailand argues that 'a panel may only accept the mere listing of a particular article as sufficient if absolutely no prejudice was possible during the course of the proceedings.' According to Thailand, 'this would be the case only where (1) a panel found that the complainant had failed to present a prima facie case and thus the adequacy of the defence was irrelevant or (2) a panel did not reach the claims under the listed articles because it decided the case solely on claims properly described in the request.'[345] We are concerned here that Thailand is blurring the distinction between, on the one hand, the sufficiency of the panel request and, on the other, the issue of whether or not the complaining party establishes a *prima facie* case of violation of an obligation imposed by the covered agreements. We recall that 'there is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the DSU, and the *arguments* supporting

---

[340] (*footnote original*) We recall the statement by the Appellate Body that "there is a significant difference between the *claims* identified in the request for the establishment of a panel, which establish the panel's terms of reference under Article 7 of the *DSU*, and the *arguments* supporting those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties". Appellate Body Report, *European Communities – Regime for the Importation, Sale and Distribution of Bananas* ("*EC – Bananas III*"), WT/DS27/AB/R, adopted 25 September 1997, DSR 1997:II, 591, para. 141.

[341] (*footnote original*) Appellate Body Report, *United States – Tax Treatment of "Foreign Sales Corporations" ("US – FSC")*, WT/DS108/AB/R, adopted 20 March 2000, para. 166.

[342] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.10.

[343] Appellate Body Report on *US – Carbon Steel*, para. 127.

[344] Appellate Body Report on *EC – Bananas III*, para. 144.

[345] (*footnote original*) Thailand's response to Panel Questions 2(a) and 7(a), Annex 2–6.

> those claims, which are set out and progressively clarified in the first written submissions, the rebuttal submissions and the first and second panel meetings with the parties.'[346] Article 6.2 DSU does not relate directly to the sufficiency of the subsequent written and oral submissions of the parties in the course of the proceedings, which may develop the arguments in support of the claims set out in the panel request. Nor does it determine whether or not the complaining party will manage to establish a *prima facie* case of violation of an obligation under a covered agreement in the actual course of the panel proceedings . . ."[347]

(g) Relevance of the principle of good faith

239. As regards the principle of good faith, see paragraphs 43–46 above and 105–107 above.

C. RELATIONSHIP WITH OTHER ARTICLES

1. Article 4

240. With respect to the relationship with Article 4, see paragraph 144 above.

2. Articles 6.2 and 21.5

241. For the relationship of Article 6.2 with Article 21.5, see paragraph 644 below.

D. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Relationship with Article 17 of the Anti-Dumping Agreement

(a) The term "matter" under paragraphs 4 and 5 of Article 17

242. The Appellate Body on *Guatemala – Cement I* held that "[Article 1.2 of the *DSU*] states . . . that . . . special or additional rules and procedures 'shall prevail' over the provisions of the DSU '[t]o the extent that there is a *difference* between' the two sets of provisions". As a result, the Appellate Body considered whether there is inconsistency between Article 6.2 of the *DSU* and Article 17.5 of the *Anti-Dumping Agreement*. The Appellate Body stated:

> "In our view, there is no *inconsistency* between Article 17.5 of the *Anti-Dumping Agreement* and the provisions of Article 6.2 of the DSU. On the contrary, they are complementary and should be applied together. A panel request made concerning a dispute brought under the *Anti-Dumping Agreement* must therefore comply with the relevant dispute settlement provisions of both that Agreement and the DSU. Thus, when a 'matter' is referred to the DSB by a complaining party under Article 17.4 of the *Anti-Dumping Agreement*, the panel request must meet the requirements of Articles 17.4 and 17.5 of the *Anti-Dumping Agreement* as well as Article 6.2 of the DSU."[348]

(b) Anti-dumping measures

243. As regards the concept of anti-dumping measures, see paragraph 1 and XVII.B.5(i) of the Chapter on the *Anti-Dumping Agreement*.

(c) Legal basis for claims under Article 17

244. Article 17 of the *Anti-Dumping Agreement* provides for the dispute settlement procedures for matters under the *Anti-Dumping Agreement*. With respect to the legal basis for claims under the *Anti-Dumping Agreement*, see the Chapter on the *Anti-Dumping Agreement*, XVII.B.1(b).

VII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Terms of Reference of Panels

1. Panels shall have the following terms of reference unless the parties to the dispute agree otherwise within 20 days from the establishment of the panel:

> "To examine, in the light of the relevant provisions in (name of the covered agreement(s) cited by the parties to the dispute), the matter referred to the DSB by (name of party) in document . . . and to make such findings as will assist the DSB in making the recommendations or in giving the rulings provided for in that/those agreement(s)."

2. Panels shall address the relevant provisions in any covered agreement or agreements cited by the parties to the dispute.

3. In establishing a panel, the DSB may authorize its Chairman to draw up the terms of reference of the panel in consultation with the parties to the dispute, subject to the provisions of paragraph 1. The terms of reference thus drawn up shall be circulated to all Members. If other than standard terms of reference are agreed upon, any Member may raise any point relating thereto in the DSB.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. General

(a) Importance of the terms of reference

245. The Appellate Body on *Brazil – Desiccated Coconut* explained the importance of the terms of reference in the following terms:

---

[346] (*footnote original*) Appellate Body Report, *European Communities – Bananas*, supra, note 37, para. 141.
[347] Panel Report on *Thailand – H-Beams*, para. 7.43.
[348] Appellate Body Report on *Guatemala – Cement I*, para. 75. See also the discussion on the special and additional rules, paras. 6–8.

"A panel's terms of reference are important for two reasons. First, terms of reference fulfil an important due process objective – they give the parties and third parties sufficient information concerning the claims at issue in the dispute in order to allow them an opportunity to respond to the complainant's case. Second, they establish the jurisdiction of the panel by defining the precise claims at issue in the dispute."[349]

246. In *US – Carbon Steel*, the Appellate Body further stated that the terms of reference "define the scope of the dispute".[350]

(b) Instances where a panel must address jurisdictional issues

247. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body defined the two instances where a panel is obliged to address issues that affect its own jurisdiction:

"We believe that a panel comes under a duty to address issues in at least two instances. First, as a matter of due process, and the proper exercise of the judicial function, panels are required to address issues that are put before them by the parties to a dispute. Second, panels have to address and dispose of certain issues of a fundamental nature, even if the parties to the dispute remain silent on those issues. In this regard, we have previously observed that '[t]he vesting of jurisdiction in a panel is a fundamental prerequisite for lawful panel proceedings.'[351] For this reason, panels cannot simply ignore issues which go to the root of their jurisdiction – that is, to their authority to deal with and dispose of matters. Rather, panels must deal with such issues – if necessary, on their own motion – in order to satisfy themselves that they have authority to proceed.

. . .

[O]ur task is simply to determine whether the 'objections' that Mexico now raises before us are of such a nature that they could have deprived the Panel of its authority to deal with and dispose of the matter. If so, then the Panel was bound to address them on its own motion."[352]

(c) Objections to the panel's jurisdiction

(i) General

248. In *Argentina – Poultry Anti-Dumping Duties*, Argentina raised as a preliminary issue that prior to bringing WTO dispute settlement proceedings against Argentina's anti-dumping measure, Brazil had challenged that measure before a MERCOSUR Ad Hoc Arbitral Tribunal. Argentina requested that, in light of the prior MERCOSUR proceedings, the Panel refrain from ruling on the claims raised by Brazil in the present WTO dispute settlement proceedings.[353] In order to defend its position, Argentina invoked the principle of estoppel. In this regard, see paragraph 79 above. In the alternative, Argentina asserted that the Panel should be bound by the ruling of the MERCOSUR Tribunal.[354] In this regard, see paragraph 23 above. As regards preliminary issues, see Section XXXVI.C below.

(ii) Timing of the objections to the panel's jurisdiction

249. In *US – 1916 Act*, the Appellate Body agreed with the Panel that objections to the Panel's jurisdiction should not be raised at the interim review stage for the first time although it also agreed with the Panel that certain jurisdictional issues may need to be addressed by the Panel at any time:

"We agree with the Panel that the interim review was not an appropriate stage in the Panel's proceedings to raise objections to the Panel's jurisdiction for the first time. An objection to jurisdiction should be raised as early as possible and panels must ensure that the requirements of due process are met. However, we also agree with the Panel's consideration that 'some issues of jurisdiction may be of such a nature that they have to be addressed by the Panel at any time.'[355] We do not share the European Communities' view that objections to the jurisdiction of a panel are appropriately regarded as simply 'procedural objections'. The vesting of jurisdiction

J. van Hof, *Commentary on the UNCITRAL Arbitration Rules: The Application by the Iran-U.S. Claims Tribunal* (Kluwer, 1991), pp. 149–150; and Rule 41(2) of the rules applicable to ICSID Arbitration Tribunals: International Centre for Settlement of Investment Disputes, Rules of Procedure for Arbitration Proceedings (Arbitration Rules).

> in a panel is a fundamental prerequisite for lawful panel proceedings. We, therefore, see no reason to accept the European Communities' argument that we must reject the United States' appeal because the United States did not raise its jurisdictional objection before the Panel in a timely manner."[356]

250. In *US – Offset Act (Byrd Amendment)*, the Appellate Body recalled that "[a]n objection to jurisdiction should be raised as early as possible"[357] and clarified that "it would be preferable, in the interests of due process, for the appellant to raise such issues in the Notice of Appeal, so that appellees will be aware that this claim will be advanced on appeal".[358]

2. Article 7.1

(a) "the matter referred to the DSB"

(i) Concept of "matter"

251. In *Guatemala – Cement I*, the Appellate Body addressed the term "matter" and held that the "matter referred to the DSB" consists of two elements; namely, the specific *measures* at issue and the *legal basis of the complaint* (*claims*):

> "The word 'matter' appears in Article 7 of the DSU, which provides the standard terms of reference for panels. . . .when that provision is read together with Article 6.2 of the DSU, the precise meaning of the term 'matter' becomes clear. Article 6.2 specifies the requirements under which a complaining Member may refer a 'matter' to the DSB: in order to establish a panel to hear its complaint, a Member must make, in writing, a 'request for the establishment of a panel' (a 'panel request'). In addition to being the document which enables the DSB to establish a panel, the panel request is also usually identified in the panel's terms of reference as the document setting out 'the matter referred to the DSB'. Thus, 'the matter referred to the DSB' for the purposes of Article 7 of the DSU and Article 17.4 of the *Anti-Dumping Agreement* must be the 'matter' identified in the request for the establishment of a panel under Article 6.2 of the DSU. That provision requires the complaining Member, in a panel request, to 'identify the *specific measures at issue* and provide a brief summary of the *legal basis of the complaint* sufficient to present the problem clearly.' (emphasis added) The '*matter* referred to the DSB', therefore, consists of two elements: the specific *measures* at issue and the *legal basis of the complaint* (or the *claims*)."[359]

252. In *Brazil – Desiccated Coconut*, Brazil argued that the issue of consistency of its countervailing duty measures with Articles I and II of GATT 1994 was not within the special terms of reference of the Panel, and, therefore, should not have been addressed by the Panel. The Appellate Body ultimately found that Articles I and II of GATT 1994 did not apply to the dispute before it, and as a result declined to make a finding on whether claims relating to these provisions were included in the Panel's terms of reference. However, the Appellate Body made the following general statement concerning this issue:

> "We agree, furthermore, with the conclusions expressed by previous panels under the GATT 1947, as well as under the *Tokyo Round SCM Code* and the *Tokyo Round Anti-dumping Code*, that the 'matter' referred to a panel for consideration consists of the specific claims stated by the parties to the dispute in the relevant documents specified in the terms of reference. We agree with the approach taken in previous adopted panel reports that a matter, which includes the claims composing that matter, does not fall within a panel's terms of reference unless the claims are identified in the documents referred to or contained in the terms of reference."[360]

(ii) Specific measures at issue

General

253. In *Indonesia – Autos*, the Panel, in a preliminary ruling, considered that the measure at issue was not sufficiently identified in the request for establishment of the Panel and thus it was not within the Panel's terms of reference:

> "We note that this Panel has standard terms of reference. Therefore, in determining whether a measure is before us, we must examine the United States' request for establishment of a panel, which is found in document WT/DS59/6. Consistent with the findings of the Appellate Body in *Bananas III*, we have carefully examined that request to ensure its compliance with both the letter and spirit of Article 6.2 of the Dispute Settlement Understanding. We conclude that the $690 million loan was not 'identified as a specific measure' in that document as required by Article 6.2 of the DSU. Indeed the United States states that the loan was not identified in the U.S. request, because it had not yet been made. Rather, the United States suggests that the loan is properly before the Panel because it is one aspect of the National Car Programme, which the United States considers to be the subject of its request. In our view, however, the United States in its request has clearly identified the measures to be considered by the Panel, and those measures do not include this loan. Accordingly, we con-

[356] Appellate Body Report on *US – 1916 Act*, para. 54.
[357] The Appellate Body referred to its Report on *US – 1916 Act*, para. 54.
[358] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 208.
[359] Appellate Body Report on *Guatemala – Cement I*, para. 72. See also Appellate Body Report on *Guatemala – Cement I*, para. 76 which states "the word 'matter' has the same meaning in Article 17 of the *Anti-Dumping Agreement* as it has in Article 7 of the DSU. It consists of two elements: the specific 'measure' and the 'claims' relating to it, both of which must be properly identified in a panel request as required by Article 6.2 of the DSU."
[360] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 22.

clude that the loan in question is not within the terms of reference of this Panel."[361]

254. In *Australia – Automotive Leather II (Article 21.5 – US)*, Australia argued that a certain loan granted by the Australian Government to a domestic enterprise (the "1999 loan") was not within the scope of the panel's terms of reference. Australia argued that the 1999 loan was not part of the implementation of the DSB's ruling and recommendation in the original case. With respect to the concept of "measures taken to comply" see Section XXI.B.4(b)(ii) below and the Chapter on the *SCM Agreement*, Section IV.B. The Panel stated:

"A 'matter' before a panel consists of the 'measure(s)' at issue, and the claims relating to those measures, as set out in the request for establishment. In this case, the United States' request for establishment clearly identifies both the repayment by Howe and the 1999 loan as the measures at issue. For us to rule, as suggested by Australia, that we are precluded from considering the 1999 loan, would allow Australia to establish the scope of our terms of reference by choosing what measure or measures it will notify, or not notify, to the DSB in connection with its implementation of the DSB's ruling.

The 1999 loan is inextricably linked to the steps taken by Australia in response to the DSB's ruling in this dispute, in view of both its timing and its nature. In our view, the 1999 loan cannot be excluded from our consideration without severely limiting our ability to judge, on the basis of the United States' request, whether Australia has taken measures to comply with the DSB's ruling. In the absence of any compelling reason to do so, we decline to conclude that a measure specifically identified in the request for establishment is not within our terms of reference."[362]

255. In *Australia – Salmon*, the Appellate Body examined whether the Panel had interpreted correctly its terms of reference with respect to the measure and the product at issue in this dispute. Australia argued that the Panel had exceeded its terms of reference both in terms of products and in terms of the measure at issue. In its request for the establishment of a panel, Canada had identified the measure and the product at issue as follows: "The Australian Government's measures prohibiting the importation of fresh, chilled or frozen salmon . . . and any amendments or modifications to it."[363] The Panel stated that the product coverage of this dispute was limited, in accordance with the request for the establishment of a panel, to "fresh, chilled or frozen salmon" and held explicitly that the product coverage "does exclude heat-treated product"[364] and that "heat-treated product falls outside the product coverage of this dispute".[365] As a result, the Appellate Body rejected Australia's claim that the Panel had exceeded its terms of reference with respect to the *product* at issue.[366] However, the Appellate Body reversed the Panel's conclusions with respect to the *measures* at issue. One of the Australian measures at issue was an import prohibition on *all* salmon; another measure, however, allowed imports which had been subject to "heat treatment". The Panel interpreted this latter measure to mean that the heat treatment required applied not only to smoked salmon, but also to other categories of salmon, including fresh, chilled or frozen salmon; specifically, the Panel had held that the "heat treatment" requirement was merely the corollary ("two sides of a single coin") of the import prohibition contained in another measure. The Panel had concluded that imports of fresh, chilled or frozen salmon were prohibited under one measure, unless they received the required "heat treatment" provided for in another measure:

"We recall that the Panel stated that the measure at issue in this dispute 'is QP86A as implemented or confirmed by the 1988 Conditions, the 1996 Requirements and the 1996 Decision, and this in so far as it prohibits the importation into Australia of fresh, chilled or frozen salmon'. As indicated above, the Panel interpreted its terms of reference to include the 1988 Conditions, by considering them to constitute a measure 'prohibiting the importation of fresh, chilled or frozen salmon' unless heat-treated as prescribed. We recall that in the context of its examination of whether Australia's measure was consistent with Article 5.1, the Panel treated the import prohibition and the heat-treatment requirement as 'two sides of a single coin'. It said that a consequence of Australia's sanitary requirement that salmon be heat-treated before it can be imported is that imports of fresh, chilled or frozen salmon are prohibited.

We do not share the Panel's position. In our view, the SPS measure at issue in this dispute can *only* be the measure which is *actually* applied to the product at issue. The product at issue is fresh, chilled or frozen salmon and the SPS measure applicable to fresh, chilled or frozen salmon is the import prohibition set forth in QP86A. The heat-treatment requirement provided for in the 1988 Conditions applies only to smoked salmon and salmon roe, not to fresh, chilled or frozen salmon."[367]

256. In *Brazil – Aircraft (Article 21.5 – Canada II)*, Canada contended that a financing programme created by the Government of Brazil, PROEX, was a prohibited export subsidy since it appeared to be offered not only in the form of traditional PROEX payments, but also in conjunction with, or as part of, export

[367] Appellate Body Report on *Australia – Salmon*, paras. 102–103.

financing packages provided by Brazil's development bank. Brazil responded that this was not within the terms of reference of this Panel. The Panel agreed with Brazil that such financing is not identified in Canada's request for establishment of a panel and was thus outside its terms of reference.[368]

257. As regards the concept of specific measure at issue, its scope and the standard of sufficient identification of the specific measures at issue in the request for establishment of a panel pursuant to Article 6.2 of the *DSU*, see Section VI.B.3(c) above.

Terminated measures

258. The Panel on *Japan – Film* gave the following overview of the treatment of terminated measures in GATT/WTO dispute settlement practice:

> "GATT/WTO precedent in other areas, including in respect of virtually all panel cases under Article XXIII:1(a), confirms that it is not the practice of GATT/WTO panels to rule on measures which have expired or which have been repealed or withdrawn.[369] In only a very small number of cases, involving very particular situations, have panels proceeded to adjudicate claims involving measures which no longer exist or which are no longer being applied. In those cases, the measures typically had been applied in the very recent past.[370]"[371]

Before agreement on the Panel's terms of reference

259. The Panel on *US – Gasoline*, in a finding not addressed by the Appellate Body, analysed the question of terminated measures with respect to the "agreement on the panel's terms of reference" and the point in time when the terms of reference had been established. The Panel addressed a particular aspect of the United States' measure at issue and noted that "the Panel's terms of reference were established after the 75 per cent rule had ceased to have any effect, and the rule had not been specifically mentioned in the terms of reference". The Panel also mentioned that the measure was not "likely to be renewed" and also found that its findings on the WTO-inconsistency of other aspects of the measure would in any case have made unnecessary the examination of that specific aspect of the measure:

> "The Panel observed that it had not been the usual practice of a panel established under the General Agreement to rule on measures that, at the time the panel's terms of reference were fixed, were not and would not become effective. In the 1978 *Animal Feed Protein* case, the Panel ruled on a discontinued measure, but one that had terminated after agreement on the panel's terms of reference.[372] In the 1980 *Chile Apples* case, the panel ruled on a measure terminated before agreement on the panel's terms of reference; however, the terms of reference in that case specifically included the terminated measure and, it being a seasonal measure, there remained the prospect of its reintroduction.[373] In the present case, the Panel's terms of reference were established after the 75 percent rule had ceased to have any effect, and the rule had not been specifically mentioned in the terms of reference. The Panel further noted that there was no indication by the parties that the 75 percent rule was a measure that, although currently not in force, was likely to be renewed. Finally, the Panel considered that its findings on treatment under the baseline establishment methods under Articles III:4 and XX (b), (d) and (g) would in any case have made unnecessary the examination of the 75 percent rule under Article I:1. The Panel did not therefore proceed to examine this aspect of the Gasoline Rule under Article I:1 of the General Agreement."[374]

260. In *Argentina – Textiles and Apparel*, one of the measures at issue was specific duties on footwear. These duties were included in the Panel's terms of reference, but were withdrawn by Argentina between the request for consultation and the establishment of the Panel. The Panel declined to make a preliminary determination on this matter and made the respective findings in its final Report.[375] In the final Report, the Panel decided not to examine these specific duties on footwear, reasoning:

---

[368] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.5, footnote 24.

[369] (*footnote original*) See *US – Gasoline* WT/DS2/R, para. 6.19, where the panel observed that "it had not been the usual practice of a panel established under the General Agreement to rule on measures that, at the time the panel's terms of reference were fixed, were not and would not become effective". See also Panel Report on *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items*, WT/DS56/R, circulated on 25 November 1997, pp. 84–86.

[370] (*footnote original*) See, e.g., Panel Report on *US – Wool Shirts and Blouses*, WT/DS33/R, upheld by the Appellate Body, WT/DS33/AB/R, where the panel ruled on a measure that was revoked after the interim review but before issuance of the final report to the parties; Panel Report on *EEC – Measure on Animal Feed Proteins*, adopted on 14 March 1992, BISD 25S/49, where the panel ruled on a discontinued measure, but one that had terminated after the terms of reference of the panel had already been agreed; Panel Report on *United States – Prohibitions on Imports of Tuna and Tuna Products from Canada*, adopted on 22 February 1982, BISD 29S/91, 106, para. 4.3., where the panel ruled on the GATT consistency of a withdrawn measure but only in light of the two parties' agreement to this procedure; Panel Report on *EEC – Restrictions on Imports of Apples from Chile*, adopted on 10 November 1980, BISD 27S/98, where the panel ruled on a measure which had terminated before agreement on the panel's terms of reference but where the terms of reference specifically included the terminated measure and, given its seasonal nature, there remained the prospect of its reintroduction.

[371] Panel Report on *Japan – Film*, para. 10.58.

[372] (*footnote original*) "*EEC – Measures on Animal Feed Proteins*", L/4599, BISD 25S/49 (adopted on 14 March 1978). See also the Report of the Panel on "*United States – Prohibitions of Imports of Tuna and Tuna Products from Canada*", BISD 29S/91, 106, para. 4.3 (adopted on 22 February 1982).

[373] (*footnote original*) "*EEC – Restrictions on Imports of Apples from Chile*", BISD 27S/98 (adopted on 10 November 1980).

[374] Panel Report on *US – Gasoline*, para. 6.19.

[375] Panel Report on *Argentina – Textiles and Apparel*, para. 6.7.

"Panels and their terms of reference are established by the DSB and panels are not authorized to amend unilaterally their mandate. On the other hand, panels have often been required to determine their jurisdiction over a matter (see for instance *United States – Standards for Reformulated and Conventional Gasoline,*[376] *Japan – Taxes on Alcoholic Beverages,*[377] *Brazil – Measures Affecting Desiccated Coconut,*[378] and *EC – Regime for the Importation, Sale and Distribution of Bananas*[379] *("Bananas III")*). . . .

On several occasions, panels have considered measures that were no longer in force.[380] It appears that in each of those cases, however, there was no objection raised by either party to the panel's consideration of the expired measure. . . .

[T]he Argentine measure under consideration was revoked before the Panel was established and its terms of reference set, i.e. before the Panel started its adjudication process. The *Gasoline* panel report would argue in favour of not considering the Argentine specific duties on footwear. Moreover, as noted by the Appellate Body in the *Shirts and Blouses*[381] case, the aim of dispute settlement is not

> 'to encourage either panels or the Appellate Body to "make law" by clarifying existing provisions of the *WTO Agreement* outside the context of resolving a particular dispute. A panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute'."[382]

261. The Panel on *Argentina – Textiles and Apparel* also held that it would not make a finding on the terminated Argentine measure solely because there might be a possibility of a re-introduction of the terminated measure:

"[T]he United States claims that there is a serious threat of recurrence since Argentina could easily reintroduce the previous import measures, and the United States suggests that Argentina is likely to do so because there is only a weak justification for its safeguard measure on footwear. We cannot evaluate the justification or likely duration of that safeguard measure. Moreover, in the absence of clear evidence to the contrary, we cannot assume that Argentina will withdraw the safeguard measure and reintroduce the specific duties measure in an attempt to evade panel consideration of its measures. We must assume that WTO Members will perform their treaty obligations in good faith, as they are required to do by the WTO Agreement and by international law.[383] We consider, therefore, that there is no evidence that the minimum specific import duties on footwear will be reintroduced."[384]

262. While it ultimately decided that it would not examine the measure withdrawn by Argentina before the establishment of the Panel, the Panel on *Argentina – Textiles and Apparel* nevertheless reserved the right to "refer to some examples of transactions" under the terminated measure:

"Consequently, we will not review the WTO compatibility of the specific duties which used to be imposed on footwear and which have, since the establishment of this Panel, been revoked. However, since these specific duties on footwear were in force for a long period until 14 February 1997, and for our understanding of the type of duties used by Argentina, we may, when reviewing the import regime applied to textiles and apparel, refer to some examples of transactions involving footwear because the type of duties used at the time by Argentina for textiles, apparel and footwear was the same."[385]

263. In *EC – Poultry*, Brazil claimed that the allocation by the European Communities of import licences on the basis of export performance was inconsistent with certain provisions of the *Licensing Agreement*. The European Communities responded, *inter alia*, that the alleged measure was no longer in place. The Panel, in a statement not addressed by the Appellate Body, noted that "Brazil claims that there are certain lingering effects. Therefore, we do not reject this claim on the grounds of mootness."[386]

264. In *US – Certain EC Products*, the Panel had ruled that the "increased bonding requirements as of 3 March on EC listed products", which was a measure no longer in existence, infringed WTO rules.[387] However, the Appellate Body considered that "there is an obvious inconsistency between the finding of the Panel that 'the 3 March Measure is no longer in existence' and the subsequent recommendation of the Panel that the DSB

request that the United States bring its 3 March Measure into conformity with its WTO obligations." The Appellate Body accordingly concluded that the Panel had erred in recommending that the DSB request the United States to bring into conformity with its WTO obligations a measure that the Panel had found no longer existed.[388]

After agreement on the Panel's terms of reference

265. In *US – Wool Shirts and Blouses*, the United States withdrew the measure at issue shortly before the Panel's final report was circulated, but well after the agreement on the Panel's terms of reference. The Panel issued the report anyway and stated:

> "We note that the United States stated that the restraint, which is the object of the present dispute, was to be withdrawn 'due to a steady decline in imports of woven wool shirts and blouses from India and the adjustment of the industry'. . . . In the absence of an agreement between the parties to terminate the proceedings, we think that it is appropriate to issue our final report regarding the matter set out in the terms of reference of this Panel in order to comply with our mandate, as referred to in paragraph 1.3 of this report, notwithstanding the withdrawal of the US restraint. A number of GATT panels have done so.[389]" [390]

266. In *Indonesia – Autos*, the Panel noted that "in previous GATT/WTO cases, where a measure included in the terms of reference was otherwise terminated or amended after the commencement of the panel proceedings, panels have nevertheless made findings in respect of such a measure".[391, 392]

Amended measures

Measures amended before the establishment of the Panel

267. In *Brazil – Aircraft*, a question arose as to the identity of the measure since regulatory changes relevant to the measure were put in place after consultations were held, but before the panel was established. The Appellate Body determined that the regulatory changes "did not change the essence" of the measure:

> "We are confident that the specific measures at issue in this case are the Brazilian export subsidies for regional aircraft under PROEX. Consultations were held by the parties on these subsidies, and it is these same subsidies that were referred to the DSB for the establishment of a panel. We emphasize that the regulatory instruments that came into effect in 1997 and 1998 *did not change the essence* of the export subsidies for regional aircraft under PROEX." [393]

Measures amended during the Panel proceedings

268. In *Indonesia – Autos*, the Panel considered that, according to GATT/WTO practice, in those cases where a measure was amended (or withdrawn) during the Panel proceedings, the Panel had nevertheless continued its work. See paragraph 266 above.

269. The Panel on *Argentina – Footwear (EC)*, in a finding subsequently not reviewed by the Appellate Body, had to address a situation whereby Argentina had imposed a safeguard measure on footwear and subsequently made several modifications to this measure after the request for establishment had been made. The Panel stated that "it is the provisional and definitive measures in their substance rather than the legal acts in their original or modified legal forms that are most relevant for our terms of reference". The Panel then linked the issue before it to Article 3.3 of the *DSU* and saw the risk that "Members could always keep one step ahead of any WTO dispute settlement proceeding because in such a situation, the complaining Member would indeed, challenge a 'moving target', and panel and Appellate Body's findings could already be overtaken by events when they are rendered and adopted by the DSB":

> "[A]n interpretation whereby these subsequent Resolutions are considered to be measures separate and independent from the definitive safeguard measure, and thus outside our terms of reference, could be contrary to

389 (*footnote original*) See for instance the Panel Report on "EEC – Restrictions on Imports of Dessert Apples, Complaint by Chile" (adopted on 22 June 1989, BISD 36S/93), the Panel Report on "EEC – Restrictions on Imports of Apples, Complaint by the United States" (adopted on 22 June 1989, BISD 36S/135), the Panel Report on "United States – Prohibition of Imports of Tuna and Tuna Products from Canada" (adopted on 22 February 1982, BISD 29S/91) or the Panel Report on "EEC – Measures on Animal Feed Proteins" (adopted on 14 March 1978, BISD 25S/49).

390 Panel Report on *US – Wool Shirts and Blouses*, para. 6.2.

391 (*footnote original*) See, e.g., Panel Report on *United States – Measures Affecting Imports of Wool Shirts and Blouses from India*, WT/DS33, adopted on 23 May 1997 (hereafter called "*Shirts and Blouses*"), the US restriction was withdrawn shortly before the issuance of the panel report; Panel Report on *EEC – Restrictions on Imports of Dessert Apples, Complaint by Chile*, adopted on 22 June 1989, BISD 36S/93; Panel Report on *EEC – Restrictions on Imports of Apples, Complaint by the United States*, adopted on 22 June 1989, BISD 36S/135; Panel Report on *United States – Prohibition of Imports of Tuna and Tuna Products from Canada*, adopted on 22 February 1982, BISD 29S/91; Panel Report on *EEC – Restrictions on Imports of Apples from Chile*, adopted on 10 November 1980, BISD 27S/98; and Panel Report on *EEC – Measures on Animal Feed Proteins*, adopted on 14 March 1978, BISD 25S/49. In the Panel Report on *United States – Section 337 of the Tariff Act of 1930*, BISD 36S/345, adopted on 7 November 1989 (hereafter called "" *Section 337*"), the challenged measure was amended during the panel process but the panel refused to take into account such amendment. We note that this is also the line taken by the Appellate Body in *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparels and Other Items*, WT/DS56, adopted on 22 April 1998, para. 64.

392 Panel Report on *Indonesia – Autos*, para. 14.9.

393 Appellate Body Report on *Brazil – Aircraft*, para. 132.

> Article 3.3 of the DSU. Such an interpretation could allow a situation where a matter brought to the DSB for prompt settlement is not resolved when the defendant changes the legal form of the measure through a separate but closely related instrument, while the measure in dispute remains essentially the same in substance. In this way, Members could always keep one step ahead of any WTO dispute settlement proceeding because in such a situation, the complaining Member would, indeed, challenge a 'moving target', and panel and Appellate Body's findings could already be overtaken by events when they are rendered and adopted by the DSB."[394]

270. The Panel on *Argentina – Footwear (EC)* therefore found that the modifications in question did "not constitute entirely new safeguard measures in the sense that they were based on a different safeguard investigation, but are instead modifications of the legal form of the original definitive measure, which remains in force in substance and which is the subject of the complaint".[395]

271. The Appellate Body on *Chile – Price Band System* actually referred to the above finding by the Panel on *Argentina – Footwear (EC)* and indicated that "[a]lthough we were not asked to review that particular finding on appeal, we agree with that panel's approach, which is based on sound reasoning and is consistent with our reasoning here".[396] The Appellate Body considered that, as in *Argentina – Footwear (EC)*, Chile's price band system remained "essentially" the same after the amendment and concluded that the measure before it in this appeal included the Law amending the system because "that law amends Chile's price band system without *changing its essence*".[397] The Appellate Body further referred to Articles 3.7 and 3.4 of the *DSU* as well as its decision in *Australia – Salmon*[398] as support for its conclusion and indicated that "[it] consider[ed] it appropriate . . . to rule on the price band system as currently in force in Chile, . . ., to 'secure a positive solution to the dispute' and to make 'sufficiently precise recommendations and rulings so as to allow for prompt compliance'".[399]

272. The Appellate Body on *Chile – Price Band System*, however, indicated that it was not condoning the practice of amending measures and turning them into "moving target[s]":

> "We emphasize that we do not mean to condone a practice of amending measures during dispute settlement proceedings if such changes are made with a view to shielding a measure from scrutiny by a panel or by us. We do not suggest that this occurred in this case. However, generally speaking, the demands of due process are such that a complaining party should not have to adjust its pleadings throughout dispute settlement proceedings in order to deal with a disputed measure as a 'moving target'. If the terms of reference in a dispute are broad enough to include amendments to a measure – as they are in this case – and if it is necessary to consider an amendment in order to secure a positive solution to the dispute – as it is here – then it is appropriate to consider the measure *as amended* in coming to a decision in a dispute."[400]

273. In *Argentina – Textiles and Apparel*, one of the Argentine measures at issue, a statistical tax, was amended during the Appellate Body proceedings. The Appellate Body noted the amendment but proceeded on the basis of the tax as it existed at the time of the request for establishment of the panel.[401]

Ambiguous, vague and unclear measures

274. The Panel on *Turkey – Textiles* dismissed certain arguments that terms used to identify measures in the panel request were too vague, ambiguous or unclear to fall within a panel's terms of reference, indicating that its "terms of reference [were] sufficiently clear":

> "On 25 September 1998 the Panel issued the following ruling on this point:
>
> > 'In assessing Turkey's claim that India's request for the establishment of a panel was not sufficiently precise, we consider that it is important that a panel request, which defines the terms of reference, meets this criterion so as to inform the defending party and potential third parties both of the measures at issue, including the products they cover, and of the legal basis of the complaint. This is necessary to ensure due process and the ability of the defendant to defend itself.'
>
> We have examined India's request for establishment of the panel (WT/DS34/2). While not identified by place and date of publication, the measures are specified by type (i.e. quantitative restrictions), by effective date of entry into force (1 January 1996) and by product coverage (textiles and clothing, a well defined class of products in the WTO).[402] In our view the panel request meets

[394] Panel Report on *Argentina – Footwear (EC)*, para. 8.41.

[397] Appellate Body Report on *Chile – Price Band System*, para. 139.
[398] Appellate Body Report on *Australia – Salmon*, para. 223.
[399] Appellate Body Report on *Chile – Price Band System*, paras. 140–143.
[400] Appellate Body Report on *Chile – Price Band System*, para. 144.
[401] Appellate Body Report on *Argentina – Textiles and Apparel*, Section V.
[402] (*footnote original*) We note also that during the period of consultations Turkey and the EC jointly sent notifications and other communications to the CRTA (WT/REG22/5, WT/REG22/7) and, pursuant to Article 3.3 of the ATC, to the TMB (G/TMB/N/308), in which Turkey lists the new textile import restrictions it adopted following the conclusion of the agreement between the EC and Turkey. In addition, during the meetings of the CRTA (WT/REG22/M1 and M2), and the TMB

the minimum requirements of specificity of Article 6.2 of the DSU as interpreted by the Appellate Body in *Bananas III* and *LAN*.[403] Even if we agree that India's request could have been more detailed, we conclude that Turkey is sufficiently informed of the measures at issue and the products they cover, and that our terms of reference are sufficiently clear. Consequently, we reject Turkey's claim that the Panel should refuse to accept India's request *in limine litis* for its failure to respect the basic requirements of Article 6.2 of the DSU."[404]

275. In *Korea – Alcoholic Beverages*, the Panel considered whether phrases used by the European Communities ("certain alcoholic beverages falling within HS heading 2208") and the US ("other distilled spirits such as whisky, brandy, vodka, gin and admixtures") were specific enough "to satisfy the letter and spirit of Article 6.2". The Panel considered that the requirements of Article 6.2 were satisfied:

"The question of whether a panel request satisfies the requirements of Article 6.2 is to be determined on a case by case basis with due regard to the wording of Article 6.2. . ., the question is whether Korea is put on sufficient notice as to the parameters of the case it is defending. . .

. . .

Korea argues that each imported product must be specifically identified in order to be within the scope of the panel proceeding. The complainants argue that the appropriate imported product is all distilled beverages. They claim, in fact, that for purposes of Article III, there is only one category in issue. They claim to have identified specific examples of such distilled alcoholic beverages for purposes of illustration, not as limits to the category.

The issue of the appropriate categories of products to compare is important to this case. In our view, however, it is one that requires a weighing of evidence. As such it is not an issue appropriate for a preliminary ruling in this case. This is particularly so in light of the Appellate Body's opinion in *Japan – Taxes on Alcoholic Beverages II,*[405] that all imported distilled alcoholic beverages were discriminated against. That element of the decision is not controlling on the ultimate resolution of other cases involving other facts; however, it cannot be considered inappropriate for complainants to follow it in framing their request for a panel in a dispute involving distilled alcoholic beverages. While it is possible that in some cases, the complaint could be considered so vague and broad that a respondent would not have adequate notice of the actual nature of the alleged discrimination, it is difficult to argue that such notice was not provided here in light of the identified tariff heading and the Appellate Body decision in *Japan – Taxes on Alcoholic Beverages II.* Furthermore, we note that the Appellate Body recently found that a panel request based on a broader grouping of products was sufficiently specific for purposes of Article 6.2.[406] We find therefore, that the complainants' requests for a panel satisfied the requirements of Article 6.2 of the DSU."[407]

276. In *Canada – Aircraft*, the Panel considered Canada's claim that certain provisions in Brazil's panel request were too vague. The Panel dismissed such arguments on the basis that whilst the measures may not have been described with sufficient clarity or precision, they had put Canada on notice that, at the very least, such provisions would be an issue in the dispute. The Panel relied on the Appellate Body's findings on "prejudice" in *EC – Computer Equipment* to justify such measures, indicating that the requirements of Article 6.2 had been met because Canada had not suffered any prejudice during the course of the panel proceedings. The Panel commented as follows when referring to the Appellate Body's decision in *EC – Computer Equipment*:

"We consider it appropriate to apply a similar standard in determining whether Brazil's request for establishment meets the requirements of Article 6.2 of the DSU in the present case. In particular, we shall consider whether any alleged imprecision in Brazil's request for establishment affected Canada's due process rights of defence in the course of the Panel proceedings. Indeed, we understand Canada to advocate a similar interpretation of Article 6.2, since Canada asserts that Brazil's 'lack of precision prejudices Canada's due process right to know the case against it. These claims are *therefore* inconsistent with Article 6.2 of the DSU.'[408] (emphasis supplied). Thus, we understand Canada to argue that Brazil's request for establishment would not be inconsistent with Article 6.2 of the DSU if the alleged lack of precision did not prejudice Canada's due process right to know the case against it."[409]

Footnote 402 (*cont.*)
(meetings of 11–12 December 1997), which preceded the request for the establishment of a panel, the parties discussed the issues relating to this dispute. This confirms to us that Turkey is sufficiently informed of the measures challenged by India in this dispute and the products covered by the measures at issue. Moreover, we note that no comments were made on this issue at any of the meetings of the DSB where the present dispute was discussed (WT/DSB/M13, 15, 42 and 43) and that no Member questioned the scope of the terms of reference in this regard.

277. In contrast, the Panel on *Indonesia – Autos* indicated that a loan that had not yet been made could not be covered by a panel's terms of reference:

> "At the first meeting of the Panel with the parties, on 3 December 1997, Indonesia raised a preliminary objection to the United States' claim with respect to a $US 690 million loan to PT TPN, on the basis that this loan was not within the Panel's terms of reference. The arguments of the parties can be found in paragraphs 4.36 to 4.50 of the Descriptive Part of this report. After hearing the arguments of the parties, the Chairman announced the following ruling on behalf of the Panel:
>
> . . .
>
> We note that this Panel has standard terms of reference. Therefore, in determining whether a measure is before us, we must examine the United States' request for establishment of a panel,. . .Consistent with the findings of the Appellate Body in *Bananas III*, we have carefully examined that request to ensure its compliance with both the letter and spirit of Article 6.2 of the Dispute Settlement Understanding. We conclude that the $690 million loan was not 'identified as a specific measure' in that document as required by Article 6.2 of the DSU. Indeed the United States states that the loan was not identified in the U.S. request, because it had not yet been made. Rather, the United States suggests that the loan is properly before the Panel because it is one aspect of the National Car Programme, which the United States considers to be the subject of its request. In our view, however, the United States in its request has clearly identified the measures to be considered by the Panel, and those measures do not include this loan. Accordingly, we conclude that the loan in question is not within the terms of reference of this Panel."[410]

Measures in existence since before the entry into force of the WTO Agreements

278. As regards the applicability of the *SPS and TBT Agreements* to measures enacted before the entry into force of the Agreements, see paragraphs 6–7 of the Chapter on the *SPS Agreement* and paragraph 7 of the Chapter on the *TBT Agreement.*

(iii) Claims

General

279. As regards the concept of claim, its scope and the requirement to identify the claims in the request for establishment of a panel pursuant to Article 6.2 of the *DSU*, see paragraphs 215–233 above.

Claims not included in the terms of reference

280. In consideration of the United States' claim under Article 63 of the TRIPS Agreement which had not been included in the request for the establishment of the panel, the Appellate Body in *India – Patents (US)* stated:

> "The jurisdiction of a panel is established by that panel's terms of reference, which are governed by Article 7 of the DSU. A panel may consider only those claims that it has the authority to consider under its terms of reference. A panel cannot assume jurisdiction that it does not have. In this case, Article 63 was not within the Panel's jurisdiction, as defined by its terms of reference. Therefore, the Panel had no authority to consider the alternative claim by the United States under Article 63.
>
> The United States argues that, in the consultations between the parties to this dispute in this case, India had not disclosed the existence of any administrative instructions' for the filing of mailbox applications for pharmaceutical and agricultural chemical products. Therefore the United States asserts that it had no way of knowing that India would rely on this argument before the Panel. The United States maintains that, for this reason, it had not included a claim under Article 63 in its request for the establishment of a panel. All that said, there is, nevertheless, no basis in the DSU for a complaining party to make an additional claim, outside of the scope of a panel's terms of reference, at the first substantive meeting of the panel with the parties. A panel is bound by its terms of reference."[411]

281. The Appellate Body on *India – Patents (US)* found the Panel's ruling that "all legal claims would be considered if they were made prior to the end of [the first substantive] meeting" inconsistent with the letter and spirit of the DSU. The Appellate Body stated:

> "Although panels enjoy some discretion in establishing their own working procedures, this discretion does not extend to modifying the substantive provisions of the DSU. To be sure, Article 12.1 of the DSU says: 'Panels shall follow the Working Procedures in Appendix 3 unless the panel decides otherwise after consulting the parties to the dispute'. Yet that is *all* that it says. Nothing in the DSU gives a panel the authority either to disregard or to modify other explicit provisions of the DSU. The jurisdiction of a panel is established by that panel's terms of reference, which are governed by Article 7 of the DSU. A panel may consider only those claims that it has the authority to consider under its terms of reference. A panel cannot assume jurisdiction that it does not have.
>
> . . .
>
> A Panel is bound by its terms of reference."[412]

---

[410] Panel Report on *Indonesia – Autos*, para. 14.3.

[411] Appellate Body Report on *India – Patents (US)*, paras. 92–93.

[412] Appellate Body Report on *India – Patents (US)*, paras. 92–93. In *US – Hot-Rolled Steel*, the issue arose of whether the "general" practice of the US investigating authorities regarding best facts available was within the terms of reference of the Panel. The Panel, which did not rule on whether a general practice could be challenged separately from the statutory measure on which it is based, concluded that Japan's claim in this regard was outside its terms of reference because there was no mention of such claim in Japan's request for the establishment of a panel. Panel Report on *US – Hot-Rolled Steel*, para. 7.22.

282. In *India – Quantitative Restrictions*, India raised before the Panel the issue of the extent to which the Panel should consider the provisions of Article XVIII:B and the 1994 Understanding on Balance-of-payments Provisions in its analysis of the US claims since the United States had not raised any claim regarding violations of those provisions. The Panel decided that although it would not address any claims of the United States based on those provisions, it considered that they were "part of the context of those provisions alleged by the United States to have been violated". The Panel also considered that India had referred to various provisions of Article XVIII:B in its defence. The Panel concluded that "[i]n our view, the defending party is not restricted in the provisions of the . . . 'WTO Agreement'. . . that it can invoke in its defence. In these circumstances, we find it relevant to consider the provisions of Article XVIII:B and the 1994 Understanding as part of the context in deciding on the claims of the United States and to examine them in relation to the defence raised by India."[413]

Claims included in terms of reference

Claims not elaborated in the parties' first written submissions

283. In *EC – Bananas III*, the Panel held that certain claims under *GATS* made by Guatemala, Honduras and Mexico were not to be included within the scope of the case. While these claims had been included in the panel request, the Panel decided not to address them because they had not been elaborated in the three parties' first written submission.[414] The Appellate Body on *EC – Bananas III* reversed the Panel's conclusion, holding that nothing in the *DSU* or *GATT* practice suggested that all claims be set out in a complaining party's first written submission:

> "There is no requirement in the DSU or in GATT practice for arguments on all claims relating to the matter referred to the DSB to be set out in a complaining party's first written submission to the panel. It is the panel's terms of reference, governed by Article 7 of the DSU, which set out the claims of the complaining parties relating to the matter referred to the DSB.
>
> . . .
>
> We do not agree with the Panel's statement that a 'failure to make a claim in the first written submission cannot be remedied by later submissions or by incorporating the claims and arguments of other complainants'. Pursuant to Articles 6.2 and 7.1 of the DSU, the terms of reference of the Panel in this case were established in the request for the establishment of the panel, WT/DS27/6, in which the claims specified under the GATS were made by all five Complaining Parties jointly."[415]

284. The Panel in *Japan – Apples*, referring to the above findings of the Appellate Body in *EC – Bananas III*, considered that "it is well established that a complainant is not prevented, as a matter of principle, from developing in its second submission arguments relating to a claim that is within the terms of reference of the panel, even if it did not do so in its first written submission". In that case, the United States had made arguments . . . only during the two substantive hearings with the parties. The Panel indicated that "[s]uch a tactic may seem questionable since nothing prevented the United States from presenting arguments on these claims in its first submission, and such an approach may significantly limit the possibility for the defending party to argue in response, depending on the circumstances of the case, or at least could unduly delay the proceedings". It therefore decided that the most appropriate way to deal with this issue was to give Japan sufficient opportunity to reply.[416]

Abandoned claims

285. In *US – Steel Plate*, India indicated in its first written submission that it would not pursue several claims that had been set out in its request for establishment of the Panel. However, India changed its view later on and informed the Panel of its intention to pursue one of these claims during the first substantive meeting of the Panel with the parties and in its rebuttal submission. In spite of the lack of specific objection by the US which had noted that the claim was within the Panel's terms of reference, the Panel decided that it was not going to rule on India's abandoned and later recovered claim:

> "This situation is not explicitly addressed in either the DSU or any previous panel or Appellate Body report. We do note, however, the ruling of the Appellate Body in *Bananas* to the effect that a claim may not be raised for the first time in a first written submission, if it was not in the request for establishment.[417] One element of the Appellate Body's decision in that regard was the notice aspect of the request for establishment. The request for establishment is relied upon by Members in deciding whether to participate in the dispute as third parties. To allow a claim to be introduced in a first written submission would deprive Members who did not choose to participate as third parties from presenting their views with respect to such a new claim.

[413] Panel Report on *India – Quantitative Restrictions*, paras. 5.18–5.19.
[414] Panel Report on *EC – Bananas III*, paras. 7.57–7.58.
[415] Appellate Body Report on *EC – Bananas III*, paras. 145–147. See also Appellate Body Report on *Chile – Price Band System*, para. 158.
[416] Panel Report on *Japan – Apples*, paras. 8.63–8.66.
[417] (*footnote original*) Appellate Body Report, *European Communities – Regime for the Importation, Sale and Distribution of Bananas* ("*EC – Bananas III*"), WT/DS27/AB/R, adopted 25 September 1997, DSR 1997:II, 591, at para. 143.

> The situation here is, in our view, analogous. That is, to allow a party to resurrect a claim it had explicitly stated, in its first written submission, that it would not pursue would, in the absence of significant adjustments in the Panel's procedures, deprive other Members participating in the dispute settlement proceeding of their full opportunities to defend their interest with respect to that claim. Paragraphs 4 and 7 of Appendix 3 to the DSU provide that parties shall 'present the facts of the case and their arguments' in the first written submission, and that written rebuttals shall be submitted prior to the second meeting. These procedures, in our view, envision that initial arguments regarding a claim should be presented for the first time in the first written submission, and not at the meeting of the panel with the parties or in rebuttal submissions.
>
> With respect to the interests of third parties, the unfairness of allowing a claim to be argued for the first time at the meeting of the panel with the parties, or in rebuttal submissions, is even more pronounced. In such a circumstance, third parties would be entirely precluded from responding to arguments with respect to such a resurrected claim, as they would not have access to those arguments under the normal panel procedures set out in paragraph 6 of Appendix 3 to the DSU. Further, India has identified no extenuating circumstances to justify the reversal of its abandonment of this claim.[418] Thus, in our view, it would be inappropriate in these circumstances to allow India to resurrect its claim in this manner. Therefore, we will not rule on India's claim under AD Agreement Articles 6.6 and 6.8 and Annex II, paragraph 7 regarding failure to exercise special circumspection in using information supplied in the petition.[419]"[420]

Whether a party has made a specific claim

286. In *US – Certain EC Products*, the United States asked the Appellate Body to reverse the Panel's finding under Article 23.2(a) on the basis that the Panel request of the European Communities was insufficient to "present the problem clearly" as required by Article 6.2 of the *DSU* and that the European Communities had never requested or argued for findings under Article 23.2(a). The Appellate Body considered that the fact that a claim of inconsistency with a given provision may be within the Panel's terms of reference does not mean that the complainant has actually made such a claim. The Appellate Body further ruled that in the absence of a specific claim of inconsistency by the complainant, the burden to present a prima facie case of violation would not be met:

> "[A]s the request for the establishment of a panel of the European Communities included a claim of inconsistency with Article 23, a claim of inconsistency with Article 23.2(a) is within the Panel's terms of reference. However, the fact that a claim of inconsistency with Article 23.2(a) of the DSU can be considered to be within the Panel's terms of reference does not mean that the European Communities actually made such a claim. An analysis of the Panel record shows that, with the exception of two instances during the Panel proceedings, the European Communities did not refer *specifically* to Article 23.2(a) of the DSU. Furthermore, in response to a request from the United States to clarify the scope of its claim under Article 23, the European Communities asserted only claims of violation of Articles 23.1 and 23.2(c) of the DSU; no mention was made of Article 23.2(a). Our reading of the Panel record shows us that, throughout the Panel proceedings in this case, the European Communities made arguments relating only to its claims that the United States acted inconsistently with Article 23.1 and Article 23.2(c) of the DSU.
>
> . . .
>
> . . . As the European Communities did not make a specific claim of inconsistency with Article 23.2(a), it did not adduce any evidence or arguments to demonstrate that the United States made a 'determination as to the effect that a violation has occurred' in breach of Article 23.2(a) of the DSU. And, as the European Communities did not adduce any evidence or arguments in support of a claim of violation of Article 23.2(a) of the DSU, the European Communities could not have established, and did not establish, a *prima facie* case of violation of Article 23.2(a) of the DSU.[421]"[422]

287. In *Chile – Price Band System*, Chile had asked the Appellate Body to reverse the Panel's finding on inconsistency of Chile's price band system with Article II:1(b) second sentence on the ground that Argentina had not actually made a claim under that second sentence. The Appellate Body concluded that, although Argentina's request for the establishment of a panel was phrased broadly enough to include a claim under both sentences of Article II:1(b) of the *GATT 1994*, a close examination of Argentina's submissions revealed that the only claim

---

[418] (*footnote original*) This is **not**, for example, a case where a complainant obtained, through the dispute settlement process, information in support of a claim to which it did not otherwise have access.

[419] (*footnote original*) We note that, since we do not reach India's alternative claims in this dispute, as discussed below in para. 7.80, we also would not have reached this claim in any event.

[420] Panel Report on *US – Steel Plate*, paras. 7.27–7.29.

[421] (*footnote original*) We recall that in our Report in *EC Measures Concerning Meat and Meat Products (Hormones)* ("*European Communities – Hormones*"), we held that:

> . . . a *prima facie* case is one which, in the absence of effective refutation by the defending party, requires a panel, as a matter of law, to rule in favour of the complaining party presenting the *prima facie* case.

See WT/DS26/AB/R, WT/DS44/AB/R, adopted 13 February 1998, para. 104.

[422] Appellate Body Report on *US – Certain EC Products*, paras. 111, 112 and 114.

made by Argentina was under the first sentence of that Article.[423] The Appellate Body considered that, in this case, the Panel "had neither a 'right' nor a 'duty' to develop its own legal reasoning to support a claim under the second sentence" and stressed that "the Panel was not entitled to make a claim for Argentina, or to develop its own legal reasoning on a provision that was not at issue":

> "In *EC – Hormones*,[424] and in *US – Certain EC Products*,[425] we affirmed the capacity of panels to develop their own legal reasoning in a context in which it was clear that the complaining party had made a claim on the matter before the panel. It was also clear, in both those cases, that the complainant had advanced arguments in support of the finding made by the panel – even though the arguments in support of the claim were not the same as the interpretation eventually adopted by the Panel. The situation in this appeal is altogether different. No claim was properly made by Argentina under the *second* sentence of Article II:1(b). No legal arguments were advanced by Argentina under the *second* sentence of Article II:1(b). Therefore, those rulings have no relevance to the situation here.
>
> Contrary to what Argentina argues, given our finding that Argentina has not made a *claim* under the *second* sentence of Article II:1(b), the Panel in this case had neither a 'right' nor a 'duty' to develop its own legal reasoning to support a claim under the second sentence. The Panel was not entitled to make a claim for Argentina,[426] or to develop its own legal reasoning on a provision that was not at issue.[427]"[428]

288. In *Argentina – Footwear (EC)*, Argentina had claimed that the Panel had violated Article 7.2 of the *DSU* and exceeded its terms of reference, because it had relied on alleged violations of Article 3 of the *Agreement on Safeguards* even though the request for the establishment of a Panel only alleged violations of Articles 2 and 4 of the *Agreement on Safeguards*.[429] In this case, the Appellate Body did not consider that the Panel was not entitled to rule on Article 3 of the *Agreement on Safeguards* and stated that it "fail[ed] to see how any panel could be expected to make an 'objective assessment of the matter', as required by Article 11 of the DSU, if it could only refer in its reasoning to the specific provisions cited by the parties in their claims":

> "We note that the very terms of Article 4.2(c) of the *Agreement on Safeguards* expressly incorporate the provisions of Article 3. Thus, we find it difficult to see how a panel could examine whether a Member had complied with Article 4.2(c) without also referring to the provisions of Article 3 of the *Agreement on Safeguards*. More particularly, given the express language of Article 4.2(c), we do not see how a panel could ignore the publication requirement set out in Article 3.1 when examining the publication requirement in Article 4.2(c) of the *Agreement on Safeguards*. And, generally, we fail to see how the Panel could have interpreted the requirements of Article 4.2(c) *without* taking into account in some way the provisions of Article 3. What is more, we fail to see how any panel could be expected to make an 'objective assessment of the matter', as required by Article 11 of the DSU, if it could only refer in its reasoning to the specific provisions cited by the parties in their claims."[430]

3. Article 7.2

289. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body defined the two instances where a panel is obliged to address issues that affect its own jurisdiction:

> "We believe that a panel comes under a duty to address issues in at least two instances. First, as a matter of due process, and the proper exercise of the judicial function, panels are required to address issues that are put before them by the parties to a dispute. Second, panels have to address and dispose of certain issues of a fundamental nature, even if the parties to the dispute remain silent on those issues. In this regard, we have previously observed that "[t]he vesting of jurisdiction in a panel is a fundamental prerequisite for lawful panel proceedings."[431] For this reason, panels cannot simply ignore issues which go to the root of their jurisdiction – that is, to their authority to deal with and dispose of matters. Rather, panels must deal with such issues – if necessary, on their own motion – in order to satisfy themselves that they have authority to proceed."[432]

[423] Appellate Body Report on *Chile – Price Band System*, para. 165.
[424] (*footnote original*) Appellate Body Report, para. 156.
[425] (*footnote original*) Appellate Body Report, para. 123. We note that the discussion above referring to our finding in *US – Certain EC Products* that a claim had not been made refers to the alleged claim under Article 23.2 of the DSU. The finding regarding a panel's ability to develop its own legal reasoning referred to a claim under Article 21.5 of the DSU, which had been made.
[426] (*footnote original*) Appellate Body Report, *Japan – Measures Affecting Agricultural Products*, WT/DS76/AB/R, adopted 19 March 1999, DSR 1999:I, 277, paras. 129–130.
[427] (*footnote original*) Argentina also seeks to rely on our reasoning in *Canada – Periodicals*, where we said that the relationship between the first and second sentences of Article III:2 of the GATT 1994 was such that we could move from an examination of the first sentence of that Article to an examination of the second sentence as "part of a logical continuum." Argentina's appellee's submission, para. 154. We do not agree with Argentina that our reasoning in *Canada – Periodicals* is relevant in this regard. In our view, the first and second sentences of Article II:1(b) prescribe distinct obligations, and do not form part of a logical continuum.
[428] Appellate Body Report on *Chile – Price Band System*, paras. 167–168.

[432] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 36.

290. For information concerning the consideration by the Panel of provisions not included as violations in the terms of reference but referred to by the defendant in its defence, see paragraph 282 above. For judicial economy, see Section XXXVI.F below. Concerning the consideration by the Panel of provisions not included in the complainant's claims, see paragraphs 329–332 below.

4. Article 7.3

(a) Special terms of reference

291. In *Brazil – Desiccated Coconut*, upon a request from Brazil for consultations on the terms of reference, the DSB authorized the DSB Chairman to "draw up terms of reference in consultation with the parties, in accordance with Article 7.3 of the DSU". The Philippines and Brazil had agreed on the following special terms of reference:

> "To examine, in the light of the relevant provisions in GATT 1994 and the Agreement on Agriculture, the matter referred to the DSB by the Philippines in document WT/DS22/5, taking into account the submission made by Brazil in document WT/DS22/3 and the record of discussions at the meeting of the DSB on 21 February 1996, and to make such findings as will assist the DSB in making the recommendations or in giving the rulings provided for in those agreements."[433]

VIII. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Composition of Panels

1. Panels shall be composed of well-qualified governmental and/or non-governmental individuals, including persons who have served on or presented a case to a panel, served as a representative of a Member or of a contracting party to GATT 1947 or as a representative to the Council or Committee of any covered agreement or its predecessor agreement, or in the Secretariat, taught or published on international trade law or policy, or served as a senior trade policy official of a Member.

2. Panel members should be selected with a view to ensuring the independence of the members, a sufficiently diverse background and a wide spectrum of experience.

3. Citizens of Members whose governments[6] are parties to the dispute or third parties as defined in paragraph 2 of Article 10 shall not serve on a panel concerned with that dispute, unless the parties to the dispute agree otherwise.

(*footnote original*) [6] In the case where customs unions or common markets are parties to a dispute, this provision applies to citizens of all member countries of the customs unions or common markets.

4. To assist in the selection of panelists, the Secretariat shall maintain an indicative list of governmental and non-governmental individuals possessing the qualifications outlined in paragraph 1, from which panellists may be drawn as appropriate. That list shall include the roster of non-governmental panellists established on 30 November 1984 (BISD 31S/9), and other rosters and indicative lists established under any of the covered agreements, and shall retain the names of persons on those rosters and indicative lists at the time of entry into force of the WTO Agreement. Members may periodically suggest names of governmental and non-governmental individuals for inclusion on the indicative list, providing relevant information on their knowledge of international trade and of the sectors or subject matter of the covered agreements, and those names shall be added to the list upon approval by the DSB. For each of the individuals on the list, the list shall indicate specific areas of experience or expertise of the individuals in the sectors or subject matter of the covered agreements.

5. Panels shall be composed of three panellists unless the parties to the dispute agree, within 10 days from the establishment of the panel, to a panel composed of five panellists. Members shall be informed promptly of the composition of the panel.

6. The Secretariat shall propose nominations for the panel to the parties to the dispute. The parties to the dispute shall not oppose nominations except for compelling reasons.

7. If there is no agreement on the panellists within 20 days after the date of the establishment of a panel, at the request of either party, the Director-General, in consultation with the Chairman of the DSB and the Chairman of the relevant Council or Committee, shall determine the composition of the panel by appointing the panellists whom the Director-General considers most appropriate in accordance with any relevant special or additional rules or procedures of the covered agreement or covered agreements which are at issue in the dispute, after consulting with the parties to the dispute. The Chairman of the DSB shall inform the Members of the composition of the panel thus formed no later than 10 days after the date the Chairman receives such a request.

8. Members shall undertake, as a general rule, to permit their officials to serve as panellists.

9. Panellists shall serve in their individual capacities and not as government representatives, nor as representatives of any organization. Members shall therefore not give them instructions nor seek to influence them as individuals with regard to matters before a panel.

10. When a dispute is between a developing country Member and a developed country Member the panel shall, if the developing country Member so requests,

[433] WT/DS22/6.

include at least one panellist from a developing country Member.

11. Panellists' expenses, including travel and subsistence allowance, shall be met from the WTO budget in accordance with criteria to be adopted by the General Council, based on recommendations of the Committee on Budget, Finance and Administration.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. Article 8.4: indicative list of panellists

292. In accordance with the proposals for the administration of the indicative list of panellists approved by the DSB on 31 May 1995, the list is completely updated every two years. At its meeting on 27 September 1995, the DSB approved the list of governmental and non-governmental panellists which contained names of individuals and an indication of their sectoral experience. The DSB also agreed that at each of its regular meetings new names may be proposed by delegations for inclusion in the indicative list.[434] To this end the Secretariat regularly circulates details of either the consolidated list or new names of potential panellists to be added to that list as approved by the DSB.[435]

2. Articles 8.6 and 8.7: panel composition

293. In *Guatemala – Cement II*, Guatemala requested the Panel to rule that its composition was inconsistent with WTO and international law principles, and that therefore the Panel lacked competence to review the matter before it. Specifically, Guatemala considered that the presence on this Panel of a member who served on *Guatemala – Cement I* detracted from the objectivity and independence that a panel should have when reviewing a matter brought before it. Mexico disagreed, arguing that the Panel was composed in conformity with the *DSU*. The Panel issued the following preliminary ruling[436] rejecting Guatemala's preliminary objection as follows:

> "In order to determine whether the substance of Guatemala's preliminary objection is an issue that is susceptible of a ruling by the Panel, we have carefully analysed the provisions of the DSU governing panel composition. It is clear that Article 8.6 of the DSU imposes primary responsibility for panel composition on the parties to the dispute. In cases where the parties are unable to agree on the composition of a panel, such as this one, Article 8.7 of the DSU imposes responsibility for panel composition on the Director General. According to Article 8 of the DSU, therefore, the composition of a panel is determined by the parties to the dispute and, in certain circumstances, by the Director General. Neither Article 8 nor any other provision of the DSU prescribes any role for the panel in the panel composition process. For this reason, we find that we are unable to rule on the substance of the issue raised by Guatemala.
>
> Should Guatemala persist with its substantive concerns regarding the composition of the Panel, Guatemala may avail itself of the procedure provided for in the Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes."[437]

IX. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Procedures for Multiple Complainants

1. Where more than one Member requests the establishment of a panel related to the same matter, a single panel may be established to examine these complaints taking into account the rights of all Members concerned. A single panel should be established to examine such complaints whenever feasible.

2. The single panel shall organize its examination and present its findings to the DSB in such a manner that the rights which the parties to the dispute would have enjoyed had separate panels examined the complaints are in no way impaired. If one of the parties to the dispute so requests, the panel shall submit separate reports on the dispute concerned. The written submissions by each of the complainants shall be made available to the other complainants, and each complainant shall have the right to be present when any one of the other complainants presents its views to the panel.

3. If more than one panel is established to examine the complaints related to the same matter, to the greatest extent possible the same persons shall serve as panellists on each of the separate panels and the timetable for the panel process in such disputes shall be harmonized.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

1. Article 9.1: "a single panel should be established . . . whenever feasible"

294. In *India – Patents (EC)*, India requested the Panel to dismiss the European Communities' complaint as inadmissible on procedural grounds. India argued that since it was "feasible" for the European Communities to have brought its complaint simultaneously with the United States' complaint (WT/DS50), the European Communities was required to do so. India contended

---

[434] WT/DSB/2.

[435] See, for example, WT/DSB/4; WT/DSB/5 and Add.1–4; WT/DSB/12; WT/DSB/13; WT/DSB17; WT/DSB/19 and Add.1–5; and WT/DSB/33 and Add.1.

[436] For more information about preliminary rulings, see Section XXXVI.C below.

[437] Panel Report on *Guatemala – Cement II*, para. 8.11.

that this was supported by a strict interpretation of Articles 9.1 and 10.4 of the *DSU*. The Panel considered that the terms of Article 9.1 are directory or recommendatory, not mandatory. Further to concluding that it was not feasible for the DSB to establish a single panel, the Panel found that there was no violation of Article 9.1:

> "In order to assess India's argument, we need to consider: (i) the nature of the requirement contained in Article 9.1; (ii) the rights generally of Members under the DSU; and (iii) whether it was feasible to establish a single panel in this particular case.
>
> Given their ordinary meaning, the terms of Article 9.1 are directory or recommendatory, not mandatory. They direct that a single panel *should* (not 'shall') be established, and that direction is limited to cases where it is *feasible*. We disagree with India that the addressee of Article 9.1 is not clear. Article 9.1 is clearly a code of conduct for the DSB because its provisions pertain to the establishment of a panel, the authority for which is exclusively reserved for the DSB. As such, Article 9.1 should not affect substantive and procedural rights and obligations of individual Members under the DSU.
>
> Indeed, the text of Article 9.1, as well as the text of Article 9.2, which is part of the context of Article 9.1, make it clear that Article 9 is not intended to limit the rights of WTO Members. In our view, one of those rights is the freedom to determine whether and when to pursue a complaint under the DSU. According to Article 3.7 of the DSU, '[t]he aim of dispute settlement mechanism is to secure a positive solution to a dispute. A solution mutually acceptable to the parties to a dispute and consistent with the covered agreements is clearly to be preferred'. It would be inconsistent with this aim of the dispute settlement mechanism to attempt to force Members to take decisions earlier than they wish on whether to request a panel in a dispute, or to continue consultations aimed at securing a mutually acceptable solution.
>
> As to feasibility, it is not disputed by the parties that the complaints by the United States (WT/DS50) and the EC (WT/DS79) relate to the same matter, i.e. India's compliance with Article 70.8 and 70.9 of the TRIPS Agreement. Was it then 'feasible' for the DSB to establish a single panel at the time of the United States' panel request in November 1996? The answer is no, because at that time the EC had not requested the establishment of a panel. Indeed, the EC was not even entitled to make such a request as it was not until 28 April 1997 that the EC requested consultations with India on this matter."[438]

(a) Relationship with other paragraphs of Article 9

(i) Article 9.2

295. In *India – Patents (EC)*, the Panel considered that the text of Article 9.2 was "part of the context of Article 9.1". In this regard, see paragraph 294 above.

2. Article 9.2: separate reports

(a) General

296. In *EC – Bananas III*, the European Communities requested the Panel, pursuant to Article 9 of the *DSU*, to prepare four panel reports in this case – one each for the claims of Ecuador, Guatemala and Honduras (who filed a joint first submission), Mexico and the United States. The Panel interpreted Article 9 as requiring it to grant the request and considered that one of the objectives of Article 9 was to ensure that a respondent is not later faced with a demand for compensation or threatened by retaliation under Article 22 of the *DSU* in respect of uncured inconsistencies with WTO rules that were not complained of by one of the complaining parties participating in a panel proceeding:

> "We interpret the terms of Article 9 to require us to grant the EC request. However, in light of the fact that the Complainants presented joint oral submissions to the Panel, joint responses to questions and a joint rebuttal submission, as well as the fact that they have collectively endorsed the arguments made in each other's first submissions, we must also take account of the close interrelationship of the Complainants' arguments.
>
> In our view, one of the objectives of Article 9 is to ensure that a respondent is not later faced with a demand for compensation or threatened by retaliation under Article 22 of the DSU in respect of uncured inconsistencies with WTO rules that were not complained of by one of the complaining parties participating in a panel proceeding. Our reports must bear this objective in mind.
>
> For purposes of determining whether a Complainant in this matter has made a claim, we have examined its first written submission, as we consider that document determines the claims made by a complaining party. To allow the assertion of additional claims after that point would be unfair to the respondent, as it would have little or no time to prepare a response to such claims. In this regard, we note that paragraph 12(c) of the Appendix 3 to the DSU on 'Working Procedures' foresees the simultaneous submission of the written rebuttals by complaining and respondent parties, a procedure that was followed in this case. To allow claims to be presented in the rebuttal submissions would mean that the respondent would have an opportunity to rebut the claims only in its oral presentation during the second meeting. In our view, the failure to make a claim in the first written submission cannot be remedied by later submissions or by incorporating the claims and arguments of other complainants."[439]

(b) Timing of the request for separate reports

297. In *US – Offset Act (Byrd Amendment)*, the Panel had rejected the request by the United States for a

[438] Panel Report on *India – Patents (EC)*, paras. 7.13–7.16.
[439] Panel Report on *EC – Bananas III*, paras. 7.55–7.57.

separate report for the dispute brought by Mexico on the grounds that the request had been filed too late in the process (two months after the issuance of the descriptive part) and no explanation had been provided on why it was not filed it earlier. The Panel considered that requests made under Article 9.2 "should be made in a timely manner, since any need to prepare separate reports may affect the manner in which a panel organises its proceedings". On appeal, the Appellate Body clarified that the text of Article 9.2 does not make the right to request separate reports dependent upon any conditions such as timing. The Appellate Body however noted that while the text of Article 9.2 of the *DSU* contains no requirement for the request for a separate panel report to be made *by a certain time*, the text does not explicitly provide that such requests may be made *at any time*. In its view, this provision cannot be read in isolation from the other *DSU* provisions, in particular Article 3.3 which calls for the "prompt" settlement of disputes:

> "By its terms, Article 9.2 accords to the requesting party a broad right to request a separate report. The *text* of Article 9.2 does not make this right dependent on any conditions. Rather, Article 9.2 explicitly provides that a panel 'shall' submit separate reports 'if one of the parties to the dispute so requests'. Thus the text of Article 9.2 of the DSU contains no requirement for the request for a separate panel report to be made *by a certain time*. We observe, however, that the text does not explicitly provide that such requests may be made *at any time*.
>
> Having made these observations, we note that Article 9.2 must not be read in isolation from other provisions of the DSU, and without taking into account the overall object and purpose of that Agreement. The overall object and purpose of the DSU is expressed in Article 3.3 of that Agreement which provides, relevantly, that the 'prompt settlement' of disputes is 'essential to the effective functioning of the WTO.' If the right to a separate panel report under Article 9.2 were 'unqualified', this would mean that a panel would have the obligation to submit a separate panel report, pursuant to the request of a party to the dispute, *at any time during the panel proceedings*. Moreover, a request for such a report could be made for whatever reason – or indeed, *without any reason* – even on the day that immediately precedes the day the panel report is due to be circulated to WTO Members at large. Such an interpretation would clearly undermine the overall object and purpose of the DSU to ensure the 'prompt settlement' of disputes."[440]

298. In *US – Steel Safeguards*, the United States requested the issuance of separate reports three days before the issuance of the descriptive part to the parties. The Panel considered that the United States' request for separate panel reports "was *not necessarily* made in an *untimely* fashion". The Panel used the word "necessarily" because it considered that despite the fact that the request was made when the Panel's process was quite advanced, this "did not necessarily prevent the Panel from settling the dispute in a prompt fashion".[441]

(c) Panel discretion

299. In *US – Offset Act (Byrd Amendment)*, when reviewing the Panel's rejection of the request by the United States for separate reports on the grounds of its untimely filing (see paragraph 297 above), the Appellate Body noted that, as mandated by Article 9.2, the rights of the other parties in the proceedings must be taken into account when making a decision. Recalling its conclusions in *EC – Hormones* on the panels' discretion in dealing with procedural issues, the Appellate Body considered that the Panel had acted within its discretion when rejecting the late request for separate reports:

> "[W]e note that the first sentence in Article 9.2 provides that it is for the panel to 'organize its examination and present its findings in such a manner that the rights which the parties to the dispute would have enjoyed had separate panels examined the complaints are in no way impaired'. Our comments in *EC – Hormones* about panels' discretion in dealing with procedural issues are pertinent here:
>
> > '. . . the DSU and in particular its Appendix 3, leave panels a *margin of discretion* to deal, always in accordance with due process, with specific situations that may arise in a particular case and that are not explicitly regulated. Within this context, an appellant requesting the Appellate Body to reverse a panel's ruling on matters of procedure must demonstrate the prejudice generated by such legal ruling.'[442] (emphasis added)
>
> In our view, the Panel acted within its 'margin of discretion' by denying the United States' request for a separate panel report. We do not believe that we should lightly disturb panels' decisions on their procedure, particularly in cases such as the one at hand, in which the Panel's decision appears to have been reasonable and in accordance with due process. We observe that, on appeal, the United States is not claiming that it suffered any prejudice from the denial of its request for a separate panel report.[443] We also note that the first sentence

[440] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, paras. 310–311 and 315–316.

[441] Panel Report on *US – Steel Safeguards*, para. 7.724.

[442] (*footnote original*) Appellate Body Report, *EC – Hormones*, footnote 138 to para.152.

[443] (*footnote original*) The United States submits that a showing of prejudice is not required by the text of Article 9.2. In response to questioning at the oral hearing, the United States added that, although it was not aware of any prejudice that it would have suffered in this case, prejudice could have resulted if, for example, Mexico had chosen to cross-appeal the claim related to Article 5 of the *SCM Agreement*, which only Mexico raised before the Panel.

of Article 9.2 refers to the rights of all the parties to the dispute. The Panel correctly based its decision on an assessment of the rights of all the parties, and not of one alone."[444]

(d) Structure of separate reports

300. In *EC – Bananas III*, the European Communities requested the Panel, pursuant to Article 9 of the *DSU*, to prepare four panel reports in this case – one each for the claims of Ecuador, Guatemala and Honduras (who filed a joint first submission), Mexico and the United States. The Panel agreed and issued four separate reports with identical descriptive parts but with findings sections that differed according to the claims of the various respondents:

> "[W]e have decided that the description of the Panel's proceedings, the factual aspects and the parties' arguments should be identical in the four reports. In the 'Findings' section, however, the reports differ to the extent that the Complainants' initial written submissions to the Panel differ in respect of alleging inconsistencies with the requirements of specific provisions of specific agreements . . ."[445]

301. In *US – Steel Safeguards*, further to the request by the United States to issue separate reports, the Panel issued its Reports in the form of one document constituting eight panel reports. The document included a common cover page, descriptive part and findings but individualized conclusions:

> "In exercising our 'margin of discretion' under Article 9.2 of the DSU, and taking into account the particularities of this dispute, the Panel decides to issue its Reports in the form of one document constituting eight Panel Reports. For WTO purposes, this document is deemed to be eight separate reports, each of the reports relating to each one of the eight complainants in this dispute. The document comprises a common cover page and a common Descriptive Part. This reflects the fact that the eight steel safeguard disputes were reviewed through a single panel process. This single document also contains a common set of Findings in relation to each of the claims that the Panel has decided to address. In our exercise of judicial economy, we have mainly addressed the complainants' common claims and on that basis, we were able to issue a common set of Findings which, we believed, resolved the dispute. Finally, this document also contains Conclusions and Recommendations that are particularised for each of the complainants, with a separate number (symbol) for each individual complainant."[446]

302. In *Canada – Wheat Exports and Grain Imports*, the DSB had successively established two panels to resolve the dispute (the "March Panel" and the "July Panel"). See paragraph 304 below in this regard. In response to a question posed by the Panel, the parties indicated that they did not wish the two Panels to issue separate reports in separate documents. The two Panels saw no compelling reason to proceed differently and therefore decided to issue their separate reports in the form of a single document.[447]

(e) Relationship with other paragraphs of Article 9

(i) Article 9.1

303. In *India – Patents (EC)*, the Panel considered that the text of Article 9.2 was "part of the context of Article 9.1". In this regard, see paragraph 294 above.

3. Article 9.3: multiple panels

(a) Multiple panels with same complainant

304. In *Canada – Wheat Exports and Grain Imports*, the Panel, in a preliminary ruling,[448] found that certain portions of the United States' panel request which dealt with Article XVII of the *GATT 1994* claim failed to satisfy the requirements of Article 6.2 of the *DSU* insofar as they did not identify the specific measures at issue.[449] In response to this preliminary ruling, the United States asked for the suspension of the Panel's work. During that suspension, the United States filed a second request for establishment of a panel remedying the insufficiencies of its first request in respect of its claims under Article XVII. The DSB established a second panel to resolve the dispute. Both Panels had the same panellists. As regards the organization of the two reports, see paragraph 302 above.

(b) Third-party rights for complainants in parallel proceedings

305. In *EC – Hormones*, the European Communities argued that the Panel had made decisions that granted certain additional third-party rights to Canada and the United States that were not justifiable under Article 9.3 of the *DSU*. More specifically, the European Communities appealed the Panel's decision to hold a joint meeting with scientific experts, to give the United States and Canada access to all information submitted in both proceedings and to invite the United States to participate and make a statement at the second substantive meeting

[445] Panel Report on *EC – Bananas III*, para. 7.58. As for the Panel's reasoning in accepting the request, see para. 296 of this Chapter.

[446] Panel Reports on *US – Steel Safeguards*, para. 7.725.

[447] Panel Report on *Canada – Wheat Exports and Grain Imports*, paras. 6.1–6.2.

[448] For more information on preliminary rulings, see Section XXXVI.C.

[449] Panel Report on *Canada – Wheat Exports and Grain Imports*, 6.10.

in the proceeding where Canada was the complaining party. The Appellate Body rejected the European Communities' arguments and upheld each of the Panel's decisions in this respect. In relation to holding one joint meeting with scientific experts, the Appellate Body stated:

"We consider the explanation of the Panel quite reasonable, and its decision to hold a joint meeting with the scientific experts consistent with the letter and spirit of Article 9.3 of the DSU. Clearly, it would be an uneconomical use of time and resources to force the Panel to hold two successive but separate meetings gathering the same group of experts twice, expressing their views twice regarding the same scientific and technical matters related to the same contested European Communities measures. We do not believe that the Panel has erred by addressing the European Communities procedural objections only where the European Communities could make a precise claim of prejudice. It is evident to us that a procedural objection raised by a party to a dispute should be sufficiently specific to enable the panel to address it.

. . .

Having access to a common pool of information enables the panel and the parties to save time by avoiding duplication of the compilation and analysis of information already presented in the other proceeding. Article 3.3 of the DSU recognizes the importance of avoiding unnecessary delays in the dispute settlement process and states that the prompt settlement of a dispute is essential to the effective functioning of the WTO. In this particular case, the Panel tried to avoid unnecessary delays, making an effort to comply with the letter and spirit of Article 9.3 of the DSU."[450]

306. The Appellate Body on *EC – Hormones* also considered reasonable the Panel's decision to grant the United States access to all information in the proceedings initiated by Canada and to grant Canada access to all information in the proceedings initiated by the United States and saw a link between granting such access and the attempt to "harmonize" timetables in multiple panel proceedings:

"The decision of the Panel to use and provide all information to the parties in both disputes was taken in view of its previous decision to hold a joint meeting with the experts. The European Communities asserts that it cannot see how providing information in one of the proceedings to a party in the other helps to harmonize timetables. We can see a relation between timetable harmonization within the meaning of Article 9.3 of the DSU and economy of effort. In disputes where the evaluation of scientific data and opinions plays a significant role, the panel that is established later can benefit from the information gathered in the context of the proceedings of the panel established earlier. Having access to a common pool of information enables the panel and the parties to save time by avoiding duplication of the compilation and analysis of information already presented in the other proceeding. Article 3.3 of the DSU recognizes the importance of avoiding unnecessary delays in the dispute settlement process and states that the prompt settlement of a dispute is essential to the effective functioning of the WTO. In this particular case, the Panel tried to avoid unnecessary delays, making an effort to comply with the letter and spirit of Article 9.3 of the DSU. Indeed, as noted earlier, despite the fact that the Canadian proceeding was initiated several months later than that of the United States, the Panel managed to finish both Panel Reports at the same time."

307. Regarding the participation of the United States in the second substantive meeting of the Panel, as requested by Canada, the Appellate Body in *EC – Hormones* recalled the Panel's findings and agreed:

"[The Panel held:]

'This decision was, *inter alia*, based on the fact that our second meeting was held the day after our joint meeting with the scientific experts and that the parties to this dispute would, therefore, most likely comment on, and draw conclusions from, the evidence submitted by these experts to be considered in both cases. Since in the panel requested by the United States the second meeting was held before the joint meeting with scientific experts, we considered it appropriate, in order to safeguard the rights of the United States in the proceeding it requested, to grant the United States the opportunity to observe our second meeting in this case and to make a brief statement at the end of that meeting.'[451]

The explanation of the Panel appears reasonable to us. If the Panel had not given the United States an opportunity to participate in the second substantive meeting of the proceedings initiated by Canada, the United States would not have had the same degree of opportunity to comment on the views expressed by the scientific experts that the European Communities and Canada enjoyed. Although Article 12.1 and Appendix 3 of the DSU do not specifically require the Panel to grant this opportunity to the United States, we believe that this decision falls within the sound discretion and authority of the Panel, particularly if the Panel considers it necessary for ensuring to all parties due process of law. In this regard, we note that in *European Communities – Bananas*,[452] the panel considered that particular circumstances justified the grant to third parties of rights somewhat broader than those explicitly envisaged in Article 10 and Appendix 3 of the DSU. We conclude that, in the case before us, circumstances justified the Panel's deci-

[452] (*footnote original*) Adopted 25 September 1997, WT/DS27/AB/R.

sion to allow the United States to participate in the second substantive meeting of the proceedings initiated by Canada."[453]

308. In *US – 1916 Act*, the Appellate Body held that issues of third-party rights were not addressed by Article 9 of the *DSU*. See also paragraph 317 below. The Appellate Body stated:

"Although the European Communities and Japan invoke Article 9 of the DSU, and, in particular, Article 9.3, in support of their position, we note that Article 9 of the DSU, which concerns procedures for multiple complaints related to the same matter, does not address the issue of the rights of third parties in such procedures."[454]

309. For further information on enhanced third-party rights, see Section X.B.2(a) below.

X. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Third Parties

1. The interests of the parties to a dispute and those of other Members under a covered agreement at issue in the dispute shall be fully taken into account during the panel process.

2. Any Member having a substantial interest in a matter before a panel and having notified its interest to the DSB (referred to in this Understanding as a "third party") shall have an opportunity to be heard by the panel and to make written submissions to the panel. These submissions shall also be given to the parties to the dispute and shall be reflected in the panel report.

3. Third parties shall receive the submissions of the parties to the dispute to the first meeting of the panel.

4. If a third party considers that a measure already the subject of a panel proceeding nullifies or impairs benefits accruing to it under any covered agreement, that Member may have recourse to normal dispute settlement procedures under this Understanding. Such a dispute shall be referred to the original panel wherever possible.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. Article 10

(a) General

310. The Appellate Body on *US – 1916 Act* confirmed that "[u]nder the DSU, as it currently stands, third parties are only entitled to the participatory rights provided for in Articles 10.2 and 10.3 and paragraph 6 of Appendix 3".[455]

311. In *US – FSC (Article 21.5 – EC)*, the Appellate Body confirmed the above statement and summarized its prior Reports as follows:

"In respect of the provisions of the DSU governing third party rights, we have already observed that, as the DSU currently stands, the rights of third parties in panel proceedings are limited to the rights granted under Article 10 and Appendix 3 to the DSU.[456] Beyond those minimum guarantees, panels enjoy a discretion to grant additional participatory rights to third parties in particular cases, as long as such 'enhanced' rights are consistent with the provisions of the DSU and the principles of due process.[457] However, panels have no discretion to circumscribe the rights guaranteed to third parties by the provisions of the DSU."[458]

2. Article 10.2

(a) Enhanced third-party rights

312. The Panel on *EC – Bananas III* considered requests by Members to be allowed to participate more broadly in the Panel proceedings than provided for under the relevant provisions of the *DSU*. More specifically, these Members requested that they be granted the right of presence at all meetings of the Panel with the parties and the right to make statements at all such meetings. Furthermore, these Members also demanded the right to receive copies of all submissions and other materials and to be granted permission to make written submissions to both meetings of the Panel. While the DSB took note of these statements, there was no consensus on such participation.[459] Several of these countries later confirmed their requests in letters addressed to the Chairman of the DSB. The Panel began by considering the provisions of the *DSU* and GATT practice:

"The rights of third parties are dealt with in Article 10 and Appendix 3 of the Dispute Settlement Understanding. Article 10 provides that third parties 'shall have an opportunity to be heard by the panel and to make written submissions to the panel'. It also provides that third parties are entitled to receive the submissions of the parties made to the first substantive panel meeting. Paragraph 6 of Appendix 3 specifies that third parties shall be invited 'to present their views during a session of the first substantive meeting of the panel set aside for that purpose. All such third parties may be present during the

[455] Appellate Body Report on *US – 1916 Act*, para. 145.
[456] (*footnote original*) Appellate Body Report, *United States – Anti-Dumping Act of 1916* ("*US – 1916 Act*"), WT/DS136/AB/R, WT/DS162/AB/R, adopted 26 September 2000, para. 145.
[457] (*footnote original*) Appellate Body Report, *US – 1916 Act*, *supra*, footnote 208, para. 150. See also Appellate Body Report, *EC-Hormones*, *supra*, footnote 40, para. 154.
[458] Appellate Body Report on *US – FSC (Article 21.5 – European Communities)*, para. 243.
[459] WT/DSB/M/16, item 1, pp. 1–5.

entirety of this session'. Under prior GATT practice, more expansive rights were granted to third parties in several disputes, including the two prior disputes involving bananas and in the *Semiconductors* case.[460] In those cases, however, the extension of such rights had been the subject of agreement between the parties at that time. No such agreement existed between the parties in the present dispute."[461]

313. After the first substantive meeting, the Panel on *EC – Bananas III* made the following ruling:

"We thereafter ruled as follows:

(a) The Panel has decided, after consultations with the parties in conformity with DSU Article 12.1, that members of governments of third parties will be permitted to observe the second substantive meeting of the Panel with the parties. The Panel envisages that the observers will have the opportunity also to make a brief statement at a suitable moment during the second meeting. The Panel does not expect them to submit additional written material beyond responses to the questions already posed during the first meeting.

(b) The Panel based its decision, *inter alia*, on the following considerations:

(i) the economic effect of the disputed EC banana regime on certain third parties appeared to be very large;

(ii) the economic benefits to certain third parties from the EC banana regime were claimed to derive from an international treaty between them and the EC;

(iii) past practice in panel proceedings involving the banana regimes of the EC and its member States; and

(iv) the parties to the dispute could not agree on the issue.

As a consequence of our ruling, the third parties in these proceedings enjoyed broader participatory rights than are granted to third parties under the DSU."[462]

314. After granting certain enhanced third-party rights, the Panel on *EC – Bananas III* declined to grant further such rights, including participation in the interim review process:

"Following the second substantive meeting of the Panel with the parties, several of the third parties asked for further participatory rights, including participation in the interim review process. We consulted the parties and found that, as before, they had diverging views on the appropriateness of granting this request. We decided that no further participatory rights should be extended to third parties, except, in accord with normal practice, to permit them to review the draft of the summary of their arguments in the Descriptive Part. In this regard, we noted that Article 15 of the DSU, which deals with the interim review process, refers only to parties as participants in that process. In our view, to give third parties all of the rights of parties would inappropriately blur the distinction drawn in the DSU between parties and third parties."[463]

315. In *EC – Hormones*, the Appellate Body upheld the Panel's decisions to grant additional participatory rights to the United States and Canada, specifically to have access to all information from the proceedings initiated by the other country, respectively, and for the United States to observe and to make a statement at the second substantive meeting in the proceeding initiated by Canada. See paragraphs 307–308 above.

316. In contrast to the *EC – Hormones* dispute, the Panel on *US – 1916 Act* refused to grant the European Communities and Japan enhanced third-party rights in each other's case. The Panel, in a finding subsequently upheld by the Appellate Body, held:[464]

"We conclude from the reports in the *EC – Hormones* cases that enhanced third party rights were granted primarily because of the specific circumstances in those cases.

We find that no similar circumstances exist in the present matter, which does *not* involve the *consideration of complex facts or scientific evidence*. Moreover, *none* of the parties *requested* that the panels *harmonise their timetables or hold concurrent deliberations* in the two procedures (WT/DS136 and WT/DS162). In fact, the European Communities was not in favour of delaying the proceedings in WT/DS136 and the United States objected to concurrent deliberations."[465]

317. The Appellate Body on *US – 1916 Act* confirmed its finding in the *EC – Hormones* case that the grant of additional third-party rights is within "the sound discretion" of a Panel and rejected the arguments by the European Communities and Japan:

[464] Appellate Body Report on *US – 1916 Act*, para. 150. See also para. 305 of this Chapter.

[465] Panel Report on *US – 1916 Act (EC)*, paras. 6.33–6.34. See also Panel Report on *US – 1916 Act (Japan)*, paras. 6.33–6.34.

"The rules relating to the participation of third parties in panel proceedings are set out in Article 10 of the DSU, and, in particular, paragraphs 2 and 3 thereof, and in paragraph 6 of Appendix 3 to the DSU.

. . .

Although the European Communities and Japan invoke Article 9 of the DSU, and, in particular, Article 9.3, in support of their position, we note that Article 9 of the DSU, which concerns procedures for multiple complaints related to the same matter, does not address the issue of the rights of third parties in such procedures.

Under the DSU, as it currently stands, third parties are only entitled to the participatory rights provided for in Articles 10.2 and 10.3 and paragraph 6 of Appendix 3.

. . .

Pursuant to Article 12.1, a panel is required to follow the Working Procedures in Appendix 3, unless it decides otherwise after consulting the parties to the dispute.

In support of their argument that the Panel should have granted them 'enhanced' third party rights, the European Communities and Japan refer to the considerations that led the panel in *European Communities – Hormones* to grant third parties 'enhanced' participatory rights, and stress the similarity between *European Communities – Hormones* and the present cases.

. . .

In our Report in *European Communities – Hormones*, we stated:

> Although Article 12.1 and Appendix 3 of the DSU do not specifically require the Panel to grant . . . ['enhanced' third party rights] to the United States, we believe that this decision falls within the sound discretion and authority of the Panel, particularly if the Panel considers it necessary for ensuring to all parties due process of law.[466]

A panel's decision whether to grant "enhanced" participatory rights to third parties is thus a matter that falls within the discretionary authority of that panel. Such discretionary authority is, of course, not unlimited and is circumscribed, for example, by the requirements of due process. In the present cases, however, the European Communities and Japan have not shown that the Panel exceeded the limits of its discretionary authority. We, therefore, consider that there is no legal basis for concluding that the Panel erred in refusing to grant 'enhanced' third party rights to Japan or the European Communities."[467]

318. In *EC – Tariff Preferences*, certain third parties requested the Panel to extend enhanced third-party rights to them; other third parties requested the Panel to grant the same rights to all third parties. The Panel decided to grant enhanced rights to all third parties on the following grounds:

"Having carefully considered the arguments of the parties and third parties in this case, the Panel considers as follows:

(a) There are significant similarities between this case and that of *EC – Bananas III (WT/DS27)* in terms of economic impact of the preference programmes on third-party developing countries. Both those third parties that are beneficiaries under the EC's Drug Arrangements and those that are excluded have a significant economic interest in the matter before this Panel.

(b) The outcome of this case could have a significant trade-policy impact on the US as a preference-giving country.

(c) As a matter of due process, it is appropriate to provide the same procedural rights to all third parties in this dispute.

(d) In granting any additional rights to third parties, it is important to guard against an inappropriate blurring of the distinction drawn in the DSU between parties and third parties."[468]

(b) "Substantial interest"

319. The Appellate Body referred briefly to Article 10.2 in its finding in *EC – Bananas III* that no "legal interest" is required for a Member to bring a case under the *DSU*. See paragraph 158 above.

3. Article 10.3

(a) "Third parties shall receive the submissions of the parties to the dispute to the first meeting of the panel"

320. As regards the access to second written submissions (rebuttals) by third parties in Article 21.5 panel proceedings, see Section XXI.B.4(c)(iv) below.

4. Third-party rights in preliminary ruling proceedings

321. In this regard, see Sections XXX.B.3(e) and XXXVI.C.1(d) below.

5. Third-party rights under Article 22.6

322. With respect to third-party rights under Article 22.6 of the *DSU*, see the excerpts from the reports of the decisions by the arbitrator referenced in paragraph 695 below.

---

[466] (*footnote original*) Appellate Body Report [on *EC – Hormones*], para. 154.
[467] Appellate Body Report on *US – 1916 Act*, paras. 139–150.
[468] Panel Report on *EC – Tariff Preferences*, para. 7 of Annex A.

6. Authority of the panel to direct a Member to be a third party

323. In *Turkey – Textiles*, Turkey argued that the European Communities should be a party to the dispute because the measure taken by Turkey was done so pursuant to a regional trade agreement between Turkey and the European Communities. The Panel ruled:

> "In the absence of any relevant provision in the DSU, in light of international practice,[469] and noting the position of the EC to this point, we consider that we do not have the authority to direct that a WTO Member be made third-party or that it otherwise participate throughout the panel process."[470]

7. Essential parties

324. In *Turkey – Textiles*, Turkey claimed that the Panel should dismiss India's claims because the measures were taken pursuant to a regional trade agreement between Turkey and the European Communities and the latter therefore should have been a party to the dispute. The Panel addressed the concept of "essential parties" first by referring to the case law of the International Court of Justice (ICJ), more specifically to the *Military and Paramilitary Activities in and Against Nicaragua* and the *Phosphate Lands in Nauru* cases:[471]

> "The practice of the ICJ indicates that if a decision between the parties to the case can be reached without an examination of the position of the third state (i.e. in the WTO context, a Member) the ICJ will exercise its jurisdiction as between the parties. In the present dispute, there are no claims against the European Communities before us that would need to be determined in order for the Panel to assess the compatibility of the Turkish measures with the WTO Agreement."[472]

325. After analysing the practice of the ICJ with respect to the "essential parties" concept, the Panel on *Turkey – Textiles* noted:

> "[T]here is no WTO concept of 'essential parties'. Based on our terms of reference and the fact that we have decided (as further discussed hereafter) not to examine the GATT/WTO compatibility of the Turkey-EC customs union, we consider that the European Communities was not an essential party to this dispute; the European Communities, had it so wished, could have availed itself of the provisions of the DSU, which we note have been interpreted with a degree of flexibility by previous panels,[473] in order to represent its interests. We recall in this context that Panel and Appellate Body reports are binding on the parties only.[474]
>
> Under WTO rules, the European Communities and Turkey are Members with equal and independent rights and obligations. For Turkey, it is not at all inconceivable that it adopted the measures in question in order to have its own policy coincide with that of the European Communities. However, in doing so, it should have been aware, in respect of the measures it has chosen, that its circumstances were different from those of the European Communities in relation to the Agreement on Textiles and Clothing ('ATC') and thus could reasonably have been anticipated to give rise to responses which focussed on that distinction."[475]

XI. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Function of Panels

> The function of panels is to assist the DSB in discharging its responsibilities under this Understanding and the covered agreements. Accordingly, a panel should make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements, and make such other findings as will assist the DSB in making the recommendations or in giving the rulings provided for in the covered agreements. Panels should consult regularly with the parties to the dispute and give them adequate opportunity to develop a mutually satisfactory solution.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

1. Standard of review under the DSU

326. In *US – Cotton Yarn*, the Appellate Body indicated that its Reports on *Argentina – Footwear (EC)*, *US – Lamb* and *US – Wheat Gluten* (see paragraphs 381–385 below), all concerning disputes under the *Agreement on Safeguards*, "spell out key elements of a panel's standard of review under Article 11 of the DSU in assessing whether the competent authorities complied with their obligations in making their determinations". The Appellate Body stated:

> "This standard may be summarized as follows: panels must examine whether the competent authority has evaluated all relevant factors; they must assess whether

[469] (*footnote original*) The Panel examined relevant principles of international law, including the practice of the International Court of Justice in the *Military and Paramilitary Activities in and Against Nicaragua* case ([1984], ICJ Reports, pp. 430–431) and the *Phosphate Lands in Nauru* case ([1992], ICJ Reports, pp. 259–262) cases (preliminary objections).
[470] Panel Report on *Turkey – Textiles*, para. 9.5.
[471] Panel Report on *Turkey – Textiles*, paras. 9.8–9.9.
[472] Panel Report on *Turkey – Textiles*, para. 9.10.
[473] (*footnote original*) See for instance the Panel Reports on *EC – Bananas III*, paras. 7.4–7.9; and *EC – Hormones*, paras. 8.12–8.15.
[474] (*footnote original*) Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 13.
[475] Panel Report on *Turkey – Textiles*, paras. 9.11–9.12.

> the competent authority has examined all the pertinent facts and assessed whether an adequate explanation has been provided as to how those facts support the determination; and they must also consider whether the competent authority's explanation addresses fully the nature and complexities of the data and responds to other plausible interpretations of the data. However, panels must not conduct a *de novo* review of the evidence nor substitute their judgement for that of the competent authority."[476]

327. In *EC – Hormones*, the European Communities argued in its appeal that the Panel had failed to apply an appropriate standard of review in assessing certain acts of, and scientific evidentiary material submitted by, the European Communities. The Appellate Body held that the applicable standard of review under Article 11 of the *DSU* is neither *de novo* review, nor "total deference", but rather the "objective assessment of the facts":

> "The standard of review appropriately applicable in proceedings under the *SPS Agreement*, of course, must reflect the balance established in that Agreement between the jurisdictional competences conceded by the Members to the WTO and the jurisdictional competences retained by the Members for themselves.[477] To adopt a standard of review not clearly rooted in the text of the *SPS Agreement* itself, may well amount to changing that finely drawn balance; and neither a panel nor the Appellate Body is authorized to do that.
>
> . . . Article 11 of the DSU bears directly on [the] matter [of standard of review] and, in effect, articulates with great succinctness but with sufficient clarity the appropriate standard of review for panels in respect of both the ascertainment of facts and the legal characterization of such facts under the relevant agreements.
>
> So far as fact-finding by panels is concerned, their activities are always constrained by the mandate of Article 11 of the DSU: the applicable standard is neither *de novo* review as such, nor 'total deference', but rather the 'objective assessment of the facts'."[478]

328. As regards the application of the standard of review of Article 11 of the *DSU* to disputes concerning safeguard and countervailing measures, see Sections XI.B.6(a) and XI.B.6(d) below respectively.

2. "objective assessment of the matter before it"

(a) "the matter before it"

(i) General

329. As regards the concept of "matter", see Section VII.B.2(a)(i) above.

330. In *EC – Poultry*, the Appellate Body warned that "[a]n allegation that a panel has failed to conduct the 'objective assessment of the matter before it' required by Article 11 of the DSU is a very serious allegation. Such an allegation goes to the very core of the integrity of the WTO dispute settlement process itself."[479]

(ii) Finding on a claim not made by the complainant

331. In *Chile – Price Band System*, the Appellate Body considered that the Panel had exceeded its mandate and thus acted inconsistently with Article 11 because it had "made a finding on a claim that was *not* made by Argentina" and "in so doing, the Panel assessed a provision that was not a part 'of the matter before it'":

> "In this case, the Panel made a finding on a claim that was *not* made by Argentina. Having determined that the duties resulting from Chile's price band system could not be assessed under the first sentence[480] of Article II:1(b) of the GATT 1994, the Panel then proceeded to examine the measure under the second sentence of that provision. In so doing, the Panel assessed a provision that was not a part 'of the matter before it'. As we have explained, the terms of reference were broad enough to have included a claim under the second sentence of Article II:1(b). However, Argentina did not articulate a claim under that sentence; nor did Argentina submit any arguments on the consistency of Chile's price band system with the second sentence.[481] Therefore, as with our finding in *US – Certain EC Products,*[482] the second sentence of Article II:1(b) was not the subject of a claim before the Panel. Because it made a finding on a provision that was not before it, the Panel, therefore, did not make an objective assessment *of the matter before it*, as required by Article 11. Rather, the Panel made a finding on a matter that was *not* before it. In doing so, the Panel acted *ultra petita* and inconsistently with Article 11 of the DSU."[483]

(iii) Reference in Panel's reasoning to provisions not included in the claims

332. In *Argentina – Footwear (EC)*, the Appellate Body considered Argentina's argument that the Panel violated Article 7.2 of the *DSU* and exceeded its terms of

Jackson, "WTO Dispute Panel Deference to National Government Decisions, The Misplaced Analogy to the U.S. Chevron Standard-of-Review Doctrine", in E.-U. Petersmann (ed.), *International Trade Law and the GATT/WTO Dispute Settlement System* (Kluwer, 1997) 185, p. 189; P. A. Akakwam, "The Standard of Review in the 1994 Antidumping Code: Circumscribing the Role of GATT Panels in Reviewing National Antidumping Determinations" (1996), 5:2 *Minnesota Journal of Global Trade* 277, pp. 295–296.
[478] Appellate Body Report on *EC – Hormones*, paras. 115–117.
[479] Appellate Body Report on *EC – Poultry*, para. 133.
[480] (*footnote original*) Panel Report, para. 7.104.
[481] See para. 287 of this Chapter.
[482] See para. 286 of this Chapter.
[483] Appellate Body Report on *Chile – Price Band System*, para. 173.

reference, because the Panel not only considered, but also relied on, alleged violations of Article 3 of the *Agreement on Safeguards* even though the request for the establishment of a Panel submitted by the European Communities only alleged violations of Articles 2 and 4 of the *Agreement on Safeguards*.[484] The Appellate Body considered that it "fail[ed] to see how any panel could be expected to make an 'objective assessment of the matter', as required by Article 11 of the DSU, if it could only refer in its reasoning to the specific provisions cited by the parties in their claims":

> "We note that the very terms of Article 4.2(c) of the *Agreement on Safeguards* expressly incorporate the provisions of Article 3. Thus, we find it difficult to see how a panel could examine whether a Member had complied with Article 4.2(c) without also referring to the provisions of Article 3 of the *Agreement on Safeguards*. More particularly, given the express language of Article 4.2(c), we do not see how a panel could ignore the publication requirement set out in Article 3.1 when examining the publication requirement in Article 4.2(c) of the *Agreement on Safeguards*. And, generally, we fail to see how the Panel could have interpreted the requirements of Article 4.2(c) *without* taking into account in some way the provisions of Article 3. What is more, we fail to see how any panel could be expected to make an 'objective assessment of the matter', as required by Article 11 of the DSU, if it could only refer in its reasoning to the specific provisions cited by the parties in their claims."[485]

(iv) Consideration of parties' arguments by the Panel

333. In *EC – Poultry*, Brazil argued in its appeal that the Panel had not made "an objective assessment of the matter before it" because, in Brazil's view, the Panel had failed to consider various arguments made by Brazil regarding GATT/WTO jurisprudence. The Appellate Body rejected this argument:

> "In *United States – Measure Affecting Imports of Woven Wool Shirts and Blouses from India*, we stated that nothing in Article 11 'or in previous GATT practice *requires* a panel to examine *all* legal claims made by the complaining party', and that '[a] panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute.' Just as a panel has the discretion to address only those *claims* which must be addressed in order to dispose of the matter at issue in a dispute, so too does a panel have the discretion to address only those *arguments* it deems necessary to resolve a particular claim. So long as it is clear in a panel report that a panel has reasonably considered a claim, the fact that a particular argument relating to that claim is not specifically addressed in the 'Findings' section of a panel report will not, in and of itself, lead to the conclusion that that panel has failed to make the 'objective assessment of the matter before it' required by Article 11 of the DSU."[486]

334. In *Australia – Automotive Leather II (Article 21.5 – US)*, both parties argued that the task of the Panel was to choose between the positions articulated by each party. The Panel disagreed and stated:

> "That neither party has argued a particular interpretation before us, and indeed, that both have argued that we should not reach issues of interpretation that they have not raised, cannot, in our view, preclude us from considering such issues if we find this to be necessary to resolve the dispute that is before us. A panel's interpretation of the text of a relevant WTO Agreement cannot be limited by the particular arguments of the parties to a dispute."[487]

(v) Due process implications

335. In *Chile – Price Band System*, the Appellate Body concluded that the Panel had made a finding on a claim that had not been made by Argentina.[488] Chile had claimed that, by making a finding on that claim, the Panel had deprived Chile of a fair right of response. The Appellate Body agreed with Chile and found that the Panel had acted inconsistently with Article 11 of the *DSU* by denying Chile the due process of a fair right of response.[489] In support of this finding, the Appellate Body considered that "in making 'an objective assessment of the matter before it', a panel is also duty bound to ensure that due process is respected":

> "Article 11 imposes duties on panels that extend beyond the requirement to assess evidence objectively and in good faith . . . This requirement is, of course, an indispensable aspect of a panel's task. However, in making 'an objective assessment of the matter before it', a panel is also duty bound to ensure that due process is respected. Due process is an obligation inherent in the WTO dispute settlement system. A panel will fail in the duty to respect due process if it makes a finding on a matter that is not before it, because it will thereby fail to accord to a party a fair right of response. In this case, because the Panel did not give Chile a fair right of response on this issue, we find that the Panel failed to accord to Chile the due process rights to which it is entitled under the DSU."[490]

(vi) Consultation of experts

336. In *India – Quantitative Restrictions*, India argued in its appeal that the Panel had acted inconsistently with Article 11 of the *DSU* because it had delegated to the IMF its duty to make an objective assessment. The Appellate Body disagreed with India and stated:

> "The Panel gave considerable weight to the views expressed by the IMF in its reply to these questions. However, nothing in the Panel Report supports India's argument that the Panel delegated to the IMF its judicial function to make an objective assessment of the matter. A careful reading of the Panel Report makes clear that the Panel did not simply accept the views of the IMF. The Panel critically assessed these views and also considered other data and opinions in reaching its conclusions."[491]

3. "objective assessment of the facts"

(a) Extent of panels' duty/discretion to examine the evidence

(i) Duty to examine all evidence

337. In the first appeal presenting an Article 11 challenge to a Panel's fact-finding,[492] *EC – Hormones,* the Appellate Body stressed that "[t]he duty to make an objective assessment of the facts is, among other things, an obligation to consider the evidence presented to a panel and to make factual findings on the basis of that evidence. The deliberate disregard of, or refusal to consider, the evidence submitted to a panel is incompatible with a panel's duty to make an objective assessment of the facts." The Appellate Body further considered that "[t]he wilful distortion or misrepresentation of the evidence put before a panel is similarly inconsistent with an objective assessment of the facts".[493]

338. In *Korea – Dairy*, Korea argued in its appeal that the Panel should have looked solely at the evidence submitted by the European Communities as the complaining party to determine whether the European Communities had met its burden of proof of making a prima facie case. The Appellate Body disagreed and stated that "under Article 11 of the DSU, a panel is charged with the mandate to determine the facts of the case and to arrive at factual findings. In carrying out this mandate, a panel has the duty to examine and consider all the evidence before it, not just the evidence submitted by one or the other party, and to evaluate the relevance and probative force of each piece thereof."[494] With respect to the burden of proof issue in this context, see also paragraph 1000 below.

(ii) Panels' discretion as trier and weigher of the facts

339. In *EC – Hormones*, the Appellate Body stressed the role of the Panel as the trier of the facts and considered that the "[d]etermination of the credibility and weight properly to be ascribed to (that is, the appreciation of) a given piece of evidence is part and parcel of the fact finding process and is, in principle, left to the discretion of a panel as the trier of facts".[495] It further stated that "it is generally within the discretion of the Panel to decide which evidence it chooses to utilize in making findings".[496] It also said that "[t]he Panel cannot realistically refer to all statements made by the experts advising it and should be allowed a substantial margin of discretion as to which statements are useful to refer to explicitly".[497]

340. In *Australia – Salmon*, with respect to the evaluation of evidence, the Appellate Body considered that "[p]anels . . . are not required to accord to factual evidence of the parties the same meaning and weight as do the parties".[498] The Appellate Body came to a similar conclusion in *EC – Bed Linen (Article 21.5 – India)*. See paragraph 354 below.

341. In *Korea – Alcoholic Beverages*, the Appellate Body reiterated the role of the Panel as the trier of the facts with the corresponding discretion to examine and weigh the evidence. The Appellate Body, however, held that this discretion "is not, of course, unlimited" since it is always subject to the panel's duty to render an objective assessment of the matter before it:[499]

> "The Panel's examination and weighing of the evidence submitted fall, in principle, within the scope of the Panel's discretion as the trier of facts and, accordingly, outside the scope of appellate review. This is true, for instance, with respect to the Panel's treatment of the Dodwell Study, the Sofres Report and the Nielsen Study. We cannot second-guess the Panel in appreciating either the evidentiary value of such studies or the consequences, if any, of alleged defects in those studies. Similarly, it is not for us to review the relative weight ascribed

---

[491] Appellate Body Report on *India – Quantitative Restrictions*, para. 149.

[492] Prior to *EC – Hormones*, an Article 11 claim was raised on appeal in *US – Wool Shirts and Blouses*, but that claim addressed solely the issue of "whether Article 11 of the *DSU* entitles a complaining party to a finding on each of the legal claims it makes to a panel". See Appellate Body Report on *US – Wool Shirts and Blouse*, p. 17. As such, the claim did not challenge the panel's "assessment of the facts of the case". In addition, in *Canada – Periodicals*, the appellant raised the issue of Article 11 when challenging the panel's reliance on a "hypothetical example" to make a determination of "like products" under Article III:2 of the GATT 1994. *See* Appellate Body Report on *Canada – Periodicals*, p. 5. The Appellate Body, however, made no ruling on Article 11 (pp. 20–23).

[493] Appellate Body Report on *EC – Hormones*, para. 133.

[494] Appellate Body Report on *Korea – Dairy*, para. 137.

[495] Appellate Body Report on *EC – Hormones*, para. 132.

[496] Appellate Body Report on *EC – Hormones*, para. 135.

[497] Appellate Body Report on *EC – Hormones*, para. 138.

[498] Appellate Body Report on *Australia – Salmon*, para. 267.

[499] As regards the Panel's duty to render an objective assessment of the facts, see Section XI.B.1.

to evidence on such matters as marketing studies, methods of production, taste, colour, places of consumption, consumption with 'meals' or with 'snacks', and prices.

A panel's discretion as trier of facts is not, of course, unlimited. That discretion is always subject to, and is circumscribed by, among other things, the panel's duty to render an objective assessment of the matter before it. In *European Communities – Hormones*, we dealt with allegations that the panel had 'disregarded', 'distorted' and 'misrepresented' the evidence before it."[500]

342. The Panel on *Australia – Automotive Leather II* observed that any evidentiary rulings that the Panel makes must be consistent with its obligation under Article 11 to conduct "an objective assessment of the matter before it". In the Panel's view, "a decision to limit the facts and arguments that the United States may present during the course of this proceeding to those set forth in the request for consultations would make it difficult, if not impossible, for us to fulfil our obligation to conduct an 'objective assessment' of the matter before us".[501]

343. In *US – Wheat Gluten*, the Appellate Body again referred to the Panel as the trier of facts in respect of its discretion to consider the evidence in a given case and recalled its prior jurisprudence on the scope of the review that the Appellate Body can undertake of the Panel's findings pursuant to Article 17.6 of the *DSU* (see also Section XVII.B.4 below):

"[W]e recall that, in previous appeals, we have emphasized that the role of the Appellate Body differs from the role of panels. Under Article 17.6 of the DSU, appeals are 'limited to *issues of law* covered in the panel report and *legal* interpretations developed by the panel'. (emphasis added) By contrast, we have previously stated that, under Article 11 of the DSU, panels are:

> . . . charged with the mandate to determine the *facts* of the case and to arrive at *factual findings*. In carrying out this mandate, a panel has the duty to examine and consider all the evidence before it, not just the evidence submitted by one or the other party, and to evaluate the relevance and probative force of each piece thereof.[502] (emphasis added)

We have also stated previously that, although the task of panels under Article 11 relates, in part, to its assessment of the *facts*, the question whether a panel has made an 'objective assessment' of the facts is a *legal* one, that may be the subject of an appeal.[503] (emphasis added) However, in view of the distinction between the respective roles of the Appellate Body and panels, we have taken care to emphasize that a panel's appreciation of the evidence falls, in principle, 'within the *scope of the panel's discretion as the trier of facts*'.[504] (emphasis added). In assessing the panel's appreciation of the evidence, we cannot base a finding of inconsistency under Article 11 simply on the conclusion that we might have reached a different factual finding from the one the panel reached. Rather, we must be satisfied that the panel has exceeded the bounds of its discretion, as the trier of facts, in its appreciation of the evidence. As is clear from previous appeals, we will not interfere lightly with the panel's exercise of its discretion.[506]"[507]

344. The Panel on *EC – Bed Linen* examined the European Communities' objection to the inclusion by India in its submission of reports of the consultations between the parties which took place before the establishment of the Panel. Although the Panel made no findings on the European Communities' claims, it provided its thoughts about the difference between questions concerning the admissibility of evidence, and the weight to be accorded to the evidence in making its decisions. In doing so, it referred to the Panel on *Australia – Automotive Leather II* (see paragraph 342 above):

"[I]t seems that the evidence concerning the consultations is at best unnecessary, and may be irrelevant. That said, however, merely because the evidence is unnecessary or irrelevant does not require us to exclude it.

. . .

[507] Appellate Body Report on *US – Wheat Gluten*, paras. 150–151. See also Appellate Body Report on *EC – Sardines*, para. 299.

> . . . we consider that it is not necessary to limit the facts and arguments India may present, even if we might consider those facts or arguments to be irrelevant or not probative on the issues before us. In our view, there is a significant and substantive difference between questions concerning the admissibility of evidence, and the weight to be accorded evidence in making our decisions. That is, we may choose to allow parties to present evidence, but subsequently not consider that evidence, because it is not relevant or necessary to our determinations or is not probative on the issues before it. In our view, there is little to be gained by expending our time and effort in ruling on points of 'admissibility' of evidence *vel non*.
>
> In addition, we note that, under Article 13.2 of the DSU, Panels have a general right to seek information 'from any relevant source'. In this context, we consider that, as a general rule, panels have wide latitude in admitting evidence in WTO dispute settlement. The DSU contains no rule that might restrict the forms of evidence that panels may consider. Moreover, international tribunals are generally free to admit and evaluate evidence of every kind, and to ascribe to it the weight that they see fit. As one legal scholar has noted:
>
> > 'The inherent flexibility of the international procedure, and its tendency to be free from technical rules of evidence applied in municipal law, provide the "evidence" with a wider scope in international proceedings . . . . Generally speaking, international tribunals have not committed themselves to the restrictive rules of evidence in municipal law. They have found it justified to receive every kind and form of evidence, and have attached to them the probative value they deserve under the circumstances of a given case'.[508]
>
> It has clearly been held in the WTO that information obtained in consultations may be presented in subsequent panel proceedings.[509]"[510]

345. In *US – Carbon Steel*, the Appellate Body summarized its previous jurisprudence on the extent of panels' duty to examine the evidence:

> "As we have observed previously, Article 11 requires panels to take account of the evidence put before them and forbids them to wilfully disregard or distort such evidence.[511] Nor may panels make affirmative findings that lack a basis in the evidence contained in the panel record.[512] Provided that panels' actions remain within these parameters, however, we have said that 'it is generally within the discretion of the Panel to decide which evidence it chooses to utilize in making findings',[513] and, on appeal, we 'will not interfere lightly with a panel's exercise of its discretion'.[514]"[515]

346. The Appellate Body on *US – Carbon Steel*, further underlined that "although panels enjoy a *discretion*, pursuant to Article 13 of the DSU,[516] to seek information 'from any relevant source', Article 11 of the DSU imposes no *obligation* on panels to conduct their own fact-finding exercise, or to fill in gaps in the arguments made by parties."[517]

347. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body ruled that it is not "an error, let alone an egregious error", for a panel to decline to accord to the evidence the weight that one of the parties sought to have accorded to it.[518] In this regard, see paragraph 354 below. Specifically, India had argued that the Panel had not made an objective assessment of the facts of the case because the Panel had distorted the evidence by placing greater weight on the statements made by the European Communities than on those made by India. The Appellate Body stressed that "the weighing of the evidence is within the discretion of the Panel as the trier of facts, and there is no indication in this case that the Panel exceeded the bounds of this discretion".[519]

348. The Appellate Body on *Japan – Apples* considered that a panel was not obliged to give precedence to the *importing* Member's approach to scientific evidence and risk over the views of the experts when analysing and assessing scientific evidence to determine whether a complainant established a prima facie case under Article 2.2.[520] As regards the examination of scientific evidence by panels in SPS disputes, see Section III.B.(c) of the Chapter on the *SPS Agreement*. In addition, the Appellate Body summarized its previous jurisprudence

[509] (*footnote original*) *Korea – Taxes on Alcoholic Beverages*, Panel Report, WT/DS75/R–WT/DS84/R, adopted 17 February 1999, para. 10.23 (issue not raised on appeal). This is unlike the situation before many international tribunals, which often refuse to admit evidence obtained during settlement negotiations between the parties to a dispute. The circumstances of such settlement negotiations are clearly different from WTO dispute settlement consultations, which are, as the Appellate Body has noted, part of the means by which facts are clarified before a panel proceeding.

[510] Panel Report on *EC – Bed Linen*, paras. 6.32–6.35.

[515] Appellate Body Report on *US – Carbon Steel*, para. 142.

[516] (*footnote original*) As we have stated, "[T]his is a grant of discretionary authority: a panel is not duty-bound to seek information in each and every case or to consult particular experts under this provision." (Appellate Body Report, *Argentina – Textiles and Apparel*, para. 84.)

[517] Appellate Body Report on *US – Carbon Steel*, para. 153.

[518] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 177.

[519] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 181.

[520] Appellate Body Report on *Japan – Apples*, paras. 165–166.

on the panels' discretion as trier and weigher of the evidence:

"Since *EC – Hormones*, the Appellate Body has consistently emphasized that, within the bounds of their obligation under Article 11 to make an objective assessment of the facts of the case, panels enjoy a 'margin of discretion' as triers of fact.[521] Panels are thus 'not required to accord to factual evidence of the parties the same meaning and weight as do the parties'[522] and may properly 'determine that certain elements of evidence should be accorded more weight than other elements'.[523]

Consistent with this margin of discretion, the Appellate Body has recognized that 'not every error in the appreciation of the evidence (although it may give rise to a question of law) may be characterized as a failure to make an objective assessment of the facts.'[524] When addressing claims under Article 11 of the DSU, the Appellate Body does not 'second-guess the Panel in appreciating either the evidentiary value of . . . studies or the consequences, if any, of alleged defects in [the evidence]'.[525] Indeed:

> '[i]n assessing the panel's appreciation of the evidence, we cannot base a finding of inconsistency under Article 11 simply on the conclusion that we might have reached a different factual finding from the one the panel reached. Rather, we must be satisfied that the panel has exceeded the bounds of its discretion, as the trier of facts, in its appreciation of the evidence.'[526]

Where parties challenging a panel's fact-finding under Article 11 have failed to establish that a panel exceeded the bounds of its discretion as the trier of facts, the Appellate Body has not 'interfere[d]' with the findings of the panel.[527]"[528]

349. In *US – Wheat Exports and Grain Imports*, the Appellate Body, referring to its prior jurisprudence, ruled that the Panel's decision not to rely on some of the facts submitted by one of the parties "would not, by itself, constitute legal error":

"As we said earlier,[529] the Appellate Body has previously held that 'it is generally within the discretion of the Panel to decide which evidence it chooses to utilize in making findings'.[530] Accordingly, the Panel's decision not to rely on some of the facts that the United States claims to have submitted would not, by itself, constitute legal error. To succeed in its claim that the Panel disregarded the evidence submitted to it, the United States would have to demonstrate that the Panel exceeded its discretion and that the Panel made, in effect, an 'egregious error'[531]"[532]

(iii) Egregious error calling into question the good faith of a panel

350. In *EC – Hormones*, the European Communities argued in its appeal that the Panel had disregarded or distorted the evidence submitted by the European Communities as well as the testimony provided by the experts advising the Panel. The European Communities claimed that the Panel had failed to make an objective assessment of the facts as required by Article 11 of the *DSU*. The Appellate Body disagreed with the European Communities and set forth the standard, for a violation of Article 11, as "an egregious error that calls into question the good faith of a panel". The Appellate Body concluded by holding that "[a] claim that a panel disregarded or distorted the evidence submitted to it is, in effect, a claim that the panel, to a greater or lesser degree, denied the party submitting the evidence fundamental fairness, or what in many jurisdictions is known as due process of law or natural justice":

"Whether or not a panel has made an objective assessment of the facts before it, as required by Article 11 of the DSU, is also a legal question which, if properly raised on appeal, would fall within the scope of appellate review.

The question which then arises is this: when may a panel be regarded as having failed to discharge its duty under Article 11 of the DSU to make an objective assessment of the facts before it? Clearly, not every error in the appreciation of the evidence (although it may give rise to

[530] (*footnote original*) Appellate Body Report, *EC – Hormones*, para. 135. The Appellate Body further observed that "The Panel cannot realistically refer to all statements made by the experts advising it and should be allowed a substantial margin of discretion as to which statements are useful to refer to explicitly." (Appellate Body Report, *EC – Hormones*, para. 138.)

[531] (*footnote original*) Appellate Body Report, *EC – Hormones*, para. 133; Appellate Body Report, *EC – Bed Linen (Article 21.5 – India)*, para. 177.

[532] Appellate Body Report on *US – Wheat Exports and Grain Imports*, para. 186.

a question of law) may be characterized as a failure to make an objective assessment of the facts. In the present appeal, the European Communities repeatedly claims that the Panel disregarded or distorted or misrepresented the evidence submitted by the European Communities and even the opinions expressed by the Panel's own expert advisors. The duty to make an objective assessment of the facts is, among other things, an obligation to consider the evidence presented to a panel and to make factual findings on the basis of that evidence. The deliberate disregard of, or refusal to consider, the evidence submitted to a panel is incompatible with a panel's duty to make an objective assessment of the facts. The wilful distortion or misrepresentation of the evidence put before a panel is similarly inconsistent with an objective assessment of the facts. 'Disregard' and 'distortion' and 'misrepresentation' of the evidence, in their ordinary signification in judicial and quasi-judicial processes, imply not simply an error of judgment in the appreciation of evidence but rather an egregious error that calls into question the good faith of a panel. A claim that a panel disregarded or distorted the evidence submitted to it is, in effect, a claim that the panel, to a greater or lesser degree, denied the party submitting the evidence fundamental fairness, or what in many jurisdictions is known as due process of law or natural justice.

. . .

[I]t is generally within the discretion of the Panel to decide which evidence it chooses to utilize in making findings.

. . .

The Panel cannot realistically refer to all statements made by the experts advising it and should be allowed a substantial margin of discretion as to which statements are useful to refer to explicitly."[533]

351. In *Australia – Salmon*, Australia argued in its appeal that the Panel had failed to make an objective assessment of the matter before it and had not applied the appropriate standard of review pursuant to Article 11 of the *DSU*. The Appellate Body noted Australia's argument that the Panel "partially or wholly ignored relevant evidence placed before it, or misrepresented evidence in a way that went beyond a mere question of the weight attributed to it, but constituted an egregious error amounting to an error of law". The Appellate Body stated:

"[I]n response to Australia's contention that the Panel failed to accord 'due deference' to matters of fact it put forward, we note that Article 11 of the DSU calls upon panels to 'make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements'. Therefore, the function of this Panel was to assess the facts in a manner consistent with its obligation to make such an 'objective assessment of the matter before it'. We believe the Panel has done so in this case. Panels, however, are not required to accord to factual evidence of the parties the same meaning and weight as do the parties."[534]

352. In *Korea – Alcoholic Beverages*, Korea argued in its appeal that the Panel had breached its obligation under Article 11 of the *DSU* by applying a "double standard" in assessing the evidence before it. The Appellate Body again referred to the "egregious error" standard:

"We are bound to conclude that Korea has not succeeded in showing that the Panel has committed any egregious errors that can be characterized as a failure to make an objective assessment of the matter before it. Korea's arguments, when read together with the Panel Report and the record of the Panel proceedings, do not disclose that the Panel has distorted, misrepresented or disregarded evidence, or has applied a 'double standard' of proof in this case. It is not an error, let alone an egregious error, for the Panel to fail to accord the weight to the evidence that one of the parties believes should be accorded to it."[535]

353. In *Japan – Agricultural Products II*, the Appellate Body examined Japan's claim that the Panel had not complied with Article 11 of the *DSU* when it made a finding under Article 2.2 of the *SPS Agreement* concerning the varietal testing requirement as it applies to apples, cherries, nectarines and walnuts. More specifically, Japan claimed the Panel had not properly examined evidence, had treated expert views in an arbitrary manner and had not properly evaluated the evidence before it. The Appellate Body referred to its previous decision in *EC – Hormones* and reiterated that "[o]nly egregious errors constitute a failure to make an objective assessment of the facts as required by Article 11 of the DSU":

"As we stated in our Report in *European Communities – Hormones*, not every failure by the Panel in the appreciation of the evidence before it can be characterized as failure to make an objective assessment of the facts as required by Article 11 of the DSU. Only egregious errors constitute a failure to make an objective assessment of the facts as required by Article 11 of the DSU.

In our view, Japan has not demonstrated that the Panel, in its examination of the consistency of the varietal testing requirement with Article 2.2, has made errors of the gravity required to find a violation of Article 11 of the DSU. We, therefore, conclude that the Panel did not

[533] Appellate Body Report on *EC – Hormones*, paras. 132–133, 135 and 138. See also Appellate Body Report on *Japan – Apples*, para. 222.
[534] Appellate Body Report on *Australia – Salmon*, para. 267.
[535] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 164.

abuse its discretion contrary to the requirements of Article 11 of the DSU."[536]

354. In *EC – Bed Linen (Article 21.5 – India)*, India claimed in appeal that the Panel had failed to meet its obligation under Article 11 of the *DSU* to examine the facts of the case objectively. The Appellate Body ruled that it is not "an error, let alone an egregious error", for a panel to decline to accord to the evidence the weight that one of the parties sought to have accorded to it.

"India has not persuaded us that the Panel in this case exceeded its discretion as the trier of facts. In our view, the Panel assessed and weighed the evidence submitted by both parties, and ultimately concluded that the European Communities had information on all relevant economic factors listed in Article 3.4. It is not 'an error, let alone an egregious error',[537] for the Panel to have declined to accord to the evidence the weight that India sought to have accorded to it. We, therefore, reject India's argument that, by failing to *shift* the burden of proof, the Panel did not properly discharge its duty to assess objectively the facts of the case as required by Article 11 of the DSU."[538]

(b) Municipal law

355. In response to India's assertion that municipal law is a fact that must be established before an international tribunal by the party relying on it and that the Panel should have sought guidance from India on matters relating to the interpretation of Indian law, the Appellate Body in *India – Patents (US)* stated:

"In public international law, an international tribunal may treat municipal law in several ways. Municipal law may serve as evidence of facts and may provide evidence of state practice. However, municipal law may also constitute evidence of compliance or non-compliance with international obligations. For example, in *Certain German Interests in Polish Upper Silesia*, the Permanent Court of International Justice observed:

> 'It might be asked whether a difficulty does not arise from the fact that the Court would have to deal with the Polish law of July 14th, 1920. This, however, does not appear to be the case. From the standpoint of International Law and of the Court which is its organ, municipal laws are merely facts which express the will and constitute the activities of States, in the same manner as do legal decisions and administrative measures. *The Court is certainly not called upon to interpret the Polish law as such; but there is nothing to prevent the Court's giving judgment on the question whether or not, in applying that law, Poland is acting in conformity with its obligations towards Germany under the Geneva Convention.*'[539] (emphasis added)

. . . It is clear that an examination of the relevant aspects of Indian municipal law and, in particular, the relevant provisions of the Patents Act as they relate to the 'administrative instructions', is essential to determining whether India has complied with its obligations under Article 70.8(a). There was simply no way for the Panel to make this determination without engaging in an examination of Indian law. But, as in the case cited above before the Permanent Court of International Justice, in this case, the Panel was not interpreting Indian law 'as such'; rather, the Panel was examining Indian law solely for the purpose of determining whether India had met its obligations under the *TRIPS Agreement*. To say that the Panel should have done otherwise would be to say that only India can assess whether Indian law is consistent with India's obligations under the *WTO Agreement*. This, clearly, cannot be so.

Previous GATT/WTO panels also have conducted a detailed examination of the domestic law of a Member in assessing the conformity of that domestic law with the relevant GATT/WTO obligations. For example, in *United States – Section 337 of the Tariff Act of 1930*, the panel conducted a detailed examination of the relevant United States' legislation and practice, including the remedies available under Section 337 as well as the differences between patent-based Section 337 proceedings and federal district court proceedings, in order to determine whether Section 337 was inconsistent with Article III:4 of the GATT 1947. This seems to us to be a comparable case."[540]

356. In connection with the examination of Sections 301–310 of the US Trade Act of 1974, the Panel in *US – Section 301 Trade Act* stated that it would not "interpret US law 'as such', the way we would, say, interpret provisions of the covered agreements". Rather, the Panel held that it was instead "called upon to establish the meaning of Sections 301–310 as factual elements":

"Our mandate is to examine Sections 301–310 solely for the purpose of determining whether the US meets its WTO obligations. In doing so, we do not, as noted by the Appellate Body in *India – Patents (US)*, interpret US law 'as such', the way we would, say, interpret provisions of the covered agreements. We are, instead, called upon to establish the meaning of Sections 301–310 as factual elements and to check whether these factual elements constitute conduct by the US contrary to its WTO obligations. The rules on burden of proof for the establishment of facts referred to above also apply in this respect.[541]

. . .

[538] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 177.
[539] (*footnote original*) [1926], PCIJ Rep., Series A, No. 7, p. 19.
[540] Appellate Body Report on *India – Patents (US)*, paras. 65–67.
[541] (*footnote original*) In this respect, the International Court of Justice ("ICJ"), referring to an earlier judgment by the Permanent Court of International Justice ("PCIJ") noted the

> We note, finally, that terms used both in Sections 301–310 and in WTO provisions, do not necessarily have the same meaning. For example, the word 'determination' need not always have the same meaning in Sections 304 and 306 as it has in Article 23.2(a) of the DSU. Thus, conduct not meeting, say, the threshold of a 'determination' under Sections 304 and 306, is not by this fact alone precluded from meeting the threshold of a 'determination' under Article 23.2(a) of the DSU. By contrast, the fact that a certain act is characterized as a 'determination' under domestic legislation, does not necessarily mean that it must be construed as a determination under the covered agreements."[542]

357. In *Brazil – Aircraft (Article 21.5 – Canada)*, the Appellate Body, upholding the Panel, stressed that a WTO Member's domestic law does not excuse that Member from fulfilling its international obligations:

> "We note Brazil's argument before the Article 21.5 Panel that Brazil has a contractual obligation under domestic law to issue PROEX bonds pursuant to commitments that have already been made, and that Brazil could be liable for damages for breach of contract under Brazilian law if it failed to respect its contractual obligations.[543] In response to a question from us at the oral hearing, however, Brazil conceded that a WTO Member's domestic law does not excuse that Member from fulfilling its international obligations. Like the Article 21.5 Panel,[544] we do not consider that any private contractual obligations, which Brazil may have under its domestic law, are relevant to the issue of whether the DSB's recommendation to 'withdraw' the prohibited export subsidies permits the continued issuance of NTN-I bonds under letters of commitment issued before 18 November 1999."[545]

358. In *US – 1916 Act (EC)*, in connection with the examination of the 1916 Act, the European Communities argued that the Panel should not be influenced by the terms used by the United States courts whereas the United States argued that "the proper interpretation of the 1916 Act is a question of fact to be established, as it is an accepted principle of international law that municipal law is a fact to be proven before international tribunals".[546] Referring to paragraph 66 of the Appellate Body Report in *India – Patents (US)*, the Panel stated:

> "[O]ur understanding of the term 'examination' as used by the Appellate Body is that panels need not accept at face value the characterisation that the respondent attaches to its law. A panel may analyse the operation of the domestic legislation and determine whether the description of the functioning of the law, as made by the respondent, is consistent with the legal structure of that Member. This way, it will be able to determine whether or not the law as applied is in conformity with the obligations of the Member concerned under the WTO Agreement.[547]"[548]

359. The Panel on *US – 1916 Act (EC)* then noted that both complaining parties and the defending party relied on United States court cases in their claims. In connection with the consideration of the case law relating to the 1916 Act, the Panel stated:

> "We recall that the International Court of Justice, in the *Elettronica Sicula S.p.A (ELSI)* case, referred to the judgement of the Permanent Court of International Justice in the *Brazilian Loans* case – to which the United States also refers in its submissions – and noted that:
>
> > 'Where the determination of a question of municipal law is essential to the Court's decision in a case, the Court will have to weigh the jurisprudence of the municipal courts, and 'If this is uncertain or divided, it will rest with the Court to select the interpretation which it considers most in conformity with the law' (*Brazilian Loans*, PCIJ, Series A, Nos. 20/21, p. 124).'[549]
>
> We are fully aware that our role is to clarify the existing provisions of the covered agreements so as to determine the compatibility of a domestic law with those agreements. We are also aware that, in the *Brazilian Loans* case, the PCIJ was asked to apply domestic legislation to a given case. We are nevertheless of the view that there is nothing in the text of the DSU, nor in the practice of the Appellate Body, that prevents us from 'weigh[ing] the jurisprudence of municipal [US] courts' if it is 'uncertain or divided'. This would not require us to develop our own independent interpretation of US law, but simply to select among the relevant judgements the interpretation

---

following: "Where the determination of a question of municipal law is essential to the Court's decision in a case, the Court will have to weigh the jurisprudence of the municipal courts, and 'If this is uncertain or divided, it will rest with the Court to select the interpretation which it considers most in conformity with the law' (*Brazilian Loans*, PCIJ, Series A, Nos. 20/21, p. 124)" (*Elettronica Sicula S.p.A. (ELSI)*, Judgment, ICJ Reports 1989, p. 47, para. 62).

546 Panel Report on *US – 1916 Act (EC)*, para. 6.46.

547 (*footnote original*) This is evidenced by the examples used by the Appellate Body (*ibid.*, para. 67):

> "Previous GATT/WTO panels also have conducted a detailed examination of the domestic law of a Member in assessing the conformity of that domestic law with the relevant GATT/WTO obligations. For example, in *United States – Section 337 of the Tariff Act of 1930* [footnote omitted], the panel conducted a detailed examination of the relevant United States' legislation and practice, including the remedies available under Section 337 as well as the difference between patent-based Section 337 proceedings and federal district court proceedings, in order to determine whether Section 337 was inconsistent with Article III:4 of the GATT 1947."

most in conformity with the US law, as necessary in order to resolve the matter before us.[550]"[551]

360. The Panel on *US – 1916 Act (EC)* also examined the legislative history to determine the intent of Congress to assist their understanding of the actual scope and operation of the 1916 Act. In so doing, the Panel considered public declarations of various United States officials and stated:

"[W]e should determine whether they could actually generate legal obligations for the United States under international law. For instance, since they are subsequent to the notification by the United States of its 'grandfathered' legislation under the GATT 1947, it might be argued that they implicitly modified that notification by stating that the 1916 Act was 'grandfathered'. We recall that the International Court of Justice has developed, *inter alia* in its judgement in the *Nuclear tests* case,[552] criteria on when a statement by a representative of a State could generate international obligations for that State. In the present case, we are reluctant to consider the statements made by senior US officials in testimonies or letters to the US Congress or to members thereof as generating international obligations for the United States. First, we recall that the constitution of the United States provides for a strict separation of the judicial and executive branches. With the exception of criminal prosecutions, the application of the 1916 Act falls within the exclusive responsibility of the federal courts. Under those circumstances, a statement by the executive branch of government in a domestic forum can only be of limited value. Second, with the possible exception of the statement of US Trade Representative Clayton Yeutter, they were not made at a sufficiently high level compared with the statements considered by the International Court of Justice in the *Nuclear Tests* case, where essentially declarations by a head of State and of members of the French government were at issue. Moreover, the statements referred to in the present case were not directly addressed to the general public. Finally, they were not made on behalf of the United States, but – at best – on behalf of the executive branch of government. This aspect would not be essential if the statements had been made in an international forum, where the executive branch represents the State.[553] However, in the present case, the statements were addressed to the US legislative branch. Therefore, we cannot consider them as creating obligations for the United States under international law."[554]

361. In *US – Shrimp (Article 21.5 – Malaysia)*, the Panel had examined the United States municipal law at issue taking into account the status of such law at the time of its review. Malaysia wanted the Panel to take into account a CTI ruling (*Turtle Island*) which was still declaratory. The Appellate Body agreed with the Panel and considered that it would have been an exercise in speculation on the part of the Panel to predict either when or how that case might be concluded, or to assume that injunctive relief ultimately would be granted and that the United States Court of Appeals or the Supreme Court of the United States eventually would compel the Department of State to modify the Revised Guidelines. The Appellate Body insisted that "the Panel was correct not to indulge in such speculation, which would have been contrary to the duty of the Panel, under Article 11 of the DSU, to make 'an objective assessment of the matter . . . including an objective assessment of the facts of the case'".[555]

362. The Appellate Body on *US – Hot-Rolled Steel* stressed that, "[a]lthough it is not the role of panels or the Appellate Body to interpret a Member's domestic legislation as such, it is permissible, indeed essential, to conduct a detailed examination of that legislation in assessing its consistency with WTO law.[556]"[557]

363. In *US – Section 211 Appropriations Act*, the Appellate Body stressed that "municipal law of WTO Members may serve not only as evidence of facts, but also as evidence of compliance or non-compliance with international obligations":

"Our rulings in these previous appeals are clear: the municipal law of WTO Members may serve not only as evidence of facts, but also as evidence of compliance or non-compliance with international obligations. Under the DSU, a panel may examine the municipal law of a WTO Member for the purpose of determining whether that Member has complied with its obligations under the *WTO Agreement*. Such an assessment is a legal characterization by a panel. And, therefore, a panel's assessment of municipal law as to its consistency with WTO obligations is subject to appellate review under Article 17.6 of the DSU.

---

[550] (*footnote original*) We do not consider that this would be engaging in *interpreting* US law, with the risks highlighted by the United States in its submissions. Our approach is in line with the reasoning of the PCIJ in the *Brazilian Loans* case, which, even though it had to apply domestic law, was prudent in its approach to the domestic case-law:

"It follows that the Court must pay the utmost regard to the decisions of the municipal courts of a country, for it is with the aid of their jurisprudence that it will be enabled to decide what are the rules which, in actual fact, are applied in the country the law of which is recognized as applicable in a given case." (PCIJ, Series A, Nos. 20/21, p. 124)

[557] Appellate Body Report on *US – 1916 Act (EC)*, para. 200.

> To address the legal issues raised in this appeal, we must, therefore, necessarily examine the Panel's interpretation of the meaning of Section 211 under United States law. An assessment of the consistency of Section 211 with the Articles of the *TRIPS Agreement* and of the Paris Convention (1967) that have been invoked by the European Communities necessarily requires a review of the Panel's examination of the meaning of Section 211. Likewise, that assessment necessarily requires a review also of the Panel's examination of the meaning of both the CACR and the Lanham Act, to the extent that they are relevant for assessing the meaning of Section 211. This is an interpretation of the meaning of Section 211 solely for the purpose of determining whether the United States has fulfilled its obligations under the *TRIPS Agreement*. The meaning given by the Panel to Section 211 is, thus, clearly within the scope of our review as set out in Article 17.6 of the DSU."[558]

364. In *US – Softwood Lumber IV*, the Appellate Body indicated the following:

> "[W]e observe that the arguments put forward by Canada relating to the nature of 'personal property', raise issues concerning the relevance, for WTO dispute settlement, of the way in which the municipal law of a WTO Member classifies or regulates things or transactions. Previous Appellate Body Reports confirm that an examination of municipal law or particular transactions governed by it might be relevant, as evidence, in ascertaining whether a financial contribution exists.[559] However, municipal laws – in particular those relating to property – vary amongst WTO Members. Clearly, it would be inappropriate to characterize, for purposes of applying any provisions of the WTO covered agreements, the same thing or transaction differently, depending on its legal categorization within the jurisdictions of different Members. Accordingly, we emphasize that municipal law classifications are not determinative of the issues raised in this appeal."[560]

(c) Drawing adverse inferences

365. In *Canada – Aircraft*, the Appellate Body addressed the issue whether panels have the authority to draw adverse inferences from a party's refusal to provide information. In this dispute, Canada refused to provide Brazil, during consultations, with information on the financing activities of a particular agency, such information being subsequently also requested by the Panel. On appeal, Brazil submitted that the Panel erred by not drawing the inference that the information withheld by Canada was adverse to Canada and supportive of Brazil's claim that the agency's debt financing was a prohibited export subsidy under Article 3.1(a) of the *SCM Agreement*. The Appellate Body held that it is within the discretion of panels to draw adverse inferences and that in this particular case the Panel, in deciding not to draw adverse inferences, had not abused this discretion inconsistently with the provisions of the *DSU*:

> "There is no logical reason why the Members of the WTO would, in conceiving and concluding the *SCM Agreement*, have granted panels the authority to draw inferences in cases involving actionable subsidies that *may* be illegal *if* they have certain trade effects, but not in cases that involve prohibited export subsidies for which the adverse effects are presumed. To the contrary, the appropriate inference is that the authority to draw adverse inferences from a Member's refusal to provide information belongs *a fortiori* also to panels examining claims of prohibited export subsidies. Indeed, that authority seems to us an ordinary aspect of the task of all panels to determine the relevant facts of any dispute involving any covered agreement: a view supported by the general practice and usage of international tribunals.
>
> Clearly, in our view, the Panel had the legal authority and the discretion to draw inferences from the facts before it – including the fact that Canada had refused to provide information sought by the Panel.
>
> . . .
>
> Yet, we do not believe that the record provides a sufficient basis for us to hold that the Panel erred in law, or abused its discretionary authority, in concluding that Brazil had not done enough to compel the Panel to make the inferences requested by Brazil. For this reason, we let the Panel's finding of *not proven* remain, and we decline Brazil's appeal on this issue."[561]

366. In *US – Wheat Gluten*, the European Communities argued, *inter alia*, that the Panel had failed to "draw the necessary adverse inferences from the United States' refusal to submit . . . requested information"; the European Communities claimed that this failure was an error of law and that the Panel consequently had violated Article 11 of the *DSU*. The Appellate Body declined this ground of the appeal; in its analysis, it noted that generally "the appellant should [when alleging that a panel should have drawn adverse inferences], at least: identify the facts on the record from which the

---

[558] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 105–106.

[559] (*footnote original*) In *US – FSC*, for example, a consideration of the meaning of United States tax law was required to determine whether the taxation measure at issue in those proceedings represented the foregoing of "revenue that is otherwise due", as contemplated by Article 1.1(a)(1)(ii) of the *SCM Agreement*. (Appellate Body Report, *US – FSC*, para. 90.) We recall as well that, in *India – Patents (US)*, the Appellate Body observed that panels must often complete a detailed examination of the relevant aspects of a Member's domestic law to determine whether a situation regulated by the covered agreements exists. (Appellate Body Report, *India – Patents (US)*, paras. 65–71.) See also Appellate Body Report, *US – Section 211 Appropriations Act*, paras. 103–106.

