3. Members may introduce or maintain sanitary or phytosanitary measures which result in a higher level of sanitary or phytosanitary protection than would be achieved by measures based on the relevant international standards, guidelines or recommendations, if there is a scientific justification, or as a consequence of the level of sanitary or phytosanitary protection a Member determines to be appropriate in accordance with the relevant provisions of paragraphs 1 through 8 of Article 5.[2] Notwithstanding the above, all measures which result in a level of sanitary or phytosanitary protection different from that which would be achieved by measures based on international standards, guidelines or recommendations shall not be inconsistent with any other provision of this Agreement.

(*footnote original*) [2] For the purposes of paragraph 3 of Article 3, there is a scientific justification if, on the basis of an examination and evaluation of available scientific information in conformity with the relevant provisions of this Agreement, a Member determines that the relevant international standards, guidelines or recommendations are not sufficient to achieve its appropriate level of sanitary or phytosanitary protection.

4. Members shall play a full part, within the limits of their resources, in the relevant international organizations and their subsidiary bodies, in particular the Codex Alimentarius Commission, the International Office of Epizootics, and the international and regional organizations operating within the framework of the International Plant Protection Convention, to promote within these organizations the development and periodic review of standards, guidelines and recommendations with respect to all aspects of sanitary and phytosanitary measures.

5. The Committee on Sanitary and Phytosanitary Measures provided for in paragraphs 1 and 4 of Article 12 (referred to in this Agreement as the "Committee") shall develop a procedure to monitor the process of international harmonization and coordinate efforts in this regard with the relevant international organizations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. General

(a) Object and purpose

51. In *EC – Hormones*, the Appellate Body held that the object and purpose of Article 3 was to promote the harmonization of national SPS measures:

> "In generalized terms, the object and purpose of Article 3 is to promote the harmonization of the SPS measures of Members on as wide a basis as possible, while recognizing and safeguarding, at the same time, the right and duty of Members to protect the life and health of their people. The ultimate goal of the harmonization of SPS measures is to prevent the use of such measures for arbitrary or unjustifiable discrimination between Members or as a disguised restriction on international trade, without preventing Members from adopting or enforcing measures which are both 'necessary to protect' human life or health and 'based on scientific principles', and without requiring them to change their appropriate level of protection."[62]

2. Article 3.1

(a) "base[d] . . . on"

52. The Appellate Body on *EC – Hormones* while examining the meaning of the term "based on" as used in this Article, also held that the Panel's interpretation of the term "based on" was not in accordance with the object and purpose of Article 3, which the Appellate Body held was to harmonize SPS measures in the future:

> "In the third place, the object and purpose of Article 3 run counter to the Panel's interpretation. That purpose, Article 3.1 states, is '[t]o harmonize [SPS] measures on as wide a basis as possible . . . It is clear to us that harmonization of SPS measures of Members on the basis of international standards is projected in the Agreement, as a *goal*, yet to be realized *in the future*. To read Article 3.1 as requiring Members to harmonize their SPS measures *by conforming those measures with international standards*, guidelines and recommendations, *in the here and now*, is, in effect, to vest such international standards,

[61] Panel Report on *Japan – Agricultural Products II*, para. 8.16.
[62] Appellate Body Report on *EC – Hormones*, para. 177.

guidelines and recommendations (which are by the terms of the Codex *recommendatory* in form and nature) with *obligatory* force and effect. The Panel's interpretation of Article 3.1 would, in other words, transform those standards, guidelines and recommendations into binding *norms*. But, as already noted, the *SPS Agreement* itself sets out no indication of any intent on the part of the Members to do so. We cannot lightly assume that sovereign states intended to impose upon themselves the more onerous, rather than the less burdensome, obligation by mandating *conformity* or *compliance with* such standards, guidelines and recommendations. To sustain such an assumption and to warrant such a far-reaching interpretation, treaty language far more specific and compelling than that found in Article 3 of the *SPS Agreement* would be necessary."[63]

(b) "international standards, guidelines or recommendations where they exist"

(i) Panel's mandate

53. With respect to the phrase "international standards . . . where they exist", the Panel on *EC – Hormones* noted as follows:

"Article 3.1 unambiguously prescribes that '. . . Members shall base their sanitary . . . measures on international standards . . . *where they exist* . . .' (emphasis added). Paragraph 3 of Annex A of the *SPS Agreement* states equally clearly that the international standards mentioned in Article 3:1 are 'for food safety, the standards . . . *established by the Codex Alimentarius Commission* relating to . . . *veterinary drug* . . . *residues* . . .' (emphasis added). No other conditions are imposed in the *SPS Agreement* on the relevance of international standards for the purposes of Article 3. Therefore, as a panel making a finding on whether or not a Member has an obligation to base its sanitary measure on international standards in accordance with Article 3.1, we only need to determine whether such international standards exist. For these purposes, we need not consider (i) whether the standards reflect *levels* of protection or sanitary *measures* or the *type* of sanitary measure they recommend, or (ii) whether these standards have been adopted by consensus or by a wide or narrow majority, or (iii) whether the period during which they have been discussed or the date of their adoption was before or after the entry into force of the *SPS Agreement*."[64]

(ii) Relevance of international standards for individual diseases

54. In *Australia – Salmon*, in the context of animal health, the Panel held that even if no international standards existed for the entire range of fish diseases at issue, this fact did not signify that an international standard applying to only one of the diseases at issue could not be relevant in the case before it:

"Paragraph 3(b) of Annex A to the *SPS Agreement* indicates that the international standards, guidelines or recommendations referred to in Article 3 *for animal health* (the concern at issue in this dispute) are those developed under the auspices of the International Office of Epizooties ('OIE'). Both parties agree that the International Aquatic Animal Health Code adopted by the OIE in 1995 ('OIE Code') provides international guidelines on a disease-by-disease basis. However, they also agree that as of today no relevant OIE guideline exists which deals with salmon on a product specific basis. Moreover, both parties also agree that OIE guidelines do not exist for all of the 24 diseases of concern to Australia. Therefore, even if we were to examine first, if and how many relevant international guidelines exist and second address the question of whether Australia deviates from these guidelines, we would thereafter still need to examine either (1) in the event Australia does deviate from any such guidelines contrary to Article 3, whether the measure in dispute could not be based on Australia's concern for any of the other diseases for which no international guideline exists (*in casu*, under Articles 2 and 5); or (2) in the event Australia's measure is based on and/or conforms to any such guidelines, whether that part of the measure for which no guidelines exist, is consistent with the provisions of the *SPS Agreement* other than Article 3 (*in casu*, Articles 2 and 5). In this respect, we are of the view, however, that the fact that in this case no international guidelines exist for *all* 24 diseases of concern does not mean that an international guideline which applies to only *one* of these diseases cannot be relevant (or, according to the language of Article 3.1, does not 'exist') for the measure at issue."[65]

(iii) Validity of OIE standards, guidelines and recommendations

55. The Panel on *Australia – Salmon* held with respect to standards developed by the International Office of Epizootics (OIE) as follows:

"[T]he *SPS Agreement* (paragraph 3(b) of Annex A) explicitly directs us to the OIE and the standards, guidelines and recommendations it develops . . . The fact that the OIE Code is subject to revision or the way it has been adopted in our view does not change its validity for our purposes."[66]

56. With respect to existing international standards, see paragraph 1 above.

---

[63] Appellate Body Report on *EC – Hormones*, para. 165.
[64] Panel Report on *EC – Hormones (Canada)*, para. 8.72; Panel Report on *EC – Hormones (US)*, para. 8.69.
[65] Panel Report on *Australia – Salmon*, para. 8.46.
[66] Panel Report on *Australia – Salmon*, para. 7.11.

(c) Burden of proof

(i) Exemptions from establishing prima facie inconsistency

57. In *EC – Hormones*, the Appellate Body disagreed with the Panel which had held that if a measure enacted by a Member does not conform to an international standard, the complaining Member is exempted from making a *prima facie* case of inconsistency of this measure with the *SPS Agreement* or with the *GATT 1994*[67]:

> "Under Article 3.1 of the *SPS Agreement*, a Member may choose to establish an SPS measure that is based on the existing *relevant* international standard, guideline or recommendation. Such a measure may adopt some, not necessarily all, of the elements of the international standard. The Member imposing this measure does not benefit from the presumption of consistency set up in Article 3.2; but, as earlier observed, the Member is not penalized by exemption of a complaining Member from the normal burden of showing a *prima facie* case of inconsistency with Article 3.1 or any other relevant Article of the *SPS Agreement* or of the GATT 1994."[68]

(d) Relationship with other paragraphs of Article 3

(i) Paragraphs 1, 2 and 3

58. The Panel on *EC – Hormones* identified a relationship of rule and exception between paragraphs 1, 2 and 3 of Article 3. The Appellate Body disagreed:

> "It appears to us that the Panel has misconceived the relationship between Articles 3.1, 3.2 and 3.3, a relationship discussed below, which is qualitatively different from the relationship between, for instance, Articles I or III and Article XX of the GATT 1994. Article 3.1 of the *SPS Agreement* simply excludes from its scope of application the kinds of situations covered by Article 3.3 of that Agreement, that is, where a Member has projected for itself a higher level of sanitary protection than would be achieved by a measure based on an international standard."[69]

59. The Appellate Body on *EC – Hormones* then distinguished the meaning of Articles 3.1, 3.2 and 3.3 in the following terms:

> "Under Article 3.2 of the *SPS Agreement*, a Member may decide to promulgate an SPS measure that conforms to an international standard. Such a measure would embody the international standard completely and, for practical purposes, converts it into a municipal standard. Such a measure enjoys the benefit of a presumption (albeit a rebuttable one) that it is consistent with the relevant provisions of the *SPS Agreement* and of the GATT 1994.
>
> Under Article 3.1 of the *SPS Agreement*, a Member may choose to establish an SPS measure that is based on the existing relevant international standard, guideline or recommendation. Such a measure may adopt some, not necessarily all, of the elements of the international standard. The Member imposing this measure does not benefit from the presumption of consistency set up in Article 3.2; but, as earlier observed, the Member is not penalized by exemption of a complaining Member from the normal burden of showing a *prima facie* case of inconsistency with Article 3.1 or any other relevant Article of the *SPS Agreement* or of the GATT 1994."[70]
>
> Under Article 3.3 of the *SPS Agreement*, a Member may decide to set for itself a level of protection different from that implicit in the international standard, and to implement or embody that level of protection in a measure not 'based on' the international standard. The Member's appropriate level of protection may be higher than that implied in the international standard. The right of a Member to determine its own appropriate level of sanitary protection is an important right."[71]

3. Article 3.2

(a) ". . . conform to . . ."

(i) Distinction from "based on"

60. In *EC – Hormones*, the Appellate Body reversed the Panel's finding that Article 3.2 "equates measures *based on* international standards with measures which *conform to* such standards".[72] The Appellate Body first drew a distinction between the terms "based on" and "conform to" and noted certain requirements for a measure to "conform to" an international standard:

> "In the first place, the ordinary meaning of 'based on' is quite different from the plain or natural import of 'conform to'. A thing is commonly said to be 'based on' another thing when the former 'stands' or is 'founded' or 'built' upon or 'is supported by' the latter. In contrast, much more is required before one thing may be regarded as 'conform[ing] to' another: the former must 'comply with', 'yield or show compliance' with the latter. The reference of 'conform to' is to 'correspondence in form or manner', to 'compliance with' or 'acquiescence', to 'follow[ing] in form or nature'. A measure that 'conforms to' and incorporates a Codex standard is, of course, 'based on' that standard. A measure, however, based on the same standard might not conform to that standard, as where only some, not all, of the elements of the standard are incorporated into the measure."[73]

[73] Appellate Body Report on *EC – Hormones*, para. 163.

(ii) Distinction as used in different parts of SPS Agreement

61. The Appellate Body on *EC–Hormones*, after distinguishing between the ordinary meaning of "based on" and "conform to", as referred to in paragraph 60 above, noted that they were used in different provisions of the *SPS Agreement* and rejected the view that such different usage was "merely inadvertent":

> "In the second place, 'based on' and 'conform to' are used in different articles, as well as in differing paragraphs of the same article. Thus, Article 2.2 uses 'based on', while Article 2.4 employs 'conform to'. Article 3.1 requires the Members to 'base' their SPS measures on international standards; however, Article 3.2 speaks of measures which 'conform to' international standards. Article 3.3 once again refers to measures 'based on' international standards. The implication arises that the choice and use of different words in different places in the *SPS Agreement* are deliberate, and that the different words are designed to convey different meanings. A treaty interpreter is not entitled to assume that such usage was merely inadvertent on the part of the Members who negotiated and wrote that Agreement. Canada has suggested the use of different terms was 'accidental' in this case, but has offered no convincing argument to support its suggestion. We do not believe this suggestion has overturned the inference of deliberate choice."[74]

(b) Burden of proof

(i) Presumption of consistency

62. The Appellate Body on *EC – Hormones*, in the context of addressing the burden of proof under the *SPS Agreement*, stated the following with respect to the presumption in Article 3.2:

> "The presumption of consistency with relevant provisions of the *SPS Agreement* that arises under Article 3.2 in respect of measures that conform to international standards may well be an *incentive* for Members so to conform their SPS measures with such standards. It is clear, however, that a decision of a Member not to conform a particular measure with an international standard does not authorize imposition of a special or generalized burden of proof upon that Member, which may, more often than not, amount to a *penalty*."[75]

63. The Appellate Body on *EC – Hormones* also noted that measures pursuant to Article 3.2 enjoy the benefit of a presumption, albeit a rebuttable one.[76] See also paragraph 59 above.

(c) Relationship with other paragraphs of Article 3

64. The Appellate Body on *EC – Hormones* clarified the meaning of Article 3.2 while discussing the relationship between Article 3.1, 3.2 and 3.3. See paragraph 59 above.

(d) Relationship with other Articles

65. The Panel on *Australia – Salmon* referred to Article 3 in the context of its analysis under Article 5.6:

> "Given the repeated reference made in the *SPS Agreement* to the relevant international organizations, in this dispute the OIE [International Office of Epizootics], and the recommendations they produce (e.g., Articles 3.1 and 5.1), as well as to the more general objective of harmonization (e.g., Articles 3.4 and the sixth preamble), we consider that appropriate weight should be given to [the] opinion on Option 5 [i.e., evisceration of the fish, proposed by the OIE]".[77]

4. Article 3.3

(a) General

66. In *EC – Hormones*, the Appellate Body held that the "right of a Member to establish its own level of sanitary protection under Article 3.3 of the *SPS Agreement* is an autonomous right and *not* an 'exception' from a 'general obligation' under Article 3.1".[78] In this respect, see also the excerpts from the Appellate Body report in paragraph 59 above.

67. The Appellate Body on *EC – Hormones* also found that the right of a Member to define its appropriate level of protection is not an absolute or unqualified right:

> "The right of a Member to define its appropriate level of protection is not, however, an absolute or unqualified right. Article 3.3 also makes this clear . . ."[79]

68. Regarding the relationship between Article 3.3 and the "precautionary principle", the Appellate Body on *EC – Hormones* also noted that the precautionary principle is reflected in Article 3.3.[80] See paragraph 3 above.

(b) "based on"

69. On the Panel's finding that "for a sanitary measure to be *based on* an international standard . . ., that *measure* needs to reflect the same level of sanitary protection as the *standard*" (emphasis original)[81], the Appellate Body on *EC – Hormones* noted as follows:

---

[74] Appellate Body Report on *EC – Hormones*, para. 164.
[75] Appellate Body Report on *EC – Hormones*, para. 102. See also para. 170 of the Appellate Body report and para. 59 above of this Chapter.
[76] Appellate Body Report on *EC – Hormones* para. 170.
[77] Panel Report on *Australia – Salmon*, para. 8.180.
[78] Appellate Body Report on *EC – Hormones*, para. 172.
[79] Appellate Body Report on *EC – Hormones*, para. 173
[80] Appellate Body Report on *EC – Hormones*, para. 124.
[81] Panel Report on *EC – Hormones (Canada)*, para. 8.76; Panel Report on *EC – Hormones (US)*, para. 8.73.

"It appears to us that the Panel reads much more into Article 3.3 than can be reasonably supported by the actual text of Article 3.3. Moreover, the Panel's entire analysis rests on its flawed premise that 'based on', as used in Articles 3.1 and 3.3, means the same thing as 'conform to' as used in Article 3.2. As already noted, we are compelled to reject this premise as an error in law. The correctness of the rest of the Panel's intricate interpretation and examination of the consequences of the Panel's litmus test, however, have to be left for another day and another case".[82]

70. For further interpretation of this term as it appears in Article 3.1, see paragraph 52 above.

(c) Clarification of conditions

71. The Appellate Body on *EC – Hormones*, distinguished between two situations in Article 3.3, but ultimately held that Article 3.3 was not "a model of clarity in drafting and communication" and that the distinction was "more apparent than real":

"Article 3.3 is evidently not a model of clarity in drafting and communication. The use of the disjunctive 'or' does indicate that two situations are intended to be covered. These are the introduction or maintenance of SPS measures which result in a higher level of protection:

(a) 'if there is a scientific justification'; or

(b) 'as a consequence of the level of . . . protection a Member determines to be appropriate in accordance with the relevant provisions of paragraphs 1 through 8 of Article 5'.

It is true that situation (a) does not speak of Articles 5.1 through 5.8. Nevertheless, two points need to be noted. First, the last sentence of Article 3.3 requires that 'all measures which result in a [higher] level of . . . protection', that is to say, measures falling within situation (a) as well as those falling within situation (b), be 'not inconsistent with any other provision of [the SPS] Agreement'. 'Any other provision of this Agreement' textually includes Article 5. Secondly, the footnote to Article 3.3, while attached to the end of the first sentence, defines 'scientific justification' as an 'examination and evaluation of available scientific information in conformity with relevant provisions of this Agreement . . .'. This examination and evaluation would appear to partake of the nature of the risk assessment required in Article 5.1 and defined in paragraph 4 of Annex A of the *SPS Agreement*.

On balance, we agree with the Panel's finding that although the European Communities has established for itself a level of protection higher, or more exacting, than the level of protection implied in the relevant Codex standards, guidelines or recommendations, the European Communities was bound to comply with the requirements established in Article 5.1. We are not unaware that this finding tends to suggest that the distinction made in Article 3.3 between two situations may have very limited effects and may, to that extent, be more apparent than real. Its involved and layered language actually leaves us with no choice".[83]

(d) "scientific justification"

(i) Rational relationship

72. In *Japan – Agricultural Products II*, with respect to the terms "scientific justification", the Appellate Body noted that:

"[I]n our opinion, there is a 'scientific justification' for an SPS measure, within the meaning of Article 3.3, if there is a rational relationship between the SPS measure at issue and the available scientific information."[84]

(e) Relationship with other paragraphs of Article 3

73. As regards the relationship between Articles 3.1, 3.2 and 3.3, see paragraph 59 above.

(f) Relationship with other Articles

(i) Article 1.1

74. As relates to applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 6 above.

(ii) Article 5.1

75. Based on its analysis of Article 3.3 referenced in paragraph 71 above, the Appellate Body in *EC – Hormones* concluded that "the Panel's finding that the European Communities is required by Article 3.3 to comply with the requirements of Article 5.1 is correct".[85]

5. Article 3.5

76. With respect to the procedures to monitor the process of international harmonization, see section XIII.B.3 below.

6. Relationship with other Articles

77. With respect to the relationship between Articles 3 and Articles 2 and 5, see paragraphs 46–47 above.

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Equivalence

1. Members shall accept the sanitary or phytosanitary measures of other Members as equivalent, even if these

[82] Appellate Body Report on *EC – Hormones*, para. 168.
[83] Appellate Body Report on *EC – Hormones*, paras. 173, 175–176.
[84] Appellate Body Report on *Japan – Agricultural Products II*, para. 79.
[85] Appellate Body Report on *EC – Hormones*, para. 177.

measures differ from their own or from those used by other Members trading in the same product, if the exporting Member objectively demonstrates to the importing Member that its measures achieve the importing Member's appropriate level of sanitary or phytosanitary protection. For this purpose, reasonable access shall be given, upon request, to the importing Member for inspection, testing and other relevant procedures.

2. Members shall, upon request, enter into consultations with the aim of achieving bilateral and multilateral agreements on recognition of the equivalence of specified sanitary or phytosanitary measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

(a) Decision on equivalence

(i) General

78. At its meeting of 26 October 2001, the SPS Committee adopted a Decision on the Implementation of Article 4 ("Decision on Equivalence").[86] At its meetings of 7–8 November 2002 and 24–25 June 2003, the SPS Committee agreed on clarifications of paragraphs 5, 6 and 7 of the Decision[87], as foreseen in the Programme for Further Work adopted by the SPS Committee in March 2002.[88] A further clarification to paragraph 5 was agreed by the Committee at its meeting of 17–18 March 2004.[89]

(ii) Concept of equivalence

79. The Preamble of the Decision on Equivalence notes that equivalence requires "acceptance of alternative measures that meet an importing Member's appropriate level of sanitary or phytosanitary protection", but not duplication or "sameness" of measures. Paragraph 1 of the Decision on Equivalence provides:

"1. Equivalence can be accepted for a specific measure or measures related to a certain product or categories of products, or on a systems-wide basis. Members shall, when so requested, seek to accept the equivalence of a measure related to a certain product or category of products. An evaluation of the product-related infrastructure and programmes within which the measure is being applied may also be necessary.[90] Members may further, where necessary and appropriate, seek more comprehensive and broad-ranging agreements on equivalence. The acceptance of the equivalence of a measure related to a single product may not require the development of a systems-wide equivalence agreement."

(iii) Explanation of SPS measures taken by importing Member

80. In order to facilitate the implementation of the provisions of Article 4, the Decision on Equivalence describes the elements to be included in an explanation of the sanitary and phytosanitary measures taken by an importing Member, when so requested by an exporting Member:

"2. In the context of facilitating the implementation of Article 4, on request of the exporting Member, the importing Member should explain the objective and rationale of the sanitary or phytosanitary measure and identify clearly the risks that the relevant measure is intended to address. The importing Member should indicate the appropriate level of protection which its sanitary or phytosanitary measure is designed to achieve.[91] The explanation should be accompanied by a copy of the risk assessment on which the sanitary or phytosanitary measure is based or a technical justification based on a relevant international standard, guideline or recommendation. The importing Member should also provide any additional information which may assist the exporting Member to provide an objective demonstration of the equivalence of its own measure."

(iv) Procedure for the recognition of equivalence

General

81. The Decision on Equivalence provides for a number of requirements and recommendations regarding the procedure to be followed for the recognition of equivalence:

"3. An importing Member shall respond in a timely manner to any request from an exporting Member for consideration of the equivalence of its measures, normally within a six-month period of time.

4. The exporting Member shall provide appropriate science-based and technical information to support its objective demonstration that its measure achieves the appropriate level of protection identified by the importing Member. This information may include, *inter alia*, reference to relevant international standards, or to relevant risk assessments undertaken by the importing Member or by another Member. In addition, the exporting Member shall provide reasonable access, upon request, to the importing Member for inspection, testing and other relevant procedures for the recognition of equivalence.

. . .

[86] G/SPS/19.
[87] G/SPS/19/Add.1 and Add.2.
[88] G/SPS/20.
[89] G/SPS/19/Add.3.
[90] Product-related infrastructure and programmes is in reference to testing, inspection and other relevant requirements specific to product safety.
[91] In doing so, Members should take into account the *Guidelines to Further the Practical Implementation of Article 5.5* adopted by the Committee on Sanitary and Phytosanitary Measures at its meeting of 21–22 June 2000 (document G/SPS/15, dated 18 July 2000).

> 7. When considering a request for recognition of equivalence, the importing Member should analyze the science-based and technical information provided by the exporting Member on its sanitary or phytosanitary measures with a view to determining whether these measures achieve the level of protection provided by its own relevant sanitary or phytosanitary measures."[92]

Accelerated procedure

82. Paragraph 5 of the Decision on Equivalence provides that "[t]he importing Member should accelerate its procedure for determining equivalence in respect of those products which it has historically imported from the exporting Member."[93]

83. In order to clarify paragraph 5 (and paragraph 6) of the Decision on Equivalence, the SPS Committee adopted another Decision at its meeting on 7–8 November 2002 ("the 7–8 November 2002 Decision").[94] In the latter Decision the SPS Committee notes that the importance of knowledge based on historic trade reasons has been fully recognized by other international organizations and international agencies:

> "This information and experience, if directly relevant to the product and measure under consideration, should be taken into account in the recognition of equivalence of measures proposed by the exporting Member. In particular, information already available to the importing Member should not be sought again with respect to procedures to determine the equivalence of measures proposed by the exporting Member."[95]

84. In its 7–8 November 2002 Decision, the SPS Committee requests the Interim Commission on Phytosanitary Measures (ICPM) to take into consideration both the Decision on Equivalence and the Decision clarifying certain aspects of it:

> "3. The Committee draws the attention of the Interim Commission on Phytosanitary Measures (ICPM) to the Decision on Equivalence (G/SPS/19), and to the above clarification with respect to Paragraph 5 of the Decision. The Committee requests that the ICPM take into consideration the Decision and this clarification in its future work on judgement of equivalence with regard to sanitary measures to address plant pests and diseases."[96]

Duty not to interrupt or suspend imports

85. Paragraph 6 of the Decision on Equivalence[97] establishes that "a request by an exporting Member for recognition of the equivalence of its measures with regard to a specific product [by an importing Member] shall not be in itself a reason to disrupt or suspend ongoing imports from that Member of the product in question."[98]

86. The 7–8 November 2002 Decision of the SPS Committee clarifies paragraph 6 of the Decision on Equivalence as follows:

> "[S]ince a request for recognition of equivalence does not in itself alter the way in which trade is occurring, there is no justification for disruption or suspension of trade. If an importing Member were to disrupt or suspend trade solely because it had received a request for an equivalence determination, it would be in apparent violation of its obligations under the *SPS Agreement* (e.g. under Article 2)."[99]

87. Also in relation to paragraph 6 of the Decision on Equivalence, the 7–8 November 2002 Decision of the SPS Committee provides, however, that a request for recognition of equivalence does not preclude an importing Member from taking measures necessary to achieve the appropriate level of protection:

> "[A] request for recognition of equivalence does not impede the right of an importing Member to take any measure it may decide is necessary to achieve its appropriate level of protection, including in response to an emergency situation. However, if the decision to impose some additional control measure were to coincide with consideration by the same Member of a request for recognition of equivalence, this might lead an exporting Member whose trade is affected to suspect that the two events were linked. To avoid any misinterpretation of this kind, the Committee recommends that the importing Member should give an immediate and comprehensive explanation of the reasons for its action in restricting trade to any other Members affected, and that it should also follow the normal or emergency notification procedures established under the *SPS Agreement*."[100]

88. Paragraph 7 of G/SPS/19/Add.1 draws the attention of Office International des Epizooties and ICPM to this further clarification.

(v) Technical assistance

89. Paragraph 8 of the Decision on Equivalence provides further that, in line with Article 9 of the *SPS Agreement*, Members shall give full consideration to requests for appropriate technical assistance to facilitate the implementation of Article 4, especially when those requests come from developing countries:

> "In accordance with Article 9 of the Agreement on the Application of Sanitary and Phytosanitary Measures, a

[92] G/SPS/19, paras. 1–4.
[93] G/SPS/19, para. 5.
[94] G/SPS/19/Add.1, paras. 1–4 and 7.
[95] G/SPS/19/Add.1, para. 2.
[96] G/SPS/19/Add.1, para. 3.
[97] See para. 79.
[98] G/SPS/19, para. 6.
[99] G/SPS/19/Add.1, para. 5.
[100] G/SPS/19/Add.1, para. 6.

Member shall give full consideration to requests by another Member, especially a developing country Member, for appropriate technical assistance to facilitate the implementation of Article 4. This assistance may, *inter alia*, be to help an exporting Member identify and implement measures which can be recognized as equivalent, or to otherwise enhance market access opportunities. Such assistance may also be with regard to the development and provision of the appropriate science-based and technical information referred to in paragraph 4, above."[101]

(vi) International cooperation outside the WTO

90. In order to improve international cooperation in this sphere outside the WTO, paragraph 9 of the Decision on Equivalence advises active participation of Members in the ongoing work in the Codex Alimentarius Commission and in any work related to equivalence undertaken by the Office International des Epizooties and in the framework of the International Plant Protection Convention.

91. Paragraph 10 of the Decision on Equivalence outlines a number of actions to be taken by the SPS Committee in this regard:

"10. The Committee on Sanitary and Phytosanitary Measures recognizes the urgency for the development of guidance on the judgement of equivalence and shall formally encourage the Codex Alimentarius Commission to complete its work with regard to equivalence as expeditiously as possible. The Committee on Sanitary and Phytosanitary Measures shall also formally encourage the Office International des Epizooties and the Interim Commission on Phytosanitary Measures to elaborate guidelines, as appropriate, on equivalence of sanitary and phytosanitary measures and equivalence agreements in the animal health and plant protection areas. The Codex Alimentarius Commission, the Office International des Epizooties and the Interim Commission on Phytosanitary Measures shall be invited to keep the Committee on Sanitary and Phytosanitary Measures regularly informed regarding their activities relating to equivalence."[102]

(vii) Notification

92. In accordance with paragraph 12 of the Decision on Equivalence, Members should regularly inform the SPS Committee of their experiences concerning the implementation of Article 4. In particular, the Decision encourages Members to inform the SPS Committee of the successful conclusion of any bilateral equivalence agreement.[103] As regards the notification procedures, see paragraph 179 below.

(b) Specific programme for the further implementation of Article 4

93. Paragraph 13 of the Decision on Equivalence asks the SPS Committee to develop a specific programme to further the implementation of Article 4, paying particular attention to the problems encountered by developing country Members.[104] At the Doha Ministerial Conference, Members also instructed the SPS Committee to develop the same specific programme.[105] At its meeting of 21 March 2002, the SPS Committee adopted a specific programme for the further implementation of Article 4.[106] The programme established the timetable and the agendas of the meetings for the discussion of the Decision on Equivalence.

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Assessment of Risk and Determination of the Appropriate Level of Sanitary or Phytosanitary Protection

1. Members shall ensure that their sanitary or phytosanitary measures are based on an assessment, as appropriate to the circumstances, of the risks to human, animal or plant life or health, taking into account risk assessment techniques developed by the relevant international organizations.

2. In the assessment of risks, Members shall take into account available scientific evidence; relevant processes and production methods; relevant inspection, sampling and testing methods; prevalence of specific diseases or pests; existence of pest- or disease-free areas; relevant ecological and environmental conditions; and quarantine or other treatment.

3. In assessing the risk to animal or plant life or health and determining the measure to be applied for achieving the appropriate level of sanitary or phytosanitary protection from such risk, Members shall take into account as relevant economic factors: the potential damage in terms of loss of production or sales in the event of the entry, establishment or spread of a pest or disease; the costs of control or eradication in the territory of the importing Member; and the relative cost-effectiveness of alternative approaches to limiting risks.

4. Members should, when determining the appropriate level of sanitary or phytosanitary protection, take into account the objective of minimizing negative trade effects.

5. With the objective of achieving consistency in the application of the concept of appropriate level of sanitary or phytosanitary protection against risks to human life or health, or to animal and plant life or health, each

[101] G/SPS/19, para. 8.
[102] G/SPS/19 paras. 9 and 10.
[103] G/SPS/19, para. 12.
[104] G/SPS/19/para. 13.
[105] WT/MIN(01)/17, para. 3.3.
[106] G/SPS/20.

Member shall avoid arbitrary or unjustifiable distinctions in the levels it considers to be appropriate in different situations, if such distinctions result in discrimination or a disguised restriction on international trade. Members shall cooperate in the Committee, in accordance with paragraphs 1, 2 and 3 of Article 12, to develop guidelines to further the practical implementation of this provision. In developing the guidelines, the Committee shall take into account all relevant factors, including the exceptional character of human health risks to which people voluntarily expose themselves.

6. Without prejudice to paragraph 2 of Article 3, when establishing or maintaining sanitary or phytosanitary measures to achieve the appropriate level of sanitary or phytosanitary protection, Members shall ensure that such measures are not more trade-restrictive than required to achieve their appropriate level of sanitary or phytosanitary protection, taking into account technical and economic feasibility.[3]

(*footnote original*) [3] For purposes of paragraph 6 of Article 5, a measure is not more trade-restrictive than required unless there is another measure, reasonably available taking into account technical and economic feasibility, that achieves the appropriate level of sanitary or phytosanitary protection and is significantly less restrictive to trade.

7. In cases where relevant scientific evidence is insufficient, a Member may provisionally adopt sanitary or phytosanitary measures on the basis of available pertinent information, including that from the relevant international organizations as well as from sanitary or phytosanitary measures applied by other Members. In such circumstances, Members shall seek to obtain the additional information necessary for a more objective assessment of risk and review the sanitary or phytosanitary measure accordingly within a reasonable period of time.

8. When a Member has reason to believe that a specific sanitary or phytosanitary measure introduced or maintained by another Member is constraining, or has the potential to constrain, its exports and the measure is not based on the relevant international standards, guidelines or recommendations, or such standards, guidelines or recommendations do not exist, an explanation of the reasons for such sanitary or phytosanitary measure may be requested and shall be provided by the Member maintaining the measure.[107]

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Article 5.1

(a) Standard of review

94. With regards to the role of panels in reviewing whether an SPS measure is based on a risk assessment, the Panels on *EC – Hormones*, in a finding not addressed by the Appellate Body, stated:

> "[I]t is for the European Communities to submit evidence before the Panel that its measures are based on a risk assessment; it is not for the Panel itself to conduct its own risk assessment on the basis of scientific evidence gathered by the Panel or submitted by the parties during the Panel proceedings."[108]

95. The Panel on *Australia – Salmon*, in a finding not addressed by the Appellate Body, made a similar statement, holding that it did not attempt to conduct its own risk assessment, but merely examined and evaluated evidence:

> "[W]e stress that in examining this case we did not attempt (nor are we, in our view, allowed) to conduct our own risk assessment or to impose any scientific opinion on Australia. We only examined and evaluated the evidence – including the information we received from the experts advising the Panel – and arguments put before us in light of the relevant WTO provisions and, following the rules on burden of proof set out above, based our findings on this evidence and these arguments."[109]

96. The Appellate Body on *Japan – Apples* considered it unnecessary to express its view on the question of whether the conformity of a risk assessment with Article 5.1 should be evaluated solely against the scientific evidence available at the time of the risk assessment, as Japan had failed to establish that the Panel utilized subsequent scientific evidence in evaluating the risk assessment at issue.[110]

(b) "based on" an assessment of the risks

(i) Taking into account risk assessment techniques

97. In *EC – Hormones*, the Panel had held that the European Communities' measure was in violation of Article 5.1 since "the European Communities did not provide any evidence that the studies . . . or the scientific conclusions reached therein '*have actually been taken into account by the competent EC institutions* either when it *enacted* those measures (in 1981 and 1988) or *at any later point in time*'" (emphasis original).[111] The Appellate Body characterized this "minimum procedural element" as "some subjectivity . . . present in certain individuals" and disagreed with this standard:

> "We are bound to note that, as the Panel itself acknowledges, no textual basis exists in Article 5 of the *SPS Agreement* for such a 'minimum procedural requirement'. The

[107] See also paras. 4 and 5 of Annex 1A.
[108] Panel Report on *EC – Hormones (Canada)*, para. 8.104; Panel Report on *EC – Hormones (US)*, para. 8.101.
[109] Panel Report on *Australia – Salmon*, para. 8.41. A similar statement was made by the Panel on *Japan – Agricultural Products II*, referenced in para. 23 of this Chapter.
[110] Appellate Body Report on *Japan – Apples*, para. 215.
[111] Appellate Body Report on *EC – Hormones*, para. 188.

term 'based on', when applied as a 'minimum procedural requirement' by the Panel, may be seen to refer to a human action, such as particular human individuals 'taking into account' a document described as a risk assessment. Thus, 'take into account' is apparently used by the Panel to refer to some subjectivity which, at some time, may be present in particular individuals but that, in the end, may be totally rejected by those individuals. We believe that 'based on' is appropriately taken to refer to a certain *objective relationship* between two elements, that is to say, to an *objective situation* that persists and is observable between an SPS measure and a risk assessment. Such a reference is certainly embraced in the ordinary meaning of the words 'based on' and, when considered in context and in the light of the object and purpose of Article 5.1 of the *SPS Agreement*, may be seen to be more appropriate than 'taking into account'. We do not share the Panel's interpretative construction and believe it is unnecessary and an error of law as well.

Article 5.1 . . . . only requires that the SPS measures be 'based on an assessment, as appropriate for the circumstances . . .'. The 'minimum procedural requirement' constructed by the Panel, could well lead to the elimination or disregard of available scientific evidence that rationally supports the SPS measure being examined. This risk of exclusion of available scientific evidence may be particularly significant for the bulk of SPS measures which were put in place before the effective date of the *WTO Agreement* and that have been simply maintained thereafter."[112]

(ii) Rational relationship between the SPS measure and the risk assessment

98. The Appellate Body on *EC – Hormones* held that the requirement of Article 5.1 – that an SPS measure be "based on" a risk assessment – was a substantive requirement that "there be a rational relationship between the measure and the risk assessment":

"We consider that, in principle, the Panels' approach of examining the scientific conclusions implicit in the SPS measure under consideration and the scientific conclusion yielded by a risk assessment is a useful approach. The relationship between those two sets of conclusions is certainly relevant; they cannot, however, be assigned relevance to the exclusion of everything else. We believe that Article 5.1, when contextually read as it should be, in conjunction with and as informed by Article 2.2 of the *SPS Agreement*, requires that the results of the risk assessment must sufficiently warrant – that is to say, reasonably support – the SPS measure at stake. The requirement that an SPS measure be 'based on' a risk assessment is a substantive requirement that there be a rational relationship between the measure and the risk assessment.

We do not believe that a risk assessment has to come to a monolithic conclusion that coincides with the scientific conclusion or view implicit in the SPS measure. The risk assessment could set out both the prevailing view representing the 'mainstream' of scientific opinion, as well as the opinions of scientists taking a divergent view. Article 5.1 does not require that the risk assessment must necessarily embody only the view of a majority of the relevant scientific community. . . . In most cases, responsible and representative governments tend to base their legislative and administrative measures on 'mainstream' scientific opinion. In other cases, equally responsible and representative governments may act in good faith on the basis of what, at a given time, may be a divergent opinion coming from qualified and respected sources. By itself, this does not necessarily signal the absence of a reasonable relationship between the SPS measure and the risk assessment, especially where the risk involved is life-threatening in character and is perceived to constitute a clear and imminent threat to public health and safety"[113]

(iii) Determination of relationship on "a case-by-case" basis

99. The Appellate Body on *EC – Hormones* also noted that determination of the presence or absence of that relationship can only be done on a case-by-case basis, after account is taken of all considerations rationally bearing upon the issue of potential adverse health effects.[114]

(c) "risk assessment"

(i) General

100. The Appellate Body on *EC – Hormones*, when addressing the requirements under Article 3.3, also considered the object and purpose of Article 3 and of the *SPS Agreement* as a whole and noted its "belief that compliance with Article 5.1 was intended as a countervailing factor in respect of the right of Members to set their appropriate level of protection . . . The requirements of a risk assessment under Article 5.1, . . . are essential for the maintenance of the delicate and carefully negotiated balance in the *SPS Agreement* between the shared, but sometimes competing, interests of promoting international trade and of protecting the life and health of human beings."[115]

101. In *Australia – Salmon*, the Appellate Body held that the presence of unknown and uncertain elements did not affect the requirements of Articles 5.1, 5.2 and 5.3:

"[T]he existence of unknown and uncertain elements does not justify a departure from the requirements of Articles 5.1, 5.2 and 5.3, read together with paragraph

[112] Appellate Body Report on *EC – Hormones*, paras. 189–190.
[113] Appellate Body Report on *EC – Hormones*, paras. 193–194.
[114] Appellate Body Report on *EC – Hormones*, para. 194.
[115] Appellate Body Report on *EC – Hormones*, para. 177.

4 of Annex A, for a risk assessment. We recall that Article 5.2 requires that 'in the assessment of risk, Members shall take into account available scientific evidence'. We further recall that Article 2, entitled 'Basic Rights and Obligations', requires in paragraph 2 that 'Members shall ensure that any sanitary . . . measure . . . is based on scientific principles and is not maintained without sufficient scientific evidence, except as provided for in paragraph 7 of Article 5'."[116]

(ii) Concept of risk assessment versus risk management

102. The Appellate Body on *EC – Hormones* rejected the distinction between "risk assessment" and "risk management" used by the original Panel in its findings under Article 5.1:

"The Panel observed that an assessment of risk is, at least with respect to risks to human life and health, a 'scientific' examination of data and factual studies; it is not, in the view of the Panel, a 'policy' exercise involving social value judgments made by political bodies.[117] The Panel describes the latter as 'non-scientific' and as pertaining to 'risk management' rather than to 'risk assessment'.[118] We must stress, in this connection, that Article 5 and Annex A of the *SPS Agreement* speak of 'risk assessment' only and that the term 'risk management' is not to be found either in Article 5 or in any other provision of the *SPS Agreement*. Thus, the Panel's distinction, which it apparently employs to achieve or support what appears to be a restrictive notion of risk assessment, has no textual basis. The fundamental rule of treaty interpretation requires a treaty interpreter to read and interpret the words actually used by the agreement under examination, and not words which the interpreter may feel should have been used."[119]

(iii) Three aspects of risk assessment

103. In *Australia – Salmon*, the Appellate Body identified three aspects of a risk assessment:

"On the basis of [the] definition [prescribed in the first part of paragraph 4 of Annex A], we consider that, in this case, a risk assessment within the meaning of Article 5.1 must:

(1) *identify* the diseases whose entry, establishment or spread a Member wants to prevent within its territory, as well as the potential biological and economic consequences associated with the entry, establishment or spread of these diseases;

(2) *evaluate the likelihood* of entry, establishment or spread of these diseases, as well as the associated potential biological and economic consequences; and

(3) evaluate the likelihood of entry, establishment or spread of these diseases *according to the SPS measures which might be applied*."[120]

(iv) Completing the analysis of a risk assessment

104. The Panel on *Australia – Salmon* found that the Australian heat treatment requirement was not "based on" a risk assessment within the meaning of Article 5.1, because the Final Report (the risk assessment) made "no substantive assessment of the risk or the risk reduction related to the heat requirements in effect imposed by the measure at issue" . . . but stated that "there is insufficient data on whether or not heat treatment inactivates the disease agents in dispute".[121] The Appellate Body, reversed this finding[122] and completed the analysis by examining whether the import prohibition on fresh, chilled and frozen salmon was based on a risk assessment. It found that the 1996 Final Report did not fulfil the requirements needed to constitute a "risk assessment" within the meaning of Article 5.1:[123]

"Applying our three-pronged test set out in paragraph 128 above, to the 1996 Final Report in order to determine whether that Report meets the requirements of a risk assessment within the meaning of Article 5.1 and the first definition in paragraph 4 of Annex A, we note that the Panel found that the 1996 Final Report identifies the diseases whose entry, establishment or spread Australia wants to prevent as well as the potential biological and economic consequences associated with the entry, establishment or spread of such diseases. The Panel, therefore, concluded that 'the 1996 Final Report meets the first requirement of a risk assessment'.[124] We agree with the Panel.

With regard to the second requirement for a risk assessment of the type applicable in this case . . . We believe . . . that on the basis of the facts found by the Panel, it could, and should, have come to the conclusion that the 1996 Final Report does not contain the 'evaluation of the likelihood of entry, establishment or spread' of the diseases of concern 'and of the associated potential biological and economic consequences' as required by paragraph 4 of Annex A of the *SPS Agreement*. As we have already emphasized, *some* evaluation of the likelihood is not enough.[125]

. . . We turn now to the third requirement of a risk assessment . . . We agree with the Panel that the measures

[116] Appellate Body Report on *Australia – Salmon*, para. 130.
[117] (*footnote original*) Panel Report on *EC – Hormones (US)*, para. 8.94; and Panel Report on *EC – Hormones (Canada)*, para. 8.97.
[118] (*footnote original*) Panel Report on *EC – Hormones (US)*, para. 8.95; and Panel Report on *EC – Hormones (Canada)*, para. 8.98.
[119] Appellate Body Report on *EC – Hormones*, para. 181.
[120] Appellate Body Report on *Australia – Salmon*, para. 121. In *Japan – Agricultural Products II*, the Appellate Body endorsed the aforesaid three-pronged test, para. 112. This test was also used by the Panel in *Australia – Salmon (Article 21.5 – Canada)*, para. 7.41.
[121] Panel Report on *Australia – Salmon*, para. 8.98.
[122] Appellate Body Report on *Australia – Salmon*, para. 104.
[123] Appellate Body Report on *Australia – Salmon*, para. 136.
[124] (*footnote original*) Panel Report, para. 8.73.
[125] (*footnote original*) *Supra.*, para. 124.

which might be applied are those which reduce the risks of concern, and are referred to in the 1996 Final Report as risk reduction factors . . .On the basis of its factual findings, the Panel should have come to the conclusion that the 1996 Final Report does not fulfil the third requirement for the type of risk assessment applicable in this case, i.e., it does not contain the required evaluation of the likelihood of entry, establishment or spread of the diseases of concern according to the SPS measures which might be applied. We recall that, contrary to the Panel, we consider that *some* evaluation of the likelihood is not enough.[126]

We conclude, on the basis of the factual findings made by the Panel and the requirements for a risk assessment as set forth above, that the 1996 Final Report meets neither the second nor the third requirement for the type of risk assessment applicable in this case, and, therefore, that the 1996 Final Report is *not* a proper risk assessment within the meaning of Article 5.1 and the first definition in paragraph 4 of Annex A."[127]

105. Regarding the definition of risk assessment within the meaning of Annex A paragraph 4, see Section XVI.B.2 below.

(v) Scope of the risk assessment

Assessment of each individual substance

106. In *EC – Hormones*, the Appellate Body upheld the Panel's finding that "there was no risk assessment with regard to MGA"[128], one of the six growth hormones at issue, stating that "[i]n other words, there was an almost complete absence of evidence on MGA in the panel proceedings."[129] On this point, the Panels had explained that "one of the basic principles of a risk assessment appears to be that it needs to be carried out for each individual substance."[130]

Different product categories

107. The Panel on *Australia – Salmon* held that studies on one particular product category could be relevant for a risk assessment in respect of another product category:

"We do, however, agree with Australia that some of the evidence, assessments and conclusions contained in the 1996 Final Report might be relevant for the risk assessment to be carried out (or relied upon) for the other categories of salmon products and that, therefore, a completely new risk assessment for these other categories of salmon products might not be necessary".[131]

(vi) Studies not sufficiently specific to the case at hand

108. The Appellate Body on *EC – Hormones* also rejected certain studies submitted by the European Communities as risk assessment for the purpose of Article 5.1, holding that these studies were general and "not sufficiently specific to the case at hand":

"[The studies submitted by the respondent] constitute general studies which do indeed show the existence of a general risk of cancer; but they do not focus on and do not address the particular kind of risk here at stake – the carcinogenic or genotoxic potential of the residues of those hormones found in meat derived from cattle to which the hormones had been administered for growth promotion purposes – as is required by paragraph 4 of Annex A of the *SPS Agreement*. Those general studies, are in other words, relevant but do not appear to be sufficiently specific to the case at hand".[132]

(vii) Who should carry out the risk assessment?