[560] Appellate Body Report on *US – Softwood Lumber IV*, para. 56.

[561] Appellate Body Report on *Canada – Aircraft*, paras. 202–203 and 205. With respect to the drawing of adverse inferences under the SCM Agreement, see also Annex V in the Chapter on *SCM Agreement*.

Panel should have drawn inferences; indicate the factual or legal inferences that the panel should have drawn from those facts; and, finally, explain why the failure of the panel to exercise its discretion by drawing these inferences amounts to an error of law under Article 11 of the DSU".

> "We . . . characterized the drawing of inferences as a 'discretionary' task falling within a panel's duties under Article 11 of the DSU. In *Canada – Aircraft*, which involved a similar factual situation, the panel did not draw any inferences 'adverse' to Canada's position. On appeal, we held that there was no basis to find that the panel had improperly exercised its discretion since 'the full *ensemble* of the facts on the record' supported the panel's conclusion.[562]
>
> In its appeal, the European Communities places considerable emphasis on the failure of the Panel to draw 'adverse' inferences from the refusal of the United States to provide information requested by the Panel. As we emphasized in *Canada – Aircraft*, under Article 11 of the DSU, a panel must draw inferences on the basis of *all of the facts of record* relevant to the particular determination to be made.[563] Where a party refuses to provide information requested by a panel under Article 13.1 of the DSU, that refusal will be one of the relevant facts of record, and indeed an important fact, to be taken into account in determining the appropriate inference to be drawn. However, if a panel were to ignore or disregard other relevant facts, it would fail to make an 'objective assessment' under Article 11 of the DSU. In this case, as the Panel observed, there *were* other facts of record that the Panel was required to include in its 'objective assessment'. Accordingly, we reject the European Communities' arguments to the extent that they suggest that the Panel erred in not drawing 'adverse' inferences simply from the refusal of the United States to provide certain information requested from it by the Panel under Article 13.1 of the DSU.
>
> In reviewing the inferences the Panel drew from the facts of record, our task on appeal is not to redo afresh the Panel's assessment of those facts, and decide for ourselves what inferences we would draw from them. Rather, we must determine whether the Panel improperly exercised its discretion, under Article 11, by failing to draw certain inferences from the facts before it. In asking us to conduct such a review, an appellant must indicate clearly the manner in which a panel has improperly exercised its discretion. Taking into account the full *ensemble* of the facts, the appellant should, at least: identify the facts on the record from which the Panel should have drawn inferences; indicate the factual or legal inferences that the panel should have drawn from those facts; and, finally, explain why the failure of the panel to exercise its discretion by drawing these inferences amounts to an error of law under Article 11 of the DSU.
>
> In this appeal, the European Communities makes, what we regard to be, broad and general statements that the Panel erred by not drawing 'adverse' inferences from the facts. Besides the fact that the United States refused to provide certain information requested by the Panel under Article 13.1 of the DSU, the European Communities does not identify, in any specific manner, *which facts* supported a particular inference. Nor does the European Communities identify *what inferences* the Panel should have drawn from those facts, other than that the inferences should have been favourable to the European Communities. Besides the simple refusal of the United States to provide information requested by the Panel, which we have already addressed, the European Communities does not offer any other specific reasons why the Panel's failure to exercise its discretion by drawing the inferences identified by the European Communities amounts to an error of law under Article 11 of the DSU. Therefore, we decline this ground of appeal."[564]

(d) Timing of submission of evidence

367. In *Argentina – Textiles and Apparel*, Argentina argued that the Panel had acted inconsistently with Article 11 of the *DSU* by allowing certain evidence offered by the United States two days before the second substantive meeting of the Panel with the parties. The Appellate Body noted that "the Working Procedures in their present form do not constrain panels with hard and fast rules on deadlines for submitting evidence" and, accordingly, did not find a violation of Article 11:

> "Article 11 of the DSU does not establish time limits for the submission of evidence to a panel. Article 12.1 of the DSU directs a panel to follow the Working Procedures set out in Appendix 3 of the DSU, but at the same time authorizes a panel to do otherwise after consulting the parties to the dispute. The Working Procedures in Appendix 3 also do not establish precise deadlines for the presentation of evidence by a party to the dispute.[565] It is true that the Working Procedures 'do not prohibit' submission of additional evidence after the first substantive meeting of a panel with the parties. It is also true, however, that the Working Procedures in Appendix 3 do contemplate two distinguishable stages in a proceeding before a panel. . . .

---

[562] (*footnote original*) Appellate Body Report on *Canada – Aircraft*, paras. 204 and 205.

[563] (*footnote original*) Appellate Body Report on *Canada – Aircraft*, paras. 204 and 205.

[564] Appellate Body Report on *US – Wheat Gluten*, paras. 173–176.

[565] (*footnote original*) As we have observed in two previous Appellate Body Reports, we believe that detailed, standard working procedures for panels would help to ensure due process and fairness in panel proceedings. See *European Communities – Regime for the Importation, Sale and Distribution of Bananas*, adopted 25 September 1997, WT/DS27/AB/R, para. 144; *India – Patent Protection for Pharmaceutical and Agricultural Chemical Products*, adopted 16 January 1998, WT/DS50/AB/R, para. 95.

Under the Working Procedures in Appendix 3, the complaining party should set out its case in chief, including a full presentation of the facts on the basis of submission of supporting evidence, during the first stage. The second stage is generally designed to permit 'rebuttals' by each party of the arguments and evidence submitted by the other parties.

As noted above, however, the Working Procedures in their present form do not constrain panels with hard and fast rules on deadlines for submitting evidence. The Panel could have refused to admit the additional documentary evidence of the United States as unseasonably submitted. The Panel chose, instead, to admit that evidence, at the same time allowing Argentina two weeks to respond to it. Argentina drew attention to the difficulties it would face in tracing and verifying the manually processed customs documents and in responding to them, since identifying names, customs identification numbers and, in some cases, descriptions of the products had been blacked out. The Panel could well have granted Argentina more than two weeks to respond to the additional evidence. However, there is no indication in the panel record that Argentina explicitly requested from the Panel, at that time or at any later time, a longer period within which to respond to the additional documentary evidence of the United States. Argentina also did not submit any countering documents or comments in respect of any of the additional documents of the United States.

[W]hile another panel could well have exercised its discretion differently, we do not believe that the Panel here committed an abuse of discretion amounting to a failure to render an objective assessment of the matter as mandated by Article 11 of the DSU."[566]

368. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling rejecting certain evidence submitted by the European Communities after the second substantive meeting. Korea alleged that its rights of defence had been violated by the late submission of such evidence:

"Korea complains that its rights of defence were violated by the late submission of a market study (the Trendscope survey) by the European Communities. Korea had submitted a study done by the AC Nielsen Company as part of its responses to questions arising from the first substantive meeting of the Panel. The European Communities responded to this with, among other things, the Trendscope survey presented at the Second Meeting of the Panel. The Panel gave Korea a week to respond to this and critique the results, methodology and questions used in the Trendscope survey. Korea argues that this time was insufficient, that it did not have copies in Korean of all the questions asked, and that it did not have time to provide further questions or comments based upon the answers.

We do not consider that Korea's rights under the DSU were violated. The European Communities submitted its rebuttal survey at the next available opportunity after receiving Korea's Nielsen survey. Had Korea chosen to submit its survey at the first substantive meeting and the European Communities failed to respond at the next opportunity (in such a case, it would have been in the rebuttal submission), there obviously would have been more merit to the claim because then the European Communities, it could have been argued, delayed submitting their evidence. As it transpired, the European Communities submitted a new piece of evidence at the next available opportunity which Korea then was able to examine for a week in order to provide comments. The survey was not of a particularly complex type and, in our view, Korea had adequate time to respond given the nature of the evidence. The Trendscope survey is not critical evidence to the complainants' case; it serves as a supplement to arguments already made. If we considered that it represented critical evidence, Korea's request for further time for comment would have been given greater weight. While all parties to litigation might prefer open-ended potential for rebutting the other side's submissions, we believe that for practical reasons submissions must be cut-off at some point and such a point was reached in this case. Thus, neither the timing nor the importance of the evidence in question support a finding that Korea's rights have been violated in this instance."[567]

369. In *Canada – Aircraft*, Canada requested the Panel to issue a preliminary ruling on the question of whether the complaining party may adduce new evidence or allegations after the end of the first substantive meeting. Canada argued that it would suffer prejudice under the accelerated procedure under Article 4 of the *SCM Agreement* as a result of the late submission of allegations or evidence. The Panel, in a finding not addressed by the Appellate Body, ruled that it was not bound to exclude the submission of new allegations after the first substantive meeting and that it could not see any legal basis for so doing:

"[A]n absolute rule excluding the submission of evidence by a complaining party after the first substantive meeting would be inappropriate, since there may be circumstances in which a complaining party is required to adduce new evidence in order to address rebuttal arguments made by the respondent. Furthermore, there may be instances, as in the present case,[568] where a party is required to submit new evidence at the request of the panel. For these

[566] Appellate Body Report on *Argentina – Textiles and Apparel*, paras. 79–81.

[567] Panel Report on *Korea – Alcoholic Beverages*, paras. 5.24–5.25.

[568] (*footnote original*) At the time of the second substantive meeting, we asked the parties a series of questions that could have led to the submission of new evidence or arguments. In order to ensure due process, we allowed each party 18 days (*i.e.*, equivalent to the time between the deadline for the respondent's first submission and the deadline for rebuttal submissions) in which to comment on any new evidence or arguments adduced by the other party in response to our questions.

reasons, we rejected Canada's request for a preliminary ruling that the Panel should not accept new evidence submitted by Brazil after the first substantive meeting.

[W]e are not bound to exclude the submission of new allegations after the first substantive meeting. We can see nothing in the DSU, or in the Appendix 3 Working Procedures, that would require the submission of new allegations to be treated any differently than the submission of new evidence. Indeed, one could envisage situations in which the respondent might present information to a panel during the first substantive meeting that could reasonably be used as a basis for a new allegation by the complaining party. Provided the new allegation falls within the panel's terms of reference, and provided the respondent party's due process rights of defence are respected, we can see no reason why any such new allegation should necessarily be rejected by the panel as a matter of course, simply because it is submitted after the first substantive meeting with the parties. We consider that this approach is consistent with the Appellate Body's ruling in *European Communities – Bananas* that '[t]here is no requirement in the DSU or in GATT practice for arguments on all claims relating to the matter referred to the DSB to be set out in a complaining party's first written submission to the panel. It is the panel's terms of reference, governed by Article 7 of the DSU, which set out the claims of the complaining parties relating to the matter referred to the DSB.'[569]"[570]

370. In *US – Offset Act (Byrd Amendment)*, Canada asked the Panel to accept as evidence a letter which it submitted after the first substantive meeting. In spite of the United States' objections, the Panel issued a preliminary ruling accepting the evidence. The Panel noted that the letter at issue did not come into the possession of Canada until after the first substantive meeting. The Panel also noted that the information contained in the letter was in the public domain, and that the information was pertinent to the proceedings since it related to an issue which it had been asked to consider.[571]

371. In *EC – Sardines*, the Appellate Body explained that the interim review stage is not an appropriate time to introduce new evidence:

"The interim review stage is not an appropriate time to introduce new evidence. We recall that Article 15 of the DSU governs the interim review. Article 15 permits parties, during that stage of the proceedings, to submit comments on the draft report issued by the panel,[572] and to make requests 'for the panel to review precise aspects of the interim report'.[573] At that time, the panel process is all but completed; it is only – in the words of Article 15 – 'precise aspects' of the report that must be verified during the interim review. And this, in our view, cannot properly include an assessment of new and unanswered evidence. Therefore, we are of the view that the Panel acted properly in refusing to take into account the new evidence during the interim review, and did not thereby act inconsistently with Article 11 of the DSU."[574]

372. The Panel in *Japan – Apples* accepted evidence that became available only after the establishment of the Panel, as the other party had had an opportunity to comment:

"A related question is whether the Panel should consider evidence that became available only after the establishment of the Panel. Our approach in this regard should be pragmatic. Besides the situation contemplated in paragraph 11 of our Working Procedures, we decided not to reject evidence submitted by a party on which the other party had had an opportunity to comment, whether it took advantage of such an opportunity or not. This is without prejudice to the admissibility of such evidence on other grounds or the weight that we might eventually give to such evidence.

. . .

. . . We are of the view that our obligation, pursuant to Article 11 of the DSU, to make an objective assessment of the matter before us, including an objective assessment of the facts of the case, imposes on us an obligation not to exclude *a priori* any evidence submitted in due time by any party. However, the fact that we accepted the evidence at issue as a matter of principle is, as stated in the latter above, without prejudice to the weight that we will ultimately give to these exhibits in our discussion of the substance of this case. We also note that, consistent with the practice of panels, we provided Japan with the opportunity to comment on the substance of these documents."[575]

373. In *US – Steel Safeguards*, the Panel sent a letter to all parties that included a series of preliminary rul-

[569] (*footnote original*) Appellate Body Report on *EC – Bananas III*, para. 145.
[570] Panel Report on *Canada – Aircraft*, paras. 9.73–9.74.
[571] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.2.
[572] (*footnote original*) Article 15.1 of the DSU provides:

> Following the consideration of rebuttal submissions and oral arguments, the panel shall issue the descriptive (factual and argument) sections of its draft report to the parties to the dispute. Within a period of time set by the panel, the parties shall submit their comments in writing.

[573] (*footnote original*) Article 15.2 of the DSU provides:

> Following the expiration of the set period of time for receipt of comments from the parties to the dispute, the panel shall issue an interim report to the parties, including both the descriptive sections and the panel's findings and conclusions. Within a period of time set by the panel, *a party may submit a written request for the panel to review precise aspects of the interim report* prior to circulation of the final report to the Members. At the request of a party, the panel shall hold a further meeting with the parties on the issues identified in the written comments. If no comments are received from any party within the comment period, the interim report shall be considered the final panel report and circulated promptly to the Members. (emphasis added)

[574] Appellate Body Report on *EC – Sardines*, para. 301.
[575] Panel Report on *Japan – Apples*, paras. 8.49 and 8.56.

ings[576] on organizational matters. Among the issues, the Panel referred to the United States' request to replace the term "rebuttal submissions" in paragraph 11 of the Panel's Working Procedures regarding the timing of the submission of evidence, with the word "rebuttals". For the United States the word "submission" is ordinarily taken to mean written submissions and thus the reference to "rebuttal submissions" would exclude the application of that paragraph to evidence in rebuttals made orally. The complainants disagreed and argued that the suggested amendment would allow, for example, new arguments and evidence to be adduced orally at the Panel's second substantive meeting. The Panel, after referring to the Appellate Body Report on *Argentina – Textiles and Apparel* (see paragraph 367 above), redrafted paragraph 11 "to ensure due process and to ensure that new evidence is not adduced at a late stage in the panel process, while simultaneously ensuring that all parties and the Panel are fully informed of all relevant evidence".[577] The new paragraph 11 read as follows:

> "Parties shall submit all factual evidence to the Panel no later than during the first substantive meeting, except with respect to evidence necessary for purposes of rebuttal submissions, or answers to questions or provided that good cause is shown. In all cases, the other party(ies) shall be accorded a period of time for comment, as appropriate."

(e) Temporal scope of the review

374. In *US – Cotton Yarn*, the Appellate Body considered that a panel reviewing the due diligence exercised by a Member in making its determination under Article 6 of the *ATC* has to put itself in the place of that Member at the time it makes its determination and thus "must not consider evidence which did not exist *at that point in time*". In this regard, see paragraph 391 below.

(f) Evidence obtained during consultations

375. With respect to the issue of whether information obtained during consultations may be used in the subsequent panel proceedings, see paragraphs 135–136 above. See also paragraphs 342 and 344 above.

(g) Relationship with Article 13

376. As regards the panels' right to seek information, see Section XIII.B below.

4. Objective assessment of whether the investigating authority's explanation is reasoned and adequate: not a "*de novo*" review

377. In this respect, see paragraphs 381–386 below.

5. "make such other findings"

378. In *US – Wool Shirts and Blouses*, the Appellate Body relied, *inter alia*, on the phrase "make such other findings" in order to confirm the ability of panels to exercise judicial economy. See paragraph 1030 below.

379. In *Canada – Aircraft*, Canada asked the Panel to make a ruling on the Panel's jurisdiction before the deadline set for the submission of the written submission of the parties. The Panel stated:

> "In our view, there is no requirement in the DSU for panels to rule on preliminary issues prior to the parties' first written submissions. Nor is there any established practice to this effect, for there are numerous panel reports where rulings on preliminary issues have been reserved until the final report. Furthermore, there may be cases where the panel wishes to seek further clarification from the parties before providing a preliminary ruling."[578]

6. Standard of review in trade remedy cases

(a) Agreement on Safeguards

(i) Application of general standard of review under Article 11 of the DSU

380. In *US – Cotton Yarn*, the Appellate Body indicated that its Reports in *Argentina – Footwear (EC)*, *US – Lamb* and *US – Wheat Gluten* (see paragraphs 381–385 below), all concerning disputes under the *Agreement on Safeguards*, "spell out key elements of a panel's standard of review under Article 11 of the DSU in assessing whether the competent authorities complied with their obligations in making their determinations".

(ii) Objective assessment of whether the investigating authority's explanation is reasoned and adequate: not a "de novo" review

381. In *Argentina – Footwear (EC)*, Argentina argued in its appeal that the Panel correctly articulated the standard of review but alleged that the Panel erred in applying that standard of review by conducting a "*de facto de novo* review" of the findings and conclusions of the Argentine authorities. The Appellate Body rejected Argentina's argument, stating as follows:

> "We have stated, on more than one occasion, that, for all but one of the covered agreements, Article 11 of the DSU sets forth the appropriate standard of review for panels.
>
> . . .
>
> Based on our review of the Panel's reasoning, we find that the Panel correctly stated the appropriate standard

[576] For "preliminary rulings", see Section XXXVI.C.
[577] Appellate Body Report on *US – Steel Safeguards*, para. 5.3.
[578] Panel Report on *Canada – Aircraft*, para. 9.15.

of review, as set forth in Article 11 of the DSU. And, with respect to its *application* of the standard of review, we do not believe that the Panel conducted a *de novo* review of the evidence, or that it substituted its analysis and judgement for that of the Argentine authorities. Rather, the Panel examined whether, as required by Article 4 of the *Agreement on Safeguards*, the Argentine authorities had considered all the relevant facts and had adequately explained how the facts supported the determinations that were made. Indeed, far from departing from its responsibility, in our view, the Panel was simply fulfilling its responsibility under Article 11 of the DSU in taking the approach it did. To determine whether the safeguard investigation and the resulting safeguard measure applied by Argentina were consistent with Article 4 of the *Agreement on Safeguards*, the Panel was obliged, by the very terms of Article 4, to assess whether the Argentine authorities had examined all the relevant facts and had provided a reasoned explanation of how the facts supported their determination."[579]

382. In *Korea – Dairy*, the Panel considered Korea's request for the Panel not to engage in a *de novo* review of its national authorities' determination to impose a safeguard. More specifically, Korea argued that the standard of review of Article 11 implies that the function of the Panel is to assess whether Korea (i) examined the relevant facts before it at the time of the investigation; and (ii) provided an adequate explanation of how the facts before it as a whole supported the determination made. Furthermore, Korea claimed that a certain deference or latitude should be left to the national authorities in this respect. The Panel held that it could not grant "total deference" to the national authorities but agreed that it could not substitute its assessment for that of the national authority:

"We consider that for the Panel to adopt a policy of total deference to the findings of the national authorities could not ensure an 'objective assessment' as foreseen by Article 11 of the DSU. This conclusion is supported, in our view, by previous panel reports that have dealt with this issue.[580] However, we do not see our review as a substitute for the proceedings conducted by national investigating authorities. Rather, we consider that the Panel's function is to assess objectively the review conducted by the national investigating authority, in this case the KTC. For us, an objective assessment entails an examination of whether the KTC had examined all facts in its possession or which it should have obtained in accordance with Article 4.2 of the Agreement on Safeguards (including facts which might detract from an affirmative determination in accordance with the last sentence of Article 4.2 of the Agreement on Safeguards), whether adequate explanation had been provided of how the facts as a whole supported the determination made, and, consequently, whether the determination made was consistent with the international obligations of Korea."[581]

383. In *US – Lamb*, the Appellate Body held that, in considering a claim under the *Agreement on Safeguards*, a panel's objective assessment involves both a *formal* aspect (whether the competent authorities have evaluated "all relevant factors") and a *substantive* aspect (whether the competent authorities have given a reasoned and adequate explanation for their determination):

"[A]n 'objective assessment' of a claim under Article 4.2(a) of the *Agreement on Safeguards* has, in principle, two elements. First, a panel must review whether competent authorities have evaluated *all relevant factors*, and, second, a panel must review whether the authorities have provided a *reasoned and adequate explanation* of how the facts support their determination.[582] Thus, the panel's objective assessment involves a *formal* aspect and a *substantive* aspect. The formal aspect is whether the competent authorities have evaluated 'all relevant factors'. The substantive aspect is whether the competent authorities have given a reasoned and adequate explanation for their determination.

This dual character of a panel's review is mandated by the nature of the specific obligations that Article 4.2 of the *Agreement on Safeguards* imposes on competent authorities. Under Article 4.2(a), competent authorities must, as a formal matter, evaluate 'all relevant factors'. However, that evaluation is not simply a matter of form, and the list of relevant factors to be evaluated is not a mere 'check list'. Under Article 4.2(a), competent authorities must conduct a substantive evaluation of 'the "*bearing*", or the "*influence*" or "*effect*"'[583] or '*impact*' that the relevant factors have on the 'situation of [the] domestic industry'. (emphasis added) By conducting such a substantive evaluation of the relevant factors, competent authorities are able to make a proper overall determination, *inter alia*, as to whether the domestic industry is seriously injured or is threatened with such injury as defined in the Agreement."[584]

[579] Appellate Body Report on *Argentina – Footwear (EC)*, paras. 118 and 121.

[580] (*footnote original*) We recall that in *US – Underwear*, paras. 7.53–54, a case dealing with a safeguard action under the ATC, the panel reached the conclusions that the standard of review was that established in Article 11 of the DSU and commented on the implications of such standard of review for safeguard measures. See also the Panel Report in *Brazil – Countervailing Duty Proceeding Concerning Imports of Milk Powder from the European Community*, SCM/179: "It was incumbent upon the investigating authorities to provide a reasoned opinion explaining how such facts and arguments had led to their finding", para. 286.

[581] Panel Report on *Korea – Dairy*, para. 7.30.

[582] (*footnote original*) Clearly, a claim under Article 4.2(a) might not relate at the same time to both aspects of the review envisaged here, but only to one of these aspects. For instance, the claim may be that, although the competent authorities evaluated all relevant factors, their explanation is either not reasoned or not adequate.

[583] (*footnote original*) Appellate Body Report, *United States – Wheat Gluten Safeguard*, *supra*, footnote 19, para. 71.

[584] Appellate Body Report on *US – Lamb*, paras. 103–104. See also Appellate Body Report on *Steel Safeguards*, para. 279.

384. In *US – Lamb*, the Appellate Body further stated that the panel must examine whether the explanation given by the competent authorities in their published report is reasoned and adequate without conducting a *de novo* review of the evidence nor substituting the authorities' conclusions:

> "It follows that the precise nature of the examination to be conducted by a panel, in reviewing a claim under Article 4.2 of the *Agreement on Safeguards*, stems, in part, from the panel's obligation to make an 'objective assessment of the matter' under Article 11 of the DSU and, in part, from the obligations imposed by Article 4.2, to the extent that those obligations are part of the claim. Thus, as with any claim under the provisions of a covered agreement, panels are required to examine, in accordance with Article 11 of the DSU,[585] whether the Member has complied with the obligations imposed by the particular provisions identified in the claim. By examining whether the explanation given by the competent authorities in their published report is reasoned and adequate, panels can determine whether those authorities have acted consistently with the obligations imposed by Article 4.2 of the *Agreement on Safeguards*.
>
> We wish to emphasize that, although panels are not entitled to conduct a *de novo* review of the evidence, nor to *substitute* their own conclusions for those of the competent authorities, this does *not* mean that panels must simply *accept* the conclusions of the competent authorities. To the contrary, in our view, in examining a claim under Article 4.2(a), a panel can assess whether the competent authorities' explanation for its determination is reasoned and adequate *only* if the panel critically examines that explanation, in depth, and in the light of the facts before the panel. Panels must, therefore, review whether the competent authorities' explanation fully addresses the nature, and, especially, the complexities, of the data, and responds to other plausible interpretations of that data. A panel must find, in particular, that an explanation is not reasoned, or is not adequate, if some *alternative explanation* of the facts is plausible, and if the competent authorities' explanation does not seem adequate in the light of that alternative explanation. Thus, in making an 'objective assessment' of a claim under Article 4.2(a), panels must be open to the possibility that the explanation given by the competent authorities is not reasoned or adequate.
>
> In this respect, the phrase '*de novo* review' should not be used loosely. If a panel concludes that the competent authorities, in a particular case, have *not* provided a reasoned or adequate explanation for their determination, that panel has not, thereby, engaged in a *de novo* review. Nor has that panel substituted its own conclusions for those of the competent authorities. Rather, the panel has, consistent with its obligations under the DSU, simply reached a conclusion that the determination made by the competent authorities is inconsistent with the specific requirements of Article 4.2 of the *Agreement on Safeguards*."[586]

385. In *US – Wheat Gluten*, the Appellate Body considered the duties of competent authorities and stated that an investigation by a competent authority requires a proper degree of activity. Their "duties of investigation and evaluation preclude them from remaining passive in the face of possible short-comings in the evidence submitted".[587] They "must undertake additional investigative steps, when the circumstances so require, in order to fulfil their obligation to evaluate all relevant factors".[588] In this case, the Appellate Body found that the Panel had applied a standard of review which fell short of what is required by Article 11 of the *DSU* by concluding that the report of the investigating authority contained an adequate explanation. In the Appellate Body's view, the Panel had heavily relied upon supplementary information supplied by the United States during the Panel proceedings.[589]

386. In *US – Cotton Yarn*, the Appellate Body, after referring to its rulings in the above-mentioned cases, summarized the panel standard of review; see paragraph 326 above.

387. In *US – Steel Safeguards*, the Appellate Body reminded the parties of the importance of providing a reasoned and adequate explanation of the facts supporting the imposition of safeguards measures, thereby

---

[585] (*footnote original*) We note, however, that Article 17.6 of the *Anti-Dumping Agreement* sets forth a special standard of review for claims under that Agreement.

[586] Appellate Body Report on *US – Lamb*, paras. 105–107. See also Appellate Body Report on *US – Steel Safeguards*, para. 302.

[587] Appellate Body Report on *US – Wheat Gluten*, para. 55.

[588] Appellate Body Report on *US – Wheat Gluten*, para. 55. See also Appellate Body Report on *US – Cotton Yarn*, para. 73.

[589] Appellate Body Report on *US – Wheat Gluten*, paras. 161–162. The Appellate Body found as follows:

> "Although the Panel's conclusion on this issue was that the *USITC Report* contained an adequate explanation of the allocation methodologies, the Panel's reasoning discloses that the Panel clearly did not consider this to be the case. The Panel did not feel able to rely solely or, even, principally, on the explanation actually provided in the USITC Report and, instead, relied heavily on supplementary information provided by the United States in response to the Panel's questions. Indeed, the most important part of the Panel's reasoning on this issue is based on those 'clarifications'. We consider that the Panel's conclusion is at odds with its treatment and description of the evidence supporting that conclusion. We do not see how the Panel could conclude that the USITC Report *did* provide an adequate explanation of the allocation methodologies, when it is clear that the Panel itself saw such deficiencies in that Report that it placed extensive reliance on 'clarifications' that were not contained in the USITC Report.
>
> By reaching a conclusion regarding the USITC Report which relied so heavily on supplementary information provided by the United States during the Panel proceedings – information not contained in the USITC Report – the Panel applied a standard of review which falls short of what is required by Article 11 of the DSU."

enabling panels to make their objective assessment as required under Article 11 of the *DSU*:

> "It bears repeating that a panel will not be in a position to assess objectively, as it is required to do under Article 11 of the DSU, whether there has been compliance with the prerequisites that must be present before a safeguard measure can be applied, if a competent authority is not required to provide a 'reasoned and adequate explanation' of how the facts support its determination of those prerequisites, including 'unforeseen developments' under Article XIX:1(a) of the GATT 1994. A panel must not be left to *wonder* why a safeguard measure has been applied.
>
> It is precisely by 'setting forth findings and reasoned conclusions on all pertinent issues of fact and law', under Article 3.1, and by providing 'a detailed analysis of the case under investigation as well as a demonstration of the relevance of the factors examined', under Article 4.2(c), that competent authorities provide panels with the basis to 'make an objective assessment of the matter before it' in accordance with Article 11. As we have said before, a panel may not conduct a *de novo* review of the evidence or substitute its judgement for that of the competent authorities.[590] Therefore, the 'reasoned conclusions' and 'detailed analysis' as well as 'a demonstration of the relevance of the factors examined' that are contained in the report of a competent authority, are the only bases on which a panel may assess whether a competent authority has complied with its obligations under the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994. This is all the more reason why they must be made explicit by a competent authority.
>
> . . .
>
> [W]e cannot accept the United States' interpretation that a failure to explain a finding does not support the conclusion that the USITC 'did not actually *perform* the analysis correctly, thereby breaching Article 2.1, 4.2, or 4.2(b) [of the *Agreement on Safeguards*]'.[591] As we stated above, because a panel may not conduct a *de novo* review of the evidence before the competent authority, it is the *explanation* given by the competent authority for its determination that alone enables panels to determine whether there has been compliance with the requirements of Article XIX of the GATT 1994 and of Articles 2 and 4 of the *Agreement on Safeguards*. It may well be that, as the United States argues, the competent authorities have performed the appropriate analysis correctly. However, where a competent authority has not provided a reasoned and adequate explanation to support its determination, the panel is not in a position to conclude that the relevant requirement for applying a safeguard measure has been fulfilled by that competent authority. Thus, in such a situation, the panel has no option but to find that the competent authority has not performed the analysis correctly."[592]

(b) Transitional safeguard measure under the Agreement on Textiles and Clothing

(i) Application of general standard of review under Article 11 of the DSU

388. The Panel on *US – Underwear* examined the standard of review to be applied in cases involving the *Agreement on Textiles and Clothing* and noted that Article 11 of the *DSU* is the relevant provision. In a finding not reviewed by the Appellate Body, the Panel held that "the task of the Panel is to examine the consistency of the US action with the international obligations of the United States, and not the consistency of the US action with the US domestic statute implementing the international obligations of the United States". The Panel went on to state:

> "[A] policy of total deference to the findings of the national authorities could not ensure an 'objective assessment' as foreseen by Article 11 of the DSU.
>
> . . .
>
> [T]he Panel's function should be to assess objectively the review conducted by the national investigating authority, in this case the CITA. We draw particular attention to the fact that a series of panel reports in the anti-dumping and subsidies/countervailing duties context have made it clear that it is not the role of panels to engage in a *de novo* review.[593] In our view, the same is true for panels operating in the context of the ATC, since they would be called upon, as in the context of cases dealing with anti-dumping and/or subsidies/countervailing duties, to review the consistency of a determination by a national investigating authority imposing a restriction under the relevant provisions of the relevant WTO legal instruments, in this case the ATC. In our view, the task of the Panel is to examine the consistency of the US action with the international obligations of the United States, and not the consistency of the US action with the US domestic statute implementing the international obligations of the United States. Consequently, the ATC constitutes, in our view, the relevant legal framework in this matter.
>
> We have therefore decided, in accordance with Article 11 of the DSU, to make an objective assessment of the Statement issued by the US authorities on 23 March 1995 (the 'March Statement) which, as the parties to the

---

[590] Appellate Body Report, *Argentina – Footwear (EC)*, para. 121.

[591] United States' appellant's submission, para. 73. (original emphasis)

[592] Appellate Body Report on *US – Steel Safeguards*, paras. 298–299 and 303.

[593] (*footnote original*) See GATT Panel Reports on Korea – Anti-Dumping Duties on Imports of Polyacetal Resins from the United States, BISD 40S/205; United States – Imposition of Anti-Dumping Duties on Imports of Fresh and Chilled Atlantic Salmon from Norway; and United States – Initiation of a Countervailing Duty Investigation into Softwood Lumber Products from Canada, BISD 34S/194.

> dispute agreed, constitutes the scope of the matter properly before the Panel without, however, engaging in a *de novo* review. In our view, an objective assessment would entail an examination of whether the CITA had examined all relevant facts before it (including facts which might detract from an affirmative determination in accordance with the second sentence of Article 6.2 of the ATC), whether adequate explanation had been provided of how the facts as a whole supported the determination made, and, consequently, whether the determination made was consistent with the international obligations of the United States."[594]

389. In *US – Wool Shirts and Blouses*, the Panel examined whether a certain transitional safeguard measure imposed by the United States was consistent with Article 6. India, the complainant, claimed that the Panel should examine whether the United States had acted reasonably, while the United States argued that it should be "entitled to the benefit of reasonable doubt", as it had been so entitled in a certain GATT case. The Panel responded as follows:

> "[A]lthough the DSU does not contain any specific reference to standards of review, we consider that Article 11 of the DSU . . . is relevant here[.]
>
> . . .
>
> Pursuant to Article 11 of the DSU, we must determine what is 'the matter before [the Panel]'. This Panel was established pursuant to Article 8.10 of the ATC and Article 6 of the DSU. . . .
>
> . . .
>
> The only restraint discussed under Article 6 of the ATC is the proposed restraint by the importing Member. Therefore, pursuant to Article 11 of the DSU, the function of this Panel, established pursuant to Article 8.10 of the ATC and Article 6 of the DSU, is limited to making an objective assessment of the facts surrounding the application of the specific restraint by the United States (and contested by India) and of the conformity of such restraint with the relevant WTO agreements."[595]

390. In support of the proposition referenced in paragraph 389 above, the Panel on *US – Wool Shirts and Blouses* referred to "an important distinction between the role of panels under the DSU and the role of the TMB under the ATC as regards safeguard actions".[596]

391. In *US – Cotton Yarn*, the Appellate Body considered for the first time a panel's standard of review under Article 11 in a dispute under the *Agreement on Textiles and Clothing*, an issue that had already been considered by Panels in *US – Underwear* and *US – Wool Shirts and Blouses* when examining the consistency of transitional safeguard measures with Article 6 of the *ATC*.[597] The Appellate Body considered that the Panel, in assessing the due diligence of the United States in making a determination under Article 6.2 of the *Agreement on Textiles and Clothing*, had exceeded its mandate under Article 11 of the *DSU* by considering certain evidence that could not possibly have been examined by the United States when it made that determination. In this regard, the Appellate Body considered:

> "Unlike Article 3 of the *Agreement on Safeguards*, which provides explicitly for an investigation by competent authorities of a Member, Article 6 of the *ATC* does not specify either the organ or the procedure through which a Member makes its 'determination'. Nevertheless, the . . . principles concerning the standard of review under Article 11 of the DSU with respect to the *Agreement on Safeguards* apply equally, in our view, to a panel's review of a Member's determination under Article 6 of the *ATC*. We note that Article 6 does not require the participation of all interested parties in the process leading to the determination. We consider, therefore, that the exercise of due diligence by a Member is all the more important in reaching a determination under Article 6 of the *ATC*.
>
> . . .
>
> In our view, a *panel* reviewing the due diligence exercised by a Member in making its determination under Article 6 of the *ATC* has to put itself in the place of that Member at the time it makes its determination. Consequently, a panel must not consider evidence which did not exist *at that point in time*.[598] A Member cannot, of course, be faulted for not having taken into account what it could not have known when making its determination. If a panel were to examine such evidence, the panel would, in effect, be conducting a *de novo* review and it would be doing so without having had the benefit of the views of the interested parties. The panel would be assessing the due diligence of a Member in reaching its conclusions and making its projections with the benefit of hindsight and would, in effect, be reinvestigating the market situation and substituting its own judgement for that of the Member. In our view, this would be inconsistent with the standard of a panel's review under Article 11 of the DSU."[599]

---

[594] Panel Report on *US – Underwear*, paras. 7.10 and 7.12–7.13.

[595] Panel Report on *US – Wool Shirts and Blouses*, paras. 7.16–7.17.

[596] Panel Report on *US – Wool Shirts and Blouses*, para. 7.18.

[597] The Appellate Body, in reference to its previous decisions regarding the standard of review in cases under the *Agreement on Safeguards* (see paras. 381–385 above), indicated that "in describing the duties of competent authorities, we simultaneously define the duties of panels in reviewing the investigations and determinations carried out by competent authorities". Appellate Body Report on *US – Cotton Yarn*, para. 73.

[598] (*footnote original*) We do not rule upon other forms of evidence, such as an expert opinion submitted to a panel that is based on data which existed when the Member made its determination. (Appellate Body Report, *United States – Lamb Safeguard, supra*, [. . .], paras. 114–116) . . .

[599] Appellate Body Report on *US – Cotton Yarn*, paras. 76 and 78. As regards the scope of the review under Article 6 of the *Agreement on Textiles and Clothing*, see Section VII.B(c) of the Chapter on the *Agreement on Textiles and Clothing*.

(c) Anti-dumping measures

392. See the excerpts from the reports of the Panels and Appellate Body referenced in the Chapter on the *Anti-Dumping Agreement*, Sections V.B.3(a)(iv) and XVII.B.7(a). See also paragraphs 393–394 below.

(d) Countervailing measures

(i) Application of general standard of review under the DSU

393. The Appellate Body on *US – Lead and Bismuth II* rejected the argument that, "by virtue of the Declaration, the standard of review specified in Article 17.6 of the *Anti-Dumping Agreement* also applies to disputes involving countervailing duty measures under Part V of the *SCM Agreement*".[600] The Appellate Body emphasized the hortatory language of the Declaration and the fact that the Declaration does not provide for the application of any particular standards of review to be applied:

> "By its own terms, the *Declaration* does not impose an obligation to apply the standard of review contained in Article 17.6 of the *Anti-Dumping Agreement* to disputes involving countervailing duty measures under Part V of the *SCM Agreement*. The *Declaration* is couched in hortatory language; it uses the words 'Ministers *recognize*'. Furthermore, the *Declaration* merely acknowledges 'the need for the consistent resolution of disputes arising from anti-dumping and countervailing duty measures.' It does not specify any specific action to be taken. In particular, it does not prescribe a standard of review to be applied.
>
> This *Decision* provides for review of the standard of review in Article 17.6 of the *Anti-Dumping Agreement* to determine if it is 'capable of general application' to other covered agreements, including the *SCM Agreement*. By implication, this *Decision* supports our conclusion that the Article 17.6 standard applies only to disputes arising under the *Anti-Dumping Agreement*, and not to disputes arising under other covered agreements, such as the *SCM Agreement*. To date, the DSB has not conducted the review contemplated in this *Decision*."[601]

394. In *US – Softwood Lumber VI*, the Panel was called on to consider a case involving a single injury determination with respect to both subsidized and dumped imports. The claims therefore involved identical or almost identical provisions of the *SCM Agreement* and the *Anti-Dumping Agreement*. The Panel concluded that given its understanding of the applicable standards of review under Article 11 of the *DSU* and Article 17.6 of the *Anti-Dumping Agreement*, it was neither necessary nor appropriate to conduct separate analyses of the injury determination under the two agreements. In arriving at this conclusion, the Panel relied on the *Declaration on Dispute Settlement Pursuant to the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 or Part V of the Agreement on Subsidies and Countervailing Measures*:

> "In light of Canada's clarification of its position, and based on our understanding of the applicable standards of review under Article 11 of the DSU and Article 17.6 of the AD Agreement, we do not consider that it is either necessary or appropriate to conduct separate analyses of the USITC determination under the two Agreements.
>
> We consider this result appropriate in view of the guidance in the Declaration of Ministers relating to Dispute Settlement under the AD and SCM Agreements. While the Appellate Body has clearly stated that the Ministerial Declaration does not require the application of the Article 17.6 standard of review in countervailing duty investigations,[602] it nonetheless seems to us that in a case such as this one, involving a single injury determination with respect to both subsidized and dumped imports, and where most of Canada's claims involve identical or almost identical provisions of the AD and SCM Agreements, we should seek to avoid inconsistent conclusions".[603]

7. Dissenting/separate opinions

395. The following table refers to dissenting/separate opinions that occurred in panel reports up to 31 December 2004:

WT/- (Complainant)	Short Title	Dissenting Opinion or Concurring Statement	Panel or Appellate Body Report
DS69 – Brazil	*EC – Poultry*	Not able to endorse the conclusion reached by the Panel	Panel Report Paras. 289–292
DS135 – Canada	*EC – Asbestos*	Concurring statement on "like product" issue	AB Report Paras. 149–154
DS165 – EC	*US – Certain EC Products*	One panellist's view	Panel Report Paras. 6.60–6.61

[600] Appellate Body Report on *US – Lead and Bismuth II*, para. 48.
[601] Appellate Body Report on *US – Lead and Bismuth II*, paras. 49–50.
[602] (*footnote original*) Appellate Body Report, *United States – Imposition of Countervailing Duties on Certain Hot-Rolled Lead and Bismuth Carbon Steel Products Originating in the United Kingdom* ("*US – Lead and Bismuth II*"), WT/DS138/AB/R, adopted 7 June 2000, DSR 2000:V, 2601 at para. 49.
[603] Panel Report on *US – Softwood Lumber VI*, paras. 7.17–7.18.

Table (*cont.*)

WT/- (Complainant)	Short Title	Dissenting Opinion or Concurring Statement	Panel or Appellate Body Report
DS213 – EC	*US – Carbon Steel*	Dissenting opinion regarding the application of *de minimis* standard to sunset reviews	Panel Report Paras. 10.1–10.15
DS246 – India	*EC – Tariff Preferences*	Dissenting opinion on whether Enabling Clause is an exception to GATT Article I and whether the complainant has the burden to raise the claim and prove it	Panel Report Paras. 6.15–6.22
DS264 – Canada	*US – Softwood Lumber V*	Dissenting opinion regarding whether zeroing is prohibited in original investigations	Panel Report Paras. 9.1–9.21

396. As regards the separate opinions in Article 22.6 arbitrations, see Section XXII.B.9(d) below. For the concurrent statements in Appellate Body Reports, see Section XVII.B.7 below.

8. Relationship with other Articles

(a) Articles 12 and 13

397. With respect to the relationship between Article 11, and Articles 12 and 13 of the *DSU*, see the excerpts from the reports of the panels and Appellate Body referenced in paragraphs 417, 429 and 431 below.

(b) Article 19

398. The Panel on *India – Autos* considered how Articles 11 and 19 of the *DSU* should be interpreted to deal with events occurring in the course of proceedings that question the appropriateness of a recommendation that a measure inconsistent with a covered agreement be brought into conformity with that agreement under Article 19.1 of the DSU:

> "If only as a matter of logic, there can be no sense in making such a recommendation if a Panel is of the view that the violation at issue has ceased to exist when its recommendation is being made.[604, 605] The Panel does not believe that Articles 11 and 19 of the DSU should be interpreted to demand that a panel must make a formalistic statement that a measure needs to be brought into compliance when it is faced with factual and legal arguments that this is no longer the case and must do so without being entitled to resolve those contentions.
>
> . . .
>
> [T]he Panel felt that it would not be making an 'objective assessment of the matter before it', or assisting the DSB in discharging its responsibilities under the DSU in accordance with Article 11 of the DSU, had it chosen not to address the impact of events having taken place in the course of the proceedings, in assessing the appropriateness of making a recommendation under Article 19.1 of the DSU.
>
> This is, in the Panel's view, an entirely distinct question from the issue of *how* India might appropriately remedy this situation and bring its measures into conformity in the future. The Panel does not seek here to engage in such an analysis. Any future issues arising as to whether India has complied with any recommendations resulting from the adoption of this report would be for a compliance panel to assess.
>
> It should be highlighted in concluding this section that the decision taken by this Panel to proceed in this way in the particular circumstances of this case is in no way intended to imply that panels have a general duty to systematically re-evaluate the existence of any violations identified before proceeding with making their recommendations under Article 19.1. This Panel is simply responding to the particular arguments placed before it, where the parties disagree as to the implications of subsequent events on the Panel's power to make recommendations and rulings. The principal aim of the Panel in proceeding in this manner is to discharge its duty in the most efficient way towards resolving the matter at issue in this dispute."[606]

9. Relationship with non-WTO law

399. In *EC – Bananas III*, the European Communities asserted "that the Panel should not have conducted an objective examination of the requirements of the Lomé Convention, but instead should have deferred to the 'common' EC and ACP views on the appropriate interpretation of the Lomé Convention". The Appellate Body expressly agreed with the following statement of the Panel:

> "We note that since the GATT Contracting Parties incorporated a reference to the Lomé Convention into

[604] (*footnote original*) This was recalled by the Appellate Body in its report on *US – Certain EC Products*, where it observed that "there is an obvious inconsistency between the finding of the Panel that 'the 3 March Measure is no longer in existence' and the subsequent recommendation of the Panel that the DSB request that the United States bring its measure into conformity with its WTO obligations. The Panel erred in recommending that the DSB request the United States to bring into conformity with its WTO obligations a measure which the Panel has found no longer exists" (*US – Certain EC Products*, Report of the Appellate Body, WT/DS165/AB/R, adopted on 10 January 2001, para. 81).

[605] The Appellate Body in *US – Certain EC Products* confirmed this line of thought at paras. 81–82.

[606] Panel Report on *India – Autos*, paras. 8.25–8.30.

the Lomé waiver, the meaning of the Lomé Convention became a GATT/WTO issue, at least to that extent. Thus, we have no alternative but to examine the provisions of the Lomé Convention ourselves in so far as it is necessary to interpret the Lomé waiver."[607]

XII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Panel Procedures

1. Panels shall follow the Working Procedures in Appendix 3 unless the panel decides otherwise after consulting the parties to the dispute.

2. Panel procedures should provide sufficient flexibility so as to ensure high-quality panel reports, while not unduly delaying the panel process.

3. After consulting the parties to the dispute, the panellists shall, as soon as practicable and whenever possible within one week after the composition and terms of reference of the panel have been agreed upon, fix the timetable for the panel process, taking into account the provisions of paragraph 9 of Article 4, if relevant.

4. In determining the timetable for the panel process, the panel shall provide sufficient time for the parties to the dispute to prepare their submissions.

5. Panels should set precise deadlines for written submissions by the parties and the parties should respect those deadlines.

6. Each party to the dispute shall deposit its written submissions with the Secretariat for immediate transmission to the panel and to the other party or parties to the dispute. The complaining party shall submit its first submission in advance of the responding party's first submission unless the panel decides, in fixing the timetable referred to in paragraph 3 and after consultations with the parties to the dispute, that the parties should submit their first submissions simultaneously. When there are sequential arrangements for the deposit of first submissions, the panel shall establish a firm time-period for receipt of the responding party's submission. Any subsequent written submissions shall be submitted simultaneously.

7. Where the parties to the dispute have failed to develop a mutually satisfactory solution, the panel shall submit its findings in the form of a written report to the DSB. In such cases, the report of a panel shall set out the findings of fact, the applicability of relevant provisions and the basic rationale behind any findings and recommendations that it makes. Where a settlement of the matter among the parties to the dispute has been found, the report of the panel shall be confined to a brief description of the case and to reporting that a solution has been reached.

8. In order to make the procedures more efficient, the period in which the panel shall conduct its examination, from the date that the composition and terms of reference of the panel have been agreed upon until the date the final report is issued to the parties to the dispute, shall, as a general rule, not exceed six months. In cases of urgency, including those relating to perishable goods, the panel shall aim to issue its report to the parties to the dispute within three months.

9. When the panel considers that it cannot issue its report within six months, or within three months in cases of urgency, it shall inform the DSB in writing of the reasons for the delay together with an estimate of the period within which it will issue its report. In no case should the period from the establishment of the panel to the circulation of the report to the Members exceed nine months.

10. In the context of consultations involving a measure taken by a developing country Member, the parties may agree to extend the periods established in paragraphs 7 and 8 of Article 4. If, after the relevant period has elapsed, the consulting parties cannot agree that the consultations have concluded, the Chairman of the DSB shall decide, after consultation with the parties, whether to extend the relevant period and, if so, for how long. In addition, in examining a complaint against a developing country Member, the panel shall accord sufficient time for the developing country Member to prepare and present its argumentation. The provisions of paragraph 1 of Article 20 and paragraph 4 of Article 21 are not affected by any action pursuant to this paragraph.

11. Where one or more of the parties is a developing country Member, the panel's report shall explicitly indicate the form in which account has been taken of relevant provisions on differential and more-favourable treatment for developing country Members that form part of the covered agreements which have been raised by the developing country Member in the course of the dispute settlement procedures.

12. The panel may suspend its work at any time at the request of the complaining party for a period not to exceed 12 months. In the event of such a suspension, the time-frames set out in paragraphs 8 and 9 of this Article, paragraph 1 of Article 20, and paragraph 4 of Article 21 shall be extended by the amount of time that the work was suspended. If the work of the panel has been suspended for more than 12 months, the authority for establishment of the panel shall lapse.

[607] Appellate Body Report on *EC – Bananas III*, para. 167.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

1. Article 12.1: Working Procedures

400. As regards the Panel's standard Working Procedures and the additional procedures developed through practice, see Section XXX.B below.

2. Article 12.2: flexibility

401. In *Australia – Salmon*, the Appellate Body warned panels to be careful to observe due process[608] when complying with the Article 12.2 requirement of flexibility in panel procedures:

> "We note that Article 12.2 of the DSU provides that '[p]anel procedures should provide sufficient flexibility so as to ensure high-quality panel reports, while not unduly delaying the panel process.' However, a panel must also be careful to observe due process, which entails providing the parties adequate opportunity to respond to the evidence submitted."[609]

3. Article 12.6

(a) "submissions"

(i) Legal right to have a submission considered by the Panel

402. In *US – Shrimp*, the Appellate Body considered whether panels have the right to accept so-called *amicus curiae* briefs. With respect to this issue, see also paragraphs 419–420 and 1049 below. In this context, the Appellate Body made a general statement on the issue of access to the dispute settlement process of the WTO. After noting that the access is limited to the Members of the WTO, the Appellate Body stated:

> "[U]nder the DSU, only Members who are parties to a dispute, or who have notified their interest in becoming third parties in such a dispute to the DSB, have a *legal right* to make submissions to, and have a *legal right* to have those submissions considered by, a panel. Correlatively, a panel is *obliged* in law to accept and give due consideration only to submissions made by the parties and the third parties in a panel proceeding. These are basic legal propositions; they do not, however, dispose of the issue here presented by the appellant's first claim of error. We believe this interpretative issue is most appropriately addressed by examining what a panel is *authorized* to do under the DSU."[610]

(ii) Meaning of the term "second written submission"

403. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings[611] on organizational matters. Among the issues, the Panel referred to the United States' request to replace the reference to "rebuttal submissions" in paragraph 11 of its Working Procedures with the word "rebuttals". This paragraph dealt with the timing of the submission of factual evidence.[612] In support of this proposal, the United States made the argument that the word "submission" is ordinarily taken to mean written submissions. Hence, the reference to "rebuttal submissions" in paragraph 11 would restrict the application of the qualification in that paragraph to rebuttals made in writing and would not extend to rebuttals made orally. The complainants argued in response that the suggested amendment would allow, for example, new arguments and evidence to be adduced orally at the Panel's second substantive meeting. The Panel disagreed and, recalling the comments made by the Appellate Body in the case *Argentina – Textiles and Apparel*,[613] indicated that they had drafted paragraph 11 to ensure due process and that new evidence was not adduced at a late stage in the panel process, while simultaneously ensuring that all parties and the Panel were kept fully informed of all relevant evidence.

(b) "Any subsequent written submissions shall be submitted simultaneously"

404. In *US – FSC (Article 21.5 – EC)*, the respondent, the United States, requested on 12 February 2001 that the Article 21.5 compliance panel deviate from the provision in Article 12.6 of the *DSU* which provides that the sequential first written submissions are to be followed by simultaneous written rebuttals. The United States argued that the European Communities had had new material from the submission of the United States to rebut in its rebuttal submission while the United States did not. The Panel denied the request. In this regard, see paragraph 616 below.

4. Article 12.7

(a) "basic rationale behind any findings and recommendations"

405. In *Korea – Alcoholic Beverages*, the Appellate Body, although refraining from attempting to define the scope of the obligation in Article 12.7, considered that the Panel had not failed to set out the basic rationale for its findings and recommendations as required by Article

---

[608] See paras. 919–930 of this Chapter on due process issues.
[609] Appellate Body Report on *Australia – Salmon*, para. 272.
[610] Appellate Body Report on *US – Shrimp*, para. 101. See also Appellate Body Report on *US – Lead and Bismuth II*, paras. 40–41.
[611] For "preliminary rulings", see Section XXXVI.C.
[612] Paragraph 11 of the Panel's Working Procedures read as follows: Parties shall submit all factual evidence to the Panel no later than during the first substantive meeting, except with respect to evidence necessary for purposes of rebuttal submissions, or answers to questions or provided that good cause is shown. In all cases, the other party(ies) shall be accorded a period of time for comment, as appropriate. Panel Report on *US – Steel Safeguards*, para. 6.1.
[613] WT/DS56/AB/R, para. 79.

12.7 of the *DSU* because it had provided a "detailed and thorough" rationale for its findings:

> "Korea claims that the Panel has failed to fulfil its obligation under Article 12.7 of the DSU to set out the basic rationale behind its findings and recommendations. Korea maintains that 'much' of the Panel Report contains contradictions and that it is vague.
>
> . . .
>
> In this case, we do not consider it either necessary, or desirable, to attempt to define the scope of the obligation provided for in Article 12.7 of the DSU. It suffices to state that the Panel has set out a detailed and thorough rationale for its findings and recommendations in this case. The Panel went to some length to take account of competing considerations and to explain why, nonetheless, it made the findings and recommendations it did. The rationale set out by the Panel may not be one that Korea agrees with, but it is certainly more than adequate, on any view, to satisfy the requirements of Article 12.7 of the DSU. We, therefore, conclude that the Panel did not fail to set out the basic rationale for its findings and recommendations as required by Article 12.7 of the DSU."[614]

406. Similarly, the Appellate Body on *Chile – Alcoholic Beverages* concluded that the Panel had set out a "basic rationale" for its finding and recommendation on the issue of "not similarly taxed", as required by Article 12.7 of the *DSU*, because it had "identified the legal standard it applied, examined the relevant facts, and provided reasons for its conclusion that dissimilar taxation existed".[615]

407. In *Argentina – Footwear (EC)*, the Appellate Body, although not agreeing with all the Panel's reasoning, considered that it had met its obligation under Article 12.7 because the Panel had "conducted *extensive* factual and legal analyses of the competing claims made by the parties, set out numerous factual findings based on detailed consideration of the evidence before the Argentine authorities as well as other evidence presented to the Panel, and provided extensive explanations of how and why it reached its factual and legal conclusions".[616]

408. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body analysed the term "basic rationale" and considered that Article 12.7 establishes a minimum standard for the reasoning that panels must provide in support of their findings and recommendations. The Appellate Body, however, indicated that it did not believe that it is either possible or desirable to determine, in the abstract, the minimum standard of reasoning that will constitute a "basic rationale" for the findings and recommendations made by a panel:

> "In considering the scope of the duties imposed on panels under Article 12.7, we turn first to the dictionary meaning of 'basic', which includes both 'fundamental; essential' and 'constituting a minimum . . . at the lowest acceptable level'.[617] 'Rationale' means both 'a reasoned exposition of principles; an explanation or statement of reasons' and 'the fundamental or underlying reason for or basis of a thing; a justification'.[618] The 'basic rationale' which a panel must provide is directly linked, by the wording of Article 12.7, to the 'findings and recommendations' made by a panel. We, therefore, consider that Article 12.7 establishes a minimum standard for the reasoning that panels must provide in support of their findings and recommendations. Panels must set forth explanations and reasons sufficient to disclose the essential, or fundamental, justification for those findings and recommendations.
>
> In our view, the duty of panels under Article 12.7 of the DSU to provide a 'basic rationale' reflects and conforms with the principles of fundamental fairness and due process that underlie and inform the provisions of the DSU.[619] In particular, in cases where a Member has been found to have acted inconsistently with its obligations under the covered agreements, that Member is entitled to know the reasons for such finding as a matter of due process. In addition, the requirement to set out a 'basic rationale' in the panel report assists such Member to understand the nature of its obligations and to make informed decisions about: (i) what must be done in order to implement the eventual rulings and recommendations made by the DSB; and (ii) whether and what to appeal. Article 12.7 also furthers the objectives, expressed in Article 3.2 of the DSU, of promoting security and predictability in the multilateral trading system and of clarifying the existing provisions of the covered agreements, because the requirement to provide 'basic' reasons contributes to other WTO Members' understanding of the nature and scope of the rights and obligations in the covered agreements.
>
> We do not believe that it is either possible or desirable to determine, in the abstract, the minimum standard of reasoning that will constitute a 'basic rationale' for the findings and recommendations made by a panel.[620]

---

[614] Appellate Body Report on *Korea – Alcoholic Beverages*, paras. 166 and 168.

[615] Appellate Body on *Chile – Alcoholic Beverages*, para. 78.

[616] Appellate Body on *Argentina – Footwear (EC)*, para. 149.

[617] (*footnote original*) *The New Shorter Oxford English Dictionary*, Lesley Brown (ed.) (Clarendon Press, 1993), Vol. I, p. 188.

[618] (*footnote original*) Ibid., Vol. II, p. 2482.

[619] (*footnote original*) We have also examined these principles in other contexts. See, for example, Appellate Body Report, *United States – Hot-Rolled Steel*, *supra*, footnote 59, paras. 101 and 193; Appellate Body Report, *United States – Import Prohibition of Certain Shrimp and Shrimp Products*, WT/DS58/AB/R, adopted 6 November 1998, para. 158; and Appellate Body Report, *United States – FSC*, *supra*, footnote 24, para. 166.

[620] (*footnote original*) Appellate Body Report, *Korea – Alcoholic Beverages*, WT/DS75/AB/R, WT/DS83/AB/R, adopted 17 February 1999, para. 168. [In this case, Korea had claimed in

> Whether a panel has articulated adequately the 'basic rationale' for its findings and recommendations must be determined on a case-by-case basis, taking into account the facts of the case, the specific legal provisions at issue, and the particular findings and recommendations made by a panel. Panels must identify the relevant facts and the applicable legal norms. In applying those legal norms to the relevant facts, the reasoning of the panel must reveal how and why the law applies to the facts. In this way, panels will, in their reports, disclose the essential or fundamental justification for their findings and recommendations.[621]
>
> This does not, however, necessarily imply that Article 12.7 requires panels to expound at length on the reasons for their findings and recommendations. We can, for example, envisage cases in which a panel's 'basic rationale' might be found in reasoning that is set out in other documents, such as in previous panel or Appellate Body reports – provided that such reasoning is quoted or, at a minimum, incorporated by reference. Indeed, a panel acting pursuant to Article 21.5 of the DSU would be expected to refer to the initial panel report, particularly in cases where the implementing measure is closely related to the original measure, and where the claims made in the proceeding under Article 21.5 closely resemble the claims made in the initial panel proceedings."[622]

409. The Appellate Body on *Mexico – Corn Syrup (Article 21.5 – US)* further noted that for purposes of transparency and fairness to the parties, an Article 21.5 panel[623] "should strive to present the essential justification for its findings and recommendations in its own report":

> "Having regard to these circumstances, we are of the view that the Panel Report, read together with the original panel report, leaves no doubt about the reasons for the Panel's additional finding under Article 3.1 of the *Anti-Dumping Agreement*. We, therefore, find that the Panel did not fail to provide a 'basic rationale' for that finding.
>
> . . .
>
> We wish to add that for purposes of transparency and fairness to the parties, even a panel proceeding under Article 21.5 of the DSU should strive to present the essential justification for its findings and recommendations in its own report. In this case, in particular, we consider that the Panel's finding under Article 3.1 of the *Anti-Dumping Agreement* would have been better supported by a direct quotation from or, at least, an explicit reference to, the relevant reasoning set out in the original panel report."[624]

410. The Appellate Body on *US – Steel Safeguards* also considered that the Panel had complied with Article 12.7 by providing a detailed explanation on how the investigating authority had failed to provide a reasoned and adequate explanation:

> "Based on our review of the Panel's reasoning, it appears to us that the Panel considered in detail the evidence that was before the USITC, and provided detailed explanations of how and why it concluded that the USITC had failed to demonstrate, through a reasoned and adequate explanation, that the alleged 'unforeseen developments' *resulted* in increased imports of *each* product subject to a safeguard measure . . .
>
> In our view, in making these statements, the Panel has sufficiently set out in its Reports the 'basic rationale' for its finding that the USITC failed to explain how, though 'plausible', the 'unforeseen developments' identified in the report in fact *resulted* in increased imports of the specific products subject to the safeguard measures at issue."[625]

5. Articles 12.8 and 12.9: deadlines for Panel review

(a) General

411. The table in paragraph 412 shows the duration of the panel review process as regards reports adopted not later than 31 December 2004.

(b) Notification of delay in the issuance of a panel report to the parties

412. The following table shows the disputes where panels notified the DSB of a delay in the issuance of a report to the parties as provided for in Article 12.9 of the *DSU*:

---

its appeal that the Panel had failed to comply with its obligations under Article 12.7 of the *DSU* to state the basic rationale behind its findings and recommendations. The Appellate Body did not define the term "basic rationale", but noted that the Panel had "set out a detailed and thorough rationale for its findings and recommendations in this case":

> "In this case, we do not consider it either necessary, or desirable, to attempt to define the scope of the obligation provided for in Article 12.7 of the DSU. It suffices to state that the Panel has set out a detailed and thorough rationale for its findings and recommendations in this case. The Panel went to some length to take account of competing considerations and to explain why, nonetheless, it made the findings and recommendations it did. The rationale set out by the Panel may not be one that Korea agrees with, but it is certainly more than adequate, on any view, to satisfy the requirements of Article 12.7 of the DSU. We, therefore, conclude that the Panel did not fail to set out the basic rationale for its findings and recommendations as required by Article 12.7 of the DSU."]

6. Article 12.10

(a) "the panel shall accord sufficient time for the developing country Member to prepare and present its argumentation"

413. In *India – Quantitative Restrictions*, India requested additional time to prepare and present its first written submission, pursuant to Article 12.10 of the *DSU*. The Panel, "in light of this provision, and considering the administrative reorganization taking place in India as a result of the recent change in government", decided to grant an additional period of time (10 days) to India.[626]

7. Article 12.11

(a) Explicit indication in the panel's report of how special and differential provisions were taken into account

414. In *India – Quantitative Restrictions*, the Panel considered that "Article 12.11 of the DSU requires us to indicate explicitly the form in which account was taken of relevant provisions on special and differential treatment for developing country Members that form part of the covered agreements which have been raised by the developing country Member in the course of the dispute settlement procedures." The Panel then noted that its analysis of Article XVIII:B of *GATT 1994*, which embodies the principle of special and differential treatment in relation to measures taken for balance-of-payments purposes, reflected its consideration of the relevant provisions on special and differential treatment.[627]

415. In *US – Offset Act (Byrd Amendment)*, India and Indonesia argued that the Act undermined Article 15 of the *Anti-Dumping Agreement* on special and differential treatment for developing countries. The United States responded that Article 15 was not part of the terms of reference of the Panel as it had not been identified in any of the complaining parties' requests for establishment of a panel. The Panel, although acknowledging that Article 15 was not mentioned in the request, noted that Article 12.11 of the *DSU* required it to explicitly indicate how it had taken into account the relevant special and differential provisions of the covered agreements which are raised by developing countries in the proceedings:

> "We note that there is no reference to AD Article 15 in the various requests for establishment of this Panel. Generally, therefore, AD Article 15 would not fall within our terms of reference.[628] However, we note that DSU Article 12.11 requires panels to 'explicitly indicate the form in which account has been taken of relevant provisions on differential and more-favourable treatment for developing country Members that form part of the covered agreements which have been raised by the developing country Member in the course of the dispute settlement procedures'. Since we consider AD Article 15 to be

[626] Panel Report on *India – Quantitative Restrictions*, para. 5.10.
[627] Panel Report on *India – Quantitative Restrictions*, para. 5.157.
[628] (*footnote original*) See, for example, *EC – Bananas III*, para. 142 (WT/DS27/AB/R).

relevant, and since that provision has been raised by developing country Members in the present proceedings, we are bound to consider that provision, even though it was not referred to in the various requests for establishment. In doing so, we note that certain developing country Members attach importance to price undertakings as a 'constructive' alternative to anti-dumping duties."[629]

416. In *Mexico – Telecoms*, the Panel explained the manner in which it had taken into account in its findings, pursuant to Article 12.11, the relevant GATS special and differential provisions for developing country Members:

"The Panel notes that, pursuant to Article 12.11 of the DSU, it has taken into account in its findings GATS provisions on differential and more-favourable treatment for developing country Members. In particular, the Panel has examined Mexico's arguments that commitments of such Members have to be interpreted in the light of Article IV of the GATS, paragraph 5 of the preamble to the GATS, and paragraph 5(g) of the Annex on Telecommunications. The Panel emphasizes that its findings in no way prevent Mexico from actively pursuing the development objectives referred to in these provisions by extending telecommunications networks and services at affordable prices in a manner consistent with its GATS commitments."[630]

XIII. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Right to Seek Information

1. Each panel shall have the right to seek information and technical advice from any individual or body which it deems appropriate. However, before a panel seeks such information or advice from any individual or body within the jurisdiction of a Member it shall inform the authorities of that Member. A Member should respond promptly and fully to any request by a panel for such information as the panel considers necessary and appropriate. Confidential information which is provided shall not be revealed without formal authorization from the individual, body, or authorities of the Member providing the information.

2. Panels may seek information from any relevant source and may consult experts to obtain their opinion on certain aspects of the matter. With respect to a factual issue concerning a scientific or other technical matter raised by a party to a dispute, a panel may request an advisory report in writing from an expert review group. Rules for the establishment of such a group and its procedures are set forth in Appendix 4.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

1. Article 13.1

(a) "right to seek information and technical advice from any individual or body"

417. In *EC – Hormones*, the Appellate Body examined the European Communities' challenge of the Panel's selection and use of experts and stated that a Panel has the discretion to decide whether to seek advice from individual scientific experts or from a group of such experts, and may, in the former case, establish *ad hoc* rules for such consultations:

"Both Article 11.2 of the *SPS Agreement* and Article 13 of the DSU enable panels to seek information and advice as they deem appropriate in a particular case . . . . We find that in disputes involving scientific or technical issues, neither Article 11.2 of the *SPS Agreement,* nor Article 13 of the DSU prevents panels from consulting with individual experts. Rather, both the *SPS Agreement* and the DSU leave to the sound discretion of a panel the determination of whether the establishment of an expert review group is necessary or appropriate. The rules and procedures set forth in Appendix 4 of the DSU apply in situations in which expert review groups have been established. However, this is not the situation in this particular case. Consequently, once the panel has decided to request the opinion of individual scientific experts, there is no legal obstacle to the panel drawing up, in consultation with the parties to the dispute, *ad hoc* rules for those particular proceedings."[631]

418. In *US – Shrimp*, the Panel received a brief from three non-governmental organizations. The complaining parties in the dispute requested the Panel not to consider the contents of the briefs submitted by the organizations while the United States urged the Panel to take into account any relevant information in the two briefs that the Panel acknowledged receiving. The Panel found that "[a]ccepting non-requested information from non-governmental sources would be, in our opinion, incompatible with the provisions of the DSU as currently applied. We therefore informed the parties that we did not intend to take these documents into consideration."[632] The Appellate Body found that the Panel had erred in its legal interpretation of Article 13 of the *DSU* and held that accepting non-requested information from non-governmental sources was not incompatible with the provisions of the *DSU*. The Appellate Body began by emphasizing the "comprehensive nature" of a

[629] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.87.
[630] Panel Report on *Mexico – Telecoms*, para. 8.3.
[631] Appellate Body Report on *EC – Hormones*, para. 148.
[632] Panel Report on *US – Shrimp*, para. 7.8.

panel's authority to seek information in the context of a dispute:

> "The comprehensive nature of the authority of a panel to 'seek' information and technical advice from 'any individual or body' it may consider appropriate, or from 'any relevant source', should be underscored. This authority embraces more than merely the choice and evaluation of the *source* of the information or advice which it may seek. A panel's authority includes the authority to decide *not to seek* such information or advice at all. We consider that a panel also has the authority to *accept or reject* any information or advice which it may have sought and received, or to *make some other appropriate disposition* thereof. It is particularly within the province and the authority of a panel to determine *the need for information and advice* in a specific case, to ascertain the *acceptability* and *relevancy* of information or advice received, and to decide *what weight to ascribe to that information or advice* or to conclude that no weight at all should be given to what has been received.
>
> The thrust of Articles 12 and 13, taken together, is that the DSU accords to a panel established by the DSB, and engaged in a dispute settlement proceeding, ample and extensive authority to undertake and to control the process by which it informs itself both of the relevant facts of the dispute and of the legal norms and principles applicable to such facts. That authority, and the breadth thereof, is indispensably necessary to enable a panel to discharge its duty imposed by Article 11 of the DSU to 'make an objective assessment of the matter before it, including an *objective assessment of the facts of the case* and the *applicability of and conformity with the relevant covered agreements* . . . .' (emphasis added)"[633]

419. The Appellate Body on *US – Shrimp* subsequently held that the word "seek" in the phrase "seek information" should not be given an excessively "formal and technical" reading. The Appellate Body opined that given the breadth of a panel's mandate to seek information without "unduly delaying the panel process", "for all practical and pertinent purposes, the distinction between 'requested' and 'non-requested' information vanishes":

> "That the Panel's reading of the word 'seek' is unnecessarily formal and technical in nature becomes clear should an 'individual or body' first ask a panel for permission to file a statement or a brief. In such an event, a panel may decline to grant the leave requested. If, in the exercise of its sound discretion in a particular case, a panel concludes *inter alia* that it could do so without 'unduly delaying the panel process', it could grant permission to file a statement or a brief, subject to such conditions as it deems appropriate. The exercise of the panel's discretion could, of course, and perhaps should, include consultation with the parties to the dispute. In this kind of situation, for all practical and pertinent purposes, the distinction between 'requested' and 'non-requested' information vanishes.
>
> A panel has the discretionary authority either to accept and consider or to reject information and advice submitted to it, *whether requested by a panel or not*. The fact that a panel may *motu proprio* have initiated the request for information does not, by itself, bind the panel to accept and consider the information which is actually submitted. The amplitude of the authority vested in panels to shape the processes of fact-finding and legal interpretation makes clear that a panel will *not* be deluged, as it were, with non-requested material, *unless that panel allows itself to be so deluged*.
>
> Moreover, acceptance and rejection of the information and advice of the kind here submitted to the Panel need not exhaust the universe of possible appropriate dispositions thereof. The Panel suggested instead, that, if any of the parties wanted 'to put forward these documents, or parts of them, as part of their own submissions to the Panel, they were free to do so.' In response, the United States then designated Section III of the document submitted by CIEL/CMC as an annex to its second submission to the Panel, and the Panel gave the appellees two weeks to respond. We believe that this practical disposition of the matter by the Panel in this dispute may be detached, as it were, from the legal interpretation adopted by the Panel of the word 'seek' in Article 13.1 of the DSU. When so viewed, we conclude that the actual disposition of these briefs by the Panel does not constitute either legal error or abuse of its discretionary authority in respect of this matter. The Panel was, accordingly, entitled to treat and take into consideration the section of the brief that the United States appended to its second submission to the Panel, just like any other part of the United States pleading.
>
> . . .
>
> We find, and so hold, that the Panel erred in its legal interpretation that accepting non-requested information from non-governmental sources is incompatible with the provisions of the DSU. At the same time, we consider that the Panel acted within the scope of its authority under Articles 12 and 13 of the DSU in allowing any party to the dispute to attach the briefs by non-governmental organizations, or any portion thereof, to its own submissions."[634]

420. While in *US – Shrimp* the Appellate Body held that panels have the authority to accept so-called *amicus curiae* briefs (see paragraph 419 above), in *US – Lead and Bismuth II*, the Appellate Body recognized that it also had the authority to accept *amicus curiae* briefs, albeit on a different legal basis. See paragraphs 1043–1051 below.

---

[633] Appellate Body Report on *US – Shrimp*, paras. 104 and 106.
[634] Appellate Body Report on *US – Shrimp*, paras. 107–110.

421. The Appellate Body on *Japan – Agricultural Products II* agreed with the Panel's finding that "[I]n deciding whether a fact or claim can. . .be accepted, we consider that we are called upon to examine and weigh all the evidence validly submitted to us, including the opinions we received from the experts advising the Panel in accordance with Article 13 of the DSU." The Appellate Body recalled its statement about the "comprehensive nature" of a panel's authority to engage in fact finding; however, it emphasized that a panel could not use this authority so as to relieve a complaining party of its burden of proof and the concomitant duty to make a prima facie case. With respect to this aspect of the burden of proof issue, see paragraph 1000 below.

422. In *India – Quantitative Restrictions*, the Panel consulted with the IMF on India's balance-of-payments situation. In this context, the question arose whether in the light of Article XV:2, which speaks of consultations between the Contracting Parties and the IMF, a panel could engage in such consultations with the IMF. The United States, the complaining party, opined that the terms of Article XV:2 of *GATT 1994*, read as per paragraph 2(b) of the Incorporation Clause of *GATT 1994* in Annex 1A of the *WTO Agreement*, require the WTO to consult with the IMF in specific matters, and the WTO, by definition, includes panels. India, in contrast, argued that to interpret the terms of Article XV to refer to panels meant to ignore the division of functions between the different bodies of the WTO, and that only the General Council and the BOP Committee were covered by this provision. The Panel stated:

> "Article 13.1 of the DSU entitles the Panel to consult with the IMF in order to obtain any relevant information relating to India's monetary reserves and balance-of-payments situation which would assist us in assessing the claims submitted to us.
>
> . . . We do not find it necessary for the purposes of this case to decide the extent to which Article XV:2 may require panels to consult with the IMF or consider as dispositive specific determinations of the IMF. As will be seen in Section V.G *infra*, we accept in the circumstances of this case certain assessments of the IMF. In this regard, however, we note that whether or not the provisions of Article XV:2 extend to panels, the Panel has the responsibility of making an objective assessment of the facts of the case and the conformity with GATT 1994, as incorporated into the WTO Agreement, of the Indian measures at issue, in accordance with Article 11 of the DSU."[635]

423. For information relating to *amicus curiae* submissions, see Section XXXVI.G below.

(b) Right to disregard information submitted

424. In *US – Section 110(5) Copyright Act*, the Arbitrators decided to seek additional information from United States collective management organizations. One such organization submitted some of the information requested but attached a number of conditions concerning the use of that information, in particular the obligation for the Arbitrators to submit "any proposed public document" to its counsel in order for it to confirm that the confidentiality of the information submitted had been effectively protected. The Arbitrators understood that the term "any proposed public document" could actually apply to their Award. Therefore, pursuant to their Working Procedures and to general practice under public international law, the Arbitrators considered that "such a condition was incompatible with the confidentiality of their deliberations, which extends to the content of their report until it is made public". The Arbitrators also feared that such conditions, if they were to be accepted, could make access to evidence more difficult in future cases under the *DSU*. As a result, they decided not to use the information submitted.[636]

425. As regards the possibility of the panel's drawing adverse inferences, see Section XI.B.3(c) above.

(c) "A Member should respond promptly and fully to any request by a panel for such information as the panel considers necessary and appropriate"

426. The Appellate Body on *Canada – Aircraft* addressed the issue of the authority of a panel to request a party to a dispute to submit information concerning that dispute. The Appellate Body stated:

> "It is clear from the language of Article 13 that the discretionary authority of a panel may be exercised to request and obtain information, not just 'from any individual or body' within the jurisdiction of a Member of the WTO, but also from *any Member*, including *a fortiori* a Member who is a party to a dispute before a panel. This is made crystal clear by the third sentence of Article 13.1, which states: '*A Member* should respond promptly and fully to *any request by a panel for such information as the panel considers necessary and appropriate*.'"[637]

427. In *Canada – Aircraft*, Canada argued in its appeal that it was not legally bound to comply with the Panel's request to provide information relating to the disputed

[635] Panel Report on *India – Quantitative Restrictions*, para. 5.12–5.13. On the right/obligation to consult the IMF, see Appellate Body Report on *Argentina – Textiles and Apparel*, paras. 82–86.

[636] Award of the Arbitrators on *US – Section 110(5) Copyright Act*, para. 1.10.

[637] Appellate Body Report on *Canada – Aircraft*, para. 185.

financing of the subject transaction. The Appellate Body held:

> "[W]e are of the view that the word 'should' in the third sentence of Article 13.1 is, in the context of the whole of Article 13, used in a normative, rather a merely exhortative, sense. Members are, in other words, under a duty and an obligation to 'respond promptly and fully' to requests made by panels for information under Article 13.1 of the DSU."[638]

428. See also the discussion on adverse inferences in Section XI.B.3(c) above.

2. Article 13.2

(a) "seek information from any relevant source"

429. In *Argentina – Textiles and Apparel*, Argentina argued on appeal that the Panel had failed to make "an objective assessment of the matter" because it had not acceded to the request of the parties in seeking information from, and consulting with, the IMF concerning certain aspects of the statistical tax. The Appellate Body held that "[j]ust as a panel has the discretion to determine how to seek expert advice, so also does a panel have the discretion to determine whether to seek information or expert advice at all":

> "The DSU gives panels different means or instruments for complying with Article 11; among these is the right to 'seek information and technical advice' provided in Article 13 of the DSU.
>
> . . .
>
> Pursuant to Article 13.2 of the DSU, a panel may seek information from any relevant source and may consult experts to obtain their opinions on certain aspects of the matter at issue. This is a grant of discretionary authority: a panel is not duty-bound to seek information in each and every case or to consult particular experts under this provision. We recall our statement in *EC Measures Concerning Meat and Meat Products (Hormones)* that Article 13 of the DSU enables a panel to seek information and technical advice as it deems appropriate in a particular case, and that the DSU leaves 'to the sound discretion of a panel the determination of whether the establishment of an expert review group is necessary or appropriate.' Just as a panel has the discretion to determine how to seek expert advice, so also does a panel have the discretion to determine whether to seek information or expert advice at all.
>
> . . .
>
> In this case, we find that the Panel acted within the bounds of its discretionary authority under Articles 11 and 13 of the DSU in deciding not to seek information from, nor to consult with, the IMF."[639]

430. In *Australia – Automotive Leather II*, Australia argued that the United States was limited to relying on the facts and arguments set forth in its request for consultations. Australia argued that the requirement that the request for consultations "include a statement of available evidence" pursuant to Article 4.2 of the *SCM Agreement*, in conjunction with the expedited nature of proceedings, requires a panel to limit the complaining party to using the evidence and arguments set forth in the request for consultations. The Panel held that the expedited nature of the proceedings under Article 4 of the *SCM Agreement* did not limit the Panel's general right to seek information:

> "[W]e note that panels have, under Article 13.2 of the DSU, a general right to seek information 'from any relevant source'. Indeed, it is a common feature of panel proceedings for panellists to question parties about the facts and arguments underlying their positions. There is nothing in Article 4 of the SCM Agreement to suggest that this right is somehow limited by the expedited nature of dispute settlement proceedings conducted under that provision. If Australia's position were correct, a panel might be constrained from seeking out relevant information from the party, in this case the United States, that was limited to reliance on the facts set forth in its request for consultations. Similarly, under Australia's view, the defending party might introduce information during the panel proceedings, which the complaining party, in this case the United States, would not be able to rebut, as it would be limited to reliance on the facts set forth in its request for consultations. We do not believe Article 4.2 requires this result."[640]

431. The Appellate Body on *EC – Sardines* rejected the claim of the European Communities that the Panel had failed to conduct "an objective assessment of the facts of the case", as required by Article 11 of the *DSU*. The European Communities had alleged impropriety in relation to the Panel's decision not to seek information from the Codex Commission:

> "Article 13.2 of the DSU provides that '[p]anels may seek information from any relevant source and may consult experts to obtain their opinion on certain aspects of the matter.' This provision is clearly phrased in a manner that attributes discretion to panels, and we have interpreted it in this vein. Our statements in *EC – Hormones*, *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items* ("*Argentina – Textiles and Apparel*"),[641] and *US – Shrimp*, all support the conclusion that, under Article 13.2 of the DSU, panels enjoy

[638] Appellate Body Report on *Canada – Aircraft*, para. 187.
[639] Appellate Body Report on *Argentina – Textiles and Apparel*, paras. 82, 84 and 86.
[640] Panel Report on *Australia – Automotive Leather II*, para. 9.28.
[641] (*footnote original*) Appellate Body Report, WT/DS56/AB/R and Corr.1, adopted 22 April 1998, DSR 1998:III, 1003.

discretion as to *whether or not* to seek information from external sources.[642] In this case, the Panel evidently concluded that it did not need to request information from the Codex Commission, and conducted itself accordingly. We believe that, in doing so, the Panel acted within the limits of Article 13.2 of the DSU. A contravention of the duty under Article 11 of the DSU to make an objective assessment of the facts of the case cannot result from the due exercise of the discretion permitted by another provision of the DSU, in this instance Article 13.2 of the DSU."[643]

XIV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Confidentiality

1. Panel deliberations shall be confidential.

2. The reports of panels shall be drafted without the presence of the parties to the dispute in the light of the information provided and the statements made.

3. Opinions expressed in the panel report by individual panelists shall be anonymous.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

432. In *Brazil – Aircraft (Article 21.5 – Canada II)*, Brazil strongly objected to the alleged disclosure of its confidential statements to the representatives of private parties who were not members of Canada's delegation. Brazil submitted that the alleged disclosure by Canada was a serious breach of Canada's obligations to respect the rules of confidentiality contained in Article 14 of the *DSU* and paragraph 3 of the Panel's Working Procedures. According to Brazil, nothing in the Panel's Working Procedures or the *DSU* authorizes disclosure of confidential documents to persons who are not members of a delegation. The Panel held that it did not think that Article 14 of the *DSU* was relevant to this issue since it "focuses on panels and their obligations in respect of confidentiality; it does not address itself to the obligations of the parties in respect of confidentiality".[644]

XV. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15
Interim Review Stage

1. Following the consideration of rebuttal submissions and oral arguments, the panel shall issue the descriptive (factual and argument) sections of its draft report to the parties to the dispute. Within a period of time set by the panel, the parties shall submit their comments in writing.

2. Following the expiration of the set period of time for receipt of comments from the parties to the dispute, the panel shall issue an interim report to the parties, including both the descriptive sections and the panel's findings and conclusions. Within a period of time set by the panel, a party may submit a written request for the panel to review precise aspects of the interim report prior to circulation of the final report to the Members. At the request of a party, the panel shall hold a further meeting with the parties on the issues identified in the written comments. If no comments are received from any party within the comment period, the interim report shall be considered the final panel report and circulated promptly to the Members.

3. The findings of the final panel report shall include a discussion of the arguments made at the interim review stage. The interim review stage shall be conducted within the time-period set out in paragraph 8 of Article 12.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

1. Scope of the interim review

433. In *Australia – Salmon*, Australia had requested a review of the whole of the Panel's report during the interim review on the grounds that a large part of the legal reasoning of the interim report was not based on an objective assessment of the matter before the Panel and contained a number of factual inaccuracies and assertions not supported by evidence before the Panel. The Panel recalled that Article 15 provides for the review of "precise aspects" of the interim report and not of the whole of the report. The Panel therefore dismissed Australia's request.[645]

2. Confidentiality of interim reports

434. In *US – Steel Safeguards*, the Panel addressed the issue of the confidentiality of interim reports because it had discovered that the parties had not respected the

[642] (*footnote original*) In *EC – Hormones*, we stated that Article 13 of the DSU "enable[s] panels to seek information and advice as they deem appropriate in a particular case". (Appellate Body Report, *supra*, footnote, 17 para. 147.) In *Argentina – Textiles and Apparel*, we stated that, pursuant to Article 13.2 of the DSU, "just as a panel has the discretion to determine how to seek expert advice, so also does a panel have the discretion to determine whether to seek information or expert advice at all". (Appellate Body Report, *supra*, footnote 236, para. 84.) In *US – Shrimp*, we considered that "a panel also has the authority to *accept or reject* any information or advice which it may have sought and received, or to *make some other appropriate disposition* thereof. It is particularly within the province and the authority of a panel to determine *the need for information and advice* in a specific case." (Appellate Body Report, *supra*, footnote 50, para. 104) (original emphasis).

[643] Appellate Body Report on *EC – Sardines*, para. 302.

[644] Panel Report on *Canada – Aircraft (Article 21.5 – Canada II)*, footnote 13.

[645] Panel Report on *Australia – Salmon*, para. 7.3.

confidentiality obligation and had disclosed aspects of the interim reports:

> "[W]e would like to address the issue of confidentiality of the Interim Reports. When, on 26 March 2002, we transmitted our Interim Reports to the parties, we clearly indicated that such Reports were confidential. Indeed, pursuant to the DSU, all panel proceedings remain confidential until the Panel Report is circulated to WTO Members. We had also explicitly emphasized at all our meetings with the parties that the panel proceedings were confidential. This was accepted by the parties and reflected in the Panel's working procedures and in all our relevant correspondence with the parties. Therefore, we are concerned to discover that parties have not respected this confidentiality obligation and have disclosed aspects of the Panel's Interim Reports. We consider that this lack of respect of a specific requirement imposed by the DSU and the Panel's working procedures is regrettable and should not remain unmentioned."[646]

3. Introduction of new evidence at the interim review stage

435. In *EC – Sardines*, the Appellate Body explained that the interim review stage is not an appropriate time to introduce new evidence:

> "The interim review stage is not an appropriate time to introduce new evidence. We recall that Article 15 of the DSU governs the interim review. Article 15 permits parties, during that stage of the proceedings, to submit comments on the draft report issued by the panel,[647] and to make requests "for the panel to review precise aspects of the interim report".[648] At that time, the panel process is all but completed; it is only – in the words of Article 15 – 'precise aspects' of the report that must be verified during the interim review. And this, in our view, cannot properly include an assessment of new and unanswered evidence. . ."[649]

XVI. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16
Adoption of Panel Reports

1. In order to provide sufficient time for the Members to consider panel reports, the reports shall not be considered for adoption by the DSB until 20 days after the date they have been circulated to the Members.

2. Members having objections to a panel report shall give written reasons to explain their objections for circulation at least 10 days prior to the DSB meeting at which the panel report will be considered.

3. The parties to a dispute shall have the right to participate fully in the consideration of the panel report by the DSB, and their views shall be fully recorded.

4. Within 60 days after the date of circulation of a panel report to the Members, the report shall be adopted at a DSB meeting[7] unless a party to the dispute formally notifies the DSB of its decision to appeal or the DSB decides by consensus not to adopt the report. If a party has notified its decision to appeal, the report by the panel shall not be considered for adoption by the DSB until after completion of the appeal. This adoption procedure is without prejudice to the right of Members to express their views on a panel report.

(*footnote original*) [7] If a meeting of the DSB is not scheduled within this period at a time that enables the requirements of paragraphs 1 and 4 of Article 16 to be met, a meeting of the DSB shall be held for this purpose.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16[650]

1. Article 16.4

(a) Time-period under Article 16.4

436. On 2 December 2004, Australia, Brazil, Thailand and the European Communities requested that a meeting of the DSB be held on 13 December 2004 for the DSB to agree to postpone consideration of the Panel reports in *EC – Export Subsidies on Sugar* and to agree an extension of the corresponding time-period under Article 16.4 of the DSU until 31 January 2005. The request included the following procedural agreement reached by the parties concerned:

> "1. In order to take account of the end of year period, and to avoid inconveniencing the appeal procedure, the above parties agree that the 60 day time-period in Article 16.4 of the *Understanding on Rules and Procedures Governing the Settlement of Disputes* (DSU) as applicable to the above disputes will be extended to 31 January

[646] Panel Report on *US – Steel Safeguards*, para. 9.41.

[647] (*footnote original*) Article 15.1 of the DSU provides:

> Following the consideration of rebuttal submissions and oral arguments, the panel shall issue the descriptive (factual and argument) sections of its draft report to the parties to the dispute. Within a period of time set by the panel, the parties shall submit their comments in writing.

[648] (*footnote original*) Article 15.2 of the DSU provides:

> Following the expiration of the set period of time for receipt of comments from the parties to the dispute, the panel shall issue an interim report to the parties, including both the descriptive sections and the panel's findings and conclusions. Within a period of time set by the panel, *a party may submit a written request for the panel to review precise aspects of the interim report* prior to circulation of the final report to the Members. At the request of a party, the panel shall hold a further meeting with the parties on the issues identified in the written comments. If no comments are received from any party within the comment period, the interim report shall be considered the final panel report and circulated promptly to the Members. (emphasis added)

[649] Appellate Body Report on *EC – Sardines*, para. 301.

[650] As regards the status of adopted Panel reports, see paras. 80–81 of this Chapter.

2005, and that the agreement of the Dispute Settlement Body (DSB) to this extension will be sought at a meeting of the DSB to be requested for 13 December 2004.

2. This extension is agreed on the understanding that the rights of the parties to the disputes with respect to adoption or appeal of the panel reports are preserved, as if such adoption or appeal had been requested within the 60 days specified in Article 16.4 of the DSU.

3. The European Communities (EC) will file its notice of appeal of the panel reports in these disputes on 13 January 2005, provided the DSB agreement set out in paragraph 1 is obtained.

4. If for any reason the EC does not file its notice of appeal on 13 January 2005, the complainants may, individually or jointly, request a DSB meeting for adoption of the panel reports within the extended 60 day period.

5. The parties also agree that the complainants will request a second meeting of the DSB for 14 - December 2004 for the adoption of the panel reports within the original 60 day period should this prove necessary, but that this request will be withdrawn should the DSB agreement set out in paragraph 1 above be obtained."[651]

437. At the DSB meeting of 13 December 2004, the DSB took note of the request and agreed that it would adopt the Panel Reports, upon request, on or before 31 January 2005, unless the DSB decided otherwise by consensus not to do so or a party notified the DSB of its decision to appeal.[652]

XVII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17
Appellate Review

Standing Appellate Body

1. A standing Appellate Body shall be established by the DSB. The Appellate Body shall hear appeals from panel cases. It shall be composed of seven persons, three of whom shall serve on any one case. Persons serving on the Appellate Body shall serve in rotation. Such rotation shall be determined in the working procedures of the Appellate Body.

2. The DSB shall appoint persons to serve on the Appellate Body for a four-year term, and each person may be reappointed once. However, the terms of three of the seven persons appointed immediately after the entry into force of the WTO Agreement shall expire at the end of two years, to be determined by lot. Vacancies shall be filled as they arise. A person appointed to replace a person whose term of office has not expired shall hold office for the remainder of the predecessor's term.

3. The Appellate Body shall comprise persons of recognized authority, with demonstrated expertise in law, international trade and the subject matter of the covered agreements generally. They shall be unaffiliated with any government. The Appellate Body membership shall be broadly representative of membership in the WTO. All persons serving on the Appellate Body shall be available at all times and on short notice, and shall stay abreast of dispute settlement activities and other relevant activities of the WTO. They shall not participate in the consideration of any disputes that would create a direct or indirect conflict of interest.

4. Only parties to the dispute, not third parties, may appeal a panel report. Third parties which have notified the DSB of a substantial interest in the matter pursuant to paragraph 2 of Article 10 may make written submissions to, and be given an opportunity to be heard by, the Appellate Body.

5. As a general rule, the proceedings shall not exceed 60 days from the date a party to the dispute formally notifies its decision to appeal to the date the Appellate Body circulates its report. In fixing its timetable the Appellate Body shall take into account the provisions of paragraph 9 of Article 4, if relevant. When the Appellate Body considers that it cannot provide its report within 60 days, it shall inform the DSB in writing of the reasons for the delay together with an estimate of the period within which it will submit its report. In no case shall the proceedings exceed 90 days.

6. An appeal shall be limited to issues of law covered in the panel report and legal interpretations developed by the panel.

7. The Appellate Body shall be provided with appropriate administrative and legal support as it requires.

8. The expenses of persons serving on the Appellate Body, including travel and subsistence allowance, shall be met from the WTO budget in accordance with criteria to be adopted by the General Council, based on recommendations of the Committee on Budget, Finance and Administration.

Procedures for Appellate Review

9. Working procedures shall be drawn up by the Appellate Body in consultation with the Chairman of the DSB and the Director-General, and communicated to the Members for their information.

10. The proceedings of the Appellate Body shall be confidential. The reports of the Appellate Body shall be drafted without the presence of the parties to the dispute and in the light of the information provided and the statements made.

[651] WT/DS265/24, WT/DS266/24 and WT/DS283/5.
[652] WT/DSB/179, paras. 8 and 9.

11. Opinions expressed in the Appellate Body report by individuals serving on the Appellate Body shall be anonymous.

12. The Appellate Body shall address each of the issues raised in accordance with paragraph 6 during the appellate proceeding.

13. The Appellate Body may uphold, modify or reverse the legal findings and conclusions of the panel.

Adoption of Appellate Body Reports

14. An Appellate Body report shall be adopted by the DSB and unconditionally accepted by the parties to the dispute unless the DSB decides by consensus not to adopt the Appellate Body report within 30 days following its circulation to the Members.[8] This adoption procedure is without prejudice to the right of Members to express their views on an Appellate Body report.

(*footnote original*) [8] If a meeting of the DSB is not scheduled during this period, such a meeting of the DSB shall be held for this purpose.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

1. General

438. In *Canada – Periodicals*, the Appellate Body stressed that "a Panel finding that has not been specifically appealed in a particular case should not be considered to have been endorsed by the Appellate Body. Such a finding may be examined by the Appellate Body when the issue is raised properly in a subsequent appeal."[653]

2. Article 17.1

(a) Establishment of the Appellate Body

439. At its meeting of 10 February 1995, the DSB established the Appellate Body in accordance with Article 17.1 of the *DSU*.[654]

3. Article 17.2

(a) Appointment of Members of the Appellate Body

440. On 6 December 1994, the Preparatory Committee to the WTO approved its recommendations for the procedures for the appointment of Appellate Body members.[655] As of 31 December 2004, the members of the Appellate Body are Mr Georges M. Abi-Saab, Ms Merit E. Janow, Mr Luiz Olavo Baptista, Mr A. V. Ganesan, Mr John Lockart, Mr Giorgio Sacerdoti and Mr Yasuhei Taniguchi.

4. Article 17.5

(a) "In no case shall the proceedings exceed 90 days"

441. The following table shows the duration of the appeal review proceedings for those Reports circulated not later than 31 December 2004:

WT/DS No.	Case Name	Date of Notice of Appeal	Date of Circulation	No. of Days
DS2	*US – Gasoline*	21 February 1996	29 April 1996	68
DS8, DS10, DS11	*Japan – Alcoholic Beverages II*	8 August 1996	4 October 1996	57
DS18	*Australia – Salmon*	22 July 1998	20 October 1998	90
DS22	*Brazil – Desiccated Coconut*	16 December 1996	21 February 1997	67

DS276	*Canada – Wheat Exports and Grain Imports*	1 June 2004	30 August 2004	90

(b) Extension of deadline for circulation of Appellate Body Report

442. In *EC – Hormones*, the Appellate Body informed the DSB that it was not going to be able to circulate its Report on time, due to the exceptional nature of this case, the time needed for translation and the intervention of the Christmas holiday period. The Appellate Body announced that it expected to circulate its Report to WTO Members by Friday, 16 January 1998.[657] The appeal process thus lasted 114 days.

443. In *US – Lead and Bismuth II*, a Member of the Division hearing the appeal, Mr Christopher Beeby, passed away. Accordingly, the parties in the appeal (European Communities and the United States) agreed to a two-week extension of the 90-day time-limit for the consideration of the appeal and thus agreed that the Report would be circulated no later than 10 May 2000.[658] The appeal process thus lasted 104 days.

444. In *EC – Asbestos*, the Appellate Body informed the DSB that, due to the exceptional workload of the Appellate Body, and in the light of the agreement of the participants, Canada and the European Communities, the Appellate Body Report in this appeal would be circulated to WTO Members no later than Monday, 12 March 2001.[659] The appeal process thus lasted 140 days.

445. In *Thailand – H-Beams*, on 20 December 2001, the Appellate Body informed the DSB that, due to the exceptional workload of the Appellate Body, and in the light of the agreement of the participants in this appeal, the Appellate Body Report in the appeal would be circulated to Members of the WTO no later than 12 March 2001.[660] The appeal process thus lasted 140 days.

5. Article 17.6: scope of appellate review

(a) "issues of law . . . and legal interpretations"

(i) Factual findings versus legal findings

446. In *Canada – Periodicals*, the Appellate Body made reference to the limits of its mandate under Articles 17.6 and 17.13 as follows:

> "We are mindful of the limitation of our mandate in Articles 17.6 and 17.13 of the *DSU*. According to Article 17.6, an appeal shall be limited to issues of law covered in the Panel Report and legal interpretations developed by the Panel. The determination of whether imported and domestic products are 'like products' is a process by which legal rules have to be applied to facts. In any analysis of Article III:2, first sentence, this process is particularly delicate, since 'likeness' must be construed narrowly and on a case-by-case basis."[661]

447. In *EC – Bananas III*, the Appellate Body identified several findings of the Panel as being factual findings and thus outside its scope of review:

> "On the first issue, the Panel found that the procedural and administrative requirements of the activity function rules for importing third-country and non-traditional ACP bananas differ from, and go significantly beyond, those required for importing traditional ACP bananas. This is a factual finding. . . .
>
> . . .
>
> It is, however, evident from the terms of its finding that the Panel concluded, as a matter of fact, that the *de facto* discrimination did continue to exist after the entry into force of the GATS. This factual finding is beyond review by the Appellate Body. Thus, we do not reverse or

[656] Original Notice of Appeal filed on 2 October 2003 – withdrawn on 3 October 2003.
[657] Appellate Body Report on *EC – Hormones*, communication from the Appellate Body – WT/DS26/11, WT/DS48/9.
[658] Appellate Body Report on *US – Lead and Bismuth II*, para. 8.
[659] Appellate Body Report on *EC – Asbestos*, para. 8.
[660] Appellate Body Report on *Thailand – H-Beams*, para. 7.
[661] Appellate Body Report on *Canada – Periodicals*, p. 22.

modify the Panel's conclusion in paragraph 7.308 of the Panel Reports.

. . .

In our view, the conclusions by the Panel on whether Del Monte is a Mexican company, the ownership and control of companies established in the European Communities that provide wholesale trade services in bananas, the market shares of suppliers of Complaining Parties' origin as compared with suppliers of EC (or ACP) origin, and the nationality of the majority of operators that 'include or directly represent' EC (or ACP) producers, are all factual conclusions. Therefore, we decline to rule on these arguments made by the European Communities."[662]

448. In *EC – Hormones*, the Appellate Body made a distinction between factual[663] and legal findings and stressed that factual findings "are, in principle, not subject to [its] review":

"Under Article 17.6 of the DSU, appellate review is limited to appeals on questions of law covered in a panel report and legal interpretations developed by the panel. Findings of fact, as distinguished from legal interpretations or legal conclusions, by a panel are, in principle, not subject to review by the Appellate Body. The determination of whether or not a certain event did occur in time and space is typically a question of fact; for example, the question of whether or not Codex has adopted an international standard, guideline or recommendation on [one of the growth hormones at issue] is a factual question. . . . The consistency or inconsistency of a given fact or set of facts with the requirements of a given treaty provision is, however, a legal characterization issue. It is a legal question."[664]

449. In *Australia – Salmon*, the Appellate Body confirmed that "[t]he Panel's consideration and weighing of the evidence in support of [the] claims relates to its assessment of the facts and, therefore, falls outside the scope of appellate review under Article 17.6 of the DSU".[665]

450. The Appellate Body on *Korea – Alcoholic Beverages* further indicated that the panel's examination and weighing of the evidence submitted fall within the scope of its discretion as the trier of facts (in this regard, see Section XI.B.3(a)(ii) above):

"The Panel's examination and weighing of the evidence submitted fall, in principle, within the scope of the Panel's discretion as the trier of facts and, accordingly, outside the scope of appellate review. This is true, for instance, with respect to the Panel's treatment of the Dodwell Study, the Sofres Report and the Nielsen Study. We cannot second-guess the Panel in appreciating either the evidentiary value of such studies or the consequences, if any, of alleged defects in those studies. Similarly, it is not for us to review the relative weight ascribed to evidence on such matters as marketing studies, methods of production, taste, colour, places of consumption, consumption with 'meals' or with 'snacks', and prices."[666]

451. In *US – Wheat Gluten*, the Appellate Body again referred to the Panel as the trier of the facts (see Section XI.B.3(a)(ii) above) in respect of its discretion to consider the evidence in a given case and summarized its prior jurisprudence on the scope of review that the Appellate Body can undertake of the Panel's findings pursuant to Article 17.6 of the *DSU*:

"[W]e recall that, in previous appeals, we have emphasized that the role of the Appellate Body differs from the role of panels. Under Article 17.6 of the DSU, appeals are 'limited to *issues of law* covered in the panel report and *legal* interpretations developed by the panel'. (emphasis added) By contrast, we have previously stated that, under Article 11 of the DSU, panels are:

> . . . charged with the mandate to determine the *facts* of the case and to arrive at *factual findings*. In carrying out this mandate, a panel has the duty to examine and consider all the evidence before it, not just the evidence submitted by one or the other party, and to evaluate the relevance and probative force of each piece thereof.[667] (emphasis added)

We have also stated previously that, although the task of panels under Article 11 relates, in part, to its assessment of the *facts*, the question whether a panel has made an 'objective assessment' of the facts is a *legal* one, that may be the subject of an appeal.[668] (emphasis added) However, in view of the distinction between the respective roles of the Appellate Body and panels, we have taken care to emphasize that a panel's appreciation of the evidence falls, in principle, 'within the *scope of the panel's discretion as the trier of facts*'.[669] (emphasis added) . . . a panel's appreciation of the evidence falls, in

[662] Appellate Body Report on *EC – Bananas III*, paras. 206, 237 and 239.

[663] Examples of factual findings that the Appellate Body have refrained from reviewing are Appellate Body Report on *EC – Bananas III*, paras. 206, 237 and 239; Appellate Body Report on *Australia – Salmon*, paras. 259–261 (see para. 449 below); Appellate Body Report on *Japan – Agricultural Products II*, para. 98; Appellate Body Report on *India – Quantitative Restrictions*, paras. 143–144.

[664] Appellate Body Report on *EC – Hormones*, para. 132.

[665] Appellate Body Report on *Australia – Salmon*, para. 261.

[666] Appellate Body Report on *Korea – Alcoholic Beverages*, para. 161.

[667] (*footnote original*) Appellate Body Report, *Korea – Dairy Safeguard*, *supra*, footnote 29, para. 137.

[668] (*footnote original*) Appellate Body Report, *EC Measures Concerning Meat and Meat Products (Hormones)* ("*European Communities – Hormones*"), WT/DS26/AB/R, WT/DS48/AB/R, adopted 13 February 1998, DSR 1998:I, 135, at 183, para. 132.

[669] (*footnote original*) Appellate Body Report, *Korea – Taxes on Alcoholic Beverages* ("*Korea – Alcoholic Beverages*"), WT/DS75/AB/R, WT/DS84/AB/R, adopted 17 February 1999, paras. 161 and 162.

principle, 'within the *scope of the panel's discretion as the trier of facts*'.[670] (emphasis added) . . ."[671]

452. In *US – Section 211 Appropriations Act*, the Appellate Body considered that the examination by the Panel of the municipal law[672] of a WTO Member for the purpose of determining whether that Member has complied with its obligations under the WTO Agreement is a legal characterization by a panel and thus subject to review by the Appellate Body:

". . . the municipal law of WTO Members may serve not only as evidence of facts, but also as evidence of compliance or non-compliance with international obligations. Under the DSU, a panel may examine the municipal law of a WTO Member for the purpose of determining whether that Member has complied with its obligations under the *WTO Agreement*. Such an assessment is a legal characterization by a panel. And, therefore, a panel's assessment of municipal law as to its consistency with WTO obligations is subject to appellate review under Article 17.6 of the DSU."[673]

453. In *US – Softwood Lumber V*, the United States submitted that one of the issues raised by Canada on appeal – whether the United States' investigating authorities exercised its discretion in calculating wood chip offset revenue for Tembec in an "objective" and "even-handed" manner – was a factual issue and, accordingly, beyond the scope of appellate review. The Appellate Body first noted that the United States did not dispute the general proposition that an investigating authority must make its determinations in an objective and even-handed manner, as the Panel had found that the USDOC did in this case, but did not find such an obligation in Article 2.2.1.1 of the *Anti-Dumping Agreement*. The Appellate Body disagreed with the United States since, in its view, the issue raised by Canada was a question of law. For the Appellate Body, "[t]he fact that such an 'obligation [is] not found in Article 2.2.1.1' is not dispositive. Whether a particular approach of an investigating authority is, or is not, even-handed is, ultimately, a matter of the 'legal characterization'[674] of facts and, as such, a matter of law."[675]

(ii) Relevance of the characterization of a finding by the Panel

454. In *Chile – Price Band System*, the Appellate Body noted that the Panel's characterization of a finding "as a factual matter" does not mean that the issue is shielded from appellate review:

"[T]he Panel's characterization of its finding 'as a factual matter' does not mean that the issue whether Chile's price band system is a border measure similar to a variable import levy or a minimum import price is shielded from appellate review. This is a question of law, and not of fact, and thus is clearly within our jurisdiction under Article 17.6 of the DSU.[676] As we said in our Report in *EC – Hormones,* the assessment of the consistency or inconsistency of a given fact or set of facts with the requirements of a given treaty provision is an issue of legal characterization. The mere assertion by a panel that its conclusion is a 'factual matter' does not make it so. . . . All the same, in reviewing the Panel's assessment of Chile's price band system, we are mindful of the need to give due deference to the discretion of the Panel, as the 'trier of fact', to weigh the evidence before it."[677]

(iii) Statements of panels not amounting to "legal findings"

455. In *US – Wool Shirts and Blouses*, the Appellate Body declined to address a particular statement by the Panel appealed by India. The Appellate Body held that the statement was not a legal finding, but rather a "descriptive and gratuitous comment":

"India appealed the following statement relating to Article 6.10 of the *ATC* at paragraph 7.20 of the Panel Report:

> 'During the review process, the TMB is not limited to the initial information submitted by the importing Member as parties may submit additional and other information in support of their positions, which, *we understand*, may relate to subsequent events.' (emphasis added)

In our view, this statement by the Panel is purely a descriptive and gratuitous comment providing background concerning the Panel's understanding of how the TMB functions. We do not consider this comment by the Panel to be 'a legal finding or conclusion' which the Appellate Body 'may uphold, modify or reverse'.[678]"[679]

456. In *EC – Poultry*, the Appellate Body addressed the issue of the allocation of a tariff-rate quota share to a non-Member and the participation of non-Members in the "others" category of a tariff-rate quota. In this context the Appellate Body stated that it was mindful of the mandate under Article 17.6 of the *DSU* and held that,

[670] (*footnote original*) Appellate Body Report, *Korea – Taxes on Alcoholic Beverages* ("*Korea – Alcoholic Beverages*"), WT/DS75/AB/R, WT/DS84/AB/R, adopted 17 February 1999, paras. 161 and 162.

[671] Appellate Body Report on *US – Wheat Gluten*, paras. 150–151.

[672] As regards the consideration of municipal law by panels, see Section XI.B.3(b).

[673] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 106.

[674] Appellate Body Report, *EC – Hormones*, para. 132.

[675] Appellate Body Report on *US – Softwood Lumber V*, para. 163.

[676] (*footnote original*) Article 17.6 of the DSU provides: "An appeal shall be limited to issues of law covered in the panel report and legal interpretations developed by the panel."

[677] Appellate Body Report on *Chile – Price Band System*, para. 224.

[678] (*footnote original*) Within the meaning of Article 17.13 of the *DSU*.

[679] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 17.

contrary to Brazil's claim, the Panel had not made any legal findings on this issue:

> "It is true that in footnote 140 of the Panel Report, the Panel states that paragraph 7.75 of the *EC – Bananas* panel reports and 'particularly the use of the phrase "all suppliers other than Members with a substantial interest in supplying the product" . . . indicates that the *Banana III* panel did not take the view that allocation of quota shares to non-Members under Article XIII:2(d) was not permitted'. We do not consider this comment made in a footnote by the Panel to be either a 'legal interpretation developed by the panel' within the meaning of Article 17.6 of the DSU or a 'legal finding' or 'conclusion' that the Appellate Body may 'uphold, modify or reverse' under Article 17.13 of the DSU. It is undisputed in this case that there is no *allocation* of a country-specific share in the tariff-rate quota to a non-Member. There is, therefore, no finding nor any 'legal interpretation developed by the panel' that may be the subject of an appeal of which the Appellate Body may take cognizance."[680]

(iv) Review of new issues

457. In *EC – Tube or Pipe Fittings*, the Appellate Body rejected the European Communities' argument that a particular issue was not properly before the Appellate Body, stating that the issue was identified during the Panel proceedings.[681]

(v) Review of new arguments

458. In *Canada – Aircraft*, Brazil had raised an argument during the appellate review which it had not raised during the Panel review. The Appellate Body, although it found that this new argument was beyond the scope of appellate review, stated that "new arguments are not *per se* excluded from the scope of appellate review, simply because they are new":

> "In our view, this new argument raised by Brazil is beyond the scope of appellate review. Article 17.6 of the DSU provides that '[a]n appeal shall be limited to issues of law covered in the panel report and legal interpretations developed by the panel'. In principle, new arguments are not *per se* excluded from the scope of appellate review, simply because they are new. However, for us to rule on Brazil's new argument, we would have to solicit, receive and review new facts that were not before the Panel, and were not considered by it. In our view, Article 17.6 of the DSU manifestly precludes us from engaging in any such enterprise."[682]

459. The Appellate Body on *US – FSC* declined to address a "new" argument regarding double taxation under the last sentence of footnote 59 of the *SCM Agreement* because it considered that this new argument did not involve either an "issue of law covered in the panel report" or "legal interpretations developed by the panel":

> "The argument which the United States asks us to address under the fifth sentence of footnote 59 involves two separate legal issues: first, that the FSC measure is a measure 'to avoid double taxation of foreign-source income' within the meaning of footnote 59; and second, that, in consequence, the FSC measure is *excluded* from the prohibition in Article 3.1(a) of the *SCM Agreement* against export subsidies. In our view, examination of the substantive issues raised by this particular argument would be outside the scope of our mandate under Article 17.6 of the DSU, as this argument does not involve either an 'issue of law covered in the panel report' or 'legal interpretations developed by the panel'. The Panel was simply not asked to address the issues raised by the United States' new argument. Further, the new argument now made before us would require us to address legal issues quite different from those which confronted the Panel and which may well require proof of new facts. . . . We, therefore, decline to examine the United States' argument that the FSC measure is a measure 'to avoid double taxation' within the meaning of footnote 59, and we reserve our opinion on this issue."[683]

(vi) Review of new facts

460. In *US – Offset Act (Byrd Amendment)*, the Appellate Body stated that it had no authority to consider new facts on appeal:

> "Article 17.6 is clear in limiting our jurisdiction to issues of law covered in panel reports and legal interpretations developed by panels. We have no authority to consider new facts on appeal. The fact that the documents are 'available on the public record' does not excuse us from the limitations imposed by Article 17.6. We note that the other participants have not had an opportunity to comment on those documents and, in order to do so, may feel required to adduce yet more evidence. We would also be precluded from considering such evidence."[684]

(b) "Completing the analysis"

461. In *US – Gasoline*, the Appellate Body, further to reversing the Panel's conclusions on the first part of Article XX(g) of *GATT 1994* and having completed the Article XX(g) analysis in that case, examined the measure's consistency with the provisions of the chapeau of Article XX, based on the legal findings contained in the Panel Report.

462. In *Canada – Periodicals*, the Appellate Body reversed the Panel's findings on the issue of "like products" under Article III:2 of *GATT 1994*. The Appellate

---

[680] Appellate Body Report on *EC – Poultry*, para. 107.
[681] Appellate Body Report on *EC – Tube or Pipe Fittings*, paras. 183–184.
[682] Appellate Body Report on *Canada – Aircraft*, para. 211.
[683] Appellate Body Report on *US – FSC*, para. 103.
[684] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 222.

Body then addressed the question whether it could "complete the Panel's analysis", specifically whether it could proceed to make a determination whether the goods at issue were "directly competitive or substitutable" within the meaning of Article III:2, second sentence, of *GATT 1994*. The Appellate Body held that it could do so, noting that Article III:2, first sentence and Article III:2, second sentence were part of a "logical continuum":[685]

> "We are mindful of the limitation of our mandate in Articles 17.6 and 17.13 of the *DSU*. According to Article 17.6, an appeal shall be limited to issues of law covered in the Panel Report and legal interpretations developed by the Panel. The determination of whether imported and domestic products are 'like products' is a process by which legal rules have to be applied to facts. In any analysis of Article III:2, first sentence, this process is particularly delicate, since 'likeness' must be construed narrowly and on a case-by-case basis. We note that, due to the absence of adequate analysis in the Panel Report in this respect, it is not possible to proceed to a determination of like products.
>
> . . .
>
> We believe the Appellate Body can, and should, complete the analysis of Article III:2 of the GATT 1994 in this case by examining the measure with reference to its consistency with the second sentence of Article III:2, provided that there is a sufficient basis in the Panel Report to allow us to do so. The first and second sentences of Article III:2 are closely related. The link between the two sentences is apparent from the wording of the second sentence, which begins with the word 'moreover'. It is also emphasized in *AD* Article III, paragraph 2, which provides: 'A tax conforming to the requirements of the first sentence of paragraph 2 would be considered to be inconsistent with the provisions of the second sentence only in cases where . . .'. An examination of the consistency of Part V.1 of the Excise Tax Act with Article III:2, second sentence, is therefore part of a logical continuum.
>
> The Appellate Body found itself in a similar situation in *United States – Gasoline*. Having reversed the Panel's conclusions on the first part of Article XX(g) and having completed the Article XX(g) analysis in that case, the Appellate Body then examined the measure's consistency with the provisions of the chapeau of Article XX, based on the legal findings contained in the Panel Report.[686]
>
> As the legal obligations in the first and second sentences are two closely-linked steps in determining the consistency of an internal tax measure with the national treatment obligations of Article III:2, the Appellate Body would be remiss in not completing the analysis of Article III:2. In the case at hand, the Panel made legal findings and conclusions concerning the first sentence of Article III:2, and because we reverse one of those findings, we need to develop our analysis based on the Panel Report in order to issue legal conclusions with respect to Article III:2, second sentence, of the GATT 1994."[687]

463. In *EC – Hormones*, the Appellate Body, having reversed the Panel's findings under Article 5.5 of the *SPS Agreement*, refused to complete the analysis by examining the measure under Article 5.6. According to the Appellate Body; it "cannot be assumed that all the findings of fact necessary to proceed to a determination of consistency or inconsistency of the EC measures with the requirements of Article 5.6 have been made by the Panel".[688]

464. In *EC – Poultry*, the Appellate Body, referring to its previous rulings on *US – Gasoline* and *Canada – Periodicals*, held that, having reversed the Panel's finding on Article 5.1(b) of the *Agreement on Agriculture*, it should complete its analysis of the c.i.f. import price by making a finding with respect to the consistency of the EC regulation with Article 5.5, which was not addressed by the Panel for reasons of judicial economy:

> "We are aware of the provisions of Article 17 of the DSU that state our jurisdiction and our mandate. Article 17.6 of the DSU provides: 'An appeal shall be limited to issues of law covered in the panel report and legal interpretations developed by the panel'. Article 17.13 of the DSU states: 'The Appellate Body may uphold, modify or reverse the legal findings and conclusions of the panel.' In certain appeals, however, the reversal of a panel's finding on a legal issue may require us to make a finding on a legal issue which was not addressed by the panel. This occurred, for example, in the appeals in *United States – Standards for Reformulated and Conventional Gasoline*[689] and in *Canada – Certain Measures Concerning Periodicals*.[690] And, in this appeal, as we have reversed the Panel's finding on Article 5.1(b), we believe we should complete our analysis of the c.i.f. import price by making a finding with respect to the consistency of the EC regulation with Article 5.5, which was not addressed by the Panel for reasons of judicial economy."[691]

465. In *Australia – Salmon*, the Appellate Body noted that "[b]ecause the Panel finds that the difference in the level of protection in respect of the three natural hormones, when used for growth promotion purposes, and the level of protection in respect of natural hormones present endogenously in meat and other foods is unjus-

[685] Appellate Body Report on *US – Gasoline*, pp. 22–29.
[686] (*footnote original*) WT/DS2/AB/R, adopted 20 May 1996, pp. 22–29.
[687] Appellate Body Report on *Canada – Periodicals*, pp. 24–26.
[688] Appellate Body Report on *EC – Hormones*, para. 222.
[689] (*footnote original*) Adopted 20 May 1996, WT/DS2/AB/R, pp. 13–29.
[690] (*footnote original*) Adopted 30 July 1997, WT/DS31/AB/R, pp. 23–24.
[691] Appellate Body Report on *EC – Poultry*, para. 156.

tifiable, the Panel regards it as unnecessary to decide whether the difference in the levels of protection set by the European Communities in respect of natural hormones used as growth promoters and in respect of the same hormones when used for therapeutic or zootechnical purposes, is justified". The Appellate Body then decided to complete the Panel's analysis:

> "In certain appeals, when we reverse a panel's finding on a legal issue, we may examine and decide an issue that was not specifically addressed by the panel, in order to complete the legal analysis and resolve the dispute between the parties. This occurred, for example, in the appeals in *United States – Gasoline*, *Canada – Certain Measures Concerning Periodicals*, *European Communities – Measures Affecting the Importation of Certain Poultry Products ('European Communities – Poultry')*, and *United States – Import Prohibition of Certain Shrimp and Shrimp Products*.
>
> As we have reversed the Panel's finding that the SPS measure at issue, erroneously identified as the heat-treatment requirement, is not based on a risk assessment, we believe that – to the extent possible on the basis of the factual findings of the Panel and/or of undisputed facts in the Panel record – we should complete the legal analysis and determine whether the actual SPS measure at issue, i.e., Australia's *import prohibition* on fresh, chilled or frozen ocean-caught Pacific salmon, is based on a risk assessment."[692]

466. In *Argentina – Footwear (EC)*, the Appellate Body upheld the conclusions of the Panel that Argentina's investigation in that case was inconsistent with the requirements of Articles 2 and 4 of the *Agreement on Safeguards*. The Appellate Body then stated that, as there was no legal basis for the safeguard measure at issue, it was not necessary to complete the analysis:

> "As a consequence, there is *no legal basis* for the safeguard measures imposed by Argentina. For this reason, we do not believe that it is necessary to complete the analysis of the Panel relating to the claim made by the European Communities under Article XIX of the GATT 1994 by ruling on whether the Argentine authorities have, in their investigation, demonstrated that the increased imports in this case occurred 'as a result of unforeseen developments'."[693]

467. In *Korea – Dairy*, the Appellate Body considered the European Communities' request that the Appellate Body complete the Panel's reasoning and find that by imposing a safeguard measure in circumstances where the alleged increase in imports was not "as a result of unforeseen developments" within the meaning of Article XIX:1(a) of *GATT 1994*, Korea also violated its obligations under Article XIX of the *GATT 1994*. The Appellate Body declined to do so, noting there were insufficient factual findings:

> "In the absence of any factual findings by the Panel or undisputed facts in the Panel record relating to whether the alleged increase in imports was, indeed, 'a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .', we are not in a position, within the scope of our mandate set forth in Article 17 of the DSU, to complete the analysis and make a determination as to whether Korea acted inconsistently with its obligations under Article XIX:1(a). Accordingly, we are unable to come to a conclusion on whether or not Korea violated its obligations under Article XIX:1(a) of the GATT 1994."[694]

468. The Appellate Body on *Korea – Dairy* also noted that in determining whether Korea violated the second sentence of Article 5.1 of the *Agreement on Safeguards*, it would have to determine whether the quantitative restrictions imposed by Korea were below the average level of imports in the last three representative years for which statistics were available, and if so, whether Korea had given a reasoned explanation as required by the second sentence of Article 5.1. Similarly, with regard to its conclusions referenced in paragraph 467 above, the Appellate Body held that it did not have a sufficient factual basis on which to complete the analysis:

> "The Panel did not make any factual findings on the average level of imports of skimmed milk powder preparations in the last three representative years. The average level of imports in that period was also contested by the parties. Accordingly, we are not in a position, within the scope of our mandate under Article 17 of the DSU, to complete the analysis in this case and make a determination as to the consistency of Korea's safeguard measure with the second sentence of Article 5.1."[695]

469. Similarly, the Appellate Body in *Canada – Autos* could not complete the Panel's analysis in the absence of sufficient facts in the Panel's record:

> "In *Australia – Salmon*, we stated that where we have reversed a finding of a panel, we should attempt to complete a panel's legal analysis 'to the extent possible on the basis of the factual findings of the Panel and/or of undisputed facts in the Panel record'. Here, as we have stated, the Panel did not identify the precise levels of the CVA requirements applicable to specific manufacturers. In addition, there are not sufficient undisputed facts in the Panel record that would enable us to examine this issue ourselves. As a result, it is impossible for us to assess whether the use of domestic over imported goods is a condition 'in law' for satisfying the CVA requirements,

[692] Appellate Body Report on *Australia – Salmon*, paras. 117–118.
[693] Appellate Body Report on *Argentina – Footwear (EC)*, para. 98.
[694] Appellate Body Report on *Korea – Dairy*, para. 92.
[695] Appellate Body Report on *Korea – Dairy*, para. 102.

and, therefore, is a condition for receiving the import duty exemption."[696]

470. In *EC – Asbestos*, the Appellate Body specified the conditions under which it would hold itself competent to "complete the analysis" of a panel. It held that it would do so when there were sufficient factual findings made by the Panel and the additional analysis required was "closely related" to the findings actually made by the Panel. Finally, the Appellate Body noted that the rules it would have had to apply, had it decided to "complete the analysis" in the present case, would have meant applying provisions which had "not previously been the subject of any interpretation or application by either panels or the Appellate Body". Ultimately, the Appellate Body decided not to complete the panel's analysis in this respect:

"As we have reached a different conclusion from the Panel's regarding the applicability of the *TBT Agreement* to the measure, we now consider whether it is appropriate for us to rule on the claims made by Canada relating to the *TBT Agreement*. In previous appeals, we have, on occasion, completed the legal analysis with a view to facilitating the prompt settlement of the dispute, pursuant to Article 3.3 of the DSU.[697] However, we have insisted that we can do so only if the factual findings of the panel and the undisputed facts in the panel record provide us with a sufficient basis for our own analysis. If that has not been the case, we have not completed the analysis.[698]

The need for sufficient facts is not the only limit on our ability to complete the legal analysis in any given case. In *Canada – Periodicals*, we reversed the panel's conclusion that the measure at issue was inconsistent with Article III:2, first sentence, of the GATT 1994, and we then proceeded to examine the United States' claims under Article III:2, second sentence, which the panel had not examined at all. However, in embarking there on an analysis of a provision that the panel had not considered, we emphasized that 'the first and second sentences of Article III:2 are *closely related*' and that those two sentences are "part of a *logical continuum*."[699] (emphasis added)

In this appeal, Canada's outstanding claims were made under Articles 2.1, 2.2, 2.4 and 2.8 of the *TBT Agreement*. We observe that, although the *TBT Agreement* is intended to 'further the objectives of GATT 1994', it does so through a specialized legal regime that applies solely to a limited class of measures. For these measures, the *TBT Agreement* imposes obligations on Members that seem to be *different* from, and *additional* to, the obligations imposed on Members under the GATT 1994.

As the Panel decided not to examine Canada's four claims under the *TBT Agreement*, it made no findings, at all, regarding any of these claims. Moreover, the meaning of the different obligations in the *TBT Agreement* has not previously been the subject of any interpretation or application by either panels or the Appellate Body. Similarly, the provisions of the Tokyo Round *Agreement on Technical Barriers to Trade*, which preceded the *TBT Agreement* and which contained obligations similar to those in the *TBT Agreement*, were also never the subject of even a single ruling by a panel."[700]

471. Similarly, in *US – Hot-Rolled Steel*, the Appellate Body could not complete the analysis of the Panel:

"In these circumstances, Japan requests that we rule on its claim, under Article 2.4 of the *Anti-Dumping Agreement*, that, in relying on downstream sales, USDOC failed to make proper 'allowances' in respect of the additional costs and profits of the downstream sellers, reflected in the price of these sales. . . .

. . .

[696] Appellate Body Report on *Canada – Autos*, para. 145.

[697] (*footnote original*) See, for instance, Appellate Body Report, *United States – Gasoline*, *supra*, footnote 15, at 18 ff; Appellate Body Report, *Canada – Certain Measures Concerning Periodicals* ("*Canada – Periodicals*"), WT/DS31/AB/R, adopted 30 July 1997, DSR 1997:I, 449, at 469 ff; Appellate Body Report, *EC Measures Concerning Meat and Meat Products (Hormones)* ("*European Communities – Hormones*"), WT/DS26/AB/R, WT/DS48/AB/R, adopted 13 February 1998, paras. 222 ff; Appellate Body Report, *European Communities – Measures Affecting the Importation of Certain Poultry Products*, WT/DS69/AB/R, adopted 23 July 1998, paras. 156 ff; Appellate Body Report, *Australia – Measures Affecting Importation of Salmon* ("*Australia – Salmon*"), WT/DS18/AB/R, adopted 6 November 1998, paras. 117 ff, 193 ff and 227 ff; Appellate Body Report, *United States – Shrimp*, *supra*, footnote 14, paras. 123 ff; Appellate Body Report, *Japan – Measures Affecting Agricultural Products*, WT/DS76/AB/R, adopted 19 March 1999, paras. 112 ff; Appellate Body Report, *United States – Tax Treatment for "Foreign Sales Corporations"*, WT/DS108/AB/R, adopted 20 March 2000, paras. 133 ff; Appellate Body Report, *Canada – Measures Affecting the Export of Civilian Aircraft, Recourse by Brazil to Article 21.5 of the DSU*, WT/DS70/AB/RW, adopted 4 August 2000, paras. 43 ff; and Appellate Body Report, *United States – Definitive Safeguard Measures on Imports of Wheat Gluten from the European Communities* ("*United States – Wheat Gluten*"), WT/DS166/AB/R, adopted 19 January 2001, paras. 80 ff and 127 ff.

In addition, after modifying the panel's reasoning, we have, on occasion, applied our interpretation of the legal provisions at issue to the facts of the case (see, for instance, Appellate Body Report, *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items*, WT/DS56/AB/R, adopted 22 April 1998, paras. 48 ff; Appellate Body Report, *Canada – Measures Affecting the Importation of Milk and the Exportation of Dairy Products*, WT/DS103/AB/R, WT/DS113/AB/R, adopted 27 October 1999, paras. 138 ff; Appellate Body Report, *Argentina – Safeguard Measures on Imports of Footwear*, WT/DS121/AB/R, adopted 12 January 2000, paras. 109 ff).

[698] (*footnote original*) See Appellate Body Report, *Australia – Salmon*, *supra*, footnote 48, paras. 209 ff, 241 ff and 255; Appellate Body Report, *Korea – Definitive Safeguard Measure on Imports of Certain Dairy Products*, WT/DS98/AB/R, adopted 12 January 2000, paras. 91 ff and 102 ff; Appellate Body Report, *Canada – Certain Measures Affecting the Automotive Industry*, WT/DS139/AB/R, WT/DS142/AB/R, adopted 19 June 2000, paras. 133 ff and 144 ff; Appellate Body Report, *Korea – Measures Affecting Imports of Fresh, Chilled and Frozen Beef* ("*Korea – Beef*"), WT/DS161/AB/R, WT/DS169/AB/R, adopted 10 January 2001, paras. 128 ff.

[699] (*footnote original*) *Supra*, footnote 48, at 469.

[700] Appellate Body Report on *EC – Asbestos*, paras. 78–81.

> Our examination of this issue must be based on the factual findings of the Panel or uncontested facts in the Panel record. As the Panel did not examine this issue, and as the parties do not agree on the relevant facts, we find that there is not an adequate factual record for us to complete the analysis by examining Japan's claim under Article 2.4 of the *Anti-Dumping Agreement*."[701]

472. Also in *Canada – Dairy (Article 21.5 – New Zealand and US)*, the Appellate Body could not complete the Panel's analysis in the absence of factual findings in the record:

> "[T]he Panel did not find it necessary to make any factual findings on the costs of production and the facts relating to this issue were not the subject of agreement between the parties. Moreover, the Panel proceedings were conducted without the parties arguing their case, or the Panel making enquiries, from the perspective of the average total cost of production standard we have adopted.
>
> In these circumstances, we are unable to complete the analysis by determining whether the supply of CEM involves 'payments' under Article 9.1(c) of the *Agreement on Agriculture*. Yet, we do not wish to be understood as holding that the supply of CEM does *not* involve 'payments' under Article 9.1(c). We are simply not in a position to make a ruling on this issue."[702]

473. In *US – Section 211 Appropriations Act*, on the contrary, the Appellate Body found sufficient factual findings in the record of the Panel so as to be able to complete its analysis:

> "In the past, we have completed the analysis where there were sufficient factual findings in the panel report or undisputed facts in the panel record to enable us to do so, and we have not completed the analysis where there were not. In one instance, we declined to complete the analysis with respect to a 'novel' issue that had not been argued in sufficient detail before the panel.
>
> . . .
>
> [W]e conclude that the Panel record contains sufficient factual findings and facts undisputed between the participants to permit us to complete the analysis regarding the consistency of Sections 211(a)(2) and (b) – in respect of trade names – with Article 2.1 of the *TRIPS Agreement* in conjunction with Article 2(1) of the Paris Convention (1967) and Article 3.1 of the *TRIPS Agreement,* with Article 4 of the *TRIPS Agreement*, with Article 42 of the *TRIPS Agreement,* and with Article 2.1 of that Agreement in conjunction with Article 8 of the Paris Convention (1967)."[703]

474. In *US – Steel Safeguards*, the Appellate Body, after considering whether it needed to complete the Panel's analysis, decided that it was not necessary.[704]

475. In *US – Softwood Lumber IV*, the Appellate Body could not complete the Panel's analysis in the absence of sufficient factual findings:

> "[W]e are unable to complete the legal analysis of Canada's claim that the United States acted inconsistently with Article 14(d) of the *SCM Agreement*. We observe, in this regard, that panels sometimes make alternative factual findings that serve to assist the Appellate Body in completing the legal analysis should it disagree with legal interpretations developed by the panel, but this is not the case in the Panel Report before us."[705]

6. Article 17.9: Working procedures of the Appellate Body

(a) "Working procedures shall be drawn up by the Appellate Body"

476. In this regard, see Section XXXII below.

7. Article 17.11: concurring opinions (Rule 3.2)

477. In *EC – Asbestos*, one Member of the Division hearing the appeal made a concurring statement regarding the findings on "like product" in the Appellate Body Report:

> "One Member of the Division hearing this appeal wishes to make a concurring statement. At the outset, I would like to make it abundantly clear that I agree with the findings and conclusions reached, and the reasoning set out in support thereof, by the Division, in: Section V (*TBT Agreement*); Section VII (Article XX(b) of the GATT 1994 and Article 11 of the DSU); Section VIII (Article XXIII:1(b) of the GATT 1994); and Section IX (Findings and Conclusions) of the Report. This concurring statement, in other words, relates only to Section VI ("Like Products" in Article III:4 of the GATT 1994) of the Report.
>
> More particularly, in respect of Section VI of the Report, I join in the findings and conclusions set out in: paragraphs 116, 126, 128, 131, 132, 141, 147 and 148. I am bound to say that, in truth, I agree with a great deal more than just the bare findings and conclusions contained in these eight paragraphs of the Report. It is, however, as a practical matter, not feasible to sort out and identify which part of which paragraph, of the sixty-odd paragraphs comprising Section VI of our Report in which I join. Nor is it feasible to offer a detailed statement with respect to the portions that would then remain. Accordingly, I set out only two related matters below.
>
> . . .

---

[701] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 174 and 180.
[702] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, paras. 235–236.
[703] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 343 and 352.
[704] Appellate Body Report on *US – Steel Safeguards*, paras. 430–431.
[705] Appellate Body Report on *US – Softwood Lumber IV*, para. 118.

> . . . Moreover, in future concrete contexts, the line between a 'fundamentally' and 'exclusively' economic view of 'like products' under Article III:4 may well prove very difficult, as a practical matter, to identify. It seems to me the better part of valour to reserve one's opinion on such an important, indeed, philosophical matter, which may have unforeseeable implications, and to leave that matter for another appeal and another day, or perhaps other appeals and other days. I so reserve my opinion on this matter."[706]

478. As regards dissenting/separate opinions in panel reports, see Section XI.B.7 above. For separate opinions in Article 22.6 arbitrations, see Section XXII.B.9(d) below.

8. Article 17.13: "may uphold, modify or reverse the legal findings and conclusions of the panel"

479. In *US – Wool Shirts and Blouses*, the Appellate Body refused to examine a given statement by the Panel on the grounds that "this statement by the Panel is purely a descriptive and gratuitous comment providing background concerning the Panel's understanding of how the TMB functions. We do not consider this comment by the Panel to be 'a legal finding or conclusion' which the Appellate Body 'may uphold, modify or reverse'" within the meaning of Article 17.13 of the *DSU*.[707]

480. In *Canada – Periodicals*, the Appellate Body made reference to the limits of its mandate under Articles 17.6 and 17.13. See paragraph 446 above.

481. In *EC – Poultry*, the Appellate Body refused to address a certain issue raised on appeal on the grounds that they did "not consider this comment made in a footnote by the Panel to be either a 'legal interpretation developed by the panel' within the meaning of Article 17.6 of the DSU or a 'legal finding' or 'conclusion' that the Appellate Body may 'uphold, modify or reverse' under Article 17.13 of the DSU".[708]

XVIII. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Communications with the Panel or Appellate Body

1. There shall be no *ex parte* communications with the panel or Appellate Body concerning matters under consideration by the panel or Appellate Body.

2. Written submissions to the panel or the Appellate Body shall be treated as confidential, but shall be made available to the parties to the dispute. Nothing in this Understanding shall preclude a party to a dispute from disclosing statements of its own positions to the public. Members shall treat as confidential information submitted by another Member to the panel or the Appellate Body which that Member has designated as confidential. A party to a dispute shall also, upon request of a Member, provide a non-confidential summary of the information contained in its written submissions that could be disclosed to the public.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

1. Article 18.2

(a) Disclosure of "written submissions"

(i) Difference between "submissions" and "statements"

482. In *Argentina – Poultry Anti-Dumping Duties*, Brazil informed the Panel of its intention to make its first written submission (except the exhibits) available to the public, after providing Argentina with an opportunity to indicate whether the submission should be revised to exclude any information deemed confidential. Argentina objected and submitted that a Member is only entitled to disclose written statements of its position. According to Argentina, Article 18.2 of the *DSU* draws a clear distinction between "written submissions" and position "statements". The Panel disqualified Argentina's interpretation as being formalistic:

> "On substance, we agree with Canada that Argentina's interpretation[709] of Article 18.2 of the *DSU* results in a formalistic distinction between the terms 'written submission' and 'statement'. In doing so, Argentina negates that a party's written submissions to a panel necessarily contain statements of that party's positions. In our view, the first two sentences of Article 18.2 of the *DSU* should not be read in formalistic isolation of one another. Read together, and in context of one another, the first two sentences of Article 18.2 of the *DSU* mean that while one party shall not disclose the submissions of another party, each party is entitled to disclose statements of its own positions, subject to the confidentiality requirement set forth in the third sentence of Article 18.2 of the *DSU*. We recall that a party's written submissions to a panel necessarily contain statements of that party's positions. In our view, therefore, disclosing submissions to a panel is one way for a party to disclose statements of its positions. If a party chooses to make public the totality of the statements of its own position contained in its written submission, it is entitled to do so, provided the confidentiality requirement of the third

[706] Appellate Body Report on *EC – Asbestos*, paras. 149–150 and 154.
[707] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 17 and footnote 26.
[708] Appellate Body Report on *EC – Poultry*, para. 107.
[709] (*footnote original*) We are referring to the arguments set forth in Argentina's submission of 15 August 2002.

sentence of Article 18.2 of the *DSU* is respected. Since Argentina has not argued that Brazil violated its confidentiality obligation, we do not consider that Brazil's decision to disclose the entirety of the statements of position contained in its first written submission to the Panel (excluding exhibits) was inconsistent with Article 18.2 of the *DSU*."[710]

(ii) Timing of the disclosure

483. Subsequently, in the proceedings in *Argentina – Poultry Anti-Dumping Duties*, Argentina withdrew its objection to the disclosure of Brazil's written submission. However, it did not agree with the timing of that disclosure. According to Argentina, Brazil should not have revealed its submissions until after publication of the Panel report. The Panel again disagreed with Argentina on this point since, in its view, Article 18.2 of the *DSU* does not impose any time-limits for the disclosure:

"Furthermore, we note that, by the time of our first substantive meeting with the parties, Argentina was no longer arguing that Brazil was not entitled to make the entirety of its written submissions to the Panel available to the public during the Panel proceedings. Implicitly, therefore, Argentina ultimately agreed that Brazil was entitled to make its written submission available to the public pursuant to Article 18.2 of the *DSU*. Although Argentina argued that Brazil should not have done so until after publication of the Panel's report, we find no basis for this argument in Article 18.2 of the *DSU*. Article 18.2 sets no temporal limits on Members' rights and obligations under that provision. Nor do we find any basis for this argument in paragraph 11 of the Panel's Working Procedures, which concerns the preparation of the descriptive part of the Panel's report.[711] We see nothing in this provision which would impose any limits on rights accruing to Members under Article 18.2 of the *DSU*."[712]

(b) Non-confidential versions of written submissions

484. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues, the Panel dealt with the United States' request to require production of non-confidential versions of written submissions within 14 days following the filing of the written submissions. The Panel responded as follows:

"The Panel recalls that, although the production of a non-confidential summary is mandatory upon request by any WTO Member, it is also WTO practice for panels to leave parties to agree on the date for production of such summaries, if any deadline is to apply. Accordingly, the Panel urges the parties to agree as early as possible on deadlines for production of such non-confidential summaries so as to ensure that appropriate information relating to the present dispute is disclosed to the public."[713]

(c) Business confidential information (BCI)

485. In *Canada – Aircraft*, the Panel adopted special Procedures Governing Business Confidential Information that went beyond the protection afforded by Article 18.2 of the *DSU*. The Procedures state that the Business Confidential Information is to be stored in a safe in a locked room at the premises of the relevant Geneva missions, with restrictions imposed on access to the locked room and safe. The Procedures also provide for either party to visit the other party's Geneva mission and review the proposed location of the safe and propose any changes. In a subsequent submission, Canada stated that it could not submit BCI under the revised Procedures because they did not provide the requisite level of protection. The Panel stated:

"[T]he important distinction between the 4 November 1998 Procedures, and the final Procedures, is that the latter would facilitate the work of the parties in preparing themselves for these 'fast-track' proceedings, without impairing the protection afforded to the substance of the BCI. The timetable of the proceedings is such that party representatives would be likely to spend large periods of time in Geneva. As noted above, Canada itself has recognised the need for a party to have 'reasonable access' to BCI submitted by the other party. In the context of a fast-track case in particular, we do not consider that there is 'reasonable access' to the BCI if a party is required to adjust its work in respect of that BCI to the official working hours of the WTO Secretariat, excluding evenings and weekends. Under the final Procedures, authorised representatives of the parties would have had the convenience of access to the BCI of the other party at any time of day or night, rather than during the working hours of the WTO Secretariat. In our view, the final Procedures therefore strike a reasonable balance between (1) the need for 'reasonable access' to BCI by the Panel and the other disputing parties, and (2) the need to provide private business

[710] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.14.

[711] (*footnote original*) Paragraph 11 of the Panel's Working Procedures provides that "[t]he descriptive part of the Panel's report will include the procedural and factual background to the present dispute. There will be no description of the main arguments of the parties and third parties as such. Instead, the Panel will attach the parties' submissions (including first and second written submissions, written versions of the first and second oral statements, and each parties' replies to questions from the other party and from the Panel) to its report. Upon request of a party, specific portions of a submission designated by that party as confidential at the time of its submission will not be included in the submission attached to the Panel's report."

[712] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.15.

[713] Panel Report on *US – Steel Safeguards*, para. 5.3.

interests with adequate protection for their proprietary business information."[714]

486. In *Canada – Aircraft* and *Brazil – Aircraft*, the Appellate Body made a preliminary ruling on 11 June 1999 that it was not necessary to adopt additional procedures to protect business confidential information in the appellate proceeding. The Appellate Body held that the existing provisions concerning confidentiality of dispute settlement proceedings were sufficient for the purposes at issue:

"Pursuant to Article 17.9 of the *Understanding on Rules and Procedures Governing the Settlement of Disputes* (the 'DSU'), the Appellate Body has the authority to draw up its own Working Procedures. Under Rule 16.1 of our *Working Procedures for Appellate Review*, a Division of the Appellate Body may adopt additional procedures for the orderly conduct of a particular appeal, provided that any such additional procedures are not inconsistent with the DSU, the other covered agreements and the *Working Procedures for Appellate Review*. We have concluded, however, that it is not necessary, under all the circumstances of this case, to adopt *additional* procedures to protect 'business confidential information' during these appellate proceedings.

We note that, with respect to 'business confidential information' submitted to the Panel that remains currently in the possession of the participants, Article XII of the Panel Procedures Governing Business Confidential Information required the parties, '[a]t the conclusion of the Panel', to 'return any printed or binary-encoded Business Confidential information in their possession to the party that submitted such Business Confidential (sic)' and to 'destroy all tapes and transcripts of the Panel hearings that contain Business Confidential information, unless the parties mutually agree otherwise.' It thus appears that each participant has an obligation, under the Panel Procedures, to return any Business Confidential information submitted by the other participant. The WTO Secretariat, assisting the Panel, was required, by the Panel Procedures, to 'transmit any printed or binary-encoded Business Confidential information, plus all tapes and transcripts of the panel hearings that contain Business Confidential Information, to the Appellate Body as part of the record of the Panel proceedings.' That information will be kept in a secure, locked cabinet in the Appellate Body Secretariat.

We also note that *all* Members are obliged, by the provisions of the DSU, to treat these proceedings of the Appellate Body, including written submissions and other documents filed by the participants and the third participants, as confidential. We are confident that the participants and the third participants in this appeal will *fully respect* their obligations under the DSU, recognizing that a Member's obligation to maintain the confidentiality of these proceedings extends also to the individuals whom that Member selects to act as its representatives, counsel and consultants.

Accordingly, we decline the request of Brazil and Canada. The reasons for this ruling will be set out more fully in the Appellate Body Report in this appeal."[715]

487. In its final ruling in *Canada – Aircraft*, the Appellate Body determined that it had no further reasons to add to the first two paragraphs of its preliminary ruling, referenced in paragraph 486 above. Noting that its ruling applies only to the request for additional procedures to protect business confidential information, the Appellate Body stated:

"[T]he provisions of Articles 17.10 and 18.2 apply to all Members of the WTO, and oblige them to maintain the confidentiality of any submissions or information submitted, or received, in an Appellate Body proceeding. Moreover, those provisions oblige Members to ensure that such confidentiality is fully respected by any person that a Member selects to act as its representative, counsel or consultant.

. . .

For these reasons, we do not consider that it is necessary, under all the circumstances of this case, to adopt *additional* procedures for the protection of business confidential information in these appellate proceedings."[716]

488. In *EC – Bananas III (US) (Article 22.6 – EC)*, the United States requested the Arbitrators to establish procedures for the handling of business confidential information similar to those established in several pending panel procedures.[717] Under the United States proposal, there would be two levels of BCI: regular BCI and super BCI. Regular BCI was described as company-specific information that was non-public and sensitive, but that could be extrapolated from other public and non-public information available to governments and the company's competitors. Super BCI was described as non-public, sensitive company-specific information that could not be so extrapolated.[718] The European Communities objected to the proposal on the grounds that working procedures on confidentiality should not be adopted on a case-by-case basis, but rather by WTO Members as a whole.[719] The Arbitrators finally adopted BCI procedures where, while agreeing with the United States that special rules were justified in light of the type

[714] Panel Report on *Canada – Aircraft*, para. 9.68.
[715] Appellate Body Report on *Canada – Aircraft*, para. 141 and Appellate Body Report on *Brazil – Aircraft*, para. 119.
[716] Appellate Body Report on *Canada – Aircraft*, paras. 145 and 147 and Appellate Body Report on *Brazil – Aircraft*, paras. 123 and 125.
[717] The United States referred to the Panel Report on *Brazil – Aircraft*; Panel Report on *Canada – Aircraft*; Panel Report on *Australia – Automotive Leather II*.
[718] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, paras. 2.2–2.3.
[719] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 2.4.

of information involved, they did not accept the need for special treatment of super BCI.[720]

489. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Brazil insisted in the course of the proceedings on the confidentiality of certain documents it had provided to the Arbitrators. The Arbitrators, who were mindful of the serious problems that could be caused by the disclosure of certain commercial or financial information, decided to prepare two versions of their report. The first version, including the details of their calculations and all the information relied upon, was issued exclusively to the parties on a confidential basis. The second version, in which the most commercially sensitive information had been removed, was circulated to the Members.[721]

490. In *Canada – Wheat Exports and Grain Imports*, the Panel, in a preliminary ruling,[722] having rejected the parties' specific proposals for the protection of confidential information, adopted its own procedures for the protection of such information.[723]

(d) Confidentiality implications of private counsel's intervention[724]

(i) General

491. In *Thailand – H-Beams*, an industry association submitted an *amicus* brief which cited Thailand's confidential submission. Thailand then claimed that Poland's private counsel might have violated WTO rules of confidentiality by providing Thailand's submission to the said association. Although Poland and the lawyer concerned denied the alleged breach of confidentiality, the Appellate Body rejected the *amicus* brief in a preliminary ruling:

> "The terms of Article 17.10 of the DSU are clear and unequivocal: '[t]he proceedings of the Appellate Body shall be confidential'. Like all obligations under the DSU, this is an obligation that all Members of the WTO, as well as the Appellate Body and its staff, must respect. WTO Members who are participants and third participants in an appeal are fully responsible under the DSU and the other covered agreements for any acts of their officials as well as their representatives, counsel or consultants. We emphasized this in *Canada – Measures Affecting the Export of Civilian Aircraft*, WT/DS70/AB/R, para. 145, where we stated that:
>
> > . . . the provisions of Articles 17.10 and 18.2 apply to all Members of the WTO, and oblige them to maintain the confidentiality of any submissions or information submitted, or received, in an Appellate Body proceeding. Moreover, *those provisions oblige Members to ensure that such confidentiality is fully respected by any person that a Member selects to act as its representative, counsel or consultant.* (emphasis added)
>
> We note that Poland has made substantial efforts to investigate this matter, and to gather information from its legal counsel, Hogan & Hartson L.L.P. We note as well the responses from the third participants, the European Communities, Japan and the United States. Furthermore, Poland has accepted the proposal made by Hogan & Hartson L.L.P. to withdraw as Poland's legal counsel in this appeal. On the basis of the responses we have received from Poland and from the third participants, and on the basis of our own examination of the facts on the record in this appeal, we believe that there is *prima facie* evidence that CITAC received, or had access to, Thailand's appellant's submission in this appeal.
>
> We see no reason to accept the written brief submitted by CITAC in this appeal. Accordingly, we have returned this brief to CITAC."[725]

492. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* rejected Brazil's arguments that Canada had acted inconsistently with the requirements of the *DSU* or the Panel's working procedures by providing advisers who were not designated as members of its delegation with access to information submitted to the Panel by Brazil. A member of the Canadian delegation at a meeting of the Panel with the parties had provided a copy of Brazil's written version of its oral statement to persons who were not members of its delegation. Further, Canada had "shared [Brazil's submissions and statements] with members of a private law firm retained by a Canadian aircraft manufacturer".[726] The Panel advised as follows:

> "In our view, it emerges from [Article 18.2 of the DSU] that Canada must keep confidential all information submitted to this Panel by Brazil.[727] However, as the Appellate Body has noted, 'a Member's obligation to maintain the confidentiality of [. . .] proceedings extends *also* to the individuals whom that Member selects to act as its representatives, counsel and consultants.'[728] Thus, the

[720] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 2.5.

[721] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 2.13–2.14.

[722] For more information about preliminary rulings, see Section XXXVI.C.

[723] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.8.

[724] As regards other aspects of the intervention by private counsels in WTO dispute settlement proceedings, see Section XXXVI.E below.

[725] Appellate Body Report on *Thailand – H-Beams*, para. 74.

[726] (*footnote original*) Canada's Response to Panel Question 31 (Annex A-4).

[727] (*footnote original*) This is subject, of course, to the provisions of the last sentence of Article 18.2 of the *DSU*, which allow a party to panel proceedings to disclose to the public non-confidential summaries of the information contained in the written submissions of the other party, if such summaries are requested.

[728] (*footnote original*) Original Appellate Body Report on *Canada – Aircraft*, *supra*, para. 141 (emphasis added). The Appellate Body made the quoted statement in respect of appellate review proceedings. We do not see, however, why the same reasoning should not extend, by analogy, to panel proceedings.

Appellate Body clearly assumed that Members may provide confidential information also to *non*-government advisors.

We see nothing in Article 18.2 of the *DSU*, or any other provision of the *DSU*,[729] to suggest that Members may share such confidential information with non-government advisors only if those advisors are members of an official delegation at a panel meeting.[730] Indeed, paragraph 13 of this Panel's Working Procedures expressly provides that:

> The parties and third parties to this proceeding have the right to determine the composition of their own delegations. Delegations may include, as representatives of the government concerned, private counsel and advisers. The parties and third parties shall have responsibility for all members of their delegations and shall ensure that all members of their delegations, *as well as any other advisors consulted by a party* or third party, act in accordance with the rules of the DSU and the working procedures of this Panel, particularly in regard to confidentiality of the proceedings. Parties shall provide a list of the participants of their delegation before or at the beginning of the meeting with the Panel. (emphasis added)

It is apparent from the second and third sentences of paragraph 13 of the Working Procedures that the 'other advisors' referred to are advisors who are *not* part of a Member's delegation at a panel meeting. It is equally clear to us that paragraph 13 is based on the premise that parties to panel proceedings *may* give their 'other advisors' access to confidential information submitted by the other party.[731] Were it otherwise, there would be no point in requiring parties to safeguard the confidentiality of panel proceedings in respect of such 'other advisors'.[732]

On the basis of the foregoing, we are unable to accept Brazil's argument that Canada acted inconsistently with the requirements of the *DSU* or this Panel's Working Procedures by giving advisors not designated as members of its delegation access to information submitted to this Panel by Brazil.[733]

In reaching this conclusion, we note, however, that, pursuant to paragraph 13 of the Working Procedures, Canada must ensure that any advisors who were not members of its official delegation respect the confidentiality of the present proceedings."[734]

493. In relation to the involvement of private lawyers, the Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* indicated that it had no basis for questioning a confidentiality agreement between the relevant private lawyers and the Canadian Government. For the Panel, confidentiality rules are not to be used by a panel to "stifle" necessary communication between Member governments and their advisers, provided adequate safeguards are in place.

> "We note Canada's statement that the members of the law firm which have had access to Brazil's submissions have been part of its litigation team and have served as 'advisors' to the Government of Canada. Since no members of a private law firm were part of Canada's delegation to the meeting of the Panel with the parties, the private lawyers Canada says were advising it fall within the 'other advisors' category within the meaning of paragraph 13 of the Panel's Working Procedures. It was (and is), therefore, the responsibility of Canada to ensure that those private lawyers maintain the confidentiality of the documents submitted by Brazil.
>
> Based on Canada's representations, we also understand that the law firm in question has an attorney-client relationship with a Canadian regional aircraft manufacturer. We think that the dual role performed by the law firm – as advisor to the Government of Canada and attorney for a Canadian regional aircraft manufacturer – places the law firm in a particularly delicate position as far as the protection of Brazil's submissions, statements and exhibits is concerned.[735] In our view, it is crucial, in such circumstances, that Canada put in place appropriate safeguards to ensure non-disclosure of confidential information.
>
> . . .
>
> We agree that maintaining confidentiality in accordance with the obligations of the *DSU* is important. On the other

[729] (*footnote original*) Contrary to Brazil, we do not think that Article 14 of the *DSU* is relevant to the issue before us. Article 14 focuses on panels and their obligations in respect of confidentiality; it does not address itself to the obligations of the parties in respect of confidentiality.

[730] (*footnote original*) The following statement by the Panel in *Korea – Alcoholic Beverages* supports this view:

> We note that written submissions of the parties which contain confidential information may, in some cases, be provided to non-government advisors who are not members of an official delegation at a panel meeting. The duty of confidentiality extends to all governments that are parties to a dispute and to all such advisors *regardless of whether they are designated as members of delegations and appear at a panel meeting.* (Panel Report on *Korea – Alcoholic Beverages*, *supra*, para. 10.32, emphasis added)

[731] (*footnote original*) Brazil is correct in pointing out that paragraph 13 does not *expressly* authorize disclosure of confidential information to "other advisors", but, in our view, it does so by implication. We stress, however, that paragraph 13 talks about "advisors" and not other members of the public, such as private parties interested in the outcome of particular panel proceedings.

[732] (*footnote original*) We note that there is nothing in the other paragraphs of this Panel's Working Procedures to suggest that confidential information may be disclosed to non-government advisors only if those advisors are members of an official delegation to a panel meeting.

[733] (*footnote original*) It should be pointed out that Brazil did not, in these proceedings, submit any business confidential information.

[734] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 3.5–3.10.

[735] (*footnote original*) We recall that Brazil's concern is with the confidentiality of its arguments and statements. Business confidential information, which might require other procedures and safeguards, is not, as already mentioned, involved in this situation.

hand, in applying the rules on confidentiality we must be careful not to stifle necessary communication between Member governments and their advisors, as long as appropriate safeguards are in place. In the absence of arguments and evidence to the contrary, we have no basis for questioning Canada's representation that the relevant private lawyers are subject to a confidentiality agreement with the Government of Canada.[736]"[737]

(ii) Joint representation

494. The Panel in *EC – Tariff Preferences* addressed the issue of whether the joint representation of the complaining party and a third party by the same legal counsel (in this regard, see Section XXXVI.E.3 below on conflict of interest) breached any confidentiality rules under the *DSU*. The Panel considered that all Members involved in the dispute settlement process have the obligation of ensuring confidentiality as required under Article 18.2 and Article 14.1 as well as the Working Procedures of the *DSU*. The Panel also noted that this obligation extended to all representatives of the parties, including their legal counsel:

"Although the European Communities does not specify which provision(s) of the DSU may be of concern, the Panel considers that the most relevant DSU rule that could be implicated is Article 18.2, whose first sentence states that '[w]ritten submissions to the panel or the Appellate Body shall be treated as confidential, but shall be made available to the parties to the dispute'. A related rule is Article 14.1 of the DSU which provides that '[p]anel deliberations shall be confidential'. Article 10 of the DSU and paragraph 12 of the Working Procedures, Appendix 3 to the DSU, which set out steps of the panel's work, could also be implicated, as third parties are permitted limited participation at various stages of panel proceedings, as compared to the parties. In particular, third parties are not provided the right to participate in the interim review process under either Article 10 or the Working Procedures. In the view of the Panel, Article 18.2 of the DSU would be the more typical and relevant rule, where third parties only receive the first submissions of the parties to the Panel and only participate in a single, special third-party session.

As a general matter, the Panel considers that Members involved in the dispute settlement process have the obligation of ensuring confidentiality, as required by Article 18.2, Article 14.1[738] and the Working Procedures, regardless of who serves as their legal counsel. Needless to say, this obligation of Members involved in the dispute settlement process must be respected by all of their representatives, including legal counsel. In addition, as a general professional discipline, it is the responsibility of counsel to maintain the confidentiality of all communications between it and the party (or third party) it represents. In this regard, the Panel again notes that bar associations in many jurisdictions have elaborated rules of conduct dealing explicitly with confidentiality between clients and their legal counsel.[739]"[740]

495. The Panel in *EC – Tariff Preferences* further considered that the issue of confidentiality did not arise thanks to the enhanced third-party rights given to all third parties during the proceedings. The Panel also considered that the European Communities had not provided evidence demonstrating any disclosure of confidential information by the legal counsel to the third party that it simultaneously represented:

"In this dispute, India argues that the issue of confidentiality does not arise for India and Paraguay because of the enhanced rights granted to all third parties. On the other hand, the European Communities responds that the problem is mitigated but not totally disposed of, as there is still the possibility of access to Panel documents, including the Interim Report by third party Paraguay, due to the use of the same legal counsel.[741] However, the Panel considers that due to the enhanced third-party rights pursuant to which all third parties receive all submissions of the parties to the Panel and participate in all meetings of the Panel with the parties, Paraguay was actually accorded the right to share all submissions and Panel documents which were distributed before the end of the Second Substantive Meeting of the Panel. After the Panel's Second Substantive Meeting, no third party was given further enhanced right to participate in the process and, particularly, to influence the Panel's Findings. Paraguay has not gained any litigation advantage over other third parties in this dispute through its use of the same legal counsel as India. The Panel also notes that the European Communities has not provided any argument or evidence to indicate that in fact there is a disclosure of confidential information, including the Interim Report of the Panel, to Paraguay due to the joint representation of India and Paraguay by the same legal counsel. Under such circumstances, the Panel finds that the confidentiality issue has not arisen in this dispute."[742]

---

[736] (*footnote original*) Since Brazil has not responded to Canada's argument that the private lawyers in question are subject to a confidentiality agreement, there are no grounds for assuming that that agreement inadequately protects confidential information.

[737] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 3.11–3.15.

[738] (*footnote original*) It could be argued that the Interim Report of a panel constitutes part of its "deliberations" before it is finalized and issued to the parties.

[739] (*footnote original*) See, e.g., American Bar Association, Model Rules of Professional Conduct, Rule 1.6; New York State Bar Association, Lawyer's Code of Professional Responsibility, DR 4–101; Canadian Bar Association, Code of Professional Conduct, Chapter IV; Law Society of Upper Canada, Rules of Professional Conduct, Rule 2.03; Council of the Bars and Law Societies of the European Union, Code of Conduct for Lawyers in the European Union, Rules 2.3; Bar of England and Wales, Code of Conduct, Rules 603, 608 and 702.

[740] Panel Report on *EC – Tariff Preferences*, paras. 7.15–7.16.

[742] Panel Report on *EC – Tariff Preferences*, para. 7.17.

XIX. ARTICLE 19

A. TEXT OF ARTICLE 19

Article 19
Panel and Appellate Body Recommendations

1. Where a panel or the Appellate Body concludes that a measure is inconsistent with a covered agreement, it shall recommend that the Member concerned[9] bring the measure into conformity with that agreement.[10] In addition to its recommendations, the panel or Appellate Body may suggest ways in which the Member concerned could implement the recommendations.

(*footnote original*) [9] The "Member concerned" is the party to the dispute to which the panel or Appellate Body recommendations are directed.
(*footnote original*) [10] With respect to recommendations in cases not involving a violation of GATT 1994 or any other covered agreement, see Article 26.

2. In accordance with paragraph 2 of Article 3, in their findings and recommendations, the panel and Appellate Body cannot add to or diminish the rights and obligations provided in the covered agreements.

B. INTERPRETATION AND APPLICATION OF ARTICLE 19

1. Article 19.1

(a) "bring the measure into conformity with that agreement"

(i) Measure in force

496. In *India – Autos*, the Panel noted that Article 19 "envisages a situation where a violation *is* in existence".[743]

497. In *Chile – Price Band System*, the Panel remarked that, pursuant to Article 19.1, "a panel is required to make the recommendation to bring a measure which it has found inconsistent into conformity *if* that measure is still in force. Conversely, when a panel concludes that a measure *was* inconsistent with a covered agreement, the said recommendation cannot and should not be made."[744]

(ii) Measure no longer in existence

498. In *US – Certain EC Products*, the Panel had recommended that the DSB request the United States to bring its measure into conformity with its obligations under the WTO Agreement.[745] However, the Appellate Body, having upheld the Panel's finding that the "measure at issue in this dispute [was] no longer in existence", concluded that the Panel's recommendation was incongruent:

> "[T]here is an obvious inconsistency between the finding of the Panel that 'the 3 March Measure is no longer in existence' and the subsequent recommendation of the Panel that the DSB request that the United States bring its 3 March Measure into conformity with its WTO obligations. The Panel erred in recommending that the DSB request the United States to bring into conformity with its WTO obligations a measure which the Panel has found no longer exists."[746]

499. In *Chile – Price Band System*, the Panel refrained from issuing recommendations on the grounds that the measures at issue were no longer in existence. The Panel however considered that this fact did not preclude it from making *findings* on those measures if such considerations were necessary to secure a positive solution to the dispute. In particular, the Panel stated that:

> "Article 19.1 DSU would not prevent us from making *findings* regarding the consistency of an expired provisional safeguard measure, if we were to consider that the making of such findings is necessary 'to secure a positive solution' to the dispute. We would not, however, formulate *recommendations* with regard to those measures."[747]

(iii) Relevance of events that occurred during the proceedings

500. In *India – Autos*, the Panel noted that certain events occurred in the course of the proceedings that had affected the existence or persistence of the alleged violations whereby the respondent had requested such events be taken into account when making recommendations under Article 19.1. In these circumstances, the Panel felt that it would not be making an "objective assessment of the matter before it", had it chosen not to address the impact of events that took place in the course of the proceedings, in assessing the appropriateness of making a recommendation under Article 19.1.[748]

(b) "the panel . . . may suggest ways in which the Member concerned could implement the recommendation"

(i) Panel's discretion to suggest ways to implement

General

501. In *US – Steel Plate*, the Panel indicated that it was "free to suggest ways in which we believe the [defendant] could appropriately implement our recommendation".[749]

---

[743] Panel Report on *India – Autos*, para. 8.15.
[744] Panel Report on *Chile – Price Band System*, para. 7.112.
[745] Panel Report on *US – Certain EC Products*, para. 7.3.
[746] Appellate Body Report on *US – Certain EC Products*, para. 81. See also para. 129.
[747] Panel Report on *Chile – Price Band System*, para. 7.112. See also para. 7.124.
[748] Panel Report on *India – Autos*, paras. 8.27–8.28.
[749] Panel Report on *US – Steel Plate*, para. 8.8. See also Panel Report on *US – Softwood Lumber VI*, para. 8.8.

502. In *US – Softwood Lumber V*, the Panel considered that "[b]y virtue of Article 19.1, panels have discretion ('may') to suggest ways in which a Member could implement the relevant recommendation. However, a panel is not required to make a suggestion should it not deem it appropriate to do so."[750]

503. As regards the effect of a finding of violation of Article 3.1 of the *SCM Agreement* on the Panel's discretion to suggest ways to implement, in light of the Article 4.7 of the *SCM Agreement* withdrawal requirement, see Section III.B.1(e) of the Chapter on the *SCM Agreement*. See also paragraph 534 below.

Suggestions made by Panel of ways to implement

504. In *US – Underwear*, the Panel recommended the DSB to request the United States bring its measure into compliance with United States obligations under the *Agreement on Textiles and Clothing* by removing the measure inconsistent with the United States' obligation. The Panel went further in suggesting the following:

> "We find that such compliance can best be achieved and further nullification and impairment of benefits accruing to Costa Rica under the ATC best be avoided by prompt removal of the measure inconsistent with the obligations of the United States. We further suggest that the United States bring the measure challenged by Costa Rica into compliance with US obligations under the ATC by immediately withdrawing the restriction imposed by the measure."[751]

505. In *EC – Bananas III (Article 21.5 – Ecuador)*, the Panel made the following recommendations to the European Communities to bring its banana import regime into conformity with WTO rules after noting that previous implementation attempts had been only partly successful:

> "First, the European Communities could choose to implement a tariff-only system for bananas, without a tariff quota. This could include a tariff preference (at zero or another preferential rate) for ACP bananas. If so, a waiver for the tariff preference may be necessary unless the need for a waiver is obviated, for example, by the creation of a free-trade area consistent with Article XXIV of GATT. This option would avoid the need to seek agreement on tariff quota shares.
>
> Second, the European Communities could choose to implement a tariff-only system for bananas, with a tariff quota for ACP bananas covered by a suitable waiver.
>
> Third, the European Communities could maintain its current bound and autonomous MFN tariff quotas, either without allocating any country-specific shares or allocating such shares by agreement with all substantial suppliers consistently with the requirements of the chapeau to Article XIII:2. The MFN tariff quota could be combined with the extension of duty-free treatment (or preferential duties) to ACP imports."[752]

506. In *India – Patents (US)*, the Panel declined the United States' request to the Panel to suggest the manner in which India should implement its obligation, since in its opinion it would have impaired India's right to choose how to implement the TRIPS Agreement pursuant to Article 1.1.[753] However it did suggest that India take into account the interests of persons who would have filed patent applications if India had had an appropriate mechanism in place:

> "[I]n establishing a mechanism that preserves novelty and priority in respect of applications for product patents in respect of pharmaceutical and agricultural chemical inventions during the transitional period, India should take into account the interests of those persons who would have filed patent applications had an appropriate mechanism been maintained since the expiry of the Patents Ordinance 1994, as well as those who have already filed such applications under that Ordinance or the administrative practices currently in place."[754]

507. In *Guatemala – Cement I*, the Panel concluded that Guatemala had violated the provisions of the *Anti-Dumping Agreement* by initiating an investigation when there was not sufficient evidence to justify such an initiation under Article 5.3 of the Agreement. Therefore it suggested that the anti-dumping measure be revoked. The Panel stated:

> "[T]he entire investigation rested on an insufficient basis, and therefore should never have been conducted. This is, in our view, a violation which cannot be corrected effectively by any actions during the course of the ensuing investigation. Therefore, we suggest that Guatemala revoke the existing anti-dumping measure on imports of Mexican cement, because, in our view, this is the only appropriate means of implementing our recommendation."[755]

508. In *India – Quantitative Restrictions*, the Panel suggested that a reasonable period of time be granted to India in order to remove the imports restrictions which were not justified under Article XVIII:B. The Panel also brought to the attention of the DSB some factors to be taken into consideration that had an added importance for the principle of special and differential treatment. The Panel suggested

[751] Panel Report on *US – Underwear*, para. 8.3.
[752] Panel Report on *EC – Bananas III (Article 21.5 – Ecuador)*, paras. 6.155–6.158.
[753] Panel Report on *India – Patents (US)*, para. 5.65.
[754] Panel Report on *India – Patents (US)*, para. 6.2.
[755] Panel Report on *Guatemala – Cement I*, para. 8.6.

> "that the parties negotiate an implementation/phase-out period. Should it be impossible for them to do so, we suggest that the reasonable period of time, whether determined by arbitration (Article 21.3(c) of the DSU) or other means, be set in light of the above-listed factors."[756]

509. In *US – Lead and Bismuth II*, the European Communities had requested the Panel "to suggest that the United States amend its countervailing duty laws to recognize the principle that a privatization at market price extinguishes subsidies". However, according to the Panel, the European Communities had not identified any provision of the United States' law that required the imposition of countervailing duties in the circumstances of the present dispute. Thus, the Panel was unable to make the suggestion requested by the European Communities. However it noted that the United States had continued to apply its change-in-ownership methodology during the course of the dispute. It therefore suggested

> "that the United States takes all appropriate steps, including a revision of its administrative practices, to prevent the aforementioned violation of Article 10 of the SCM Agreement from arising in the future."[757]

510. In *Guatemala – Cement II*, the Panel suggested that Guatemala revoke its anti-dumping measure on imports of grey Portland cement from Mexico. However, it declined Mexico's request that the Panel suggest to Guatemala that it should refund the anti-dumping duties:

> "In respect of Mexico's request that we suggest that Guatemala refund the anti-dumping duties collected, we note that Guatemala has now maintained a WTO-inconsistent anti-dumping measure in place for a period of three and a half years. . . . Mexico's request raises important systemic issues regarding the nature of the actions necessary to implement a recommendation under Article 19.1 of the DSU, issues which have not been fully explored in this dispute. Thus, we decline Mexico's request to suggest that Guatemala refund the anti-dumping duties collected."[758]

511. In *US – Cotton Yarn*, Pakistan requested the Panel to suggest that the most appropriate way for the United States to implement the Panel's ruling would be to rescind the safeguard action forthwith. The Panel agreed and held as follows:

> "In this case, we recommend that the Dispute Settlement Body request that the United States bring the measure at issue into conformity with its obligations under the ATC. We suggest that this can best be achieved by prompt removal of the import restriction."[759]

512. In *US – Offset Act (Byrd Amendment)*, the Panel considered that, "although there could potentially be a number of ways in which the United States could bring the [concerned measure] into conformity", it found it "difficult to conceive of any method which would be more appropriate and/or effective than the repeal of the . . . measure". Therefore, the Panel suggested that the United States repeal the WTO-inconsistent measures.[760]

513. In *Argentina – Poultry Anti-Dumping Duties*, the Panel "[could] not perceive how Argentina could properly implement [the] recommendation without revoking the anti-dumping measure at issue in this dispute. Accordingly, [the Panel suggested] that Argentina repeals Resolution No. 574/2000 imposing definitive anti-dumping measures on eviscerated poultry from Brazil."[761]

Panel declines to suggest ways to implement

514. In *India – Patents (US)*, the Panel declined the United States' request to the Panel to suggest a manner in which India should implement its obligation, since in its opinion it would impair India's right to choose how to implement the TRIPS Agreement pursuant to Article 1.1.[762] However it did suggest to India to take into account the interests of those persons who would have filed patent applications. In this regard, see paragraph 506 above.

515. In *US – DRAMS*, the Panel declined to make any suggestions on the grounds that there was a range of possible ways through which the United States could appropriately implement the Panel's recommendation.[763]

516. In *US – Lead and Bismuth II*, the European Communities had requested the Panel to suggest that the United States amend its countervailing duty laws to recognize the principle that a privatization at market price extinguishes subsidies. However, according to the Panel, the European Communities had not identified any provision of United States' law that required the imposition of countervailing duties in the circumstances of that dispute; and thus, it was unable to make the suggestion requested by the European Communities. See paragraph 509 above in this regard.

517. In *Guatemala – Cement II*, the Panel declined Mexico's request that the Panel suggest to Guatemala that it should refund the anti-dumping duties. The

[756] Panel Report on *India – Quantitative Restrictions*, paras. 7.5–7.7.
[757] Panel Report on *US – Lead and Bismuth II*, para. 8.1.
[758] Panel Report on *Guatemala – Cement II*, para. 9.7.
[759] Panel Report on *US – Cotton Yarn*, para. 8.5.
[760] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 8.6.
[761] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 8.7.
[762] Panel Report on *India – Patents (US)*, para. 5.65.
[763] Panel Report on *US – DRAMS*, para. 7.4. See also Panel Report on *US – Steel Plate*, para. 7.110.

Panel, however, suggested that Guatemala revoke its anti-dumping measure on imports of grey Portland cement from Mexico. In this regard see paragraph 510 above.

518. In *US – Stainless Steel*, Korea requested the Panel to suggest that the United States revoke its anti-dumping orders on stainless steel plate and sheet from Korea. The Panel noted that the *Anti-Dumping Agreement* comprised 18 separate articles and numerous obligations; thus violations might have different forms and implications. The Panel further recalled that Korea's claims related to the determinations of the Department of Commerce regarding the margin of dumping. It found that the determinations were inconsistent with the *Anti-Dumping Agreement* in a number of respects, but it could not say that had the Department of Commerce acted consistently with the *Anti-Dumping Agreement*, it would not have found the existence of dumping. In this case the Panel concluded:

> "Under these circumstances, while there can be little doubt that revocation would be *one* way that the United States could implement our recommendation, we are not prepared to conclude at this time that it is the only way to do so. Accordingly, we decline Korea's request to suggest that the United States revoke the anti-dumping duties at issue in this dispute."[764]

519. In *US – Hot Rolled Steel*, the Panel declined to make specific suggestions in accordance with Japan's requests. It considered that the modalities of the implementation of its recommendations were for the United States to determine.[765] It further noted that Japan's request for reimbursement raised important systemic issues that had not been fully explored in the dispute.[766]

520. In *US – Line Pipe*, the Panel declined Korea's request for a specific suggestion on ways in which the United States might implement the recommendations, stating that there might be other ways in which the United States could implement its recommendation.[767]

521. In *US – Steel Plate*, the Panel indicated that it was "free to suggest ways in which we believe the [defendant] could appropriately implement our recommendation" but decided not to do so in that case.[768]

522. In *Chile – Price Band System*, the Panel recommended that the DSB request Chile to bring its price band system measure into conformity with its obligations under the *Agreement on Agriculture* and the *GATT 1994*. However it declined to make any recommendation with respect to the safeguard measures Argentina had challenged.[769]

523. In *EC – Sardines*, Peru requested the Panel to make a specific suggestion, i.e. that the European Communities permit Peru without any further delay to market its sardines in accordance with the naming standard consistent with the *TBT Agreement*. However, the Panel declined to make the suggestion stating that the authority under Article 19.1 was a discretionary one.[770]

524. In *US – Countervailing Measures on Certain EC Products*, the European Communities requested the Panel to suggest possible means of implementation by the United States, *inter alia*, the revocation of a number of countervailing duty orders. According to the European Communities, the Panel should do this on the grounds that the United States had shown a lack of good faith with respect to their previous dispute settlement proceedings. The Panel declined to do so and explained that its findings were sufficiently clear and that WTO Members have discretion in how they bring their measures into conformity with their WTO obligations.[771]

525. In *EC – Tariff Preferences*, India requested the Panel to suggest to the European Communities that it bring its measure into conformity with its obligations under *GATT 1994* by obtaining a waiver. The Panel did not consider it appropriate to make such a suggestion to the European Communities in light of the fact that there was more than one way that the European Communities could bring its measure into conformity and because the European Communities had requested a waiver which was still pending.[772]

526. In *US – Oil Country Tubular Goods Sunset Reviews*, Argentina requested that the Panel suggest to the United States that it bring its measures into conformity with its WTO obligations by revoking the anti-dumping order and repealing or amending the laws and regulations at issue. However, the Panel saw "no particular reason to make such a suggestion and therefore decline[d] Argentina's request".[773]

527. In *EC – Tube or Pipe Fittings*, Brazil requested the Panel to suggest that the European Communities repeal its anti-dumping duty order and reimburse all the anti-dumping duties collected thereunder. The Panel declined to do so.[774]

---

[772] Panel Report on *EC – Tariff Preferences*, para. 8.3.
[773] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, paras. 8.3–8.5.
[774] Panel Report on *EC – Tube or Pipe Fittings*, paras. 8.9 and 8.11.

(ii) Choice of means of implementation

528. In *US – Steel Plate*, the Panel referred to Article 21.3, which concerns the defendant's duty to inform the DSB of its intentions in respect of implementation, as supporting its statement that "while a panel may suggest ways of implementing its recommendation, the choice of means of implementation is decided, in the first instance, by the Member concerned".[775]

529. In *US – Countervailing Measures on Certain EC Products*, the Panel rejected a request by the European Communities to make suggestions on the way that the United States should bring its measure into conformity and pointed out that "the Members have discretion in how to bring a measure found to be WTO-inconsistent into conformity with WTO obligations".[776]

(iii) Surveillance of implementation

530. In *Brazil – Aircraft (Article 21.5 – Canada)*, Canada requested that the Panel suggest that the parties develop mechanisms that would allow Canada to verify compliance with the original recommendation of the DSB. The Panel stated:

> "In our view, Article 19.1 appears to envision suggestions regarding what could be done to a measure to bring it into conformity or, in case of a recommendation under Article 4.7 of the *SCM Agreement*, what could be done to 'withdraw' the prohibited subsidy. It is not clear if Article 19.1 also addresses issues of surveillance of those steps. That said, any agreement that WTO Members might reach among themselves to improve transparency regarding the implementation of WTO obligations can only be encouraged."[777]

2. Article 19.2

531. In *Chile – Alcoholic Beverages*, Chile claimed that through its findings, the Panel had added to the rights and obligations of WTO Members under the *WTO Agreement*, contrary to Article 19.2 of the *DSU*. The Appellate Body rejected this argument. See paragraphs 20 and 83 above.

3. Relationship with other Articles

(a) Article 11

532. With respect to the relationship with Article 11 of the *DSU*, see paragraph 398 above.

(b) Articles 16, 21 and 22

533. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body concluded that a reading of Articles 16.4 and 19.1, 21.1, 21.3 and 22.1, taken together, clarifies that "an *unappealed* finding included in a panel report that is *adopted* by the DSB must be treated as a *final resolution* to a dispute between the parties in respect of the *particular* claim and the *specific* component of a measure that is the subject of that claim".[778]

4. Relationship with other WTO Agreements

(a) Article 4.7 of the SCM Agreement

534. In *Australia – Automotive Leather II (Article 21.5 – US)*, the Panel addressed the issue of the relationship between the recommendation to "bring the measure into conformity" under Article 19.1 and the recommendation to "withdraw the subsidy" under Article 4.7 of the *SCM Agreement*. In this context and considering whether Article 4.7 allowed "retroactive" remedies, the Panel rejected the argument that "Article 19.1 of the DSU, even in conjunction with Article 3.7 of the DSU, requires the limitation of the specific remedy provided for in Article 4.7 of the SCM Agreement to purely prospective action." The Panel held that:

> "An interpretation of Article 4.7 of the SCM Agreement which would allow exclusively 'prospective' action would make the recommendation to 'withdraw the subsidy' under Article 4.7 indistinguishable from the recommendation to 'bring the measure into conformity' under Article 19.1 of the DSU, thus rendering Article 4.7 redundant.
>
> . . .
>
> . . . Article 19.1 of the DSU is not the basis of the recommendation in a case involving prohibited subsidies, such as this one. Rather, the recommendation to 'withdraw the subsidy' is required by Article 4.7 of the SCM Agreement . . . Thus, to the extent that 'withdraw the subsidy' requires some action that is different from 'bring the measure into conformity', it is that different action which prevails."[779]

535. See also Section IV.B.6 of the Chapter on the *SCM Agreement*.

XX. ARTICLE 20

A. TEXT OF ARTICLE 20

Article 20
Time-frame for DSB Decisions

Unless otherwise agreed to by the parties to the dispute, the period from the date of establishment of the panel by the DSB until the date the DSB considers the

[775] Panel Report on *US – Steel Plate*, para. 8.8.
[776] Panel Report on *US – Countervailing Measures on Certain EC Products*, para. 6.43.
[777] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 7.3.
[778] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 93.
[779] Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, paras. 6.31 and 6.41.

panel or appellate report for adoption shall as a general rule not exceed nine months where the panel report is not appealed or 12 months where the report is appealed. Where either the panel or the Appellate Body has acted, pursuant to paragraph 9 of Article 12 or paragraph 5 of Article 17, to extend the time for providing its report, the additional time taken shall be added to the above periods.

B. INTERPRETATION AND APPLICATION OF ARTICLE 20

536. A table showing the time-frames as regards panel and Appellate Body reports adopted not later than 31 December 2004 is included in Section XXXVII below.

XXI. ARTICLE 21

A. TEXT OF ARTICLE 21

Article 21
Surveillance of Implementation of Recommendations and Rulings

1. Prompt compliance with recommendations or rulings of the DSB is essential in order to ensure effective resolution of disputes to the benefit of all Members.

2. Particular attention should be paid to matters affecting the interests of developing country Members with respect to measures which have been subject to dispute settlement.

3. At a DSB meeting held within 30 days[11] after the date of adoption of the panel or Appellate Body report, the Member concerned shall inform the DSB of its intentions in respect of implementation of the recommendations and rulings of the DSB. If it is impracticable to comply immediately with the recommendations and rulings, the Member concerned shall have a reasonable period of time in which to do so. The reasonable period of time shall be:

(*footnote original*) [11] If a meeting of the DSB is not scheduled during this period, such a meeting of the DSB shall be held for this purpose.

(a) the period of time proposed by the Member concerned, provided that such period is approved by the DSB; or, in the absence of such approval,

(b) a period of time mutually agreed by the parties to the dispute within 45 days after the date of adoption of the recommendations and rulings; or, in the absence of such agreement,

(c) a period of time determined through binding arbitration within 90 days after the date of adoption of the recommendations and rulings.[12] In such arbitration, a guideline for the arbitrator[13] should be that the reasonable period of time to implement panel or Appellate Body recommendations should not exceed 15 months from the date of adoption of a panel or Appellate Body report. However, that time may be shorter or longer, depending upon the particular circumstances.

(*footnote original*) [12] If the parties cannot agree on an arbitrator within ten days after referring the matter to arbitration, the arbitrator shall be appointed by the Director-General within ten days, after consulting the parties.
(*footnote original*) [13] The expression "arbitrator" shall be interpreted as referring either to an individual or a group.

4. Except where the panel or the Appellate Body has extended, pursuant to paragraph 9 of Article 12 or paragraph 5 of Article 17, the time of providing its report, the period from the date of establishment of the panel by the DSB until the date of determination of the reasonable period of time shall not exceed 15 months unless the parties to the dispute agree otherwise. Where either the panel or the Appellate Body has acted to extend the time of providing its report, the additional time taken shall be added to the 15-month period; provided that unless the parties to the dispute agree that there are exceptional circumstances, the total time shall not exceed 18 months.

5. Where there is disagreement as to the existence or consistency with a covered agreement of measures taken to comply with the recommendations and rulings such dispute shall be decided through recourse to these dispute settlement procedures, including wherever possible resort to the original panel. The panel shall circulate its report within 90 days after the date of referral of the matter to it. When the panel considers that it cannot provide its report within this time frame, it shall inform the DSB in writing of the reasons for the delay together with an estimate of the period within which it will submit its report.

6. The DSB shall keep under surveillance the implementation of adopted recommendations or rulings. The issue of implementation of the recommendations or rulings may be raised at the DSB by any Member at any time following their adoption. Unless the DSB decides otherwise, the issue of implementation of the recommendations or rulings shall be placed on the agenda of the DSB meeting after six months following the date of establishment of the reasonable period of time pursuant to paragraph 3 and shall remain on the DSB's agenda until the issue is resolved. At least 10 days prior to each such DSB meeting, the Member concerned shall provide the DSB with a status report in writing of its progress in the implementation of the recommendations or rulings.

7. If the matter is one which has been raised by a developing country Member, the DSB shall consider what further action it might take which would be appropriate to the circumstances.

8. If the case is one brought by a developing country Member, in considering what appropriate action might

be taken, the DSB shall take into account not only the trade coverage of measures complained of, but also their impact on the economy of developing country Members concerned.

B. INTERPRETATION AND APPLICATION OF ARTICLE 21

1. Article 21.1

(a) "prompt compliance"

(i) Concept of compliance

537. The Arbitrator in *Argentina – Hides and Leather (Article 21.3)* defined the concept of "compliance" or "implementation" as a technical concept with a specific content: "the withdrawal or modification of a measure, or part of a measure, the establishment or application of which by a Member of the WTO constituted the violation of a provision of a covered agreement":

> "[T]he non-conforming measure is to be brought into a state of conformity with specified treaty provisions either by *withdrawing* such measure completely, or by *modifying* it by excising or correcting the offending portion of the measure involved. Where the non-conforming measure is a statute, a repealing or amendatory statute is commonly needed. Where the measure involved is an administrative regulation, a new statute may or may not be necessary, but a repealing or amendatory regulation is commonly required.[780] *
>
> It thus appears that the concept of compliance or implementation prescribed in the DSU is a technical concept with a specific content: The withdrawal or modification of a measure, or part of a measure, the establishment or application of which by a Member of the WTO constituted the violation of a provision of a covered agreement . . ."[781]

538. In *Argentina – Hides and Leather (Article 21.3)*, the Arbitrator differentiated the concept of "compliance" within the meaning of the DSU from the removal or modification of the underlying economic/social/other conditions which may have caused the enactment or application of the WTO-inconsistent governmental measure:

> "Compliance within the meaning of the DSU is distinguishable from the removal or modification of the underlying economic or social or other conditions the existence of which might well have caused or contributed to the enactment or application of the WTO-inconsistent governmental measure in the first place. Those economic or other conditions might, in certain situations, survive the removal or modification of the non-conforming measure; nevertheless, the WTO Member concerned will have complied with the DSB recommendations and rulings and with its obligations under the relevant covered agreement. To my mind, it is *inter alia* for the above reason that the need for structural adjustment of the industry or industries in respect of which the WTO-inconsistent measure was promulgated and applied, has generally been regarded, in prior arbitrations under Article 21.3(c) of the DSU, as *not* bearing upon the determination of a 'reasonable period of time' for implementation of DSB recommendations and rulings.[782]"[783]

(ii) Promptness of compliance

Flexibility

539. In *Chile – Alcoholic Beverages (Article 21.3)*, the Arbitrator considered that the existence of a certain element of flexibility in respect of time in complying with the recommendations and rulings of the DSB "would appear to be essential if 'prompt' compliance, in a world of sovereign states, is to be a balanced conception and objective":

> "The DSU clearly stressed the systemic interest of all WTO Members in the Member concerned complying 'immediately' with the recommendations and rulings of the DSB. Reading Articles 21.1 and 21.3 together, 'prompt' compliance is, in principle, 'immediate' compliance. At the same time, however, should 'immediate' compliance be 'impracticable' – it may be noted that the DSU does not use the far more rigorous term 'impossible' – the Member concerned becomes entitled to a 'reasonable period of time' to bring itself into a state of conformity with its WTO obligations. Clearly, a certain element of flexibility in respect of time is built into the notion of compliance with the recommendations and rulings of the DSB. That element would appear to be essential if 'prompt' compliance, in a world of sovereign states, is to be a balanced conception and objective."[784]

540. In *US – 1916 Act (Article 21.3)*, the Arbitrator further indicated that an implementing Member "may rea-

---

[780] (*footnote original*) The non-conforming measure might also assume other forms: e.g., an executive or administrative practice actually carried out but not specifically mandated or authorized by statute or administrative regulation; or a "quasi-judicial" determination by an administrative body. Since the Argentine measures involved in this arbitration are not of these kinds, it is not necessary to examine the requirements of compliance where those other kinds of measures are concerned.

[781] Award of the Arbitrator on *Argentina – Hides and Leather (Article 21.3)*, paras. 40–41. See also the Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 49.

[782] (*footnote original*) Award of the Arbitrator under Article 21.3(c) of the DSU, *Indonesia – Automobile Industry*, WT/DS54/15, *supra*, footnote 10 para. 23; and Award of the Arbitrator under Article 21.3(c) of the DSU, *Canada – Pharmaceutical Patents*, *supra*, footnote 9 para. 52.

[783] Award of the Arbitrator on *Argentina – Hides and Leather (Article 21.3)*, para. 41.

[784] Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 38. As regards the concept of "flexibility" when considering the reasonable period of time, see also Awards of the Arbitrator, *Canada – Patent Term*, para. 64; *US – 1916 Act*, para. 39; *US – Section 110(5) Copyright Act*, paras. 38–39 and *Chile – Price Band System (Article 21.3)*, para. 39.

sonably be expected to use all the flexibility available within its normal legislative procedures to enact the required legislation as speedily as possible".[785]

Time after adoption of report(s)

541. In *US – Section 110(5) Copyright Act (Article 21.3)*, the Arbitrator further indicated that, in order to effect "prompt compliance", an implementing Member must use the time after adoption of a panel and/or Appellate Body report to begin to implement the recommendations and rulings of the DSB:

> "[A]n implementing Member must use the time after adoption of a panel and/or Appellate Body report to begin to implement the recommendations and rulings of the DSB. Arbitrators will scrutinize very carefully the actions an implementing Member takes in respect of implementation during the period after adoption of a panel and/or Appellate Body report and prior to any arbitration proceeding. If it is perceived by an arbitrator that an implementing Member has not adequately begun implementation after adoption so as to effect 'prompt compliance', it is to be expected that the arbitrator will take this into account in determining the 'reasonable period of time'."[786]

542. In the same vein, the Arbitrator on *Chile – Price Band System (Article 21.3)* considered that a Member's obligation to implement the recommendations and rulings of the DSB is triggered by the adoption of the report(s) at issue and thus a Member "must at the very least promptly *commence* and continue concrete steps towards implementation":

> "A Member's obligation to implement the recommendations and rulings of the DSB is triggered by the DSB's adoption of the relevant panel and/or Appellate Body reports. Although Article 21.3 acknowledges circumstances where *immediate* implementation is 'impracticable', in my view the implementation process should not be prolonged through a Member's inaction (or insufficient action) in the first months following adoption. In other words, whether or not a Member is able to *complete* implementation promptly, it must at the very least promptly *commence* and continue concrete steps towards implementation. Otherwise, inaction or dilatory conduct by the implementing Member would exacerbate the nullification or impairment of the rights of other Members caused by the inconsistent measure. It is for this reason that arbitral awards under Article 21.3(c) calculate 'reasonable period[s] of time' as from the date of adoption of panel and/or Appellate Body reports."[787]

Relationship with Article 21.3(c)

543. As regards the interpretation of Article 21.3(c) in the context of the obligation of "prompt compliance" under Article 21.1, see paragraph 557 below.

2. Article 21.2

(a) "interests of developing country Members"

544. In *Indonesia – Autos (Article 21.3)*, the Arbitrator, in determining the "reasonable period of time" pursuant to Article 21.3(c) of the *DSU*, took into account not only Indonesia's status as a developing country in determining the "reasonable period of time", but also the fact that "it is a developing country that is currently in a dire economic and financial situation":

> "Although the language of this provision is rather general and does not provide a great deal of guidance, it is a provision that forms part of the context for Article 21.3(c) of the DSU and which I believe is important to take into account here. Indonesia has indicated that in a 'normal situation', a measure such as the one required to implement the recommendations and rulings of the DSB in this case would become effective on the date of issuance. However, this is not a 'normal situation'. Indonesia is not only a developing country; it is a developing country that is currently in a dire economic and financial situation. Indonesia itself states that its economy is 'near collapse'. In these very particular circumstances, I consider it appropriate to give full weight to matters affecting the interests of Indonesia as a developing country pursuant to the provisions of Article 21.2 of the DSU. I, therefore, conclude that an additional period of six months over and above the six-month period required for the completion of Indonesia's domestic rule-making process constitutes a reasonable period of time for implementation of the recommendations and rulings of the DSB in this case."[788]

545. In *Chile – Alcoholic Beverages (Article 21.3)*, the Arbitrator held that taking into account the interests of developing countries in determining the "reasonable period of time" pursuant to Article 21.3(c), should not result in different "*kinds* of considerations that may be taken into account". However, the arbitrator stressed that "because Article 21.2 is in the DSU, it is not simply to be disregarded" and that it "usefully enjoins, *inter alia*, an arbitrator functioning under Article 21.3(c) to be generally mindful of the great difficulties that a developing country Member may, in a particular case, face as it proceeds to implement the recommendations and rulings of the DSB":

---

[785] Award of the Arbitrator, *US – 1916 Act (Article 21.3)*, para. 39. See also Awards of the Arbitrator on *US – Section 110(5) Copyright Act (Article 21.3)*, paras. 38–39; *Canada – Patent Term (Article 21.3)*, para. 64; and *Chile – Price Band System (Article 21.3)*, para. 49.

[786] Award of the Arbitrator on *US – Section 110(5) Copyright Act (Article 21.3)*, para. 46.

[787] Award of the Arbitrator on *Chile – Price Band System (Article 21.3)*, para. 43.

[788] Award of the Arbitrator on *Indonesia – Autos (Article 21.3)*, para. 24. See also Award of the Arbitrator on *Argentina – Hides and Leather (Article 21.3)*, para. 51.

"It is not necessary to assume that the operation of Article 21.2 will essentially result in the application of 'criteria' for the determination of 'the reasonable period of time' – understood as the *kinds* of considerations that may be taken into account – that would be 'qualitatively' different for developed and for developing country Members. I do not believe Chile is making such an assumption. Nevertheless, although cast in quite general terms, because Article 21.2 is in the DSU, it is not simply to be disregarded. As I read it, Article 21.2, whatever else it may signify, usefully enjoins, *inter alia*, an arbitrator functioning under Article 21.3(c) to be generally mindful of the great difficulties that a developing country Member may, in a particular case, face as it proceeds to implement the recommendations and rulings of the DSB."[789]

546. In *Chile – Price Band System (Article 21.3)*, the Arbitrator, while agreeing with the Arbitrator in *Chile – Alcoholic Beverages (Article 21.3)* on the importance of being generally mindful of the difficulties that a developing country may face upon implementation of rulings and recommendations of the DSB (see paragraph 545 above), noted that the current case differed from the latter since this was the first arbitration where both the complainant and the defendant were developing country Members. The Arbitrator concluded that given the unusual circumstances of this case, he was "not swayed towards either a longer or shorter period of time by the '[p]articular attention' [to be paid] to the interests of developing countries":

"I agree with the following statement by the arbitrator in *Chile – Alcoholic Beverages* that 'an arbitrator functioning under Article 21.3(c) [must] be *generally mindful* of the great difficulties that a developing country Member may, in a particular case, face as it proceeds to implement the recommendations and rulings of the DSB.'[790] This arbitration is, however, the first arbitration under Article 21.3(c) to include developing countries as both complainant *and* respondent. The period of time for implementation of the recommendations and rulings of the DSB in this case is thus a 'matter[] affecting the interests' of both Members: the general difficulties facing Chile as a developing country in revising its long-standing PBS, and the burden imposed on Argentina as a developing country whose access to the Chilean agricultural market is impeded by the PBS, contrary to WTO rules.

Furthermore, Chile has not pointed to additional *specific* obstacles that it faces *as a developing country* under present circumstances. This is a matter which I should take into account in evaluating whether a longer period of time may be needed for implementation. The absence of presently-existing, concrete difficulties in Chile's position as a developing country stands in contrast to previous arbitrations, wherein Members have identified, not simply their positions as developing countries, but also 'severe'[791] or 'dire'[792] economic and financial situations existing at the time of the proposed period of implementation. In contrast, the acuteness of Argentina's burden as a developing country complainant that has been successful in establishing the WTO-inconsistency of a challenged measure, is amplified by Argentina's daunting financial woes at present. Accordingly, I recognize that Chile may indeed face obstacles as a developing country in its implementation of the recommendations and rulings of the DSB, and that Argentina, likewise, faces continuing hardship as a developing country so long as the WTO-inconsistent PBS is maintained. In the unusual circumstances of this case, therefore, I am not swayed towards either a longer or shorter period of time by the '[p]articular attention'[793] I pay to the interests of developing countries."[794]

547. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the Arbitrator had difficulty in comprehending how the fact that various complainants were developing country Members could affect the determination of the reasonable period of time for the developed country Member to implement the DSB recommendations:

"I am, furthermore, mindful of my obligation, pursuant to Article 21.2, to pay '[p]articular attention . . . to matters affecting the interests of developing country Members'. I note that, by its wording, Article 21.2 does not distinguish between situations where the developing country Member concerned is an implementing or a complaining party. However, I also note that the Complaining Parties have not explained *specifically* how developing country Members' interests should affect my determination of the reasonable period of time for implementation. It is useful to recall, once again, that the term 'reasonable period of time' has been consistently interpreted to signify the 'shortest period possible within the legal system of the Member'. Therefore, I have some difficulty in seeing how the fact that several Complaining Parties are developing country Members should have an effect on the determination of the shortest period possible within the legal system of the United States to implement the recommendations and rulings of the DSB in this case."[795]

548. In *EC – Tariff Preferences (Article 21.3)*, the European Communities requested the Arbitrator to take into account the interests of the developing countries which

[789] Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 45.
[790] (*footnote original*) Award of the Arbitrator, *Chile – Alcoholic Beverages*, para. 45 (emphasis added).
[791] (*footnote original*) Award of the Arbitrator, *Argentina – Hides and Leather*, para. 51.
[792] (*footnote original*) Award of the Arbitrator, *Indonesia – Autos*, para. 24.
[793] (*footnote original*) Article 21.2 of the DSU.
[794] Award of the Arbitrator on *Chile – Price Band System (Article 21.3)*, paras. 55–56.
[795] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 81.

were at the time beneficiaries of measures found to be inconsistent with WTO law (the Drug Arrangements). The Arbitrator recalled that some arbitrators had taken Article 21.2 of the *DSU* into account in assessing the difficulties faced by an implementing Member that was a developing country,[796] or where both parties were developing countries.[797] The Arbitrator pointed out that until then no arbitrator had determined whether the reference to "developing country Members" in Article 21.2 should be interpreted to include, in the context of an Article 21.3(c) arbitration, Members not party to the arbitration. The Arbitrator, however, decided that it was unnecessary for him to decide this issue.[798]

3. Article 21.3(c)

(a) Mandate of the arbitrator

549. The Arbitrator defined his mandate in *EC – Hormones (Article 21.3)* as follows:

> "It is not within my mandate under Article 21.3(c) of the DSU, to suggest ways or means to the European Communities to implement the recommendations and rulings of the Appellate Body Report and Panel Reports. My task is to determine the reasonable period of time within which implementation must be completed. Article 3.7 of the DSU provides, in relevant part, that 'the first objective of the dispute settlement mechanism is *usually to secure the withdrawal of the measures concerned* if these are found to be inconsistent with the provisions of any of the covered agreements' (emphasis added). Although withdrawal of an inconsistent measure is the *preferred* means of complying with the recommendations and rulings of the DSB in a violation case,[799] it is not necessarily the *only* means of implementation consistent with the covered agreements. An implementing Member, therefore, has a measure of discretion in choosing the *means* of implementation, as long as the means chosen are consistent with the recommendations and rulings of the DSB and with the covered agreements."[800]

550. In *US – Hot-Rolled Steel (Article 21.3)*, the Arbitrator confirmed that it is for the implementing WTO Member to determine the proper scope and content of anticipated legislation. However, he also indicated that "the degree of complexity of the contemplated implementing legislation may be relevant for the arbitrator, to the extent that such complexity bears upon the length of time that may reasonably be allocated to the enactment of such legislation":

> "I do not believe that an arbitrator acting under Article 21.3(c) of the DSU is vested with jurisdiction to make any determination of the proper scope and content of implementing legislation, and hence do not propose to deal with it. The degree of complexity of the contemplated implementing legislation may be relevant for the arbitrator, to the extent that such complexity bears upon the length of time that may reasonably be allocated to the enactment of such legislation. But the proper scope and content of anticipated legislation are, in principle, left to the implementing WTO Member to determine."[801]

551. In *Chile – Price Band System (Article 21.3)*, the Arbitrator further explained that, although the manner of implementation is up to the Member concerned, the more information provided on the details of the implementing measure, the greater the guidance to an Arbitrator in selecting a reasonable period of time:

> "The fact that an Article 21.3(c) arbitration focuses on the period of time for implementation, however, does not render the substance of the implementation, that is, the precise means or manner of implementation, immaterial from the perspective of the arbitrator. In fact, the more information that is known about the details of the implementing measure, the greater the guidance to an arbitrator in selecting a reasonable period of time, and the more likely that such period of time will fairly balance the legitimate needs of the implementing Member against those of the complaining Member. Nevertheless, the arbitrator should still avoid deciding what a Member must do for proper implementation[802]. . . ."[803]

(b) "reasonable period of time"

(i) Availability of the reasonable period of time

552. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the Arbitrator indicated that Article 21.3 "makes clear that 'prompt compliance', in principle, implies

---

[796] See, for example, Award of the Arbitrator, *Indonesia – Autos*, para. 24; Award of the Arbitrator, *Chile – Alcoholic Beverages*, para. 45; and Award of the Arbitrator, *Argentina – Hides and Leather*, para. 51.

[797] Award of the Arbitrator, *Chile – Price Band System*, paras. 55 and 56. See also Award of the Arbitrator, *US – Offset Act (Byrd Amendment)*, para. 81.

[798] Award of the Arbitrator in *EC – Tariff Preferences (Article 21.3)*, para. 59.

[799] (*footnote original*) By contrast, in a non-violation case, brought under Article XXIII:1(b) of the GATT 1994, Article 26.1(b) of the DSU states explicitly that "there is no obligation to withdraw".

[800] Award of the Arbitrator on *EC – Hormones (Article 21.3)*, para. 38. See also the Awards of the Arbitrator on *Australia – Salmon (Article 21.3)*, para. 35; *Korea – Alcoholic Beverages (Article 21.3)*, para. 45, where the Arbitrator indicated that "choosing the means of implementation is, and should be, the prerogative of the implementing Member"; *Canada – Pharmaceutical Patents (Article 21.3)*, paras. 40;; *Chile – Alcoholic Beverages (Article 21.3)*, para. 42, where the Arbitrator confirmed that "[t]he choice and the timing of the detailed operating steps in enacting a new law are properly left to the Member concerned"; *Chile – Price Band System (Article 21.3)*, para. 32; *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 48; *EC – Tariff Preferences (Article 21.3)*, para. 30.

[801] Award of the Arbitrator on *US – Hot-Rolled Steel (Article 21.3)*, para. 30.

[802] (*footnote original*) Award of the Arbitrator, *US – Hot-Rolled Steel*, para. 30.

[803] Award of the Arbitrator on *Chile – Price Band System (Article 21.3)*, para. 37.

'immediate[ ]' compliance" and, accordingly deduced that a "'reasonable period of time' for implementation is not available unconditionally to an implementing Member. Rather, an implementing Member is entitled to a reasonable period of time for implementation only where, pursuant to Article 21.3, 'it is impracticable to comply immediately with the recommendations and rulings' of the DSB."[804]

(ii) Concept of "reasonableness"

553. In *US – Hot-Rolled Steel (Article 21.3)*, the Arbitrator considered that the essence of "reasonableness", as articulated by the Appellate Body in *US – Hot-Rolled Steel* in the context of the *Anti-Dumping Agreement*, was equally pertinent in the context of Article 21.3(c) of the *DSU*:

> "In *US – Hot-Rolled Steel*, the implementation of which is involved here, the Appellate Body had occasion to interpret the phrase 'reasonable period' found in Article 6.8 of the *Anti-Dumping Agreement* and 'reasonable time' used in paragraph 1 of Annex II of that Agreement. 'The word "reasonable"', the Appellate Body stated:
>
> > . . . implies a degree of flexibility that involves consideration of all of the circumstances of a particular case. What is 'reasonable' in one set of circumstances may prove to be less than 'reasonable' in different circumstances. This suggests that what constitutes a reasonable period or a reasonable time under Article 6.8 and Annex II of the *Anti-Dumping Agreement*, should be defined on a case-by-case basis, in the light of the specific circumstances of each investigation.
> >
> > In sum, a 'reasonable period' must be interpreted consistently with the notions of flexibility and balance that are inherent in the concept of 'reasonableness', and in a manner that allows for account to be taken of the particular circumstances of each case.[805]
>
> Although, in the above excerpt, the Appellate Body dealt with the *Anti-Dumping Agreement*, and not the DSU, the essence of 'reasonableness' so articulated is, in my view, equally pertinent for an arbitrator faced with the task of determining what constitutes 'a reasonable period of time' in the context of the DSU."[806]

(iii) Length of the reasonable period of time

The 15-month guideline

554. The Arbitrator on *EC – Hormones (Article 21.3)* considered that "the ordinary meaning of the terms of Article 21.3(c) indicates that 15 months is a 'guideline for the arbitrator', and not a rule".[807]

555. In *Canada – Pharmaceutical Patents (Article 21.3)*, the Arbitrator noted that "the 15-month period is a 'guideline', and not an average, or usual, period. It is expressed also as a *maximum* period, subject only to any 'particular circumstances' mentioned in the second sentence."[808]

556. In *EC – Bananas III (Article 21.3)*, the European Communities requested a period of 15 months and one week based on the alleged complexity and difficulty of amending the then existing import regime for bananas. The Arbitrator confirmed that the 15-month period provided for in Article 21.3(c) is a guideline and that the "reasonable period of time" may be shorter or longer than 15 months, depending upon the "particular circumstances" (see paragraph 593 below):

> "When the 'reasonable period of time' is determined through binding arbitration, as provided for under Article 21.3(c) of the DSU, this provision states that a 'guideline' for the arbitrator should be that the 'reasonable period of time' should not exceed 15 months from the date of the adoption of a panel or Appellate Body report. Article 21.3(c) of the DSU also provides, however, that the 'reasonable period of time' may be shorter or longer than 15 months, depending upon the 'particular circumstances.'"[809]

The shortest period possible

557. The Arbitrator on *EC – Hormones (Article 21.3)* considered that, when read in the context of the requirement of "prompt compliance" of Article 21.1, the "reasonable period of time" should be the "shortest period possible within the legal system of the Member to implement the recommendations and rulings of the DSB". The Arbitrator held, *inter alia*, that "when implementation can be effected by administrative means, the reasonable period of time should be considerably shorter than 15 months":

> "The ordinary meaning of the terms of Article 21.3(c) indicates that 15 months is a 'guideline for the arbitra-

---

[804] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 40.

[805] (*original footnote*) Appellate Body Report [on *US – Hot-Rolled Steel*], paras. 84–85.

[806] Award of the Arbitrator on *US – Hot-Rolled Steel (Article 21.3)*, paras. 25–26. See also the Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 42.

[807] Award of the Arbitrator on *EC – Hormones (Article 21.3)*, para. 25.

[808] Award of the Arbitrator on *Canada – Pharmaceutical Patents (Article 21.3)*, para. 45. See also Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 39. In *US – Hot-Rolled Steel (Article 21.3)*, the Arbitrator further indicated that he ". . . d[id] not see any basis for reading the 15-month guideline as establishing a fixed maximum or 'outer limit' for 'a reasonable period of time'. Neither, of course, does the 15-month guideline constitute a floor or 'inner limit' of 'a reasonable period of time'." Award of the Arbitrator on *US – Hot-Rolled Steel (Article 21.3)*, para. 25. See also the Awards of the Arbitrator on *Chile – Price Band System (Article 21.3)*, para. 33; and *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 41.

[809] Award of the Arbitrator on *EC – Bananas III (Article 21.3)*, para. 18. See also the Awards of the Arbitrator on *Australia – Salmon (Article 21.3)*, para. 30; and *Canada – Autos (Article 21.3)*, para. 39.

tor', and not a rule. This guideline is stated expressly to be that 'the reasonable period of time . . . *should not exceed* 15 months from the date of adoption of a panel or Appellate Body report' (emphasis added). In other words, the 15-month guideline is an outer limit or a maximum in the usual case. For example, when implementation can be effected by administrative means, the reasonable period of time should be considerably shorter than 15 months. However, the reasonable period of time could be shorter or longer, depending upon the particular circumstances, as specified in Article 21.3(c).

Article 21.3(c) also should be interpreted in its context and in light of the object and purpose of the DSU. Relevant considerations in this respect include other provisions of the DSU, including, in particular, Articles 21.1 and 3.3. Article 21.1 stipulates that: '*Prompt compliance* with recommendations and rulings of the DSB is essential in order to ensure effective resolution of disputes to the benefit of all Members' (emphasis added). Article 3.3 states: 'The *prompt* settlement of situations in which a Member considers that any benefits accruing to it directly or indirectly under the covered agreements are being impaired by measures taken by another Member is essential to the effective functioning of the WTO and the maintenance of a proper balance between the rights and obligations of Members' (emphasis added). *The Concise Oxford Dictionary* defines the word, 'prompt', as meaning 'a. acting with alacrity; ready. b. made, done, etc. readily or at once'. Read in context, it is clear that the reasonable period of time, as determined under Article 21.3(c), should be the shortest period possible within the legal system of the Member to implement the recommendations and rulings of the DSB. In the usual case, this should not be greater than 15 months, but could also be less."[810]

Normal versus extraordinary legislative procedure

558. In *Korea – Alcoholic Beverages (Article 21.3)*, the Arbitrator stated that while the reasonable period of time should be the shortest period possible within the legal system of the Member concerned, the Member in question should not be required to utilize extraordinary legislative procedures to comply with the recommendations and rulings of the DSB:

> "Although the reasonable period of time should be the shortest period possible within the legal system of the Member to implement the recommendations and rulings of the DSB, this does not require a Member, in my view, to utilize an *extraordinary* legislative procedure, rather than the *normal* legislative procedure, in every case. Taking into account all of the circumstances of the present case, I believe that it is reasonable to allow Korea to follow its *normal* legislative procedure for the consideration and adoption of a tax bill with budgetary implications, that is, to submit the proposed amendments to the next regular session of the National Assembly. For the same reasons, I consider it reasonable that the new tax legislation should be enacted by the National Assembly in the course of the next regular session, and promulgated by the President before the end of this year."[811]

DSB actions as precedents

559. In *US – Hot-Rolled Steel (Article 21.3)*, the United States referred to the extensions of the reasonable period of time agreed by the DSB in two previous disputes to take into account the adjournment of the United States Congress' legislative session,[812] in order to support its position that the reasonable period of time

[810] Award of the Arbitrator on *EC – Hormones (Article 21.3)*, paras. 25–26. See also the Awards of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 38; *Canada – Pharmaceutical Patents (Article 21.3)*, para. 47; *US – 1916 Act (Article 21.3)*, para. 32; *Chile – Price Band System (Article 21.3)*, para. 34; and *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 42; *EC – Tariff Preferences (Article 21.3)*, para. 26.

[811] Award of the Arbitrator on *Korea – Alcoholic Beverages (Article 21.3)*, paras. 42–43. In *Chile – Alcoholic Beverages*, the European Communities had argued that the reasonable period of time should be 5 months because Chile could resort to urgency procedures to enact the emendatory bill needed for the implementation. The Arbitrator, however, considered that "the Member concerned has the sovereign prerogative and responsibility of determining for itself the most appropriate, and probably effective, method of implementing the recommendations and rulings of the DSB by securing the passage of the emendatory law. The choice and the timing of the detailed operating steps in enacting a new law are properly left to the Member concerned." Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 42. See also the Award of the Arbitrator on *US – Section 110(5) Copyright Act*, para. 32. In *Chile – Price Band System (Article 21.3)*, Argentina also argued that Chile should be expected to resort to "urgency procedures" in order to effect the "flexibility" that its Constitution allowed and thus more promptly achieve implementation. The Arbitrator, after having established that "an implementing Member 'may reasonably be expected to use all the flexibility available within its normal legislative procedures to enact the required legislation as speedily as possible'" (see para. 540 of this Chapter), indicated that he found "it unreasonable for me to *expect* or assume that Chile will necessarily make use of the 'flexibility' arguably provided by the extraordinary 'urgency procedure' when implementing legislation that modifies the PBS. Indeed, there is sufficient flexibility within the *ordinary* legislative procedure of Chile to enable it to implement the recommendations and rulings of the DSB in this case within a time frame of less than the 18 months which it seeks." See Award of the Arbitrator on *Chile – Price Band System (Article 21.3)*, paras. 49–54. See also Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 43.

[812] The United States referred to *US – 1916 Act* and *US – Section 110(5) Copyright Act* where the arbitrators set the reasonable period at 10 months and 12 months, respectively. The United States on 12 July 2001 asked the DSB to modify the reasonable period of time determined by the arbitrators in both cases, that were due to expire, respectively, on 26 July 2001 and 27 July 2001, so that the modified periods would instead end on 31 December 2001, or on the date on which the then current 2001 session of the United States Congress adjourned, whichever was earlier. At its meeting of 24 July 2001, the DSB noted and agreed to the United States' request. In both instances, the complaining parties – the European Communities and Japan in *US – 1916 Act* and the European Communities in *US – Section 110(5) of the US Copyright Act* – having previously reached some understanding with the United States on the matter, did not oppose the requests of the United States. Award of the Arbitrator on *US – Hot-Rolled Steel (Article 21.3)*, para. 39.

should be longer than ten months. The Arbitrator noted that, on both occasions, the complaining parties had agreed to the extension and therefore did not consider that the actions of the DSB in those cases could have "any precedential value":

> "It appears to me that whether the actions of the DSB in those two instances have any precedential value in respect of the present arbitration proceedings, is open to substantial debate. The present proceedings have been precipitated precisely by the failure of the parties to the dispute to reach an agreement on a reasonable period of time to comply under Article 21.3(b) of the DSU."[813]

Burden of proof

560. The Arbitrator on *Canada – Pharmaceutical Patents (Article 21.3)* held that it was for the implementing Member to bear the burden of proof in showing that the duration of any proposed period of implementation is a "reasonable period of time":

> "Based on the wording of Articles 21.3, and on the context provided in Articles 3.3, 21.1 and 21.4 of the DSU, I agree with the arbitrator in *European Communities – Hormones* that 'the reasonable period of time, as determined under Article 21.3(c), should be the shortest period possible within the legal system of the Member to implement the recommendations and rulings of the DSB.'[814] Moreover, as immediate compliance is clearly the preferred option under Article 21.3, it is, in my view, for the implementing Member to bear the burden of proof in showing – '[i]f it is impracticable to comply immediately' – that the duration of any proposed period of implementation, including its supposed component steps, constitutes a 'reasonable period of time'. And the longer the proposed period of implementation, the greater this burden will be."[815]

561. In *EC – Tariff Preferences (Article 21.3)*, India argued that the implementing Member – in this case, the European Communities – bears the burden of demonstrating that the period it proposes is reasonable and that "the already great burden becomes even greater" if this period is more than 15 months. The Arbitrator disagreed and held that, in his view, the European Communities must demonstrate that the period it proposes is reasonable; "but I do not find it necessary in this arbitration to determine whether the burden of proof becomes greater if the period proposed is more than 15 months".[816]

562. As regards the burden of proof concerning the existence or not of "particular circumstances" under Article 21.3(c), see paragraphs 593–594 below.

Examples of amendment of the "reasonable period of time"

563. In the dispute *Canada – Dairy*, on 23 December 1999, Canada informed the Chairman of the DSB that it had reached an agreement with New Zealand and the United States on the reasonable period of time for the implementation of the DSB's rulings.[817]

564. Concerning the *US – FSC* dispute, at its meeting of 12 October 2000, the DSB accepted the United States' request to modify the time-period for compliance.[818]

565. In respect of the dispute *US – Hot-Rolled Steel*, at its meeting on 5 December 2002, the DSB accepted the request of the United States to modify the time period for compliance.[819]

Length of "reasonable period of time" as awarded by Article 21.3(c) arbitration

566. The following table lists the disputes where the determination of the length of the reasonable period of time was subject to arbitration under Article 21.3(c) and the time awarded by the Arbitrator:

WT/DS No.	Short Title	Award Circulated	"Reasonable Period of Time"
DS8 – EC DS10 – Canada DS11 – US	*Japan – Alcoholic Beverages II*	14 February 1997 (WT/DS8/15, WT/DS10/15, WT/DS11/13)	15 months
DS18 – Canada	*Australia – Salmon*	23 February 1999 (WT/DS18/9)	8 months from 6 November 1998
DS26 – US DS48 – Canada	*EC – Hormones*	29 May 1998 (WT/DS26/15, WT/DS48/13)	15 months from 13 February 1998

Table (*cont.*)

WT/DS No.	Short Title	Award Circulated	"Reasonable Period of Time"
DS27 – Ecuador, Guatemala, Honduras, Mexico, US	*EC – Bananas III*	7 January 1998 (WT/DS27/15)	From 25 September 1997 to 1 January 1999
DS54 – EC DS55 – Japan DS59 – US DS64 – Japan	*Indonesia – Autos*	7 December 1998 (WT/DS54/15, WT/DS55/14, WT/DS59/13, WT/DS64/12)	12 months from 23 July 1998
DS75 – EC DS84 – US	*Korea – Alcoholic Beverages*	4 June 1999 (WT/DS75/16, WT/DS84/14)	11 months and 2 weeks, that is, from 17 February 1999 to 31 January 2000
DS87 – EC DS110 – EC	*Chile – Alcoholic Beverages*	23 May 2000 (WT/DS87/15, WT/DS110/14)	not more than 14 months and 9 days from 12 January 2000, that is to say, until 21 March 2001
DS114 – EC	*Canada – Pharmaceutical Patents*	18 August 2000 (WT/DS114/13)	6 months from adoption of report i.e. expiry date: 7 October 2000
DS136 – EC DS162 – Japan	*US – 1916 Act*	28 February 2001 (WT/DS136/11, WT/DS162/14)	10 months from adoption of reports i.e. expiry date: 26 July 2001 Extended: 31 December 2001
DS139 – Japan DS142 – EC	*Canada – Autos*	4 October 2000 (WT/DS139/12, WT/DS142/12)	8 months from adoption of report i.e. expiry date: 19 February 2001
DS155 – EC	*Argentina – Hides and Leather*	31 August 2001 (WT/DS155/10)	Not more than 12 months and 12 days i.e. expiry date: 28 February 2002
DS160 – EC	*US – Section 110(5) Copyright Act*	15 January 2001 (WT/DS160/12)	12 months from adoption of report i.e. expiry date: 27 July 2001 Extended: 31 December 2001
DS170 – US	*Canada – Patent Term*	28 February 2001 (WT/DS170/10)	10 months from adoption of report i.e. expiry date: 12 August 2001
DS184 – Japan	*US – Hot-Rolled Steel*	19 February 2002 (WT/DS184/13)	15 months from 23 August 2001 i.e. expiry date: 23 November 2002
DS202 – Korea	*US – Line Pipe*	26 July 2002 (WT/DS202/17)	Parties agreed on RPT and no award was issued.
DS207 – Argentina	*Chile – Price Band System*	17 March 2003 (WT/DS207/13)	14 months i.e. expiry date: 23 December 2003
DS217 – Australia, Brazil, Chile, EC, India, Indonesia, Japan, Korea and Thailand DS234 – Canada, Mexico	*US – Offset Act (Byrd Amendment)*	13 June 2003 (WT/DS217/14, WT/DS234/22)	11 months i.e. expiry date: 27 December 2003
DS246 – India	*EC – Tariff Preferences*	20 September 2004 (WT/DS246/14)	14 months, 11 days i.e. expiry date: 1 July 2005
DS264 – Canada	*US – Softwood Lumber V*	13 December 2004 (WT/DS264/13)	Parties agreed on RPT and no award was issued

(iv) The application of WTO-inconsistent measures during the reasonable period of time

567. In *US – Section 129(c)(1) URAA*, the Panel considered that nothing suggests that Members are obliged, during the course of the reasonable period of time, to suspend application of the offending measure or to provide relief for the past effects of such measure:

> "Nothing in Article 21.3 suggests that Members are obliged, during the course of the reasonable period of time, to suspend application of the offending measure, much less to provide relief for past effects. Rather, in the case of antidumping and countervailing duty measures, entries that take place during the reasonable period of time may continue to be liable for the payment of duties.
>
> . . .

> When panels and the Appellate Body have been asked to make recommendations for retroactive relief, they have rejected those requests, recognizing that a Member's obligation under the DSU is to provide prospective relief in the form of withdrawing a measure inconsistent with a WTO agreement, or bringing that measure into conformity with the agreement by the end of the reasonable period of time. In the six years of dispute settlement under the WTO agreements, no panel or the Appellate Body has ever suggested that bringing a WTO-inconsistent antidumping or countervailing duty measure into conformity with a Member's WTO obligations requires the refund of antidumping or countervailing duties collected on merchandise that entered prior to the date of implementation."[820]

568. The Panel on *US – Section 129(c)(1) URAA* also added that Articles 22.1 and 22.2 of the *DSU* confirm not only that a Member may maintain the WTO-inconsistent measure until the end of the reasonable period of time for implementation, but also that neither compensation nor the suspension of concessions or other obligations are available to the complaining Member until the conclusion of that reasonable period of time.[821]

(v) Exception: prohibited subsidies

569. In *Brazil – Aircraft*, the Appellate Body noted that the provisions of Article 21.3 of the *DSU* are not relevant in determining the period of time for implementation of a finding of inconsistency with the prohibited subsidies provisions of the *SCM Agreement*:

> "With respect to implementation of the recommendations or rulings of the DSB in a dispute brought under Article 4 of the *SCM Agreement*, there is a significant difference between the relevant rules and procedures of the DSU and the special or additional rules and procedures set forth in Article 4.7 of the *SCM Agreement*. Therefore, the provisions of Article 21.3 of the DSU are not relevant in determining the period of time for implementation of a finding of inconsistency with the prohibited subsidies provisions of Part II of the *SCM Agreement*. Furthermore, we do not agree with Brazil that Article 4.12 of the *SCM Agreement* is applicable in this situation. In our view, the Panel was correct in its reasoning and conclusion on this issue. Article 4.7 of the *SCM Agreement*, which is applicable to this case, stipulates a time-period. It states that a subsidy must be withdrawn 'without delay'. That is the recommendation the Panel made."[822]

570. With respect to the period of implementation under Article 4.7 of the *SCM Agreement*, see Section IV.B.6(b) of the Chapter on the *SCM Agreement*.

(c) "particular circumstances"

(i) Concept of "particular circumstances"

571. In *Canada – Pharmaceutical Patents (Article 21.3)*, the Arbitrator defined the term "particular circumstances" in Article 21.3 as "those that can influence what the shortest period possible for implementation may be within the legal system of the implementing Member".[823]

(ii) Relevance of "particular circumstances"

572. In *Chile – Alcoholic Beverages (Article 21.3)*, the Arbitrator pointed out that the shortest period of time *theoretically* possible for the completion of the legislative process is not the *sole* criterion that should be taken into account in determining the reasonable period of time. The Arbitrator further considered that Article 21.3(c) "contemplates a case-specific approach and authorizes the consideration of the 'particular circumstances' of a given case, which may warrant a longer or shorter period":

> "The concept of reasonableness, which is, of course, built into the notion of 'a reasonable period of time' for implementation, inherently involves taking into account the relevant circumstances. In some cases these circumstances may be singular or few in number but in other cases they may be multiple. Determination of a 'reasonable period of time' is not, in principle, appropriately carried out by ascribing decisive or exclusive relevance to one single or even a few *a priori* factors and eschewing consideration of everything else as non-pertinent. Thus, the shortest period of time *theoretically* possible for the completion of the legislative process, even assuming the bill enjoys the necessary parliamentary majority from the beginning and is never the subject of serious debate, is not the *sole* criterion that I should take into account in determining the reasonable period. What Article 21.3(c) of the DSU provides arbitrators with is a '*guide*line', not a fixed command, that the reasonable period should be not more than 15 months from the date of adoption by the DSB of the pertinent Panel and Appellate Body Reports. Article 21.3(c) evidently contemplates a case-specific approach and authorizes the consideration of the 'particular circumstances' of a given case, which may warrant a longer or shorter period."[824]

[821] Panel Report on *US – Section 129(c)(1) URAA*, para. 3.91.
[822] Appellate Body Report on *Brazil – Aircraft*, para. 192.
[823] Award of the Arbitrator *on Canada – Pharmaceutical Patents (Article 21.3)*, para. 48.
[824] Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 39.

(iii) Factors amounting to "particular circumstances"

Complexity of enacting implementing legislation

573. In *Chile – Alcoholic Beverages (Article 21.3)*, the Arbitrator considered that, "[s]ince compliance here means *adoption of a law* appropriately amending" the Chilean law at issue, the reference to particular circumstances in this case is to "circumstances which rationally bear upon the time necessary for *enactment* of such a law".[825]

574. In *Canada – Pharmaceutical Patents (Article 21.3)*, the Arbitrator mentioned the implementation by administrative or legislative means, the complexity of the proposed implementation and the legally binding force of the component steps leading to implementation as relevant criteria for determining the existence of "particular circumstances":

> "[I]f implementation is by *administrative* means, such as through a regulation, then the 'reasonable period of time' will normally be shorter than for implementation through *legislative* means.
>
> Likewise, the *complexity* of the proposed implementation can be a relevant factor. If implementation is accomplished through extensive new regulations affecting many sectors of activity, then adequate time will be required to draft the changes, consult affected parties, and make any consequent modifications as needed. On the other hand, if the proposed implementation is the simple repeal of a single provision of perhaps a sentence or two, then, obviously, less time will be needed for drafting, consulting, and finalizing the procedure. To be sure, complexity is not merely a matter of the number of pages in a proposed regulation; yet it seems reasonable to assume that, in most cases, the shorter a proposed regulation, the less its likely complexity.
>
> In addition, the *legally binding*, as opposed to the discretionary, nature of the component steps leading to implementation should be taken into account. If the law of a Member dictates a mandatory period of time for a mandatory part of the process needed to make a regulatory change, then that portion of a proposed period will, unless proven otherwise due to unusual circumstances in a given case, be reasonable. On the other hand, if there is no such mandate, then a Member asserting the need for a certain period of time must bear a much more imposing burden of proof. Something required by law must be done; something not required by law need not necessarily be done, depending on the facts and the circumstances in a particular case."[826]

575. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the Arbitrator refused to take into account in his determination of the "reasonable period of time" both the existence of several legislative options (paragraph 587 below) and the need of the implementing Member to take into account international treaty obligations (paragraph 589 below). The Arbitrator considered that "'complexity' of implementing legislation as a particular circumstance, within the meaning of Article 21.3(c), is a *legal* criterion, to be examined without regard for political contentiousness or other non-legal factors that may surround a measure at issue. I am precluded, by my mandate under Article 21.3(c), from giving consideration to these non-legal factors."[827]

Role in society of the WTO-inconsistent measure

576. In *Chile – Price Band System (Article 21.3)*, the Arbitrator considered that the unique role of the price band system in Chilean society was a relevant factor to take into account in his determination of the reasonable period of time:

> "I am of the view that the PBS is so fundamentally integrated into the policies of Chile, that domestic opposition to repeal or modification of those measures reflects, not simply opposition by interest groups to the loss of protection, but also reflects serious debate, within and outside the legislature of Chile, over the means of devising an implementation measure when confronted with a DSB ruling against the original law. In the light of the longstanding nature of the PBS, its fundamental integration into the central agricultural policies of Chile, its price-determinative regulatory position in Chile's agricultural policy, and its intricacy, I find its unique role and impact on Chilean society is a relevant factor in my determination of the 'reasonable period of time' for implementation."[828]

Flexibility of the legislative system

577. In *EC – Tariff Preferences (Article 21.3)*, the Arbitrator took into account, as a relevant matter, the flexibility in the European Communities' legislative system when determining the reasonable period of time. The Arbitrator, however, stressed that this flexibility does

---

[826] Award of the Arbitrator on *Canada – Pharmaceutical Patents (Article 21.3)*, paras. 49–51. See also the Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 57.

[827] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 61.

[828] Award of the Arbitrator on *Chile – Price Band System (Article 21.3)*, para. 48. On most occasions, however, arbitrators have typically refused to treat mere contentiousness or political sensitivity as a factor warranting a longer period of time for implementation. See, for example, the Awards of the Arbitrator on *Canada – Pharmaceutical Patents*, para. 60; *Canada – Patent Term*, para. 58; *US – Offset Act (Byrd Amendment)*, para. 61; *EC – Tariff Preferences (Article 21.3)*, para. 56.

not, of itself, determine the question of the reasonable period of time for implementation.[829]

Rules on entry into force of legal instruments

578. The Arbitrator on *Korea – Alcoholic Beverages* determined that it was reasonable to include in the reasonable period of time the "thirty-day grace period for enforcement of certain ... instruments" provided in a Korean statute.[830]

579. The Arbitrator on *EC – Bananas III* appeared to take into account the European Communities' statement that "any change in legislation which directly affects the customs treatment of products in connection with importation or exportation, enters into force either on 1 January or 1 July of the relevant year"[831] in determining the reasonable period of time in that dispute.[832]

Institutional changes

580. In *EC – Tariff Preferences (Article 21.3)*, the European Communities argued that the reasonable period of time should be extended because of the enlargement of the European Union, the election of a new European Parliament and the designation of a new Commission. The Arbitrator agreed to consider as circumstances that might prolong the reasonable period of time: the time needed to translate certain instruments into 20 official languages as well as the time needed to respond to potential requests for verification by member States that the necessary qualified majority has been reached when adopting the implementing regulation. The Arbitrator, however, did not take into account the fact that a new Parliament was to be elected and a new Commission designated.[833]

(iv) Factors not qualifying as "particular circumstances"

General

581. In *Canada – Pharmaceutical Patents (Article 21.3)*, the Arbitrator indicated that "the 'particular circumstances' ... do *not* include factors unrelated to an assessment of the shortest period possible for implementation within the legal system of a Member":

> [T]he 'particular circumstances' mentioned in Article 21.3 do *not* include factors unrelated to an assessment of the shortest period possible for implementation within the legal system of a Member. Any such unrelated factors are irrelevant to determining the 'reasonable period of time' for implementation. The determination of a 'reasonable period of time' must be a legal judgement based on an examination of relevant legal requirements."[834]

582. The Arbitrator on *Argentina – Hides and Leather (Article 21.3)* warned about the negative implications for the multilateral trading system of an interpretation of "reasonable period" of time that took into account "time or opportunity to control and manage economic or social conditions which antedate or are contemporaneous with the adoption of the WTO-inconsistent governmental measure":

> "[T]o build into the concept of a 'reasonable period of time' to comply with DSB recommendations and rulings, time or opportunity to control and manage economic or social conditions which antedate or are contemporaneous with the adoption of the WTO-inconsistent governmental measure, may, in the generality of instances, be to defer to an indefinitely receding future the duty of compliance. The implications for the multilateral trading system as we know it today, of such an interpretation of 'reasonable period of time' for compliance are clear and far-reaching and ominous. Such an interpretation would tend to reduce the fundamental duty of 'immediate' or 'prompt' compliance to a figure of speech."[835]

Example of factors not qualifying as "particular circumstances"

Structural adjustments of the implementing Member's affected industries

583. In *Indonesia – Autos (Article 21.3)*, the Arbitrator considered that "the structural adjustments of" a Member's "affected industries" was not a "particular circumstance" to be taken into account under Article 21.3(c):

> "I do not view structural adjustments of Indonesia's affected industries as a 'particular circumstance' which may be taken into account under Article 21.3(c) of the DSU.[836] In virtually every case in which a measure has

[829] Award of the Arbitrator on *EC – Tariff Preferences (Article 21.3)*, para. 36. The Arbitrator considered that the EC legislative system was flexible "in the sense that no mandatory minimum time periods are imposed for any particular step in the implementation process".

[830] Award of the Arbitrator on *Korea – Alcoholic Beverages (Article 21.3)*, para. 47.

[831] Award of the Arbitrator on *EC – Bananas III (Article 21.3)*, para. 9.

[832] Award of the Arbitrator on *EC – Bananas III (Article 21.3)*, para. 19. The Arbitrator concluded, in paragraph 20, that the reasonable period of time should be "from 25 September 1997 to 1 January 1999". In *EC – Tariff Preferences (Article 21.3)*, the Arbitrator, in reference to *EC – Bananas III (Article 21.3)*, regarded the administrative practice of the European Communities pertaining to advance publication of tariff changes and the date on which such changes take effect as a relevant factor in determining the reasonable period of time for implementation. Award of the Arbitrator on *EC – Tariff Preferences (Article 21.3)*, para. 51.

[833] Award of the Arbitrator on *EC – Tariff Preferences (Article 21.3)*, paras. 52–54.

[834] Award of the Arbitrator on *Canada – Pharmaceutical Patents (Article 21.3)*, para. 52.

[835] Award of the Arbitrator on *Argentina – Hides and Leather*, para. 49.

[836] (*footnote original*) I note that the Award of the Arbitrator in *Japan – Taxes on Alcoholic Beverages* WT/DS8/15, WT/DS10/15, WT/DS11/13, 14 February 1997 rejected the argument that adverse effects on producers (and consumers) of the products involved constitute "particular circumstances" that should be taken into account in determining the reasonable period of time under Article 21.3(c) of the DSU.

been found to be inconsistent with a Member's obligations under the GATT 1994 or any other covered agreement, and therefore, must be brought into conformity with that agreement, some degree of adjustment by the domestic industry of the Member concerned will be necessary. This will be the case regardless of whether the Member concerned is a developed or a developing country. Structural adjustment to the withdrawal or the modification of an inconsistent measure, therefore, is not a 'particular circumstance' that can be taken into account in determining the reasonable period of time under Article 21.3(c)."[837]

Limited powers of the executive branch

584. In *Japan – Alcoholic Beverages II (Article 21.3)*, Japan argued that a period of 23 months was a "reasonable period of time" on the basis that there were "particular circumstances" justifying such an extension of the 15-month period. Japan claimed that the limited powers of the executive branch over tax matters and the need for a formal adoption of legislation by the parliament, the adverse effects of the tax increases on Japanese consumers of shochu, and the administrative constraints on the execution of taxation were "particular circumstances" justifying a 23-month period needed to implement the recommendations and rulings of the DSB. The Arbitrator was not persuaded that these circumstances were "particular circumstances" within the meaning of Article 21.3(c) and determined 15 months as the reasonable period of time.[838]

Economic and financial consequences of implementation

585. In *Argentina – Hides and Leather (Article 21.3)*, Argentina had argued that it needed 46 months as the reasonable period of time for implementation in order to control and counter certain economic and financial consequences that would follow from the enactment of legislation implementing the recommendations of the DSB. See paragraph 582 above.

Choice of legislative implementation

586. The Arbitrator on *US – Section 110(5) Copyright Act (Article 21.3)* stated that, although it is an "important issue" whether a Member decides to "simply repeal" a measure or whether "some other approach will be utilized", he failed to see how this issue would "add any additional time to the legislative process as the content of the legislation effecting implementation is precisely the issue that Congress will decide through its normal procedures" (original emphasis).[839]

587. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the Arbitrator did not consider that the existence of numerous options to implement was relevant to the determination of the "reasonable period of time":

"I do not consider the existence of numerous options to implement the recommendations and rulings of the DSB, as invoked by the United States, to be relevant to my determination of the 'reasonable period of time' for implementation of the recommendations and rulings of the DSB.[840] The weighing and balancing of the respective merits of various legislative alternatives is one of the key functions and aspects of any legislative process. The mere fact that implementation of the recommendations and rulings of the DSB necessitates the choice between several, or even a large number of, alternative options is generally not, in my view, in and of itself, a particular circumstance that would inform my determination of the shortest period possible to implement the recommendations and rulings of the DSB in this case."[841]

Scientific studies or consultations

588. The Arbitrator on *EC – Hormones (Article 21.3)* indicated that, while scientific studies or consultations with experts may form part of the domestic implementation process, the time required to conduct such studies or consultations could not be included in the reasonable period of time:

"An implementing Member . . . has a measure of discretion in choosing the *means* of implementation, as long as the means chosen are consistent with the recommendations and rulings of the DSB and with the covered agreements.

It would not be in keeping with the requirement of *prompt* compliance to include in the reasonable period of time, time to conduct studies or to consult experts to demonstrate the *consistency* of a measure already judged to be *inconsistent*. That cannot be considered as 'particular circumstances' justifying a longer period than the guideline suggested in Article 21.3(c). This is not to say that the commissioning of scientific studies or

[837] Award of the Arbitrator on *Indonesia – Autos (Article 21.3)*, para. 23. See also Award of the Arbitrator on *Canada – Pharmaceutical Patents (Article 21.3)*, para. 52; and Award of the Arbitrator on *Argentina – Hides and Leather (Article 21.3)*, para. 41.

[838] Award of the Arbitrator on *Japan – Alcoholic Beverages II (Article 21.3)*, para. 27. See also the Award of the Arbitrator on *EC – Bananas III (Article 21.3)*, paras. 6–10.

[839] Award of the Arbitrator on *US – Section 110(5) Copyright Act*, para. 42.

[840] (*footnote original*) I recall that the Arbitrator in *US – Section 110(5) Copyright Act* stated that, although it is an "important issue" whether a Member decides to "simply repeal" a measure or whether "some other approach will be utilized", he failed to see how this issue would

> . . . add any *additional time* to the legislative process, as the *content* of the legislation effecting implementation is precisely the issue that Congress will decide through its normal procedures. (original emphasis)

(Award of the Arbitrator, *US – Section 110(5) Copyright Act*, para. 42.)

[841] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 59.

consultations with experts *cannot* form part of a domestic implementation process in a particular case. However, such considerations are not pertinent to the determination of the reasonable period of time."[842]

International treaty obligations

589. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the Arbitrator did not consider that the need to take into account international treaty obligations in the process of drafting implementing legislation was relevant to the determination of the "reasonable period of time":

"[T]he need to distinguish, in the light of Panel and Appellate Body findings in this dispute, between WTO-consistent and WTO-inconsistent implementation options would appear to be the typical content, and concomitant aspect, of every legislative process aiming at implementing recommendations and rulings of the DSB. I do agree with previous arbitrators that, in principle, the complex nature of implementing measures can be a relevant factor for the determination of the reasonable period of time.[843] Nevertheless, I do not believe that the need to take into account international treaty obligations in the process of drafting implementing legislation, in and of itself, gives rise to the kind of complexity that would warrant additional time for implementation. *Each and every* piece of legislation enacted with a view to implementing recommendations and rulings of the DSB must be designed and drafted in the light of the implementing Member's rights and obligations under the covered agreements. If the need to distinguish between WTO-consistent and WTO-inconsistent implementation options were to qualify, *per se*, as 'complexity', and, therefore, were to give rise to 'particular circumstances' relevant for the determination of the reasonable period of time, then *every* implementation measure under consideration in proceedings pursuant to Article 21.3(c) would have to be considered complex. In other words, 'complexity' would not be a 'particular circumstance'; rather, it would be a standard aspect of every implementation."[844]

Economic harm to the complainant's economic operators

590. In *US – Offset Act (Byrd Amendment) (Article 21.3)*, the complaining parties urged the Arbitrator to consider the economic harm that might be inflicted on their economic operators by another disbursement of collected anti-dumping and countervailing duties to United States' producers. The Arbitrator considered that the economic harm suffered by foreign exporters should not have an impact on the determination of the reasonable period of time:

"In my view, economic harm suffered by foreign exporters does not, and cannot, by definition, impact on what is the 'shortest period possible within the legal system of the Member to implement the recommendations and rulings of the DSB'.[845] The particular circumstances, within the meaning of Article 21.3(c), can only be of such nature as will influence the evolution and unfolding of the implementation process itself. Factors external to the legislative process itself are of no relevance for the determination of the reasonable period of time for implementation.

I do not wish to imply that economic harm, caused by the WTO-inconsistent measure, to economic agents of the Complaining Parties, or any other WTO Members, is irrelevant in the context of the implementation of the recommendations and rulings of the DSB. Many WTO-inconsistent measures will cause some form of economic harm to exporters of WTO Members.[846] However, the need, and urgency, to remove WTO-inconsistent measures, and to remove the harm to economic agents caused by such measures, is, in my view, already reflected in the principle of 'prompt compliance' under Article 21.1. The same concern, in my view, underlies the well-established principle, under Article 21.3(c), that the reasonable period of time for implementation be the shortest time possible within the legal system of the Member. Thus, it would be supererogatory, and incongruous, to accord renewed consideration to the issue of economic harm when determining the shortest period possible for implementation within the legal system of the implementing Member."[847]

Changes other than those necessary to implement the DSB recommendations

591. The Arbitrator on *Canada – Autos (Article 21.3)* declined to take into account the fact that "it might be more convenient for Canada to implement the DSB's recommendations in this case on the same timeline as it has planned for the reform of its customs administration regime".[848]

592. In *EC – Tariff Preferences (Article 21.3)*, the Arbitrator confirmed that his determination on the reasonable period of time for implementation must have regard only to the shortest period possible within the

[842] Award of the Arbitrator on *EC – Hormones (Article 21.3)*, paras. 38–39. See also the Award of the Arbitrator on *Australia – Salmon*, para. 36.

[843] (*footnote original*) Award of the Arbitrator, *Canada – Pharmaceutical Patents*, para. 50. I also agree with the example for "complexity" given by the Arbitrator in those proceedings, namely where "implementation is accomplished through extensive new regulations affecting many sectors of activity".

[844] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, para. 60.

[845] (*footnote original*) See also Award of the Arbitrator, *Canada – Patent Term*, para. 48.

[846] (*footnote original*) See also Award of the Arbitrator, *Canada – Patent Term*, para. 48.

[847] Award of the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 21.3)*, paras. 79–80.

[848] Award of the Arbitrator on *Canada – Autos (Article 21.3)*, para. 55.

legal system of the European Communities to bring its measures (the Drug Arrangements) into conformity with its WTO obligations. In the Arbitrator's view, "the mere fact that the European Communities has decided to incorporate the task of implementation within the larger objective of reforming its overall GSP scheme cannot lead to a determination of a shorter, or longer, period of time".[849]

(v) Burden of proof

593. In *EC – Bananas III (Article 21.3)*, the Arbitrator implicitly found that it was up to the complaining parties to persuade him "that there are 'particular circumstances' in this case to justify a shorter period of time than stipulated by the guideline in Article 21.3(c) of the DSU [15 months]". In the case at issue, the Arbitrator found that he had not been so persuaded by the complaining parties:

> "When the 'reasonable period of time' is determined through binding arbitration, as provided for under Article 21.3(c) of the DSU, this provision states that a 'guideline' for the arbitrator should be that the 'reasonable period of time' should not exceed 15 months from the date of the adoption of a panel or Appellate Body report. Article 21.3(c) of the DSU also provides, however, that the 'reasonable period of time' may be shorter or longer than 15 months, depending upon the 'particular circumstances'.
>
> The Complaining Parties have not persuaded me that there are 'particular circumstances' in this case to justify a shorter period of time than stipulated by the guideline in Article 21.3(c) of the DSU. At the same time, the complexity of the implementation process, demonstrated by the European Communities, would suggest adherence to the guideline, with a slight modification, so that the 'reasonable period' of time for implementation would expire by 1 January 1999."[850]

594. In *EC – Hormones (Article 21.3)*, the Arbitrator held that the burden of proof concerning the existence of particular circumstances falls on any party arguing for a period longer or shorter than 15 months:

> "In my view, the party seeking to prove that there are 'particular circumstances' justifying a shorter or a longer time has the burden of proof under Article 21.3(c). In this arbitration, therefore, the onus is on the European Communities to demonstrate that there are particular circumstances which call for a reasonable period of time of 39 months, and it is likewise up to the United States and Canada to demonstrate that there are particular circumstances which lead to the conclusion that 10 months is reasonable."[851]

(d) Relationship with Article 22

595. In *Chile – Alcoholic Beverages (Article 21.3)*, the Arbitrator considered that when fixing the reasonable period of time one should take into account that, pursuant to Article 22.1, "full and effective implementation is 'preferred'":

> "In assessing the duration of the reasonable period, the provisions of Article 22 of the DSU are also noteworthy. Under Article 22.1, although 'a reasonable period of time' may have elapsed without compliance with the recommendations and rulings of the DSB, *neither* compensation *nor* suspension of concessions or other obligations is to be 'preferred to full implementation', by bringing the measure concerned into conformity with WTO obligations. Thus, in fixing the reasonable period, I should take account of the fact that full and effective implementation is 'preferred'."[852]

(e) Participation by all the original parties

596. In *Japan – Alcoholic Beverages II (Article 21.3)*, it was agreed that all the original parties to the dispute could participate in the arbitration process even though only the United States had requested binding arbitration pursuant to Article 21.3.[853]

(f) Relationship with other WTO Agreements

(i) SCM Agreement

597. As regards the relationship with Article 4.7 of the *SCM Agreement*, see paragraphs 569–570 above.

4. Article 21.5

(a) Function and scope of Article 21.5 proceedings

598. The Appellate Body on *Canada – Aircraft (Article 21.5 – Brazil)* disagreed with the Panel's reasoning that the scope of Article 21.5 dispute settlement proceedings was limited to the issue of whether or not the defendant had implemented the DSB recommendations. In the Appellate Body's view, under Article 21.5, a panel is obliged to examine the consistency of the "measures taken to comply" with WTO law:

> "We have already noted that these proceedings, under Article 21.5 of the DSU, concern the 'consistency' of the revised TPC programme with Article 3.1(a) of the *SCM Agreement*. Therefore, we disagree with the Article 21.5 Panel that the scope of these Article 21.5 dispute

[849] Award of the Arbitrator on *EC – Tariff Preferences (Article 21.3)*, para. 31.

[850] Award of the Arbitrator on *EC – Bananas III (Article 21.3)*, paras. 18–19. See also the Awards of the Arbitrator on *Australia – Salmon (Article 21.3)*, para. 30; *Canada – Autos (Article 21.3)*, para. 39; *US – 1916 Act (Article 21.3)*, paras. 38–39; and *Chile – Price Band System (Article 21.3)*, para. 38.

[851] Award of the Arbitrator on *EC – Hormones (Article 21.3)*, para. 27.

[852] Award of the Arbitrator on *Chile – Alcoholic Beverages (Article 21.3)*, para. 40.

[853] Award of the Arbitrator on *Japan – Alcoholic Beverages II (Article 21.3)*, para. 3.

settlement proceedings is limited to 'the issue of whether or not Canada *has implemented the DSB recommendation*'. The recommendation of the DSB was that the measure found to be a prohibited export subsidy must be withdrawn within 90 days of the adoption of the Appellate Body Report and the original panel report, as modified – that is, by 18 November 1999. That recommendation to 'withdraw' the prohibited export subsidy did not, of course, cover the new measure – because the new measure did not exist when the DSB made its recommendation. It follows then that the task of the Article 21.5 Panel in this case is, in fact, to determine whether the new measure – the revised TPC programme – is consistent with Article 3.1(a) of the *SCM Agreement*.

Accordingly, in carrying out its review under Article 21.5 of the DSU, a panel is not confined to examining the 'measures taken to comply' from the perspective of the claims, arguments and factual circumstances that related to the measure that was the subject of the original proceedings. Although these may have some relevance in proceedings under Article 21.5 of the DSU, Article 21.5 proceedings involve, in principle, not the original measure, but rather a new and different measure which was not before the original panel. In addition, the relevant facts bearing upon the 'measure taken to comply' may be different from the relevant facts relating to the measure at issue in the original proceedings. It is natural, therefore, that the claims, arguments and factual circumstances which are pertinent to the 'measure taken to comply' will not, necessarily, be the same as those which were pertinent in the original dispute. Indeed, the utility of the review envisaged under Article 21.5 of the DSU would be seriously undermined if a panel were restricted to examining the new measure from the perspective of the claims, arguments and factual circumstances that related to the original measure, because an Article 21.5 panel would then be unable to examine fully the 'consistency with a covered agreement of the measures taken to comply', as required by Article 21.5 of the DSU."[854]

599. In *US – Shrimp (Article 21.5 – Malaysia)*, the Appellate Body further explained that, when the issue concerns the consistency of a new measure "taken to comply", the task of a 21.5 panel is to consider that new measure in its totality, meaning the measure itself and its application, but only in respect of the claims included in the request for establishment of that 21.5 panel:

"As we ruled in our Report in *Canada – Aircraft (21.5*), panel proceedings pursuant to Article 21.5 of the DSU involve, in principle, not the original measure, but a new and different measure that was not before the original panel. Therefore, 'in carrying out its review under Article 21.5 of the DSU, a panel is not confined to examining the "measure [. . .] taken to comply" from the perspective of the claims, arguments and factual circumstances that related to the measure that was the subject of the original proceedings.'

When the issue concerns the consistency of a new measure 'taken to comply', the task of a panel in a matter referred to it by the DSB for an Article 21.5 proceeding is to consider that new measure in its totality. The fulfilment of this task requires that a panel consider both the measure itself and the measure's application. As the title of Article 21 makes clear, the task of panels under Article 21.5 forms part of the process of the '*Surveillance of Implementation of the Recommendations and Rulings*' of the DSB. Toward that end, the task of a panel under Article 21.5 is to examine the 'consistency with a covered agreement of measures taken to comply with the recommendations and rulings' of the DSB. That task is circumscribed by the specific claims made by the complainant when the matter is referred by the DSB for an Article 21.5 proceeding. It is not part of the task of a panel under Article 21.5 to address a claim that has not been made.

Malaysia relies in this appeal on our ruling in *Canada – Aircraft (21.5).* We understand Malaysia to argue, based in part on our ruling in *Canada – Aircraft (21.5),* that the Panel in this case had a duty to review the *totality* of the United States measure, and to assess it for its consistency with the relevant provisions of the GATT 1994. That is indeed a panel's task under Article 21.5 of the DSU. Yet, as we have said, it is not part of a panel's task to go beyond the particular claims that have been made with respect to the consistency of a new measure with a covered agreement when a matter is referred to it by the DSB for an Article 21.5 proceeding. Thus, it would not have been appropriate in this case for the Panel to address a claim that was *not* made by Malaysia when requesting that this matter be referred by the DSB for an Article 21.5 proceeding."[855]

600. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body concisely summarized prior case law on the function and scope of Article 21.5 proceedings:

"We addressed the function and scope of Article 21.5 proceedings for the first time in *Canada – Aircraft (Article 21.5 – Brazil)*. There, we found that Article 21.5 panels are not merely called upon to assess whether 'measures taken to comply' implement specific 'recommendations and rulings' adopted by the DSB in the original dispute.[856] We explained there that the mandate of Article 21.5 panels is to examine either the 'existence' of 'measures taken to comply' or, more frequently, the

[854] Appellate Body Report on *Canada – Aircraft (Article 21.5 – Brazil)*, paras. 40–42. See also Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 78 and 80.

[855] Appellate Body Report on *US – Shrimp (Article 21.5 – Malaysia)*, paras. 86–88.

[856] (*footnote original*) Appellate Body Report, *Canada – Aircraft (Article 21.5 – Brazil)*, para. 40.

'*consistency with a covered agreement*' of implementing measures.[857] This implies that an Article 21.5 panel is not confined to examining the 'measures taken to comply' from the perspective of the claims, arguments, and factual circumstances relating to the measure that was the subject of the *original* proceedings.[858] Moreover, the relevant facts bearing upon the 'measure taken to comply' may be different from the facts relevant to the measure at issue in the original proceedings. It is to be expected, therefore, that the claims, arguments, and factual circumstances relating to the 'measure taken to comply' will not, necessarily, be the same as those relating to the measure in the original dispute.[859] Indeed, a complainant in Article 21.5 proceedings may well raise *new* claims, arguments, and factual circumstances different from those raised in the original proceedings, because a 'measure taken to comply' may be *inconsistent* with WTO obligations in ways different from the original measure. In our view, therefore, an Article 21.5 panel could not properly carry out its mandate to assess whether a 'measure taken to comply' is *fully consistent* with WTO obligations if it were precluded from examining claims additional to, and different from, the claims raised in the original proceedings.[860]"[861]

601. With respect to the relationship between "measures taken to comply" and a panel's terms of reference, see paragraph 254 above. See also the excerpts from the reports of the panels and Appellate Body referenced in the Chapter on the *SCM Agreement*, Section IV.B.6.

(b) The "matter" in Article 21.5 proceedings

(i) General

In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body emphasized that Article 21.5 proceedings are similar to the original proceedings and thus, the "matter" at issue consists of the same elements: (i) the specific measures at issue (in this case, the measures taken to comply) and (ii) the legal basis of the complaint, i.e. the claims.[862]

(ii) Measures concerned by Article 21.5 panel proceedings: measures taken to comply

Concept of "measures taken to comply"

602. In *Canada – Aircraft (Article 21.5 – Brazil)*, the Appellate Body held that proceedings under Article 21.5 concern only measures "taken to comply" with the recommendations and rulings of the DSB and interpreted this concept as referring to "measures which have been, or which should be, adopted by a Member to bring about compliance with the recommendations and rulings of the DSB":

> "Proceedings under Article 21.5 do not concern just *any* measure of a Member of the WTO; rather, Article 21.5 proceedings are limited to those 'measures *taken to comply* with the recommendations and rulings' of the DSB. In our view, the phrase 'measures taken to comply' refers to measures which have been, or which should be, adopted by a Member to bring about compliance with the recommendations and rulings of the DSB. In principle, a measure which has been 'taken to comply with the recommendations and rulings' of the DSB will *not* be the same measure as the measure which was the subject of the original dispute, so that, in principle, there would be two separate and distinct measures:[863] the original measure which *gave rise* to the recommendations and rulings of the DSB, and the 'measures taken to comply' which are – or should be – adopted to *implement* those recommendations and rulings. In these Article 21.5 proceedings, the measure at issue is a new measure, the *revised* TPC programme, which became effective on 18 November 1999 and which Canada presents as a 'measure taken to comply with the recommendations and rulings' of the DSB."[864]

603. The Appellate Body on *EC – Bed Linen (Article 21.5 – India)* reiterated that the "measures" at issue in an Article 21.5 proceeding can only be those "measures taken to comply". It further stated that "[i]f a *claim* challenges a *measure* which is not a 'measure taken to comply', that *claim* cannot properly be raised in Article 21.5 proceedings".[865]

Scope of the measures taken to comply

604. In *EC – Bed Linen (Article 21.5 – India)*, the Panel declined to consider India's claim on the "other factors" analysis after finding that the original panel had dismissed the claim and India had not appealed.[866] The

---

[857] (*footnote original*) *Ibid.*, paras. 40–41. The panels in *EC – Bananas III (Article 21.5 – Ecuador)* (paras. 6.8–6.9) and *Australia – Salmon (Article 21.5 – Canada)* (para. 7.10.9) reached essentially the same conclusion.

[858] (*footnote original*) Appellate Body Report, *Canada – Aircraft (Article 21.5 – Brazil)*, para. 41.

[859] (*footnote original*) *Ibid.*

[860] (*footnote original*) As we put it in *Canada – Aircraft (Article 21.5 – Brazil)*:

> Indeed, the utility of the review envisaged under Article 21.5 of the DSU would be seriously undermined if a panel were restricted to examining the new measure from the perspective of the claims, arguments and factual circumstances that related to the original measure, because an Article 21.5 panel would then be unable to examine fully the "consistency with a covered agreement of the measures taken to comply", as required by Article 21.5 of the DSU.

(Appellate Body Report, *Canada – Aircraft (Article 21.5 – Brazil)*, para. 41.) We defined the function of Article 21.5 proceedings in the same vein in our Report in *US – Shrimp (Article 21.5 – Malaysia)* (para. 87).

[861] Appellate Body Report on *EC – Bed Linen (Article 21.5)*, para. 79.

[862] Appellate Body Report on *EC – Bed Linen (Article 21.5)*, para. 78.

[863] (*footnote original*) We recognize that, where it is alleged that there exist *no* "measures taken to comply", a panel may find that there is *no* new measure.

[864] Appellate Body Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 36. See also Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 78–79.

[865] Appellate Body Report on *EC – Bed Linen (Article 21.5)*, para. 78.

[866] Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.53.

Appellate Body concurred, explaining that there is no reason to conclude that a "part of the redetermination that merely incorporates elements of the original determination . . . would constitute an inseparable element of a measure taken to comply with the DSB rulings in the original dispute". In its view, the "other factors" analysis was such an element – an unrevised element of the original measure – that "the investigating authorities of the European Communities were able to treat ... separately" when conducting the redetermination:

> "We agree with India that the investigating authorities of the European Communities were required to revise the original determination of dumping and injury in order to comply with the DSB recommendations and rulings. Towards this end, the European Communities recalculated the dumping margins *without* applying the practice of 'zeroing' that had been found to be inconsistent with WTO obligations in the original dispute. According to the recalculation, two of the *individually* examined Indian producers were *not* dumping. The investigating authorities deducted the imports attributable to those two producers from the *volume* of dumped imports, and, accordingly, the volume of dumped imports in the redetermination was *lower* than in the original determination. According to EC Regulation 1644/2001, the investigating authorities of the European Communities also 're-examined' whether a causal link between the two *revised* elements – dumped imports and the injury to the domestic industry – still existed, and the Panel reviewed that re-examination.
>
> The *amount* of dumped imports will, of course, have an impact on the assessment of the *effects* of the 'dumped imports' for the purposes of determining *injury*. It is clear, therefore, that the revised findings on dumping and injury could have a bearing on whether a causal link exists between dumping and injury. But whilst a revised finding of *dumping* will, in all likelihood, have an impact on the 'effect of *dumped* imports', we see no reason to conclude as well that this revised finding would have any impact on the 'effects . . . of known factors *other than* the dumped imports' in this dispute. Accordingly, we are of the view that the investigating authorities of the European Communities were not required to change the determination as it related to the 'effects of other factors' in this particular dispute. Moreover, we do not see why that part of the redetermination that merely incorporates elements of the original determination on 'other factors' would constitute an inseparable element of a measure taken to comply with the DSB rulings in the original dispute. Indeed, the investigating authorities of the European Communities were able to treat this element separately. Therefore, we do not agree with India that the redetermination can only be considered 'as a whole new measure'."[867]

Panel's discretion to decide on scope of the measures taken to comply

605. The Panel in *Australia – Salmon (Article 21.5 – Canada)* ruled that an Article 21.5 panel could not leave to the discretion of the parties the decision on whether a measure is a "measure taken to comply":

> "We note that an Article 21.5 panel cannot leave it to the full discretion of the implementing Member to decide whether a measure is one 'taken to comply'. If one were to allow that, an implementing Member could simply avoid any scrutiny of certain measures by a compliance panel, even where such measures would be so clearly connected to the panel and Appellate Body reports concerned, both in time and in respect of the subject-matter, that any impartial observer would consider them to be measures 'taken to comply'."[868]

606. In *EC – Bed Linen (Article 21.5 – India)*, the Panel, in a finding upheld by the Appellate Body,[869] also concluded that it is for the panel to decide whether certain measures have been "taken to comply" with a DSB ruling:

> "Thus, it is clear that it is the Panel, and not the EC, which decides whether the measures cited by India in the request for establishment are to be considered 'measures taken to comply' and therefore fall within the purview of this dispute. That said, however, it is also not India's right to determine which measures taken by the EC are measures taken to comply. Rather, this is an issue which must be considered and decided by an Article 21.5 panel."[870]

(iii) Claims in Article 21.5 proceedings

General

607. The Appellate Body on *EC – Bed Linen (Article 21.5 – India)*, stressed that "[i]f a claim challenges a measure which is not a 'measure taken to comply', that claim cannot properly be raised in Article 21.5 proceedings".[871]

Claims already raised and decided during the original proceedings

608. In *US – Shrimp (Article 21.5 – Malaysia)*, Malaysia raised a claim against an aspect of the implementation

---

867 Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, paras. 85–86 (original footnotes omitted).

868 Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, para. 7.10, subparagraph 22. *See also* Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, paras. 6.4–6.5.

869 "We agree with the Panel that it is, ultimately, for an Article 21.5 panel – and not for the complainant or the respondent – to determine which of the measures listed in the request for its establishment are 'measures taken to comply'." Appellate Body Report on *EC – Bed Linen (Article 21.5)*, para. 78.

870 Panel Report on *EC – Bed Linen (Article 21.5)*, para. 6.15.

871 Appellate Body Report on *EC – Bed Linen (Article 21.5)*, para. 78.

measure that was the *same* as the *original* measure, and that, at the appeal stage, the Appellate Body had found to be not *inconsistent* with WTO obligations in the original dispute. The Appellate Body upheld the panel's dismissal of Malaysia's claim on the grounds that an adopted Appellate Body Report must be treated as a final resolution to a dispute between the parties to that dispute:

> "We wish to recall that panel proceedings under Article 21.5 of the DSU are, as the title of Article 21 states, part of the process of the '*Surveillance of Implementation of Recommendations and Rulings*' of the DSB. This includes Appellate Body Reports. To be sure, the right of WTO Members to have recourse to the DSU, including under Article 21.5, must be respected. Even so, it must also be kept in mind that Article 17.14 of the DSU provides not only that Reports of the Appellate Body 'shall be' adopted by the DSB, by consensus, but also that such Reports 'shall be . . . unconditionally accepted by the parties to the dispute. . . .' Thus, Appellate Body Reports that are adopted by the DSB are, as Article 17.14 provides, '. . . unconditionally accepted by the parties to the dispute', and, therefore, must be treated by the parties to a particular dispute as a final resolution to that dispute. In this regard, we recall, too, that Article 3.3 of the DSU states that the 'prompt settlement' of disputes 'is essential to the effective functioning of the WTO'."[872]

609. In *EC – Bed Linen (Article 21.5 – India)*, the Panel declined to consider India's claim on the "other factors" analysis after finding that the original panel had dismissed the claim and that India had *not* appealed it.[873] The Appellate Body explained that, based on other provisions of the *DSU*, namely Articles 16.4, 19.1, 21.1, 21.3 and 22.1, an unappealed finding in an adopted panel report must be treated as the "*final resolution* to a dispute between the parties in respect of the *particular* claim and the *specific* component of a measure that is the subject of that claim". The Appellate Body thus gave the same value to a panel finding in an adopted Report as to a finding included in an adopted Appellate Body Report":

> "[A]n *unappealed* finding included in a panel report that is *adopted* by the DSB must be treated as a *final resolution* to a dispute between the parties in respect of the *particular* claim and the *specific* component of a measure that is the subject of that claim. This conclusion is supported by Articles 16.4 and 19.1, paragraphs 1 and 3 of Article 21, and Article 22.1 of the DSU. Where a panel concludes that a measure is inconsistent with a covered agreement, that panel shall *recommend*, according to Article 19.1, that the Member concerned bring that measure into conformity with that agreement. A panel report, including the *recommendations* contained therein, shall be *adopted* by the DSB within the time period specified in Article 16.4 – unless appealed. Members are to *comply* with recommendations and rulings *adopted* by the DSB promptly, or within a reasonable period of time, in accordance with paragraphs 1 and 3 of Article 21 of the DSU. A Member that does not comply with the recommendations and rulings adopted by the DSB within these time periods must face the consequences set out in Article 22.1, relating to compensation and suspension of concessions. Thus, a reading of Articles 16.4 and 19.1, paragraphs 1 and 3 of Article 21, and Article 22.1, taken together, makes it abundantly clear that a panel finding which is not appealed, and which is included in a panel report *adopted* by the DSB, must be accepted by the parties as a *final* resolution to the dispute between them, in the same way and with the same finality as a finding included in an Appellate Body Report adopted by the DSB – with respect to the particular claim and the specific component of the measure that is the subject of the claim.
>
> . . .
>
> The Panel's ruling that India's claim under Article 3.5 relating to 'other factors' was not properly before it is also consistent with the object and purpose of the DSU. Article 3.3 provides that the *prompt* settlement of disputes is 'essential to the effective functioning of the WTO'. Article 21.5 advances the purpose of achieving a prompt settlement of disputes by providing an expeditious procedure to establish whether a Member has fully complied with the recommendations and rulings of the DSB.[874] For that purpose, an Article 21.5 panel is to complete its work within 90 days, whereas a panel in an original dispute is to complete its work within 9 months of its establishment, or within 6 months of its composition. It would be incompatible with the function and purpose of the WTO dispute settlement system if a claim could be reasserted in Article 21.5 proceedings after the original panel or the Appellate Body has made a finding that the challenged aspect of the original measure is *not* inconsistent with WTO obligations, and that report has been adopted by the DSB. At some point, disputes must be viewed as definitely *settled* by the WTO dispute settlement system."[875]

---

[872] Appellate Body Report on *US – Shrimp (Article 21.5 – Malaysia)*, para. 97.

[873] The Panel ruled that:

> "When considering the status of adopted panel reports, the Appellate Body has indicated that they are binding on the parties 'with respect to that particular dispute'. In our view, the Panel's ruling in the original dispute disposed of India's claim in this regard. Thus, we consider that India is precluded from reasserting in this proceeding and presenting arguments in support of a claim challenging the EC's consideration of 'other factors' of injury." (footnotes omitted)

Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.52.

[874] (*footnote original*) *Ibid.*, para. 6.45.

[875] Appellate Body Report on *EC – Bed Linen (Article 21.5)*, paras. 93 and 98.

Claims different from or additional to those raised in the original proceedings:

610. In *Canada – Aircraft (Article 21.5 – Brazil)*, the Appellate Body examined whether an Article 21.5 panel could consider a *new* claim that challenged an aspect of the measure taken to comply that was not part of the original measure and had not been, and could not have been, previously raised before the panel in the original proceedings. The Appellate Body explained that an Article 21.5 panel is not limited solely to examining whether the Member had complied with the DSB recommendations and rulings, but rather must examine the consistency of the new measure with the relevant provisions of, *in casu*, the *SCM Agreement*. The Appellate Body considered that the utility of Article 21.5 proceedings would be hampered if the panel could only considered the new measure from the perspective of the claims raised during the original proceedings:

> "We have already noted that these proceedings, under Article 21.5 of the DSU, concern the 'consistency' of the revised TPC programme with Article 3.1(a) of the *SCM Agreement*.[876] Therefore, we disagree with the Article 21.5 Panel that the scope of these Article 21.5 dispute settlement proceedings is limited to 'the issue of whether or not Canada *has implemented the DSB recommendation*'. The recommendation of the DSB was that the measure found to be a prohibited export subsidy must be withdrawn within 90 days of the adoption of the Appellate Body Report and the original panel report, as modified – that is, by 18 November 1999. That recommendation to 'withdraw' the prohibited export subsidy did not, of course, cover the new measure – because the new measure did not exist when the DSB made its recommendation. It follows then that the task of the Article 21.5 Panel in this case is, in fact, to determine whether the new measure – the revised TPC programme – is consistent with Article 3.1(a) of the *SCM Agreement*.
>
> Accordingly, in carrying out its review under Article 21.5 of the DSU, a panel is not confined to examining the 'measures taken to comply' from the perspective of the claims, arguments and factual circumstances that related to the measure that was the subject of the original proceedings. Although these may have some relevance in proceedings under Article 21.5 of the DSU, Article 21.5 proceedings involve, in principle, not the original measure, but rather a new and different measure which was not before the original panel. In addition, the relevant facts bearing upon the 'measure taken to comply' may be different from the relevant facts relating to the measure at issue in the original proceedings. It is natural, therefore, that the claims, arguments and factual circumstances which are pertinent to the 'measure taken to comply' will not, necessarily, be the same as those which were pertinent in the original dispute. Indeed, the utility of the review envisaged under Article 21.5 of the DSU would be seriously undermined if a panel were restricted to examining the new measure from the perspective of the claims, arguments and factual circumstances that related to the original measure, because an Article 21.5 panel would then be unable to examine fully the 'consistency with a covered agreement of the measures taken to comply', as required by Article 21.5 of the DSU."[877]

611. In *US – FSC (Article 21.5 – EC)*, the Appellate Body upheld a ruling on a *new* claim challenging an aspect of the measure taken to comply that was a revision of the original measure.[878]

612. The Panel on *EC – Bed Linen (Article 21.5 – India)* voiced due process concerns about a situation where a complainant raises in the Article 21.5 proceeding new claims regarding unchanged aspects of the measures concerned that could have been raised during the original proceedings but were not for one reason or another:

> "As an extreme example, assume a complaining Member challenges an anti-dumping duty in dispute settlement, and alleges violations only in connection with the investigating authorities' determination of injury. Assume the Panel concludes that the anti-dumping duty is inconsistent with the AD Agreement because of a violation of Article 3.4 in the determination of injury, and the DSB recommends that the defending Member 'bring the measure into conformity'. Assume the defending Member re-evaluates only the injury aspect of its original decision, makes a new determination of injury, and continues the imposition of the anti-dumping duty on the basis of the new finding of injury and the pre-existing finding of dumping and causal link. If that anti-dumping duty, and all aspects of the determinations underlying that duty, are considered the 'measure taken to comply', then the complaining Member could, in a subsequent Article 21.5 proceeding, allege a violation in connection with the dumping determination which had not been challenged in the original dispute. If the Article 21.5 panel found a violation of the AD Agreement in the determination of dumping, it would presumably conclude that the measure taken to comply is inconsistent with the AD Agreement. In this circumstance, the defending Member would have no opportunity to bring its measure into conformity with the AD Agreement with respect to the dumping calculation. Moreover, the defending Member would be subject to potential suspension of concessions as a result of a finding of violation with respect to the dumping aspect of the original determination which, because it was not the subject of any finding of violation in the original report, the Member was entitled to assume was consistent with its

[876] (*footnote original*) *Supra*, para. 37.
[877] Appellate Body Report on *Canada – Aircraft (Article 21.5 – Brazil)*, paras. 40–41.
[878] (*footnote original*) Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 222.

obligations under the relevant agreement. Such an outcome would not seem to be consistent with the overall object and purpose of the DSU to achieve satisfactory resolution of disputes, effective functioning of the WTO, to maintain a proper balance between the rights and obligations of Members, and to ensure that benefits accruing to any Member under covered agreements are not nullified or impaired.[879]"[880]

613. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body further stressed that a complainant in Article 21.5 proceedings could raise new claims, meaning claims that it did not raise in the original proceedings:

"[T]he relevant facts bearing upon the 'measure taken to comply' may be different from the facts relevant to the measure at issue in the original proceedings. It is to be expected, therefore, that the claims, arguments, and factual circumstances relating to the 'measure taken to comply' will not, necessarily, be the same as those relating to the measure in the original dispute.[881] Indeed, a complainant in Article 21.5 proceedings may well raise *new* claims, arguments, and factual circumstances different from those raised in the original proceedings, because a 'measure taken to comply' may be *inconsistent* with WTO obligations in ways different from the original measure. In our view, therefore, an Article 21.5 panel could not properly carry out its mandate to assess whether a 'measure taken to comply' is *fully consistent* with WTO obligations if it were precluded from examining claims additional to, and different from, the claims raised in the original proceedings.[882]"[883]

(c) "through recourse to these dispute settlement procedures"

(i) General

614. The parties to a dispute have often concluded ad hoc procedural agreements to solve the sequencing problem between compliance review procedures under Article 21.5 and the suspension of concessions and other obligations procedures under Article 22. These procedural agreements also tend to include procedural arrangements concerning the various stages of Article 21.5 compliance review procedures. In this regard, see Section XXI.B.4(e) below.

(ii) Timing of the establishment of Article 21.5 panels

615. Until 31 December 2004, Article 21.5 panels have been established at the first DSB meeting at which the request for establishment was submitted; with the sole exception of the Panel on *Brazil – Aircraft (Article 21.5 – Canada II)*, which was established at the second DSB meeting.[884] In most of the cases, the establishment at the first DSB meeting was a procedural requirement agreed by the parties in an ad hoc agreement regarding procedures under Articles 21 and 22 of the DSU applicable to the given dispute. For information relating to these procedural arrangements, see Section XXI.B.4(e) below.

(iii) Parties' submissions

616. In *US – FSC (Article 21.5 – EC)*, the respondent, the United States, requested on 12 February 2001 that the Article 21.5 compliance panel deviate from the provision in Article 12.6 DSU which provides that the sequential first written submissions are to be followed by simultaneous written rebuttals. The United States argued that the European Communities had had new material from the submission of the United States to rebut in its rebuttal submission while the United States had not. The Panel denied the request on the following grounds:

"We recall that we adopted our working procedures after having heard the views of the parties, including their views on the issue of the timing of the filing of their rebuttal submissions. We do not believe that any development or consideration has since arisen that would require us to reconsider this aspect of our working procedures, particularly given the current advanced stage of the proceedings and the difficulties inherent in adjusting

[879] See Articles 3.2–3.3 of the DSU.

[880] Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.40.

[881] (*footnote original*) *Ibid.*

[882] (*footnote original*) As we put it in *Canada – Aircraft (Article 21.5 – Brazil)*:

> Indeed, the utility of the review envisaged under Article 21.5 of the DSU would be seriously undermined if a panel were restricted to examining the new measure from the perspective of the claims, arguments and factual circumstances that related to the original measure, because an Article 21.5 panel would then be unable to examine fully the "consistency with a covered agreement of the measures taken to comply", as required by Article 21.5 of the DSU.

(Appellate Body Report, *Canada – Aircraft (Article 21.5 – Brazil)*, para. 41.) We defined the function of Article 21.5 proceedings in the same vein in our Report in *US – Shrimp (Article 21.5 – Malaysia)* (para. 87).

[883] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 79.

[884] Compliance panels established during first DSB meeting: *EC – Bananas III (Article 21.5 – European Communities and Ecuador)* (WT/DSB/M/53); *Canada – Aircraft (Article 21.5 – Brazil)* (WT/DSB/M/72); *US – DRAMS (Article 21.5 – Korea)* (WT/DSB/M/79); *Mexico – Corn Syrup (Article 21.5 – United States)* (WT/DSB/M/91); *US – Countervailing Measures on Certain EC Products (Article 21.5 – European Communities)* (WT/DSB/M/176); Compliance Panels with Establishment at First Meeting Pursuant to an Understanding Between the Parties Regarding Procedures under Articles 21 and 22 of the DSU: *Australia – Salmon (Article 21.5 – Canada)* (WT/DSB/M/66); *Brazil – Aircraft (Article 21.5 – Canada)* (WT/DSB/M/72); *US – Shrimp (Article 21.5 – Malaysia)* (WT/DSB/M/91 and WT/DS58/16); *Canada – Dairy (Article 21.5 – United States and New Zealand)* (WT/DSB/M/100, WT/DS103/14 and WT/DS113/14); *Canada – Dairy (Article 21.5 II – United States and New Zealand)* (WT/DSB/M/116, WT/DS103/24 and WT/DS113/24); *US – FSC (Article 21.5 – European Communities)* (WT/DSB/M/95 and WT/DS108/12); *Australia – Automotive Leather II (Article 21.5 – US)* (WT/DSB/M/69); *EC – Bed Linen (Article 21.5 – India)* (WT/DSB/M/124 and WT/DS141/11); *Japan – Apples (Article 21.5 – United States)* (WT/DSB/M/174 and WT/DS245/10); Compliance Panel established during second DSB meeting: *Brazil – Aircraft (Article 21. 5 II – Canada)* (WT/DSB/M/98 and WT/DSB/M/99).

other aspects of the Panel's schedule that such a change would necessitate.

We therefore deny this request by the United States to change the Panel's schedule with respect to the timing for filing the parties' second written submissions. We note that the United States, as well as the European Communities, if they wish, would be able to respond to, or comment on, the other party's rebuttals in their oral statements at the substantive meeting."[885]

(iv) Third-party rights: access to second written submissions by third parties

617. In *Australia – Automotive Leather II (Article 21.5 – US)*, the working procedures adopted by the Panel provided, *inter alia*, for only one meeting with the parties, to be held in conjunction with the third party session. The procedures also provided for third parties to receive only the first submissions, and not the rebuttal submissions, of the parties. The European Communities objected and argued that since in this case there was to be only one meeting of the Panel, at which the Panel would be considering both submissions of each party, the third parties, in accordance with Article 10.3 of the DSU, should receive all of the parties' submissions. The Panel, in a preliminary ruling,[886] rejected the European Communities' request as follows:

"[T]he Panel indicated that it had decided not to change the existing working procedures which provide for third parties to receive the first written submissions of the parties, but not the rebuttals. The Panel stated that if it had decided to hold two meetings with the parties, as is the normal situation envisioned in Appendix 3 of the DSU, third parties would have received only the written submissions made prior to the first meeting, but not rebuttals or other submissions made subsequently. Thus, in the more usual case, third parties would be in the same position as they were in this case with respect to their ability to present views to the panel. In the view of the Panel, the procedure it had established conformed more closely with the usual practice than would be the case if third parties received the rebuttals, and was in keeping with Article 10.3 of the DSU in a case where the Panel holds only one meeting."[887]

618. In *Australia – Salmon (Article 21.5 – Canada)*, the Panel also followed the approach above and denied the European Communities' request to allow the third parties access to second written submissions.[888]

619. In *Canada – Dairy (Article 21.5 – New Zealand and US)*, however, the Panel decided, in a preliminary ruling,[889] to allow third parties access to the second written submissions of the parties on the following grounds:

"In the Panel's view, the object and purpose of Article 10.3 of the DSU is to allow third parties to participate in an informed and, hence, meaningful, manner in a session of the meeting with the parties specifically set aside for that purpose. Third parties can only do so if they have received all the information exchanged between the parties before that session. Otherwise, third parties might find themselves in a situation where their oral statements at the meeting become partially or totally irrelevant or moot in the light of second submissions by the parties to which third parties did not have access. Without access to all the submissions by the parties to the dispute to the first meeting of the panel, uninformed third party submissions could unduly delay panel proceedings and, as rightly emphasised by the EC and supported by Mexico, could prevent the Panel from receiving 'the benefit of a useful contribution by third parties which could help the Panel to make the objective assessment that it is required to make under Article 11 of the DSU'."[890]

620. In *US – FSC (Article 21.5 – EC)*, the Panel, in a preliminary ruling,[891] did not follow the position of the Panel in *Canada – Dairy (Article 21.5 – New Zealand and US)* and denied access to second written submissions to third parties on the grounds that it was not permitted by Article 10.3 of the *DSU*. However, the Appellate Body disagreed with the Panel on the grounds that Article 10.3 requires that third parties be provided with all of the submissions made by the parties up to the time of the first panel meeting "whether that meeting is the first of two panel meetings, or the first and only panel meeting":

"Article 10.3 of the DSU is couched in mandatory language. By its terms, third parties 'shall' receive 'the submissions of the parties to the *first* meeting of the panels'. (emphasis added) Article 10.3 does *not* say that third parties shall receive 'the *first* submissions' of the parties, but rather that they shall receive '*the* submissions' of the parties. (emphasis added) The number of submissions that third parties are entitled to receive is *not* stated. Rather, Article 10.3 defines the submissions that third parties are entitled to receive by reference to a specific step in the proceedings – the first meeting of the panel.[892] It follows, in our view, that, under this provision, third parties must

[885] Panel Report on *US – FSC (Article 21.5 – EC)*, para. 6.6.
[886] For more information on preliminary rulings, see Section XXXVI.C.
[887] Panel Report on *Australia – Automotive Leather II (Article 21.5 – United States)*, para. 3.9.
[888] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.5–7.6.
[889] For more information on preliminary rulings, see Section XXXVI.C.
[890] Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 2.34.
[891] For more information on preliminary rulings, see Section XXXVI.C.
[892] (*footnote original*) We note, in this regard, that paragraph 6 of Appendix 3 to the DSU also links the participatory rights of third parties to this step in the proceeding. It states that third parties "*shall be invited in writing to present their views during a session of the first substantive meeting of the panel*". (emphasis added)

be given all of the submissions that have been made by the parties to the panel up to the first meeting of the panel, irrespective of the number of such submissions which are made, including any rebuttal submissions filed in advance of the first meeting.[893]"[894]

621. As regards third-party rights in general, see Section X.B above.

(d) Burden of proof

622. The Appellate Body on *Canada – Aircraft (Article 21.5 – Brazil)* ruled that the examination of "measures taken to comply" is based on the relevant facts proved, by the complainant, to the Article 21.5 panel, during the panel proceedings:

"We add also that the examination of 'measures taken to comply' is based on the relevant facts proved, by the complainant, to the Article 21.5 panel, during the panel proceedings. Therefore, the 'minimum implementation standard' that the Article 21.5 Panel expressed and which, it said, was 'effectively' agreed between the parties, should be viewed with caution. The Article 21.5 Panel said that Canada's implementation should '"*ensure*" that *future* TPC assistance to the Canadian regional aircraft industry will not be *de facto* contingent on export performance.' (emphasis added) The use in this standard of the words 'ensure' and 'future', if taken too literally, might be read to mean that the Panel was seeking a strict guarantee or absolute assurance as to the *future* application of the revised TPC programme. A standard which, if so read, would, however, be very difficult, if not impossible, to satisfy since no one can predict how unknown administrators would apply, in the unknowable future, even the most conscientiously crafted compliance measure."[895]

623. In *Brazil – Aircraft (Article 21.5 – Canada)*, Brazil argued that the Article 21.5 Panel erred in placing upon Brazil the burden of proving that its implementation measure complied with the recommendations and rulings of the DSB. Brazil claimed that Canada must bear the burden of proving that Brazil's measure does not implement the DSB recommendations and rulings. The Appellate Body stated that the fact that the measure at issue was "taken to comply" with the "recommendations and rulings" of the DSB does not alter the allocation of the burden of proving a defence:

"[T]he fact that the measure at issue was 'taken to comply' with the 'recommendations and rulings' of the DSB does not alter the allocation of the burden of proving Brazil's 'defence' under item (k). In this respect, we note that Brazil concedes that the revised PROEX measure is, in principle, prohibited under Article 3.1(a) of the *SCM Agreement*; yet Brazil asserts nonetheless that the PROEX measure is justified, under the first paragraph of item (k). Thus, in our view, Brazil is, clearly, using item (k) to make an affirmative claim in its defence. In *United States – Measure Affecting Imports of Woven Wool Shirts and Blouses from India*, we said: 'It is only reasonable that the burden of establishing [an affirmative] defence should rest on the party asserting it.' As it is Brazil that is asserting this 'defence' using item (k) in these proceedings, we agree with the Article 21.5 Panel that Brazil has the burden of proving that the revised PROEX is justified under the first paragraph of item (k), including the burden of proving that payments under the revised PROEX are *not* 'used to secure a material advantage in the field of export credit terms.'"[896]

(e) List of disputes under Article 21.5

624. The following table lists the disputes where an Article 21.5 panel and/or Appellate Body report has been circulated as of 31 December 2004:

	WT/DS No.	Case Name	Date circulated	Date adopted
1	WT/DS18	*Australia – Salmon (Article 21.5 – Canada)*	18 February 2000	20 March 2000
2	WT/DS27	*EC – Bananas III (Article 21.5 – EC)*	12 April 1999	–
3	WT/DS27	*EC – Bananas III (Article 21.5 – Ecuador)*	12 April 1999	6 May 1999
4	WT/DS46	*Brazil – Aircraft (Article 21.5 – Canada)*	9 May 2000	4 August 2000
5	WT/DS46	*Brazil – Aircraft (Article 21.5 – Canada II)*	26 July 2001	23 August 2001
6	WT/DS58	*US – Shrimp (Article 21.5 – Malaysia)*	15 June 2001	21 November 2001
7	WT/DS70	*Canada – Aircraft (Article 21.5 – Brazil)*	9 May 2000	4 August 2000

[893] (*footnote original*) We note, in that respect, that the DSU does not place any limits on the number of submissions which panels can request of the parties in advance of the first meeting.

[894] Appellate Body Report on *US – FSC (Article 21.5 – European Communities)*, para. 245.

[895] Appellate Body Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 38.

[896] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 66.

Table (*cont.*)

	WT/DS No.	Case Name	Date circulated	Date adopted
8	WT/DS99	*US – DRAMS (Article 21.5 – Korea)*	7 November 2000	Mutually Agreed Solution
9	WT/DS103, WT/DS113	*Canada – Dairy (Article 21.5 – New Zealand and US)*	11 July 2001	18 December 2001
10	WT/DS103, WT/DS113	*Canada – Dairy (Article 21.5 – New Zealand and US II)*	26 July 2002	17 January 2003
11	WT/DS108	*US – FSC (Article 21.5 – EC)*	20 August 2001	29 January 2002
12	WT/DS126	*Australia – Automotive Leather II (Article 21.5 – US)*	21 January 2000	11 February 2000
13	WT/DS132	*Mexico – Corn Syrup (Article 21.5 – US)*	22 June 2001	21 November 2001
14	WT/DS141	*EC – Bed Linen (Article 21.5 – India)*	29 November 2002	24 April 2003

5. Ad hoc agreements on procedures under Articles 21 and 22 concluded by parties

(a) The sequencing issue

625. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators indicated that they were "aware of the question of 'sequencing' recourses to Article 21.5 and Article 22.6 of the DSU". The Arbitrators noted that one of the effects of the bilateral agreement concluded by the parties (see paragraph 637 below) "was to establish such a 'sequencing'". The Arbitrators thus considered that by issuing their report after the Appellate Body Article 21.5 report, they had respected the intention of the parties. The Arbitrators concluded that "the question of whether such a sequencing is actually required under the DSU is not part of the mandate of the Arbitrators".[897]

(b) Sequencing solutions in ad hoc procedural agreements

(i) Recourse to Article 21.5 before initiating Article 22 proceedings

626. In *Australia – Automotive Leather II*, the United States and Australia agreed on a procedural understanding on 4 October 1999, whereby the complainant, the United States, would not initiate Article 22 proceedings until the circulation of the compliance panel's report pursuant to Article 21.5. The relevant part of the procedural agreement provides that "the United States will not request authorization to suspend concessions until after the review panel has circulated its report".[898]

627. In *US – Shrimp,* the disputing parties, Malaysia and the United States, agreed on a procedural agreement on 22 December 1999, which included a similar provision to that in *Australia – Automotive Leather II* (see paragraph 626 above). However, in this case Malaysia undertook not to initiate Article 22 proceedings until the *adoption* of the 21.5 panel report. The relevant part of the procedural agreement reads as follows:

> "If Malaysia at some future date decides that it may wish to initiate proceedings under Articles 21.5 and Article 22 of the DSU, Malaysia will initiate proceedings under Article 21.5 prior to any proceedings under Article 22. Malaysia will provide the United States advance notice of any proposal to initiate proceedings under Article 21.5 and will consult with the United States before requesting the establishment of a panel under Article 21.5. Malaysia will not request authorization to suspend concessions or other obligations under Article 22 until the adoption of the Article 21.5 panel report."[899]

628. Similarly, in *Argentina – Hides and Leather*, the disputing parties, the European Communities and Argentina, agreed on a procedural agreement on 26 February 2002. According to this agreement, the complainant, the European Communities, would only have recourse to Article 22 proceedings after the completion of the Article 21.5 proceedings. The relevant part of the procedural agreement provides that:

> "However, the EC's resort to the DSU for the purposes of suspension of concessions or other obligations may take place only after completion of proceedings under Article 21.5 of the DSU."[900]

---

[897] Decision by the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)*, footnote 7.

[898] WT/DS126/8. For similar provisions see also *Brazil – Aircraft*, WT/DS46/13; *Canada – Aircraft*, WT/DS70/9; *EC – Bed Linen*, WT/DS141/11.

[899] WT/DS58/16, para. 1. For a similar provision see also *Thailand – H-Beams*, WT/DS122/10.

[900] WT/DS155/12, para. 2. For similar provisions, see also *US – Steel Plate*, WT/DS206/9; *Chile – Price Band System*, WT/DS207/16.

(ii) Simultaneous Articles 21.5 and 22 proceedings

629. In *Canada – Dairy*, the disputing parties, New Zealand and Canada, agreed on 23 November 1999 on a procedural agreement whereby the complainant, New Zealand, could request authorization to suspend concessions under Article 22 either simultaneously or after an Article 21.5 proceeding. In the event that the Articles 21.5 and 22 proceedings were simultaneously initiated, and the matter referred to arbitration pursuant to Article 22.6, the parties would request the arbitrator to suspend its work until the adoption of the compliance panel [and Appellate Body] report[s]. The relevant part of the procedural agreement reads as follows:

> "After the end of the period available to Canada to implement the DSB recommendations and rulings . . ., should New Zealand consider that the situation described in Article 21.5 of the DSU exists, New Zealand will request consultations which the parties agree to hold within 10 days from the date of the request. Canada and New Zealand agree that at the end of such consultations, should either party so state, the parties will jointly consider that the consultations have failed to settle the dispute. Thenceforward New Zealand will be entitled to request the establishment of a panel pursuant to Article 21.5 of the DSU (the 'Article 21.5 compliance panel').
>
> . . .
>
> New Zealand may request authorization to suspend concessions or other obligations pursuant to Article 22.2 of the DSU simultaneously with or after any New Zealand request for the establishment of a panel pursuant to paragraph 1.
>
> . . .
>
> Where the matter has been referred to arbitration, the parties agree to request the Article 22.6 arbitrator, at the earliest possible moment, to suspend its work until either (a) the adoption of the Article 21.5 compliance panel report; or (b) if there is an appeal, the adoption of the Appellate Body report."[901]

(iii) Agreement not to appeal the compliance report

630. In *Australia – Automotive Leather II* (see paragraph 626 above), the disputing parties agreed to refrain from appealing the panel report under Article 21.5 in the event the compliance panel found that the measures taken by Australia were inconsistent with the recommendations and rulings of the DSB. The relevant part of the procedural agreement reads as follows:

> "Both Australia and the United States will unconditionally accept the review panel report and there will be no appeal of that report."[902]

(iv) Withdrawal of Article 22 arbitration request

631. In *US – FSC*, the disputing parties, the European Communities and the United States, concluded a procedural agreement on 29 September 2000. Pursuant to this agreement, in the event that the DSB found that the measures taken to comply by the United States were not inconsistent with WTO law, the European Communities undertook to withdraw its request for authorization to suspend concessions under Article 22. The relevant part of the procedural agreement provides that:

> "In the event that the DSB finds that measures taken by the US to comply with the recommendations and rulings of the DSB are inconsistent with the covered agreements referred to in the Article 21.5 compliance panel request, the arbitrator will automatically resume its work. In the event that the DSB finds that the measures taken by the US to comply with the recommendations and rulings of the DSB are not inconsistent with the covered agreements referred to in the Article 21.5 compliance panel request, the EC will withdraw its request under Article 22.2 of the DSU, thereby terminating the arbitration procedure."[903]

(v) Direct recourse to Article 22

632. In *US – FSC*, the disputing parties agreed that in the absence of measures taken to comply by the United States, the European Communities could proceed directly to request authorization to suspend concessions under Article 22.2, without having recourse to Article 21.5 proceedings. The relevant part of the procedural agreement reads as follows:

> "Where there exist no measures taken to comply with the DSB recommendations and rulings by the end of the implementation period, the EC may request authorization to suspend concessions or other obligations pursuant to Article 22.2 of the DSU and to adopt countermeasures pursuant to Article 4.10 of the SCM Agreement, without having recourse to Article 21.5 of the DSU."[904]

(vi) Agreement not to object to arbitration under Article 22.6

633. In *Japan – Apples*, the disputing parties, Japan and the United States, agreed, in a procedural agreement concluded on 30 June 2004, that in the event the complainant, the United States, requested the authorization to suspend concessions, the respondent, Japan, would object to the proposed level of suspension and request arbitration under Article 22.6. In that case, the

[901] WT/DS113/14. For similar provisions, see also *Japan – Apples*, WT/DS245/10; *US – FSC*, WT/DS108/12.
[902] WT/DS126/8, para. 4.
[903] WT/DS108/12, para. 12. For similar provisions, see also *Canada – Dairy*, WT/DS113/14; *Japan – Apples*, WT/DS245/10.
[904] WT/DS108/12, para. 9.