109. In *EC – Hormones*, the Appellate Body addressed the question of whether a Member should carry out its own risk assessment for a SPS measure:

"Article 5.1 does not insist that a Member that adopts a sanitary measure shall have carried out its own risk assessment . . . The SPS measure might well find its objective justification in a risk assessment carried out by another Member, or an international organization".[133]

(viii) Format of the risk assessment

110. The Panel on *Australia – Salmon* held that a risk assessment need not be an official government report:

"We note that these reports do not form part of Australia's formal risk assessment nor represent Australia's official government policy. However, to the extent they constitute relevant available scientific information which was submitted to the Panel, we consider it our task to take this evidence into account. We consider that, for purposes of our examination, the scientific and technical content of these reports and studies is relevant, not their administrative status (i.e., whether they are official government reports or not).

. . . Whether or not this evidence is part of official Australian government policy does not, in our mind, change the scientific weight to be given to it".[134]

(ix) Relevance of the timing of publication of risk assessment

111. With respect to the risk assessment requirement for SPS measures enacted *before* the entry into force of the *SPS Agreement*, the Panel on *EC – Hormones* noted:

---

[126] (*footnote original*) *Supra.*, para 124.
[127] Appellate Body Report on *Australia – Salmon*, para. 135.
[128] Appellate Body Report on *EC – Hormones*, para. 201.
[129] Appellate Body Report on *EC – Hormones*, para. 201.
[130] Panel Reports on *EC – Hormones (US)*, para. 8.257; *EC – Hormones (Canada)*, para. 8.258.
[131] Panel Report on *Australia – Salmon*, para. 8.58.
[132] Appellate Body Report on *EC – Hormones*, para. 200.
[133] Appellate Body Report on *EC – Hormones*, para. 190.
[134] Panel Report on *Australia – Salmon*, paras. 8.136–8.137.

"[Article 5.1] does not prevent that with respect to a sanitary measure enacted *before* the entry into force of the *SPS Agreement*, the risk assessment is carried out or invoked *after* the entry into force of that Agreement (and thus *after* the enactment of the sanitary measure in question). However, the fact that a sanitary measure may be enacted *before* the entry into force of the *SPS Agreement* does not mean that, once the *SPS Agreement* entered into force, there is no obligation for the Member in question to base that measure on a risk assessment."[135]

112. The Panel on *Australia – Salmon* while addressing Canada's complaint that Australia's measure was maintained without any form of risk assessment added in this respect:

"Article 5.1 does not qualify – either in terms of application in time or product coverage – the substantive obligation imposed on all WTO Members to base their sanitary measures on a risk assessment.

. . .

We note Australia's statement that its policy of allowing imports of salmon products heat-treated in accordance with the 1988 Conditions will be reviewed and that for these purposes an import risk analysis is scheduled. It is possible that this risk analysis provides a rational basis for the measure at issue. However, as of today and on the basis of the risk assessment before us, we do not detect such basis."[136]

113. In *Australia – Salmon (Article 21.5 – Canada)*, Canada claimed that the new Australian measures could not be said to be based on a risk assessment, because the 1999 Import Risk Analysis (IRA) (the Australian risk assessment for the amended measure) was only published in its final form on 12 November 1999, i.e. after the publication of the new measures which had occurred on 19 July 1999. The Panel rejected this argument as follows:

"We note that the final form of the 1999 IRA, though only edited and published in book form on 12 November 1999, is still dated July 1999 and that . . . the amendments made in the final 1999 IRA 'do not alter the substance or the conclusions of the report as announced on 19 July'.

On these grounds, we find that the fact that the 1999 IRA was only published in final form subsequent to the date the new sanitary measures were taken, does not, in this case, preclude the measures from being *based on* the 1999 IRA. All substantive elements of the risk assessment we looked at earlier were already included in the draft 1999 IRA of July 1999, i.e. *before* the new measures were taken."[137]

(x) Identifying the SPS measure

114. The Panel on *Australia – Salmon* defined the sanitary measure enacted by Australia to be an import prohibition on, *inter alia*, fresh, chilled and frozen salmon. The Panel then went on to state that the measure effectively imposed heat treatment "as a sanitary solution to the risk posed by the importation of salmon" and concluded that "these two perspectives [the import prohibition on fresh, chilled and frozen salmon and the heat treatment requirement] are two sides of a single coin: a consequence of Australia's sanitary requirement that salmon be heat-treated before it can be imported, is that imports of fresh, chilled and frozen salmon are prohibited".[138] The Appellate Body disagreed with this characterization of the Australian measure:

"In our view, the SPS measure at issue in this dispute can *only* be the measure which is *actually* applied to the product at issue. The product at issue is fresh, chilled or frozen salmon and the SPS measure applicable to fresh, chilled or frozen salmon is the import prohibition set forth in QP86A. The heat-treatment requirement provided for in the 1988 Conditions applies only to smoked salmon and salmon roe, not to fresh, chilled or frozen salmon.

We also do not share the Panel's view that the import prohibition and the heat-treatment requirement are 'two sides of the same coin'. Smoked salmon and fresh, chilled or frozen salmon are different products and the SPS measures applied to each are not 'two sides of the same coin'. We agree with Australia that it is not a consequence of the requirement that *smoked* salmon be heat-treated that imports of *fresh, chilled or frozen* salmon are prohibited. Imports of fresh, chilled or frozen salmon are prohibited as a direct consequence of the application of QP86A, and this prohibition has not been revoked, but has, in fact, been continuously maintained since 1975. We likewise do not share the Panel's view that the 1996 Requirements apply to fresh, chilled or frozen salmon. These requirements clearly apply only to imports of small amounts of smoked salmon."[139]

(xi) Evaluation of risk in a risk assessment ("Zero risk")

115. The Panel on *Australia – Salmon* held that "a risk assessment, on which to base an import prohibition in accordance with Article 5.1, cannot be premised on the concept of 'zero risk'. Otherwise, all import prohibitions would be based on a risk assessment since there is a risk

[135] Panel Report on *EC – Hormones (Canada)*, para. 8.102; Panel Report on *EC – Hormones (US)*, para. 8.99.
[136] Panel Report on *Australia – Salmon*, paras. 8.56 and 8.100.
[137] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.76–7.77.
[138] Panel Report on *Australia – Salmon*, para. 8.95.
[139] Appellate Body Report on *Australia – Salmon*, paras. 103–104.

(i.e., a *possibility* of an adverse event occurring), however remote, associated with most (if not all) imports".[140] On appeal, the Appellate Body emphasized the distinction between risk assessment under Article 5.1 and the determination, by a Member, of its own appropriate level of protection:

> "[I]t is important to distinguish – perhaps more carefully than the Panel did – between the evaluation of 'risk' in a risk assessment and the determination of the appropriate level of protection. As stated in our Report in *European Communities – Hormones*, the 'risk' evaluated in a risk assessment must be an ascertainable risk; theoretical uncertainty is 'not the kind of risk which, under Article 5.1, is to be assessed.' This does not mean, however, that a Member cannot determine its own appropriate level of protection to be 'zero risk'."[141]

(xii) No threshold level of risk required

116. In *EC – Hormones*, the Appellate Body addressed the European Communities' appeal that the original Panel was "in effect requiring a Member carrying out a risk assessment to quantify the potential for adverse effects on human health".[142] The Appellate Body elaborated on the term "scientifically identified risk" that the Panel had employed and the notion of "theoretical uncertainty" in the context of Article 5.1. The Appellate Body indicated that Article 5.1 does not address theoretical uncertainty: that is to say, "uncertainty that theoretically always remains since science can *never* provide *absolute* certainty that a given substance will not *ever* have adverse health effects":

> "It is not clear in what sense the Panel uses the term 'scientifically identified risk'. The Panel also frequently uses the term 'identifiable risk'[143], and does not define this term either. The Panel might arguably have used the terms 'scientifically identified risk' and 'identifiable risk' simply to refer to an ascertainable risk: if a risk is not ascertainable, how does a Member ever know or demonstrate that it exists? In one part of its Reports, the Panel opposes a requirement of an 'identifiable risk' to the uncertainty that theoretically always remains since science can *never* provide *absolute* certainty that a given substance will not *ever* have adverse health effects.[144] We agree with the Panel that this theoretical uncertainty is not the kind of risk which, under Article 5.1, is to be assessed. In another part of its Reports, however, the Panel appeared to be using the term 'scientifically identified risk' to prescribe implicitly that a certain *magnitude* or threshold level of risk be demonstrated in a risk assessment if an SPS measure based thereon is to be regarded as consistent with Article 5.1.[145] To the extent that the Panel purported to require a risk assessment to establish a minimum magnitude of risk, we must note that imposition of such a quantitative requirement finds no basis in the *SPS Agreement*. A panel is authorized only to determine whether a given SPS measure is 'based on' a risk assessment. As will be elaborated below, this means that a panel has to determine whether an SPS measure is sufficiently supported or reasonably warranted by the risk assessment."[146]

117. In *Japan – Apples*, the Appellate Body agreed with the Panel that "scientific prudence" displayed by the experts in this case did not relate to the "theoretical uncertainty" that is inherent in the scientific method:

> "The comments of the Panel in response to the argument of the United States on 'theoretical risk' should be viewed in their appropriate context. . . . We understand that the 'scientific prudence' displayed by the experts in this case related to risks that might arise from radical changes in Japan's current system of phytosanitary controls, taking into account Japan's island environment and climate. The scientific prudence displayed by the experts did not relate to the 'theoretical uncertainty' that is inherent in the scientific method and which stems from the intrinsic limits of experiments, methodologies, or instruments deployed by scientists to explain a given phenomenon. Therefore, we agree with the Panel that the scientific prudence displayed by the experts should not be 'completely assimilated' to the 'theoretical uncertainty' that the Appellate Body discussed in *EC – Hormones* as being beyond the purview of risks to be addressed by measures subject to the *SPS Agreement* . . ."[147]

(d) "as appropriate to the circumstances"

(i) Flexibility

118. When addressing the applicability of the *SPS Agreement* to measures adopted before the entry into force of the *WTO Agreement* the Appellate Body on *EC – Hormones* noted that the phrase "as appropriate to the circumstances" provides for a certain degree of flexibility:

> "We are aware that the applicability, as from 1 January 1995, of the requirement that an SPS measure be based on a risk assessment to the many SPS measures already in existence on that date, may impose burdens on Members. It is pertinent here to note that Article 5.1 stipulates that SPS measures must be based on a risk assessment, *as appropriate to the circumstances*, and this makes

[140] Panel Report on *Australia – Salmon*, para. 8.81.
[141] Appellate Body Report on *Australia – Salmon*, para. 125.
[142] Appellate Body Report on *EC – Hormones*, para. 185.
[143] In the footnote to this sentence, the Appellate Body cited Panel Reports on *EC – Hormones (US)*, paras. 8.124, 8.134, 8.136, 8.151, 8.153, 8.161, and 8.162; *EC – Hormones (Canada)*, paras. 8.127, 8.137, 8.139, 8.154, 8.156, 8.164, and 8.165.
[144] In the footnote to this sentence, the Appellate Body cited Panel Reports on *EC – Hormones (US)*, paras. 8.152–8.153; *EC – Hormones (Canada)*, paras. 8.155–8.156.
[145] (*footnote original*) US Panel Report, footnote 331; Canada Panel Report, footnote 437.
[146] Appellate Body Report on *EC – Hormones*, para. 186.
[147] Appellate Body Report on *Japan – Apples*, para. 241.

clear that the Members have a certain degree of flexibility in meeting the requirements of Article 5.1."[148]

119. The Panel on *Australia – Salmon* held that the phrase "as appropriate to the circumstances" created the possibility "to assess the risk, on a case-by-case basis, in terms of product, origin and destination, including, in particular, country-specific situations":

"Following Article 5.1, a risk assessment needs to be 'appropriate to the circumstances'. Answering a Panel question in this respect, Canada is of the view that the circumstances thus referred to are the source of the risk (e.g., an animal pathogen or a chemical contaminant) and the subject of the risk (i.e., whether it is to human, animal or plant life or health). For Australia, the phrase 'as appropriate to the circumstances' confers a right and obligation on WTO Members to assess the risk, on a case by case basis, in terms of product, origin and destination, including, in particular, country specific situations. We agree that both interpretations may be covered by the term 'as appropriate to the circumstances'. In our view, also the OIE risk assessment techniques as well as the scientific opinions we gathered, may shed light on what is a risk assessment 'appropriate to the circumstances'."[149]

(ii) Does not waive duty of risk assessment

120. The Panel on *Australia – Salmon* held that the phrase "as appropriate to the circumstances" did not alleviate the duty to base a measure on a risk assessment:

"As to the product coverage of Article 5.1, the reference contained in Article 5.1 to base sanitary measures on an assessment 'as appropriate to the circumstances' cannot, in our view, annul or supersede the substantive obligation resting on Australia to base the sanitary measure in dispute (irrespective of the products that measure may cover) on a risk assessment. We consider that the reference 'as appropriate to the circumstances' relates, rather, to the way in which such risk assessment has to be carried out.[150] Only Article 5.7 allows for an exception to the obligation to base sanitary measures on a risk assessment."[151]

(e) Taking into account risk assessment techniques

(i) Mention of scientific studies in preambular sections of the domestic directives

121. The Appellate Body on *EC – Hormones* disagreed with the Panel's finding that certain scientific studies were not taken into consideration, *inter alia*, because these studies were not mentioned in the preambles to the relevant European Communities' directives:

"In the course of demanding evidence that EC authorities actually 'took into account' certain scientific studies, the Panel refers to the preambles of the EC Directives here involved. The Panel notes that such preambles did not mention any of the scientific studies referred to by the European Communities in the panel proceedings. Preambles of legislative or quasi-legislative acts and administrative regulations commonly fulfil requirements of the internal legal orders of WTO Members. Such preambles are certainly not required by the *SPS Agreement*; they are not normally used to demonstrate that a Member has complied with its obligations under international agreements. The absence of any mention of scientific studies in the preliminary sections of the EC Directives does not, therefore, prove anything so far as the present case is concerned".[152]

(f) Relationship with other paragraphs of Article 5

(i) Article 5.2

122. For discussion on the risk factors to be taken into account, see Section VI.B.2(a) below.

(ii) Article 5.5

123. On the relationship between Articles 5.1 and 5.5, the Panel on *Australia – Salmon* stated that "the obligations contained in Article 5.1 (risk assessment) and Article 5.5 are complementary, not mutually exclusive. We consider, therefore, that a WTO Member cannot justify the inconsistency with one Article on the ground that such inconsistency avoids an additional inconsistency with another Article."[153]

(g) Relationship with other Articles

(i) Article 1.1

124. As relates to the applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 5 above.

2. Article 5.2

(a) Risk factors to be taken into account

(i) Risk ascertainable by scientific and non scientific processes

125. With respect to the risk factors to be examined in the context of a risk assessment, the Appellate Body on *EC – Hormones* agreed with the Panel's emphasis of the scientific nature of risk assessment, but added a qualification on the nature of the "risk":

"The listing in Article 5.2 begins with 'available scientific evidence'; this, however, is only the beginning. We note in this connection that the Panel states that, for purposes

[148] Appellate Body Report on *EC – Hormones*, para. 129.
[149] Panel Report on *Australia – Salmon*, para. 8.71.
[150] (*footnote original*) See further in para. 8.70.
[151] Panel Report on *Australia – Salmon*, para. 8.57.
[152] Appellate Body Report on *EC – Hormones*, para. 191.
[153] Panel Report on *Australia – Salmon*, para. 8.126.

of the EC measures in dispute, a risk assessment required by Article 5.1 is 'a *scientific* process aimed at establishing the *scientific* basis for the sanitary measure a Member intends to take'.[154] To the extent that the Panel intended to refer to a process characterized by systematic, disciplined and objective enquiry and analysis, that is, a mode of studying and sorting out facts and opinions, the Panel's statement is unexceptionable. However, to the extent that the Panel purports to exclude from the scope of a risk assessment in the sense of Article 5.1, all matters not susceptible of quantitative analysis by the empirical or experimental laboratory methods commonly associated with the physical sciences, we believe that the Panel is in error. Some of the kinds of factors listed in Article 5.2 such as 'relevant processes and production methods' and 'relevant inspection, sampling and testing methods' are not necessarily or wholly susceptible of investigation according to laboratory methods of, for example, biochemistry or pharmacology. Furthermore, there is nothing to indicate that the listing of factors that may be taken into account in a risk assessment of Article 5.2 was intended to be a closed list. It is essential to bear in mind that the risk that is to be evaluated in a risk assessment under Article 5.1 is not only risk ascertainable in a science laboratory operating under strictly controlled conditions, but also risk in human societies as they actually exist, in other words, the actual potential for adverse effects on human health in the real world where people live and work and die."[155]

(ii) Risks arising from control of compliance with certain requirements

126. Having held that "risk assessment" did not only refer to the risk ascertainable in a science laboratory operating under strictly controlled conditions, the Appellate Body on *EC – Hormones* considered that, for instance, risks arising from difficulties of control of compliance with certain requirements could be taken into account in the context of a risk assessment:

"It should be recalled that Article 5.2 states that in the assessment of risks, Members shall take into account, in addition to 'available scientific evidence', 'relevant processes and production methods; [and] relevant inspection, sampling and testing methods'. We note also that Article 8 requires Members to 'observe the provisions of Annex C in the operation of control, inspection and approval procedures . . .'. The footnote in Annex C states that 'control, inspection and approval procedures include, *inter alia*, procedures for sampling, testing and certification'. We consider that this language is amply sufficient to authorize the taking into account of risks arising from failure to comply with the requirements of good veterinary practice in the administration of hormones for growth promotion purposes, as well as risks arising from difficulties of control, inspection and enforcement of the requirements of good veterinary practice."[156]

(iii) Risks arising from abuse of controlled substances not to be excluded on an a priori basis

127. The Appellate Body on *EC – Hormones* added a caveat to its finding referred to in paragraphs 126 above. It held that risks arising from the potential abuse of controlled substances in practice need not necessarily be taken into account in each and every case; it explained that its findings in paragraphs 126 above were to be interpreted as meaning that such types of risk should not be excluded *a priori*:

"[T]he *SPS Agreement* requires assessment of the potential for adverse effects on human health arising from the presence of contaminants and toxins in food. We consider that the object and purpose of the *SPS Agreement* justify the examination and evaluation of all such risks for human health whatever their precise and immediate origin may be. We do not mean to suggest that risks arising from potential abuse in the administration of controlled substances and from control problems need to be, or should be, evaluated by risk assessors in each and every case. When and if risks of these types do in fact arise, risk assessors may examine and evaluate them. Clearly, the necessity or propriety of examination and evaluation of such risks would have to be addressed on a case-by-case basis. What, in our view is a fundamental legal error is to exclude, on an *a priori* basis, any such risks from the scope of application of Articles 5.1 and 5.2."[157]

(b) Relationship with other Articles

(i) Articles 2.2 and 5.1

128. In *Australia – Salmon*, the Appellate Body agreed[158] with the finding of the Panel, whereby the Panel held that a violation of Article 5.1 or 5.2 would imply a violation of the more general provision of Article 2.2:

"Articles 5.1 and 5.2 – in the words of the Appellate Body in *EC – Hormones* when dealing with the relationship between Articles 2.3 and 5.5 – 'may be seen to be marking out and elaborating a particular route leading to the same destination set out in' Article 2.2. Indeed, in the event a sanitary measure is not based on a risk assessment as required in Articles 5.1 and 5.2, this measure can be presumed, more generally, not to be based on scientific principles or to be maintained without sufficient scientific evidence. We conclude, therefore, that if we find a violation of the more specific Article 5.1 or 5.2 such finding can be presumed to imply a violation of the more general provisions of Article 2.2. We do recog-

[154] (*footnote original*) Panel Reports on *EC – Hormones (US)*, para. 8.107 and *EC – Hormones (Canada)*, para. 8.110.

nize, at the same time, that given the more general character of Article 2.2 not all violations of Article 2.2 are covered by Articles 5.1 and 5.2."[159]

3. Article 5.3

129. In assessing risk and determining the measure to be applied, the Appellate Body on *Australia – Salmon* noted that the presence of unknown and uncertain elements does not affect the requirements under Article 5.3. See paragraph 101 above.

4. Article 5.4

(a) General

130. The Panel on *EC – Hormones*, in a finding not reviewed by the Appellate Body, held that Article 5.4 was of an hortatory nature:

"Guided by the wording of Article 5.4, in particular the words 'should' (not 'shall') and 'objective', we consider that this provision of the *SPS Agreement* does not impose an obligation. However, this objective of minimizing negative trade effects has nonetheless to be taken into account in the interpretation of other provisions of the *SPS Agreement*."[160]

(b) Relationship with other paragraphs of Article 5

131. In *Australia – Salmon*, the Appellate Body determined that the *SPS Agreement* contains an implicit obligation that WTO Members determine their appropriate level of protection.[161] See paragraph 151 below.

5. Article 5.5

(a) Standard of review

132. While examining whether Australia imposed different levels of protection in respect of "different situations" in the sense of Article 5.5, the Panel addressed an argument made by Australia, the responding party, that for a situation to be so compared, a risk assessment in respect of it would need to have been carried out. The Panel emphasized that it could not conduct its own risk assessment, but rather had to weigh the evidence before it:

"We cannot conduct our own risk assessment. Nor do we attempt to do so in this report. The fact that one of the experts advising the Panel stated that 'if you are trying to say which [of two products] is the most risky, then you need to know something about and possibly do a full assessment for [the other] product' and that 'it would be sensible to assess that which you have prioritized initially to have the highest risk first, but until you have done the risk assessment, you actually cannot be sure you have got that right', does not change our position. Nor do we disagree with these statements. Indeed, for a scientist to say with scientific certainty that one product represents a higher risk than the other, there may be a need to have two, more or less, complete sets of data, including two risk assessments. And even on that basis a scientist would probably not be able to state with absolute certainty that one product is riskier than the other. Our mandate is different. We are not asked to make a scientific risk comparison nor to state with scientific certainty that one product is riskier than the other. We can only weigh the evidence put before us and, on the basis of the rules of burden of proof we adopted, including the use of factual presumptions, decide whether sufficient evidence is before us – evidence which has not been rebutted – in order to state that it can be presumed that one product is riskier than the other."[162]

(b) Cumulative elements of Article 5.5

133. In *EC – Hormones*, the Appellate Body considered the three elements of Article 5.5 and held that these elements were cumulative in nature. It emphasized in particular, that the third element, should be demonstrated positively and independently of the second element:

"The first element is that the Member imposing the measure complained of has adopted its own appropriate levels of sanitary protection against risks to human life or health in several different situations. The second element to be shown is that those *levels of protection* exhibit arbitrary or unjustifiable differences ('distinctions' in the language of Article 5.5) in their treatment of different situations. The last element requires that the arbitrary or unjustifiable differences result in discrimination or a disguised restriction of international trade. We understand the last element to be referring to the *measure* embodying or implementing a particular level of protection as resulting, in its application, in discrimination or a disguised restriction on international trade. . . .

We consider the above three elements of Article 5.5 to be cumulative in nature; all of them must be demonstrated to be present if violation of Article 5.5 is to be found. In particular, both the second and third elements must be found. The second element alone would not suffice. The third element must also be demonstrably present: the implementing measure must be shown to be applied in such a manner as to result in discrimination or a disguised restriction on international trade. The presence of the second element – the arbitrary or unjustifiable character of differences in *levels of protection* considered by a Member as appropriate in differing situations – may in practical effect operate as a 'warning' signal that the implementing *measure* in its application *might* be a discriminatory measure or *might*

[159] Panel Report on *Australia – Salmon*, para. 8.52.
[160] Panel Report on *EC – Hormones (Canada)*, para. 8.169; Panel Report on *EC – Hormones (US)*, para. 8.166.
[161] Appellate Body Report on *Australia – Salmon*, paras. 205–207.
[162] Panel Report on *Australia – Salmon*, para. 8.126.

be a restriction on international trade disguised as an SPS measure for the protection of human life or health. Nevertheless, the measure itself needs to be examined and appraised and, in the context of the differing levels of protection, shown to result in discrimination or a disguised restriction on international trade."[163]

(c) "appropriate level of protection"

(i) Legal status of the first part of Article 5.5

134. In *EC – Hormones*, with respect to the first part of Article 5.5, the Appellate Body held that the statement of the goal of consistency did not establish a legal obligation of consistency of appropriate levels of protection. Rather, only certain types of inconsistencies were to be avoided:

"The objective of Article 5.5 is formulated as the 'achieving [of] consistency in the application of the concept of appropriate level of sanitary or phytosanitary protection'. Clearly, the desired consistency is defined as a goal to be achieved in the future. To assist in the realization of that objective, the Committee on Sanitary and Phytosanitary Measures is to develop *guidelines for the practical implementation of Article 5.5*, bearing in mind, among other things, that ordinarily, people do not voluntarily expose themselves to health risks. Thus, we agree with the Panel's view that the statement of that goal [consistency] does not establish a *legal obligation* of consistency of appropriate levels of protection. We think, too, that the goal set is not absolute or perfect consistency, since governments establish their appropriate levels of protection frequently on an *ad hoc* basis and over time, as different risks present themselves at different times. It is only arbitrary or unjustifiable inconsistencies that are to be avoided."[164]

(ii) "distinctions in the levels of protection in different situations"

Different situations

135. The Panel on *EC – Hormones* found that the "different situations" that can be compared under Article 5.5 were situations "where the same substance or the same adverse health effect is involved".[165] On appeal, the Appellate Body stated:

"Clearly, comparison of *several* levels of sanitary protection deemed appropriate by a Member is necessary if a panel's inquiry under Article 5.5 is to proceed at all. The situations exhibiting differing levels of protection cannot, of course, be compared unless they are comparable, that is, unless they present some common element or elements sufficient to render them comparable. If the situations proposed to be examined are *totally* different from one another, they would not be rationally comparable and the differences in levels of protection cannot be examined for arbitrariness."[166]

Comparable situations

136. In *Australia – Salmon*, the Appellate Body held that comparable situations under Article 5.5 were those where either the same or a similar disease, or where the same biological and economic consequences were involved:

"Situations which involve a risk of entry, establishment or spread of the same or a similar disease have some common elements sufficient to render them comparable under Article 5.5. Likewise, situations with a risk of the same or similar associated potential biological and economic consequences also have some common elements sufficient to render them comparable under Article 5.5. We, therefore, consider that for 'different' situations to be comparable under Article 5.5, there is no need for both the disease *and* the biological and economic consequences to be the same or similar."[167]

Level of protection as reflected in SPS Measures

137. The Panel on *Australia – Salmon*, addressed the question of how to ascertain the level of sanitary protection chosen by a Member. The Panel found that this level of sanitary protection will be reflected in the sanitary measure itself, but noted that "imposing the same sanitary measure for different situations does not necessarily result in the same level of protection".[168] The Appellate Body did not disagree with these statements in particular, but reversed the Panel's related findings, because it disagreed with the statement by the Panel that "the level of protection implied or reflected in a sanitary *measure* or regime imposed by a WTO Member can be presumed to be at least as high as the level of protection considered to be appropriate by that Member."[169]

138. In response to Australia's argument that a "situation" cannot be compared under Article 5.5 if no risk assessment has been made in respect of it, the Panel on *Australia – Salmon*, in a finding not reviewed by the Appellate Body, found that since Australia had a sanitary regime to address situations in respect of which no risk assessment existed, a level of protection existed:

"[W]e consider that even though Australia has not yet conducted import risk analyses for the other products compared under Article 5.5, Australia does, nevertheless, have a level of protection it considers to be appropriate for these other products. Australia currently has a sanitary regime, imposing specific sanitary measures or refraining from such regulation, for these other prod-

[163] Appellate Body Report on *EC – Hormones*, paras. 214–215.
[164] Appellate Body Report on *EC – Hormones*, para. 213.
[165] Panel Report on *EC – Hormones (Canada)*, para. 8.179; Panel Report on *EC – Hormones (US)*, para. 8.176.
[166] Appellate Body Report on *EC – Hormones*, para. 217.
[167] Appellate Body Report on *Australia – Salmon*, para. 146.
[168] Panel Report on *Australia – Salmon*, paras. 8.123–8.124.
[169] Appellate Body Report on *Australia – Salmon*, para. 196.

ucts. This sanitary regime (whether or not specific measures are enacted) reflects a level of protection. To have a specific level of protection, there is no need to first complete a risk assessment . . . Article 5.5 directs us to compare for different situations the related levels of protection as they are currently considered to be appropriate by Australia and this whether or not the sanitary measures enacted to achieve that level are based on a risk assessment. Of course, such comparison would be easier and more accurate if for both situations an appropriate risk assessment were available. However, according to Article 5.5 and our mandate set out in Article 11 of the DSU (to make an 'objective assessment of the matter before [us], including an objective assessment of the facts of the case'), we are called upon in this case to make this comparison and to do so on the basis of the evidence before us."[170]

(iii) "Arbitrary or unjustifiable" distinctions in levels of protection

139. The Panel on *EC – Hormones* found arbitrary or unjustifiable distinction in the level of protection in the European Communities' regulation in that while the European Communities prohibited added natural hormones with respect to beef, it did not attempt to limit naturally occurring hormones.[171] The Appellate Body disagreed:

"We do not share the Panel's conclusions that the above differences in levels of protection in respect of added hormones in treated meat and in respect of naturally-occurring hormones in food, are merely arbitrary and unjustifiable. We consider there is a fundamental distinction between added hormones (natural or synthetic) and naturally-occurring hormones in meat and other foods. In respect of the latter, the European Communities simply takes no regulatory action; to require it to prohibit totally the production and consumption of such foods or to limit the residues of naturally-occurring hormones in food, entails such a comprehensive and massive governmental intervention in nature and in the ordinary lives of people as to reduce the comparison itself to an absurdity."[172]

(iv) Distinctions which "result in discrimination or a disguised restriction on international trade"

Factors that result in a disguised restriction on international trade

140. The Panel on *Australia – Salmon* found three "warning signals" and three "other factors more substantial in nature" with respect to the issue of whether there was a disguised restriction on trade arising from the distinct levels of protection existing in Australia. The three warning signals that the Panel indicated were: (1) "the arbitrary character of the differences in levels of protection"[173]; (2) "the rather substantial difference in levels of protection"[174]; and (3) its earlier "two findings of inconsistency (with both Article 5.1 and 2.2)" which make it "seem that the measure at issue constitutes an import prohibition, i.e., a restriction on international trade, 'disguised' as a sanitary measure".[175] The three "other factors" were: (1) Australia was applying two different implementing measures to products which represented the same risk, leading to discrimination between salmon, on the one hand, and herring used as bait and live ornamental finfish on the other; (2) the change in conclusions in a preliminary report and in f the final report one year later; and (3) the fact that Australia was imposing a very strict measure upon importation of salmon, but not similarly strict standards for the internal movement of salmon products within Australia. The Appellate Body agreed with the Panel with respect to the first two warning signals. On the first warning signal it added that "the Panel considered the arbitrary or unjustifiable character of differences in levels of protection as a 'warning signal' for, and not as 'evidence' of, a disguised restriction on international trade".[176] The Appellate Body was also in agreement with the Panel that the rather substantial difference in levels of protection should be treated as a separate (second) warning signal.[177] The Appellate Body also approved of the third "warning factor". However, while it also agreed with the Panel on the second and third of the "other factors", the Appellate Body held, with respect to the first of these "other factors":

"We believe that the first 'additional factor' should indeed be excluded from the examination of the third element of Article 5.5. All 'arbitrary or unjustifiable distinctions' in levels of protection will lead logically to discrimination between products, whether the products are the same (e.g., discrimination between imports of salmon from different countries or between imported salmon and domestic salmon) or different (e.g., salmon versus herring used as bait and live ornamental finfish). The first 'additional factor' is therefore not different from the first warning signal, and should not be taken into account as a *separate* factor in the determination of

[170] Panel Report on *Australia – Salmon*, paras. 8.125–8.126.
[171] Panel Report on *EC – Hormones (Canada)*, para. 8.193; Panel Report on *EC – Hormones (US)*, para. 8.190.
[172] Appellate Body Report on *EC – Hormones*, para. 221. When comparing the levels of protection for hormones used for growth promotion purposes and hormones used for therapeutic and zootechnical purposes – a comparison not further pursued by the panels – the Appellate Body, referring to the differences in frequency and scale of the two treatments and the strict mode of administration of the latter treatment, found that the distinction in levels of protection "is not, in itself, 'arbitrary or unjustifiable'." (see paras. 222–225 of the Report).
[173] Panel Report on *Australia – Salmon*, para. 8.149.
[174] Panel Report on *Australia – Salmon*, para. 8.150.
[175] Panel Report on *Australia – Salmon*, para. 8.151.
[176] Appellate Body Report on *Australia – Salmon*, para. 162.
[177] Appellate Body Report on *Australia – Salmon*, para. 164.

whether an SPS measure results in a 'disguised restriction on international trade'."[178]

Applicability of GATT Articles III and XX jurisprudence

141. The Panel on *EC – Hormones* considered pertinent, in its analysis of the terms "discrimination" and "disguised restriction on international trade", the Appellate Body's jurisprudence under Articles III and XX of the *GATT 1994*. The Appellate Body disagreed with this finding:

"We agree with the Panel's view that 'all three elements [of Article 5.5] need to be distinguished and addressed separately'.[179] We also recall our interpretation that Article 5.5 and, in particular, the terms 'discrimination or a disguised restriction on international trade', have to be read in the context of the basic obligations contained in Article 2.3, which requires that 'sanitary . . . *measures* shall not be *applied in a manner which would constitute a disguised restriction on international trade*'. (emphasis added)

However, we disagree with the Panel on two points. First, in view of the structural differences between the standards of the *chapeau* of Article XX of the GATT 1994 and the elements of Article 5.5 of the *SPS Agreement*, the reasoning in our Report in *United States – Gasoline*, quoted by Panel, cannot be casually imported into a case involving Article 5.5 of the *SPS Agreement*. Secondly, in our view, it is similarly unjustified to assume applicability of the reasoning of the Appellate Body in *Japan – Alcoholic Beverages* about the inference that may be drawn from the sheer size of a tax differential for the application of Article III:2, second sentence, of the GATT 1994, to the quite different question of whether arbitrary or unjustifiable differences in levels of protection against risks for human life or health, 'result in discrimination or a disguised restriction on international trade'."[180]

142. The Appellate Body on *EC Hormones* explained its reluctance to apply its jurisprudence under Article III:2 of the *GATT 1994* to Article 5.5 of the *SPS Agreement* by noting that while there was a "clear and linear relationship" between a tax differential and protection given to domestic products, no such clear relationship existed between differentials of levels of protection of human health and protection given to domestic products:

"The differential involved in *Japan – Alcoholic Beverages* was a tax differential, which is very different from a differential in levels of protection. Unlike a differential in levels of protection, a tax differential is always expressed in quantitative terms and a significant tax differential in favour of domestic products will inevitably affect the competitiveness of imported products and thus afford protection to domestic products. There is a clear and linear relationship between a tax differential and the protection afforded to domestic products. There is, however, no such relationship between a differential in levels of human health protection and discrimination or disguised restriction on trade."[181]

Differences in levels of protection for comparable situations not sufficient

143. After making its findings referenced in paragraphs 141–142 above, the Appellate Body on *EC – Hormones* reversed the Panel's finding that the EC measure in question constituted "discrimination or a disguised restriction on international trade". The Appellate Body held with respect to the difference in levels of protection for certain comparable situations:

"[T]he degree of difference, or the extent of the discrepancy, in the levels of protection, is only one kind of factor which, along with others, may cumulatively lead to the conclusion that discrimination or a disguised restriction on international trade in fact results from the application of a measure or measures embodying one or more of those different levels of protection. Thus, we do not think that the difference between a 'no residues' level and 'unlimited residues' level is, together with a finding of an arbitrary or unjustifiable difference, sufficient to demonstrate that the third, and most important, requirement of Article 5.5 has been met . . . Evidently, the answer to the question whether arbitrary or unjustifiable differences or distinctions in levels of protection established by a Member do in fact result in discrimination or a disguised restriction on international trade must be sought in the circumstances of each individual case."[182]

(d) "guidelines to further practical implementation . . ."

144. At its meeting of 21–22 June 2000, the SPS Committee adopted the Guidelines to Further the Practical Implementation of Article 5.5.[183] These guidelines address the objective of achieving consistency in the application of the concept of the appropriate level of protection.[184]

(e) Relationship with other paragraphs of Article 5

145. On the relationship between Articles 5.1 and 5.5, see paragraph 123 above.

(f) Relationship with other Articles

(i) Article 1.1

146. As relates to applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 6 above.

6. Article 5.6

(a) Cumulative elements

147. In *Australia – Salmon*, with respect to the structure of Article 5.6, the Appellate Body identified three separate elements and found that these elements applied cumulatively:

> "We agree with the Panel that Article 5.6 and, in particular, the footnote to this provision, clearly provides a three-pronged test to establish a violation of Article 5.6. As already noted, the three elements of this test under Article 5.6 are that there is an SPS measure which:
>
> (1) is reasonably available taking into account technical and economic feasibility;
>
> (2) achieves the Member's appropriate level of sanitary or phytosanitary protection; and
>
> (3) is significantly less restrictive to trade than the SPS measure contested.
>
> These three elements are cumulative in the sense that, to establish inconsistency with Article 5.6, all of them have to be met. If any of these elements is not fulfilled, the measure in dispute would be consistent with Article 5.6. Thus, if there is no alternative measure available, taking into account technical and economic feasibility, *or* if the alternative measure does not achieve the Member's appropriate level of sanitary or phytosanitary protection, *or* if it is not significantly less trade-restrictive, the measure in dispute would be consistent with Article 5.6."[185]

148. In *Japan – Agricultural Products II*, the Appellate Body confirmed the finding referenced in paragraph 147 above:[186]

(b) "achieves the appropriate level of . . . protection"

(i) Determining "appropriate level of . . . protection" as a "prerogative" of the Member concerned

149. The Appellate Body on *Australia – Salmon* emphasized that determining the appropriate level of protection is the *prerogative* of the Member concerned:

> "We do not believe that Article 11 of the DSU, or any other provision of the DSU or of the *SPS Agreement*, entitles the Panel or the Appellate Body, for the purpose of applying Article 5.6 in the present case, to substitute its own reasoning about the implied level of protection for that expressed consistently by Australia. The determination of the appropriate level of protection, a notion defined in paragraph 5 of Annex A . . . is a *prerogative* of the Member concerned and not of a panel or of the Appellate Body."[187]

150. In *Japan – Agricultural Products II*, the Panel emphasized that it was up to Japan to determine its appropriate level of protection:

> "Both parties agree that it is up to Japan to determine its appropriate level of phytosanitary protection with respect to codling moth. We agree since the *SPS Agreement* (in paragraph 5 of Annex A) defines the 'appropriate level of . . . phytosanitary protection' as '[t]he level of protection *deemed appropriate by the Member* establishing a . . . phytosanitary measure to protect . . . plant life or health within its territory'[188], *in casu*, the level deemed appropriate by Japan."[189]

(ii) Implied or explicit level of protection

<u>General</u>

151. In *Australia – Salmon*, the question arose whether a WTO Member is obliged to determine, positively, its appropriate level of protection. While the Panel had held that no such obligation existed[190], the Appellate Body determined that such an obligation exists under the *SPS Agreement*, albeit only implicitly. However, it also held that where a Member fails to determine its appropriate level of protection, this level of protection can be established by a panel on the basis of existing relevant SPS measures:

> "We recognize that the *SPS Agreement* does not contain an *explicit* provision which obliges WTO Members to determine the appropriate level of protection. Such an obligation is, however, implicit in several provisions of the *SPS Agreement*, in particular, in paragraph 3 of Annex B, Article 4.1, Article 5.4 and Article 5.6 of the *SPS Agreement* . . .
>
> We thus believe that the *SPS Agreement* contains an implicit obligation to determine the appropriate level of protection. We do not believe that there is an obligation to determine the appropriate level of protection in quantitative terms. This does not mean, however, that an importing Member is free to determine its level of protection with such vagueness or equivocation that the application of the relevant provisions of the *SPS Agreement,* such as Article 5.6, becomes impossible. It would obviously be wrong to interpret the *SPS Agreement* in a way that would render nugatory entire

[186] Appellate Body Report on *Japan – Agricultural Products II*, para. 95.
[187] Appellate Body Report on *Australia – Salmon*, para. 199.
[188] (*footnote original*) Emphasis added.
[189] Panel Report on *Japan – Agricultural Products II*, para. 8.81.
[190] Panel Report on *Australia – Salmon*, para. 8.107.

> Articles or paragraphs of Articles of this Agreement and allow Members to escape from their obligations under this Agreement.
>
> . . . we believe that in cases where a Member does not determine its appropriate level of protection, or does so with insufficient precision, the appropriate level of protection may be established by panels on the basis of the level of protection reflected in the SPS measure actually applied. Otherwise, a Member's failure to comply with the implicit obligation to determine its appropriate level of protection – with sufficient precision – would allow it to escape from its obligations under this Agreement and, in particular, its obligations under Articles 5.5 and 5.6."[191]

Statement by Member

152. In *Australia – Salmon*, the Panel had found that "the *level of* protection implied or reflected in a sanitary *measure* or regime imposed by a WTO Member can be presumed to be at least as high as the level of protection considered to be *appropriate* by that Member."[192] The Appellate Body disagreed with this statement, in particular because Australia had explicitly stated that its level of protection was different from the one reflected in its measure. The Appellate Body stressed that an explicit statement by a Member about its level of protection could not be questioned by a Panel or the Appellate Body. See paragraph 149 above.

As reflected by SPS measure

153. The Appellate Body on *Australia – Salmon*, also emphasized the differences between the "appropriate level of protection" and the SPS measure:

> "The 'appropriate level of protection' established by a Member and the 'SPS measure' have to be clearly distinguished.[193] They are not one and the same thing. The first is an *objective*, the second is an *instrument* chosen to attain or implement that objective.
>
> It can be deduced from the provisions of the *SPS Agreement* that the determination by a Member of the 'appropriate level of protection' logically precedes the establishment or decision on maintenance of an 'SPS measure'.
>
> . . . The words of Article 5.6, in particular the terms '*when establishing or maintaining* sanitary . . . protection', demonstrate that the determination of the level of protection is an element in the decision-making process which logically *precedes* and is *separate* from the establishment or maintenance of the SPS measure. It is the appropriate level of protection which determines the SPS measure to be introduced or maintained, not the SPS measure introduced or maintained which determines the appropriate level of protection. To imply the appropriate level of protection from the existing SPS measure would be to assume that the measure always achieves the appropriate level of protection determined by the Member. That clearly cannot be the case."[194]

(c) "significantly less restrictive to trade"

154. In *Australia – Salmon*, the Panel examined whether the measure at issue met the requirement of an alternative measure which is "significantly less restrictive to trade".[195] The Panel found:

> "Canada argues that all four alternative options set out in the 1996 Final Report are significantly less trade restrictive. In its request for access to the Australian market, Canada examined in particular headless, eviscerated product and advocated that these products could be safely imported. We recall that the measure imposed by Australia (in effect, certain heat treatment requirements) *prohibits* the importation into Australia of fresh, chilled or frozen salmon, including the salmon products further examined. All four alternative options outlined above would *allow* imports of the salmon products further examined, albeit under specific conditions (e.g., the salmon products would have to be retail-ready fillets, eviscerated, headless or gilled, etc. . .). We consider that even imposing the most stringent of these specific conditions would still be significantly less restrictive to trade than an outright prohibition. As opposed to any of the other conditions, heat treatment actually changes the nature of the product and limits its use. Heat-treated salmon can obviously no longer be consumed as fresh salmon. Eviscerated, headless or filleted salmon, on the other hand, can either be consumed as fresh salmon or cooked salmon.[196] We consider, therefore, that Canada has raised a presumption that all four alternatives outlined in the 1996 Final Report are 'significantly less restrictive to trade' than the measure in dispute and that Australia has not rebutted this presumption."[197]

---

[191] Appellate Body Report on *Australia – Salmon*, paras. 205–207.

[192] Panel Report on *Australia – Salmon*, para. 8.173

[193] (*footnote original*) That the level of protection and the SPS measure applied have to be clearly distinguished results already from our Report in *European Communities – Hormones*, WT/DS26/AB/R, WT/DS48/AB/R, adopted 13 February 1998, para. 214.

[194] Appellate Body Report on *Australia – Salmon*, paras. 200–201, 203.

[195] Panel Reports on *Australia – Salmon*, para. 8.182; *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.150–7.153; and *Japan – Agricultural Products II*, paras. 8.79, 8.89, 8.95–8.96 and 8.103–8.104.

[196] (*footnote original*) Out of a total of 66,234 tonnes of Canadian salmon exports in 1996, 50,838 tonnes were fresh and frozen salmon; the rest was canned salmon. As opposed to canned or heat-treated salmon, Canada submits that "recent trends indicate consumer preference for fresh and frozen salmon" (Canada, First Submission, para. 31). Australia seems to recognize this when it states that: "For [Australian] farmed Atlantic salmon [the main salmon species commercialized in Australia] supply to both the domestic and export market is predominantly of whole fresh fish" (Australia, Second Submission, para. 58).

[197] Panel Report on *Australia – Salmon*, para. 8.182.

(d) "taking into account technical and economic feasibility"

155. The Panel on *Australia – Salmon* found that there existed alternatives to the Australian measure, as evidenced by the Australian report at issue, and found that nothing implied that any of these four alternatives would be technically or economically unfeasible.[198] The Appellate Body reversed this finding, because it had earlier found that the Panel had examined the wrong measure.[199]

(ii) "Reasonably available"

156. The Panel on *Australia – Salmon (Article 21.5 – Canada)*, while examining one of the four alternatives proposed by Canada, stated with respect to whether a measure was "reasonably available" within the meaning of footnote 3 in Article 5.6:

> "[S]ince one can assume that current Australian requirements are 'reasonably available taking into account technical and economic feasibility', also a regime without the consumer-ready requirements [the current Australian requirements] . . . would be so. Given that inspection and control to release from quarantine only product that meets the consumer-ready requirements would no longer be necessary, a regime without the consumer ready requirements would be even more reasonably available in the sense of Article 5.6."[200]

157. With regard to the phrase "achieves [the Member's] appropriate level of . . . protection" under Article 5.6, see Section VI.B.6(b) above.

(iii) Burden of proof

158. In *Japan – Agricultural Products II*, concerning the issue of the burden of proof, the Appellate Body reversed the Panel's findings on Article 5.6, holding that the Panel could not have made the finding at issue, because the United States as the complaining party had not made a relevant claim and, *a fortiori*, had not established a prima facie case. The Appellate Body then stressed that the investigative authority of a panel did not stretch so far as to "make the case for a complaining party":

> "Pursuant to the rules on burden of proof set out above, we consider that it was for the United States [complainant] to establish a *prima facie* case that there is an alternative measure that meets all three elements under Article 5.6 in order to establish a *prima facie* case of inconsistency with Article 5.6. Since the United States did not even claim before the Panel that the 'determination of sorption levels' is an alternative measure which meets the three elements under Article 5.6, we are of the opinion that the United States did not establish a *prima facie* case that the 'determination of sorption levels' is an alternative measure within the meaning of Article 5.6."[201]

(iv) Relationship with other Articles

Article 1.1

159. On the applicability of the *SPS Agreement* to measures adopted before 1 January 1995 and measures adopted since, see paragraph 6 above.

Article 2.2

160. In *Australia – Salmon*, the Panel noted that "Article 5.6 must be read in context . . . an important part of the context of Article 5 is Article 2. We consider that Article 5.6 should, in particular, be read in light of Article 2.2".[202] The Appellate Body reversed the Panel's finding because it found that the Panel had examined the wrong measure.[203] The Panel on *Japan – Agricultural Products II* reached the same conclusion on the relationship between Articles 2.2 and 5.6, but the Appellate Body did not address this issue on appeal.[204]

161. In *Japan – Agricultural Products II*, the Panel noted that its "findings under Article 5.6 would stand even if the measure in dispute were not in violation of Article 2.2".[205] It added that "even if we were to have found that Japan's measure is maintained with sufficient scientific evidence in accordance with Article 2.2, we would then be called upon to examine whether the measure is consistent with Article 5.6."[206] The Appellate Body did not specifically address this statement on appeal.

7. Article 5.7

(a) General

162. The Appellate Body on *Japan – Agricultural Products II* referred to Article 5.7 as a "qualified exemption". See paragraph 36 above:

> "Article 5.7 operates as a *qualified* exemption from the obligation under Article 2.2 not to maintain SPS measures without sufficient scientific evidence. An overly broad and flexible interpretation of that obligation would render Article 5.7 meaningless."[207]

207 Appellate Body Report on *Japan – Agricultural Products II*, para. 80.

(i) Four cumulative requirements

163. In *Japan – Agricultural Products II*, the Appellate Body identified four requirements imposed upon a Member having recourse to this provision. The Appellate Body added that these four requirements are cumulative in nature:

> "Article 5.7 of the *SPS Agreement* sets out four requirements which must be met in order to adopt and maintain a provisional SPS measure. Pursuant to the first sentence of Article 5.7, a Member may provisionally adopt an SPS measure if this measure is:
>
> (1) imposed in respect of a situation where 'relevant scientific information is insufficient'; and
>
> (2) adopted 'on the basis of available pertinent information'.
>
> Pursuant to the second sentence of Article 5.7, such a provisional measure may not be maintained unless the Member which adopted the measure:
>
> (1) 'seek[s] to obtain the additional information necessary for a more objective assessment of risk'; and
>
> (2) 'review[s] the . . . measure accordingly within a reasonable period of time'.
>
> These four requirements are clearly cumulative in nature and are equally important for the purpose of determining consistency with this provision. Whenever *one* of these four requirements is not met, the measure at issue is inconsistent with Article 5.7."[208]

(b) "where relevant scientific evidence is insufficient"

(i) Meaning

164. Upholding the Panel's finding that Japan's phytosanitary measure at issue was not imposed in a situation "where relevant scientific evidence is insufficient", the Appellate Body on *Japan – Apples* said that "relevant scientific evidence" will be "insufficient" within the meaning of Article 5.7 if the body of available scientific evidence does not allow, in quantitative or qualitative terms, the performance of an adequate assessment of risks as required under Article 5.1 and as defined in Annex A to the *SPS Agreement*:

> "[J]apan's reliance on the opposition between evidence 'in general' and evidence relating to specific aspects of a particular subject matter is misplaced. The first requirement of Article 5.7 is that there must be insufficient scientific evidence. When a panel reviews a measure claimed by a Member to be provisional, that panel must assess whether 'relevant scientific evidence is insufficient'. This evaluation must be carried out, not in the abstract, but in the light of a particular inquiry. The notions of 'relevance' and 'insufficiency' in the introductory phrase of Article 5.7 imply a relationship between the scientific evidence and something else. Reading this introductory phrase in the broader context of Article 5. of the *SPS Agreement*, which is entitled 'Assessment of Risk and Determination of the Appropriate Level of Sanitary or Phytosanitary Protection', is instructive in ascertaining the nature of the relationship to be established. Article 5.1 sets out a key discipline under Article 5, namely that 'Members shall ensure that their sanitary or phytosanitary measures are based on an assessment . . . of the risks to human, animal or plant life or health'.[209] This discipline informs the other provisions of Article 5, including Article 5.7. We note, as well, that the second sentence of Article 5.7 refers to a 'more objective assessment of risks'. These contextual elements militate in favour of a link or relationship between the first requirement under Article 5.7 and the obligation to perform a risk assessment under Article 5.1: 'relevant scientific evidence' will be 'insufficient' within the meaning of Article 5.7 if the body of available scientific evidence does not allow, in quantitative or qualitative terms, the performance of an adequate assessment of risks as required under Article 5.1 and as defined in Annex A to the *SPS Agreement*. Thus, the question is not whether there is sufficient evidence of a general nature or whether there is sufficient evidence related to a specific aspect of a phytosanitary problem, or a specific risk. The questions is whether the relevant evidence, be it 'general' or 'specific', in the Panel's parlance, is sufficient to permit the evaluation of the likelihood of entry, establishment or spread of, in this case, fire blight in Japan."[210]

165. The Appellate Body on *Japan – Apples* also rejected Japan's interpretation of Article 5.7 through the concept of "scientific uncertainty", and said that the application of Article 5.7 is triggered not by the existence of scientific uncertainty, but rather by the insufficiency of scientific evidence and these two concepts – "insufficiency of scientific evidence" and "scientific uncertainty" – are not interchangeable:

> "Japan challenges the Panel's statement that Article 5.7 is intended to address only 'situations where little, or no, reliable evidence was available on the subject matter at issue'[211] because this does not provide for situations of 'unresolved uncertainty'. Japan draws a distinction between 'new uncertainty' and 'unresolved uncertainty'[212], arguing that both fall within Article 5.7. According to Japan, 'new uncertainty' arises when a new risk is identified; Japan argues that the Panel's characterization that 'little, or no, reliable evidence was available

[208] Appellate Body Report on *Japan – Agricultural Products II*, para. 89. In this case, the Panel examined whether the measure at issue met with these four requirements. See Panel Report on *Japan – Agricultural Products II*, paras. 8.56–8.57 and 8.60.

[209] (*footnote original*) The risk assessment referred to in Article 5.1 is defined in Annex A of the *SPS Agreement*.

[210] Appellate Body Report on *Japan – Apples*, para. 179.

[211] (*footnote original*) Panel Report, para. 8.219.

[212] (*footnote original*) Japan's appellant's submission, para. 101.

on the subject matter at issue' is relevant to a situation of 'new uncertainty'.[213] We understand that Japan defines 'unresolved uncertainty' as uncertainty that the scientific evidence is not able to resolve, despite accumulated scientific evidence.[214] According to Japan, the risk of transmission of fire blight through apple fruit relates essentially to a situation of 'unresolved uncertainty'.[215] Thus, Japan maintains that, despite considerable scientific evidence regarding fire blight, there is still uncertainty about certain aspects of transmission of fire blight. Japan contends that the reasoning of the Panel is tantamount to restricting the applicability of Article 5.7 to situations of 'new uncertainty' and to excluding situations of 'unresolved uncertainty'; and that, by doing so, the Panel erred in law.[216]

We disagree with Japan. The application of Article 5.7 is triggered not by the existence of scientific uncertainty, but rather by the insufficiency of scientific evidence. The text of Article 5.7 is clear: it refers to 'cases where relevant scientific evidence is insufficient', not to 'scientific uncertainty'. The two concepts are not interchangeable. Therefore, we are unable to endorse Japan's approach of interpreting Article 5.7 through the prism of 'scientific uncertainty'."[217]

(c) "seek to obtain additional information"

166. In *Japan – Agricultural Products II*, in respect of the third requirement under Article 5.7, the Appellate Body stated that the additional information to be sought must be "germane" to conducting a more objective risk assessment:

"Neither Article 5.7 nor any other provision of the *SPS Agreement* sets out explicit prerequisites regarding the additional information to be collected or a specific collection procedure. Furthermore, Article 5.7 does not specify what actual results must be achieved; the obligation is to 'seek to obtain' additional information. However, Article 5.7 states that the additional information is to be sought in order to allow the Member to conduct 'a more objective assessment of risk'. Therefore, the information sought must be germane to conducting such a risk assessment, i.e., the evaluation of the likelihood of entry, establishment or spread of, *in casu*, a pest, according to the SPS measures which might be applied. We note that the Panel found that the information collected by Japan does not 'examine the appropriateness' of the SPS measure at issue and does not address the core issue as to whether 'varietal characteristics cause a divergency in quarantine efficacy'. In the light of this finding, we agree with the Panel that Japan did not seek to obtain the additional information necessary for a more objective risk assessment."[218]

(d) "review . . . within a reasonable period of time"

167. The Appellate Body on *Japan – Agricultural Products II* found that the "reasonable period of time" had to be established on a case-by-case basis:

"In our view, what constitutes a 'reasonable period of time' has to be established on a case-by-case basis and depends on the specific circumstances of each case, including the difficulty of obtaining the additional information necessary for the review *and* the characteristics of the provisional SPS measure. In the present case, the Panel found that collecting the necessary additional information would be relatively easy. Although the obligation 'to review' the varietal testing requirement has only been in existence since 1 January 1995, we agree with the Panel that Japan has not reviewed its varietal testing requirement 'within a reasonable period of time'."[219]

(e) Burden of proof

168. In *Japan – Apples*, concerning Japan's *argument in the alternative* under Article 5.7, which was made in the event that the Panel rejected Japan's view that "sufficient scientific evidence" exists to maintain the measure within the meaning of Article 2.2, the Panel assigned the burden of proof to Japan. The Panel's assignment of the burden of proof was not appealed.[220]

"We understand Japan to be claiming that the phytosanitary measure at issue is justified under Article 5.7 'in the alternative', should the Panel find that the measure is maintained without sufficient scientific evidence within the meaning of Article 2.2. We first note that arguing in the alternative is a well-established judicial practice and arguing a point in the alternative of another point often implies that there may be some contradictions between the two lines of argumentation if they were presented concurrently.

In this instance, we have determined above that Japan's measure is maintained without sufficient scientific evidence within the meaning of Article 2.2, which is the circumstance in which Japan invokes Article 5.7 in the alternative and claims that this provisional measure has been in place since the date of entry into force of the *SPS Agreement* in 1995.

We will therefore now consider whether the measure at issue can be justified as a provisional measure within the meaning of Article 5.7 of the *SPS Agreement*. Before doing so, however, we find it relevant to recall that the burden is on Japan, as the party invoking Article 5.7 to make a prima facie case in support of its position."[221]

[221] Panel Report on *Japan – Apples*, paras. 8.210 – 8.212.

(f) Treatment of the precautionary principle

169. The Appellate Body on *EC – Hormones* noted the following concerning Article 5.7 and the precautionary principle: "[T]he precautionary principle indeed finds reflection in Article 5.7 of the *SPS Agreement*. We agree, at the same time, with the European Communities, that there is no need to assume that Article 5.7 exhausts the relevance of a precautionary principle . . ."[222]

(g) Relationship with other Articles

(i) Article 2.2

170. Regarding the relationship between Article 5.7 and Article 2.2, see paragraphs 35–37 above.

8. Article 5.8

(a) General

171. The Panel on *EC – Hormones* allocated the burden of proof to the responding party, where the responding party enacted a measure not based on an international standard. In doing so, the Panel based its finding partially upon Article 5.8. The Appellate Body disagreed and indicated that Article 5.8 is not intended to address the burden of proof problem:

> "Article 5.8 of the *SPS Agreement* does not purport to address burden of proof problems; it does not deal with a dispute settlement situation. To the contrary, a Member seeking to exercise its right to receive information under Article 5.8 would, most likely, be in a pre-dispute situation, and the information or explanation it receives may well make it possible for that Member to proceed to dispute settlement proceedings and to carry the burden of proving on a *prima facie* basis that the measure involved is not consistent with the *SPS Agreement*."[223]

(b) Relationship with other Articles

(i) Article 2.2

172. While discussing the burden of proof under Article 2.2, the Appellate Body on *Japan – Agricultural Products II* made reference to Article 5.8. See paragraph 17 above.

(c) Article 3

173. The Panel on *Australia – Salmon* discussed the relationship between Article 5 on the one hand, and Articles 2 and 3 on the other. See paragraphs 46–48 above.

174. Also, the Appellate Body in *Japan – Agricultural Products II* touched on the relationship of Article 5 with Articles 2.2 and 3.3. See Section III.B.1(a)(ii) above.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6

Adaptation to Regional Conditions, Including Pest- or Disease-Free Areas and Areas of Low Pest or Disease Prevalence

1. Members shall ensure that their sanitary or phytosanitary measures are adapted to the sanitary or phytosanitary characteristics of the area – whether all of a country, part of a country, or all or parts of several countries – from which the product originated and to which the product is destined. In assessing the sanitary or phytosanitary characteristics of a region, Members shall take into account, *inter alia*, the level of prevalence of specific diseases or pests, the existence of eradication or control programmes, and appropriate criteria or guidelines which may be developed by the relevant international organizations.

2. Members shall, in particular, recognize the concepts of pest- or disease-free areas and areas of low pest or disease prevalence. Determination of such areas shall be based on factors such as geography, ecosystems, epidemiological surveillance, and the effectiveness of sanitary or phytosanitary controls.

3. Exporting Members claiming that areas within their territories are pest- or disease-free areas or areas of low pest or disease prevalence shall provide the necessary evidence thereof in order to objectively demonstrate to the importing Member that such areas are, and are likely to remain, pest- or disease-free areas or areas of low pest or disease prevalence, respectively. For this purpose, reasonable access shall be given, upon request, to the importing Member for inspection, testing and other relevant procedures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

175. In *Australia – Salmon*, Australia argued that the Panel had exceeded its terms of reference by referring to Article 6.1; Australia claimed that the Panel had made an implicit finding of inconsistency of the Australian measure with Article 6, although the Canadian request for the establishment of a panel had not included a claim under Article 6. The Appellate Body rejected the Australian argument:

> "Canada's request for the establishment of a panel did not include a claim of violation of Article 6 of the *SPS Agreement*. The Panel's terms of reference are determined by Canada's request for the establishment of a panel. We, therefore, agree with Australia that Article 6

[222] Appellate Body Report on *EC – Hormones*, para. 124.
[223] Appellate Body Report on *EC – Hormones*, para. 102. This was confirmed by the Panel in *Japan – Apples*, para. 8.41.

of the *SPS Agreement* is not within the terms of reference of the Panel. However, we disagree with Australia that the Panel exceeded its terms of reference in quoting Article 6.1 in a footnote, attached to a paragraph in which the Panel examined a violation of Article 5.5. More precisely, we reject Australia's contention that the Panel, by merely referring to Article 6.1 in a footnote, made an implied finding of inconsistency with Article 6. In our view, the statement of the Panel with regard to Article 6, in footnote 430 of its Report, is similar in character to the statement of the panel in *United States – Shirts and Blouses*, with regard to the powers of the Textile Monitoring Body ('TMB'). India appealed from this statement, but we found it to be 'purely a descriptive and gratuitous comment providing background concerning the Panel's understanding of how the TMB functions'.[224] We did not consider that statement to be 'a legal finding or conclusion' which the Appellate Body 'may uphold, modify or reverse'. Likewise, we consider that in this case, the Panel's statement in footnote 430 of its Report regarding Article 6.1 of the *SPS Agreement* is a purely gratuitous comment and not 'a legal finding or conclusion'. By making such a comment, the Panel did not exceed its terms of reference."[225]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Transparency

Members shall notify changes in their sanitary or phytosanitary measures and shall provide information on their sanitary or phytosanitary measures in accordance with the provisions of Annex B.[226]

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. General

176. In *Japan – Agricultural Products II*, the Panel concluded that: "Japan, by not having published the varietal testing requirement, acts inconsistently with its obligations under paragraph 1 of Annex B of the *SPS Agreement* and, for that reason, with its obligations contained in Article 7 of that Agreement."[227] The Appellate Body while examining Japan's appeal on publication requirements under paragraph 1 of Annex B concluded that the varietal testing requirement, as set out in the *Experimental Guide*, is a phytosanitary regulation within the meaning of paragraph 1 of Annex B, and upheld the Panel's finding that Japan had acted inconsistently with this provision and hence with Article 7 of the *SPS Agreement*,[228] see paragraph 225 below.

2. Notification requirements

(a) Recommended notification procedures

177. At its meeting of 29–30 March 1995, the SPS Committee adopted notification procedures recommended by the informal contact group, subject to certain conditions.[229] At its meeting of 29–30 May 1996, the SPS Committee revised the notification procedures to be followed for notifications required under paragraphs 5 and 6 of Annex B.[230] Further, at its meeting of 10–11 March 1999, the SPS Committee again revised the notification procedures.[231] The last revision of the notification procedures was carried out by the SPS Committee at its meeting of 2 April 2002.[232]

178. In November 2000, a handbook entitled "How to apply the Transparency Provisions of the *SPS Agreement*" was prepared by the Secretariat.[233] The Handbook was further revised in September 2002. This handbook, which is available in English, French and Spanish, provides guidance on the establishment and operation of notification authorities and enquiry points. The handbook also covers all three areas of transparency: the publication of regulations, notifications, and responding to enquiries.

179. At its meeting of 26 October 2001, the SPS Committee adopted the following provision relating to the notification of the conclusion of equivalence agreements between Members further to the Decision on Equivalence (see paragraphs 79–92 above):

"The Committee on Sanitary and Phytosanitary Measures shall revise its recommended notification procedures to provide for the notification of the conclusion of agreements between Members which recognize the equivalence of sanitary and phytosanitary measures.[234] Furthermore, the procedures shall reinforce the existing obligation in paragraph 3(d) of Annex B of the Agreement on the Application of Sanitary and Phytosanitary Measures for national Enquiry Points to provide information, upon request, on the participation in any bilateral or multilateral equivalence agreements of the Member concerned."[235]

[234] (*footnote original*) G/SPS/7/Rev.1.
[235] G/SPS/19, para. 11.

(b) "significant effect on trade of other Members"

180. The notification procedures adopted and revised by the SPS Committee define the term "significant effect on trade of other Members" as follows:

> "For the purposes of Annex B, paragraphs 5 and 6 in the *SPS Agreement*, the concept of 'significant effect on trade of other Members' may refer to the effect on trade:
>
> - of one sanitary or phytosanitary regulation only or of various sanitary or phytosanitary regulations in combination;
> - in a specific product, group of products or products in general; and
> - between two or more Members (countries).
>
> When assessing whether the sanitary or phytosanitary regulation may have a significant effect on trade, the Member concerned should take into consideration, using relevant information which is available, such elements as the value or other importance of imports in respect of the importing and/or exporting Members concerned, whether from other Members individually or collectively, the potential development of such imports, and difficulties for producers in other Members to comply with the proposed sanitary or phytosanitary regulations. The concept of a significant effect on trade of other Members should include both import-enhancing and import-reducing effects on the trade of other Members, as long as such effects are significant."[236]

3. Reference to Annex B

181. With respect to Annex B, see Section XVII.B below.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Control, Inspection and Approval Procedures

Members shall observe the provisions of Annex C[237] in the operation of control, inspection and approval procedures, including national systems for approving the use of additives or for establishing tolerances for contaminants in foods, beverages or feedstuffs, and otherwise ensure that their procedures are not inconsistent with the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

No jurisprudence or decision of a competent WTO body.

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Technical Assistance

1. Members agree to facilitate the provision of technical assistance to other Members, especially developing country Members, either bilaterally or through the appropriate international organizations. Such assistance may be, *inter alia*, in the areas of processing technologies, research and infrastructure, including in the establishment of national regulatory bodies, and may take the form of advice, credits, donations and grants, including for the purpose of seeking technical expertise, training and equipment to allow such countries to adjust to, and comply with, sanitary or phytosanitary measures necessary to achieve the appropriate level of sanitary or phytosanitary protection in their export markets.

2. Where substantial investments are required in order for an exporting developing country Member to fulfil the sanitary or phytosanitary requirements of an importing Member, the latter shall consider providing such technical assistance as will permit the developing country Member to maintain and expand its market access opportunities for the product involved.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

No jurisprudence or decision of a competent WTO body.

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Special and Differential Treatment

1. In the preparation and application of sanitary or phytosanitary measures, Members shall take account of the special needs of developing country Members, and in particular of the least-developed country Members.

2. Where the appropriate level of sanitary or phytosanitary protection allows scope for the phased introduction of new sanitary or phytosanitary measures, longer time-frames for compliance should be accorded on products of interest to developing country Members so as to maintain opportunities for their exports.

3. With a view to ensuring that developing country Members are able to comply with the provisions of this Agreement, the Committee is enabled to grant to such countries, upon request, specified, time-limited exceptions in whole or in part from obligations under this Agreement, taking into account their financial, trade and development needs.

---

[236] G/SPS/7, section 7, as revised.
[237] See Section XVIII.

4. Members should encourage and facilitate the active participation of developing country Members in the relevant international organizations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. General

182. At the Doha Ministerial Conference, Members resolved to "provide, to the extent possible, the financial and technical assistance necessary to enable least-developed countries to respond adequately to the introduction of any new SPS measures which may have significant negative effects on their trade."[238]

183. At the same Ministerial Conference, Members also decided to ensure a level of technical assistance necessary to enable least-developed countries to respond to the special problems they face in implementing the *SPS Agreement*.[239]

184. In 2003, the SPS Committee adopted in principle a proposal by Canada to enhance the transparency of special and differential treatment, subject to elaboration of the procedure.[240] Following discussions on this elaboration in the Committee meetings in March and June 2004, at the October meeting, the Committee adopted the elaboration.[241]

2. Article 10.2: "phased introduction of new sanitary and phytosanitary measures"

(a) "longer time frame for compliance"

185. At the Doha Ministerial Conference, Members adopted a decision in order to establish a time-frame for the gradual introduction of new sanitary and phytosanitary measures:

> "Where the appropriate level of sanitary and phytosanitary protection allows scope for the phased introduction of new sanitary and phytosanitary measures, the phrase 'longer time-frame for compliance' referred to in Article 10.2 of the Agreement on the Application of Sanitary and Phytosanitary Measures, shall be understood to mean normally a period of not less than 6 months. . . ."[242]

(b) Impossibility of phased introduction of SPS measures

186. At the same Ministerial Conference, Members adopted a decision that established a process to be applied in cases where the phased introduction of a new measure may not be possible:

> "Where the appropriate level of sanitary and phytosanitary protection does not allow scope for the phased introduction of a new measure, but specific problems are identified by a Member, the Member applying the measure shall upon request enter into consultations with the country with a view to finding a mutually satisfactory solution to the problem while continuing to achieve the importing Member's appropriate level of protection."[243]

XII. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Consultations and Dispute Settlement

1. The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding shall apply to consultations and the settlement of disputes under this Agreement, except as otherwise specifically provided herein.

2. In a dispute under this Agreement involving scientific or technical issues, a panel should seek advice from experts chosen by the panel in consultation with the parties to the dispute. To this end, the panel may, when it deems it appropriate, establish an advisory technical experts group, or consult the relevant international organizations, at the request of either party to the dispute or on its own initiative.

3. Nothing in this Agreement shall impair the rights of Members under other international agreements, including the right to resort to the good offices or dispute settlement mechanisms of other international organizations or established under any international agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

1. General

187. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *SPS Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*Australia – Salmon*	WT/DS18	Articles 2, 3 and 5 and Annexes A, B and C
2	*EC – Hormones (US)*	WT/DS26	Articles 2, 3 and 5
3	*EC – Hormones (Canada)*	WT/DS48	Articles 2, 3 and 5
4	*Japan – Agricultural Products II*	WT/DS76	Articles 2, 5, 7 and 8 and Annexes A and B
5	*Japan – Apples*	WT/DS245	Articles 2, 5, and 7 and Annex B

[238] WT/MIN(01)/17, para. 3.6 (i).
[239] WT/MIN(01)/17, para. 3.6 (ii).
[240] G/SPS/W/127.
[241] G/SPS/33.
[242] WT/MIN(01)/17, para. 3.1.
[243] WT/MIN(019/17, para. 3.1.

2. Article 11.2

(a) Appointment of scientific experts advising the panel

(i) Individual experts

188. In *EC – Hormones*, the Appellate Body agreed with the Panel's decision to hear from individual experts rather than to establish an expert review group:[244]

> "[I]n disputes involving scientific or technical issues, neither Article 11.2 of the *SPS Agreement,* nor Article 13 of the DSU prevents panels from consulting with individual experts. Rather, both the *SPS Agreement* and the DSU leave to the sound discretion of a panel the determination of whether the establishment of an expert review group is necessary or appropriate."[245]

189. As regards, *ad hoc* proceedings for the appointment of individual experts, see paragraph 191 below.

(ii) Expert appointment procedures

General

190. The procedures for the selection of scientific experts were described by the Panel on *EC – Hormones*, paragraphs 6.6–6.7, the Panel on *Australia – Salmon*, paragraphs 6.2–6.3, the Panel on *Japan – Agricultural Products II*, paragraph 6.2 and the Panel on *Australia – Salmon (Article 21.5 – Canada)*, paragraph 6.2.

Ad hoc procedures for individual experts

191. On the procedures followed by the Panel on *EC – Hormones* in appointing experts, the Appellate Body noted the following:

> "The rules and procedures set forth in Appendix 4 of the DSU apply in situations in which expert review groups have been established. However, this is not the situation in this particular case. Consequently, once the panel has decided to request the opinion of individual scientific experts, there is no legal obstacle to the panel drawing up, in consultation with the parties to the dispute, *ad hoc* rules for those particular proceedings."[246]

Parties' nomination of scientific experts

192. In *EC – Hormones*, the Panel gave each party the right to nominate one scientific expert:

> "The parties were invited to nominate one expert each, not necessarily from the list provided by the Panel. The Panel then selected three additional individuals from the list taking into account the comments of the parties."[247]

193. In contrast, in *Australia – Salmon*, the Panel did not give the parties the right to nominate any expert.[248] Also in *Japan – Agricultural Products II* and *Australia – Salmon (Article 21.5 – Canada)*, the Panels proceeded in similar fashion.[249]

(iii) Procedures for obtaining advice from scientific experts

194. The procedures for obtaining advice from scientific experts were described by the Panels on *EC – Hormones*[250]; *Australia – Salmon*[251]; *Australia – Salmon (Article 21.5 – Canada)*[252] *Japan – Agricultural Products II*[253]; and *Japan – Apples.*[254]

(iv) Role of scientific experts

195. In *EC – Hormones*, with respect to the role of scientific experts, the Panel noted as follows:

> "It is of particular importance that we made clear to the experts advising the Panel that we were not seeking a consensus position among the experts but wanted to hear all views."[255]

(b) Standard of review

196. In *Japan – Agricultural Products II*, the Appellate Body stressed that the investigative authority of a panel did not stretch so far as to "make the case for a complaining party":

> ". . . Article 13 of the DSU and Article 11.2 of the *SPS Agreement* suggest that panels have a significant investigative authority. However, this authority cannot be used by a panel to rule in favour of a complaining party which has not established a *prima facie* case of inconsistency based on specific legal claims asserted by it. A panel is entitled to seek information and advice from experts and from any other relevant source it chooses, pursuant to Article 13 of the DSU and, in an SPS case, Article 11.2 of the *SPS Agreement*, to help it to understand and evaluate the evidence submitted and the arguments made by the parties, but not to make the case for a complaining party."[256]

[256] Appellate Body Report on *Japan – Agricultural Products II*, paras. 126 and 129.

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Administration

1. A Committee on Sanitary and Phytosanitary Measures is hereby established to provide a regular forum for consultations. It shall carry out the functions necessary to implement the provisions of this Agreement and the furtherance of its objectives, in particular with respect to harmonization. The Committee shall reach its decisions by consensus.

2. The Committee shall encourage and facilitate ad hoc consultations or negotiations among Members on specific sanitary or phytosanitary issues. The Committee shall encourage the use of international standards, guidelines or recommendations by all Members and, in this regard, shall sponsor technical consultation and study with the objective of increasing coordination and integration between international and national systems and approaches for approving the use of food additives or for establishing tolerances for contaminants in foods, beverages or feedstuffs.

3. The Committee shall maintain close contact with the relevant international organizations in the field of sanitary and phytosanitary protection, especially with the Codex Alimentarius Commission, the International Office of Epizootics, and the Secretariat of the International Plant Protection Convention, with the objective of securing the best available scientific and technical advice for the administration of this Agreement and in order to ensure that unnecessary duplication of effort is avoided.

4. The Committee shall develop a procedure to monitor the process of international harmonization and the use of international standards, guidelines or recommendations. For this purpose, the Committee should, in conjunction with the relevant international organizations, establish a list of international standards, guidelines or recommendations relating to sanitary or phytosanitary measures which the Committee determines to have a major trade impact. The list should include an indication by Members of those international standards, guidelines or recommendations which they apply as conditions for import or on the basis of which imported products conforming to these standards can enjoy access to their markets. For those cases in which a Member does not apply an international standard, guideline or recommendation as a condition for import, the Member should provide an indication of the reason therefor, and, in particular, whether it considers that the standard is not stringent enough to provide the appropriate level of sanitary or phytosanitary protection. If a Member revises its position, following its indication of the use of a standard, guideline or recommendation as a condition for import, it should provide an explanation for its change and so inform the Secretariat as well as the relevant international organizations, unless such notification and explanation is given according to the procedures of Annex B.

5. In order to avoid unnecessary duplication, the Committee may decide, as appropriate, to use the information generated by the procedures, particularly for notification, which are in operation in the relevant international organizations.

6. The Committee may, on the basis of an initiative from one of the Members, through appropriate channels invite the relevant international organizations or their subsidiary bodies to examine specific matters with respect to a particular standard, guideline or recommendation, including the basis of explanations for non-use given according to paragraph 4.

7. The Committee shall review the operation and implementation of this Agreement three years after the date of entry into force of the WTO Agreement, and thereafter as the need arises. Where appropriate, the Committee may submit to the Council for Trade in Goods proposals to amend the text of this Agreement having regard, *inter alia*, to the experience gained in its implementation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

1. General

197. At its meeting of 19–20 March 1997, the SPS Committee agreed that the Rules of Procedure for meetings of the General Council[257] shall apply *mutatis mutandis* for its meetings, except as otherwise provided in the Working Procedures.[258]

2. Article 12.3

198. With reference to paragraph 3, the WTO and the OIE agreed on a cooperation agreement on 4 May 1998.[259]

199. The list of observers at meetings of the SPS Committee is as follows:

(a) International Intergovernmental Organizations having observer status on a regular basis

- Food and Agriculture Organization (FAO)
- FAO International Plant Protection Convention (IPPC)
- FAO/WHO Joint Codex Alimentarius Commission (Codex)

[257] WT/L/161.
[258] G/L/170.
[259] WT/L/272. This Agreement has been approved by the SPS Committee at its meeting of 1–2 July 1997 (G/SPS/R/8), and subsequently by the Council for Trade in Goods at its meeting of 21 July 1997 (G/C/M/22) and the General Council at its meeting of 22 October 1997 (WT/GC/M/23).

- International Monetary Fund (IMF)*
- International Organization for Standardization (ISO)
- International Trade Centre (ITC)
- Office international des épizooties (OIE)
- United Nations Conference on Trade and Development (UNCTAD)
- World Bank*
- World Health Organization (WHO)

(b) International Intergovernmental Organizations having observer status on an *ad hoc* basis

- African, Caribbean and Pacific Group of States (ACP Group)
- European Free Trade Association (EFTA)
- Inter-American Institute for Agricultural Cooperation (IICA)
- Organization for Economic Co-operation and Development (OECD)
- Regional International Organization for Plant Protection and Animal Health (OIRSA)
- Latin American Economic System (SELA)

(c) International Intergovernmental Organizations whose request is pending

- Asian and Pacific Coconut Community (APCC)
- International Vine and Wine Office (OIV)
- Convention on Biological Diversity (CBD)

200. As regards cooperation in accordance with the Decision on Equivalence, see paragraph 91 above.

3. Article 12.4

201. At its meeting of 15–16 October 1997, the SPS Committee adopted provisional procedures to monitor the use of international standards[260], and also agreed to review the operation of the provisional monitoring procedure 18 months after its implementation, with a view to deciding at that time whether to continue with the same procedure, amend it or develop another one.[261] After agreeing to a number of extensions on the provisional procedure to monitor the use of international standards, at its meeting of 27–28 October 2004, the SPS Committee adopted modifications to the provisional procedure to monitor the use of international standards.[262]

4. Article 12.7

202. At its meeting on 15–16 October 1997, the SPS Committee agreed on procedures for conducting the review of the implementation and operation of the *SPS Agreement*.[263]

203. At the Doha Ministerial Conference, Members adopted a deadline for reviewing the operation and implementation of the *SPS Agreement*:

> "Pursuant to the provisions of Article 12.7 of the Agreement on the Application of Sanitary and Phytosanitary Measures, the Committee on Sanitary and Phytosanitary Measures is instructed to review the operation and implementation of the Agreement on Sanitary and Phytosanitary Measures at least once every four years."[264]

204. At its meeting of 22–23 June 2004, the Committee decided on the process for the review of the *SPS Agreement*. The review is to be conducted by means of open-ended, informal meetings of the Committee and Members will be invited to identify issues for discussion as part of that process.

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Implementation

Members are fully responsible under this Agreement for the observance of all obligations set forth herein. Members shall formulate and implement positive measures and mechanisms in support of the observance of the provisions of this Agreement by other than central government bodies. Members shall take such reasonable measures as may be available to them to ensure that non-governmental entities within their territories, as well as regional bodies in which relevant entities within their territories are members, comply with the relevant provisions of this Agreement. In addition, Members shall not take measures which have the effect of, directly or indirectly, requiring or encouraging such regional or non-governmental entities, or local governmental bodies, to act in a manner inconsistent with the provisions of this Agreement. Members shall ensure that

* Observer status in WTO subsidiary bodies provided through the WTO Agreements with the Fund and the World Bank (WT/L/194 and WT/L/195).

260 G/SPS/11. At its meeting of 8 July 1999, the Committee adopted the First Annual Report on the monitoring procedure. G/SPS/13. The Sixth Annual Report on the Procedure to Monitor the Process of International Harmonization was adopted by the Committee in June 2004.

261 G/SPS/R/9/Rev.1, para. 21. The text of the procedures can be found in G/SPS/11.

262 G/SPS/11/Rev.1.

263 G/SPS/R/9/Rev.1, paras. 35–37. The procedures can be found in G/SPS/10.

264 WT/MIN(01)/17, para. 3.4.

they rely on the services of non-governmental entities for implementing sanitary or phytosanitary measures only if these entities comply with the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

1. Scope of the SPS Agreement

(a) Measures of a provincial government

205. In *Australia – Salmon (Article 21.5 – Canada)*, with respect to a measure taken by a provincial government (Tasmania), the Panel held that in the light of Article 13, measures taken by a non-central government body of Australia fell under the scope of the *SPS Agreement*:

> "Article 13 of the *SPS Agreement* provides unambiguously that: (1) 'Members are fully responsible under [the SPS] Agreement for the observance of all obligations set forth herein'; and (2) 'Members shall formulate and implement positive measures and mechanisms in support of the observance of the provisions of this Agreement by other than central government bodies'. Reading these two obligations together . . ., we consider that sanitary measures taken by the Government of Tasmania, being an 'other than central government' body as recognized by Australia, are subject to the *SPS Agreement* and fall under the responsibility of Australia as WTO Member when it comes to their observance of SPS obligations".[265]

XV. RELATIONSHIP WITH OTHER WTO AGREEMENTS

A. WTO AGREEMENT

1. Article XVI:4

206. In coming to the conclusion referred to in paragraph 6 above, the Appellate Body on *EC – Hormones* also referred to Article XVI:4 of the *WTO Agreement*:

> "Finally, we observe, more generally, that Article XVI.4 of the *WTO Agreement* stipulates that:
>
> > Each Member shall ensure the conformity of its laws, regulations and administrative procedures with its obligations as provided in the annexed Agreements.
>
> Unlike the GATT 1947, the *WTO Agreement* was accepted definitively by Members, and therefore, there are no longer 'existing legislation' exceptions (so-called 'grandfather rights')".[266]

B. TBT AGREEMENT

1. Article 1.5

207. The Panel on *EC – Hormones*, referring to Article 1.5 of the *TBT Agreement*[267], stated that "[s]ince the measures in dispute are sanitary measures, we find that the TBT Agreement is not applicable to this dispute."[268]

C. GATT 1994

1. Order of analysis

208. The Panel on *EC – Hormones*, in a finding not reviewed by the Appellate Body decided that both the *SPS Agreement* and the *GATT 1994* applied to the European Communities' measure at issue, and then addressed the question of which of the two Agreements to examine first:

> "The *SPS Agreement* specifically addresses the type of measure in dispute. If we were to examine GATT first, we would in any event need to revert to the *SPS Agreement*: if a violation of GATT were found, we would need to consider whether Article XX(b) could be invoked and would then necessarily need to examine the *SPS Agreement*; if, on the other hand, no GATT violation were found, we would still need to examine the consistency of the measure with the *SPS Agreement* since nowhere is consistency with GATT presumed to be consistency with the *SPS Agreement*. For these reasons, and in order to conduct our consideration of this dispute in the most efficient manner, we shall first examine the claims raised under the *SPS Agreement*."[269]

2. Article III and Article XI

209. In *EC – Hormones*, exercising judicial economy, the Panel stated: "Since we have found that the EC measures in dispute are inconsistent with the requirements of the *SPS Agreement*, we see no need to further examine whether the EC measures in dispute are also inconsistent with Articles III or XI of GATT."[270] Also, in *Australia – Salmon*, the Panel stated: "Since we have found that the measure in dispute is inconsistent with the requirements of the *SPS Agreement*, we see no need to further examine whether it is also inconsistent with Article XI of GATT 1994."[271] The Appellate Body did not address either of these two findings.

[271] Panel Report on *Australia – Salmon*, para. 8.185. With respect to judicial economy in general, see Chapter on *DSU*, paras. Section XXXVI.F.

3. Article XX(b)

210. In *EC – Hormones*, the European Communities submitted that "the 'substantive' provisions of the *SPS Agreement* can only be addressed if recourse is made to GATT Article XX(b), *i.e.*, if, and only if, a violation of another provision of GATT is first established". The Panel, in a finding not addressed by the Appellate Body, rejected this argument, indicating as follows:

> "According to Article 1.1 of the *SPS Agreement*, two requirements need to be fulfilled for the *SPS Agreement* to apply: (i) the measure in dispute is a sanitary or phytosanitary measure; and (ii) the measure in dispute may, directly or indirectly, affect international trade. There are no additional requirements. The *SPS Agreement* contains, in particular, no explicit requirement of a prior violation of a provision of GATT which would govern the applicability of the *SPS Agreement*, as asserted by the European Communities."[272]

211. The Panel on *EC – Hormones* then added, with respect to the relationship between the *SPS Agreement* and Article XX(b) of the *GATT 1994*, that "[m]any provisions of the *SPS Agreement* impose 'substantive' obligations which go significantly beyond and are additional to the requirements for invocation of Article XX(b)":

> "[W]e find the EC claim that the *SPS Agreement* does not impose 'substantive' obligations additional to those already contained in Article XX(b) of GATT not to be persuasive. It is clear that some provisions of the *SPS Agreement* elaborate on provisions already contained in GATT, in particular Article XX(b). The final preambular paragraph of the *SPS Agreement* provides, indeed, that the Members desired 'to elaborate rules for the application of the provisions of GATT 1994 which relate to the use of sanitary or phytosanitary measures, in particular the provisions of Article XX(b)'. Examples of such rules are, arguably, some of the obligations contained in Article 2 of the *SPS Agreement*. However, on this basis alone we cannot conclude that the *SPS Agreement* only applies, as Article XX(b) of GATT does, if, and only if, a prior violation of a GATT provision has been established. Many provisions of the *SPS Agreement* impose 'substantive' obligations which go significantly beyond and are additional to the requirements for invocation of Article XX(b). These obligations are, *inter alia,* imposed to 'further the use of harmonized sanitary and phytosanitary measures between Members'[273] and to 'improve the human health, animal health and phytosanitary situation in all Members'.[274] They are not imposed, as is the case of the obligations imposed by Article XX(b) of GATT, to justify a violation of another GATT obligation (such as a violation of the non-discrimination obligations of Articles I or III)."[275]

212. The Panel on *Australia – Salmon* also dealt with the question whether to address first the provisions of the *GATT 1994* or those of the *SPS Agreement*:

> "Canada recognizes that the *SPS Agreement* provides for obligations additional to those contained in GATT 1994, but, nevertheless, first addresses its claim under Article XI of GATT 1994. Australia invokes Article 2.4 of the *SPS Agreement*, which presumes GATT consistency for measures found to be in conformity with the *SPS Agreement*, to first address the *SPS Agreement*. We note, moreover, that (1) the *SPS Agreement* specifically addresses the type of measure in dispute, and (2) we will in any case need to examine the *SPS Agreement*, whether or not we find a GATT violation (since GATT consistency is nowhere presumed to constitute consistency with the *SPS Agreement*). In order to conduct our consideration of this dispute in the most efficient manner, we shall, therefore, first address the claims made by Canada under the *SPS Agreement* before addressing those put forward under GATT 1994."[276]

XVI. ANNEX A

A. TEXT OF ANNEX A

ANNEX A
DEFINITIONS[4]

(*footnote original*) [4] For the purpose of these definitions, "animal" includes fish and wild fauna; "plant" includes forests and wild flora; "pests" include weeds; and "contaminants" include pesticide and veterinary drug residues and extraneous matter.

1. *Sanitary or phytosanitary measure* – Any measure applied:

(a) to protect animal or plant life or health within the territory of the Member from risks arising from the entry, establishment or spread of pests, diseases, disease-carrying organisms or disease-causing organisms;

(b) to protect human or animal life or health within the territory of the Member from risks arising from additives, contaminants, toxins or disease-causing organisms in foods, beverages or feedstuffs;

(c) to protect human life or health within the territory of the Member from risks arising from diseases carried by animals, plants or products thereof, or from the entry, establishment or spread of pests; or

(d) to prevent or limit other damage within the territory of the Member from the entry, establishment or spread of pests.

[272] Panel Report on *EC – Hormones (Canada)*, para. 8.39; Panel Report on *EC – Hormones (US)*, para. 8.36.
[273] (*footnote original*) Preambular para. 6 of the SPS Agreement.
[274] (*footnote original*) Preambular para. 2 of the SPS Agreement.
[275] Panel Report on *EC – Hormones (Canada)*, para. 8.41; Panel Report on *EC – Hormones (US)*, para. 8.38.
[276] Panel Report on *Australia – Salmon*, para. 8.39.

Sanitary or phytosanitary measures include all relevant laws, decrees, regulations, requirements and procedures including, *inter alia*, end product criteria; processes and production methods; testing, inspection, certification and approval procedures; quarantine treatments including relevant requirements associated with the transport of animals or plants, or with the materials necessary for their survival during transport; provisions on relevant statistical methods, sampling procedures and methods of risk assessment; and packaging and labelling requirements directly related to food safety.

2. *Harmonization* – The establishment, recognition and application of common sanitary and phytosanitary measures by different Members.

3. *International standards, guidelines and recommendations*

(a) for food safety, the standards, guidelines and recommendations established by the Codex Alimentarius Commission relating to food additives, veterinary drug and pesticide residues, contaminants, methods of analysis and sampling, and codes and guidelines of hygienic practice;

(b) for animal health and zoonoses, the standards, guidelines and recommendations developed under the auspices of the International Office of Epizootics;

(c) for plant health, the international standards, guidelines and recommendations developed under the auspices of the Secretariat of the International Plant Protection Convention in cooperation with regional organizations operating within the framework of the International Plant Protection Convention; and

(d) for matters not covered by the above organizations, appropriate standards, guidelines and recommendations promulgated by other relevant international organizations open for membership to all Members, as identified by the Committee.

4. *Risk assessment* – The evaluation of the likelihood of entry, establishment or spread of a pest or disease within the territory of an importing Member according to the sanitary or phytosanitary measures which might be applied, and of the associated potential biological and economic consequences; or the evaluation of the potential for adverse effects on human or animal health arising from the presence of additives, contaminants, toxins or disease-causing organisms in food, beverages or feedstuffs.

5. *Appropriate level of sanitary or phytosanitary protection* – The level of protection deemed appropriate by the Member establishing a sanitary or phytosanitary measure to protect human, animal or plant life or health within its territory.

NOTE: Many Members otherwise refer to this concept as the "acceptable level of risk".

6. *Pest- or disease-free area* – An area, whether all of a country, part of a country, or all or parts of several countries, as identified by the competent authorities, in which a specific pest or disease does not occur.

NOTE: A pest- or disease-free area may surround, be surrounded by, or be adjacent to an area – whether within part of a country or in a geographic region which includes parts of or all of several countries – in which a specific pest or disease is known to occur but is subject to regional control measures such as the establishment of protection, surveillance and buffer zones which will confine or eradicate the pest or disease in question.

7. *Area of low pest or disease prevalence* – An area, whether all of a country, part of a country, or all or parts of several countries, as identified by the competent authorities, in which a specific pest or disease occurs at low levels and which is subject to effective surveillance, control or eradication measures.

B. INTERPRETATION AND APPLICATION OF ANNEX A

1. Relationship between paragraph 1(a) and 1(b) of Annex A

213. In *Australia – Salmon*, the Panel examined whether an Australian prohibition on imports of dead salmon was a "sanitary measure" within the meaning of paragraph 1(b) of Annex A of the *SPS Agreement*. While the definition in paragraph 1(a) of Annex A focuses on measures intended to protect animal or plant life or health from risks arising as a result of pests and diseases, paragraph 1(b) speaks of measures intended to protect human or animal life or health from disease-causing organisms contained in food, beverages or feedstuffs. The Panel held:

> "In the circumstances at hand, we consider that the definition of a 'sanitary measure' in paragraph 1(a) encompasses the coverage sought by Australia under the definition in paragraph 1(b). The definition in paragraph 1(a) deals with risks arising from 'the entry, establishment or spread of pests, diseases . . . or disease-causing organisms' in general. In the context of disease-causing organisms, the definition in paragraph 1(b) is limited in the sense that it only addresses risks arising from 'disease-causing organisms in foods, beverages or feedstuffs' (hereafter also referred to as food-borne risks). We are of the view that, even though both definitions of a 'sanitary measure' invoked by Australia might be applicable to the measure in dispute, the objectives for which that measure is being applied are more appropriately covered by the definition in paragraph 1(a). These objectives have been clearly expressed by Australia on several occasions."[277]

[277] Panel Report on *Australia – Salmon*, para. 8.34.