United States undertook not to object to the referral of the dispute to arbitration under Article 22.6. The relevant part of the procedural agreement provides that:

> "Under DSU Article 22.6, Japan will object to the level of suspension of concessions or other obligations and/or make a claim under DSU Article 22.3 before the date of the DSB meeting considering the United States' request and the matter will be referred to arbitration pursuant to DSU Article 22.6. The United States will not pose any objection to the referral of the matter to such arbitration."[905]

(vii) Non-application of the 30-day deadline in first sentence in Article 22.6

634. In *EC – Bed Linen*, the disputing parties, the European Communities and India, agreed in a procedural agreement concluded on 13 September 2001, that the European Communities would not invoke the 30-day deadline in the first sentence in Article 22.6 in order to block India's request for arbitration under Article 22.6. The relevant part of the procedural agreement reads as follows:

> "If on the basis of the results of proceedings under Article 21.5 of the DSU that might be initiated by India no later than 31 March 2002, India decides to initiate proceedings under Article 22 of the DSU, the EC will not assert that India is precluded from obtaining DSB authorization because India's request was made outside the 30 day time-period specified in the first sentence of Article 22.6 of the DSU."[906]

635. In *Australia – Automotive Leather II* (see paragraph 626 above), the disputing parties, the United States and Australia, agreed to extend the 30-day time period in the first sentence of Article 22.6 to 60 days. In addition, the 60-day deadline would start from the date of circulation of the compliance panel report. By common consent, the 60-day period for completing the arbitration under Article 22.6 was reduced by agreement to 45 days. The relevant part of the procedural agreement provides:

> "Pursuant to footnote 6 to Article 4 of the SCM Agreement, Australia and the United States agree that the deadline for DSB action under the first sentence of Article 22.6 of the DSU shall be 60 days after the circulation of the review panel report under Article 21.5 of the DSU, and that the deadline specified in the third sentence of Article 22.6 of the DSU for completion of arbitration shall be 45 days after the matter is referred to arbitration."[907]

(c) Consultations

636. In *US – Steel Plate*, the disputing parties, the United States and India, agreed in a procedural agreement concluded on 14 February 2003, that should the complainant consider that the situation described in Article 21.5 exists, it would request consultations with the respondent prior to requesting the establishment of a compliance panel. The relevant part of the procedural agreement reads:

> "Should India consider that the situation described in Article 21.5 of the DSU exists, India will request consultations which the parties agree to hold within 12 days from the date of circulation of the request. India and the United States agree that at the end of such consultations, should either party so state, the parties will jointly consider that the consultations have failed to settle the dispute."[908]

(d) Establishment of the panel

637. In *Brazil – Aircraft* and *Canada – Aircraft*, and the two proceedings under Article 21.5 brought by Canada and Brazil against each other, the disputing parties agreed, in two identical procedural agreements concluded on 23 November 1999, to include a provision whereby the parties would agree to establish the 21.5 panels at the first DSB meeting. The relevant part of the procedural agreement reads as follows:

> "On 23 November 1999, Canada will request that this matter be referred to the original panel pursuant to Article 21.5 of the DSU. Canada will also request the convening of a DSB meeting on 3 December 1999 and Brazil will not object to the holding of such a meeting.
>
> At the DSB meeting convened in response to the request by Canada, Brazil will accept the establishment of a review panel under Article 21.5 of the DSU and will not pose any procedural objection to the establishment of such a panel."[909]

(e) Appointment of panellists

638. In *Japan – Apples*, the disputing parties agreed that if the original panellists were not available for the compliance panel or the Article 22.6 arbitration (or both) proceedings, they would request the Director-General of the WTO to appoint a replacement for the proceeding or proceedings in which this was required.

---

[905] *Japan – Apples*, WT/DS245/10, para. 5. For similar provisions see also *US – FSC*, WT/DS108/12; *Canada Dairy*, WT/DS113/14.

[906] WT/DS141/11, para. 5. For similar provisions see also *US – Shrimp*, WT/DS58/16; *Thailand – H-Beams*, WT/DS122/10; *Argentina – Hides and Leather*, WT/DS155/12; *US – Steel Plate*, WT/DS206/9; *Chile – Price Band System*, WT/DS207/16; *Japan – Apples*, WT/DS245/10.

[907] WT/DS126/8, para. 6. For similar provisions, see also *Brazil – Aircraft*, WT/DS46/13 and *Canada – Aircraft*, WT/DS70/9.

[908] WT/DS206/9, para. 1. For similar provisions, see also *US – FSC*, WT/DS108/12; *Canada – Dairy*, WT/DS103/14; *Thailand – H-Beams*, WT/DS122/10; *US – Steel Plate*, WT/DS206/9 and *Chile – Price Band System*, WT/DS207/16.

[909] WT/DS46/13, paras. 1–2. For similar provisions, see also *US – FSC*, WT/DS108/12; *Canada – Dairy*, WT/DS103/14; *US – Steel Plate*, WT/DS206/9; *Chile – Price Band System*, WT/DS207/16 and *Japan – Apples*, WT/DS245/10.

The relevant part of the procedural agreement provides:

> "If any of the original panellists are not available for either the Article 21.5 compliance panel or the Article 22.6 arbitration, or both, the parties will request the Director-General of the WTO to appoint, as soon as possible, a replacement for the proceeding or proceedings in which such a replacement is required. If an original panellist is unavailable to serve in either proceeding, the parties will further request that in making this appointment, the Director-General seek a person who will also be available to act in both proceedings."[910]

(f) Participation of experts

639. In *Japan – Apples*, the disputing parties agreed that if the participation of experts was deemed necessary, the parties would not object to the participation of the original experts. The relevant part of the procedural agreement provides:

> "Should the Article 21.5 compliance panel determine that the participation of experts is necessary, and should the panel consider the participation of the original experts appropriate, the parties will not object to the participation of the original experts."[911]

(g) Cooperation to ensure time-limits for the work of the compliance panel and Appellate Body are respected

640. In *Canada – Dairy*, the disputing parties agreed to include a provision in the procedural agreement whereby they would agree to cooperate to ensure that the 90-day deadlines for both the compliance panel and the Appellate Body work were respected. The relevant part of the procedural agreement reads as follows:

> "New Zealand and Canada will cooperate to enable the Article 21.5 panel to circulate its report within 90 days of the panel's composition, excluding such time as the panel's work may be suspended pursuant to Article 12.12 of the DSU.
>
> . . .
>
> In case of an appeal of the Article 21.5 compliance panel report, the parties will cooperate to enable the Appellate Body to circulate its report within no more than 90 days from the date of notification of the appeal to the DSB."[912]

(h) Non-prejudice of the parties' other rights

641. In *US – Steel Plate*, the disputing parties included a clause whereby they agreed that the provisions in the procedural agreement did not prejudice their rights or interests. The relevant part of the agreement provides that:

> "These agreed procedures do not prejudice the rights of India or the United States to take any action or procedural step to protect their rights or interests, including the activation of any aspect of the provisions of the DSU."[913]

(i) List of ad hoc agreements

642. The following table shows in which proceedings these procedural agreements were concluded up to 31 December 2004:

WT/DS Complainant	Short Title	Referral to original panel	Agreement on procedures under Articles 21 and 22
DS18 – Canada	*Australia – Salmon*	28.7.1999	Yes WT/DS18/RW, para. 1.3
DS27 – Ecuador	*EC – Bananas III (Article 21.5 – Ecuador)*	12.1.1999	No
DS27 – EC	*EC – Bananas III (Article 21.5 – EC)*	9.12.1999	No
DS46 – Canada	*Brazil – Aircraft (Article 21.5 – Canada)*	9.12.1999	Yes WT/DS46/13
DS46 – Canada	*Brazil – Aircraft (Article 21.5 – Canada II)*	16.2.2001	No
DS58 – Malaysia	*US – Shrimp (Article 21.5 – Malaysia)*	23.10.2000	Yes WT/DS58/16
DS70 – Brazil	*Canada – Aircraft (Article 21.5 – Brazil)*	9.12.1999	Yes WT/DS70/9

[910] WT/DS245/10, para. 10. For similar provisions, see also *US – FSC*, WT/DS108/12; *Canada – Dairy*, WT/DS113/14 and *Chile – Price Band System*, WT/DS207/16.

[911] WT/DS245/10, para. 11.

[912] WT/DS113/14, paras. 3 and 5. For similar provisions see also *Australia – Automotive Leather II*, WT/DS126/8; *Brazil – Aircraft*, WT/DS46/13; *Canada – Aircraft*, WT/DS70/9; *US – FSC*, 108/12; *US – Steel Plate*, WT/DS206/9; *Chile – Price Band System*, WT/DS207/16.

[913] WT/DS206/9, para. 10. For a similar provision, see *Japan – Apples*, WT/DS245/10.

Table (*cont.*)

WT/DS Complainant	Short Title	Referral to original panel	Agreement on procedures under Articles 21 and 22
DS99 – Korea	*US – DRAMS (Article 21.5 – Korea)*	25.4.2000	No
DS103 – US DS113 – New Zealand	*Canada – Dairy (Article 21.5 – New Zealand and US)*	1.3.2001	Yes WT/DS103/14 and 24 WT/DS113/14 and 24
DS103 – US DS113 – New Zealand	*Canada – Dairy (Article 21.5 – New Zealand and US II)*	18.12.2001	Yes WT/DS103/14 and 24 WT/DS113/14 and 24
DS108 – EC	*US – FSC (Article 21.5 – EC)*	20.12.2000	Yes WT/DS108/12

DS245 – US	*Japan – Apples (Article 21.5 – US)*	30.7.2004	Yes WT/DS245/10

(j) Panel's scope of review of procedural agreements

643. In *Brazil – Aircraft* and *Canada – Aircraft*, with regard to the two proceedings under Article 21.5 brought by Canada and Brazil against each other in relation to their respective aircraft export subsidies, Canada and Brazil reached two identical agreements (though the names of the parties were swapped) on the conduct of proceedings (see paragraph 637 above). Brazil, however, stated at a hearing during the Article 22.6 Arbitration proceedings that the recourse by Canada to Article 22.2 of the DSU before the completion of the Article 21.5 proceedings was a material breach of the bilateral agreement. Referring to Article 60 of the *Vienna Convention*, Brazil declared that it was terminating the bilateral agreement. Brazil thus stated that, pursuant to Article 22.7 of the DSU, the Arbitrators should determine that the proposed countermeasures are not allowed under the *SCM Agreement* on the grounds that the time within which they may be authorized has expired. Canada considered that the Arbitrators did not have authority to interpret the bilateral agreement.[914] The Arbitrators considered that they did not need to discuss the question of whether they could interpret the bilateral agreement or whether it ceased to apply to the Arbitrators' tasks after Brazil's alleged application of Article 60 of the *Vienna Convention*.[915]

6. Relationship with other Articles

(a) Article 6.2

644. The Appellate Body on *Mexico – Corn Syrup* assumed that "the same procedures apply in Article 21.5 proceedings as in original panel proceedings"[916] when considering the alleged failure of the United States to comply with Article 6.2 of the *DSU* because the United States' communication seeking recourse to Article 21.5

[914] Decision by the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.6.
[915] Decision by the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.7–3.8.
[916] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 67.

of the *DSU* did not indicate whether consultations had been held. The Appellate Body considered that the requirement under Article 6.2 of the *DSU* "to indicate whether consultations were held" is satisfied by the inclusion in the Panel request of a statement as to whether or not consultations occurred:

> "In assessing the importance of the obligation 'to indicate whether consultations were held', we observe that the requirement will be satisfied by the inclusion, in the request for establishment of a panel, of a statement as to whether consultations occurred *or not*. The purpose of the requirement seems to be primarily informational – to inform the DSB and Members as to whether consultations took place. We also recall that the DSU expressly contemplates that, in certain circumstances, a panel can deal with and dispose of the matter referred to it even if no consultations took place. Similarly, the authority of the panel cannot be invalidated by the absence, in the request for establishment of the panel, of an indication 'whether consultations were held'. Indeed, it would be curious if the requirement in Article 6.2 to inform the DSB whether consultations were held was accorded more importance in the dispute settlement process than the requirement actually to hold those consultations."[917]

(b) Article 12.7

645. As regards the panels' duty to provide a basic rationale behind their findings and conclusions in Article 21.5 proceedings, see Section XII.B.4(a) above.

XXII. ARTICLE 22

A. TEXT OF ARTICLE 22

Article 22
Compensation and the Suspension of Concessions

1. Compensation and the suspension of concessions or other obligations are temporary measures available in the event that the recommendations and rulings are not implemented within a reasonable period of time. However, neither compensation nor the suspension of concessions or other obligations is preferred to full implementation of a recommendation to bring a measure into conformity with the covered agreements. Compensation is voluntary and, if granted, shall be consistent with the covered agreements.

2. If the Member concerned fails to bring the measure found to be inconsistent with a covered agreement into compliance therewith or otherwise comply with the recommendations and rulings within the reasonable period of time determined pursuant to paragraph 3 of Article 21, such Member shall, if so requested, and no later than the expiry of the reasonable period of time, enter into negotiations with any party having invoked the dispute settlement procedures, with a view to developing mutually acceptable compensation. If no satisfactory compensation has been agreed within 20 days after the date of expiry of the reasonable period of time, any party having invoked the dispute settlement procedures may request authorization from the DSB to suspend the application to the Member concerned of concessions or other obligations under the covered agreements.

3. In considering what concessions or other obligations to suspend, the complaining party shall apply the following principles and procedures:

(a) the general principle is that the complaining party should first seek to suspend concessions or other obligations with respect to the same sector(s) as that in which the panel or Appellate Body has found a violation or other nullification or impairment;

(b) if that party considers that it is not practicable or effective to suspend concessions or other obligations with respect to the same sector(s), it may seek to suspend concessions or other obligations in other sectors under the same agreement;

(c) if that party considers that it is not practicable or effective to suspend concessions or other obligations with respect to other sectors under the same agreement, and that the circumstances are serious enough, it may seek to suspend concessions or other obligations under another covered agreement;

(d) in applying the above principles, that party shall take into account:

(i) the trade in the sector or under the agreement under which the panel or Appellate Body has found a violation or other nullification or impairment, and the importance of such trade to that party;

(ii) the broader economic elements related to the nullification or impairment and the broader economic consequences of the suspension of concessions or other obligations;

(e) if that party decides to request authorization to suspend concessions or other obligations pursuant to subparagraphs (b) or (c), it shall state the reasons therefor in its request. At the same time as the request is forwarded to the DSB, it also shall be forwarded to the relevant Councils and also, in the case of a request pursuant to subparagraph (b), the relevant sectoral bodies;

(f) for purposes of this paragraph, "sector" means:

[917] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 70.

(i) with respect to goods, all goods;

(ii) with respect to services, a principal sector as identified in the current "Services Sectoral Classification List" which identifies such sectors;[14]

(*footnote original*) [14] The list in document MTN.GNS/W/120 identifies eleven sectors.

(iii) with respect to trade-related intellectual property rights, each of the categories of intellectual property rights covered in Section 1, or Section 2, or Section 3, or Section 4, or Section 5, or Section 6, or Section 7 of Part II, or the obligations under Part III, or Part IV of the Agreement on TRIPS;

(g) for purposes of this paragraph, "agreement" means:

(i) with respect to goods, the agreements listed in Annex 1A of the WTO Agreement, taken as a whole as well as the Plurilateral Trade Agreements in so far as the relevant parties to the dispute are parties to these agreements;

(ii) with respect to services, the GATS;

(iii) with respect to intellectual property rights, the Agreement on TRIPS.

4. The level of the suspension of concessions or other obligations authorized by the DSB shall be equivalent to the level of the nullification or impairment.

5. The DSB shall not authorize suspension of concessions or other obligations if a covered agreement prohibits such suspension.

6. When the situation described in paragraph 2 occurs, the DSB, upon request, shall grant authorization to suspend concessions or other obligations within 30 days of the expiry of the reasonable period of time unless the DSB decides by consensus to reject the request. However, if the Member concerned objects to the level of suspension proposed, or claims that the principles and procedures set forth in paragraph 3 have not been followed where a complaining party has requested authorization to suspend concessions or other obligations pursuant to paragraph 3(b) or (c), the matter shall be referred to arbitration. Such arbitration shall be carried out by the original panel, if members are available, or by an arbitrator[15] appointed by the Director-General and shall be completed within 60 days after the date of expiry of the reasonable period of time. Concessions or other obligations shall not be suspended during the course of the arbitration.

(*footnote original*) [15] The expression "arbitrator" shall be interpreted as referring either to an individual or a group.

7. The arbitrator[16] acting pursuant to paragraph 6 shall not examine the nature of the concessions or other obligations to be suspended but shall determine whether the level of such suspension is equivalent to the level of nullification or impairment. The arbitrator may also determine if the proposed suspension of concessions or other obligations is allowed under the covered agreement. However, if the matter referred to arbitration includes a claim that the principles and procedures set forth in paragraph 3 have not been followed, the arbitrator shall examine that claim. In the event the arbitrator determines that those principles and procedures have not been followed, the complaining party shall apply them consistent with paragraph 3. The parties shall accept the arbitrator's decision as final and the parties concerned shall not seek a second arbitration. The DSB shall be informed promptly of the decision of the arbitrator and shall, upon request, grant authorization to suspend concessions or other obligations where the request is consistent with the decision of the arbitrator, unless the DSB decides by consensus to reject the request.

(*footnote original*) [16] The expression "arbitrator" shall be interpreted as referring either to an individual or a group or to the members of the original panel when serving in the capacity of arbitrator.

8. The suspension of concessions or other obligations shall be temporary and shall only be applied until such time as the measure found to be inconsistent with a covered agreement has been removed, or the Member that must implement recommendations or rulings provides a solution to the nullification or impairment of benefits, or a mutually satisfactory solution is reached. In accordance with paragraph 6 of Article 21, the DSB shall continue to keep under surveillance the implementation of adopted recommendations or rulings, including those cases where compensation has been provided or concessions or other obligations have been suspended but the recommendations to bring a measure into conformity with the covered agreements have not been implemented.

9. The dispute settlement provisions of the covered agreements may be invoked in respect of measures affecting their observance taken by regional or local governments or authorities within the territory of a Member. When the DSB has ruled that a provision of a covered agreement has not been observed, the responsible Member shall take such reasonable measures as may be available to it to ensure its observance. The provisions of the covered agreements and this Understanding relating to compensation and suspension of concessions or other obligations apply in cases where it has not been possible to secure such observance.[17]

(*footnote original*) [17] Where the provisions of any covered agreement concerning measures taken by regional or local governments or authorities within the territory of a Member contain provisions different from the provisions of this paragraph, the provisions of such covered agreement shall prevail.

B. INTERPRETATION AND APPLICATION OF ARTICLE 22

1. General

(i) Nature and purpose of countermeasures

646. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators confirmed that the authorization to suspend concessions or other obligations is a temporary measure pending full implementation by the Member concerned. They further agreed with the United States "that this *temporary* nature indicates that it is the purpose of countermeasures to *induce compliance*". However, the Arbitrators considered that "this purpose does not mean that the DSB should grant authorization to suspend concessions beyond what is *equivalent* to the level of nullification or impairment. In our view, there is nothing in Article 22.1 of the *DSU*, let alone in paragraphs 4 and 7 of Article 22, that could be read as a justification for countermeasures of a *punitive* nature."[918]

647. Similarly, the Arbitrators in *EC – Bananas III (Ecuador) (Article 22.6 – EC)* observed that "the object and purpose of Article 22 ... is to induce compliance".[919]

648. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)* the Arbitrator considered that "Article 22.1 of the DSU is particularly clear as to the temporary nature of suspensions of concessions or other obligations, pending compliance." The Arbitrator further stated that "[u]nder Article 22.1 of the DSU and Article 4.10 of the SCM Agreement, non-compliance is the very event justifying the adoption of countermeasures." Moreover, the Arbitrator noted that ". . .the *EC – Bananas* Arbitrators, referring to [DSU Article 22.1], expressed the view that suspension of concessions or other obligations was intended to induce compliance because it was temporary".[920]

649. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators clarified that they were "not called upon to 'provide a comprehensive list of the purposes' of the suspension of concessions or other obligations, or to 'rank these purposes in some sort of order of priority'".[921] Further to quoting the above awards, the Arbitrators agreed that "a fundamental objective of the suspension of obligations is to induce compliance". It emphasized that "[t]he fact that such suspension is meant to be temporary – as indicated in Article 22.1 – is further evidence of this purpose".[922] The Arbitrators further indicated that:

> "We also agree with the critically important point that the concept of 'equivalence', as embodied in Article 22.4, means that obligations cannot be suspended in a punitive manner. This means that in suspending certain obligations owed to the United States under the GATT and the Anti-Dumping Agreement, the European Communities cannot exceed the level of nullification or impairment sustained by the European Communities as a result of the 1916 Act. We consider this further below."[923]

650. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the Arbitrator questioned the nature of the countermeasures, in particular whether "inducing compliance", as set out in *EC – Bananas III (US) (Article 22.6 – EC)*, was the only objective pursued by the DSU when allowing a WTO Member to suspend concessions or other obligations. In that regard, the Arbitrator noted that:

> "The concept of 'inducing compliance' was first raised in the *EC – Bananas III (US) (Article 22.6 – EC)*[924] arbitration and has been referred to since in other arbitrations. However, it is not expressly referred to in any part of the DSU and we are not persuaded that the object and purpose of the DSU – or of the WTO Agreement – would support an approach where the purpose of suspension of concessions or other obligations pursuant to Article 22 would be exclusively to induce compliance. Having regard to Articles 3.7 and 22.1 and 22.2 of the DSU as part of the context of Articles 22.4 and 22.7, we cannot exclude that inducing compliance is part of the objectives behind suspension of concessions or other obligations, but at most it can be only one of a number of purposes in authorizing the suspension of concessions or other obligations. By relying on 'inducing compliance' as the benchmark for the selection of the most appropriate approach we also run the risk of losing sight of the requirement of Article 22.4 that the level of suspension be *equivalent* to the level of nullification or impairment."[925]

651. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the Arbitrator further remarked that the reason

[922] Decision by the Arbitrators on *US – 1916 Act (Article 22.6 – US)*, para. 5.7.

[923] Decision by the Arbitrators on *US – 1916 Act (Article 22.6 – US)*, para. 5.8.

[924] (*footnote original*) *EC – Bananas III (US) (Article 22.6 – US)*, para. 6.3.

[925] Decision by the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – EC)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – India)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Japan)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Korea)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 3.74, *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 3.72, *US – Offset Act (Byrd Amendment) (Article 22.6 – Chile)*, para. 3.69.

for suspending concessions is not explicit in the *DSU*, and that the means for "inducing compliance" are likely to vary in each case:

> "[T]he DSU does not expressly explain the purpose behind the authorization of the suspension of concessions or other obligations. On the one hand, the general obligation to comply with DSB recommendations and rulings seems to imply that suspension of concessions or other obligations is intended to induce compliance, as has been acknowledged by previous arbitrators.[926] However, exactly what may induce compliance is likely to vary in each case, in the light of a number of factors including, but not limited to, the level of suspension of obligations authorized.[927]"[928]

652. As regards the standard of "equivalence" and its assessment by the arbitrators, see Section XXII.B.9(b)(iii) below.

653. As regards the concept of "appropriate countermeasures" in arbitrations initiated pursuant to Article 4.10 of the *SCM Agreement*, see Section XXII.B.10(a) below.

(ii) Bilateral procedural agreements

654. In respect of the ad hoc bilateral agreements concluded by parties to a dispute in order to establish the order and timing of Articles 21 and 22 proceedings, see Section XXI.B.4(e) above.

(iii) Confidential information

655. Concerning the special procedures adopted to safeguard confidential information in Article 22.6 arbitrations, see paragraphs 488–489 above.

2. Article 22.1

656. Regarding compensation and suspension of concessions or other obligations, in the event that the DSB recommendations and rulings are not implemented within a reasonable period of time, see also paragraphs 568–646 above.

657. With respect to the temporary nature of the suspension of concessions, see Section XXII.B.1(i) above.

658. With respect to the relationship of Article 22.1 with Article 21.3, see paragraph 595 above.

3. Article 22.2

(a) Specificity in the request for suspension of concessions or other obligations

(i) Application of Article 6.2 specificity requirement

659. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators held that the requests for suspension of concessions under Article 22.2, as well as the requests for a referral to arbitration under Article 22.6, serve similar due process objectives to requests under Article 6.2 and thus concluded that the specificity standards are relevant for Article 22 requests:

> "The DSU does not explicitly provide that the specificity requirements, which are stipulated in Article 6.2 for panel requests, apply *mutatis mutandis* to arbitration proceedings under Article 22. However, we believe that requests for suspension under Article 22.2, as well as requests for a referral to arbitration under Article 22.6, serve similar due process objectives as requests under Article 6.2. First, they give notice to the other party and enable it to respond to the request for suspension or the request for arbitration, respectively. Second, a request under Article 22.2 by a complaining party defines the jurisdiction of the DSB in authorizing suspension by the complaining party. Likewise, a request for arbitration under Article 22.6 defines the terms of reference of the Arbitrators. Accordingly, we consider that the specificity standards, which are well-established in WTO jurisprudence under Article 6.2, are relevant for requests for authorization of suspension under Article 22.2, and for requests for referral of such matter to arbitration under Article 22.6, as the case may be. They do, however, not apply to the document submitted during an arbitration proceeding, setting out the methodology used for the calculation of the level of nullification or impairment."[929]

(ii) Minimum specificity requirements

660. In *EC – Hormones (US) (Article 22.6 – EC)*, the Arbitrators stated that the minimum requirements attached to a request to suspend concessions or other obligations are:

> "(1) the request must set out a specific level of suspension, i.e. a level equivalent to the nullification and impairment caused by the WTO inconsistent measure, pursuant to Article 22.4; and (2) the request must specify the agreement and sector(s) under which concessions

---

[926] (*footnote original*) *EC – Bananas III (US) (Article 22.6 – EC)*, para. 6.3.

[927] (*footnote original*) While the value of the suspension or concessions or other obligations easily comes to mind as a relevant factor in inducing compliance, it must also be acknowledged that the actual role of the value of such suspension in securing compliance or not may vary from one case to the next. In some cases, even a very high amount of countermeasures may not achieve compliance, whereas in some others a limited amount may.

[928] Decision by the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Chile)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – EC)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – India)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Japan)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Korea)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 6.2.

[929] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 20.

or other obligations would be suspended, pursuant to Article 22.3.[930]"[931]

661. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, in connection with the first minimum requirement for making a request for the suspension of concessions or other obligations, Ecuador requested suspension under Article 22.2 of the *DSU* in the amount of US$ 450 million. Ecuador's methodology paper and submissions indicated that the direct and indirect harm and macroeconomic repercussions of its entire economy amount to US$ 1 billion. Ecuador argued that, pursuant to Article 21.8 of the *DSU*, the total economic impact of the European Communities banana regime should be considered by the Arbitrators by applying a multiplier when calculating the level of nullification and impairment suffered by Ecuador. The Arbitrators stated:

> "[T]he level of suspension specified in Ecuador's request under Article 22.2 is the relevant one and defines the amount of requested suspension for purposes of this arbitration proceeding. Additional estimates advanced by Ecuador in its methodology document and submissions were not addressed to the DSB and thus cannot form part of the DSB's referral of the matter to arbitration. Belated supplementary requests and arguments concerning additional amounts of alleged nullification or impairment are, in our view, not compatible with the minimum specificity requirements for such a request because they were not included in Ecuador's request for suspension under Article 22.2 of the DSB."[932]

662. With respect to the second minimum requirement for making a request for the suspension of concessions or other obligations, the Arbitrators in *EC – Bananas III (Ecuador) (Article 22.6 – EC)* noted that Ecuador listed the service subsector of "wholesale trade services (CPC 622)" under the *GATS*; "Protection of performers, producers of phonograms (sound recordings) and broadcasting organizations" in Section 1 (Copyright and related rights), Section 3 (Geographical indications) and Section 4 (Industrial designs) under the *TRIPS Agreement*. The Arbitrators determined that these requests by Ecuador under the *GATS* and *TRIPS Agreement* fulfilled the minimum requirement to specify the agreements and sectors with respect to which it requests authorization to suspend concessions or other obligations. However, the Arbitrators held with respect to Ecuador's statement that it "reserve[d] the right" to suspend concessions under the *GATT*:

> "[T]he terms of reference of arbitrators, acting pursuant to Article 22.6, are limited to those sector(s) and/or agreement(s) with respect to which suspension is specifically being requested from the DSB. We thus consider Ecuador's statement that it 'reserves the right' to suspend concessions under the GATT as not compatible with the minimum requirements for requests under Article 22.2. Therefore, we conclude that our terms of reference in this arbitration proceeding include only Ecuador's requests for authorization of suspension of concessions or other obligations with respect to those specific sectors under the GATS and the *TRIPS Agreement* that were unconditionally listed in its request under Article 22.2."[933]

(b) "concessions or other obligations under the covered agreements"

(i) Tariff "concessions"

List of products

663. In *EC – Hormones (US) (Article 22.6 – EC)* and in *EC – Hormones (Canada) (Article 22.6 – EC)*, the United States and Canada had not attached a list of products to their request for suspension of concessions (as the United States had done in *EC – Bananas III (US) (Article 22.6 – EC)*). The European Communities had requested the Arbitrators to first decide on the amount of trade impairment, to then request a specific product list from the United States and Canada and to finally determine whether both were "equivalent". The Arbitrators in both cases declared themselves "unable to follow the EC request" since "[n]o support for this request can be found in the DSU"[934] and thus they "d[id] not have jurisdiction to set a definite list of products that can be subject to suspension".[935] The Panel considered that the "*qualitative* aspects of the . . . suspension touching upon the 'nature' of concessions . . . fall outside the arbitrators' jurisdiction":

> "The authorization given by the DSB under Article 22.6 of the DSU is an authorization 'to suspend [the application to the Member concerned of] concessions or other obligations [under the covered agreements]'.[936] In our view, the limitations linked to this DSB authorisation are those set out in the proposal made by the requesting Member on the basis of which the authorisation is

---

[930] (*footnote original*) The more precise a request for suspension is in terms of product coverage, type and degree of suspension, etc. . ., the better. Such precision can only be encouraged in pursuit of the DSU objectives of "providing security and predictability to the multilateral trading system" (Article 3.2) and seeking prompt and positive solutions to disputes (Articles 3.3 and 3.7). It would also be welcome in light of the statement in Article 3.10 that "all Members will engage in [DSU] procedures in good faith in an effort to resolve the dispute".

[931] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)*, para. 16.

[933] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 29.

[934] Decisions by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 14.

[935] Decision by the Arbitrator on *EC – Hormones (US) (Article 22.6 – EC)*, para. 23.

[936] (*footnote original*) Article 22.6 of the DSU. Bracketed text added is from Article 22.2 of the DSU.

> granted. In the event tariff concessions are to be suspended, only products that appear on the product list attached to the request for suspension can be subject to suspension. This follows from the minimum requirements attached to a request to suspend concessions or other obligations. They are, in our view: (1) the request must set out a specific level of suspension, i.e. a level equivalent to the nullification and impairment caused by the WTO inconsistent measure, pursuant to Article 22.4;[937] and (2) the request must specify the agreement and sector(s) under which concessions or other obligations would be suspended, pursuant to Article 22.3.[938]
>
> Neither can support for the EC request be found in other provisions of Article 22 . . .
>
> In our view, the determination of other aspects related to the suspension remain the prerogative of the Member requesting the suspension. We note, in particular, that the Member in respect of whom concessions or other obligations would be suspended, can object to '*the level* of suspension proposed'[939] and that an arbitrator has to 'determine whether *the level* of such suspension is equivalent to *the level* of nullification or impairment'.[940] Arbitrators are explicitly prohibited from 'examin[ing] *the nature* of the concessions or other obligations to be suspended'[941] (other than under Articles 22.3 and 22.5).
>
> On these grounds, we cannot require that the US further specify the nature of the proposed suspension. As agreed by all parties involved in this dispute, in case a proposal for suspension were to target, for example, only biscuits with a 100 per cent tariff *ad valorem*, it would not be for the arbitrators to decide that, for example, cheese and not biscuits should be targeted; that a 150 per cent tariff should be imposed instead of a 100 per cent tariff; or that tariff increases should be levied on a product weight basis, not *ad valorem*. All of these are *qualitative* aspects of the proposed suspension touching upon the 'nature' of concessions to be withdrawn. They fall outside the arbitrators' jurisdiction."[942]

664. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the requesting parties (all but Mexico, i.e. Brazil, Canada, Chile, European Communities, India, Japan and Korea) requested authorization to suspend tariff concessions and to be allowed to impose additional import duties on a list of products originating in the United States. Since, in the case of the European Communities' request, the list of products was not "final", the Arbitrator noted that the European Communities "will notify the DSB every year, prior to the entry into force of a new level of suspension of concessions or other obligations [. . .] the list of products that will be subject to this measure."[943, 944]

"Carousel" type suspension

665. In *EC – Hormones (US) (Article 22.6 – EC)*, the European Communities referred to statements made by the United States Trade Representative and submitted that the United States claimed to be free to resort to a "carousel" type of suspension whereby the concessions and other obligations subject to suspension would change every now and then, in particular in terms of product coverage. The European Communities claimed that in so doing the United States would decide not only which concessions or other obligations would be suspended, but also unilaterally would decide whether the level of such suspension of concessions or other obligations was equivalent to the level of nullification and impairment determined by arbitration. Replying to the questions by the Arbitrators, the United States submitted that although nothing in the *DSU* prevented future changes to the list of products subject to suspension, the United States had no intention of making such changes. The Arbitrators decided to "assume that the US – in good faith and based upon this unilateral promise – will not implement the suspension of concessions in a 'carousel' manner" and that "therefore [they] d[id] not need to consider whether such an approach would require an adjustment in the way in which the effect of an authorized suspension is calculated".[945] The Arbitrators further considered:

> "As explained above,[946] we do not have jurisdiction to set a definite list of products that can be subject to suspension. It is for the US to draw up that list. In our view,

[937] (*footnote original*) In respect of the first requirement see further paragraph 21.

[938] (*footnote original*) The more precise a request for suspension is in terms of product coverage, type and degree of suspension, etc. . ., the better. Such precision can only be encouraged in pursuit of the DSU objectives of "providing security and predictability to the multilateral trading system" (Article 3.2) and seeking prompt and positive solutions to disputes (Articles 3.3 and 3.7). It would also be welcome in light of the statement in Article 3.10 that "all Members will engage in [DSU] procedures in good faith in an effort to resolve the dispute".

[939] (*footnote original*) Article 22.6, emphasis added.

[940] (*footnote original*) Article 22.7, emphasis added.

[941] (*footnote original*) Ibid.

[942] Decisions by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, paras. 16–19.

[943] Decision by the Arbitrator on *US – Offset Act (Byrd Amendment) (Article 22.6 – EC)*, para. 5.3.

[944] The authorization to suspend concessions of Brazil, India, Japan and Korea expressly indicated that the additional import duties were to be applied on a"final list of products". The authorization to the European Communities did not mention the term "final", and hence the remark made by the Arbitrator. The European Communities had committed itself, however (as had the four Members mentioned above) not to change the list of products (see para. 1.6 of the decisions concerning these Members). A similar situation concerned Chile's request, who would notify each year the products where the suspension of concessions was to be applied; the decision concerning Chile did not indicate whether or not the Member had committed itself not to change the products. Finally, in Canada's request there is no reference to "final" list, nor is there a remark regarding the possibility of altering the products on a yearly basis.

[945] Decision by the Arbitrator on *EC – Hormones (US) (Article 22.6 – EC)*, para. 22.

[946] (*footnote original*) See paragraphs 18–19.

> it has to do so within the bounds of the product list put before the DSB. We also agree with the EC that once this list is made or once the US has defined a method of suspension, that list or method necessarily needs to cover trade in an amount not exceeding (i.e. equivalent to or less than) the nullification and impairment we find. This matter of equivalence is not one to be determined exclusively by the US.[947] The US has an obligation to ensure equivalence pursuant to Article 22.4 of the DSU.[948] In its reply to our questions, the US submitted that it 'will scrupulously comply with the requirement that the level of suspension of concessions not exceed the level of nullification or impairment to be found by the Arbitrator'.[949]"[950]

(ii) "Obligations"

Cases where the suspension of obligations was requested

666. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators indicated that the complainant could obtain authorization from the DSB to suspend unspecified obligations "under the TRIPS Agreement" with respect to certain sectors.[951]

667. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators authorized both the suspension of tariff concessions and the suspension of "obligations" – including obligations under the *Agreement on Textiles and Clothing* and the *Agreement on Import Licensing Procedures*.[952]

668. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, the Arbitrator accepted the suspension by Brazil, *inter alia*, of the application of obligations under the *Agreement on Import Licensing Procedures* relative to licensing requirements on imports from Canada.[953]

669. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators accepted the suspension by the European Communities of "obligations" under the *GATT 1994* and the *Anti-Dumping Agreement* in order to adopt an equivalent regulation to the 1916 Act against imports from the United States.

670. In *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, Canada requested, and was granted, the authorization to: (i) impose additional import duties above bound custom duties on products originating in the United States, and (ii) suspend the application of the obligations under Article VI of *GATT 1994*, Articles 3, 5, 7, 8, 9, 10, 11 and 12 of the *Anti-Dumping Agreement* and Articles 11, 12, 15, 17, 18, 19, 20, 21 and 22 of the *SCM Agreement* to determine that the effect of dumping or subsidization of products from the United States is to cause or threaten material injury to an established domestic injury, or is to retard materially the establishment of a domestic industry.[954]

671. In *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, Mexico requested authorization to suspend the application to the United States "of obligations in the goods sector".[955] The Arbitrator granted Mexico the possibility to suspend "concessions or other obligation on products originating in the United States".[956]

Whether the "obligations" to be suspended need to be specified

672. In *US – 1916 Act (EC) (Article 22.6 – US)*, the European Communities had requested to suspend "obligations" under the *GATT 1994* and the *Anti-Dumping Agreement* in order to adopt an equivalent regulation to the 1916 Act against imports from the United States, instead of tariff concessions. The Arbitrators confirmed that the decision by the European Communities to seek the suspension of "obligations" rather than tariff "concessions" was not subject to their review.[957] The Arbitrators however examined the question whether the European Communities was nevertheless obligated under Article 22 of the *DSU* to specify precisely which "obligations" in those two Agreements it sought to suspend. In doing so, the Arbitrator reviewed previous arbitrations and concluded that a party seeking to suspend obligations is not required, under Article 22 of the *DSU*, to indicate precisely which "obligations" it seeks authorization to suspend:

> "In our view, a party seeking to suspend obligations is not required, under Article 22 of the DSU, to indicate precisely which 'obligations' it seeks authorization to suspend. Article 22.2 of the DSU states simply that a party may request authorization from the DSB 'to suspend the application to the Member concerned of concessions or other obligations under the covered agreements.' There is no requirement that the requesting party identify exactly which obligations it wishes to suspend.

950 Decision by the Arbitrator on *EC – Hormones (US) (Article 22.6 – EC)*, para. 23.
951 Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 173.
952 Decision by the Arbitrator on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 4.1.
953 Decision by the Arbitrator on *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, para. 4.1.
954 Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 5.2.
955 Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 1.4.
956 Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 5.2.
957 Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, para. 3.7.

> Moreover, we note that in previous cases, neither the arbitrators nor the DSB have required requesting parties to enumerate which concessions or other obligations such Members were seeking to suspend. For example, in *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, the arbitrator accepted, and the DSB authorized, the suspension by Brazil, *inter alia*, of 'the application of obligations under the Agreement on Import Licensing Procedures relative to licensing requirements on imports from Canada.' The Brazilian request did not indicate which 'obligations' under the Agreement on Import Licensing it wished to suspend, nor did the arbitrators require such specificity.[958] In *Brazil – Aircraft (Article 22.6 – Brazil)*, the arbitrators similarly did not object to the suspension by Canada of obligations under 'the Agreement on Textiles and Clothing and the Agreement on Import Licensing Procedures.'[959] In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the arbitrators indicated that the complainant could obtain authorization from the DSB to suspend unspecified obligations 'under the TRIPS Agreement' with respect to certain sectors.[960]
>
> Moreover, even for requests seeking the suspension of tariff concessions 'and related obligations under the GATT 1994' the arbitrators did not require specificity as to what these 'related obligations' were.[961]
>
> Thus, past practice indicates that arbitrators have accepted requests to suspend unspecified 'obligations'. The DSB has granted authorization to suspend obligations, while allowing the requesting Member to decide which particular obligations it would select to implement the authorization. We would emphasize, however, that whatever discretion is granted to such a Member is subject to the requirement that the level of suspension of obligations cannot exceed the level of nullification or impairment. We return to this point below.
>
> Therefore, we do not consider that the European Communities' request to 'suspend the application of the obligations under GATT 1994 and the Anti-Dumping Agreement in order to adopt an equivalent regulation to the 1916 Act against imports from the United States' can be considered as deficient under Article 22 of the DSU for failing to specify which 'obligations' it seeks to suspend."[962]

673. In *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, the Arbitrator found that Canada's request for suspension of obligations under a number of articles of the *GATT 1994*, the *Anti-Dumping Agreement*, and the *SCM Agreement*, "to determine that the effect of dumping or subsidization of products from the United states is to cause or threaten material injury to an established domestic industry or is to retard the establishment of a domestic industry",[963] "while it could have certainly been more informative, is acceptable in terms of the minimum specificity requirement applicable to Article 22.2 requests". In that respect, the Arbitrator "consider[ed] that the United States did not demonstrate that either its ability to reach an informed decision to request arbitration, or its ability to defend itself in these proceedings had been prejudiced as a result of the way Canada's request was formulated".[964]

4. Article 22.3

(a) Scope of review by arbitrators under Article 22.3

674. In *EC – Bananas III (US) (Article 22.6 – EC)*, the United States argued that the Arbitrators could not examine the principles and procedures set forth in Article 22.3 in that particular arbitration proceeding because the United States had requested authorization to suspend concessions only pursuant to subparagraph (a) of Article 22.3 of the *DSU*. In the view of the United States, the Arbitrators could only do so if the United States had requested authorization to suspend concessions pursuant to subparagraphs (b) or (c) of Article 22.3 of the *DSU*. The Arbitrators disagreed:

> "We believe that the basic rationale of these disciplines is to ensure that the suspension of concessions or other obligations across sectors or across agreements (beyond those sectors or agreements under which a panel or the Appellate Body has found violations) remains the exception and does not become the rule. In our view, if Article 22.3 of the DSU is to be given full effect, the authority of Arbitrators to review upon request whether the principles and procedures of subparagraphs (b) or (c) of that Article have been followed must imply the Arbitrators' competence to examine whether a request made under subparagraph (a) should have been made – in full or in part – under subparagraphs (b) or (c). If the Arbitrators were deprived of such an implied authority, the principles and procedures of Article 22.3 of the DSU could easily be circumvented. If there were no review whatsoever with respect to requests for authorization to suspend concessions made under subparagraph (a), Members might be tempted to always invoke that sub-

[964] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 5.2. See also para. 736 below.

paragraph in order to escape multilateral surveillance of cross-sectoral suspension of concessions or other obligations, and the disciplines of the other subparagraphs of Article 22.3 of the DSU might fall into disuse altogether."[965]

(b) "the complaining party shall apply the following principles and procedures"

675. With respect to the principles and procedures to be applied under Article 22.3, see paragraphs 679–680 below.

5. Article 22.3(a)

(a) "general principle . . . complaining party should first seek to suspend concessions or other obligations with respect to the same sector(s)"

(i) General

676. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators examined Ecuador's request for suspension of concessions or other obligations in the area of the *GATS* and the *TRIPS Agreement*. The Arbitrators stated:

"[W]e further recall the general principle set forth in Article 22.3(a) that suspension of concessions or other obligations should be sought first with respect to the same sector(s) as that in which the panel or Appellate Body has found a violation or other nullification or impairment. Given this principle, it remains the preferred option under Article 22.3 for Ecuador to request suspension of concessions under the GATT as one of the same agreements where a violation was found, if it considers that such suspension could be applied in a practicable and effective manner."[966]

(ii) Parallelism between violations and requests for suspension of concessions

677. In *EC – Bananas III (US) (Article 22.6 – EC)*, the European Communities alleged that in cases where findings of violation or nullification have been made in more than one sector, or under more than one Agreement, requests for the suspension of concessions had to be made commensurate with the number or the degree of violation. The Arbitrators disagreed:

"We recall that subparagraph (a) of Article 22.3 of the DSU refers to the suspension of 'concessions or other obligations with respect to the same sector(s) as that in which the panel or Appellate Body has found a violation or other nullification or impairment.' We note that the words 'same sector(s)' include both the singular and the plural. The concept of 'sector(s)' is defined in subparagraph (f)(i) with respect to goods as *all goods*, and in subparagraph (f)(ii) with respect to services as a *principal sector* identified in the 'Services Sectoral Classification List'. We, therefore, conclude that the United States has the right to request the suspension of concessions in either of these two sectors, or in both, up to the overall level of nullification or impairment suffered, if the inconsistencies with the EC's obligations under the GATT and the GATS found in the original dispute have not been removed fully in the EC's revision of its regime. In this case the 'same sector(s)' would be 'all goods' and the sector of 'distribution services', respectively. Our conclusion, based on the ordinary meaning of Article 22.3(a), is also consistent with the fact that the findings of violations under the GATT and the GATS in the original dispute were closely related and all concerned a single import regime in respect of one product, i.e. bananas."[967]

(b) Scope of review of arbitrators under Article 22.5(a)

678. As regards the scope of review of the arbitrators when the party has requested authorization to suspend concessions only pursuant to paragraph (a) of Article 22.3, see paragraph 674 above.

6. Article 22.3(b) and (c)

(a) "if that party considers that it is not practical or effective"

679. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the European Communities argued that Ecuador had not demonstrated why it was not practicable or effective for it to suspend concessions under the *GATT* or commitments under the *GATS* in service sectors other than distribution services. Ecuador claimed that "it did not request suspension entirely under the GATT and/or in service sectors under the GATS other than distribution services because it considered that it would not be practicable or effective in the meaning of Article 22.3(b) and (c) of the DSU, that circumstances in Ecuador's bananas trade sector and the economy on the whole are serious enough to justify suspension under another agreement, and that the parameters in Article 22.3(d)(i)–(ii) corroborate this conclusion".[968] The Arbitrators held that the term "practicable" connoted "availability" and "suitability"; with respect to the term "effective", the Arbitrators held that "the thrust of this criterion empowers the party seeking suspension to ensure that the impact of that suspension is strong and has the desired result, namely to induce compliance by the Member which fails to bring WTO-inconsistent measures into compliance with DSB rulings within a reasonable period of time".

[965] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 3.7.
[966] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 33.
[967] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 3.10.
[968] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 68.

"[A]n examination of the 'practicability' of an alternative suspension concerns the question whether such an alternative is available for application in practice as well as suited for being used in a particular case.

To give an obvious example, suspension of commitments in service sub-sectors or in respect of modes of service supply which a particular complaining party has not bound in its GATS Schedule is not available for application in practice and thus cannot be considered as practicable. But also other case-specific and country-specific situations may exist where suspension of concessions or other obligations in a particular trade sector or area of WTO law may not be 'practicable'.

In contrast, the term 'effective' connotes 'powerful in effect', 'making a strong impression', 'having an effect or result'. Therefore, the thrust of this criterion empowers the party seeking suspension to ensure that the impact of that suspension is strong and has the desired result, namely to induce compliance by the Member which fails to bring WTO-inconsistent measures into compliance with DSB rulings within a reasonable period of time.

One may ask whether this objective may ever be achieved in a situation where a great imbalance in terms of trade volume and economic power exists between the complaining party seeking suspension and the other party which has failed to bring WTO-inconsistent measures into compliance with WTO law. In such a case, and in situations where the complaining party is highly dependent on imports from the other party, it may happen that the suspension of certain concessions or certain other obligations entails more harmful effects for the party seeking suspension than for the other party. In these circumstances, a consideration by the complaining party in which sector or under which agreement suspension may be expected to be least harmful to itself would seem sufficient for us to find a consideration by the complaining party of the effectiveness criterion to be consistent with the requirement to follow the principles and procedures set forth in Article 22.3.

. . .

Our interpretation of the 'practicability' and 'effectiveness' criteria is consistent with the object and purpose of Article 22 which is to induce compliance. If a complaining party seeking the DSB's authorization to suspend certain concessions or certain other obligations were required to select the concessions or other obligations to be suspended in sectors or under agreements where such suspension would be either not available in practice or would not be powerful in effect, the objective of inducing compliance could not be accomplished and the enforcement mechanism of the WTO dispute settlement system could not function properly."[969]

680. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, Ecuador argued that it was the prerogative of the Member suffering nullification or impairment to decide whether it is "practicable or effective" to choose the same sector, another sector or another agreement for the purposes of suspending concessions or other obligations. The Arbitrators held that the term "consider" in subparagraphs (b) and (c) granted a certain margin of appreciation, but that a decision by a Member was nevertheless subject to review by the Arbitrators regarding whether the Member had considered "the necessary facts objectively":

"It follows from the choice of the words 'if that party *considers*' in subparagraphs (b) and (c) that these subparagraphs leave a certain margin of appreciation to the complaining party concerned in arriving at its conclusions in respect of an evaluation of certain factual elements, i.e. of the practicability and effectiveness of suspension within the same sector or under the same agreement and of the seriousness of circumstances. However, it equally follows from the choice of the words 'in considering what concessions or other obligations to suspend, the complaining party *shall* apply the following principles and procedures' in the chapeau of Article 22.3 that such margin of appreciation by the complaining party concerned is subject to review by the Arbitrators. In our view, the margin of review by the Arbitrators implies the authority to broadly judge whether the complaining party in question has considered the necessary facts objectively and whether, on the basis of these facts, it could plausibly arrive at the conclusion that it was not practicable or effective to seek suspension within the same sector under the same agreements, or only under another agreement provided that the circumstances were serious enough."[970]

(b) Relationship between Article 22.3(a) and 22.3(c)

681. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators noted that Ecuador argued that, in addition to suspending concessions or other obligations under the *GATS* and *TRIPS Agreement*, it "reserves the right to suspend tariff concessions or other tariff obligations granted in the framework of the GATT 1994 in the event that these may be applied in a practicable and effective manner".[971] With respect to the criterion of specificity relating to this request, see paragraph 662 above. The Arbitrators noted an "inconsistency" between making simultaneously a request under Articles 22.3(a) and Article 22.3(c):

"Even if Ecuador's 'reservation' of a request for suspension under the GATT were permissible, there would be a

[969] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, paras. 70–73 and 76.
[970] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 52.
[971] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 27.

certain degree of inconsistency between making a request under Article 22.3(c) – implying that suspension is not practicable or effective within the same sector under the same agreement or under another agreement – and simultaneously making a request under Article 22.3(a) – which implies that suspension is practicable and effective under the same sector. In this respect, we note that, although Ecuador did not in fact make both requests at the very same point in time, if it were likely that the suspension of concessions under the GATT could be applied in a practicable and effective manner, doubt would be cast on Ecuador's assertion that at present only suspension of obligations under other sectors and/or other agreements within the meaning of Article 22.3(b-c) is practicable or effective in the case before us.

. . . we fail to see how it could be possible to suspend concessions or other obligations for a particular amount of nullification or impairment under the same sector as that where a violation was found (which implies that this *is* practicable and effective) and simultaneously for the same amount in another sector or under a different agreement (which implies that suspension under the same sector[972] – or under a different sector under the same agreement – is *not* practicable or effective). But we do not exclude the possibility that, once a certain amount of nullification or impairment has been determined by the Arbitrators, suspension may be practicable and effective under the same sector(s) where a violation has been found only for part of that amount and that for the rest of this amount of suspension is practicable or effective only in (an)other sector(s) under the same agreement or even only under another agreement."[973]

7. Article 22.4

(a) "*The level of the suspension of concessions or other obligations . . . shall be equivalent to the level of the nullification or impairment*"

682. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the Arbitrator examined the possibility of setting for the "level of suspension", rather than setting a fixed value, an economic formula that, when completed with the values of annual disbursements made by the respondent under the WTO-inconsistent measure, would give the parties the level of suspension authorized for that year. The Arbitrator concluded that nothing in Article 22 of the *DSU* prevented the adoption of a variable level of suspension if the circumstances of the case required it. In particular, the Arbitrator considered:

"While we note that Article 22.4 refers to 'the level' (singular) of nullification or impairment and to 'the level' (singular) of suspension of concessions or other obligations, we are not persuaded that these terms impose an obligation to identify a single and enduring level of nullification or impairment. The requirement of Article 22.4 is simply that the two levels be equivalent. As long as the two levels are equivalent, we do not see any reason why these levels may not be adjusted from time to time, provided such adjustments are justified and unpredictability is not increased as a result. In fact, we see no limitation in the DSU to the possibility of providing for a variable level of suspension if the level of nullification or impairment also varies.

Most previous arbitrators have established one single level of nullification or impairment at the level that existed at the end of the reasonable period of time granted to the responding party to bring its legislation into conformity.[974] We do not disagree that this approach is, in the large majority of cases, the most appropriate. However, we do not read anything in Article 22 of the DSU that would preclude us from following a different path if the circumstances of this case clearly required it."[975]

683. In adopting such a decision, the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6)* gave particular relevance to the circumstances of that case, by considering that, under a variable level of suspension system, the respondent party "would control the levers to make the actual level of suspension of concessions or other obligations go down". The Arbitrator remarked that while "in other arbitrations where the level of nullification or impairment was set once and for all, the responding party could not influence the level of countermeasures applied to its trade, unless the requesting party agreed to modify it, [i]n this case, the level of suspension of concessions will automatically depend on the amount of disbursements made under the [WTO-inconsistent measure] in a given year. If this amount decreases, so will the level of suspension of concessions or other obligations that the Requesting Parties will be entitled to impose. If no disbursements are made, the level of suspension will have to be 'zero'."[976]

---

[972] (*footnote original*) We note that within a sector, suspension may be possible with respect to certain types of products, while it is not practicable or effective with respect to other categories of products.

[973] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, paras. 30–31.

[974] (*footnote original*) See, e.g., *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 37; *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.63–3.65; *US – FSC (Article 22.6 – US)*, paras. 2.12–2.15; *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, paras. 3.67–3.73.

[975] Decision by the Arbitrators in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil), US – Offset Act (Byrd Amendment) (Article 22.6 – Canada), US – Offset Act (Byrd Amendment) (Article 22.6 – Chile), US – Offset Act (Byrd Amendment) (Article 22.6 – EC), US – Offset Act (Byrd Amendment) (Article 22.6 – India), US – Offset Act (Byrd Amendment) (Article 22.6 – Japan), US – Offset Act (Byrd Amendment) (Article 22.6 – Korea), US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, paras. 4.20–4.21.

[976] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil), US – Offset Act (Byrd Amendment) (Article 22.6 – Canada), US – Offset Act (Byrd Amendment) (Article 22.6 – Chile), US – Offset Act (Byrd Amendment) (Article 22.6 – EC), US – Offset Act (Byrd Amendment) (Article 22.6 – India), US – Offset Act (Byrd Amendment) (Article 22.6 – Japan), US – Offset Act (Byrd Amendment) (Article 22.6 – Korea), US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 4.24.

684. As regards the standard of "equivalence" and its assessment by the Arbitrators, see Section XXII.B.9(b)(iii) below.

685. With respect to the relationship between the "equivalence" standard and the "appropriate countermeasures" standard in arbitrations pursuant to Article 4.10 of the *SCM Agreement*, see Section XXII.B.9(c) below.

8. Article 22.6

(a) Specificity in the request for a referral to arbitration under Article 22.6

686. In *EC – Hormones (US) (Article 22.6 – EC)*, the Arbitrators considered that it was better to be as precise as possible in the request for suspension of concessions:

> "The more precise a request for suspension is in terms of product coverage, type and degree of suspension, etc. . . ., the better. Such precision can only be encouraged in pursuit of the DSU objectives of 'providing security and predictability to the multilateral trading system' (Article 3.2) and seeking prompt and positive solutions to disputes (Articles 3.3 and 3.7). It would also be welcome in light of the statement in Article 3.10 that 'all Members will engage in [DSU] procedures in good faith in an effort to resolve the dispute'."[977]

687. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators held that the requests for a referral to arbitration under Article 22.6 serve similar due process objectives to requests under Article 6.2 and thus concluded that the specificity standards are relevant for Article 22 requests. See paragraph 659 above.

(b) "by the original panel, if members are available, or by an arbitrator appointed by the Director-General"

688. As of 31 December 2004, all arbitrations under Article 22.6 of the *DSU* have been referred to the original panel with the exception of *US – 1916 Act (EC) (Article 22.6 – US)*. In this case, the Chairman of the original panel was no longer available. However, the other two arbitrators were members of the original Panel.[978]

(c) Burden of proof

(i) General

689. In *EC – Hormones (US) (Article 22.6 – EC)* and in *EC – Hormones (Canada) (Article 22.6 – EC)*, the Arbitrators addressed the issue of the burden of proof and concluded that, as the European Communities was challenging the conformity of the United States' proposal with Article 22.4, it was for the European Communities to prove that the United States' proposal was inconsistent with Article 22.4:

> "WTO Members, as sovereign entities, can be *presumed* to act in conformity with their WTO obligations. A party claiming that a Member has acted *inconsistently* with WTO rules bears the burden of proving that inconsistency. The act at issue here is the US proposal to suspend concessions. The WTO rule in question is Article 22.4 prescribing that the level of suspension be equivalent to the level of nullification and impairment. The EC challenges the conformity of the US proposal with the said WTO rule. It is thus for the EC to prove that the US proposal is inconsistent with Article 22.4. Following well-established WTO jurisprudence, this means that it is for the EC to submit arguments and evidence sufficient to establish a *prima facie* case or presumption that the level of suspension proposed by the US is *not* equivalent to the level of nullification and impairment caused by the EC hormone ban. Once the EC has done so, however, it is for the US to submit arguments and evidence sufficient to rebut that presumption. Should all arguments and evidence remain in equipoise, the EC, as the party bearing the original burden of proof, would lose.
>
> The same rules apply where the existence of a specific *fact* is alleged; in this case, for example, where a party relies on a decrease of beef consumption in the EC or the use of edible beef offal as pet food. It is for the party alleging the fact to prove its existence.
>
> The duty that rests on *all* parties to produce evidence and to collaborate in presenting evidence to the arbitrators – an issue to be distinguished from the question of who bears the burden of proof – is crucial in Article 22 arbitration proceedings. The EC is required to submit evidence showing that the proposal is *not* equivalent. However, at the same time and as soon as it can, the US is required to come forward with evidence explaining how it arrived at its proposal and showing why its proposal *is* equivalent to the trade impairment it has suffered. Some of the evidence – such as data on trade with third countries, export capabilities and affected exporters – may, indeed, be in the sole possession of the US, being the party that suffered the trade impairment."[979]

690. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators, after referring to the above quote from *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, confirmed their agreement that that quote was an accurate presentation of the

---

[977] *EC – Hormones (US) (Article 22.6 – EC)*, footnote 16. We note that the arbitrators in *EC – Bananas III (Ecuador) (Article 22.6 – EC)* also quoted this statement. *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, footnote 12.

[978] WT/DS136/17.

[979] Decisions by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, paras. 9–11. See also Decision by the Arbitrators, *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, paras. 37–38; Decision by the Arbitrators, *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 2.8 and footnote 12; Decision by the Arbitrator, *US – FSC (Article 22.6 – US)*, paras. 2.10 and footnote 18; Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, para. 3.2 and 3.5.

burden of proof applicable in Article 22.6 proceedings. The Arbitrators clarified that "the fact that this case relates to the suspension of 'obligations', as opposed to the suspension of tariff concessions, in no way alters the applicable burden of proof".[980]

(ii) Burden of proof in subsidy arbitrations under Article 4.11 of the SCM Agreement

691. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators considered that the general principles of the burden of proof also apply to arbitrations under Article 4.11 of the *SCM Agreement*:

> "In application of the well-established WTO practice on the burden of proof in dispute resolution, it is for the Member claiming that another has acted inconsistently with the WTO rules to prove that inconsistency.[981]. . . . Brazil challenges the conformity of this proposal [from Canada] with Article 22 of the DSU and Article 4.10 of the SCM Agreement. It is therefore up to Brazil to submit evidence sufficient to establish a *prima facie* case or 'presumption' that the countermeasures that Canada proposes to take are not 'appropriate'. Once Brazil has done so, it is for Canada to submit evidence sufficient to rebut that 'presumption'. Should the evidence remain in equipoise on a particular claim, the Arbitrators would conclude that the claim has not been established. Should all evidence remain in equipoise, Brazil, as the party bearing the original burden of proof, would lose the case."[982]

692. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, the Arbitrator summarized the burden of proof rules applicable in the case of arbitration proceedings under Article 4.11 of the *SCM Agreement* as follows:

> "We recall that the general principles applicable to burden of proof, as stated by the Appellate Body, require that a party claiming a violation of a provision of the WTO Agreement by another Member must assert and prove its claim.[983] We find these principles to be also of relevance to arbitration proceedings under Article 4.11 of the SCM Agreement.[984] In this procedure, we thus agree that it is for Canada, which has challenged the consistency of Brazil's proposed level of countermeasures under Articles 4.10 of the SCM Agreement, to bear the burden of proving that the proposed amount is not consistent with that provision. It is therefore up to Canada to submit evidence sufficient to establish a prima facie case or 'presumption' that the countermeasures that Brazil proposes taking are not 'appropriate'. Once Canada has done so, it is for Brazil to submit evidence sufficient to rebut that 'presumption'. Should the evidence remain in equipoise on a particular claim, the Arbitrator would conclude that the claim has not been established.
>
> We note, however, that it is generally for each party asserting a fact, whether complainant or respondent, to provide proof thereof.[985] In this respect, therefore, it is also for Brazil to provide evidence for the facts which it asserts.
>
> Finally, both parties have claimed that, in respect of certain issues, the other party is in sole possession of the information necessary to establish the appropriateness of the proposed level of suspension of concessions or other obligations. In this regard, we recall that both parties generally have a duty to cooperate in these arbitral proceedings in order to assist us in fulfilling our mandate, through the provision of relevant information.[986] This is why, even though Canada bears the original burden of proof, we also requested Brazil to submit a 'methodology paper' describing how it arrived at the level of countermeasures it proposes.[987] Later, we asked it to come forward with evidence supporting various factual assertions made in its 'methodology paper'."[988]

(d) Preliminary rulings

693. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the respondent party filed a request for a preliminary ruling. The Arbitrators decided not to issue a preliminary ruling because some of the issues they were asked to rule upon were intimately linked to questions central to the substance of the arbitration. The Arbitrators also considered that nothing in Article 22 of the *DSU* foresaw the possibility of issuing preliminary rulings in arbitration proceedings. The Arbitrators remarked, however, that this fact did not preclude them from ruling on procedural issues in their Decision. In particular, the Arbitrators stated that:

> "[W]e note that neither paragraph 6 nor paragraph 7 of Article 22 of the DSU provide for the possibility of a preliminary ruling and there is, strictly speaking, no practice

of a preliminary ruling at the request of a party in past arbitrations."[989]

694. As regards preliminary rulings in Panel and Appellate Body proceedings, see Section XXXVI.C below.

(e) Third-party rights

695. In *EC – Bananas III (US) (Article 22.6 – EC)*, Ecuador requested the Arbitrators to accord it third-party status in light of its special interest in the proceedings. The Arbitrators, however, in light of the absence of provisions for third-party status under Article 22 of the *DSU* and given that they did not believe that Ecuador's rights would be affected by this proceeding, declined Ecuador's request.[990]

696. In *EC – Hormones (US) (Article 22.6 – EC)* and in *EC – Hormones (Canada) (Article 22.6 – EC)*, the United States and Canada respectively had requested the Arbitrators to accord them third-party rights in each other's arbitration procedures. On this occasion, the Arbitrators, recalling their discretion to decide on procedural matters under Article 12.1 of the *DSU* and the absence of a reference to third-party participation in Article 22, did grant the authorization on the grounds that the rights of the United States and Canada might be affected in both arbitration proceedings:

"The US and Canada are allowed to attend both arbitration hearings, to make a statement at the end of each hearing and to receive a copy of the written submissions made in both proceedings.

The above ruling was made on the following grounds.

- DSU provisions on panel proceedings, referred to by analogy in the arbitrators' working procedures, give the arbitrators discretion to decide on procedural matters not regulated in the DSU (Article 12.1 of the DSU) in accordance with due process.[991] The DSU does not address the issue of third-party participation in Article 22 arbitration proceedings.

- US and Canadian rights may be affected in both arbitration proceedings:

  First, the estimates for high quality beef ('HQB') exports, foregone because of the hormone ban, are to be based on a tariff quota that allegedly needs to be shared between Canada and the US. A determination in one proceeding may thus be decisive for the determination in the other.

  Second, several methodologies are proposed to calculate lost export opportunities. Given the fact that the product scope (HQB and edible bovine offal ('EBO')) and relevant trade barriers (hormone ban and HQB tariff quota) are the same in both proceedings, both arbitration panels (composed of the same three individuals) may consider it necessary to adopt the same or very similar methodologies. This is all the more necessary because the arbitrators are called upon to arrive at a specific determination on the amount of nullification and impairment caused by the ban.[992] They are therefore not limited, as in most panel proceedings, to ruling only on the consistency of the amounts proposed by the US and Canada with DSU provisions. Due process thus requires that all three parties receive the opportunity to comment on the methodologies proposed by each of the parties.

- In contrast, the EC has not shown how third-party participation would prejudice its rights. No specific arguments were made demonstrating that third party participation would substantially impair the EC's interests or due process rights."[993]

697. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Australia requested that it be granted the authorization to participate as a third party in the Article 22.6 arbitration in light of its participation in that capacity in the Article 21.5 Panel. The Arbitrator declined this request and noted the absence of a specific provision, in Article 22, on third-party rights:

"[W]e informed Australia that we declined its request. Our decision took into account the views expressed by the parties, the fact that there is no provision in the DSU as regards third party status under Article 22, and the fact that we do not believe that Australia's rights would be affected by this proceeding.

We note in this respect that third party rights were granted in the Article 22.6 arbitrations concerning *European Communities – Measures Concerning Meat and Meat Products (Hormones)* and rejected in the *EC – Bananas (1999)* Article 22.6 arbitration. We do not consider that Australia in this case is in the same situation as Canada and the United States in the *EC – Hormones*

[989] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil), US – Offset Act (Byrd Amendment) (Article 22.6 – Canada), US – Offset Act (Byrd Amendment) (Article 22.6 – Chile), US – Offset Act (Byrd Amendment) (Article 22.6 – EC), US – Offset Act (Byrd Amendment) (Article 22.6 – India), US – Offset Act (Byrd Amendment) (Article 22.6 – Japan), US – Offset Act (Byrd Amendment) (Article 22.6 – Korea), US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 2.4.

[990] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 2.8.

[991] (*footnote original*) In this respect see footnote 138 in the Appellate Body Report on *EC – Measures Concerning Meat and Meat Products (Hormones)*, adopted on 13 February 1998, WT/DS26/15, WT/DS48/13: "[T]he DSU, and in particular its Appendix 3, leave panels a margin of discretion to deal, always in accordance with due process, with specific situations that may arise in a particular case and that are not explicitly regulated. Within this context, an appellant requesting the Appellate Body to reverse a panel's ruling on matters of procedure must demonstrate the prejudice generated by such legal ruling."

[992] (*footnote original*) See paragraph 12.

[993] Decisions by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 7.

arbitrations, nor even in the same situation as Ecuador in the *EC – Bananas (1999)* arbitration. Indeed, Australia never initiated dispute settlement proceedings against Brazil with respect to the export financing programme at issue. Moreover, Australia did not draw the attention of the Arbitrators to any benefits accruing to it or any rights under the WTO Agreement which might be affected by their decision.[994]"[995]

(f) Working procedures in Article 22.6 arbitrations

699. In this respect, see Section XXXIII below.

(g) List of Article 22.6 arbitration proceedings

	WT/DS No.	Case Name	Date award circulated	DSB authorization
1	DS26	*EC – Hormones (US) (Article 22.6 – EC)*	12 July 1999	26 July 1999
2	DS27	*EC – Bananas III (US) (Article 22.6 – EC)*	9 April 1999	19 April 1999
3	DS27	*EC – Bananas III (Ecuador) (Article 22.6 – EC)*	24 March 2000	18 May 2000
4	DS46	*Brazil – Aircraft (Article 22.6 – Brazil)*	28 August 2000	12 December 2000
5	DS48	*EC – Hormones (Canada) (Article 22.6 – EC)*	12 July 1999	26 July 1999
6	DS108	*US – FSC (Article 22.6 – US)*	30 August 2002	7 May 2003
7	DS136	*US – 1916 Act (Article 22.6 – EC)*	24 February 2004	–
8	DS217	*US – Offset Act (Byrd Amendment) (Brazil) (Article 22.6 – US)*	31 August 2004	16 November 2004
9	DS217	*US – Offset Act (Byrd Amendment) (Chile) (Article 22.6 – US)*	31 August 2004	17 December 2004

13	DS217	*US – Offset Act (Byrd Amendment) (Korea) (Article 22.6 – US)*	31 August 2004	16 November 2004
14	DS222	*Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*	17 February 2003	18 March 2003
15	DS234	*US – Offset Act (Byrd Amendment) (Canada) (Article 22.6 – US)*	31 August 2004	16 November 2004
16	DS234	*US – Offset Act (Byrd Amendment) (Mexico) (Article 22.6 – US)*	31 August 2004	16 November 2004

9. Article 22.7

(a) The mandate of the Arbitrators

701. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators examined the extent of the arbitrators' mandate to review the choice made by a complaining Member pursuant to Article 22.3 (see paragraph 674 above). In order to do so, they looked at the mandate of arbitrators in paragraphs 6 and 7 of Article 22 and found that there was no contradiction:

> "Article 22.7 of the DSU empowers the Arbitrators to examine claims concerning the principles and procedures set forth in Article 22.3 of the DSU in its entirety, whereas Article 22.6 of the DSU seems to limit the competence of Arbitrators to such examination to cases where a request for authorization to suspend concessions is made under subparagraphs (b) or (c) of Article 22.3 of the DSU. However, we believe that there is no contradiction between paragraphs 6 and 7 of Article 22 of the DSU, and that these provisions can be read together in a harmonious way.
>
> If a panel or Appellate Body report contains findings of WTO-inconsistencies only with respect to one and the same sector in the meaning of Article 22.3(f) of the DSU, there is little need for a multilateral review of the choice with respect to goods or services or intellectual property rights, as the case may be, which a Member has selected for the suspension of concessions subject to the DSB's authorization. However, if a Member decides to seek authorization to suspend concessions under another sector, or under another agreement, outside of the scope of the sectors or agreements to which a Panel's findings relate, paragraphs (b)–(d) of Article 22.3 of the DSU provide for a certain degree of discipline such as the requirement to state reasons why that Member considered the suspension of concessions within the same sector(s) as that where violations of WTO law were found as not practicable or effective."[996]

702. The Arbitrators in *EC – Bananas III (Ecuador) (Article 22.6 – EC)* held with respect to their authority under Article 22.7:

[994] (*footnote original*) Our decision may have been different if Australia had demonstrated that the countermeasures which Canada plans to adopt may affect Australia's rights or benefits under the WTO Agreement.

[995] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 2.5–2.6.

[996] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, paras. 3.5–3.6.

"[T]he jurisdiction of the Arbitrators includes the power to determine (i) whether the level of suspension of concessions or other obligations requested is *equivalent* to the level of nullification or impairment; and (ii) whether the principles or procedures concerning the suspension of concessions or other obligations across sectors and/or agreements pursuant to Article 22.3 of the DSU have been followed."[997]

703. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Brazil had claimed that, as a result of the termination of the bilateral agreement (see paragraph 643 above), the Arbitrators should, pursuant to Article 22.7 of the *DSU*, determine that the proposed countermeasures are not allowed under the *SCM Agreement* on the grounds that the time within which they may be authorized has expired. The Arbitrators disregarded Brazil's claim as follows:

"We note that Article 60 of the Vienna Convention provides for the 'termination' of a treaty by one party in response to a 'material breach' by the other party. Article 70 of the Vienna Convention nevertheless provides that the termination of a treaty does not affect any right, obligation or legal situation of the parties created through the execution of the treaty prior to its termination. We conclude that, even assuming that the Bilateral Agreement has been terminated by Brazil on 14 July 2000, the request by Canada under Article 4.10 of the SCM Agreement, to the extent it was made in accordance with the terms of the Bilateral Agreement, remains unaffected by the termination.[998] We therefore do not find it necessary to address further this question."[999]

704. In *US – 1916 Act (Article 22.6 – US)*, the European Communities had requested to suspend obligations instead of tariff concessions. On that occasion, the Arbitrators considered that "the decision by the European Communities to seek the suspension of 'obligations' rather than tariff 'concessions' is not subject to review by the Arbitrators".[1000]

705. In *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, the Arbitrator stated that it did not "fall within [his] mandate to recommend the suspension of specific obligations or the adoption of specific measures by 'the requesting party'".[1001]

706. Also in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, the Arbitrator examined Canada's request for suspension of obligations under a number of provisions of the *GATT 1994*, the *Anti-Dumping Agreement*, and the *SCM Agreement*. The Arbitrator found that he did not "have authority under our mandate to *require* Canada to be more specific as to the *measures* it intends to apply to suspend its obligations" under those provisions.[1002] In that regard, the Arbitrator stated that:

"[I]t is necessary to differentiate between the *WTO obligation* to be suspended and the specific *measures* taken to implement such suspensions. We note that our mandate is to determine whether the level of suspension of WTO *obligations* is equivalent with the level of nullification or impairment. Article 22.7 of the DSU does not imply a review of the actual *measures*, which will implement a suspension, to determine if they will exceed the level of nullification or impairment, and in our view, the Arbitrator's mandate does not extend to addressing or approving the proposed implementation of the suspension of the obligations."[1003]

707. In *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, the Arbitrator left the final decision regarding the legitimacy of the request to the DSB, by noting that:

"[I]f the DSB considers that Canada's request is not acceptable in this respect, it may reject Canada's request, pursuant to the last sentence of Article 22.7 of the DSU. Similarly, if the United States were to consider that the actual suspension of obligations by Canada exceeded the level of nullification or impairment determined pursuant to this decision, it may have recourse to the dispute settlement mechanism.[1004]"[1005]

708. As regards the task of the arbitrators under Article 4.11 of the *SCM Agreement*, see paragraph 746 below.

---

[997] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 11.

[998] (*footnote original*) Furthermore, we note that the interpretation of the first sentence of Article 22.6 of the DSU suggested by Brazil has not been followed by the DSB so far. For instance, the request by Ecuador to suspend concessions or other obligations under Article 22.6 of the DSU in the case on *European Communities – Regime for the Importation, Sale and Distribution of Bananas* (hereinafter "*EC – Bananas*"), adopted on 25 September 1997, WT/DS27/AB/R, was made on 8 November 1999, several months after the adoption of the panel report under Article 21.5 (at the DSB meeting of 6 May 1999).

[999] Decision by the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.10.

[1000] Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, para. 3.7.

[1001] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil)*, para. 4.11.

[1002] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 2.32.

[1003] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 2.29.

[1004] (*footnote original*) See *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 71, *US – 1916 Act (EC) (Article 22.6 – US)*, para. 7.9.

[1005] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, para. 2.32.

(b) "The arbitrator . . . shall determine whether the level of such suspension is equivalent to the level of nullification or impairment."

(i) Assessment of the level of nullification or impairment

Presumption of nullification or impairment not evidence of a level of nullification or impairment

709. The Arbitrators in *EC – Bananas III (US) (Article 22.6 – EC)* established that the presumption of nullification or impairment of Article 3.8 of the *DSU* cannot be taken as evidence proving a particular level of nullification or impairment allegedly suffered by a Member

> "The *presumption* of nullification or impairment in the case of an infringement of a GATT provision as set forth by Article 3.8 of the DSU cannot in and of itself be taken simultaneously as *evidence* proving a particular level of nullification or impairment allegedly suffered by a Member requesting authorization to suspend concessions under Article 22 of the DSU at a much later stage of the WTO dispute settlement system. The review of the level of nullification or impairment by Arbitrators from the objective benchmark foreseen by Article 22 of the DSU is a separate process that is independent from the finding of infringements of WTO rules by a panel or the Appellate Body. . . .However, a Member's legal interest in compliance by other Members does not, in our view, automatically imply that it is entitled to obtain authorization to suspend concessions under Article 22 of the DSU."[1006]

710. In *US – 1916 Act (Article 22.6 – US)*, the European Communities had not quantified the level of nullification or impairment but rather had requested a qualitative suspension of concessions (see paragraphs 736–738 below). The United States had claimed that the level of nullification or impairment in this case should then be "zero". The Arbitrators disagreed and indicated that although the level of nullification or impairment had not been specified in quantitative terms by the European Communities, "it clearly is not, and cannot be, 'zero'":

> "We do not accept the position of the United States that the level of nullification or impairment in this case is 'zero'. As noted by the European Communities, the original Panel in this dispute found, and the Appellate Body confirmed, that 'the 1916 Act nullifies and impairs benefits accruing to the European Communities.' Therefore, while the level of nullification or impairment has not been specified in quantitative terms in the EC request under Article 22.2, it clearly is not, and cannot be, 'zero'. In our view, this US position cannot be sustained in light of the adopted Panel and Appellate Body findings.
>
> . . .
>
> We agree with the arbitrators in *EC – Bananas III (US) (Article 22.6 – EC)* that the *presumption* of nullification or impairment, as provided in Article 3.8 of the DSU, by no means provides evidence of the *level* of nullification or impairment sustained by the Member requesting authorization to suspend obligations. However, the fact that the presumption does not automatically translate to a given level does not mean that the level is 'zero'. The original Panel determined that the 1916 Act 'nullifies and impairs benefits accruing to the European Communities.' In light of this conclusion, the level must be something greater than 'zero', and it is a contradiction in terms to suggest otherwise."[1007]

711. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the requesting parties (Brazil, Canada, Chile, European Communities, India, Japan, Korea and Mexico) partially based their request to suspend concessions on the premise that a violation is a form of nullification or impairment. The Arbitrator distinguished the concept of violation from that of nullification or impairment by noting that, pursuant to Article 3.8 of the *DSU*, a violation generates a *presumption* of nullification or impairment, not that a violation *is a form* of nullification or impairment. The Arbitrator stated:

> "If violation was conceptually equated [. . .] to nullification or impairment, there would be no reason to provide for a possibility to rebut the presumption. The theoretical possibility to rebut the presumption established by Article 3.8 can only exist because violation and nullification or impairment are two different concepts."[1008]

Parameters for calculating the level of nullification or impairment

Trade effect

712. In *US – Offset Act (Byrd Amendment) (Article 22.6)* the Arbitrator noted that "trade effect" as a parameter to determine the level of nullification and impairment pursuant to Article 22 of the DSU "is found neither in Article XXIII of GATT 1994, nor in Article 22 of the DSU. [. . .]" However, the Arbitrator decided to follow an approach based on determining the trade effect of the inconsistent measure since "the 'trade effect' approach has been regularly applied in other

[1006] Decision by the Arbitrators in *EC – Bananas III (US) (Article 22.6 – EC)*, para. 6.10.

[1007] Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, paras. 5.48–5.50.

[1008] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil)*, para. 3.23, *US – Offset Act (Byrd Amendment) (Article 22.6 – EC)*, *US – Offset Act (Byrd Amendment) (Article 22.6 – India)*, para. 3.23, *US – Offset Act (Byrd Amendment) (Article 22.6 – Japan)*, para. 3.23, *US – Offset Act (Byrd Amendment) (Article 22.6 – Korea)*, para. 3.23, *US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, paras. 3.70–3.71, *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, paras. 3.68–3.69, *US – Offset Act (Byrd Amendment) (Article 22.6 – Chile)*, paras. 3.65–3.66.

Article 22.6 arbitrations and seems to be generally accepted by Members as *a* correct application of Article 22 of the DSU". The Arbitrator noted in that regard that "[p]revious arbitrators' decisions based on direct trade impact are not binding precedents".[1009]

Using reasoned estimates and avoiding speculation

713. The Arbitrators in *EC – Hormones (US) (Article 22.6 – EC)* stated that they were to use reasoned estimates when assessing the level of nullification or impairment. Applying this approach, the Arbitrators rejected United States claims for certain lost exports as "too remote" and "too speculative".[1010] The Arbitrators considered:

> "The question we thus have to answer here is: what would annual prospective US exports of hormone-treated beef and beef products to the EC be if the EC had withdrawn the ban on 13 May 1999? An answer to this question, like any question about future events, can only be a reasoned estimate. It is necessarily based on certain assumptions. In making those estimates and assumptions, we need to guard against claims of lost opportunities where the causal link with the inconsistent hormone ban is less than apparent, i.e. where exports are allegedly foregone not because of the ban but due to other circumstances."[1011]

714. A similar approach was taken by the Arbitrator in *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*. In that case, Canada argued that a certain airline had a "revealed margin of preference" for a Canadian regional aircraft manufacturer. The Arbitrator dismissed this argument in part because "[w]hile such a preference may have existed, Canada has not meaningfully quantified it . . . ."[1012]

715. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators referred to the above statements as support to their view that ["i]n determining the level of nullification or impairment sustained by the European Communities as a result of the 1916 Act, we need to rely, as much as possible, on credible, factual, and verifiable information".[1013] The Arbitrators further considered that "this prudent approach taken by earlier arbitrators is appropriate".[1014]

716. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the Arbitrator analysed the economic models suggested by the parties, in order to choose the appropriate model to apply in the calculation of the level of nullification or impairment. The Arbitrator "considered the approach of the Requesting Parties to be too aggregated, hence not specific enough to th[e] case. While the model specification proposed by the United States is disaggregated and well specified, [the Arbitrator] concluded that there is insufficient data to run that model with any degree of accuracy." In light of "the lack of available data to implement the United States' model", the Arbitrator decided "to reject the United States' model in favour of a modified version of the model proposed by the Requesting Parties".[1015]

Indirect benefits

717. The Arbitrators in *EC – Bananas III (US) (Article 22.6 – EC)* considered the notion of "*direct or indirect benefits*" accruing under the WTO agreements whose nullification or impairment may give rise to an entitlement to obtain compensation or the authorization to suspend concessions or other obligations. In this case, the United States had argued that its exports to Latin America (e.g. fertilizers) used in the production of bananas that would be exported to the European Communities under a WTO-consistent regime should be counted in setting the level of suspension. The Arbitrators concluded that, "to the extent the US assessment of nullification or impairment includes *lost US exports* defined as *US content incorporated in Latin American bananas* (e.g. US fertilizer, pesticides and machinery shipped to Latin America and US capital or management services used in banana cultivation), we do not consider such lost US exports for calculating nullification or impairment in the present arbitration proceeding between the European Communities and the United States":

[1009] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil)*, paras. 3.70–3.71.

[1010] *EC – Hormones (US) (Article 22.6 – EC)*, para. 77.

[1011] Decision by the Arbitrators in *EC – Hormones (US) (Article 22.6 – EC)*, para. 41. In support of this position, the *EC – Hormones (US) (Article 22.6 – EC)* arbitrators quoted from *EC – Bananas III (US) (Article 22.6 – EC)*:

> "We are of the view that the benchmark for the calculation of nullification or impairment of US trade flows should be losses in US exports of goods to the European Communities and losses by US service suppliers in services supply in or to the European Communities. However, we are of the opinion that losses of US exports in goods or services *between the US and third countries* do not constitute nullification or impairment of even *indirect* benefits accruing to the US under the GATT or the GATS for which the European Communities could face suspension of concessions."

Decision by the Arbitrators in *EC – Bananas III (US) (Article 22.6 – EC)*, para. 6.12.

[1012] Decision by the Arbitrator in *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, para. 3.22.

[1014] Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, para. 5.57.

[1015] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil), US – Offset Act (Byrd Amendment) (Article 22.6 – EC), US – Offset Act (Byrd Amendment) (Article 22.6 – India), US – Offset Act (Byrd Amendment) (Article 22.6 – Japan), US – Offset Act (Byrd Amendment) (Article 22.6 – Korea), US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, paras 3.22–3.23, *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, paras 3.20–3.21, *US – Offset Act (Byrd Amendment) (Article 22.6 – Chile)*, paras 3.19–3.20,

"The *presumption* of nullification or impairment in the case of an infringement of a GATT provision as set forth by Article 3.8 of the DSU cannot in and of itself be taken simultaneously as *evidence* proving a particular level of nullification or impairment allegedly suffered by a Member requesting authorization to suspend concessions under Article 22 of the DSU at a much later stage of the WTO dispute settlement system. The review of the level of nullification or impairment by Arbitrators from the objective benchmark foreseen by Article 22 of the DSU is a separate process that is independent from the finding of infringements of WTO rules by a panel or the Appellate Body. As a result, a Member's potential interests in trade in goods or services and its interest in a determination of rights and obligations under the WTO Agreements are each sufficient to establish a right to pursue a WTO dispute settlement proceeding. However, a Member's legal interest in compliance by other Members does not, in our view, automatically imply that it is entitled to obtain authorization to suspend concessions under Article 22 of the DSU.

Over the last decades of GATT dispute settlement practice, it has become a truism of GATT law that lack of *actual* trade cannot be determinative for a finding that no violation of a provision occurred because it cannot be excluded that the absence of trade is the result of an illegal measure. As discussed by the original panel reports,[1016] in past dispute settlement practice the non-discrimination provisions have been interpreted to protect 'competitive opportunities'[1017] or the 'effective equality of opportunities'[1018] for foreign products which may be undermined by 'any laws or regulations which might adversely modify the conditions of competition between domestic and imported products'.[1019] All these past panel reports concerned the alleged nullification or impairment of potential trade opportunities under the national treatment clause. Also the *US – Superfund* case,[1020] from which the wording of Article 3.8 of the DSU establishing the presumption of nullification or impairment in case of an infringement of GATT is drawn, concerned the alleged violation of Article III of GATT. Therefore, the notion underlying the protection of *potential* trade opportunities is *potential* trade between the complaining and the respondent party. Likewise, in the case of an alleged violation of the MFN treatment clause, a dispute would involve trade between the complaining party or a third country, on the one hand, and the respondent party, on the other.

We are of the view that the benchmark for the calculation of nullification or impairment of US trade flows should be losses in US exports of goods to the European Communities and losses by US service suppliers in services supply in or to the European Communities. However, we are of the opinion that losses of US exports in goods or services *between the US and third countries* do not constitute nullification or impairment of even *indirect* benefits accruing to the United States under the GATT or the GATS for which the European Communities could face suspension of concessions. To the extent the US assessment of nullification or impairment includes *lost US exports* defined as *US content incorporated in Latin American bananas* (e.g. US fertilizer, pesticides and machinery shipped to Latin America and US capital or management services used in banana cultivation), we do not consider such lost US exports for calculating nullification or impairment in the present arbitration proceeding between the European Communities and the United States."[1021]

Company-specific effects versus overall effect on the Member

718. In *EC – Bananas III (US) (Article 22.6 – EC)*, the initial United States' request for the authorization to suspend concessions or other obligations involved only losses incurred by one of its companies. The Arbitrators considered that "[i]n order to calculate the level of nullification and impairment for the United States, it is our view that it is necessary to calculate the aggregate net effects on all US suppliers of wholesale services to bananas wholesaled in the European Communities".[1022]

Court judgments

719. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators considered that any final judgments under the 1916 Act against European Communities companies "would constitute nullification or impairment of benefits accruing to the European Communities, up to the cumulative dollar or monetary value of the final judgments":

"In our view, any final judgments entered against EC companies or their subsidiaries under the 1916 Act would constitute nullification or impairment of benefits accruing to the European Communities, up to the cumulative dollar or monetary value of the final judgements. In our view, it would be appropriate to include only 'final' judgements, i.e. the amounts payable either after the appeals have been completed, or the appeal periods have expired. Moreover, all such decisions are made public, and therefore the amounts of the judgments are readily verifiable.

[1022] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 6.27.

> In a case involving multiple claims – i.e., a judgment award that includes both 1916 Act claims and non-1916 Act claims – the amount included by the European Communities in calculating its level of nullification or impairment would need to be limited to the 1916 Act claims alone.
>
> Judgments under the 1916 Act are awarded pursuant to WTO-inconsistent legislation, and clearly nullify or impair benefits accruing to the European Communities under the GATT 1994 and the Anti-Dumping Agreement. The cumulative dollar or monetary value of judgments under the Act therefore could, in principle, be included in any cumulative calculation by the European Communities of the overall level of the nullification or impairment that it has sustained."[1023]

Settlements

720. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators considered that any settlement awards entered into by the European Communities companies would "constitute nullification or impairment of benefits accruing to the European Communities, up to the cumulative dollar or monetary value of the settlements":

> "In our view, any settlement awards entered into by EC companies or their subsidiaries under the 1916 Act would equally constitute nullification or impairment of benefits accruing to the European Communities, up to the cumulative dollar or monetary value of the settlements. Once again, such settlements result from WTO-inconsistent legislation, and therefore nullify or impair benefits accruing to the European Communities. In our view, whether the amounts are payable by EC entities pursuant to court orders under the 1916 Act, or settlements under the Act, the legal effect is the same in terms of the nullification or impairment of benefits accruing to the European Communities.
>
> In a settlement involving multiple claims – i.e., a settlement of a lawsuit that includes both 1916 Act claims and non-1916 Act claims – the amount included by the European Communities in calculating its level of nullification or impairment would need to be limited to the 1916 Act claims alone.
>
> As noted above, in calculating the level of nullification or impairment, it is necessary to rely only on credible, verifiable information, and not on speculation. In the context of settlements under the 1916 Act, this would almost certainly necessitate the disclosure of such settlements, such that the amounts of the settlements – and the portions attributable to the 1916 Act – can be confirmed. . ."[1024]

Deterrent or "chilling" effect

721. In *US – 1916 Act (Article 22.6 – US)*, the European Communities had argued that the most damaging effect of the 1916 Act was its chilling effect on the commercial behaviour of European companies and its potential use as a means of intimidation of European companies that were either already active on the United States' market or which had considered entering the market.[1025] The Arbitrators were "of the view that any claim for a deterrent or 'chilling effect' by the European Communities in the present case would be too speculative, and too remote". They warned that they did not need to decide, for the purposes of this arbitration, whether a "chilling effect" could be considered to exist for the purposes of WTO dispute settlement. They only needed to determine whether such a chilling effect could be meaningfully quantified for the purposes of determining the level of nullification or impairment sustained by the European Communities as a result of the 1916 Act.[1026] The Arbitrators concluded that, "[o]n the basis of the information provided to the arbitrators, we agree with the parties that a quantification of the chilling effect is not possible. Accordingly, the chilling effect allegedly caused by the 1916 Act could not be included in any calculation by the European Communities of its overall level of the nullification or impairment."[1027]

Litigation costs

722. In *US – 1916 Act (Article 22.6 – US)*, the European Communities argued that legal expenses related to the pending US court cases were one of the immediate costs of the 1916 Act.[1028] The Arbitrators disagreed and considered that the litigation costs could not be included in the calculation of the level of the nullification or impairment:

> "The Arbitrators recall their position, stated above, that it is appropriate to follow the prudent approach taken by earlier arbitrators in determining the level of nullification or impairment. We are not aware of any basis in the WTO Agreements to support the view advanced by the European Communities that legal fees can be claimed as a loss of a benefit accruing to a WTO Member. Moreover, we are not aware of any prior case in which such a claim has been permitted. It is also not clear which fees, and under what circumstances, could be included in such a claim.
>
> In the circumstances of this case, it is uncontested that the European Communities has not 'meaningfully quan-

tified' the amount of legal fees paid by EC entities as a result of the 1916 Act. Indeed, the European Communities acknowledges that it has provided only examples of such costs, not an overall, verifiable tabulation. In addition, as indicated above, these examples of legal fees have been contested by the United States.

Accordingly, in our view, the litigation costs incurred by EC entities under the 1916 Act could not be included in any calculation by the European Communities of the overall level of the nullification or impairment." [1029]

Double-counting of nullification or impairment

723. In *EC – Bananas III (US) (Article 22.6 – EC)*, the United States had argued that its lost exports, including those of goods and services used in the production of Latin-American bananas for the European market, should be counted in setting the level of suspension. After rejecting the United States' argument on "indirect benefits" (see paragraph 717 above), the Arbitrators warned that if overlapping claims by different WTO Members were permissible under the *DSU* in respect of nullification or impairment suffered because of lost trade in goods, this would result in double counting of nullification and impairment:

"[I]f *overlapping* claims by different WTO Members as to nullification or impairment suffered because of the same lost trade in goods (and goods and service inputs used in their production or incorporated therein) or the same lost trade in services were permissible under the DSU, the problem of '*double-counting*' of nullification or impairment would arise. Due to the difference in origin of goods or services used as *inputs* in the banana production, on the one hand, and the origin of the bananas as *end-products*, on the other, *cumulative* requests for compensation or suspension of concessions could be made for the *same* amount of nullification or impairment caused by a Member.

If we were to allow for such '*double-counting*' of the same nullification or impairment in arbitration proceedings under Article 22.6 of the DSU with different WTO Members, incompatibilities with the standard of '*equivalence*' as embodied in paragraphs 4 and 7 of Article 22 of the DSU could arise. Given that the *same* amount of nullification or impairment inflicted on *one* Member cannot simultaneously be inflicted on *another*, the authorizations to suspend concessions granted by the DSB to different WTO Members could exceed the overall amount of nullification or impairment caused by the Member that has failed to bring a WTO-inconsistent measure into compliance with WTO law. Moreover, such *cumulative* compensation or *cumulative* suspension of concessions by different WTO Members for the *same* amount of nullification or impairment would run counter to the general international law principle of proportionality of countermeasures.[1030]" [1031]

Disbursements operating as subsidies

724. In *US – Offset Act (Byrd Amendment) (Article 22.6)* the Arbitrator utilized a formula to determine the effect that a subsidy had on the trade of the Members concerned. The Arbitrator judged that the trade effect of the subsidy could be found by multiplying the value of the subsidy by a "trade effect coefficient" composed of the values of pass-through, import penetration and elasticity of substitution. In this regard, the Arbitrator considered that:

"A basic economic model to derive a coefficient for the trade effects of disbursements operating as subsidies can be described as the product of four variables: the value of the subsidy, a measure of the *ad valorem* price reduction caused by the CDSOA disbursements (i.e., 'pass-through'), a substitution elasticity of imports, and import penetration. The basic relationship of the trade effect can be expressed as follows:

Trade effect = (value of disbursements) × [(pass-through) × (import penetration) × (elasticity of substitution)]" [1032]

Changes in the level of nullification or impairment after authorization

725. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators decided that the European Communities could suspend concessions qualitatively provided always that the level of nullification or impairment was quantified on a monetary basis. To facilitate this, the Arbitrators allowed the European Communities to take into account the cumulative monetary value of any amounts payable by EC entities pursuant to final court judgements for claims under the 1916 Act and the settlement of claims under the 1916 Act. In this context, the Arbitrators referred to the possibility that the quantified amount of nullification or impairment suffered by the European Communities could vary over time as a result

of new judgements or settlement agreements under the 1916 Act:

> "[T]he quantified amount of nullification or impairment sustained by the European Communities as a result of the 1916 Act may vary over time, if there are new judgments or settlement agreements under the 1916 Act involving EC entities. This may necessitate access by the parties to all relevant information, including settlement awards. The Arbitrators are confident that each party will abide fully by its obligation under Article 3.10 of the DSU to 'engage in dispute settlement procedures in good faith in an effort to resolve the dispute.' In our view, this obligation applies to all stages of the dispute, including during the implementation of the suspension of obligations.
>
> We also recall that the United States may have recourse to the appropriate dispute settlement procedures in the event that it considers that the application of the suspension by the European Communities exceeds the level of nullification or impairment that the European Communities has sustained as a result of the 1916 Act . . ."[1033]

726. Concerning the possibility of setting a variable level of suspension of concessions or other obligations in order to reflect possible variations in the level of nullification or impairment, see paragraphs 682–683 above.

Exception: arbitrations pursuant to Article 4.10 of the *SCM Agreement*

727. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators considered the provisions of Article 4.11 of the *SCM Agreement* as special or additional rules and recalled that the concept of nullification or impairment is absent from Articles 3 and 4 of the *SCM Agreement*. In the Arbitrators' view, there is no legal obligation in that context that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment. The Arbitrators thus concluded that, when dealing with a prohibited export subsidy, an amount of countermeasures that corresponds to the total amount of the subsidy is "appropriate". See paragraph 766 below.

728. In *US – FSC (Article 22.6 – US)*, the Arbitrators recalled that "Articles 4.10 and 4.11 of the SCM Agreement are 'special or additional rules' under Appendix 2 of the DSU, and that in accordance with Article 1.2 of the DSU, it is possible for such rules or procedures to prevail over those of the DSU. There can be no presumption, therefore, that the drafters intended the standard under Article 4.10 to be necessarily coextensive with that under Article 22.4 so that the notion of 'appropriate countermeasures' under Article 4.10 would limit such countermeasures to an amount 'equivalent to the level of nullification or impairment' suffered by the complaining Member. Rather, Articles 4.10 and 4.11 of the SCM Agreement use distinct language and that difference must be given meaning."[1034]

(ii) Assessment of the level of suspension of concessions

General

729. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators considered that "to estimate the level of nullification or impairment, the same basis needs to be used for measuring the level of suspension of concessions. Since the latter is the gross value of US imports from the European Communities, the comparable basis for estimating nullification and impairment in our view is the impact on the value of relevant EC imports from the United States (rather than US firms' costs and profits, as used in the US submission). More specifically, we compare the value of relevant EC imports from the United States under the present banana import regime (the actual situation) with their value under a WTO-consistent regime (a "counterfactual" situation)."[1035]

Methodology paper

730. In *EC – Hormones (US) (Article 22.6 – EC)*,[1036] *EC – Hormones (Canada) (Article 22.6 – EC)*[1037] and *Brazil – Aircraft (Article 22.6 – Brazil)*,[1038] the Arbitrators asked the requesting party to provide them with a methodology paper explaining the methodology they applied in calculating the proposed level of suspension.

731. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the European Communities requested that the Arbitrators disregard certain information contained in Ecuador's methodology document on the basis that such information was included in Ecuador's first submission only and not in the methodology document. The Arbitrators held that while a procedural step of submitting a methodology document had been stipulated in another arbitration proceeding for reasons of practicality, such a "methodology document" was not expressly mentioned in the *DSU*. Furthermore, the Arbitrators rejected "the idea that the specificity requirements of

[1033] Decision by the Arbitrators in *US – 1916 Act (Article 22.6 – US)*, paras. 9.1–9.2.
[1034] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.47.
[1035] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 7.1.
[1036] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)*, para. 5.
[1037] Decision by the Arbitrators on *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 5.
[1038] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 2.9.

Article 6.2 apply *mutatis mutandis* to the methodology document":

> "[W]e introduced the procedural step of submitting a methodology document in the US/EC *Bananas III* arbitration proceeding because we reckoned that certain information about the methodology used by the party for calculating the level of nullification or impairment would logically only be in the possession of that Member and that it would not be possible for the Member requesting arbitration pursuant to Article 22 of the DSU to challenge this information unless it was disclosed. Obviously, if such information were to be disclosed by the Member suffering impairment only in its first submission, the Member requesting arbitration could only rebut that information in its rebuttal submission, while its first submission would become necessarily less meaningful and due process concerns could arise. It was out of these concerns that the United States was requested to submit a document explaining the methodology used for calculating impairment before the filing of the first submission by both parties. Unlike in panel proceedings, where parties do not file their first submissions simultaneously, it has been the practice in past arbitration proceedings under Article 22 that both rounds of submissions take place before a single oral hearing of the parties by the Arbitrators and that in both these rounds parties file their submissions simultaneously.
>
> However, we agree with Ecuador that such a methodology document is nowhere mentioned in the DSU. Nor do we believe, as explained in detail above, that the specificity requirements of Article 6.2 relate to that methodology document rather than to requests for suspension pursuant to Article 22.2, and to requests for the referral of such matters to arbitration pursuant to Article 22.6. For these reasons, we reject the idea that the specificity requirements of Article 6.2 apply *mutatis mutandis* to the methodology document. In our view, questions concerning the amount, usefulness and relevance of information contained in a methodology document are more closely related to the questions of who is required at what point in time to present evidence and in which form, or in other words, the issue of the burden of proof in an arbitration proceeding under Article 22.6."[1039]

(iii) Standard of equivalence

Quantitative equivalence

732. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators considered the meaning of "equivalence" and noted "that the ordinary meaning of the word '*equivalence*' is 'equal in value, significance or meaning', 'having the same effect', 'having the same relative position or function', 'corresponding to', 'something equal in value or worth', also 'something tantamount or virtually identical'".[1040] The Arbitrators considered that "this meaning connotes a correspondence, identity or balance between two related levels, i.e. between the level of the concessions to be suspended, on the one hand, and the level of the nullification or impairment, on the other".[1041]

733. The Arbitrators in *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)* specifically found that "equivalent" had to be determined in "quantitative" terms:

> "What we do have to determine. . .is whether the overall proposed level of suspension is *equivalent* to the level of nullification and impairment. This involves a *quantitative* – not a qualitative – assessment of the proposed suspension. As noted by the arbitrators in the *Bananas* case, '[i]t is impossible to ensure correspondence or identity between two levels if one of the two is not clearly defined'. Therefore, as a prerequisite for ensuring equivalence between the two levels, we have to be able to determine, not only the 'level of the nullification and impairment', but also the 'level of the suspension of concessions or other obligations'. To give effect to the obligation of equivalence in Article 22.4, the Member requesting suspension thus has to identify the level of suspension of concessions it proposes in a way that allows us to determine equivalence."[1042]

734. Also in *EC – Hormones (Canada) (Article 22.6 – EC)* the Arbitrators stated that the "total trade value" could not "exceed the amount of trade impairment we find".[1043]

735. Similarly, the Arbitrators in *US – FSC (Article 22.6 – US)* noted that drafters of Article 22.4 had explicitly set a "quantitative" benchmark to the level of suspension of concessions or other obligations that can be authorized:

> "The drafters [of Article 22.4] have explicitly set a quantitative benchmark to the level of suspension of concessions or other obligations that might be authorized. This is similarly reflected in Article 22.7, which defines the arbitrators' mandate in such proceedings . . . .
>
> As we have already noted in our analysis of the text of Article 4.10 of the *SCM Agreement* above, there is, by contrast, no such indication of an explicit quantitative benchmark in that provision . . . ."[1044]

[1039] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, paras. 35–36.

[1042] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 20.

[1043] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 21.

[1044] Decision by the Arbitrator on *US – FSC (Article 22.6 – US)*, paras. 5.46–5.47.

Qualitative equivalence

736. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators acknowledged that this was the first time that a complainant had requested authorization to suspend "qualitatively" equivalent (rather than "quantitatively" equivalent) obligations. The Arbitrators compared the case before them with previous cases and concluded that the fact that the requested suspension had not been stated in quantitative terms "[did] not in and of itself render the EC request inconsistent with Article 22":

> "[T]his is the first case in which a WTO Member has sought to suspend 'qualitatively equivalent' obligations. In all previous cases, parties seeking to suspend concessions or other obligations have provided a quantitative, monetary figure indicating the amount of suspension sought. Indeed, the European Communities indicated that it was 'aware that its request for suspension of "qualitatively equivalent" obligations constitutes a novelty in WTO practice.'
>
> . . .
>
> In cases such as *EC – Hormones (US) (Article 22.6 – EC)*, *EC – Hormones (Canada) (Article 22.6 – EC)* and *US – FSC (Article 22.6 – US)*, where the requested suspension was expressed in quantitative terms, the arbitrators necessarily had to assess whether there was 'quantitative equivalence' between the level of the nullification or impairment and the level of the suspension of concessions or other obligations.
>
> In the present case, by contrast, the requested suspension has not been stated in quantitative terms. However, this does not in and of itself render the EC request inconsistent with Article 22 . . ."[1045]

737. The Arbitrators on *US – 1916 Act (Article 22.6 – US)* further indicated that the question of whether it is possible to determine the WTO-consistency of a "qualitatively equivalent" Article 22.2 request cannot be considered in the abstract but has to be looked at from the point of view of its application:

> "Indeed, it is not possible to determine the WTO-consistency of a 'qualitatively equivalent' Article 22.2 request in the *abstract*. Instead, it is necessary to determine how the actual suspension resulting from such 'qualitative equivalence' would be *applied*. More specifically:
>
> - If the suspension of obligations were applied in such a manner that it were equal to or below the level of nullification or impairment sustained by the European Communities, then the suspension would, in principle, be consistent with DSU Article 22.4.[1046]
>
> - If the suspension of obligations were applied in such a manner that it exceeded the level of nullification or impairment sustained by the European Communities, then the suspension would be punitive, and would not be consistent with DSU Article 22.4.
>
> . . . .
>
> In the present case, in order to determine whether the qualitative suspension could be applied in such a manner that the level of suspension could exceed the level of nullification or impairment, it is necessary to determine the trade or economic effects on the European Communities of the 1916 Act. Once this has been determined, the European Communities could implement its suspension up to, but not beyond, this amount. This necessitates a determination of the trade or economic effects of the 1916 Act on the European Communities in numerical or monetary terms, which is the only way in which the arbitrators can determine 'equivalence' in the present context."[1047]

738. In *US – 1916 Act (Article 22.6 – US)*, the European Communities had requested the right to suspend obligations by enacting a regulation replicating the US 1916 Act which had been found inconsistent with WTO law. The Arbitrators noted that the European Communities' request had placed no quantifiable or monetary limits on how the suspension could be applied in practice. The Arbitrators were concerned that the suspension could thus apply to an unlimited amount of US exports to the European Communities. The Arbitrators then rejected the EC argument that the suspension of obligations is somehow "equivalent" because its proposed measure would replicate, or partially replicate, the 1916 Act. The Arbitrators concluded that:

> "Leaving aside for the moment the issue of whether we can examine the EC measure, we would reiterate that similar or even identical measures can have dissimilar trade effects. Stated another way, similar or identical measures may not result in the required equivalence between the level of suspension and the level of nullification or impairment.
>
> . . .
>
> Given the potentially unlimited application of the EC suspension, as described in its request, it is possible that the

[1045] Decision by the Arbitrators on *US – 1916 Act (Article 22.6 – US)*, paras. 5.17 and 5.20–5.21.

[1046] (*footnote original*) We recall that we asked the United States if "reciprocal or 'mirror' retaliation – suspension of the same obligations which have been breached by the Member which is the object of the retaliation – is in principle permissible under the DSU provided that the level of suspension is equivalent to the level of nullification or impairment." The United States indicated in its reply that it "agrees that the suspension of the same obligations is, in principle, permissible under the DSU provided that the level of suspension is equivalent to the level of nullification or impairment." *Answers of the United States to the Arbitrator's Questions to the Parties*, 20 November 2003, paragraph 38. Original emphasis.

[1047] Decision by the Arbitrators on *US – 1916 Act (Article 22.6 – US)*, paras. 5.21 and 5.23.

EC suspension could exceed the level of nullification or impairment when it is applied, and thereby become punitive. The EC request does not ensure that the suspension will be limited to the level of nullification it has sustained, as expressed in quantifiable economic or trade terms."[1048]

Assessment of "equivalence"

General

739. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators considered that they could not fulfil their task of assessing the equivalence between the two levels (i.e. level of nullification or impairment and level of suspension) before they had reached a view on whether the revised EC regime was, in the light of the Panel and the Appellate Body's findings in the original dispute, fully WTO-consistent:

"[I]t is our opinion that the concept of *equivalence* between the two levels (i.e. of the proposed suspension and the nullification or impairment) remains a concept devoid of any meaning if either of the two variables in our comparison between the proposed suspension and the nullification or impairment would remain unknown. In essence, we would be left with the option to declare the level of nullification or impairment to be tantamount to the proposed level of suspension, i.e. to equate one variable in the equation with the other. To do that would mean that any proposed level of suspension would necessarily be deemed equivalent to the level of nullification or impairment so equated. Or, we could resort to the option of measuring the level of nullification or impairment on the basis of our findings in the original dispute, as modified by the Appellate Body and adopted by the DSB. To do that would mean to ignore altogether the undisputed fact that the European Communities has taken measures to revise its banana import regime. That is certainly not the mandate that the DSB has entrusted to us.

Consequently, we cannot fulfil our task to assess the *equivalence* between the two levels before we have reached a view on whether the revised EC regime is, in light of our and the Appellate Body's findings in the original dispute, fully WTO-consistent. It would be the WTO-inconsistency of the revised EC regime that would be the root cause of any nullification or impairment suffered by the United States. Since the level of the proposed suspension of concessions is to be equivalent to the level of nullification or impairment, logic dictates that our examination as Arbitrators focuses on that latter level before we will be in a position to ascertain its equivalence to the level of the suspension of concessions proposed by the United States.[1049]

In arriving at this conclusion, we are mindful of the DSB Chairman's statement at the meeting of 29 January 1999 when the DSB decided to refer this matter to us in our capacity as Arbitrators:

'There remains the problem of how the Panel and the Arbitrators would coordinate their work, but as they will be the same individuals, the reality is that they will find a logical way forward, in consultation with the parties. In this way, the dispute settlement mechanisms of the DSU can be employed to resolve all of the remaining issues in this dispute, while recognizing the right of both parties and respecting the integrity of the DSU.'

We are convinced that our chosen 'way forward' in tackling the tasks before us is the most 'logical way forward'. It is the one that gives full weight and meaning to all of the dispute settlement mechanisms provided for under the DSU that parties to the original *Bananas III* dispute have chosen to invoke."[1050]

740. In *EC – Bananas III (US) (Article 22.6 – EC)*, the European Communities contested the Arbitrators' competence to review the WTO-consistency or otherwise of the revised European Communities' regime (see paragraph 739 above) on the grounds that such a review would deprive Article 21.5 of its *raison d'être*. The Arbitrators disagreed:

"[T]he European Communities argues that if we consider the WTO consistency of its banana regime in an arbitration proceeding under Article 22, we will deprive Article 21.5 of its *raison d'être*. We disagree. For those Members that for whatever reasons do not wish to suspend concessions, Article 21.5 will remain the prime vehicle for challenging implementation measures. However, if we accepted the EC's argument, we would in fact read the time-limit foreseen in Article 22.6 out of the DSU since an Article 21.5 proceeding, which in the EC view includes consultations and an appeal, would seldom, if ever, be completed before the end of the time-limit specified within Article 22.6 (i.e. thirty days of the expiry of the reasonable period of time).[1051] In this regard

[1048] Decision by the Arbitrators on *US – 1916 Act (Article 22.6 – US)*, paras. 5.32 and 5.34.

[1049] (*footnote original*) In this connection, we note that Article 23.2(a) of the DSU provides that Members shall make any determination to the effect that a violation has occurred or that benefits have been nullified or impaired "consistent with the findings contained in the panel or Appellate Body report adopted by the DSB *or an arbitration award* rendered under this Understanding" (emphasis added). This by implication suggests that issues of violation and nullification or impairment can be determined by arbitration.

[1050] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, paras. 4.7–4.9.

[1051] (*footnote original*) As we noted in our Initial Decision, Arbitrators pursuant to Article 22 of the DSU are neither in a position to influence the point in time when parties to the original dispute initiate such a procedure, nor when original parties initiate a procedure under Article 21.5 of the DSU, nor when the DSB is in a position to deal with such requests, nor when the DSB establishes a reconvened panel, nor when the DSB refers a matter to arbitration. We recall, on the one hand, that Article 21.5 of the DSU requires reconvened panels to complete their work in principle within 90 days as of the referral of the matter to them, but without specifying when such a proceeding should be initiated. The express wording of Article 21.5 of the

it is useful to recall the arbitration award in the *Hormones* case, in which it is stated 'Read in context, it is clear that the reasonable period of time, as determined under Article 21.3(c), should be the *shortest* period possible within the legal system of the Member to implement the recommendations and rulings of the DSB.'[1052] We note that in the US view, if it cannot make a request for authorization to suspend concessions within the Article 22.6 time-period, it loses its right to do so, at least under circumstances where the negative-consensus rule of Article 22.6 applies."[1053]

741. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators considered that the benchmark of *equivalence* reflects a stricter standard of review for Arbitrators acting pursuant to Article 22.7 of the *DSU* than the degree of scrutiny that the standard of *appropriateness*, as applied under the *GATT 1947*, would have suggested. In arriving at this conclusion, the Arbitrators examined the working party on *Netherlands Action under Article XXIII:2 to Suspend Obligations to the United States*:

"We are mindful of the fact that the working party on *Netherlands Action under Article XXIII:2 to Suspend Obligations to the United States*[1054] considered whether the proposed action was '*appropriate*' and that the Working Party only had '*regard*' to the *equivalence* of the impairment suffered:

> '2. The Working Party was instructed by the CONTRACTING PARTIES to investigate the *appropriateness of the measure* which the Netherlands Government proposed to take, having regard to the *equivalence to the impairment* suffered by the Netherlands as a result of the United States restrictions.
>
> 3. The Working Party felt that the appropriateness of the measure envisaged by the Netherlands Government should be considered from two points of view: in the first place, whether in the circumstances, the measure proposed was *appropriate* in character, and secondly, whether the extent of the quantitative restriction proposed by the Netherlands Government was *reasonable*, having regard to the impairment suffered.' (emphasis added).

In our view, in light of the explicit reference in paragraphs 4 and 7 of Article 22 of the DSU to the need to ensure the *equivalence* between the level of proposed suspension and the level of the nullification or impairment suffered, the standard of *appropriateness* applied by the 1952 working party has lost its significance as a benchmark for the authorization of the suspension of concessions under the DSU.

However, we note that the ordinary meaning of '*appropriate*', connoting 'specially suitable, proper, fitting, attached or belonging to',[1055] suggests a certain degree of relation between the level of the proposed suspension and the level of nullification or impairment, where as we stated above, the ordinary meaning of '*equivalent*' implies a higher degree of correspondence, identity or stricter balance between the level of the proposed suspension and the level of nullification or impairment. Therefore, we conclude that the benchmark of *equivalence* reflects a stricter standard of review for Arbitrators acting pursuant to Article 22.7 of the WTO's DSU than the degree of scrutiny that the standard of *appropriateness*, as applied under the GATT of 1947 would have suggested."[1056]

742. In *EC – Hormones (US) (Article 22.6 – EC)* and in *EC – Hormones (Canada) (Article 22.6 – EC)*, the Arbitrators considered that "an arbitrator has to 'determine whether the level of such suspension is equivalent to the level of nullification or impairment'" but that "[a]rbitrators are explicitly prohibited from 'examin[ing] the nature of the concessions or other obligations to be suspended' (other than under Articles 22.3 and 22.5)".[1057] The Arbitrators further indicated that the determination of whether the overall proposed level of suspension is equivalent to the level of nullification and impairment involves a *quantitative* – not a qualitative – assessment of the proposed suspension:

"What we do have to determine, however, is whether the overall proposed level of suspension is *equivalent* to the level of nullification and impairment. This involves a *quantitative* – not a qualitative – assessment of the proposed suspension. As noted by the arbitrators in the

---

Footnote 1051 (*cont.*)
DSU does not exclude the possibility of initiating such a proceeding *before* or *after* the expiry of the reasonable period of time for implementation of panel and/or Appellate Body reports adopted by the DSB. On the other hand, we recall that, pursuant to Article 22.6 of the DSU, Arbitrators shall complete their work within 60 days as of the expiry of the reasonable period of time. If a proceeding under Article 21.5 of the DSU is initiated close to the end of the reasonable period, or after it has expired, the 90 day period of Article 21.5 and the 60 day period of Article 22.6 become irreconcilable. In any event, our terms of reference as Arbitrators are limited to those foreseen in paragraphs 6 and 7 of Article 22 of the DSU. We note that the relationship of Articles 21.5 and 22 is now under discussion in the ongoing review of the DSU.

[1052] (*footnote original*) Arbitration Award under Article 21.3(c) in *EC Measures Concerning Meat and Meat Products (Hormones)*, WT/DS26/15 & WT/DS48/13, paragraph 26 (29 May 1998) (emphasis added).

[1053] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 4.11.

[1054] (*footnote original*) Report of the working party on Netherlands Action under Article XXIII:2 to Suspend Obligations to the United States, adopted on 8 November 1952, BISD 1S/62.

[1055] (*footnote original*) The New Shorter Oxford English Dictionary on Historic Principles (1993), page 103.

[1056] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, paras. 6.4–6.5. In *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, the Arbitrators followed this approach and considered that they "would have to estimate the level of suspension we consider to be *equivalent* to the impairment suffered" (emphasis added), para. 12.

[1057] Decisions by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* and *EC – Hormones (Canada) (Article 22.6 – EC)*, para. 18.

Bananas case, '[i]t is impossible to ensure correspondence or identity between two levels if one of the two is not clearly defined'.[1058] Therefore, as a prerequisite for ensuring equivalence between the two levels, we have to be able to determine, not only the 'level of the nullification and impairment', but also the 'level of the suspension of concessions or other obligations'. To give effect to the obligation of equivalence in Article 22.4, the Member requesting suspension thus has to identify the level of suspension of concessions it proposes in a way that allows us to determine equivalence."[1059]

Extent of the Arbitrators' mandate when they reject the proposed level of suspension

743. The Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)* considered that when the Arbitrators determine that the level of suspension of concessions or other obligations sought by the complaining party is not equivalent to the actual level of nullification or impairment suffered, they are obliged to determine what level of suspension would be equivalent:

"There is . . . a difference between our task here and the task given to a panel. In the event we decide that the US proposal is *not* WTO consistent, i.e. that the suggested amount is too high, we should not end our examination the way panels do, namely by requesting the DSB to recommend that the measure be brought into conformity with WTO obligations. Following the approach of the arbitrators in the *Bananas* case – where the proposed amount of US$ 520 million was reduced to US$ 191.4 million – we would be called upon to go further. In pursuit of the basic DSU objectives of prompt and positive settlement of disputes, we would have to estimate the level of suspension we consider to be equivalent to the impairment suffered. This is the essential task and responsibility conferred on the arbitrators in order to settle the dispute. In our view, such approach is implicitly called for in Article 22.7. . . "[1060]

744. Similarly, in *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators stated:

"[W]e note that, if we were to find the proposed amount . . . not to be equivalent, we would have to estimate the level of suspension we consider to be equivalent to the nullification or impairment suffered by Ecuador. This approach is consistent with Article 22.7 of the DSU which emphasizes the finality of the arbitrators' decision. . . .

We recall that this approach was followed in the US/EC arbitration proceeding in *EC – Bananas III* and the arbitration proceedings in *EC – Hormones*, where the arbitrators did not consider the proposed amount of suspension as equivalent to the nullification or impairment suffered and recalculated that amount in order to be able to render a final decision."[1061]

745. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, the Arbitrators confirmed that "prior Arbitrators that have rejected proposed levels of countermeasures (or suspensions of concessions) have always proceeded to set levels consistent with the relevant agreements".[1062]

(c) Exception: standard of appropriateness in subsidy arbitrations

746. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators, although indicating that they were following the approach adopted by previous arbitrators, used the standard of appropriateness, that had been rejected in *EC – Bananas III (US) (Article 22.6 – EC)* (see paragraph 741 above). This was because Article 4.11 of the *SCM Agreement* calls for the Arbitrators to determine the "*appropriate countermeasures*". The Arbitrators indicated that "[a]s to our task, we follow the approach adopted by previous arbitrators under Article 22.6 of the DSU.[1063] We will have not only to determine whether Canada's proposal constitutes '*appropriate countermeasures*', but also to determine the level of countermeasures we consider to be *appropriate* in case we find that Canada's level of countermeasures is not appropriate, if necessary by applying our own methodology." (emphasis added)[1064]

747. With respect to the relationship between the "equivalence" and "appropriateness" standards, see paragraphs 727–728 above. As regards the particularities of arbitrations pursuant to Article 4.11 of the *SCM Agreement*, see paragraphs 763–777 below and Section IV.B.8 of the Chapter on the *SCM Agreement*.

(d) Separate opinions

748. In *US – FSC (Article 22.6 – EC)*, the Arbitrators expressed separate opinions in two footnotes regarding the extent of the possible interpretations of the Arbitrators' conclusions.[1065]

749. As regards dissenting/separate opinions in panel reports, see Section XI.B.7 above. For concurrent

statements in Appellate Body reports, see Section XVII.B.7 above.

(e) Suspension of concessions awarded under arbitration

750. In *EC – Bananas III (US) (Article 22.6 – EC)*, the Arbitrators decided that the suspension by the United States of the application to the European Communities and its member States of tariff concessions and related obligations under *GATT 1994* covering trade in a maximum amount of US$191.4 million per year would be consistent with Article 22.4 of the *DSU*.[1066] Further to the request by the United States,[1067] the DSB, at its meeting on 19 April 1999, authorized the suspension of concessions.[1068]

751. In *EC – Hormones (US) (Article 22.6 – EC)*, the Arbitrators decided that the suspension by the United States of the application to the European Communities and its member States of tariff concessions and related obligations under *GATT 1994* covering trade in a maximum amount of US$116.8 million per year would be consistent with Article 22.4 of the *DSU*.[1069] Further to the request by the United States,[1070] the DSB, at its meeting on 26 July 1999, authorized the suspension of concessions.[1071]

752. In *EC – Hormones (Canada) (Article 22.6 – EC)*, the Arbitrators decided that the suspension by Canada of the application to the European Communities and its member States of tariff concessions and related obligations under *GATT 1994* covering trade in a maximum amount of Can$11.3 million per year would be consistent with Article 22.4 of the *DSU*.[1072] Further to the request by Canada,[1073] the DSB, at its meeting on 26 July 1999, authorized the suspension of concessions.[1074]

753. In *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, the Arbitrators decided that the suspension by Ecuador to the European Communities of concessions or other obligations at a level not exceeding US$201.6 million per year would be consistent within the meaning of Article 22.4. The Arbitrators further decided that

> "(b) Ecuador may request, pursuant to subparagraph (a) of Article 22.3, and obtain authorization by the DSB to suspend concessions or other obligations under the GATT concerning certain categories of goods in respect of which we have been persuaded that suspension of concessions is effective and practicable. Notwithstanding the requirement set forth in Article 22.7 that arbitrators 'shall not examine the nature of the concessions or other obligations to be suspended', we note that in our view these categories of goods do not include investment goods or primary goods used as inputs in Ecuadorian manufacturing and processing industries, whereas these categories of goods do include goods destined for final consumption by end-consumers in Ecuador.[1075] In making its request for suspension of concessions with respect to certain product categories, we note that, consistent with past practice in arbitration proceedings under Article 22,[1076] Ecuador should submit to the DSB a list identifying the products with respect to which it intends to implement such suspension once it is authorized.
>
> (c) Ecuador may request, pursuant to subparagraph (a) of Article 22.3, and obtain authorization by the DSB to suspend commitments under the GATS with respect to 'wholesale trade services' (CPC 622) in the principal sector of distribution services.
>
> (d) To the extent that suspension requested under the GATT and the GATS, in accordance with subparagraphs (b) and (c) above, is insufficient to reach the level of nullification and impairment indicated in subparagraph (a) of this paragraph, Ecuador may request, pursuant to subparagraph (c) of Article 22.3, and obtain authorization by the DSB to suspend its obligations under the TRIPS Agreement with respect to the following sectors of that Agreement:
>
> Section 1: Copyright and related rights, Article 14 on 'Protection of performers, producers of phonograms (sound recordings) and broadcasting organisations';
>
> Section 3: Geographical indications;
>
> Section 4: Industrial designs."[1077]

754. Further to the request by Ecuador,[1078] the DSB, at its meeting on 28 May 2000, authorized the suspension of concessions.[1079]

[1066] Decision by the Arbitrators on *EC – Bananas III (US) (Article 22.6 – EC)*, para. 7.8.
[1067] WT/DS27/49.
[1068] WT/DSB/M/59.
[1069] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)*, para. 84.
[1070] WT/DS26/21.
[1071] WT/DSB/M/65.
[1072] Decision by the Arbitrators on *EC – Hormones (US) (Article 22.6 – EC)*, para. 84.
[1073] WT/DS48/19.
[1074] WT/DSB/M/65.
[1075] (*footnote original*) We would expect that a request by Ecuador under subparagraph (a) of Article 22.3 for suspension of concessions under the GATT with respect to the product categories just mentioned would be at least of the amount identified in paragraph 99 above.
[1076] (*footnote original*) Decision by the Arbitrators in *European Communities – Measures Concerning Meat and Meat Products (Hormones) – Original Complaint by the United States – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* (WT/DS26/ARB, dated 12 July 1999), paras. 18–23. Decision by the Arbitrators in *European Communities – Measures Concerning Meat and Meat Products (Hormones) – Original Complaint by Canada – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* (WT/DS48/ARB, dated 12 July 1999), paras. 18–21.
[1077] Decision by the Arbitrators on *EC – Bananas III (Ecuador) (Article 22.6 – EC)*, para. 173.
[1078] WT/DS27/54.
[1079] WT/DSB/M/80.

755. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators decided that the suspension by Canada of the application to Brazil of tariff concessions or other obligations under *GATT 1994*, the *Agreement on Textiles and Clothing* and the *Agreement on Import Licensing Procedures* covering trade in a maximum amount of Can$344.2 million per year would constitute appropriate countermeasures within the meaning of Article 4.10 of the *SCM Agreement*.[1080] Further to the request by Canada,[1081] the DSB, meeting on 12 December 2000, authorized the suspension of concessions.[1082]

756. In *US – FSC (Article 22.6 – US)*, the Arbitrators decided that the suspension by the European Communities of concessions under the *GATT 1994* in the form of the imposition of a 100 per cent *ad valorem* charge on imports of certain goods from the United States in a maximum amount of US$4,043 million per year would constitute appropriate countermeasures within the meaning of Article 4.10 of the *SCM Agreement*.[1083] Further to the request by the European Communities,[1084] the DSB, at its meeting on 7 May 2003, authorized the suspension of concessions.[1085]

757. In *US – 1916 Act (Article 22.6 – US)*, the Arbitrators awarded the European Communities the possibility of suspending concessions "qualitatively" (see paragraphs 736–738 above) instead of quantitatively as in all the previous cases above, provided that it ensured that "the application of such a suspension is quantified, and does not exceed the quantified level of nullification or impairment it has sustained as a result of the 1916 Act". As parameters for quantifying the monetary level of its nullification or impairment, the Arbitrators allowed the European Communities to include (i) "the cumulative monetary value of any amounts payable by EC entities pursuant to final court judgments for claims under the 1916 Act"; and (ii) "the cumulative monetary value of any amounts payable by EC entities pursuant to the settlement of claims under the 1916 Act".[1086] As of 31 December 2004, the European Communities had not requested the DSB for authorization to suspend concessions after the issuance of the Decision by the Arbitrator, pursuant to Article 22.7 of the *DSU*, last sentence.

758. In *Canada – Aircraft Credits and Guarantees (Article 22.6 Canada)* the Arbitrator decided that the suspension by Brazil: (a) of the application of the obligation under paragraph 6(a) of Article VI of the *GATT 1994* to determine that the effect of subsidization under EDC Canada Account and EDC Corporate Account programmes was to cause or threaten material injury to an established domestic industry, or was to retard materially the establishment of a domestic industry; (b) of the application of obligations under the *Agreement on Import Licensing Procedures* relative to licensing requirements on imports from Canada; and (c) of tariff concessions and related obligations under the *GATT 1994* concerning a list of products to be drawn from the list attached to its request, covering trade in a total amount of US$247,797,000, would constitute appropriate countermeasures within the meaning of Article 4.10 of the SCM Agreement.[1087] Further to the request by Brazil,[1088] the DSB, at its meeting on 18 March 2003, authorized the suspension of concessions.[1089]

759. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, the Arbitrator awarded the requesting parties (Brazil, Chile, European Communities, India, Japan, Korea and Mexico) the possibility of suspending concessions or other obligations in the form of the imposition of an additional import duty above bound custom duties on a final list of products originating in the United States covering, on a yearly basis, a total value of trade not exceeding, in US dollars, the amount resulting from the following equation:

> "Amount of disbursements under CDSOA for the most recent year for which data are available relating to anti-dumping or countervailing duties paid on imports from [the requesting party] at that time, as published by the United States' authorities.
>
> *multiplied by:*
>
> 0.72"[1090]

760. Following Canada's request to suspend concessions and other obligations, the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Canada)*, allowed Canada, in addition to imposing additional import duties, to suspend "the application of the obligations under Article VI of *GATT 1994*, Articles 3, 5, 7, 8, 9, 10, 11 and 12 of the *Anti-Dumping Agreement*, and Articles 11, 12, 15, 17, 18, 19, 20, 21 and 22 of the *SCM Agreement*

[1089] WT/DSB/M/145.

[1090] Decision by the Arbitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – India)*, para. 5.2. Similar decisions were taken in regard to the requests of Brazil, Canada, Chile, EC, Japan, Korea and Mexico, with some textual variations in some cases. See decision by the Abitrator in *US – Offset Act (Byrd Amendment) (Article 22.6 – Brazil), US – Offset Act (Byrd Amendment) (Article 22.6 – Canada), US – Offset Act (Byrd Amendment) (Article 22.6 – Chile), US – Offset Act (Byrd Amendment) (Article 22.6 – EC), US – Offset Act (Byrd Amendment) (Article 22.6 – Japan), US – Offset Act (Byrd Amendment) (Article 22.6 – Korea), US – Offset Act (Byrd Amendment) (Article 22.6 – Mexico)*, para. 5.2.

to determine that the effect of dumping or subsidization of products from the United States is to cause or threaten material injury to an established domestic injury, or is to retard materially the establishment of a domestic industry", converting a value of trade not exceeding the amount resulting from the same formula.[1091]

761. In *US – Offset Act (Byrd Amendment) (Article 22.6)*, further to the request by all the requesting parties except Chile,[1092] the DSB, at its meeting on 24 and 26 November 2004, authorized the suspension of concessions.[1093] Pursuant to a request by Chile,[1094] authorization to suspend concessions was granted at the DSB meeting on 17 December 2004.[1095]

762. The table below illustrates the authorizations granted by the DSB to suspend concessions as of 31 December 2004:

Dispute	Parties	Date of the award	Level of suspension
US – Offset Act (Byrd Amendment) (DS217, DS234)	Brazil, Canada, Chile, EC, India, Japan, Korea, Mexico,	31 August 2004	Amount of annual disbursements multiplied by a United States trade effect coefficient
US – 1916 Act (EC) (DS136)	EC / United States	24 February 2004	Amount of the final decisions and awards under 1916 Act
Canada – Aircraft (DS222)	Brazil / Canada	17 February 2003	US$247,797,000
US – FSC (DS108)	EC / United States	30 August 2002	US$4,043 millions per year
Brazil – Aircraft (DS46)	Canada / Brazil	28 August 2000	CAN$344.2 millions per year
EC – Bananas III (Ecuador) (DS27)	Ecuador / EC	24 March 2000	US$201.6 millions per year
EC – Hormones (Canada, DS26) (United States, DS48)	Canada / EC United States / EC	12 July 1999	CAN$11.3 millions per year (Canada) US$116.8 millions per year (United States)
EC – Bananas III (United States) (DS27)	United States / EC	9 April 1999	US$191.4 millions per year

10. Relationship with other WTO Agreements

(a) Arbitrations pursuant to Article 4.10 and 4.11 of the SCM Agreement

(i) Special or additional rules

763. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators indicated that they read the provisions of Article 4.11 of the *SCM Agreement* as special or additional rules:

> "We read the provisions of Article 4.11 of the SCM Agreement as special or additional rules. In accordance with the reasoning of the Appellate Body in *Guatemala – Cement*,[1096] we must read the provisions of the DSU and the special or additional rules in the SCM Agreement so as to give meaning to all of them, except if there is a conflict or a difference. . ."[1097]

764. In *US – FSC (Article 22.6 – US)*, the Arbitrators recalled Article 30 of the *SCM Agreement* and concluded that Article 22.6 of the *DSU* applies to arbitrations pursuant to Article 4.11 of the *SCM Agreement* although this latter provision would prevail in case of conflict:

> "We also recall the terms of Article 30 of the *SCM Agreement*, which clarifies that the provisions of the *DSU* are applicable to proceedings concerning measures covered by the *SCM Agreement*. Article 22.6 of the *DSU* therefore remains relevant to arbitral proceedings under Article 4.11 of the *SCM Agreement*, as illustrated by the textual reference made to Article 22.6 of the *DSU* in that provision. However, the special or additional rules and procedures of the *SCM Agreement*, including Articles 4.10 and 4.11, would prevail to the extent of any difference between them.[1098]"[1099]

[1099] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 2.6.

(ii) Exception to the requirement of equivalence to the level of nullification or impairment

765. The Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* rejected Brazil's argument that the countermeasures must be equivalent to the level of nullification or impairment pursuant to Article 22.4 of the *DSU*, noting that the concept of nullification or impairment is not found in Articles 3 and 4 of the *SCM Agreement*. The Arbitrators explained:

> "A first approach would be to consider that the concept of nullification or impairment does not apply to Article 4 of the SCM Agreement. We note in this respect that, in relation to actionable subsidies, Article 5 refers to nullification or impairment as only one of the three categories of adverse effects. This could mean that another test than nullification or impairment could also apply in the context of Article 4 of the SCM Agreement.
>
> That said, we note that the Original Panel concluded that, since a violation had been found, a *prima facie* case of nullification or impairment had been made within the meaning of Article 3.8 of the DSU, which Brazil had not rebutted. In that context, we are more inclined to consider that no reference was expressly made to nullification or impairment in Article 4 of the SCM Agreement for the following reasons:
>
> (a) a violation of Article 3 of the SCM Agreement entails an irrebuttable presumption of nullification or impairment. It is therefore not necessary to refer to it;
>
> (b) the purpose of Article 4 is to achieve the *withdrawal* of the prohibited subsidy. In this respect, we consider that the requirement to withdraw a prohibited subsidy is of a different nature than removal of the specific nullification or impairment caused to a Member by the measure.[1100] The former aims at removing a measure which is presumed under the WTO Agreement to cause negative trade effects, irrespective of who suffers those trade effects and to what extent. The latter aims at eliminating the effects of a measure on the trade of a given Member;
>
> (c) the fact that nullification or impairment is established with respect to a measure does not necessarily mean that, in the presence of an obligation to withdraw that measure, the level of appropriate countermeasures should be based only on the level of nullification or impairment suffered by the Member requesting the authorisation to take countermeasures."[1101]

766. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators further indicated that they read the provisions of Article 4.11 of the *SCM Agreement* as special or additional rules and recalled that the concept of nullification or impairment is absent from Articles 3 and 4 of the *SCM Agreement*. The Arbitrators considered that, accordingly, in that context there was no legal obligation that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment. The Arbitrators thus concluded that, when dealing with a prohibited export subsidy, an amount of countermeasures that corresponds to the total amount of the subsidy is "appropriate":

> "We read the provisions of Article 4.11 of the SCM Agreement as special or additional rules. In accordance with the reasoning of the Appellate Body in *Guatemala – Cement*,[1102] we must read the provisions of the DSU and the special or additional rules in the SCM Agreement so as to give meaning to all of them, except if there is a conflict or a difference. While we agree that in practice there may be situations where countermeasures equivalent to the level of nullification of impairment will be appropriate, we recall that the concept of nullification or impairment is absent from Articles 3 and 4 of the SCM Agreement. In that framework, there is no legal obligation that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment.
>
> On the contrary, requiring that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment would be contrary to the principle of effectiveness by significantly limiting the efficacy of countermeasures in the case of prohibited subsidies. Indeed, as shown in the present case,[1103] other countermeasures than suspension of concessions or obligations may not always be feasible because of their potential effects on other Members. This would be the case of a counter-subsidy granted in a sector where other Members than the parties compete with the products of the parties. In such a case, the Member taking the countermeasure may not be in a position to induce compliance.
>
> We are mindful that our interpretation may, at a first glance, seem to cause some risk of disproportionality in case of multiple complainants. However, in such a case, the arbitrator could allocate the amount of appropriate countermeasures among the complainants in proportion to their trade in the product concerned. The "inducing" effect would most probably be very similar.

[1100] (*footnote original*) We note that Article 3.7 of the DSU refers to the "withdrawal of the measures concerned" as a first objective. However, we also note that, contrary to Article 3.7 of the DSU, Article 4.7 of the SCM Agreement does not provide for any alternative than the withdrawal of the measure once it has been found to be a prohibited subsidy.

[1101] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.47–3.48.

[1102] (*footnote original*) *op. cit.*, para. 65.

[1103] (*footnote original*) Canada mentioned that it could have applied a counter-subsidy but refrained from doing so for a number of reasons.

> For the reasons set out above, we conclude that, when dealing with a prohibited export subsidy, an amount of countermeasures which corresponds to the total amount of the subsidy is 'appropriate'.[1104]"[1105]

767. In *US – FSC (Article 22.6 – US)*, the Arbitrator considered that, since Articles 4.10 and 4.11 of the *SCM Agreement* may prevail over those of the *DSU*, there can be no presumption that the drafters intended the standard under Article 4.10 of the *SCM Agreement* to be "necessarily coextensive" with that under Article 22.4 of the *DSU*:

> "It should be recalled here that Articles 4.10 and 4.11 of the *SCM Agreement* are 'special or additional rules' under Appendix 2 of the *DSU*, and that in accordance with Article 1.2 of the *DSU*, it is possible for such rules or procedures to prevail over those of the *DSU*. There can be no presumption, therefore, that the drafters intended the standard under Article 4.10 to be necessarily coextensive with that under Article 22.4 so that the notion of 'appropriate countermeasures' under Article 4.10 would limit such countermeasures to an amount 'equivalent to the level of nullification or impairment' suffered by the complaining Member. Rather, Articles 4.10 and 4.11 of the *SCM Agreement* use distinct language and that difference must be given meaning.
>
> Indeed, reading the text of Article 4.10 in its context, one might reasonably observe that if the drafters had intended the provision to be construed in this way, they could certainly have made it clear. Indeed, relevant provisions both elsewhere in the *SCM Agreement* and in the *DSU* use distinct terms to convey precisely such a standard as described by the United States, in so many words. Yet the drafters chose terms for this provision in the *SCM Agreement* different from those found in Article 22.4 of the DSU. It would not be consistent with effective treaty interpretation to simply read away such differences in terminology.
>
> We therefore find no basis in the language itself or in the context of Article 4.10 of the *SCM Agreement* to conclude that it can or should be read as amounting to a 'trade effect-oriented' provision where explicitly alternative language is to be read away in order to conform it to a different wording to be found in Article 22.4 of the *DSU*.
>
> We would simply add that, while we consider that the precise difference in language must be given proper meaning, this goes no further than that. Our interpretation of Article 4.10 of the *SCM Agreement* as embodying a different rule from Article 22.4 of the *DSU* does not make the *DSU* otherwise inapplicable or redundant."[1106]

768. As regards the subsidy-specific aspects of the determination of "appropriate countermeasures", see Section IV.B.7(a) of the Chapter on the *SCM Agreement*.

769. With respect to the standard of "*appropriateness*" as opposed to the standard of "*equivalence*", see paragraphs 741–746 above.

(iii) Concept of "appropriate countermeasures"

"countermeasure"

770. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators looked at the word 'countermeasure' as context for finding a meaning to the word "appropriate". The Arbitrators disregarded the dictionary meaning of the word and preferred to refer to its general meaning in international law and to the work of the International Law Commission on state responsibility:

> "While the parties have referred to dictionary definitions for the term 'countermeasures', we find it more appropriate to refer to its meaning in general international law[1107] and to the work of the International Law Commission (ILC) on state responsibility, which addresses the notion of countermeasures.[1108] We note that the ILC work is based on relevant state practice as well as on judicial decisions and doctrinal writings, which constitute recognized sources of international law.[1109] When considering the definition of 'countermeasures' in Article 47 of the Draft Articles,[1110] we note that counter-

---

[1104] (*footnote original*) The Arbitrators also reviewed the arguments and evidence submitted by the parties concerning the approach based on the level of nullification or impairment suffered by Canada. They note that this approach implied – as any counterfactual – many more assumptions than the approach based on the amount of the subsidy. The Arbitrators were of the view that, if the calculation of appropriate countermeasures based on the amount of the subsidy were compatible with Article 4.10 of the SCM Agreement, it would be preferable to follow this approach since it could lead to a more objective result.

[1105] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.57–3.60.

[1106] Decision by the Arbitrator on *US – FSC (Article 22.6 – US)*, paras. 5.47–5.50.

[1107] (*footnote original*) See, e.g., the *Naulilaa* arbitral award (1928), UN Reports of International Arbitral Awards, Vol. II, p. 1028 and *Case Concerning the Air Services Agreement of 27 March 1946 (France v. United States of America)* (1978) International Law Reports, Vol. 54 (1979), p. 338. See also, *inter alia*, the *Draft Articles on State Responsibility With Commentaries Thereto Adopted by the International Law Commission on First Reading* (January 1997), hereinafter the "Draft Articles" and the draft Articles provisionally adopted by the Drafting Committee on second reading, A/CN.4/L 600, 11 August 2000. Even though the latter modify a number of provisions of the Draft Articles, they do not affect the terms to which we refer in this report.

[1108] (*footnote original*) We also note that, on the basis of the definition of "countermeasures" in the Draft Articles, the notion of "appropriate countermeasures" would be more general than the term "equivalent to the level of nullification or impairment". It would basically include it. Limiting its meaning to that given to the term "equivalent to the level of nullification or impairment" would be contrary to the principle of effectiveness in interpretation of treaties.

[1109] (*footnote original*) See Article 38 of the Statute of the ICJ.

[1110] (*footnote original*) We note that Canada objects to us using the Draft Articles in this interpretation process. Canada argues that the Draft Articles are not "relevant rules of international law applicable to the relations between the parties" within the meaning of Article 31.3(c) of the Vienna Convention. As already

measures are meant to 'induce [the State which has committed an internationally wrongful act] to comply with its obligations under articles 41 to 46'. We note in this respect that the Article 22.6 arbitrators in the *EC – Bananas* (1999) arbitration made a similar statement.[1111] We conclude that a countermeasure is 'appropriate' *inter alia* if it effectively induces compliance."[1112]

771. In *US – FSC (Article 22.6 – US)*, the Arbitrator looked into the ordinary meaning of the word "countermeasure":

"Dictionary definitions of 'countermeasure' suggest that a countermeasure is essentially defined by reference to the wrongful action to which it is intended to respond. The New Oxford Dictionary defines 'countermeasure' as 'an action taken to counteract a danger, threat, etc'.[1113] The meaning of 'counteract' is to 'hinder or defeat by contrary action; neutralize the action or effect of'.[1114] Likewise, the term 'counter' used as a prefix is defined *inter alia* as: 'opposing, retaliatory'.[1115] The ordinary meaning of the term thus suggests that a countermeasure bears a relationship with the action to be counteracted, or with its effects (cf. 'hinder or defeat by contrary action; neutralize the action or effect of').[1116]

In the context of Article 4 of the *SCM Agreement*, the term 'countermeasures' is used to define temporary measures which a prevailing Member may be authorized to take in response to a persisting violation of Article 3 of the *SCM Agreement*, pending full compliance with the DSB's recommendations. This use of the term is in line with its ordinary dictionary meaning as described above: these measures are authorized to counteract, in this context, a wrongful action in the form of an export subsidy that is prohibited *per se,* or the effects thereof.