214. With respect to the two definitions of risk assessment under paragraph 4, see Section XVI.B.2 below.

2. Paragraph 4: "risk assessment"

(a) General

215. The Panel on *Australia – Salmon (Article 21.5 – Canada)* rejected the interpretation of "risk assessment" put forward by Canada, the complaining party. The Panel held that a requirement that Members assess risk "according to the [sanitary] measures which might be applied" could not be read into the definition of "risk assessment"; rather, the requirement of a linkage between the risk assessment on the one hand, and the final measure and the necessity to use such measure on the other, were to be derived from other provisions of the *SPS Agreement*:

> "Canada's claim . . . raises the question of whether the definition of risk assessment *as such*, requiring Members to assess risk 'according to the [sanitary] measures which might be applied', can be construed so as to include the obligation to make the link between the assessment, the measures *finally selected* and the necessity to use these measures in order to achieve the [appropriate level of sanitary or phytosanitary protection]. We find it difficult to read such a requirement into paragraph 4 of Annex A.
>
> In our view, the rights and obligations in respect of these linkages are set out *not* in the definition of risk assessment itself – which logically *precedes* the selection of measures – but, *inter alia*, in the obligation to *base* sanitary measures *on* a risk assessment in Article 5.1 and to ensure that sanitary measures are not more trade-restrictive than required to achieve the [appropriate level of sanitary or phytosanitary protection] in the sense of Article 5.6. To examine these questions of relationship between the risk assessment, the measures selected and the [appropriate level of sanitary or phytosanitary protection] under the definition of risk assessment – as Canada . . . seem[s] to do – would, in our view, run the risk of adding to or diminishing the more specific rights and obligations of Members set out in other SPS obligations, contrary to Article 19.2 of the DSU.
>
> . . . In any event, we prefer to address this question of relationship between the measures selected and the risk assessment under the obligation to *base* measures *on* a risk assessment pursuant to Article 5.1 rather than under the very definition of risk assessment referred to in the same provision."[278]

(b) First part of paragraph 4: First definition of risk assessment

(i) Types of risks

216. Referring to the first of the two definitions of "risk assessment" in paragraph 4 of Annex A, the Panel on *Australia – Salmon* in a finding with which the Appellate Body later expressly agreed[279], considered the two types of risk contained therein:

> "Examining the definition of risk assessment applicable to the measure at issue, i.e., the 'evaluation of the likelihood of entry, establishment or spread of a pest or disease within the territory of an importing Member according to the sanitary or phytosanitary measures which might be applied, and of the associated potential biological and economic consequences', we consider, first of all, that the risk thus to be assessed includes (1) the risk of 'entry, establishment or spread' of a disease and (2) the risk of the 'associated potential biological and economic consequences'. When we refer hereafter to the risk related to a disease, this risk thus includes the risk of entry, establishment or spread of that disease as well as the biological and economic consequences associated therewith.
>
> . . .
>
> In this dispute, the measure at issue is intended to protect animal health as a sanitary measure defined in paragraph 1(a) of Annex A and is to be based on a risk assessment in the sense of the first definition in paragraph 4 of Annex A. According to this first definition in paragraph 4, such risk assessment has to take into account risks arising not only from the 'entry, establishment or spread of a pest or disease', but also from the 'associated biological and economic consequences'."[280]

(ii) Elements of a "risk assessment"

217. On the three aspects of a risk assessment, see paragraph 103 above.

(iii) Identifying risk on a disease-specific basis

218. The Panel on *Australia – Salmon* stated that where several diseases were involved in the risk assessment, such risk assessment at least had to identify risk on a disease-specific basis. The Panel also referred to the Appellate Body's findings in *EC – Hormones*:

> "[G]iven the definition of risk assessment applicable in this case (the 'evaluation of the likelihood of entry, establishment or spread of a . . . *disease*', in the singular form), a risk assessment for the measure at issue in this dispute at least has to *identify* risk on a disease specific basis, i.e., it has to identify the risk for any given disease of concern separately, not simply address the overall risk related to the combination of all diseases of concern. . . . The experts advising the Panel on this issue confirmed this. In the *EC – Hormones* case as well, both the panels and the Appellate Body required some degree of specificity for a risk assessment – or a study or report allegedly part

[278] Panel Report on *Australia – Salmon (Article 21.5 – Canada)*, paras. 7.68–7.70.
[279] Appellate Body Report on *Australia – Salmon*, para. 120.
[280] Panel Report on *Australia – Salmon*, paras. 8.72 and 8.116.

thereof – to be in accordance with the requirements imposed in Article 5.1."[281]

(iv) "likelihood"

219. In *Australia – Salmon*, the Appellate Body recalled its finding in *EC – Hormones* where it had distinguished between the terms "potential" and "probability". Finding that the term "likelihood" was synonymous with the term "probability", the Appellate Body disagreed with the Panel's finding that a risk assessment required only *some* evaluation of likelihood or probability:

> "We note that the first definition in paragraph 4 of Annex A speaks about the evaluation of 'likelihood.' In our report in *European Communities – Hormones,* we referred to the dictionary meaning of 'probability' as 'degrees of likelihood' and 'a thing that is judged likely to be true', for the purpose of distinguishing the terms 'potential' and 'probability'. For the present purpose, we refer in the same manner to the ordinary meaning of 'likelihood', and we consider that it has the same meaning as 'probability'. On this basis, as well as on the basis of the definition of 'risk' and 'risk assessment' developed by the Office international des épizooties ('OIE') and the OIE *Guidelines for Risk Assessment,* we maintain that for a risk assessment to fall within the meaning of Article 5.1 and the first definition in paragraph 4 of Annex A, it is not sufficient that a risk assessment conclude that there is a *possibility* of entry, establishment or spread of diseases and associated biological and economic consequences. A proper risk assessment of this type must evaluate the 'likelihood', i.e., the 'probability', of entry, establishment or spread of diseases and associated biological and economic consequences as well as the 'likelihood', i.e., 'probability', of entry, establishment or spread of diseases *according to the SPS measures which might be applied*.
>
> We note that, although the Panel stated that the definition of a risk assessment for this type of measure requires an 'evaluation of the likelihood', for the purpose of satisfying the second and third requirements, it subsequently was hesitant in applying these requirements, by stating or suggesting in paragraphs 8.80, 8.83, 8.89 and 8.91, that *some* evaluation of the likelihood or probability would suffice. We consider this hesitation unfortunate. We do not agree with the Panel that a risk assessment of this type needs only *some* evaluation of the likelihood or probability. The definition of this type of risk assessment in paragraph 4 of Annex A refers to 'the evaluation of the likelihood' and not to *some* evaluation of the likelihood. We agree, however, with the Panel's statements in paragraph 8.80 that the *SPS Agreement* does not require that the evaluation of the likelihood needs to be done quantitatively. The likelihood may be expressed either quantitatively or qualitatively. Furthermore, we recall, as does the Panel, that we stated in *European Communities – Hormones* that there is no requirement for a risk assessment to establish a certain magnitude or threshold level of degree of risk."[282]

219bis. The Panel in *Japan – Apples* recalled the Appellate Body's finding in *EC – Hormones* that the evaluation of likelihood involves more than a mere identification of 'possibilities' and requires an assessment of *probability* of entry, which implies a higher degree or a 'threshold of potentiality or possibility'. The Panel further added that such probability need not be expressed in quantitative terms, but may be expressed in qualitative terms.[283]

(v) "according to . . . which might be applied"

220. Regarding the requirement to evaluate the likelihood of entry, establishment or spread of the diseases according to the SPS measures which might be applied, the Appellate Body on *Japan – Apples* agreed with the Panel and found that the phrase "according to the . . . which might be applied" implies that a risk assessment should not be limited to an examination of the measure already in place:

> "[A]ccording to the Panel, the terms in the definition of 'risk assessment' set out in paragraph 4 of Annex A to the *SPS Agreement* – more specifically, the phrase 'according to the sanitary or phytosanitary measures which might be applied' – suggest that 'consideration should be given not just to those specific measures which are currently in application, but at least to a potential range of relevant measures.'[284] . . .
>
> The definition of 'risk assessment' in the *SPS Agreement* requires that the evaluation of the entry, establishment or spread of a disease be conducted 'according to the sanitary or phytosanitary measure which might be applied.' We agree with the Panel that this phrase 'refers to the measures *which might* be applied, not merely to the measures which *are being* applied.'[285] The phrase 'which might be applied' is used in the conditional tense. In this sense, 'might' means: 'were or would be or have been able to, were or would be or have been allowed to, were or would perhaps'.[286] We understand this phrase to imply that a risk assessment should not be limited to an examination of the measure already in place or favoured by the importing Member. In other words, the evaluation contemplated in paragraph 4 of Annex A to the *SPS Agreement* should not be distorted by preconditioned views on the nature and the content of the measure to be taken; nor should it develop into an exercise tailored to and carried out for the purpose of justifying decisions *ex post facto*."[287]

[287] Appellate Body Report on *Japan – Apples*, paras. 207–208.

(vi) "Evaluation of likelihood of entry, establishment or spread of a pest or disease . . ."

Risk assessment to be specific about the product at issue

221. In *Japan – Apples*, the Appellate Body upheld the Panel's finding that Japan's risk assessment did not evaluate the likelihood of entry, establishment or spread of fire blight because its risk assessment was not specific enough about the product at issue – apple fruit:

> "[U]nder the *SPS Agreement*, the obligation to conduct an assessment of 'risk' is not satisfied merely by a general discussion of the disease sought to be avoided by the imposition of a phytosanitary measure.[288] The Appellate Body found the risk assessment at issue in *EC – Hormones* not to be 'sufficiently specific' even though the scientific articles cited by the importing Member had evaluated the 'carcinogenic potential of entire *categories* of hormones, or of the hormones at issue *in general*.'[289] In order to constitute a 'risk assessment' as defined in the *SPS Agreement*, the Appellate Body concluded, the risk assessment should have reviewed the carcinogenic potential, not of the relevant hormones in general, but of 'residues of those hormones found in meat derived from cattle to which the hormones had been administered for growth promotion purposes'.[290] Therefore, when discussing the risk to be specified in the risk assessment in *EC – Hormone*, the Appellate Body referred in general to the harm concerned (cancer or genetic damage) *as well as* to the precise agent that may possibly cause the harm (that is, the specific hormones when used in a specific manner and for specific purposes).
>
> In this case, the Panel found that the conclusion of the 1999 PRA with respect to fire blight was 'based on an overall assessment of possible modes of contamination, where apple fruit is only one of the possible hosts/vectors considered.'[291] . . . Given that the measure at issue relates to the risk of transmission of fire blight through apple fruit, in an evaluation of whether the risk assessment is 'sufficiently specific to the case at hand'[292], the nature of the risk addressed by the measure at issue is a factor to be taken into account. In light of these considerations, we are of the view that the Panel properly determined that the 1999 PRA 'evaluat[ion of] the risks associated with all possible hosts taken together'[293] was not sufficiently specific to qualify as a 'risk assessment' under the *SPS Agreement* for the evaluation of the likelihood of entry, establishment or spread of fire blight in Japan through apple fruit."[294]

(c) Second part of paragraph 4: Second definition of risk assessment

(i) General

222. With respect to the second definition of "risk assessment" contained in paragraph 4 of Annex A, the Appellate Body on *Australia – Salmon* noted that while the first definition speaks of "likelihood", the second definition speaks of "potential" for adverse effects:

> "We note that the first type of risk assessment in paragraph 4 of Annex A is substantially different from the second type of risk assessment contained in the same paragraph. While the second requires only the evaluation of the *potential* for adverse effects on human or animal health, the first type of risk assessment demands an evaluation of the *likelihood* of entry, establishment or spread of a disease, and of the associated potential biological and economic consequences. In view of the very different language used in paragraph 4 of Annex A for the two types of risk assessment, we do not believe that it is correct to diminish the substantial differences between these two types of risk assessments, as the European Communities seems to suggest when it argues that 'the object, purpose and context of the *SPS Agreement* indicate that no greater level of probability can have been intended for the first type of risk assessment than for the second type, [as b]oth types can apply both to human life or health and to animal or plant life or health'. (Third participant's submission of the European Communities, para. 7)."[295]

(ii) Methodology of risk assessment

Two-step analysis

223. In *EC – Hormones*, with respect to the methodology for a risk assessment under the second definition of paragraph 4 of Annex A of the *SPS Agreement*, the Panels stated that "in this dispute, a risk assessment carried out in accordance with the *SPS Agreement* should (i) *identify* the *adverse effects* on human health (if any) arising from the presence of the hormones at issue when used as growth promoters *in meat or meat products*, and (ii) if any such adverse effects exist, *evaluate* the *potential* or probability of occurrence of these effects".[296] The Appellate Body did not disagree with the Panels' finding

---

[288] (*footnote original*) Indeed, we are of the view that, as a general matter, "risk" cannot usually be understood only in terms of the disease or adverse effects that may result. Rather, an evaluation of risk must connect the possibility of adverse effects with an antecedent or cause. For example, the abstract reference to the "risk of cancer" has no significance, in and of itself, under the *SPS Agreement*; but when one refers to the "risk of cancer from smoking cigarettes", the particular risk is given content.

[289] (*footnote original*) Appellate Body Report, para. 199. (original italics) In other words, the risk assessment proffered by the importing Member in *EC – Hormones* considered the relationship between the broad *grouping* of hormones that were the subject of the measure and cancer.

[290] (*footnote original*) Appellate Body Report, para. 200.

[291] (*footnote original*) Panel Report, para. 8.270.

[292] (*footnote original*) Appellate Body Report, para. 7.14.

[293] (*footnote original*) Panel Report, para. 7.14.

[294] Appellate Body Report on *Japan – Apples*, paras. 202–203.

[295] Appellate Body Report on *Australia – Salmon*, fn. 69.

[296] Panel Report on *EC – Hormones (Canada)*, para. 8.101; Panel Report on *EC – Hormones (US)*, para. 8.98.

but cautioned against equating the terms "potential" and "probability":

> "Although the utility of a two-step analysis may be debated, it does not appear to us to be substantially wrong. What needs to be pointed out at this stage is that the Panel's use of 'probability' as an alternative term for 'potential' creates a significant concern. The ordinary meaning of 'potential' relates to 'possibility' and is different from the ordinary meaning of 'probability'. 'Probability' implies a higher degree or a threshold of potentiality or possibility. It thus appears that here the Panel introduces a quantitative dimension to the notion of risk."[297]

Specific attribution of risk

224. While the Appellate Body on *Japan – Apples* agreed with Japan that whether to analyse the risk on the basis of the particular pest or disease, or on the basis of a particular commodity, is a "matter of methodology" that lies within the discretion of the importing Member, it found that the Panel's reading of *EC – Hormones* did not suggest, as Japan had argued, that there was an obligation to follow any particular methodology in conducting a risk assessment. The Appellate Body further elaborated that Members are free to consider in their risk analysis multiple agents in relation to one disease, provided that the risk assessment attributes a likelihood of entry, establishment or spread of the disease to each agent specifically:

> "Japan contends that the 'methodology' of the risk assessment is not directly addressed by the *SPS Agreement*. In particular, Japan suggests that, whether to analyze the risk on the basis of the particular pest or disease, or on the basis of a particular commodity, is a 'matter of methodology' not directly addressed by the *SPS Agreement*.[298] We agree. Contrary to Japan's submission, however, the Panel's reading of *EC – Hormones* does not suggest that there is an obligation to follow any particular methodology for conducting a risk assessment. In other words, even though, in a given context, a risk assessment must consider a specific agent or pathway through which contamination might occur, Members are not precluded from organizing their risk assessments along the lines of the disease or pest at issue, or of the commodity to be imported. Thus, Members are free to consider in their risk analysis multiple agents in relation to one disease, provided that the risk assessment attribute a likelihood of entry, establishment or spread of the disease to each agent specifically. Members are also free to follow the other 'methodology' identified by Japan and focus on a particular commodity, subject to the same proviso."[299]

XVII. ANNEX B

A. TEXT OF ANNEX B

ANNEX B
TRANSPARENCY OF SANITARY AND PHYTOSANITARY REGULATIONS

Publication of regulations

1. Members shall ensure that all sanitary and phytosanitary regulations[5] which have been adopted are published promptly in such a manner as to enable interested Members to become acquainted with them.

(*footnote original*) [5] Sanitary and phytosanitary measures such as laws, decrees or ordinances which are applicable generally.

2. Except in urgent circumstances, Members shall allow a reasonable interval between the publication of a sanitary or phytosanitary regulation and its entry into force in order to allow time for producers in exporting Members, and particularly in developing country Members, to adapt their products and methods of production to the requirements of the importing Member.

Enquiry points

3. Each Member shall ensure that one enquiry point exists which is responsible for the provision of answers to all reasonable questions from interested Members as well as for the provision of relevant documents regarding:

(a) any sanitary or phytosanitary regulations adopted or proposed within its territory;

(b) any control and inspection procedures, production and quarantine treatment, pesticide tolerance and food additive approval procedures, which are operated within its territory;

(c) risk assessment procedures, factors taken into consideration, as well as the determination of the appropriate level of sanitary or phytosanitary protection;

(d) the membership and participation of the Member, or of relevant bodies within its territory, in international and regional sanitary and phytosanitary organizations and systems, as well as in bilateral and multilateral agreements and arrangements within the scope of this Agreement, and the texts of such agreements and arrangements.

4. Members shall ensure that where copies of documents are requested by interested Members, they are supplied at the same price (if any), apart from the cost of delivery, as to the nationals[6] of the Member concerned.

(*footnote original*) [6] When "nationals" are referred to in this Agreement, the term shall be deemed, in the case of a separate

customs territory Member of the WTO, to mean persons, natural or legal, who are domiciled or who have a real and effective industrial or commercial establishment in that customs territory.

Notification procedures

5. Whenever an international standard, guideline or recommendation does not exist or the content of a proposed sanitary or phytosanitary regulation is not substantially the same as the content of an international standard, guideline or recommendation, and if the regulation may have a significant effect on trade of other Members, Members shall:

(a) publish a notice at an early stage in such a manner as to enable interested Members to become acquainted with the proposal to introduce a particular regulation;

(b) notify other Members, through the Secretariat, of the products to be covered by the regulation together with a brief indication of the objective and rationale of the proposed regulation. Such notifications shall take place at an early stage, when amendments can still be introduced and comments taken into account;

(c) provide upon request to other Members copies of the proposed regulation and, whenever possible, identify the parts which in substance deviate from international standards, guidelines or recommendations;

(d) without discrimination, allow reasonable time for other Members to make comments in writing, discuss these comments upon request, and take the comments and the results of the discussions into account.

6. However, where urgent problems of health protection arise or threaten to arise for a Member, that Member may omit such of the steps enumerated in paragraph 5 of this Annex as it finds necessary, provided that the Member:

(a) immediately notifies other Members, through the Secretariat, of the particular regulation and the products covered, with a brief indication of the objective and the rationale of the regulation, including the nature of the urgent problem(s);

(b) provides, upon request, copies of the regulation to other Members;

(c) allows other Members to make comments in writing, discusses these comments upon request, and takes the comments and the results of the discussions into account.

7. Notifications to the Secretariat shall be in English, French or Spanish.

8. Developed country Members shall, if requested by other Members, provide copies of the documents or, in case of voluminous documents, summaries of the documents covered by a specific notification in English, French or Spanish.

9. The Secretariat shall promptly circulate copies of the notification to all Members and interested international organizations and draw the attention of developing country Members to any notifications relating to products of particular interest to them.

10. Members shall designate a single central government authority as responsible for the implementation, on the national level, of the provisions concerning notification procedures according to paragraphs 5, 6, 7 and 8 of this Annex.

General reservations

11. Nothing in this Agreement shall be construed as requiring:

(a) the provision of particulars or copies of drafts or the publication of texts other than in the language of the Member except as stated in paragraph 8 of this Annex; or

(b) Members to disclose confidential information which would impede enforcement of sanitary or phytosanitary legislation or which would prejudice the legitimate commercial interests of particular enterprises.

B. INTERPRETATION AND APPLICATION OF ANNEX B

1. Paragraphs 1 and 2: Publication requirements

225. In *Japan – Agricultural Products II*, with reference to the footnote to paragraph 1 of Annex B, the Appellate Body held that the list of instruments contained therein was not exhaustive in nature and referred to the object and purpose of paragraph 1 of Annex B:

> "We consider that the list of instruments contained in the footnote to paragraph 1 of Annex B is, as is indicated by the words 'such as', not exhaustive in nature. The scope of application of the publication requirement is not limited to 'laws, decrees or ordinances', but also includes, in our opinion, other instruments which are applicable generally and are similar in character to the instruments explicitly referred to in the illustrative list of the footnote to paragraph 1 of Annex B.
>
> The object and purpose of paragraph 1 of Annex B is 'to enable interested Members to become acquainted with' the sanitary and phytosanitary regulations adopted or maintained by other Members and thus to enhance transparency regarding these measures. In our opinion, the scope of application of the publication requirement of paragraph 1 of Annex B should be interpreted in the light of the object and purpose of this provision.

> We note that it is undisputed that the varietal testing requirement is applicable generally. Furthermore, we consider in the light of the actual impact of the varietal testing requirement on exporting countries, as discussed by the Panel in paragraphs 8.112 and 8.113 of the Panel Report, that this instrument is of a character similar to laws, decrees and ordinances, the instruments explicitly referred to in the footnote to paragraph 1 of Annex B."[300]

2. Paragraph 2: "reasonable interval"

226. At the Doha Ministerial conference, Members decided that the "reasonable interval" in respect of paragraph 2 should normally be understood as a period of not less than six months:

> "Subject to the conditions specified in paragraph 2 of Annex B to the Agreement on the Application of Sanitary and Phytosanitary Measures, the phrase 'reasonable interval' shall be understood to mean normally a period of not less than 6 months. It is understood that timeframes for specific measures have to be considered in the context of the particular circumstances of the measure and actions necessary to implement it. The entry into force of measures which contribute to the liberalization of trade should not be unnecessarily delayed."[301]

3. Paragraph 3: Enquiry points

227. The Panel on *Australia – Salmon* found that there was no obligation under the *SPS Agreement* for a Member to positively identify its chosen appropriate level of protection. In the context of this finding, the Panel held that paragraph 3 of Annex B did not impose a "substantive obligation on Members to identify or quantify their appropriate level of protection", but rather merely a "mainly procedural obligation to provide 'answers to all reasonable questions from all interested Members'".[302] The Appellate Body reversed the Panel's finding and held that there was such an – albeit implicit – obligation, *inter alia*, in paragraph 3 of Annex B.[303]

(a) Paragraph 3(d)

228. In relation to the reinforcement of the transparency obligation of the agreements on equivalence between Members, see paragraph 179 above.

4. Paragraph 5: Conditions for notification requirements

229. The Panel on *Japan – Apples* found that, in determining whether any changes in Members' SPS measures constitute changes that must be notified under Article 7, the most important factor is "whether the change affects the conditions of market access for the product concerned, that is, would the exported product still be permitted to enter [the market (Japan in this case)] if they complied with the prescription contained in the previous regulations[304]" under the chapeau of paragraph 5 of Annex B. The Panel considered that if that was not the case, then they should decide whether the change could be considered to potentially have a *significant* effect on the trade of other Members. In this connection, the Panel further held that the party making an allegation must establish a prima facie case by specifying, through sufficient evidence, in what respect any changes in SPS regulations departed from previous ones:

> "It is not disputed that the present situation is one where 'an international standard, guideline or recommendation does not exist [regarding *E. amylovora*] or the content of a proposed sanitary or phytosanitary regulation is not substantially the same as the content of an international standard, guideline or recommendation'. Therefore, we must determine whether the changes identified above constitute changes which are required to be notified under Article 7 because, *inter alia*, they 'may have a significant effect on trade of other Members' in the context of the chapeau to Paragraph 5 of Annex B.
>
> We consider that the most important factor in this regard is whether the change affects the conditions of market access for the product concerned, that is, would the exported product (apple fruit from the United States in this case) still be permitted to enter Japan if they complied with the prescription contained in the previous regulations.[305] If this is not the case, then we must consider whether the change could be considered to potentially have a *significant* effect on trade of other Members. In this regard, it would be relevant to consider whether the change has resulted in any increase in production, packaging and sales costs, such as more onerous treatment requirements or more time-consuming administrative formalities.
>
> . . . We recall that, in *EC – Hormones*, the Appellate Body noted that
>
> > '. . . Panels are inhibited from addressing legal claims falling outside their terms of reference. However, nothing in the DSU limits the faculty of a panel freely to use arguments submitted by any of the parties – or to develop its own legal reasoning – to support its

[303] Appellate Body Report on *Australia – Salmon*, para. 205.
[304] (*footnote original*) This approach is in line with the discussion of the concept of "significant effect on trade of other Members" in the notification procedures adopted and revised by the SPS Committee G/SPS/7/Rev.2, para. 7).
[305] This approach is in line with the discussion of the concept of "significant effect on trade of other Members" in the notification procedures adopted and revised by the SPS Committee G/SPS/7/Rev.2, para. 7).

own findings and conclusions on the matter under its consideration.'

However, the Appellate Body clarified in *Korea – Dairy* that '[B]oth "claims" and "arguments" are distinct from the "evidence" which the complainant or respondent presents to support its assertions of facts and arguments'.[306] We note in this regard that the party making an allegation must provide sufficient evidence in support of this allegation, and that a panel should not entertain a claim for which a prima facie case has not been made.[307] In the present case, the United States has effectively argued that Japan had substantially changed its fire blight measures since the entry into force of the *SPS Agreement*. However, the United States limited its argumentation to mention that new regulations had been implemented and to attach translations of the regulations to its first written submission. It did not specify in what respect these new regulations departed from the previous ones.

Indeed, either the United States knows in which respect the 1997 texts differ from the ones they replace – in which case it could and should have mentioned it in its submissions – or it does not, in which case it cannot be deemed to have established a prima facie case. In either situation, for the Panel to examine the regulations at issue to identify differences would be equivalent to 'making a case' for the United States, something we are not allowed to do. For these reasons we conclude that the United States did not establish a prima facie case in relation to the violation of Article 7 and Annex B of the *SPS Agreement*."[308]

XVIII. ANNEX C

A. TEXT OF ANNEX C

ANNEX C
CONTROL, INSPECTION AND APPROVAL PROCEDURES[7]

(*footnote original*) [7] Control, inspection and approval procedures include, *inter alia*, procedures for sampling, testing and certification.

1. Members shall ensure, with respect to any procedure to check and ensure the fulfilment of sanitary or phytosanitary measures, that:

(a) such procedures are undertaken and completed without undue delay and in no less favourable manner for imported products than for like domestic products;

(b) the standard processing period of each procedure is published or that the anticipated processing period is communicated to the applicant upon request; when receiving an application, the competent body promptly examines the completeness of the documentation and informs the applicant in a precise and complete manner of all deficiencies; the competent body transmits as soon as possible the results of the procedure in a precise and complete manner to the applicant so that corrective action may be taken if necessary; even when the application has deficiencies, the competent body proceeds as far as practicable with the procedure if the applicant so requests; and that upon request, the applicant is informed of the stage of the procedure, with any delay being explained;

(c) information requirements are limited to what is necessary for appropriate control, inspection and approval procedures, including for approval of the use of additives or for the establishment of tolerances for contaminants in food, beverages or feedstuffs;

(d) the confidentiality of information about imported products arising from or supplied in connection with control, inspection and approval is respected in a way no less favourable than for domestic products and in such a manner that legitimate commercial interests are protected;

(e) any requirements for control, inspection and approval of individual specimens of a product are limited to what is reasonable and necessary;

(f) any fees imposed for the procedures on imported products are equitable in relation to any fees charged on like domestic products or products originating in any other Member and should be no higher than the actual cost of the service;

(g) the same criteria should be used in the siting of facilities used in the procedures and the selection of samples of imported products as for domestic products so as to minimize the inconvenience to applicants, importers, exporters or their agents;

(h) whenever specifications of a product are changed subsequent to its control and inspection in light of the applicable regulations, the procedure for the modified product is limited to what is necessary to determine whether adequate confidence exists that the product still meets the regulations concerned; and

(i) a procedure exists to review complaints concerning the operation of such procedures and

[306] Appellate Body in *Korea – Dairy*, para. 139.
[307] (*footnote original*) Appellate Body Report in *Japan – Agricultural Products II*, para.126.
[308] Panel Report on *Japan – Apples*, paras. 8.314–8–318.

to take corrective action when a complaint is justified.

Where an importing Member operates a system for the approval of the use of food additives or for the establishment of tolerances for contaminants in food, beverages or feedstuffs which prohibits or restricts access to its domestic markets for products based on the absence of an approval, the importing Member shall consider the use of a relevant international standard as the basis for access until a final determination is made.

2. Where a sanitary or phytosanitary measure specifies control at the level of production, the Member in whose territory the production takes place shall provide the necessary assistance to facilitate such control and the work of the controlling authorities.

3. Nothing in this Agreement shall prevent Members from carrying out reasonable inspection within their own territories.

B. INTERPRETATION AND APPLICATION OF ANNEX C

1. Paragraph 1(c)

230. In *Australia – Salmon (Article 21.5 – Canada)*, Canada claimed a violation of paragraph 1(c) of Annex C by Australia. The Panel noted that only "procedures to check and ensure the fulfilment of sanitary or phytosanitary measures" fall under the scope of paragraph 1(c) of Annex C. It also considered that the Australian requirements referred to by Canada were "substantive sanitary measures in their own right" and not "procedures to check and ensure the fulfilment of sanitary or phytosanitary measures". The Panel thus concluded that no violation of paragraph 1(c) could be found.[309]

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Recalling that Ministers agreed at Punta del Este that "negotiations in the area of textiles and clothing shall aim to formulate modalities that would permit the eventual integration of this sector into GATT on the basis of strengthened GATT rules and disciplines, thereby also contributing to the objective of further liberalization of trade";

Recalling also that in the April 1989 Decision of the Trade Negotiations Committee it was agreed that the process of integration should commence following the conclusion of the Uruguay Round of Multilateral Trade Negotiations and should be progressive in character;

Recalling further that it was agreed that special treatment should be accorded to the least-developed country Members;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1

1. This Agreement sets out provisions to be applied by Members during a transition period for the integration of the textiles and clothing sector into GATT 1994.

2. Members agree to use the provisions of paragraph 18 of Article 2 and paragraph 6(b) of Article 6 in such a way as to permit meaningful increases in access possibilities for small suppliers and the development of commercially significant trading opportunities for new entrants in the field of textiles and clothing trade.[1]

(*footnote original*) [1] To the extent possible, exports from a least-developed country Member may also benefit from this provision.

3. Members shall have due regard to the situation of those Members which have not accepted the Protocols extending the Arrangement Regarding International Trade in Textiles (referred to in this Agreement as the "MFA") since 1986 and, to the extent possible, shall afford them special treatment in applying the provisions of this Agreement.

4. Members agree that the particular interests of the cotton-producing exporting Members should, in consultation with them, be reflected in the implementation of the provisions of this Agreement.

5. In order to facilitate the integration of the textiles and clothing sector into GATT 1994, Members should allow for continuous autonomous industrial adjustment and increased competition in their markets.

6. Unless otherwise provided in this Agreement, its provisions shall not affect the rights and obligations of

Members under the provisions of the WTO Agreement and the Multilateral Trade Agreements.

7. The textile and clothing products to which this Agreement applies are set out in the Annex.[1]

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. General

1. The Panel on *US – Underwear* examined whether a certain transitional safeguard measure imposed by the United States was consistent with Article 6. In so doing, the Panel referred to Article 1 in explaining the overall purpose of the *Agreement on Textiles and Clothing (ATC)*:

> "[T]he overall purpose of the ATC is to integrate the textiles and clothing sector into GATT 1994. Article 1 of the ATC makes this point clear. To this effect, the ATC requires notification of all existing quantitative restrictions (Article 2 of the ATC) and provides that they will have to be terminated by the year 2004 (Article 9 of the ATC)."[2]

2. Article 1.2

(a) "meaningful increases in access possibilities for small suppliers"

2. See the excerpt from the TMB's comprehensive report to the Council for Trade in Goods on the implementation of the *ATC* during the first stage of the integration process (the "Implementation Report"), referenced in paragraph 23 below.

(b) Footnote 1 to Article 1

3. In its Implementation Report, the TMB stated:

> "[T]he TMB recalls the particular importance of a full and faithful implementation of the provisions of the ATC in favour of least-developed country Members, [. . .] and invites Members to examine the possibilities for providing, whenever possible, substantially increased market access opportunities for the textile and clothing products of the least-developed country Members. In such cases, the TMB expects that it will be notified accordingly."[3]

3. Article 1.4

4. In the Implementation Report, the TMB noted, *inter alia*, that Members have different perceptions on how the interests of cotton-producing exporting Members should be reflected in the implementation of the provisions of the *ATC*. The TMB thus encouraged Members to have consultations in order to clarify implementation issues related to Article 1.4:

> "[I]t appears to the TMB that Members have different perceptions on how the particular interests of the cotton-producing exporting Members should be – and were – reflected in the implementation of the provisions of the ATC. The TMB notes in this respect that the Members maintaining restrictions under Article 2 had stated that they were prepared to have consultations on this matter with the Members concerned. The TMB encourages interested Members to enter into consultations with a view to clarifying the issues related to the implementation of Article 1.4. The TMB also recalls in this regard that, should the need arise, the provisions of Article 8.4 are available for this purpose."[4]

4. Article 1.5

5. The TMB's Implementation Report contains, *inter alia*, the following statement on the implementation of the integration provisions of the *ATC* with reference to Article 1.5:

> "One preoccupation of the TMB is how the implementation of the integration provisions of the ATC has ensured the full and faithful implementation of the ATC within the time-frames established therein. In the view of the TMB, one of the conditions of such an implementation is a steady progress in terms of structural adjustment and, also, as a result of this, an increased competition in the Members' markets. This interrelation is recognized by Article 1.5.
>
> . . .
>
> [T]he TMB does not have information or empirical evidence regarding what has been the progress and accomplishment in terms of increasing the competition and implementing autonomous industrial adjustment. The TMB believes that it would be useful to have a better appreciation of the progress and trends of autonomous industrial adjustment, as foreseen in Article 1.5."[5]

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2

1. All quantitative restrictions within bilateral agreements maintained under Article 4 or notified under Article 7 or 8 of the MFA in force on the day before the entry into force of the WTO Agreement shall, within 60 days following such entry into force, be notified in detail, including the restraint levels, growth rates and flexibility provisions, by the Members maintaining such restrictions to the Textiles Monitoring Body provided for in Article 8 (referred to in this Agreement as the "TMB"). Members agree that as of the date of entry into force of the WTO

[1] With respect to the Annex, see Section XI. (The list of textile and clothing products is omitted).
[2] Panel Report on *US – Underwear*, para. 7.19.
[3] G/L/179, para. 308.
[4] G/L/179, para. 316.
[5] G/L/179, paras. 74 and 77.

Agreement, all such restrictions maintained between GATT 1947 contracting parties, and in place on the day before such entry into force, shall be governed by the provisions of this Agreement.

2. The TMB shall circulate these notifications to all Members for their information. It is open to any Member to bring to the attention of the TMB, within 60 days of the circulation of the notifications, any observations it deems appropriate with regard to such notifications. Such observations shall be circulated to the other Members for their information. The TMB may make recommendations, as appropriate, to the Members concerned.

3. When the 12–month period of restrictions to be notified under paragraph 1 does not coincide with the 12–month period immediately preceding the date of entry into force of the WTO Agreement, the Members concerned should mutually agree on arrangements to bring the period of restrictions into line with the agreement year[2], and to establish notional base levels of such restrictions in order to implement the provisions of this Article. Concerned Members agree to enter into consultations promptly upon request with a view to reaching such mutual agreement. Any such arrangements shall take into account, *inter alia*, seasonal patterns of shipments in recent years. The results of these consultations shall be notified to the TMB, which shall make such recommendations as it deems appropriate to the Members concerned.

(*footnote original*) [2] The "agreement year" is defined to mean a 12–month period beginning from the date of entry into force of the WTO Agreement and at the subsequent 12–month intervals.

4. The restrictions notified under paragraph 1 shall be deemed to constitute the totality of such restrictions applied by the respective Members on the day before the entry into force of the WTO Agreement. No new restrictions in terms of products or Members shall be introduced except under the provisions of this Agreement or relevant GATT 1994 provisions.[3] Restrictions not notified within 60 days of the date of entry into force of the WTO Agreement shall be terminated forthwith.

(*footnote original*) [3] The relevant GATT 1994 provisions shall not include Article XIX in respect of products not yet integrated into GATT 1994, except as specifically provided in paragraph 3 of the Annex.

5. Any unilateral measure taken under Article 3 of the MFA prior to the date of entry into force of the WTO Agreement may remain in effect for the duration specified therein, but not exceeding 12 months, if it has been reviewed by the Textiles Surveillance Body (referred to in this Agreement as the "TSB") established under the MFA. Should the TSB not have had the opportunity to review any such unilateral measure, it shall be reviewed by the TMB in accordance with the rules and procedures governing Article 3 measures under the MFA. Any measure applied under an MFA Article 4 agreement prior to the date of entry into force of the WTO Agreement that is the subject of a dispute which the TSB has not had the opportunity to review shall also be reviewed by the TMB in accordance with the MFA rules and procedures applicable for such a review.

6. On the date of entry into force of the WTO Agreement, each Member shall integrate into GATT 1994 products which accounted for not less than 16 per cent of the total volume of the Member's 1990 imports of the products in the Annex, in terms of HS lines or categories. The products to be integrated shall encompass products from each of the following four groups: tops and yarns, fabrics, made-up textile products, and clothing.[6]

7. Full details of the actions to be taken pursuant to paragraph 6 shall be notified by the Members concerned according to the following:

(a) Members maintaining restrictions falling under paragraph 1 undertake, notwithstanding the date of entry into force of the WTO Agreement, to notify such details to the GATT Secretariat not later than the date determined by the Ministerial Decision of 15 April 1994. The GATT Secretariat shall promptly circulate these notifications to the other participants for information. These notifications will be made available to the TMB, when established, for the purposes of paragraph 21;

(b) Members which have, pursuant to paragraph 1 of Article 6, retained the right to use the provisions of Article 6, shall notify such details to the TMB not later than 60 days following the date of entry into force of the WTO Agreement, or, in the case of those Members covered by paragraph 3 of Article 1, not later than at the end of the 12th month that the WTO Agreement is in effect. The TMB shall circulate these notifications to the other Members for information and review them as provided in paragraph 21.

8. The remaining products, i.e. the products not integrated into GATT 1994 under paragraph 6, shall be integrated, in terms of HS lines or categories, in three stages, as follows:

(a) on the first day of the 37th month that the WTO Agreement is in effect, products which

[6] With respect to Article 2.6, in Marrakesh, the Ministerial Conference took the following Decision on Notification of First Integration under Article 2.6 of the *ATC*:

"*Ministers agree* that the participants maintaining restrictions falling under paragraph 1 of Article 2 of the Agreement on Textiles and Clothing shall notify full details of the actions to be taken pursuant to paragraph 6 of Article 2 of that Agreement to the GATT Secretariat not later than 1 October 1994. The GATT Secretariat shall promptly circulate these notifications to the other participants for information. These notifications will be made available to the Textiles Monitoring Body, when established, for the purposes of paragraph 21 of Article 2 of the Agreement on Textiles and Clothing."

accounted for not less than 17 per cent of the total volume of the Member's 1990 imports of the products in the Annex. The products to be integrated by the Members shall encompass products from each of the following four groups: tops and yarns, fabrics, made-up textile products, and clothing;

(b) on the first day of the 85th month that the WTO Agreement is in effect, products which accounted for not less than 18 per cent of the total volume of the Member's 1990 imports of the products in the Annex. The products to be integrated by the Members shall encompass products from each of the following four groups: tops and yarns, fabrics, made-up textile products, and clothing;

(c) on the first day of the 121st month that the WTO Agreement is in effect, the textiles and clothing sector shall stand integrated into GATT 1994, all restrictions under this Agreement having been eliminated.

9. Members which have notified, pursuant to paragraph 1 of Article 6, their intention not to retain the right to use the provisions of Article 6 shall, for the purposes of this Agreement, be deemed to have integrated their textiles and clothing products into GATT 1994. Such Members shall, therefore, be exempted from complying with the provisions of paragraphs 6 to 8 and 11.

10. Nothing in this Agreement shall prevent a Member which has submitted an integration programme pursuant to paragraph 6 or 8 from integrating products into GATT 1994 earlier than provided for in such a programme. However, any such integration of products shall take effect at the beginning of an agreement year, and details shall be notified to the TMB at least three months prior thereto for circulation to all Members.

11. The respective programmes of integration, in pursuance of paragraph 8, shall be notified in detail to the TMB at least 12 months before their coming into effect, and circulated by the TMB to all Members.

12. The base levels of the restrictions on the remaining products, mentioned in paragraph 8, shall be the restraint levels referred to in paragraph 1.

13. During Stage 1 of this Agreement (from the date of entry into force of the WTO Agreement to the 36th month that it is in effect, inclusive) the level of each restriction under MFA bilateral agreements in force for the 12–month period prior to the date of entry into force of the WTO Agreement shall be increased annually by not less than the growth rate established for the respective restrictions, increased by 16 per cent.

14. Except where the Council for Trade in Goods or the Dispute Settlement Body decides otherwise under paragraph 12 of Article 8, the level of each remaining restriction shall be increased annually during subsequent stages of this Agreement by not less than the following:

(a) for Stage 2 (from the 37th to the 84th month that the WTO Agreement is in effect, inclusive), the growth rate for the respective restrictions during Stage 1, increased by 25 per cent;

(b) for Stage 3 (from the 85th to the 120th month that the WTO Agreement is in effect, inclusive), the growth rate for the respective restrictions during Stage 2, increased by 27 per cent.

15. Nothing in this Agreement shall prevent a Member from eliminating any restriction maintained pursuant to this Article, effective at the beginning of any agreement year during the transition period, provided the exporting Member concerned and the TMB are notified at least three months prior to the elimination coming into effect. The period for prior notification may be shortened to 30 days with the agreement of the restrained Member. The TMB shall circulate such notifications to all Members. In considering the elimination of restrictions as envisaged in this paragraph, the Members concerned shall take into account the treatment of similar exports from other Members.

16. Flexibility provisions, i.e. swing, carryover and carry forward, applicable to all restrictions maintained pursuant to this Article, shall be the same as those provided for in MFA bilateral agreements for the 12–month period prior to the entry into force of the WTO Agreement. No quantitative limits shall be placed or maintained on the combined use of swing, carryover and carry forward.

17. Administrative arrangements, as deemed necessary in relation to the implementation of any provision of this Article, shall be a matter for agreement between the Members concerned. Any such arrangements shall be notified to the TMB.

18. As regards those Members whose exports are subject to restrictions on the day before the entry into force of the WTO Agreement and whose restrictions represent 1.2 per cent or less of the total volume of the restrictions applied by an importing Member as of 31 December 1991 and notified under this Article, meaningful improvement in access for their exports shall be provided, at the entry into force of the WTO Agreement and for the duration of this Agreement, through advancement by one stage of the growth rates set out in paragraphs 13 and 14, or through at least equivalent changes as may be mutually agreed with respect to a different mix of base levels, growth and flexibility provisions. Such improvements shall be notified to the TMB.

19. In any case, during the duration of this Agreement, in which a safeguard measure is initiated by a Member under Article XIX of GATT 1994 in respect of a particular product during a period of one year immediately following the integration of that product into GATT 1994 in accordance with the provisions of this Article,

the provisions of Article XIX, as interpreted by the Agreement on Safeguards, will apply, save as set out in paragraph 20.

20. Where such a measure is applied using non-tariff means, the importing Member concerned shall apply the measure in a manner as set forth in paragraph 2(d) of Article XIII of GATT 1994 at the request of any exporting Member whose exports of such products were subject to restrictions under this Agreement at any time in the one-year period immediately prior to the initiation of the safeguard measure. The exporting Member concerned shall administer such a measure. The applicable level shall not reduce the relevant exports below the level of a recent representative period, which shall normally be the average of exports from the Member concerned in the last three representative years for which statistics are available. Furthermore, when the safeguard measure is applied for more than one year, the applicable level shall be progressively liberalized at regular intervals during the period of application. In such cases the exporting Member concerned shall not exercise the right of suspending substantially equivalent concessions or other obligations under paragraph 3(a) of Article XIX of GATT 1994.

21. The TMB shall keep under review the implementation of this Article. It shall, at the request of any Member, review any particular matter with reference to the implementation of the provisions of this Article. It shall make appropriate recommendations or findings within 30 days to the Member or Members concerned, after inviting the participation of such Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

6. At its meeting in December 1999, the TMB addressed the concern expressed by a number of Members that the United States had introduced a new restraint measure on exports of certain products from Turkey. The measure was published under the United States domestic procedures, but not notified to the TMB, since, according to the United States and Turkey, it "was taken pursuant to a provision of the ATC which does not require notification to the TMB".[7] The TMB "examine[d] briefly all the provisions of the ATC with a view to identifying under which provision such a measure could have been agreed without requiring its notification to the TMB", stating as follows:

> "Furthermore, restrictions maintained under Article 2 had to be notified, in detail, within 60 days following the entry into force of the WTO Agreement. A measure that had not been notified at all, obviously could not fall under the provisions of Article 2. Article 2.4 for its part states, *inter alia*, that '[n]o new restrictions in terms of products or Members shall be introduced except under the provisions of this Agreement or relevant GATT 1994 provisions', but no provision under Article 2 provides the possibility of introducing new restrictions. The TMB noted, therefore, that the particular measure subject to its examination could not have been taken pursuant to Article 2."[8]

2. Article 2.1

7. In *Turkey – Textiles*, the Panel established that the notification requirement related to MFA restrictions set out in Article 2.1 which required that such notification should be made within 60 days following the entry into force of the WTO Agreement is mandatory. The Panel noted that all Members that maintained MFA-derived restrictions upon the entry into force of the WTO Agreement, and were accordingly vested the maintenance of that right under the *ATC*, had notified the maintained restrictions restrictions to the TMB:

> "The lists of restrictions notified pursuant to Article 2.1 set the starting point for the treatment of the restraints carried over from the former MFA regime. Four WTO Members notified the TMB pursuant to Article 2.1 of the ATC: Canada, the European Communities, Norway and the United States. We consider that the notification requirement of 60 days referred to in Article 2.1 of the ATC is mandatory both for formal and substantive reasons. The wording of Article 2.1 is unequivocal with the use of the term 'shall'. Moreover, since the purpose of the ATC is to provide exceptions to the general application of Articles XI and XIII of GATT during an integration period to be completed by 1 January 2005, these exceptions should be interpreted narrowly.[9] Stemming from this provision, only the four Members above had the right to and did notify measures which allowed them to maintain MFA-derived quantitative restrictions for a maximum period of 10 years during which import quotas must increase annually until the products they cover are integrated into GATT. In the absence of an exception under the ATC or a justification under GATT, no new quantitative restrictions introduced by a Member can benefit from the exceptions provided for in Article 2.1 of the ATC after this 60 day period."[10]

3. Article 2.4

(a) Jurisprudence

8. In *Turkey – Textiles*, the complainant, India, claimed that Turkey's increase in restrictions were "new"

---

[7] G/TMB/R/60, para. 29.
[8] G/TMB/R/60, para. 30.
[9] (*footnote original*) See for instance in Panel Report on *Indonesia – Certain Measures Affecting the Automobile Industry*, adopted 23 July 1998, WT/DS54, 55, 59 and 64/R, ("*Indonesia – Autos*") (Not appealed), para. 14.92, where the period allowed for notification to the TRIMS Committee under Article 5 of the TRIMS Agreement, in order for a Member to benefit from the transition provisions of the TRIMS Agreement, was considered mandatory.
[10] Panel Report on *Turkey – Textiles*, para. 9.69.

measures and therefore inconsistent with Article 2.4 of the *ATC*. The Panel held that any increase of an existing restriction was a "new measure" and hence a violation of Article 2.4:

> "The prohibition on 'new restrictions' must be interpreted taking into account the preceding sentence: 'The restrictions notified under paragraph 1 shall be deemed to constitutes the *totality of such restrictions* applied by the respective Members on the day before the entry into force of the WTO Agreement'. The ordinary meaning of the words indicates that WTO Members intended that as of 1 January 1995, the incidence of restrictions under the ATC could only be reduced. We are of the view that any legal fiction whereby an existing restriction could simply be increased and not constitute a 'new restriction', would defeat the clear purpose of the ATC which is to reduce the scope of such restrictions, starting from 1 January 1995 (but for the exceptional situations referred to in Article 2.4 of the ATC). Thus, we consider that, setting aside the possibility of exceptions and justifications mentioned in Article 2.4 of the ATC, any increase of an ATC compatible quantitative restriction notified under Article 2.1 of the ATC, constitutes a 'new' restriction."[11]

(b) TMB statements

9. In its report of the meeting in December 1999, when examining a new restriction introduced by the United States on Turkey's exports of certain textile products, as part of a broader understanding reached between the two Members, the TMB recalled the content of Article 2.4 of the *ATC* and concluded that the measure agreed upon by Turkey and the United States had "not been demonstrated to be in conformity with the provisions of the ATC".[12]

> "In concluding its examination of the measure mutually agreed between Turkey and the United States, the TMB recalled that Article 2.4 of the ATC states that '[n]o new restrictions in terms of products or Members shall be introduced except under the provisions of this Agreement or relevant GATT 1994 provisions'. After having considered the new measure against the different provisions of the ATC on the basis of the information available to it [. . .], the TMB concluded that the measure agreed upon by Turkey and the United States, affecting imports by the United States of category 352/652 products, had not been demonstrated to be in conformity with the provisions of the ATC."[13]

4. Article 2.6

(a) The issue of "ex-positions"

10. At its meeting in May 1997, the TMB examined a notification by Colombia, on behalf of itself and certain other WTO Members, regarding certain aspects of the European Communities' integration programme notified under Article 2.6. With respect to the treatment of certain products for which only a respective part (defined as "ex-position" in the Harmonized System) is included in "List of Products covered by this Agreement", the TMB stated as follows:

> "The TMB agreed with Colombia that the integration programme of the European Community for the first stage had also included certain imports which did not qualify for integration as they did not fall under the coverage of the ATC, as defined in its Annex. The TMB observed that with respect to a number of HS expositions concerned this was not contested by the European Community, which in particular referred to difficulties or the impossibility of providing trade data for these products strictly conforming to the description contained in the Annex to the ATC.
>
> . . .
>
> Also due to the lack of reliable statistical information, the TMB was not in a position to pronounce itself on the magnitude of the discrepancies which had occurred. It appeared however possible that after necessary corrections, the EC's integration programme could account for less than 16 per cent of the EC's total volume of 1990 imports. The TMB believed that the size of the shortfall, if any, could best be assessed by the importing Member itself.
>
> The TMB, therefore, recommended that the European Community re-examine its first stage integration programme in light of the TMB's comments and findings, [. . .]. The TMB expected the European Community to report on the results of this examination as rapidly as possible. The TMB agreed that it would keep this matter under review."[14]

11. On the issue of "ex-positions", at its meeting in May 1997, the TMB further stated:

> "During its review [. . .] of the notification made by Colombia, [. . .] alleging certain discrepancies in the programme of integration notified by the European Community under paragraph 6 of Article 2 of the ATC [. . .], the TMB noted the statement of the EC's representative that several other WTO Members had included in the list of products to be integrated in the first and/or second stages of implementation of the ATC products of those HS lines in the Annex for which only part of the line fell under the coverage of the ATC (indicated as 'ex' HS lines in the Annex).
>
> With regard to the programmes for the first stage of integration which had already been reviewed by the TMB, the Body noted that it had not ascertained whether the statistical information provided by Mem-

[11] Panel Report on *Textiles – Turkey*, para. 7.71.
[12] G/TMB/R/60, para. 33.
[13] G/TMB/R/60, para. 33.
[14] G/TMB/R/29, paras. 39, 41 and 42.

bers referred to the whole HS line or only to that portion of the HS line covered by the ATC. The TMB, therefore, decided to verify with the Members concerned whether the volume of imports they had notified for the 'ex HS lines' related precisely to the products described in the Annex.

With respect to the second stage of integration the review of which had not yet been completed by the TMB, the Body decided to pay due regard to these issues."[15]

12. Again, on the issue of "ex-positions", at its meeting in July 1997, the TMB concluded that, in principle, all Members that had notified integration programmes could be affected by technical problems due to the non-availability of statistical information in respect to the precise product descriptions included in the Annex to the ATC:

"The TMB had a follow-up discussion on this matter which led to a conclusion according to which, in principle, all the Members which had notified integration programmes may be affected by technical problems resulting essentially from the non-availability of statistical information corresponding to the precise product descriptions contained in the Annex to the ATC, independently of whether or not they had included 'ex HS items' in their respective integration programmes for Stage 1 and/or Stage 2. This resulted from the fact that in quantifying and notifying the total volume of 1990 imports each Member concerned had to include the relevant data related to the 'ex HS lines' defined in the Annex to the ATC. Therefore, the TMB decided to request that all Members which had submitted integration programmes, including those which had not as yet included in such programmes 'ex HS items', ascertain whether the statistical data counted in calculating the total volume of the Member's 1990 imports of the products in the Annex referred to the whole HS lines, or only to that portion of those HS lines which was covered by the ATC. The TMB expected that Members would report to it on the outcome of such verification."[16]

13. In its Implementation Report in July 1997, the TMB observed that several integration programmes did not fully meet the particular technical criteria established under Article 2.6, but before examining this data the TMB noted that it had not been possible to provide more accurate data:

"[T]he TMB in some instances took note of integration programmes which, in certain respects, did not fully meet the technical criteria established under Article 2.6. This concerned cases where the data were not available in volume, or for the year 1990, or where the share of integration was calculated relative to data for the textiles and clothing sector as a whole since data for the exact product coverage of the ATC were not available. Prior to taking note of such notifications, the TMB was assured that no better data could be obtained."[17]

5. Article 2.7(b)

14. As regards late notifications, at its meeting in December 1996, the TMB stated:

"With respect to notifications addressed to the TMB after the respective deadlines foreseen in the ATC, the TMB reiterated that its taking note of late notifications was without prejudice to the legal status of such notifications."[18]

6. Article 2.8

15. At its meeting in May 1997, in examining the notifications of a number of Members pursuant to Articles 2.8(a) and 2.11, the TMB held:

"With regard to those notifications mentioned above for which the calculation of the share of the products integrated had been made on the basis of value, or of volume of imports of a different base year other than 1990, the TMB ensured that no better data were available and that the Members concerned had followed the same approach as for the notification they had made pursuant to paragraphs 6 and 7(b) of Article 2."[19]

7. Article 2.11

16. With respect to the treatment of late notifications, see paragraph 14 above.

8. Articles 2.13 and 2.14

(a) Implementation of the growth-on-growth provisions

17. At its meeting in July 2002, the TMB considered it necessary, in the context of the review of several notifications received pursuant to Articles 2.1 and 2.2, to address the cross-cutting issue of the manner in which the growth-on-growth provisions provided for in Articles 2.13 and 2.14 had to be implemented with respect to recently acceded Members, such as China and Chinese Taipei.[20]

---

[15] G/TMB/R/29, paras. 43–45.
[16] G/TMB/R/34, para. 7.
[17] G/L/179, para. 29.
[18] G/TMB/R/22, para. 16. This statement was subsequently repeated on a number of occasions.
[19] G/TMB/R/30, para. 8. At its forty-second (March 1998) and forty-fourth meetings (May 1998), the TMB reiterated the aforesaid position. G/TMB/R/41, para. 28; G/TMB/R/43, para. 5.
[20] In order to discharge its responsibilities, the TMB was also required to examine and to reach an understanding on the modalities agreed and guidance provided by Members in the respective legal instruments of accession *vis-à-vis* the implementation of the growth-on-growth provisions of the ATC. Only such a common understanding could provide a basis and serve as a benchmark for the TMB, enabling it to verify if the actual implementation had been effected in compliance with the requirements established by the Members.

18. In relation to China, the TMB noted that the increase in the growth rates should have been ideally implemented on the date of China's accession on 11 December 2001. The TMB observed that the four Members maintaining restrictions on imports from China with reference to Article 2.1 had actually taken into account the growth rates only on 1 January 2002. This raised the issue whether the provisions of the accession instrument allowed for the implementation of the growth-on-growth provisions on 1 January 2002 only:

> "In considering this aspect of the subject-matter, the TMB noted that the increase in the respective growth rates, as far as, when applicable, Stage 1 and in any event, Stage 2 were concerned, should have been ideally implemented on 11 December 2001. At the same time, the TMB recalled that it had already accepted that in any possible reading of the third sentence of paragraph 241 of the Working Party report, the term 'as appropriate' could (also) be related to the very last part of the sentence which indicated that the respective commitments should be applied 'as from the date of China's accession'. Based on this flexibility inherent in the formulation, practical considerations could also be raised in support of why an actual implementation starting on 1 January 2002 could be found to be appropriate. In terms of the administration of restraints under the ATC, the beginning of a new calendar year has always been a turning-point, since it represented the start of a new 'quota-year', *inter alia*, by establishing the new annual restraint levels, also as a result of the application of the respective annual growth rates. Since the time difference between China's accession and the start of the implementation of the new annual restraint levels for the year 2002 did not exceed three weeks, this delayed actual implementation could be explained by practical administrative considerations and the time-lag could not be considered to be too excessive.
>
> In light of the above considerations, the TMB concluded that though some of the measures in question could have already been implemented as from 11 December 2001, they had to be implemented at latest by 1 January 2002, and this had been done by Canada, the European Communities, Turkey and the United States."[21]

19. The TMB also discussed which increases in the growth rate should apply, i.e. the growth rate increase of 16 per cent in paragraph 13 or the rates in paragraph 14. In the absence of clarity with regard to this issue, the TMB referred to the minimum requirements incumbent on Members:

> "[S]ince the relevant provisions of the legal instruments of China's accession did not provide an unambiguous guidance, it was not possible to provide a clear answer to the question of whether the restraining Members had also been required to apply the not less than 16 per cent increase in the respective growth rates, as provided for in Article 2.13, for the Stage 1 integration process. The lack of a clear answer regarding this aspect had led the TMB to consider those minimum requirements which had to be implemented by the Members concerned. These minimum requirements could be summarized in the following: as from 1 January 2002, the base levels in force on 10 December 2001 had to be increased by the respective growth rates applied for the year 2001 (prior to China's accession), increased by the full 25 per cent applicable to Stage 2 and further increased by the 27 per cent applicable to Stage 3."[22] (emphasis original)

20. Concerning Chinese Taipei, the TMB reiterated its holding in its examination of the rights of China with regard to this issue:

> "[S]ince the relevant provisions of the legal instruments of Chinese Taipei's accession did not provide unambiguous guidance in this regard, it was not possible to give a clear answer to the question of whether restraining Members had also been required to apply the not less than 16 per cent, followed by the not less than 25 per cent increase in the respective growth rates, as provided for in Articles 2.13 and 2.14(a) for Stages 1 and 2, respectively. The lack of a clear reply regarding this aspect led the TMB to consider those minimum requirements which had to be implemented by the Members concerned. The TMB concluded that these minimum requirements implied that on 1 January 2002, the base levels in force on 31 December 2001 had to be increased by the respective growth rates applied in 2001, as further increased by 27 per cent which was applicable for Stage 3."[23] (emphasis original)

9. Article 2.17

21. Concerning a mutually agreed solution notified by Pakistan under Article 2.17 and by the United States under Article 5, which provided for, *inter alia*, the introduction of a new restraint (on United States imports from Pakistan on products falling under US categories 666–S and 666–P), the TMB indicated that:

> "The TMB also recalled that according to Article 2.17, '[a]dministrative arrangements, as deemed necessary in relation to the implementation of any provision' of Article 2 could be agreed between the Members concerned. As the restrictions on category 666 – S and 666 – P products had not been notified pursuant to Article 2.1 and, therefore, did not fall under the scope of the provisions of Article 2, the TMB did not see how the imposition of these new restrictions, even if mutually agreed between the two Members, could be considered to be necessary in relation to the implementation of the provisions of Article 2. The TMB also observed that the administrative arrangements concluded between the United States and

[21] G/TMB/R, paras. 30–31.
[22] (*footnote original*) G/TMB/R/90, para. 32.
[23] (*footnote original*) G/TMB/R/90, para. 43.

Pakistan . . . did not provide for the introduction of new quantitative restrictions . . .

The TMB, therefore, concluded that there appeared to be no justification to apply new quantitative restrictions under Article 2.17."[24]

22. With respect to the same subject-matter examined under Article 5, see also the excerpts from the reports of the TMB referenced in paragraphs 31–38 below.

10. Article 2.18

23. In examining the notifications provided by some Members on the improvements in access provided to those Members whose exports had been subject to restrictions on 31 December 1994 and whose restrictions represented 1.2 per cent or less of the total volume of the importing Members' restrictions on 31 December 1991, the TMB stated as follows:

"The TMB observed that the implementation of this provision of the ATC had been made by the Members concerned using different methodologies and no Member used the option of equivalent changes with respect to a different mix of base levels, growth and flexibility provisions. It was observed that Article 2.18 does not provide precise guidance as to how to implement the advancement by one stage of the growth rates set out in Articles 2.13 and 2.14, or how to apply 'at least equivalent changes as may be mutually agreed with respect to a different mix of base levels, growth and flexibility provisions'. However, it was noted that the result in terms of market access in the first stage would have been improved if the methodology chosen for the advancement by one stage of the growth rates included the growth factor of the first stage, as done by one Member."[25]

11. Article 2.21

24. See the excerpts from the reports of the TMB referenced above.

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3

1. Within 60 days following the date of entry into force of the WTO Agreement, Members maintaining restrictions[4] on textile and clothing products (other than restrictions maintained under the MFA and covered by the provisions of Article 2), whether consistent with GATT 1994 or not, shall (*a*) notify them in detail to the TMB, or (*b*) provide to the TMB notifications with respect to them which have been submitted to any other WTO body. The notifications should, wherever applicable, provide information with respect to any GATT 1994 justification for the restrictions, including GATT 1994 provisions on which they are based.

(*footnote original*) [4] Restrictions denote all unilateral quantitative restrictions, bilateral arrangements and other measures having a similar effect.

2. Members maintaining restrictions falling under paragraph 1, except those justified under a GATT 1994 provision, shall either:

(a) bring them into conformity with GATT 1994 within one year following the entry into force of the WTO Agreement, and notify this action to the TMB for its information; or

(b) phase them out progressively according to a programme to be presented to the TMB by the Member maintaining the restrictions not later than six months after the date of entry into force of the WTO Agreement. This programme shall provide for all restrictions to be phased out within a period not exceeding the duration of this Agreement. The TMB may make recommendations to the Member concerned with respect to such a programme.

3. During the duration of this Agreement, Members shall provide to the TMB, for its information, notifications submitted to any other WTO bodies with respect to any new restrictions or changes in existing restrictions on textile and clothing products, taken under any GATT 1994 provision, within 60 days of their coming into effect.

4. It shall be open to any Member to make reverse notifications to the TMB, for its information, in regard to the GATT 1994 justification, or in regard to any restrictions that may not have been notified under the provisions of this Article. Actions with respect to such notifications may be pursued by any Member under relevant GATT 1994 provisions or procedures in the appropriate WTO body.

5. The TMB shall circulate the notifications made pursuant to this Article to all Members for their information.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. General

25. With respect to the measure concerning the United States and Turkey, referred to in paragraphs 6 and 8 above, the TMB confirmed that all restrictive measures that touch upon the subject matter of the *ATC*, even if they have been adopted on a basis other than *ATC* provisions, have to be notified to the TMB:

"Since restrictions other than those covered by the provisions of Article 2 also had to be notified within 60 days

[24] G/TMB/R/45, paras. 27–28.
[25] G/L/179, para. 210.

following the date of entry into force of the WTO Agreement, the TMB observed that the restraint could not have been agreed between Turkey and the United States under the provisions of Article 3.1 either. Article 3.3 does not exclude the possibility, *inter alia*, of introducing new restrictions on textile and clothing products. However, it contains not only the requirement of 'double' notification (i.e. to the appropriate WTO body and also to the TMB, for its information), but also limits the possibility of applying, *inter alia*, new restrictions to those cases where the measures were taken under any GATT 1994 provision. As to the restraint agreed between Turkey and the United States, the TMB noted that, according to the joint communication submitted by the two Members concerned, this measure had not been introduced under a GATT 1994 provision, but that it had been taken pursuant to a provision of the ATC. On this basis the TMB observed that the new restraint in question could not have been introduced pursuant to the provisions of Article 3."[26]

2. Article 3.1

(a) "restrictions"

26. At its meeting in November 2002, while reviewing an Article 3.1 notification received from China, following its accession to the WTO, the TMB considered, *inter alia*, the scope of the application of Article 3, i.e. whether it also applies to export restrictions. The TMB noted that the term "restriction" in Article 3.1 is not subject to any additional qualifications and that the language of the Article does not support an interpretation whereby Article 3.1 only applies to imports:

> "[A]rticle 3.1 uses the word 'restrictions' without any additional qualifications and that the footnote to this provision related to the same term states the following: 'Restrictions denote all unilateral quantitative restrictions, bilateral arrangements and other measures having a similar effect.'[27] The language of Article 3 does not limit the application of this provision to any specific type of restriction. The export quotas maintained by China affecting silk yarn and woven fabrics of silk are, undoubtedly, unilateral quantitative restrictions, corresponding to the definition provided in the footnote referred to above. Therefore, also in view of the lack of any further precision in the respective provision of the ATC, export restrictions are not *a priori* excluded from the scope of application of Article 3. This conclusion is also in line with past practice in the TMB, whereby the notification under Article 3 of certain measures affecting exports of some textile products was not questioned.[28]
>
> The TMB noted, furthermore, that the additional notification by China referred to 'restrictions on certain textile products which fall under the coverage of ATC and are subject to Article 3 of [that] Agreement'. This reference presumably indicated that, in the view of China, the measures in question should be considered under the applicable provisions of the ATC. It was observed that the notification of these export restrictions under Articles 3.1 and 3.2(b) did not appear to be in contradiction with the relevant portion of the Report of the Working Party on the Accession of China.[29]"[30]

3. Article 3.2(b)

27. At its meeting in February 1996, the TMB considered a notification by Hungary of the phase-out programme to be applied to the restrictions maintained by that Member under Article 3.1. In taking note of this programme, the TMB:

> "[O]bserved that, in view of the general nature of this programme, it expected that the details of its implementation in the respective stages would be notified to the Body prior to their implementation, for the Body's consideration".[31]

28. At its meeting in March 1996, "[t]he TMB reverted to its consideration of a notification made by Japan, under Article 3.2(b), of the phase out of the measures notified under Article 3.1. In taking note of this phase-out programme the TMB expressed the expectation that its implementation, in conformity with paragraph 2(b) of Article 3, would be such as to provide appropriate progressive increases to the level of restrictions on imports of silk yarn and silk fabric from Korea."[32]

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4

1. Restrictions referred to in Article 2, and those applied under Article 6, shall be administered by the exporting Members. Importing Members shall not be obliged to accept shipments in excess of the restrictions notified under Article 2, or of restrictions applied pursuant to Article 6.

2. Members agree that the introduction of changes, such as changes in practices, rules, procedures and categorization of textile and clothing products, including those changes relating to the Harmonized System, in the implementation or administration of those restrictions notified or applied under this Agreement should not: upset the balance of rights and obligations between the

---

[26] G/TMB/R/60, para. 30.
[27] (*footnote original*) See footnote 4 of the ATC.
[28] (*footnote original*) Japan notified the application of an export approval system affecting certain products with certain specified destinations (United States, European Communities). For details see G/TMB/N/82 and G/TMB/N/175.
[29] (*footnote original*) See WT/ACC/CHN/49, paragraph 165.
[30] G/TMB/R/93, paras. 19–20.
[31] G/TMB/R/9, para. 12.
[32] G/TMB/R/11, para. 8.

Members concerned under this Agreement; adversely affect the access available to a Member; impede the full utilization of such access; or disrupt trade under this Agreement.

3. If a product which constitutes only part of a restriction is notified for integration pursuant to the provisions of Article 2, Members agree that any change in the level of that restriction shall not upset the balance of rights and obligations between the Members concerned under this Agreement.

4. When changes mentioned in paragraphs 2 and 3 are necessary, however, Members agree that the Member initiating such changes shall inform and, wherever possible, initiate consultations with the affected Member or Members prior to the implementation of such changes, with a view to reaching a mutually acceptable solution regarding appropriate and equitable adjustment. Members further agree that where consultation prior to implementation is not feasible, the Member initiating such changes will, at the request of the affected Member, consult, within 60 days if possible, with the Members concerned with a view to reaching a mutually satisfactory solution regarding appropriate and equitable adjustments. If a mutually satisfactory solution is not reached, any Member involved may refer the matter to the TMB for recommendations as provided in Article 8. Should the TSB not have had the opportunity to review a dispute concerning such changes introduced prior to the entry into force of the WTO Agreement, it shall be reviewed by the TMB in accordance with the rules and procedures of the MFA applicable for such a review.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. General

29. In the context of examining the measure introduced by the United States on exports of certain products from Turkey, referred to in paragraphs 6 and 8 above, the TMB and held that the provisions of Article 4 have to be read in conjunction with the other provisions of the Agreement:

"[A]rticle 4.1 deals with the administration of 'restrictions referred to in Article 2, and those applied under Article 6'. Article 4.2 states that 'Members agree that the introduction of changes, such as changes in practices, rules, procedures and categorization of textile and clothing products including those changes relating to the Harmonized System, in the implementation or administration of those restrictions notified or applied under this Agreement should not: upset the balance of rights and obligations between Members concerned under this Agreement; adversely affect the access available to a Member; impede the full utilization of such access; or disrupt trade under this Agreement.' Article 4.4 provides, *inter alia*, the possibility to reach a 'mutually acceptable solution regarding appropriate and equitable adjustment' between Members when necessary changes, in the sense of Article 4.2, are introduced in the implementation or administration of existing restrictions. The TMB noted that, according to Article 4.4, such mutually acceptable solutions did not have to be notified to the TMB. The TMB recalled its findings that the new restriction could not have been agreed pursuant to the provisions of Articles 2 and 6. It was also observed that Article 4.4 does not provide explicit guidance regarding the scope of the adjustment that can be agreed between the Members concerned in the framework of the mutually acceptable solution. A reading according to which the introduction of a new restriction, in the sense of Article 2.4, can be agreed upon pursuant to Article 4.4 as an adjustment to balance possible improvements in the implementation or administration of restrictions maintained pursuant to Article 2 was, however, in the view of the TMB not consistent with the intention of the drafters of the ATC, since Article 4 relates to the implementation or administration of the restrictions referred to in Article 2, or applied under Article 6. Also, the construction of Article 4 and its language seem to suggest that when changes, in the sense of Article 4.2 are introduced, the appropriate and equitable adjustment referred to in Article 4.4 can only involve and affect the restrictions that have already been in place and notified pursuant to Article 2 or Article 6."[33]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5

1. Members agree that circumvention by transshipment, re-routing, false declaration concerning country or place of origin, and falsification of official documents, frustrates the implementation of this Agreement to integrate the textiles and clothing sector into GATT 1994. Accordingly, Members should establish the necessary legal provisions and/or administrative procedures to address and take action against such circumvention. Members further agree that, consistent with their domestic laws and procedures, they will cooperate fully to address problems arising from circumvention.

2. Should any Member believe that this Agreement is being circumvented by transshipment, re-routing, false declaration concerning country or place of origin, or falsification of official documents, and that no, or inadequate, measures are being applied to address and/or to take action against such circumvention, that Member should consult with the Member or Members concerned with a view to seeking a mutually satisfactory solution. Such consultations should be held promptly, and within 30 days when possible. If a mutually satisfactory solution

[33] G/TMB/R/60, para. 31.

is not reached, the matter may be referred by any Member involved to the TMB for recommendations.

3. Members agree to take necessary action, consistent with their domestic laws and procedures, to prevent, to investigate and, where appropriate, to take legal and/or administrative action against circumvention practices within their territory. Members agree to cooperate fully, consistent with their domestic laws and procedures, in instances of circumvention or alleged circumvention of this Agreement, to establish the relevant facts in the places of import, export and, where applicable, transshipment. It is agreed that such cooperation, consistent with domestic laws and procedures, will include: investigation of circumvention practices which increase restrained exports to the Member maintaining such restraints; exchange of documents, correspondence, reports and other relevant information to the extent available; and facilitation of plant visits and contacts, upon request and on a case-by-case basis. Members should endeavour to clarify the circumstances of any such instances of circumvention or alleged circumvention, including the respective roles of the exporters or importers involved.

4. Where, as a result of investigation, there is sufficient evidence that circumvention has occurred (e.g. where evidence is available concerning the country or place of true origin, and the circumstances of such circumvention), Members agree that appropriate action, to the extent necessary to address the problem, should be taken. Such action may include the denial of entry of goods or, where goods have entered, having due regard to the actual circumstances and the involvement of the country or place of true origin, the adjustment of charges to restraint levels to reflect the true country or place of origin. Also, where there is evidence of the involvement of the territories of the Members through which the goods have been transshipped, such action may include the introduction of restraints with respect to such Members. Any such actions, together with their timing and scope, may be taken after consultations held with a view to arriving at a mutually satisfactory solution between the concerned Members and shall be notified to the TMB with full justification. The Members concerned may agree on other remedies in consultation. Any such agreement shall also be notified to the TMB, and the TMB may make such recommendations to the Members concerned as it deems appropriate. If a mutually satisfactory solution is not reached, any Member concerned may refer the matter to the TMB for prompt review and recommendations.

5. Members note that some cases of circumvention may involve shipments transiting through countries or places with no changes or alterations made to the goods contained in such shipments in the places of transit. They note that it may not be generally practicable for such places of transit to exercise control over such shipments.

6. Members agree that false declaration concerning fibre content, quantities, description or classification of merchandise also frustrates the objective of this Agreement. Where there is evidence that any such false declaration has been made for purposes of circumvention, Members agree that appropriate measures, consistent with domestic laws and procedures, should be taken against the exporters or importers involved. Should any Member believe that this Agreement is being circumvented by such false declaration and that no, or inadequate, administrative measures are being applied to address and/or to take action against such circumvention, that Member should consult promptly with the Member involved with a view to seeking a mutually satisfactory solution. If such a solution is not reached, the matter may be referred by any Member involved to the TMB for recommendations. This provision is not intended to prevent Members from making technical adjustments when inadvertent errors in declarations have been made.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. General

30. In the context of examining the measure introduced by the United States on exports of certain products from Turkey, referred to in paragraphs 6 and 8 above, the TMB stated that all measures adopted on the basis of Article 5 shall be notified to the TMB, unless the parties reach a mutually agreed solution:

> "[P]rovides, *inter alia*, the possibility of taking certain actions, after consultations had been held between the Members concerned with a view to arriving at a mutually satisfactory solution between them. Article 5.4 stipulates, *inter alia*, that '. . . where there is evidence of the involvement of territories of the Members through which the goods have been transshipped, such action may include the introduction of restraints with respect to such Members.' Article 5.4 also states that '[t]he Members concerned may agree on other remedies in consultation'. However, any action taken pursuant to Article 5.4 has to be notified to the TMB. In case of evidence that the ATC is being circumvented by false declaration concerning fibre content, quantities, description or classification of merchandise, Article 5.6 allows the Members concerned to consult with a view to seeking a mutually satisfactory solution and the same Article does not require the notification of such mutually agreed solutions to the TMB. At the same time, the TMB observed that Article 5 refers to situations of 'circumvention by transshipment, re-routing, false declaration concerning country or place of origin, and falsification of official documents', and that neither Turkey nor the United States had invoked or reported such a situation. Without prejudice as to whether in particular circumstances a new restriction can be introduced, or not, pur-

suant to the provisions of Article 5, the TMB, on the basis of the information available to it, concluded that the provision of the ATC referred to by both Turkey and the United States could not be Article 5."[34]

2. Article 5.4

(a) "appropriate action, to the extent necessary to address the problem"

31. In reviewing a number of administrative arrangements agreed between the United States and several other Members under which triple charges could be imposed on quotas to counter circumventions, the TMB stated:

"[T]hat Article 5 of the ATC contained detailed descriptions of the rules and procedures to be followed. It appeared to the TMB that some aspects of the related provisions included in the administrative arrangements could go beyond what was specified in Article 5. The TMB noted, *inter alia*, that paragraph 4 of Article 5 of the ATC seemed to provide some flexibility in terms of remedies or agreed actions that could be foreseen in cases when circumvention has occurred. It observed, however, that Article 5 contained no mention of the possibility for the importing Member to impose triple charges on quotas, as a deterrent to circumvention. The TMB noted in this regard that this provision had not been utilized by the United States.

The TMB recalled that the United States had stated that when provisions of the administrative arrangements were inconsistent with the ATC, the provisions of the ATC would apply. The TMB understood that this statement applied to each and every provision of the arrangements notified. The TMB expected, therefore, that all the provisions of these administrative arrangements would be implemented by the respective Members in conformity with the relevant provisions of the ATC."[35]

(b) "Members concerned may agree on other remedies in consultation"

32. Concerning a mutually agreed solution notified by Pakistan under Article 2.17 and by the United States under Article 5, referenced in paragraph 21 above, which provided, *inter alia*, for the introduction of a new restraint (on United States imports from Pakistan on products falling under United States categories 666–S and 666–P), the TMB examined whether a new quantitative restriction, can be considered as an "appropriate action" in the light of Article 5.4 of the *ATC*:

"The TMB observed that, apart from the third sentence of Article 5.4, the introduction of a new restriction, even if mutually agreed between the Members concerned, was not mentioned in Article 5.4 as an 'appropriate action, to the extent necessary to address the problem' when circumvention as defined in Article 5.1 had occurred. Furthermore, the TMB understood that the introduction of restrictions, set out in the third sentence of Article 5.4, related only to the true country or place of origin in case there had been evidence of its involvement in the transshipment. This provision, therefore, could not *per se* allow the introduction of new restrictions on imports from Pakistan in the particular case when circumvention had occurred.

The TMB also observed that while the second and third sentences of Article 5.4 specified possible actions that could be taken when circumvention had occurred, they did not provide an exhaustive list for such actions. This was made clear by the language of the second sentence as well as by the fifth sentence of Article 5.4, the latter providing that '[t]he Members concerned may agree on other remedies in consultation'."[36]

33. While examining the measure referred to in paragraph 32 above, the TMB noted with respect to the fifth sentence of Article 5.4 that "the Agreement did not specify what, in the context of this paragraph, could or could not constitute the 'other remedies'". It also held that Article 5.4 was sufficiently clear that an objective interpretation of "other remedies" could not be asserted as to grant Members the right to adopt new quantitative restrictions:

"It could be argued that the 'other remedies' referred to in Article 5.4 did not include the permission to introduce new quantitative restrictions, since Article 5.4 in itself as well as the broader context as determined by the ATC provided sufficient guidance to the Members concerned to develop a correct understanding on what could or could not constitute such 'other remedies' in the sense of Article 5.4. It could be contended that Article 5.4 was sufficiently specific in defining what type of actions can be taken in response to well defined circumstances. The second sentence of this Article, in addressing the issue of what kind of action could be taken in the relationship between the importing Member (the United States) and the Member constituting the true place of origin (Pakistan) of the goods allegedly circumvented (cotton bedsheets), specified that '[s]uch action may include . . ., where goods have entered, having due regard to the actual circumstances and the involvement of the country or place of true origin, the adjustment of charges to restraint levels to reflect the true country or place of origin'. This formulation seemed to imply that the action taken should affect the product that was subject to circumvention. Since only the exports of products that had already been subject to restrictions could be circumvented, the remedy for such circumvention could not affect products other than those with respect to which circumvention had been claimed. Reading the second

[34] G/TMB/R/60, para. 30.
[35] G/TMB/R/31, paras. 20–21.
[36] G/TMB/R/45, paras. 33–34.

sentence of Article 5.4 in conjunction with the fifth sentence, it appeared, therefore, that the two Members could have agreed on adjustments of charges to the restraint level established for the category 361 products or on 'other remedies' affecting the same products, but not on 'other remedies' affecting other products, like category 666 – S and 666 – P products.

In addition, the third sentence of Article 5.4 explicitly allowed the introduction of new restrictions, but did so only in cases where there was evidence of the involvement of the territories of (third) Members through which the goods had been transhipped [. . .]. If this provision were read together with the fifth sentence of Article 5.4, it appeared that remedies other than the introduction of restrictions on imports of category 361 products could also have been foreseen, but these actions had to be limited to the products transshipped and to the Member through which the transshipment was effected. The TMB understood that no restrictions had been introduced by the United States against imports of category 361 products from the Member through which the products of Pakistani origin had allegedly been transhipped. Also, the TMB was not aware of any other action taken by the United States *vis-à-vis* imports of the transshipped products from the Member involved in this transshipment. In any case, this sentence did not provide authorization for the introduction of new restrictions on imports from Pakistan."[37]

34. As further support for the proposition that the quantitative restriction at issue was not permitted under Article 5.4, the TMB referred to "the broader context" of the *ATC*. The TMB considered that as the *ATC* expressly provides for an exception to the prohibition on introducing new quantitative measures and that as it aims to achieve a complete integration of this sector in the covered agreements of the *GATT 1994*, these were conclusive in the determination that quantitative restrictions cannot be introduced on the basis of Article 5.4:

"It could be contended that the broader context as defined by the ATC also confirmed the statements included in [the] paragraphs [cited in paragraph 32 above]. It could be argued that, since the Agreement sets out provisions to be applied by Members during a transition period for the integration of the textiles and clothing sector into GATT 1994 and thus the ultimate objective of the Agreement was to ensure the full integration of trade in the covered products into the GATT 1994 rules and disciplines, the ATC carefully circumscribed the possibilities for maintaining or introducing quantitative restrictions; (apart from the third sentence of Article 5.4) the relevant provisions were contained in Articles 2, 3 and 6. As indicated earlier, the provisions of Articles 2 and 3 were not applicable to the particular case in question. While Article 6 allowed for the introduction of new restrictions for a limited duration, if the conditions specified in that Article were fully met, it was observed, however, that neither of the two Members had invoked the provisions of Article 6 as a justification for the introduction of the new restrictions. Keeping in mind also the provisions of Article 2.4, it could be concluded on the basis of the arguments presented above that the introduction of the new restrictions on imports of category 666 products from Pakistan, even if mutually agreed between the two Members, could not be justified under the ATC."[38]

35. With a view to giving due consideration to possible readings to the fifth sentence of Article 5.4 other than its interpretation referenced in paragraphs 32–34 above, the TMB also noted:

"It could also appear, however, that the language of the fifth sentence of Article 5.4 was vague and permissive, not setting any limitation on the kind of actions that would constitute possible 'other remedies'. It could, therefore, be argued that this formulation provided broad discretion to the Members concerned in reaching an agreement, in consultation, on what they consider in a particular case to be appropriate remedies (other than those defined in the preceding sentences of the same Article). On the basis of such a reasoning, one could not exclude an argument that the introduction of restrictions on products previously not subject to such restrictions could be considered as a possibility for providing 'other remedies'."[39]

36. With respect to the treatment of the measure at issue under Article 2.17, see the excerpts from the reports of the TMB referenced in paragraph 21 above. Also, with respect to the same issue under Article 5.6, see the excerpt from the report of the TMB referenced in paragraph 37 below.

3. Article 5.6

37. Concerning a mutually agreed solution notified by Pakistan under Article 2.17 and by the United States under Article 5, which provided, *inter alia*, for the introduction of a new restraint (on United States imports from Pakistan on products falling under United States categories 666–S and 666–P), the TMB examined, with respect to the measure referenced in paragraphs 21 and 32 above, whether the introduction of new quantitative import restrictions was permitted under Article 5.6, and held that "it could be argued that the introduction of the new restraints, even if mutually agreed between the two Members, could not be justified in the context of Article 5.6":

"It could be argued that Article 5.6 did not allow for taking such measures as the introduction of new quan-

[37] G/TMB/R/45, paras. 36–37.
[38] G/TMB/R/45, para. 38.
[39] G/TMB/R/45, para. 39.

titative restrictions. The second sentence of Article 5.6 envisaged that appropriate measures, consistent with domestic laws and procedures, should be taken against the exporters or importers involved. Therefore, it appeared that a mutually satisfactory solution reached pursuant to this provision would encompass appropriate measures against the firms involved (exporters and/or importers), as opposed to those against governments. In addition, while Article 5.6 was not precise in providing Members with modalities for taking 'appropriate measures' in cases where false declarations had been made for purposes of circumvention, it could be contended that the loose disciplines attached to this provision (e.g. there was no requirement to notify the appropriate measures agreed to the TMB), compared to other provisions concerning the taking of measures having a restrictive effect embodied in the ATC, raised doubts as to whether the introduction of new restrictions could be contemplated under this particular provision. Based on these considerations as well as on the analysis regarding the broader context defined by the ATC, . . . it could be argued that the introduction of the new restraints, even if mutually agreed between the two Members, could not be justified in the context of Article 5.6.

It could also be argued, that if one accepted that (i) incorrect marking of cotton bedsheets had been, at least in part, the root of the problem identified and that (ii) this practice amounted to a false declaration as defined in Article 5.6, the language of this Article authorized the Members concerned to agree, in case when no, or inadequate, administrative measures were being applied to address and/or to take action against such circumvention, on any kind of mutually satisfactory solution, possibly including the introduction of new restraints. Such a conclusion would rely, *inter alia,* on the lack in this language of any explicit indication regarding the possible nature of the measures that could be agreed between the Members as a mutually satisfactory solution. The TMB declined to take a definitive position at this stage regarding the applicability of this provision, as well as on the conformity of the actions taken with Article 5.6."[40]

38. With respect to the treatment of the measure at issue under Article 2.17, see excerpts from the reports of the TMB referenced in the section dealing with Article 2.17, paragraph 21 above.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6

1. Members recognize that during the transition period it may be necessary to apply a specific transitional safeguard mechanism (referred to in this Agreement as "transitional safeguard"). The transitional safeguard may be applied by any Member to products covered by the Annex, except those integrated into GATT 1994 under the provisions of Article 2. Members not maintaining restrictions falling under Article 2 shall notify the TMB within 60 days following the date of entry into force of the WTO Agreement, as to whether or not they wish to retain the right to use the provisions of this Article. Members which have not accepted the Protocols extending the MFA since 1986 shall make such notification within 6 months following the entry into force of the WTO Agreement. The transitional safeguard should be applied as sparingly as possible, consistently with the provisions of this Article and the effective implementation of the integration process under this Agreement.

2. Safeguard action may be taken under this Article when, on the basis of a determination by a Member[5], it is demonstrated that a particular product is being imported into its territory in such increased quantities as to cause serious damage, or actual threat thereof, to the domestic industry producing like and/or directly competitive products. Serious damage or actual threat thereof must demonstrably be caused by such increased quantities in total imports of that product and not by such other factors as technological changes or changes in consumer preference.

(*footnote original*) [5] A customs union may apply a safeguard measure as a single unit or on behalf of a member State. When a customs union applies a safeguard measure as a single unit, all the requirements for the determination of serious damage or actual threat thereof under this Agreement shall be based on the conditions existing in the customs union as a whole. When a safeguard measure is applied on behalf of a member State, all the requirements for the determination of serious damage, or actual threat thereof, shall be based on the conditions existing in that member State and the measure shall be limited to that member State.

3. In making a determination of serious damage, or actual threat thereof, as referred to in paragraph 2, the Member shall examine the effect of those imports on the state of the particular industry, as reflected in changes in such relevant economic variables as output, productivity, utilization of capacity, inventories, market share, exports, wages, employment, domestic prices, profits and investment; none of which, either alone or combined with other factors, can necessarily give decisive guidance.

4. Any measure invoked pursuant to the provisions of this Article shall be applied on a Member-by-Member basis. The Member or Members to whom serious damage, or actual threat thereof, referred to in paragraphs 2 and 3, is attributed, shall be determined on the basis of a sharp and substantial increase in imports, actual or imminent[6], from such a Member or Members individually, and on the basis of the level of imports as compared with imports from other sources, market share, and import and domestic prices at a comparable stage of commercial transaction; none of these factors,

[40] G/TMB/R/45, paras. 47–48.

either alone or combined with other factors, can necessarily give decisive guidance. Such safeguard measure shall not be applied to the exports of any Member whose exports of the particular product are already under restraint under this Agreement.

(*footnote original*) [6] Such an imminent increase shall be a measurable one and shall not be determined to exist on the basis of allegation, conjecture or mere possibility arising, for example, from the existence of production capacity in the exporting Members.

5. The period of validity of a determination of serious damage or actual threat thereof for the purpose of invoking safeguard action shall not exceed 90 days from the date of initial notification as set forth in paragraph 7.

6. In the application of the transitional safeguard, particular account shall be taken of the interests of exporting Members as set out below:

(a) least-developed country Members shall be accorded treatment significantly more favourable than that provided to the other groups of Members referred to in this paragraph, preferably in all its elements but, at least, on overall terms;

(b) Members whose total volume of textile and clothing exports is small in comparison with the total volume of exports of other Members and who account for only a small percentage of total imports of that product into the importing Member shall be accorded differential and more favourable treatment in the fixing of the economic terms provided in paragraphs 8, 13 and 14. For those suppliers, due account will be taken, pursuant to paragraphs 2 and 3 of Article 1, of the future possibilities for the development of their trade and the need to allow commercial quantities of imports from them;

(c) with respect to wool products from wool-producing developing country Members whose economy and textiles and clothing trade are dependent on the wool sector, whose total textile and clothing exports consist almost exclusively of wool products, and whose volume of textiles and clothing trade is comparatively small in the markets of the importing Members, special consideration shall be given to the export needs of such Members when considering quota levels, growth rates and flexibility;

(d) more favourable treatment shall be accorded to re-imports by a Member of textile and clothing products which that Member has exported to another Member for processing and subsequent reimportation, as defined by the laws and practices of the importing Member, and subject to satisfactory control and certification procedures, when these products are imported from a Member for which this type of trade represents a significant proportion of its total exports of textiles and clothing.

7. The Member proposing to take safeguard action shall seek consultations with the Member or Members which would be affected by such action. The request for consultations shall be accompanied by specific and relevant factual information, as up-to-date as possible, particularly in regard to: (*a*) the factors, referred to in paragraph 3, on which the Member invoking the action has based its determination of the existence of serious damage or actual threat thereof; and (*b*) the factors, referred to in paragraph 4, on the basis of which it proposes to invoke the safeguard action with respect to the Member or Members concerned. In respect of requests made under this paragraph, the information shall be related, as closely as possible, to identifiable segments of production and to the reference period set out in paragraph 8. The Member invoking the action shall also indicate the specific level at which imports of the product in question from the Member or Members concerned are proposed to be restrained; such level shall not be lower than the level referred to in paragraph 8. The Member seeking consultations shall, at the same time, communicate to the Chairman of the TMB the request for consultations, including all the relevant factual data outlined in paragraphs 3 and 4, together with the proposed restraint level. The Chairman shall inform the members of the TMB of the request for consultations, indicating the requesting Member, the product in question and the Member having received the request. The Member or Members concerned shall respond to this request promptly and the consultations shall be held without delay and normally be completed within 60 days of the date on which the request was received.

8. If, in the consultations, there is mutual understanding that the situation calls for restraint on the exports of the particular product from the Member or Members concerned, the level of such restraint shall be fixed at a level not lower than the actual level of exports or imports from the Member concerned during the 12–month period terminating two months preceding the month in which the request for consultation was made.

9. Details of the agreed restraint measure shall be communicated to the TMB within 60 days from the date of conclusion of the agreement. The TMB shall determine whether the agreement is justified in accordance with the provisions of this Article. In order to make its determination, the TMB shall have available to it the factual data provided to the Chairman of the TMB, referred to in paragraph 7, as well as any other relevant information provided by the Members concerned. The TMB may make such recommendations as it deems appropriate to the Members concerned.

10. If, however, after the expiry of the period of 60 days from the date on which the request for consultations was received, there has been no agreement between the Members, the Member which proposed to take safeguard action may apply the restraint by date of import or date of export, in accordance with the provisions of

this Article, within 30 days following the 60–day period for consultations, and at the same time refer the matter to the TMB. It shall be open to either Member to refer the matter to the TMB before the expiry of the period of 60 days. In either case, the TMB shall promptly conduct an examination of the matter, including the determination of serious damage, or actual threat thereof, and its causes, and make appropriate recommendations to the Members concerned within 30 days. In order to conduct such examination, the TMB shall have available to it the factual data provided to the Chairman of the TMB, referred to in paragraph 7, as well as any other relevant information provided by the Members concerned.

11. In highly unusual and critical circumstances, where delay would cause damage which would be difficult to repair, action under paragraph 10 may be taken provisionally on the condition that the request for consultations and notification to the TMB shall be effected within no more than five working days after taking the action. In the case that consultations do not produce agreement, the TMB shall be notified at the conclusion of consultations, but in any case no later than 60 days from the date of the implementation of the action. The TMB shall promptly conduct an examination of the matter, and make appropriate recommendations to the Members concerned within 30 days. In the case that consultations do produce agreement, Members shall notify the TMB upon conclusion but, in any case, no later than 90 days from the date of the implementation of the action. The TMB may make such recommendations as it deems appropriate to the Members concerned.

12. A Member may maintain measures invoked pursuant to the provisions of this Article: (*a*) for up to three years without extension, or (*b*) until the product is integrated into GATT 1994, whichever comes first.

13. Should the restraint measure remain in force for a period exceeding one year, the level for subsequent years shall be the level specified for the first year increased by a growth rate of not less than 6 per cent per annum, unless otherwise justified to the TMB. The restraint level for the product concerned may be exceeded in either year of any two subsequent years by carry forward and/or carryover of 10 per cent of which carry forward shall not represent more than 5 per cent. No quantitative limits shall be placed on the combined use of carryover, carry forward and the provision of paragraph 14.

14. When more than one product from another Member is placed under restraint under this Article by a Member, the level of restraint agreed, pursuant to the provisions of this Article, for each of these products may be exceeded by 7 per cent, provided that the total exports subject to restraint do not exceed the total of the levels for all products so restrained under this Article, on the basis of agreed common units. Where the periods of application of restraints of these products do not coincide with each other, this provision shall be applied to any overlapping period on a *pro rata* basis.

15. If a safeguard action is applied under this Article to a product for which a restraint was previously in place under the MFA during the 12–month period prior to the entry into force of the WTO Agreement, or pursuant to the provisions of Article 2 or 6, the level of the new restraint shall be the level provided for in paragraph 8 unless the new restraint comes into force within one year of:

> (a) the date of notification referred to in paragraph 15 of Article 2 for the elimination of the previous restraint; or
>
> (b) the date of removal of the previous restraint put in place pursuant to the provisions of this Article or of the MFA

in which case the level shall not be less than the higher of (*i*) the level of restraint for the last 12–month period during which the product was under restraint, or (*ii*) the level of restraint provided for in paragraph 8.