It would be consistent with a reading of the plain meaning of the concept of countermeasure to say that it can be directed either at countering the measure at issue (in this case, at effectively neutralizing the export subsidy) or at counteracting its effects on the affected party, or both.

We need, however, to broaden our textual analysis in order to see whether we can find more precision in how countermeasures are to be construed in this context. We thus turn to an examination of the expression '*appropriate*' countermeasures with a view to clarifying what level of countermeasures may be legitimately authorized."[1117]

"appropriate countermeasure"

772. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Canada had proposed adopting countermeasures based on the amount of subsidy per aircraft granted by Brazil instead of basing them on the level of nullification or impairment. The Arbitrators examined the meaning of the term appropriate and concluded that "a countermeasure is 'appropriate' *inter alia* if it *effectively* induces compliance":

"In accordance with Article 3.2 of the DSU, we proceed with an analysis of the meaning of the term 'appropriate' based on Article 31 of the Vienna Convention.

Examining only the ordinary meaning of the term 'appropriate' does not allow us to reply to the question before us, since dictionary definitions are insufficiently specific. Indeed, the relevant dictionary definitions of the word 'appropriate' are 'specially suitable; proper'.[1118] However, they point in the direction of meeting a particular objective.

The first context of the term 'appropriate' is the word 'countermeasures', of which it is an adjective. While the parties have referred to dictionary definitions for the term 'countermeasures', we find it more appropriate to refer to its meaning in general international law[1119] and to the work of the International Law Commission (ILC) on state responsibility, which addresses the notion of countermeasures.[1120] We note that the ILC work is based

mentioned, we use the Draft Articles as an indication of the agreed meaning of certain terms in general international law.

[1111] (*footnote original*) *Op. cit.*, para. 6.3. In that case, the arbitrators had to determine the level of nullification or impairment. Since the Article 22.6 arbitrators in the *EC – Bananas* case considered that measures equivalent to the level of nullification or impairment can induce compliance, it could be argued that in the present case too, countermeasures equivalent to the level of nullification or impairment should be sufficient to induce compliance. However, the arbitrators in *EC – Bananas* were instructed by Article 22.7 to determine whether the proposed measures were equivalent to the level of nullification or impairment.

[1117] Decision by the Arbitrator on *US – FSC (Article 22.6 – US)*, paras. 5.4–5.7.

[1118] (*footnote original*) The New Shorter Oxford English Dictionary (1993), p. 103; Webster's New Encyclopedic Dictionary (1994), p. 48.

[1119] (*footnote original*) See, e.g., the *Naulilaa* arbitral award (1928), UN Reports of International Arbitral Awards, Vol. II, p. 1028 and *Case Concerning the Air Services Agreement of 27 March 1946 (France v. United States of America)* (1978) International Law Reports, Vol. 54 (1979), p. 338. See also, *inter alia*, the *Draft Articles on State Responsibility With Commentaries Thereto Adopted by the International Law Commission on First Reading* (January 1997), hereinafter the "Draft Articles" and the draft Articles provisionally adopted by the Drafting Committee on second reading, A/CN.4/L 600, 11 August 2000. Even though the latter modify a number of provisions of the Draft Articles, they do not affect the terms to which we refer in this report.

[1120] (*footnote original*) We also note that, on the basis of the definition of "countermeasures" in the Draft Articles, the notion of "appropriate countermeasures" would be more general than the term "equivalent to the level of nullification or impairment". It would basically include it. Limiting its meaning to that given to the term "equivalent to the level of nullification or impairment" would be contrary to the principle of effectiveness in interpretation of treaties.

on relevant state practice as well as on judicial decisions and doctrinal writings, which constitute recognized sources of international law.[1121] When considering the definition of 'countermeasures' in Article 47 of the Draft Articles,[1122] we note that countermeasures are meant to 'induce [the State which has committed an internationally wrongful act] to comply with its obligations under articles 41 to 46'. We note in this respect that the Article 22.6 arbitrators in the *EC – Bananas (1999)* arbitration made a similar statement.[1123] We conclude that a countermeasure is 'appropriate' *inter alia* if it *effectively* induces compliance."[1124]

773. The Arbitrators, in *US – FSC (Article 22.6 – US)*, considered the dictionary meaning of the word "appropriate" and concluded that, as far as the amount or level of countermeasures is concerned, the expression "appropriate" does not in and of itself predefine the precise and exhaustive conditions for the application of countermeasures.[1125] According to them, Articles 4.10 and 4.11 are not designed to lay down a precise formula or otherwise quantified benchmark or amount of countermeasures which might be legitimately authorized in each and every instance.[1126] The Arbitrators indicated:

"Based on the plain meaning of the word, this means that countermeasures should be adapted to the particular case at hand. The term is consistent with an intent not to prejudge what the circumstances might be in the specific context of dispute settlement in a given case. To that extent, there is an element of flexibility, in the sense that there is thereby an eschewal of any rigid *a priori* quantitative formula. But it is also clear that there is, nevertheless, an objective relationship which must be absolutely respected: the countermeasures must be suitable or fitting by way of response to the case at hand."[1127]

Footnote 9 of the SCM Agreement

774. In *US – FSC (Article 22.6 – US)*, the Arbitrators considered that the term "appropriate" countermeasures in Article 4.10 is informed by footnote 9, which provides guidance as to what the expression "appropriate" should be understood to mean. In the Arbitrators' view, "these two elements are part of a single assessment and that the meaning of the expression 'appropriate countermeasures' should result from a combined examination of these terms of the text in light of its footnote".[1128] The Arbitrators thus concluded that "[t]his footnote effectively clarifies further how the term 'appropriate' is to be interpreted. We understand it to mean that countermeasures that would be 'disproportionate in light of the fact that the subsidies dealt with under these provisions are prohibited' could not be considered 'appropriate' within the meaning of Article 4.10 of the SCM Agreement".[1129] Further to analysing the dictionary meaning of the word "disproportionate" in footnote 9, the Arbitrators considered that footnote 9 "confirms that, while the notion of 'appropriate countermeasures' is intended to ensure sufficient flexibility of response to a particular case, it is a flexibility that is distinctly bounded" and that "[t]hose bounds are set by the relationship of appropriateness". In his view, "[t]hat appropriateness, in turn, entails an avoidance of disproportion between the proposed countermeasures and, as our analysis to this point has brought us, either the actual violating measure itself, the effects thereof on the affected Member, or both".[1130]

775. In *US – FSC (Article 22.6 – US)*, the Arbitrators further looked at the text of the final part of footnote 9 and considered that this text directed him "to consider the 'appropriateness' of countermeasures under Article 4.10 from this perspective of countering a wrongful act and taking into account its essential nature as an upsetting of the rights and obligations as between Members".[1131] The Arbitrators further noted that "the negative formulation of the requirement under footnote 9 is consistent with a greater degree of latitude than a positive requirement may have entailed: footnote 9 clarifies that Article 4.10 is not intended to allow countermeasures that would be 'dis-

[1121] (*footnote original*) See Article 38 of the Statute of the ICJ.

[1122] (*footnote original*) We note that Canada objects to us using the Draft Articles in this interpretation process. Canada argues that the Draft Articles are not "relevant rules of international law applicable to the relations between the parties" within the meaning of Article 31.3(c) of the Vienna Convention. As already mentioned, we use the Draft Articles as an indication of the agreed meaning of certain terms in general international law.

[1123] (*footnote original*) *Op. cit.*, para. 6.3. In that case, the arbitrators had to determine the level of nullification or impairment. Since the Article 22.6 arbitrators in the *EC – Bananas* case considered that measures equivalent to the level of nullification or impairment can induce compliance, it could be argued that in the present case too, countermeasures equivalent to the level of nullification or impairment should be sufficient to induce compliance. However, the arbitrators in *EC – Bananas* were instructed by Article 22.7 to determine whether the proposed measures were equivalent to the level of nullification or impairment.

proportionate'. It does not require strict proportionality.[1132]"[1133]

(iv) Arbitrators' mandate pursuant to Article 4.11

776. In *Brazil – Aircraft (Article 22.6 – Brazil)*, a case that dealt with Canada's request for authorization to take "appropriate countermeasures" under Article 4.10 of the *SCM Agreement*, the Arbitrators described their task under Article 4.11 of the *SCM Agreement*. See paragraph 746 above.

777. In *US – FSC (Article 22.6 – US)*, the Arbitrators considered that their mandate required them to review whether the prevailing Member, in proposing certain measures to take in application of Article 4 of the *SCM Agreement*, had respected the parameters of what is permissible under that provision:

> "[Articles 4.10 and 4.11 of the *SCM Agreement*] complement each other: the arbitrator's mandate in relation to countermeasures concerning prohibited subsidies under Article 4 of the *SCM Agreement* is defined, quite logically, with reference to the notion embodied in the underlying provision in Article 4.10. The expression 'appropriate countermeasures' defines what measures can be authorized in case of non-compliance, and our mandate requires us to review whether, in proposing certain measures to take in application of that provision, the prevailing Member has respected the parameters of what is permissible under that provision.
>
> In doing this, we must aim at determining whether, in this particular case, the countermeasures proposed by the European Communities are 'appropriate'."[1134]

XXIII. ARTICLE 23

A. TEXT OF ARTICLE 23

Article 23
Strengthening of the Multilateral System

1. When Members seek the redress of a violation of obligations or other nullification or impairment of benefits under the covered agreements or an impediment to the attainment of any objective of the covered agreements, they shall have recourse to, and abide by, the rules and procedures of this Understanding.

2. In such cases, Members shall:

   (a) not make a determination to the effect that a violation has occurred, that benefits have been nullified or impaired or that the attainment of any objective of the covered agreements has been impeded, except through recourse to dispute settlement in accordance with the rules and procedures of this Understanding, and shall make any such determination consistent with the findings contained in the panel or Appellate Body report adopted by the DSB or an arbitration award rendered under this Understanding;

   (b) follow the procedures set forth in Article 21 to determine the reasonable period of time for the Member concerned to implement the recommendations and rulings; and

   (c) follow the procedures set forth in Article 22 to determine the level of suspension of concessions or other obligations and obtain DSB authorization in accordance with those procedures before suspending concessions or other obligations under the covered agreements in response to the failure of the Member concerned to implement the recommendations and rulings within that reasonable period of time.

[1132] (*footnote original*) We note in this regard the view of the commentator, Sir James Crawford, on the relevant Article of the ILC text on State Responsibility, reflected in a resolution adopted on 12 December 2001 by the UN General Assembly (A/RES/56/83), which expresses – but only in positive terms – a requirement of proportionality for countermeasures:

> "the positive formulation of the proportionality requirement is adopted in Article 51. A negative formulation might allow too much latitude." (J. Crawford, *The ILC's Articles on State Responsibility, Introduction, Text and Commentaries* 2002, CUP, para. 5 on Article 51).

Article 51 of the ILC Articles on State Responsibility (entitled "*Proportionality*") reads as follows:

> "Countermeasures must be commensurate with the injury suffered, taking into account the gravity of the internationally wrongful act and the rights in question." (emphasis added)

We also note in this respect that, while that provision expressly refers – contrary to footnote 9 of the *SCM Agreement* – to the injury suffered, it also requires the gravity of the wrongful act and the right in question to be taken into account. This has been understood to entail a qualitative element to the assessment, even where commensurateness with the injury suffered is at stake. We note the view of Sir James Crawford on this point in his Commentaries to the ILC Articles:

> "Considering the need to ensure that the adoption of countermeasures does not lead to inequitable results, proportionality must be assessed taking into account not only the purely 'quantitative' element of the injury suffered, but also 'qualitative' factors such as the importance of the interest protected by the rule infringed and the seriousness of the breach. Article 51 relates proportionality primarily to the injury suffered but 'taking into account' two further criteria: the gravity of the internationally wrongful act, and the rights in question. The reference to 'the rights in question' has a broad meaning, and includes not only the effect of a wrongful act on the injured State but also on the rights of the responsible State. Furthermore, the position of other States which may be affected may also be taken into consideration." (*Op. cit.*, para. 6 of the commentaries on Article 51.)

[1133] Decision by the Arbitrator on *US – FSC (Article 22.6 – US)*, para. 5.27.

[1134] Decision by the Arbitrator on *US – FSC (Article 22.6 – US)*, paras. 4.3–4.4.

B. INTERPRETATION AND APPLICATION OF ARTICLE 23

1. General

778. In *US – Section 301 Trade Act*, the Panel stated that Article 23 has to be construed in light of the object and purpose of the WTO. The Panel opined that State responsibility was not only triggered when an actual violation takes place:

> "In treaties which concern only the relations between States, State responsibility is incurred only when an actual violation takes place. By contrast, in a treaty the benefits of which depend in part on the activity of individual operators the legislation itself may be construed as a breach, since the mere existence of legislation could have an appreciable 'chilling effect' on the economic activities of individuals."[1135]

779. In *US – Certain EC Products*, the Panel considered the European Communities argument that the United States unilaterally imposed trade sanctions and thereby violated Article 23 of the *DSU*. The Panel, in a finding not directly reviewed by the Appellate Body, held that both paragraphs of Article 23 provide a prohibition on "unilateral redress", but that this prohibition is more directly provided for under the second paragraph of Article 23:

> "The structure of Article 23 is that the first paragraph states the general prohibition or general obligation, i.e. when Members seek the redress of a WTO violation,[1136] they shall do so only through the DSU. This is a general obligation. Any attempt to seek 'redress' can take place only in the institutional framework of the WTO and pursuant to the rules and procedures of the DSU.
>
> The prohibition against unilateral redress in the WTO sectors is more directly provided for in the second paragraph of Article 23. From the ordinary meaning of the terms used in the chapeau of Article 23.2 ('in such cases, Members shall'), it is also clear that the second paragraph of Article 23 is 'explicitly linked to, and has to be read together with and subject to, Article 23.1'.[1137] That is to say, the specific prohibitions of paragraph 2 of Article 23 have to be understood in the context of the first paragraph, i.e. when such action is performed by a WTO Member with a view to redressing a WTO violation."[1138]

780. The Panel on *US – Certain EC Products* also agreed with the European Communities that Article 23.2 contains specific examples of conduct inconsistent with the rules of the *DSU*, but held that the first analytical step necessarily was to determine – before turning to Article 23.2 – whether the measure at issue falls under the scope of Article 23.1:

> "We also agree with the *US – Section 301 Trade Act* Panel Report that Article 23.2 contains 'egregious examples of conduct that contradict the rules of the DSU'[1139] and which constitute more specific forms of unilateral actions, otherwise generally prohibited by Article 23.1 of the DSU.
>
> > '[t]hese rules and procedures [Article 23.1] clearly cover much more than the ones specifically mentioned in Article 23.2. There is a great deal more State conduct which can violate the general obligation in Article 23.1 to have recourse to, and abide by, the rules and procedures of the DSU than the instances especially singled out in Article 23.2.'(Footnotes omitted)[1140]
>
> The same Panel identified a few examples of such instances where the DSU could be violated[1141] contrary to the provisions of Article 23. Each time a Member seeking the redress of a WTO violation is not abiding by a rule of the DSU, it thus violates Article 23.1 of the DSU.
>
> In order to verify whether individual provisions of Article 23.2 have been infringed (keeping in mind that the obligation to also observe other DSU provisions can be brought under the umbrella of Article 23.1), we must first determine whether the measure at issue comes under the coverage of Article 23.1. In other words, we need to determine whether Article 23 is applicable to the dispute before addressing the specific violations envisaged in the second paragraph of Article 23 of the DSU or elsewhere in the DSU."[1142]

2. Article 23.1

(a) "seek[ing] the redress of a WTO violation"

781. In *US – Certain EC Products*, the Panel, in a finding not reviewed by the Appellate Body, considered whether the United States was "seeking to redress" what it perceived to be a WTO violation when it decided to withhold liquidation on imports from the European Communities of a list of products and impose a contingent liability for 100 per cent duties on each individual importation of affected products ("3 March Measure").

[1135] Panel Report on *US – Section 301 Trade Act*, para. 7.81.

[1136] (*footnote original*) Article 23.1 of the *DSU* refers more accurately to "seek the redress of a violation of obligations or other nullification or impairment of benefits under the covered agreements or an impediment to the attainment of any objective of the covered agreements", i.e. the three causes of actions under WTO. In this Panel Report, the expression "WTO violation(s)" refers to all three causes of actions mentioned in Article 23.1 of the *DSU*.

[1137] (*footnote original*) Panel Report on *US – Section 301 Trade Act*, para. 7.44.

[1138] Panel Report on *US – Certain EC Products*, paras 6.19–6.20. This was upheld by the Appellate Body at para. 111.

[1139] (*footnote original*) Panel Report on *US – Section 301 Trade Act*, para. 7.45.

[1140] (*footnote original*) Panel Report on *US – Section 301 Trade Act*, para. 7.45.

[1141] (*footnote original*) See Panel Report on *US – Section 301 Trade Act*, fns. 655 and 656.

[1142] Panel Report on *US – Certain EC Products*, paras. 6.17–6.20.

"The term 'seeking' or 'to seek' is defined in the Webster New Encyclopaedic Dictionary as: 'to resort to, . . . to make an attempt, try'. . . . The term 'to redress' is defined in the New Shorter Oxford English Dictionary as 'repair (an action); atone for (a misdeed); remedy or remove; to set right or rectify (injury, a wrong, a grievance etc.); obtaining reparation or compensation'. . . . . The term 'redress' implies, therefore, a reaction by a Member against another Member, because of a perceived (or WTO determined) WTO violation, with a view to remedying the situation.

. . .

On its face, this description of the 3 March Measure shows that, because of the US perceived WTO inconsistency of the 1998 Bananas regime put in place by the European Communities as a measure taken to implement the Panel and Appellate Body recommendations (the 'EC implementing measure'), the United States imposed an increased contingent liability on EC listed imports only. This 3 March Measure was, therefore, discriminatory and aimed at the European Communities exclusively. The unilateral imposition of a liability for 100 per cent duty as of 3 March (well above the bound rates of tariffs) constitutes the imposition of a debt on such imports, and adds further obligations on such imports, even if the full effect of such liability is suspended until a future liquidation date. This debt, this liability, this additional obligation imposed on listed EC imports, is evidence that the United States wanted to remedy, was 'seeking to redress', what it perceived to be a WTO violation."[1143]

(b) "recourse to, and abide by"

782. In *US – Section 301 Trade Act*, the Panel held that Article 23.1 of the *DSU* prescribes "a general duty of a dual nature":

"Article 23.1 is not concerned only with specific instances of violation. It prescribes a general duty of a dual nature. First, it imposes on all Members to 'have recourse to' the multilateral process set out in the DSU when they seek the redress of a WTO inconsistency. In these circumstances, Members have to have recourse to the DSU dispute settlement system to the exclusion of any other system, in particular a system of unilateral enforcement of WTO rights and obligations. This, what one could call 'exclusive dispute resolution clause', is an important new element of Members' rights and obligations under the DSU."[1144]

3. Article 23.2(a)

783. The Panel on *US – Section 301 Trade Act* held that a statute "which . . . reserves the right for the Member concerned to do something which it has promised *not* to do under Article 23.2(a)" is a violation of Article 23.2(a) read together with Article 23.1:

"The text of Article 23.1 is simple enough: Members are obligated generally to (a) have recourse to and (b) abide by DSU rules and procedures. These rules and procedures include most specifically in Article 23.2(a) a prohibition on making a unilateral determination of inconsistency prior to exhaustion of DSU proceedings.

. . .

[T]he very discretion granted under Section 304, which under the US argument absolves the legislation, is what, in our eyes, creates the presumptive violation. The statutory language which gives the USTR this discretion on its face precludes the US from abiding by its obligations under the WTO. In each and every case when a determination is made whilst DSU proceedings are not yet exhausted, Members locked in a dispute with the US will be subject to a mandatory determination by the USTR under a statute which explicitly puts them in that very danger which Article 23 was intended to remove.

. . .

Trade legislation, important or positive as it may be, which statutorily reserves the right for the Member concerned to do something which it has promised *not* to do under Article 23.2(a), goes, in our view, against the ordinary meaning of Article 23.2(a) read together with Article 23.1."[1145]

4. Article 23.2(c)

(a) General

784. After determining that the so-called 3 March Measure, which imposed an increased bonding requirement upon goods from the European Communities, constituted a measure taken to redress a WTO violation (see the excerpt referenced in paragraph 781 above), the Panel in *US – Certain Measures* examined whether the 3 March Measure violated Article 23.2(c) of the DSU. The Panel, in a finding not reviewed by the Appellate Body, held that "any WTO suspension of concessions or other obligations without prior DSB authorization is explicitly prohibited":

"Article 23.2(c) prohibits any suspensions of concessions or other obligations (taken as measures seeking to redress a WTO violation), prior to a relevant DSB authorization. Article 3.7 provides that suspension of concessions or other obligations should be used as a last resort, and subject to a DSB authorization. In Article 22.6, the suspension of concessions or other obligations is prohibited during the arbitration process which can only take place before the DSB authorization.

. . .

In the context of these provisions, any WTO suspension of concessions or other obligations without prior DSB

[1143] Panel Report on *US – Certain EC Products*, paras. 6.22 and 6.26.
[1144] Panel Report on *US – Section 301 Trade Act*, para. 7.43.
[1145] Panel Report on *US – Section 301 Trade Act*, paras. 7.59, 7.61 and 7.63.

authorization is explicitly prohibited. On 3 March there was no relevant DSB authorization of any sort."[1146]

(b) Relationship with other provisions of the DSU

(i) Article 3.7

785. In *US – Certain EC Products*, the Appellate Body clarified that "[t]he *obligation* of WTO Members not to suspend concessions or other obligations *without* prior DSB authorization is explicitly set out in Articles 22.6 and 23.2(c), not in Article 3.7 of the DSU". It "consider[ed], however, that if a Member has acted in breach of Articles 22.6 and 23.2(c) of the DSU, that Member has also, in view of the nature and content of Article 3.7, last sentence, necessarily acted contrary to the latter provision."[1147]

5. Relationship with other WTO Agreements

(a) SCM Agreement

786. In *Canada – Aircraft Credits and Guarantees*, the Panel recalled the prospective nature of WTO dispute settlement remedies and that such an approach was also applicable to the *SCM Agreement*:

> "In any event, even if the WTO dispute settlement mechanism does only provide for prospective remedies, we note that it does so in respect of all cases, and not only those involving prohibited export subsidies. Article 23.1 of the DSU provides that Members shall resolve all disputes through the multilateral dispute system, to the exclusion of unilateral self-help. Thus, to the extent that the WTO dispute settlement system only provides for prospective remedies, that is clearly the result of a policy choice by the WTO Membership. Given this policy choice, and given the fact that Article 23.1 of the DSU applies to all disputes, including those involving (alleged) prohibited export subsidies, we see no reason why the (allegedly) prospective nature of WTO dispute settlement remedies should impact on our interpretation of the second paragraph of item (k)."[1148]

XXIV. ARTICLE 24

A. TEXT OF ARTICLE 24

Article 24
Special Procedures Involving Least-Developed Country Members

1. At all stages of the determination of the causes of a dispute and of dispute settlement procedures involving a least-developed country Member, particular consideration shall be given to the special situation of least-developed country Members. In this regard, Members shall exercise due restraint in raising matters under these procedures involving a least-developed country Member. If nullification or impairment is found to result from a measure taken by a least-developed country Member, complaining parties shall exercise due restraint in asking for compensation or seeking authorization to suspend the application of concessions or other obligations pursuant to these procedures.

2. In dispute settlement cases involving a least-developed country Member, where a satisfactory solution has not been found in the course of consultations the Director-General or the Chairman of the DSB shall, upon request by a least-developed country Member, offer their good offices, conciliation and mediation with a view to assisting the parties to settle the dispute, before a request for a panel is made. The Director-General or the Chairman of the DSB, in providing the above assistance, may consult any source which either deems appropriate.

B. INTERPRETATION AND APPLICATION OF ARTICLE 24

No jurisprudence or decision of a competent WTO body.

XXV. ARTICLE 25

A. TEXT OF ARTICLE 25

Article 25
Arbitration

1. Expeditious arbitration within the WTO as an alternative means of dispute settlement can facilitate the solution of certain disputes that concern issues that are clearly defined by both parties.

2. Except as otherwise provided in this Understanding, resort to arbitration shall be subject to mutual agreement of the parties which shall agree on the procedures to be followed. Agreements to resort to arbitration shall be notified to all Members sufficiently in advance of the actual commencement of the arbitration process.

3. Other Members may become party to an arbitration proceeding only upon the agreement of the parties which have agreed to have recourse to arbitration. The parties to the proceeding shall agree to abide by the arbitration award. Arbitration awards shall be notified to the DSB and the Council or Committee of any relevant agreement where any Member may raise any point relating thereto.

4. Articles 21 and 22 of this Understanding shall apply *mutatis mutandis* to arbitration awards.

[1146] Panel Report on *US – Certain EC Products*, paras. 6.37–6.38.
[1147] Appellate Body Report on *US – Certain EC Products*, para. 120.
[1148] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.170.

B. INTERPRETATION AND APPLICATION OF ARTICLE 25

1. General

(a) Scope of the Arbitrators' mandate under Article 25

787. In *US – Section 110(5) Copyright Act (Article 25.3)*, the first time since the inception of the WTO that Members have had recourse to arbitration pursuant to Article 25 of the *DSU*, the Arbitrators observed that such recourse is not subject to multilateral control and that, accordingly, "it is incumbent on the Arbitrators themselves to ensure that it is applied in accordance with the rules and principles governing the WTO system":

> "The Arbitrators note that this is the first time since the establishment of the WTO that Members have had recourse to arbitration pursuant to Article 25 of the DSU.[1149] Whereas the DSB establishes panels or refers matters to other arbitration bodies, Article 25 provides for a different procedure. The parties to this dispute only had to *notify* the DSB of their recourse to arbitration. No decision is required from the DSB for a matter to be referred to arbitration under Article 25. In the absence of a multilateral control over recourse to that provision, it is incumbent on the Arbitrators themselves to ensure that it is applied in accordance with the rules and principles governing the WTO system[1150]. . . ."[1151]

(b) Jurisdiction of the Arbitrators under Article 25

788. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators were called upon to determine the level of nullification or impairment of benefits to the European Communities as a result of Section 110(5)B of the US Copyright Act. The Arbitrators considered that it was for them to determine whether they had jurisdiction to consider this issue; they concluded that they did have jurisdiction:

> "As recalled by the Appellate Body in *United States – Anti-Dumping Act of 1916,*[1152] it is a widely accepted rule that an international tribunal is entitled to consider the issue of its own jurisdiction on its own initiative. The Arbitrators believe that this principle applies also to arbitration bodies.[1153]"[1154]

(c) Burden of proof in Article 25 arbitrations

789. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators followed the rules on burden of proof applicable in Article 22.6 arbitrations as stipulated in the agreed procedures submitted by the parties. Therefore, it was for the United States, the defendant in the original panel proceedings, to provide a prima facie case that the methodology and estimates proposed by the European Communities did not accurately reflect the European Communities benefits being nullified or impaired:

> "The **Arbitrators** carefully examined the claims, arguments and evidence submitted by the parties in light of the rules on burden of proof applicable in the context of arbitrations under Article 22.6 of the DSU, as instructed by the parties. The Arbitrators were mindful of the fact that, in arbitration proceedings under Article 22.6, a party contests the level of countermeasures which the other intends to take under paragraphs 2, 3 and 4 of Article 22. It is therefore understandable that the burden be on the party that contests the level of countermeasures to make a *prima facie* demonstration that the methodology and the calculations submitted by the party intending to apply countermeasures are inconsistent with the requirements of Article 22 of the DSU. For instance, in the *European Communities – Hormones* cases, the initial burden was on the European Communities. The present case, however, was referred to the Arbitrators by both parties 'by mutual agreement'. It is arguable whether or not there is a complainant and a defendant. This said, we note that the agreed procedures submitted by the parties[1155] expressly instruct us to follow the allocation of the burden of proof applied in arbitrations under Article 22.6. We also note that the parties agreed that the European Communities would submit a methodology paper ahead of the first written submissions, as in proceedings under Article 22.6. As a result, the Arbitrators decided to allocate the burden of proof accordingly, as in an Article 22.6 case."[1156]

(d) Matters dealt under Article 25 arbitrations

(i) Nullification or impairment of benefits

General

790. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators were called on to determine the

---

[1149] (*footnote original*) The Arbitrators recall that arbitration was seldom used under GATT 1947.

[1150] (*footnote original*) In particular, the Arbitrators believe that this arbitration should not be applied so as to circumvent the provisions of Article 22.6 of the DSU (see Article 23.2(c) of the DSU).

[1151] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.1.

[1152] (*footnote original*) See the Appellate Body Report on *United States – Anti-Dumping Act of 1916*, WT/DS136/AB/R and WT/DS162/AB/R, adopted 26 September 2000, para. 54, footnote 30.

[1153] (*footnote original*) This is evidenced by Article 21 of the Optional Rules of the Permanent Court of Arbitration for arbitrations involving international organizations and States. See Permanent Court of Arbitration: Optional Rules for Arbitration involving International Organizations and States, effective 1 July 1996, International Bureau of the Permanent Court of Arbitration, The Hague, The Netherlands.

[1154] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.1.

[1155] (*footnote original*) See WT/DS160/15.

[1156] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 4.4.

level of nullification or impairment of benefits to the European Communities as a result of Section 110(5)B of the US Copyright Act. As indicated in paragraph 788 above, the Arbitrators concluded that they did have jurisdiction. The first step in their reasoning was to compare the panel procedure under the *DSU* with the Article 25 arbitration. The Arbitrators concluded that the procedure provided for in Article 25 may be considered an alternative to a panel procedure:

> "The Arbitrators first note that, pursuant to the text of Article 25.1, arbitration under Article 25 is an '*alternative* means of dispute settlement'.[1157] The term 'dispute settlement' is generally used in the WTO Agreement to refer to the complete process of dispute[1158] resolution under the DSU, not to one aspect of it, such as the determination of the level of benefits nullified or impaired as a result of a violation. It may be argued that the procedure provided for in Article 25 is actually an alternative to a panel procedure. This would seem to be confirmed by the terms of Article 25.4, which provides that 'Articles 21 and 22 of this Understanding shall apply *mutatis mutandis* to arbitration awards.'[1159] Article 22.2 itself, unlike Article 21.3(c), does not refer to arbitration as an alternative to the negotiation of mutually acceptable compensation. It could then be argued that arbitration under Article 25 is not intended for 'determin[ing] the level of nullification or impairment of benefits' to the European Communities as a result of Section 110(5)(B) of the US Copyright Act."[1160]

791. Despite their acknowledgement that an argument may be made whereby arbitration pursuant to Article 25 would be considered as not being intended for determining the level of nullification or impairment of benefits, the Arbitrators in *US – Section 110(5) Copyright Act (Article 25.3)* considered that the elements sustaining such an argument are outweighed by other elements of interpretation. The Arbitrators therefore concluded that, "pending further interpretation by the Members", they did have jurisdiction under Article 25 to determine the level of European Communities' benefits that were nullified or impaired in this case:

> "While being mindful of these elements of interpretation, the Arbitrators are of the view that they are outweighed by other elements, based on the fact that none of the provisions concerned expressly excludes recourse to arbitration under Article 25 in the particular context in which they apply. Article 25.2 itself provides that resort to arbitration shall be subject to mutual agreement of the parties which shall agree on the procedures to be followed 'except as otherwise provided in this Understanding'. Article 25 itself does not specify that recourse to Article 25 arbitration should be excluded when determining the level of nullification or impairment suffered by a Member. On the contrary, the terms of Article 25.1 referring to 'the solution of certain disputes that concern issues that are clearly defined by the parties' may support the view that Article 25 should be understood as an arbitration mechanism to which Members may have recourse whenever necessary within the WTO framework. We also note that Article 22.2 refers to 'negotiations [. . .] with a view to developing mutually acceptable compensation.' There is no language in that provision which would make it impossible to consider arbitration as a means of reaching a mutually acceptable compensation.
>
> Moreover, recourse to Article 25 arbitration in the present situation is fully consistent with the object and purpose of the DSU. Arbitration is likely to contribute to the prompt settlement of a dispute between Members, as commanded by Article 3.3 of the DSU. Indeed, it may facilitate the resolution of a divergence in the context of a negotiation of compensations, thus paving the way to implementation without suspension of concessions or other obligations.
>
> In general, recourse to arbitration under Article 25 strengthens the dispute resolution system by complementing negotiation under Article 22.2. The possibility for the parties to a dispute to seek arbitration in relation to the negotiation of compensation operates to increase the effectiveness of that option under Article 22.2. Incidentally, the Arbitrators note that compensation, in their opinion, is always to be preferred to countermeasures of any sort, since it enhances trade instead of restricting or diverting it. Finally, such an application of Article 25 does not, at least in the case at hand, affect the rights of other Members under the DSU.[1161]
>
> Having regard to the object of the arbitration requested by the parties and the fact that the rights of other Members under the DSU are not affected by the decision of the European Communities and the United States to seek arbitration under Article 25, the Arbitrators are of the view that, pending further interpretation by the

[1157] (*footnote original*) Emphasis added.

[1158] (*footnote original*) In a note by the GATT Secretariat on Concept, Forms and Effects of Arbitration (MTN.GNG/NG13/W/20, 22 February 1988), the term "dispute" is defined as a specific disagreement concerning a matter of fact, law or policy in which a claim or assertion by one party is met with refusal, counter-claim or denial by another.

[1159] (*footnote original*) The text of Article 25 of the DSU is essentially identical to that of paragraphs 1, 2 and 3 of Section E of the 1989 Decision on improvements to the GATT dispute settlement procedures (BISD 36S/63). It is worth noting that, in that Decision, Section E follows other sections on means of resolution of disputes, such as consultations (Section C) and good offices, conciliation and mediation (Section D). Moreover, GATT 1947 did not provide for the sophisticated means of enforcement found in the DSU. The note MTN.GNG/NG13/W/20 of 22 February 1988, referred to above, also presents arbitration "as an alternative to the normal dispute settlement process" (para. 12) or "as an alternative to panel proceedings" (para. 17).

[1160] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.3.

[1161] (*footnote original*) As a matter of fact, it may affect them positively, given the *erga omnes* character of compensation.

Members, they should declare that they have jurisdiction under Article 25 to determine the level of EC benefits which are being nullified or impaired in this case.[1162]" [1163]

Nature of the benefits nullified or impaired

792. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators agreed with the parties that, for the purpose of the arbitration proceeding, the relevant benefits were those which were economic in nature:

"In their submissions to the Arbitrators, the parties have focused on this type of benefit accruing to copyright holders. The Arbitrators concur with the parties that, for purposes of these arbitration proceedings, the relevant benefits are those which are economic in nature.[1164] This is consistent with previous decisions of arbitrators acting under Article 22.6 of the DSU.[1165] Moreover, like the parties to this dispute, the Arbitrators will proceed on the assumption that the licensing royalties realizable by copyright holders constitute an adequate measure of the economic benefits arising from Articles 11*bis*(1)(iii) and 11(1)(ii)." [1166]

Benefits denied to a WTO Member

793. The Arbitrators in *US – Section 110(5) Copyright Act (Article 25.3)* stated that their task was to assess the level of nullification or impairment of the benefits denied to the European Communities rather than determining the benefits denied to European Communities' right holders:

"Accordingly, the Arbitrators will, in this case, assess the level of EC benefits which Section 110(5)(B) is nullifying or impairing in terms of the royalty income foregone by EC right holders. In making this observation, the Arbitrators are aware that their task in this case is to determine the benefits which are denied to the *European Communities* rather than determining the benefits which are denied to *EC right holders*. However, there can be no question that the benefits which are denied to the European Communities include the benefits which are denied to EC right holders.[1167] What is more, the European Communities has not made out a claim to the effect that Section 110(5)(B) is nullifying or impairing benefits additional to those which EC right holders could otherwise derive from Articles 11*bis*(1)(iii) and 11(1)(ii). As a result, it is appropriate, for the purposes of these proceedings, to determine the level of EC benefits which Section 110(5)(B) is nullifying or impairing in terms of the benefits foregone by EC right holders." [1168]

Point in time to assess the level of nullification or impairment

794. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators assumed that the parties wanted an assessment of the level of benefits nullified or impaired on the date the matter was referred to arbitration, disregarding the rules established in Article 22.6 of the *DSU*:

"The Arbitrators note that they have been appointed under Article 25 of the DSU. As a result, they do not feel

[1162] (*footnote original*) The Arbitrators' recognition of their jurisdiction in this case is not a unilateral extension of WTO jurisdiction, since it is dependent on the agreement of the parties to a dispute to have recourse to Article 25 of the DSU. This decision is without prejudice to the DSU compatibility of the decision of the parties to accept this award as the level of nullification or impairment for the purpose of any further proceedings under Article 22 of the DSU in relation to this case. It is also without prejudice to any interpretation of the provisions of Articles 22 and 25 of the DSU by the Ministerial Conference or the General Council.

[1163] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, paras. 2.4–2.7.

[1164] (*footnote original*) This view is based on the object of the present proceedings, which is to quantify the economic harm suffered by the European Communities as a consequence of the continued application of Section 110(5)(B). It does not necessarily follow that Members having recourse to Article 64 of the TRIPS Agreement need to establish nullification or impairment of *economic* benefits accruing to them under the TRIPS Agreement. The Arbitrators find support for their view in the following statement by the arbitrators in *European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU*: "[A] Member's potential interests in trade in goods or services and its interest in a determination of rights and obligations under the WTO Agreements are each sufficient to establish a right to pursue a WTO dispute settlement proceeding. However, a Member's legal interest in compliance by other Members does not, in our view, automatically imply that it is entitled to obtain authorization to suspend concessions under Article 22 of the DSU." See the Decision by the Arbitrators on *European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* (hereafter "*EC – Bananas III (22.6) (US)*"), WT/DS27/ARB, 9 April 1999, para. 6.10.

[1165] (*footnote original*) See, e.g., the Decisions by the Arbitrators on *EC – Bananas III (22.6) (US)*, *supra*, para. 6.12 (benefits nullified or impaired: losses in US exports of goods and losses by US service suppliers in services supply); *European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU*, WT/DS27/ARB/ECU, 24 March 2000, footnote 52 (benefits nullified or impaired: losses by Ecuador of actual trade and of potential trade opportunities in bananas and the loss of actual and potential distribution service supply); *European Communities – Measures Concerning Meat and Meat Products (Hormones) – Original Complaint by the United States – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* (hereafter "*EC – Hormones (22.6) (US)*"), WT/DS26/ARB, 12 July 1999, para. 41 (benefits nullified or impaired: foregone US exports of hormone-treated beef and beef products); *European Communities – Measures Concerning Meat and Meat Products (Hormones) – Original Complaint by Canada – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* (hereafter "*EC – Hormones (22.6) (Canada)*"), WT/DS48/ARB, 12 July 1999, para. 40 (benefits nullified or impaired: foregone Canadian exports of hormone-treated beef and beef products).

[1166] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 3.18.

[1167] (*footnote original*) Indeed, as already pointed out, the rights set forth in Articles 11*bis*(1)(iii) and 11(1)(ii) must, in conformity with the provisions of Article 1.3 of the TRIPS Agreement, be granted to EC right holders.

[1168] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 3.19.

constrained by a number of obligations imposed on arbitrators in Article 22.6 proceedings. Unlike Article 22.6, which closely relates to compliance (or absence thereof) at the end of the reasonable period of time, Article 25 is silent as to the date on which a matter referred to arbitration should be assessed. However, the Arbitrators are aware that they are not called upon to consider the level of EC benefits which may still be nullified or impaired after the end of the implementation period, but to consider the level of EC benefits which are being nullified or impaired as a result of the current application of Section 110(5)(B).[1169] General practice under the DSU has been to consider the facts of a case as at the date of establishment of the panel. In the absence of any specification in our mandate, we believe that it should be assumed that the parties wanted us to assess the level of benefits nullified or impaired on the date the matter was referred to us. In other words, we must determine the level of nullification or impairment of EC benefits over a one-year period ending as closely as possible to 23 July 2001.[1170]"[1171]

(e) Right to seek and disregard information

795. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators disregarded the information they had requested from a United States' collective management organization because certain conditions were attached to the use of such information. See paragraph 424 above.

(f) Treatment of confidential information

796. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators decided that, in the absence of specific requests from the parties as to how confidentiality of business confidential information should be preserved, they would, in general, rely on the relevant practice of the Appellate Body:

"In the absence of specific requests from the parties as to how confidentiality of business confidential information should be preserved, the Arbitrators will rely generally on the practice of the Appellate Body on this matter.[1172] To the extent that confidential information may appear as such in the award in order to support the findings of the Arbitrators, the Arbitrators decided that two versions of the award would be prepared. One, for the parties, would contain all the information used in support of the determinations of the Arbitrators. The other, which would be circulated to all Members, would be edited so as not to include the information for which, after consultation with the parties, the Arbitrators would conclude that confidentiality for business reasons was sufficiently warranted. The information which the Arbitrators would consider to be business confidential would be replaced by 'x'.[1173]"[1174]

2. Article 25.1

(a) "expeditious arbitration . . . as an alternative means of dispute settlement"

797. In *US – Certain EC Products*, the Panel noted that Article 25 of the *DSU* provides for arbitration as a means of adjudicating WTO related disputes. The Panel stated that:

"[A]lthough the panel (and Appellate Body) process is the most commonly used WTO dispute settlement procedure, Article 25 of the DSU, for example, explicitly provides for arbitration as a means of adjudicating WTO related disputes. Article 25.4 provides for the applicability of Articles 21 and 22 of the DSU to the results of such arbitration. There is no reason why the WTO assessment of the compatibility of an implementing measure could not be determined by an Article 25 arbitration, as one of the WTO dispute settlement procedures."[1175]

798. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators noted that an Article 25 arbitration is an alternative means of dispute settlement and considered that an Article 25 arbitration procedure arguably "is actually an alternative to a panel procedure".[1176] See paragraph 787 above.

(b) Differences compared with panel proceedings

799. Also in *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators observed that whereas the DSB

[1169] (*footnote original*) This seems to imply that the level of nullification or impairment that the Arbitrators will assess in this case may be different from that which may exist after the end of the reasonable period of time. This implies further that the amount which will be determined by the Arbitrators may not dispense the parties from an Article 22.6 arbitration.

[1170] (*footnote original*) The reason for the choice of a yearly basis is essentially because compensations or suspensions of concessions or other obligations have been so far calculated on a twelve-month basis.

[1171] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 4.19.

[1172] (*footnote original*) See, in particular, the Appellate Body Report on *Canada – Measures Affecting the Export of Civilian Aircraft*, WT/DS70/AB/R, adopted 20 August 1999, paras. 141–147.

[1173] (*footnote original*) This approach was used in one Article 22.6 arbitration and does not seem to have met with objections in the DSB. See the Decision by the Arbitrators on *Brazil – Export Financing Programme for Aircraft – Recourse to Arbitration by Brazil under Article 22.6 of the DSU and Article 4.11 of the SCM Agreement* (hereafter "*Brazil – Aircraft (22.6)*"), WT/DS46/ARB, 28 August 2000, para. 2.14.

[1174] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 1.24.

[1175] Panel Report on *US – Certain EC Products*, para. 6.119. The elaboration made by the Panel in this case regarding the mandate of arbitrators appointed under Article 22.6 of the DSU based upon its interpretation of Articles 21.5 and 25 of the DSU was later dismissed by the Appellate Body on the grounds that the Panel's statements relate to a measure which was outside its terms of reference. Appellate Body Report on *US – Certain EC Products*, paras. 89–90.

[1176] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.3.

establishes panels or refers matters to other arbitration bodies, under Article 25 proceedings, the parties only had to notify the DSB of their recourse to arbitration. See paragraph 787 above.

3. Article 25.2

(a) Arbitration under Article 25 should only be excluded when expressly provided

800. In *US – Section 110(5) Copyright Act*, the Arbitrators, when deciding whether they were competent to assess the level of nullification or impairment (see paragraphs 790–794 above), noted that "none of the provisions concerned expressly excludes recourse to arbitration under Article 25 in the particular context in which they apply. Article 25.2 itself provides that resort to arbitration shall be subject to mutual agreement of the parties which shall agree on the procedures to be followed 'except as otherwise provided in this Understanding'."[1177]

4. Article 25.4

(a) General

801. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators noted that the nature of an Article 25 arbitration as an alternative to the panel procedure (see paragraph 798 above), "would seem to be confirmed by the terms of Article 25.4, which provides that 'Articles 21 and 22 of this Understanding shall apply *mutatis mutandis* to arbitration awards'[1178]."[1179]

(b) "Articles 21 and 22 . . . . shall apply *mutatis mutandis*"

802. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators indicated that "they [did] not feel constrained by a number of obligations imposed on arbitrators in Article 22.6 proceedings". See paragraph 794 above.

5. Relationship with other Articles

(a) Article 3.3

803. In *US – Section 110(5) Copyright Act*, the Arbitrators considered that the recourse to Article 25 arbitration in that case was fully consistent with the object and purpose of the *DSU* since the arbitration at issue was likely to contribute to the prompt settlement of a dispute between the European Communities and the United States, as commanded by Article 3.3 of the *DSU*:

> "Moreover, recourse to Article 25 arbitration in the present situation is fully consistent with the object and purpose of the DSU. Arbitration is likely to contribute to the prompt settlement of a dispute between Members, as commanded by Article 3.3 of the DSU. Indeed, it may facilitate the resolution of a divergence in the context of a negotiation of compensations, thus paving the way to implementation without suspension of concessions or other obligations."[1180]

(b) Article 21

804. With respect to the relationship with Article 21, see paragraphs 790, 797, and 801 above.

(c) Article 22.2

805. With respect to the relationship with Article 22.2, see paragraphs 790, 791, 797, and 801 above.

(d) Article 22.6

806. With respect to the relationship between Article 25 arbitrations and Article 22.6, see paragraphs 789, 792, 794 and 802 above.

XXVI. ARTICLE 26

A. TEXT OF ARTICLE 26

Article 26

1. *Non-Violation Complaints of the Type Described in Paragraph 1(b) of Article XXIII of GATT 1994*

Where the provisions of paragraph 1(b) of Article XXIII of GATT 1994 are applicable to a covered agreement, a panel or the Appellate Body may only make rulings and recommendations where a party to the dispute considers that any benefit accruing to it directly or indirectly under the relevant covered agreement is being nullified or impaired or the attainment of any objective of that Agreement is being impeded as a result of the application by a Member of any measure, whether or not it conflicts with the provisions of that Agreement. Where and to the extent that such party considers and a panel or the Appellate Body determines that a case concerns a measure that does not conflict with the provisions of a covered agreement to which the provisions of paragraph 1(b) of Article XXIII of GATT 1994 are applicable, the procedures in this Understanding shall apply, subject to the following:

[1177] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.4.

[1178] (*footnote original*) The text of Article 25 of the DSU is essentially identical to that of paragraphs 1, 2 and 3 of Section E of the 1989 Decision on improvements to the GATT dispute settlement procedures (BISD 36S/63). It is worth noting that, in that Decision, Section E follows other sections on means of resolution of disputes, such as consultations (Section C) and good offices, conciliation and mediation (Section D). Moreover, GATT 1947 did not provide for the sophisticated means of enforcement found in the DSU. The note MTN.GNG/NG13/W/20 of 22 February 1988, referred to above, also presents arbitration "as an alternative to the normal dispute settlement process" (para. 12) or "as an alternative to panel proceedings" (para. 17).

[1179] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.3.

[1180] Award of the Arbitrators on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 2.5.

(a) the complaining party shall present a detailed justification in support of any complaint relating to a measure which does not conflict with the relevant covered agreement;

(b) where a measure has been found to nullify or impair benefits under, or impede the attainment of objectives, of the relevant covered agreement without violation thereof, there is no obligation to withdraw the measure. However, in such cases, the panel or the Appellate Body shall recommend that the Member concerned make a mutually satisfactory adjustment;

(c) notwithstanding the provisions of Article 21, the arbitration provided for in paragraph 3 of Article 21, upon request of either party, may include a determination of the level of benefits which have been nullified or impaired, and may also suggest ways and means of reaching a mutually satisfactory adjustment; such suggestions shall not be binding upon the parties to the dispute;

(d) notwithstanding the provisions of paragraph 1 of Article 22, compensation may be part of a mutually satisfactory adjustment as final settlement of the dispute.

2. *Complaints of the Type Described in Paragraph 1(c) of Article XXIII of GATT 1994*

Where the provisions of paragraph 1(c) of Article XXIII of GATT 1994 are applicable to a covered agreement, a panel may only make rulings and recommendations where a party considers that any benefit accruing to it directly or indirectly under the relevant covered agreement is being nullified or impaired or the attainment of any objective of that Agreement is being impeded as a result of the existence of any situation other than those to which the provisions of paragraphs 1(a) and 1(b) of Article XXIII of GATT 1994 are applicable. Where and to the extent that such party considers and a panel determines that the matter is covered by this paragraph, the procedures of this Understanding shall apply only up to and including the point in the proceedings where the panel report has been circulated to the Members. The dispute settlement rules and procedures contained in the Decision of 12 April 1989 (BISD 36S/61–67) shall apply to consideration for adoption, and surveillance and implementation of recommendations and rulings. The following shall also apply:

(a) the complaining party shall present a detailed justification in support of any argument made with respect to issues covered under this paragraph;

(b) in cases involving matters covered by this paragraph, if a panel finds that cases also involve dispute settlement matters other than those covered by this paragraph, the panel shall circulate a report to the DSB addressing any such matters and a separate report on matters falling under this paragraph.

B. INTERPRETATION AND APPLICATION OF ARTICLE 26

1. Article 26.1

(a) "detailed justification in support of any complaint"

807. In *Japan – Film*, the Panel examined the issue of which party bears the burden of proof in a claim involving non-violation under Article 26.1 of the *DSU*. The Panel stated:

> "In a case of non-violation nullification or impairment pursuant to Article XXIII:1(b), Article 26.1(a) of the DSU and GATT jurisprudence confirm that this is an exceptional remedy for which the complaining party bears the burden of providing a *detailed justification* to back up its allegations.
>
> . . .
>
> Consistent with the explicit terms of the DSU and established WTO/GATT jurisprudence, and recalling the Appellate Body ruling that 'precisely how much and precisely what kind of evidence will be required to establish . . . a presumption [that what is claimed is true] will necessarily vary from . . . provision to provision', we thus consider that the United States, with respect to its claim of non-violation nullification or impairment under Article XXIII:1(b), bears the burden of providing a detailed justification for its claim in order to establish a presumption that what is claimed is true. It will be for Japan to rebut any such presumption."[1181]

808. In *EC – Asbestos*, the Panel confirmed that "[w]here the application of Article XXIII:1(b) is concerned, Article 26.1(a) of the Understanding and panel practice in the context of the WTO Agreement and the GATT 1947 confirm that this is an exceptional course of action requiring the complaining party to carry the burden of presenting a detailed justification in support of its complaint".[1182] The Panel further stated that "because of the importance conferred on them *a priori* by the GATT 1994, as compared with the rules governing international trade, situations that fall under Article XX justify a stricter burden of proof being applied in this context to the party invoking Article XXIII:1(b), particularly with regard to the existence of legitimate expectations and whether or not the initial Decree could be reasonably anticipated".[1183]

[1181] Panel Report on *Japan – Film*, paras. 10.30 and 10.32.
[1182] Panel Report on *EC – Asbestos*, para. 8.275.
[1183] Panel Report on *EC – Asbestos*, para. 8.282.

2. Jurisprudence under Article XXIII:1(b)

809. With respect to panel and Appellate Body reports on claims brought under Article XXIII:1(b), see Section XXIV.B.2 of the Chapter on the *GATT 1994*.

C. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Article XXIII:1(a) of the GATT 1994

810. With respect to the relationship between Article XXIII:1(a) and Article XXIII:1(b) of the *GATT 1994*, see Section XXIV.B.1(a) of the Chapter on the *GATT 1994*.

2. Article XXIII:1(b) of the GATT 1994

811. With respect to the issue of non-violation, see Section XXIV.B.2(a) of the Chapter on the *GATT 1994*.

XXVII. ARTICLE 27

A. TEXT OF ARTICLE 27

Article 27
Responsibilities of the Secretariat

1. The Secretariat shall have the responsibility of assisting panels, especially on the legal, historical and procedural aspects of the matters dealt with, and of providing secretarial and technical support.

2. While the Secretariat assists Members in respect of dispute settlement at their request, there may also be a need to provide additional legal advice and assistance in respect of dispute settlement to developing country Members. To this end, the Secretariat shall make available a qualified legal expert from the WTO technical cooperation services to any developing country Member which so requests. This expert shall assist the developing country Member in a manner ensuring the continued impartiality of the Secretariat.

3. The Secretariat shall conduct special training courses for interested Members concerning these dispute settlement procedures and practices so as to enable Members' experts to be better informed in this regard.

B. INTERPRETATION AND APPLICATION OF ARTICLE 27

No jurisprudence or decision of a competent WTO body.

XXVIII. APPENDIX 1: AGREEMENTS COVERED BY THE DSU

A. TEXT OF APPENDIX 1

APPENDIX 1
AGREEMENTS COVERED BY THE UNDERSTANDING

(A) Agreement Establishing the World Trade Organization

(B) Multilateral Trade Agreements

Annex 1A: Multilateral Agreements on Trade in Goods

Annex 1B: General Agreement on Trade in Services

Annex 1C: Agreement on Trade-Related Aspects of Intellectual Property Rights

Annex 2: Understanding on Rules and Procedures Governing the Settlement of Disputes

(C) Plurilateral Trade Agreements

Annex 4: Agreement on Trade in Civil Aircraft
Agreement on Government Procurement
International Dairy Agreement
International Bovine Meat Agreement

The applicability of this Understanding to the Plurilateral Trade Agreements shall be subject to the adoption of a decision by the parties to each agreement setting out the terms for the application of the Understanding to the individual agreement, including any special or additional rules or procedures for inclusion in Appendix 2, as notified to the DSB.

B. INTERPRETATION AND APPLICATION OF APPENDIX 1

812. As regards the concept of "covered agreements", see paragraphs 1–5 above.

XXIX. APPENDIX 2: SPECIAL OR ADDITIONAL DISPUTE SETTLEMENT RULES AND PROCEDURES

A. TEXT OF APPENDIX 2

APPENDIX 2
SPECIAL OR ADDITIONAL RULES AND PROCEDURES CONTAINED IN THE COVERED AGREEMENTS

Agreement	*Rules and Procedures*
Agreement on the Application of Sanitary and Phytosanitary Measures	11.2
Agreement on Textiles and Clothing	2.14, 2.21, 4.4, 5.2, 5.4, 5.6, 6.9, 6.10, 6.11, 8.1 through 8.12
Agreement on Technical Barriers to Trade	14.2 through 14.4, Annex 2
Agreement on Implementation of Article VI of GATT 1994	17.4 through 17.7
Agreement on Implementation of Article VII of GATT 1994	19.3 through 19.5, Annex II.2(f), 3, 9, 21
Agreement on Subsidies and Countervailing Measures	4.2 through 4.12, 6.6, 7.2 through 7.10, 8.5, footnote 35, 24.4, 27.7, Annex V
General Agreement on Trade in Services	XXII:3, XXIII:3
Annex on Financial Services	4
Annex on Air Transport Services	4
Decision on Certain Dispute Settlement Procedures for the GATS	1 through 5

The list of rules and procedures in this Appendix includes provisions where only a part of the provision may be relevant in this context.

Any special or additional rules or procedures in the Plurilateral Trade Agreements as determined by the competent bodies of each agreement and as notified to the DSB.

B. INTERPRETATION AND APPLICATION OF APPENDIX 2

813. With respect to the interpretation and application of Article 1.2 of the *DSU*, setting forth the rules applying to the "special or additional rules and procedures", see paragraphs 6–10 above.

XXX. APPENDIX 3: PANEL WORKING PROCEDURES

A. TEXT OF APPENDIX 3

APPENDIX 3
WORKING PROCEDURES

1. In its proceedings the panel shall follow the relevant provisions of this Understanding. In addition, the following working procedures shall apply.

2. The panel shall meet in closed session. The parties to the dispute, and interested parties, shall be present at the meetings only when invited by the panel to appear before it.

3. The deliberations of the panel and the documents submitted to it shall be kept confidential. Nothing in this Understanding shall preclude a party to a dispute from disclosing statements of its own positions to the public. Members shall treat as confidential information submitted by another Member to the panel which that Member has designated as confidential. Where a party to a dispute submits a confidential version of its written submissions to the panel, it shall also, upon request of a Member, provide a non-confidential summary of the information contained in its submissions that could be disclosed to the public.

4. Before the first substantive meeting of the panel with the parties, the parties to the dispute shall transmit to the panel written submissions in which they present the facts of the case and their arguments.

5. At its first substantive meeting with the parties, the panel shall ask the party which has brought the complaint to present its case. Subsequently, and still at the same meeting, the party against which the complaint has been brought shall be asked to present its point of view.

6. All third parties which have notified their interest in the dispute to the DSB shall be invited in writing to present their views during a session of the first substantive meeting of the panel set aside for that purpose. All such third parties may be present during the entirety of this session.

7. Formal rebuttals shall be made at a second substantive meeting of the panel. The party complained against shall have the right to take the floor first to be followed by the complaining party. The parties shall submit, prior to that meeting, written rebuttals to the panel.

8. The panel may at any time put questions to the parties and ask them for explanations either in the course of a meeting with the parties or in writing.

9. The parties to the dispute and any third party invited to present its views in accordance with Article 10 shall make available to the panel a written version of their oral statements.

10. In the interest of full transparency, the presentations, rebuttals and statements referred to in paragraphs 5 to 9 shall be made in the presence of the parties. Moreover, each party's written submissions, including any comments on the descriptive part of the report and responses to questions put by the panel, shall be made available to the other party or parties.

11. Any additional procedures specific to the panel.

12. Proposed timetable for panel work:

(a)	Receipt of first written submissions of the parties:		
	(1) complaining Party:	_____	3–6 weeks
	(2) Party complained against:	_____	2–3 weeks
(b)	Date, time and place of first substantive meeting with the parties; third party session:	_____	1–2 weeks
(c)	Receipt of written rebuttals of the parties:	_____	2–3 weeks
(d)	Date, time and place of second substantive meeting with the parties:	_____	1–2 weeks
(e)	Issuance of descriptive part of the report to the parties:	_____	2–4 weeks
(f)	Receipt of comments by the parties on the descriptive part of the report:	_____	2 weeks
(g)	Issuance of the interim report, including the findings and conclusions, to the parties:	_____	2–4 weeks
(h)	Deadline for party to request review of part(s) of report:	_____	1 week
(i)	Period of review by panel, including possible additional meeting with parties:	_____	2 weeks
(j)	Issuance of final report to parties to dispute:	_____	2 weeks
(k)	Circulation of the final report to the Members:	_____	3 weeks

The above calendar may be changed in the light of unforeseen developments. Additional meetings with the parties shall be scheduled if required.

B. INTERPRETATION AND APPLICATION OF APPENDIX 3

1. General

(a) Appendix 3 and the panel's margin of discretion

814. The Appellate Body on *EC – Hormones* held that panels, under the *DSU*, enjoy a margin of discretion to deal with situations that "are not explicitly regulated":

> "[T]he DSU, and in particular its Appendix 3, leave panels a margin of discretion to deal, always in accordance with due process, with specific situations that may arise in a particular case and that are not explicitly regulated. Within this context, an appellant requesting the Appellate Body to reverse a panel's ruling on matters of procedure must demonstrate the prejudice generated by such legal ruling."[1184]

815. The Appellate Body on *EC – Hormones* stated that it agreed with the Panel's exercise of its margin of discretion when it allowed the United States to participate in the second substantive meeting of the proceedings initiated by Canada in the same dispute.[1185] With respect to "enhanced" third-party rights, see paragraphs 312–317 above.

816. In *India – Patents (US)*, the Appellate Body examined the Panel's decision at the outset of the first substantive meeting – "that all legal claims would be considered if they were made prior to the end of that meeting; and this ruling was accepted by both parties". The Appellate Body, in being called upon to determine whether the Panel had exceeded its terms of reference, stated:

> "We do not find this statement . . . consistent with the letter and the spirit of the DSU. Although panels enjoy some discretion in establishing their own working procedures, this discretion does not extend to modifying the substantive provisions of the DSU. To be sure, Article 12.1 of the DSU says: 'Panels shall follow the Working Procedures in Appendix 3 unless the panel decides otherwise after consulting the parties to the dispute'. Yet that is *all* that it says. Nothing in the DSU gives a panel the authority either to disregard or to modify other explicit provisions of the DSU."[1186]

817. The Panel in *EC – Tariff Preferences* addressed the issue of the joint representation of India, the complaining party and Paraguay, a third party, by the same legal counsel, the Advisory Centre of WTO Law (AWCL). The Panel stated that "flowing from its terms of reference and from the requirement . . . pursuant to Article 12 of

[1184] Appellate Body Report on *EC – Hormones*, fn. 138.
[1185] Appellate Body Report on *EC – Hormones*, para. 154.
[1186] Appellate Body Report on *India – Patents (US)*, para. 92.

the DSU, to determine and administer its Working Procedures, the Panel has the inherent authority – and, indeed, the duty – to manage the proceeding in a manner guaranteeing due process to all parties involved in the proceeding and to maintain the integrity of the dispute settlement system". As regards the Panel's conclusion on conflict of interest, see Section XXXVI.E.3 below.

(b) Working procedures as a means to ensure due process

818. In this respect, see Section XXXVI.B.1 below.

2. Paragraph 3: non-confidential versions of written submissions

819. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among other issues, the Panel dealt with the United States' request to require production of non-confidential versions of written submissions within 14 days following the filing of the written submissions. In this respect, see paragraph 484 above.

3. Paragraph 11: additional procedures

(a) Separate reports

820. As regards the issuance of separate reports in panel proceedings with two or more complainants, see Article 9.2 (Section IX.B.1 above).

(b) Composition of parties' delegations

821. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel's Working Procedures included a paragraph 13 providing that the parties and third parties had the right to determine the composition of their own delegations:

> "The parties and third parties to this proceeding have the right to determine the composition of their own delegations. Delegations may include, as representatives of the government concerned, private counsel and advisers. The parties and third parties shall have responsibility for all members of their delegations and shall ensure that all members of their delegations, as well as any other advisors consulted by a party or third party, act in accordance with the rules of the DSU and the working procedures of this Panel, particularly in regard to confidentiality of the proceedings. Parties shall provide a list of the participants of their delegation before or at the beginning of the meeting with the Panel."[1187]

(c) Business confidential information (BCI)

822. As regards procedures concerning BCI, see Section XVIII.B.1(c) above.

(d) Preliminary rulings

(i) General

823. It is often the case that the parties to a dispute raise preliminary objections in panel and Appellate Body proceedings. Section XXXVI.C below is concerned with the issues arising from this procedural issue.

(ii) Procedures

824. In *EC – Tube or Pipe Fittings*, the Panel's Working Procedures provided that preliminary rulings must be requested not later than the first written submission, but that exceptions could be made upon showing of "good cause". The European Communities requested the Panel to make a preliminary ruling rejecting a number of exhibits submitted by Brazil during the first substantive meeting on the grounds that they did not form part of the record of the underlying investigation. The Panel noted that, as Brazil submitted these exhibits in conjunction with its oral statement at the first meeting, which meant that the European Communities was not in a position to make a preliminary objection in its first written submission, good cause existed for enabling the Panel to consider the merits of the European Communities request for a preliminary ruling.[1188]

825. In *Canada – Wheat Exports and Grain Imports*, the Panel gave the United States an opportunity to provide preliminary written submissions in response to Canada's earlier preliminary submissions. At the request of Canada, the Panel also scheduled a preliminary hearing. The panel also decided to invite the third parties to participate in the preliminary proceedings.[1189]

(e) Participation of third parties in preliminary ruling proceedings

826. In *Canada – Wheat Exports and Grain Imports*, the Panel, in a preliminary ruling, decided to grant third parties the possibility to participate in the proceedings regarding preliminary rulings requested by Canada concerning the consistency of the United States' panel request with Article 6.2 of the DSU and Canada's request for the adoption of specific procedures for the protection of proprietary or commercially sensitive information. As regards the specific rights granted to the third parties, see paragraph 935 below. The Panel

[1187] This paragraph is quoted in paragraph 3.7 of the Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*. With respect to the discussion on confidentiality implications of disclosing submissions to non-government members of the parties' delegations, see paras. 491–493.

[1188] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.37–7.40.

[1189] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.6.

thus amended paragraph 6 of its Working Procedures as follows:

> "The third parties shall be invited in writing to present their views during a session of the preliminary hearing of the Panel set aside for that purpose as well as during a session of the first substantive meeting of the Panel set aside for that purpose. The third parties may be present during the entirety of these sessions."[1190]

(f) Executive summaries

827. In *US – Line Pipe*, the Working Procedures of the Panel requested the parties to present executive summaries of the claims and arguments contained in their written submissions and oral presentations.[1191] The parties presented various arguments in connection with the issue of confidential information. Those arguments were summarized in the parties' executive summaries of their submissions and oral statements and were included in the relevant sections of the Panel's report. In its comments on the descriptive part of the report, Korea requested the Panel to include as an annex to the Panel report a copy of their non-summarized closing oral statement made at the second substantive meeting, addressing the issue of confidential information and use of judicial economy. The Panel declined Korea's request on the grounds that Korea's closing statement formed part of their oral statement at the second substantive meeting and that, accordingly, any arguments presented therein should have been included in its executive summary of that oral statement. Nevertheless, the Panel clarified that all the communications and submissions of the parties formed part of the record of this proceeding, and were duly considered by the Panel.[1192]

828. In *EC – Tube or Pipe Fittings*, the Panel's Working Procedures requested the parties to submit an executive summary of the claims and arguments contained in their written submissions and oral presentations.[1193] In its comments on the descriptive part of the Panel Report, Brazil requested that the complete text of its first and second submissions, rather than Brazil's executive summaries thereof, be included in Annexes A and C respectively of the Report. The Panel rejected this request as follows:

> "This paragraph [of the Working Procedures] makes it clear that we are to use the executive summaries only for the purpose of assisting us in drafting a concise arguments section of the Panel Report so as to facilitate timely translation and circulation of the Panel Report to the Members. The rationale of this paragraph is to facilitate our production of a concise and timely descriptive part and not to attach the entire written submissions and statements of the parties. We find no substantiation for Brazil's assertion that other panels that have adopted a similar paragraph in their working procedures have also nevertheless attached the parties' entire written submissions to their reports. Indeed, this would seem to us to defeat the purpose of adopting the 'executive summary approach' in the first place.
>
> Second, the attachment of executive summaries to our report also leaves the parties in control of the contents of the executive summaries and enables them to set forth their most important arguments as they wish to set these forth. Each party has the obligation and the discretion to ensure that its own executive summaries of its own submissions accurately reflects its claims and arguments. Neither party requested us to increase the page limits referred to in our Working Procedures.
>
> Third, we adopted these Working Procedures after hearing the views of the parties, at which time Brazil expressed no objection to the formulation in paragraph 16 of the Working Procedures. We decided at the outset to follow the 'executive summaries approach' for these Panel proceedings. Having adopted this approach at the outset, we do not consider that it would beneficial, at this rather advanced stage in the proceedings, to adopt Brazil's suggested approach of attaching its full first and second submissions. Our adoption of such an approach at this stage would result in significant further delays in issuing our Report, particularly in view of the lengthy nature of these submissions (totalling over 370 pages). This would impose a considerable translation burden, adding to the burden already being borne due to the operation of the WTO dispute settlement system generally. There would also be an incongruity if the full EC submissions were not also attached, which, if we were to address by taking the requisite procedural steps and

---

[1190] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.6.

[1191] Paragraph 16 of the Panel's Working procedures provided:

> "The parties shall provide the Panel with an executive summary of the claims and arguments contained in their written submissions and oral presentations. These executive summaries will be used by the Panel only for the purpose of assisting the Panel in drafting a concise arguments section of the Panel report so as to facilitate timely translation and circulation of the Panel report to the Members. They shall not serve in any way as a substitute for the submissions of the parties."

Panel Report on *US – Line Pipe*, footnote 25.

[1192] Panel Report on *US – Line Pipe*, footnote 25.

[1193] Paragraph 16 of the Panel's Working procedures provided:

> "The parties shall provide the Panel with an executive summary of the claims and arguments contained in their written submissions and oral presentations. These executive summaries will be used by the Panel only for the purpose of assisting the Panel in drafting a concise arguments section of the Panel report so as to facilitate timely translation and circulation of the Panel report to the Members. They shall not serve in any way as a substitute for the submissions of the parties. The summaries of the first written submission and rebuttal written submission shall be limited to 10 pages and the summaries of the oral statements at the meeting will be limited to 5 pages. Summaries shall be submitted to the Secretariat within seven days of the original submission concerned."

Panel Report on *EC – Tube or Pipe Fittings*, para. 7.50.

then by annexing the EC submissions, would augment the translation burden. We find particularly salient, in this respect, Article 12.2 of the *DSU*, which provides:

> "Panel procedures should provide sufficient flexibility so as to ensure high-quality panel reports, *while not unduly delaying the panel process*." (emphasis added)

Fourth, as our Working Procedures also make clear, in no way are the executive summaries to substitute for the parties' submissions. In the course of our examination of the parties' claims and arguments in these proceedings, we have read and analysed with great care the full written and oral submissions of the parties and the exchanges of questions and answers relating thereto. Our findings and conclusions in this Panel Report are based upon these full written and oral submissions and questions and answers. They form an integral part of the record before the Panel in this case. We therefore believe that we have adhered to both the letter and spirit of our Working Procedures and do not believe that any prejudice has arisen to Brazil in the course of these proceedings from annexing executive summaries of its first and second written submissions.

Fifth, we recall that Article 18.2 of the *DSU*, as also reflected in paragraph 3 of our Working Procedures, states that nothing in the *DSU* shall preclude a party to a dispute from disclosing statements of its own positions to the public. There is therefore nothing precluding Brazil from making its full first and second submissions generally and publicly available (subject, of course, to the requirements of maintaining the confidentiality of the EC's submissions in Article 18.2 of the *DSU* and paragraph 3 of our Working Procedures).[1194]" [1195]

829. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings[1196] on organizational matters. Among the issues considered, the Panel referred to the executive summaries requested in paragraph 5 of the Panel's Working Procedures, as follows:

> "In relation to the requirement contained in paragraph 5 of the Working Procedures to submit executive summaries, on the basis of discussions with the parties, the Panel has decided to allow the United States to submit executive summaries that should not exceed 30 pages. The first 15 pages should deal with the common claims raised by the complainants. The additional 15 pages would allow the United States to deal with specific claims made individually by one or more of the complainants but which are not common to all the complainants." [1197]

4. Timetable

(a) General

830. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings[1198] on organizational matters. Among other issues, the Panel referred to the timetable for its proceedings as follows:

> "The Panel notes at the outset that this case is likely to impose a heavy burden on parties in terms of their obligations to make submissions as set out in the timetable for the proceedings, a copy of which is attached. As is noted at the end of the timetable, the Panel would like to emphasize that the calendar may be changed during the panel process. The Panel would also like to assure parties that it will do its utmost, within reason, to accommodate the parties' concerns and requests in relation to the deadlines set out in the timetable." [1199]

(b) Deadline for affirmative defence

831. In *Canada – Aircraft*, Brazil argued that a good faith interpretation of the *DSU* requires a party making an affirmative defence to set forth the grounds for that affirmative defence in its first written submission to the panel. The Panel disagreed:

> "As noted above, there is nothing in the DSU, or in the Appendix 3 Working Procedures, to prevent a party submitting new evidence or allegations after the first substantive meeting. We can see no basis in the DSU to treat the submission of affirmative defences after the first sub-

---

[1194] (*footnote original*) Our Working Procedures state, in relevant part: "Members shall treat as confidential information submitted by another Member to the Panel which that Member has designated as confidential and shall not disclose such information to individuals not involved in the dispute. Where a party to a dispute submits a confidential version of its written submissions to the Panel, it shall also, upon request, provide a non-confidential summary of the information contained in its submissions that could be disclosed to the public, within ten days of its submission to the Panel."

[1195] Panel Report on *EC – Tube or Pipe Fittings*, paras. 7.51–7.55.

[1196] For "preliminary rulings", see Section XXXVI.C.

[1197] Appellate Body Report on *US – Steel Safeguards*, para. 5.3. The final text of paragraph 5 of the Panel's Working Procedure thus read as follows:

> "Within seven days following the date for filing a submission, each of the parties and third parties is invited to provide the Panel with an executive summary of their submissions. The executive summaries will be used only for the purpose of assisting the Panel in drafting a concise factual and arguments section of the Panel report to the Members. They shall not in any way serve as a substitute for the submissions of the parties in the Panel's examination of the case. The executive summary to be provided by each party should not exceed 15 pages in length and shall summarize the content of the written submissions. In relation to the executive summaries to be provided by the United States, it is allowed an additional 15 pages to address issues that have been raised in the submissions of one or more of the other parties that are specific to those parties and which are not common to the other parties. The summary to be provided by each third party shall summarize their written submissions, as applicable, and should not exceed 5 pages in length."

[1198] For "preliminary rulings", see Section XXXVI.C.

[1199] Appellate Body Report on *US – Steel Safeguards*, para. 5.3.

stantive meeting any differently. Thus, although it is desirable that affirmative defences, as with any claim, should be submitted as early as possible, there is no requirement that affirmative defences should be submitted before the end of the first substantive meeting with the parties. Provided that due process is respected, we see nothing to prohibit the submission of affirmative defences after the first substantive meeting with the parties."[1200]

(c) Timing of the submission of evidence

832. As regards the timing for the submission of evidence by the parties in panel proceedings, see Section XI.B.3(b) above.

(d) Timing for raising objections to panels' jurisdiction

833. In this regard, see Section VII.B.1(c)(ii) above.

(e) Timing for the filing of submissions with the WTO Dispute Settlement Registrar

834. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings[1201] on organizational matters. Among the issues, the Panel referred to the timing for the filing of the parties' written submissions with the WTO Dispute Settlement Registrar. The Panel decided to require parties to file their written submissions with the Registrar by 5:30 p.m. on the deadlines established by the Panel, except for those deadlines falling on a Friday in which case the submissions should be filed by 5:00 p.m. The Panel considered that, in exceptional circumstances, when it was not possible to comply with these time deadlines, the parties could agree upon an alternative arrangement with the Secretary to the Panel.[1202]

XXXI. APPENDIX 4: EXPERT REVIEW GROUPS

A. TEXT OF APPENDIX 4

APPENDIX 4
EXPERT REVIEW GROUPS

The following rules and procedures shall apply to expert review groups established in accordance with the provisions of paragraph 2 of Article 13.

1. Expert review groups are under the panel's authority. Their terms of reference and detailed working procedures shall be decided by the panel, and they shall report to the panel.

2. Participation in expert review groups shall be restricted to persons of professional standing and experience in the field in question.

3. Citizens of parties to the dispute shall not serve on an expert review group without the joint agreement of the parties to the dispute, except in exceptional circumstances when the panel considers that the need for specialized scientific expertise cannot be fulfilled otherwise. Government officials of parties to the dispute shall not serve on an expert review group. Members of expert review groups shall serve in their individual capacities and not as government representatives, nor as representatives of any organization. Governments or organizations shall therefore not give them instructions with regard to matters before an expert review group.

4. Expert review groups may consult and seek information and technical advice from any source they deem appropriate. Before an expert review group seeks such information or advice from a source within the jurisdiction of a Member, it shall inform the government of that Member. Any Member shall respond promptly and fully to any request by an expert review group for such information as the expert review group considers necessary and appropriate.

5. The parties to a dispute shall have access to all relevant information provided to an expert review group, unless it is of a confidential nature. Confidential information provided to the expert review group shall not be released without formal authorization from the government, organization or person providing the information. Where such information is requested from the expert review group but release of such information by the expert review group is not authorized, a non-confidential summary of the information will be provided by the government, organization or person supplying the information.

6. The expert review group shall submit a draft report to the parties to the dispute with a view to obtaining their comments, and taking them into account, as appropriate, in the final report, which shall also be issued to the parties to the dispute when it is submitted to the panel. The final report of the expert review group shall be advisory only.

[1200] Panel Report on *Canada – Aircraft*, para. 9.77.

[1201] For "preliminary rulings", see Section XXXVI.C.

[1202] Appellate Body Report on *US – Steel Safeguards*, paras. 5.3. Paragraph 17(b) of the Panel's Working Procedures read as follows:

> "The parties and the third parties shall provide their written submissions to the Dispute Settlement Registrar by 5:30 p.m. on the deadlines established by the Panel and by 5:00 p.m. if the deadline falls on a Friday. If, due to exceptional circumstances, it is not possible for submissions to be provided to the Registrar by the times stipulated, parties should agree otherwise with the Secretary to the Panel, ... The parties and the third parties shall provide the Panel with 10 paper copies of their written submissions. All these copies must be filed with the Dispute Settlement Registrar, . . ."

B. INTERPRETATION AND APPLICATION OF APPENDIX 4

No jurisprudence or decision of a competent WTO body.

XXXII. WORKING PROCEDURES FOR APPELLATE REVIEW

A. TEXT OF THE WORKING PROCEDURES FOR APPELLATE REVIEW[1203]

"Definitions

1. In these Working Procedures for Appellate Review,

"appellant"
means any party to the dispute that has filed a Notice of Appeal pursuant to Rule 20;

"appellate report"
means an Appellate Body report as described in Article 17 of the DSU;

"appellee"
means any party to the dispute that has filed a submission pursuant to Rule 22 or paragraph 4 of Rule 23;

"consensus"
a decision is deemed to be made by consensus if no Member formally objects to it;

"covered agreements"
has the same meaning as "covered agreements" in paragraph 1 of Article 1 of the DSU;

"division"
means the three Members who are selected to serve on any one appeal in accordance with paragraph 1 of Article 17 of the DSU and paragraph 2 of Rule 6;

"documents"
means the Notice of Appeal, any Notice of Other Appeal and the submissions and other written statements presented by the participants or third participants;

"DSB"
means the Dispute Settlement Body established under Article 2 of the DSU;

"DSU"
means the Understanding on Rules and Procedures Governing the Settlement of Disputes which is Annex 2 to the WTO Agreement;

"Member"
means a Member of the Appellate Body who has been appointed by the DSB in accordance with Article 17 of the DSU;

"other appellant"
means any party to the dispute that has filed a Notice of Other Appeal pursuant to paragraph 1 of Rule 23;

"participant"
means any party to the dispute that has filed a Notice of Appeal pursuant to Rule 20, a Notice of Other Appeal pursuant to Rule 23 or a submission pursuant to Rule 22 or paragraph 4 of Rule 23;

"party to the dispute"
means any WTO Member who was a complaining or defending party in the panel dispute, but does not include a third party;

"proof of service"
means a letter or other written acknowledgement that a document has been delivered, as required, to the parties to the dispute, participants, third parties or third participants, as the case may be;

"Rules"
means these Working Procedures for Appellate Review;

"Rules of Conduct"
means the Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes as attached in Annex II to these Rules;

"SCM Agreement"
means the Agreement on Subsidies and Countervailing Measures which is in Annex 1A to the WTO Agreement;

"Secretariat"
means the Appellate Body Secretariat;

"service address"
means the address of the party to the dispute, participant, third party or third participant as generally used in WTO dispute settlement proceedings, unless the party to the dispute, participant, third party or third participant has clearly indicated another address;

"third participant"
means any third party that has filed a written submission pursuant to Rule 24(1); or any third party that appears at the oral hearing, whether or not it makes an oral statement at that hearing;

"third party"
means any WTO Member who has notified the DSB of its substantial interest in the matter before the panel pursuant to paragraph 2 of Article 10 of the DSU;

"WTO"
means the World Trade Organization;

[1203] WT/AB/WP/5. Note from the authors: This consolidated version of the Appellate Body Working Procedures entered into force on 1 January 2005 and was circulated on 4 January 2005. Although the current version of the Analytical Index only covers developments in dispute settlement until 31 December 2004, the authors have considered that the readers would find it useful to have the most current version of the Appellate Body Working Procedures.

"WTO Agreement"
means the Marrakesh Agreement Establishing the World Trade Organization, done at Marrakesh, Morocco on 15 April 1994;

"WTO Member"
means any State or separate customs territory possessing full autonomy in the conduct of its external commercial relations that has accepted or acceded to the WTO in accordance with Articles XI, XII or XIV of the WTO Agreement; and

"WTO Secretariat"
means the Secretariat of the World Trade Organization.

PART I
MEMBERS

Duties and Responsibilities

2. (1) A Member shall abide by the terms and conditions of the DSU, these Rules and any decisions of the DSB affecting the Appellate Body.

(2) During his/her term, a Member shall not accept any employment nor pursue any professional activity that is inconsistent with his/her duties and responsibilities.

(3) A Member shall exercise his/her office without accepting or seeking instructions from any international, governmental, or non-governmental organization or any private source.

(4) A Member shall be available at all times and on short notice and, to this end, shall keep the Secretariat informed of his/her whereabouts at all times.

Decision-Making

3. (1) In accordance with paragraph 1 of Article 17 of the DSU, decisions relating to an appeal shall be taken solely by the division assigned to that appeal. Other decisions shall be taken by the Appellate Body as a whole.

(2) The Appellate Body and its divisions shall make every effort to take their decisions by consensus. Where, nevertheless, a decision cannot be arrived at by consensus, the matter at issue shall be decided by a majority vote.

Collegiality

4. (1) To ensure consistency and coherence in decision-making, and to draw on the individual and collective expertise of the Members, the Members shall convene on a regular basis to discuss matters of policy, practice and procedure.

(2) The Members shall stay abreast of dispute settlement activities and other relevant activities of the WTO and, in particular, each Member shall receive all documents filed in an appeal.

(3) In accordance with the objectives set out in paragraph 1, the division responsible for deciding each appeal shall exchange views with the other Members before the division finalizes the appellate report for circulation to the WTO Members. This paragraph is subject to paragraphs 2 and 3 of Rule 11.

(4) Nothing in these Rules shall be interpreted as interfering with a division's full authority and freedom to hear and decide an appeal assigned to it in accordance with paragraph 1 of Article 17 of the DSU.

Chairman

5. (1) There shall be a Chairman of the Appellate Body who shall be elected by the Members.

(2) The term of office of the Chairman of the Appellate Body shall be one year. The Appellate Body Members may decide to extend the term of office for an additional period of up to one year. However, in order to ensure rotation of the Chairmanship, no Member shall serve as Chairman for more than two consecutive terms.

(3) The Chairman shall be responsible for the overall direction of the Appellate Body business, and in particular, his/her responsibilities shall include:

(a) the supervision of the internal functioning of the Appellate Body; and
(b) any such other duties as the Members may agree to entrust to him/her.

(4) Where the office of the Chairman becomes vacant due to permanent incapacity as a result of illness or death or by resignation or expiration of his/her term, the Members shall elect a new Chairman who shall serve a full term in accordance with paragraph 2.

(5) In the event of a temporary absence or incapacity of the Chairman, the Appellate Body shall authorize another Member to act as Chairman *ad interim*, and the Member so authorized shall temporarily exercise all the powers, duties and functions of the Chairman until the Chairman is capable of resuming his/her functions.

Divisions

6. (1) In accordance with paragraph 1 of Article 17 of the DSU, a division consisting of three Members shall be established to hear and decide an appeal.

(2) The Members constituting a division shall be selected on the basis of rotation, while taking into account the principles of random selection, unpredictability and opportunity for all Members to serve regardless of their national origin.

(3) A Member selected pursuant to paragraph 2 to serve on a division shall serve on that division, unless:

(i) he/she is excused from that division pursuant to Rules 9 or 10;
(ii) he/she has notified the Chairman and the Presiding Member that he/she is prevented from serving on the division because of illness or other serious reasons pursuant to Rule 12; or
(iii) he/she has notified his/her intentions to resign pursuant to Rule 14.

Presiding Member of the Division

7. (1) Each division shall have a Presiding Member, who shall be elected by the Members of that division.

(2) The responsibilities of the Presiding Member shall include:

(a) coordinating the overall conduct of the appeal proceeding;
(b) chairing all oral hearings and meetings related to that appeal; and
(c) coordinating the drafting of the appellate report.

(3) In the event that a Presiding Member becomes incapable of performing his/her duties, the other Members serving on that division and the Member selected as a replacement pursuant to Rule 13 shall elect one of their number to act as the Presiding Member.

Rules of Conduct

8. (1) On a provisional basis, the Appellate Body adopts those provisions of the *Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes*, attached in Annex II to these Rules, which are applicable to it, until *Rules of Conduct* are approved by the DSB.

(2) Upon approval of *Rules of Conduct* by the DSB, such *Rules of Conduct* shall be directly incorporated and become part of these Rules and shall supersede Annex II.

9. (1) Upon the filing of a Notice of Appeal, each Member shall take the steps set out in Article VI:4(b)(i) of Annex II, and a Member may consult with the other Members prior to completing the disclosure form.

(2) Upon the filing of a Notice of Appeal, the professional staff of the Secretariat assigned to that appeal shall take the steps set out in Article VI:4(b)(ii) of Annex II.

(3) Where information has been submitted pursuant to Article VI:4(b)(i) or (ii) of Annex II, the Appellate Body shall consider whether further action is necessary.

(4) As a result of the Appellate Body's consideration of the matter pursuant to paragraph 3, the Member or the professional staff member concerned may continue to be assigned to the division or may be excused from the division.

10. (1) Where evidence of a material violation is filed by a participant pursuant to Article VIII of Annex II, such evidence shall be confidential and shall be supported by affidavits made by persons having actual knowledge or a reasonable belief as to the truth of the facts stated.

(2) Any evidence filed pursuant to Article VIII:1 of Annex II shall be filed at the earliest practicable time: that is, forthwith after the participant submitting it knew or reasonably could have known of the facts supporting it. In no case shall such evidence be filed after the appellate report is circulated to the WTO Members.

(3) Where a participant fails to submit such evidence at the earliest practicable time, it shall file an explanation in writing of the reasons why it did not do so earlier, and the Appellate Body may decide to consider or not to consider such evidence, as appropriate.

(4) While taking fully into account paragraph 5 of Article 17 of the DSU, where evidence has been filed pursuant to Article VIII of Annex II, an appeal shall be suspended for fifteen days or until the procedure referred to in Article VIII:14–16 of Annex II is completed, whichever is earlier.

(5) As a result of the procedure referred to in Article VIII:14–16 of Annex II, the Appellate Body may decide to dismiss the allegation, to excuse the Member or professional staff member concerned from being assigned to the division or make such other order as it deems necessary in accordance with Article VIII of Annex II.

11. (1) A Member who has submitted a disclosure form with information attached pursuant to Article VI:4(b)(i) or is the subject of evidence of a material violation pursuant to Article VIII:1 of Annex II, shall not participate in any decision taken pursuant to paragraph 4 of Rule 9 or paragraph 5 of Rule 10.

(2) A Member who is excused from a division pursuant to paragraph 4 of Rule 9 or paragraph 5 of Rule 10 shall not take part in the exchange of views conducted in that appeal pursuant to paragraph 3 of Rule 4.

(3) A Member who, had he/she been a Member of a division, would have been excused from that division pursuant to paragraph 4 of Rule 9, shall not take part in the exchange of views conducted in that appeal pursuant to paragraph 3 of Rule 4.

Incapacity

12. (1) A Member who is prevented from serving on a division by illness or for other serious reasons shall give notice and duly explain such reasons to the Chairman and to the Presiding Member.

(2) Upon receiving such notice, the Chairman and the Presiding Member shall forthwith inform the Appellate Body.

Replacement

13. Where a Member is unable to serve on a division for a reason set out in paragraph 3 of Rule 6, another Member shall be selected forthwith pursuant to paragraph 2 of Rule 6 to replace the Member originally selected for that division.

Resignation

14. (1) A Member who intends to resign from his/her office shall notify his/her intentions in writing to the Chairman of the Appellate Body who shall immediately inform the Chairman of the DSB, the Director-General and the other Members of the Appellate Body.

(2) The resignation shall take effect 90 days after the notification has been made pursuant to paragraph 1, unless the DSB, in consultation with the Appellate Body, decides otherwise.

Transition

15. A person who ceases to be a Member of the Appellate Body may, with the authorization of the Appellate Body and upon notification to the DSB, complete the disposition of any appeal to which that person was assigned while a Member, and that person shall, for that purpose only, be deemed to continue to be a Member of the Appellate Body.

PART II
PROCESS

General Provisions

16. (1) In the interests of fairness and orderly procedure in the conduct of an appeal, where a procedural question arises that is not covered by these Rules, a division may adopt an appropriate procedure for the purposes of that appeal only, provided that it is not inconsistent with the DSU, the other covered agreements and these Rules. Where such a procedure is adopted, the division shall immediately notify the parties to the dispute, participants, third parties and third participants as well as the other Members of the Appellate Body.

(2) In exceptional circumstances, where strict adherence to a time-period set out in these Rules would result in a manifest unfairness, a party to the dispute, a participant, a third party or a third participant may request that a division modify a time-period set out in these Rules for the filing of documents or the date set out in the working schedule for the oral hearing. Where such a request is granted by a division, any modification of time shall be notified to the parties to the dispute, participants, third parties and third participants in a revised working schedule.

17. (1) Unless the DSB decides otherwise, in computing any time-period stipulated in the DSU or in the special or additional provisions of the covered agreements, or in these Rules, within which a communication must be made or an action taken by a WTO Member to exercise or preserve its rights, the day from which the time-period begins to run shall be excluded and, subject to paragraph 2, the last day of the time-period shall be included.

(2) The DSB Decision on "Expiration of Time-Periods in the DSU", WT/DSB/M/7, shall apply to appeals heard by divisions of the Appellate Body.

Documents

18. (1) No document is considered filed with the Appellate Body unless the document is received by the Secretariat within the time-period set out for filing in accordance with these Rules.

(2) Except as otherwise provided in these Rules, every document filed by a party to the dispute, a participant, a third party or a third participant shall be served on each of the other parties to the dispute, participants, third parties and third participants in the appeal.

(3) A proof of service on the other parties to the dispute, participants, third parties and third participants shall appear on, or be affixed to, each document filed with the Secretariat under paragraph 1 above.

(4) A document shall be served by the most expeditious means of delivery or communication available, including by:

(a) delivering a copy of the document to the service address of the party to the dispute, participant, third party or third participant; or

(b) sending a copy of the document to the service address of the party to the dispute, participant, third party or third participant by facsimile transmission, expedited delivery courier or expedited mail service.

(5) Upon authorization by the division, a participant or a third participant may correct clerical errors in any of its documents (including typographical mistakes, errors of grammar, or words or numbers placed in the wrong order). The request to correct

clerical errors shall identify the specific errors to be corrected and shall be filed with the Secretariat no later than 30 days after the date of the filing of the Notice of Appeal. A copy of the request shall be served upon the other parties to the dispute, participants, third parties and third participants, each of whom shall be given an opportunity to comment in writing on the request. The division shall notify the parties to the dispute, participants, third parties and third participants of its decision.

Ex Parte Communications

19. (1) Neither a division nor any of its Members shall meet with or contact one party to the dispute, participant, third party or third participant in the absence of the other parties to the dispute, participants, third parties and third participants.

(2) No Member of the division may discuss any aspect of the subject matter of an appeal with any party to the dispute, participant, third party or third participant in the absence of the other Members of the division.

(3) A Member who is not assigned to the division hearing the appeal shall not discuss any aspect of the subject matter of the appeal with any party to the dispute, participant, third party or third participant.

Commencement of Appeal

20. (1) An appeal shall be commenced by notification in writing to the DSB in accordance with paragraph 4 of Article 16 of the DSU and simultaneous filing of a Notice of Appeal with the Secretariat.

(2) A Notice of Appeal shall include the following information:

(a) the title of the panel report under appeal;
(b) the name of the party to the dispute filing the Notice of Appeal;
(c) the service address, telephone and facsimile numbers of the party to the dispute; and
(d) a brief statement of the nature of the appeal, including:

(i) identification of the alleged errors in the issues of law covered in the panel report and legal interpretations developed by the panel;
(ii) a list of the legal provision(s) of the covered agreements that the panel is alleged to have erred in interpreting or applying; and
(iii) without prejudice to the ability of the appellant to refer to other paragraphs of the panel report in the context of its appeal, an indicative list of the paragraphs of the panel report containing the alleged errors.

Appellant's Submission

21. (1) The appellant shall, within 7 days after the date of the filing of the Notice of Appeal, file with the Secretariat a written submission prepared in accordance with paragraph 2 and serve a copy of the submission on the other parties to the dispute and third parties.

(2) A written submission referred to in paragraph 1 shall

(a) be dated and signed by the appellant; and
(b) set out

(i) a precise statement of the grounds for the appeal, including the specific allegations of errors in the issues of law covered in the panel report and legal interpretations developed by the panel, and the legal arguments in support thereof;
(ii) a precise statement of the provisions of the covered agreements and other legal sources relied on; and
(iii) the nature of the decision or ruling sought.

Appellee's Submission

22. (1) Any party to the dispute that wishes to respond to allegations raised in an appellant's submission filed pursuant to Rule 21 may, within 25 days after the date of the filing of the Notice of Appeal, file with the Secretariat a written submission prepared in accordance with paragraph 2 and serve a copy of the submission on the appellant, other parties to the dispute and third parties.

(2) A written submission referred to in paragraph 1 shall

(a) be dated and signed by the appellee; and
(b) set out

(i) a precise statement of the grounds for opposing the specific allegations of errors in the issues of law covered in the panel report and legal interpretations developed by the panel raised in the appellant's submission, and the legal arguments in support thereof;
(ii) an acceptance of, or opposition to, each ground set out in the appellant's submission;
(iii) a precise statement of the provisions of the covered agreements and other legal sources relied on; and
(iv) the nature of the decision or ruling sought.

Multiple Appeals

23. (1) Within 12 days after the date of the filing of the Notice of Appeal, a party to the dispute other than the original appellant may join in that appeal or appeal on the basis of other alleged errors in the issues of law covered in the panel report and legal interpretations developed by the panel. That party shall notify the DSB in writing of its appeal and shall simultaneously file a Notice of Other Appeal with the Secretariat.

(2) A Notice of Other Appeal shall include the following information:

(a) the title of the panel report under appeal;
(b) the name of the party to the dispute filing the Notice of Other Appeal;
(c) the service address, telephone and facsimile numbers of the party to the dispute; and either

(i) a statement of the issues raised on appeal by another participant with which the party joins; or
(ii) a brief statement of the nature of the other appeal, including:

(A) identification of the alleged errors in the issues of law covered in the panel report and legal interpretations developed by the panel;
(B) a list of the legal provision(s) of the covered agreements that the panel is alleged to have erred in interpreting or applying; and
(C) without prejudice to the ability of the other appellant to refer to other paragraphs of the panel report in the context of its appeal, an indicative list of the paragraphs of the panel report containing the alleged errors.

(3) The other appellant shall, within 15 days after the date of the filing of the Notice of Appeal, file with the Secretariat a written submission prepared in accordance with paragraph 2 of Rule 21 and serve a copy of the submission on the other parties to the dispute and third parties.

(4) The appellant, any appellee and any other party to the dispute that wishes to respond to a submission filed pursuant to paragraph 3 may file a written submission within 25 days after the date of the filing of the Notice of Appeal, and any such submission shall be in the format required by paragraph 2 of Rule 22.

(5) This Rule does not preclude a party to the dispute which has not filed a submission under Rule 21 or a Notice of Other Appeal under paragraph 1 of this Rule from exercising its right of appeal pursuant to paragraph 4 of Article 16 of the DSU.

(6) Where a party to the dispute which has not filed a submission under Rule 21 or a Notice of Other Appeal under paragraph 1 of this Rule exercises its right to appeal as set out in paragraph 5, a single division shall examine the appeals.

Amending Notices of Appeal

23*bis*. (1) The division may authorize an original appellant to amend a Notice of Appeal or an other appellant to amend a Notice of Other Appeal.

(2) A request to amend a Notice of Appeal or a Notice of Other Appeal shall be made as soon as possible in writing and shall state the reason(s) for the request and identify precisely the specific amendments that the appellant or other appellant wishes to make to the Notice. A copy of the request shall be served on the other parties to the dispute, participants, third participants and third parties, each of whom shall be given an opportunity to comment in writing on the request.

(3) In deciding whether to authorize, in full or in part, a request to amend a Notice of Appeal or Notice of Other Appeal, the division shall take into account:

(a) the requirement to circulate the appellate report within the time-period set out in Article 17.5 of the DSU or, as appropriate, Article 4.9 of the *SCM Agreement*; and,

(b) the interests of fairness and orderly procedure, including the nature and extent of the proposed amendment, the timing of the request to amend a Notice of Appeal or Notice of Other Appeal, any reasons why the proposed amended Notice of Appeal or Notice of Other Appeal was not or could not have been filed on its original date, and any other considerations that may be appropriate.

(4) The division shall notify the parties to the dispute, participants, third participants, and third parties of its decision. In the event that the division authorizes an amendment to a Notice of Appeal or a Notice of Other Appeal, it shall provide an amended copy of the Notice to the DSB.

Third Participants

24. (1) Any third party may file a written submission containing the grounds and legal arguments in support of its position. Such submission shall be filed within 25 days after the date of the filing of the Notice of Appeal.

(2) A third party not filing a written submission shall, within the same period of 25 days, notify the Secretariat in writing if it intends to appear at the oral hearing, and, if so, whether it intends to make an oral statement.

(3) Third participants are encouraged to file written submissions to facilitate their positions being taken fully into account by the division hearing the appeal and in order that participants and other third participants will have notice of positions to be taken at the oral hearing.

(4) Any third party that has neither filed a written submission pursuant to paragraph (1), nor notified the Secretariat pursuant to paragraph (2), may notify the Secretariat that it intends to appear at the oral hearing, and may request to make an oral statement at the hearing. Such notifications and requests should be notified to the Secretariat in writing at the earliest opportunity.

Transmittal of Record

25. (1) Upon the filing of a Notice of Appeal, the Director-General of the WTO shall transmit forthwith to the Appellate Body the complete record of the panel proceeding.

(2) The complete record of the panel proceeding includes, but is not limited to:

(a) written submissions, rebuttal submissions, and supporting evidence attached thereto by the parties to the dispute and the third parties;
(b) written arguments submitted at the panel meetings with the parties to the dispute and the third parties, the recordings of such panel meetings, and any written answers to questions posed at such panel meetings;
(c) the correspondence relating to the panel dispute between the panel or the WTO Secretariat and the parties to the dispute or the third parties; and
(d) any other documentation submitted to the panel.

Working Schedule

26. (1) Forthwith after the commencement of an appeal, the division shall draw up an appropriate working schedule for that appeal in accordance with the time-periods stipulated in these Rules.

(2) The working schedule shall set forth precise dates for the filing of documents and a timetable for the division's work, including, where possible, the date for the oral hearing.

(3) In accordance with paragraph 9 of Article 4 of the DSU, in appeals of urgency, including those which concern perishable goods, the Appellate Body shall make every effort to accelerate the appellate proceedings to the greatest extent possible. A division shall take this into account in drawing up its working schedule for that appeal.

(4) The Secretariat shall serve forthwith a copy of the working schedule on the appellant, the parties to the dispute and any third parties.

Oral Hearing

27. (1) A division shall hold an oral hearing, which shall be held, as a general rule, between 35 and 45 days after the date of the filing of a Notice of Appeal.

(2) Where possible in the working schedule or otherwise at the earliest possible date, the Secretariat shall notify all parties to the dispute, participants, third parties and third participants of the date for the oral hearing.

(3) (a) Any third party that has filed a submission pursuant to Rule 24(1), or has notified the Secretariat pursuant to Rule 24(2) that it intends to appear at the oral hearing, may appear at the oral hearing, make an oral statement at the hearing, and respond to questions posed by the division.
(b) Any third party that has notified the Secretariat pursuant to Rule 24(4) that it intends to appear at the oral hearing may appear at the oral hearing.
(c) Any third party that has made a request pursuant to Rule 24(4) may, at the discretion of the division hearing the appeal, taking into account the requirements of due process, make an oral statement at the hearing, and respond to questions posed by the division.

(4) The Presiding Member may set time-limits for oral arguments.

Written Responses

28. (1) At any time during the appellate proceeding, including, in particular, during the oral hearing, the division may address questions orally or in writing to, or request additional memoranda from, any participant or third participant, and specify the time-periods by which written responses or memoranda shall be received.

(2) Any such questions, responses or memoranda shall be made available to the other participants and third participants in the appeal, who shall be given an opportunity to respond.

(3) When the questions or requests for memoranda are made prior to the oral hearing, then the questions or requests, as well as the responses or memoranda, shall also be made available to the

third parties, who shall also be given an opportunity to respond.

Failure to Appear

29. Where a participant fails to file a submission within the required time-periods or fails to appear at the oral hearing, the division shall, after hearing the views of the participants, issue such order, including dismissal of the appeal, as it deems appropriate.

Withdrawal of Appeal

30. (1) At any time during an appeal, the appellant may withdraw its appeal by notifying the Appellate Body, which shall forthwith notify the DSB.

(2) Where a mutually agreed solution to a dispute which is the subject of an appeal has been notified to the DSB pursuant to paragraph 6 of Article 3 of the DSU, it shall be notified to the Appellate Body.

Prohibited Subsidies

31. (1) Subject to Article 4 of the *SCM Agreement*, the general provisions of these Rules shall apply to appeals relating to panel reports concerning prohibited subsidies under Part II of that *Agreement*.

(2) The working schedule for an appeal involving prohibited subsidies under Part II of the *SCM Agreement* shall be as set out in Annex I to these Rules.

Entry into Force and Amendment

32. (1) These Rules shall enter into force on 15 February 1996.

(2) The Appellate Body may amend these Rules in compliance with the procedures set forth in paragraph 9 of Article 17 of the DSU.

(3) Whenever there is an amendment to the DSU or to the special or additional rules and procedures of the covered agreements, the Appellate Body shall examine whether amendments to these Rules are necessary.

ANNEX I
TIMETABLE FOR APPEALS[1]

	General Appeals (Day)	Prohibited Subsidies Appeals (Day)
Notice of Appeal[2]	0	0
Appellant's Submission[3]	7	4
Notice of Other Appeal[4]	12	6
Other Appellant(s) Submission(s)[5]	15	7

Table (*cont.*)

Document Number	Effective Date	Rules Amended	*Working Documents* Explanatory Texts	Principal DSB Meetings(s) at which Amendments Discussed, Minutes
WT/AB/WP/4	1 May 2003	Rules 24 and 27(3), with consequential amendments to Rules 1, 16, 18, 19, and 28, and Annex I	WT/AB/WP/W/6, WT/AB/WP/W/7	23 October 2002, WT/DSB/M/134
WT/AB/WP/5 WT/DSB/M/169	1 January 2005	Rules 1, 18, 20, 21, 23, 23 *bis*, and 27, and Annexes I and III	WT/AB/WP/W/8, WT/AB/WP/W/9	19 May 2004

B. INTERPRETATION AND APPLICATION OF THE APPELLATE BODY WORKING PROCEDURES

1. General

835. On 15 February 1996, the Appellate Body circulated its Working Procedures as an unrestricted document.[1204] On 24 January 2002 and 1 May 2003, the Appellate Body circulated consolidated, revised versions of its Working Procedures.[1205] On 4 January 2005, the Appellate Body circulated another consolidated, revised version replacing the May 2003 version and reflecting amendments to Rules 1, 18(5), 20, 21, 23, 27 and Annex I, as well as the addition of a new Rule 23*bis* and a new Annex III, as discussed in WT/AB/WP/W/8 and WT/AB/WP/W/9. These new consolidated Working Procedures are to be applied to appeals initiated after 1 January 2005. Although the current version of the Analytical Index only covers developments in dispute settlement up until the end of December 2004, the authors have decided to include this version in Section A above since it will be the version in force when this Analytical Index is published.

2. Appellate Body's authority to adopt procedural rules

836. In *US – Lead and Bismuth II*, the Appellate Body examined whether it could admit *amicus curiae* briefs (see Section XXXVI.G.2 below; with respect to the issue of *amicus curiae* briefs in general, see Section XXXVI.G below). The Appellate Body confirmed its broad authority to adopt procedural rules:

> "[Article 17.9 of the DSU] makes clear that the Appellate Body has broad authority to adopt procedural rules which do not conflict with any rules and procedures in the DSU or the covered agreements.[1206] Therefore, we are of the opinion that as long as we act consistently with the provisions of the DSU and the covered agreements, we have the legal authority to decide whether or not to accept and consider any information that we believe is pertinent and useful in an appeal."[1207]

3. Appellate Body's authority to disregard its Working Procedures

837. In *US – Gasoline*, the United States in its appeal argued that the issues of whether clean air is an exhaustible natural resources within the meaning of Article XX(g) of the *GATT 1994* and whether the baseline establishment rules were consistent with the *TBT Agreement* were not properly brought before the Appellate Body in accordance with its Working Procedures. In that case, Venezuela and Brazil had appealed the relevant findings of the Panel, but brought up these issues in their appellee's submission, contrary to the Appellate Body's Working Procedures which stipulated that such "cross-appeal" be brought in an appellant's submission. The Appellate Body refused to "casually . . . disregard" its own Working Procedures and stated:

> "[T]o deal with those two issues, under the circumstances of this appeal, would have required the Appellate Body casually to disregard its own *Working Procedures* and to do so in the absence of a compelling reason grounded on, for instance, fundamental fairness or *force majeure*. Venezuela and Brazil could have appealed the Panel's finding and non-finding on the two matters by taking advantage of Rules 23(1) or 23(4) of the *Working Procedures* and thereby placing the Appellate Body in a position to dispose of those issues directly in one and the same appellate proceeding.
>
> . . . the route . . . Brazil and Venezuela chose for addressing the two issues in question is not contemplated by the *Working Procedures*, and therefore, these issues are not properly the subject of this appeal."[1208]

[1204] WT/AB/WP/1.
[1205] WT/AB/WP/3 and WT/AB/WP/4 respectively.
[1206] (*footnote original*) In addition, Rule 16(1) of the *Working Procedures* allows a division hearing an appeal to develop an appropriate procedure in certain specified circumstances where a procedural question arises that is not covered by the *Working Procedures*.
[1207] Appellate Body Report on *US – Lead and Bismuth II*, para. 39.
[1208] Appellate Body Report on *US – Gasoline*, p. 12.

4. Interpretation of the Working Procedures

838. In *EC – Sardines*, the Appellate Body stated that its Working Procedures cannot be interpreted in a way that could undermine the effectiveness of the dispute settlement system because they have been drawn up pursuant to the DSU:

> "[W]e emphasize that the *Working Procedures* must not be interpreted in a way that could undermine the effectiveness of the dispute settlement system, for they have been drawn up pursuant to the DSU and as a means of ensuring that the dispute settlement mechanism achieves the aim of securing a positive solution to a dispute.[1209] As we have said:
>
> > 'The procedural rules of WTO dispute settlement are designed to promote . . . the fair, prompt and effective resolution of trade disputes.'[1210]
>
> This obligation to interpret the *Working Procedures* in a way that promotes the effective resolution of disputes is complemented by the obligation of Members, set out in Article 3.10 of the DSU, to 'engage in [dispute settlement] procedures in good faith in an effort to resolve the dispute'. Hence, the right to withdraw an appeal must be exercised subject to these limitations, which are applicable generally to the dispute settlement process."[1211]

5. Rule 3.1: decision-making

839. See Section XXXII.B.9 below.

6. Rule 3.2: concurrent opinions

840. In this respect, see Section XVII.B.7 above.

7. Rule 8: rules of conduct

841. In *Brazil – Aircraft*, the Appellate Body recalled that its Members are subject to the Rules of Conduct:

> "[W]e wish to recall that Members of the Appellate Body and its staff are covered by Article VII:1 of the *Rules of Conduct*,[1212] which provides:
>
> > Each covered person shall at all times maintain the confidentiality of dispute settlement deliberations and proceedings together with any information identified by a party as confidential. (emphasis added)"[1213]

8. Rule 13: replacement of Appellate Body member in a given appeal

842. In *US – Lead and Bismuth II*, Mr Christopher Beeby, one of the members of the Division hearing the appeal, passed away and Mr Julio Lacarte-Muró, another member of the Appellate Body, was selected to replace him.[1214]

843. In *US – Offset Act (Byrd Amendment)*, Mr Giorgio Sacerdoti replaced Mr A.V. Ganesan as Presiding Member of the Division hearing this appeal because the latter was prevented from continuing to serve on the Division for serious personal reasons.[1215]

844. In *US – Softwood Lumber IV*, Mr Giorgio Sacerdoti replaced Mr A.V. Ganesan as a Member of the Division hearing this appeal because the latter was prevented from continuing to serve on the Division for serious personal reasons.[1216]

9. Rule 16

(a) Rule 16(1): "appropriate procedure for the purposes of that appeal only"

845. In *EC – Bananas III*, the Appellate Body accepted Saint Lucia's request to be assisted by private counsel during the Appellate Body hearing on the grounds that it is for a WTO Member to decide who should represent it as members of its delegation in an oral hearing of the Appellate Body.[1217] In this regard, see paragraphs 1022–1023 below.

846. In *Guatemala – Cement I*, both parties, Guatemala and Mexico, had filed their appellee's submissions in Spanish. In order to ensure that the third participant, the United States, would have time to prepare its submission after receiving an English version of the appellant's submission, the Appellate Body granted the United States additional time to file its third participant's submission. The Appellate Body further declined Mexico's request that its appellee's submission be withheld from Guatemala and the United States until the end of the time-period allowed to the United States to file its third participant's submission.[1218]

847. In *Brazil – Aircraft*, Brazil and Canada had requested that the Appellate Body apply, *mutatis mutandis*, the Procedures Governing Business Confidential Information adopted by the Panel in this case. The Appellate Body issued a preliminary ruling[1219] in which

[1218] Appellate Body Report on *Guatemala – Cement I*, para. 4.
[1219] For more information on preliminary rulings, see Section XXXVI.C.

it concluded that it was not necessary, under the circumstances of this case, to adopt *additional* procedures to protect business confidential information.[1220]

848. In *EC – Asbestos*, the Appellate Body adopted an additional procedure, for the purposes of this appeal only, pursuant to Rule 16(1) of its Working Procedures, to deal with any possible submissions received from *amici curiae*. In this regard, see Section XXXVI.G.3 below.

849. In *US – Lead and Bismuth II*, due to the passing away of Mr Christopher Beeby, the Appellate Body, pursuant to Rule 13 of the *Working Procedures*, had selected Mr Julio Lacarte-Muró to replace him (see paragraph 842 above). "In view of these extraordinary circumstances, the newly-constituted Division decided, pursuant to Rule 16(1) of the *Working Procedures*, and in the interests of fairness and orderly procedure in the conduct of this appeal, to hold another oral hearing on 4 April 2000. On that date, the participants and third participants presented oral arguments and responded to questions put to them by the Members of the newly-constituted Division. Due to these same extraordinary circumstances, the participants in this appeal, the European Communities and the United States, agreed to a two-week extension of the 90-day time limit for the consideration of this appeal, and thus agreed that the Report would be circulated no later than 10 May 2000."[1221]

850. In *US – Countervailing Measures on Certain EC Products*, the European Communities filed a request for a Preliminary Ruling, alleging that the United States' Notice of Appeal was not in conformity with Rule 20(2)(d) of the Working Procedures for Appellate Review. The European Communities asked the Appellate Body to order the United States, pursuant to Rule 16(1) of the Working Procedures, immediately to file further and better particulars to its notice of appeal identifying the precise legal findings and legal interpretations that it was challenging. The Appellate Body thus invited the United States "to identify the precise findings and interpretations of the Panel which are alleged, in the Notice of Appeal filed on 9 September 2002, to constitute errors".[1222]

(b) Rule 16(2): "exceptional circumstances"

851. In *EC – Bed Linen*, the European Communities and India requested the Appellate Body to extend the time-period for filing the appellee's and third participant's submissions. The Division hearing the appeal accepted the request pursuant to Rule 16(2) of the *Working Procedure* and in the light of the "exceptional circumstances" in that appeal.[1223]

852. In *US – FSC (Article 21.5 – EC)*, the United States requested the Appellate Body to modify its timetable on the grounds that the bioterrorists' attack amounted to "exceptional circumstances" under Rule 16(2) of the Appellate Body Working Procedures:

> "By letter of 22 October 2001, the United States requested the Appellate Body pursuant to Rule 16(2) of the *Working Procedures* to modify the timetable set out in the Working Schedule for Appeal for the filing of the appellant's submissions by the United States. The United States stated that suspected bioterrorist attacks had compromised the ability of the United States to conduct the necessary consultations with the United States Congress with regard to this appeal.[1224] According to the United States, the effect of these circumstances was such that adhering to the original timetable would result in manifest unfairness to the United States. In its letter of 23 October 2001, the European Communities did not object to the request made by the United States, but requested that, in order to preserve the balance of procedural rights afforded to the participants in this appeal, the Appellate Body extend the deadline for the filing of the European Communities' appellee's submission by 14 days. In a letter dated 23 October 2001, the Division of the Appellate Body hearing the appeal accepted that the circumstances identified by the United States constituted 'exceptional circumstances' within the meaning of Rule 16(2) of the *Working Procedures* and that maintaining the deadline for submission of the appellants' submission would result in 'manifest unfairness' to the United States. Accordingly, the Division agreed to modify the Working Schedule for this appeal to allow the United States an additional seven days for the filing of its appellant's submission. In the same letter, the Division also extended by seven days the deadlines for the filing of the other appellant's submissions, the appellee's submission, and the third participants' submissions."[1225]

(c) Rule 16(2): change of date

853. In *EC – Bananas III*, pursuant to Rule 16(2) of the Working Procedures, Jamaica asked the Appellate Body to postpone the dates of the oral hearing, set out in the working schedule. This request was not granted as the Appellate Body was not persuaded that there were exceptional circumstances resulting in manifest unfair-

[1224] (*footnote original*) In its letter, the United States explained that, due to the delivery of the bacterium anthrax to the United States Congress, several buildings had been temporarily closed, including buildings housing the offices of United States Senate officials with jurisdiction over the issues arising in this appeal.

[1225] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 8.

ness to any participant or third participant that justified the postponement of the oral hearing in the appeal.[1226]

854. In *US – Shrimp (Article 21.5 – Malaysia)*, on 13 August 2001, the United States requested that the Division hearing this appeal change the date of the oral hearing set out in the working schedule for this appeal. After inviting the participants to make their views known with respect to this request, the Division ruled that it would not change the date of the oral hearing.[1227]

10. Rule 20: notice of appeal

(a) Purpose of the notice of appeal

855. In *US – Countervailing Measures on Certain EC Products*, the Appellate Body rejected the argument by the United States that the notice of appeal serves a limited purpose as simply a formal trigger for initiating the appeal and stressed the importance of the notice of appeal as the means to allow the appellees to exercise their right of defence:

> "[O]ur previous rulings have underscored the important balance that must be maintained between the right of Members to exercise the right of appeal meaningfully and effectively, and the right of appellees to receive notice through the Notice of Appeal of the findings under appeal, so that they may exercise their right of defence effectively. Hence, we disagree with the contention of the United States here that the Notice of Appeal 'serves a limited purpose' as 'simply a formal trigger for initiating the appeal.' Indeed, if this were the only objective of the notice, our *Working Procedures* would have included only the first paragraph of Rule 20, which refers to commencement of an appeal through written notification to the Dispute Settlement Body and Appellate Body Secretariat. However, Rule 20 also prescribes additional requirements for commencing an appeal; it provides that the Notice of Appeal must include 'a brief statement of the nature of the appeal, including the allegations of errors in the issues of law covered in the panel report and legal interpretations developed by the panel.'[1228] The notification under Rule 20(1) serves as the 'trigger' to which the United States refers. The additional requirements under Rule 20(2) serve to ensure that the appellee also receives notice, albeit brief, of the 'nature of the appeal' and the 'allegations of errors' by the panel."[1229]

(b) Rule 20(2)(d): "brief statement of the nature of appeal, including the allegations of error"

(i) Identification standard

856. In *US – Shrimp*, the Appellate Body discussed the requirement in the *Working Procedures for Appellate Review* according to which the appellant is to be *brief* in its notice of appeal in setting out "the nature of the appeal, including the allegations of errors". The Appellate Body concluded that "the 'nature of the appeal' and 'the allegations of errors' are sufficiently set out where the notice of appeal adequately identifies the findings or legal interpretations of the Panel that are being appealed as erroneous":

> "The *Working Procedures for Appellate Review* enjoin the appellant to be *brief* in its notice of appeal in setting out 'the nature of the appeal, including the allegations of errors'. We believe that, in principle, the 'nature of the appeal' and 'the allegations of errors' are sufficiently set out where the notice of appeal adequately identifies the findings or legal interpretations of the Panel which are being appealed as erroneous. The notice of appeal is not expected to contain the reasons why the appellant regards those findings or interpretations as erroneous. The notice of appeal is not designed to be a summary or outline of the arguments to be made by the appellant. The legal arguments in support of the allegations of error are, of course, to be set out and developed in the appellant's submission."[1230]

857. The appellees in *US – Shrimp* argued that the notice of appeal of the United States was both vague and cursory and therefore not in compliance with the procedural requirements of Rule 20(2) of the *Working Procedures for Appellate Review*. The Appellate Body disagreed:

> "It is scarcely necessary to add that an appellee is, of course, always entitled to its full measure of due process. In the present appeal, perhaps the best indication that that full measure of due process was not in any degree impaired by the notice of appeal filed by the United States, is the developed and substantial nature of the appellees' submissions."[1231]

858. In *US – Countervailing Measures on Certain EC Products*, the Appellate Body emphasized that, generally, a notice of appeal that simply refers to the paragraph numbers found in the "Conclusions and Recommendations" section of a panel report, or that simply quotes them in full, is insufficient to provide adequate notice of the allegations of error on appeal. In this case, however, as the section in question was particularly detailed, the Appellate Body considered that the notice of appeal was adequate in this respect:

[1226] Appellate Body Report on *EC – Bananas III*, para. 4.
[1227] Appellate Body Report on *US – Shrimp (Article 21.5 – Malaysia)*, para. 11.
[1228] (*footnote original*) The United States' comparison to the lack of notice provided to a cross-appellee is not appropriate because the *Working Procedures* do not impose any notification requirements under such circumstances.
[1229] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, para. 62. See also Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 200.
[1230] Appellate Body Report on *US – Shrimp*, para. 95.
[1231] Appellate Body Report on *US – Shrimp*, para. 97.

"We observe that, in coming to these conclusions, we have before us a rather unusual example of the 'Conclusions and Recommendations' section of a panel report. In most panel reports, the 'Conclusions and Recommendations' section is relatively brief, setting out findings in summary fashion. Detailed legal interpretations and reasoning upon which panels rely are usually found only in the 'Findings' sections of panel reports. In this case, however, the Panel's 'Conclusions and Recommendations' are more detailed than usual. Paragraphs 8.1(a)–8.1(d) of the Panel Report include, not only the Panel's findings, but also certain of the reasons leading to those findings. Hence, in this case, it is possible, by reading the 'Conclusions and Recommendations' section from the Panel Report, to discern alleged errors of law appealed by the United States. We emphasize, however, that generally, a Notice of Appeal that refers simply to the paragraph numbers found in the 'Conclusions and Recommendations' section of a panel report, or that quotes them in full, will be insufficient to provide adequate notice of the allegations of error on appeal, and, hence, will fall short of the requirements set out in Rule 20(2)(d) of the *Working Procedures*."[1232]

859. In *US – Offset Act (Byrd Amendment)*, the Appellate Body considered that generic statements in a notice of appeal do not give the appellees adequate notice of the "nature of the appeal" and the "allegations of errors" made by the panel:

"We do not agree with the United States' contention that the first numbered paragraph of the United States' Notice of Appeal, referring generally to the Panel's failure properly to interpret Article 18.1 of the *Anti-Dumping Agreement* and Article 32.1 of the *SCM Agreement*, 'plainly covers' a claim that the Panel exceeded its terms of reference. As we have said, the Notice of Appeal 'serve[s] to ensure that the appellee also receives notice, albeit brief, of the "nature of the appeal" and the "allegations of errors" by the panel.'[1233] Generic statements such as that relied upon by the United States cannot serve to give the appellees adequate notice that they will be required to defend against a claim that the Panel exceeded its terms of reference. This is particularly so for procedural errors; it can be especially difficult to discern a claim of procedural error by a panel from general references to panel findings or from extracts of a panel report, because allegations of procedural error by a panel may not necessarily be raised until the appellate stage."[1234]

(ii) Distinction between "claims of error" and "legal arguments"

860. In *Chile – Price Band System*, Chile argued that the Panel had erred in choosing to examine Argentina's claim under Article 4.2 of the *Agreement on Agriculture* before examining its claim under Article II:1(b) of the *GATT 1994*. Argentina raised a procedural objection, alleging that Chile introduced this point for the first time in its appellant's submission, when, according to Argentina, Chile should have included this "allegation of error" in its notice of appeal pursuant to Rule 20(2)(d) of the *Working Procedures for Appellate Review*. The Appellate Body referred to the distinction it made between claims and legal arguments under Article 6.2 of the *DSU* in *EC – Bananas III* (see paragraph 223 above). The Appellate Body considered that this distinction "is also relevant to the distinction between 'allegations of error' and legal arguments as contemplated by Rule 20 of the *Working Procedures*":

"In our view, this distinction between claims and legal arguments under Article 6.2 of the DSU is also relevant to the distinction between 'allegations of error' and legal arguments as contemplated by Rule 20 of the *Working Procedures*. Bearing this distinction in mind, we do *not* agree with Argentina that Chile's arguments regarding the order of analysis chosen by the Panel amount to a separate 'allegation of error' that Chile *should have* – or *could have* – included in its Notice of Appeal. In fact, we do not see, nor has Argentina explained, what *separate* 'allegation of error' could have been made, or what legal basis for such 'allegation of error' there could have been. Rather than making a separate 'allegation of error', Chile has, in our view, simply set out a *legal argument* in support of the issues it raised on appeal relating to Article 4.2 of the *Agreement on Agriculture* and Article II:1(b) of the GATT 1994.[1235]"[1236]

(iii) Claims not included in the notice of appeal

General rule: exclusion from scope of appeal

861. In *EC – Bananas III*, the Appellate Body, having found that the European Communities had not properly indicated, in its notice of appeal, that it was appealing one particular Panel finding, decided to exclude that particular finding from the scope of the appeal:

"In our view, the claims of error by the European Communities set out in paragraphs (c) and (d) of the Notice of Appeal do not cover the Panel's finding in paragraph 7.93 of the Panel Reports. The finding in that paragraph explicitly deals with Ecuador's right to invoke Article

[1232] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, para. 70.

[1233] (*footnote original*) Appellate Body Report, *US – Countervailing Measures on Certain EC Products*, para. 62. See paragraph 855 above.

[1234] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 200.

[1235] (*footnote original*) Indeed, Chile suggests in paragraph 34 of its appellant's submission that, had the Panel begun with Article II:1(b), it would "most likely have avoided the error of inventing a new definition of 'ordinary customs duties' which has no apparent basis in the text of Article II:1(b)." Thus Chile is in fact making a legal argument in support of a substantive claim under Article II:1(b).

[1236] Appellate Body Report on *Chile – Price Band System*, para. 182.

> XIII:2 or XIII:4 of the GATT 1994, given that Ecuador acceded to the WTO *after* the *WTO Agreement* entered into force and *after* the tariff quota for the BFA countries had been negotiated and inscribed in the EC Schedule to the GATT 1994. There is no specific mention of this Panel finding in either the Notice of Appeal or in the main arguments of the appellant's submission by the European Communities. Therefore, Ecuador had no notice that the European Communities was appealing this finding. For these reasons, we conclude that the Panel's finding in paragraph 7.93 of the Panel Reports should be excluded from the scope of this appeal."[1237]

862. As regards the need to include claims on Article 11 of the DSU in the notice of appeal, see paragraphs 866–868 below.

Exception: jurisdictional issues

863. In *US – Offset Act (Byrd Amendment)*, the Appellate Body, having found that the notice of appeal did not include claims on the jurisdiction of the Panel, decided, nevertheless, that "the issue of a panel's jurisdiction is so fundamental that it is appropriate to consider claims that a panel has exceeded its jurisdiction even if such claims were not raised in the Notice of Appeal":

> "Notice of Appeal does not provide notice to the appellees that the United States intended to make claims that the Panel exceeded its terms of reference; the next question is whether we are precluded from examining these claims on appeal. As we have explained, if an appellee has not received sufficient notice in the Notice of Appeal that a particular claim will be advanced by the appellant, that claim normally will be excluded from the appeal. However, we observe that the United States has argued in this appeal that we are entitled to examine questions of jurisdiction in any event, even if not included in the Notice of Appeal.[1238]
>
> We agree with the United States' position. We have stated previously, in relation to a panel's obligation to address issues related to its jurisdiction, that:
>
> > '. . . panels have to address and dispose of certain issues of a fundamental nature, even if the parties to the dispute remain silent on those issues. In this regard, we have previously observed that "[t]he vesting of jurisdiction in a panel is a fundamental prerequisite for lawful panel proceedings." For this reason, panels cannot simply ignore issues which go to the root of their jurisdiction – that is, to their authority to deal with and dispose of matters. Rather, panels must deal with such issues – if necessary, on their own motion – in order to satisfy themselves that they have authority to proceed.[1239] (footnote omitted)'
>
> . . . we have said, '[a]n objection to jurisdiction should be raised as early as possible' and it would be preferable, in the interests of due process, for the appellant to raise such issues in the Notice of Appeal, so that appellees will be aware that this claim will be advanced on appeal. However, in our view, the issue of a panel's jurisdiction is so fundamental that it is appropriate to consider claims that a panel has exceeded its jurisdiction even if such claims were not raised in the Notice of Appeal."[1240]

(iv) Amendment of the notice of appeal

864. In *US – Countervailing Measures on Certain EC Products*, the European Communities had claimed that the United States' notice of appeal did not meet the requirements set out in Rule 20(2)(d). The United States then submitted a letter supplementing their notice of appeal. The Appellate Body decided to examine both the notice of appeal and its supplement with a view to giving full meaning and effect to the right of appeal:

> "In conducting our analysis, we will examine both the Notice of Appeal and the letter of 13 September 2002 supplementing the Notice of Appeal. Although the *Working Procedures* do not expressly provide for the filing of clarifications or further particulars or supplementary or amended Notices of Appeal, we consider it appropriate, in the particular circumstances of this case, to examine both documents with a view to giving 'full meaning and effect to the right of appeal.'[1241] We note in particular that the additional document was filed by the United States in response to our invitation to do so, based in part on a request for additional particulars filed by the European Communities. Moreover, the additional document was filed shortly after the filing of the Notice of Appeal (three days). Finally, we note that the European Communities referred to both the Notice of Appeal and the letter of 13 September 2002 in its arguments on this issue."[1242]

(v) Replacement of a notice of appeal

865. The Appellate Body on *EC – Sardines*, after having considered that the conditional withdrawal of its notice of appeal by the European Communities was appropriate and effective, and that, therefore, the filing of a replacement notice of appeal did not constitute a second appeal,[1243] rejected Peru's request that the replacement Notice of Appeal be declared inadmissible because neither the *DSU* nor the Working Procedures "accord[s] an appellant the right to appeal the same panel report twice on different grounds":

[1237] Appellate Body Report on *EC – Bananas III*, para. 152.
[1238] (*footnote original*) United States' response to questioning at the oral hearing.
[1239] (*footnote original*) Appellate Body Report, *Mexico – Corn Syrup (Article 21.5 – US)*, para. 36.
[1240] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, paras. 206–208.
[1241] (*footnote original*) Appellate Body Report, *US – Shrimp*, para. 97.
[1242] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, para. 64.
[1243] Appellate Body Report on *EC – Sardines*, para. 149.

"Peru alleges that, in sanctioning the approach of the European Communities in this appeal, we would be creating a procedural right for which the DSU has not provided – a right that can only be added to the DSU through a formal amendment by the Members of the World Trade Organization (the 'WTO'). We are, however, not creating a new procedural right; we are only upholding the right to withdraw an appeal. In addition, in admitting the replacement Notice of Appeal in this dispute, we are, as we were in *United States – Import Prohibition of Certain Shrimp and Shrimp Products* ('*US – Shrimp*'), seeking to:

> '. . . give full meaning and effect to the right of appeal and to give a party which regards itself aggrieved by some legal finding or interpretation in a panel report a real and effective opportunity to demonstrate the error in such finding or interpretation.'[1244]

In that same Report, we added that 'an appellee is, of course, always entitled to its full measure of due process.'[1245] In the circumstances of this case, we believe that Peru has been accorded the full measure of its due process rights, because the withdrawal of the original Notice and the filing of a replacement Notice were carried out in response to objections raised by Peru, the replacement Notice was filed in a timely manner and early in the process, and the replacement Notice contained no new or modified grounds of appeal. Also, Peru has not demonstrated that it suffered prejudice as a result. Moreover, Peru was given an adequate opportunity to address its concerns about the European Communities' actions during the course of the appeal.

In our view, the withdrawal of the original Notice of Appeal of 25 June 2002 and its replacement with the Notice of Appeal of 28 June 2002 was not an exercise of abusive litigation techniques by the European Communities, but rather was an appropriate response under the circumstances to Peru's objections regarding the original Notice of Appeal."[1246]

(vi) Article 11 of the DSU: allegation of a panel's failure to make an objective assessment

866. In *US – Countervailing Measures on Certain EC Products*, the Appellate Body established that a claim of error by a panel under Article 11 of the *DSU* is only possible in the context of an appeal and thus it needs to be included in the notice of appeal:

"A *claim* of error by a panel under Article 11 of the DSU is possible only in the context of an appeal. By definition, this *claim* will not be found in requests for establishment of a panel, and panels therefore will not have referred to it in panel reports. Accordingly, if appellants intend to argue that issue on appeal, they must refer to it in Notices of Appeal in a way that will enable appellees to discern it and know the case they have to meet.

Accordingly, we do not believe that the European Communities can be said to have been notified that the United States intended to argue on appeal that the Panel failed to act consistently with Article 11 of the DSU, and, consequently, we consider that the issue of the Panel's compliance with Article 11 of the DSU is not properly before us in this appeal."[1247]

867. In *Japan – Apples*, the Appellate Body stressed that notice of an Article 11 claim cannot be assumed merely because there is a challenge to a panel's analysis of a substantive provision of a WTO agreement.

"By referring to the Panel's alleged failure to comply with Article 11 of the DSU only in the context of Article 2.2, Japan did not enable the United States to 'know the case [it had] to meet'[1248] as to the Article 11 claim related to Article 5.1 of the *SPS Agreement*. The Appellate Body has consistently emphasized that due process requires that a Notice of Appeal place an appellee on notice of the issues raised on appeal.[1249] It is this concern with due process, reflected in Rule 20 of the *Working Procedures*, that underlay the Appellate Body's ruling on the sufficiency of the Notice of Appeal in *US – Countervailing Measures on Certain EC Products*.

Japan acknowledged during the oral hearing that it did not give the United States notice of its Article 11 claim specifically with respect to the Panel's analysis under Article 5.1 of the *SPS Agreement*. Japan claimed, however, that 'since we raised the claim under Article 5.1 of the *SPS Agreement*, this naturally involved some factual issues and . . . we can assume that the United States was notified' as to the related Article 11 claim. We disagree. As noted above,[1250] the Appellate Body determined in *US – Countervailing Measures on Certain EC Products* that Article 11 claims are distinct from those raised under substantive provisions of other covered agreements. It follows from this distinction that notice of an Article 11 challenge cannot be 'assumed' merely because there is a challenge to a panel's analysis of a substantive provision of a WTO agreement. Rather, an Article 11 claim constitutes a 'separate "allegation of error"'[1251] that

---

[1244] (*footnote original*) Appellate Body Report, WT/DS58/AB/R, adopted 6 November 1998, DSR 1998:VII, 2755, para. 97.

[1248] Appellate Body Report, *US – Countervailing Measures on Certain EC Products*, para. 74.

[1249] (*footnote original*) For example, Appellate Body Report, *US – Offset Act (Byrd Amendment)*, para. 195; Appellate Body Report, *US – Countervailing Measures on Certain EC Products*, para. 62; Appellate Body Report, *EC – Bananas III*, para. 152; and Appellate Body Report, *US – Shrimp*, para. 97.

[1250] (*footnote original*) *Supra*, para. 123, quoting Appellate Body Report, *US – Countervailing Measures on Certain EC Products*, para. 74.

[1251] (*footnote original*) Appellate Body Report, *Chile – Price Band System*, para. 182, quoting Rule 20(2)(d) of the *Working Procedures*. In this respect, we note the distinction between *claims* and *arguments* in the context of determining whether claims have been properly identified in the request for the

must be included in a Notice of Appeal. We therefore reject Japan's assertion that an Article 11 challenge is only a 'legal argument' underlying the issues raised on appeal.[1252]" [1253]

868. In *US – Steel Safeguards*, the Appellate Body further emphasized that a claim under Article 11 of the *DSU* must not be vague or ambiguous but stand by itself and be substantiated, as such, and not as subsidiary to another alleged violation:

"A challenge under Article 11 of the DSU must not be vague or ambiguous. On the contrary, such a challenge must be clearly articulated and substantiated with specific arguments. An Article 11 claim is not to be made lightly, or merely as a subsidiary argument or claim in support of a claim of a panel's failure to construe or apply correctly a particular provision of a covered agreement.[1254] A claim under Article 11 of the DSU must stand by itself and be substantiated, as such, and not as subsidiary to another alleged violation.

The United States' arguments on Article 11 of the DSU are mentioned only in passing in its appellant's submission. Nowhere do we find a clearly articulated claim or specific arguments that would support such a claim. Moreover, the United States did not clarify its challenge under Article 11 of the DSU during the oral hearing. In sum, the United Stated has not substantiated its claim that the Panel acted inconsistently with Article 11 of the DSU, and this claim must therefore fail." [1255]

11. Rule 23: multiple appeals (cross appeal)

(a) Conditional appeals

869. In *US – Gasoline*, the United States argued that certain of Venezuela's and Brazil's arguments were in fact conditional appeals and requested the Appellate Body to disregard them since those two parties had not filed a notice of appeal in that regard. The Appellate Body agreed with the United States and considered that Venezuela and Brazil should have taken advantage of Rules 23(1) or 23(4) of the Working Procedures:

"The arguments raised by Venezuela and Brazil on the clean air and TBT issues may be seen to be, in effect, conditional appeals, that is, conditional on the Appellate Body's overturning the Panel's overall findings on Article XX(g) and not finding in favour of Venezuela and Brazil as to the other requirements of Article XX. This condition is not fulfilled. Even if this condition had been fulfilled, the Appellate Body would have been most reluctant to pass upon these two issues. We observe, in the first place, that the issues in fact raised by the Appellant, the United States, are not of the kind which cannot be decided without at the same time necessarily resolving the clean air issue or the applicability of the *TBT Agreement*. In the second place, to deal with those two issues [i.e. the clean air issue and the application of the TBT Agreement], under the circumstances of this appeal, would have required the Appellate Body casually to disregard its own Working Procedures and to do so in the absence of a compelling reason grounded on, for instance, fundamental fairness or force majeure. Venezuela and Brazil could have appealed the Panel's finding and non-finding on the two matters by taking advantage of Rules 23(1) or 23(4) of the Working Procedures and thereby placing the Appellate Body in a position to dispose of those issues directly in one and the same appellate proceeding.

. . . the route they chose for addressing the two issues in question is not contemplated by the Working Procedures, and therefore, these issues are not properly the subject of this appeal." [1256]

870. In *US – Steel Safeguards*, the complainants made a number of conditional appeals. These appeals were conditional upon the Appellate Body reversing some of the Panel's findings. Since the Appellate Body upheld those findings, it did not consider it necessary to examine those conditional appeals.[1257]

12. Rule 24: third participants

871. In *Argentina – Footwear (EC)*, the Appellate Body received a letter from the Government of Paraguay indicating its interest "in attending" the oral hearing in this appeal. Several days later, the Appellate Body received a second letter from Paraguay clarifying that it was not requesting an opportunity to "make oral arguments or presentations at the oral hearing" as set forth in Rule 27.3 of the Working Procedures. Rather, Paraguay maintained that, as a third party which had notified its interest to the DSB under Article 10.2 of the DSU, it had the right to "participate passively" in the oral hearing before the Appellate Body in the present dispute. No participant or third participant objected to the participation of

establishment of a panel (Appellate Body Report, *EC – Bananas III*, paras. 141–143; Appellate Body Report, *EC – Hormones*, para. 156), and we affirm the Appellate Body's observation in *Chile – Price Band System* that "this distinction between claims and legal arguments under Article 6.2 of the DSU is also relevant to the distinction between 'allegations of error' and legal arguments as contemplated by Rule 20 of the *Working Procedures*." (Appellate Body Report, para. 182)

[1252] (*footnote original*) Japan's response to questioning at the oral hearing. As discussed, *supra*, at paragraph 123, the Appellate Body rejected a similar contention by the appellant in *US – Countervailing Measures on Certain EC Products*. (Appellate Body Report, paras. 73–74) The Appellate Body made a similar observation in *US – Steel Safeguards*. (Appellate Body Report, para. 498)

[1253] Appellate Body Report on *Japan – Apples*, paras. 126–127.

[1254] (*footnote original*) The United States further clarified during the oral hearing that if we were to conclude that the Panel erred in its findings on Article 4.2(b) of the *Agreement on Safeguards*, it would not be necessary for us to reach its claim under Article 11.

[1255] Appellate Body Report on *US – Steel Safeguards*, paras. 498–499.

[1256] Appellate Body Report on *US – Gasoline*, p. 12.

[1257] Appellate Body Report on *US – Steel Safeguards*, paras. 508–512.

Paraguay on a "passive" basis. Subsequently, the Members of the Division hearing the appeal informed Paraguay, the participants and third participants that, having regard to the provisions of Articles 10.2 and 17.4 of the DSU as well as the provisions of Rules 24 and 27 of the Working Procedures, Paraguay would be allowed to attend the oral hearing as a "passive observer".[1258]

872. In *India – Autos,* the Appellate Body defined the scope of "passive observer" as attending the oral hearing and hearing the oral statements and responses to questioning by the participants and the third participant in this appeal.[1259]

13. Rule 26: working schedule

(a) Extension of deadline for participants' or third participants' submissions

873. In *EC – Bananas III*, in accordance with Rule 16(2) of the Working Procedures, and at the request of the complaining parties, the Appellate Body granted a two-day extension for the filing of the appellees' and third participants' submissions.[1260]

874. In *Guatemala – Cement I*, Guatemala filed an appellant's submission drafted in Spanish. Two weeks later, Mexico filed an appellee's submission also drafted in Spanish. In order to ensure that the third participant would have time to prepare its submission after receiving an English version of the appellant's submission, the Appellate Body granted the United States additional time to file its third participant's submission.[1261]

875. In *EC – Bed Linen*, the European Communities and India requested the Appellate Body to extend the time-period for filing the appellee's and third participant's submissions. The Division hearing the appeal accepted the request pursuant to Rule 16(2) of the *Working Procedures* and in the light of the "exceptional circumstances" in that appeal.[1262]

876. In *US – Softwood Lumber IV*, for scheduling reasons, the United States withdrew its notice of appeal pursuant to Rule 30 of the Working Procedures, conditional on its right to re-file the notice of appeal at a later date. Three weeks later, the United States re-filed a substantively identical notice of appeal pursuant to Rule 20 of the Working Procedures. On that same day, the United States filed its appellant's submission in accordance with the Working Schedule drawn up by the Division for this appeal.[1263] The European Communities, a third participant in the proceedings, requested the Appellate Body to modify the Working Schedule in light of these developments. The following day, the Appellate Body declined the European Communities' request, noting that extending the date for the filing of third participants' submissions would significantly reduce the time available for the Division to consider carefully the arguments raised therein as well as the time available to the participants to respond to those arguments. The Division also observed that the new notice of appeal filed by the United States was, in all relevant respects, identical to the one submitted previously, and that the critical time-period for third participants and appellees to prepare their responses to arguments raised by appellants and other appellants is the period between the receipt of the appellant's or other appellant's submission, which contains the appellants' arguments, and the due date for the filing of the third participants' submissions. The Division noted that the time-period between the receipt of the appellant's submission and the due date for third participants' submissions in this case was the same as it would have been had the notice of appeal been filed 10 days before the date of the appellant's submission, as normally occurs.[1264]

(b) Extension of deadline for circulation of Appellate Body Report

877. In this regard, see Section XVII.B.4 above.

14. Rule 27: oral hearing

(a) Change of date

878. For information relating to requests by parties to change the date set for an oral hearing, see paragraphs 853–854 above.

(b) Joint oral hearing

879. In *US – 1916 Act,* the United States, the European Communities and Japan appealed certain issues of law and legal interpretations developed in the Panel Reports, *US – 1916 Act,* complaint by the European Communities[1265] and *US – 1916 Act,* complaint by Japan.[1266] These Panel Reports were rendered by two Panels composed of the same three members.[1267] The

[1264] Appellate Body Report on *US – Softwood Lumber IV,* para. 7.
[1265] (*footnote original*) WT/DS136/R, 31 March 2000.
[1266] (*footnote original*) WT/DS162/R, 29 May 2000.
[1267] (*footnote original*) As the composition of both Panels was identical, we will refer to the Panels as "the Panel".

two Panel Reports, while not identical, were alike in all major respects.[1268] In view of the close similarity of the issues raised in the two appeals, it was decided, after consultation with the parties, that a single Division would hear and decide both appeals.[1269]

15. Rule 28: written responses

880. In *US – Gasoline*, further to the oral hearing, the participants and third participants were invited to provide, and did provide, the Appellate Body and each other with final written statements of their respective positions.[1270]

881. In *Japan – Alcoholic Beverages II*, the parties answered most of the Appellate Body's questions orally at the hearing. They also answered a number in writing. The Division hearing the appeal gave each participant an opportunity to respond to the written post-hearing memoranda of the other participants.[1271]

882. In *US – Underwear*, the participants and third participant in the oral hearing did not take advantage of an invitation by the Division hearing the appeal to submit post-hearing memoranda. The United States later submitted a written clarification and amplification of its oral response to one of the Division's questions. The next day, Costa Rica responded in writing to the United States' clarification.[1272]

883. In *EC – Poultry*, at the request of the Division hearing the appeal, the participants and third participants submitted written post-hearing memoranda on particular issues relating to the appeal. The participants submitted their respective written replies to these post-hearing memoranda.[1273]

884. In *US – Shrimp*, at the invitation of the Appellate Body, the United States, India, Pakistan, Thailand and Malaysia filed additional submissions on certain issues arising under Article XX(b) and Article XX(g) of the *GATT 1994*.[1274]

885. In *Canada – Patent Term*, at the request of the Appellate Body Division hearing the appeal, the participants submitted additional memoranda on certain issues of legal interpretation arising under Articles 70.1 and 70.2 of the *TRIPS Agreement*. The Division afforded each participant an opportunity to respond to the additional memoranda submitted by the other participant.[1275]

886. In *US – Section 211 Appropriations Act*, the Division hearing the appeal requested that the participants submit additional written memoranda on the interpretation by domestic courts of Article 6*quinquies* of the Paris Convention (1967), or the interpretation by domestic courts of legislation incorporating Article 6*quinquies*. Both participants filed the additional written memoranda and were given an opportunity to respond to these memoranda at the oral hearing.[1276]

887. In *US – FSC (Article 21.5 – EC)*, at the oral hearing, the Division requested the United States to submit in writing certain of its responses to questioning. The Division also authorized the European Communities and the third participants, if they wished, to respond in writing by 30 November 2001.[1277]

16. Rule 30(1): withdrawal of appeal

(a) General

888. As of 31 December 2004, appellants have withdrawn their notices of appeal on five occasions. On four of these occasions (*US – FSC*;[1278] *US – Line Pipe*;[1279] *EC – Sardines*;[1280] *US – Softwood Lumber IV*)[1281] the withdrawals were "conditional" upon the filing of a new notice of appeal. In *India – Autos*, India withdrew its appeal and did not file a new one.[1282]

(b) Nature of the right to withdraw an appeal

889. The Appellate Body on *EC – Sardines* considered that Rule 30(1) grants the appellant the right to withdraw an appeal which on its face appears to be "unfettered". The Appellate Body however warned that, in spite of the permissive language of Rule 30(1), the Working Procedures must not be interpreted in a way that could undermine the effectiveness of the dispute settlement system:

> "This rule accords to the appellant a broad right to withdraw an appeal at any time. This right appears, on its face, to be unfettered: an appellant is not subject to any deadline by which to withdraw its appeal; an appellant need not provide any reason for the withdrawal; and an appellant need not provide any notice thereof to other participants in an appeal. More significantly for this appeal, there is nothing in the Rule prohibiting the attachment of conditions to a withdrawal. Indeed, in two previous cases, notices of appeal were withdrawn subject to the condition that new notices would be

[1281] Appellate Body Report on *US – Softwood Lumber IV*, para. 6.
[1282] Appellate Body Report on *India – Autos*, para. 15.

filed.[1283] Nor is the right to withdraw an appeal expressly subject to the condition that no new notice be filed on the same matter after the withdrawal.