16. When a Member which is not maintaining a restraint under Article 2 decides to apply a restraint pursuant to the provisions of this Article, it shall establish appropriate arrangements which: *(a)* take full account of such factors as established tariff classification and quantitative units based on normal commercial practices in export and import transactions, both as regards fibre composition and in terms of competing for the same segment of its domestic market, and *(b)* avoid over-categorization. The request for consultations referred to in paragraphs 7 or 11 shall include full information on such arrangements.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. General

(a) Elements of Article 6

39. In *US – Cotton Yarn*, the Appellate Body held that in applying Article 6 three different, although interrelated, elements of that provision have to be examined, namely "causation", "attribution" and "application":

> "[W]e have to distinguish three different, but interrelated, elements under Article 6: first, *causation* of serious damage or actual threat thereof by increased imports[41]; second, *attribution* of that serious damage to the Member(s) the imports from whom contributed to

[41] (*footnote original*) The element of *causation* of serious damage is referred to in paragraph 2 of Article 6 of the *ATC*. The second sentence of paragraph 2 provides that serious damage "must demonstrably be caused by such increased quantities in total imports of that product" and not by "*other factors*" such as technological changes or changes in consumer preferences.

that damage; and third, *application* of transitional safeguard measures to such Member(s)."[42] [43]

(b) Introduction of a restraint under Article 6 without notification to the TMB

40. In the context of examining a new restriction introduced by the United States on Turkey's exports of certain textile products, as part of a broader understanding reached between the two Members, the TMB held that it required notification of restraint measures under Article 6:

> "Article 6 specifically provides in its paragraph 1 the possibility of introducing 'transitional safeguard' which, as stipulated in other provisions of the same Article, takes the form of restraint measures. However, the restraint measure or measures taken under this Article have to be notified to the TMB, whether agreed or applied unilaterally, as clearly set out in Articles 6.9, 6.10 and 6.11, so as to enable the TMB to examine the measure(s) in question, as required by the provisions of Article 6. Therefore, the measure agreed between Turkey and the United States could not have been taken under Article 6 since that Article requires notification and since both Members had stated to the TMB that the measure had been taken 'pursuant to a provision of the ATC which does not require notification to the TMB'."[44]

(c) Scope of review

(i) Jurisprudence

41. In *US – Underwear*, the United States provided the Panel with the statement issued by the United States authorities on 23 March 1995 (the "March Statement"), based upon which it proposed the transitional safeguard measure in question, and another statement which the United States later provided to the complainant in the TMB review proceedings (the "July Statement"). The Panel, in a statement not reviewed by the Appellate Body, restricted its review to an examination of the March Statement, noting as follows:

> "We believe that statements subsequent to the March Statement should not be viewed as a legally independent basis for establishing serious damage or actual threat thereof in the present case. A restriction may be imposed, in a manner consistent with Article 6 of the ATC, when based on a determination made in accordance with the procedure embodied in Article 6.2 and 6.4 of the ATC. This is precisely the role that the March Statement is called upon to play. Consequently, to review the alleged inconsistency of the US action with the ATC, we must focus our legal analysis on the March Statement as the relevant legal basis for the safeguard action taken by the United States."[45]

42. While it declined to consider a later statement which the United States had provided to the complainant (Costa Rica) in the TMB review proceedings, as referenced in paragraph 41 above, the Panel on *US – Underwear*, in a finding not reviewed by the Appellate Body, held that it could nevertheless "legitimately take the July Statement into account as evidence submitted by the United States in our assessment of the overall accuracy of the March Statement":

> "The March Statement included under the heading 'Market Situation' one sub-heading entitled 'Serious Damage to the Domestic Industry' (sub-heading A), which contained general information about the effect of underwear imports in Category 352/652, and a second sub-heading 'Industry Statements' (sub-heading B), which summarized statements to the US authorities by individual US companies. To some extent, there was an overlap between the information contained under the two sub-headings. The same categories of information were equally discussed in a statement submitted to the TMB by the United States in July 1995 (the 'July Statement'). While we have concluded that the July Statement should not be viewed as a legally independent basis for establishing serious damage or actual threat thereof, we feel that we can legitimately take the July Statement into account as evidence submitted by the United States in our assessment of the overall accuracy of the March Statement. Consequently, we will use the July Statement for this limited purpose only. By doing so, we do not share the concerns expressed by the United States that such use of the July Statement would impair proceedings in the TMB in the future. We consider that a reluctance to submit updated information would normally adversely affect Members concerned. The interest to cooperate as required by Articles 6.7 and 6.9 of the ATC would prevail."[46]

43. Also in the context of the scope of review, the Panel on *US – Underwear* held with respect to the information concerning bilateral negotiation between the parties:

> "In our view, the wording of Article 4.6 of the DSU makes it clear that offers made in the context of consultations are, in case a mutually agreed solution is not reached, of no legal consequence to the later stages of dispute settlement, as far as the rights of the parties to the dispute are concerned. Consequently, we will not base our findings on such information."[47]

---

[42] (*footnote original*) The element of *application* of transitional safeguard measures to exporting Member(s) is dealt with in the first and the last sentences of paragraph 4 of Article 6 of the *ATC*. It is also dealt with in various places in paragraphs 6 through 16 of that Article. The first sentence of Article 6.4 provides that transitional safeguard measures "shall be applied on a Member-by-Member basis".

[43] Appellate Body Report on *US – Cotton Yarn*, para. 109.

[44] G/TMB/R/60, para. 30.

[45] Panel Report on *US – Underwear*, para. 7.26.

[46] Panel Report on *US – Underwear*, para. 7.29.

[47] Panel Report on *US – Underwear*, para. 7.27.

44. In *US – Cotton Yarn*, the Appellate Body considered that the Panel, in assessing the due diligence required of the United States in making a determination under Article 6.2, had exceeded its mandate under Article 11 of the DSU by considering certain evidence that could not possibly have been examined by the United States when it made that determination. The Appellate Body concluded:

> "[I]f a Member that has exercised due diligence in complying with its obligations of investigation, evaluation and explanation, were held responsible before a panel for what it *could not have known* at the time it made its determination, this would undermine the right afforded to importing Members under Article 6 to take transitional safeguard action when the determination demonstrates the fulfilment of the specific conditions provided for in this Article".[48]

(ii) TMB statements

45. At its meeting in November 1998, in examining a safeguard measure introduced by Colombia against imports of certain products from Korea and Thailand, the TMB observed:

> "With respect to requesting additional information, as referred to by Colombia, the TMB was of the view that its review of the measures introduced by Colombia had to be based essentially on the information made available by Colombia in accordance with Article 6.7 at the time the request for consultations had been made."[49]

(d) Burden of proof

46. In *US – Wool Shirts and Blouses*, on the issue of the burden of proof regarding whether a certain transitional safeguard measure complied with the requirements in Article 6, the Appellate Body held that it was for India to demonstrate that the United States measure had been imposed in violation of Article 6. In so doing, the Appellate Body also indirectly reversed a statement by the Panel on *US – Underwear*, which had held, in a finding not reviewed by the Appellate Body, that the burden of proof under Article 6 fell upon the Member imposing the safeguard measure. In *US – Wool Shirts and Blouses*, the Appellate Body found that Article 6 embodied "a fundamental part of the rights and obligations of WTO Members concerning non-integrated textile and clothing products covered by the *ATC* during the transitional period":

> "We agree with the Panel that it was up to India to present evidence and argument sufficient to establish a presumption that the transitional safeguard determination made by the United States was inconsistent with its obligations under Article 6 of the *ATC*. With this presumption thus established, it was then up to the United States to bring evidence and argument to rebut the presumption.
>
> . . .
>
> The transitional safeguard mechanism provided in Article 6 of the *ATC* is a fundamental part of the rights and obligations of WTO Members concerning non-integrated textile and clothing products covered by the *ATC* during the transitional period. Consequently, a party claiming a violation of a provision of the *WTO Agreement* by another Member must assert and prove its claim. In this case, India claimed a violation by the United States of Article 6 of the *ATC*. We agree with the Panel that it, therefore, was up to India to put forward evidence and legal argument sufficient to demonstrate that the transitional safeguard action by the United States was inconsistent with the obligations assumed by the United States under Articles 2 and 6 of the *ATC*. India did so in this case. And, with India having done so, the onus then shifted to the United States to bring forward evidence and argument to disprove the claim. This, the United States was not able to do and, therefore, the Panel found that the transitional safeguard action by the United States 'violated the provisions of Articles 2 and 6 of the ATC'."[50]

(e) Standard of review

47. For jurisprudence relating to the standard of review under the *ATC*, see Section XI.B.6(b) of the Chapter on the *DSU*.

(f) Specificity of data

48. At its meeting in March 1997, in examining a transitional safeguard measure taken by Brazil, with respect to the desired nature of information underpinning such measures, the TMB stated:

> "[I]n case of recourse to Article 6, it was important to provide as much factual information and data as possible that was specific to the product category itself, as product-specific information and data should have a major impact on the overall assessment whether serious damage or actual threat thereof could be demonstrated."[51]

49. On the same issue as referenced in paragraph 48 above, the TMB continued:

> "[T]he Body agreed with Hong Kong's main contention according to which a determination of serious damage could not be made almost entirely by reference to, and therefore by inferences drawn from, data relating to

[48] Appellate Body Report on *US – Cotton Yarn*, para. 79.
[49] G/TMB/R/49, para. 25. The TMB repeated this statement on several occasions (G/TMB/R/51, para. 32; G/TMB/R/81, paras. 15, 17; G/TMB/R/83, para. 26).
[50] Appellate Body Report on *US – Wool Shirts and Blouses*, pp. 13, 16 and 17.
[51] G/TMB/R/26, para. 25.

much broader industries in respect of which damage is claimed."[52]

2. Article 6.2

(a) General

50. In *US – Cotton Yarn*, the Appellate Body explained that Article 6.2 provides for three analytical steps which precede the attribution exercise demanded by Article 6.4 (see paragraphs 80–89 below):

> "Attribution is preceded by three analytical steps which are set forth in Article 6.2: (i) an assessment of whether the domestic industry is suffering serious damage (or actual threat thereof) according to Articles 6.2 and 6.3; (ii) an examination of whether there is a surge in imports as envisaged by Article 6.2; and, (iii) an establishment of a causal link between the surge in imports and the serious damage (or actual threat thereof); according to the last sentence of Article 6.2, '[s]erious damage . . . must demonstrably be caused by such increased quantities in *total* imports of that product and not by . . . other factors'. (emphasis added)"[53]

(b) "a particular product is being imported"

51. At its fourth meeting in July 1998, in examining a transitional safeguard measure introduced by Colombia on imports of certain products from Brazil and India, the TMB held the phrase "is being imported" indicated a temporal proximity between the serious damage and the request for consultation:

> "Article 6.2 referred to a situation where 'a particular product *is being imported* [. . .] in such increased quantities as to cause serious damage, or actual threat thereof, to the domestic industry' (emphasis added). This causal link seemed to indicate that the serious damage had to occur in a period close to the time at which the request for consultation was made. It followed that the information provided to demonstrate the serious damage had to be recent."[54]

(c) "in such increased quantities"

52. At its meeting in January 2000, the TMB considered the reasons given by Argentina for its inability to conform with the TMB's recommendation to rescind a safeguard measure imposed on certain imports from Brazil. The TMB pointed to the decline in imports and held:

> "Regarding the need to consider the increase in imports not only in absolute terms, but 'also in relation to the parameters for determining the damage mentioned in Article 6.3', as claimed by Argentina, the TMB observed that the conditions defined in Article 6.2 did not allow for the application of transitional safeguard measures in cases where imports were declining, even though their share in the apparent market were increasing."[55]

53. At its meeting in September 2001, the TMB examined the safeguard measure imposed by Poland on imports of certain textile products from Romania. The TMB, observing the trend of imports over a five-year period, held that the reference period should be seen in its proper context, taking into account the continuous and significant decrease of imports of the relevant product in the years prior to the reference period:

> "In analysing the above information, the TMB noted that there had been an increase in the volume of total imports in the year 2000, the reference period, compared to the previous year. It could not be ignored, however, that the volume of imports continuously decreased in 1998 and 1999, and that the level achieved in 2000 still remained well below the volume of total imports in 1996 and 1997, respectively. In this light, the trends indicated, at most, a recovery of total imports, but did not appear to substantiate the claim of a significant increase compared to the performance achieved in previous years. As to the argument of Poland that the decrease experienced in 1998 and 1999 was only in absolute terms, but not relative to consumption, the TMB observed that the ATC does not incorporate the concept of increased quantities of imports relative to other factors.
>
> In light of the trends described above, the TMB was of the view that the 10.5 per cent increase in total imports reported for the reference period should be assessed in its proper context. Noting the argument by Romania that it had serious doubts as to whether an increase of total imports of this magnitude could constitute a sufficient demonstration in the meaning of Article 6.2, which requires the demonstration that 'a particular product is being imported into its territory **in such increased quantities** as to cause serious damage, or actual threat thereof, to the domestic industry producing like and/or directly competitive products (emphasis added)', the TMB also expressed its doubts that the alleged serious damage could be caused by the 10.5 per cent increase in total imports during the reference period. These doubts notwithstanding, the TMB decided to review the state of the Polish domestic industry and to revert to this aspect of the case, if necessary, at a subsequent stage of its examination."[56]

(d) "serious damage, or actual threat thereof"

(i) Concepts of "serious damage, or actual threat thereof"

54. In *US – Underwear*, the Panel noted that, contrary to the determination of "serious damage", a determination of an "actual threat thereof" requires the

[52] G/TMB/R/26, para. 28.
[53] Appellate Body Report on *US – Cotton Yarn*, para. 112.
[54] G/TMB/R/46, para. 13.
[55] G/TMB/R/60, para. 13.
[56] G/TMB/R/81, para. 21–22.

competent authorities to carry out a prospective analysis in order that they can objectively conclude that unless action is taken, damage will surely occur in the near future:

> "Article 6.2 and 6.4 of the ATC make reference to 'serious damage, or actual threat thereof'. The word 'thereof', in our view, clearly refers to 'serious damage'. The word 'or' distinguishes between 'serious damage' and 'actual threat thereof'. In our view, 'serious damage' refers to a situation that has already occurred, whereas 'actual threat of serious damage' refers to a situation existing at present which might lead to serious damage in the future. Consequently, in our view, a finding on 'serious damage' requires the party that takes action to demonstrate that damage has already occurred, whereas a finding on 'actual threat of serious damage' requires the same party to demonstrate that, unless action is taken, damage will most likely occur in the near future.[57] The March Statement contains no elements of such a prospective analysis. In our view, even if the mention of 'actual threat' in the Diplomatic Note accompanying the March Statement were to be considered, the fact that the March Statement made no reference to actual threat and contained no elements of such a prospective analysis was dispositive *per se*. Consequently, we do not agree with the US argument that the March Statement supports a finding on actual threat of serious damage."[58]

55. In *US – Cotton Yarn*, the Panel quoted the above-mentioned paragraph in *US – Underwear* as support for its finding that when a, "actual threat of serious damage" supplements the determination of existing serious damage, the former is redundant and not an autonomous concept. Consequently, to the extent that the serious damage is established, a determination of an "actual threat thereof" is supplementary and needs not to be followed by a prospective analysis. In a ruling not reviewed by the Appellate Body, the Panel held:

> "In our view, the US finding on actual threat of serious damage contained in the 1998 Market Statement is essentially a finding that the existing 'serious damage' to the domestic industry would continue if imports were to continue as before. It would seem a reasonable inference to assume that if the trend in imports were to continue, the trend in domestic sales would continue, and consequently, the existing 'serious damage' would continue. Under the terms of Article 6.4, there seems to be no basis for demanding any further 'prospective analysis' than taking into consideration the prospect that the price-undercutting of imports from Pakistan would likely continue, in contrast to Pakistan's argument.
>
> However, this US finding of 'actual threat of serious damage' in the 1998 Market Statement is totally dependent on the finding of serious damage. It is based on a finding that there is current serious damage and extrapolates to a conclusion that there is an actual threat of the serious damage continuing. This means that it does not serve as an independent (or alternative) determination of actual threat of serious damage. It is a redundant exercise and that means that if there is a fatal flaw in the serious damage determination, the actual threat determination necessarily falls, too. If the United States were to make an independent finding of actual threat of serious damage, further analysis would need to be done to substantiate the finding. In other words, a prospective analysis is required if an independent finding of actual threat is to be made rather than a redundant and dependant one as was effectively made by the United States in the 1998 Market Statement."[59]

(ii) Indicators of serious damage

56. In *US – Cotton Yarn*, Pakistan had argued that the United States should not have treated as indicators of damage to its domestic industry the fact that establishments producing combed cotton yarn had been retooled to produce carded cotton yarn or any other products. The Panel, in a statement not addressed by the Appellate Body, considered that this issue related to the interpretation of "damage" under Article 6.2 and concluded "the fact that an establishment changed its products to those which are neither like nor directly competitive products should be treated as an indicator of 'serious damage' to a subject domestic industry":

> "In the Panel's view, this issue concerns the interpretation of the term 'damage' under Article 6.2. Transitional safeguard measures are permitted to protect the domestic industry producing – rather than individual companies which are producers of – 'like and/or directly competitive products' from import competition. Pakistan itself argues that the scope of the domestic industry is determined not by producers but by products. Otherwise, changes in ownership of domestic enterprises producing 'like and/or directly competitive products' could be deemed as an indicator of 'serious damage' to the 'domestic industry'.
>
> In this connection, we recall that Pakistan argued that 'if a plant produces carded instead of combed yarn, thrives in its new capacity and retains its workforce, the increase in imports obviously did not cause *grave injury that impaired its value or usefulness*.' However, we disagree with this argument. Assume that, in reaction to import surge, domestic producers of certain textile products merged into companies in another industry; and the establishments of the acquired producers, after retooling

[57] (*footnote original*) See GATT Panel Reports on *United States – Measures Affecting Imports of Softwood Lumber from Canada*, BISD 40S/358, paras. 402, 408; *New Zealand – Imports of Electrical Transformers from Finland*, para. 4.8; and *Korea – Antidumping Duties on Imports of Polyacetal Resins from the United States*, paras. 253, 272, 278.

[58] Panel Report on *US – Underwear*, para. 7.55.

[59] Panel Report on *US – Cotton Yarn*, paras. 7.138–7.139.

to produce totally different products, achieved the same level of production, sales, profit, employment, etc. In this situation, indeed, the 'value' of the retooled establishments may not have been impaired in some overall sense, but it would be obviously unreasonable that no transitional safeguard measure would be permitted since the 'domestic industry' producing the textile products was driven out by the import surge. In our view, the fact that an establishment changed its products to those which are neither like nor directly competitive products should be treated as an indicator of 'serious damage' to a subject domestic industry."[60]

(iii) Choice of investigation period

Length of the investigation period

57. In *US – Cotton Yarn*, Pakistan had argued that the eight-month investigation period chosen by the United States authorities for determining serious damage and causation was not enough. The Panel, in a finding not addressed by the Appellate Body, "deem[ed] it inappropriate to set out a general guideline on the length of the period during which damage or causation occurs, when there is no specific treaty language in the ATC".[61] The Panel further considered that the question of whether an eight-month period was sufficiently long for finding serious damage and causation should be done on a "case-by-case determination".[62] The Panel dismissed Pakistan's claim on the ground that Pakistan had not established that the eight-month period was unjustifiable:

"**The Panel** first notes that Article 6.2 does not explicitly set forth any specific period of time as the minimum period for investigation, or for determining whether damage is serious or, in turn, is caused by the subject imports. The parties agreed on this point.

Second, Article 6.7 of the ATC requires that when the Member invoking a transitional safeguard measure seeks consultations with the Member or Members which would be affected by such action, it shall provide the Member or Members with 'specific and relevant factual information, as up-to-date as possible, particularly in regard to: (a) the factors . . . on which the Member invoking the action has based its determination of the existence of serious damage or actual threat of damage; and (b) the factors . . . on the basis of which it proposes to invoke the safeguard action with respect to the Member or Members concerned.' Also, that Article provides that 'the information shall be related, as closely as possible, to identifiable segments of production and to the reference period set out in paragraph 8', which period is defined under paragraph 8 as 'the 12–month period terminating two months preceding the month in which the request for consultation was made.' In our view, Article 6.7 does not address, directly or indirectly, the length of either investigation periods or periods during which damage occurs. For example, the requirement that the information to be provided to the exporting Member or Members 'be related, as closely as possible, to the [12–month] reference period' does not give any guidance as to how long the investigation period should be or how long damage should continue in order to constitute 'serious damage' and causation thereof.

In this respect, we recall Pakistan's argument that 'since the damage must be determined to be "serious", the period must be adequately long to discern that the effect of imports was more than just temporary.' However, it is unclear how this general consideration demands that the period during which the serious damage occurred must be longer than the eight months utilised by the United States. In our view, whether or not the chosen period is justifiably long would depend on, at least partly, the extent of the damage suffered by a subject domestic industry during that period. Thus, we deem it inappropriate to set out a general guideline on the length of the period during which damage or causation occurs, when there is no specific treaty language in the ATC."[63]

Most recent period

58. At its meeting in October 1999, the TMB examined certain transitional safeguard measures taken by Argentina on imports of several products from Brazil. With respect to the choice of the investigation period, the TMB stated that "a determination of serious damage, in the sense of Article 6, could not be based on developments that had affected the domestic industry years before the actual determination was being made":

"[T]he TMB reiterated that in examining and assessing the determination of serious damage, or actual threat thereof, caused to the domestic industry producing like and/or directly competitive products by increased quantities of imports, decisive guidance had to be provided by the developments which had occurred in the most recent period, while data related to the longer time-period provided supplementary information that could support the justification of the determination made. The evidence that developments in the most recent period should have a decisive role in such a determination was, in the view of the TMB, supported by the time-frame referred to in Articles 6.7 and 6.8, by the requirements defined in Article 6.2 that in a determination it has to be demonstrated that a particular product 'is being imported' in increased quantities, and by the period of validity of a determination of serious damage or actual threat thereof for the purpose of invoking safeguard as stated in Article 6.5. Also, the object and the nature of

[60] Panel Report on *US – Cotton Yarn*, para. 7.104.
[61] Panel Report on *US –Cotton Yarn*, para. 7.115.
[62] Panel Report on *US –Cotton Yarn*, para. 7.120.
[63] Panel Report on *US – Cotton Yarn*, paras. 7.113–7.115.

the ATC (constituting an agreement for a transition period) as well as Article 6.12 (allowing for the maintenance of a transitional safeguard measure for up to three years without extension) confirmed that a determination of serious damage, in the sense of Article 6, could not be based on developments that had affected the domestic industry years before the actual determination was being made."[64]

(e) "the domestic industry producing like and/or directly competitive products"

(i) Product-oriented definition of domestic industry

59. In *US – Cotton Yarn*, which dealt with a safeguard measure introduced by the United States on imports of cotton yarn from Pakistan (see paragraph 70 below), the issue of the exclusion by the United States from the scope of its definition of domestic industry of the vertically integrated fabric producers who produce yarn for their own internal use was considered. The Appellate Body, which upheld the Panel's finding that such an exclusion was inconsistent with Article 6.2[65], was of the view that the definition of domestic industry is "product-oriented and not producer-oriented, and that the definition must be based on the products[66] produced by the *domestic industry* which are to be compared with the imported product in terms of their being like or directly competitive".[67]

(ii) "producing"

60. In *US – Cotton Yarn*, the Appellate Body defined the scope of the term "producing" in Article 6.2 as producing for commercial purposes and concluded that its meaning was not dependent on what the producer chooses to do with its product:

> "[T]he term 'producing' in Article 6.2 means producing for commercial purposes and that it cannot be interpreted, in itself, to be limited to or qualified as producing for sale on the merchant or any other segment of the market. The definition of the domestic industry, in terms of Article 6.2, is determined by what the industry *produces*, that is, like and/or directly competitive products. In our view, the term '*producing*', in itself, cannot be given a different or a qualified meaning on the basis of what a domestic producer chooses to do with its product."[68]

(iii) "directly competitive products"

Article III:2 of GATT 1994: interpretation of "directly competitive"

61. In *US – Cotton Yarn*, the Appellate Body looked into the concept of directly competitive products. In this case, the United States had claimed that its exclusion of yarn produced by vertically integrated fabric producers from the definition of the domestic industry was not because they were not producing a like product, but because they were not producing a directly competitive product.[69] The Appellate Body, which had not yet interpreted this concept in the context of Article 6.2, started its analysis by referring to its previous decisions in *Korea – Alcoholic Beverages* and *Japan – Taxes on Alcoholic Beverages*, interpreting the term "directly competitive" products in the context of Interpretative Note *Ad* Article III:2 of the GATT 1994. (In this respect, see also Section IV.C.3 of the Chapter on the *GATT 1994*.) The Appellate Body described the key elements of its interpretation of "directly competitive":

> "(a) The word '*competitive*' means 'characterised by competition'. The context of the competitive relationship is necessarily the marketplace, since that is the forum where consumers choose different products that offer alternative ways of satisfying a particular need or taste. As competition in the marketplace is a dynamic and evolving process, the competitive relationship between products is not to be analyzed exclusively by current consumer preferences[70]; the competitive relationship extends as well to potential competition.[71]
>
> (b) According to the ordinary meaning of the term 'directly competitive', products are competitive or substitutable when they are interchangeable or if they offer alternative ways of satisfying a particular need or taste.[72]
>
> (c) In the context of Article III:2, second sentence, the qualifying word 'directly' in the *Ad* Article suggests a degree of proximity in the competitive relationship between the domestic and imported products. The word 'directly' does not, however, prevent a consideration of both latent and extant demand.[73]
>
> (d) 'Like' products are a subset of directly competitive or substitutable products: all like products are, by definition, directly competitive or substitutable products,

---

[64] G/TMB/R/58, para. 14.
[65] Panel Report on *US – Cotton Yarn*, paras. 7.90 and 8.1(a). Appellate Body Report on *US – Cotton Yarn*, para. 105.
[66] (*footnote original*) In *United States – Lamb Safeguard*, we also found that the *product* defines the scope of the definition of the domestic industry under the *Agreement on Safeguards*. In that case, the "like" product at issue was lamb *meat*. (Appellate Body Report, . . . paras. 84, 86–88 and 95)
[67] Appellate Body Report on *US – Cotton Yarn*, para. 86.
[68] Appellate Body Report on *US – Cotton Yarn*, para. 87.
[69] Therefore, the Appellate Body concluded that it did not need to consider the concept of like product in the context of Article 6.2 because both parties agreed that the yarn imported from Pakistan and yarn produced by the producers of the United States, regardless of whether they are vertically integrated fabric producers or independent yarn producers, were like products.
[70] (*footnote original*) The Appellate Body refers to its Report on *Korea – Alcoholic Beverages*, paras. 114–115.
[71] (*footnote original*) The Appellate Body refers to its Report on *Korea – Alcoholic Beverages*, paras. 115–116.
[72] (*footnote original*) The Appellate Body refers to its Report on *Korea – Alcoholic Beverages*, para. 115.
[73] (*footnote original*) The Appellate Body refers to its Report on *Korea – Alcoholic Beverages*, para. 116.

whereas not all 'directly competitive or substitutable' products are 'like'.[74]"[75]

62. At the same time, the Appellate Body in *US – Cotton Yarn* dismissed the United States' argument that the above elements could not be applied to a definition of "directly competitive products" under Article 6.2 of the *ATC*, because they have been developed to define not only "directly competitive" products but also "directly substitutable" products pursuant to Article III:2 of the GATT 1994. In the Appellate Body's view, "the mere absence of the word 'substitutable' in Article 6.2 of the *ATC*" does not "[render] our interpretation of the term 'directly competitive' under Article III:2 of the GATT 1994 irrelevant in terms of its contextual significance for the interpretation of that term under Article 6.2 of the *ATC*."[76]

Proximity in competitive relationship

63. As regards the definition of "directly competitive" in the specific context of Article 6.2 of the *ATC*, the Appellate Body in *US – Cotton Yarn* put an emphasis on the critical importance of the degree of proximity between domestic and imported products in their competitive relationship to underpin the reasonableness of a safeguard action against an imported product:

> "We must bear in mind that Article 6.2 permits a safeguard action to be taken in order to protect a domestic industry from serious damage (or actual threat thereof) caused by a surge in imports, provided the domestic industry is identified as the industry producing 'like and/or directly competitive products' in comparison with the imported product. The criteria of 'like' and 'directly competitive' are characteristics attached to the domestic product in order to ensure that the domestic industry is the appropriate industry in relation to the imported product. The degree of proximity between the imported and domestic products in their competitive relationship is thus critical to underpin the reasonableness of a safeguard action against an imported product."[77]

Dynamic competitive relationship

64. The Appellate Body on *US – Cotton Yarn* further indicated that the competitive relationship between domestic and imported products is not static but dynamic since "products which are competitive may not be actually competing with each other in the marketplace at a given moment for a variety of reasons, such as regulatory restrictions or producers' decisions":

> "According to the ordinary meaning of the term 'competitive', two products are in a competitive relationship if they are commercially interchangeable, or if they offer alternative ways of satisfying the same consumer demand in the marketplace. 'Competitive' is a characteristic attached to a product and denotes the *capacity* of a product to compete both in a current or a future situation. The word 'competitive' must be distinguished from the words 'competing' or 'being in actual competition'. It has a wider connotation than 'actually competing' and includes also the notion of a potential to compete. It is not necessary that two products be competing, or that they be in actual competition with each other, in the marketplace at a given moment in order for those products to be regarded as competitive. Indeed, products which are competitive may not be actually competing with each other in the marketplace at a given moment for a variety of reasons, such as regulatory restrictions or producers' decisions. Thus, a static view is incorrect, for it leads to the same products being regarded as competitive at one moment in time, and not so the next, depending upon whether or not they are in the marketplace."[78]

"Directly" as a qualifier and limit to "competitive"

65. The Appellate Body on *US – Cotton Yarn* also stressed the relevance of the word "directly" which qualifies and limits the word "competitive" "to signify the degree of proximity that must obtain in the competitive relationship when the products in question are unlike". In the Appellate Body's view, "[u]nder this definition of 'directly', a safeguard action will not extend to protecting a domestic industry that produces unlike products which have only a remote or tenuous competitive relationship with the imported product".[79] In its view:

> "It is significant that the word 'competitive' is qualified by the word 'directly', which emphasizes the degree of proximity that must obtain in the competitive relationship between the products under comparison. As noted earlier, a safeguard action under the *ATC* is permitted in order to protect the domestic industry against competition from an imported product. To ensure that such protection is reasonable, it is expressly provided that the domestic industry must be producing 'like' and/or 'directly competitive products'. Like products are, necessarily, in the highest degree of competitive relationship in the marketplace.[80] In permitting a safeguard action, the first consideration is, therefore, whether the domestic industry is producing a like product as compared with the imported product in question. If this is so, there can be no doubt as to the reasonableness of the safeguard action against the imported product.

[74] (*footnote original*) The Appellate Body refers to its Report on *Korea – Alcoholic Beverages*, para. 118.
[75] Appellate Body Report on *US – Cotton Yarn*, para. 91.
[76] Appellate Body Report on *US – Cotton Yarn*, para. 94.
[77] Appellate Body Report on *US – Cotton Yarn*, para. 95.
[78] Appellate Body Report on *US – Cotton Yarn*, para. 96.
[79] Appellate Body Report on *US – Cotton Yarn*, para. 98.
[80] (*footnote original*) Appellate Body Report, *Korea – Alcoholic Beverages . . .*, para. 118; Appellate Body Report, *Canada – Certain Measures Concerning Periodicals*, WT/DS31/AB/R, adopted 30 July 1997, DSR 1997:I, 449, at 473. In these cases, we stated that "like" products are perfectly substitutable and that "directly competitive" products are characterized by a high, but imperfect, degree of substitutability.

> When, however, the product produced by the domestic industry is not a 'like product' as compared with the imported product, the question arises how close should be the competitive relationship between the imported product and the 'unlike' domestic product. It is common knowledge that unlike or dissimilar products compete or can compete in the marketplace to varying degrees, ranging from direct or close competition to remote or indirect competition. The more unlike or dissimilar two products are, the more remote or indirect their competitive relationship will be in the marketplace. The term 'competitive' has, therefore, purposely been qualified and limited by the word 'directly' to signify the degree of proximity that must obtain in the competitive relationship when the products in question are unlike. Under this definition of 'directly', a safeguard action will not extend to protecting a domestic industry that produces unlike products which have only a remote or tenuous competitive relationship with the imported product."[81]

Captive production

66. In *US – Cotton Yarn*, the United States had excluded from the scope of its definition of domestic industry those vertically integrated United States' fabric manufacturers producing yarn for their own captive consumption. The United States had argued that such yarn was not directly competitive with imported yarn (in spite of being like products) because it was not offered for sale on the market (except when the captive production was "out of balance", and even then only in *de minimis* quantities). The United States also argued that vertically integrated fabric producers were not dependent on the merchant market for meeting any of their requirements of yarn except to a *de minimis* extent. The Appellate Body did not subscribe to the United States' arguments because it was a "static[82] view which makes the competitive relationship between yarn sold on the merchant market and yarn used for internal consumption by vertically integrated producers dependent on what they choose to do at a particular point in time."[83] The Appellate Body concluded that a proper analysis of the competitive relationship between the two products would clearly show that they were "directly competitive" within the meaning of Article 6.2.[84] The Appellate Body also dismissed the United States' argument that its decision in *US – Hot-Rolled Steel* supported the United States' contention that the captive segment of the market can be separated from the merchant market segment because the Appellate Body had observed that captive production was "shielded from direct competition":

> "We did not hold, however, that captive production can be excluded from either the definition of the domestic industry or from the injury analysis. We said that, while an injury analysis can be carried out segment-by-segment before assessing damage to the domestic industry as a whole, an analysis of the captive segment of the market cannot be excluded. Our observation that captive steel production was 'shielded from direct competition' did not mean that steel produced in the captive market segment is not directly competitive with imported steel destined for the merchant market. Our ruling in *United States – Hot-Rolled Steel*, therefore, does not support the argument of the United States."[85]

(iv) "and/or"

67. In *US – Cotton Yarn*, the parties disagreed on the interpretation of the connectors "and/or" in Article 6.2. According to Pakistan, a subject domestic industry consisted of producers of: (i) like products; or (ii) directly competitive products; or (iii) both like products and directly competitive products. In contrast, the United States argued that Members are permitted to identify a "domestic industry" as an industry producing a product that is: (i) like but not directly competitive; or (ii) unlike but directly competitive; or (iii) both like and directly competitive.[86] The Panel, in a finding not addressed by the Appellate Body[87], analysed the various possible combinations and concluded that the United States' interpretation was flawed because: (i) it included "like but not directly competitive products" which is a meaningless alternative; and (ii) it permitted Members to impose transitional safeguard measures for domestic producers of "unlike but directly competitive products":

> "Both of the parties' interpretations of the term 'and/or' are grammatically possible. However, in our view, the chart shows that the US interpretation is flawed in that among other things, one of the categories of a domestic industry, *i.e.* the producers of [like but not directly competitive products], is a meaningless alternative. Imports of any textile product cannot damage producers of 'like but not directly competitive products' through market competition. The United States itself conceded that 'if the products of domestic producers are *not* directly competitive with imports – such as in the case of yarn manufactured by vertically integrated producers for their internal consumption – the need for safeguard action would not arise.' Indeed, not only would the need not arise, but the case could not be made because causation could not be demonstrated. Thus, the treaty would give a meaningless right. In this respect, the US

[81] Appellate Body Report on *US – Cotton Yarn*, paras. 97–98.
[82] As regards "static" versus "dynamic" approach to the competitive relationship between domestic and imported products, see para. 64.
[83] Appellate Body Report on *US – Cotton Yarn*, paras. 99–100.
[84] Appellate Body Report on *US – Cotton Yarn*, para. 101.
[85] Appellate Body Report on *US – Cotton Yarn*, para. 102.
[86] Panel Report on *US – Cotton Yarn*, para. 7.81.
[87] Appellate Body Report on *US – Cotton Yarn*, para. 104.

interpretation is inconsistent with the principle of effectiveness in treaty interpretation.[88]

. . .

[I]n our view, the US interpretation is problematic in permitting Members to impose transitional safeguard measures for domestic producers of 'unlike but directly competitive products'. This means that 'serious damage' would be found based upon the examination of the situation regarding these producers, without taking into consideration the situation regarding producers of 'like and directly competitive products', which are *core* products competing with subject imports. To give an example of the absurdity of the potential result from the US formulation, take the following example of an investigation with respect to an industry producing directly competitive but unlike products. In such a case the imported products could be combed cotton yarn as in the present case, but the domestic industry would not be the cotton yarn industry; rather, it could be the synthetic yarn industry if such products were found to be directly competitive. But because the chosen category is unlike but directly competitive, then the combed cotton yarn producers would be excluded from the investigation. This would leave open the possibility of finding serious damage and causation thereof even where the domestic combed cotton yarn industry was flourishing, but the synthetic yarn industry was in trouble. This would seem to be in direct conflict with the requirement of the treaty language in Article 6.2 that 'Serious damage or actual threat thereof must demonstrably be caused by such increased quantities in total imports of that product *and not by such other factors as technological changes or changes in customer preferences*.'" (emphasis added)[89]

(v) TMB statements

68. At its meeting in November 1998, in examining certain transitional safeguard measures introduced by Colombia on imports from Korea and Thailand, the TMB noted that the *ATC* does not include a definition of "domestic industry" and that this leaves a certain discretion to the Members. However, to only account one company, representing 62 per cent of the total domestic production, as the whole domestic industry hindered the TMB in making a proper assessment of the domestic industry:

"[T]he Colombian investigating authorities had determined that one company, which had requested the application of the safeguard measure on imports, represented on average 62 per cent of the total domestic production of plain polyester filaments and, therefore, could be considered to represent the domestic industry. It followed from this determination that Colombia had provided information regarding the economic variables referred to in Article 6.3 which reflected data pertaining to that one company. The TMB observed in this respect that the ATC does not provide a definition of what constitutes the domestic industry. The TMB noted, however, that Colombia had failed to provide information on a significant part of its domestic industry producing plain polyester filaments. This lack of information brought about important uncertainties and, therefore, hampered the TMB's ability to assess the situation of the Colombian industry producing plain polyester filaments."[90]

69. On the subject referenced in the above-mentioned paragraph, the TMB noted that as a consequence of the incomplete information on the domestic industry, it could not be determined whether the commercial difficulties that the sole concerned domestic producer faced (who had requested the investigation) were due to the increase of imports or whether it was a result of enhanced competition between domestic producers:

"[B]earing in mind in particular the information that had been made available by Colombia pursuant to Article 6.7, continued to be of the view that in the absence of any information on a significant part of the domestic industry, it had not been possible to assess the state of the industry producing plain polyester filaments, in particular the effect of increased imports on the companies constituting the domestic industry producing the particular product. Therefore, it had been impossible to determine whether the difficulties encountered by the company requesting the investigation could be attributed to a possible damage caused by the increased volume of total imports or to other factors such as, for example, an important increase in the production of the other domestic company producing plain polyester filaments, resulting in an increased competition between the domestic producers;

. . .

The TMB observed that it had not provided any interpretation of the definition of the term 'domestic industry', as claimed by Colombia. Similarly, the TMB had not suggested that the information on the domestic industry should cover 100 per cent of the domestic producers of such products."[91]

70. At its meeting in April 1999, the TMB examined a safeguard measure introduced by the United States on

[88] (*footnote original*) Appellate Body, in *US – Gasoline*, stated as follows:

> ". . . One of the corollaries of the 'general rule of interpretation' in the V*ienna Convention* is that interpretation must give meaning and effect to all the terms of the treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility."

[91] G/TMB/R/51, para. 21.

certain imports from Pakistan. The United States had determined, with respect to the term "domestic industry producing like and/or directly competitive products" a category of "vertically integrated firms whose yarn did not ordinarily enter normal channels of trade and did not compete with yarn produced for sale in the open market" and that had not provided the TMB with information concerning this category. The TMB recalled that:

> "[A]ccording to Article 6.2, '[s]afeguard action may be taken under this Article when, on the basis of a determination by a Member, it is demonstrated that a particular product is being imported into its territory in such increased quantities as to cause serious damage, or actual threat thereof, to the domestic industry producing like and/or directly competitive products. Serious damage or actual threat thereof must demonstrably be caused by such increased quantities in total imports of that product and not by such other factors as technological changes or changes in consumer preference'. It followed from this that the factual information referred to in Article 6.7 had to be provided with respect to the domestic industry producing like and/or directly competitive products."[92]

71. The TMB then went on to hold that it "would ordinarily be up to the Body, on the basis of the detailed information provided pursuant to Article 6.7, to determine whether it was justified in excluding a particular segment of production":

> "The TMB noted that the particular product subject to the safeguard measure introduced by the United States was *combed cotton yarn identified as US category 301*. The TMB observed, furthermore, that *in terms of its characteristics any combed cotton yarn was identical, i.e. alike in all respects, including common end-uses, with respect to the particular product subject to the safeguard measure in question*.
>
> The TMB noted that the United States had defined the domestic industry producing products like and/or directly competitive with imports of combed cotton yarn (category 301) as the US industry segment that produced spun yarn for sale, chief weight combed cotton defined as category 301, sold to other firms for use in the manufacture of fabric and finished textile products. It followed from this that the United States had provided information regarding all the economic variables referred to in Article 6.3 with respect to that segment of the industry. As regards the other segment of the US industry producing cotton spun yarn, chief weight combed cotton, the United States had explained that this segment had been composed of vertically integrated firms whose yarn did not ordinarily enter normal channels of trade and did not compete with yarn produced for sale in the open market.
>
> . . .
>
> The TMB noted that the United States had provided arguments why, in its view, the combed cotton yarn production of the vertically integrated mills should be excluded from the scope of the investigation and, by extension, why it had not provided data pursuant to Article 6.3 with respect to this segment of production. The TMB observed that it *would ordinarily be up to the Body, on the basis of the detailed information provided pursuant to Article 6.7, to determine whether it was justified to exclude a particular segment of production. Therefore the TMB would have expected to receive, to the extent practicable, sufficient information to allow it to do so.*"[93] (emphasis added)

72. At its meeting in June 1999, on the same matter, the TMB confirmed its findings referenced in paragraphs 70–71 above:

> "The United States had claimed, in view of the lack of 'direct competitiveness' between the two segments of the industry, that the vertically integrated segment should be excluded from the definition of the domestic industry and, therefore, from the investigation conducted under Article 6 without the necessity to provide specific information on the economic variables, pursuant to Article 6.7, regarding the vertically integrated firms. The TMB, on the other hand, guided by the fact that the domestic industry producing combed cotton yarn encompassed two segments (i.e. that of the 'for sale' companies as well as that of the vertically integrated firms), had held the view that:
>
> - information reflecting the status of the vertically integrated firms should also have been provided by the United States, to the extent practicable, regarding the economic variables defined in Article 6.3; and
> - on the basis of this information the TMB could have determined whether for the purpose of the particular investigation it was justified, or not, to exclude this segment of the production from the scope of the domestic industry producing like and/or directly competitive products for which serious damage, or actual threat thereof, as a result of increased imports, had been claimed."[94]

(f) Causation

(i) "demonstrably"

73. The Panel on *US – Underwear*, referring to Article 6.2, second sentence, emphasized, in a finding not reviewed by the Appellate Body, the word "demonstrably" and found that it is not sufficient to merely make a mechanical causal link between the increase in imports and the alleged serious damage to the domestic industry in making a determination of whether the imports have caused serious damage to the domestic industry:

---

[92] G/TMB/R/53, para. 12.
[93] G/TMB/R/53, paras. 13–14 and 16. Emphases added.
[94] G/TMB/R/55, para. 14.

"Nowhere in the March Statement [on which the United States proposed the subject transitional safeguard measure] could we find a discussion or demonstration of causality as required under this provision, beyond the mere statement that the imports were responsible for the damage. This assertion is inadequate, in our view, because of special factors affecting trade in underwear between the United States and a number of exporting Members including Costa Rica. (As noted above, most of this trade with Costa Rica – at least 94 per cent – is apparently 807 or 807A trade.) While such trade may certainly cause damage to the domestic industry, the nature of the trade is such that it may benefit the domestic firms that participate in it (see paragraph 7.44). Thus, in a discussion of whether such trade has caused serious damage, it is necessary to look at this trade to determine its effects on the industry. Because of the nature of the trade it is not possible in these circumstances to conclude from the simple fact that there has been a fall in production that there has also been serious damage. The March Statement undertakes no such discussion. Moreover, the March Statement suggests other possible causes of serious damage, such as rising cotton prices (see paragraph 7.44), but does not consider their role as a cause of such damage. Thus, it cannot be said that the March Statement 'demonstrably' shows that serious damage was caused by increased levels of imports. We find, therefore, that an objective assessment of the March Statement leads to the conclusion that the United States failed to comply with its obligations under Article 6.2 of the ATC by imposing a restriction on imports of Costa Rican underwear without adequately demonstrating that increased imports had caused serious damage."[95]

74. In *US – Wool Shirts and Blouses*, with respect to the term "demonstrably", the Panel found, in a statement not reviewed by the Appellate Body, that under Article 6.2 of the ACT there is an explicit obligation incumbent on the Member introducing the safeguard measure to demonstrate that the serious damage or actual threat thereof was not due to consumer preferences or technological changes:

"[T]he clear wording of Article 6.2 of the ATC '. . . Serious damage or actual threat thereof must demonstrably be caused by . . . and not by such other factors as technological changes or changes in consumer preference' imposes on the importing Member at least an explicit obligation to address the question whether serious damage or actual threat thereof to the particular domestic industry was caused by changes in consumer preferences or technological changes. The importing Member remains free to choose the method of assessing whether the state of its particular domestic industry was caused by such other factors as technological changes or changes in consumer preferences, but it must demonstrate that it has addressed the issue."[96]

(ii) Choice of investigation period

75. At its meeting in April 2000, the TMB reviewed certain transitional safeguard measures taken by Argentina on certain textile products imported from Korea. Korea claimed that since there was a five-month gap between the end of the period investigated and the application of the safeguard measures, Argentina had failed to establish the substantial increase in imports under Article 6.2 and had violated Article 6.7, which stipulates that "the information shall be related, as closely as possible, to . . . the reference period set out in paragraph 8" of Article 6. The TMB responded as follows:

"In the present case, Argentina should have provided in the relevant factual data information at least with respect to the developments in total imports and imports from Korea for the period August 1998–July 1999. At the same time, the TMB recognized that the formulation of Article 6.7 (i.e. that the information shall be related as closely as possible to the reference period) permitted certain flexibility in providing information on the different economic variables listed in Article 6.3, depending on the availability of the relevant data and information. However, the safeguard measures in question had been applied by Argentina pursuant to the provisions of Article 6.11, which required the existence of 'highly unusual and critical circumstances, where delay would cause damage which would be difficult to repair'. The TMB was of the view that the existence of such circumstances could only be proven if information was provided regarding developments which occurred in the very recent period, i.e. during or very close to the reference period.

With reference to the five-month gap between the end of the period investigated (i.e. May 1999) and the provisional application of the safeguard measures in question (i.e. October 1999), as raised by Korea, the TMB observed that the National Commission for Foreign Trade of Argentina had made its finding regarding the determination of the existence of serious damage caused by increased imports on 30 July 1999, on the basis of information including the 12–month period ending in May 1999. Therefore, had the Government of Argentina decided to invoke the provisions of Article 6 soon thereafter, it could have provided all the information referred to in Articles 6.2 and 6.3 covering the reference period specified in Articles 6.7 and 6.8. The TMB noted the explanation of the representative of Argentina that this finding had only been a step in the internal administrative procedures, and that the formal determination of serious damage could only be made by the Minister for the Economy and Public Works and Services. In view of the administrative procedures involved, this decision was made only on 28 October 1999. The TMB

[95] Panel Report on *US – Underwear*, para. 7.46.
[96] Panel Report on *US – Wool Shirts and Blouses*, para. 7.50.

considered that it would be inappropriate for it to comment on the internal administrative procedures involved in any Member's recourse to the provisions of the ATC. The Body had to observe, however, that possible delays in taking decisions, as a result of such procedures, may have an impact on the findings and conclusions the TMB could reach, in accordance with the provisions of the ATC, regarding the justification of the measures in question or aspects thereof."[97]

76. As regards the investigation period for the determination of causation, see paragraphs 57–58 above.

3. Article 6.3

(a) List of conditions in Article 6.3

77. In *US – Underwear*, the Panel held that the criteria in *inter alia* Article 6.3 had to be fulfilled in order for transitional safeguard measures to be consistent with the *ATC*. Further on in the report, the Panel stated that despite its observation that the United States had failed to analyse all of the listed economic factors of Article 6.3 it could not be concluded that the finding of serious damage was inconsistent with that provision, because the economic factors in Article 6.3 represent only an illustrative list. In a finding, not reviewed by the Appellate Body, the Panel held that "Article 6.3 of the ATC contains an indicative list of economic variables that can be taken into account in order to assess the serious damage or actual threat thereof."[98]

78. In *US – Wool Shirts and Blouses*, which the DSB adopted three months after *US – Underwear*, the Panel did not follow the approach adopted in *US – Underwear*. In a finding not reviewed by the Appellate Body, the Panel held that the criteria in Article 6.3 reflected an exhaustive, and not "indicative", list of economic factors. Hence, all the 11 economic factors included in that paragraph had to be considered in order for the imposition of transitional safeguard measures to be consistent with the *ATC*.[99] The Panel held:

> "In our view, the wording of Article 6.2 and 6.3 of the ATC makes it clear that all relevant economic factors, namely, all those factors listed in Article 6.3 of the ATC, had to be addressed by CITA, whether subsequently discarded or not, with an appropriate explanation. The wording of paragraph 3, which reads
>
> > '. . . the Member shall examine the effect of those imports on the state of the particular industry, *as reflected in changes in such relevant economic variables as output, productivity, utilization of capacity, inventories, market share, exports, wages, employment, domestic prices, profits and investment*.' (emphasis added),
>
> implies two requirements. First, the relevant economic variables must be examined. Second, output, productivity, utilization of capacity, etc. . . . are relevant economic variables. The wording of Article 6.3 of the ATC '. . . the Member *shall examine* the effects . . . on the state of the particular industry, as reflected in changes in *such relevant economic variables as output, productivity, etc*. . . .' makes clear that each of the listed factors is not only relevant but must be examined. Effectively, the listed economic variables are examples of relevant economic variables, they are presumed to be 'relevant economic variables' and must be examined by the importing country in its determination."
>
> The wording of the first sentence of Article 6.3 of the ATC imposes on the importing Member the obligation to examine, at the time of its determination, at least all of the factors listed in that paragraph. The importing Member may decide – in its assessment of whether or not serious damage or actual threat thereof has been caused to the domestic industry – that some of these factors carry more or less weight. At a minimum, the importing Member must be able to demonstrate that it has considered the relevance or otherwise of each of the factors listed in Article 6.3 of the ATC.
>
> The last part of Article 6.3 of the ATC, which states that 'none of which, either alone or combined with other factors, can necessarily give decisive guidance', confirms that some consideration and a relevant and adequate explanation have to be provided *of how the facts as a whole support the conclusion* that the determination is consistent with the requirements of the ATC."[100] (emphasis original)

79. The conclusions of panels and the Appellate Body on the interpretation of the similarly worded provision can be found in Section V.B.4(a)(viii) of the Chapter on the *Agreement on Safeguards*; in Section III.B.6(c) the Chapter on the *Anti-Dumping Agreement*, and Article 15.4 of the Chapter on the *SCM Agreement*.

4. Article 6.4

(a) Steps preceding the attribution of serious damage to individual Members

80. In *US – Cotton Yarn*, the Appellate Body explained that before carrying out the attribution exercise demanded by Article 6.4 it is necessary to apply the three analytical steps set forth in Article 6.2:

> "Attribution is preceded by three analytical steps which are set forth in Article 6.2: (i) an assessment of whether the domestic industry is suffering serious damage (or actual threat thereof) according to Articles 6.2 and 6.3; (ii) an examination of whether there is a surge in imports as envisaged by Article 6.2; and, (iii) an establishment of

[97] G/TMB/R/64, paras. 23–24.
[98] Panel Report on *US – Underwear*, para. 7.22.
[99] Panel Report on *US – Wool Shirts and Blouses*, para. 7.26.
[100] Panel Report on *US – Wool Shirts and Blouses*, paras. 7.25–7.27.

a causal link between the surge in imports and the serious damage (or actual threat thereof); according to the last sentence of Article 6.2, '[s]erious damage . . . must demonstrably be caused by such increased quantities in *total* imports of that product and not by . . . other factors'. (emphasis added)"[101]

(b) Attribution requirements

81. In *US – Cotton Yarn*, the Appellate Body emphasized the two requirements mandated by Article 6.4 to which the attribution of serious damage to individual Members must conform.[102] The first requirement is that "the attribution be confined to only those Members from whom imports have shown a sharp and substantial increase".[103] The second requirement is "a comparative analysis, in the event that there is more than one Member from whom imports have shown a sharp and substantial increase in its imports."[104]

(i) First requirement: only those Members from whom imports have shown a sharp and substantial increase

82. In *US – Cotton Yarn*, the Appellate Body referred to the first attribution requirement as follows:

"The first requirement is that the attribution be confined to only those Members from whom imports have shown a sharp and substantial increase. Such Members will be identified on an individual basis by virtue of the wording in Article 6.4, second sentence, 'on the basis of a sharp and substantial increase in imports, actual or imminent, from such a Member or Members individually'. The Panel interpreted the term 'sharp' to refer to the rate of the import increase, and the term 'substantial' to the amount of that increase.[105] These interpretations of the Panel have not been appealed and are, therefore, not before us."[106]

"sharp" and "substantial" increase in imports

83. The Panel on *US – Cotton Yarn* interpreted the terms "sharp" and "substantial". These interpretations were not considered by the Appellate Body.[107] The Panel interpreted the "term 'sharp' to refer to the percentage increase and the term 'substantial' to refer to the absolute increase".[108]

Attribution to all Members whose imports cause serious damage or threat thereof

84. In *US – Cotton Yarn*, the Panel had found that the United States had acted inconsistently with Article 6.4 by not examining the effect of imports from Mexico (and possibly other appropriate Members) individually when attributing serious damage to Pakistan.[109] The Panel also ruled that Article 6.4 requires attribution to all Members whose imports cause serious damage or actual threat thereof.[110] The Appellate Body, further to upholding the Panel's first finding regarding US inconsistency with Article 6.4[111], considered that its findings on that first issue[112] resolved the dispute as defined by Pakistan's claims before the Panel. The Appellate Body therefore declined to rule on the issue of whether Article 6.4 requires attribution to all Members whose imports are causing serious damage or actual threat thereof and indicated that "[i]n these circumstances, the Panel's interpretation on this question is of no legal effect".[113]

(ii) Second requirement: comparative analysis

85. In *US – Cotton Yarn*, the Appellate Body referred to the second attribution requirement:

"The second requirement of Article 6.4, second sentence, is a comparative analysis, in the event that there is more than one Member from whom imports have shown a sharp and substantial increase in its imports.[114] The conduct of the comparative analysis is governed by the latter part of the second sentence of Article 6.4, which requires the analysis to address certain specific factors, namely: (i) the level of imports as compared with imports from other sources; (ii) market share; and (iii) import and domestic prices at a comparable stage of commercial transaction. Article 6.4 further specifies that

[102] Appellate Body Report on *US – Cotton Yarn*, para. 113.
[103] Appellate Body Report on *US – Cotton Yarn*, para. 114.
[104] Appellate Body Report on *US – Cotton Yarn*, para. 115.
[105] (*footnote original*) Panel Report, para. 7.130.
[106] Appellate Body Report on *US – Cotton Yarn*, para. 114.
[107] Appellate Body Report on *US – Cotton Yarn*, para. 114.
[108] Panel Report on *US – Cotton Yarn*, para. 7.130.
[109] Panel Report on *US – Cotton Yarn*, para. 8.1(b).
[110] Panel Report on *US – Cotton Yarn*, paras. 7.126–7.127. The Panel had found that "unlike other safeguard investigations, and resulting applications of measures, which are done on an MFN basis, . . . [t]he Member imposing a safeguard under the ATC must then do a further attribution analysis and narrow the causation down to only those Members whose exports are causing the serious damage."
[111] The Appellate Body upheld the Panel's finding in para. 8.1(b) of its Report "albeit for reasons partly different from those given by the panel". Appellate Body Report on *US – Cotton Yarn*, para. 126.
[112] Appellate Body Report on *US – Cotton Yarn*, paras. 119 and 125–126.
[113] Appellate Body Report on *US – Cotton Yarn*, para. 128.
[114] (*footnote original*) We note that the panel in *United States – Underwear* stressed that such a comparative analysis of the effects of imports is indispensable in attributing serious damage to a Member. The panel noted that, while there had been a significant increase in imports of underwear from Costa Rica, the position of Costa Rica was not significantly different from that of the other five exporting Members considered in the United States' determination. Nonetheless, the determination failed to undertake a *comparative assessment* of the effects of imports from Costa Rica with those five exporting Members. The panel further reasoned that the United States could not enter into agreements permitting an overall increase of imports of 478 percent over the current import levels from those five Members and, at the same time, claim that an import increase of 22 percent from Costa Rica contributed to serious damage. (Panel Report, *supra*, footnote 29, paras. 7.49 and 7.51) The issue of attribution was not appealed in that case.

none of these factors, either alone or combined with other factors, can necessarily give decisive guidance."[115]

Why is a comparative analysis required?

86. In *US – Cotton Yarn*, the Appellate Body faced the question of why a comparative analysis is needed under Article 6.4 as the means to respond to another question, namely how to conduct a comparative analysis since Article 6.4 does not directly address this issue.[116] The Appellate Body concluded that attributing damage actually caused to the domestic industry by imports from a Member to a different Member imports amounted to a "'mis-attribution' of damage and would be inconsistent with the interpretation in good faith of the terms of Article 6.4":

> "Article 6.4 provides, in relevant part, that '[t]he Member or Members to whom serious damage . . . is attributed, shall be *determined on the basis* of a sharp and substantial *increase in imports . . . from such a Member or Members*'. (emphasis added) The clear inference from this phrase is that the sharp and substantial increase of imports from *such a* Member determines not only the basis, but also the *scope* of attribution of serious damage to that Member.
>
> In consequence, where imports from more than one Member contribute to serious damage, it is only that *part* of the total damage which is actually caused by imports from such a Member that can be attributed to that Member under Article 6.4, second sentence. Damage that is actually caused to the domestic industry by imports from one Member cannot, in our view, be attributed to a different Member imports from whom were not the cause of that part of the damage. This would amount to a 'mis-attribution' of damage and would be inconsistent with the interpretation in good faith of the terms of Article 6.4. Therefore, the part of the total serious damage attributed to an exporting Member must be proportionate to the damage caused by the imports from that Member. Contrary to the view of the United States, we believe that Article 6.4, second sentence, does not permit the attribution of the totality of serious damage to one Member, unless the imports from that Member alone have caused all the serious damage."[117]

87. As support for its conclusions on the reasons why a comparative analysis is needed, the Appellate Body in *US – Cotton Yarn* referred to the rules of general international law on State responsibility and Article 22.4 of the *DSU* (suspension of concessions)[118]:

> "Our view is supported further by the rules of general international law on state responsibility, which require that countermeasures in response to breaches by states of their international obligations be commensurate with the injury suffered.[119] In the same vein, we note that Article 22.4 of the DSU[120] stipulates that the suspension of concessions shall be equivalent to the level of nullification or impairment. This provision of the DSU has been interpreted consistently as not justifying punitive damages.[121] These two examples illustrate the consequences of breaches by states of their international obligations, whereas a safeguard action is merely a remedy to WTO-consistent 'fair trade' activity.[122] It would be absurd if the breach of an international obligation were sanctioned by proportionate countermeasures, while, in the absence of such breach, a WTO Member would be subject to a disproportionate and, hence, 'punitive', attribution of serious damage not wholly caused by its exports. In our view, such an exorbitant derogation from the principle of proportionality in respect of the attribution of serious damage could be justified only if the drafters of the *ATC* had expressly provided for it, which is not the case."[123]

88. Also in support for its conclusions on the reasons why a comparative analysis is needed, the Appellate Body pointed out:

> "Finally, and most significantly, if the totality of serious damage could be attributed to only one of those Members the imports from whom have contributed to it, there would be no need to undertake a comparative analysis of the effects of imports from that one Member, once the imports from that Member have been found to have increased sharply and substantially; such an interpretation would reduce a whole segment of Article 6.4 to inutility."[124]

How to conduct a comparative analysis

89. Further to responding to the question why a comparative analysis is needed, the Appellate Body in *US – Cotton Yarn* focussed on the question how to conduct a comparative analysis since this is not expressly stated in the wording of Article 6.4, second sentence.[125] In this regard, the Appellate Body considered that such an analysis "is to be seen in the light of the principle of proportionality as the means of determining the scope or assessing the part of the total serious damage that can be attributed to an exporting Member." The Appellate Body further concluded that "an assessment of the share of total serious damage, which is proportionate to the damage actually caused by imports from a particular Member, requires a comparison according to the factors envisaged in Article 6.4 with all other Members (from whom imports have also increased sharply and substantially) taken **individually**" (emphasis added):

> "We now turn to the question of how to conduct the comparative analysis required by Article 6.4. This analysis is to be seen in the light of the principle of proportionality as the means of determining the scope or assessing the part of the total serious damage that can be attributed to an exporting Member. We recall that Article 6.4 enjoins the importing Member to conduct this comparative analysis on a multi-factor basis including "levels of imports", "market share" and "prices", while specifying that none of these factors alone or in combination with other factors can necessarily give decisive guidance. The comparison is to take place between the effects of imports from the Member in question, on the one hand, and those of imports from other sources, on the other. The comparison must thus be based on a variety of factors, each of which has a different significance and weight, and is to be measured on a different scale.
>
> It is of course possible to compare the level of imports of one Member with the level of imports from other sources taken together. Likewise, it is possible to establish the market share of one Member in comparison with all other imports and the output of the domestic industry. However, the full effects of the level of imports from, and the market share of, one Member can only be assessed if this level and this share are compared *individually* with the level of imports from, and the market share of, the other Members from whom imports have also increased sharply and substantially. This conclusion is even more obvious for the comparison of import and domestic prices. The price of imports from one Member can be compared with the average price of imports from other sources and with domestic prices. However, prices of imports from the other Members may vary widely from one another. A fair assessment of the effects of the price of imports from one Member will therefore require a comparison with the price of imports from other Members taken individually. Moreover, these different factors interact in different ways, producing different effects, under different circumstances, not to mention the possible existence of other relevant factors (and their effects) that must be taken into account in the comparison according to the proviso at the end of Article 6.4, second sentence.
>
> An assessment of the share of total serious damage, which is proportionate to the damage actually caused by imports from a particular Member, requires, therefore, a comparison according to the factors envisaged in Article 6.4 with all other Members (from whom imports have also increased sharply and substantially) taken individually."[126]

90. In *US – Underwear*, the Panel considered on a comparative basis whether the attribution of serious damage in the United States' domestic industry to Costa Rican imports was consistent with the requirements under Article 6.4. In this context the Panel analysed the five bilateral agreements that the United States had concluded with five different exporting States which represented a substantial portion of all United States' imports. In these agreements the United States agreed to ensure unrestricted imports to the United States' territory of more than 170 million "dozen units of a product (an increase of 478 per cent over then current import levels)."[127] The Panel concluded, in a finding not reviewed by the Appellate Body, that the attribution of serious damage to Costa Rican imports was inconsistent with the requirements of Article 6.4 as follows:

> "In light of (i) the fact that restrictions under Article 6 of the ATC are to be applied only sparingly, (ii) the fact that the United States has the burden of proving that it has complied with the requirements of Article 6 of the ATC, (iii) the deficiencies detailed above in respect of the evidence on the existence of serious damage, which raise serious questions in our view as to whether there was serious damage shown under Article 6.2 at all, (iv) the fact that the United States failed to demonstrate adequately that the cause of serious damage was imports, and (v) the fact that the United States voluntarily agreed to accept import limits from other countries exporting underwear to the United States that permitted increases over their current export levels that were far in excess of Costa Rica's export levels to the United States, we conclude that the United States failed to demonstrate adequately in the March Statement that its domestic industry suffered serious damage that could be attributed to Costa Rican imports and thus, by imposing import restrictions on imports of Costa Rican underwear, the United States failed to comply with its obligations under Article 6.2 and 6.4 of the ATC."[128]

5. Article 6.6

(a) Article 6.6(a)

91. With respect to the definition of "least-developed country Members", see excerpts referenced in the Chapter on the *WTO Agreement*, Article XI:2.

(b) Article 6.6(d)

92. The Panel on *US – Underwear* examined whether the United States, in its application of the transitional safeguard measure at issue, accorded more favourable treatment to re-imports into its territory in accordance with Article 6.6(d) Specifically, the Panel held that the United States could not have complied with Article 6.6(d) merely by offering Costa Rica enhanced access for its textiles exports under certain other programmes:

> "The 'chapeau' to Article 6.6(d) of the ATC makes it clear that the more favourable treatment must be granted 'in the *application* of the transitional safeguard' (emphasis added). This means, in our view, that Members availing themselves of the Article 6 transitional safeguard are obliged to grant more favourable treatment to re-imports, independently of whether such treatment has been previously rejected by the affected Member during the bilateral consultations or whether other privileges were envisaged to be accorded to such a Member in negotiations based upon the implemented safeguard measure. The term 'more favourable treatment' is not further qualified in the ATC. We, therefore, reject the United States argument (paragraph 5.157) that they had complied with Article 6.6(d) of the ATC by offering Costa Rica enhanced access under GAL programmes during the course of the consultations."[129]

93. In response to the Costa Rican claim for quotas larger than those required under Article 6.8, the Panel on *US – Underwear* rejected the notion that more favourable treatment within the meaning of Article 6.6(d) necessarily implies the availability of larger quotas:

> "We agree with Costa Rica that quantitatively more favourable treatment for the full three-year period is one of the options available to Members in order to comply with the requirements of Article 6.6(d) of the ATC. We do not consider it, however, to be the only option. In our view, a Member could, for example, comply with the requirements under Article 6.6(d) of the ATC by imposing a restriction for a period shorter than three years."[130]

6. Article 6.7

94. At its meeting in July 1998, the TMB examined a transitional safeguard measure taken by Colombia on imports of denim from Brazil and India. The TMB stated that while Article 6.7 "allowed for some flexibility, in particular in view of the availability of most recent data", this "did not provide for the possibility of taking a safeguard measure on the basis of economic variables describing the status of the industry almost two years before the time at which the request for consultation had been made":

> "[T]he TMB addressed the time-lag of about fifteen months that had taken place between the investigation concluded by INCOMEX and the time at which Colombia had requested consultations with, *inter alia*, Brazil and India. The TMB recalled in this respect that, according to Article 6.7, the information referred to in Articles 6.3 and 6.4 shall be related, as closely as possible, to the reference period set out in Article 6.8, i.e. the 12–month period terminating two months preceding the month in which the request for consultation was made [. . .]. The TMB recognised that this formulation allowed for some flexibility, in particular in view of the availability of most recent data. In the view of the TMB, however, this did not provide for the possibility of taking a safeguard measure on the basis of economic variables describing the status of the industry almost two years before the time at which the request for consultation had been made."[131]

95. At its meeting in November 1998, examining a transitional safeguard measure taken by Colombia on imports from Korea and Thailand, the TMB stated as follows:

> "The TMB [. . .] decided to make an examination, on the basis of the information available, of the possible effects of the increased quantities in total imports of plain polyester filaments on the state of the particular industry, as specified in Article 6.3. The TMB noted in this respect that it could not base its assessment on estimates provided by Colombia for the year 1998; and that the monthly averages provided by Colombia could not be considered in most cases as providing reliable indications."[132]

96. At its meeting in January 1999, the TMB provided a clarification on its statement referenced in paragraph 95 above. The TMB agreed that Article 6 did not "lay down a single methodology for the presentation of the information in question". Furthermore, the TMB emphasized that in its statement referenced in paragraph 95 above, it had not made a finding on "how information regarding imports or the variables used for determining serious damage to the domestic industry should be presented under Article 6", but rather "had expressed a view on the difficulties it was facing because of the problems in comparing certain data provided by Colombia in the present case":

---

[129] Panel Report on *US – Underwear*, para. 7.57.
[130] Panel Report on *US – Underwear*, para. 7.58.
[131] G/TMB/R/46, para. 12.
[132] G/TMB/R/49, para. 21.

"[T]he TMB agreed with Colombia that Article 6 does not lay down a single methodology for the presentation of the information in question. The TMB had recalled what were the time periods covered by the information presented by Colombia pursuant to Article 6.7. '[T]he technical report prepared by INCOMEX contained data regarding the performance of total imports for the 12–month periods June to May of 1995–1996, 1996–1997 and 1997–1998, the reference period referred to in Article 6.8. The data and information incorporated into the report regarding the economic variables set out in Article 6.3 referred to calendar years; for 1998, it incorporated actual data for the period January to May and provided estimates for the full calendar year. In addition, the report provided monthly averages regarding each variable for 1995, 1996, 1997 and January to May 1998' (G/TMB/R/49, paragraph 11). The TMB could not agree with the contention of Colombia that the TMB had omitted to observe that information had been presented in three different forms. The TMB had not qualified whether these forms were mutually supportive, as claimed by Colombia, since the Body had not found that certain such forms were convincing. This had been reflected in the report adopted by the TMB: '[t]he TMB noted [. . .] that it could not base its assessment on *estimates* provided by Colombia for the year 1998; and that the *monthly averages* provided by Colombia could not be considered in most cases as providing reliable indications.' (G/TMB/R/49, paragraph 21, emphasis added). Therefore, the TMB had added that '[f]or data to be meaningful Colombia would have had *in the present case* to have provided comparisons either on a January/May basis or on a year-ending May basis' (same paragraph, emphasis added). In the view of the TMB, the above excerpts of its report made it clear that (i) the report faithfully reflected the forms of information provided, including the respective time-frames; (ii) the TMB had not provided any interpretation, but had expressed the view that *in the present case* the presentation was such that it did not allow a reliable comparison of the developments or changes in the relevant economic variables referred to in Article 6.3. The reference of the TMB to the January/May comparisons was not an interpretation and was not contrary to any provision of Article 6, since the Body had not suggested that this information should have been provided *in lieu* of the information submitted, but *in addition* to what had been made available. Without such additional information it was not possible for the TMB to assess whether developments during the first five months of 1998 could be an indication of serious damage caused by imports or whether they constituted a seasonal phenomenon which had characterised the domestic industry in the same period of the preceding years as well. The TMB recognized that Colombia had explained that the product subject to safeguard measures was not subject to seasonal factors. This statement, however, had not been substantiated by the information presented pursuant to Article 6.7. The TMB reiterated that it had not provided any interpretation regarding how information regarding imports or the variables used for determining serious damage to the domestic industry should be presented under Article 6. Instead, it had expressed a view on the difficulties it was facing because of the problems in comparing certain data provided by Colombia in the present case." (emphasis original)[133]

97. At its meeting in October 1999, concerning the choice of periods for comparison, the TMB held that two data series for overlapping periods were insufficient for the purposes of Article 6.7. In the specific case, there had been an overlap of eight months. The TMB emphasized that "[r]eliable indications cannot be obtained but by comparing data for identical time-periods":

"The TMB recalled that the relevant provisions of the ATC (Article 6.7) required, *inter alia*, that '[i]n respect of requests [for consultations] made under this paragraph, the information shall be related, as closely as possible, to identifiable segments of production and to the reference period set out in paragraph 8' of Article 6. In the particular cases referred to the TMB and subject to the present review, this reference period, in accordance with Article 6.8, corresponded to the period May 1998/April 1999, for which category-specific information had been provided by Argentina. It had to be observed, however, that in the factual information given by Argentina developments of this most recent period could not be compared to the state of the domestic industry as reflected in the different variables during a preceding corresponding period, i.e. during May 1997/April 1998, since all other data had been provided on a calendar-year basis. Though Argentina gave indications (expressed in terms of percentages) regarding 'changes over 12 months', these indications could not be considered to provide a reliable basis, as they compared data relating to May 1998/April 1999 to those reported for January/December 1998. Therefore, between the two data series compared there had been an overlap of eight months. Reliable indications cannot be obtained but by comparing data for identical time-periods. Though Argentina had explained that there had not been indications referring to the existence of seasonal factors, the TMB was of the view that the availability of data for the calendar-year 1998 and for the period May 1998/April 1999 could give an indication for comparing trends between January-April 1998 and the same period in 1999, but did not allow for more far-reaching comparisons."[134]

98. At its meeting in November 2001, the TMB examined a notification by Poland which considered itself unable to conform with the recommendation the TMB had made regarding a transitional safeguard measure introduced by Poland on imports of certain products

[133] G/TMB/R/51, paras. 26–27.
[134] G/TMB/R/58, para. 13.

from Romania. The TMB found that "developments that occurred prior to the period covered by the factual information provided pursuant to Article 6.7 can hardly be considered as a valid reason for a Member's inability to conform with the TMB's recommendation":

> "[T]he TMB recognized that the ATC does not provide specific guidance as to how long the period of investigation (and, consequently, the period covered in the specific and relevant information in the sense of Article 6.7) should be. Therefore, the definition of the length of the period of investigation is very much left to the discretion of the authorities of the Member invoking the provisions of Article 6. While the use of the present tense of the verb in Article 6.2 (i.e. '. . . a particular product is being imported . . .') and the reference to the information 'as up-to-date as possible' in Article 6.7 appear to indicate that the information to be provided should at the minimum, include developments of the recent past, there is no similar guidance regarding what should be the starting-point of the period covered by the factual information. In view of this, the TMB had proceeded to the examination of the matter under Article 6.10 on the basis of the information provided by Poland for the period of 12 months (from 1 January 2000 to 1 January 2001);
>
> It follows from the above that reference to developments that occurred prior to the period covered by the factual information provided pursuant to Article 6.7 can hardly be considered as a valid reason for a Member's inability to conform with the TMB's recommendation;"[135]

7. Article 6.10

99. In *US – Underwear*, the Appellate Body examined the Panel's finding that a transitional safeguard measure imposed by the United States was inconsistent with Article 6. The Panel had held that the wording of Article 6.10 did not provide any guidance on whether backdating a transitional safeguard measure was permissible. Proceeding to the provisions of the *GATT 1994*, the Panel then took Article X:2 thereof as its applicable and controlling text.[136] The Appellate Body disagreed with these findings of the Panel. As to whether Article 6 permits the retroactive application of transitional safeguard measures, referring to Article 6.10, the Appellate Body held that there was a "presumption [in the] very text of Article 6.10 that such a measure may be applied only prospectively":

> "It is essential to note that, under the express terms of Article 6.10, *ATC*, the restraint measure may be 'applied' only 'after the expiry of the period of 60 days' for consultations, without success, and only within the 'window' of 30 days immediately following the 60–day period. Accordingly, we believe that, in the absence of an express authorization in Article 6.10, *ATC*, to backdate the effectivity of a safeguard restraint measure, a presumption arises from the very text of Article 6.10 that such a measure may be applied only prospectively. This presumption appears to us entirely appropriate in respect of measures which are limitative or deprivational in character or tenor and impact upon Member countries and their rights or privileges and upon private persons and their acts."[137]

100. Further, the Appellate Body considered that the context of Article 6.10, "includ[ing], of course, the whole of Article 6", supported its finding referenced in paragraph 99 above:

> "Article 6.1 directs that transitional safeguard measures be applied 'as sparingly as possible' on the one hand and, on the other, applied 'consistently with the provisions of [Article 6] and the effective implementation of the integration process under [the *ATC*]'. It appears to the Appellate Body that to inject into Article 6.10 an authorization for backdating the effectivity of a restraint measure will encourage return to the practice of backdating restraint measures which appears to have been widespread under the regime of the *MFA*, a regime which has now ended, as discussed below, with the advent of the *ATC*. Such an introjection would moreover loosen up the carefully negotiated language of Article 6.10, which reflects an equally carefully drawn balance of rights and obligations of Members, by allowing the importing Member an enhanced ability to restrict the entry into its territory of goods in the exportation of which no unfair trade practice such as dumping or fraud or deception as to origin, is alleged or proven. For retroactive application of a restraint measure effectively enables the importing Member to exclude more goods by enforcing the quota measure earlier rather than later."[138]

101. Finally, the Appellate Body also held that backdating measures imposed pursuant to Article 6.10 would "diminish the utility and significance of prior consultations with the identified exporting Member or Members":

> "It further appears to us that to read Article 6.10 as somehow authorizing the backdating, as a matter of course, of the effectivity or operation of a restraint measure, will tend to diminish the utility and significance of prior consultations with the identified exporting Member or Members. Article 6.7 of the *ATC* provides for those consultations in very substantial detail. Thus, Article 6.7 requires that the request for consultations be accompanied by specific, relevant and up-to-date information on the factors which led the importing Member to make a determination of 'serious damage' (listed in

[135] G/TMB/R/83, para. 29.
[136] Panel Report on *US – Underwear*, paras. 7.63–7.64.
[137] Appellate Body Report on *US – Underwear*, p. 14.
[138] Appellate Body Report on *US – Underwear*, p. 15.

Article 6.3) and the factors which led to the unilateral attribution of such damage to an identified exporting Member or Members (referred to in Article 6.4). One clear objective of requiring a 60–day period for consultations is to give such Member or Members a real and fair, not merely *pro forma*, opportunity to rebut or moderate those factors. The requirement of consultations is thus grounded on, among other things, due process considerations; that requirement should be protected from erosion or attenuation by a treaty interpreter. It is, again, noteworthy that Article 6.7 refers *repeatedly* to the Member '*proposing* to take safeguard action', or who '*proposes* to invoke the safeguard action' and to the level at which imports of the goods specified 'are *proposed* to be restrained'. The common, day-to-day, implication which arises from this language is clear to us: the restraint is to be applied *in the future*, *after* the consultations, should these prove fruitless and the proposed measure not withdrawn. The principle of effectiveness in treaty interpretation[139] sustains this implication."[140]

102. In addition to its reasoning referenced in paragraphs 99–101 above, the Appellate Body in *US – Underwear* also addressed "the prior existence and demise, as it were, of the *MFA*" and pointed out that one particular provision of the MFA expressly permitted backdating:

"Article 3(5)(i) of the *MFA* expressly permitted backdating of the effectivity of a restraint measure to the date of the importing Member's call for consultations.[141] The above underscored clause of Article 3(5)(i), *MFA*, however, disappeared with the supersession of the *MFA* by the new *ATC*; no comparable clause was carried over into Article 6.10 of the *ATC*. The Panel did not draw any operable inference from the disappearance of the *MFA* clause.[142] Appellant Costa Rica urges that the absence of an equivalent clause in Article 6.10 of the *ATC* means that backdating of a restraint measure may no longer be resorted to under Article 6.10, *ATC*. Appellee United States, in contrast, insists that such backdating is nevertheless available under the regime of the *ATC*."[143]

103. With respect to the fact that a provision of the MFA expressly provided for the possibility to backdate preliminary safeguard measures, the Appellate Body held that the disappearance in the *ATC* of this provision "strongly reinforces the presumption that such retroactive application is no longer permissible":

"We believe the disappearance in the *ATC* of the earlier *MFA* express provision for backdating the operative effect of a restraint measure, strongly reinforces the presumption that such retroactive application is no longer permissible. This is the commonplace inference that is properly drawn from such disappearance. We are not entitled to assume that that disappearance was merely accidental or an inadvertent oversight on the part of either harassed negotiators or inattentive draftsmen. That no official record may exist of discussions or statements of delegations on this particular point is, of course, no basis for making such an assumption. At the oral hearing, the United States stated that since 1974, for over 20 years, all importing countries had 'counted' imports in the textile area against quotas imposed by restraints from the date of the request for consultations. While that may well have been the practice of many importing countries, it was, of course, the practice *under the MFA*. Two considerations bear upon this matter. Firstly, assuming, *arguendo* only, that the WTO Members had wanted to keep that practice, it is very difficult to understand why the treaty basis for such practice was not maintained but was instead wiped out. Secondly, it has not been suggested that such a widely followed practice has arisen *under Article 6.10 of the ATC* notwithstanding the absence of the *MFA* backdating clause. At any rate, it is much too early for practice to have arisen under the *ATC* regime which commenced only on 1 January 1995."[144] (emphasis original)

104. Further, in response to the United States claim that the retroactive application of transitional safeguard measures was needed to deal with flood of imports after an announcement of a request for consultations under the *ATC*, the Appellate Body stated:

"When and to the extent that a speculative 'flood of imports' turns out, in a particular situation, to be a real and serious problem engaging the legitimate interests of the Member proposing a safeguard measure, we consider that recourse may be had to Article 6.11 of the *ATC*. Article 6.11 authorizes the importing Member, 'in highly unusual and critical circumstances, where delay would cause damage which would be difficult to repair', to

[139] (*footnote original*) See Report of the Appellate Body, "*United States – Standards for Reformulated and Conventional Gasoline*", AB-1996–1, (adopted 20 May 1996) p. 23; and Report of the Appellate Body, "*Japan – Taxes on Alcoholic Beverages*", AB-1996–2 (adopted 1 November 1996), p. 12.

[140] Appellate Body Report on *US – Underwear*, pp. 15–16.

[141] (*footnote original*) Simply as a matter of comparative texts, it may be noted that like Article 6.10 of the *ATC*, Article XIX of the *General Agreement* and the *Agreement on Safeguards* do not contain any language expressly permitting backdating of the effectivity of a safeguard restraint measure taken thereunder with respect to categories of goods already integrated into the *General Agreement*. In contrast, it may also be noted that both Article 10(2) of the *Anti-dumping Agreement* and Article 20(2) of the *SCM Agreement expressly authorize, under certain conditions*, the *retroactive levying* of anti-dumping and countervailing duties for the period when provisional measures were in force. (emphasis original)

[142] (*footnote original*) We have noted in page 12 that the Panel "conclude[d] that *the prevalent practice under the MFA* of setting the initial date of a restraint period as the date of request for consultations *cannot be maintained under the ATC*". Immediately thereafter, however, the Panel held that backdating could be resorted to (in 1995, under the *ATC*) provided that the date of initial effectivity is not earlier than the date of publication of the call for consultations. (Panel Report, para. 7.69) This ruling appears at odds with the Panel's own immediately preceding conclusion. (emphasis original)

[143] Appellate Body Report on *US – Underwear*, pp. 16–17.

[144] Appellate Body Report on *US – Underwear*, p. 17.

impose and apply *immediately*, albeit provisionally, the restraint measure authorized under Article 6.10. The request for consultations and the notification to the Textile Monitoring Board must, however, be issued within five working days after the taking of provisional action. In other words, the requirements of Article 6.10 must nevertheless be observed. Action under Article 6.11 of the *ATC* is not in lieu of, and does not supersede, action taken or begun under Article 6.10, *ATC*. Provisional action under Article 6.11 is folded into action under Article 6.10. Considering that Article 6.11 permits the provisional imposition of a restraint measure even *before* consultations, *a fortiori* it would permit such imposition *after* consultations have in fact begun, so long as the requisites of both Articles 6.10 and 6.11 are met or continue to be met.

. . .

The conclusion we have arrived at, in respect of the issue of permissibility of backdating, is that the giving of retroactive effect to a safeguard restraint measure is no longer permissible under the regime of Article 6 of the *ATC* and is in fact prohibited under Article 6.10 of that *Agreement*. The presumption of prospective effect only, has not been overturned; it is a proposition not simply presumptively correct but one requiring our assent. We believe, accordingly, and so hold, that the Panel erred in ruling that Article 6.10 of the *ATC* had nothing to say on the issue of backdating and that such backdating to 21 April 1995, the date of publication of the call for consultations, was permissible under Article X:2 of the *General Agreement*. The importing Member is, however, not defenceless against a speculative 'flood of imports' where it is confronted with the circumstances contemplated in Article 6.11. Its appropriate recourse is, in other words, to action under Article 6.11 of the *ATC*, complying in the process with the requirements of Article 6.10 and Article 6.11."[145] (emphasis original)

105. In this connection, the Appellate Body held therefore with respect to the finding of the Panel on the permissibility of backdating, referenced in paragraph 99 above, that "[o]ur finding, therefore, that the safeguard restraint measure here involved is properly regarded as 'a measure of general application' under Article X:2 does not conflict with, and does not affect our conclusion under the first issue above that backdating the effectivity of a restraint measure is prohibited by Article 6.10 of the *ATC*."[146]

8. Article 6.11

(a) Consultation requirements

106. At its meeting in January 2000, as regards the view of Pakistan that the request for consultations and the notification to the TMB had been made by Argentina more than five working days *after* the action had been taken, contrary to what is stipulated in Article 6.11, the TMB stated as follows:

"The measure had been introduced as from 31 July 1999 and the respective notification and request for consultation had been made on 4 August 1999 'within no more than five working days' as stipulated in Article 6.11, from the implementation of the provisional safeguard measure.

The notion of 'taking' a safeguard action is not defined clearly by Articles 6.10 and 6.11, at least as far as a possible distinction between 'taking' and 'applying' a measure is concerned.

There can be a reading that an action is being taken in the sense of the above provisions when the restraint is effectively implemented, while another reading according to which 'taking' and 'applying' the measure are distinct actions, cannot be excluded either.

In any case, while it could be argued that the effect of a restraint begins immediately once it is announced, the decision in the present case was taken on 13 July 1999, but was published (and, therefore, became known to the foreign and domestic economic operators) only later and the difference of slightly more than two weeks in administrative terms, including the preparation of the implementation through appropriate procedures, did not seem to be excessive."[147]

(b) Notification requirements

107. At its meeting in April 2000, the TMB reviewed certain transitional safeguard measures taken by Argentina on certain textile products imported from Korea. With respect to Article 6.11, the TMB held that "the Member invoking the provisions of Article 6.11 and applying a safeguard measure provisionally was under clear obligation to respect also the relevant procedural requirements, including those related to notifications within established time-frames":

"[T]he language of Article 6.11 does not specify explicitly which of the Members involved has to submit such a notification within the deadline clearly defined. However, it followed from the logic and structure of Article 6, in particular of Articles 6.10 and 6.11, that the Member invoking the provisions of Article 6.11 and applying a safeguard measure provisionally was under clear obligation to respect also the relevant procedural requirements, including those related to notifications within established time-frames. It could be assumed as well that the Member affected by the provisional application of the safeguard measure would also have every interest in informing the TMB about developments as expeditiously as possible, in particular in case of lack of agreement as a result of consultations, since in these circumstances the provisionally applied safeguard measure would remain in place, at least until the TMB would have

[145] Appellate Body Report on *US – Underwear*, pp. 18–19.
[146] Appellate Body Report on *US – Underwear*, p. 21.
[147] G/TMB/R/61, para. 18.

conducted its examination and made appropriate recommendations to the Members concerned. The TMB also observed that the tight deadlines inscribed in Article 6.11 had been defined on purpose: while this provision enabled the importing Member to take action immediately, on a provisional basis, the respective procedures had been accelerated compared to those foreseen under Article 6.10 with a view to limiting the uncertainties regarding the justification of the measures, or lack thereof, thus introduced and limiting also the potentially adverse effects of the safeguards applied in case they were not to be found justified by the TMB under the provisions of Article 6."[148]

(c) "highly unusual and critical circumstances"

108. At its meeting in November 1996, in examining certain transitional safeguard measures taken by Brazil under Article 6.11, the TMB stated as follows:

"The TMB was of the view that in cases where the provisions of paragraph 11 of Article 6 were invoked, the expectation was that the elements envisaged in paragraphs 2, 3 and 4 of Article 6 would indicate as unambiguously as possible the highly unusual and critical character of the circumstances. The TMB was also of the view that, unless such circumstances were met, any action taken under Article 6 should be preceded by consultations between the parties."[149]

109. At its meeting in January 2000, in examining certain transitional safeguard measures introduced by Argentina on imports of certain products from Pakistan, the TMB distinguished between procedural and substantive elements of Article 6.11:

"[T]he TMB noted that Article 6.11 involves procedural and substantive elements. In the view of the TMB, the procedural requirements, in particular the notification of the measure within a narrowly defined time period, had been met. As to the substantive elements, they can be summarized as follows:

- it has to be demonstrated that a particular product is being imported into a Member's territory in such increased quantities as to cause serious damage, or actual threat thereof, to the domestic industry producing like and/or directly competitive products. In this context the TMB noted that Article 6 defines only one set of criteria for demonstrating serious damage and, therefore, they were the same whether Article 6.10 or 6.11 is invoked;
- in addition, the invoking Member has to provide explanations that would convince the Member affected by the measure, as well as the TMB, regarding the existence of highly unusual and critical circumstances where delay in taking action would cause damage which would be difficult to repair."[150]

110. After distinguishing between procedural and substantive elements of Article 6.11, as referenced in paragraph 109 above, the TMB stated that it was not convinced by Argentina's argument that in the case before it, "the continued increases of such imports during the period investigated had created a situation that was one as described in Article 6.11". The TMB held that:

"[A]rgentina had not provided any explanation in the factual information of the reasons why it had considered that the circumstances were highly unusual and critical. Subsequently, Argentina had explained that developments in total imports could have, in its view, fully justified taking action pursuant to Article 6 earlier, and that the continued increases of such imports during the period investigated had created a situation that was one as described in Article 6.11. The TMB had not found this argument to be a convincing one. It noted, among other things, that the rate of increase of total imports seemed to have decelerated since the beginning of 1999. Consequently, the circumstances could not be highly unusual and critical, since some of the difficulties experienced by the industry had started earlier and the situation had, perhaps, gradually worsened throughout the period investigated.

In light of the above, the TMB continued to be of the view that Argentina's recourse to the procedures laid down in Article 6.11 had not been appropriate. Whether such an inappropriate recourse to Article 6.11 can invalidate a transitional safeguard measure or not, was, in the view of the TMB, a decision to be taken case-by-case, on the basis of the consideration of all the relevant elements involved. In the present case the TMB found, on the one hand, that serious damage caused by increased imports had been demonstrated and that it could be attributed, *inter alia*, to imports from Pakistan. Furthermore, the procedural requirements under Article 6.11 had been met. On the other hand, the detailed examination of the determination of serious damage as well as the lack of convincing explanations pursuant to Article 6.11 revealed that the recourse to this provision, i.e. to apply the restraint provisionally, without having exhausted the possibility of prior consultations, had not been justified. The TMB came to the overall conclusion, however, that in this particular case the inappropriate recourse to Article 6.11, although it constituted an important shortcoming, would not lead to the conclusion that the safeguard measure should be rejected on that basis."[151]

111. At its meeting in April 2000, the TMB examined certain transitional safeguard measures taken by Argentina under Article 6.11 on imports of certain products originating in Korea. With respect to the measure affecting one category of products, the TMB recalled:

[148] G/TMB/R/64, para. 18.
[149] G/TMB/R/20, para. 24. The TMB reiterated this view on several occasions. See G/TMB/R/27, para. 37 and G/TMB/R/58, para. 44.
[150] G/TMB/R/61, para. 53.
[151] G/TMB/R/61, paras. 54–55.

"[T]hat in examining a previous case involving recourse to the provisions of Article 6.11 it had stated, *inter alia*, the following: '[w]hether . . . an inappropriate recourse to Article 6.11 can invalidate a transitional safeguard measure or not, was, in the view of the TMB, *a decision to be taken case-by-case, on the basis of the consideration of all the relevant elements involved*' (*emphasis added*)[152]. In the present case the TMB, in its thorough analysis of the developments affecting the Argentinian industry, was unable to identify any significant element of the case where it could find that the situation corresponded to the circumstances defined in Article 6.11.

The TMB concluded that Argentina had not demonstrated successfully that the products of category 229/629 were being imported into Argentina in the reference period in such increased quantities as to cause serious damage to the domestic industry producing like and/or directly competitive products and, in particular, as to substantiate the highly unusual and critical circumstances where delay would cause damage that would be difficult to repair. The TMB recommended, therefore, that Argentina rescind the safeguard measure applied provisionally on imports of these products originating from Korea."[153]

112. At the same meeting, with respect to another safeguard measure on imports of another category of products, the TMB found a recourse by Argentina to Article 6.11 to be justified, even though no separate analysis had been provided by the National Commission for Foreign Trade of Argentina to support its statement that "the unusual and critical circumstances mentioned in Article 6.11 of the ATC existed":

"The TMB recalled that Argentina had decided to apply provisionally the safeguard measure on imports from Korea pursuant to the provisions of Article 6.11, which refers to 'highly unusual and critical circumstances, where delay would cause damage which would be difficult to repair'. It was observed that in its findings, on 30 July 1999, the National Commission for Foreign Trade of Argentina had considered, *inter alia*, that 'the unusual and critical circumstances mentioned in Article 6.11 of the ATC existe[d], enabling the provisional application of measures'. Though no separate analysis was provided by this Commission to substantiate this statement, on the basis of the examination of this case pursuant to Articles 6.2, 6.3 and 6.4, the TMB came to the view that at the end of July 1999 the existence of the highly unusual and critical circumstances had been demonstrated on the basis of data covering the period June 1998–May 1999. Practically all the elements examined supported such a conclusion: the sharp and continuous rise of imports, both from all sources and from Korea; the significant and continuous decline of output and domestic sales of local production, while consumption continued to increase dynamically; the decline in productivity and employment; the low rate of utilization of capacity and, not the least, the important pressure import prices put on the domestic market. All these, i.e. the elements envisaged in Articles 6.2, 6.3 and 6.4, seemed to indicate without ambiguity the existence of the highly unusual and, in particular, the critical nature of the circumstances."[154]

113. With respect to the relationship with Article 6.10, see the excerpt from the Appellate Body Report on *US – Underwear*, referenced in paragraph 104 above.