However, despite this permissive language, we emphasize that the *Working Procedures* must not be interpreted in a way that could undermine the effectiveness of the dispute settlement system, for they have been drawn up pursuant to the DSU and as a means of ensuring that the dispute settlement mechanism achieves the aim of securing a positive solution to a dispute.[1284]"[1285]

(c) Legality of a conditional withdrawal of an appeal

890. In *EC – Sardines*, Peru claimed that Rule 30 did not permit conditions to be attached to a withdrawal of an appeal. The Appellate Body disagreed:

"Peru submits that nothing in Rule 30 of the *Working Procedures* permits the attachment of conditions to the withdrawal of a notice of appeal, and that, therefore, this appeal must be deemed to have been withdrawn irrespective of whether the conditions are met. We find no support in Rule 30 for Peru's position. While it is true that nothing in the text of Rule 30(1) explicitly permits an appellant to exercise its right subject to conditions, it is also true that nothing in the same text prohibits an appellant from doing so. As we have just explained, in our view, the right to withdraw a notice of appeal under Rule 30(1) is broad, subject only to the limitations we have described. Therefore, we see no reason to interpret Rule 30 as granting a right to withdraw an appeal only if that withdrawal is unconditional. Rather, the correct interpretation, in our view, is that Rule 30(1) permits conditional withdrawals, unless the condition imposed undermines the 'fair, prompt and effective resolution of trade disputes', or unless the Member attaching the condition is not 'engag[ing] in [dispute settlement] procedures in good faith in an effort to resolve the dispute.' Therefore, it is necessary to examine any such conditions attached to withdrawals on a case-by-case basis to determine whether, in fact, the particular condition in a particular case in any way obstructs the dispute settlement process, or in some way diminishes the rights of the appellee or other participants in the appeal."[1286]

891. In *EC – Sardines*, the Appellate Body considered whether, by withdrawing its notice of appeal subject to the condition of filing a replacement notice of appeal, the European Communities had effectively undermined the "fair, prompt and effective resolution of trade disputes" or has not "engage[d] in [dispute settlement] procedures in good faith in an effort to resolve the dispute".[1287] The Appellate Body considered that attaching a condition to the withdrawal was not unreasonable under the circumstances of the case[1288] and addressed examples of situations where the attachment of conditions to a withdrawal of appeal could be abusive or contrary to the DSU:

"We agree with Peru that there may be situations where the withdrawal of an appeal on condition of refiling a new notice, and the filing thereafter of a new notice, could be abusive and disruptive. However, in such cases, we would have the right to reject the condition, and also to reject any filing of a new notice of appeal, on the grounds either that the Member seeking to file such a new notice would not be engaging in dispute settlement proceedings in good faith, or that Rule 30(1) of the *Working Procedures* must not be used to undermine the fair, prompt, and effective resolution of trade disputes. We agree with Peru that the rules must be interpreted so as to 'ensure that appellate review proceedings do not become an arena for unfortunate litigation techniques that frustrate the objectives of the DSU, and that developing countries do not have the resources to deal with'.[1289] The case before us, however, presents none of these circumstances.

In addition, we believe there are circumstances that, although not constituting 'abusive practices', would be in violation of the DSU, and would, thus, compel us to disallow the conditional withdrawal of a notice of appeal as well as the filing of a replacement notice. For example, if the conditional withdrawal or the filing of a new notice were to take place after the 60-day deadline in Article 16.4 of the DSU for adoption of panel reports, this would effectively circumvent the requirement to file appeals within 60 days of circulation of panel reports. In such circumstances, we would reject the conditional withdrawal and the new notice of appeal.

. . .

Peru alleges that, in sanctioning the approach of the European Communities in this appeal, we would be creating a procedural right for which the DSU has not provided – a right that can only be added to the DSU through a formal amendment by the Members of the World Trade Organization (the 'WTO'). We are, however, not creating a new procedural right; we are only upholding the right to withdraw an appeal. In addition, in admitting the replacement Notice of Appeal in this dispute, we are, as we were in *United States – Import*

[1283] (*footnote original*) We note that, in both previous cases, unlike in this case, the Divisions hearing those appeals and the appellees had prior knowledge of, and agreed with, the process. (Appellate Body Report, *US – FSC*, *supra*, footnote 20, para. 4; Appellate Body Report, *US – Line Pipe*, *supra*, footnote 19, para. 13) Peru distinguishes this case on that basis; however, the mere fact that there was both notice and agreement in those cases does not, on its own, mean that such notice and agreement are required.
[1284] (*footnote original*) DSU, Article 3.7.
[1285] Appellate Body Report on *EC – Sardines*, paras. 138–139.

[1289] (*footnote original*) *Ibid.*, para. 51.

Prohibition of Certain Shrimp and Shrimp Products ('*US – Shrimp*'), seeking to:

> '. . . give full meaning and effect to the right of appeal and to give a party which regards itself aggrieved by some legal finding or interpretation in a panel report a real and effective opportunity to demonstrate the error in such finding or interpretation.'[1290]

In that same Report, we added that 'an appellee is, of course, always entitled to its full measure of due process.'[1291] In the circumstances of this case, we believe that Peru has been accorded the full measure of its due process rights, because the withdrawal of the original Notice and the filing of a replacement Notice were carried out in response to objections raised by Peru, the replacement Notice was filed in a timely manner and early in the process, and the replacement Notice contained no new or modified grounds of appeal. Also, Peru has not demonstrated that it suffered prejudice as a result. Moreover, Peru was given an adequate opportunity to address its concerns about the European Communities' actions during the course of the appeal."[1292]

(d) Replacement of a notice of appeal

892. The Appellate Body on *EC – Sardines*, having agreed to the European Communities' conditional withdrawal of an appeal, rejected Peru's argument that to permit this would be to create a new procedural right not foreseen under the *DSU*. Rather, the Appellate Body held that they were merely upholding the right to withdraw an appeal. See also paragraph 865 above.

> "Peru alleges that, in sanctioning the approach of the European Communities in this appeal, we would be creating a procedural right for which the DSU has not provided – a right that can only be added to the DSU through a formal amendment by the Members of the World Trade Organization (the 'WTO'). We are, however, not creating a new procedural right; we are only upholding the right to withdraw an appeal."[1293]

XXXIII. WORKING PROCEDURES FOR ARTICLE 22.6 ARBITRATIONS

A. TEXT OF THE WORKING PROCEDURES FOR ARTICLE 22.6 ARBITRATIONS

893. In both *Canada – Aircraft Credits and Guarantees (Article 22.6–Canada)* and *US – Offset Act (Byrd Amendment)*, the Arbitrator(s) attached their working procedures to their Decisions. The following is a reproduction of the working procedures in *US – Offset Act (Byrd Amendment)*:[1294]

> "The Arbitrator will follow the normal working procedures of the DSU where relevant and as adapted to the circumstances of the present proceedings, in accordance with the timetable it has adopted. In this regard, –
>
> (a) the Arbitrator will meet in closed session;
>
> (b) the deliberations of the Arbitrator and the documents submitted to it shall be kept confidential. However, this is without prejudice to the parties' disclosure of statements of their own positions to the public, in accordance with Article 18.2 of the DSU;
>
> (c) at any substantive meeting with the parties, the Arbitrator will ask the United States to present orally its views first, followed by the party(ies) having requested authorization to suspend concessions or other obligations;
>
> (d) each party shall submit all factual evidence to the Arbitrator no later than in its written submission to the Arbitrator, except with respect to evidence necessary during the hearing or for answers to questions. Derogations to this procedure will be granted upon a showing of good cause, in which case the other party(ies) shall be accorded a period of time for comments, as appropriate;
>
> (e) the parties shall provide an electronic copy (on a computer format compatible with the Secretariat's programmes) together with the printed version (6 copies) of their submissions, including the methodology paper, on the due date. All these copies must be filed with the Dispute Settlement Registrar, [. . .]. Electronic copies may be sent by e-mail to [. . .]. Parties shall provide 6 copies and an electronic version of their oral statements during any meeting with the Arbitrator or no later than noon on the day following any such meeting.
>
> (f) except as otherwise indicated in the timetable, submissions should be provided at the latest by 5.00 p.m. on the due date so that there is a possibility to send them to the Arbitrator on that date. As is customary, distribution of submissions to the other party(ies) shall be made by the parties themselves;
>
> (g) if necessary, and at any time during the proceedings, the Arbitrator may put questions to any party to clarify any point that is unclear. Whenever appropriate, a right to comment on the responses will be granted to the other party(ies);

[1290] (*footnote original*) Appellate Body Report, WT/DS58/AB/R, adopted 6 November 1998, DSR 1998:VII, 2755, para. 97.

[1291] (*footnote original*) *Ibid.*

[1292] Appellate Body Report on *EC – Sardines*, paras. 146–147 and 150.

[1293] Appellate Body Report on *EC – Sardines*, para. 150.

[1294] The text of these working procedures is similar to that of the earlier working procedures in *Canada – Aircraft Credits and Guarantees* (Article 22.6–Canada), although further developed.

(h) any material submitted shall be concise and limited to questions of relevance in this particular procedure.

(i) Parties have the right to determine the composition of their own delegations. Delegations may include, as representatives of the government concerned, private counsel and advisers. Parties shall have responsibility for all members of their delegations and shall ensure that all members of their delegations act in accordance with the rules of the DSU and these Working Procedures, particularly in regard to confidentiality of the proceedings. Parties shall provide a list of the participants of their delegation prior to, or at the beginning of, any meeting with the Arbitrator.

(j) to facilitate the maintenance of the record of the arbitration, and to maximize the clarity of submissions and other documents, in particular the references to exhibits submitted by parties, parties shall sequentially number their exhibits throughout the course of the arbitration."

B. INTERPRETATION AND APPLICATION OF THE WORKING PROCEDURES

1. Admissibility of new evidence

894. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, Canada requested the Arbitrator to reject certain evidence presented by Brazil on the grounds of its late submission (at the end of the substantive meeting). The Arbitrator, after referring to the working procedures and the existing jurisprudence in this area, accepted Canada's objection and rejected Brazil's new evidence:

> "We recall that paragraph (d) of our Working Procedures provides that:
>
> '(d) the parties shall submit all factual evidence to the Arbitrators no later than the first written submissions to the Arbitrators, except with respect to evidence necessary for purposes of rebuttals or answers to questions. Exceptions to this procedure will be granted upon a showing of good cause. In such cases, the other party shall be accorded a period of time for comment, as appropriate;'
>
> The purpose of paragraph (d), which is also found, *mutatis mutandis*, in most panel and Article 21.5 DSU compliance panel working procedures, is to ensure that parties are given sufficient opportunities to comment on any piece of evidence submitted in the course of the proceedings. Paragraph (d) clearly states the circumstances in which evidence may be submitted after the first written submission. First, additional evidence may be submitted for the purpose of rebuttals or answers to questions. Second, the Arbitrator may allow new evidence to be submitted at a later time, upon a showing of good cause. In all events, paragraph (d) requires that the other party shall be accorded a period of time for comment, as appropriate.
>
> We recall that in *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items,*[1295] the Panel was confronted with a situation of evidence submitted late in the proceedings.[1296] The Panel considered that due process required that it accept the evidence submitted by the United States on the understanding that Argentina would have a period of time to provide further comments on the additional pieces of evidence. The Appellate Body upheld the Panel's reasoning, confirming that the Panel enjoyed a certain amount of discretion in its dealing with evidence and stating that Argentina had not requested more time to comment.[1297]
>
> . . . In this case, Canada requests that the Arbitrator reject the evidence, since Brazil showed no good cause for submitting late a piece of information that had been available to it for some time.[1298] Brazil responds that Exhibits BRA-76 and 77 were submitted as part of its reply to question No. 2 of the Arbitrator to both parties. However, nowhere do we find any reference to these exhibits in Brazil's reply of 1 November 2002. Assuming the evidence was for purposes of rebuttal, we see no particular reason why it could not have been submitted together with Brazil's oral statement at our meeting rather than with its closing statement. By delaying the presentation of this evidence until its closing statement, Brazil's position as respondent gave it a procedural advantage since it spoke last, and it was not foreseen in the Working Procedures that Canada could reply at that point. This makes such a late submission of evidence even less acceptable. Intentionally submitting evidence at a time where the other party is normally no longer in a position to comment – as in this case – not only adversely affects the interests of that party, it also affects due process in general and can generate delays in the work of panels and Arbitrators, thus making it more difficult for them to meet the deadlines contained in the WTO Agreement. Hence, we felt it more appropriate to exclude such evidence rather than to allow Canada to respond, the more so as Canada had expressly requested the Arbitrator to reject such evidence. As a result, we decided not to take into account the evidence submitted by Brazil in Exhibits BRA-76 and 77."[1299]

[1295] (*footnote original*) Panel Report, *Argentina – Textiles and Apparel*, para. 6.55.

[1296] (*footnote original*) In that case, evidence had been submitted by the United States a few days before the second hearing of the panel.

[1297] (*footnote original*) Appellate Body Report, *Argentina – Textiles and Apparel*, paras. 80–81.

[1298] (*footnote original*) Exhibits BRA-76 and 77 are respectively dated 10 July 2001 and 19 October 2002.

[1299] Decision by the Arbitrator in *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, paras. 2.11–2.14.

2. Admissibility of new arguments

895. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, Brazil had advanced new arguments in its concluding remarks at the first substantive meeting. Canada thus presented an additional submission to the Arbitrator to respond to those arguments. The Arbitrator decided to accept this additional submission on the following grounds:

> "[Canada's additional] submission should not be treated as a reply to new evidence, but as a new submission of arguments which is not foreseen in the Working Procedures. A strict interpretation of our Working Procedures should lead us to disregard Canada's additional submission. However, we note that Brazil developed a rather new line of argumentation in its concluding remarks. It was in the interest of due process and of the information of the Arbitrator to hear what Canada had to say about it, if it wished to do so. We also note that, even if Canada decided to reply to Brazil's arguments, Brazil's right – as respondent – to speak last was preserved by the opportunity given to parties to comment on each other's replies to the questions of the Arbitrator. We saw no reason to formally intervene in that process as long as due process was ultimately respected. We also do not believe that our passivity in this respect could lead to an endless exchange of arguments since the comments on the replies to the questions were the last opportunity for parties to express their views, as provided by the Arbitrator at its hearing with the parties.
>
> For these reasons we decide to accept Canada's comments on Brazil's concluding statement and Brazil's remarks on those comments."[1300]

3. Confidential/non-confidential versions of the Arbitrators' decision

896. In *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, both parties insisted on the confidentiality of certain documents. The Arbitrator decided to prepare two versions of its decision: (i) a confidential version, including the details of its calculations and all the information relied upon, issued exclusively to the parties on a confidential basis; and (ii) a non-confidential version circulated to all WTO Members. In order to decide which information should be excluded from this non-confidential version, the Arbitrator requested the parties to identify the commercially sensitive information which they considered should be removed.[1301]

XXXIV. RULES OF CONDUCT FOR THE UNDERSTANDING ON RULES AND PROCEDURES GOVERNING THE SETTLEMENT OF DISPUTES

A. TEXT OF THE RULES OF CONDUCT[1302]

Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes

I. Preamble

Members,

Recalling that on 15 April 1994 in Marrakesh, Ministers welcomed the stronger and clearer legal framework they had adopted for the conduct of international trade, including a more effective and reliable dispute settlement mechanism;

Recognizing the importance of full adherence to the Understanding on Rules and Procedures Governing the Settlement of Disputes ("DSU") and the principles for the management of disputes applied under Articles XXII and XXIII of GATT 1947, as further elaborated and modified by the DSU;

Affirming that the operation of the DSU would be strengthened by rules of conduct designed to maintain the integrity, impartiality and confidentiality of proceedings conducted under the DSU thereby enhancing confidence in the new dispute settlement mechanism;

Hereby establish the following Rules of Conduct.

II. Governing Principle

1. Each person covered by these Rules (as defined in paragraph 1 of Section IV below and hereinafter called "covered person") shall be independent and impartial, shall avoid direct or indirect conflicts of interest and shall respect the confidentiality of proceedings of bodies pursuant to the dispute settlement mechanism, so that through the observance of such standards of conduct the integrity and impartiality of that mechanism are preserved. These Rules shall in no way modify the rights and obligations of Members under the DSU nor the rules and procedures therein.

III. Observance of the Governing Principle

1. To ensure the observance of the Governing Principle of these Rules, each covered person is expected (1) to adhere strictly to the provisions of the DSU; (2) to disclose the existence or development of any interest, relationship or matter that that person could reasonably be expected to know and that is likely to affect, or give rise

[1300] Decision by the Arbitrator in *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, paras. 2.16–2.17.
[1301] Decision by the Arbitrator on *Canada – Aircraft Credits and Guarantees (Article 22.6 – Canada)*, paras. 2.18–2.19.
[1302] WT/DSB/RC/W/1, subsequently circulated as document WT/DSB/RC/1.

to justifiable doubts as to, that person's independence or impartiality; and (3) to take due care in the performance of their duties to fulfil these expectations, including through avoidance of any direct or indirect conflicts of interest in respect of the subject matter of the proceedings.

2. Pursuant to the Governing Principle, each covered person shall be independent and impartial, and shall maintain confidentiality. Moreover, such persons shall consider only issues raised in, and necessary to fulfil their responsibilities within, the dispute settlement proceeding and shall not delegate this responsibility to any other person. Such person shall not incur any obligation or accept any benefit that would in any way interfere with, or which could give rise to, justifiable doubts as to the proper performance of that person's dispute settlement duties.

IV. Scope

1. These Rules shall apply, as specified in the text, to each person serving: (a) on a panel; (b) on the Standing Appellate Body; (c) as an arbitrator pursuant to the provisions mentioned in Annex "1a"; or (d) as an expert participating in the dispute settlement mechanism pursuant to the provisions mentioned in Annex "1b". These Rules shall also apply, as specified in this text and the relevant provisions of the Staff Regulations, to those members of the Secretariat called upon to assist the panel in accordance with Article 27.1 of the DSU or to assist in formal arbitration proceedings pursuant to Annex "1a"; to the Chairman of the Textiles Monitoring Body (hereinafter called "TMB") and other members of the TMB Secretariat called upon to assist the TMB in formulating recommendations, findings or observations pursuant to the WTO Agreement on Textiles and Clothing; and to Standing Appellate Body support staff called upon to provide the Standing Appellate Body with administrative or legal support in accordance with Article 17.7 of the DSU (hereinafter "Member of the Secretariat or Standing Appellate Body support staff"), reflecting their acceptance of established norms regulating the conduct of such persons as international civil servants and the Governing Principle of these Rules.

2. The application of these Rules shall not in any way impede the Secretariat's discharge of its responsibility to continue to respond to Members' requests for assistance and information.

3. These Rules shall apply to the members of the TMB to the extent prescribed in Section V.

V. Textiles Monitoring Body

1. Members of the TMB shall discharge their functions on an *ad personam* basis, in accordance with the requirement of Article 8.1 of the Agreement on Textiles and Clothing, as further elaborated in the working procedures of the TMB, so as to preserve the integrity and impartiality of its proceedings.[1]

(*footnote original*) [1] These working procedures, as adopted by the TMB on 26 July 1995 (G/TMB/R/1), currently include, *inter alia*, the following language in paragraph 1.4: "In discharging their functions in accordance with paragraph 1.1 above, the TMB members and alternates shall undertake not to solicit, accept or act upon instructions from governments, nor to be influenced by any other organisations or undue extraneous factors. They shall disclose to the Chairman any information that they may consider likely to impede their capacity to discharge their functions on an *ad personam* basis. Should serious doubts arise during the deliberations of the TMB regarding the ability of a TMB member to act on an *ad personam* basis, they shall be communicated to the Chairman. The Chairman shall deal with the particular matter as necessary."

VI. Self-Disclosure Requirements by Covered Persons

1. (a) Each person requested to serve on a panel, on the Standing Appellate Body, as an arbitrator, or as an expert shall, at the time of the request, receive from the Secretariat these Rules, which include an Illustrative List (Annex 2) of examples of the matters subject to disclosure.

(b) Any member of the Secretariat described in paragraph IV:1, who may expect to be called upon to assist in a dispute, and Standing Appellate Body support staff, shall be familiar with these Rules.

2. As set out in paragraph VI:4 below, all covered persons described in paragraph VI.1(a) and VI.1(b) shall disclose any information that could reasonably be expected to be known to them at the time which, coming within the scope of the Governing Principle of these Rules, is likely to affect or give rise to justifiable doubts as to their independence or impartiality. These disclosures include the type of information described in the Illustrative List, if relevant.

3. These disclosure requirements shall not extend to the identification of matters whose relevance to the issues to be considered in the proceedings would be insignificant. They shall take into account the need to respect the personal privacy of those to whom these Rules apply and shall not be so administratively burdensome as to make it impracticable for otherwise qualified persons to serve on panels, the Standing Appellate Body, or in other dispute settlement roles.

4. (a) All panellists, arbitrators and experts, prior to confirmation of their appointment, shall complete the form at Annex 3 of these Rules. Such information would be disclosed to the Chair of the Dispute Settlement Body ("DSB") for consideration by the parties to the dispute.

(b) (i) Persons serving on the Standing Appellate Body who, through rotation, are selected to hear the appeal of a particular panel case, shall review the factual portion of the Panel report and complete the form at Annex 3. Such information would be disclosed to the Standing Appellate Body for its consideration whether

the member concerned should hear a particular appeal.

(ii) Standing Appellate Body support staff shall disclose any relevant matter to the Standing Appellate Body, for its consideration in deciding on the assignment of staff to assist in a particular appeal.

(c) When considered to assist in a dispute, members of the Secretariat shall disclose to the Director-General of the WTO the information required under paragraph VI:2 of these Rules and any other relevant information required under the Staff Regulations, including the information described in the footnote.**

(*footnote original*) ** Pending adoption of the Staff Regulations, members of the Secretariat shall make disclosures to the Director-General in accordance with the following draft provision to be included in the Staff Regulations:

"When paragraph VI:4(c) of the Rules of Conduct for the DSU is applicable, members of the Secretariat would disclose to the Director-General of the WTO the information required in paragraph VI:2 of those Rules, as well as any information regarding their participation in earlier formal consideration of the specific measure at issue in a dispute under any provisions of the WTO Agreement, including through formal legal advice under Article 27.2 of the DSU, as well as any involvement with the dispute as an official of a WTO Member government or otherwise professionally, before having joined the Secretariat.

The Director-General shall consider any such disclosures in deciding on the assignment of members of the Secretariat to assist in a dispute.

When the Director-General, in the light of his consideration, including of available Secretariat resources, decides that a potential conflict of interest is not sufficiently material to warrant non-assignment of a particular member of the Secretariat to assist in a dispute, the Director-General shall inform the panel of his decision and of the relevant supporting information."

5. During a dispute, each covered person shall also disclose any new information relevant to paragraph VI:2 above at the earliest time they become aware of it.

6. The Chair of the DSB, the Secretariat, parties to the dispute, and other individuals involved in the dispute settlement mechanism shall maintain the confidentiality of any information revealed through this disclosure process, even after the panel process and its enforcement procedures, if any, are completed.

VII. Confidentiality

1. Each covered person shall at all times maintain the confidentiality of dispute settlement deliberations and proceedings together with any information identified by a party as confidential. No covered person shall at any time use such information acquired during such deliberations and proceedings to gain personal advantage or advantage for others.

2. During the proceedings, no covered person shall engage in ex parte contacts concerning matters under consideration. Subject to paragraph VII:1, no covered person shall make any statements on such proceedings or the issues in dispute in which that person is participating, until the report of the panel or the Standing Appellate Body has been derestricted.

VIII. Procedures Concerning Subsequent Disclosure and Possible Material Violations

1. Any party to a dispute, conducted pursuant to the WTO Agreement, who possesses or comes into possession of evidence of a material violation of the obligations of independence, impartiality or confidentiality or the avoidance of direct or indirect conflicts of interest by covered persons which may impair the integrity, impartiality or confidentiality of the dispute settlement mechanism, shall at the earliest possible time and on a confidential basis, submit such evidence to the Chair of the DSB, the Director-General or the Standing Appellate Body, as appropriate according to the respective procedures detailed in paragraphs VIII:5 to VIII:17 below, in a written statement specifying the relevant facts and circumstances. Other Members who possess or come into possession of such evidence may provide such evidence to the parties to the dispute in the interest of maintaining the integrity and impartiality of the dispute settlement mechanism.

2. When evidence as described in paragraph VIII:1 is based on an alleged failure of a covered person to disclose a relevant interest, relationship or matter, that failure to disclose, as such, shall not be a sufficient ground for disqualification unless there is also evidence of a material violation of the obligations of independence, impartiality, confidentiality or the avoidance of direct or indirect conflicts of interests and that the integrity, impartiality or confidentiality of the dispute settlement mechanism would be impaired thereby.

3. When such evidence is not provided at the earliest practicable time, the party submitting the evidence shall explain why it did not do so earlier and this explanation shall be taken into account in the procedures initiated in paragraph VIII:1.

4. Following the submission of such evidence to the Chair of the DSB, the Director-General of the WTO or the Standing Appellate Body, as specified below, the procedures outlined in paragraphs VIII:5 to VIII:17 below shall be completed within fifteen working days.

Panellists, Arbitrators, Experts

5. If the covered person who is the subject of the evidence is a panellist, an arbitrator or an expert, the party shall provide such evidence to the Chair of the DSB.

6. Upon receipt of the evidence referred to in paragraphs VIII:1 and VIII:2, the Chair of the DSB shall forthwith provide the evidence to the person who is the subject of such evidence, for consideration by the latter.

7. If, after having consulted with the person concerned, the matter is not resolved, the Chair of the DSB shall

forthwith provide all the evidence, and any additional information from the person concerned, to the parties to the dispute. If the person concerned resigns, the Chair of the DSB shall inform the parties to the dispute and, as the case may be, the panellists, the arbitrator(s) or experts.

8. In all cases, the Chair of the DSB, in consultation with the Director-General and a sufficient number of Chairs of the relevant Council or Councils to provide an odd number, and after having provided a reasonable opportunity for the views of the person concerned and the parties to the dispute to be heard, would decide whether a material violation of these Rules as referred to in paragraphs VIII:1 and VIII:2 above has occurred. Where the parties agree that a material violation of these Rules has occurred, it would be expected that, consistent with maintaining the integrity of the dispute settlement mechanism, the disqualification of the person concerned would be confirmed.

9. The person who is the subject of the evidence shall continue to participate in the consideration of the dispute unless it is decided that a material violation of these Rules has occurred.

10. The Chair of the DSB shall thereafter take the necessary steps for the appointment of the person who is the subject of the evidence to be formally revoked, or excused from the dispute as the case may be, as of that time.

Secretariat

11. If the covered person who is the subject of the evidence is a member of the Secretariat, the party shall only provide the evidence to the Director-General of the WTO, who shall forthwith provide the evidence to the person who is the subject of such evidence and shall further inform the other party or parties to the dispute and the panel.

12. It shall be for the Director-General to take any appropriate action in accordance with the Staff Regulations.***

(*footnote original*) *** Pending adoption of the Staff Regulations, the Director-General would act in accordance with the following draft provision for the Staff Regulations: "If paragraph VIII:11 of the Rules of Conduct for the DSU governing the settlement of disputes is invoked, the Director-General shall consult with the person who is the subject of the evidence and the panel and shall, if necessary, take appropriate disciplinary action."

13. The Director-General shall inform the parties to the dispute, the panel and the Chair of the DSB of his decision, together with relevant supporting information.

Standing Appellate Body

14. If the covered person who is the subject of the evidence is a member of the Standing Appellate Body or of the Standing Appellate Body support staff, the party shall provide the evidence to the other party to the dispute and the evidence shall thereafter be provided to the Standing Appellate Body.

15. Upon receipt of the evidence referred to in paragraphs VIII:1 and VIII:2 above, the Standing Appellate Body shall forthwith provide it to the person who is the subject of such evidence, for consideration by the latter.

16. It shall be for the Standing Appellate Body to take any appropriate action after having provided a reasonable opportunity for the views of the person concerned and the parties to the dispute to be heard.

17. The Standing Appellate Body shall inform the parties to the dispute and the Chair of the DSB of its decision, together with relevant supporting information.

***

18. Following completion of the procedures in paragraphs VIII:5 to VIII:17, if the appointment of a covered person, other than a member of the Standing Appellate Body, is revoked or that person is excused or resigns, the procedures specified in the DSU for initial appointment shall be followed for appointment of a replacement, but the time-periods shall be half those specified in the DSU.**** The member of the Standing Appellate Body who, under that Body's rules, would next be selected through rotation to consider the dispute, would automatically be assigned to the appeal. The panel, members of the Standing Appellate Body hearing the appeal, or the arbitrator, as the case may be, may then decide, after consulting with the parties to the dispute, on any necessary modifications to their working procedures or proposed timetable.

(*footnote original*) **** Appropriate adjustments would be made in the case of appointments pursuant to the Agreement on Subsidies and Countervailing Measures.

19. All covered persons and Members concerned shall resolve matters involving possible material violations of these Rules as expeditiously as possible so as not to delay the completion of proceedings, as provided in the DSU.

20. Except to the extent strictly necessary to carry out this decision, all information concerning possible or actual material violations of these Rules shall be kept confidential.

IX. Review

1. These Rules of Conduct shall be reviewed within two years of their adoption and a decision shall be taken by the DSB as to whether to continue, modify or terminate these Rules.

ANNEX 1a

Arbitrators acting pursuant to the following provisions:

- Articles 21.3(c); 22.6 and 22.7; 26.1(c) and 25 of the DSU;
- Article 8.5 of the Agreement on Subsidies and Countervailing Measures;
- Articles XXI.3 and XXII.3 of the General Agreement on Trade in Services.

ANNEX 1b

Experts advising or providing information pursuant to the following provisions:

- Article 13.1; 13.2 of the DSU;
- Article 4.5 of the Agreement on Subsidies and Countervailing Measures;
- Article 11.2 of the Agreement on the Application of Sanitary and Phytosanitary Measures;
- Article 14.2; 14.3 of the Agreement on Technical Barriers to Trade.

ANNEX 2

ILLUSTRATIVE LIST OF INFORMATION TO BE DISCLOSED

This list contains examples of information of the type that a person called upon to serve in a dispute should disclose pursuant to the Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes.

Each covered person, as defined in Section IV:1 of these Rules of Conduct, has a continuing duty to disclose the information described in Section VI:2 of these Rules which may include the following:

(a) financial interests (e.g. investments, loans, shares, interests, other debts); business interests (e.g. directorship or other contractual interests); and property interests relevant to the dispute in question;

(b) professional interests (e.g. a past or present relationship with private clients, or any interests the person may have in domestic or international proceedings, and their implications, where these involve issues similar to those addressed in the dispute in question);

(c) other active interests (e.g. active participation in public interest groups or other organisations which may have a declared agenda relevant to the dispute in question);

(d) considered statements of personal opinion on issues relevant to the dispute in question (e.g. publications, public statements);

(e) employment or family interests (e.g. the possibility of any indirect advantage or any likelihood of pressure which could arise from their employer, business associates or immediate family members).

ANNEX 3

Dispute Number: _____

WORLD TRADE ORGANIZATION DISCLOSURE FORM

I have read the Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU) and the Rules of Conduct for the DSU. I understand my continuing duty, while participating in the dispute settlement mechanism, and until such time as the Dispute Settlement Body (DSB) makes a decision on adoption of a report relating to the proceeding or notes its settlement, to disclose herewith and in future any information likely to affect my independence or impartiality, or which could give rise to justifiable doubts as to the integrity and impartiality of the dispute settlement mechanism; and to respect my obligations regarding the confidentiality of dispute settlement proceedings.

Signed: Dated:

B. INTERPRETATION AND APPLICATION OF THE RULES OF CONDUCT

897. At its meeting on 3 December 1996,[1303] the DSB adopted the Rules of Conduct for the Understanding on Rules and Procedures Governing the Settlement of Disputes.[1304]

898. With a communication, dated 20 January 1997, from the Chairman of the Appellate Body addressed to the Chairman of the Dispute Settlement Body, and circulated to Members for information, "the Appellate Body confirms that the Rules of Conduct have been directly incorporated into the Working Procedures for Appellate Review. Accordingly, the Rules of Conduct, as adopted by the Dispute Settlement Body, are made a part of, and supersede Annex II of, the Working Procedures for Appellate Review."[1305]

899. At its meeting on 25, 28 and 29 January and 1 February 1999,[1306] and in accordance with Section IX of the Rules of Conduct, which provides for a periodic review of the rules, the DSB agreed to continue to apply the current Rules of Conduct.[1307]

XXXV. RULES OF PROCEDURE FOR MEETINGS OF THE DISPUTE SETTLEMENT BODY

A. TEXT OF THE RULES OF PROCEDURE

Rules of Procedure for Meetings of the Dispute Settlement Body[1308]

1. When the General Council convenes as the Dispute Settlement Body (DSB), it shall follow the rules of procedure for meetings of the General Council, except as provided otherwise in the Dispute Settlement Understanding (DSU) or below.

[1303] WT/DSB/M/27, section 1.
[1304] WT/DSB/RC/W/1, subsequently circulated as document WT/DSB/RC/1.
[1305] WT/DSB/RC/2.
[1306] WT/DSB/M/54, section 9.
[1307] WT/DSB/RC/1.
[1308] WT/DSB/9.

Chapter IV – Observers

2. Observership at meetings of the DSB shall be governed by paragraphs 9 to 11 of Annex 2 and paragraph 3, including footnote 5 of Annex 3 to these Rules.[1]

(*footnote original*) [1] WT/L/161.

Chapter V – Officers

3. The DSB shall elect its own Chairperson* from among the representatives of Members. The election shall take place at the first meeting of the year and shall take effect at the end of the meeting. The Chairperson shall hold office until the end of the first meeting of the following year.

(*footnote original*) * The Dispute Settlement Body shall apply the relevant guidelines contained in the "Guidelines for Appointment of Officers to WTO Bodies" (WT/L/31).

4. If the Chairperson is absent from any meeting or part thereof, the Chairperson of the General Council or in the latter's absence, the Chairperson of the Trade Policy Review Body, shall perform the functions of the Chairperson. If the Chairpersons of the General Council and of the Trade Policy Review Body are also not present, the DSB shall elect an interim Chairperson for that meeting or that part of the meeting.

5. If the Chairperson can no longer perform the functions of the office, the DSB shall designate a Chairperson in accordance with paragraph 4 to perform those functions pending the election of a new Chairperson.

B. INTERPRETATION AND APPLICATION OF THE RULES OF PROCEDURE

1. Adoption

900. At its meeting of 10 February 1995, the DSB, in accordance with Article IV:3 of the WTO Agreement, adopted the Rules of Procedure contained in PC/IPL/9 with the exception of the rules concerning officers and the participation of international organizations as observers in the WTO, which were at the time open issues. Once agreement was reached on those pending issues, the rules of procedure were circulated in document WT/DSB/9.

2. Reference to General Council procedures

901. Further to its own rules of procedures, the DSB follows the rules of procedure for meetings of the General Council,[1309] except as otherwise provided in the DSU or in document WT/DSB/9.

XXXVI. OTHER ISSUES IN WTO DISPUTE SETTLEMENT PROCEEDINGS

A. ORDER OF ANALYSIS

1. Provisions of different WTO Agreements

(a) Test: Agreement that deals specifically and in detail with the measure at issue

902. In *EC – Bananas III*, the Appellate Body enunciated the test that should be applied in order to decide the order of analysis where two or more provisions from different covered Agreements appear *a priori* to apply to the measure in question. According to the Appellate Body, the provision from the Agreement that "deals specifically, and in detail" with the measures at issue should be analysed first. See paragraph 903 below.[1310]

(i) GATT 1994 versus Licensing Agreement

903. In *EC – Bananas III*, the Appellate Body, disagreeing with the Panel's choice, considered that the Panel should have applied the *Licensing Agreement* first (instead of the GATT 1994), "since this agreement deals specifically, and in detail, with the administration of import licensing procedures":

> "Although Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures. If the Panel had done so, then there would have been no need for it to address the alleged inconsistency with Article X:3(a) of the GATT 1994."[1311]

(ii) GATT 1994 versus SPS Agreement

904. In *EC – Hormones*, the Panel, in a finding not reviewed by the Appellate Body, considered which Agreement, the *SPS Agreement* or the *GATT 1994*,[1312] should be examined first in this particular dispute. The Panel considered that the *SPS Agreement* was to be addressed first because it "specifically addresses the type of measure in dispute":

> "[I]n accordance with the ordinary meaning to be given to the terms of the SPS Agreement in their context and in the light of its object and purpose (in conformity with Article 31 of the Vienna Convention), there is no requirement, in any of the provisions of the SPS Agreement,

[1309] WT/L/161.
[1310] Appellate Body Report on *EC – Bananas III*, para. 204.
[1311] Appellate Body Report on *EC – Bananas III*, para. 204.
[1312] As regards the relationship between the *Agreement on Sanitary and Phytosanitary Measures* and *GATT 1994*, see Section XV of the Chapter on the *Agreement on Sanitary and Phytosanitary Measures*.

that a prior violation of a GATT provision need be established before the SPS Agreement applies.

Having reached the conclusion that we are not *per se* required to address GATT claims prior to those raised under the SPS Agreement, we must then decide which of the two agreements we should examine first in this particular dispute. The SPS Agreement specifically addresses the type of measure in dispute. If we were to examine GATT first, we would in any event need to revert to the SPS Agreement: if a violation of GATT were found, we would need to consider whether Article XX(b) could be invoked and would then necessarily need to examine the SPS Agreement; if, on the other hand, no GATT violation were found, we would still need to examine the consistency of the measure with the SPS Agreement since nowhere is consistency with GATT presumed to be consistency with the SPS Agreement. For these reasons, and in order to conduct our consideration of this dispute in the most efficient manner, we shall first examine the claims raised under the SPS Agreement."[1313]

905. The Panel on *Australia – Salmon* also dealt with the question whether to address first the provisions of the *GATT 1994* or those of the *SPS Agreement*:

"Canada recognizes that the SPS Agreement provides for obligations additional to those contained in GATT 1994, but, nevertheless, first addresses its claim under Article XI of GATT 1994. Australia invokes Article 2.4 of the SPS Agreement, which presumes GATT consistency for measures found to be in conformity with the SPS Agreement, to first address the SPS Agreement. We note, moreover, that (1) the SPS Agreement specifically addresses the type of measure in dispute, and (2) we will in any case need to examine the SPS Agreement, whether or not we find a GATT violation (since GATT consistency is nowhere presumed to constitute consistency with the SPS Agreement). In order to conduct our consideration of this dispute in the most efficient manner, we shall, therefore, first address the claims made by Canada under the SPS Agreement before addressing those put forward under GATT 1994."[1314]

(iii) GATT 1994 versus TBT Agreement

906. In *EC – Asbestos*, the Panel was faced with the difficulty of applying the above test set out by the Appellate Body in *EC – Bananas III* because the parties did not agree on the legal nature of the measure itself (technical regulation covered by the *TBT Agreement* or a general ban coming under the scope of the *GATT 1994* alone) (see paragraphs 902–903 above). The Panel decided to start by examining the ways in which the Decree at issue violated the *TBT Agreement* since "if the Decree is a 'technical regulation' within the meaning of the *TBT Agreement*, then the latter would deal with the measure in the most specific and most detailed manner":

"According to the Appellate Body in *European Communities – Regime for the Importation, Sale and Distribution of Bananas,*[1315] when the GATT 1994 and another Agreement in Annex 1A appear *a priori* to apply to the measure in question, the latter should be examined on the basis of the Agreement that deals 'specifically, and in detail,' with such measures. In this particular case, as the parties do not agree on the legal nature of the measure itself (technical regulation covered by the TBT Agreement or general ban coming under the scope of the GATT 1994 alone), it is difficult at this stage to determine which Agreement, either the GATT 1994 or the TBT Agreement, deals with the measure in question most specifically and in the most detailed manner without undertaking an in-depth examination of the measure in the light of each Agreement.

In order to decide upon the order in which our consideration should proceed, in the way suggested by the Appellate Body, the hypothesis should be that, if the Decree is a 'technical regulation' within the meaning of the TBT Agreement, then the latter would deal with the measure in the most specific and most detailed manner. Consequently, in our view it must first be determined whether the Decree is a technical regulation within the meaning of the TBT Agreement. If this is the case, we shall start considering this case by examining the ways in which the Decree violates the TBT Agreement. If we find that the Decree is not a 'technical regulation', we shall then immediately start to consider it in the context of the GATT 1994."[1316]

907. In *EC – Sardines*, the Panel considered whether to examine the claims in the order requested by Peru. Peru had requested the Panel to first examine its claim under Article 2.4 of the *TBT Agreement* and then examine its claims under Articles 2.2 and 2.1 of the *TBT Agreement* only if the EC Regulation was not considered inconsistent with Article 2.4. Peru further requested the Panel to examine its claims in respect of Article III:4 of the *GATT 1994* only if the EC Regulation was not considered inconsistent with the provisions of the *TBT Agreement* invoked by Peru. The Panel recalled the Appellate Body's statement in *EC – Bananas III* stating that where two agreements apply simultaneously, a panel should normally consider the more specific agreement before the more general agreement. Furthermore, the Panel recalled the Appellate Body's statement in *US – FSC* in relation to the sequencing of claims:

"These requests by Peru on sequencing of claims thereby oblige us to consider whether there is an interpretative methodology that compels panels to adopt a particular

[1313] Panel Report on *EC – Hormones*, paras. 8.41–8.42.
[1314] Panel Report on *Australia – Salmon*, para. 8.39.
[1315] (*footnote original*) Adopted on 25 September 1997, WT/DS27/AB/R, hereinafter "*European Communities – Bananas*", para. 204.
[1316] Panel Report on *EC – Asbestos*, paras. 8.16–8.17.

order which, if not followed, would constitute an error of law.[1317] We recall the Appellate Body's statement in *US – FSC* in relation to the US argument that the panel erred by commencing its analysis with Article 3.1(a) rather than footnote 59 of the Subsidies and Countervailing Measures Agreement. The Appellate Body stated:

> 'In our view, it was not a legal error for the Panel to begin its examination of whether the FSC measure involves export *subsidies* by examining the general definition of a "*subsidy*" that is applicable to export *subsidies* in Article 3.1(a). In any event, whether the examination begins with the general definition of a "subsidy" in Article 1.1 or with footnote 59, we believe that the outcome of the European Communities' claim under Article 3.1(a) would be the same. The appropriate meaning of both provisions can be established and can be given effect, irrespective of whether the examination of the claim of the European Communities under Article 3.1(a) begins with Article 1.1 or with footnote 59.'[1318]

In our view, if the EC Regulation is a technical regulation, it would not constitute an error of law to start the examination of the consistency of the EC Regulation with Article 2.4 followed by Articles 2.2 and 2.1 of the TBT Agreement as necessary since such sequential examination would not affect the interpretation of the other provisions."[1319]

(iv) GATT 1994 versus Agreement on Agriculture

908. In *EC – Bananas III*, the Appellate Body considered that "the provisions of the GATT 1994, including Article XIII, apply to market access commitments concerning agricultural products, except to the extent that the *Agreement on Agriculture* contains specific provisions dealing specifically with the same matter".[1320]

909. In *Chile – Price Band System*, the Appellate Body considered whether the Panel had erred in choosing to examine Argentina's claim under Article 4.2 of the *Agreement on Agriculture* before examining its claim under Article II:1(b) of the *GATT 1994*. The Appellate Body upheld the Panel's order of analysis and found that Article 4.2 of the *Agreement on Agriculture* "applies *specifically* to agricultural products," whereas Article II:1(b) of the *GATT 1994* "applies *generally* to trade in *all* goods".[1321]

(v) GATT 1994 versus SCM Agreement

910. In *Indonesia – Autos*, the Panel, in a finding not reviewed by the Appellate Body, considered whether there is a conflict between the *SCM Agreement* and Article III of the *GATT 1994*. The Panel recalled that for a conflict to exist between two agreements, they must cover the same substantive matter. The Panel found that there was no conflict since the two provisions have different purposes.[1322]

(vi) GATT 1994 versus TRIMs Agreement

911. In *Indonesia – Autos*, the Panel considered that it should first examine the claims under the *TRIMs Agreement* since the *TRIMs Agreement* is more specific than Article III:4 of the *GATT 1994*:

> "As to which claims, those under Article III:4 of GATT or Article 2 of the TRIMs Agreement, to examine first, we consider that we should first examine the claims under the TRIMs Agreement since the TRIMs Agreement is more specific than Article III:4 as far as the claims under consideration are concerned. A similar issue was presented in *Bananas III*, where the Appellate Body discussed the relationship between Article X of GATT and Article 1.3 of the Licensing Agreement and concluded that the Licensing Agreement being more specific it should have been applied first.[1323] This is also in line with the approach of the panel and the Appellate Body in the *Hormones*[1324] dispute, where the measure at issue was examined first under the SPS Agreement since the measure was alleged to be an SPS measure."[1325]

2. Provisions within the same Agreement

(a) GATT 1994

(i) Articles III and XI

912. In *India – Autos*, the Panel recalled the GATT Panel Report on *Canada – FIRA* when it stated that Articles III and XI of the *GATT 1994* have distinct scopes of application. It quoted from that Panel that

---

[1317] (*footnote original*) In *US – Shrimp*, for example, the Appellate Body considered the sequence of analysis important in examining whether the U.S. measure protecting sea turtles was justifiable under Article XX of the GATT 1994. It held that the panel erred by looking at the chapeau of Article XX and then subsequently examining whether the U.S. measure was covered by the terms of Article XX(b) or (g) because "[t]he task of interpreting the chapeau so as to prevent the abuse or misuse of the specific exemptions provided for in Article XX is rendered very difficult, if indeed it remains possible at all, where the interpreter . . . has not first identified and examined the specific exception threatened with abuse". Appellate Body Report, *US – Shrimp*, para. 120.

[1318] (*footnote original*) Appellate Body Report, *United States – Tax Treatment for "Foreign Sales Corporations"* ("*US – FSC*"), WT/DS108/AB/R, adopted 20 March 2000, para. 89.

[1319] Panel Report on *EC – Sardines*, paras. 7.17–7.18.

[1320] Appellate Body Report on *EC – Bananas III*, para. 155.

[1321] Appellate Body Report on *Chile – Price Band System*, para. 187.

[1322] Panel Report on *Indonesia – Autos*, para. 14.29.

[1323] (*footnote original*) The Appellate Body in *Bananas III* stated in paragraph 204:"Although Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures. If the Panel had done so, then there would have been no need for it to address the alleged inconsistency with Article X:3(a) of the GATT 1994."

[1324] (*footnote original*) Panel and Appellate Body reports on *EC – Measures Concerning Meat and Meat Products (Hormones) Complaints by the United States and Canada*, WT/DS26 and DS48, adopted on 13 February 1998, hereafter called *Hormones*.

[1325] Panel Report on *Indonesia – Autos*, para. 14.62.

"the General Agreement distinguishes between measures affecting the 'importation' of products, which are regulated in Article XI:1, and those affecting 'imported products', which are dealt with in Article III. If Article XI:1 were interpreted broadly to cover also internal requirements, Article III would be partly superfluous.[1326]"[1327]

913. In *India – Autos*, the Panel did, however, consider that under certain circumstances, specific measures may have an impact upon both the importation of products (Article XI) and the competitive conditions of imported products on the internal market (Article III):

> "[I]t therefore cannot be excluded *a priori* that different aspects of a measure may affect the competitive opportunities of imports in different ways, making them fall within the scope either of Article III (where competitive opportunities on the domestic market are affected) or of Article XI (where the opportunities for importation itself, i.e. entering the market, are affected), or even that there may be, in perhaps exceptional circumstances, a potential for overlap between the two provisions, as was suggested in the case of state trading. . .
>
> . . .

The Panel went on to note: . . .

> there may be circumstances in which specific measures may have a range of effects. In appropriate circumstances they may have an impact both in relation to the conditions of importation of a product and in respect of the competitive conditions of imported products on the internal market within the meaning of Article III:4.[1328] This is also in keeping with the well established notion that different aspects of the same measure may be covered by different provisions of the covered Agreements."[1329]

(b) GATS

(i) Annex on Telecommunication and Member's Reference Paper on Commitments

915. In *Mexico – Telecoms*, the United States presented two claims concerning Mexico's Reference Paper commitments first, followed by its claim concerning Section 5 of the Annex on Telecommunications. The Panel decided to examine these claims in the order presented by the United States on the grounds that such an "order will allow us to analyse the issues in the most efficient manner".[1330]

(c) SCM Agreement

(i) Articles 1.1 and 3.1(a)

916. In *US – FSC*, the Appellate Body examined the United States' argument that the Panel had erred by failing to begin its examination of the European Communities' claim under Articles 1.1 and 3.1(a) of the *SCM Agreement*, rather than with footnote 59 of that Agreement. The Appellate Body considered that "whether the examination begins with the general definition of a 'subsidy' in Article 1.1 or with footnote 59, we believe that the outcome of the European Communities' claim under Article 3.1(a) would be the same":

> "Instead, the Panel began its examination with the general definition of a 'subsidy' that is set forth in Article 1.1 of the *SCM Agreement*. This definition applies throughout the *SCM Agreement*, to all the different types of 'subsidy' covered by that Agreement. In our view, it was not a legal error for the Panel to begin its examination of whether the FSC measure involves export *subsidies* by examining the general definition of a '*subsidy*' that is applicable to export *subsidies* in Article 3.1(a). In any event, whether the examination begins with the general definition of a 'subsidy' in Article 1.1 or with footnote 59, we believe that the outcome of the European Communities' claim under Article 3.1(a) would be the same. The appropriate meaning of both provisions can be established and can be given effect, irrespective of whether the examination of the claim of the European Communities under Article 3.1(a) begins with Article 1.1 or with footnote 59."[1331]

(ii) Articles 3.1(a) and 27.4

917. In *Brazil – Aircraft*, the Appellate Body examined the order of the legal reasoning of the Panel. The Appellate Body criticized the fact that the Panel had examined whether Brazil, the defending party, had met the requirements of a particular provision (*in casu* Article 3.1(a) of the *SCM Agreement*) and had only subsequently considered whether this particular provision applied to Brazil in its capacity as a developing country, in light of another provision (*in casu* Article 27.4 of the *SCM Agreement*). The Appellate Body found that the reverse order of analysis would have been appropriate. The Appellate Body also found that the Panel should not have considered Brazil's 'affirmative defence' based on item (k) of the Illustrative List before determining whether Article 3.1(a) applied to Brazil:

[1326] (*footnote original*) Panel Report, L/5504, adopted on 7 February 1987, para. 5.14.

[1327] Panel Report on *India – Autos*, para. 7.220.

[1328] (*footnote original*) The Panel notes that the TRIMS Agreement Illustrative List envisages measures relating to export requirements both in the context of Article XI:1, as noted above in the context of our analysis under Article XI:1, and in the context of Article III:4 of the GATT 1994, by listing as inconsistent with that provision measures which require "that an enterprise's purchases or use of imported products be limited to an amount related to the volume or value of local products that it exports": TRIMS Illustrative List, Item 1 (b).

[1329] Panel Report on *India – Autos*, paras. 7.224 and 7.296.

[1330] Panel Report on *Mexico – Telecoms*, para. 7.17.

[1331] Appellate Body Report on *US – FSC*, para. 89.

"Our interpretation of the relationship between Article 27 and Article 3.1(a) of the *SCM Agreement*[1332] leads us, in this appeal, to examine, first, the issues appealed relating to whether Brazil has increased the level of its export subsidies contrary to the provisions of Article 27.4. Only if we determine that Brazil has not complied with the conditions of Article 27.4, and thereby find that the provisions of Article 3.1(a) do in fact *apply* to Brazil, will we need to examine Brazil's appeal of the Panel's findings relating to its alleged 'affirmative defence' under item (k) of the Illustrative List."[1333]

(d) TRIPS Agreement

(i) Articles 33 and 70

918. In *Canada – Patent Term*, the Appellate Body considered what the order of its analysis should be regarding Articles 33 and 70 of the *TRIPS Agreement* and decided to start with the examination of the latter:

"As in every appeal, a threshold question is whether the measure before us falls within the scope of one of the covered agreements, in this case the *TRIPS Agreement*. For this reason, we begin our analysis of the legal issues raised in this appeal by considering Article 70, because this Article determines the overall applicability of the obligations of the *TRIPS Agreement*, including the obligation found in Article 33, to the measure in dispute. Only if we conclude from addressing Article 70 that the measure before us does fall within the scope of the *TRIPS Agreement* will it become necessary for us to examine the consistency of Section 45 of Canada's *Patent Act* with Article 33 of that Agreement."[1334]

B. DUE PROCESS IN WTO DISPUTE SETTLEMENT PROCEEDINGS

1. Standard panel working procedures as a tool to ensure due process

919. In *EC – Bananas III*, the Appellate Body indicated that issues including whether or not a claim had been specified in the request for establishment of a panel "could be decided early in panel proceedings, without causing prejudice or unfairness to any party or third party, if panels had detailed, standard working procedures that allowed, *inter alia*, for preliminary rulings".[1335]

920. The Appellate Body on *India – Patents (US)* also pointed to the relevance of having standard panel working procedures that provide for appropriate factual discovery at an early stage in order to assist the requirements of due process:

"It is worth noting that, with respect to fact-finding, the dictates of due process could better be served if panels had standard working procedures that provided for appropriate factual discovery at an early stage in panel proceedings."[1336]

921. Similarly, the Appellate Body in *Argentina – Textiles and Apparel* observed that "standard working procedures for panels would help to ensure due process and fairness in panel proceedings":

"As we have observed in two previous Appellate Body Reports, we believe that detailed, standard working procedures for panels would help to ensure due process and fairness in panel proceedings. See *European Communities – Regime for the Importation, Sale and Distribution of Bananas*, adopted 25 September 1997, WT/DS27/AB/R, para. 144; *India – Patent Protection for Pharmaceutical and Agricultural Chemical Products*, adopted 16 January 1998, WT/DS50/AB/R, para. 95."[1337]

2. Due process demands when identifying the measures and claims at issue

922. In *India – Patents (US)*, the Appellate Body noted that "the demands of due process that are implicit in the *DSU* make [the clear statement of the claims and the free disclosure of facts] especially necessary during consultations". See paragraph 118 above.

923. The European Communities argued in *EC – Computer Equipment* that its right to due process during the course of the proceedings was violated because the term "LAN equipment" lacked precision in the request for establishment of a panel. The Appellate Body stated:

"We do not see how the alleged lack of precision of the terms, LAN equipment and PCs with multimedia capability, in the request for the establishment of a panel affected the rights of defence of the European Communities *in the course* of the panel proceedings. As the ability of the European Communities to defend itself was not prejudiced by a lack of knowing the measures at issue, we do not believe that the fundamental rule of due process was violated by the Panel."[1338]

924. The Appellate Body on *Korea – Dairy*, when considering if the mere listing in the request for establish-

---

[1332] (*footnote original*) The Appellate Body considered that: "[w]ith respect to the *application* of the prohibition of export subsidies in Article 3.1(a) of the *SCM Agreement*, paragraphs 2 and 4 of Article 27 contain a carefully negotiated balance of rights and obligations for developing country Members. During the transitional period . . . certain developing country Members are *entitled* to the *non-application* of Article 3.1(a), *provided* that they comply with the specific obligation set forth in Article 27.4. Put another way, when a developing country Member complies with the conditions in Article 27.4, a claim of violation of Article 3.1(a) cannot be entertained during the transitional period, because the export subsidy prohibition in Article 3 simply *does not apply* to that developing country Member." Appellate Body Report on *Brazil – Aircraft*, para. 139.

[1333] Appellate Body Report on *Brazil – Aircraft*, para. 144.

[1334] Appellate Body Report on *Canada – Patent Term*, para. 49.

[1335] Appellate Body Report on *EC – Bananas III*, para. 144.

[1336] Appellate Body Report on *India – Patents (US)*, para. 95.

[1337] Appellate Body Report on *Argentina – Textiles and Apparel*, fn. 68.

[1338] Appellate Body Report on *EC – Computer Equipment*, para. 70.

ment of the Articles claimed to have been violated meets the standard of Article 6.2, took into account whether the ability of the respondent to defend itself had been prejudiced by that fact. See paragraph 220 above.

925. In *Chile – Price Band System*, the Appellate Body ruled that "[t]he requirements of due process and orderly procedure dictate that claims must be made explicitly in WTO dispute settlement". See paragraph 233 above.

926. Also in *Chile – Price Band System*, the Appellate Body, in the context of its analysis of whether an amendment to a measure after the request for establishment of a panel was part of the measure at issue, considered the importance for the "demands of due process" "that a complaining party should not have to adjust its pleadings throughout dispute settlement proceedings in order to deal with a disputed measure as a 'moving target'".[1339] See paragraph 272 above.

3. Identification of appealed measures

927. In this regard, see paragraphs 855–861 above.

4. Right of response

928. In *Australia – Salmon*, the Appellate Body warned panels to be careful to observe due process, when complying with the Article 12.2 requirement of flexibility in panel procedures, by providing parties with adequate opportunity to respond to evidence submitted:

> "We note that Article 12.2 of the DSU provides that '[p]anel procedures should provide sufficient flexibility so as to ensure high-quality panel reports, while not unduly delaying the panel process.' However, a panel must also be careful to observe due process, which entails providing the parties adequate opportunity to respond to the evidence submitted."[1340]

929. In *Australia – Salmon*, the Appellate Body further indicated that "[a] fundamental tenet of due process is that a party be provided with an opportunity to respond to claims made against it". In this case, Australia had claimed that the Panel erred in failing to accord it an opportunity to submit a formal written rebuttal submission to respond to the oral statement made by Canada at the second meeting. The Appellate Body, noting that Australia had requested one week to respond to Canada's oral statement and that the Panel had granted Australia's request, dismissed the claim as follows:

> "A fundamental tenet of due process is that a party be provided with an opportunity to respond to claims made against it. In this case, we believe that the Panel *did* accord Australia a proper opportunity to respond by allowing Australia to submit a third written submission. We cannot see how the Panel failed to accord due process to Australia by granting the extra time it had requested."[1341]

930. In *Chile – Price Band System*, the Appellate Body concluded that the Panel had made a finding on a claim not made by Argentina.[1342] Chile had claimed that, by making a finding on that claim, the Panel had deprived Chile of a fair right to response. The Appellate Body agreed with Chile and ruled that the Panel had acted inconsistently with Article 11 of the *DSU* by denying Chile the fair right of response and thus had denied it the due process rights to which it was entitled:

> "There is, furthermore, the requirement of due process. As Argentina made no claim under the second sentence of Article II:1(b) of the GATT 1994, Chile was entitled to assume that the second sentence was not in issue in the dispute, and that there was no need to offer a defence against a claim under that sentence. We agree with Chile that, by making a finding on the second sentence – a claim that was neither made nor argued – the Panel deprived Chile of a 'fair right of response'.[1343]
>
> As we said in *India – Patents*, '. . . the demands of due process . . . are implicit in the DSU'.[1344] And, as we said in *Australia – Salmon* on the right of response, '[a] fundamental tenet of due process is that a party be provided with an opportunity to respond to claims made against it'.[1345] Chile contends that this fundamental tenet of due process was not observed on this issue.
>
> As we said earlier, Article 11 imposes duties on panels that extend beyond the requirement to assess evidence objectively and in good faith, as suggested by Argentina. This requirement is, of course, an indispensable aspect of a panel's task. However, in making 'an objective assessment of the matter before it', a panel is also duty bound to ensure that due process is respected. Due process is an obligation inherent in the WTO dispute settlement system. A panel will fail in the duty to respect due process if it makes a finding on a matter that is not before it, because it will thereby fail to accord to a party a fair right of response. In this case, because the Panel did not give Chile a fair right of response on this issue, we find that the Panel failed to accord to Chile the due process rights to which it is entitled under the DSU."[1346]

[1339] Appellate Body Report on *Chile – Price Band System*, para. 144.
[1340] Appellate Body Report on *Australia – Salmon*, para. 272.
[1341] Appellate Body Report on *Australia – Salmon*, para. 278.
[1342] See para. 287 of this Chapter.
[1343] (*footnote original*) Chile's appellant's submission, para. 23.
[1344] (*footnote original*) Appellate Body Report [. . .] para. 94.
[1345] (*footnote original*)Appellate Body Report [. . .] para. 278.
[1346] Appellate Body Report on *Chile – Price Band System*, paras. 174–176.

C. PRELIMINARY RULINGS

1. General

(a) Lack of regulation in standard working procedures

931. In *EC – Bananas III*, the Appellate Body considered that the compliance of the Panel request with Article 6.2 could be decided early by a preliminary ruling if panels had detailed, standard working procedures that allowed it:

> "As a panel request is normally not subjected to detailed scrutiny by the DSB, it is incumbent upon a panel to examine the request for the establishment of the panel very carefully to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU. . .
>
> . . .
>
> We note, in passing, that this kind of issue could be decided early in panel proceedings, without causing prejudice or unfairness to any party or third party, if panels had detailed, standard working procedures that allowed, *inter alia*, for preliminary rulings."[1347]

932. In *Canada – Aircraft*, the Panel noted that there is no requirement nor established practice that obliges the Panel to issue a preliminary ruling before the deadline for the parties' first written submission. See paragraph 933 below.

(b) Absence of a requirement to rule on a preliminary basis

933. In *Canada – Aircraft*, Canada asked the Panel to issue a preliminary ruling on its jurisdiction before the deadline for the parties' first written submission. The Panel denied the request on the grounds that there is no requirement nor established practice in that regard:

> "Canada asked the Panel to issue the requested ruling on the Panel's jurisdiction prior to the deadline for the parties' first written submissions. In our view, there is no requirement in the DSU for panels to rule on preliminary issues prior to the parties' first written submissions. Nor is there any established practice to this effect, for there are numerous panel reports where rulings on preliminary issues have been reserved until the final report.[1348] Furthermore, there may be cases where the panel wishes to seek further clarification from the parties before providing a preliminary ruling. Indeed, we considered it necessary to request such clarification in the present case. In our view, the possibility for obtaining such clarification would be lost – or at least significantly undermined – if a panel were required to rule on preliminary issues before the deadline for the parties' first written submissions. For these reasons, we rejected Canada's request for a preliminary ruling on this issue prior to the deadline for the parties' first submissions."[1349]

(c) Preliminary ruling procedures followed in certain disputes

934. In this regard, see Section XXX.B.3(d)(ii) above.

(d) Participation of third parties in preliminary ruling proceedings

935. In *Canada – Wheat Exports and Grain Imports*, the Panel, after consulting the parties to the dispute in accordance with Article 12.1 of the DSU, decided, in a preliminary ruling, that the third parties to this dispute were to be invited to participate in the proceedings up to the time the Panel issues its preliminary rulings on the requests made by Canada concerning the consistency with Article 6.2 of the DSU of the United States' request for the establishment and certain additional procedures proposed by Canada for the protection of proprietary or commercially sensitive information. As regards the extent of this participation, the Panel decided as follows:

> "(a) third parties shall receive the preliminary written submissions of the parties to the dispute;[1350]
>
> (b) third parties shall have an opportunity to make preliminary written submissions to the Panel for purposes of commenting on the parties' preliminary written submissions; and
>
> (c) third parties shall have an opportunity to be heard by the Panel on the issues raised in the parties' preliminary written submissions."[1351]

(e) Preliminary rulings in Article 22.6 Arbitrations

936. In this respect, see Section XXII.B.8(d) above.

2. Parties' objections

937. In *EC – Hormones*, the Appellate Body ruled that "a procedural objection raised by a party to a dispute should be sufficiently specific to enable the panel to address it[1352]".[1353]

[1347] Appellate Body Report on *EC – Bananas III*, paras.142 and 144.

[1348] (*footnote original*) See, for example, *European Communities – Bananas* (WT/DS27//R, adopted 25 September 1997), and *European Communities – Computer Equipment* (WT/DS62, 67/R, adopted 22 June 1998).

[1349] Panel Report on *Canada – Aircraft*, para. 9.15.

[1350] (*footnote original*) For the purposes of these proceedings, the expression "preliminary written submissions of the parties to the dispute" refers to the preliminary written submissions by Canada of 13 May 2003 and the preliminary written submissions to be filed by the United States on 27 and 28 May 2003.

[1351] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.6.

[1352] (*footnote original*) Furthermore, the DSU, and in particular its Appendix 3, leave panels a margin of discretion to deal, always in accordance with due process, with specific situations that may arise in a particular case and that are not explicitly regulated. Within this context, an appellant requesting the Appellate Body to reverse a panel's ruling on matters of procedure must demonstrate the prejudice generated by such legal ruling.

[1353] Appellate Body Report on *EC – Hormones*, para. 152.

938. The Appellate Body on *Mexico – Corn Syrup (Article 21.5 – US)* stated that requirements of good faith, due process and orderly procedure dictate that objections should be explicitly raised for the Panel to be required to address them:

> "[T]he 'observations' raised by Mexico were not expressed in a fashion that indicated that Mexico was raising an objection to the authority of the Panel. The requirements of good faith, due process and orderly procedure dictate that objections, especially those of such potential significance, should be explicitly raised. Only in this way will the panel, the other party to the dispute, and the third parties, understand that a specific objection has been raised, and have an adequate opportunity to address and respond to it. In our view, Mexico's objection was not explicitly raised. Thus, in making its 'observations', Mexico did not meet this standard.
>
> (. . .)
>
> However, had we been satisfied that Mexico did, in fact, explicitly raise its objections before the Panel, then the Panel may well have been required to 'address' those objections, whether by virtue of Articles 7.2 and 12.7 of the DSU, or the requirements of due process.[1354] In such circumstances, however, the Panel could have satisfied that duty simply by stating in its Report that it declined to examine or rule on Mexico's 'objections' due to the *untimely* manner in which they were raised. We note, in this regard, that Mexico was aware of all the facts on which it now relies in arguing that the Panel had no authority to deal with and dispose of the matter as soon as the United States submitted its communication seeking recourse to Article 21.5 of the DSU on 12 October 2000. Yet Mexico mentioned these alleged deficiencies, for the first time, more than four months later, at the meeting with the Panel on 20 February 2000. Mexico did not take advantage of the opportunities it had to raise the issues at the DSB meeting of 23 October 2000, or in either of its written submissions to the Panel."[1355]

939. As regards the requirement to raise objections in a timely manner, see paragraph 980 below.

3. Issues that have been the object of a preliminary objection

(a) Adequacy of consultations

940. In *Korea – Alcoholic Beverages*, Korea requested a preliminary ruling on the adequacy of the consultations on the grounds that the complainants had not engaged in consultations in good faith with a view to reaching a mutual solution as envisaged by the DSU.[1356] As regards the content of the Panel's preliminary ruling, see paragraph 120 above.

(b) Compliance of panel request with Article 6.2 requirements

941. In *EC – Bananas III*, the Appellate Body considered that "this kind of issue could be decided early in panel proceedings, without causing prejudice or unfairness to any party or third party, if panels had detailed, standard working procedures that allowed, *inter alia*, for preliminary rulings".[1357]

942. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling on the specificity of the request for establishment of the panel by both the European Communities and the United States. Korea argued that the description of the product concerned by the European Communities ("certain alcoholic beverages falling within HS heading 2208") and the United States ("other distilled spirits such as whisky, brandy, vodka, gin and ad-mixtures") were not specific enough to satisfy Article 6.2.[1358] For information on the actual preliminary ruling, see paragraph 209 above.

943. In *Thailand – H-Beams*, Thailand had asked the Panel for a preliminary ruling on the sufficiency of Poland's panel request with respect to the lack of clarity as regards Articles 5 and 6 of the *Anti-Dumping Agreement*. In assessing and identifying the claim brought under Article 6.2, the Appellate Body responded:

> "Thailand argues that it was prejudiced by the lack of clarity of Poland's panel request. The fundamental issue in assessing claims of prejudice is whether a defending party was made aware of the claims presented by the complaining party, sufficient to allow it to defend itself. In assessing Thailand's claims of prejudice, we consider it relevant that, although Thailand asked the Panel for a preliminary ruling on the sufficiency of Poland's panel request with respect to Articles 5 and 6 of the *Anti-Dumping Agreement* at the time of filing of its first written submission, it did not do so at that time with respect to Poland's claims under Articles 2 and 3 of that Agreement. We must, therefore, conclude that Thailand did not feel at that time that it required additional clarity with respect to these claims, particularly as we note that Poland had further clarified its claims in its first written submission. This is a strong indication to us that Thailand

---

[1354] (*footnote original*) We recall that, in a different context involving judicial economy, we said that: ". . . for purposes of transparency and fairness to the parties, a panel should, . . .in all cases, address expressly [even] those claims which it declines to examine and rule upon . . . Silence does not suffice for these purposes."
Appellate Body Report, *Canada – Certain Measures Affecting the Automotive Industry*, WT/DS139/AB/R, WT/DS142/AB/R, adopted 19 June 2000, para. 117.

[1355] Appellate Body Report, *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 47–49.

[1356] Panel Report on *Korea – Alcoholic Beverages*, para. 5.21.

[1357] Appellate Body Report on *EC – Bananas III*, para. 144.

[1358] Panel Report on *Korea – Alcoholic Beverages*, paras. 5.4–5.12.

did not suffer any prejudice on account of any lack of clarity in the panel request."[1359]

944. In *US – Wheat Exports and Grain Imports*, Canada raised several preliminary objections that the United States' claims under Article XVII of the *GATT 1994*, rail car allocation and Article 2 of the *TRIMS Agreement* as set out in the panel request failed to satisfy the requirements of Article 6.2 of the *DSU*. The Panel disregarded Canada's objections as regards the rail car allocation and the *TRIMS Agreement* but agreed with Canada in that the United States had failed to comply with Article 6.2 requirements as regards its claim under Article XVII of the *GATT 1994*.[1360]

945. In *US – Oil Country Tubular Goods Sunset Reviews*, the United States requested the Panel to dismiss certain claims raised by Argentina in its panel request on the grounds that, inconsistently with the requirements of Article 6.2 of the *DSU*, these claims were identified in vague terms. The Panel declined the United States' request for preliminary rulings.[1361]

(c) Panel composition

946. In *Guatemala – Cement II*, Guatemala submitted a preliminary objection to the Panel requesting it to rule that the composition of the Panel was inconsistent with WTO and international law principles because one of the members of the Panel had served on the previous *Guatemala – Cement I*. The Panel issued a preliminary ruling rejecting Guatemala's request. For the content of the Panel's ruling, see paragraph 293 above.

(d) Panel's jurisdiction

(i) Measures withdrawn before establishment of the Panel

947. In *Argentina – Textiles and Apparels*, the Panel declined to issue a preliminary ruling on the objection raised by Argentina as regards the Panel not having jurisdiction to address the specific duties on footwear that were withdrawn before the Panel was established.[1362]

(ii) Double fora

948. In *Argentina – Poultry Anti-Dumping Duties*, Argentina raised as a preliminary issue the fact that, prior to bringing WTO dispute settlement proceedings against Argentina's anti-dumping measure, Brazil had challenged that measure before a MERCOSUR Ad Hoc Arbitral Tribunal. Argentina requested that, in light of the prior MERCOSUR proceedings, the Panel refrain from ruling on the claims raised by Brazil in the present WTO dispute settlement proceedings.[1363] In order to defend this position, Argentina invoked the principle of estoppel. In this regard, see paragraph 79 above. In the alternative, Argentina asserted that the Panel should be bound by the ruling of the MERCOSUR Tribunal.[1364] In this regard, see paragraph 23 above.

(iii) Claims outside the panel's terms of reference

949. In *EC – Tube or Pipe Fittings*, the European Communities requested the Panel to make a preliminary ruling that certain of Brazil's claims were not within its terms of reference. The Panel noted that among the said claims, there were several provisions cited by Brazil in its first written submission not mentioned in its request for establishment. The Panel accordingly found that Brazil's claims under those provisions were not within its terms of reference. As regards the content of the Panel's preliminary ruling, see paragraph 221 above.

950. In *US – Softwood Lumber V*, the United States raised a preliminary objection that Canada had included in its first written submission claims with respect to a number of provisions of the *Anti-Dumping Agreement* that were not included in the Panel Request, claiming that these were therefore outside the Panel's terms of reference.[1365] The Panel, in its Report, agreed that some of the provisions mentioned by Canada in its written submissions were not part of its terms of reference since they were not included in the panel request.[1366]

951. In *Canada – Wheat Exports and Grain Imports*, the Panel, in a preliminary ruling, found that certain portions of the United States' panel request that dealt with Article XVII of the *GATT 1994* claim failed to satisfy the requirements of Article 6.2 of the *DSU* insofar as they did not identify the specific measures at issue.[1367]

952. In *US – Oil Country Tubular Goods Sunset Reviews*, the United States requested a preliminary ruling on the grounds that certain claims that appeared in Argentina's first written submission were not within the Panel's terms of reference because these claims had not been raised in Argentina's panel request. The Panel declined the request.[1368]

[1359] Appellate Body Report on *Thailand – H-Beams*, para. 95.
[1360] Panel Report on *US – Wheat Exports and Grain Imports*, para. 6.10.
[1361] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, paras. 7.40 and 7.48.
[1362] Panel Report on *Argentina – Textiles and Apparel*, para. 6.7.
[1363] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.17.
[1364] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.17.
[1365] Panel Report on *US – Softwood Lumber V*, para. 7.17.
[1366] Panel Report on *US – Softwood Lumber V*, para. 7.30.
[1367] Panel Report on *Canada – Wheat Exports and Grain Imports*, 6.10.
[1368] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7.70.

(e) Clarity of claims in written submissions

953. In *EC – Tube or Pipe Fittings*, the European Communities had requested the Panel to refuse to consider certain of Brazil's claims on the grounds that these claims were defective as they were only vaguely defined in Brazil's first written submission.[1369] As regards the Panel's preliminary ruling, see paragraph 235 above.

(f) Evidence

(i) Timing of the submission of evidence

954. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling rejecting certain evidence submitted by the European Communities after the second substantive meeting. Korea alleged that its rights of defence were violated by the late submission of such evidence.[1370] As regards the content of the Panel's preliminary ruling, see paragraph 368 above.

955. In *Canada – Aircraft*, Canada requested the Panel to make a preliminary ruling on the issue of whether the complaining party may adduce new evidence or allegations after the end of the first substantive meeting. Canada argued that it would suffer prejudice under the accelerated procedure under Article 4 of the *SCM Agreement* as a result of the late submission of allegations or evidence.[1371] As regards the content of the Panel's preliminary ruling, see paragraph 369 above.

956. In *US – Offset Act (Byrd Amendment)*, Canada asked the Panel to accept as evidence a letter which it submitted after the first substantive meeting. In spite of the United States' objections, the Panel issued a preliminary ruling accepting the evidence. As regards the reasoning of the Panel's ruling, see paragraph 370 above.[1372]

957. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues, the Panel referred to the timing for the submission of evidence in the context of the parties' discussion about the wording of paragraph 11 of the Panel's Working Procedures. For the content of the Panel's preliminary ruling, see paragraph 373 above.

(ii) Information not made available to the investigating authorities

958. In *EC – Tube or Pipe Fittings*, the European Communities requested the Panel to make a preliminary ruling rejecting a number of exhibits submitted by Brazil during the first substantive meeting on the grounds that they did not form part of the record of the underlying investigation.[1373]

959. In *US – Softwood Lumber V*, the United States raised a preliminary objection claiming that Canada had introduced certain new evidence in the context of the proceedings that had not been before the investigating authority during the course of the investigation.[1374] Since the United States had not requested the Panel to rule on a preliminary basis, the Panel preferred to rule within its report where it indicated that it would not take such evidence into consideration.[1375]

(g) Third-party rights

(i) Third-party participation in preliminary proceedings

960. In *Canada – Wheat Exports and Grain Imports*, the Panel, after consulting with the parties to the dispute in accordance with Article 12.1 of the *DSU*, decided, in a preliminary ruling, that the third parties to this dispute would be invited to participate in the proceedings up to the time the Panel issued its preliminary rulings. These rulings related to requests made by Canada concerning the consistency with Article 6.2 of the DSU of the United States' request for the establishment and certain additional procedures proposed by Canada for the protection of proprietary or commercially sensitive information. As regards the extent of this participation, see paragraph 935 above.

(ii) Access to second written submissions by third parties in Article 21.5 proceedings

961. In *Australia – Automotive Leather II (Article 21.5 – US)*, the European Communities raised a preliminary objection and argued that since in this case there was to be only one meeting of the Panel, at which the Panel would be considering both submissions of each party, the third parties, in accordance with Article 10.3 of the *DSU*, should receive all of the parties' submissions. The Panel, in a preliminary ruling, rejected the European Communities' request.[1376] For the content of the Panel's preliminary ruling, see paragraph 617 above.

962. In *Australia – Salmon (Article 21.5 – Canada)*, the Panel was also requested to rule on a preliminary basis on this issue and did so following the approach in *Australia – Automotive Leather II (Article 21.5 – US)*.[1377]

963. In *Canada – Dairy (Article 21.5 – New Zealand and US)*, also in a preliminary ruling, the Panel,

[1369] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.10.
[1370] Panel Report on *Korea – Alcoholic Beverages*, para. 5.21.
[1371] Panel Report on *Canada – Aircraft*, para. 9.73.
[1372] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.2.
[1373] Panel Report on *EC – Tube or Pipe Fittings*, paras. 7.37–7.40.
[1374] Panel Report on *US – Softwood Lumber V*, para. 7.17.
[1375] Panel Report on *US – Softwood Lumber V*, para. 7.43.
[1376] Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, para. 3.9.
[1377] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.5–7.6.

however, decided to allow third parties access to the second written submissions of the parties.[1378] For the content of the Panel's preliminary ruling, see paragraph 619 above.

964. In *US – FSC (Article 21.5 – EC)*, the Panel, in a preliminary ruling, did not follow the position of the Panel in *Canada – Dairy (Article 21.5 – New Zealand and US)* and denied access to second written submissions to third parties on the grounds that it was not permitted by Article 10.3 of the *DSU*. However, the Appellate Body disagreed with the Panel.[1379] For the content of the Panel's preliminary ruling, see paragraph 620 above.

(h) Confidentiality

(i) Breach of confidentiality of the consultation process

965. In *Korea – Alcoholic Beverages*, Korea requested a preliminary ruling on whether both complainants, the European Communities and the United States, had breached the confidentiality requirement of Article 4.6 by making reference, in their submissions, to information supplied by Korea during consultations.[1380] As regards the Panel's preliminary ruling in this regard, see paragraph 135 above.

(ii) Disclosure of written submissions

966. In *Argentina – Poultry Anti-Dumping Duties*, Brazil informed the Panel of its intention to make its first written submission (except the exhibits) available to the public, after providing Argentina with an opportunity to indicate whether the submission should be revised to exclude any information deemed to be confidential. Argentina objected and submitted that a Member is only entitled by virtue of Article 18.2 of the *DSU* to disclose written statements of its positions. See paragraphs 482–483 above.

(iii) Non-confidential versions of written submissions

967. In *US – Steel Safeguards,* the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues, the Panel dealt with the United States' request to require production of non-confidential versions of written submissions within 14 days following the filing of the written submissions. In this respect, see paragraph 484 above.

(iv) Business confidential information

968. In *Canada – Aircraft* and *Brazil – Aircraft*, the Appellate Body issued a preliminary ruling on 11 June 1999 that it was not necessary to adopt additional procedures to protect business confidential information in the appellate proceeding. The Appellate Body held that the existing provisions concerning confidentiality of dispute settlement proceedings were sufficient for the purposes at issue. In this regard, see paragraph 486 above.

969. In *Canada – Wheat Exports and Grain Imports*, the Panel, in a preliminary ruling, having rejected the parties' specific proposals for the protection of confidential information, adopted its own procedures for the protection of such information.[1381]

(v) Confidentiality concerns when private counsel intervene

970. In *Thailand – H-Beams*, an industry association submitted an *amicus* brief which cited Thailand's confidential submission. Thailand then claimed that Poland's private counsel might have violated WTO rules of confidentiality by providing Thailand's submission to the said association. Although Poland and the lawyer concerned denied the alleged breach of confidentiality, the Appellate Body issued a preliminary ruling rejecting the *amicus* brief. See paragraphs 491–493 above.

(i) Private counsel

971. In *EC – Bananas III*, St Lucia submitted to the Appellate Body a letter explaining its reasons for including two private lawyers in its delegation for the oral hearing. The Appellate Body issued a preliminary ruling indicating that nothing in the *WTO Agreement*, the *DSU* or its Working Procedures prevented a Member from admitting whomever it deems fit to become part of its delegation to Appellate Body proceedings. See paragraph 1022 below.

972. In *Indonesia – Autos*, Indonesia had announced that two private lawyers were members of its delegation for the first substantive meeting of the Panel with the parties. Following a request by the United States to exclude those lawyers from the meeting, the Chairman issued a preliminary ruling on behalf of the Panel following the line in *EC – Bananas III*: see paragraph 1024 below.

973. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling with respect to permission to have private counsel attend the Panel meetings and address the Panel. The Panel accepted the presence of private counsel. As regards the content of the Panel's preliminary ruling in this regard, see paragraph 1025 below.

[1378] Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 2.34.
[1379] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 245.
[1380] Panel Report on *Korea – Alcoholic Beverages*, para. 5.31.
[1381] Panel Report on *Canada – Wheat Exports and Grain Imports*, para. 6.8.

974. As regards confidentiality concerns when private lawyers are concerned, see paragraphs 491–493 and 970 above.

(j) Panel's timetable

975. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues dealt with, the Panel referred to the timetable for its proceedings. In this regard, see paragraph 830 above.

(k) Executive summaries

976. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues, the Panel referred to executive summaries. For the content of the Panel's preliminary ruling, see paragraph 829 above.

(l) Meaning of the term "second written submissions"

977. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings on organizational matters. Among the issues, the Panel dealt with a request by the United States to change the reference in its Working Procedures from "rebuttal submission" to "rebuttal". In this respect, see paragraph 403 above.

(m) Timing for the filing of submissions in panel proceedings

978. In *US – Steel Safeguards*, the Panel sent a letter to all parties including a series of preliminary rulings[1382] on organizational matters. Among the issues, the Panel referred to the timing for the filing of the parties' written submissions with the WTO Dispute Settlement Registrar. As regards the content of this preliminary ruling, see paragraph 834 above.

(n) Amicus curiae

979. In *EC – Asbestos*, the Panel received several written submissions from non-governmental organizations. The Panel issued a preliminary ruling informing the parties that, in the light of the European Communities' decision to incorporate into its own submissions the *amicus* briefs submitted by two organizations, the Panel would consider these two documents on the same basis as the other documents furnished by the European Communities in this dispute. At the second substantive meeting of the Panel with the parties, the Panel gave Canada the opportunity to reply, in writing or orally, to the arguments set forth in these two *amicus* briefs. At that same meeting, the Panel also informed the parties that it had decided not to take into consideration the other *amicus* briefs submitted.[1383] At the appeal stage, the Appellate Body adopted an additional procedure, for the purposes of this appeal only, pursuant to Rule 16(1) of its Working Procedures, to deal with any possible submissions received from *amici curiae*. With respect to the additional procedures, see Section XXXII.B.9 above. Pursuant to the additional procedure, the Appellate Body received 17 applications requesting leave to file a written brief in this appeal. Six of these 17 applications were received after the deadline specified in the additional procedure and, for this reason, leave to file a written brief was denied to these six applicants. The other 11 applications were considered by the Appellate Body but finally denied for failure to comply sufficiently with all the requirements set forth in paragraph 3 of the Additional Procedure.[1384]

3. Timing

(a) Promptness of objections

980. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body ruled that parties must raise objections in a timely manner:

> "When a Member wishes to raise an objection in dispute settlement proceedings, it is always incumbent on that Member to do so promptly. A Member that fails to raise its objections in a timely manner, notwithstanding one or more opportunities to do so, may be deemed to have waived its right to have a panel consider such objections."[1385]

981. In *US – 1916 Act*, the Appellate Body agreed with the Panel that objections on the Panel's jurisdiction should not be raised at the interim review stage for the first time although it also agreed with the Panel that certain jurisdictional issues may need to be addressed by the Panel at any time:

> "We agree with the Panel that the interim review was not an appropriate stage in the Panel's proceedings to raise objections to the Panel's jurisdiction for the first time. An objection to jurisdiction should be raised as early as possible and panels must ensure that the requirements of due process are met. However, we also agree with the Panel's consideration that 'some issues of jurisdiction may be of such a nature that they have to be addressed by the Panel at any time.'[1386] We do not share

[1382] For "preliminary rulings", see Section XXXVI.C.

[1383] Panel Report on *EC – Asbestos*, paras. 6.1–6.4 and 8.12–8.14.

[1384] Appellate Body Report on *EC – Asbestos*, paras. 50–57.

[1385] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 50.

[1386] (*footnote original*) EC Panel Report, para. 5.17. We note that it is a widely accepted rule that an international tribunal is entitled to consider the issue of its own jurisdiction on its own initiative, and to satisfy itself that it has jurisdiction in any case that comes before it. See, for example, *Case Concerning the Administration of the Prince von Pless (Preliminary Objection)* (1933) P.C.I.J. Ser. A/B, No. 52, p. 15; Individual Opinion of President Sir A. McNair, *Anglo-Iranian Oil Co. Case (Preliminary Objection)*

the European Communities' view that objections to the jurisdiction of a panel are appropriately regarded as simply 'procedural objections'. The vesting of jurisdiction in a panel is a fundamental prerequisite for lawful panel proceedings. We, therefore, see no reason to accept the European Communities' argument that we must reject the United States' appeal because the United States did not raise its jurisdictional objection before the Panel in a timely manner."[1387]

982. The Appellate Body on *Thailand – H-Beams* stressed that the importance of the request for establishment was such that the defending party was entitled to request further clarification on the claims raised in a panel request from the complaining party, even before the filing of the first written submission:[1388]

"In view of the importance of the request for the establishment of a panel, we encourage complaining parties to be precise in identifying the legal basis of the complaint. We also note that nothing in the DSU prevents a defending party from requesting further clarification on the claims raised in a panel request from the complaining party, even before the filing of the first written submission. In this regard, we point to Article 3.10 of the DSU which enjoins Members of the WTO, if a dispute arises, to engage in dispute settlement procedures 'in good faith in an effort to resolve the dispute'. As we have previously stated, the 'procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes'.[1389]"[1390]

983. In *US – Offset Act (Byrd Amendment)*, the Appellate Body recalled that "[a]n objection to jurisdiction should be raised as early as possible"[1391] and clarified that "it would be preferable, in the interests of due process, for the appellant to raise such issues in the Notice of Appeal, so that appellees will be aware that this claim will be advanced on appeal".[1392]

984. In *EC – Tube or Pipe Fittings*, the European Communities requested the Panel to make a preliminary ruling rejecting a number of exhibits submitted by Brazil during the first substantive meeting on the grounds that they did not form part of the record of the underlying investigation. In this case, the Panel's Working Procedures provided that preliminary rulings must be requested not later than the first written submission, but that exceptions could be made upon showing of "good cause". The Panel noted that, as Brazil submitted these exhibits in conjunction with its oral statement at the first meeting, which meant that the European Communities was not in a position to make a preliminary objection in its first written submission, good cause existed for it to consider the merits of the European Communities request for a preliminary ruling.[1393]

985. In *US – Wheat Exports and Grain Imports*, Canada had raised several preliminary objections regarding compliance by the United States' panel request with the requirements of Article 6.2 (see paragraph 944 above). The United States argued that Canada's request for a preliminary ruling should be denied because Canada failed to raise its procedural objection at the earliest opportunity. The Panel, referring to the Appellate Body's findings in *Thailand – H-Beams* (see paragraph 982 above), considered that "the Appellate Body notes that there is no legal bar to any Member requesting clarification of a panel request even before the filing of the first written submission". It further concluded that such a "statement does not suggest that, in *Thailand – H-Beams*, Thailand should have raised its concerns at the DSB meetings at which Poland's panel request was on the agenda". Accordingly, the Panel rejected the United States' argument.[1394] On appeal, the Appellate Body upheld the Panel and considered that a determination as to the timeliness of a preliminary objection under Article 6.2 must be examined on a case-by-case basis:

"As regards objections to the *adequacy* of panel requests, the Appellate Body has stated that compliance

[1387] Appellate Body Report on *US – 1916 Act*, para. 54.

[1388] The Appellate Body made this statement as part of its review of a finding by the Panel that Poland's request for the establishment was sufficient to meet the requirements of Article 6.2 of the DSU. The Panel had made such a finding in response to a request for a preliminary ruling by Thailand which had submitted its request to the Panel as part of its first written submission.

with the requirements of Article 6.2 of the DSU must be determined on the merits of each case.[1395] Similarly, it would appear to us that a determination as to the *timeliness* of an objection raised under Article 6.2 must be examined on a case-by-case basis. This is consistent with the discretion given to panels, under the DSU, to deal with specific situations that may arise in a particular case and that are not explicitly regulated.[1396] Furthermore, under Article 12 of the DSU, it is the panel that sets the timetable for the panel proceedings and, therefore, it is the panel that is in the best position to determine whether, under the particular circumstances of each case, an objection is raised in a timely manner."[1397]

(b) Timing of the preliminary ruling

986. In *Canada – Aircraft*, Canada asked the Panel to make a ruling on the Panel's jurisdiction before the deadline set for the submission of the written submission of the parties. The Panel stated:

"In our view, there is no requirement in the DSU for panels to rule on preliminary issues prior to the parties' first written submissions. Nor is there any established practice to this effect, for there are numerous panel reports where rulings on preliminary issues have been reserved until the final report. Furthermore, there may be cases where the panel wishes to seek further clarification from the parties before providing a preliminary ruling."[1398]

987. In *US – Softwood Lumber V*, the United States raised two preliminary objections (on the Panel's terms of reference and introduction of new evidence), but did not request the Panel to rule on them on a preliminary basis.[1399]

D. BURDEN OF PROOF

1. The rule on burden of proof

988. In *US – Wool Shirts and Blouses*, the Appellate Body held that the burden of proof rests upon the party, whether complaining or defending, who asserts the affirmative of a particular claim or defence:

"[W]e find it difficult, indeed, to see how any system of judicial settlement could work if it incorporated the proposition that the mere assertion of a claim might amount to proof. It is, thus, hardly surprising that various international tribunals, including the International Court of Justice, have generally and consistently accepted and applied the rule that the party who asserts a fact, whether the claimant or the respondent, is responsible for providing proof thereof.[1400] Also, it is a generally-accepted canon of evidence in civil law, common law and, in fact, most jurisdictions, that the burden of proof rests upon the party, whether complaining or defending, who asserts the affirmative of a particular claim or defence. If that party adduces evidence sufficient to raise a presumption that what is claimed is true, the burden then shifts to the other party, who will fail unless it adduces sufficient evidence to rebut the presumption.[1401]

In the context of the GATT 1994 and the *WTO Agreement*, precisely how much and precisely what kind of evidence will be required to establish such a presumption will necessarily vary from measure to measure, provision to provision, and case to case."[1402]

989. The Panel on *Turkey – Textiles*, in a finding not addressed by the Appellate Body, summed up the rules on burden of proof under WTO jurisprudence as follows:

"(a) it is for the complaining party to establish the violation it alleges;

(b) it is for the party invoking an exception or an affirmative defence to prove that the conditions contained therein are met; and

(c) it is for the party asserting a fact to prove it."[1403]

990. In *EC – Hormones*, the Appellate Body discussed the allocation of the burden of proof in the context of the *SPS Agreement*, but referred to its statement in *US – Wool Shirts and Blouses* and stated that this rule "embodies a rule applicable in any adversarial proceedings":

"The initial burden lies on the complaining party, which must establish a *prima facie* case of inconsistency with a

[1402] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 14.

[1403] Panel Report on *Turkey – Textiles*, para. 9.57. See also Panel Report on *Argentina – Textiles and Apparel*, paras. 6.34–6.40.

particular provision of the *SPS Agreement* on the part of the defending party, or more precisely, of its SPS measure or measures complained about. When that *prima facie* case is made, the burden of proof moves to the defending party, which must in turn counter or refute the claimed inconsistency. This seems straightforward enough and is in conformity with our ruling in *United States – Shirts and Blouses*,[1404] which the Panel invokes and which embodies a rule applicable in any adversarial proceedings."[1405]

991. In *Japan – Apples*, the Appellate Body emphasized the distinction between the two "distinct" principles relating to the burden of proof:

"It is important to distinguish, on the one hand, the principle that the complainant must establish a *prima facie* case of inconsistency with a provision of a covered agreement[1406] from, on the other hand, the principle that the party that asserts a fact is responsible for providing proof thereof.[1407] In fact, the principles are distinct."[1408]

2. Evidence and arguments remain in equipoise

992. In *US – Section 301 Trade Act*, the Panel clarified, in the light of the allocation of the burden of proof, which party would benefit in case of uncertainty (i.e. in case all evidence and arguments were to remain in "equipoise"):

"Since, in this case, both parties have submitted extensive facts and arguments in respect of the EC claims, our task will essentially be to balance all evidence on record and decide whether the EC, as party bearing the original burden of proof, has convinced us of the validity of its claims. In case of uncertainty, i.e. in case all the evidence and arguments remain in equipoise, we have to give the benefit of the doubt to the US as defending party."[1409]

3. Establishing a prima facie case

(a) What is a prima facie case?

993. In *EC – Hormones*, the Appellate Body specified what is meant by the term "prima facie case":

"It is also well to remember that a *prima facie* case is one which, in the absence of effective refutation by the defending party, requires a panel, as a matter of law, to rule in favour of the complaining party presenting the *prima facie* case."[1410]

(b) Source of evidence for a prima facie case

994. In *US – Wool Shirts and Blouses*, the Appellate Body stated that the nature and scope of evidence required to establish a prima facie case "will vary from measure to measure, provision to provision, and case to case".[1411]

995. In *Korea – Dairy*, Korea argued in its appeal that the Panel should have looked solely at the evidence submitted by the European Communities as the complaining party to determine whether the European Communities had met its burden of proof of making a prima facie case. The Appellate Body disagreed and stated, *inter alia*: "In carrying out this mandate, a panel has the duty to examine and consider all the evidence before it, not just the evidence submitted by one or the other party, and to evaluate the relevance and probative force of each piece thereof":

"Korea appears to suggest that the Panel, in evaluating Korea's actions leading up to the adoption of its safeguard measure, should have looked solely to the evidence submitted by the European Communities as complaining party. We do not agree with Korea in this respect. It is, of course, true that the European Communities has the *onus* of establishing its claim that Korea's safeguard measure is inconsistent with the requirements of Article 4.2 of the *Agreement on Safeguards*. However, under Article 11 of the DSU, a panel is charged with the mandate to determine the facts of the case and to arrive at factual findings. In carrying out this mandate, a panel has the duty to examine and consider all the evidence before it, not just the evidence submitted by one or the other party, and to evaluate the relevance and probative force of each piece thereof. . . . The determination of the significance and weight properly pertaining to the evidence presented by one party is a function of a panel's appreciation of the probative value of all the evidence submitted by both parties considered together.

We note that in examining the [Report of the Korean Authority], the Panel did not do anything out of the ordinary. The European Communities' claim was that Korea had disregarded certain requirements of Article 4.2 of the *Agreement on Safeguards* in its actions preceding and accompanying the adoption of its safeguard measure. The [Report of the Korean Authority] was issued by the Korean authorities which, *inter alia*, investigated and evaluated the assertions of serious injury to the domestic industry involved. Thus, that Report was clearly relevant to the task of the Panel to determine the facts, and the Panel was within its discretionary authority in deciding whether or not, or to what extent, it should rely upon

the Report in ascertaining the facts relating to Korea's injury determination."[1412]

(c) No need to state explicitly that a prima facie case has been made.

996. The Appellate Body has held on several occasions that a Panel was not obliged to make an explicit finding that a party has met its burden of proof of making a prima facie case: for example, see paragraph 1005 below. Further, in *Thailand – H-Beams*, the Appellate Body stated:

"In our view, a panel is not required to make a separate and specific finding, in each and every instance, that a party has met its burden of proof in respect of a particular claim, or that a party has rebutted a *prima facie* case. Thus, the Panel did not err to the extent that it made no specific findings on whether Poland had met its burden of proof."[1413]

997. In *Korea – Dairy*, Korea argued in its appeal that "'as a threshold matter', 'a panel must evaluate and make a finding on whether the complaining Member (i.e., the Member with the burden of proof) has established a *prima facie* case of a violation', before requiring the respondent to submit evidence of its own case or defence." By ignoring this step, the Panel "'did not consider and *a fortiori* did not find that the European Communities made a prima facie case that justified its proceeding to examine the evidence and arguments' of Korea".[1414] The Appellate Body stated:

"We find no provision in the DSU or in the Agreement on Safeguards that requires a panel to make an explicit ruling on whether the complainant has established a *prima facie* case of violation before a panel may proceed to examine the respondent's defence and evidence."[1415]

4. Relevance of the difficulty of collecting information to prove a case

998. In *EC – Sardines*, the Appellate Body also found that there is nothing in the WTO dispute settlement system to support the notion that the allocation of the burden of proof should be decided on the basis of a comparison between the respective difficulties that might possibly be encountered by the complainant and the respondent in collecting information to prove a case:

"The degree of difficulty in substantiating a claim or a defence may vary according to the facts of the case and the provision at issue. For example, on the one hand, it may be relatively straightforward for a complainant to show that a particular measure has a text that establishes an explicit and formal discrimination between like products and is, therefore, inconsistent with the national treatment obligation in Article III of the GATT 1994. On the other hand, it may be more difficult for a complainant to substantiate a claim of a violation of Article III of the GATT 1994 if the discrimination does not flow from the letter of the legal text of the measure, but rather is a result of the administrative practice of the domestic authorities of the respondent in applying that measure. But, in both of those situations, the complainant must prove its claim. There is nothing in the WTO dispute settlement system to support the notion that the allocation of the burden of proof should be decided on the basis of a comparison between the respective difficulties that may possibly be encountered by the complainant and the respondent in collecting information to prove a case."[1416]

5. Necessary collaboration of the parties

999. In *Argentina – Textiles and Apparel*, the Panel, in a finding not addressed by the Appellate Body, made the following statement regarding burden of proof and the requirement of collaboration of the parties in presenting facts and evidence to the panel:

"Another incidental rule to the burden of proof is the requirement for collaboration of the parties in the presentation of the facts and evidence to the panel and especially the role of the respondent in that process. It is often said that the idea of peaceful settlement of disputes before international tribunals is largely based on the premise of co-operation of the litigating parties. In this context the most important result of the rule of collaboration appears to be that the adversary is obligated to provide the tribunal with relevant documents which are in its sole possession. This obligation does not arise until the claimant has done its best to secure evidence and has actually produced some *prima facie* evidence in support of its case. It should be stressed, however, that 'discovery' of documents, in its common-law system sense, is not available in international procedures.

. . . Before an international tribunal, parties do have a duty to collaborate in doing their best to submit to the adjudicatory body all the evidence in their possession."[1417]

6. Relationship between the burden of proof and a panel's fact-finding mandate

1000. In *Japan – Agricultural Products II*, the Appellate Body held that while a panel had a broad and "comprehensive authority" to engage in fact-finding under Article 13 of the *DSU*, it could not use this authority so as to effectively relieve the complaining party of making a prima facie case of inconsistency:

[1412] Appellate Body Report on *Korea – Dairy*, paras. 137–138.
[1413] Appellate Body Report on *Thailand – H-Beams*, para. 134. See also Appellate Body Report on *Canada – Aircraft*, para. 185.
[1414] Appellate Body Report on *Korea – Dairy*, para. 144.
[1415] Appellate Body Report on *Korea – Dairy*, para. 145.
[1416] Appellate Body Report on *EC – Sardines*, para. 281.
[1417] Panel Report on *Argentina – Textiles and Apparel*, paras. 6.40 and 6.58.

"Article 13 of the DSU allows a panel to seek *information* from any relevant source and to consult individual experts or expert bodies to obtain their *opinion* on certain aspects of the matter before it. In our Report in *United States – Import Prohibition of Certain Shrimp and Shrimp Products* ('*United States – Shrimp*'), we noted the 'comprehensive nature' of this authority, and stated that this authority is 'indispensably necessary' to enable a panel to discharge its duty imposed by Article 11 of the DSU to 'make an objective assessment of the matter before it, including an *objective assessment of the facts of the case* and the *applicability of and conformity with the relevant covered agreements* . . . .'

Furthermore, we note that the present dispute is a dispute under the *SPS Agreement*. Article 11.2 of the *SPS Agreement* explicitly *instructs* panels in disputes under this Agreement involving scientific and technical issues to 'seek advice from experts'.

Article 13 of the DSU and Article 11.2 of the *SPS Agreement* suggest that panels have a significant investigative authority. However, this authority cannot be used by a panel to rule in favour of a complaining party which has not established a *prima facie* case of inconsistency based on specific legal claims asserted by it. A panel is entitled to seek information and advice from experts and from any other relevant source it chooses, pursuant to Article 13 of the DSU and, in an SPS case, Article 11.2 of the *SPS Agreement*, to help it to understand and evaluate the evidence submitted and the arguments made by the parties, but not to make the case for a complaining party.

In the present case, the Panel was correct to seek information and advice from experts to help it to understand and evaluate the evidence submitted and the arguments made by the United States and Japan with regard to the alleged violation of Article 5.6. The Panel erred, however, when it used that expert information and advice as the basis for a finding of inconsistency with Article 5.6, since the United States did not establish a *prima facie* case of inconsistency with Article 5.6 based on claims relating to the 'determination of sorption levels'. The United States did not even *argue* that the 'determination of sorption levels' is an alternative measure which meets the three elements under Article 5.6."[1418]

7. Relevance of the mandatory/discretionary distinction

1001. In *US – Carbon Steel*, the Appellate Body, endorsing the approach of the Panel, considered that when there is an issue related to the mandatory/discretionary aspect of the law of a Member, the burden of proof will be on the complainant to demonstrate that the law is mandatory. The Appellate Body further noted that a responding Member's law will be treated as WTO-consistent "until proven otherwise":

"[A] responding Member's law will be treated as WTO-*consistent* until proven otherwise. The party asserting that another party's municipal law, as such, is inconsistent with relevant treaty obligations bears the burden of introducing evidence as to the scope and meaning of such law to substantiate that assertion . . . . The nature and extent of the evidence required to satisfy the burden of proof will vary from case to case."[1419]

1002. As regards which party has the burden of proof in respect of whether certain legislation is mandatory or discretionary when this is invoked as an affirmative defence, see paragraph 188 above.

1003. As regards the mandatory/discretionary distinction in general, see Section VI.B.3(c)(ii) above.

8. Application of the burden of proof in the context of a given WTO Agreement

(a) Burden of proof in the GATT 1994

1004. In *India – Quantitative Restrictions*, India argued in its appeal that the Panel erred in finding that the proviso to Article XVIII:11 of *GATT 1994* was to be properly characterized as an affirmative defence and that India, therefore, bore the burden of proof in respect thereof. The Appellate Body upheld the finding of the Panel:

"Assuming that the complaining party has successfully established a *prima facie* case of inconsistency with Article XVIII:11 and the Ad Note, the responding party may, in its defence, either rebut the evidence adduced in support of the inconsistency or invoke the proviso. In the latter case, it would have to demonstrate that the complaining party violated its obligation not to require the responding party to change its development policy. This is an assertion with respect to which the responding party must bear the burden of proof. We, therefore, agree with the Panel that the burden of proof with respect to the proviso is on India."[1420]

1005. In *India – Quantitative Restrictions*, India argued on appeal that the Panel did not apply the rules on burden of proof correctly. India claimed that the Panel failed to analyse whether the United States had made a prima facie case prior to considering the answers provided by the IMF to the Panel's questions and prior to shifting the burden of proof to India. India also argued that the evidence introduced by the United States could not, as a matter of law, have constituted a prima facie case that India's balance-of-payments restrictions were not justified under the Ad Note. The Appellate

[1418] Appellate Body Report on *Japan – Agricultural Products II*, paras. 127–130.
[1419] Appellate Body Report on *US – Carbon Steel*, para. 157.
[1420] Appellate Body Report on *India – Quantitative Restrictions*, para. 136.

Body stated that a Panel was not required to make an explicit statement that a prima facie case has been made:

> "In support of its argument, India refers to the Appellate Body Report in *European Communities – Hormones,* where the Appellate Body stated:
>
> > 'In accordance with our ruling in *United States – Shirts and Blouses*, the Panel should have begun the analysis of each legal provision by examining whether the United States and Canada had presented evidence and legal instruments sufficient to demonstrate that the EC measures were inconsistent with the obligations assumed by the European Communities under each Article of the *SPS Agreement* addressed by the Panel. . . . Only after such a *prima facie* determination has been made by the Panel may the onus be shifted to the European Communities to bring forward evidence and arguments to disprove the complaining party's claim.'
>
> We do not interpret the above statement as requiring a panel to conclude that a *prima facie* case is made before it considers the views of the IMF or any other experts that it consults. Such consideration may be useful in order to determine whether a *prima facie* case has been made. Moreover, we do not find it objectionable that the Panel took into account, in assessing whether the United States had made a *prima facie* case, the responses of India to the arguments of the United States. This way of proceeding does not imply, in our view, that the Panel shifted the burden of proof to India. We, therefore, are not of the opinion that the Panel erred in law in proceeding as it did."[1421]

1006. The Appellate Body on *India – Quantitative Restrictions* then rejected India's appeal on the grounds "that the evidence introduced by the United States could not, as a matter of law, have constituted a *prima facie* case". The Appellate Body recalled its previous findings in this respect and held that the "weighing and assessing of the evidence" was outside the scope of review.

> "As to the second alleged mistake, namely, that the evidence introduced by the United States could not, as a matter of law, have constituted a *prima facie* case that India's balance-of-payments restrictions were not justified under the Ad Note, we recall that in *European Communities – Hormones*, the Appellate Body stated:
>
> > 'Determination of the credibility and weight properly to be ascribed to (that is, the appreciation of) a given piece of evidence is part and parcel of the fact finding process and is, in principle, left to the discretion of a panel as the trier of facts . . .'
>
> Similarly, in *Korea – Taxes on Alcoholic Beverages*, the Appellate Body stated:
>
> > 'The Panel's examination and weighing of the evidence submitted fall, in principle, within the scope of the Panel's discretion as the trier of facts and, accordingly, outside the scope of appellate review. . . .'
>
> We believe that this second mistake alleged by India relates to the weighing and assessing of the evidence adduced by the United States, and is, therefore, outside the scope of appellate review."[1422]

(b) Burden of proof under the Enabling Clause

1007. The Appellate Body stated in *EC – Tariff Preferences* that as an exception provision, the ultimate burden of proof under the Enabling Clause falls on the respondent party:

> "As a general rule, the burden of proof for an 'exception' falls on the respondent, that is, as the Appellate Body stated in *US – Wool Shirts and Blouses*, on the party 'assert[ing] the affirmative of a particular . . . defence'.[1423] From this allocation of the burden of proof, it is normally for the respondent, first, to *raise* the defence and, second, to *prove* that the challenged measure meets the requirements of the defence provision.
>
> We are therefore of the view that the European Communities must *prove* that the Drug Arrangements satisfy the conditions set out in the Enabling Clause. Consistent with the principle of *jura novit curia,* it is not the responsibility of the European Communities to provide us with the legal interpretation to be given to a particular provision in the Enabling Clause; instead, the burden of the European Communities is to adduce sufficient evidence to substantiate its assertion that the Drug Arrangements comply with the requirements of the Enabling Clause."[1424]

1008. However, the Appellate Body also found in *EC – Tariff Preferences* that the complainant bears the burden of raising the Enabling Clause in its panel request in order to convey the "legal basis of the complaint sufficient to present the problem clearly" as required by Article 6 of the DSU. At the same time, the Appellate Body reiterated its view that the ultimate burden of justifying the challenged measure under the Enabling Clause is with the respondent:

> "In our view, the special status of the Enabling Clause in the WTO system has particular implications for WTO dispute settlement. As we have explained, paragraph 1 of the Enabling Clause enhances market access for

[1421] Appellate Body Report on *India – Quantitative Restrictions*, paras. 141–142.

[1422] Appellate Body Report on *India – Quantitative Restrictions*, paras. 143–144.

[1423] (*footnote original*) Appellate Body Report, p. 14, DSR 1997:I, at 335. (See also Appellate Body Report, *US – FSC (Article 21.5 – EC)*, para. 133; and Appellate Body Report, *India – Quantitative Restrictions*, para. 136.)

[1424] Appellate Body Report on *EC – Tariff Preferences*, paras. 104–105.

developing countries as a means of improving their economic development by authorizing preferential treatment for those countries, 'notwithstanding' the obligations of Article I. It is evident that a Member cannot implement a measure authorized by the Enabling Clause without according an 'advantage' to a developing country's products over those of a developed country. It follows, therefore, that every measure undertaken pursuant to the Enabling Clause would necessarily be inconsistent with Article I, if assessed on that basis alone, but it would be exempted from compliance with Article I because it meets the requirements of the Enabling Clause. Under these circumstances, we are of the view that a complaining party challenging a measure taken pursuant to the Enabling Clause must allege more than mere inconsistency with Article I:1 of the GATT 1994, for to do only that would not convey the 'legal basis of the complaint sufficient to present the problem clearly'. In other words, it is insufficient in WTO dispute settlement for a complainant to allege inconsistency with Article I:1 of the GATT 1994 if the complainant seeks also to argue that the measure is not justified under the Enabling Clause. This is especially so if the challenged measure, like that at issue here, is plainly taken pursuant to the Enabling Clause, as we discuss *infra*.

. . .

The responsibility of the complaining party in such an instance, however, should not be overstated. It is merely to *identify* those provisions of the Enabling Clause with which the scheme is allegedly inconsistent, without bearing the burden of *establishing* the facts necessary to support such inconsistency. That burden, as we concluded above, remains on the responding party invoking the Enabling Clause as a defence."[1425]

(c) Burden of proof in the SPS Agreement

(i) *Burden of proof in the context of Article 2.2 of the SPS Agreement*

1010. The Appellate Body explained in *Japan – Apples* that the complainant could establish a prima facie case of inconsistency with Article 2.2 of the *SPS Agreement* even though it confined its arguments to a claim asserted by it, and found that the Panel acted within the limits of its investigative authority when the Panel assessed relevant allegations of fact asserted by Japan as the respondent:

"Japan also contends that the Panel did not have the authority to make certain findings of fact . . . . We disagree with Japan. . . .The Panel acted within the limits of its investigative authority because it did nothing more than assess relevant allegations of fact asserted by Japan, in the light of the evidence submitted by the parties and the opinions of the experts.

Japan also submits that, 'in order to establish a *prima facie* case of insufficient scientific evidence under Article 2.2 of the SPS Agreement, the complaining party must establish that there is not sufficient evidence for *any* of the perceived risks underlying the measure.' . . . We find no basis for the approach advocated by Japan. As the Appellate Body stated in *EC – Hormones*, 'a *prima facie* case is one which, in the absence of effective refutation by the defending party, requires a panel, as a matter of law, to rule in favour of the complaining party presenting the *prima facie* case.'[1426] In *US – Wool Shirts and Blouses*, the Appellate Body stated that the nature and scope of evidence required to establish a *prima facie* case 'will vary from measure to measure, provision to provision, and case to case.'[1427] In the present case, the Panel appears to have concluded that in order to demonstrate a *prima facie* case that Japan's measure is maintained without sufficient scientific evidence, it sufficed for the United States to address only the question of whether mature, symptomless apples could serve as a pathway for fire blight.

The Panel's conclusion seems appropriate to us for the following reasons. First, the claim pursued by the United States was that Japan's measure is maintained without sufficient scientific evidence to the extent that it applies to mature, symptomless apples exported from the United States to Japan. What is required to demonstrate a *prima facie* case is necessarily influenced by the nature and the scope of the claim pursued by the complainant. A complainant should not be required to prove a claim it does not seek to make. Secondly, the Panel found that mature, symptomless apple fruit is the commodity 'normally exported' by the United States to Japan.[1428] The Panel indicated that the risk that apple fruit other than mature, symptomless apples may actually be imported into Japan would seem to arise primarily as a result of human or technical error, or illegal actions,[1429] and noted that the experts characterized errors of handling and illegal actions as 'small' or 'debatable' risks.[1430] Given the characterization of these risks, in our opinion it was legitimate for the Panel to consider that the United States could demonstrate a *prima facie* case of inconsistency with Article 2.2 of the SPS Agreement through argument based solely on mature, symptomless apples. Thirdly, the record contains no evidence to suggest that apples other than mature, symptomless ones have ever been exported to Japan from the United States as a result of errors of handling or illegal actions. . . . "[1431]

[1425] Appellate Body Report on *EC – Tariff Preferences*, paras. 110 and 115.

[1426] (*footnote original*) Appellate Body Report on *EC – Hormones*, para. 104.

[1428] (*footnote original*) Panel Report, para. 8.141. The Panel also found that "the importation of immature, infected apples may only occur as a result of a handling error or an illegal action". (*Ibid.*, footnote 2275 to para. 8.121.)

[1429] (*footnote original*) Panel Report, para. 8.174.

[1430] (*footnote original*) Panel Report, para. 8.161.

[1431] Appellate Body Report on *Japan – Apples*, paras. 158–160.

(ii) *Burden of proof in the context of Article 3.2 of the SPS Agreement*

1012. In *EC – Hormones*, the Appellate Body examined whether the Panel correctly allocated the burden of proof under the *SPS Agreement*. The Appellate Body noted that the Panel made an interpretative ruling that "the *SPS Agreement* allocates the 'evidentiary burden' to the Members imposing an SPS measure" on the basis of, *inter alia*, Article 3.2 of the *SPS Agreement*. The Appellate Body noted that the Panel drew a reverse inference from Article 3.2 of the *SPS Agreement* to the effect that "if a measure does not conform to international standards, the Member imposing such a measure must bear the burden of proof in any complaint of inconsistency with the provisions of the *SPS Agreement*." The Appellate Body reversed the Panel's ruling and stated:

> "The presumption of consistency with relevant provisions of the *SPS Agreement* that arises under Article 3.2 in respect of measures that conform to international standards may well be an *incentive* for Members so to conform their SPS measures with such standards. It is clear, however, that a decision of a Member not to conform a particular measure with an international standard does not authorize imposition of a special or generalized burden of proof upon that Member, which may, more often than not, amount to a *penalty*.
>
> . . .
>
> The Panel relies on two interpretative points in reaching its above finding. First, the Panel posits the existence of a 'general rule – exception' relationship between Article 3.1 (the general obligation) and Article 3.3 (an exception) and applies to the *SPS Agreement* what it calls 'established practice under GATT 1947 and GATT 1994' to the effect that the burden of justifying a measure under Article XX of the GATT 1994 rests on the defending party. It appears to us that the Panel has misconceived the relationship between Articles 3.1, 3.2 and 3.3, a relationship discussed below, which is qualitatively different from the relationship between, for instance, Articles I or III and Article XX of the GATT 1994. Article 3.1 of the *SPS Agreement* simply excludes from its scope of application the kinds of situations covered by Article 3.3 of that Agreement, that is, where a Member has projected for itself a higher level of sanitary protection than would be achieved by a measure based on an international standard. Article 3.3 recognizes the autonomous right of a Member to establish such higher level of protection, provided that that Member complies with certain requirements in promulgating SPS measures to achieve that level. The general rule in a dispute settlement proceeding, requiring a complaining party to establish a *prima facie* case of inconsistency with a provision of the *SPS Agreement* before the burden of showing consistency with that provision is taken on by the defending party, is *not* avoided by simply describing that same provision as an 'exception'. In much the same way, merely characterizing a treaty provision as an 'exception' does not by itself justify a 'stricter' or 'narrower' interpretation of that provision than would be warranted by examination of the ordinary meaning of the actual treaty words, viewed in context and in the light of the treaty's object and purpose, or, in other words, by applying the normal rules of treaty interpretation. It is also well to remember that a *prima facie* case is one which, in the absence of effective refutation by the defending party, requires a panel, as a matter of law, to rule in favour of the complaining party presenting the *prima facie* case."[1432]

(d) Burden of proof in the SCM Agreement

1013. In *Brazil – Aircraft*, Canada appealed the Panel's finding that, in a case involving a claim of violation of Article 3.1(a) of the *SCM Agreement* against a developing country Member, the complaining party has the burden of proving that the developing country Member in question has not complied with at least one of the elements set out in Article 27.4 of the *SCM Agreement*. Canada argued that since Article 27.4 of the *SCM Agreement* is in the nature of a conditional exception or an affirmative defence, the respondent developing country Member has the burden of proof whereas Brazil submitted that since Article 27 is a transitional provision that contains a set of special and differential rights and obligations for developing country Members, the complaining party, namely Canada, has the burden of proving that the developing country Member is not in compliance with Article 27.4 of the *SCM Agreement*. The Appellate Body stated:

> "On reading paragraphs 2(b) and 4 of Article 27 together, it is clear that the conditions set forth in paragraph 4 are *positive obligations* for developing country Members, *not* affirmative defences. If a developing country Member complies with the obligations in Article 27.4, the prohibition on export subsidies in Article 3.1(a) simply does not apply. However, if that developing country Member does *not* comply with those obligations, Article 3.1(a) *does* apply.
>
> For these reasons, we agree with the Panel that the burden is on the complaining party (*in casu* Canada) to demonstrate that the developing country Member (*in casu* Brazil) is not in compliance with at least one of the elements set forth in Article 27.4. If such non-compliance is demonstrated, then, and only then, does the prohibition of Article 3.1(a) *apply* to that developing country Member."[1433]

1014. In *Canada – Aircraft*, Canada justified its refusal to provide information on the disputed financing of the

[1432] Appellate Body Report on *EC – Hormones*, paras. 102 and 104. See also Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 6.22.

[1433] Appellate Body Report on *Brazil – Aircraft*, paras. 140–141.

transaction at issue on the grounds that Brazil had not established a prima facie case that such financing constituted a prohibited export subsidy under Article 3.1(a) of the *SCM Agreement*. The Appellate Body stated:

> "A *prima facie* case, it is well to remember, is a case which, in the absence of effective refutation by the defending party (that is, in the present appeal, the Member requested to provide the information), requires a panel, as a matter of law, to rule in favour of the complaining party presenting the *prima facie* case. There is, as noted earlier, nothing in either the DSU or the *SCM Agreement* to support Canada's assumption. To the contrary, a panel is vested with ample and extensive discretionary authority to determine *when* it needs information to resolve a dispute and *what* information it needs. A panel may need such information before or after a complaining or a responding Member has established its complaint or defence on a *prima facie* basis. A panel may, in fact, need the information sought in order to evaluate evidence already before it in the course of determining whether the claiming or the responding Member, as the case may be, has established a *prima facie* case or defence. Furthermore, a refusal to provide information requested on the basis that a *prima facie* case has not been made implies that the Member concerned believes that it is able to judge for itself whether the other party has made a *prima facie* case. However, no Member is free to determine for itself whether a *prima facie* case or defence has been established by the other party. That competence is necessarily vested in the panel under the DSU, and not in the Members that are parties to the dispute."[1434]

(e) Burden of proof in the TRIPS Agreement

1015. In *India – Patents (US)*, India challenged the application of the burden of proof by the Panel, arguing that the Panel erroneously required the United States, the complaining party, merely to raise "reasonable doubts" suggesting a violation of Article 70.8 of the *TRIPS Agreement*, and subsequently placed the burden on India to dispel such doubts. The Appellate Body recalled the finding of the Panel and rejected India's claim:

> "India raises the additional argument that the Panel erred in its application of the burden of proof in assessing Indian municipal law. In particular, India alleges that the Panel, after having required the United States merely to raise 'reasonable doubts' suggesting a violation of Article 70.8, placed the burden on India to dispel such doubts.
>
> The Panel states:
>
> > 'As the Appellate Body report on *Shirts and Blouses* points out, "a party claiming a violation of a provision of the WTO Agreement by another Member must assert and prove its claim". In this case, it is the United States that claims a violation by India of Article 70.8 of the *TRIPS Agreement*. Therefore, it is up to the United States to put forward evidence and legal arguments sufficient to demonstrate that action by India is inconsistent with the obligations assumed by India under Article 70.8. In our view, the United States has successfully put forward such evidence and arguments. Then, . . . the onus shifts to India to bring forward evidence and arguments to disprove the claim. We are not convinced that India has been able to do so (footnotes deleted).'[1435]
>
> This statement of the Panel is a legally correct characterization of the approach to burden of proof that we set out in *United States – Shirts and Blouses*.[1436] However, it is not sufficient for a panel to enunciate the correct approach to burden of proof; a panel must also apply the burden of proof correctly. A careful reading of paragraphs 7.35 and 7.37 of the Panel Report reveals that the Panel has done so in this case. These paragraphs show that the United States put forward evidence and arguments that India's 'administrative instructions' pertaining to mailbox applications were legally insufficient to prevail over the application of certain mandatory provisions of the Patents Act. India put forward rebuttal evidence and arguments. India misinterprets what the Panel said about 'reasonable doubts'. The Panel did not require the United States merely to raise 'reasonable doubts' before the burden shifted to India. Rather, after properly requiring the United States to establish a *prima facie* case and after hearing India's rebuttal evidence and arguments, the Panel concluded that *it* had 'reasonable doubts' that the 'administrative instructions' would prevail over the mandatory provisions of the Patents Act if a challenge were brought in an Indian court.
>
> For these reasons, we conclude that the Panel applied the burden of proof correctly in assessing the compliance of India's domestic law with Article 70.8(a) of the *TRIPS Agreement*."[1437]

(f) Burden of proof in the TBT Agreement

1016. In *EC – Sardines*, the European Communities had asserted before the Panel that Codex Stan 94 was "ineffective or inappropriate" to fulfil the "legitimate objectives" of the European Communities Regulation at issue. The Panel was of the view that the European Communities was thus asserting the affirmative of a particular claim or defence, and, therefore, that the burden of proof was on the European Communities to demonstrate that claim.[1438] The Panel justified its position as follows: first, it reasoned that the complainant is

[1437] Appellate Body Report on *India – Patents (US)*, paras. 73–75.
[1438] Panel Report on *EC – Sardines*, para. 7.50.

not in a position to "spell out" the "legitimate objectives" pursued by a Member through a technical regulation; and, second, it reasoned "that the assessment of whether a relevant international standard is 'inappropriate' ... may extend to considerations which are proper to the Member adopting or applying a technical regulation".[1439] The Panel, although it acknowledged the Appellate Body's finding in *EC – Hormones* (see paragraph 990 above), concluded that it "does not have a direct bearing" on the question of the allocation of the burden of proof under the second part of Article 2.4 of the *TBT Agreement*".[1440] The Appellate Body disagreed with the Panel's conclusion that its ruling on the issue of the burden of proof in *EC – Hormones* had no "direct bearing" on this case and reversed the Panel's finding on burden of proof.[1441] The Appellate Body thus concluded that the complaining Member seeking a ruling on the inconsistency of the measure applied by the defendant with Article 2.4 of the *TBT Agreement* was to bear the burden of proving its claim:

> "We disagree with the Panel's conclusion that our ruling on the issue of the burden of proof has no 'direct bearing' on this case. The Panel provides no explanation for this conclusion and, indeed, could not have provided any plausible explanation. For there are strong conceptual similarities between, on the one hand, Article 2.4 of the *TBT Agreement* and, on the other hand, Articles 3.1 and 3.3 of the *SPS Agreement*, and our reasoning in *EC – Hormones* is equally apposite for this case. The heart of Article 3.1 of the *SPS Agreement* is a requirement that Members base their sanitary or phytosanitary measures on international standards, guidelines, or recommendations. Likewise, the heart of Article 2.4 of the *TBT Agreement* is a requirement that Members use international standards as a basis for their technical regulations. Neither of these requirements in these two agreements is absolute. Articles 3.1 and 3.3 of the *SPS Agreement* permit a Member to depart from an international standard if the Member seeks a level of protection higher than would be achieved by the international standard, the level of protection pursued is based on a proper risk assessment, and the international standard is not sufficient to achieve the level of protection pursued. Thus, under the *SPS Agreement*, departing from an international standard is permitted in circumstances where the international standard is ineffective to achieve the objective of the measure at issue. Likewise, under Article 2.4 of the *TBT Agreement*, a Member may depart from a relevant international standard when it would be an 'ineffective or inappropriate means for the fulfilment of the legitimate objectives pursued' by that Member through the technical regulation.
>
> Given the conceptual similarities between, on the one hand, Articles 3.1 and 3.3 of the *SPS Agreement* and, on the other hand, Article 2.4 of the *TBT Agreement*, we see no reason why the Panel should not have relied on the principle we articulated in *EC – Hormones* to determine the allocation of the burden of proof under Article 2.4 of the *TBT Agreement*. In *EC – Hormones*, we found that a 'general rule–exception' relationship between Articles 3.1 and 3.3 of the *SPS Agreement* does not exist, with the consequence that the complainant had to establish a case of inconsistency with *both* Articles 3.1 and 3.3.[1442] We reached this conclusion as a consequence of our finding there that 'Article 3.1 of the *SPS Agreement* simply excludes from its scope of application the kinds of situations covered by Article 3.3 of that Agreement'.[1443] Similarly, the circumstances envisaged in the second part of Article 2.4 are excluded from the scope of application of the first part of Article 2.4. Accordingly, as with Articles 3.1 and 3.3 of the *SPS Agreement*, there is no 'general rule–exception' relationship between the first and the second parts of Article 2.4. Hence, in this case, it is for Peru – as the complaining Member seeking a ruling on the inconsistency with Article 2.4 of the *TBT Agreement* of the measure applied by the European Communities – to bear the burden of proving its claim. This burden includes establishing that Codex Stan 94 has not been used 'as a basis for' the EC Regulation, as well as establishing that Codex Stan 94 is effective and appropriate to fulfil the 'legitimate objectives' pursued by the European Communities through the EC Regulation."[1444]

1017. As regards the statements of the Appellate Body in *EC – Sardines* on the lack of relevance of the difficulty of collecting information to prove a case in the allocation of the burden of proof, see paragraph 998 above.

(g) Burden of proof in the Agreement on Agriculture

E. PRIVATE COUNSEL

1. Presence of private counsel in oral hearings

1022. In *EC – Bananas III*, the Panel did not allow the presence of private lawyers at the first substantive meeting.[1445] The Appellate Body, however, allowed their presence in the oral hearing and to that effect it issued a preliminary ruling indicating that nothing in the *WTO Agreement*, the *DSU* or its Working Procedures prevented a Member from admitting whomever it deems fit to become part of its delegation to Appellate Body proceedings. Accordingly, the Appellate Body held that a Member could include private counsel in its delegation to an Appellate Body hearing:

> "[W]e can find nothing in the *Marrakesh Agreement Establishing the World Trade Organization* (the '*WTO Agreement*'), the *DSU* or the *Working Procedures*, nor in customary international law or the prevailing practice of international tribunals, which prevents a WTO Member from determining the composition of its delegation in Appellate Body proceedings. Having carefully considered the request made by the government of Saint Lucia, and the responses dated 14 July 1997 received from Canada; Jamaica; Ecuador, Guatemala, Honduras, Mexico and the United States, we rule that it is for a WTO Member to decide who should represent it as members of its delegation in an oral hearing of the Appellate Body."[1446]

1023. In its Report, the Appellate Body in *EC – Bananas III* further justified its preliminary ruling (see paragraph 1022 above) as follows:

> "We note that there are no provisions in the *Marrakesh Agreement Establishing the World Trade Organization* (the '*WTO Agreement*'), in the DSU or in the *Working Procedures* that specify who can represent a government in making its representations in an oral hearing of the Appellate Body. With respect to GATT practice, we can find no previous panel report which speaks specifically to this issue in the context of panel meetings with the parties. We also note that representation by counsel of a government's own choice may well be a matter of particular significance – especially for developing-country Members – to enable them to participate fully in dispute settlement proceedings. Moreover, given the Appellate Body's mandate to review only issues of law or legal interpretation in panel reports, it is particularly important that governments be represented by qualified counsel in Appellate Body proceedings."[1447]

1024. In *Indonesia – Autos*, the Panel applied the same principle to the presence of private lawyers before panels:

> "I wish to inform the parties that having carefully reviewed the letters received in the preliminary matter before us, and having heard the arguments of the parties, the Panel does not agree with the United States' request to exclude from meetings of the Panel certain persons nominated by the Government of Indonesia as members of its delegation. We conclude that it is for the Government of Indonesia to nominate the members of its delegation to meetings of this Panel, and we find no provision in the WTO Agreement or the DSU, including the standard rules of procedure included therein, which prevents a WTO Member from determining the composition of its delegation to WTO panel meetings. Nor does past practice in GATT and WTO dispute settlement point us to a different conclusion in this case. In particular, we note that unlike in this present case, the working procedures of the *Bananas III* Panel contained a specific provision requiring the presence only of government officials.
>
> We would like to emphasize that all members of parties' delegations – whether or not they are government employees – are present as representatives of their governments, and as such are subject to the provisions of the DSU and of the standard working procedures, including Articles 18.1 and 18.2 of the DSU and paragraphs 2 and 3 of those procedures. In particular, parties are required to treat as confidential all submissions to the Panel and all information so designated by other Members; and, in addition, the Panel meets in closed session. Accordingly, we expect that all delegations will fully respect those obligations and will treat these proceedings with the utmost circumspection and discretion. I would ask the four Heads of Delegation to confirm that all members of their delegations are present as representatives of their governments, and as such will abide by all of the applicable provisions; and therefore that the governments are responsible for the actions of their representatives.[1448]"[1449]

1025. In *Korea – Alcoholic Beverages*, Korea requested the Panel to issue a preliminary ruling with respect to permission to have private counsel attend the Panel meetings and address the Panel. In Korea's view, in order to fully defend its interests and match the much greater resources of the complaining parties, it had to retain the services of expert counsel with long standing experience in matters of international economic law and international economics. The European Communities had no problem with the presence of private counsel provided that Korea assumed full responsibility for any breach of confidentiality which might result from the presence at the Panel meetings of non-governmental persons. The

[1445] Panel Report on *EC – Bananas III*, paras. 7.10–7.12.
[1446] Appellate Body Report on *EC – Bananas III*, para. 10.
[1447] Appellate Body Report on *EC – Bananas III*, para. 12.
[1448] (*footnote original*) The Panel, on referring to *Bananas III*, referred to the Appellate and Panel Reports on *EC – Regime for the Importation, Sale and Distribution of Bananas*, WT/DS27, adopted on 25 September 1997.
[1449] Panel Report on *Indonesia – Autos*, para. 14.2.

United States, however, indicated, among other things, that the established practice applied in disputes under the GATT 1947 system excluded the routine presence of private lawyers in panel proceedings and asked the Panel, in the event that it decided to accept Korea's request, to impose appropriate safeguards with respect to those persons. The Panel accepted the presence of private counsel as follows:

> "Having considered the request of Korea for the right to use private counsel at the panel meetings, and the responses of the European Communities and the United States, we decided to permit the appearance of private counsel before the Panel and to allow them to address arguments to the Panel in this case. In our view, it is appropriate to grant such a request in order to ensure that Korea has every opportunity to fully defend its interests in this case. However, such permission is granted based on the representations by Korea that the private counsel concerned are official members of the delegation of Korea, that they are retained by and responsible to the Government of Korea, and that they will fully respect the confidentiality of the proceedings and that Korea assumes full responsibility for confidentiality of the proceedings on behalf of all members of its delegation, including non-government employees.
>
> We note that written submissions of the parties which contain confidential information may, in some cases, be provided to non-government advisors who are not members of an official delegation at a panel meeting. The duty of confidentiality extends to all governments that are parties to a dispute and to all such advisors regardless of whether they are designated as members of delegations and appear at a panel meeting.
>
> The United States offered several suggestions for new rules and procedures in regard to these questions. However, in our view, the broader question of establishing further rules on confidentiality and possibly rules of conduct specifically directed at the role of non-governmental advisors generally is a matter more appropriate for consideration by the Dispute Settlement Body and is not within the terms of reference of this Panel."[1450]

2. Confidentiality concerns

1026. As regards confidentiality concerns when private lawyers are concerned, see Section XVIII.B.1(d) above.

3. Conflict of interest

1027. In *EC – Tariff Preferences*, the European Communities had raised ethical concerns arising from the joint representation of India, the complaining party and Paraguay, a third party, by the same legal counsel, the Advisory Centre of WTO Law (ACWL). The Panel considered that it had an obligation to clarify this issue:

> "The Panel nonetheless considers that, flowing from its terms of reference and from the requirement, in Article 11 of the DSU, to 'make an objective assessment of the matter before it . . . ', as well as the requirement, pursuant to Article 12 of the DSU, to determine and administer its Working Procedures, the Panel has the inherent authority – and, indeed, the duty – to manage the proceeding in a manner guaranteeing due process to all parties involved in the proceeding and to maintain the integrity of the dispute settlement system. With specific reference to issues raised in the instant case, it is incumbent on the Panel to clarify whether the ACWL's joint representation of India and Paraguay poses any ethical concerns of the kind raised by the European Communities. At the same time, and although the European Communities asks the Panel for a ruling whether, as a matter of principle, the same legal counsel can represent simultaneously a party and a third party and, if so, under what conditions, the Panel considers that it cannot rule on such issues in the abstract, but only as they relate to the specific case before it."[1451]

1028. The Panel in *EC – Tariff Preferences* then examined the issue of whether there was a conflict of interest when the complainant and a third party were represented by the same legal counsel. In this regard, the Panel found that some common ethical rules of conduct in national jurisdictions were applicable to a conflict of interest situation in WTO dispute settlement proceedings, one such applicable rule being that parties concerned could waive any conflict of interest by their express consent to their joint representation:

> "As a general matter, the Panel considers that it is the responsibility of legal counsel to ensure that it is not placing itself in a position of actual or potential conflict of interest when agreeing to represent, and thereafter representing, one or more WTO Members in a dispute under the DSU. In this regard, the Panel notes that bar associations in many jurisdictions have elaborated rules of conduct dealing explicitly with conflicts of interest through joint representation.[1452]
>
> Common to all such ethical rules of conduct is the principle that counsel shall not accept or continue representation of more than one client in a matter in which the interests of the clients actually or potentially conflict. Underlying this principle is the fundamental notion that a client must have full confidence in the objectivity and independence of the professional advice provided to it

[1450] Panel Report on *Korea – Alcoholic Beverages*, paras. 10.31–10.33.

[1451] Panel report on *EC – Tariff Preferences*, para. 7.8.

[1452] (*footnote original*) See, e.g., American Bar Association, Model Rules of Professional Conduct, Rule 1.7; State Bar of California, Rules of Conduct, Rule 3–310; New York State Bar Association, Lawyer's Code of Professional Responsibility, DR 5–105; Canadian Bar Association, Code of Professional Conduct, Chapter V; Law Society of Upper Canada, Rules of Professional Conduct, Rule 2.04; Council of the Bars and Law Societies of the European Union, Code of Conduct for Lawyers in the European Union, Rule 3.2; Barreau de Paris, Règles professionnelles, Article 155; Bar of England and Wales, Code of Conduct, Rules 603 and 608.

by counsel. A second common element to all such ethical rules, however, is the possibility for clients, when faced with counsel being subject to actual or potential conflict of interest as the result of joint representation, to consent to such joint representation, but only following full disclosure by counsel. In other words, following disclosure of the actual or potential conflict of interest, clients may waive such conflict. Yet a third common element is that counsel shall nevertheless discontinue such joint representation at such time as counsel becomes aware that the interests of the two (or more) clients are directly adverse.

The Panel considers that the above-described common elements to ethical rules of conduct in many jurisdictions are equally appropriate to dealing with issues of representational conflict of interest in the WTO dispute settlement context."[1453]

1029. In *EC – Tariff Preferences*, the Panel further found no "conflict of interest" based on the fact that the parties concerned had consented to the joint representation following a full disclosure of information by the legal counsel to them:

"The Panel agrees with India and Paraguay that the parties most likely to be concerned by any potential or actual conflict of interest are those agreeing to joint representation, here India and Paraguay. It would seem that the basis for raising concerns over such joint representation would be considerably less for other parties in the case, who would be unlikely to be prejudiced by any joint representation of India and Paraguay. While the Panel does not exclude that, in a different case, there could be concerns of a more systemic nature, that could be raised by parties other than those agreeing to joint representation, the Panel is of the view that the European Communities has not demonstrated the existence of a particular situation which gives rise to such concerns in the instant case. The Panel accordingly does not consider that it is faced with an issue of principle or one having systemic implications for the WTO dispute settlement system.

As stated in the Introduction, India and Paraguay claim to have been fully informed about their joint representation by the ACWL and have given their written consent to such joint representation. In these circumstances, the Panel considers that India and Paraguay, as well as counsel for this party and third party, have done everything necessary to allow for the continued joint representation of India and Paraguay by the ACWL."[1454]

F. JUDICIAL ECONOMY

1. Legal basis for the exercise of judicial economy

1030. The Panel on *US – Wool Shirts and Blouses* decided to exercise judicial economy with respect to some of India's claims in that dispute, stating "India is entitled to have the dispute over the contested 'measure' resolved by the Panel, and if we judge that the specific matter in dispute can be resolved by addressing only some of the arguments raised by the complaining party, we can do so. We, therefore, decide to address only the legal issues we think are needed in order to make such findings as will assist the DSB in making recommendations or in giving rulings in respect of this dispute." The Appellate Body upheld the finding of the Panel and discussed the legal basis for judicial economy. The Appellate Body began by noting the function of panels, as defined under Article 11 of the *DSU*:

"The function of panels is expressly defined in Article 11 of the *DSU*, which reads as follows:

'The function of panels is to assist the DSB in discharging its responsibilities under this Understanding and the covered agreements. Accordingly, a panel should make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements, and *make such other findings as will assist the DSB* in making the recommendations or in giving the rulings provided for in the covered agreements . . . (emphasis added).'

Nothing in this provision or in previous GATT practice requires a panel to examine all legal claims made by the complaining party. Previous GATT 1947 and WTO panels have frequently addressed only those issues that such panels considered necessary for the resolution of the matter between the parties, and have declined to decide other issues. Thus, if a panel found that a measure was inconsistent with a particular provision of the GATT 1947, it generally did not go on to examine whether the measure was also inconsistent with other GATT provisions that a complaining party may have argued were violated.[1455] In recent WTO practice, panels likewise

[1453] Panel Report on *EC – Tariff Preferences*, paras. 7.9–7.11.
[1454] Panel Report on *EC – Tariff Preferences*, paras. 7.12–7.13.
[1455] (*footnote original*) See, for example, *EEC – Quantitative Restrictions Against Imports of Certain Products from Hong Kong*, adopted 12 July 1983, BISD 30S/129, para. 33; *Canada – Administration of the Foreign Investment Review Act*, adopted 7 February 1984, BISD 30S/140, para. 5.16; *United States – Imports of Sugar from Nicaragua*, adopted 13 March 1984, BISD 31S/67, paras. 4.5–4.6; *United States – Manufacturing Clause*, adopted 15/16 May 1984, BISD 31S/74, para. 40; *Japan – Measures on Imports of Leather*, adopted 15/16 May 1984, BISD 31S/94, para. 57; *Japan – Trade in Semi-Conductors*, adopted 4 May 1988, BISD 35S/116, para. 122; *Japan – Restrictions on Imports of Certain Agricultural Products*, adopted 22 March 1988, BISD 35S/163, para. 5.4.2; *EEC – Regulations on Imports of Parts and Components*, adopted 16 May 1990, BISD 37S/132, paras. 5.10, 5.22, and 5.27; *Canada – Import, Distribution and Sale of Certain Alcoholic Drinks by Provincial Marketing Agencies*, adopted 22 March 1988, BISD 35S/37, para. 5.6; and *United States – Denial of Most-Favoured-Nation Treatment as to Non-Rubber Footwear from Brazil*, adopted 19 June 1992, BISD 39S/128, para. 6.18.

have refrained from examining each and every claim made by the complaining party and have made findings only on those claims that such panels concluded were necessary to resolve the particular matter.[1456]

Although a few GATT 1947 and WTO panels did make broader rulings, by considering and deciding issues that were not absolutely necessary to dispose of the particular dispute, there is nothing anywhere in the *DSU* that requires panels to do so.[1457]"[1458]

1031. The Appellate Body on *US – Wool Shirts and Blouses* also referred to Article 3.7 of the *DSU* and emphasized that a requirement to address all legal claims raised by a party is inconsistent with the basic aim of dispute settlement, namely to settle disputes:

"Furthermore, such a requirement [to address all legal claims] is not consistent with the aim of the WTO dispute settlement system. Article 3.7 of the *DSU* explicitly states:

> 'The aim of the dispute settlement mechanism is to secure a positive solution to a dispute. A solution mutually acceptable to the parties to a dispute and consistent with the covered agreements is clearly to be preferred.'

Thus, the basic aim of dispute settlement in the WTO is to settle disputes. This basic aim is affirmed elsewhere in the *DSU*. Article 3.4, for example, stipulates:

> 'Recommendations or rulings made by the DSB shall be aimed at achieving a satisfactory settlement of the matter in accordance with the rights and obligations under this Understanding and under the covered agreements.'"[1459]

1032. Finally, the Appellate Body in *US – Wool Shirts and Blouses* rejected the argument by India that, pursuant to Article 3.2, panels were obliged to address all legal claims raised by the parties:

"As India emphasizes, Article 3.2 of the *DSU* states that the Members of the WTO 'recognize' that the dispute settlement system 'serves to preserve the rights and obligations of Members under the covered agreements, and *to clarify the existing provisions of those agreements* in accordance with customary rules of interpretation of public international law' (emphasis added). Given the explicit aim of dispute settlement that permeates the *DSU*, we do not consider that Article 3.2 of the *DSU* is meant to encourage either panels or the Appellate Body to 'make law' by clarifying existing provisions of the *WTO Agreement* outside the context of resolving a particular dispute. A panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute.[1460]

We note, furthermore, that Article IX of the *WTO Agreement* provides that the Ministerial Conference and the General Council have the 'exclusive authority' to adopt interpretations of the *WTO Agreement* and the Multilateral Trade Agreements.[1461] This is explicitly recognized in Article 3.9 of the *DSU*, which provides:

> 'The provisions of this Understanding are without prejudice to the rights of Members to seek authoritative interpretation of provisions of a covered agreement through decision-making under the WTO Agreement or a covered agreement which is a Plurilateral Trade Agreement.'

In the light of the above, we believe that the Panel's finding in paragraph 7.20 of the Panel Report is consistent with the *DSU* as well as with practice under the GATT 1947 and the *WTO Agreement*."

1033. The Appellate Body confirmed its approach to judicial economy in *India – Patents (US)*:

"[A] panel has the discretion to determine the claims it must address in order to resolve the dispute between the parties – provided that those claims are within that panel's terms of reference."[1462]

2. Exercise of judicial economy with respect to arguments

1034. While the Appellate Body has, on several occasions, reiterated that panels are not obliged to address every legal claim made by a party – i.e. the ability of panels to exercise judicial economy – in *EC – Poultry* it held that a panel also had the discretion to decide which arguments made by the parties it was going to address in its analysis. See paragraph 333 above.

3. No obligation to exercise judicial economy

1035. In *US – Lead and Bismuth II*, the United States, the defending party, argued that the Panel was required to exercise judicial economy and not address issues

---

[1456] (*footnote original*) See, for example, Panel Report, *Brazil – Measures Affecting Desiccated Coconut*, adopted 20 March 1997, WT/DS22/R, para. 293; and Panel Report, *United States – Standards for Reformulated and Conventional Gasoline*, as modified by the Appellate Body Report, AB-1996–1, adopted 20 May 1996, WT/DS2/9, para. 6.43.

[1457] (*footnote original*) See, for example, *EEC – Restrictions on Imports of Dessert Apples*, Complaint by Chile, adopted 22 June 1989, BISD 36S/93, para.12.20, where the panel explicitly stated that given its finding that the EEC measures were in violation of Article XI:1 of the GATT 1947 and were not justified by Article XI:2(c)(i) or (ii) of the GATT 1947, no further examination of the administration of the measures would normally be required. In that case, the panel nonetheless considered it "appropriate" to examine the administration of the EEC measures in respect of Article XIII of the GATT 1947 in view of the questions of great practical interest raised by both parties.

[1458] Appellate Body Report on *US – Wool Shirts and Blouses*, pp. 18–19.

[1459] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 19.

[1460] (*footnote original*) The "matter in issue" is the "matter referred to the DSB" pursuant to Article 7 of the *DSU*.

[1461] (*footnote original*) *Japan – Taxes on Alcoholic Beverages*, AB-1996–2, adopted 1 November 1996, WT/DS8/AB/R, WT/DS10/AB/R, WT/DS11/AB/R, p. 13.

[1462] Appellate Body Report on *India – Patents (US)*, para. 87.

which did not need to be addressed for resolving the dispute at hand. The Appellate Body rejected the argument and emphasized that the exercise of judicial economy was within the discretion of a Panel, but that a Panel was never required to exercise judicial economy:

> "The United States seems to consider that our Report in *United States – Shirts and Blouses* sets forth a general principle that panels may not address any issues that need not be addressed in order to resolve the dispute between the parties. We do not agree with this characterization of our findings. In that appeal, India had argued that it was entitled to a finding by the Panel on each of the legal claims that it had made. We, however, found that the principle of judicial economy allows a panel to decline to rule on certain claims.
>
> . . .
>
> In order to resolve the claim of the European Communities, the Panel deemed it necessary to address the two principal arguments made in support of this claim. In doing so, the Panel acted within the context of resolving this particular dispute and, therefore, within the scope of its mandate under the DSU."[1463]

1036. In *Argentina – Footwear (EC)*, the Appellate Body expressed its "surprise" that the Panel had made a certain finding under the *Agreement on Safeguards*:

> "We are somewhat surprised that the Panel, having determined that there were no 'increased imports', and having determined that there was no 'serious injury', for some reason went on to make an assessment of causation. It would be difficult, indeed, to demonstrate a 'causal link' between 'increased imports' that did not occur and 'serious injury' that did not exist. Nevertheless, we see no error in the Panel's interpretation of the causation requirements, or in its interpretation of Article 4.2(b) of the *Agreement on Safeguards*."[1464]

4. Requirement for a panel to state it is exercising judicial economy

1037. In *Canada – Autos*, the Appellate Body admonished the Panel for not stating explicitly that it was exercising judicial economy, when it did not address a particular claim:

> "In our view, it was not necessary for the Panel to make a determination on the European Communities' *alternative* claim relating to the CVA requirements under Article 3.1(a) of the *SCM Agreement* in order 'to secure a positive solution' to this dispute. The Panel had already found that the CVA requirements violated both Article III:4 of the GATT 1994 and Article XVII of the GATS. Having made these findings, the Panel, in our view, exercising the discretion implicit in the principle of judicial economy, could properly decide not to examine the *alternative* claim of the European Communities that the CVA requirements are inconsistent with Article 3.1(a) of the *SCM Agreement*.
>
> We are bound to add that, for purposes of transparency and fairness to the parties, a panel should, however, in all cases, address expressly those claims which it declines to examine and rule upon for reasons of judicial economy. Silence does not suffice for these purposes."[1465]

5. "False" judicial economy

1038. In *Australia – Salmon*, the Appellate Body held that the right to exercise judicial economy could not be exercised where only a partial resolution of a dispute would result:

> "The principle of judicial economy has to be applied keeping in mind the aim of the dispute settlement system. This aim is to resolve the matter at issue and 'to secure a positive solution to a dispute'. To provide only a partial resolution of the matter at issue would be false judicial economy. A panel has to address those claims on which a finding is necessary in order to enable the DSB to make sufficiently precise recommendations and rulings so as to allow for prompt compliance by a Member with those recommendations and rulings 'in order to ensure effective resolution of disputes to the benefit of all Members.'"[1466]

1039. In *Japan – Agricultural Products*, the Appellate Body found an error of law in the Panel's exercise of judicial economy. As in *Australia – Salmon*, the Appellate Body found that the Panel had exercised "false" judicial economy and had provided only a partial resolution of the dispute before it:

> "We note that there is an error of logic in the Panel's finding in paragraph 8.63. The Panel stated that it had found earlier in its Report that the varietal testing requirement violates Article 2.2, and that there was, therefore, no need to examine whether the measure at issue was based on a risk assessment in accordance with Articles 5.1 and 5.2 of the *SPS Agreement*. We note, however, that the Panel's finding of inconsistency with Article 2.2 only concerned the varietal testing requirement as it applies to apples, cherries, nectarines and walnuts. With regard to the varietal testing requirement as it applies to apricots, pears, plums and quince, the Panel found that there was insufficient evidence before it to conclude that this measure was inconsistent with Article 2.2. The Panel, therefore, made an error of logic when it stated, in general terms, that there was no need to examine whether the varietal testing requirement was consistent with Article 5.1 because this requirement had

[1464] Appellate Body Report on *Argentina – Footwear (EC)*, para. 145.
[1465] Appellate Body Report on *Canada – Autos*, paras. 116–117.
[1466] Appellate Body Report on *Australia – Salmon*, para. 223. See also Panel Report on *EC – Sardines*, paras. 7.148–7.152; Appellate Body Report on *US – Steel Safeguards*, para. 10.703.

already been found to be inconsistent with Article 2.2. With regard to the varietal testing requirement as it applies to apricots, pears, plums and quince, there was clearly still a need to examine whether this measure was inconsistent with Article 5.1. By not making a finding under Article 5.1 with regard to the varietal testing requirement as it applies to apricots, pears, plums and quince, the Panel improperly applied the principle of judicial economy. We believe that a finding under Article 5.1 with respect to apricots, pears, plums and quince is necessary 'in order to ensure effective resolution' of the dispute."[1467]

1040. In *Argentina – Ceramic Tiles*, the Panel declined to exercise judicial economy despite its finding under Article 6.8 of the *Anti-Dumping Agreement* that "cast doubt on the entire final determination of dumping" by the investigating authorities. The Panel indicated that "[m]indful of the Appellate Body's comments in [*Australia – Salmon*],[1468] we will continue with our analysis of the other claims made before us 'because it could prove of utility depending on any appeal'[1469] and in order 'to enable the DSB to make sufficiently precise recommendations and rulings so as to allow for prompt compliance with those recommendations and rulings'.[1470]"[1471]

G. *AMICUS CURIAE* BRIEFS

1. Access to the dispute settlement process by non-WTO members

1041. In connection with the access to the WTO dispute settlement process, the Appellate Body in *US – Shrimp* emphasized that such access and the legal right to have one's submission considered by a panel existed only in respect of WTO Members:[1472]

"It may be well to stress at the outset that access to the dispute settlement process of the WTO is limited to Members of the WTO. This access is not available, under the *WTO Agreement* and the covered agreements as they currently exist, to individuals or international organizations, whether governmental or non-governmental. Only Members may become parties to a dispute of which a panel may be seized, and only Members 'having a substantial interest in a matter before a panel' may become third parties in the proceedings before that panel.[1473] Thus, under the DSU, only Members who are parties to a dispute, or who have notified their interest in becoming third parties in such a dispute to the DSB, have a *legal right* to make submissions to, and have a *legal right* to have those submissions considered by, a panel. Correlatively, a panel is *obliged* in law to accept and give due consideration only to submissions made by the parties and the third parties in a panel proceeding. These are basic legal propositions; they do not, however, dispose of the issue here presented by the appellant's first claim of error. We believe this interpretative issue is most appropriately addressed by examining what a panel is *authorized* to do under the DSU."[1474]

1042. In *Turkey – Textiles*, Turkey argued that India should have directed its complaint against the customs union between Turkey and the European Communities instead of directing it solely against Turkey. Turkey argued that it was not responsible for actions collectively taken by the members of the customs union through the institutions created by the agreement. The Panel did not accept this argument and ultimately held that the measures at issue had been taken by Turkey. See also paragraphs 171 and 323–325 above. The Panel also emphasized that the customs union between Turkey and the European Communities did not have standing under WTO law:

"[T]he WTO dispute settlement system is based on Members' rights; is accessible to Members only; and is enforced and monitored by Members only. The Turkey-EC customs union is not a WTO Member, and in that respect does not have any autonomous legal standing for the purpose of WTO law and therefore its dispute settlement procedures. Moreover, the European Communities' import restrictions appear *a priori* to be WTO compatible and could not be the object of any panel recommendation that the European Communities brings its measure into conformity with the WTO Agreement, as required by Article 19 of the DSU."[1475]

2. Authority to admit *amicus curiae* briefs

1043. In *US – Shrimp*, the Appellate Body found that the Panel had erred in its legal interpretation of Article 13 of the *DSU* and held that accepting non-requested information from non-governmental sources was not incompatible with the provisions of the *DSU*. The Appellate Body emphasized the "comprehensive nature" of a panel's authority to seek information in the context of a dispute:

"The comprehensive nature of the authority of a panel to 'seek' information and technical advice from 'any individual or body' it may consider appropriate, or from 'any

[1474] Appellate Body Report on *US – Shrimp*, para. 101.

[1475] Panel Report on *Turkey – Textiles*, para. 9.41.

relevant source', should be underscored. This authority embraces more than merely the choice and evaluation of the *source* of the information or advice which it may seek. A panel's authority includes the authority to decide *not to seek* such information or advice at all. We consider that a panel also has the authority to *accept or reject* any information or advice which it may have sought and received, or to *make some other appropriate disposition* thereof. It is particularly within the province and the authority of a panel to determine *the need for information and advice* in a specific case, to ascertain the *acceptability* and *relevancy* of information or advice received, and to decide *what weight to ascribe to that information or advice* or to conclude that no weight at all should be given to what has been received.

The thrust of Articles 12 and 13, taken together, is that the DSU accords to a panel established by the DSB, and engaged in a dispute settlement proceeding, ample and extensive authority to undertake and to control the process by which it informs itself both of the relevant facts of the dispute and of the legal norms and principles applicable to such facts. That authority, and the breadth thereof, is indispensably necessary to enable a panel to discharge its duty imposed by Article 11 of the DSU to 'make an objective assessment of the matter before it, including an *objective assessment of the facts of the case* and the *applicability of and conformity with the relevant covered agreements* . . . .' (emphasis added)"[1476]

1044. In *US – Lead and Bismuth II*, the Appellate Body considered that as long as it acts consistently with the provisions of the *DSU* and the covered agreements, the Appellate Body also has the legal authority pursuant to Article 17.9 of the *DSU* to decide whether or not to accept and consider any information that it believes is relevant and useful in an appeal:

"In considering this matter, we first note that nothing in the DSU or the *Working Procedures* specifically provides that the Appellate Body may accept and consider submissions or briefs from sources other than the participants and third participants in an appeal. On the other hand, neither the DSU nor the *Working Procedures* explicitly prohibit[s] acceptance or consideration of such briefs. . . . [Article 17.9] makes clear that the Appellate Body has broad authority to adopt procedural rules which do not conflict with any rules and procedures in the DSU or the covered agreements. Therefore, we are of the opinion that as long as we act consistently with the provisions of the DSU and the covered agreements, we have the legal authority to decide whether or not to accept and consider any information that we believe is pertinent and useful in an appeal."[1477]

1045. In *US – Lead and Bismuth II*, the Appellate Body drew a distinction between, on the one hand, parties and third parties to a dispute, which have a legal right to participate in panel and Appellate Body proceedings, and, on the other hand, private individuals and organizations, which are not Members of the WTO, and which, therefore, do not have a legal right to participate in dispute settlement proceedings:

"We wish to emphasize that in the dispute settlement system of the WTO, the DSU envisages *participation* in panel or Appellate Body proceedings, as a matter of legal right, *only* by parties and third parties to a dispute. And, under the DSU, *only* Members of the WTO have a legal right to participate as parties or third parties in a particular dispute. . . .

Individuals and organizations, which are not Members of the WTO, have no legal *right* to make submissions to or to be heard by the Appellate Body. The Appellate Body has no legal duty to accept or consider unsolicited *amicus curiae* briefs submitted by individuals or organizations, not Members of the WTO. The Appellate Body has a legal duty to accept and consider only submissions from WTO Members which are parties or third parties in a particular dispute."[1478]

1046. The Appellate Body on *US – Lead and Bismuth II* further explained that participation by private individuals and organizations is dependent upon the Appellate Body permitting such participation if it finds it useful to do so:

"[W]e have the legal authority under the DSU to accept and consider *amicus curiae* briefs in an appeal in which we find it pertinent and useful to do so. In this appeal, we have not found it necessary to take the two *amicus curiae* briefs filed into account in rendering our decision."[1479]

1047. In *EC – Sardines*, the Appellate Body received for the first time an *amicus curiae* brief from a WTO Member, Morocco, that had not exercised its third-party rights at the panel stage of the proceedings. The Appellate Body found that it was entitled to accept the *amicus curiae* brief submitted by Morocco, and to consider it. However, the Appellate Body emphasized that, in accepting the brief filed by Morocco in this appeal, it was not suggesting that each time a Member files such a brief it was required to accept and consider it. The Appellate Body indicated that it could well exercise its discretion to reject an *amicus curiae* brief if, by accepting it, this would interfere with the "fair, prompt and effective resolution of trade disputes":

"As we explained in *US – Lead and Bismuth II*, the DSU gives WTO Members that are participants and third participants a legal *right* to participate in appellate pro-

[1476] Appellate Body Report on *US – Shrimp*, paras. 104 and 106.
[1477] Appellate Body Report on *US – Lead and Bismuth II*, para. 39.
[1478] Appellate Body Report on *US – Lead and Bismuth II*, paras. 40–41.
[1479] Appellate Body Report on *US – Lead and Bismuth II*, para. 42.

ceedings.[1480] In particular, WTO Members that are third participants in an appeal have the *right* to make written and oral submissions. The corollary is that we have a *duty*, by virtue of the DSU, to accept and consider these submissions from WTO Members. By contrast, participation as *amici* in WTO appellate proceedings is not a legal *right*, and we have no duty to accept any *amicus curiae* brief. We may do so, however, based on our legal authority to regulate our own procedures as stipulated in Article 17.9 of the DSU. The fact that Morocco, as a sovereign State, has chosen not to exercise its *right* to participate in this dispute by availing itself of its third-party rights at the panel stage does not, in our opinion, undermine our *legal authority* under the DSU and our *Working Procedures* to accept and consider the *amicus curiae* brief submitted by Morocco.

Therefore, we find that we are entitled to accept the *amicus curiae* brief submitted by Morocco, and to consider it. We wish to emphasize, however, that, in accepting the brief filed by Morocco in this appeal, we are not suggesting that each time a Member files such a brief we are required to accept and consider it. To the contrary, acceptance of any *amicus curiae* brief is a matter of discretion, which we must exercise on a case-by-case basis. We recall our statement that:

> The procedural rules of WTO dispute settlement are designed to promote . . . the fair, prompt and effective resolution of trade disputes.[1481]

Therefore, we could exercise our discretion to reject an *amicus curiae* brief if, by accepting it, this would interfere with the 'fair, prompt and effective resolution of trade disputes.' This could arise, for example, if a WTO Member were to seek to submit an *amicus curiae* brief at a very late stage in the appellate proceedings, with the result that accepting the brief would impose an undue burden on other participants."[1482]

3. Appellate Body additional procedure for *amicus curiae* briefs

1048. In *EC – Asbestos*, the Appellate Body adopted an additional procedure, for the purposes of this appeal only, pursuant to Rule 16(1) of its Working Procedures, to deal with any possible submissions received from *amici curiae*. The additional procedure was posted on the WTO website on 8 November 2000 and provided as follows:

> "1. In the interests of fairness and orderly procedure in the conduct of this appeal, the Division hearing this appeal has decided to adopt, pursuant to Rule 16(1) of the *Working Procedures for Appellate Review*, and after consultations with the parties and third parties to this dispute, the following additional procedure for purposes of this appeal only.
>
> 2. Any person, whether natural or legal, other than a party or a third party to this dispute, wishing to file a written brief with the Appellate Body, must apply for leave to file such a brief from the Appellate Body *by noon* on *Thursday, 16 November 2000*.
>
> 3. An application for leave to file such a written brief shall:
>
> (a) be made in writing, be dated and signed by the applicant, and include the address and other contact details of the applicant;
>
> (b) be in no case longer than three typed pages;
>
> (c) contain a description of the applicant, including a statement of the membership and legal status of the applicant, the general objectives pursued by the applicant, the nature of the activities of the applicant, and the sources of financing of the applicant;
>
> (d) specify the nature of the interest the applicant has in this appeal;
>
> (e) identify the specific issues of law covered in the Panel Report and legal interpretations developed by the Panel that are the subject of this appeal, as set forth in the Notice of Appeal (WT/DS135/8) dated 23 October 2000, which the applicant intends to address in its written brief;
>
> (f) state why it would be desirable, in the interests of achieving a satisfactory settlement of the matter at issue, in accordance with the rights and obligations of WTO Members under the DSU and the other covered agreements, for the Appellate Body to grant the applicant leave to file a written brief in this appeal; and indicate, in particular, in what way the applicant will make a contribution to the resolution of this dispute that is not likely to be repetitive of what has been already submitted by a party or third party to this dispute; and
>
> (g) contain a statement disclosing whether the applicant has any relationship, direct or indirect, with any party or any third party to this dispute, as well as whether it has, or will, receive any assistance, financial or otherwise, from a party or a third party to this dispute in the preparation of its application for leave or its written brief.

[1480] (*footnote original*) Appellate Body Report, *supra*, footnote 58, para. 40. This is subject to meeting the requirements in Rule 27(3) of the *Working Procedures*, which provides that "[a]ny third participant who has filed a submission pursuant to Rule 24 may appear to make oral arguments or presentations at the oral hearing." However, we have on several occasions permitted third parties who have not filed a submission to attend the oral hearing as passive observers.

[1481] (*footnote original*) Appellate Body Report, *US – FSC*, *supra*, footnote 20, para. 166. In that appeal, we were not referring in the quoted excerpt to the issue of *amicus curiae* briefs. The issue there related to the exercise of the right of appeal. We nevertheless believe that our views on how to interpret the *Working Procedures* are of general application and are thus pertinent to the *amicus curiae* issue as it arises in this case.

[1482] Appellate Body Report on *EC – Sardines*, paras. 166–167.

5. The Appellate Body will review and consider each application for leave to file a written brief and will, without delay, render a decision whether to grant or deny such leave.

6. The grant of leave to file a brief by the Appellate Body does not imply that the Appellate Body will address, in its Report, the legal arguments made in such a brief.

7. Any person, other than a party or a third party to this dispute, granted leave to file a written brief with the Appellate Body, must file its brief with the Appellate Body Secretariat *by noon* on *Monday, 27 November 2000*.

8. A written brief filed with the Appellate Body by an applicant granted leave to file such a brief shall:

(a) be dated and signed by the person filing the brief;

(b) be concise and in no case longer than 20 typed pages, including any appendices; and

(c) set out a precise statement, strictly limited to legal arguments, supporting the applicant's legal position on the issues of law or legal interpretations in the Panel Report with respect to which the applicant has been granted leave to file a written brief.

8. An applicant granted leave shall, in addition to filing its written brief with the Appellate Body Secretariat, also serve a copy of its brief on all the parties and third parties to the dispute *by noon* on *Monday, 27 November 2000*.

9. The parties and the third parties to this dispute will be given a full and adequate opportunity by the Appellate Body to comment on and respond to any written brief filed with the Appellate Body by an applicant granted leave under this procedure." (original emphasis)[1483]

4. Admission/rejection of *amicus curiae* briefs

1049. In *US – Shrimp*, the Appellate Body admitted three *amicus curiae* briefs that were attached as exhibits to the appellant's submission in that appeal. The Appellate Body concluded that those briefs formed part of the appellant's submission, and observed that it was for a participant in an appeal to determine for itself what to include in its submission.[1484]

1050. In *EC – Asbestos*, the Panel received several written submissions from non-governmental organizations. The Panel issued a preliminary ruling informing the parties that, in the light of the European Communities' decision to incorporate into its own submissions the *amicus* briefs submitted by two organizations, the Panel would consider these two documents on the same basis as the other documents furnished by the European Communities in this dispute. At the second substantive meeting of the Panel with the parties, the Panel gave Canada the opportunity to reply, in writing or orally, to the arguments set forth in these two *amicus* briefs. At that same meeting, the Panel also informed the parties that it had decided not to take into consideration the other *amicus* briefs submitted.[1485] At the appeal stage, the Appellate Body adopted an additional procedure, for the purposes of this appeal only, pursuant to Rule 16(1) of its Working Procedures, to deal with any possible submissions received from *amici curiae*. With respect to the additional procedures, see Section XXXVI.G.3 above. Pursuant to the additional procedure, the Appellate Body received 17 applications requesting leave to file a written brief in this appeal. Six of these 17 applications were received after the deadline specified in the additional procedure and, for this reason, leave to file a written brief was denied to these six applicants. The other 11 applications were considered by the Appellate Body but finally denied for failure to comply sufficiently with all the requirements set forth in paragraph 3 of the Additional Procedure.[1486]

1051. In *Thailand – H-Beams*, an industry association submitted an *amicus* brief which cited Thailand's confidential submission. Thailand then claimed that Poland's private counsel might have violated WTO rules of confidentiality by providing Thailand's submission to the said association. Although Poland and the lawyer concerned denied the alleged breach of confidentiality, the Appellate Body issued a preliminary ruling rejecting the *amicus* brief. See Section XVIII.B.1(b) above.

1052. In *EC – Sardines*, the Appellate Body received for the first time an *amicus curiae* brief from a WTO Member, Morocco, that had not exercised its third-party rights at the panel stage of the proceedings. The Appellate Body found that it was entitled to accept the *amicus curiae* brief submitted by Morocco, and to consider it. See paragraph 1047 above in this regard.[1487]

1053. In *US – Countervailing Measures on Certain EC Products*, the Appellate Body received an *amicus curiae* brief from a United States' industry association. The Appellate Body did not take it into account on the

[1483] Appellate Body Report on *EC – Asbestos*, para. 52. See also document WT/DS135/9.
[1484] Appellate Body Report on *US – Shrimp*, para. 91. See also Appellate Body Report on *Thailand – H-Beams* and Appellate Body Report on *US – Shrimp (Article 21.5 – Malaysia)*.
[1485] Panel Report on *EC – Asbestos*, paras. 6.1–6.4 and 8.12–8.14.

[1487] Appellate Body Report on *EC – Sardines*, paras. 166–167.

grounds that they did not find it to be of assistance in the appeal.[1488]

1054. In *US – Steel Safeguards*, the Appellate Body received an *amicus curiae* brief from an industry association, the American Institute for International Steel. The Appellate Body did not take it into account on the grounds that it was primarily directed to a question that was not part of any of the claims and thus the Appellate Body did not find it to be of assistance in the appeal.[1489]

1055. In *US – Softwood Lumber IV*, the Appellate Body received two *amicus curiae* briefs from the Indigenous Network on Economies and Trade (Canada) and jointly from Defenders of Wildlife, Natural Resources Defense Council and Northwest Ecosystem Alliance (United States). The Appellate Body did not find it necessary to take the two *amicus curiae* briefs into account in rendering its decision on the grounds that these briefs dealt with questions not addressed in the submissions of the participants or third participants and that no participant or third participant adopted the arguments made in these briefs.[1490]

I. PARAGRAPH A

A. TEXT OF PARAGRAPH A

Members hereby *agree* as follows:

A. *Objectives*

(i) The purpose of the Trade Policy Review Mechanism ("TPRM") is to contribute to improved adherence by all Members to rules, disciplines and commitments made under the Multilateral Trade Agreements and, where applicable, the Plurilateral Trade Agreements, and hence to the smoother functioning of the multilateral trading system, by achieving greater transparency in, and understanding of, the trade policies and practices of Members. Accordingly, the review mechanism enables the regular collective appreciation and evaluation of the full range of individual Members' trade policies and practices and their impact on the functioning of the multilateral trading system. It is not, however, intended to serve as a basis for the enforcement of specific obligations under the Agreements or for dispute settlement procedures, or to impose new policy commitments on Members.

(ii) The assessment carried out under the review mechanism takes place, to the extent relevant, against the background of the wider economic and developmental needs, policies and objectives of the Member concerned, as well as of its external environment. However, the function of the review mechanism is to examine the impact of a Member's trade policies and practices on the multilateral trading system.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH A

1. Mission of TPRM

1. With respect to the mission of the *TPRM*, the TPRB, in its Report to the Third Ministerial Conference, stated:

> "The TPRB reaffirmed the relevance of TPRM's mission as defined in Annex 3. The TPRM had been conceived as a policy exercise and it was therefore not intended to serve as a basis for the enforcement of specific WTO obligations or for dispute settlement procedures, or to impose new policy commitments on Members. The Mechanism should continue to focus on improved adherence by all Members to rules, disciplines and commitments made under the Multilateral Trade Agreements and, where

applicable, the Plurilateral Trade Agreements, and hence contribute to the smoother functioning of the multilateral trading system, by achieving greater transparency in, and understanding of, the trade policies and practices of Members. Accordingly, the Mechanism enables the regular collective appreciation and evaluation of the full range of individual Members' trade policies and practices and their impact on the functioning of the multilateral trading system. Reviews under the Mechanism should continue to take place, to the extent relevant, against the background of the wider economic and development needs, policies and objectives of the Members concerned, as well as of their external environment. Greater attention should be given to transparency in government decision-making on trade policy matters, in line with Paragraph B of Annex 3."[1]

2. Reference to GATT practice

2. With respect to GATT practice on this subject-matter see GATT Analytical Index, pages 305–308.

II. PARAGRAPH B

A. TEXT OF PARAGRAPH B

B. *Domestic transparency*

Members recognize the inherent value of domestic transparency of government decision-making on trade policy matters for both Members' economies and the multilateral trading system, and agree to encourage and promote greater transparency within their own systems, acknowledging that the implementation of domestic transparency must be on a voluntary basis and take account of each Member's legal and political systems.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH B

3. The TPRB, in its Report to the Third Ministerial Conference, found:

"The Mechanism had demonstrated that it had a valuable public-good aspect, particularly in its contribution to transparency. The Mechanism had also been a catalyst for Members to reconsider their policies, had served as an input into policy formulation and had helped identify technical assistance needs."[2]

4. The TPRB then concluded in the Report that "[g]reater attention should be given to transparency in government decision-making on trade policy matters, in line with Paragraph B of Annex 3".[3]

III. PARAGRAPH C

A. TEXT OF PARAGRAPH C

C. *Procedures for review*

(i) The Trade Policy Review Body (referred to herein as the "TPRB") is hereby established to carry out trade policy reviews.

(ii) The trade policies and practices of all Members shall be subject to periodic review. The impact of individual Members on the functioning of the multilateral trading system, defined in terms of their share of world trade in a recent representative period, will be the determining factor in deciding on the frequency of reviews. The first four trading entities so identified (counting the European Communities as one) shall be subject to review every two years. The next 16 shall be reviewed every four years. Other Members shall be reviewed every six years, except that a longer period may be fixed for least-developed country Members. It is understood that the review of entities having a common external policy covering more than one Member shall cover all components of policy affecting trade including relevant policies and practices of the individual Members. Exceptionally, in the event of changes in a Member's trade policies or practices that may have a significant impact on its trading partners, the Member concerned may be requested by the TPRB, after consultation, to bring forward its next review.

(iii) Discussions in the meetings of the TPRB shall be governed by the objectives set forth in paragraph A. The focus of these discussions shall be on the Member's trade policies and practices, which are the subject of the assessment under the review mechanism.

(iv) The TPRB shall establish a basic plan for the conduct of the reviews. It may also discuss and take note of update reports from Members. The TPRB shall establish a programme of reviews for each year in consultation with the Members directly concerned. In consultation with the Member or Members under review, the Chairman may choose discussants who, acting in their personal capacity, shall introduce the discussions in the TPRB.

(v) The TPRB shall base its work on the following documentation:

(a) a full report, referred to in paragraph D, supplied by the Member or Members under review;

(b) a report, to be drawn up by the Secretariat on its own responsibility, based on the information available to it and that pro-

[3] WT/MIN(99)/2, section VIII, fourth bullet point. See para. 29 of this Chapter.

vided by the Member or Members concerned. The Secretariat should seek clarification from the Member or Members concerned of their trade policies and practices.

(vi) The reports by the Member under review and by the Secretariat, together with the minutes of the respective meeting of the TPRB, shall be published promptly after the review.

(vii) These documents will be forwarded to the Ministerial Conference, which shall take note of them.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH C

1. Subparagraph (i)

(a) Establishment of Trade Policy Review Body

5. With respect to the composition of the TPRB, see the Chapter on the *WTO Agreement*, Section IV.B.4.

(b) Rules of procedure

6. At its meeting of 6 June 1995, pursuant to Article IV:4 of the *WTO Agreement*, the TPRB adopted the rules of procedure for its meetings,[4] where the TPRB follows, *mutatis mutandis*, the rules of procedure for the General Council,[5] with certain exceptions.

7. The procedural improvements proposed by the TPRB to the *TPRM* and the discussion of these proposals can be found in two Notes by the Chairperson.[6]

(c) Overview of activities

(i) Reviews

8. As of 31 December 2004, the TPRB has conducted 197 reviews since its establishment in 1989.[7] The reviews have covered 114 Members, counting the European Union as one Member.[8] In its annual report for 2004, the TPRB stated:

> "By the end of 2004, the TPRM will have conducted 197 reviews since its formation (Annex I). The reviews have covered 114 of 148 Members, representing around 88% of the share of world trade. The trade policies and practices of four Members will have been reviewed for the first time during 2004.[9] The increased importance given to the reviews of least developed countries (LDCs) has led to 20 such reviews since 1998.[10]"[11]

(ii) Reporting

9. The TPRB issues annual reports covering its annual assessment of the *TPRM* and the extent to which it fulfils its objectives as set out in the *WTO Agreement*.[12]

2. Subparagraph (ii)

(a) Timing and frequency of review

10. Paragraph 2 of the rules of procedure for TPRB meetings provides as follows:

> "The cycle of reviews provided for in Paragraph C (ii) of the Agreement on the Trade Policy Review Mechanism (TPRM) shall be applied with a general flexibility of up to six months, if and as may be necessary. Schedules of subsequent reviews shall be established counting from the date of the previous review meeting. Members should adhere strictly to the timetables for the preparation of reviews, once agreed."[13]

11. The TPRB, in its Report to the Third Ministerial Conference, observed:

> "The TPRB considered that the current frequency of reviews provided a balance amongst numerous competing considerations, including TPRM objectives, particularly the smoother functioning of the multilateral trading system, the need to maintain a realistic workload, and the benefits of reviewing all Members soon."[14]

12. Also in the Report, the TPRB concluded that "[a]ll Members, including LDCs, should be reviewed at least once as soon as possible".[15]

(b) "the review of entities having a common external policy"

13. With respect to the reviews of regional entities and "grouped" reviews, the Note by the Chairperson dated 13 December 1995 states:

> "I believe it should be stressed that individual reviews must remain the basis of the TPRM. There is room for consideration of grouping of reviews, where possible;

[14] WT/MIN(96)/2, para. 9. See para. 29 of this Chapter. On this matter, see also WT/TPR/13, section (i) and WT/TPR/20, para. 10 and para. 7 of this Chapter.
[15] WT/MIN(96)/2, section VIII, second bullet point. See para. 29 of this Chapter.

however, at this stage there is no support for reviews of regional entities other than the EU."[16]

14. Also, the Note by the Chairperson submitted to the TPRB meeting of 11–12 June 1996 states:

"There is caution about the idea of 'grouping' countries for review, since criteria for such groupings would be difficult to develop and the benefits are not self-evident. However, where smaller member States might themselves volunteer to be reviewed as a group, such requests would be sympathetically considered."[17]

15. Further, the TPRB, in its Report to the Third Ministerial Conference, stated:

"Efforts to maximize efficiency might include: (i) a more considered use of grouped reviews . . . ."[18]

16. The TPRB has conducted reviews of the European Communities and its members. Also, the TPRB has conducted to date the group review of the WTO Members of (i) the South African Customs Union ("SACU")[19] and (ii) the Organisation of Eastern Caribbean States ("OECS").[20]

3. Subparagraph (iii)

17. On TPRB meetings, the TPRB, in its Report to the Third Ministerial Conference, stated:

"The TPRB judged two half-days as an appropriate timespan for a TPRB review, and a day-in-between as desirable. More interactive discussion was encouraged, as was greater participation in reviews of smaller Members, if possible at a rank reflecting the high-level representation often sent by Members under review. Reviews could highlight changes since the previous review."[21]

4. Subparagraph (v)

(a) Documentation

18. On the issue of documentation, the TPRB, in its Report to the Third Ministerial Conference, stated:

"The TPRB felt it essential to meet the agreed four weeks lead time for document distribution in all WTO official languages, as active participation in reviews depended on the timely availability of documents. The TPRB favoured flexibility on the lead time to submit written questions, as well as on the role and number of discussants. Current practice concerning minutes of meetings was seen as appropriate, as was the inclusion of written questions and answers in minutes. Members were encouraged to provide written answers whenever possible during the TPRB meetings. Questions left unanswered during the review should be answered in writing, with responses made available to the Membership; on this there should be a regular follow-up by the WTO Secretariat."[22]

(i) Government reports

19. With respect to reports by Members, see paragraphs 23–28 below.

(ii) Secretariat reports

20. On the Secretariat reports, the TPRB, in its Report to the Third Ministerial Conference, stated:

"The Secretariat should retain its capacity to prepare autonomous, in-depth reports that allowed the TPRB to arrive at an independent, fully informed evaluation of a Member's trade policies and practices. The present structure and coverage of Secretariat reports was generally satisfactory; care should continue to be taken that the reports achieve an appropriate balance between the traditional and relatively new areas of the WTO. Reports should be WTO-relevant, comprehensive and self-contained. The TPRB saw scope for making the Summary Observations of the Secretariat report more readable and for presenting in relevant parts of the report subsequent developments on issues raised at the previous review."[23]

(iii) Derestriction of reports by the Secretariat and the Member under review

21. The Reports by the Secretariat and the Member under review are subject to restricted circulation and press embargo until the end of the first session of the review meeting of the Trade Policy Review Body.

5. Subparagraph (vi)

22. On the dissemination of reviews, the TPRB, in its Report to the Third Ministerial Conference, stated:

"The TPRB considered present dissemination practices as satisfactory. Members noted the value of building awareness within the wider public of the work of the TPRB. Taking existing publication arrangements and budgetary implications into account, the fullest possible dissemination of reviews was encouraged, particularly through the Internet."[24]

---

[16] WT/TPR/13, para. 11. See para. 7 of this Chapter. The Note, however, states that "[t]he general feeling was that national trade policy reviews should not be confused with analyses of regional agreements under Article XXIV of GATT 1994 and Article V of GATS". WT/TPR/13, para. 9.

IV. PARAGRAPH D

A. TEXT OF PARAGRAPH D

D. *Reporting*

In order to achieve the fullest possible degree of transparency, each Member shall report regularly to the TPRB. Full reports shall describe the trade policies and practices pursued by the Member or Members concerned, based on an agreed format to be decided upon by the TPRB. This format shall initially be based on the Outline Format for Country Reports established by the Decision of 19 July 1989 (BISD 36S/406–409), amended as necessary to extend the coverage of reports to all aspects of trade policies covered by the Multilateral Trade Agreements in Annex 1 and, where applicable, the Plurilateral Trade Agreements. This format may be revised by the TPRB in the light of experience. Between reviews, Members shall provide brief reports when there are any significant changes in their trade policies; an annual update of statistical information will be provided according to the agreed format. Particular account shall be taken of difficulties presented to least-developed country Members in compiling their reports. The Secretariat shall make available technical assistance on request to developing country Members, and in particular to the least-developed country Members. Information contained in reports should to the greatest extent possible be coordinated with notifications made under provisions of the Multilateral Trade Agreements and, where applicable, the Plurilateral Trade Agreements.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH D

1. Government reports

(a) Format

23. With respect to the Decision of 19 July 1989,[25] see GATT Analytical Index, page 307.

24. On this topic, the TPRB, in its Report to the Third Ministerial Conference, stated:

> "The TPRB saw the Secretariat and Government reports as complementary. Governments were free to define the structure and coverage of their own reports, but were encouraged to keep them short, WTO-relevant and forward-looking, highlighting recent trade policy development and future policy directions and their impact on trade."[26]

25. Further, a decision of the Contracting Parties to *GATT 1947*, adopted at the Council meeting of 10 May 1994, states:

> "[I]n order to avoid duplication of the material contained in the Secretariat report, and to lighten the burden of delegations, Government reports shall be in the form of policy statements."[27]

(b) Timing

26. The rules of procedure for the TPRB meetings state:

> "Documentation relating to each review meeting shall be circulated in all working languages not less than four weeks in advance of the relevant meetings."[28]

27. Also, the TPRB, in its Report to the Third Ministerial Conference, stated:

> "The TPRB felt it essential to meet the agreed four weeks lead time for document distribution in all WTO official languages, as active participation in reviews depended on the timely availability of documents. The TPRB favoured flexibility on the lead time to submit written questions, as well as on the role and number of discussants."[29]

28. In practice, Members are accordingly requested to submit their government reports to the WTO at least eight weeks before the TPRB meeting for their review.[30]

V. PARAGRAPH E

A. TEXT OF PARAGRAPH E

E. *Relationship with the balance-of-payments provisions of GATT 1994 and GATS*

Members recognize the need to minimize the burden for governments also subject to full consultations under the balance-of-payments provisions of GATT 1994 or GATS. To this end, the Chairman of the TPRB shall, in consultation with the Member or Members concerned, and with the Chairman of the Committee on Balance-of-Payments Restrictions, devise administrative arrangements that harmonize the normal rhythm of the trade policy reviews with the timetable for balance-of-payments consultations but do not postpone the trade policy review by more than 12 months.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH E

No jurisprudence or decision of a competent WTO body.

VI. PARAGRAPH F

A. TEXT OF PARAGRAPH F

F. *Appraisal of the Mechanism*

The TPRB shall undertake an appraisal of the operation of the TPRM not more than five years after the

---

[26] WT/MIN(99)/2, para. 7. See para. 29 of this Chapter.
[27] L/7458.
[28] WT/TPR/6, para. 10. See para. 6 of this Chapter.
[29] WT/MIN(99)/2, para. 12. See para. 29 of this Chapter.
[30] See also the Decision adopted by the GATT Council at its meeting 12 April 1989 to establish the Trade Policy Review Mechanism, L/6490, para. B(i).

entry into force of the Agreement Establishing the WTO. The results of the appraisal will be presented to the Ministerial Conference. It may subsequently undertake appraisals of the TPRM at intervals to be determined by it or as requested by the Ministerial Conference.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH F

29. At its meeting of 27 January 1999, the TPRB agreed on a procedure to appraise the operation of the *TPRM*.[31] On 5 October 1999, the TPRB adopted a report to the Third Ministerial Conference concerning the results of its first appraisal.[32] With respect to the contents of this report, see paragraphs 1, 3, 4, 11, 12, 15, 17, 18, 20, 22, 27 and 30 in this Chapter.

30. With respect to a further appraisal of the operation of the *TPRM*, the TPRB's report to the Third Ministerial Conference states:

> "The TPRB should undertake a further appraisal of the operation of the TPRM not more than five years after the conclusion of the Third WTO Ministerial or as requested by a Ministerial Conference."[33]

VII. PARAGRAPH G

A. TEXT OF PARAGRAPH G

G. *Overview of Developments in the International Trading Environment*

An annual overview of developments in the international trading environment which are having an impact on the multilateral trading system shall also be undertaken by the TPRB. The overview is to be assisted by an annual report by the Director-General setting out major activities of the WTO and highlighting significant policy issues affecting the trading system.

B. INTERPRETATION AND APPLICATION OF PARAGRAPH G

31. Annual reports by the Director-General are submitted to the TPRB in accordance with Paragraph G.[34]

---

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Signatories[1] to the Agreement on Trade in Civil Aircraft, hereinafter referred to as "this Agreement";

(*footnote original*) [1] The term "Signatories" is hereinafter used to mean Parties to this Agreement.

Noting that Ministers on 12–14 September 1973 agreed the Tokyo Round of Multilateral Trade Negotiations should achieve the expansion and ever-greater liberalization of world trade through, *inter alia*, the progressive dismantling of obstacles to trade and the improvement of the international framework for the conduct of world trade;

Desiring to achieve maximum freedom of world trade in civil aircraft, parts and related equipment, including elimination of duties, and to the fullest extent possible, the reduction or elimination of trade restricting or distorting effects;

Desiring to encourage the continued technological development of the aeronautical industry on a worldwide basis;

Desiring to provide fair and equal competitive opportunities for their civil aircraft activities and for their producers to participate in the expansion of the world civil aircraft market;

Being mindful of the importance in the civil aircraft sector of their overall mutual economic and trade interests;

Recognizing that many Signatories view the aircraft sector as a particularly important component of economic and industrial policy;

Seeking to eliminate adverse effects on trade in civil aircraft resulting from governmental support in civil aircraft development, production, and marketing while recognizing that such governmental support, of itself, would not be deemed a distortion of trade;

Desiring that their civil aircraft activities operate on a commercially competitive basis, and recognizing that government–industry relationships differ widely among them;

Recognizing their obligations and rights under the General Agreement on Tariffs and Trade, hereinafter referred to as "the GATT", and under other multilateral agreements negotiated under the auspices of the GATT;

Recognizing the need to provide for international notification, consultation, surveillance and dispute settlement procedures with a view to ensuring a fair, prompt and effective enforcement of the provisions of this Agreement and to maintain the balance of rights and obligations among them;

Desiring to establish an international framework governing conduct of trade in civil aircraft;

Hereby agree as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. General

(a) Origins

1. The *Aircraft Agreement* was concluded on 12 April 1979 at the end of the Tokyo Round. It entered into force on 1 January 1980.[1] Signatories adopted on 8 March 1983 an "Agreed interpretation of Article 2.1.2 of the Agreement on Trade in Civil Aircraft" and "Common guidelines for binding of duties on repairs, to be inserted as a headnote in Signatories' respective GATT schedules".[2] During the Uruguay Round, the negotiators tried unsuccessfully to elaborate a new Aircraft Agreement. At the end of the negotiations, the 1979 *Aircraft Agreement* was annexed, unchanged, to the *WTO Agreement*.

(b) Status under the WTO

2. As of 31 December 2004, there were 30 Signatories to the Agreement: Bulgaria, Canada, the European Communities, Austria, Belgium, Chinese Taipei, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, the United Kingdom, Egypt, Estonia, Georgia, Japan, Latvia, Lithuania, Macau, Malta, Norway, Romania, Switzerland and the United States. Those WTO Members with observer status in the Committee are: Argentina, Australia, Bangladesh, Brazil, Cameroon, China, Colombia, the Czech Republic, Finland, Gabon, Ghana, India, Indonesia, Israel, Korea, Mauritius, Nigeria, Oman, Poland, Singapore, Slovakia, Sri Lanka, Trinidad and Tobago, Tunisia and Turkey. In addition, the Russian Federation and Saudi Arabia are also observers. The IMF and UNCTAD are also observers.[3]

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Product Coverage

1.1 This Agreement applies to the following products:

(*a*) all civil aircraft,

(*b*) all civil aircraft engines and their parts and components,

(*c*) all other parts, components, and sub-assemblies of civil aircraft,

(*d*) all ground flight simulators and their parts and components,

whether used as original or replacement equipment in the manufacture, repair, maintenance, rebuilding, modification or conversion of civil aircraft.[4]

1.2 For the purposes of this Agreement "civil aircraft" means (*a*) all aircraft other than military aircraft and (*b*) all other products set out in Article 1.1 above.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1.1

3. The Annex to the Aircraft Agreement on Product Coverage, to which there were three certifications of modifications and rectifications,[5] has been further amended by means of a Protocol in 1986.[6] At the 21 November 2001 meeting, the Chairman gave an updated report confirming the adoption by the Committee of the *Protocol (2001)*[7] and decision on interim application of duty-free treatment to aircraft ground maintenance simulators,[8] with effect from 6 June 2001. In view of the fact that the *Protocol (2001)* had not yet been accepted by all Signatories, and that the terms of the Protocol give authority to the Committee to decide on the date for acceptance, Signatories adopted a decision to extend the date of acceptance of the *Protocol (2001)* indefinitely.[9, 10] At the 13 November 2002 meet-

[1] BISD 26S/162–170.
[2] AIR/M/10, paras. 9–25 (see footnote 10 of this Chapter). For the Agreed interpretation of Article 2.1.2, see para. 6 of this Chapter.
[3] No Members have become signatories to this Agreement since 1 February 2002.
[4] With respect to the coverage of this Agreement, see the Annex in Section XI.
[5] BISD 30S/4 (1983); BISD 31S/4 (1984); BISD 31S/5 (1985).
[6] BISD 34S/22–24.
[7] TCA/4.
[8] TCA/6.
[9] TCA/7.
[10] The Protocol amending the Annex to the TCA Agreement transposes into the Annex to the Agreement the changes introduced in 1992, 1996 and 2002 versions of the Harmonized Commodity Description and Coding System, as well as extending the product coverage of the Agreement. The new product coverage annex is thus contained in Annex TCA/4.

ing, the Committee adopted ad referendum a decision on Procedures for the Circulation and Derestriction of Documents,[11] aligning the procedures concerning circulation and derestriction of Committee documents with those applicable to other WTO documents.[12]

4. At the meeting of 30 November 1998, the Aircraft Committee decided that the factual information regarding civil/military identification for domestic customs purposes contained in AIR/TSC/W/49 should be updated.[13]

5. At its meeting of 15 November 2000, the Aircraft Committee adopted the following decision:

> "The Committee decides to urge that Signatories apply immediately, on an interim basis, duty-free treatment to the goods of the proposed product coverage Annex outlined in WTO document TCA/W/5/Rev. 3, including aircraft ground maintenance simulators. Signatories shall inform the Committee on steps they have taken relating to such interim application."[14]

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Customs Duties and Other Charges

2.1 Signatories agree:

2.1.1 to eliminate by 1 January 1980, or by the date of entry into force of this Agreement, all customs duties and other charges[1] of any kind levied on, or in connection with, the importation of products, classified for customs purposes under their respective tariff headings listed in the Annex, if such products are for use in a civil aircraft and incorporation therein, in the course of its manufacture, repair, maintenance, rebuilding, modification or conversion;

(*footnote original*) [1] "Other charges" shall have the same meaning as in Article II of the GATT.

2.1.2 to eliminate by 1 January 1980, or by the date of entry into force of this Agreement, all customs duties and other charges[1] of any kind levied on repairs on civil aircraft;

(*footnote original*) [1] "Other charges" shall have the same meaning as in Article II of the GATT.

2.1.3 to incorporate in their respective GATT Schedules by 1 January 1980, or by the date of entry into force of this Agreement, duty-free or duty-exempt treatment for all products covered by Article 2.1.1 above and for all repairs covered by Article 2.1.2 above.

2.2 Each Signatory shall: (a) adopt or adapt an end-use system of customs administration to give effect to its obligations under Article 2.1 above; (b) ensure that its end-use system provides duty-free or duty-exempt treatment that is comparable to the treatment provided by other Signatories and is not an impediment to trade; and (c) inform other Signatories of its procedures for administering the end-use system.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

6. As mentioned in paragraph 1 above, on 8 March 1983, the signatories adopted an "Agreed Interpretation of Article 2.1.2 of the Agreement on Trade in Civil Aircraft"[15], which states that the elimination of "all customs duties and other charges of any kind levied on repairs on civil aircraft" applies only to repairs of complete civil aircraft and those civil aircraft products covered by the respective tariff headings listed in the Annex to the *Aircraft Agreement.*

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Technical Barriers to Trade

3.1 Signatories note that the provisions of the Agreement on Technical Barriers to Trade apply to trade in civil aircraft. In addition, Signatories agree that civil aircraft certification requirements and specifications on operating and maintenance procedures shall be governed, as between Signatories, by the Provisions of the Agreement on Technical Barriers to Trade.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

No jurisprudence or decision of a competent WTO body.

---

[11] TCA/8.

[12] The Committee agreed that the Decision on Procedures for the Circulation and Derestriction of Documents would be considered as finally adopted in the absence of objections from Signatories before the agreed deadline of 30 November 2002. No objections were made by that date and the adoption of the Decision was thus confirmed. The Decision can be found in document TCA/8.

[13] WT/L/291, para. 4. As of 15 November 2000, Bulgaria, Canada, the European Communities, Japan and the United States had provided the requisite information, TCA/M/11, para. 58.

[14] TCA/M/11, para. 48. See also TCA/M/12, paras. 47–51, and TCA/W/7 concerning a communication from Japan on the non-legally binding nature of the Aircraft Committee decision on 15 November 2000.

[15] AIR/M/10, BISD 30S/24.

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Government-Directed Procurement, Mandatory Sub-Contracts and Inducements

4.1 Purchasers of civil aircraft should be free to select suppliers on the basis of commercial and technological factors.

4.2 Signatories shall not require airlines, aircraft manufacturers, or other entities engaged in the purchase of civil aircraft, nor exert unreasonable pressure on them, to procure civil aircraft from any particular source, which would create discrimination against suppliers from any Signatory.

4.3 Signatories agree that the purchase of products covered by this Agreement should be made only on a competitive price, quality and delivery basis. In conjunction with the approval or awarding of procurement contracts for products covered by this Agreement a Signatory may, however, require that its qualified firms be provided with access to business opportunities on a competitive basis and on terms no less favourable than those available to the qualified firms of other Signatories.[1]

(*footnote original*) [1] Use of the phrase "access to business opportunities . . . on terms no less favourable . . ." does not mean that the amount of contracts awarded to the qualified firms of one Signatory entitles the qualified firms of other Signatories to contracts of a similar amount.

4.4 Signatories agree to avoid attaching inducements of any kind to the sale or purchase of civil aircraft from any particular source which would create discrimination against suppliers from any Signatory.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

No jurisprudence or decision of a competent WTO body.

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Trade Restrictions

5.1 Signatories shall not apply quantitative restrictions (import quotas) or import licensing requirements to restrict imports of civil aircraft in a manner inconsistent with applicable provisions of the GATT. This does not preclude import monitoring or licensing systems consistent with the GATT.

5.2 Signatories shall not apply quantitative restrictions or export licensing or other similar requirements to restrict, for commercial or competitive reasons, exports of civil aircraft to other Signatories in a manner inconsistent with applicable provisions of the GATT.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

No jurisprudence or decision of a competent WTO body.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Government Support, Export Credits, and Aircraft Marketing

6.1 Signatories note that the provisions of the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (Agreement on Subsidies and Countervailing Measures) apply to trade in civil aircraft. They affirm that in their participation in, or support of, civil aircraft programmes they shall seek to avoid adverse effects on trade in civil aircraft in the sense of Articles 8.3 and 8.4 of the Agreement on Subsidies and Countervailing Measures. They also shall take into account the special factors which apply in the aircraft sector, in particular the widespread governmental support in this area, their international economic interests, and the desire of producers of all Signatories to participate in the expansion of the world civil aircraft market.

6.2 Signatories agree that pricing of civil aircraft should be based on a reasonable expectation of recoupment of all costs, including non-recurring programme costs, identifiable and pro-rated costs of military research and development on aircraft, components, and systems that are subsequently applied to the production of such civil aircraft, average production costs, and financial costs.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

No jurisprudence or decision of a competent WTO body.

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Regional and Local Governments

7.1 In addition to their other obligations under this Agreement, Signatories agree not to require or encourage, directly or indirectly, regional and local governments and authorities, non-governmental bodies, and other bodies to take action inconsistent with provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Surveillance, Review, Consultation, and Dispute Settlement

8.1 There shall be established a Committee on Trade in Civil Aircraft (hereinafter referred to as "the Committee") composed of representatives of all Signatories. The Committee shall elect its own Chairman. It shall meet as necessary, but not less than once a year, for the purpose of affording Signatories the opportunity to consult on any matters relating to the operation of this Agreement, including developments in the civil aircraft industry, to determine whether amendments are required to ensure continuance of free and undistorted trade, to examine any matter for which it has not been possible to find a satisfactory solution through bilateral consultations, and to carry out such responsibilities as are assigned to it under this Agreement, or by the Signatories.

8.2 The Committee shall review annually the implementation and operation of this Agreement taking into account the objectives thereof. The Committee shall annually inform the Contracting Parties to the GATT of developments during the period covered by such review.

8.3 Not later than the end of the third year from the entry into force of this Agreement and periodically thereafter, Signatories shall undertake further negotiations, with a view to broadening and improving this Agreement on the basis of mutual reciprocity.

8.4 The Committee may establish such subsidiary bodies as may be appropriate to keep under regular review the application of this Agreement to ensure a continuing balance of mutual advantages. In particular, it shall establish an appropriate subsidiary body in order to ensure a continuing balance of mutual advantages, reciprocity and equivalent results with regard to the implementation of the provisions of Article 2 above related to product coverage, the end-use systems, customs duties and other charges.

8.5 Each Signatory shall afford sympathetic consideration to and adequate opportunity for prompt consultation regarding representations made by another Signatory with respect to any matter affecting the operation of this Agreement.

8.6 Signatories recognize the desirability of consultations with other Signatories in the Committee in order to seek a mutually acceptable solution prior to the initiation of an investigation to determine the existence, degree and effect of any alleged subsidy. In those exceptional circumstances in which no consultations occur before such domestic procedures are initiated, Signatories shall notify the Committee immediately of initiation of such procedures and enter into simultaneous consultations to seek a mutually agreed solution that would obviate the need for countervailing measures.

8.7 Should a Signatory consider that its trade interests in civil aircraft manufacture, repair, maintenance, rebuilding, modification or conversion have been or are likely to be adversely affected by any action by another Signatory, it may request review of the matter by the Committee. Upon such a request, the Committee shall convene within thirty days and shall review the matter as quickly as possible with a view to resolving the issues involved as promptly as possible and in particular prior to final resolution of these issues elsewhere. In this connection the Committee may issue such rulings or recommendations as may be appropriate. Such review shall be without prejudice to the rights of Signatories under the GATT or under instruments multilaterally negotiated under the auspices of the GATT, as they affect trade in civil aircraft. For the purposes of aiding consideration of the issues involved, under the GATT and such instruments, the Committee may provide such technical assistance as may be appropriate.

8.8 Signatories agree that, with respect to any dispute related to a matter covered by this Agreement, but not covered by other instruments multilaterally negotiated under the auspices of the GATT, the provisions of Articles XXII and XXIII of the General Agreement and the provisions of the Understanding related to Notification, Consultation, Dispute Settlement and Surveillance shall be applied, *mutatis mutandis*, by the Signatories and the Committee for the purposes of seeking settlement of such dispute. These procedures shall also be applied for the settlement of any dispute related to a matter covered by this Agreement and by another instrument multilaterally negotiated under the auspices of the GATT, should the parties to the dispute so agree.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

7. The Aircraft Committee reviews annually the implementation of the *Aircraft Agreement* and, pursuant to Article IV.8 of the *WTO Agreement*, submits annual reports to the General Council.[16]

[16] WT/L/107; WT/L/193; WT/L/247; WT/L/291; WT/L/340 (+Corr.1); WT/L/374. (See TCA/M/1, para. 20.)

8. At its meeting of 20 February 1980, the Aircraft Committee established a Technical Sub-Committee,[17] with the following terms of reference:

"1. Pursuant to Article 8.4, to examine the implementation of the provisions of Article 2 related to product coverage, the end-use system, customs duties and other charges, including matters relating to aircraft tariff nomenclature, and to report to the Committee.

2. In the light of the Preamble of the Agreement, to examine proposals for modifying the product coverage and to report thereon to the Committee".[18]

9. At its meeting of 16 July 1992, the Aircraft Committee also established the Sub-Committee of the Committee on Trade in Civil Aircraft in which negotiations under Article 8.3 of the Agreement would be conducted.[19] The Sub-Committee has not met since its fourteenth meeting in November 1995.[20]

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Final Provisions

9.1 *Acceptance and Accession*

9.1.1 This Agreement shall be open for acceptance by signature or otherwise by governments contracting parties to the GATT and by the European Economic Community.

9.1.2 This Agreement shall be open for acceptance by signature or otherwise by governments having provisionally acceded to the GATT, on terms related to the effective application of rights and obligations under this Agreement, which take into account rights and obligations in the instruments providing for their provisional accession.

9.1.3 This Agreement shall be open to accession by any other government on terms, related to the effective application of rights and obligations under this Agreement, to be agreed between that government and the Signatories, by the deposit with the Director-General to the CONTRACTING PARTIES to the GATT of an instrument of accession which states the terms so agreed.

9.1.4 In regard to acceptance, the provisions of Article XXVI:5 (*a*) and (*b*) of the General Agreement would be applicable.

9.2 *Reservations*

9.2.1 Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Signatories.

9.3 *Entry into Force*

9.3.1 This Agreement shall enter into force on 1 January 1980 for the governments[1] which have accepted or acceded to it by that date. For each other government it shall enter into force on the thirtieth day following the date of its acceptance or accession to this Agreement.

(*footnote original*) [1] For the purpose of this Agreement, the term "government" is deemed to include the competent authorities of the European Economic Community.

9.4 *National Legislation*

9.4.1 Each government accepting or acceding to this Agreement shall ensure, not later than the date of entry into force of this Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement.

9.4.2 Each Signatory shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

9.5 *Amendments*

9.5.1 The Signatories may amend this Agreement, having regard, *inter alia*, to the experience gained in its implementation. Such an amendment, once the Signatories have concurred in accordance with the procedures established by the Committee, shall not come into force for any Signatory until it has been accepted by such Signatory.

9.6 *Withdrawal*

9.6.1 Any Signatory may withdraw from this Agreement. The withdrawal shall take effect upon the expiration of twelve months from the day on which written notice of withdrawal is received by the Director-General to the CONTRACTING PARTIES to the GATT. Any Signatory may

[17] AIR/M/1, paras. 36–40.
[18] AIR/M/1, para. 38.
[19] AIR/M/32, para. 35. See also AIR/M/34, paras. 6–11.
[20] TCA/1. See also TCA/M/4, paras. 18–25.

upon such notification request an immediate meeting of the Committee.

9.7 *Non-Application of this Agreement Between Particular Signatories*

9.7.1 This Agreement shall not apply as between any two Signatories if either of the Signatories, at the time either accepts or accedes to this Agreement, does not consent to such application.

9.8 *Annex*

9.8.1 The Annex to this Agreement forms an integral part thereof.

9.9 *Secretariat*

9.9.1 This Agreement shall be serviced by the GATT secretariat.

9.10 *Deposit*

9.10.1 This Agreement shall be deposited with the Director-General to the CONTRACTING PARTIES to the GATT who shall promptly furnish to each Signatory and each contracting party to the GATT a certified copy thereof and of each amendment thereto pursuant to Article 9.5 and a notification of each acceptance thereof or accession thereto pursuant to Article 9.1, or each withdrawal therefrom pursuant to Article 9.6.

9.11 *Registration*

9.11.1 This Agreement shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

Done at Geneva this twelfth day of April nineteen hundred and seventy-nine in a single copy, in the English and French languages, each text being authentic, except as otherwise specified with respect to the various lists in the Annex.[1]

(*footnote original*) [1] On 25 March 1987, the Committee agreed that the Spanish text of the Agreement shall also be considered authentic.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

No jurisprudence or decision of a competent WTO body.

XI. ANNEX

A. TEXT OF THE ANNEX

ANNEX

(as amended by the Protocol (1986) amending the access to the Agreement on Trade in Civil Aircraft)

PRODUCT COVERAGE

1. The product coverage is defined in Article 1 of the Agreement on Trade in Civil Aircraft.

2. Signatories agree that products covered by the descriptions listed below[1] and properly classified for customs purposes under the Customs Co-operation Council Nomenclature (Revised) headings of the Harmonized System codes shown alongside shall be accorded duty-free or duty-exempt treatment, if such products are for use in civil aircraft or ground flying trainers* and for incorporation therein, in the course of their manufacture, repair, maintenance, rebuilding, modification or conversion.

These products shall not include:

an incomplete or unfinished product, unless it has the essential character of a complete or finished part, component, sub-assembly or item of equipment of a civil aircraft or ground flying trainer*, (e.g. an article which has a civil aircraft manufacturer's number),

materials in any form (e.g. sheets, plates, profile shapes, strips, bars, pipes, tubes or other shapes) unless they have been cut to size or shape and/or shaped for incorporation in civil aircraft or a ground flying trainer* (e.g. an article which has a civil aircraft manufacturer's part number),

raw materials and consumable goods.

4. For the purpose of this Annex, «Ex» has been included to indicate that the product description referred to does not exhaust the entire range of products within the Customs Co-operation Council Nomenclature (Revised) headings or the Harmonized System codes listed below.[1]

(*footnote original*) [1] The list is not reproduced.
(*footnote original*) * For the purposes of Article 1.1 of this Agreement "ground flight simulators" are to be regarded as ground flying trainers as provided for under 8805.20 of the Harmonized System.

B. INTERPRETATION AND APPLICATION OF THE ANNEX

No jurisprudence or decision of a competent WTO body.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Parties to this Agreement (hereinafter referred to as "Parties"),

Recognizing the need for an effective multilateral framework of rights and obligations with respect to laws, regulations, procedures and practices regarding government procurement with a view to achieving greater liberalization and expansion of world trade and improving the international framework for the conduct of world trade;

Recognizing that laws, regulations, procedures and practices regarding government procurement should not be prepared, adopted or applied to foreign or domestic products and services and to foreign or domestic suppliers so as to afford protection to domestic products or services or domestic suppliers and should not discriminate among foreign products or services or among foreign suppliers;

Recognizing that it is desirable to provide transparency of laws, regulations, procedures and practices regarding government procurement;

Recognizing the need to establish international procedures on notification, consultation, surveillance and dispute settlement with a view to ensuring a fair, prompt and effective enforcement of the international provisions on government procurement and to maintain the balance of rights and obligations at the highest possible level;

Recognizing the need to take into account the development, financial and trade needs of developing countries, in particular the least-developed countries;

Desiring, in accordance with paragraph 6(b) of Article IX of the Agreement on Government Procurement done on 12 April 1979, as amended on 2 February 1987, to broaden and improve the Agreement on the basis of mutual reciprocity and to expand the coverage of the Agreement to include service contracts;

Desiring to encourage acceptance of and accession to this Agreement by governments not party to it;

Having undertaken further negotiations in pursuance of these objectives;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE I

A. TEXT OF ARTICLE I

Article I
Scope and Coverage

1. This Agreement applies to any law, regulation, procedure or practice regarding any procurement by entities covered by this Agreement, as specified in Appendix I.[1]

(*footnote original*) [1] For each Party, Appendix I is divided into five Annexes:
- Annex 1 contains central government entities.
- Annex 2 contains sub-central government entities.
- Annex 3 contains all other entities that procure in accordance with the provisions of this Agreement.
- Annex 4 specifies services, whether listed positively or negatively, covered by this Agreement.
- Annex 5 specifies covered construction services.

Relevant thresholds are specified in each Party's Annexes.

2. This Agreement applies to procurement by any contractual means, including through such methods as purchase or as lease, rental or hire purchase, with or without an option to buy, including any combination of products and services.

3. Where entities, in the context of procurement covered under this Agreement, require enterprises not included in Appendix I to award contracts in accordance with particular requirements, Article III shall apply *mutatis mutandis* to such requirements.

4. This Agreement applies to any procurement contract of a value of not less than the relevant threshold specified in Appendix I.

B. INTERPRETATION AND APPLICATION OF ARTICLE I

1. Article I:1

(a) Loose-leaf system for updating appendices

1. At its meeting of 4 June 1996, the Committee on Government Procurement decided to establish a loose-leaf system with legal effect to periodically update the Appendices to the *Agreement on Government Procurement*.[1] At its meeting on 24 February 1997, the Committee on Government Procurement agreed on the procedures for subsequent modifications to the loose-leaf system.[2] In addition to being made available in hard-copy form, the loose-leaf system and future new or replacement pages are circulated to parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up-to-date copy of the loose-leaf system is also available to the general public through the government procurement site on the WTO Home Page on the Internet.[3]

2. Appendix 1

2. With respect to the interpretation of the Korean Annex 1 in the Panel on *Korea – Procurement*, see paragraphs 27–33 below.

3. Article I:4

3. At its meeting of 27 February 1996, the Committee on Government Procurement decided on the "Modalities for Notifying Threshold Figures in National Currencies".[4]

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Valuation of Contracts

1. The following provisions shall apply in determining the value of contracts[2] for purposes of implementing this Agreement.

(*footnote original*) [2] This Agreement shall apply to any procurement contract for which the contract value is estimated to equal or exceed the threshold at the time of publication of the notice in accordance with Article IX.

2. Valuation shall take into account all forms of remuneration, including any premiums, fees, commissions and interest receivable.

3. The selection of the valuation method by the entity shall not be used, nor shall any procurement requirement be divided, with the intention of avoiding the application of this Agreement.

4. If an individual requirement for a procurement results in the award of more than one contract, or in contracts being awarded in separate parts, the basis for valuation shall be either:

(a) the actual value of similar recurring contracts concluded over the previous fiscal year or 12 months adjusted, where possible, for anticipated changes in quantity and value over the subsequent 12 months; or

(b) the estimated value of recurring contracts in the fiscal year or 12 months subsequent to the initial contract.

5. In cases of contracts for the lease, rental or hire purchase of products or services, or in the case of contracts which do not specify a total price, the basis for valuation shall be:

(a) in the case of fixed-term contracts, where their term is 12 months or less, the total contract value for their duration, or, where their term exceeds 12 months, their total value including the estimated residual value;

(b) in the case of contracts for an indefinite period, the monthly instalment multiplied by 48.

If there is any doubt, the second basis for valuation, namely (b), is to be used.

6. In cases where an intended procurement specifies the need for option clauses, the basis for valuation shall be the total value of the maximum permissible procurement, inclusive of optional purchases.

B. INTERPRETATION AND APPLICATION OF ARTICLE II

No jurisprudence or decision of a competent WTO body.

IV. ARTICLE III

A. TEXT OF ARTICLE III

Article III
National Treatment and Non-discrimination

1. With respect to all laws, regulations, procedures and practices regarding government procurement covered by this Agreement, each Party shall provide immediately and unconditionally to the products, services and suppliers of other Parties offering products or services of the Parties, treatment no less favourable than:

(a) that accorded to domestic products, services and suppliers; and

(b) that accorded to products, services and suppliers of any other Party.

[1] GPA/M/2, Section E.
[2] GPA/M/5, Section D.
[3] GPA/19, para. 7.
[4] GPA/M/1, Section B. The text of the decision can be found in GPA/1, Annex 3.

2. With respect to all laws, regulations, procedures and practices regarding government procurement covered by this Agreement, each Party shall ensure:

(a) that its entities shall not treat a locally-established supplier less favourably than another locally-established supplier on the basis of degree of foreign affiliation or ownership; and

(b) that its entities shall not discriminate against locally-established suppliers on the basis of the country of production of the good or service being supplied, provided that the country of production is a Party to the Agreement in accordance with the provisions of Article IV.

3. The provisions of paragraphs 1 and 2 shall not apply to customs duties and charges of any kind imposed on or in connection with importation, the method of levying such duties and charges, other import regulations and formalities, and measures affecting trade in services other than laws, regulations, procedures and practices regarding government procurement covered by this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE III

No jurisprudence or decision of a competent WTO body.

V. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV
Rules of Origin

1. A Party shall not apply rules of origin to products or services imported or supplied for purposes of government procurement covered by this Agreement from other Parties, which are different from the rules of origin applied in the normal course of trade and at the time of the transaction in question to imports or supplies of the same products or services from the same Parties.

2. Following the conclusion of the work programme for the harmonization of rules of origin for goods to be undertaken under the Agreement on Rules of Origin in Annex 1A of the Agreement Establishing the World Trade Organization (hereinafter referred to as "WTO Agreement") and negotiations regarding trade in services, Parties shall take the results of that work programme and those negotiations into account in amending paragraph 1 as appropriate.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

No jurisprudence or decision of a competent WTO body.

VI. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Special and Differential Treatment for Developing Countries

Objectives

1. Parties shall, in the implementation and administration of this Agreement, through the provisions set out in this Article, duly take into account the development, financial and trade needs of developing countries, in particular least-developed countries, in their need to:

(a) safeguard their balance-of-payments position and ensure a level of reserves adequate for the implementation of programmes of economic development;

(b) promote the establishment or development of domestic industries including the development of small-scale and cottage industries in rural or backward areas; and economic development of other sectors of the economy;

(c) support industrial units so long as they are wholly or substantially dependent on government procurement; and

(d) encourage their economic development through regional or global arrangements among developing countries presented to the Ministerial Conference of the World Trade Organization (hereinafter referred to as the "WTO") and not disapproved by it.

2. Consistently with the provisions of this Agreement, each Party shall, in the preparation and application of laws, regulations and procedures affecting government procurement, facilitate increased imports from developing countries, bearing in mind the special problems of least-developed countries and of those countries at low stages of economic development.

Coverage

3. With a view to ensuring that developing countries are able to adhere to this Agreement on terms consistent with their development, financial and trade needs, the objectives listed in paragraph 1 shall be duly taken into account in the course of negotiations with respect to the procurement of developing countries to be covered by the provisions of this Agreement. Developed countries, in the preparation of their coverage lists under the provisions of this Agreement, shall endeavour to include entities procuring products and services of export interest to developing countries.

Agreed Exclusions

4. A developing country may negotiate with other participants in negotiations under this Agreement mutually

acceptable exclusions from the rules on national treatment with respect to certain entities, products or services that are included in its coverage lists, having regard to the particular circumstances of each case. In such negotiations, the considerations mentioned in subparagraphs 1(a) through 1(c) shall be duly taken into account. A developing country participating in regional or global arrangements among developing countries referred to in subparagraph 1(d) may also negotiate exclusions to its lists, having regard to the particular circumstances of each case, taking into account, *inter alia*, the provisions on government procurement provided for in the regional or global arrangements concerned and, in particular, products or services which may be subject to common industrial development programmes.

5. After entry into force of this Agreement, a developing country Party may modify its coverage lists in accordance with the provisions for modification of such lists contained in paragraph 6 of Article XXIV, having regard to its development, financial and trade needs, or may request the Committee on Government Procurement (hereinafter referred to as "the Committee") to grant exclusions from the rules on national treatment for certain entities, products or services that are included in its coverage lists, having regard to the particular circumstances of each case and taking duly into account the provisions of subparagraphs 1(a) through 1(c). After entry into force of this Agreement, a developing country Party may also request the Committee to grant exclusions for certain entities, products or services that are included in its coverage lists in the light of its participation in regional or global arrangements among developing countries, having regard to the particular circumstances of each case and taking duly into account the provisions of subparagraph 1(d). Each request to the Committee by a developing country Party relating to modification of a list shall be accompanied by documentation relevant to the request or by such information as may be necessary for consideration of the matter.

6. Paragraphs 4 and 5 shall apply *mutatis mutandis* to developing countries acceding to this Agreement after its entry into force.

7. Such agreed exclusions as mentioned in paragraphs 4, 5 and 6 shall be subject to review in accordance with the provisions of paragraph 14 below.

Technical Assistance for Developing Country Parties

8. Each developed country Party shall, upon request, provide all technical assistance which it may deem appropriate to developing country Parties in resolving their problems in the field of government procurement.

9. This assistance, which shall be provided on the basis of non-discrimination among developing country Parties, shall relate, *inter alia*, to:

- the solution of particular technical problems relating to the award of a specific contract; and
- any other problem which the Party making the request and another Party agree to deal with in the context of this assistance.

10. Technical assistance referred to in paragraphs 8 and 9 would include translation of qualification documentation and tenders made by suppliers of developing country Parties into an official language of the WTO designated by the entity, unless developed country Parties deem translation to be burdensome, and in that case explanation shall be given to developing country Parties upon their request addressed either to the developed country Parties or to their entities.

Information Centres

11. Developed country Parties shall establish, individually or jointly, information centres to respond to reasonable requests from developing country Parties for information relating to, *inter alia*, laws, regulations, procedures and practices regarding government procurement, notices about intended procurements which have been published, addresses of the entities covered by this Agreement, and the nature and volume of products or services procured or to be procured, including available information about future tenders. The Committee may also set up an information centre.

Special Treatment for Least-Developed Countries

12. Having regard to paragraph 6 of the Decision of the CONTRACTING PARTIES to GATT 1947 of 28 November 1979 on Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries (BISD 26S/203–205), special treatment shall be granted to least-developed country Parties and to the suppliers in those Parties with respect to products or services originating in those Parties, in the context of any general or specific measures in favour of developing country Parties. A Party may also grant the benefits of this Agreement to suppliers in least-developed countries which are not Parties, with respect to products or services originating in those countries.

13. Each developed country Party shall, upon request, provide assistance which it may deem appropriate to potential tenderers in least-developed countries in submitting their tenders and selecting the products or services which are likely to be of interest to its entities as well as to suppliers in least-developed countries, and likewise assist them to comply with technical regulations and standards relating to products or services which are the subject of the intended procurement.

Review

14. The Committee shall review annually the operation and effectiveness of this Article and, after each three years of its operation on the basis of reports to be submitted by Parties, shall carry out a major review in order to evaluate its effects. As part of the three-yearly reviews and with a view to achieving the maximum implemen-

tation of the provisions of this Agreement, including in particular Article III, and having regard to the development, financial and trade situation of the developing countries concerned, the Committee shall examine whether exclusions provided for in accordance with the provisions of paragraphs 4 through 6 of this Article shall be modified or extended.

15. In the course of further rounds of negotiations in accordance with the provisions of paragraph 7 of Article XXIV, each developing country Party shall give consideration to the possibility of enlarging its coverage lists, having regard to its economic, financial and trade situation.

B. INTERPRETATION AND APPLICATION OF ARTICLE V

No jurisprudence or decision of a competent WTO body.

VII. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
Technical Specifications

1. Technical specifications laying down the characteristics of the products or services to be procured, such as quality, performance, safety and dimensions, symbols, terminology, packaging, marking and labelling, or the processes and methods for their production and requirements relating to conformity assessment procedures prescribed by procuring entities, shall not be prepared, adopted or applied with a view to, or with the effect of, creating unnecessary obstacles to international trade.

2. Technical specifications prescribed by procuring entities shall, where appropriate:

(a) be in terms of performance rather than design or descriptive characteristics; and

(b) be based on international standards, where such exist; otherwise, on national technical regulations,[3] recognized national standards,[4] or building codes.

(*footnote original*) [3] For the purpose of this Agreement, a technical regulation is a document which lays down characteristics of a product or a service or their related processes and production methods, including the applicable administrative provisions, with which compliance is mandatory. It may also include or deal exclusively with terminology, symbols, packaging, marking or labelling requirements as they apply to a product, service, process or production method.
(*footnote original*) [4] For the purpose of this Agreement, a standard is a document approved by a recognized body, that provides, for common and repeated use, rules, guidelines or characteristics for products or services or related processes and production methods, with which compliance is not mandatory. It may also include or deal exclusively with terminology, symbols, packaging, marking or labelling requirements as they apply to a product, service, process or production method.

3. There shall be no requirement or reference to a particular trademark or trade name, patent, design or type, specific origin, producer or supplier, unless there is no sufficiently precise or intelligible way of describing the procurement requirements and provided that words such as "or equivalent" are included in the tender documentation.

4. Entities shall not seek or accept, in a manner which would have the effect of precluding competition, advice which may be used in the preparation of specifications for a specific procurement from a firm that may have a commercial interest in the procurement.

B. INTERPRETATION AND APPLICATION OF ARTICLE VI

No jurisprudence or decision of a competent WTO body.

VIII. ARTICLE VII

A. TEXT OF ARTICLE VII

Article VII
Tendering Procedures

1. Each Party shall ensure that the tendering procedures of its entities are applied in a non-discriminatory manner and are consistent with the provisions contained in Articles VII through XVI.

2. Entities shall not provide to any supplier information with regard to a specific procurement in a manner which would have the effect of precluding competition.

3. For the purposes of this Agreement:

(a) Open tendering procedures are those procedures under which all interested suppliers may submit a tender.

(b) Selective tendering procedures are those procedures under which, consistent with paragraph 3 of Article X and other relevant provisions of this Agreement, those suppliers invited to do so by the entity may submit a tender.

(c) Limited tendering procedures are those procedures where the entity contacts suppliers individually, only under the conditions specified in Article XV.

B. INTERPRETATION AND APPLICATION OF ARTICLE VII

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE VIII

A. TEXT OF ARTICLE VIII

Article VIII
Qualification of Suppliers

In the process of qualifying suppliers, entities shall not discriminate among suppliers of other Parties or between domestic suppliers and suppliers of other Parties. Qualification procedures shall be consistent with the following:

(a) any conditions for participation in tendering procedures shall be published in adequate time to enable interested suppliers to initiate and, to the extent that it is compatible with efficient operation of the procurement process, complete the qualification procedures;

(b) any conditions for participation in tendering procedures shall be limited to those which are essential to ensure the firm's capability to fulfil the contract in question. Any conditions for participation required from suppliers, including financial guarantees, technical qualifications and information necessary for establishing the financial, commercial and technical capacity of suppliers, as well as the verification of qualifications, shall be no less favourable to suppliers of other Parties than to domestic suppliers and shall not discriminate among suppliers of other Parties. The financial, commercial and technical capacity of a supplier shall be judged on the basis both of that supplier's global business activity as well as of its activity in the territory of the procuring entity, taking due account of the legal relationship between the supply organizations;

(c) the process of, and the time required for, qualifying suppliers shall not be used in order to keep suppliers of other Parties off a suppliers' list or from being considered for a particular intended procurement. Entities shall recognize as qualified suppliers such domestic suppliers or suppliers of other Parties who meet the conditions for participation in a particular intended procurement. Suppliers requesting to participate in a particular intended procurement who may not yet be qualified shall also be considered, provided there is sufficient time to complete the qualification procedure;

(d) entities maintaining permanent lists of qualified suppliers shall ensure that suppliers may apply for qualification at any time; and that all qualified suppliers so requesting are included in the lists within a reasonably short time;

(e) if, after publication of the notice under paragraph 1 of Article IX, a supplier not yet qualified requests to participate in an intended procurement, the entity shall promptly start procedures for qualification;

(f) any supplier having requested to become a qualified supplier shall be advised by the entities concerned of the decision in this regard. Qualified suppliers included on permanent lists by entities shall also be notified of the termination of any such lists or of their removal from them;

(g) each Party shall ensure that:

(i) each entity and its constituent parts follow a single qualification procedure, except in cases of duly substantiated need for a different procedure; and

(ii) efforts be made to minimize differences in qualification procedures between entities;

(h) nothing in subparagraphs (a) through (g) shall preclude the exclusion of any supplier on grounds such as bankruptcy or false declarations, provided that such an action is consistent with the national treatment and non-discrimination provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE VIII

No jurisprudence or decision of a competent WTO body.

X. ARTICLE IX

A. TEXT OF ARTICLE IX

Article IX
Invitation to Participate Regarding Intended Procurement

1. In accordance with paragraphs 2 and 3, entities shall publish an invitation to participate for all cases of intended procurement, except as otherwise provided for in Article XV (limited tendering). The notice shall be published in the appropriate publication listed in Appendix II.

2. The invitation to participate may take the form of a notice of proposed procurement, as provided for in paragraph 6.

3. Entities in Annexes 2 and 3 may use a notice of planned procurement, as provided for in paragraph 7, or a notice regarding a qualification system, as provided for in paragraph 9, as an invitation to participate.

4. Entities which use a notice of planned procurement as an invitation to participate shall subsequently invite all suppliers who have expressed an interest to confirm their interest on the basis of information which shall include at least the information referred to in paragraph 6.

5. Entities which use a notice regarding a qualification system as an invitation to participate shall provide, subject to the considerations referred to in paragraph 4 of Article XVIII and in a timely manner, information which allows all those who have expressed an interest to have a meaningful opportunity to assess their interest in participating in the procurement. This information shall include the information contained in the notices referred

to in paragraphs 6 and 8, to the extent such information is available. Information provided to one interested supplier shall be provided in a non-discriminatory manner to the other interested suppliers.

6. Each notice of proposed procurement, referred to in paragraph 2, shall contain the following information:

(a) the nature and quantity, including any options for further procurement and, if possible, an estimate of the timing when such options may be exercised; in the case of recurring contracts the nature and quantity and, if possible, an estimate of the timing of the subsequent tender notices for the products or services to be procured;

(b) whether the procedure is open or selective or will involve negotiation;

(c) any date for starting delivery or completion of delivery of goods or services;

(d) the address and final date for submitting an application to be invited to tender or for qualifying for the suppliers' lists, or for receiving tenders, as well as the language or languages in which they must be submitted;

(e) the address of the entity awarding the contract and providing any information necessary for obtaining specifications and other documents;

(f) any economic and technical requirements, financial guarantees and information required from suppliers;

(g) the amount and terms of payment of any sum payable for the tender documentation; and

(h) whether the entity is inviting offers for purchase, lease, rental or hire purchase, or more than one of these methods.

7. Each notice of planned procurement referred to in paragraph 3 shall contain as much of the information referred to in paragraph 6 as is available. It shall in any case include the information referred to in paragraph 8 and:

(a) a statement that interested suppliers should express their interest in the procurement to the entity;

(b) a contact point with the entity from which further information may be obtained.

8. For each case of intended procurement, the entity shall publish a summary notice in one of the official languages of the WTO. The notice shall contain at least the following information:

(a) the subject matter of the contract;

(b) the time-limits set for the submission of tenders or an application to be invited to tender; and

(c) the addresses from which documents relating to the contracts may be requested.

9. In the case of selective tendering procedures, entities maintaining permanent lists of qualified suppliers shall publish annually in one of the publications listed in Appendix III a notice of the following:

(a) the enumeration of the lists maintained, including their headings, in relation to the products or services or categories of products or services to be procured through the lists;

(b) the conditions to be fulfilled by suppliers with a view to their inscription on those lists and the methods according to which each of those conditions will be verified by the entity concerned; and

(c) the period of validity of the lists, and the formalities for their renewal.

When such a notice is used as an invitation to participate in accordance with paragraph 3, the notice shall, in addition, include the following information:

(d) the nature of the products or services concerned;

(e) a statement that the notice constitutes an invitation to participate.

However, when the duration of the qualification system is three years or less, and if the duration of the system is made clear in the notice and it is also made clear that further notices will not be published, it shall be sufficient to publish the notice once only, at the beginning of the system. Such a system shall not be used in a manner which circumvents the provisions of this Agreement.

10. If, after publication of an invitation to participate in any case of intended procurement, but before the time set for opening or receipt of tenders as specified in the notices or the tender documentation, it becomes necessary to amend or re-issue the notice, the amendment or the re-issued notice shall be given the same circulation as the original documents upon which the amendment is based. Any significant information given to one supplier with respect to a particular intended procurement shall be given simultaneously to all other suppliers concerned in adequate time to permit the suppliers to consider such information and to respond to it.

11. Entities shall make clear, in the notices referred to in this Article or in the publication in which the notices appear, that the procurement is covered by the Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE IX

No jurisprudence or decision of a competent WTO body.

XI. ARTICLE X

A. TEXT OF ARTICLE X

Article X
Selection Procedures

1. To ensure optimum effective international competition under selective tendering procedures, entities shall, for each intended procurement, invite tenders from the maximum number of domestic suppliers and suppliers of other Parties, consistent with the efficient operation of the procurement system. They shall select the suppliers to participate in the procedure in a fair and non-discriminatory manner.

2. Entities maintaining permanent lists of qualified suppliers may select suppliers to be invited to tender from among those listed. Any selection shall allow for equitable opportunities for suppliers on the lists.

3. Suppliers requesting to participate in a particular intended procurement shall be permitted to submit a tender and be considered, provided, in the case of those not yet qualified, there is sufficient time to complete the qualification procedure under Articles VIII and IX. The number of additional suppliers permitted to participate shall be limited only by the efficient operation of the procurement system.

4. Requests to participate in selective tendering procedures may be submitted by telex, telegram or facsimile.

B. INTERPRETATION AND APPLICATION OF ARTICLE X

No jurisprudence or decision of a competent WTO body.

XII. ARTICLE XI

A. TEXT OF ARTICLE XI

Article XI
Time-limits for Tendering and Delivery

General

1. (a) Any prescribed time-limit shall be adequate to allow suppliers of other Parties as well as domestic suppliers to prepare and submit tenders before the closing of the tendering procedures. In determining any such time-limit, entities shall, consistent with their own reasonable needs, take into account such factors as the complexity of the intended procurement, the extent of subcontracting anticipated and the normal time for transmitting tenders by mail from foreign as well as domestic points.

(b) Each Party shall ensure that its entities shall take due account of publication delays when setting the final date for receipt of tenders or of applications to be invited to tender.

Deadlines

2. Except in so far as provided in paragraph 3,

(a) in open procedures, the period for the receipt of tenders shall not be less than 40 days from the date of publication referred to in paragraph 1 of Article IX;

(b) in selective procedures not involving the use of a permanent list of qualified suppliers, the period for submitting an application to be invited to tender shall not be less than 25 days from the date of publication referred to in paragraph 1 of Article IX; the period for receipt of tenders shall in no case be less than 40 days from the date of issuance of the invitation to tender;

(c) in selective procedures involving the use of a permanent list of qualified suppliers, the period for receipt of tenders shall not be less than 40 days from the date of the initial issuance of invitations to tender, whether or not the date of initial issuance of invitations to tender coincides with the date of the publication referred to in paragraph 1 of Article IX.

3. The periods referred to in paragraph 2 may be reduced in the circumstances set out below:

(a) if a separate notice has been published 40 days and not more than 12 months in advance and the notice contains at least:

(i) as much of the information referred to in paragraph 6 of Article IX as is available;

(ii) the information referred to in paragraph 8 of Article IX;

(iii) a statement that interested suppliers should express their interest in the procurement to the entity; and

(iv) a contact point with the entity from which further information may be obtained,

the 40-day limit for receipt of tenders may be replaced by a period sufficiently long to enable responsive tendering, which, as a general rule, shall not be less than 24 days, but in any case not less than 10 days;

(b) in the case of the second or subsequent publications dealing with contracts of a recurring nature within the meaning of paragraph 6 of Article IX, the 40-day limit for receipt of tenders may be reduced to not less than 24 days;

(c) where a state of urgency duly substantiated by the entity renders impracticable the periods in question, the periods specified in paragraph 2 may be reduced but shall in no case be less than 10 days from the date of the pub-

lication referred to in paragraph 1 of Article IX; or

(d) the period referred to in paragraph 2(c) may, for procurements by entities listed in Annexes 2 and 3, be fixed by mutual agreement between the entity and the selected suppliers. In the absence of agreement, the entity may fix periods which shall be sufficiently long to enable responsive tendering and shall in any case not be less than 10 days.

4. Consistent with the entity's own reasonable needs, any delivery date shall take into account such factors as the complexity of the intended procurement, the extent of subcontracting anticipated and the realistic time required for production, de-stocking and transport of goods from the points of supply or for supply of services.

B. INTERPRETATION AND APPLICATION OF ARTICLE XI

No jurisprudence or decision of a competent WTO body.

XIII. ARTICLE XII

A. TEXT OF ARTICLE XII

Article XII
Tender Documentation

1. If, in tendering procedures, an entity allows tenders to be submitted in several languages, one of those languages shall be one of the official languages of the WTO.

2. Tender documentation provided to suppliers shall contain all information necessary to permit them to submit responsive tenders, including information required to be published in the notice of intended procurement, except for paragraph 6(g) of Article IX, and the following:

(a) the address of the entity to which tenders should be sent;

(b) the address where requests for supplementary information should be sent;

(c) the language or languages in which tenders and tendering documents must be submitted;

(d) the closing date and time for receipt of tenders and the length of time during which any tender should be open for acceptance;

(e) the persons authorized to be present at the opening of tenders and the date, time and place of this opening;

(f) any economic and technical requirement, financial guarantees and information or documents required from suppliers;

(g) a complete description of the products or services required or of any requirements including technical specifications, conformity certification to be fulfilled, necessary plans, drawings and instructional materials;

(h) the criteria for awarding the contract, including any factors other than price that are to be considered in the evaluation of tenders and the cost elements to be included in evaluating tender prices, such as transport, insurance and inspection costs, and in the case of products or services of other Parties, customs duties and other import charges, taxes and currency of payment;

(i) the terms of payment;

(j) any other terms or conditions;

(k) in accordance with Article XVII the terms and conditions, if any, under which tenders from countries not Parties to this Agreement, but which apply the procedures of that Article, will be entertained.

Forwarding of Tender Documentation by the Entities

3. (a) In open procedures, entities shall forward the tender documentation at the request of any supplier participating in the procedure, and shall reply promptly to any reasonable request for explanations relating thereto.

(b) In selective procedures, entities shall forward the tender documentation at the request of any supplier requesting to participate, and shall reply promptly to any reasonable request for explanations relating thereto.

(c) Entities shall reply promptly to any reasonable request for relevant information submitted by a supplier participating in the tendering procedure, on condition that such information does not give that supplier an advantage over its competitors in the procedure for the award of the contract.

B. INTERPRETATION AND APPLICATION OF ARTICLE XII

No jurisprudence or decision of a competent WTO body.

XIV. ARTICLE XIII

A. TEXT OF ARTICLE XIII

Article XIII
Submission, Receipt and Opening of Tenders and Awarding of Contracts

1. The submission, receipt and opening of tenders and awarding of contracts shall be consistent with the following:

(a) tenders shall normally be submitted in writing directly or by mail. If tenders by telex, telegram

or facsimile are permitted, the tender made thereby must include all the information necessary for the evaluation of the tender, in particular the definitive price proposed by the tenderer and a statement that the tenderer agrees to all the terms, conditions and provisions of the invitation to tender. The tender must be confirmed promptly by letter or by the despatch of a signed copy of the telex, telegram or facsimile. Tenders presented by telephone shall not be permitted. The content of the telex, telegram or facsimile shall prevail where there is a difference or conflict between that content and any documentation received after the time-limit; and

(b) the opportunities that may be given to tenderers to correct unintentional errors of form between the opening of tenders and the awarding of the contract shall not be permitted to give rise to any discriminatory practice.

Receipt of Tenders

2. A supplier shall not be penalized if a tender is received in the office designated in the tender documentation after the time specified because of delay due solely to mishandling on the part of the entity. Tenders may also be considered in other exceptional circumstances if the procedures of the entity concerned so provide.

Opening of Tenders

3. All tenders solicited under open or selective procedures by entities shall be received and opened under procedures and conditions guaranteeing the regularity of the openings. The receipt and opening of tenders shall also be consistent with the national treatment and non-discrimination provisions of this Agreement. Information on the opening of tenders shall remain with the entity concerned at the disposal of the government authorities responsible for the entity in order that it may be used if required under the procedures of Articles XVIII, XIX, XX and XXII.

Award of Contracts

4. (a) To be considered for award, a tender must, at the time of opening, conform to the essential requirements of the notices or tender documentation and be from a supplier which complies with the conditions for participation. If an entity has received a tender abnormally lower than other tenders submitted, it may enquire with the tenderer to ensure that it can comply with the conditions of participation and be capable of fulfilling the terms of the contract.

(b) Unless in the public interest an entity decides not to issue the contract, the entity shall make the award to the tenderer who has been determined to be fully capable of undertaking the contract and whose tender, whether for domestic products or services, or products or services of other Parties, is either the lowest tender or the tender which in terms of the specific evaluation criteria set forth in the notices or tender documentation is determined to be the most advantageous.

(c) Awards shall be made in accordance with the criteria and essential requirements specified in the tender documentation.

Option Clauses

5. Option clauses shall not be used in a manner which circumvents the provisions of the Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIII

No jurisprudence or decision of a competent WTO body.

XV. ARTICLE XIV

A. TEXT OF ARTICLE XIV

Article XIV
Negotiation

1. A Party may provide for entities to conduct negotiations:

(a) in the context of procurements in which they have indicated such intent, namely in the notice referred to in paragraph 2 of Article IX (the invitation to suppliers to participate in the procedure for the proposed procurement); or

(b) when it appears from evaluation that no one tender is obviously the most advantageous in terms of the specific evaluation criteria set forth in the notices or tender documentation.

2. Negotiations shall primarily be used to identify the strengths and weaknesses in tenders.

3. Entities shall treat tenders in confidence. In particular, they shall not provide information intended to assist particular participants to bring their tenders up to the level of other participants.

4. Entities shall not, in the course of negotiations, discriminate between different suppliers. In particular, they shall ensure that:

(a) any elimination of participants is carried out in accordance with the criteria set forth in the notices and tender documentation;

(b) all modifications to the criteria and to the technical requirements are transmitted in writing to all remaining participants in the negotiations;

(c) all remaining participants are afforded an opportunity to submit new or amended sub-

missions on the basis of the revised requirements; and

(d) when negotiations are concluded, all participants remaining in the negotiations shall be permitted to submit final tenders in accordance with a common deadline.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIV

No jurisprudence or decision of a competent WTO body.

XVI. ARTICLE XV

A. TEXT OF ARTICLE XV

Article XV
Limited Tendering

1. The provisions of Articles VII through XIV governing open and selective tendering procedures need not apply in the following conditions, provided that limited tendering is not used with a view to avoiding maximum possible competition or in a manner which would constitute a means of discrimination among suppliers of other Parties or protection to domestic producers or suppliers:

(a) in the absence of tenders in response to an open or selective tender, or when the tenders submitted have been collusive, or not in conformity with the essential requirements in the tender, or from suppliers who do not comply with the conditions for participation provided for in accordance with this Agreement, on condition, however, that the requirements of the initial tender are not substantially modified in the contract as awarded;

(b) when, for works of art or for reasons connected with protection of exclusive rights, such as patents or copyrights, or in the absence of competition for technical reasons, the products or services can be supplied only by a particular supplier and no reasonable alternative or substitute exists;

(c) in so far as is strictly necessary when, for reasons of extreme urgency brought about by events unforeseeable by the entity, the products or services could not be obtained in time by means of open or selective tendering procedures;

(d) for additional deliveries by the original supplier which are intended either as parts replacement for existing supplies, or installations, or as the extension of existing supplies, services, or installations where a change of supplier would compel the entity to procure equipment or services not meeting requirements of interchangeability with already existing equipment or services;[5]

(*footnote original*) [5] It is the understanding that "existing equipment" includes software to the extent that the initial procurement of the software was covered by the Agreement.

(e) when an entity procures prototypes or a first product or service which are developed at its request in the course of, and for, a particular contract for research, experiment, study or original development. When such contracts have been fulfilled, subsequent procurements of products or services shall be subject to Articles VII through XIV;[6]

(*footnote original*) [6] Original development of a first product or service may include limited production or supply in order to incorporate the results of field testing and to demonstrate that the product or service is suitable for production or supply in quantity to acceptable quality standards. It does not extend to quantity production or supply to establish commercial viability or to recover research and development costs.

(f) when additional construction services which were not included in the initial contract but which were within the objectives of the original tender documentation have, through unforeseeable circumstances, become necessary to complete the construction services described therein, and the entity needs to award contracts for the additional construction services to the contractor carrying out the construction services concerned since the separation of the additional construction services from the initial contract would be difficult for technical or economic reasons and cause significant inconvenience to the entity. However, the total value of contracts awarded for the additional construction services may not exceed 50 per cent of the amount of the main contract;

(g) for new construction services consisting of the repetition of similar construction services which conform to a basic project for which an initial contract was awarded in accordance with Articles VII through XIV and for which the entity has indicated in the notice of intended procurement concerning the initial construction service, that limited tendering procedures might be used in awarding contracts for such new construction services;

(h) for products purchased on a commodity market;

(i) for purchases made under exceptionally advantageous conditions which only arise in the very short term. This provision is intended to cover unusual disposals by firms which are not normally suppliers, or disposal of assets of businesses in liquidation or receivership. It is not intended to cover routine purchases from regular suppliers;

(j) in the case of contracts awarded to the winner of a design contest provided that the contest has been organized in a manner which is consistent with the principles of this Agreement, notably as regards the publication, in the sense of Article IX, of an invitation to suitably qualified suppliers, to participate in such a contest which shall be judged by an independent jury with a view to design contracts being awarded to the winners.

2. Entities shall prepare a report in writing on each contract awarded under the provisions of paragraph 1. Each report shall contain the name of the procuring entity, value and kind of goods or services procured, country of origin, and a statement of the conditions in this Article which prevailed. This report shall remain with the entities concerned at the disposal of the government authorities responsible for the entity in order that it may be used if required under the procedures of Articles XVIII, XIX, XX and XXII.

B. INTERPRETATION AND APPLICATION OF ARTICLE XV

No jurisprudence or decision of a competent WTO body.

XVII. ARTICLE XVI

A. TEXT OF ARTICLE XVI

Article XVI
Offsets

1. Entities shall not, in the qualification and selection of suppliers, products or services, or in the evaluation of tenders and award of contracts, impose, seek or consider offsets.[7]

(*footnote original*) [7] Offsets in government procurement are measures used to encourage local development or improve the balance-of-payments accounts by means of domestic content, licensing of technology, investment requirements, countertrade or similar requirements.

2. Nevertheless, having regard to general policy considerations, including those relating to development, a developing country may at the time of accession negotiate conditions for the use of offsets, such as requirements for the incorporation of domestic content. Such requirements shall be used only for qualification to participate in the procurement process and not as criteria for awarding contracts. Conditions shall be objective, clearly defined and non-discriminatory. They shall be set forth in the country's Appendix I and may include precise limitations on the imposition of offsets in any contract subject to this Agreement. The existence of such conditions shall be notified to the Committee and included in the notice of intended procurement and other documentation.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVI

No jurisprudence or decision of a competent WTO body.

XVIII. ARTICLE XVII

A. TEXT OF ARTICLE XVII

Article XVII
Transparency

1. Each Party shall encourage entities to indicate the terms and conditions, including any deviations from competitive tendering procedures or access to challenge procedures, under which tenders will be entertained from suppliers situated in countries not Parties to this Agreement but which, with a view to creating transparency in their own contract awards, nevertheless:

(a) specify their contracts in accordance with Article VI (technical specifications);

(b) publish the procurement notices referred to in Article IX, including, in the version of the notice referred to in paragraph 8 of Article IX (summary of the notice of intended procurement) which is published in an official language of the WTO, an indication of the terms and conditions under which tenders shall be entertained from suppliers situated in countries Parties to this Agreement;

(c) are willing to ensure that their procurement regulations shall not normally change during a procurement and, in the event that such change proves unavoidable, to ensure the availability of a satisfactory means of redress.

2. Governments not Parties to the Agreement which comply with the conditions specified in paragraphs 1(a) through 1(c), shall be entitled if they so inform the Parties to participate in the Committee as observers.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVII

1. Working Group on Transparency in Government Procurement

4. The Working Group on Transparency in Government Procurement was established pursuant to the mandate provided in the Singapore Ministerial Declaration and paragraph 26 of the Doha Ministerial Declaration. Paragraph 26 reads as follows:

"Recognizing the case for a multilateral agreement on transparency in government procurement and the need for enhanced technical assistance and capacity building in this area, we agree that negotiations will take place after the Fifth Session of the Ministerial Conference on the basis of a decision to be taken, by explicit consensus,

at that Session on modalities of negotiations. These negotiations will build on the progress made in the Working Group on Transparency in Government Procurement by that time and take into account participants' development priorities, especially those of least-developed country participants. Negotiations shall be limited to the transparency aspects and therefore will not restrict the scope for countries to give preferences to domestic supplies and suppliers. We commit ourselves to ensuring adequate technical assistance and support for capacity building both during the negotiations and after their conclusion."[5]

XIX. ARTICLE XVIII

A. TEXT OF ARTICLE XVIII

Article XVIII
Information and Review as Regards Obligations of Entities

1. Entities shall publish a notice in the appropriate publication listed in Appendix II not later than 72 days after the award of each contract under Articles XIII through XV. These notices shall contain:

(a) the nature and quantity of products or services in the contract award;

(b) the name and address of the entity awarding the contract;

(c) the date of award;

(d) the name and address of winning tenderer;

(e) the value of the winning award or the highest and lowest offer taken into account in the award of the contract;

(f) where appropriate, means of identifying the notice issued under paragraph 1 of Article IX or justification according to Article XV for the use of such procedure; and

(g) the type of procedure used.

2. Each entity shall, on request from a supplier of a Party, promptly provide:

(a) an explanation of its procurement practices and procedures;

(b) pertinent information concerning the reasons why the supplier's application to qualify was rejected, why its existing qualification was brought to an end and why it was not selected; and

(c) to an unsuccessful tenderer, pertinent information concerning the reasons why its tender was not selected and on the characteristics and relative advantages of the tender selected as well as the name of the winning tenderer.

3. Entities shall promptly inform participating suppliers of decisions on contract awards and, upon request, in writing.

4. However, entities may decide that certain information on the contract award, contained in paragraphs 1 and 2(c), be withheld where release of such information would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interest of particular enterprises, public or private, or might prejudice fair competition between suppliers.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVIII

No jurisprudence or decision of a competent WTO body.

XX. ARTICLE XIX

A. TEXT OF ARTICLE XIX

Article XIX
Information and Review as Regards Obligations of Parties

1. Each Party shall promptly publish any law, regulation, judicial decision, administrative ruling of general application, and any procedure (including standard contract clauses) regarding government procurement covered by this Agreement, in the appropriate publications listed in Appendix IV and in such a manner as to enable other Parties and suppliers to become acquainted with them. Each Party shall be prepared, upon request, to explain to any other Party its government procurement procedures.

2. The government of an unsuccessful tenderer which is a Party to this Agreement may seek, without prejudice to the provisions under Article XXII, such additional information on the contract award as may be necessary to ensure that the procurement was made fairly and impartially. To this end, the procuring government shall provide information on both the characteristics and relative advantages of the winning tender and the contract price. Normally this latter information may be disclosed by the government of the unsuccessful tenderer provided it exercises this right with discretion. In cases where release of this information would prejudice competition in future tenders, this information shall not be disclosed except after consultation with and agreement of the Party which gave the information to the government of the unsuccessful tenderer.

3. Available information concerning procurement by covered entities and their individual contract awards shall be provided, upon request, to any other Party.

4. Confidential information provided to any Party which would impede law enforcement or otherwise be

[5] WT/MIN(01)/DEC/1.

contrary to the public interest or would prejudice the legitimate commercial interest of particular enterprises, public or private, or might prejudice fair competition between suppliers shall not be revealed without formal authorization from the party providing the information.

5. Each Party shall collect and provide to the Committee on an annual basis statistics on its procurements covered by this Agreement. Such reports shall contain the following information with respect to contracts awarded by all procurement entities covered under this Agreement:

(a) for entities in Annex 1, statistics on the estimated value of contracts awarded, both above and below the threshold value, on a global basis and broken down by entities; for entities in Annexes 2 and 3, statistics on the estimated value of contracts awarded above the threshold value on a global basis and broken down by categories of entities;

(b) for entities in Annex 1, statistics on the number and total value of contracts awarded above the threshold value, broken down by entities and categories of products and services according to uniform classification systems; for entities in Annexes 2 and 3, statistics on the estimated value of contracts awarded above the threshold value broken down by categories of entities and categories of products and services;

(c) for entities in Annex 1, statistics, broken down by entity and by categories of products and services, on the number and total value of contracts awarded under each of the cases of Article XV; for categories of entities in Annexes 2 and 3, statistics on the total value of contracts awarded above the threshold value under each of the cases of Article XV; and

(d) for entities in Annex 1, statistics, broken down by entities, on the number and total value of contracts awarded under derogations to the Agreement contained in the relevant Annexes; for categories of entities in Annexes 2 and 3, statistics on the total value of contracts awarded under derogations to the Agreement contained in the relevant Annexes.

To the extent that such information is available, each Party shall provide statistics on the country of origin of products and services purchased by its entities. With a view to ensuring that such statistics are comparable, the Committee shall provide guidance on methods to be used. With a view to ensuring effective monitoring of procurement covered by this Agreement, the Committee may decide unanimously to modify the requirements of subparagraphs (a) through (d) as regards the nature and the extent of statistical information to be provided and the breakdowns and classifications to be used.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIX

1. Article XIX:5

5. At its meeting of 27 February 1996, the Committee on Government Procurement adopted the recommendation of the Statistical Working Group that the rules of origin used for the purposes of statistical reporting in Article XIX:5 of the Agreement should be the same as those applied under Article IV, which are those used in the normal course of trade.[6]

6. At its meeting of 4 June 1996, the Committee on Government Procurement adopted the product classification system of 26 product categories as proposed by the Chairman.[7] The Committee on Government Procurement also adopted the services classification system as proposed by the Chairman,[8] as amended by merging category 71 and 73 into one category named "transport services".[9]

XXI. ARTICLE XX

A. TEXT OF ARTICLE XX

Article XX
Challenge Procedures

Consultations

1. In the event of a complaint by a supplier that there has been a breach of this Agreement in the context of a procurement, each Party shall encourage the supplier to seek resolution of its complaint in consultation with the procuring entity. In such instances the procuring entity shall accord impartial and timely consideration to any such complaint, in a manner that is not prejudicial to obtaining corrective measures under the challenge system.

Challenge

2. Each Party shall provide non-discriminatory, timely, transparent and effective procedures enabling suppliers to challenge alleged breaches of the Agreement arising in the context of procurements in which they have, or have had, an interest.

3. Each Party shall provide its challenge procedures in writing and make them generally available.

4. Each Party shall ensure that documentation relating to all aspects of the process concerning procurements covered by this Agreement shall be retained for three years.

5. The interested supplier may be required to initiate a challenge procedure and notify the procuring entity

[6] GPA/M/1, paras. 56–57.
[7] GPA/W/17, Annex 1.
[8] GPA/W/17, Annex 2.
[9] GPA/M/2, paras. 49–51.

within specified time-limits from the time when the basis of the complaint is known or reasonably should have been known, but in no case within a period of less than 10 days.

6. Challenges shall be heard by a court or by an impartial and independent review body with no interest in the outcome of the procurement and the members of which are secure from external influence during the term of appointment. A review body which is not a court shall either be subject to judicial review or shall have procedures which provide that:

(a) participants can be heard before an opinion is given or a decision is reached;

(b) participants can be represented and accompanied;

(c) participants shall have access to all proceedings;

(d) proceedings can take place in public;

(e) opinions or decisions are given in writing with a statement describing the basis for the opinions or decisions;

(f) witnesses can be presented;

(g) documents are disclosed to the review body.

7. Challenge procedures shall provide for:

(a) rapid interim measures to correct breaches of the Agreement and to preserve commercial opportunities. Such action may result in suspension of the procurement process. However, procedures may provide that overriding adverse consequences for the interests concerned, including the public interest, may be taken into account in deciding whether such measures should be applied. In such circumstances, just cause for not acting shall be provided in writing;

(b) an assessment and a possibility for a decision on the justification of the challenge;

(c) correction of the breach of the Agreement or compensation for the loss or damages suffered, which may be limited to costs for tender preparation or protest.

8. With a view to the preservation of the commercial and other interests involved, the challenge procedure shall normally be completed in a timely fashion.

B. INTERPRETATION AND APPLICATION OF ARTICLE XX

No jurisprudence or decision of a competent WTO body.

XXII. ARTICLE XXI

A. TEXT OF ARTICLE XXI

Article XXI
Institutions

1. A Committee on Government Procurement composed of representatives from each of the Parties shall be established. This Committee shall elect its own Chairman and Vice-Chairman and shall meet as necessary but not less than once a year for the purpose of affording Parties the opportunity to consult on any matters relating to the operation of this Agreement or the furtherance of its objectives, and to carry out such other responsibilities as may be assigned to it by the Parties.

2. The Committee may establish working parties or other subsidiary bodies which shall carry out such functions as may be given to them by the Committee.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXI

1. Article XXI:1

7. At its meeting of 27 February 1996, the Committee on Government Procurement approved recommendations for decisions adopted by the Interim Committee[10] on Procedures on the Participation of Observers.[11]

8. At its meeting of 27 February 1996, the Committee on Government Procurement adopted interim procedures on the circulation of documents and on the derestriction of documents, pending definitive measures.[12] Subsequently, at its meeting of 24 February 1997, the Committee on Government Procurement adopted revised procedures with respect to circulation and derestriction of documents.[13] At its meeting of 8 October 2002, the Committee agreed to the revision of that Decision on Circulation and Derestriction of Documents[14] in order to reflect the WTO procedures adopted in the General Council Decision of 14 May 2002 on Procedures for the Circulation and Derestriction of WTO Documents.[15, 16]

XXIII. ARTICLE XXII

A. TEXT OF ARTICLE XXII

Article XXII
Consultations and Dispute Settlement

1. The provisions of the Understanding on Rules and Procedures Governing the Settlement of Disputes under the WTO Agreement (hereinafter referred to as the "Dispute Settlement Understanding") shall be applicable except as otherwise specifically provided below.

2. If any Party considers that any benefit accruing to it, directly or indirectly, under this Agreement is being nullified or impaired, or that the attainment of any objective of this Agreement is being impeded as the result of the failure of another Party or Parties to carry out its obligations under this Agreement, or the application by another Party or Parties of any measure, whether or not it conflicts with the provisions of this Agreement, it may, with a view to reaching a mutually satisfactory resolution of the matter, make written representations or proposals to the other Party or Parties which it considers to be concerned. Such action shall be promptly notified to the Dispute Settlement Body established under the Dispute Settlement Understanding (hereinafter referred to as "DSB"), as specified below. Any Party thus approached shall give sympathetic consideration to the representations or proposals made to it.

3. The DSB shall have the authority to establish panels, adopt panel and Appellate Body reports, make recommendations or give rulings on the matter, maintain surveillance of implementation of rulings and recommendations, and authorize suspension of concessions and other obligations under this Agreement or consultations regarding remedies when withdrawal of measures found to be in contravention of the Agreement is not possible, provided that only Members of the WTO Party to this Agreement shall participate in decisions or actions taken by the DSB with respect to disputes under this Agreement.

4. Panels shall have the following terms of reference unless the parties to the dispute agree otherwise within 20 days of the establishment of the panel:

> "To examine, in the light of the relevant provisions of this Agreement and of (name of any other covered Agreement cited by the parties to the dispute), the matter referred to the DSB by (name of party) in document . . . and to make such findings as will assist the DSB in making the recommendations or in giving the rulings provided for in this Agreement."

In the case of a dispute in which provisions both of this Agreement and of one or more other Agreements listed in Appendix 1 of the Dispute Settlement Understanding are invoked by one of the parties to the dispute, paragraph 3 shall apply only to those parts of the panel report concerning the interpretation and application of this Agreement.

5. Panels established by the DSB to examine disputes under this Agreement shall include persons qualified in the area of government procurement.

6. Every effort shall be made to accelerate the proceedings to the greatest extent possible. Notwithstanding the provisions of paragraphs 8 and 9 of Article 12 of the Dispute Settlement Understanding, the panel shall attempt to provide its final report to the parties to the dispute not later than four months, and in case of delay not later than seven months, after the date on which the composition and terms of reference of the panel are agreed. Consequently, every effort shall be made to reduce also the periods foreseen in paragraph 1 of Article 20 and paragraph 4 of Article 21 of the Dispute Settlement Understanding by two months. Moreover, notwithstanding the provisions of paragraph 5 of Article 21 of the Dispute Settlement Understanding, the panel shall attempt to issue its decision, in case of a disagreement as to the existence or consistency with a covered Agreement of measures taken to comply with the recommendations and rulings, within 60 days.

7. Notwithstanding paragraph 2 of Article 22 of the Dispute Settlement Understanding, any dispute arising under any Agreement listed in Appendix 1 to the Dispute Settlement Understanding other than this Agreement shall not result in the suspension of concessions or other obligations under this Agreement, and any dispute arising under this Agreement shall not result in the suspension of concessions or other obligations under any other Agreement listed in the said Appendix 1.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXII

1. Article XXII:2

(a) Non-violation claim

9. In *Korea – Procurement*, the Panel was requested to determine alternatively – if no violation of the *Agreement on Government Procurement* were found – whether the measures nevertheless nullified or impaired benefits accruing to the United States under the *Agreement on Government Procurement*, pursuant to Article XXII:2 providing for non-violation claims. The Panel began by noting the general requirements for a "non-violation claim":

> "[N]ormal non-violation cases involve an examination as to whether there is: (1) an application of a measure by a WTO Member; (2) a benefit accruing under the relevant agreement; and (3) nullification or impairment of the benefit due to the application of the measure that could not have been reasonably expected by the exporting Member."[17]

[17] Panel Report on *Korea – Procurement*, para. 7.86.

10. The Panel on *Korea – Procurement* then held that the question in the case before it was "whether or not there was a reasonable expectation of an entitlement to a benefit that had accrued pursuant to the negotiation rather than pursuant to a concession":

> "In this case, the United States has asserted that measures it claimed violated the GPA (that is, the imposition of inadequate bid-deadlines; the imposition of certain qualification requirements; the imposition of certain domestic partnering requirements; and the failure to establish effective domestic challenge procedures engaged in by KAA [Korea Airports Authority] and its successors in relation to the IIA [Inchon International Airport] project) to nullify or impair benefits accruing to the United States under the GPA, pursuant to Article XXII:2 of the GPA. A key difference between a traditional non-violation case and the present one would seem to be that, normally, the question of 'reasonable expectation' is whether or not it was reasonably to be expected that the benefit under an existing concession would be impaired by the measures. However here, if there is to be a non-violation case, the question is whether or not there was a reasonable expectation of an entitlement to a benefit that had accrued pursuant to the negotiation rather than pursuant to a concession."[18]

11. Noting that non-violation is an exceptional concept within the WTO dispute settlement system, stemming from the public international law principle of *pacta sunt servanda*, the Panel however specified that it was not implying that "a complainant [must] affirmatively prove actual bad faith on the part of another Member":

> "[U]pon occasion, it may be the case that some actions, while permissible under one set of rules (e.g., the Agreement on Subsidies and Countervailing Measures is a commonly referenced example of rules in this regard), are not consistent with the spirit of other commitments such as those in negotiated Schedules. That is, such actions deny the competitive opportunities which are the reasonably expected effect of such commitments. However, we must also note that, while the overall burden of proof is on the complainant, we do not mean to introduce here a new requirement that a complainant affirmatively prove actual bad faith on the part of another Member. It is fairly clear from the history of disputes prior to the conclusion of the Uruguay Round that such a requirement was never established and there is no evidence in the current treaty text that such a requirement was newly imposed. Rather, the affirmative proof should be that measures have been taken that frustrate the object and purpose of the treaty and the reasonably expected benefits that flow therefrom."[19]

12. With reference to the case at hand, the Panel subsequently held that an error in treaty negotiation can also be addressed under Article 26 of the *DSU* and Article XXII:2 of the *Agreement on Government Procurement*:

> "One of the issues that arises in this dispute is whether the concept of non-violation can arise in contexts other than the traditional approach represented by *pacta sunt servanda*. Can, for instance the question of error in treaty negotiation be addressed under Article 26 of the DSU and Article XXII:2 of the GPA? We see no reason why it cannot. Parties have an obligation to negotiate in good faith just as they must implement the treaty in good faith. It is clear to us (as discussed in paragraphs 7.110 and 7.121 below) that it is necessary that negotiations in the Agreement before us (the GPA) be conducted on a particularly open and forthcoming basis.
>
> Thus, on the basis of the ample evidence provided by both parties to the dispute, we will review the claim of nullification or impairment raised by the United States within the framework of principles of international law which are generally applicable not only to performance of treaties but also to treaty negotiation.[20] To do otherwise potentially would leave a gap in the applicability of the law generally to WTO disputes and we see no evidence in the language of the WTO Agreements that such a gap was intended. If the non-violation remedy were deemed not to provide a relief for such problems as have arisen in the present case regarding good faith and error in the negotiation of GPA commitments (and one might add, in tariff and services commitments under other WTO Agreements), then nothing could be done about them within the framework of the WTO dispute settlement mechanism if general rules of customary international law on good faith and error in treaty negotiations were ruled not to be applicable."[21]

13. After examination of the facts of the case, the Panel on *Korea – Procurement* found that while Members had a "right to expect full and forthright answers to their questions submitted during negotiations", they had to protect their own interests "as well":

> "Members have a right to expect full and forthright answers to their questions submitted during negotiations, particularly with respect to Schedules of affirmative

[18] Panel Report on *Korea – Procurement*, para. 7.87.
[19] Panel Report on *Korea – Procurement*, para. 7.99.
[20] (*footnote original*) We note that DSU Article 7.1 requires that the relevant covered agreement be cited in the request for a panel and reflected in the terms of reference of a panel. That is not a bar to a broader analysis of the type we are following here, for the GPA would be the referenced covered agreement and, in our view, we are merely fully examining the issue of non-violation raised by the United States. We are merely doing it within the broader context of customary international law rather than limiting it to the traditional analysis that accords with the extended concept of *pacta sunt servanda*. The purpose of the terms of reference is to properly identify the claims of the party and therefore the scope of a panel's review. We do not see any basis for arguing that the terms of reference are meant to *exclude* reference to the broader rules of customary international law in interpreting a claim properly before the Panel.
[21] Panel Report on *Korea – Procurement*, paras. 7.100–7.101.

commitments such as those appended to the GPA. However, Members must protect their own interests as well and in this case the United States did not do so. It had a significant amount of time to realize, particularly in light of the wide knowledge of KAA's role, that its understanding of the Korean answer was not accurate. Therefore, we *find* that, even if the principles of a traditional non-violation case were applicable in this situation the United States has failed to carry its burden of proof to establish that it had reasonable expectations that a benefit had accrued."[22]

14. With regard to the possible error in treaty formation, the Panel held that it would consider "whether the United States was induced into error about a fact or situation which it assumed existed in relation to the agreement being negotiated regarding Korea's accession to the GPA":

"[W]e [. . .] first recall our finding that there is a particular duty of transparency and openness on the 'offering' party in negotiations on concessions under the GPA. The negotiations between the Parties under the GPA do not benefit from a generally accepted framework such as the Harmonized System with respect to goods or even the Central Product Classification in services. The Annexes to the GPA which contain the entities whose procurement is covered by the Agreement are basically self-styled Schedules whose interpretation may require extensive knowledge of another country's procurement systems and governmental organization. Therefore, we believe that transparency and forthright provision of all relevant information are of the essence in negotiations on GPA Schedules.

In our view, as discussed fully in the previous section, Korea's response to the US question was not as forthright as it should have been. Indeed, the response could be characterized as at best incomplete in light of existing Korean legislation and ongoing plans for further legislation. However, when addressing this problem, rather than asking whether there was a nullification or impairment of expectations arising from a concession, it might be better to inquire as to whether the United States was induced into error about a fact or situation which it assumed existed in relation to the agreement being negotiated regarding Korea's accession to the GPA. In this case, it clearly appears that the United States was in error when it assumed that the IIA project was covered by the GPA as a result of the entity coverage offered by Korea."[23]

15. The Panel noted that Article 48(1) of the *Vienna Convention* provides that "[a] State may invoke an error in a treaty as invalidating its consent to be bound by the treaty if the error related to a fact or situation which was assumed by that State to exist at the time when the treaty was concluded and formed an essential basis of its consent to be bound by the treaty". The Panel then went on to recall that, in the course of the negotiations on the Annexes to the *Agreement on Government Procurement*:

"[T]he United States believed that the IIA project was covered. As we have found in section VII:B of these Findings, that was not correct. The IIA project procurement was the responsibility of a non-covered entity. Hence the US error related to a fact or situation which was assumed by the US to exist at the time when the treaty was concluded. In our view, it also appears from the behaviour of the United States that this purported concession arguably formed an essential basis of its consent to be bound by the treaty as finally agreed. Hence the initial conditions for error under Article 48(1) of the Vienna Convention seem to us to be satisfied."[24]

16. After making the finding referenced in paragraph 15 above, the Panel then turned to the second paragraph of Article 48, which states that "Paragraph 1 shall not apply if the State in question contributed by its own conduct to the error or if the circumstances were such as to put that State on notice of a possible error." The Panel ultimately found that the United States error was not excusable:

"This raises the question of whether the exclusionary clause of the second paragraph of Article 48 can be overcome. Although we have indicated above that the duty to demonstrate good faith and transparency in GPA negotiations is particularly strong for the 'offering' party, this does not relieve the other negotiating partners from their duty of diligence to verify these offers as best as they can. Here again the facts already recounted in the previous sub-section demonstrate that the United States has not properly discharged this burden. We do not think the evidence at all supports a finding that the United States has contributed by its own conduct to the error, but given the elements mentioned earlier (such as the two and a half year interval between Korea's answer to the US question and its final offer, the actions by the European Community in respect of Korea's offer, the subsequent four-month period, of which at least one month was explicitly designated for verification, etc.), we conclude that the circumstances were such as to put the United States on notice of a possible error. Hence the error should not have subsisted at the end of the two and a half year gap, at the moment the accession of Korea was 'concluded.' Therefore, the error was no longer 'excusable' and only an excusable error can qualify as an error which may vitiate the consent to be bound by the agreement."[25]

[22] Panel Report on *Korea – Procurement*, para. 7.119.
[23] Panel Report on *Korea – Procurement*, paras. 7.121–7.122.
[24] Panel Report on *Korea – Procurement*, para. 7.124.
[25] Panel Report on *Korea – Procurement*, para. 7.125.

17. The following table lists the dispute in which a panel report has been adopted where the provisions of the *Agreement on Government Procurement* were invoked:

Case Name	Number	Invoked Articles
1 *Korea – Procurement*	WT/DS163	Articles 1(1), XXII:2

XXIV. ARTICLE XXIII

A. TEXT OF ARTICLE XXIII

Article XXIII
Exceptions to the Agreement

1. Nothing in this Agreement shall be construed to prevent any Party from taking any action or not disclosing any information which it considers necessary for the protection of its essential security interests relating to the procurement of arms, ammunition or war materials, or to procurement indispensable for national security or for national defence purposes.

2. Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail or a disguised restriction on international trade, nothing in this Agreement shall be construed to prevent any Party from imposing or enforcing measures: necessary to protect public morals, order or safety, human, animal or plant life or health or intellectual property; or relating to the products or services of handicapped persons, of philanthropic institutions or of prison labour.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIII

No jurisprudence or decision of a competent WTO body.

XXV. ARTICLE XXIV

A. TEXT OF ARTICLE XXIV

Article XXIV
Final Provisions

1. *Acceptance and Entry into Force*

This Agreement shall enter into force on 1 January 1996 for those governments[8] whose agreed coverage is contained in Annexes 1 through 5 of Appendix I of this Agreement and which have, by signature, accepted the Agreement on 15 April 1994 or have, by that date, signed the Agreement subject to ratification and subsequently ratified the Agreement before 1 January 1996.

(*footnote original*) [8] For the purpose of this Agreement, the term "government" is deemed to include the competent authorities of the European Communities.

2. *Accession*

Any government which is a Member of the WTO, or prior to the date of entry into force of the WTO Agreement which is a contracting party to GATT 1947, and which is not a Party to this Agreement may accede to this Agreement on terms to be agreed between that government and the Parties. Accession shall take place by deposit with the Director-General of the WTO of an instrument of accession which states the terms so agreed. The Agreement shall enter into force for an acceding government on the 30th day following the date of its accession to the Agreement.[26]

3. *Transitional Arrangements*

(a) Hong Kong and Korea may delay application of the provisions of this Agreement, except Articles XXI and XXII, to a date not later than 1 January 1997. The commencement date of their application of the provisions, if prior to 1 January 1997, shall be notified to the Director-General of the WTO 30 days in advance.

(b) During the period between the date of entry into force of this Agreement and the date of its application by Hong Kong, the rights and obligations between Hong Kong and all other Parties to this Agreement which were on 15 April 1994 Parties to the Agreement on Government Procurement done at Geneva on 12 April 1979 as amended on 2 February 1987 (the "1988 Agreement") shall be governed by the substantive[9] provisions of the 1988 Agreement, including its Annexes as modified or rectified, which provisions are incorporated herein by reference for that purpose and shall remain in force until 31 December 1996.

(*footnote original*) [9] All provisions of the 1988 Agreement except the Preamble, Article VII and Article IX other than paragraphs 5(a) and (b) and paragraph 10.

(c) Between Parties to this Agreement which are also Parties to the 1988 Agreement, the rights and obligations of this Agreement shall supersede those under the 1988 Agreement.

(d) Article XXII shall not enter into force until the date of entry into force of the WTO Agreement. Until such time, the provisions of Article VII of the 1988 Agreement shall apply to consultations and dispute settlement under this Agreement, which provisions are hereby incorporated in the Agreement by reference for that purpose. These provisions shall be applied under the auspices of the Committee under this Agreement.

[26] With respect to accession to the *Agreement on Government Procurement*, in Marrakesh, see the Decision on Accession to the Agreement on Government Procurement, in Section XXVII.

(e) Prior to the date of entry into force of the WTO Agreement, references to WTO bodies shall be construed as referring to the corresponding GATT body and references to the Director-General of the WTO and to the WTO Secretariat shall be construed as references to, respectively, the Director-General to the CONTRACTING PARTIES to GATT 1947 and to the GATT Secretariat.

4. *Reservations*

Reservations may not be entered in respect of any of the provisions of this Agreement.

5. *National Legislation*

(a) Each government accepting or acceding to this Agreement shall ensure, not later than the date of entry into force of this Agreement for it, the conformity of its laws, regulations and administrative procedures, and the rules, procedures and practices applied by the entities contained in its lists annexed hereto, with the provisions of this Agreement.

(b) Each Party shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

6. *Rectifications or Modifications*

(a) Rectifications, transfers of an entity from one Annex to another or, in exceptional cases, other modifications relating to Appendices I through IV shall be notified to the Committee, along with information as to the likely consequences of the change for the mutually agreed coverage provided in this Agreement. If the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII.

(b) Where a Party wishes, in exercise of its rights, to withdraw an entity from Appendix I on the grounds that government control or influence over it has been effectively eliminated, that Party shall notify the Committee. Such modification shall become effective the day after the end of the following meeting of the Committee, provided that the meeting is no sooner than 30 days from the date of notification and no objection has been made. In the event of an objection, the matter may be pursued in accordance with the procedures on consultations and dispute settlement contained in Article XXII. In considering the proposed modification to Appendix I and any consequential compensatory adjustment, allowance shall be made for the market-opening effects of the removal of government control or influence.

7. *Reviews, Negotiations and Future Work*

(a) The Committee shall review annually the implementation and operation of this Agreement taking into account the objectives thereof. The Committee shall annually inform the General Council of the WTO of developments during the periods covered by such reviews.

(b) Not later than the end of the third year from the date of entry into force of this Agreement and periodically thereafter, the Parties thereto shall undertake further negotiations, with a view to improving this Agreement and achieving the greatest possible extension of its coverage among all Parties on the basis of mutual reciprocity, having regard to the provisions of Article V relating to developing countries.

(c) Parties shall seek to avoid introducing or prolonging discriminatory measures and practices which distort open procurement and shall, in the context of negotiations under subparagraph (b), seek to eliminate those which remain on the date of entry into force of this Agreement.

8. *Information Technology*

With a view to ensuring that the Agreement does not constitute an unnecessary obstacle to technical progress, Parties shall consult regularly in the Committee regarding developments in the use of information technology in government procurement and shall, if necessary, negotiate modifications to the Agreement. These consultations shall in particular aim to ensure that the use of information technology promotes the aims of open, non-discriminatory and efficient government procurement through transparent procedures, that contracts covered under the Agreement are clearly identified and that all available information relating to a particular contract can be identified. When a Party intends to innovate, it shall endeavour to take into account the views expressed by other Parties regarding any potential problems.

9. *Amendments*

Parties may amend this Agreement having regard, *inter alia*, to the experience gained in its implementation.

Such an amendment, once the Parties have concurred in accordance with the procedures established by the Committee, shall not enter into force for any Party until it has been accepted by such Party.

10. *Withdrawal*

(a) Any Party may withdraw from this Agreement. The withdrawal shall take effect upon the expiration of 60 days from the date on which written notice of withdrawal is received by the Director-General of the WTO. Any Party may upon such notification request an immediate meeting of the Committee.

(b) If a Party to this Agreement does not become a Member of the WTO within one year of the date of entry into force of the WTO Agreement or ceases to be a Member of the WTO, it shall cease to be a Party to this Agreement with effect from the same date.

11. *Non-application of this Agreement between Particular Parties*

This Agreement shall not apply as between any two Parties if either of the Parties, at the time either accepts or accedes to this Agreement, does not consent to such application.

12. *Notes,*[27] *Appendices and Annexes*

The Notes, Appendices and Annexes to this Agreement constitute an integral part thereof.

13. *Secretariat*

This Agreement shall be serviced by the WTO Secretariat.

14. *Deposit*

This Agreement shall be deposited with the Director-General of the WTO, who shall promptly furnish to each Party a certified true copy of this Agreement, of each rectification or modification thereto pursuant to paragraph 6 and of each amendment thereto pursuant to paragraph 9, and a notification of each acceptance thereof or accession thereto pursuant to paragraphs 1 and 2 and of each withdrawal therefrom pursuant to paragraph 10 of this Article.

15. *Registration*

This Agreement shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

Done at Marrakesh this fifteenth day of April one thousand nine hundred and ninety-four in a single copy, in the English, French and Spanish languages, each text being authentic, except as otherwise specified with respect to the Appendices hereto.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIV

1. Article XXIV:2

18. At its meeting of 27 February 1996, the Committee on Government Procurement adopted the Procedures for Accession to the Agreement.[28]

19. In June 2000, with respect to the process of accession to the *Agreement on Government Procurement*, the Committee on Government Procurement adopted a Checklist of issues for the provision of information by applicant governments.[29] By way of streamlining the accession process, the Committee agreed to an Indicative Time-frame for Accession Negotiations and Arrangements for Reporting on the Progress of Work in document GPA/W/109/Rev.2.[30]

2. Article XXIV:3

20. At its meetings of 18 February and 25 June 1998, the Committee on Government Procurement discussed the legal and procedural aspects of the relationship of the *Tokyo Round Agreement on Government Procurement* to the *1994 Agreement on Government Procurement* on the basis of a Note prepared by the Secretariat in response to the Committee's request.[31]

3. Article XXIV:5

21. At its meeting on 4 June 1996, the Committee on Government Procurement adopted the Procedures for the Notification of National Implementing Legislation.[32]

4. Article XXIV:6

22. In accordance with the procedures established by the Committee on Government Procurement at its meeting of 24 February 1997,[33] parties proposing to make rectifications and modifications to their appendices should notify them to the Committee in the form of relevant replacement or additional pages identifying the proposed changes to be inserted in the loose-leaf system for the Appendices to the Agreement that was established by the Committee at that time.[34]

---

[27] For the Notes, see Section XXVIII.

[28] GPA/M/1, Section B. The text of the decision can be found in GPA/1, Annex 2.

[29] GPA/M/13, Section G, and GPA/M/14, Section C. The text of the adopted document can be found in GPA/35.

[30] GPA/58, para. 22 and GPA/M/15, paras. 15–16.

[31] GPA/M/8, Section C and GPA/M/9, Section B.

[32] GPA/M/2, para.7. The text of the decision can be found in GPA/1/Add.1.

[33] GPA/M/5, Section D. See also GPA/W/35/Rev.1, para. 4.

[34] These proposals and any supplementary documents relating to them are circulated in the GPA/MOD/- document series (formerly in the GPA/W/- series). Once a proposal has been approved, the new or amended page(s) is certified in a WT/Let/- document and the relevant documentation derestricted. An up-to-date electronic copy of the loose-leaf system is available on the WTO website (www.wto.org).

23. At its meeting of 23 April 2004, the Committee on Government Procurement adopted a Decision Pursuant to Article XXIV:6(a) of the Agreement on Government Procurement,[35] approving the modification to the Appendices of the European Communities proposed in document GPA/MOD/EEC/1. This modification resulted in the extension of coverage under the Agreement on Government Procurement to the ten new member States of the European Communities, i.e. Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. Following the adoption of that decision, the European Communities made a statement clarifying the content of its modifications made in view of its enlargement.[36] The decision entered into force on 1 May 2004, on the same date as the enlargement of the European Communities to include the above countries.

24. At its meeting of 16 December 2004, the Committee on Government Procurement adopted a Decision pursuant to Article XXIV:6(a) of the Agreement on Government Procurement.[37] The Decision allows Israel to extend by one year the period to reduce its offsets from 30 to 20 per cent. Under its previous Note to Appendix I of the Agreement, Israel was authorized to require offsets in any form up to 30 per cent of the value of a contract until the end of 2004, and should have further reduced this level to 20 per cent of the value of a contract as of 1 January 2005. Based on Israel's proposed modification to its Note to Appendix I,[38] and subsequent informal consultations with other parties, a draft Decision was submitted to, and adopted by, the Committee without further discussion. According to this Decision, Israel may extend by one year the period to reduce its offsets to 20 per cent, and shall submit a report concerning the implementation of its modified Note to Appendix I at the end of 2005.

5. Article XXIV:7

25. Pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, the Committee adopted Annual Reports to the General Council for each year since the entry into force of the Government Procurement Agreement of 1994. These reports are available in the following documents: GPA/8 and GPA/8/Add.1 for 1996;[39] GPA/19 for 1997;[40] GPA/25 for 1998;[41] GPA/30 for 1999;[42] GPA/44 for 2000;[43] GPA/58 for 2001;[44] GPA/73 for 2002;[45] and GPA/75 for November 2002 to June 2003.

26. Pursuant to Article XXIV:7(b) and (c) of the Agreement, the Parties to the Agreement have undertaken further negotiations under the Agreement on Government Procurement. Further information on the negotiations undertaken so far on the non-market-access-related provisions in the text of the Agreement can be found in the above reports. At its meeting of 16 July 2004, the Committee on Government Procurement adopted a Decision on Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices.[46] According to this decision, the Committee as a whole will address the provisions in the draft revised text of the Agreement referred to as "market access issues", as well as issues relating to the presentation and structure of the appendices to the Agreement. At the same time, negotiations on the extension of coverage of each Party's Appendix I as well as on the elimination of discriminatory measures and practices in such Appendices will be largely pursued bilaterally but subject to monitoring by the Committee as a whole. The decision sets the aim that Parties conclude the overall re-negotiation of the Agreement pursuant to Article XXIV:7(b) and (c) by the beginning of 2006.

XXVI. APPENDIX I

A. CENTRAL GOVERNMENT ENTITIES

27. The Panel on *Korea – Procurement* examined whether several entities concerned at successive stages with the procurement of airport construction in Korea, specifically the Korean Airport Construction Authority (KOACA), Korea Airports Authority (KAA) and the Inchon International Airport Corporation (IIAC) were within the scope of Korea's list of "central government entities" as specified in Annex 1 of Korea's obligations in Appendix I of the *Agreement on Government Procurement*. The United States contended that the practices of these entities were inconsistent with Korea's obligations under the *Agreement on Government Procurement*. In this regard, the Panel noted:

> "A critical question we must first address is determining what is explicitly contained in Korea's Schedule. A preliminary issue is the status of Note 1 to Annex 1, in particular the extent to which Parties can qualify the coverage of listed entities through such Notes. In our view, Members determine, pursuant to negotiation, the

[45] GPA/M/19, para. 62.
[46] GPA/M/23, paras. 2–6. The text of the decision can be found in GPA/79.

scope of the coverage of their commitments as expressed in the Schedules. In this regard, we take note of the panel finding in *United States – Restrictions on Imports of Sugar* ('*United States – Sugar*') wherein the panel observed that Headnotes could be used to qualify the tariff concessions themselves."[47]

28. Accordingly, the Panel noted that:

"[T]he first step of the analysis, therefore, will be to examine Korea's Schedule and determine whether, within the ordinary meaning of the terms therein, the entity responsible for Inchon International Airport (IIA) procurement is covered. This will include a review of all relevant Annexes and Notes."[48]

29. In light of the fact that the Ministry of Construction and Transportation ("MOCT") was included in the list of central government entities in Annex 1 to Korea's Schedule, the Panel went on to consider whether "there exists the possibility of the inclusion of certain procurements of an entity which is not listed, due to its relationship with a listed entity":

"[T]here is a remaining question as to whether there exists the possibility of the inclusion of certain procurements of an entity which is not listed, due to its relationship with a listed entity. These arguably are general issues which arise with respect to any Member's Schedule regardless of the structure and content of the Schedule and any qualifying Notes."[49]

30. The Panel eventually rejected the United States' argument that KAA could be considered a part of MOCT because it was controlled, at least for the purposes of the IIA project, by MOCT. The Panel noted in this respect that:

"There is no use of the term 'direct control' or even 'control' in the sense that the United States wishes to use it. It has not been defined in this manner either in the context used in the Tokyo Round Agreement or elsewhere. We cannot agree with the overall US position that a 'control' test should be read into the GPA. However, we also do not think that it is an entirely irrelevant question. We think the issue of 'control' of one entity over another can be a relevant criterion among others for determining coverage of the GPA, as discussed below.

. . .

[W]e do believe that entities that are not listed in an Annex 1 to the GPA whether in the Annex list or through a Note to the Annex, can, nevertheless, be covered under the GPA. We believe that this flows from the fact that an overly narrow interpretation of 'central government entity' may result in less coverage under Annex 1 than was intended by the signatories. On the other hand, an overly broad interpretation of the term may result in coverage of entities that were never intended to be covered by signatories."[50]

31. The Panel on *Korea – Procurement* then put forward two criteria for answering the question referenced in paragraph 29 above:

"In the present case, our view is that the relevant questions are: (1) Whether an entity (KAA, in this case) is essentially a part of a listed central government entity (MOCT) – in other words, are the entities legally unified? and (2) Whether KAA and its successors have been acting on behalf of MOCT. The first test is appropriate because if entities that are essentially a part of, or legally unified with, listed central government entities are not considered covered, it could lead to great uncertainty as to what was actually covered because coverage would be dependent on the internal structure of an entity which may be unknown to the other negotiating parties. The second test is appropriate because procurements that are genuinely undertaken on behalf of a listed entity (as, for example, in the case where a principal/agent relationship exists between the listed entity and another entity) should properly be covered under Annex 1 because they would be considered legally as procurements by MOCT. In our view, it would defeat the objectives of the GPA if an entity listed in a signatory's Schedule could escape the Agreement's disciplines by commissioning another agency of government, not itself listed in that signatory's Schedule, to procure on its behalf."[51]

32. With respect to the first question, the Panel, persuaded on balance by the indicia of independence of KAA and its successors, found that KAA was not legally unified with or a part of MOCT, basing itself on the following criteria:

"KAA was established by law as an independent juristic entity; it authored and adopted its own by-laws; it had its own management and employees who were not government employees; it published bid announcements and requests for proposals of its own accord; it concluded contracts with successful bidders on its own behalf; and it funded portions of the IIA project with its own monies."[52]

33. With regard to the question whether or not KAA and its successors were acting on behalf of MOCT, at least with respect to the IIA project (i.e., whether the IIA project was really the legal responsibility of MOCT), the Panel, after having reviewed the laws governing construction of the IIA as well as other factual evidence regarding involvement of MOCT in the IIA project, found that:

"[T]here certainly is a role under Korean law for MOCT in the IIA project. It appears to be a role of oversight. We

[47] Panel Report on *Korea – Procurement*, para. 7.30.
[48] Panel Report on *Korea – Procurement*, para. 7.12.
[49] Panel Report on *Korea – Procurement*, para. 7.49.

do not think oversight by one governmental entity of a project which has been delegated by law to another entity (which we have already found to be independent and not covered by GPA commitments) results in a conclusion that there is an agency relationship between them."[53]

XXVII. DECISION ON ACCESSION TO THE AGREEMENT ON GOVERNMENT PROCUREMENT

A. TEXT OF THE DECISION

Decision on Accession to the Agreement on Government Procurement

1. *Ministers invite* the Committee on Government Procurement established under the Agreement on Government Procurement in Annex 4(b) of the Agreement Establishing the World Trade Organization to clarify that:

(a) a Member interested in accession according to paragraph 2 of Article XXIV of the Agreement on Government Procurement would communicate its interest to the Director-General of the WTO, submitting relevant information, including a coverage offer for incorporation in Appendix I having regard to the relevant provisions of the Agreement, in particular Article I and, where appropriate, Article V;

(b) the communication would be circulated to Parties to the Agreement;

(c) the Member interested in accession would hold consultations with the Parties on the terms for its accession to the Agreement;

(d) with a view to facilitating accession, the Committee would establish a working party if the Member in question, or any of the Parties to the Agreement, so requests. The working party should examine: (i) the coverage offer made by the applicant Member; and (ii) relevant information pertaining to export opportunities in the markets of the Parties, taking into account the existing and potential export capabilities of the applicant Member and export opportunities for the Parties in the market of the applicant Member;

(e) upon a decision by the Committee agreeing to the terms of accession including the coverage lists of the acceding Member, the acceding Member would deposit with the Director-General of the WTO an instrument of accession which states the terms so agreed. The acceding Member's coverage lists in English, French and Spanish would be appended to the Agreement;

(f) prior to the date of entry into force of the WTO Agreement, the above procedures would apply mutatis mutandis to contracting parties to the GATT 1947 interested in accession, and the tasks assigned to the Director-General of the WTO would be carried out by the Director-General to the CONTRACTING PARTIES to the GATT 1947.

2. It is noted that Committee decisions are arrived at on the basis of consensus. It is also noted that the non-application clause of paragraph 11 of Article XXIV is available to any Party.

B. INTERPRETATION AND APPLICATION OF THE DECISION

No jurisprudence or decision of a competent WTO body.

XXVIII. NOTES

A. TEXT OF THE NOTES

NOTES

The terms 'country' or 'countries' as used in this Agreement, including the Appendices, are to be understood to include any separate customs territory Party to this Agreement.

In the case of a separate customs territory Party to this Agreement, where an expression in this Agreement is qualified by the term 'national', such expression shall be read as pertaining to that customs territory, unless otherwise specified.

Article 1, paragraph 1

Having regard to general policy considerations relating to tied aid, including the objective of developing countries with respect to the untying of such aid, this Agreement does not apply to procurement made in furtherance of tied aid to developing countries so long as it is practised by Parties.

B. INTERPRETATION AND APPLICATION OF THE NOTES

No jurisprudence or decision of a competent WTO body.

A. TEXT OF ANNEX ON CERTAIN MILK PRODUCTS 1431

I. PREAMBLE

A. TEXT OF THE PREAMBLE

The *Parties* to this Agreement,

Recognizing the importance of milk and dairy products to the economy of many countries[1] in terms of production, trade and consumption;

(*footnote original*) [1] In this Agreement and in the Annex thereto, the term "country" is deemed to include the European Communities as well as any separate customs territory Member of the World Trade Organization.

Recognizing the need, in the mutual interests of producers and consumers, and of exporters and importers, to avoid surpluses and shortages, and to maintain prices at an equitable level;

Noting the diversity and interdependence of dairy products;

Noting the situation in the dairy products market, which is characterized by very wide fluctuations and the proliferation of export and import measures;

Considering that improved cooperation in the dairy products sector contributes to the attainment of the objectives of expansion and liberalization of world trade, and the implementation of the principles and objectives concerning developing countries agreed upon in the Tokyo Declaration of Ministers dated 14 September 1973;

Determined to respect the principles and objectives of the General Agreement on Tariffs and Trade 1994[2] and, in carrying out the aims of this Agreement, effectively to implement the principles and objectives agreed upon in the said Tokyo Declaration;

(*footnote original*) [2] This provision shall apply only among Parties that are Members of the World Trade Organization.

Hereby agree as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE 1

A. TEXT OF ARTICLE I

Article I
Objectives

The objectives of this Agreement shall be, in accordance with the principles and objectives agreed upon in the Tokyo Declaration of Ministers dated 14 September 1973,

- to achieve the expansion and ever greater liberalization of world trade in dairy products under market conditions as stable as possible, on the basis of mutual benefit to exporting and importing countries;
- to further the economic and social development of developing countries.

B. INTERPRETATION AND APPLICATION OF ARTICLE I

1. The *International Dairy Agreement* replaced the International Dairy Arrangement that had operated since 1 January 1980.

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Product Coverage

1. This Agreement applies to the dairy products sector. For the purpose of this Agreement, the term "dairy products" is deemed to include the following products, as defined in the Harmonized Commodity Description and Coding System ("Harmonized System") established by the Customs Co-operation Council:[3]

(*footnote original*) [3] For those Parties which have not yet implemented the Harmonized System, the following Customs Co-operation Council Nomenclature applies with respect to Article II of this Agreement and Article 1 of the Annex:

	CCCN
Milk and cream, fresh, not concentrated or sweetened	04.01
Milk and cream, preserved, concentrated or sweetened	04.02
Butter	04.03
Cheese and curd	04.04
Casein	ex 35.01

HS Code

04.01.10-30 Milk and cream, not concentrated nor containing added sugar or other sweetening matter

04.02.10-99 Milk and cream, concentrated or containing added sugar or other sweetening matter

04.03.10-90 Buttermilk, curdled milk and cream, yoghurt, kephir and other fermented or acidified milk and cream, whether or not concentrated or containing added sugar or other sweetening matter or flavoured or containing added fruit or cocoa

04.04.10-90 Whey, whether or not concentrated or containing added sugar or other sweetening matter; products consisting of natural milk constituents, whether or not containing added sugar or other sweetening matter, not elsewhere specified or included

04.05.00 Butter and other fats and oils derived from milk

04.06.10-90 Cheese and curd

35.01.10 Casein

2. The International Dairy Council, established under paragraph 1(a) of Article VII (hereinafter referred to as "the Council"), may decide that the Agreement is to apply to other products in which dairy products referred to in paragraph 1 have been incorporated, if it deems their inclusion necessary for the implementation of the objectives and provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE II

No jurisprudence or decision of a competent WTO body.

IV. ARTICLE III

A. TEXT OF ARTICLE III

Article III
Information and Market Monitoring

1. Each Party shall provide regularly and promptly to the Council the information required to permit the Council to monitor and assess the overall situation of the world market for dairy products and the world market situation for each individual dairy product.

2. Developing country Parties shall furnish the information available to them. In order that these Parties may improve their data collection mechanisms, developed Parties, and any developing Parties able to do so, shall consider sympathetically any request to them for technical assistance.

3. The information that the Parties undertake to provide pursuant to paragraph 1, according to the modalities that the Council shall establish, shall include data on past performance, current situation and outlook regarding production, consumption, prices, stocks and trade, including transactions other than normal commercial transactions, in respect of the products referred to in Article II, and any other information deemed necessary by the Council. Parties shall also provide information on their domestic policies and trade measures, and on their bilateral, plurilateral or multilateral commitments, in the dairy sector and shall make known, as early as possible, any changes in such policies and measures that are likely to affect international trade in dairy products. The provisions of this paragraph shall not require any Party to disclose confidential information

which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

4. The Secretariat of the World Trade Organization (hereinafter referred to as "the Secretariat"), shall draw up, and keep up to date, an inventory of all measures affecting trade in dairy products, including commitments resulting from bilateral, plurilateral and multilateral negotiations.

B. INTERPRETATION AND APPLICATION OF ARTICLE III

1. Notification requirements

2. At its meeting of 20–21 March 1995, the International Dairy Council adopted the notification requirements for information to be provided by the Parties[1] and for the inventory of measures to be kept by the WTO Secretariat under Article III.[2]

V. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV

Functions of the International Dairy Council and Cooperation between the Parties

1. The Council shall meet in order to:

   (a) make an evaluation of the situation in and outlook for the world market for dairy products, on the basis of a status report prepared by the Secretariat with the documentation furnished by Parties in accordance with Article III, information arising from the operation of the Annex to this Agreement on Certain Milk Products (hereinafter referred to as "the Annex") and any other information available to the Secretariat;

   (b) review the functioning of this Agreement.

2. If after an evaluation of the world market situation and outlook, referred to in paragraph 1(a), the Council finds that a serious market disequilibrium, or threat of such a disequilibrium, which affects or may affect international trade, is developing for dairy products in general or for one or more products, the Council will proceed to identify, taking particular account of the situation of developing countries, possible solutions for consideration by governments.

3. Depending on whether the Council considers that the situation defined in paragraph 2 is temporary or more durable, the measures referred to in paragraph 2 could include short-, medium- or long-term measures to contribute to improve the overall situation of the world market.

4. When considering measures that could be taken pursuant to paragraphs 2 and 3, due account shall be taken of the special and more favourable treatment to be provided for developing countries, where this is feasible and appropriate.

5. Any Party may raise before the Council any matter[4] affecting this Agreement, *inter alia,* for the same purposes provided for in paragraph 2. Each Party shall promptly afford adequate opportunity for consultation regarding such matter affecting this Agreement.

(*footnote original*) [4] It is confirmed that the term "matter" in this paragraph includes any matter which is covered by Multilateral Trade Agreements annexed to the Agreement Establishing the World Trade Organization, in particular those bearing on export and import measures.

6. If the matter affects the application of the specific provisions of the Annex, any Party which considers that its trade interests are being seriously threatened and which is unable to reach a mutually satisfactory solution with the other Party or Parties concerned may request the Chairman of the Committee established under paragraph 2(a) of Article VII, to convene a special meeting of the Committee on an urgent basis so as to determine as rapidly as possible, and within four working days if requested, any measures which may be required to meet the situation. If a satisfactory solution cannot be reached, the Council shall, at the request of the Chairman of the Committee, meet within a period of not more than fifteen days to consider the matter with a view to facilitating a satisfactory solution.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

1. Article IV:1(a)

(a) Preparation of status report

3. At its meeting of 20–21 March 1995, the International Dairy Council adopted procedural requirements for the status reports to be distributed by the Secretariat under Article IV:1(a).[3]

2. Article IV:1(b)

(a) Review of the functioning of the Agreement

4. Pursuant to Article IV:1(b), at its meeting on 17 October 1995, the International Dairy Council adopted a decision suspending the Annex on Certain Milk Products, with effect from 18 October 1995.[4]

[1] IDA/1, Rule 23.
[2] IDA/1, Rule 30.
[3] IDA/1, Rule 24.
[4] International Dairy Council, Second Session, adopted 13 February 1996, IDA/5.

VI. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Food Aid and Transactions other than Normal Commercial Transactions

1. The Parties agree:

   (a) In cooperation with FAO and other interested organizations, to foster recognition of the value of dairy products in improving nutritional levels and of ways and means through which they may be made available for the benefit of developing countries.

   (b) In accordance with the objectives of this Agreement, to furnish, within the limits of their possibilities, dairy products by way of food aid. Parties should notify the Council in advance each year, as far as practicable, of the scale, quantities and destinations of their proposed contributions of such food aid. Parties should also give, if possible, prior notification to the Council of any proposed amendments to the notified food-aid contributions. It is understood that contributions could be made bilaterally or through joint projects or through multilateral programmes, particularly the World Food Programme.

   (c) Recognizing the desirability of harmonizing their efforts in this field, as well as the need to avoid harmful interference with normal patterns of production, consumption and international trade, to exchange views in the Council on their arrangements for the supply and requirements of dairy products as food aid or on concessional terms.

2. Donated exports, exports destined for relief purposes or welfare purposes, and other transactions which are not normal commercial transactions shall be effected in accordance with Article 10 of the Agreement on Agriculture. The Council shall cooperate closely with the FAO Consultative Sub-Committee on Surplus Disposal.

3. The Council shall, in accordance with conditions and modalities that it will establish, upon request, discuss and consult on all transactions other than normal commercial transactions and other than those covered by the Agreement on Subsidies and Countervailing Measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE V

1. Article V:3

(a) Information on transactions

5. At its meeting of 20–21 March 1995, the International Dairy Council defined the procedural requirements in respect of parties requested to furnish information on the transactions defined in Article V:3.[5]

VII. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
Annex[6]

Without prejudice to the provisions of Articles I to V, the products listed below shall be subject to the provisions of the Annex:

Milk powder and cream powder, excluding whey powder

Milk fat

Certain cheeses

B. INTERPRETATION AND APPLICATION OF ARTICLE VI

1. Annex

(a) Paragraph 3

6. At its meeting of 2–3 May 1994, the Management Committee established by the participants to the Protocol Relating to Milk Fat as of 2 April 1973,[7] decided to suspend under the previous International Dairy Arrangement the minimum prices for butter and anhydrous milk fat contained in Article 3:2(b) of the Protocol for a period of 12 months.[8]

(b) Paragraph 4

7. At its meeting of 20–21 March 1995, the International Dairy Council adopted notification requirements for cases where prices in international trade of the products covered approached the minimum prices mentioned in Article 4 of the Annex.[9]

VIII. ARTICLE VII

A. TEXT OF ARTICLE VII

Article VII
Administration

1. *International Dairy Council*

   (a) An International Dairy Council shall be established within the framework of the World Trade Organization (hereinafter referred to as the "WTO"). The Council shall comprise repre-

[5] IDA/1, Rule 25.
[6] See Section X.
[7] L/3835, BISD 20S/11, Article VII:1.
[8] DPC/PTL/40, para. 4.
[9] IDA/1, Rule 26.

sentatives of all Parties to the Agreement and shall carry out all the functions which are necessary to implement the provisions of the Agreement. The Council shall be serviced by the Secretariat. The Council shall establish its own rules of procedure. The Council may, as appropriate, establish subsidiary working groups or other bodies.

(b) *Regular and special meetings*

The Council shall normally meet as appropriate, but not less than twice each year. The Chairman may call a special meeting of the Council either on his own initiative, at the request of the Committee established under paragraph 2(a), or at the request of a Party to this Agreement.

(c) *Decisions*

The Council shall reach its decisions by consensus. The Council shall be deemed to have decided on a matter submitted for its consideration if no member of the Council formally objects to the acceptance of a proposal.

(d) *Cooperation with other organizations*

The Council shall make whatever arrangements are appropriate for consultation or cooperation with intergovernmental and non-governmental organizations.

(e) *Admission of observers*

(i) The Council may invite any non-Party government to be represented at any meeting as an observer and may determine rules on the rights and obligations of observers, in particular with respect to the provision of information.

(ii) The Council may also invite any of the organizations referred to in paragraph 1(d) to attend any meeting as an observer.

2. *Committee on Certain Milk Products*

(a) The Council shall establish a Committee on Certain Milk Products (hereinafter referred to as "the Committee") to carry out all the functions which are necessary to implement the provisions of the Annex. This Committee shall comprise representatives of all Parties. The Committee shall be serviced by the Secretariat. It shall report to the Council on the exercise of its functions.

(b) *Examination of the market situation*

The Council shall make the necessary arrangements, determining the modalities for the information to be furnished under Article III, so that the Committee may keep under constant review the situation in and the evolution of the international market for the products covered by the Annex, and the conditions under which the provisions of the Annex are applied by Parties, taking into account the evolution of prices in international trade in each of the other dairy products having implications for the trade in products covered by the Annex.

(c) *Regular and special meetings*

The Committee shall normally meet once each quarter. However, the Chairman of the Committee may call a special meeting of the Committee on his own initiative or at the request of any Party.

(d) *Decisions*

The Committee shall reach its decisions by consensus. The Committee shall be deemed to have decided on a matter submitted for its consideration if no member of the Committee formally objects to the acceptance of a proposal.

B. INTERPRETATION AND APPLICATION OF ARTICLE VII

1. Article VII:1(a)

8. The International Dairy Council was established under the GATT framework according to Article VII:1(a) of the International Dairy Agreement of 1979.[10]

9. At its First Session of 20–21 March 1995, the International Dairy Council adopted its Rules of Procedure.[11]

2. Article VII:2(a)

10. At its meeting on 17 October 1995, the International Diary Council decided to suspend the Application of the Annex on Certain Milk Products and the functioning of the Committee on Certain Milk Products, whose rules of procedures were set out in Rules 15 to 22,[12] with effect from 18 October 1995.[13]

IX. ARTICLE VIII

A. TEXT OF ARTICLE VIII

Article VIII
Final Provisions

1. *Acceptance*

(a) This Agreement is open for acceptance, by signature or otherwise, by any State or separate

[10] BISD 26S/91.
[11] IDA/1.
[12] IDA/1.
[13] IDA/3.

customs territory possessing full autonomy in the conduct of its external commercial relations and of the other matters provided for in the Agreement Establishing the WTO (hereinafter referred to as the "WTO Agreement"), and by the European Communities.

(b) Any government[5] accepting this Agreement may at the time of its acceptance make a reservation with regard to the application of the Annex with respect to any product(s) specified therein. Reservations may not be entered in respect of any of the provisions of the Annex without the consent of the other Parties.

(*footnote original*) [5] For the purpose of this Agreement, the term "government" is deemed to include the competent authorities of the European Communities.

(c) Acceptance of this Agreement shall carry denunciation of the International Dairy Arrangement done at Geneva on 12 April 1979, which entered into force on 1 January 1980, for Parties having accepted that Arrangement. Such denunciation shall take effect on the date of entry into force of this Agreement for that Party.

2. *Entry into force*

(a) This Agreement shall enter into force, for those Parties having accepted it, on the date of entry into force of the WTO Agreement. For Parties accepting this Agreement after that date, it shall be effective from the date of their acceptance.

(b) The validity of contracts entered into before the date of entry into force of this Agreement shall not be affected by this Agreement.

3. *Validity*

This Agreement shall remain in force for three years. The duration of this Agreement shall be extended for further periods of three years at a time, unless the Council, at least eighty days prior to each date of expiry, decides otherwise.

4. *Amendment*

Except where provision for modification is made elsewhere in this Agreement, the Council may recommend an amendment to the provisions of this Agreement. The proposed amendment shall enter into force upon acceptance by all Parties.

5. *Relationship between the Agreement and the Annex and Attachments*

The following shall be deemed to be an integral part of this Agreement, subject to the provisions of paragraph 1(b):

- the Annex mentioned in Article VI;
- the lists of reference points mentioned in Article 2 of the Annex and contained in Attachment A;
- the schedules of price differentials according to milk fat content mentioned in paragraph 4 of Article 3 of the Annex and contained in Attachment B;
- the register of processes and control measures referred to in paragraph 5 of Article 3 of the Annex and contained in Attachment C.

6. *Relationship between the Agreement and Other Agreements*

Nothing in this Agreement shall affect the rights and obligations of Parties under the General Agreement on Tariffs and Trade and the WTO Agreement.[6]

(*footnote original*) [6] This provision shall apply only among Parties that are Members of the WTO or GATT.

7. *Withdrawal*

(a) Any Party may withdraw from this Agreement. Such withdrawal shall take effect upon the expiration of 60 days from the date on which written notice of withdrawal is received by the Director-General of the WTO.

(b) Subject to such conditions as may be agreed upon by the Parties, any Party may withdraw its acceptance of the application of the provisions of the Annex with respect to any product(s) specified therein. Such withdrawal shall take effect upon the expiration of 60 days from the date on which written notice of withdrawal is received by the Director-General of the WTO.

8. *Deposit*

Until the entry into force of the WTO Agreement, the text of this Agreement shall be deposited with the Director-General to the CONTRACTING PARTIES to GATT who shall promptly furnish a certified copy thereof and a notification of each acceptance thereof to each Party. The texts of this Agreement in the English, French and Spanish languages shall all be equally authentic. This Agreement, and any amendments thereto, shall, upon the entry into force of the WTO Agreement, be deposited with the Director-General of the WTO.

9. *Registration*

This Agreement shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

Done at Marrakesh this fifteenth day of April nineteen hundred and ninety-four.

B. INTERPRETATION AND APPLICATION OF ARTICLE VIII

1. Article VIII:2

11. On 12 December 1994, the parties to the *International Dairy Agreement*[14] agreed:

> "[A]ll decisions and procedures currently in effect in the International Dairy Agreement will be applied on a *de facto* basis during the period following the period following entry into force of the International Dairy Agreement until such time as the International Dairy Council adopts a definitive decision on these matters."[15]

2. Article VIII:3

12. Following a decision of the Parties to *the International Dairy Agreement* on 30 September 1997,[16] the General Council, at its meeting of 10 December 1997, decided to delete the *International Dairy Agreement* from Annex 4 of the *WTO Agreement*, with effect from 1 January 1998.[17]

X. ANNEX ON CERTAIN MILK PRODUCTS

A. TEXT OF ANNEX ON CERTAIN MILK PRODUCTS

ANNEX ON CERTAIN MILK PRODUCTS

Article 1

Product Coverage

1. This Annex applies to:

   (a) milk powder and cream powder falling under HS heading Nos. 04.02.10–99 and 04.03.10–90;

   (b) milk fat falling under HS heading No. 04.05.00, having a milk fat content equal to or greater than 50 per cent by weight; and

   (c) cheeses falling under HS heading No. 04.06.10–90, having a fat content in dry matter, by weight, equal to or more than 45 per cent and a dry matter content, by weight, equal to or more than 50 per cent.

Field of application

2. For each Party, this Annex is applicable to exports of the products specified in paragraph 1 manufactured or repacked inside its own customs territory.

Article 2

Pilot Products

The minimum export prices established under Article 3 shall be established with respect to the pilot products of the following specifications:

(a) Designation: *Skimmed milk powder*
Milk fat content: less than or equal to 1.5 per cent by weight
Water content: less than or equal to 5 per cent by weight

(b) Designation: *Whole milk powder*
Milk fat content: 26 per cent by weight
Water content: less than or equal to 5 per cent by weight

(c) Designation: *Buttermilk powder*[7]
Milk fat content: less than or equal to 11 per cent by weight
Water content: less than or equal to 5 per cent by weight

(*footnote original*) [7] Derived from the manufacture of butter and anhydrous milk fat.

(d) Designation: *Anhydrous milk fat*
Milk fat content: 99.5 per cent by weight

(e) Designation: *Butter*
Milk fat content: 80 per cent by weight

(f) Designation: *Cheese*

Packaging:

In packages normally used in the trade, of a net content by weight of not less than 25 kgs. or 50 lbs., except for cheese, of 20 kgs. or 40 lbs., respectively, as appropriate.

Terms of sale:

F.o.b. from the exporting Party or free-at-frontier exporting Party.

By derogation from this provision, reference points for the Parties listed in Attachment A may be as provided therein.

Prompt payment against documents.

Article 3

Minimum Prices

Level and observance of minimum prices

1. Each Party shall take the steps necessary to ensure that the export prices of the products defined in Article 2 shall not be less than the minimum prices applicable under this Annex. If the products are exported in the form of goods in which they have been incorporated, Parties shall take the steps necessary to avoid circumvention of the price provisions of this Annex.

2. (a) The minimum price levels set out in this Article take account, in particular, of the current market situation, dairy prices in producing Parties, the need to ensure an appropriate relationship between the

[14] Argentina, Australia, Bulgaria, Egypt, the European Communities, Hungary, Japan, New Zealand, Norway, Poland, Romania, Switzerland and Uruguay.
[15] L/7568.
[16] IDA/1.
[17] WT/L/251.

minimum prices established in the Annex, the need to ensure equitable prices to consumers, and the desirability of maintaining a minimum return to the most efficient producers in order to ensure stability of supply over the longer term.

(b) The minimum prices provided for in paragraph 1 applicable at the date of entry into force of this Agreement are fixed at:

(i) US$1,200 per metric ton for the skimmed milk powder defined in Article 2(a);

(ii) US$1,250 per metric ton for the whole milk powder defined in Article 2(b);

(iii) US$1,200 per metric ton for the buttermilk powder defined in Article 2(c);

(iv) US$1,625 per metric ton for the anhydrous milk fat defined in Article 2(d);

(v) US$1,350 per metric ton for the butter defined in Article 2(e);

(vi) US$1,500 per metric ton for the cheese defined in Article 2(f).

3. (a) The levels of the minimum prices specified in this Article may be modified by the Committee, taking into account, on the one hand, the results of the operation of the Annex and, on the other hand, the evolution of the situation of the international market.

(b) The levels of the minimum prices specified in this Article shall be subject to review at least once a year by the Committee. In undertaking this review the Committee shall take account in particular, to the extent relevant and necessary, of costs faced by producers, other relevant economic factors of the world market, the need to maintain a long-term minimum return to the most economic producers, the need to maintain stability of supply and to ensure acceptable prices to consumers, and the current market situation and shall have regard to the desirability of improving the relationship between the levels of the minimum prices set out in paragraph 2(b) and the dairy support levels in the major producing Parties.

Adjustment of minimum prices

4. If the products actually exported differ from the pilot products in respect of the fat content, packaging or terms of sale, the minimum prices shall be adjusted so as to protect the minimum prices established in this Annex for the products specified in Article 2 of this Annex, according to the following provisions:

Milk fat content:

Milk powders. If the milk fat content of the milk powders falling under Article 1(a), excluding buttermilk powder,[8] differs from the milk fat content of the pilot products as specified in Article 2(a) and Article 2(b), then for each full percentage point of milk fat as from 2 per cent, the minimum price shall be adjusted in proportion to the difference between the minimum prices in force for the pilot products as specified in Article 2(a) and Article 2(b).[9]

(*footnote original*) [8] As defined in Article 2(c) of this Annex.

(*footnote original*) [9] See Attachment B, "Schedule of Price Differentials According to Milk Fat Content".

Milk fats. If the milk fat content of the milk fat falling under Article 1(b) differs from the milk fat content of the pilot products as specified in Article 2(d) or Article 2(e) then, if the milk fat content is equal to or greater than 82 per cent or less than 80 per cent, the minimum price of this product shall be, for each full percentage point by which the milk fat content is more than or less than 80 per cent, increased or reduced in proportion to the difference between the minimum prices in force for the pilot products as specified in Article 2(d) or Article 2(e), respectively.

Packaging:

If the products are offered otherwise than in packages normally used in the trade, of a net content by weight of not less than 25 kgs. or 50 lbs., or for cheese, of not less than 20 kgs. or 40 lbs., respectively, as appropriate, the minimum prices shall be adjusted so as to reflect the difference in the cost of packaging relative to the cost of the type of package specified above.

Terms of sale:

If sold on terms other than f.o.b. from the exporting Party or free-at-frontier exporting Party,[10] the minimum prices shall be calculated on the basis of the minimum f.o.b. prices specified in paragraph 2(b), plus the real and justified costs of the services provided; if the terms of the sale include credit, this shall be charged for at the prevailing commercial rates in the exporting Party concerned.

(*footnote original*) [10] See Article 2 of this Annex.

Exports and imports of skimmed milk powder and buttermilk powder for purposes of animal feed

5. By derogation from the provisions of paragraphs 1 to 4, a Party may, under the conditions defined below, export or import, as the case may be, skimmed milk powder and buttermilk powder for purposes of animal feed at prices below the minimum prices provided for in this Annex for these products. A Party may make use of this possibility only to the extent that it ensures that the products exported or imported are subjected to the processes and control measures which will be applied in the country of export or destination so as to ensure that

the skimmed milk powder and buttermilk powder thus exported or imported are used exclusively for animal feed. These processes and control measures shall have been approved by the Committee and recorded in a register established by it.[11] A Party wishing to make use of the provisions of this paragraph shall give advance notification of its intention to do so to the Committee which shall meet, at the request of any Party, to examine the market situation. The Parties shall furnish the necessary information concerning their transactions in respect of skimmed milk powder and buttermilk powder for purposes of animal feed, so that the Committee may follow developments in this sector and periodically make forecasts concerning the evolution of this trade.

(*footnote original*) [11] See Attachment C, "Register of Processes and Control Measures". It is understood that exporters would be permitted to ship skimmed milk powder and buttermilk powder for animal feed purposes in an unaltered state to importers which have had their processes and control measures inserted in the Register. In this case, exporters shall so inform the Committee.

Special conditions of sales

6. Parties undertake, within the limit of their institutional possibilities, to ensure that practices such as those referred to in Article 4 do not have the effect of directly or indirectly bringing the export prices of the products subject to the minimum price provisions below the agreed minimum prices.

Transactions other than normal commercial transactions

7. The provisions of paragraphs 1 to 6 shall not be regarded as applying to donated exports or to exports destined for relief purposes or food-related development purposes or welfare purposes, provided these have been notified to the Council as provided for in Article V of the Agreement.

Article 4
Provision of Information

In cases where prices in international trade of the products covered by Article 1 are approaching the minimum prices mentioned in paragraph 2(b) of Article 3, and without prejudice to the provisions of Article III of the Agreement, Parties shall notify to the Committee all the relevant elements for evaluating their own market situation and, in particular, credit or loan practices, twinning with other products, barter or three-sided transactions, refunds or rebates, exclusivity contracts, packaging costs and details of the packaging, so that the Committee can make a verification.

Article 5
Obligations of Exporting Parties

Exporting Parties agree to use their best endeavours, in accordance with their institutional possibilities, to supply on a priority basis the normal commercial requirements of developing importing Parties, especially those used for food-related development purposes and welfare purposes.

Article 6
Cooperation of Importing Parties

1. Parties which import products covered by Article 1 undertake in particular:

(a) to cooperate in implementing the minimum price objective of this Annex and to ensure, as far as possible, that the products covered by Article 1 are not imported at less than the appropriate customs valuation equivalent to the prescribed minimum prices;

(b) without prejudice to the provisions of Article III of the Agreement and Article 4 of this Annex, to supply information concerning imports of products covered by Article 1 from non-Parties;

(c) to consider sympathetically proposals for appropriate remedial action if imports at prices inconsistent with the minimum prices threaten the operation of this Annex.

2. Paragraph 1 shall not apply to imports of skimmed milk powder and buttermilk powder for purposes of animal feed, provided that such imports are subject to the measures and procedures provided for in paragraph 5 of Article 3.

Article 7
Derogations

1. Upon request by a Party, the Committee shall have the authority to grant derogations from the provisions of paragraphs 1 to 5 of Article 3 in order to remedy difficulties which observance of minimum prices could cause certain Parties. The Committee shall take a decision on such a request within three months from the date of the request.

2. The provisions of paragraphs 1 to 4 of Article 3 shall not apply to exports, in exceptional circumstances, of small quantities of natural unprocessed cheese which would be below normal export quality as a result of deterioration or production faults. Parties exporting such cheese shall notify the Secretariat in advance of their intention to do so. Parties shall also notify the Committee quarterly of all sales of cheese effected under this provision, specifying in respect of each transaction the quantities, prices and destinations involved.

Article 8
Emergency Action

Any Party which considers that its interests are seriously endangered by a country not bound by this Annex can request the Chairman of the Committee to convene an emergency meeting of the Committee within

two working days to determine and decide whether measures would be required to meet the situation. If such a meeting cannot be arranged within the two working days and the commercial interests of the Party concerned are likely to be materially prejudiced, that Party may take unilateral action to safeguard its position, on the condition that any other Parties likely to be affected are immediately notified. The Chairman of the Committee shall also be formally advised immediately of the full circumstances of the case and shall call a special meeting of the Committee at the earliest possible moment.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

The *Parties* to this Agreement,

Convinced that increased international cooperation should be carried out in such a way as to contribute to the achievement of greater liberalization, stability and expansion in international trade in meat and live animals;

Taking into account the need to avoid serious disturbances in international trade in bovine meat and live animals;

Recognizing the importance of production and trade in bovine meat and live animals for the economies of many countries, especially for certain developed and developing countries;

Mindful of their obligations to the principles and objectives of the General Agreement on Tariffs and Trade 1994 (hereinafter referred to as "GATT 1994");[1]

(*footnote original*) [1] This provision shall apply only among Parties that are Members of the World Trade Organization.

Determined, in carrying out the aims of this Agreement to implement the principles and objectives agreed upon in the Tokyo Declaration of Ministers dated 14 September 1973, in particular as concerns special and more favourable treatment for developing countries;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE I

A. TEXT OF ARTICLE I

Article I
Objectives

The objectives of this Agreement shall be:

1. to promote the expansion, ever greater liberalization and stability of the international meat and livestock market by facilitating the progressive dismantling of obstacles and restrictions to world trade in bovine meat and live animals, including those which compartmentalize this trade, and by improving the international framework of world trade to the benefit of both consumer and producer, importer and exporter;

2. to encourage greater international cooperation in all aspects affecting the trade in bovine meat and live animals with a view in particular to greater rationalization and more efficient distribution of resources in the international meat economy;

3. to secure additional benefits for the international trade of developing countries in bovine meat and live animals through an improvement in the possibilities for these countries to participate in the

expansion of world trade in these products by means of *inter alia*:

(a) promoting long-term stability of prices in the context of an expanding world market for bovine meat and live animals; and

(b) promoting the maintenance and improvement of the earnings of developing countries that are exporters of bovine meat and live animals;

the above with a view thus to deriving additional earnings, by means of securing long-term stability of markets for bovine meat and live animals;

4. to further expand trade on a competitive basis taking into account the traditional position of efficient producers.

B. INTERPRETATION AND APPLICATION OF ARTICLE I

1. General

1. The *International Bovine Meat Agreement* replaced the Arrangement Regarding Bovine Meat that had operated since 1 January 1980.

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Product Coverage

This Agreement applies to the products listed in the Annex[1] and to any other product that may be added by the International Meat Council (hereinafter also referred to as "the Council"), as established under the terms of Article V, in order to accomplish the objectives and provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE II

No jurisprudence or decision of a competent WTO body.

IV. ARTICLE III

A. TEXT OF ARTICLE III

Article III
Information and Market Monitoring

1. Each Party shall provide regularly and promptly to the Council the information which will permit the Council to monitor and assess the overall situation of the world market for meat and the situation of the world market for each specific meat.

2. Developing country Parties shall furnish the information available to them. In order that these Parties may improve their data collection mechanism, developed country[2] Parties and any developing country Parties able to do so, shall consider sympathetically any request to them for technical assistance.

(*footnote original*) [2] In this Agreement the term "country" is deemed to include the European Communities as well as any separate customs territory Member of the World Trade Organization.

3. The information that the Parties undertake to provide pursuant to paragraph 1, according to the modalities that the Council shall establish, shall include data on past performance and current situation and an assessment of the outlook regarding production (including the evolution of the composition of herds), consumption, prices, stocks of and trade in the products referred to in Article II, and any other information deemed necessary by the Council, in particular on competing products. Parties shall also provide information on their domestic policies and trade measures including bilateral and plurilateral commitments in the bovine sector, and shall notify as early as possible any changes in such policies and measures that are likely to affect international trade in bovine meat and live animals. The provisions of this paragraph shall not require any Party to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

4. The Secretariat of the World Trade Organization (hereinafter referred to as "Secretariat") shall monitor variations in market data, in particular herd sizes, stocks, slaughtering and domestic and international prices, so as to permit early detection of the symptoms of any serious imbalance in the supply and demand situation. The Secretariat shall keep the Council apprised of significant developments on world markets, as well as prospects for production, consumption, exports and imports. The Secretariat shall draw up and keep up to date an inventory of all measures affecting trade in bovine meat and live animals, including commitments resulting from bilateral, plurilateral and multilateral negotiations.

B. INTERPRETATION AND APPLICATION OF ARTICLE III

1. Notification requirements

2. At its meeting on 20–21 June 1995, the International Meat Council adopted the procedural and notification requirements for the information concerning domestic policies, statistics and trade measures including bilateral and plurilateral commitments in the bovine meat sector to be furnished by the parties under Article III (Rules 15 to 18).[2]

[1] See Section VIII.

[2] IMA/1. In the questionnaires to be filled out by parties, the parties were to provide the document reference for any policies or measures notified under the notification procedures of the Committees on Agriculture and Sanitary and Phytosanitary Measures (IMA/2).

V. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV
Functions of the International Meat Council and Cooperation between the Parties

1. The Council shall meet in order to:

(a) evaluate the world supply and demand situation and outlook on the basis of an interpretative analysis of the present situation and of probable developments drawn up by the Secretariat, on the basis of documentation provided in conformity with Article III, including that relating to the operation of domestic and trade policies and of any other information available to the Secretariat;

(b) proceed to a comprehensive examination of the functioning of this Agreement;

(c) provide an opportunity for regular consultation on all matters affecting international trade in bovine meat.

2. If after evaluation of the world supply and demand situation referred to in paragraph 1 (a), or after examination of all relevant information pursuant to paragraph 3 of Article III, the Council finds evidence of a serious imbalance or a threat thereof in the international meat market, the Council will proceed by consensus, taking particular account of the situation in developing countries, to identify for consideration by governments[3] possible solutions to remedy the situation consistent with the principles and rules of GATT 1994.

(*footnote original*) [3] For the purpose of this Agreement, the term "government" is deemed to include the competent authorities of the European Communities.

3. Depending on whether the Council considers that the situation defined in paragraph 2 is temporary or more durable, the measures referred to in paragraph 2 could include short-, medium-, or long-term measures taken by importers as well as exporters to contribute to improve the overall situation of the world market consistent with the objectives and aims of this Agreement, in particular the expansion, ever greater liberalization, and stability of the international meat and livestock markets.

4. When considering the suggested measures pursuant to paragraphs 2 and 3, due consideration shall be given to special and more favourable treatment to developing countries, where this is feasible and appropriate.

5. The Parties undertake to contribute to the fullest possible extent to the implementation of the objectives of this Agreement set forth in Article I. To this end, and consistent with the principles and rules of the GATT 1994, Parties shall, on a regular basis, enter into the discussions provided in paragraph 1 (c) with a view to exploring the possibilities of achieving the objectives of this Agreement, in particular the further dismantling of obstacles to world trade in bovine meat and live animals. Such discussions should prepare the way for subsequent consideration of possible solutions of trade problems consistent with the rules and principles of the GATT 1994, which could be jointly accepted by all the Parties concerned, in a balanced context of mutual advantages.

6. Any Party may raise before the Council any matter[4] affecting this Agreement, *inter alia*, for the same purposes provided for in paragraph 2. The Council shall, at the request of a Party, meet within a period of not more than fifteen days to consider any matter affecting this Agreement.

(*footnote original*) [4] It is confirmed that the term "matter" in this paragraph includes any matter which is covered by the Multilateral Trade Agreements annexed to the Agreement Establishing the WTO, in particular those bearing on export and import measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

3. Pursuant to Article IV:1, at its meeting of 2 June 1997, the International Meat Council completed its evaluation of the world supply and demand situation and outlook in the bovine meat sector.[3]

VI. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Administration

1. *International Meat Council*

An International Meat Council shall be established within the framework of the World Trade Organization (hereinafter referred to as "the WTO"). The Council shall comprise representatives of all Parties to the Agreement and shall carry out all the functions which are necessary to implement the provisions of the Agreement. The Council shall be serviced by the Secretariat. The Council shall establish its own rules of procedure. The Council may, as appropriate, establish subsidiary working groups or other bodies.

2. *Regular and special meetings*

The Council shall normally meet as appropriate, but not less than twice each year. The Chairman may call a special meeting of the Council either on his own initiative or at the request of a Party to this Agreement.

[3] IMA/W/11. See also IMA/W/1, IMA/W/7 and IMA/W/7/Corr. 1.

3. *Decisions*

The Council shall reach its decisions by consensus. The Council shall be deemed to have decided on a matter submitted for its consideration if no member of the Council formally objects to the acceptance of a proposal.

4. *Cooperation with other organizations*

The Council shall make arrangements as appropriate for consultation or cooperation with intergovernmental and non-governmental organizations.

5. *Admission of observers*

(a) The Council may invite any non-Party government to be represented at any of its meetings as an observer and may determine rules on the rights and obligations of observers, in particular with respect to the provision of information.

(b) The Council may also invite any of the organizations referred to in paragraph 4 to attend any meeting as an observer.

B. INTERPRETATION AND APPLICATION OF ARTICLE V

4. Pursuant to Article V:1, at its meeting of 21–22 June 1995, the International Meat Council adopted its Rules of Procedure.[4]

5. Pursuant to Article V:5(b), at its meeting of 21–22 June 1995, the International Meat Council issued a standing invitation to the United Nations Economic Commission for Europe (ECE), FAO, the International Trade Centre (ITC), OECD and UNCTAD.[5]

VII. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
Final provisions

1. *Acceptance*

(a) This Agreement is open for acceptance, by signature or otherwise, by any State or separate customs territory possessing full autonomy in the conduct of its external commercial relations and of the other matters provided for in the Agreement Establishing the WTO (hereinafter referred to as "WTO Agreement"), and by the European Communities.

(b) Reservations may not be entered without the consent of the other Parties.

(c) Acceptance of this Agreement shall carry denunciation of the Arrangement Regarding Bovine Meat, done at Geneva on 12 April 1979, which entered into force on 1 January 1980, for Parties having accepted that Arrangement. Such denunciation shall take effect on the date of entry into force of this Agreement for that Party.

2. *Entry into force*

This Agreement shall enter into force for those Parties having accepted it, on the date of entry into force of the WTO Agreement. For Parties accepting this Agreement after that date, it shall be effective from the date of their acceptance.

3. *Validity*

This Agreement shall remain in force for three years. The duration of this Agreement shall be extended for further periods of three years at a time, unless the Council, at least eighty days prior to each date of expiry, decides otherwise.

4. *Amendment*

Except where provision for modification is made elsewhere in this Agreement, the Council may recommend an amendment to the provisions of this Agreement. The proposed amendment shall enter into force upon acceptance by all Parties.

5. *Relationship between the Agreement and other Agreements*

Nothing in this Agreement shall affect the rights and obligations of Parties under the General Agreement on Tariffs and Trade or the WTO Agreement.[5]

(*footnote original*) [5] This provision shall apply only among Parties that are Members of the WTO or the GATT.

6. *Withdrawal*

Any Party may withdraw from this Agreement. Such withdrawal shall take effect upon the expiration of sixty days from the date on which written notice of withdrawal is received by the Director-General of the WTO.

7. *Deposit*

Until the entry into force of the WTO Agreement, the text of this Agreement shall be deposited with the Director-General to the Contracting Parties to GATT who shall promptly furnish a certified copy thereof and a notification of each acceptance thereof to each Party. The texts of this Agreement in the English, French and Spanish languages shall all be equally authentic. This Agreement, and any amendments thereto, shall, upon the entry into force of the WTO Agreement, be deposited with the Director-General of the WTO.

8. *Registration*

This Agreement shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

[4] IMA/1.
[5] IMA/4, para. 8.

Done at Marrakesh on this fifteenth day of April nineteen hundred and ninety four.

B. INTERPRETATION AND APPLICATION OF ARTICLE VI

6. At its meeting of 30 September 1997 the International Meat Council decided to terminate the *International Bovine Meat Agreement*.[6] Pursuant to Article X:9 of the *WTO Agreement*, the General Council deleted the *International Bovine Meat Agreement* from Annex 4 of the *WTO Agreement* with its termination effective as of 1 January 1998.[7]

VIII. ANNEX

A. TEXT OF THE ANNEX

ANNEX
PRODUCT COVERAGE

This Agreement applies to bovine meat. For the purpose of this Agreement, the term "bovine meat" is considered to include the following products, as defined by the Harmonized Commodity Description and Coding System ("Harmonized System") established by the Customs Co-operation Council:[6]

(*footnote original*) [6] For those Parties which have not yet implemented the Harmonized System, the following Customs Co-operation Council Nomenclature applies with respect to Article II:

CCCN

(a) Live bovine animals 01.02

(b) Meat and edible offals of bovine animals, fresh, chilled or frozen ex 02.01

(c) Meat and edible offals of bovine animals, salted, in brine, dried or smoked ex 02.06

(d) Other prepared or preserved meat or offal of bovine animals ex 16.02

HS code

01.02 – Live bovine animals:
0102.10 – Pure-bred breeding animals
0102.90 – Other

02.01 – Meat of bovine animals, fresh or chilled:
0201.10 – Carcasses and half-carcasses
0201.20 – Other cuts with bone-in
0201.30 – Boneless

02.02 – Meat of bovine animals, frozen:
0202.10 – Carcasses and half-carcasses
0202.20 – Other cuts with bone-in
0202.30 – Boneless

02.06 – Edible offal of bovine animals, fresh, chilled or frozen:
0206.10 – Of bovine animals, fresh or chilled
– Of bovine animals, frozen:
0206.21 – Tongues
0206.22 – Livers
0206.29 – Other

02.10 – Meat and edible meat offal, salted, in brine, dried or smoked; edible flours and meals of meat or meat offal:
0210.20 – Meat of bovine animals
ex0210.90 – Edible offal of bovine animals

16.02 – Other prepared or preserved meat, meat offal or blood:
1602.50 – Of bovine animals

B. INTERPRETATION AND APPLICATION OF THE ANNEX

No jurisprudence or decision of a relevant WTO body.

EC – Bananas III	*European Communities – Regime for the Importation, Sale and Distribution of Bananas* Panel Report, WT/DS27/R/[. . .], adopted 25 September 1997, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Ecuador)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Ecuador* Panel Report, WT/DS27/R/ECU, adopted 25 September 1997, DSR

	1997:III, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Ecuador) (Article 22.6 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS27/ARB/ECU, 24 March 2000, DSR 2000:V
EC – Bananas III (Guatemala and Honduras)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Guatemala and Honduras* Panel Report, WT/DS27/R/GTM, WT/DS27/R/HND, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (Mexico)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by Mexico* Panel Report, WT/DS27/R/MEX, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (US)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Complaint by the United States* Panel Report, WT/DS27/R/USA, adopted 25 September 1997, DSR 1997:II, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:II
EC – Bananas III (US) (Article 22.6 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS27/ARB, 9 April 1999, DSR 1999:II
EC – Bananas III (Article 21.3)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS27/15, 7 January 1998, DSR 1998:I
EC – Bananas III (Article 21.5 – EC)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Article 21.5 of the DSU by the European Communities* Panel Report, WT/DS27/RW/EEC and Corr.1, adopted 6 May 1999, DSR 1999:II
EC – Bananas III (Article 21.5 – Ecuador)	*European Communities – Regime for the Importation, Sale and Distribution of Bananas – Recourse to Article 21.5 of the DSU by Ecuador* Panel Report, WT/DS27/RW/ECU, adopted 6 May 1999, DSR 1999:II
EC – Bed Linen	*European Communities – Anti-Dumping Duties on Imports of Cotton-Type Bed Linen from India* Panel Report, WT/DS141/R, adopted 12 March 2001, as modified by the Appellate Body Report, WT/DS141/AB/R, DSR 2001:V and DSR 2001:VI
EC – Bed Linen (Article 21.5 – India)	*European Communities – Anti-Dumping Duties on Imports of Cotton-Type Bed Linen from India – Recourse to Article 21.5 of the DSU by India* Panel Report, WT/DS141/RW, adopted 24 April 2003, as modified by the Appellate Body Report, WT/DS141/AB/RW, DSR 2003:III and DSR 2003:IV
EC – Butter	*European Communities – Measures Affecting Butter Products* Panel Report, WT/DS72/R, 24 November 1999

EC – Computer Equipment	*European Communities – Customs Classification of Certain Computer Equipment* Panel Report, WT/DS62/R, WT/DS67/R, WT/DS68/R, adopted 22 June 1998, as modified by the Appellate Body Report, WT/DS62/AB/R, WT/DS67/AB/R, WT/DS68/AB/R, DSR 1998:V
EC – Hormones (Canada)	*EC Measures Concerning Meat and Meat Products (Hormones) – Complaint by Canada* Panel Report, WT/DS48/R/CAN, adopted 13 February 1998, DSR 1998:II, as modified by the Appellate Body Report, WT/DS26/AB/R, WT/DS48/AB/R, DSR 1998:I
EC – Hormones (Canada) (Article 22.6 – EC)	*EC Measures Concerning Meat and Meat Products (Hormones) – Recourse to Arbitration by the European Communities under Article 2.6 of the DSU* Decision by the Arbitrators, WT/DS48/ARB, 12 July 1999, DSR 1999:III
EC – Hormones (US)	*EC Measures Concerning Meat and Meat Products (Hormones) – Complaint by the United States* Panel Report, WT/DS26/R/USA, adopted 13 February 1998, DSR 1998:III, as modified by the Appellate Body Report, WT/DS26/AB/R, WT/DS48/AB/R, DSR 1998:I
EC – Hormones (US) (Article 22.6 – EC)	*EC Measures Concerning Meat and Meat Products (Hormones) – Recourse to Arbitration by the European Communities under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS26/ARB, 12 July 1999, DSR 1999:III
EC – Hormones (Article 21.3)	*EC Measures Concerning Meat and Meat Products (Hormones) – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS26/15, WT/DS48/13, 29 May 1998, DSR 1998:V
EC – Poultry	*European Communities – Measures Affecting the Importation of Certain Poultry Products* Panel Report, WT/DS69/R, adopted 23 July 1998, as modified by the Appellate Body Report, WT/DS69/AB/R, DSR 1998:V
EC – Sardines	*European Communities – Trade Description of Sardines* Panel Report, WT/DS231/R and Corr.1, adopted 23 October 2002, as modified by the Appellate Body Report, WT/DS231/AB/R
EC – Scallops (Canada)	*European Communities – Trade Description of Scallops – Request by Canada* Panel Report, WT/DS7/R, 5 August 1996, DSR 1996:I
EC – Scallops (Peru and Chile)	*European Communities – Trade Description of Scallops – Requests by Peru and Chile* Panel Report, WT/DS12/R, WT/DS14/R, 5 August 1996, DSR 1996:I
EC – Tariff Preferences	*European Communities – Conditions for the Granting of Tariff Preferences to Developing Countries* Panel Report, WT/DS246/R, adopted 20 April 2004, as modified by the Appellate Body Report, WT/DS246/AB/R
EC – Tariff Preferences (Article 21.3)	*European Communities – Conditions for the Granting of Tariff Preferences to Developing Countries – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS246/14, 20 September 2004

EC – Tube or Pipe Fittings	*European Communities – Anti-Dumping Duties on Malleable Cast Iron Tube or Pipe Fittings from Brazil* Panel Report, WT/DS219/R, adopted 18 August 2003, as modified by the Appellate Body Report, WT/DS219/AB/R, DSR 2003:VI and DSR:VIII
Egypt – Steel Rebar	*Egypt – Definitive Anti-Dumping Measures on Steel Rebar from Turkey* Panel Report, WT/DS211/R, adopted 1 October 2002, DSR 2002:VII
Guatemala – Cement I	*Guatemala – Anti-Dumping Investigation Regarding Portland Cement from Mexico* Panel Report, WT/DS60/R, adopted 25 November 1998, as modified by the Appellate Body Report, WT/DS60/AB/R, DSR 1998:IX
Guatemala – Cement II	*Guatemala – Definitive Anti-Dumping Measures on Grey Portland Cement from Mexico* Panel Report, WT/DS156/R, adopted 17 November 2000, DSR 2000:XI
India – Autos	*India – Measures Affecting Trade and Investment in the Motor Vehicle Sector* Panel Report, WT/DS146/R and Corr.1, WT/DS175/R and Corr.1, adopted 5 April 2002, Appellate Body Report, WT/DS146/AB/R, WT/DS175/AB/R, DSR 2002:V
India – Patents (EC)	*India – Patent Protection for Pharmaceutical and Agricultural Chemical Products – Complaint by the European Communities* Panel Report, WT/DS79/R, adopted 22 September 1998, DSR 1998:VI
India – Patents (US)	*India – Patent Protection for Pharmaceutical and Agricultural Chemical Products – Complaint by the United States* Panel Report, WT/DS50/R, adopted 16 January 1998, as modified by the Appellate Body Report, WT/DS50/AB/R, DSR 1998:I
India – Quantitative Restrictions	*India – Quantitative Restrictions on Imports of Agricultural, Textile and Industrial Products* Panel Report, WT/DS90/R, adopted 22 September 1999, as upheld by the Appellate Body Report, WT/DS90/AB/R, DSR 1999:V
Indonesia – Autos	*Indonesia – Certain Measures Affecting the Automobile Industry* Panel Report, WT/DS54/R and Corr. 1, 2, 3, 4, WT/DS55/R and Corr. 1, 2, 3, 4, WT/DS55/R and Corr. 1, 2, 3, 4, WT/DS64/R and Corr. 1, 2, 3, 4, adopted 23 July 1998, DSR 1998:VI
Indonesia – Autos (Article 21.3)	*Indonesia – Certain Measures Affecting the Automobile Industry – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS54/15, WT/DS55/14, WT/DS59/13, WT/DS64/12, 7 December 1998, DSR 1998:IX
Japan – Agricultural Products II	*Japan – Measures Affecting Agricultural Products* Panel Report, WT/DS76/R, adopted 19 March 1999, as modified by the Appellate Body Report, WT/DS76/AB/R, DSR 1999:I
Japan – Alcoholic Beverages II	*Japan – Taxes on Alcoholic Beverages* Panel Report, WT/DS8/R, WT/DS10/R, WT/DS11/R, adopted 1 November 1996, as modified by the Appellate Body Report, WT/DS8/AB/R, WT/DS10/AB/R, WT/DS11/AB/R, DSR 1996:I
Japan – Alcoholic Beverages II (Article 21.3)	*Japan – Taxes on Alcoholic Beverages – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS8/15, WT/DS10/15, WT/DS11/13, 14 February 1997, DSR 1997:I

Japan – Apples	*Japan – Measures Affecting the Importation of Apples* Panel Report, WT/DS245/R, adopted 10 December 2003, as upheld by the Appellate Body Report, WT/DS245/AB/R, DSR 2003:IX
Japan – Film	*Japan – Measures Affecting Consumer Photographic Film and Paper* Panel Report, WT/DS44/R, adopted 22 April 1998, DSR 1998:IV
Korea – Alcoholic Beverages	*Korea – Taxes on Alcoholic Beverages* Panel Report, WT/DS75/R, WT/DS84/R, adopted 17 February 1999, as modified by the Appellate Body Report, WT/DS75/AB/R, WT/DS84/AB/R, DSR 1999:I
Korea – Alcoholic Beverages (Article 21.3)	*Korea – Taxes on Alcoholic Beverages – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS75/16, WT/DS84/14, 4 June 1999, DSR 1999:II
Korea – Dairy	*Korea – Definitive Safeguard Measure on Imports of Certain Dairy Products* Panel Report, WT/DS98/R and Corr.1, adopted 12 January 2000, as modified by the Appellate Body Report, WT/DS98/AB/R, DSR 2000:I
Korea – Procurement	*Korea – Measures Affecting Government Procurement* Panel Report, WT/DS163/R, adopted 19 June 2000, DSR 2000:VIII
Korea – Various Measures on Beef	*Korea – Measures Affecting Imports of Fresh, Chilled and Frozen Beef* Panel Report, WT/DS161/R, WT/DS169/R, adopted 10 January 2001, as modified by the Appellate Body Report, WT/DS161/AB/R, WT/DS169/AB/R, DSR 2001:I
Mexico – Corn Syrup	*Mexico – Anti-Dumping Investigation of High Fructose Corn Syrup (HFCS) from the United States* Panel Report, WT/DS132/R and Corr.1, adopted 24 February 2000, DSR 2000:III
Mexico – Corn Syrup (Article 21.5 – US)	*Mexico – Anti-Dumping Investigation of High Fructose Corn Syrup (HFCS) from the United States – Recourse to Article 21.5 of the DSU by the United States* Panel Report, WT/DS132/RW, adopted 21 November 2001, DSR 2001:XIII
Mexico – Telecoms	*Mexico – Measures Affecting Telecommunications Services* Panel Report, WT/DS204/R, adopted 1 June 2004
Thailand – H-Beams	*Thailand – Anti-Dumping Duties on Angles, Shapes and Sections of Iron or Non-Alloy Steel and H-Beams from Poland* Panel Report, WT/DS122/R, adopted 5 April 2001, as modified by the Appellate Body Report, WT/DS122/AB/R, DSR 2001:VII
Turkey – Textiles	*Turkey – Restrictions on Imports of Textile and Clothing Products* Panel Report, WT/DS34/R, adopted 19 November 1999, as modified by the Appellate Body Report, WT/DS34/AB/R, DSR 1999:VI
US – 1916 Act (EC)	*United States – Anti-Dumping Act of 1916 – Complaint by the European Communities* Panel Report, WT/DS136/R and Corr.1, adopted 26 September 2000, as upheld by the Appellate Body Report, WT/DS136/AB/R, WT/DS162/AB/R, DSR 2000:X
US – 1916 Act (Japan)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan* Panel Report, WT/DS162/R and Add.1, adopted 26 September 2000, as upheld by the Appellate Body Report, WT/DS136/AB/R, WT/DS162/AB/R, DSR 2000:X

US – 1916 Act (Article 21.3)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS136/11, WT/DS162/14, 28 February 2001, DSR 2001:V
US – 1916 Act (Article 22.6 – US)	*United States – Anti-Dumping Act of 1916 – Complaint by Japan – Recourse to Arbitration by the United States under Article 22.6 of the DSU* Decision by the Arbitrators, WT/DS136/ARB, 24 February 2004
US – Carbon Steel	*United States – Countervailing Duties on Certain Corrosion-Resistant Carbon Steel Flat Products from Germany* Panel Report, WT/DS213/R and Corr.1, adopted 19 December 2002, as modified by the Appellate Body Report, WT/DS213/AB/R and Corr.1, DSR 2002:IX
US – Certain EC Products	*United States – Import Measures on Certain Products from the European Communities* Panel Report, WT/DS165/R and Add.1, adopted 10 January 2001, as modified by the Appellate Body Report, WT/DS165/AB/R, DSR 2001:I and DSR 2001:II
US – Cotton Yarn	*United States – Transitional Safeguard Measure on Combed Cotton Yarn from Pakistan* Panel Report, WT/DS192/R, adopted 5 November 2001, as modified by the Appellate Body Report, WT/DS192/AB/R, DSR 2001:XII
US – Countervailing Measures on Certain EC Products	*United States – Countervailing Measures Concerning Certain Products from the European Communities* Panel Report, WT/DS212/R, adopted 8 January 2003, as modified by the Appellate Body Report, WT/DS212/AB/R, DSR 2003:I
US – DRAMS	*United States – Anti-Dumping Duty on Dynamic Random Access Memory Semiconductors (DRAMS) of One Megabit or Above from Korea* Panel Report, WT/DS99/R, adopted 19 March 1999, DSR 1999:II
US – DRAMS (Article 21.5 – Korea)	*United States – Anti-Dumping Duty on Dynamic Random Access Memory Semiconductors (DRAMS) of One Megabit or Above from Korea – Recourse to Article 21.5 of the DSU by Korea* Panel Report, WT/DS99/RW, 7 November 2000
US – Export Restraints	*United States – Measures Treating Export Restraints as Subsidies* Panel Report, WT/DS194/R and Corr.2, adopted on 23 August 2001, DSR 2001:XI
US – FSC	*United States – Tax Treatment for "Foreign Sales Corporations"* Panel Report, WT/DS108/R, adopted 20 March 2000, as modified by the Appellate Body Report, WT/DS108/AB/R, DSR 2000:III and DSR 2000:IV
US – FSC (Article 21.5 – EC)	*United States – Tax Treatment for "Foreign Sales Corporations"* Panel Report, WT/DS108/RW, adopted 29 January 2002, as modified by the Appellate Body Report, WT/DS108/AB/RW, DSR 2002:I
US – FSC (Article 22.6 – US)	*United States – Tax Treatment for "Foreign Sales Corporations" – Recourse to Arbitration by the United States under Article 22.6 of the DSU and Article 4.11 of the SCM Agreement* Decision by the Arbitrator, WT/DS180/ARB, 30 August 2002, DSR 2002:VI

US – Gasoline	*United States – Standards for Reformulated and Conventional Gasoline* Panel Report, WT/DS2/R, adopted 20 May 1996, as modified by the Appellate Body Report, WT/DS2/AB/R, DSR 1996:I
US – Hot-Rolled Steel	*United States – Anti-Dumping Measures on Certain Hot-Rolled Steel Products from Japan* Panel Report, WT/DS184/R, adopted 23 August 2001, as modified by the Appellate Body Report, DSR 2001:X
US – Hot-Rolled Steel (Article 21.3)	*United States – Anti-Dumping Measures on Certain Hot-Rolled Steel Products from Japan – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS184/12, 19 February 2002, DSR 2002:IV
US – Lamb	*United States – Safeguard Measures on Imports of Fresh, Chilled or Frozen Lamb Meat from New Zealand and Australia* Panel Report, WT/DS177/R, WT/DS178/R, adopted 16 May 2001, as modified by the Appellate Body Report, WT/DS177/AB/R, WT/DS178/AB/R, DSR 2001:IX
US – Lead and Bismuth II	*United States – Imposition of Countervailing Duties on Certain Hot-Rolled Lead and Bismuth Carbon Steel Products Originating in the United Kingdom* Panel Report, WT/DS138/R and Corr.2, adopted 7 June 2000, as upheld by the Appellate Body Report, WT/DS138/AB/R, DSR 2001:V and DSR 2001:VI
US – Line Pipe	*United States – Definitive Safeguard Measures on Imports of Circular Welded Carbon Quality Line Pipe from Korea* Panel Report, WT/DS202/R, adopted 8 March 2002, as modified by the Appellate Body Report, WT/DS202/AB/R, DSR 2002:IV
US – Line Pipe (Article 21.3)	*United States – Definitive Safeguard Measures on Imports of Circular Welded Carbon Quality Line Pipe from Korea – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS202/17, 26 July 2002, DSR 2002:V
US – Offset Act (Byrd Amendment)	*United States – Continued Dumping and Subsidy Offset Act of 2000* Panel Report, WT/DS217/R, WT/DS234/R, adopted 27 January 2003, as modified by the Appellate Body Report, WT/DS217/AB/R, WT/DS234/AB/R, DSR 2003:I and DSR 2003:II
US – Offset Act (Byrd Amendment) (Article 21.3)	*United States – Continued Dumping and Subsidy Offset Act of 2000 – Arbitration under Article 21.3(c) of the DSU* Award of the Arbitrator, WT/DS217/14, WT/DS234/22, 13 June 2003, DSR 2003:III
US – Offset Act (Byrd Amendment) (Brazil) (Article 22.6 – US)	*United States – Continued Dumping and Subsidy Offset Act of 2000, Original Complaint by Brazil – Recourse to Arbitration by the United States under Article 22.6 of the DSU* Decision by the Arbitrator, WT/DS217/ARB/BRA, 31 August 2004
US – Offset Act (Byrd Amendment) (Canada) (Article 22.6 – US)	*United States – Continued Dumping and Subsidy Offset Act of 2000, Original Complaint by Canada – Recourse to Arbitration by the United States under Article 22.6 of the DSU* Decision by the Arbitrator, WT/DS234/ARB/CAN, 31 August 2004
US – Offset Act (Byrd Amendment) (Chile) (Article 22.6 – US)	*United States – Continued Dumping and Subsidy Offset Act of 2000, Original Complaint by Chile – Recourse to Arbitration by the United States under Article 22.6 of the DSU* Decision by the Arbitrator, WT/DS217/ARB/CHL, 31 August 2004

US – Offset Act (Byrd Amendment) (EC) (Article 22.6 – US)	*United States – Continued Dumping and Subsidy Offset Act of 2000, Original Complaint by the European Communities – Recourse to Arbitration by the United States under Article 22.6 of the DSU* Decision by the Arbitrator, WT/DS217/ARB/EEC, 31 August 2004

multiple findings **AG** 93
"pertinent issues", unforeseen developments **AG** 101
"publish"/"make publicly available", equivalence **AG** 98
timing of report, relevance **AG** 103
publication of measures such as laws, decrees or ordinances (transparency of SPS Regulations (Annex B) (para. 1, footnote 5)) **SPS** 225
legal instruments as "measure" **DSU** 173

quantitative restrictions (ATC 2) (integration process)
administrative arrangements, agreement on (ATC 2.17), new restrictions (ATC 2.4) and **ATC** 21
conformity with ATC provisions, need for (ATC 2.4) **GATT** 725, **ATC** 9
administrative arrangements (2.17) and **ATC** 21
"new" restriction **ATC** 8
transitional safeguards (ATC 6) and **ATC** 114–15
"ex-positions" (ATC 2.6) **ATC** 10–13
Colombia **ATC** 10–11
growth-on-growth provisions (ATC 2.13 and 2.14) **ATC** 17–20
improvements in access (ATC 2.18) **ATC** 23
integration provisions (ATC 1.5) **ATC** 5
late notifications (ATC 2.7(b)) **ATC** 14
new restraints not requiring notification, possibility of **ATC** 6
notifications (ATC 2.8(a) and 2.11) **ATC** 15
regional trade agreements (GATT XXIV) as exception/defence **GATT** 687 n. 971, 720, 725
quantitative restrictions (ATC 3)
administration of restrictions (ATC 4)
changes, requirements (ATC 4.2) **ATC** 29
mutually acceptable solution (ATC 4.4) **ATC** 29
Decision on Implementation-Related Issues and Concerns (para. 4) **WTO** p 81
elimination (ATC 2.1) **GATT** 395
phase-out programme (ATC 3.2(b)) **ATC** 27–8
"restrictions" (ATC 3.1) **ATC** 26
restrictions not covered by ATC 2 (ATC 3.1) **ATC** 25
quantitative restrictions, elimination (GATT XI): *see also* balance of payments difficulties, developing country Members' right to take import measures (GATT XVIII:B); non-discriminatory administration of quantitative restrictions (GATT XIII)
Agriculture Agreement and **GATT** 395
burden of proof **GATT** 396
customs unions (GATT XXIV:5(a)) as defence/exception **GATT** 687–9
GATT VI and **GATT** 420
GATT practice **GATT** 397, 413, 424
GATT preference for tariffs and **GATT** 395
as importation measure **GATT** 295–6
GATT practice **GATT** 297
national treatment (GATT III) and **GATT** 108, 112, 293–6, 401–3, 417–19
notification obligations and procedures **GATT** 414
"prohibition or restriction" (GATT XI:1) **GATT** 400–3
bonding requirements **GATT** 410, 416
causal link, need for **GATT** 406
complete ban **GATT** 398
de facto restrictions **GATT** 404, 406
equality of competitive conditions as test **GATT** 406
evidence of, trade effects **GATT** 406
licensing requirements **GATT** 411–12
obligation to prevent breach by third party, whether **GATT** 405
presence of private parties during customs process **GATT** 404, 406
private action, relevance **GATT** 405
"restrictions made effective through state-trading organizations" (Ad Articles XI, XI, XIII, XIV and XVIII) **GATT** 407–9, 423, 453
trade balancing condition **GATT** 399

regional trade agreements (GATT XI) as defence/exception **GATT** 687–9, 709
Safeguards Agreement and **GATT** 395
SPS Agreement and **GATT** 425
quota modulation (SG 5.2(b)) **AG** 80, 229

reasoned and adequate explanation, need for (SG 3.1) **AG** 204–5
application of safeguard measures (SG 5.1) and **AG** 95
"as a result of unforeseen developments" (GATT XIX:1(a)) **GATT** 526–8, 537, 540, **AG** 72, 77, 97, 107
"demonstration", need for **GATT** 533–6, 538–9
causation (SG 2.1/SG 4.2(b)) **GATT** 527, **AG** 45, 68–72, 74–7, 93, 97, 170, 177, 184, 204–5
non-compliance with SG 3.1 as violation of SG 2.1/SG 4 **AG** 97
confidential information (SG 3.2) and **DSU** 110
panel's obligation to confirm **GATT** 526–8, 537, 540, **AG** 45, 72, 93, 107, 145–9, 170, **DSU** 381–90
publication as authorities' obligation **GATT** 540
timing of report, relevance **AG** 103
segmented domestic injury, in case of (SG 4.2(a)) **AG** 164–5

Index by Case

Argentina – Ceramic Tiles (Panel), WT/DS189/R, DSR 2001:XII
- Anti-Dumping Agreement (AD), preparatory work (VCLT 32), evidentiary rules (investigation of dumping) (AD 6), notification to all interested parties of essential facts under consideration (AD 6.9), choice of means **AD** 426
- anti-dumping duties, imposition and collection (AD 9), calculation of "all other" anti-dumping duty rate (AD 9.4), limitation of sample (AD 6.10) and **AD** 436
- determination of dumping (AD 2)
  - fair comparison of export price and normal value (AD 2.4)
    - determination of individual margins (AD 6.10) distinguished **AD** 437 n. 573, 443
    - "due allowance", "in each case, on its merits" **AD** 56
- evidentiary rules (investigation of dumping) (AD 6)
  - accuracy of information, authorities' obligation to satisfy themselves (AD 6.6), as responsibility of authorities **AD** 367
  - confidential information (AD 6.5)
    - non-confidential summaries (AD 6.5.1)
    - as balance between protection of confidentiality and need to ensure opportunity to defend interests **AD** 416, 424
    - purpose **AD** 358
    - public notice of determinations (AD 12) and **AD** 417, 449
    - right to rely on **AD** 416–18, 570
    - unwarranted request for confidentiality, right to disregard information (AD 6.5.2) **AD** 416 553
  - determination of individual margins of dumping (AD 6.10)
    - individual margin for each known exporter or producer **AD** 437
    - exporter or producer not originally selected (AD 6.10.2) **AD** 437
  - facts available to investigating authority, right of resort to (AD 6.8/Annex II)
    - failure to submit necessary information "in timely fashion" (Annex II, para. 3) and, interpretation in light of AD 6.1.1, 6.8/Annex II, para. 1 **AD** 423
    - reasons for disregarding information, need for **AD** 414
    - resort to, requirements **AD** 385
    - specification "in detail" (Annex II, para. 1) **AD** 384
  - "notice of the information . . . and ample opportunity to present in writing all evidence" (AD 6.1), clear request for information, need for **AD** 308, 332, 384, 423
  - notification to all interested parties of essential facts under consideration (AD 6.9), choice of means at Member's discretion **AD** 426
  - on-the-spot verification (AD 6.7), as option **AD** 367 n. 464, 369, 689
- implementation of recommendations and rulings of the DSB (DSU 21), prompt compliance (DSU 21.1), judicial economy and **DSU** 1040
- interpretation of covered agreements, guidelines, effectiveness principle (*ut res magis valeat quam pereat/effet utile*), meaning to be attributed to every word and phrase **AD** 416
- judicial economy, discretionary nature, precise recommendations and rulings by DSB and **DSU** 1040
- nullification or impairment (DSU 3.8), adverse impact/prejudice, relevance **DSU** 98
- public notice and explanation of determinations (AD 12), confidentiality of information (AD 6.5) and **AD** 417, 449
- relationships within and between agreements
  - AD 2.4/AD 6.10 **AD** 437 n. 573, 443
  - AD 6.1.1/AD 6.8 **AD** 332
  - AD 6.5/AD 12 **AD** 570
  - AD 6.5/other AD 6 paragraphs **AD** 364
  - AD 6.8/AD 3 **AD** 418
  - AD 6.8/AD 12 **AD** 417, 449
  - AD 6.10/AD 9.4 **AD** 436, 437, 478
- request for establishment of panel, requirements (DSU 6.2), identification of specific measures at issue **DSU** 98
- standard/powers of review (panel) (AD 17.6), investigating authorities' establishment of the facts (AD 17.6(i)), evaluation as at time of determination **AD** 638

Argentina – Footwear (EC) (AB), WT/DS121/AB/R, DSR 2000:I
- Agreement on Safeguards, as integral part of WTO Agreement **WTO** 13

standard/powers of review (panel) (DSU 11)
applicability to Safeguards Agreement **AG** 145
reasoned and adequate explanation (SG 3.1), need to confirm **AG** 145, **DSU** 381
terms of reference of panels (DSU 7), identification of specific measures at issue, amendment of measures following establishment of panel **DSU** 269–70
transitional safeguards (ATC 6), relevant factors (ATC 6.3), obligation to examine all **AG** 142

Argentina – Hides and Leather dispute, WT/DS155, DSR 2001:II, arbitration (DSU 22.6), timing in relation to Article 21.5 arbitration ("sequencing"), ad hoc procedural agreements, recourse to Article 21.5 before Article 22 **DSU** 628

Argentina – Hides and Leather (Panel), WT/DS155/R and Corr.1, DSR 2001:II
Appellate Body (AB) (DSU 17), reports, as clarification **GATT** 154
General Exceptions (GATT XX), measures necessary to secure compliance with GATT-consistent measure (GATT XX(d)), "necessary" **GATT** 618
interpretation of covered agreements, means, same or closely related phrases in same agreement, GATT VII:2(b)/GATT X:3(a) **GATT** 381
"like product" (GATT III:2 and III:4)
hypothetical "like product" **GATT** 165
relevant factors
differences between sellers **GATT** 181
nationality of producer or origin of product **GATT** 250
national treatment, general principle (GATT III:1)
applicability, measures imposed at the time or point of importation ("internal measures") (GATT Ad Art. III), imposition on like domestic product requirement **GATT** 123–4
"so as to afford protection", equality of competitive relationship **GATT** 119
national treatment, tax discrimination (GATT III:2)
"charge of any kind" **GATT** 173
determination of violation, requirements
aims and effects test/policy purpose **GATT** 129, 185

duration of tax differential, relevance **GATT** 180
economic impact **GATT** 119, 176
"directly or indirectly" **GATT** 188
methodology of comparison, individual transactions basis **GATT** 176–7, 210, 218
"so as to afford protection"
as application of general principle (GATT III:1) **GATT** 154
design and structure of measure as evidence of protective application **GATT** 165
non-discriminatory administration of quantitative restrictions (GATT XIII)
publication and administration of trade regulations (GATT X:3(a)) **GATT** 380–3
"reasonable" (risk of disclosure of confidential information) **GATT** 383
publication and administration of trade regulations (GATT X)
measures of general application (GATT X:1) **GATT** 376
relationship with other GATT provisions **GATT** 387
substantive content distinguished **GATT** 387 n. 585
uniform, impartial and reasonable administration (GATT X:3(a)) **GATT** 376
applicability to individual traders **GATT** 380
discrimination between Members, relevance **GATT** 375, 389
"impartial" (presence of private parties during customs process) **GATT** 382, **DSU** 202
as procedural requirement **GATT** 376
"uniform" **GATT** 381
quantitative restrictions, elimination (GATT XI)
"prohibition or restriction" (GATT XI:1)
causal link, need for **GATT** 406
de facto restrictions **GATT** 404, 406
equality of competitive conditions as test **GATT** 406
evidence of, trade effects **GATT** 406
presence of private parties during customs process **GATT** 404, 406
private action, relevance **GATT** 405
relationships within and between agreements, GATT /GATT as a whole **GATT** 375

Argentina – Hides and Leather (Article 21.3), WT/DS155/10, DSR 2001:XII
implementation of recommendations and rulings of the DSB (DSU 21)
impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau), "reasonable period", economic and social conditions, relevance **DSU** 538, 582, 585
prompt compliance (DSU 21.1)
"compliance" **DSU** 537–8
modification of underlying economic or social conditions distinguished **DSU** 538
interpretation of covered agreements, specific terms and phrases, "compliance" (DSU 21.1) **DSU** 537–8

Argentina – Poultry Anti-Dumping Duties (Panel), WT/DS241/R, DSR 2003:V)
anti-dumping duties, imposition and collection (AD 9)
"appropriate" amounts (AD 9.2) **AD** 460
assessment (AD 9.3)
retrospective assessment (AD 9.3.1) **AD** 465
variable duties, possibility of **AD** 464–5
confidentiality of proceedings (DSU 14/DSU 17.10/DSU 18.2/WP 3)
"submissions" and statements of own position distinguished **DSU** 482
time limits for non-disclosure **DSU** 483
data collection, period for (AD 2 and AD 3)
use of different periods
dumping/injury determinations **AD** 104
injury factors **AD** 103
determination of dumping (AD 2)
calculation of dumping margins (AD 2.4), comparison of weighted average normal value with weighted average of *all* comparable export transactions (AD 2.4.2), "comparable" **AD** 251–2
"normal value" **AD** 82–3
determination of injury (AD 3)
evaluation of injury factors (AD 3.4), "objective examination" requirement (AD 3.1) and **AD** 118
"positive evidence" / "objective examination" requirement (AD 3.1)
"objective examination", "consequent impact" (AD 3.1(b)) **AD** 118
use of different periods for data collection and **AD** 103
for dumping and injury investigations **AD** 104
"domestic industry" (AD 4)
"a major proportion of the total domestic production" (AD 4.1) **AD** 226
interpretation in accordance with AD 4.1, obligation **AD** 228
estoppel, panel competence, related proceedings in another forum and **DSU** 79, 248, 948
evidentiary rules (investigation of dumping) (AD 6)
determination of individual margins of dumping (AD 6.10), procedural nature **AD** 438
facts available to investigating authority, right of resort to (AD 6.8/Annex II), "information appropriately submitted so that it can be used . . . *without undue difficulties*" (Annex II(3)) **AD** 396
"notice of the information . . . and ample opportunity to present in writing all evidence" (AD 6.1)
access to information provided by another interested party (AD 6.1.1/AD 6.1.2), "interested parties *participating in the investigation*" **AD** 323
"questionnaires" (AD 6.1.1), failure to send, relevance **AD** 316
notification to all interested parties of essential facts under consideration (AD 6.9), "*essential* facts" **AD** 427–8
implementation of panel or AB recommendations (DSU 19.1), right of panel or AB to make suggestions **DSU** 513
interpretation of covered agreements
applicable law, customary rules of interpretation of public international law [as codified in the Vienna Convention on the Law of Treaties (1969)], treaty application and treaty interpretation distinguished **DSU** 23
specific terms and phrases, "comparable" (AD 2.4.2) **AD** 251–2
investigation of dumping (AD 5)/subsidy (SCM 11)
evidence, sufficiency (AD 5.2)
evidence of causal link (AD 5.2(iv)), evidence for purposes of preliminary or final determination distinguished **AD** 248 n. 317
evidence of dumping **AD** 250
evidence, sufficiency, investigating authority's obligation to examine accuracy and adequacy (AD 5.3), AD 2.4 compared **AD** 251–2
evidence, sufficiency, simultaneous consideration of evidence of dumping and injury (AD 5.7), initiation of investigation in absence of sufficient evidence (AD 5.3) and **AD** 282
MERCOSUR ad hoc Arbitral Tribunal, proceedings before as impediment (estoppel) to DSU proceedings **DSU** 79, 248, 948
MERCOSUR ad hoc Arbitral Tribunal, relevance of decisions in DSU proceedings **DSU** 23
preliminary rulings on
confidentiality issues **DSU** 966
double fora **DSU** 948
public notice of initiation of investigation (AD 12.1)
"interested parties", obligation to in absence of contact details **AD** 550
notification and public notice distinguished **AD** 549

burden of proof, SCM 4.11 and **DSU** 692

timing in relation to Article 21.5 arbitration **DSU** 643
working procedures **DSU** 893
late submission of evidence **DSU** 894
opportunity to comment, need for **DSU** 894
new argumentation, cut-off date **DSU** 895
burden of proof
arbitration (DSU 22.6) **DSU** 692
countermeasures (SCM 4.10), applicability to Article 22.6 arbitration (SCM 4.11) **DSU** 692
confidentiality of proceedings (DSU 14/DSU 17.10/DSU 18.2/WP 3), non-confidential summary of arbitrator's report (Article 22.6 proceedings) **DSU** 896
countermeasures in case of failure to comply with panel or AB report within specified time-period (SCM 4.10), inducement of compliance as objective **DSU** 648
due process (dispute settlement proceedings)
late submission of evidence **DSU** 894
new argumentation, cut-off date **DSU** 895
nature and purpose of counter measures **DSU** 648
"or other obligations", authorization to suspend (DSU 22.2) **DSU** 668
relationships within and between agreements, DSU 22.6/SCM 4.10 and 4.11 **DSU** 692
suspension of concessions for non-implementation of DSB recommendations and rulings (DSU 22)
agreement to **DSU** 668, 758
level equivalent to nullification or impairment (DSU 22.4), reasoned estimates, need for **DSU** 714
"or other obligations", authorization to suspend (DSU 22.2), obligations under LIC **DSU** 668, 758
termination of treaty for breach (VCLT 60), rights created prior to, effect on (VCLT 70) **DSU** 643, 703

Canada – Autos (AB), WT/DS139/AB/R, WT/DS142/AB/R, DSR 2000:VI and DSR 2000:VII
export subsidy, prohibited (SCM, Part II)
"contingent . . . upon the use of domestic over imported goods" (SCM 3.1(b)), "contingent in fact", applicability to **SCM** 129–31
"contingent in law . . ." (SCM 3.1(a)) **SCM** 90–1, 93
GATS Agreement
"affecting" (GATS I:1), wholesale trade service suppliers in their capacity as service suppliers, need to examine **GATS** 7, 23
GATT 1994, overlap **GATT** 313
"measures affecting trade in services" (GATS I:1), "affecting" **GATS** 6–7, 23
GATt , object and purpose (GATT I:1), non-discrimination **GATT** 4, 22
interpretation of covered agreements
guidelines, object and purpose, GATT I:1 **GATT** 8, 22
means, same or closely related phrases in same agreement, SPS 3.1(a)/SPS 3.1(b) **SCM** 1230–1
ordinary meaning
"contingent" (SCM 3.1) **SCM** 129–30
"contingent upon the use of domestic over imported goods" (SCM 3.1(b)) **SCM** 131
judicial economy
explicit reference to, relevance **DSU** 1037
"positive solution to dispute" requirement (DSU 3.7) and **DSU** 1037
MFN treatment (GATS II), determination of violation, requirements, analysis of evidence **GATS** 23
MFN treatment (GATT I:1)
"accorded immediately and unconditionally to the like product", affiliation with designated local manufacturer/importer requirement and **GATT** 19–20
"advantage", "*any* advantage . . . granted . . . to *any* product" **GATT** 12
"*all* other contracting parties", regional trade agreements (GATT XXIV:5) and **GATT** 66
de facto discrimination **GATT** 10
relationships within and between agreements
GATS I:1/GATS II/XVII **GATS** 6, 22, 6, 22
GATT I/GATT XXIV **GATT** 66
subsidy, definition (SCM 1), financial contribution (SCM 1.1(a)(1)), exemption from or remission of internal taxes upon exportation (SCM 1.1(a)(1)(ii), footnote 1) **SCM** 27

Canada – Autos (Panel), WT/DS139/R, WT/DS142/R, DSR 2000:VI and DSR 2000:VII
customs unions (GATT XXIV:5(a)), as defence or exception, economic test **GATT** 696
due process (dispute settlement proceedings)
new argumentation, cut-off date **DSU** 227
opportunity to respond to evidence/presentations of other parties **DSU** 227
prejudice to party, relevance **DSU** 227
economic integration (GATS V)
regional trade agreements, notification, national treatment (GATS V:1(b))/MFN treatment (GATS II), applicability **GATS** 41
"substantially all discrimination" (GATS V:1(b)) **GATS** 41
export subsidy, prohibited (SCM, Part II), "contingent . . . upon the use of domestic over imported goods" (SCM 3.1(b)), "contingent in fact", applicability to **SCM** 130
GATS Agreement, "measures affecting trade in services" (GATS I:1), "affecting" **GATS** 6
GATT 1994, object and purpose (GATT I:1), non-discrimination **GATT** 22
interpretation of covered agreements
guidelines, object and purpose **GATT** 22
means, same or closely related phrases in same agreement, SPS 3.1(a)/SPS 3.1(b) **SCM** 130
MFN treatment (GATS II)
"like service and service supplier" (GATS II:1), wholesale transactions **GATS** 27
vertical integration/exclusive distribution arrangements, effect **GATS** 25
MFN treatment (GATT I:1)
"accorded immediately and unconditionally to the like product", conditional advantage and "advantage accorded unconditionally" distinguished **GATT** 21
"all other contracting parties", regional trade agreements (GATT XXIV:5) and **GATT** 22, 27, 66
national treatment, regulatory discrimination (GATT III:4)
"affecting" **GATT** 260
actual impact, relevance **GATT** 260
"requirements"
local content requirement **GATT** 261
non-mandatory measures **GATT** 253, 255
private contractual arrangements, relevance **GATT** 255
ratio requirement (net sales value of locally-produced product/locally sold product) **GATT** 261
TRIMs and **GATT** 308, **TRIMs** 31–4
national treatment, services and service suppliers (GATS XVII), foreign character of services (SG XVII, footnote 10), relevance **GATS** 77
relationships within and between agreements
GATS XVII/SCM 3.1(a) **SCM** 125
GATT I/GATT XXIV **GATT** 66
GATT III:4/SCM 3.1(a) **SCM** 125
GATT III:4/TRIMs 2 **GATT** 308
request for establishment of panel, requirements (DSU 6.2)
identification of specific measures at issue, government action, limitation to **DSU** 201
legal basis of claim, arguments distinguished **DSU** 227

Canada – Autos (Article 21.3), WT/DS139/12, WT/DS142/12, DSR 2000:X, implementation of recommendations and rulings of the DSB (DSU 21), impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau), "reasonable period", coordination with other changes, relevance **DSU** 591

Canada – Dairy dispute (WT/DS103, WT/DS113)
arbitration (DSU 22.6), timing in relation to Article 21.5 arbitration ("sequencing"), ad hoc procedural agreements, simultaneous recourse to Article 21.5 and Article 22 **DSU** 629
implementation of recommendations and rulings of the DSB (DSU 21), impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau), "reasonable period", amendment **DSU** 563
review of implementation of DSB rulings (DSU 21.5), ad hoc procedural agreements, compliance with deadlines **DSU** 640

Canada – Dairy (AB), WT/DS103/AB/R and Corr.1, WT/DS113/AB/R and Corr.1, DSR 1999:V and DSR 1999:VI
interpretation of covered agreements
guidelines, effectiveness principle (*ut res magis valeat quam pereat/effet utile*), meaning to be attributed to every word and phrase **DSU** 57
means
dictionaries **AG** 57, 58
same or closely related phrases in same agreement, AG 9.1(a)/AG 9.1(c) **AG** 58–60
supplementary means (VCLT 32), in case of ambiguity **DSU** 34
ordinary meaning, "payments" **AG** 60–1
specific terms and phrases
"government" (AG 9.1(a)) **AG** 57
"government agency" (AG 9.1(a)) **AG** 57
payments on export of agricultural product financed by virtue of governmental action (AG 9.1(c))
"financed", "whether or not a charge on the public account" **AG** 58
"payments"
payment-in-kind as **AG** 58–61
transfer of economic resources, need for **AG** 58
Schedules of Concessions (GATT II)
"subject to the terms, conditions or qualifications in the schedule" (GATT II:1(b))
description distinguished **GATT** 86
price ceiling not included in Schedule **GATT** 87
subsidy, definition (SCM 1)
Agreement on Agriculture, applicability to **AG** 6
financial contribution (SCM 1.1(a)(1)), transfer of economic resources from grantor to recipient for less than full consideration **AG** 56
Canada – Dairy (Panel), WT/DS103/R, WT/DS113/R, DSR 1999:V and DSR 1999:VI
Import Licensing Procedures Agreement (LIC), non-automatic import licensing (LIC 3), GATT II(1)(b) and **LIC** 33
relationships within and between agreements, GATT II:1(b)/LIC 3 **GATT** 115, **LIC** 33
Schedules of Concessions (GATT II)
"subject to the terms, conditions or qualifications in the schedule" (GATT II:1(b))
description distinguished **GATT** 86
"subject to" **GATT** 86
subsidy, definition (SCM 1), "direct subsidies, including payments-in-kind" (AG 9.1(a)), payment-in-kind, as direct subsidy **AG** 56
Canada – Dairy (Article 21.5 – New Zealand and US) (AB), WT/DS103/AB/RW, WT/DS113/AB/RW, DSR 2001:XIII
export subsidy commitments, prevention of circumvention (AG 10.1), export subsidy, prohibited (SCM 1.1 and 3.1) and **SCM** 127
interpretation of covered agreements, means, same or closely related phrases in same agreement, AG 9.1(a) and (b)/AG 9.1(c) **AG** 62
payments on export of agricultural product financed by virtue of governmental action (AG 9.1(c))
benchmark/standard (AG 9.1(c))
absence of express provision, relevance **AG** 62
domestic price fixed by government **AG** 63
factual and regulatory setting, relevance **AG** 62–3
industry-wide production costs **AG** 65–7
market rate, relevance, world market price **AG** 64
objective standard, need for **AG** 64
"by virtue of" **AG** 69, 71–3
nexus, need for **AG** 71–2
"financed" **AG** 69
"whether or not a charge on the public account" **AG** 69
"government action" **AG** 68
government mandate or direction, relevance, AG 9.1(e), SCM 1.1 and SCM Illustrative List of Export Subsidies distinguished **SCM** 428
payments by private parties as **AG** 72
relationships within and between agreements, AG 9.1 and 10.1/SCM 3.1 **SCM** 127, 424
Canada – Dairy (Article 21.5 – New Zealand and US) (Panel), WT/DS103/RW, WT/DS113/RW, DSR 2001:XIII
export subsidy commitments, prevention of circumvention (AG 10.1), export subsidy, prohibited (SCM 1.1 and 3.1) and **SCM** 126
payments on export of agricultural product financed by virtue of governmental action (AG 9.1(c))
"by virtue of" **AG** 70
"but for" test **AG** 70
preliminary rulings on, third party rights **DSU** 963–4
relationships within and between agreements
GATT II:1(b)/LIC 3 **LIC** 33
SCM 3.1/SCM 4.7 **SCM** 113
review of implementation of DSB rulings (DSU 21.5), third party rights (DSU 10), right to receive submissions to first meeting of the panel, limitation to (DSU 10.3) **DSU** 619, 963–4
"withdrawal of subsidy without delay" (SCM 4.7), agricultural subsidies, applicability to **SCM** 113, 128
Canada – Dairy (Article 21.5 – New Zealand and US II) (AB), WT/DS103/AB/RW2, WT/DS113/AB/RW2, DSR 2003:I
burden of proof, reversal in respect of circumvention of export subsidy commitments (AG 10.3) **AG** 88–9
costs of marketing exports (AG 9.1(d)), general business costs distinguished **AG** 77
payments on export of agricultural product financed by virtue of governmental action (AG 9.1(c))
"by virtue of" **AG** 69, 74–7
"financed" **AG** 74–6
"whether or not a charge on the public account" **AG** 74
Canada – FIRA (GATT Panel), BISD 30S/140
national treatment, general principle (GATT III:1), applicability, measures imposed at the time or point of importation ("internal measures") (GATT Ad Art. III), quantitative restrictions (GATT XI) distinguished **GATT** 295, 419
national treatment, regulatory discrimination (GATT III:4), "requirements", private contractual arrangements, relevance **GATT** 18 n. 20, 255
quantitative restrictions, elimination (GATT XI)
GATT III, and **GATT** 295
as importation measure **GATT** 295
Canada – Patent Term (AB), WT/DS170/AB/R, DSR 2000:X and DSR 2000:XI
intellectual property rights (TRIPS)
*acquis*ition and maintenance of intellectual property rights (TRIPS 62), unwarranted curtailment, prohibition (TRIPS 62.2), term of protection (TRIPS 33) as distinct and cumulative provision **TRIPS** 133
existing subject matter, applicability to (TRIPS 70)
"acts which occurred before date" (TRIPS 70.1) and "existing at the date" (TRIPS 70.2) distinguished **TRIPS** 155, 159, **DSU** 67
"acts" (TRIPS 70.1) **TRIPS** 156–8, **DSU** 67
"subject matter" (TRIPS 70.2) **TRIPS** 159
term of protection (TRIPS 33) and **TRIPS** 165
interpretation of covered agreements
ordinary meaning
"acts" (TRIPS 70.1) **TRIPS** 156–8, **DSU** 67
"filing date" (TRIPS 33) **TRIPS** 117
non-retroactivity of treaties (VCLT 28)
in absence of different intention **DSU** 67
continuing measures **DSU** 67
patents (TRIPS, Section 5)
patentable subject matter (TRIPS 27), as context for interpretation of TRIPS 70 (protection of existing subject matter) **TRIPS** 159
term of protection (TRIPS 33)
"available" **TRIPS** 118
"effectiveness", relevance **TRIPS** 119
"existing subject matter" (TRIPS 70.2) and **TRIPS** 165
freedom to choose method of implementation (TRIPS 1.1) and, "filing date" **TRIPS** 117
unwarranted curtailment, prohibition (TRIPS 62.2) as distinct and cumulative provision **TRIPS** 133
relationships within and between agreements
TRIPS 33/TRIPS 70 **DSU** 918
TRIPS 33/TRIPS 70.2 **TRIPS** 165
retroactivity (TRIPS 70.1) **TRIPS** 155, **DSU** 67

TRIPS Agreement
interpretation of covered agreements, means, object and purpose (TRIPS 7) **TRIPS** 158
transitional arrangements (TRIPS 65), procedural nature **TRIPS** 140
Working Procedures (appellate review (DSU 17.9 and ABWP)), written responses (ABWP 28) **DSU** 885

Canada – Patent Term (Panel), WT/DS170/R, DSR 2000:X and DSR 2000:XI
consultations (DSU 4), acceleration (DSU 4.9), Panel's workload and **DSU** 142
fair and equitable procedures (TRIPS 42)
requirement (TRIPS 41.2) **TRIPS** 122
"right holders" **TRIPS** 122
intellectual property rights (TRIPS), *acquis*ition and maintenance (TRIPS 62), unwarranted curtailment, prohibition (TRIPS 62.2), term of protection (TRIPS 33) as distinct and cumulative provision **TRIPS** 3
patents (TRIPS, Section 5)
patentable subject matter (TRIPS 27), "discrimination" (TRIPS 27.1), necessary elements **TRIPS** 92
term of protection (TRIPS 33)
freedom to choose method of implementation (TRIPS 1.1) and **TRIPS** 3
"filing date" **TRIPS** 117
unwarranted curtailment, prohibition (TRIPS 62.2) as distinct and cumulative provision **TRIPS** 3
TRIPS Agreement
obligations (TRIPS 1), implementation, freedom to choose method (TRIPS 1.1) **TRIPS** 3
protection of existing subject matter (TRIPS 70), freedom to choose method of implementation (TRIPS 1.1) and **TRIPS** 3

Canada – Periodicals (AB), WT/DS31/AB/R, DSR 1997:I
decisions, procedures and customary practices under GATT 1947 (WTO XVI:1), panel reports (unappealed) **WTO** 223
directly competitive or substitutable products (GATT III:2), as dynamic relationship (including possibility of latent demand) **GATT** 204
GATS Agreement, GATT 1994, overlap **GATT** 311, **GATS** 18–19
interpretation of covered agreements
guidelines, object and purpose **GATT** 281
means, preparatory work (VCLT 32), GATT III **GATT** 281
"like product" (GATT III:2 and III:4)
determination of "likeness"
on case by case basis **GATT** 167, **DSU** 446
as legal issue **DSU** 446
relevant factors
consumer preferences **GATT** 163, 167
end-uses **GATT** 163
physical properties **GATT** 163, 167

text/plain language (VCLT 31(2)) **AG** 19
means
"any subsequent practice . . . which establishes the agreement of the parties regarding its interpretation" (VCLT 31(1)(b)) **AG** 23
practice of Members, need for discernible pattern **DSU** 31
scheduling practice **AG** 25
preparatory work (VCLT 32), AG 4.2 **AG** 19
same or closely related phrases in same agreement, AG 4.2/AG 5 **AG** 21–2
specific terms and phrases
"any measures of the kind" (AG 4.2 and footnote 1)
"converted into" **AG** 20, 24
"have been converted" **AG** 21
"have been required to be converted" **AG** 21
"include" (AG 4.2, footnote 1) **AG** 20
"minimum import price" (AG 4.2, footnote 1) **AG** 35
"similar", as comparative concept **AG** 37
"*similar* border measures" (AD 4.2, footnote 1) **AG** 36–40
"*variable* import levy" (AD 4.2, footnote 1) **AG** 33–4
tariff cap, relevance **AG** 38–9
market access (AG 4)
"have been required to be converted" (AG 4.2) **AG** 19
measures required to be converted into ordinary customs duties (AG 4.2 and footnote 1)
border measures
distorting effect **AG** 40
ordinary customs duties extinguished **AG** 40
failure to convert by due date, effect **AG** 19
interpretation, subsequent practice (VCLT 32(3)(b)) **AG** 23, **DSU** 31
measure and result of measure distinguished **AG** 29
special safeguards (AG 5.1) and **AG** 21–2
timing of obligation **AG** 19, 30
object and purpose **AG** 16
notice of appeal, requirements (ABWP 20(2)), statement of allegation of error on issues of law/legal interpretations (ABWP 20(2)(d)), legal argument in support of claim distinguished **DSU** 860
relationships within and between agreements
AG 4.2
footnote 1 **AG** 20, 41
Guidelines for the Calculation of Tariff Equivalents **AG** 39
AG 4.2/GATT II:2 **GATT** 114
AG 4.2/GATT Annex 5 **AG** 28
AG 4.2/GATT II:1(b) **AG** 42, **DSU** 909
AG 4.2/GATT II:2 **AG** 28
request for establishment of panel, requirements (DSU 6.2)
implied claims, exclusion **DSU** 287
"present the problem clearly", due process considerations **DSU** 233
Schedules of Concessions (GATT II)
ordinary customs duties *in excess of* those provided for in Schedule (GATT II:1(b))
customs duties based on exogenous factors **AG** 26
"ordinary customs duties" **GATT** 97, **DSU** 61
standard/powers of review (AB) (issues of law and legal interpretations) (DSU 17.6)
classification as issue of law or fact, panel's classification of measure, relevance **DSU** 454
"objective assessment of the facts", evidence, alleged disregard or distortion by panel, discretion in assessment of evidence **DSU** 454

standard/powers of review (panel) (DSU 11)
"objective assessment of matter before it"
due process and **DSU** 335, 930
ultra petita finding on provision not before it **DSU** 331, 930
terms of reference of panels (DSU 7)
as definition of jurisdiction/legal claims at issue, legal claim included in terms of reference, limitation of jurisdiction to **DSU** 287
identification of specific measures at issue, amendment of measures following establishment of panel **DSU** 271–2, 926

Chile – Price Band System (Panel), WT/DS207/R, DSR 2002:VIII
consultations (DSU 4), measure at issue (DSU 4.4), measure subsequent to request for consultations, extension of existing measure distinguished **DSU** 133
consultations (SCM 4.1–4), notification of request for (DSU 4.4), identification of measure at issue, need for **DSU** 133
implementation of panel or AB recommendations (DSU 19.1)
measure terminated in course of proceedings/no longer in existence **DSU** 497, 499
right of panel or AB not to make suggestions **DSU** 522
interpretation of covered agreements
guidelines, multiple authentic languages (VCLT 33), meaning which best reconciles texts (VCLT 33(4)) **DSU** 61
means, dictionaries **AG** 98, **DSU** 61
publication of findings and reasoned conclusions on all pertinent issues of fact and law, authorities' obligation (SG 3.1) **GATT** 533
"publish"/"make publicly available", equivalence **AG** 98
reasoned and adequate explanation, need for (SG 3.1), "as a result of unforeseen developments" (GATT XIX:1(a)), "demonstration", need for **GATT** 533
safeguard measures (SG/GATT XIX)
conditions (SG 2)
"as a result of unforeseen developments" (GATT XIX:1(a))
"as a pertinent issue of fact and law" /publication (SG 3.1) **GATT** 533
"demonstration", need for **GATT** 533
duration and review (SG 7), extension of measure (SG 7.1), whether distinct measure **DSU** 133

Chile – Price Band System (Article 21.3), WT/DS207/13, DSR 2003:III
developing countries, implementation of DSB recommendations and rulings (DSU 21.2) **DSU** 546
implementation of recommendations and rulings of the DSB (DSU 21)
choice of means at Member's discretion (DSU 21.3) **DSU** 551
impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau)
"reasonable period"
complexity of implementation process, effect on society and **DSU** 576
developing country Members and (DSU 21.2) **DSU** 548
mandate of arbitrator, limitation to determination of reasonable period of time for implementation (DSU 21.3(c)) **DSU** 551

EC – Asbestos (AB), WT/DS135/AB/R, DSR 2001:VII and DSR 2001:VIII
amicus curiae briefs
additional procedures **DSU** 979, 1048, 1050
preliminary ruling on **DSU** 1050
Appellate Body (AB) (DSU 17)
reports
anonymity (DSU 17.11), concurring opinions (ABWP 3.2) **DSU** 477
extension of deadline for circulation (DSU 17.5) **DSU** 444
burden of proof
national treatment, regulatory discrimination (GATT III:4) **GATT** 201
onus probandi actori incumbit **GATT** 653–4
confidentiality of proceedings (DSU 14/DSU 17.10/DSU 18.2/WP 3), anonymity of individual AB members **DSU** 477
directly competitive or substitutable products (GATT III:2), as dynamic relationship (including possibility of latent demand) **GATT** 117, 246
evidence (GATT XX: justification)
scientific evidence, evaluation **GATT** 609–12
scientific sources representing divergent opinion **GATT** 610
General Exceptions (GATT XX), alternative WTO-consistent measure, availability **GATT** 613–15, 624
General Exceptions (GATT XX), measures necessary to protect human, animal or plant life or health (GATT XX(b))
GATT III:4 (national treatment, regulatory discrimination) and **GATT** 278
justification
evidence of health risks, relevance **GATT** 278
good faith reliance on **GATT** 610
"preponderant" evidence **GATT** 610
good faith (including *pacta sunt servanda* principle (VCLT 26)), scientific evidence, reliance on **GATT** 610
"like product" (GATT III:2 and III:4)
competitive relationship, need for **GATT** 237, 239, 243–5
evidence of health risks, relevance **GATT** 245
determination of "likeness"
in case of conflicting evidence **GATT** 247
need to take account of all the evidence **GATT** 242
GATT III:1 compared **GATT** 142, 160, 234–9
relevant factors
Border Tax Adjustment, Working Party on **GATT** 239
consumer preferences **GATT** 239, 242, 244–6
end-uses **GATT** 239, 244
fluidity **GATT** 239
health risks **GATT** 245
physical properties **GATT** 243
tariff classifications **GATT** 239
national treatment, general principle (GATT III:1), as context for interpretation of GATT III:2–5 **GATT** 234
national treatment, regulatory discrimination (GATT III:4)
burden of proof **GATT** 201
GATT XX and **GATT** 278
"less favourable treatment"
grouping approach **GATT** 268
as requirement for violation finding **GATT** 238
national treatment, tax discrimination (GATT III:2), first and second sentences distinguished **GATT** 235–6
non-violation claims (GATT XXIII:1(b))
"*any* measure **GATT** 644
non-commercial measure **GATT** 649
burden of proof **GATT** 653–5
as exceptional remedy **GATT** 644, 645
GATT XXIII:1(a) distinguished **GATT** 644
GATT XXIII:1(b) distinguished **GATT** 644
measure in "conflict" with GATT provisions, applicability to **GATT** 644
concurrent application to measures falling under other provisions of GATT **GATT** 648
risk assessment, need for (SPS 5.1–5.3 and Annex A, para. 4), ascertainable/theoretical risk distinguished (SPS 5.1), quantitative threshold, relevance **GATT** 611
standard/powers of review (AB) (issues of law and legal interpretations) (DSU 17.6)
completion of the legal analysis in case of contentiousness/omission/insufficiency of facts **DSU** 470
disagreement with the panel **DSU** 470
insufficient argument of novel issue **DSU** 470
standard/powers of review (panel) (DSU 11), "objective assessment of the facts", evidence, alleged disregard or distortion by panel, discretion in assessment of evidence **GATT** 609
"technical regulation" (TBT, Annex 1.1) **TBT** 2, 58–9
identifiability requirement **TBT** 59
Working Procedures (appellate review (DSU 17.9 and ABWP)), "appropriate procedure for the purpose of that appeal only" (ABWP 16(1)) **DSU** 848

EC – Asbestos (Panel), WT/DS135/R and Add.1, DSR 2001:VII and DSR 2001:VIII
amicus curiae briefs, preliminary ruling **DSU** 979, 1050
burden of proof
delay in submitting claim and **GATT** 655
non-violation claims (GATT XXIII:1(b)) **DSU** 808
onus probandi actori incumbit **GATT** 581
prima facie case, need for **GATT** 581
decisions, procedures and customary practices under GATT 1947 (WTO XVI:1) **GATT** 402

(*cont.*)
General Exceptions (GATT XX), burden of proof, chapeau and paras. a-j distinguished **GATT** 581
General Exceptions (GATT XX), measures necessary to protect human, animal or plant life or health (GATT XX(b)), justification, three-tier test **GATT** 602
information or technical advice, panel's right to seek (TBT 14)
individual advice, right to seek **TBT** 54
technical expert group, panel's right to establish (TBT 14.2), individual advice, right to seek **TBT** 54
interpretation of covered agreements
guidelines, multiple authentic languages (VCLT 33), "and"/"comme" **GATT** 401, 402, **DSU** 60
means, different language in same agreement **GATT** 403 n. 608
national treatment, general principle (GATT III:1)
applicability
measures imposed at the time or point of importation ("internal measures") (GATT Ad Art. III)
imposition on like domestic product requirement **GATT** 401
quantitative restrictions (GATT XI) distinguished **GATT** 294, 401–3
national treatment, regulatory discrimination (GATT III:4)
"laws, regulations or requirements", identity of measure, relevance **GATT** 402
"restrictions made effective through state-trading organizations" (Ad Articles XI, XI, XIII, XIV and XVIII) **GATT** 403
non-violation claims (GATT XXIII:1(b))
"benefit"/legitimate expectation of improved market access as as norm **GATT** 662
reasonable anticipation and **GATT** 666–8
burden of proof **DSU** 808
as exceptional remedy **DSU** 808
GATT XXIII:1(a) distinguished **GATT** 644
nullification or impairment, need for **GATT** 673
preliminary rulings on, *amicus curiae* briefs **DSU** 979
quantitative restrictions, elimination (GATT XI)
GATT III, and **GATT** 294
national treatment (GATT III) and **GATT** 401–3, 418
"prohibition or restriction" (GATT XI:1), "restrictions made effective through state-trading organizations" (Ad Articles XI, XI, XIII, XIV and XVIII) **GATT** 409
relationships within and between agreements
GATT III:4/GATT XI **GATT** 418
GATT/TBT **DSU** 906
SPS Agreement, burden of proof, scientific evidence, sufficiency (SPS 2.2) **GATT** 582
State trading enterprises (GATT XVII), national treatment, regulatory discrimination (GATT III:4) and **GATT** 403

EC – Bananas III (AB), WT/DS27/AB/R, DSR 1997:II
Agriculture Agreement (AG)
GATT 1994 and (AG 21.1), market access concessions and commitments (AG 4.1) and **GATT** 110–11, **AG** 18, 126
Modalities Paper and, non-discrimination (GATT XIII) and **GATT** 450, **AG** 126

Import Licensing Procedures Agreement (LIC)
neutrality in application and administration in a fair and equitable manner, need for (LA 1.3), administration in a uniform, impartial and reasonable manner (GATT X:3(a)), equivalence **GATT** 392
rules and procedures distinguished **LIC** 4
tariff quotas, applicability to **LIC** 2, 13
use of "restriction" in LIC 3.2 and 3.3, relevance **LIC** 2
interpretation of covered agreements, means, same or closely related phrases in different agreements, GATT X:3(a)/LIC 1.3 **GATT** 392
licensing procedures, national treatment, regulatory discrimination (GATT III:4) and **GATT** 259
"like product" (GATT I), "any product originating in or destined for another country", administrative distinctions, relevance **GATT** 17
Lomé waiver **WTO** 164, **GATT** 65, 444, **DSU** 399
market access (AG 4)
concessions and commitments (AG 4.1)
consistency with GATT XIII **GATT** 450, **DSU** 908
reform process, as essential part of **AG** 126
MFN treatment (GATS II)
determination of violation, requirements, aims and effects test **GATT** 132, **GATS** 28
national treatment (GATS XVII) distinguished **GATS** 24
"treatment no less favourable" (GATS II:1), *de facto* discrimination **GATS** 24
MFN treatment (GATT I:1)
"advantage", allocation of tariff quotas **GATT** 13
de facto discrimination **GATT** 9
modification of schedules (GATT XXVIII), applicability of GATT I and XIII **GATT** 67, 85
national treatment, general principle (GATT III:1), "so as to afford protection", GATS II and XVII distinguished **GATS** 24
national treatment, regulatory discrimination (GATT III:4)
"affecting"
hurricane licences **GATT** 272
purpose of measure, relevance **GATT** 259
general principle (GATT III:1) and **GATT** 230
"less favourable treatment"
discriminatory system for allocation of import licences **GATT** 107, 125, 285
formal differentiation in treatment, relevance **GATT** 272
"so as to afford protection" **GATT** 230
national treatment, services and service suppliers (GATS XVII), determination of violation, requirements, aims and effects test **GATT** 132, **GATS** 76
non-discriminatory administration of quantitative restrictions (GATT XIII)
administrative distinctions, relevance **GATT** 431
AG 4.1 (market access) and **GATT** 450
allocation to Members not having a substantial interest (GATT XIII:1) **GATT** 433
distribution of trade as close as possible to expected shares in absence of restrictions as aim (GATT XIII:2, chapeau) **GATT** 436
finding as factual matter **DSU** 447
notice of appeal, requirements (ABWP 20(2)), statement of allegation of error on issues of law/legal interpretations (ABWP 20(2)(d)), omission, effect **DSU** 861
nullification or impairment (DSU 3.8)
adverse impact/prejudice, relevance **DSU** 95
GATS XXIII, (dispute settlement and enforcement), distinguished **GATS** 127, **DSU** 102
presumption in case of inconsistency with covered agreement **DSU** 95
order of analysis, specific/general provision **AD** 343 n. 445
precedent, decisions, procedures and customary practices under GATT 1947 (WTO XVI:1), panel reports preceding relevant AB decisions **GATT** 154
preliminary rulings on, specificity of request for panel (DSU 6.2) **DSU** 941
preliminary rulings (procedural aspects)
timing **DSU** 919
working procedures, need for **DSU** 237, 919, 931
publication and administration of trade regulations (GATT X)
national treatment (GATT X:1) and **GATT** 372
relationship with other GATT provisions **GATT** 373, 387
uniform, impartial and reasonable administration (GATT X:3(a)) **GATT** 373

relationships within and between agreements
AG 4.1 and 21.1/GATT XIII **GATT** 450, **DSU** 908

India – Quantitative Restrictions (AB), WT/DS90/AB/R, DSR 1999:V
balance of payments difficulties, developing country Members' right to take import measures (GATT XVIII:B)
change in development policy, exclusion of requirement for (GATT XVIII:9), macroeconomic policy instruments and structural measures distinguished **GATT** 505
competence of panel to examine justification **GATT** 489–91, 506
progressive relaxation obligation (GATT XVIII:11), Ad Note (removal of restrictions and recurrence of one of GATT XVIII:9 conditions), temporal sequence ("thereupon") **GATT** 504
balance of payments restrictions, GATT XVIII:B, DSU, applicability to disputes relating to **DSU** 5
Balance of Payments Understanding (BOP)
DSU, applicability (BOB Understanding, footnote 1) **GATT** 489–91
preparatory work, absence of **GATT** 489
burden of proof
allocation, review by AB, exclusion **DSU** 1006
defences and exceptions, GATT XVIII:11 and Ad Note **DSU** 1004
prima facie case, need for, explicit finding, relevance **DSU** 1005
expert evidence, independent assessment, panel's obligation to make **DSU** 336
information or technical advice, panel's right to seek (DSU 13/SPS 11.2), expert evidence (DSU 13.2), establishment of *prima facie* case and **SPS** 25, **DSU** 1005
interpretation of covered agreements, means, preparatory work (VCLT 32), BOP Understanding, footnote 1 **GATT** 489
judicial restraint **GATT** 453
special or additional rules and procedures for dispute settlement (DSU 1.2 and Appendix 2), Balance of Payments Understanding (BOP), whether **DSU** 5
standard/powers of review (panel) (DSU 11)
balance of payments measures (BOP Understanding, footnote 1) **GATT** 489–91
"objective assessment of the facts", evidence, alleged disregard or distortion by panel, discretion in assessment of evidence **DSU** 1006
"objective assessment of matter before it", expert evidence, panel's obligation to make independent assessment **DSU** 336

India – Quantitative Restrictions (Panel), WT/DS90/R, DSR 1999:V
balance of payments difficulties, developing country Members' right to take import measures (GATT XVIII:B) **GATT** 429, 488
adequacy to forestall the threat of or stop a serious decline in monetary reserves (GATT XVIII:9(a)) **GATT** 496–7
IMF information as evidence of **GATT** 497
change in development policy, exclusion of requirement for (GATT XVIII:9 and Note Ad), burden of proof **GATT** 498
justification (GATT XVIII:9)
Ad Note GATT XVIII:11 and **GATT** 500–4
critical date for evaluation by panel **GATT** 495
phase out, right to in absence of balance of payments difficulties (GATT XVIII:12(c)) **GATT** 493, 507, 510
progressive relaxation obligation (GATT XVIII:11)
General Council/BOB Committee role (GATT XVIII:12(c)) **GATT** 492–3
"gradual relaxation" **GATT** 501
progressive relaxation obligation (GATT XVIII:11), Ad Note (removal of restrictions and recurrence of one of GATT XVIII:9 conditions) **GATT** 500–4
causal relationship ("would produce") **GATT** 503
threat of return, sufficiency **GATT** 501
right (GATT XVIII:2) **GATT** 488
balance of payments restrictions (GATT XII), developing country Members (GATT XVIII:B) distinguished **GATT** 429, 488
Balance of Payments Understanding (BOP)
status in relation to GATT XII and XVIII:B **GATT** 346, 508, **DSU** 5
time-schedule (para. 13) **GATT** 493, 510, 516
burden of proof
affirmative defence **DSU** 1004
change in development policy, exclusion of requirement for (GATT XVIII:9 and Note Ad) **GATT** 498–9
prima facie case, need for **GATT** 396, 499, **DSU** 1004
quantitative restrictions (GATT XI) **GATT** 396
consultations (DSU 4), developing country Members and (DSU 4.10), extension of periods agreed under DSU 4.7 and 4.8 (DSU 12.10) **DSU** 413
developing country Members
consultations (DSU 4.10), extension of periods established under DSU 4.7 and 8 (DSU 12.10) **DSU** 413
panel reports, need for specific reference to form in which account has been taken of special needs (DSU 12.11) **LIC** 414
WTO Agreement Preamble and **WTO** 5
economic development, government assistance (GATT XVIII), balance of payments (GATT XVIII) and **GATT** 429
exchange arrangements (IMF cooperation) (GATT XV), consultations and exchange of information (GATT XV:2), DSU 13.1 consultations and **DSU** 422
implementation of panel or AB recommendations (DSU 19.1), right of panel or AB to make suggestions **DSU** 508
interpretation of covered agreements, guidelines, multiple authentic languages (VCLT 33), meaning which best reconciles texts (VCLT 33(4)) **DSU** 59
licensing requirement, as quantitative restriction (GATT XI:1) **GATT** 411
modification of schedules (GATT XXVIII), applicability of GATT XI and **GATT** 396
quantitative restrictions, elimination (GATT XI)
burden of proof **GATT** 396
GATT XIII and **GATT** 447
"prohibition or restriction" (GATT XI:1)
licensing requirements **GATT** 411
"restrictions made effective through state-trading organizations" (Ad Articles XI, XI, XIII, XIV and XVIII) **GATT** 407, 423
relationships within and between agreements
GATT XI:1/GATT I:1 and XIII:12.421
GATT XI and XVIII:B/GATT XIII **GATT** 447

"in excess of" **GATT** 152, 175
"not similarly taxed" distinguished **GATT** 214–16
first and second sentences distinguished **GATT** 145, 191, 236
general principle (GATT III:1) and **GATT** 141
Interpretative Note Ad Article III:2, relevance **GATT** 151, 190, 215
"not similarly taxed"
"so as to afford protection" distinguished **GATT** 219
threshold/*de minimis* differential **GATT** 214–15
"so as to afford protection" **GATT** 191
design and structure of measure as evidence of protective application **GATT** 220
intention, relevance **GATT** 224
"not similarly taxed" distinguished **GATT** 219
tariff roles as evidence of **GATT** 223
tax differentials as evidence of protective application **GATT** 221
panel reports, legal status, "other decisions of the Contracting Parties to GATT 1947" (GATT 1994 Art. 1(b)(iv)), whether **GATT** 1
precedent, decisions, procedures and customary practices under GATT 1947 (WTO XVI:1) **GATT** 152
relationships within and between agreements
GATT III/WTO Agreement **GATT** 300
GATT III:1/GATT III as a whole **GATT** 141
Working Procedures (appellate review (DSU 17.9 and ABWP)), written responses (ABWP 28) **DSU** 881

Japan – Alcoholic Beverages II (Panel), WT/DS8/R, WT/DS10/R, WT/DS11/R, DSR 1996:I
directly competitive or substitutable products (GATT III:2), as dynamic relationship (including possibility of latent demand) **GATT** 202
interpretation of covered agreements, means, "any subsequent practice . . . which establishes the agreement of the parties regarding its interpretation" (VCLT 31(1)(b)), panel reports **DSU** 30
"like product" (GATT III:2 and III:4), GATT III:4 compared **GATT** 161
national treatment, general principle (GATT III:1), applicability to products not subject of tariff concession under GATT II **GATT** 120
national treatment, tax discrimination (GATT III:2), determination of violation, requirements, burden of proof **GATT** 155, 192

Japan – Alcoholic Beverages II (Article 21.3), WT/DS8/15, WT/DS10/15, WT/DS11/13, DSR 1997:I
arbitration (DSU 22.6), right to participate in **DSU** 596
implementation of recommendations and rulings of the DSB (DSU 21)
impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau)
"reasonable period"
complexity of implementation process **DSU** 584
contentiousness, relevance **DSU** 584
"particular circumstances" **DSU** 584

Japan – Apples dispute (WT/DS245)
arbitration (DSU 22.6), timing in relation to Article 21.5 arbitration ("sequencing"), ad hoc procedural agreements, agreement not to object to Article 22.6 arbitration **DSU** 633
expert evidence, Article 21.5 proceedings **DSU** 639
review of implementation of DSB rulings (DSU 21.5)
ad hoc procedural agreements
appointment of panelist **DSU** 638
experts **DSU** 639

Japan – Apples (AB), WT/DS245/AB/R, DSR 2003:IX
information or technical advice, panel's right to seek (DSU 13/SPS 11.2)
expert evidence (DSU 13.2)
establishment of *prima facie* case and **SPS** 25–6
expert evidence/Member's scientific evidence, primacy **SPS** 26, **DSU** 348
panel's rights, to assess facts **SPS** 24
notice of appeal, requirements (ABWP 20(2)), notification of allegation of panel's failure to make objective assessment (DSU 11) **DSU** 867
relationships within and between agreements, SPS 5.1/SPS 5.7 **SPS** 164
risk assessment, need for (SPS 5.1–5.3 and Annex A, para. 4)
ascertainable/theoretical risk distinguished (SPS 5.1), scientific prudence **SPS** 117
"likelihood", according to SPS measures which might be applied **SPS** 220
methodology, parties' right to choose **SPS** 224
specificity of assessment, need for (SPS 5.1 and 5.2) **SPS** 221, 224
"sufficient scientific evidence" requirement (SPS 2.2) and, divergence of expert views, relevance **SPS** 26
scientific evidence, need for sufficient (SPS 2.2)
provisional adoption of measures in case of insufficiency of scientific evidence (SPS 5.7)
"insufficient" **SPS** 164–5
scientific uncertainty, relevance **SPS** 165
standard/powers of review (panel) (DSU 11)
"objective assessment of the facts", evidence, alleged disregard or distortion by panel, discretion in assessment of evidence **DSU** 348
"objective assessment of matter before it", expert evidence, panel's obligation to make independent assessment **SPS** 26, **DSU** 348

Japan – Apples (Panel), WT/DS245/R, DSR 2003:IX
burden of proof
allocation, responding party **SPS** 19
onus probandi actori incumbit **SPS** 19, **DSU** 991
scientific evidence, sufficiency (SPS 2.2) **SPS** 17–20, **DSU** 1010
evidence (panel procedures) (DSU 12), time limits for submission, panel's right to admit "late" evidence, opportunity to comment, need for **DSU** 372
interpretation of covered agreements
guidelines, effectiveness principle (*ut res magis valeat quam pereat/effet utile*), meaning to be attributed to every word and phrase **SPS** 12
specific terms and phrases, "likelihood" (SPS Annex A, para. 4) **SPS** 219*bis*
proportionality, risk based on scientific evidence **SPS** 16
relationships within and between agreements
SPS 2.2/SPS 4 **SPS** 29

SPS 2.2/SPS 5.4 and 5.6 **SPS** 34
SPS 2.2/SPS 5.7 **SPS** 37
request for establishment of panel, requirements (DSU 6.2), legal basis of claim, arguments distinguished **DSU** 284
risk assessment, need for (SPS 5.1–5.3 and Annex A, para. 4)
ascertainable/theoretical risk distinguished (SPS 5.1), scientific prudence **SPS** 117
"likelihood"
4.219*bis*
according to SPS measures which might be applied **SPS** 220
proportionality and **SPS** 16
scientific evidence available at the time, limitation to **SPS** 96
scientific evidence, need for sufficient (SPS 2.2)
burden of proof **SPS** 17–20
equivalence (SPS 4), relevance **SPS** 29
proportionality/risk equation **SPS** 16
provisional adoption of measures in case of insufficiency of scientific evidence (SPS 5.7) **SPS** 36
rational or objective relationship between SPS measure and scientific evidence, need for, ad hoc determination **SPS** 15
"scientific evidence" **SPS** 12
SPS Agreement
burden of proof
scientific evidence, sufficiency (SPS 2.2) **SPS** 18
scientific evidence, sufficiency (SPS 5.7) **SPS** 168
SPS measures, appropriate level of protection (SPS 5.5–5.6), measures "not more trade restrictive than required to achieve their appropriate level of . . . protection" (SPS 5.6), SPS 2.2 and **SPS** 34
transparency of SPS regulations (SPS 7 and Annex B), notification procedures, changes requiring notification **SPS** 229

Japan – Film (Panel), WT/DS44/R, DSR 1998:IV
burden of proof
national treatment, regulatory discrimination (GATT III:4) **GATT** 231
onus probandi actori incumbit **GATT** 652–4
interpretation of covered agreements
ordinary meaning
"measure" (GATT XXIII:1(b)) **DSU** 199
"specific measures" (DSU 6.2) **DSU** 204
"like product" (GATT III:2 and III:4), competitive relationship, need for, GATT XXIII:1(b) compared **GATT** 269, 279
national treatment, regulatory discrimination (GATT III:4)
burden of proof **GATT** 231
"laws, regulations or requirements", "measures" (GATT XXIII:1(b)) distinguished **GATT** 252
"less favourable treatment", equality of competitive conditions as test **GATT** 266
non-violation claims (GATT XXIII:1(b))
"*any* measure
government measures, limitation to **GATT** 657
measure currently in force, limitation to **GATT** 658
non-binding action **GATT** 656
"benefit", legitimate expectation of improved market access as norm **GATT** 659–62
"benefit"/legitimate expectation of improved market access as
arising out of successive rounds of negotiation **GATT** 659–62
reasonable anticipation and **GATT** 663–8, 672
burden of proof **GATT** 652–5, **DSU** 807
as exceptional remedy **GATT** 645–6, **DSU** 807
"measure"
affecting the competitive relationship, GATT III:4 compared **GATT** 269
government action, limitation to **DSU** 198–200
"law, regulations or requirements" (GATT III:4) compared **GATT** 252
measure in "conflict" with GATT provisions, applicability to, concurrent application to measures falling under other provisions of GATT **GATT** 648
necessary elements **GATT** 650–1
nullification or impairment, need for **GATT** 671–2
causality and **GATT** 671–2
competitive relationship as key factor **GATT** 671
object and purpose **GATT** 647
publication and administration of trade regulations (GATT X), laws, regulations, judicial decisions and administrative rulings, of general application (GATT X:1) **GATT** 367
quantitative restrictions, elimination (GATT XI), "prohibition or restriction" (GATT XI:1), private action, relevance **GATT** 405
relationships within and between agreements, GATT III:4/GATT XXIII:1(b) **GATT** 69, 252, 279
request for establishment of panel, requirements (DSU 6.2)
identification of specific measures at issue
government action, limitation to **DSU** 198–200
administrative guidance **DSU** 199
GATT practice **DSU** 199
measures implementing measure specifically referred to, sufficiency **DSU** 204
terms of reference of panels (DSU 7), terminated measures **DSU** 258

Korea – Alcoholic Beverages (AB), WT/DS75/AB/R, WT/DS84/AB/R, DSR 1999:I
directly competitive or substitutable products (GATT III:2)
criteria, potential to compete as determining factor **GATT** 149
as dynamic relationship (including possibility of latent demand) **GATT** 117, 199–205, 246
interpretation of covered agreements
guidelines, object and purpose **GATT** 198
means, same or closely related phrases in different agreements, GATT III/SCM 15, footnote 46 **SCM** 270
"like product" (GATT III:2 and III:4)
determination of "likeness", on case by case basis **SCM** 270
directly competitive or substitutable products distinguished **GATT** 149, 211, 213
relevant factors
cross-price elasticity **GATT** 195–6, 207
end-uses **GATT** 207
market place **GATT** 197
physical properties **GATT** 207
national treatment, general principle (GATT III:1), "so as to afford protection" **GATT** 117
national treatment, tax discrimination (GATT III:2)
first and second sentences distinguished **GATT** 149
methodology of comparison, "grouping" approach **GATT** 207, 209
object and purpose **GATT** 198
"so as to afford protection", intention, relevance **GATT** 226
panel reports, rationale, need for (DSU 12.7), sufficiency **DSU** 405
standard/powers of review (panel) (DSU 11)
"objective assessment of the facts"
evidence, alleged disregard or distortion by panel
discretion in assessment of evidence **DSU** 341
egregious error, need for **DSU** 352

Korea – Alcoholic Beverages (Panel), WT/DS75/R, WT/DS84/R, DSR 1999:I
composition of delegation (appellate review), Member's right to determine **DSU** 973, 1025
composition of delegation (panel), legal representation/private counsel **DSU** 972
confidentiality of proceedings
(DSU 14/DSU 17.10/DSU 18.2/WP 3), obligation to respect/ensure respect for **DSU** 1025
consultations (DSU 4)
adequacy of consultations, Panel responsibilities in relation to **DSU** 120, 940
confidentiality (DSU 4.6)
disclosure of information obtained in same proceedings **DSU** 135–6
third party participation and **DSU** 139 n. 182
directly competitive or substitutable products (GATT III:2)
competition and trade law distinguished **GATT** 121
"directly" **GATT** 205
due process (dispute settlement proceedings)
opportunity to defend oneself **DSU** 275
opportunity to respond to evidence/presentations of other parties **DSU** 368
evidence (panel procedures) (DSU 12)
time limits for submission
panel's right to admit "late" evidence **DSU** 954
time limit for rebuttal **DSU** 368

(*cont.*)
interpretation of covered agreements, means, other treaties, Treaty of Rome (1958) **GATT** 121
national treatment, general principle (GATT III:1), competition law compared **GATT** 121
national treatment, tax discrimination (GATT III:2), determination of violation, requirements, burden of proof **GATT** 193
precedent, ECJ decisions **GATT** 121
preliminary rulings on
confidentiality issues **DSU** 135–6, 965
specificity of request for panel (DSU 6.2) **DSU** 942
timing of submission of evidence **DSU** 954
request for establishment of panel, requirements (DSU 6.2)
identification of specific measures at issue
identification of product, need for **DSU** 138
specificity, preliminary ruling on **DSU** 942
specificity sufficient to present the problem clearly **DSU** 275
third party rights, confidentiality (DSU 4.6) and **DSU** 139 n. 182
trade and competition policy, interaction between (Doha Declaration, paras. 23–5), market definitions, distinguishability **GATT** 121
Korea – Alcoholic Beverages (Article 21.3), WT/DS75/16, WT/DS84/14
4 June 1999, DSR 1999:II
implementation of recommendations and rulings of the DSB (DSU 21)
choice of means at Member's discretion (DSU 21.3) **DSU** 549
impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau)
"reasonable period"
entry into force of legislative instrument, relevance **DSU** 578
shortest period possible within Member's normal legislative process **DSU** 558
mandate of arbitrator, limitation to determination of reasonable period of time for implementation (DSU 21.3(c)) **DSU** 549
Korea – Dairy (AB), WT/DS98/AB/R, DSR 2000:I
burden of proof
prima facie case, need for
evidence other than that submitted by parties, panel's right to consider **DSU** 995
explicit finding, relevance **DSU** 997
SG 4.2 **DSU** 995
competence of panels and AB (DSU 3.2), right to develop own legal reasoning including arguments not adduced by parties (*jura novit curia*) **SPS** 229, **SCM** 177
due process (dispute settlement proceedings), prejudice to party, relevance **DSU** 219–20
GATT 1947, WTO continuity with, incorporation of GATT 1947 provisions into WTO Agreement **GATT** 4
interpretation of covered agreements
guidelines
consistency with article/agreement as a whole **DSU** 54
effectiveness principle (*ut res magis valeat quam pereat/effet utile*) **GATT** 531
meaning to be attributed to every word and phrase **WTO** 13, **AG** 1, **DSU** 54–5
means, preamble of agreement under consideration **AG** 1
ordinary meaning **GATT** 531
notification and consultation (SG 12)
"all pertinent information" (SG 12.2) **AG** 264–6
injury factors (SG 4.2(a)) and **AG** 264–6, 274
objective test **AG** 264, 274
object and purpose **AG** 266
right to request additional information, relevance **AG** 265
timeliness (SG 12.1, 12.3 and 12.3) **AG** 267
procedure, international and municipal rules distinguished **DSU** 338
relationships within and between agreements
GATT XIX:1/SG 2 and 4 **GATT** 531
SG and II.1(a)/WTO II **GATT** 566
SG 2 and 4/SG 12 **AG** 274
request for establishment of panel, requirements (DSU 6.2)
identification of specific measures at issue **DSU** 98
legal basis of claim
arguments distinguished **SCM** 177
listing of articles without explanation, sufficiency **DSU** 220, 924
summary, sufficiency **DSU** 162
as two-stage test **DSU** 219–20
safeguard measures (SG/GATT XIX)
application of measures (SG 5), "to the extent necessary" (proportionality) (SG 5.1), "clear justification", need for **AG** 219
conditions (SG 2)
"as a result of unforeseen developments" (GATT XIX:1(a))
critical date **GATT** 548
omission from SG 2.1, relevance **GATT** 531
causation (SG 2.1): see determination of serious injury or threat thereof (SG 4), requirements, causation (SG 4.2(b))
as extraordinary/emergency remedy **GATT** 522
relationship between Safeguards Agreement and GATT XIX **GATT** 521, 566, **AG** 1
rules for application of GATT XIX (SG 1 and 11.1(a)) **AG** 4
Safeguards Agreement, Preamble, as evidence of object and purpose **AG** 1
standard/powers of review (AB) (issues of law and legal interpretations) (DSU 17.6)
completion of the legal analysis in case of contentiousness/omission/insufficiency of facts **DSU** 467–8
limitation to panel's findings or undisputed facts in panel record **DSU** 468
standard/powers of review (panel) (DSU 11)
"objective assessment of the facts"
evidence, alleged disregard or distortion by panel, obligation to examine and evaluate *all* the evidence available to it **DSU** 338
evidence other than that submitted by parties, right to consider **DSU** 338, 995
terms of reference of panels (DSU 7), "matter referred to the DSB", as identified in DSU 6.2 (DSU 7.1), "claim" **DSU** 213
WTO Agreement, cumulative nature of obligations **AG** 1
Korea – Dairy (Panel), WT/DS98/R and Corr.1, DSR 2000:I
determination of serious injury or threat thereof (SG 4), requirements
causation (SG 4.2(b))
evaluation of all relevant factors of objective and quantifiable nature **AG** 169
factors other than increased imports causing injury, non-attribution requirement **AG** 169
relevance in absence of serious injury **AG** 212
evaluation of all relevant factors (SG 4.2(a)) **DSU** 382
all factors listed in SG 4.2(a) **AG** 141
price analysis, relevance **AG** 55
segmented domestic industry and **AG** 133
investigation of conditions for safeguard measures, requirements (SG 3.1/SG 4.2(c))
evaluation of all factors **AD** 629 n. 809
obligation of competent authorities to seek information additional to that supplied by interested parties **AD** 629 n. 809
published report, absence of claim relating to, effect on possibility of SG 4 claims **AG** 89
notification and consultation (SG 12)
"adequate opportunity for prior consultations" (SG 12.3) **AG** 269
successful outcome as evidence of **AG** 269

guidelines
effectiveness principle (*ut res magis valeat quam pereat/effet utile*) **AD** 599
interpretation of covered agreements, guidelines, effectiveness principle (*ut res magis valeat quam pereat/effet utile*), meaning to be attributed to every word and phrase **AD** 706
means, context (VCLT 31.2), AD Agreement as **AD** 707
legislation as such, right to challenge (WTO XVI:4), mandatory/discretionary legislation, distinguishability **AD** 599, 676
municipal law
as evidence of, compliance with international obligations, interpretation of legislation distinguished **DSU** 359 n. 550
as fact for purposes of international adjudication **DSU** 358
decisions of municipal courts, applicability **DSU** 359
legislative history, relevance **DSU** 360
national treatment, regulatory discrimination (GATT III:4), anti-dumping (GATT VI) and **GATT** 288–90, 343
order of analysis, specific/general provision **GATT** 265
panel reports, legal status, unadopted reports **AD** 599
relationships within and between agreements
AD 3/GATT VI **GATT** 347
AG 3/GATT VI:1 **AD** 219
specific/general provision, as general principle of international law **AD** 343 n. 445
specific action against dumping (AD 18.1) or subsidy (SCM 32.1) in accordance with GATT VI as interpreted by AD/SCM Agreement, "except in accordance with the provisions" **GATT** 331, **AD** 669
standard/powers of Review (Panel) (DSU 11), claims against legislation as such **AD** 608
third party rights
panel proceedings (DSU 10 and Appendix 3)
enhancement in accordance with due process, agreement between the parties, relevance **DSU** 316
multiple complainants (DSU 9) and **DSU** 316

US – 1916 Act (Japan) (Panel), WT/DS162/R and Add.1, DSR 2000:X
AD 18.1/other AD articles **AD** 684–5
Anti-Dumping Agreement (AD)
conformity with domestic laws, regulations and administrative procedures, obligation to ensure conformity (AD 18.4), finding of non-conformity under any AD provision **WTO** 228, **AD** 684–5
GATT VI and
AD 1 as link **AD** 711
quantitative restrictions (GATT XI) and **GATT** 426
separability of provisions **GATT** 346, **AD** 706
interpretation of covered agreements, means, preparatory work (VCLT 32), WTO Agreement **GATT** 339
national treatment, regulatory discrimination (GATT III:4), GATT VI and **GATT** 291–2, 343
quantitative restrictions, elimination (GATT XI), GATT VI and **GATT** 420
relationships within and between agreements
AD/GATT VI **AD** 711
AD/GATT XI **GATT** 426, **AD** 713
GATT VI/GATT XI **GATT** 344, 420
specific action against dumping (AD 18.1) or subsidy (SCM 32.1) in accordance with GATT VI as interpreted by AD/SCM Agreement, action under other relevant provisions of GATT 1994 distinguished (AD 18.1, footnote 24) **AD** 670
standard/powers of Review (Panel) (DSU 11), claims against legislation as such **AD** 608
third party rights
panel proceedings (DSU 10 and Appendix 3)

(*cont.*)
enhancement in accordance with due process, agreement between the parties, relevance **DSU** 316
multiple complainants (DSU 9) and **DSU** 316
WTO Agreement, obligation to ensure conformity of domestic laws, regulations and administrative procedures (WTO XVI:4) **WTO** 228
US – 1916 Act (Article 22.6 – US), WT/DS136/ARB, DSR 2004:IX
arbitration (DSU 22.6)
"by the original panel" **DSU** 688
scope of review/arbitrators' mandate (DSU 22.7), suspension of concessions or "other obligations", limitations on role **DSU** 704
burden of proof, suspension of concessions, conformity with DSU 22.4 **DSU** 690
suspension of concessions for non-implementation of DSB recommendations and rulings (DSU 22)
level equivalent to nullification or impairment (DSU 22.4)
changes in level after authorization **DSU** 725–6
court judgments and **DSU** 719, 757
deterrent/"chilling" effect **DSU** 721
"equivalent", qualitative test **DSU** 736–8, 757
litigation costs and **DSU** 722
reasoned estimates, need for **DSU** 715
settlement agreements and **DSU** 720, 757
zero level, exclusion **DSU** 710
nature and purpose of counter measures **DSU** 649
"or other obligations", authorization to suspend (DSU 22.2) **DSU** 669
specificity requirement **DSU** 672
US – 1916 Act (Article 21.3), WT/DS136/11, WT/DS162/14, DSR 2001:V, implementation of recommendations and rulings of the DSB (DSU 21), impracticality of immediate compliance/reasonable period of time (DSU 21.3, chapeau), "reasonable period", "time . . . shorter or longer, depending on the particular circumstances" (DSU 21.3(c)) **DSU** 540
US – Canada Tuna (GATT Panel), BISD 295/91, request for establishment of panel, requirements (DSU 6.2), identification of specific measures at issue, termination of measures following agreement on terms of reference **DSU** 258 n. 370
US – Carbon Steel (AB), WT/DS213/AB/R and Corr.1, DSR 2002:IX
burden of proof, mandatory/discretionary legislation distinction **DSU** 177, 1000, 1001
competence of panels and AB (DSU 3.2), not to add to or diminish rights and obligations (DSU 3.2/19.2) **SCM** 317
countervailing duties (SCM, Part V)
balance between rights and obligations relating to, need for **SCM** 499
preconditions (SCM 19.1), standard of proof (SCM 22.1) **SCM** 321
public notice and explanation of determinations (SCM 22), standard of proof (SCM 22.1) **SCM** 321
as remedy to offset benefits of subsidies **SCM** 499
developing country Members (SCM 27), *de minimis* subsidization threshold (SCM 27.10 and 27.11) **SCM** 384
due process (dispute settlement proceedings), notification of nature of case **DSU** 157
evidence, acceptability as, practice in application of laws **DSU** 177
good faith (including *pacta sunt servanda* principle (VCLT 26)), dispute settlement procedures, engagement in (DSU 3.10), obligation to challenge deficient procedures promptly **DSU** 108
information or technical advice, panel's right to seek (DSU 13/SPS 11.2), panel's rights, not to seek **DSU** 346
interpretation of covered agreements
guidelines
object and purpose, preamble as evidence of **SCM** 499
same or closely related phrases in different agreements, cross-referencing, role **SCM** 253–4, 304
means
footnotes to treaty **SCM** 256
preamble of agreement under consideration, as evidence of object and purpose **SCM** 499
preparatory work (VCLT 32), SCM 11 **SCM** 255
investigation of dumping (AD 5)/subsidy (SCM 11)
preparatory work (VCLT 32) **SCM** 255
Secretariat Note for the Uruguay Round Negotiating Group on Subsidies and Countervailing Measures (1987), relevance **SCM** 255
procedural nature of provisions **SCM** 250, 252
termination (SCM 11.9)
de minimis standard, applicability **SCM** 250–7, 316–17
developing country Members (SCM 27.10) **SCM** 384
grounds **SCM** 249
limitation of provisions to investigation phase **SCM** 250
legislation as such, right to challenge (WTO XVI:4), mandatory/discretionary legislation, distinguishability, burden of proof and **DSU** 177, 1001
relationships within and between agreements
SCM 11.6/SCM 21.3 **SCM** 314
SCM 11.9/SCM 21.3 **SCM** 250–7, 316–17
request for establishment of panel, requirements (DSU 6.2)
compliance, importance of
demonstration of on the "face of the request", need for **DSU** 236
opportunity to cure defect **DSU** 157, 163
legal basis of claim, summary, sufficiency **DSU** 163
SCM Agreement, object and purpose (SCM 1), balanced framework of rights and obligations relating to countervailing duties **SCM** 499
standard/powers of Review (Panel) (DSU 11), "objective assessment of the facts", evidence, alleged disregard or distortion by panel, discretion in selection of evidence to refer to explicitly **DSU** 345
subsidy, definition (SCM 1), level of subsidy, relevance **SCM** 256
sunset review (SCM 21.3)
burden/standard of proof
original investigation requirements (SCM 11 and 12) distinguished **SCM** 305–6
SCM 11.6, relevance **SCM** 314
de minimis standard
absence of reference to, relevance **SCM** 253–7
termination of investigation provisions (SCM 11.9) distinguished **SCM** 250, 316–17
as threshold test **SCM** 251, 256
original investigation requirements distinguished **SCM** 305–6, 312–13
"likely to lead to continuation or recurrence of subsidization and injury" test (SCM 21.3) **SCM** 308–10
preparatory work (VCLT 32) **SCM** 257
self-initiation, right of **SCM** 303
terms of reference of panels (DSU 7), as definition of jurisdiction/legal claims at issue **DSU** 246
US – Carbon Steel (Panel), WT/DS213/R and Corr.1, DSR 2002:IX
interpretation of covered agreements, means, same or closely related phrases in different agreements, SCM 21.2/AD and SPS Agreements **SCM** 309
relationships within and between agreements, SCM 11.6/SCM 21.3 **SCM** 314–15
request for establishment of panel, requirements (DSU 6.2), identification of specific measures at issue, expedited sunset review, need for specific inclusion **DSU** 206
sunset review (SCM 21.3)
AD 11.2 standard, applicability **SCM** 309
burden/standard of proof, SCM 11.6, relevance **SCM** 314–15
US – Certain EC Products (AB), WT/DS165/AB/R, DSR 2001:I and DSR 2001:II
burden of proof, *prima facie* case, need for, "prima facie" **DSU** 286
competence of panels and AB (DSU 3.2)
not to add to or diminish rights and obligations (DSU 3.2/19.2) **DSU** 84
right to develop own legal reasoning including arguments not adduced by parties (*jura novit curia*) **DSU** 224 n. 322
relationships within and between agreements
DSU 3.7/DSU 22.6 and DSU 22.3(c) **DSU** 786
GATT II/GATT XI **GATT** 109
request for establishment of panel, requirements (DSU 6.2)
identification of specific measures at issue
specificity sufficient to present the problem clearly **DSU** 286
termination of measures before agreement on terms of reference **DSU** 264

Schedules of Concessions (GATT II), treatment no less favourable than that provided in appropriate schedule (GATT II:1(a)), bonding requirements, imposition of import duties distinguished **GATT** 69, 88, 109
standard/powers of Review (Panel) (DSU 11), "objective assessment of matter before it", *ultra petita* finding on provision not before it **DSU** 331
sunset review (SCM 21.3), object and purpose of SCM as a whole **SCM** 315
suspension of concessions for non-implementation of DSB recommendations and rulings (DSU 22), authorization, need for (DSU 3.7, 22.6 and 23.2(c)), suspension without authorization as breach of DSU 3.7 **DSU** 785
terms of reference of panels (DSU 7), as definition of jurisdiction/legal claims at issue, failure to make specific mention of alleged inconsistency (DSU 23.2(a)) **DSU** 286

US – Certain EC Products (Panel), WT/DS165/R and Add.1, DSR 2001:I and DSR 2001:II
Customs Valuation Agreement (VAL)
applicable law/tariff, tariff in force on day of importation **VAL** 12
delay in final determination of customs value (VAL 13), changes to tariff after importation, relevance to **VAL** 12
Dispute Settlement Understanding (DSU)
obligation to have recourse to (DSU 23.1)
prohibition of suspensions prior to completion of DSU 22 procedures **DSU** 784
in "seeking redress of WTO violation" **DSU** 781
fees and formalities connected with importation and exportation (GATT VIII), "limited . . . to the approximate cost of services rendered" (GATT VIII:1(a)), bonding requirements **GATT** 357
implementation of panel or AB recommendations (DSU 19.1), measure terminated in course of proceedings/no longer in existence **DSU** 498
interpretation of covered agreements, means, dictionaries **DSU** 781
MFN treatment (GATT I:1), "accorded immediately and unconditionally to the like product", differential treatment on the basis of origin of product and **GATT** 23
quantitative restrictions, elimination (GATT XI), "prohibition or restriction" (GATT XI:1), bonding requirements **GATT** 410, 416
relationships within and between agreements
DSU 23.1/DSU 23.2 **DSU** 780
GATT II/GATT XI **GATT** 109
request for establishment of panel, requirements (DSU 6.2), identification of specific measures at issue, termination of measures before agreement on terms of reference **DSU** 264
suspension of concessions for non-implementation of DSB recommendations and rulings (DSU 22), authorization, need for (DSU 3.7, 22.6 and 23.2(c)) **DSU** 784
unilateral action by Member, prohibition (DSU 23.1) **DSU** 779–80
examples of excluded actions (DSU 23.2) **DSU** 780
Working Procedures (panel) (DSU 12.1 and Appendix 3 (WP)), separate opinion (DSU 14.3) **GATT** 109

US – Corrosion-Resistant Steel Sunset Review (AB), WT/DS244/AB/R and Corr.1, DSR 2004:I
Anti-Dumping Agreement (AD)
conformity with domestic laws, regulations and administrative procedures, obligation to ensure conformity (AD 18.4)
dispute settlement procedures, applicability to **AD** 677
"laws, regulations and administrative procedures", normative value as determining factor **DSU** 174, 180
consultation and dispute settlement (AD 17), special or additional rule and procedure (DSU 1.2 and Appendix 2), whether **DSU** 9
interpretation of covered agreements
guidelines, security and predictability (DSU 3.2) **DSU** 179
means, same or closely related phrases in same agreement, AD 11.2/AD 11.3 **AD** 528
specific terms and phrases, "laws, regulations and requirements" (AD 18.4) **DSU** 174, 181
legislation as such, right to challenge (WTO XVI:4)
analysis of legislation, method **DSU** 178
mandatory/discretionary legislation, distinguishability, relevance **AD** 602–3, **DSU** 192–3
normative value as determining factor **DSU** 174, 179–81
rationale **DSU** 179
national treatment, regulatory discrimination (GATT III:4), "requirements", non-mandatory measures **GATT** 254
prompt and satisfactory resolution of disputes, Members' right to (DSU 3), impairment of benefits by measures taken by another Member (DSU 3.3), "measure taken by another Member" **DSU** 86
relationships within and between agreements, AD 2.4/AD 11.3 **AD** 519
special or additional rules and procedures for dispute settlement (DSU 1.2 and Appendix 2), AD 17, whether **DSU** 9
State responsibility for breach of international obligations, for acts or omissions of executive **DSU** 86, 169–70
sunset review (AD 11.3) (including "likelihood" test)
company-specific determination, need for **AD** 528
investigatory role of authorities **AD** 513–14
mandatory rule/exception **AD** 510
methodology
absence of specific provision **AD** 518–19, 528, 529
AD 2.4 disciplines, applicability **AD** 519
dumping margins, relevance **AD** 518–19
original investigation distinguished **AD** 512
"positive evidence", need for, presumptions, exclusion **AD** 524–5

US – Corrosion-Resistant Steel Sunset Review (Panel), WT/DS244/R, DSR 2004:I
evidentiary rules (investigation of dumping) (AD 6), facts available to investigating authority, right of resort to (AD 6.8/Annex II), time limits, right to set (AD 6.1.1), sunset reviews and **AD** 318
interpretation of covered agreements, means, same or closely related phrases in different agreements, cross-referencing, role **AD** 533, 538
investigation of dumping (AD 5)/subsidy (SCM 11)
rejection of application (AD 5.8), *de minimis* test, sunset review (AD 11.3), applicability to **AD** 534–6
self-initiation (AD 5.6), sunset review (AD 11.3), applicability of rules to **AD** 532–3
legislation as such, right to challenge (WTO XVI:4), policy document, whether (US Sunset Policy Bulletin) **GATT** 378