9. Relationship with Article 2.4

114. In *US – Underwear*, the Panel examined whether certain transitional safeguard measures imposed by the United States on imports from Costa Rica were inconsistent with Article 6. The Panel, in a finding not addressed by the Appellate Body, stated with respect to the relationship between Articles 2.4 and 6 that "one of the central elements of the ATC is the prohibition, in principle, for Members to have recourse to any new restrictions beyond those notified under Article 2.1 of the ATC". Based on this reasoning, the Panel on *US – Underwear* concluded that "Article 6 of the ATC is an exception to the rule of Article 2.4 of the ATC".[155] The Appellate Body did not address these findings upon review. However, in its report in *US – Wool Shirts and Blouses*, the Appellate Body held that Article 6 was an integral part of the balance of rights and obligations under the *ATC*, that Article 6 did not have exceptional character and that the burden of proof in this context fell upon the complaining party. See paragraph 46 above.

115. In *US – Wool Shirts and Blouses*, the Panel examined whether a certain United States transitional safeguard measure was consistent with Article 6. With respect to the relationship between Articles 2.4 and 6, the Panel, in a statement not reviewed by the Appellate Body, indicated as follows:

"Since we conclude that the safeguard action taken by the United States violated the provisions of Article 6 of the ATC, it is our view that the United States applied a restraint not authorized under the ATC, which, therefore, constitutes also a violation of Article 2.4 of the ATC."[156]

10. Relationship with other WTO Agreements

(a) Article III.2 of the GATT 1994

116. As regards the relationship between Article 6.2 and Article III.2 and the concept of "directly competitive" products, see paragraph 61 above.

---

[152] G/TMB/R/61, para. 55.
[153] G/TMB/R/64, paras. 38–39.
[154] G/TMB/R/64, para. 57.
[155] Panel Report on *US – Underwear*, paras. 7.15–7.16.
[156] Panel Report on *US – Wool Shirts and Blouses*, para. 7.59. For same conclusion see Panel Report on *US – Underwear*, paras. 7.70–7.71.

(b) Article X:2 of the GATT 1994

117. In *US – Underwear*, the Appellate Body addressed the Panel's finding on Article X:2 of the *GATT 1994* and its applicability to transitional safeguard measures within the meaning of Article 6 of the *ATC*. The Panel reviewed the measure at issue in the light of Article X:2 of the *GATT 1994* because it had found that Article 6.10 of the *ATC* did not provide guidance on the issue of whether backdating a transitional safeguard measure was permissible; see paragraph 99 above. While the Appellate Body disagreed with the Panel's reading of Article 6.10 of the *ATC*[157], it agreed that the safeguard restraint measure was a measure of general application within the meaning of Article X:2:

> "The Panel found that the safeguard restraint measure imposed by the United States is 'a measure of general application' within the contemplation of Article X:2. We agree with this finding. While the restraint measure was addressed to particular, i.e. named exporting Members, including Appellant Costa Rica, as contemplated by Article 6.4, *ATC*, we note that the measure did not try to become specific as to the individual persons or entities engaged in exporting the specified textile or clothing items to the importing Member and hence affected by the proposed restraint."[158]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7

1. As part of the integration process and with reference to the specific commitments undertaken by the Members as a result of the Uruguay Round, all Members shall take such actions as may be necessary to abide by GATT 1994 rules and disciplines so as to:

(a) achieve improved access to markets for textile and clothing products through such measures as tariff reductions and bindings, reduction or elimination of non-tariff barriers, and facilitation of customs, administrative and licensing formalities;

(b) ensure the application of policies relating to fair and equitable trading conditions as regards textiles and clothing in such areas as dumping and anti-dumping rules and procedures, subsidies and countervailing measures, and protection of intellectual property rights; and

(c) avoid discrimination against imports in the textiles and clothing sector when taking measures for general trade policy reasons.

Such actions shall be without prejudice to the rights and obligations of Members under GATT 1994.

2. Members shall notify to the TMB the actions referred to in paragraph 1 which have a bearing on the implementation of this Agreement. To the extent that these have been notified to other WTO bodies, a summary, with reference to the original notification, shall be sufficient to fulfil the requirements under this paragraph. It shall be open to any Member to make reverse notifications to the TMB.

3. Where any Member considers that another Member has not taken the actions referred to in paragraph 1, and that the balance of rights and obligations under this Agreement has been upset, that Member may bring the matter before the relevant WTO bodies and inform the TMB. Any subsequent findings or conclusions by the WTO bodies concerned shall form a part of the TMB's comprehensive report.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8

1. In order to supervise the implementation of this Agreement, to examine all measures taken under this Agreement and their conformity therewith, and to take the actions specifically required of it by this Agreement, the Textiles Monitoring Body ("TMB") is hereby established. The TMB shall consist of a Chairman and 10 members. Its membership shall be balanced and broadly representative of the Members and shall provide for rotation of its members at appropriate intervals. The members shall be appointed by Members designated by the Council for Trade in Goods to serve on the TMB, discharging their function on an *ad personam* basis.

2. The TMB shall develop its own working procedures. It is understood, however, that consensus within the TMB does not require the assent or concurrence of members appointed by Members involved in an unresolved issue under review by the TMB.

3. The TMB shall be considered as a standing body and shall meet as necessary to carry out the functions required of it under this Agreement. It shall rely on notifications and information supplied by the Members under the relevant Articles of this Agreement, supplemented by any additional information or necessary details they may submit or it may decide to seek from them. It may also rely on notifications to and reports from other WTO bodies and from such other sources as it may deem appropriate.

---

[157] Appellate Body Report on *US – Underwear*, p. 14.
[158] Appellate Body Report on *US – Underwear*, pp. 21–22.

4. Members shall afford to each other adequate opportunity for consultations with respect to any matters affecting the operation of this Agreement.

5. In the absence of any mutually agreed solution in the bilateral consultations provided for in this Agreement, the TMB shall, at the request of either Member, and following a thorough and prompt consideration of the matter, make recommendations to the Members concerned.

6. At the request of any Member, the TMB shall review promptly any particular matter which that Member considers to be detrimental to its interests under this Agreement and where consultations between it and the Member or Members concerned have failed to produce a mutually satisfactory solution. On such matters, the TMB may make such observations as it deems appropriate to the Members concerned and for the purposes of the review provided for in paragraph 11.

7. Before formulating its recommendations or observations, the TMB shall invite participation of such Members as may be directly affected by the matter in question.

8. Whenever the TMB is called upon to make recommendations or findings, it shall do so, preferably within a period of 30 days, unless a different time period is specified in this Agreement. All such recommendations or findings shall be communicated to the Members directly concerned. All such recommendations or findings shall also be communicated to the Council for Trade in Goods for its information.

9. The Members shall endeavour to accept in full the recommendations of the TMB, which shall exercise proper surveillance of the implementation of such recommendations.

10. If a Member considers itself unable to conform with the recommendations of the TMB, it shall provide the TMB with the reasons therefor not later than one month after receipt of such recommendations. Following thorough consideration of the reasons given, the TMB shall issue any further recommendations it considers appropriate forthwith. If, after such further recommendations, the matter remains unresolved, either Member may bring the matter before the Dispute Settlement Body and invoke paragraph 2 of Article XXIII of GATT 1994 and the relevant provisions of the Dispute Settlement Understanding.

11. In order to oversee the implementation of this Agreement, the Council for Trade in Goods shall conduct a major review before the end of each stage of the integration process. To assist in this review, the TMB shall, at least five months before the end of each stage, transmit to the Council for Trade in Goods a comprehensive report on the implementation of this Agreement during the stage under review, in particular in matters with regard to the integration process, the application of the transitional safeguard mechanism, and relating to the application of GATT 1994 rules and disciplines as defined in Articles 2, 3, 6 and 7 respectively. The TMB's comprehensive report may include any recommendation as deemed appropriate by the TMB to the Council for Trade in Goods.

12. In the light of its review the Council for Trade in Goods shall by consensus take such decisions as it deems appropriate to ensure that the balance of rights and obligations embodied in this Agreement is not being impaired. For the resolution of any disputes that may arise with respect to matters referred to in Article 7, the Dispute Settlement Body may authorize, without prejudice to the final date set out under Article 9, an adjustment to paragraph 14 of Article 2, for the stage subsequent to the review, with respect to any Member found not to be complying with its obligations under this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. General

118. At the 1996 meeting, in Singapore, with respect to the role of the TMB, the Ministerial Conference declared as follows:

> "We agree that, keeping in view its quasi-judicial nature, the Textiles Monitoring Body (TMB) should achieve transparency in providing rationale for its findings and recommendations. We expect that the TMB shall make findings and recommendations whenever called upon to do so under the Agreement. We emphasize the responsibility of the Goods Council in overseeing, in accordance with Article IV:5 of the WTO Agreement and Article 8 of the ATC, the functioning of the ATC, whose implementation is being supervised by the TMB."[159]

2. Role of the TMB

119. The Panel on *US – Wool Shirts and Blouses*, in statements not addressed by the Appellate Body, elaborated on the difference between the role and the function of dispute settlement panels on the one hand and the role and function of the TMB on the other. The Panel pointed out, *inter alia*, the lack of specific terms of reference for the TMB and the generally more "multi-faceted role" of the TMB, in particular its investigative powers:

> "The wording of the ATC and the DSU confirms that the role and function of DSU panels differ substantially from that of the TMB. For instance, the TMB is not limited to any specific terms of reference as DSU panels are (Article 7 of the DSU). The function of the TMB is to

[159] The Singapore Ministerial Declaration, para. 15.

supervise the implementation of the ATC generally and to examine measures taken, agreements reached and any other matters referred to it. The nature of these broad functions confirms the special and multifaceted role of the TMB. This is also reflected in the TMB's rules of procedure, its decision-making rule and its composition. The TMB members are appointed by WTO Members designated by the Council for Trade in Goods but discharge their function on an ad personam basis. Pursuant to a General Council Decision, the TMB's membership is composed of constituencies, in most cases of several Members, where most members also appoint alternates. Furthermore, a TMB member appointed by a WTO Member involved in a dispute before the TMB, participates in the TMB's deliberations, although such TMB member cannot block a consensus (Article 8.2 of the ATC). On the contrary, panelists under the DSU are not selected on the basis of constituencies and the citizens of any party to a dispute under the DSU cannot participate as panelists, absent agreement of the parties (Article 8.3 of the DSU). In addition, a panelist may issue a dissenting opinion under the DSU, while the TMB can only act by consensus. Moreover, Article 8.3 of the ATC is clear as to the wide investigative authority of the TMB:

> 'The TMB shall be considered as a standing body and shall meet as necessary to carry out the functions required of it under this Agreement. It shall rely on notifications and information supplied by the Members under the relevant Articles of this Agreement, *supplemented by any additional information or necessary details they may submit or it may decide to seek from them*. It may also rely on *notifications to and reports from other WTO bodies and from such other sources as it may deem appropriate*.'"[160]

120. The Panel also noted that after completion of the TMB process, a Member was still free to request the establishment of a panel, but that the TMB process in these circumstances replaced consultations under Article 4 of the *DSU*:

> "We note also that, according to Article 8.10 of the ATC, when the TMB process has been completed, a Member which remains unsatisfied with the TMB recommendations can request the establishment of a panel without having to request consultations under Article 4 of the DSU. This is to say that the TMB process can replace the consultation phase in the dispute settlement process under the DSU and is distinct from the formal adjudication process by panels[161].
>
> Therefore when differences arise, the ATC requires parties first to seek consultations with a view to reaching a mutually satisfactory solution to the problem, within the specific parameters or considerations set out in the relevant provision(s) of the ATC. If a mutually satisfactory solution is not reached in the consultations, the matter may be or shall be, depending on the applicable provision, referred to the TMB for review and recommendations. In the case of recourse to Article 6 of the ATC, the object of the consultations is to see whether there is a mutual understanding that the situation calls for restraint on the exports of the particular product or not. If there is such a mutual understanding, details of the agreed restraint measure shall be communicated to the TMB which has to determine whether the agreement is justified in accordance with the provisions of Article 6 of the ATC. If there is no agreement between the parties concerned and the safeguard action is taken, the matter also has to be referred to the TMB. According to Article 6.10 of the ATC, in order to conduct such an examination, '. . . the TMB shall have available to it the factual data provided to the Chairman of the TMB, referred to in paragraph 7 [of Article 6], as well as any other relevant information provided by the Members concerned'. During the review process, the TMB is not limited to the initial information submitted by the importing Member as parties may submit additional and other information in support of their positions, which, we understand, may relate to subsequent events. Moreover, the TMB may hear witnesses on these facts and perform a genuine fact finding and evidence-building exercise on the continuing situation of the parties concerned with the safeguard action, in order to settle the dispute. TMB members deliberate on the basis of all the information presented to decide whether the safeguard action taken by the importing Member is justified and whether serious damage or actual threat thereof to the domestic industry of the importing Member and causation exist.
>
> The second track is the DSU. If, after recourse to Articles 6.10 and 8.10 of the ATC, the exporting Member is not satisfied with the recommendation of the TMB, such exporting Member can challenge the safeguard action and bring it to the formal dispute settlement process under the DSU. Unlike the TMB, a DSU panel is not called upon, under its terms of reference, to reinvestigate the market situation. When assessing the WTO compatibility of the decision to impose national trade remedies, DSU panels do not reinvestigate the market situation but rather limit themselves to the evidence used by the importing Member in making its determination to impose the measure. In addition, such DSU panels, contrary to the TMB, do not consider developments subsequent to the initial determination. In respect of the US determination at issue in the present case, we consider,

[160] Panel Report on *US – Wool Shirts and Blouses*, para. 7.19(emphasis added).

[161] (*footnote original*) Article 8.10 of the ATC: "If a Member considers itself unable to conform with the recommendations of the TMB, it shall provide the TMB with the reasons therefor not later than one month after receipt of such recommendations. Following thorough consideration of the reasons given, the TMB shall issue any further recommendations it considers appropriate forthwith. If, after such further recommendations, the matter remains unresolved, either Member may bring the matter before the Dispute Settlement Body and invoke paragraph 2 of Article XXIII of GATT 1994 and the relevant provisions of the Dispute Settlement Understanding."

therefore, that this Panel is requested to make an objective assessment as to whether the United States respected the requirements of Article 6.2 and 6.3 of the ATC at the time of the determination."[162]

3. Article 8.1

(a) "The TMB shall consist of a Chairman and 10 members."

121. The General Council decided on the original composition of the TMB at its meeting of 31 January 1995.[163] The General Council further decided on the composition of the TMB at its meeting of 10 December 1997.[164]

(b) TMB members "discharge [. . .] their functions on an *ad personam* basis"

122. The Working Procedures adopted by the TMB state the following:

> "In discharging their functions [. . .], TMB members and alternates undertake not to solicit, accept or act upon instructions from governments, nor to be influenced by any other organisations or undue extraneous factors. They shall disclose to the Chairman any information that they may consider likely to impede their capacity to discharge their functions on an *ad personam* basis. Should serious doubts arise during the deliberations of the TMB regarding the ability of a TMB member to act on an *ad personam* basis, they shall be communicated to the Chairman. The Chairman shall deal with the particular matter as necessary."[165]

123. The Council for Trade in Goods, at its meeting of 27 January 1997, further clarified the status of TMB Members:

> "WTO Members which, pursuant to the decision of the General Council of 31 January 1995, appoint TMB members under Article 8.1 of the Agreement on Textiles and Clothing accept that TMB members discharge their function on an *ad personam* basis and not as government representatives. Consequently, they shall not give TMB members instructions, nor seek to influence them, with regard to matters before the TMB. The same applies to alternates."[166]

4. Article 8.2

(a) "The TMB shall develop its own working procedures"

124. At its first meeting, in March to July 1995, the TMB adopted its working procedures.[167]

125. At its meeting in December 1996, in relation to working procedures, the TMB took note of the decision of the DSB on 3 December 1996 to adopt rules of conduct for the *DSU*[168], "in view of the fact that such Rules apply, *inter alia*, to the Chairman of the TMB and other members of the TMB secretariat called upon to assist the TMB in formulating recommendations, findings or observations pursuant to the ATC, as well as, to the extent prescribed in the relevant Section of the Rules, to members of the TMB."[169]

(b) "consensus within the TMB"

126. The decision of 31 January 1995 by the General Council on the composition of the TMB provides that "[t]he Textiles Monitoring Body will take all decisions by consensus".[170] This general statement is qualified in that decision that "[a]s provided for in Article 8.2 of the Agreement on Textiles and Clothing, in case of an unresolved issue under review by the TMB, it is understood that consensus within the TMB does not require the assent or concurrence of members appointed by members involved in such unresolved issue."[171]

127. The Working Procedures adopted by the TMB state the following:

> "Consensus within the TMB does not require the assent or concurrence of TMB members appointed by WTO Members involved in an unresolved issue under review by the TMB.[172] However, at least seven TMB members shall be present when deciding on such unresolved issues, except in cases where one or two TMB members have been appointed by WTO Members involved in an unresolved issue, where eight TMB members shall be present. For the purpose of this paragraph the term 'TMB members' covers the respective alternates in case a TMB member is absent."[173]

5. Article 8.3

(a) Standard of review

128. In *US – Underwear*, addressing the issue of "standard of review" with reference to Articles 8.3 and 8.5, the Panel stated that it could not engage in a *de novo* review of the national measure at issue and added that such *de novo* review was, "if at all, to be conducted by the TMB":

> "A *de novo* review, if at all, is to be conducted by the TMB. Article 8.3 of the ATC reads as follows: 'The TMB

> . . . shall rely on notifications and information supplied by the Members under the relevant Articles of the Agreement, supplemented by any additional information or necessary details they may submit or it may decide to seek from them'. Article 8.5 of the ATC calls for a 'thorough and prompt' review of the matter by the TMB."[174]

6. Article 8.9

129. The Panel on *US – Wool Shirts and Blouses* addressed the issue of the legal force of the TMB's recommendations and found that the recommendations of the TMB are not binding:

> "Concerning India's claim that the US restraint is invalid because the TMB did not endorse the measure which the United States attempted to justify in the Market Statement and on which consultations were held, we note that under Article 6.10 of the ATC, the United States, should it be entitled to impose a restraint, could do so without TMB authorization, although it would be required to refer the matter to the TMB for appropriate recommendations. Article 8.9 of the ATC confirms that the recommendations of the TMB are not binding:
>
> > 'The Members shall endeavour to accept in full the recommendations of the TMB, which shall exercise proper surveillance of the implementation of such recommendations.' (emphasis added)
>
> We, therefore, reject India's claim that under the ATC a safeguard action can be maintained only if adequately endorsed by the TMB."[175]

7. Article 8.10

130. At its meeting in March 1997, with reference to the reasons provided by Hong Kong for its inability to conform to the TMB's recommendations, the TMB noted as follows:

> "[P]aragraph 10 of Article 8 did not provide any express guidance on the reasons which can be given by a Member for its inability to conform with the recommendations of the TMB"[176]

131. At its meeting in November 2001, whilst examining the reasons why Poland considered itself unable to conform with the TMB recommendation made at a previous meeting to rescind the transitional safeguard measure Poland had introduced on imports of certain products from Romania, the TMB addressed, *inter alia*, the question of the period for making notifications pursuant to Article 8.10, as follows:

> "The TMB first addressed the argument made by Romania that Poland's communication regarding its inability to conform with the TMB's recommendation had not been made within the period established by Article 8.10, which requires that the Member concerned submit such a communication 'not later than one month after receipt of such recommendations'. Noting the arguments of Romania in this regard, the TMB took the view that the one-month period started on the date when the report containing the TMB's examination, together with the conclusions reached and recommendations adopted, had been officially communicated to the Member concerned. In this particular case, this had been done on 17 September 2001 when the TMB's report on the examination of the safeguard measure had been circulated to all WTO Members[177] and the Chairman of the TMB had provided a separate official communication to the Polish authorities in this regard. The communication made by Poland under Article 8.10 was dated 17 October 2001 and had been received by the TMB on that same day, i.e. within the deadline specified in Article 8.10."[178]

132. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *ATC* were invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Underwear*	WT/DS24	Articles 6.2, 6.4, 6.6, 6.10, 8.3
2	*US – Wool Shirts and Blouses*	WT/DS33	Articles 6.2. 6.3 and 8.9
3	*Turkey – Textiles and Clothing*	WT/DS34	Articles 2 and 2.4
4	*US – Cotton Yarn*	WT/DS192	Articles 6.2 and 6.3

8. Article 8.11

(a) "a major review before the end of each stage of the integration process"

133. Pursuant to Article 8.11, to assist in the review by the Council for Trade in Goods, on 31 July 1997, the TMB adopted and subsequently circulated a comprehensive report on the implementation of the ATC during the first stage of integration.[179] The Council for Trade in Goods conducted a major review of the first stage of the integration process.[180] Furthermore, on 26 July 2001, the TMB adopted and subsequently circulated a comprehensive report on the implementation of the ATC during the second stage of the integration process.[181]

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9

This Agreement and all restrictions thereunder shall stand terminated on the first day of the 121st month that the WTO Agreement is in effect, on which date the textiles and clothing sector shall be fully integrated into GATT 1994. There shall be no extension of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

134. This Agreement was terminated as scheduled on 1 January 2005, together with all the restrictions maintained under its jurisdiction.

135. As part of its overall assessment on the implementation of the *ATC*, the TMB submitted a comprehensive report to the Council for Trade in Goods. In its comments on the implementation of the *ATC* during the third and final stage of the integration process[182], the TMB observed:

> "[I]n the respective official notifications repeated assurances have been recently provided regarding the timely and full implementation of the ATC. The Agreement will be fully implemented as scheduled and provided for in Article 9. Thus the ATC and all restrictions thereunder shall stand terminated on 1 January 2005, on which date the textiles and clothing sector shall be fully integrated into GATT 1994, thereby putting an end to a special and discriminatory regime that has been in application for more than four decades."[183]

XI. ANNEX

A. TEXT OF ANNEX

ANNEX
LIST OF PRODUCTS COVERED BY THIS AGREEMENT

1. This Annex lists textile and clothing products defined by Harmonized Commodity Description and Coding System (HS) codes at the six-digit level.

2. Actions under the safeguard provisions in Article 6 will be taken with respect to particular textile and clothing products and not on the basis of the HS lines *per se*.

3. Actions under the safeguard provisions in Article 6 of this Agreement shall not apply to:

(a) developing country Members' exports of handloom fabrics of the cottage industry, or hand-made cottage industry products made of such handloom fabrics, or traditional folklore handicraft textile and clothing products, provided that such products are properly certified under arrangements established between the Members concerned;

(b) historically traded textile products which were internationally traded in commercially significant quantities prior to 1982, such as bags, sacks, carpetbacking, cordage, luggage, mats, mattings and carpets typically made from fibres such as jute, coir, sisal, abaca, maguey and henequen;

(c) products made of pure silk.

For such products, the provisions of Article XIX of GATT 1994, as interpreted by the Agreement on Safeguards, shall be applicable. [The list of products is omitted.]

B. INTERPRETATION AND APPLICATION OF ANNEX

No jurisprudence or decision of a competent WTO body.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Having regard to the Uruguay Round of Multilateral Trade negotiations;

Desiring to further the objectives of GATT 1994;

Recognizing the important contribution that international standards and conformity assessment systems can make in this regard by improving efficiency of production and facilitating the conduct of international trade;

Desiring therefore to encourage the development of such international standards and conformity assessment systems;

Desiring however to ensure that technical regulations and standards, including packaging, marking and labelling requirements, and procedures for assessment of conformity with technical regulations and standards do not create unnecessary obstacles to international trade;

Recognizing that no country should be prevented from taking measures necessary to ensure the quality of its exports, or for the protection of human, animal or plant life or health, of the environment, or for the prevention of deceptive practices, at the levels it considers appropriate, subject to the requirement that they are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail or a disguised restriction on international trade, and are otherwise in accordance with the provisions of this Agreement;

Recognizing that no country should be prevented from taking measures necessary for the protection of its essential security interest;

Recognizing the contribution which international standardization can make to the transfer of technology from developed to developing countries;

Recognizing that developing countries may encounter special difficulties in the formulation and application of technical regulations and standards and procedures for assessment of conformity with technical regulations and standards, and desiring to assist them in their endeavours in this regard;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
General Provisions

1.1 General terms for standardization and procedures for assessment of conformity shall normally have the meaning given to them by definitions adopted within the United Nations system and by international standardizing bodies taking into account their context and in the light of the object and purpose of this Agreement.

1.2 However, for the purposes of this Agreement the meaning of the terms given in Annex 1[1] applies.

1.3 All products, including industrial and agricultural products, shall be subject to the provisions of this Agreement.

1.4 Purchasing specifications prepared by governmental bodies for production or consumption requirements of governmental bodies are not subject to the provisions of this Agreement but are addressed in the Agreement on Government Procurement, according to its coverage.

1.5 The provisions of this Agreement do not apply to sanitary and phytosanitary measures as defined in Annex A of the Agreement on the Application of Sanitary and Phytosanitary Measures.

1.6 All references in this Agreement to technical regulations, standards and conformity assessment procedures shall be construed to include any amendments thereto and any additions to the rules or the product coverage thereof, except amendments and additions of an insignificant nature.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. General

(a) Termination of Tokyo Round TBT Agreement

1. At its meeting on 20 October 1995, the Tokyo Round TBT Committee adopted a decision on the Termination of the Tokyo Round TBT Agreement with effect from 1 January 1996.[2]

(b) Scope of the TBT Agreement

2. In *EC – Asbestos*, the complainant (Canada) contended that the TBT Agreement applied to the French Decree at issue, because it was a "technical regulation" within the meaning of Annex 1, paragraph 1. The measure at issue contained a general prohibition on the importation, marketing and use of asbestos, but provided for a few limited exceptions to this ban. The Panel rejected the Canadian argument and held that "the part of the Decree relating to the ban on imports of asbestos and asbestos-containing products" did not constitute a "technical regulation".[3] The Appellate Body reversed the Panel finding and held that it was necessary to consider the measure at issue in its entirety, i.e. both "the prohibitive and the permissive elements that are part of it":

> "[T]he proper legal character of the measure at issue cannot be determined unless the measure is examined as a whole. . . . the scope and generality of those prohibitions can only be understood in light of the exceptions to it which, albeit for a limited period, *permit*, *inter alia*, the use of certain product products containing asbestos and, principally, products containing chrysotile asbestos fibres. The measure is, therefore, *not* a *total* prohibition on asbestos fibres, because it also includes provisions that *permit*, for a limited duration, the use of asbestos in certain situations. Thus, to characterize the measure simply as a general prohibition, and to examine it as such, overlooks the complexities of the measure, which include both prohibitive and permissive elements. In addition, we observe that the exceptions in the measure would have no autonomous legal significance in the absence of the prohibitions. We, therefore, conclude that the measure at issue is to be examined as an integrated whole, taking into account, as appropriate, the prohibitive and the permissive elements that are part of it."[4]

2. Article 1.2

3. On the definition of "technical regulation", see paragraphs 58–62 below. On the definition of "standard", see paragraphs 10–12 and 63–65 below.

3. Article 1.5

4. In *EC – Hormones*, the complainants (United States and Canada) claimed that measures taken by the European Communities were inconsistent with: (i) *GATT* Articles III or XI; (ii) Articles 2, 3 and 5 of the *SPS Agreement*; (iii) Article 2 of the *TBT Agreement*; and (iv) Article 4 of the *Agreement on Agriculture*. The Panel, referring to Article 1.5 of the *TBT Agreement*, found that, since the measures at issue were sanitary measures, the *TBT Agreement* was not applicable to the dispute.[5]

TECHNICAL REGULATIONS AND STANDARDS

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2

Preparation, Adoption and Application of Technical Regulations by Central Government Bodies

With respect to their central government bodies:

2.1 Members shall ensure that in respect of technical regulations, products imported from the territory of any Member shall be accorded treatment no less favourable than that accorded to like products of national origin and to like products originating in any other country.

---

[1] See Section XVII.
[2] TBT/M/50, para. 6. The text of the decision is contained in TBT/W/195.
[3] Panel Report on *EC – Asbestos*, para. 8.72(a).
[4] Appellate Body Report on *EC – Asbestos*, para. 64.
[5] Panel Report on *EC – Hormones (US)*, para. 8.29 and Panel Report on *EC – Hormones (Canada)*, para. 8.32.

2.2 Members shall ensure that technical regulations are not prepared, adopted or applied with a view to or with the effect of creating unnecessary obstacles to international trade. For this purpose, technical regulations shall not be more trade-restrictive than necessary to fulfil a legitimate objective, taking account of the risks non-fulfilment would create. Such legitimate objectives are, *inter alia:* national security requirements; the prevention of deceptive practices; protection of human health or safety, animal or plant life or health, or the environment. In assessing such risks, relevant elements of consideration are, *inter alia:* available scientific and technical information, related processing technology or intended end-uses of products.

2.3 Technical regulations shall not be maintained if the circumstances or objectives giving rise to their adoption no longer exist or if the changed circumstances or objectives can be addressed in a less trade-restrictive manner.

2.4 Where technical regulations are required and relevant international standards exist or their completion is imminent, Members shall use them, or the relevant parts of them, as a basis for their technical regulations except when such international standards or relevant parts would be an ineffective or inappropriate means for the fulfilment of the legitimate objectives pursued, for instance because of fundamental climatic or geographical factors or fundamental technological problems.

2.5 A Member preparing, adopting or applying a technical regulation which may have a significant effect on trade of other Members shall, upon the request of another Member, explain the justification for that technical regulation in terms of the provisions of paragraphs 2 to 4. Whenever a technical regulation is prepared, adopted or applied for one of the legitimate objectives explicitly mentioned in paragraph 2, and is in accordance with relevant international standards, it shall be rebuttably presumed not to create an unnecessary obstacle to international trade.

2.6 With a view to harmonizing technical regulations on as wide a basis as possible, Members shall play a full part, within the limits of their resources, in the preparation by appropriate international standardizing bodies of international standards for products for which they either have adopted, or expect to adopt, technical regulations.

2.7 Members shall give positive consideration to accepting as equivalent technical regulations of other Members, even if these regulations differ from their own, provided they are satisfied that these regulations adequately fulfil the objectives of their own regulations.

2.8 Wherever appropriate, Members shall specify technical regulations based on product requirements in terms of performance rather than design or descriptive characteristics.

2.9 Whenever a relevant international standard does not exist or the technical content of a proposed technical regulation is not in accordance with the technical content of relevant international standards, and if the technical regulation may have a significant effect on trade of other Members, Members shall:

2.9.1 publish a notice in a publication at an early appropriate stage, in such a manner as to enable interested parties in other Members to become acquainted with it, that they propose to introduce a particular technical regulation;

2.9.2 notify other Members through the Secretariat of the products to be covered by the proposed technical regulation, together with a brief indication of its objective and rationale. Such notifications shall take place at an early appropriate stage, when amendments can still be introduced and comments taken into account;

2.9.3 upon request, provide to other Members particulars or copies of the proposed technical regulation and, whenever possible, identify the parts which in substance deviate from relevant international standards;

2.9.4 without discrimination, allow reasonable time for other Members to make comments in writing, discuss these comments upon request, and take these written comments and the results of these discussions into account.

2.10 Subject to the provisions in the lead-in to paragraph 9, where urgent problems of safety, health, environmental protection or national security arise or threaten to arise for a Member, that Member may omit such of the steps enumerated in paragraph 9 as it finds necessary, provided that the Member, upon adoption of a technical regulation, shall:

2.10.1 notify immediately other Members through the Secretariat of the particular technical regulation and the products covered, with a brief indication of the objective and the rationale of the technical regulation, including the nature of the urgent problems;

2.10.2 upon request, provide other Members with copies of the technical regulation;

2.10.3 without discrimination, allow other Members to present their comments in writing, discuss these comments upon request, and take these written comments and the results of these discussions into account.

2.11 Members shall ensure that all technical regulations which have been adopted are published promptly

or otherwise made available in such a manner as to enable interested parties in other Members to become acquainted with them.

2.12 Except in those urgent circumstances referred to in paragraph 10, Members shall allow a reasonable interval between the publication of technical regulations and their entry into force in order to allow time for producers in exporting Members, and particularly in developing country Members, to adapt their products or methods of production to the requirements of the importing Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. Article 2.2

(a) Trade-restrictiveness

5. In *EC – Sardines*, the Panel decided to exercise judicial economy with regard to claims based on Article 2.2, but nonetheless included in its analysis under Article 2.4 some developments relating to the trade-restrictiveness of the measure at issue. The Appellate Body found that "the question whether the EC Regulation is trade-restrictive in nature could have been relevant to a legal analysis under Article 2.2 of the TBT Agreement." However, as the Panel had not made legal findings under Article 2.2, the Appellate Body declared that the relevant analysis on trade-restrictiveness did not have legal effect.[6]

2. Article 2.4

(a) Temporal application of Article 2.4

6. In *EC – Sardines*, the Appellate Body upheld the Panel's finding that Article 2.4 applies not only to the "preparation and adoption" of technical regulations, but also to the "application" of *existing* measures adopted *prior to* 1 January, 1995, such as the EC regulations that were adopted in June 1989 and have continued to exist. The Panel had observed, *inter alia*, that:

> "Article 2.4 of the TBT Agreement starts with the language 'where technical regulations are required'. We construe this expression to cover technical regulations that are already in existence as it is entirely possible that a technical regulation that is already in existence can continue to be required. . . . Moreover, we note that the first part of the sentence of Article 2.4 is in the present tense ('exist') and not in the past tense – '[w]here technical regulations are required and relevant international standards *exist or their completion is imminent*', Members are obliged to use such international standards as a basis. This supports the view that Members have to use relevant international standards that currently exist or whose completion is imminent with respect to the technical regulations that are already in existence. We do not consider that the word 'imminent', the ordinary meaning of which is 'likely to happen without delay', is intended to limit the scope of the coverage of technical regulations to those that have yet to be adopted. Rather, the use of the word 'imminent' means that Members cannot disregard a relevant international standard whose completion is imminent with respect to their existing technical regulations."[7]

7. In *EC – Sardines*, the Appellate Body concurred with the Panel's view on the applicability of Article 2.4 to existing technical regulations (see paragraph 6 above), and further noted:

> "[We] fail to see how the terms 'where technical regulations are required', 'exist', 'imminent', 'use', and 'as a basis for' give any indication that Article 2.4 applies only to the two stages of *preparation* and *adoption* of technical regulations. To the contrary, as the panel noted, the use of the present tense suggests a continuing obligation for existing measures, and not one limited to regulations prepared and adopted after the *TBT Agreement* entered into force. . . . The obligation refers to technical regulations generally and without limitations.
>
> . . .
>
> Like the sanitary measure in *EC – Hormones*, the EC Regulation concerned is currently in force. The European Communities has conceded that the EC regulation is an act or fact that has not 'ceased to exist'. Accordingly, following our reasoning in *EC – Hormones*, Article 2.4 of the *TBT Agreement* applies to existing measures unless that provision 'reveals a contrary intention'.
>
> Furthermore, like Articles 5.1 and 5.5 of the *SPS Agreement*, Article 2.4 is a 'central provision' of the *TBT Agreement*, and it cannot just be assumed that such a central provision does not apply to existing measures. Again, following our reasoning in *EC – Hormones*, we must conclude that, if the negotiators had wanted to exempt the very large group of existing technical regulations from the disciplines of a provision as important as Article 2.4 of the TBT Agreement, they would have said so explicitly."[8]

8. In *EC – Sardines*, the Appellate Body also agreed with the panel's analysis of Articles 2.5 and 2.6 as relevant context for Article 2.4, providing support for the argument that Article 2.4 regulates measures adopted before the TBT Agreement entered into force.[9] Finally, in the same case, the Appellate Body found further support for this conclusion in Article XVI:4 of the WTO Agreement and in the object and purpose of the TBT Agreement.[10]

[8] Appellate Body Report on *EC – Sardines*, paras. 205 and 207–208.
[9] Appellate Body Report on *EC – Sardines*, paras. 210–212. See also paras. 23–24 of this Chapter.
[10] Appellate Body Report on *EC – Sardines*, paras. 214–215.

(b) Burden of proof

9. In *EC – Sardines*, the Appellate Body reversed the Panel's ruling on the issue of the burden of proof under Article 2.4. The Appellate Body ruled that the burden of proof should be borne by the complaining Member seeking a ruling of inconsistency with Article 2.4.[11] Specifically, the Appellate Body stated that, as with Articles 3.1 and 3.3 of the SPS Agreement, there is no "general rule-exception" relationship between the first and the second parts of Article 2.4:[12]

> "There are strong conceptual similarities between, on the one hand, Article 2.4 of the *TBT Agreement* and, on the other hand, Articles 3.1 and 3.3 of the *SPS Agreement*, and our reasoning in *EC – Hormones* is equally apposite for this case. The heart of Article 3.1 of the *SPS Agreement* is a requirement that Members base their sanitary or phytosanitary measures on international standards, guidelines, or recommendations. Likewise, the heart of Article 2.4 of the *TBT Agreement* is a requirement that Members use international standards as a basis for their technical regulations. Neither of these requirements in these two agreements is absolute. Articles 3.1 and 3.3 of the *SPS Agreement* permit a Member to depart from an international standard if the Member seeks a level of protection higher than would be achieved by the international standard, the level of protection pursued is based on a proper risk assessment, and the international standard is not sufficient to achieve the level of protection pursued. Thus, under the *SPS Agreement*, departing from an international standard is permitted in circumstances where the international standard is ineffective to achieve the objective of the measure at issue. Likewise, under Article 2.4 of the *TBT Agreement*, a Member may depart from a relevant international standard when it would be an 'ineffective or inappropriate means for the fulfilment of the legitimate objectives pursued' by that Member through the technical regulation.
>
> . . . Similarly, the circumstances envisaged in the second part of Article 2.4 are excluded from the scope of application of the first part of Article 2.4. Accordingly, as with Articles 3.1 and 3.3 of the *SPS Agreement*, there is no 'general rule-exception' relationship between the first and the second parts of Article 2.4. Hence, in this case, it is for Peru – as the complaining Member seeking a ruling on the inconsistency with Article 2.4 of the *TBT Agreement* of the measure applied by the European Communities – to bear the burden of proving its claim. This burden includes establishing that Codex Stan 94 has not been used 'as a basis for' the EC Regulation, as well as establishing that Codex Stan 94 is effective and appropriate to fulfil the 'legitimate objectives' pursued by the European Communities through the EC Regulation."[13]

(c) Relevant international standard

(i) "international standard"

10. The Appellate Body on *EC – Sardines* upheld the Panel's conclusion that even if not adopted by consensus, an international standard can constitute a "relevant international standard".[14] The Appellate Body agreed with the following interpretation by the Panel of the last two sentences of the Explanatory note to the definition of the term "standard", as contained in Annex 1 paragraph 2:

> "The first sentence reiterates the norm of the international standardization community that standards are prepared on the basis of consensus. The following sentence, however, acknowledges that consensus may not always be achieved and that international standards that were not adopted by consensus are within the scope of the TBT Agreement.[15] This provision therefore confirms that even if not adopted by consensus, an international standard can constitute a relevant international standard."[16]

11. In *EC – Sardines*, the Appellate Body made the following observation on the issue of consensus in international standards:

> "[T]he text of the Explanatory note supports the conclusion that consensus is not required for standards adopted by the international standardizing community. The last sentence of the Explanatory note refers to 'documents'. The term 'document' is also used in the singular in the first sentence of the definition of a 'standard'. We believe that 'document(s)' must be interpreted as having the same meaning in both the definition and the Explanatory note. . . . Interpreted in this way, the term 'documents' in the last sentence of the Explanatory note must refer to standards *in general*, and not only to those adopted by entities *other than* international bodies . . .
>
> Moreover, the text of the last sentence of the Explanatory note, referring to documents not based on consensus, gives no indication whatsoever that it is departing

---

[11] Appellate Body Report on *EC – Sardines*, paras. 274–275.

[12] In *EC – Hormones*, the Panel had assigned the burden of showing that the measure there was justified under Article 3.3 to the respondent, reasoning that Article 3.3 provides an exception to the general obligation contained in Article 3.1. The Panel was of the view that it was the *defending* party that was asserting the *affirmative* of that particular defence. The Appellate Body reversed the panel's finding (see the Appellate Body Report on *EC – Hormones*, para. 104). See also Chapter on the *SPS Agreement*, Section IV.B.2(d).

[13] Appellate Body Report on *EC – Sardines*, paras. 274–275.

[14] Appellate Body Report on *EC – Sardines*, para. 227.

[15] (*footnote original*) The record does not demonstrate that Codex Stan 94 was not adopted by consensus. In any event, we consider that this issue would have no bearing on our determination in light of the explanatory note of paragraph 2 of Annex 1 of the TBT Agreement which states that the TBT Agreement covers "documents that are not based on consensus".

[16] Panel Report on *EC – Sardines*, para. 7.90 and footnote 86 thereto.

from the subject of the immediately preceding sentence, which deals with standards adopted by international bodies. Indeed, the use of the word 'also' in the last sentence suggests that the same subject is being addressed – namely standards prepared by the international standardization community. Hence, the logical assumption is that the last phrase is simply continuing in the same vein, and refers to standards adopted by international bodies, including those not adopted by consensus."[17]

12. In *EC – Sardines*, the Appellate Body also noted that the definition of "standard" in the ISO/IEC Guide includes a consensus requirement and that "the *omission* of a consensus requirement in the definition of a 'standard' in Annex 1.2 of the *TBT Agreement* was a deliberate choice on the part of the drafters of the *TBT Agreement*, and that the last two phrases of the Explanatory note were included to give effect to this choice".[18] In light of this, the Appellate Body upheld the Panel's conclusion that:

"[T]he definition of a 'standard' in Annex 1.2 to the *TBT Agreement* does not require approval by consensus for standards adopted by a 'recognized body' of the international standardization community. We emphasize, however, that this conclusion is relevant only for purposes of the *TBT Agreement*. It is not intended to affect, in any way, the internal requirements that international standard-setting bodies may establish for themselves for the adoption of standards within their respective operations. In other words, the fact that we find that the *TBT Agreement* does not require approval by consensus for standards adopted by the international standardization community should not be interpreted to mean that we believe an international standardization body should not require consensus for the adoption of its standards. That is not for us to decide."[19]

13. Also, on the notion of "standard", see below, the section on the definition of the term "standard" in Annex 1 (see paragraphs 63–64 below).

(ii) "relevant"

14. In *EC – Sardines*, the Appellate Body agreed with the Panel's statement that the ordinary meaning of the term "relevant" is "bearing upon or relating to the matter in hand; pertinent".[20] The Panel reasoned that, to be a "relevant international standard", the standard at issue in the dispute – Codex Stan 94 – would have to "bear upon, relate to, or be pertinent to the EC Regulation".[21] The Panel then noted the following about that standard:

"The title of Codex Stan 94 is 'Codex Standard for Canned Sardines and Sardine-type Products' and the EC Regulation lays down common marketing standards for preserved sardines. The European Communities indicated in its response that the term 'canned sardines' and 'preserved sardines' are essentially identical. Therefore, it is apparent that both the EC Regulation and Codex Stan 94 deal with the same product, namely preserved sardines. The scope of Codex Stan 94 covers various species of fish, including *Sardina pilchardus* which the EC Regulation covers, and includes, *inter alia*, provisions on presentation (Article 2.3), packing medium (Article 3.2), labelling, including a requirement that the packing medium is to form part of the name of the food (Article 6), determination of net weight (Article 7.3), foreign matter (Article 8.1) and odour and flavour (Article 8.2). The EC Regulation contains these corresponding provisions set out in Codex Stan 94, including the section on labelling requirement."[22]

15. In *EC – Sardines*, the Appellate Body upheld the Panel's finding that Codex Stan 94 is a "relevant international standard" under Article 2.4.[23] The Appellate Body disagreed with the European Communities' argument that the EC Regulation dealt only with preserved sardines – understood to mean exclusively preserved Sardina pilchardus – while Codex Stan 94 also covered other species of fish that are "sardine-type":

"We are not persuaded by this argument. First, even if we accepted that the EC Regulation relates only to preserved *Sardina pilchardus*, which we do not, the fact remains that section 6.1.1(i) of Codex Stan 94 also relates to preserved *Sardina pilchardus*. Therefore, Codex Stan 94 can be said to bear upon, relate to, or be pertinent to the EC Regulation because both refer to preserved *Sardina pilchardus*.

Second, we have already concluded that, although the EC Regulation expressly mentions only *Sardina pilchardus*, it has legal consequences for other fish species that could be sold as preserved sardines, including preserved *Sardinops sagax*. Codex Stan 94 covers 20 fish species in addition to *Sardina pilchardus*. These other species also are legally affected by the exclusion in the EC Regulation. Therefore, we conclude that Codex Stan 94 bears upon, relates to, or is pertinent to the EC Regulation."[24]

(d) use . . . "as a basis for"

16. In *EC – Sardines*, the Appellate Body agreed with the panel that an international standard is used "as a basis for" a technical regulation "when it is used as the

[17] Appellate Body Report on *EC – Sardines*, paras. 222–223.
[18] Appellate Body Report on *EC – Sardines*, paras. 222–223. In this respect, see also paras. 63–64 of this Chapter.
[19] Appellate Body Report on *EC – Sardines*, para. 227.
[20] Panel Report on *EC – Sardines*, para. 7.68, quoting *Webster's New World Dictionary* (William Collins & World Publishing Co., Inc. 1976), p. 1199.
[21] Panel Report on *EC – Sardines*, para. 7.68.
[22] Panel Report on *EC – Sardines*, para. 7.69.
[23] Appellate Body Report on *EC – Sardines*, para. 233.
[24] Appellate Body Report on *EC – Sardines*, para. 232.

principal constituent or fundamental principle for the purpose of enacting the technical regulation".[25] The Appellate Body cited certain definitions of the term "basis", and concluded that:

> "From these various definitions, we would highlight the similar terms 'principal constituent', 'fundamental principle', 'main constituent', and 'determining principle' – all of which lend credence to the conclusion that there must be a very strong and very close relationship between two things in order to be able to say that one is 'the basis for' the other."[26]

17. In *EC – Sardines*, in its analysis of the terms "as a basis for", the Appellate Body considered its approach to the interpretation of the term "based on" in the context of Article 3.1 of the *SPS Agreement* as being relevant for the interpretation of Article 2.4.[27] However, it did not consider it necessary to decide in that case whether the term "as a basis", in the context of Article 2.4 of the *TBT Agreement*, has the same meaning as the term "based on", in the context of Article 3.1 of the *SPS Agreement*.[28]

18. In *EC – Sardines*, the Appellate Body rejected the European Communities' argument that a "rational relationship" between an international standard and a technical regulation is sufficient to conclude that the former is used "as a basis for" the latter:

> "[W]e see nothing in the text of Article 2.4 to support the European Communities' view, nor has the European Communities pointed to any such support. Moreover, the European Communities does not offer any arguments relating to the context or the object and purpose of that provision that would support its argument that the existence of a 'rational relationship' is the appropriate criterion for determining whether something has been used 'as a basis for' something else.
>
> We see no need here to define in general the nature of the relationship that must exist for an international standard to serve 'as a basis for' a technical regulation. Here we need only examine this measure to determine if it fulfils this obligation. In our view, it can certainly be said – at a minimum – that something cannot be considered a 'basis' for something else if the two are *contradictory*. Therefore, under Article 2.4, if the technical regulation and the international standard *contradict* each other, it cannot properly be concluded that the international standard has been used 'as a basis for' the technical regulation."[29]

19. With regard to the requirement in Article 2.4 that Members use relevant international standards "or the relevant parts of them" as a basis for their technical regulations, the Appellate Body observed in *EC – Sardines*:

> "In our view, the phrase '*relevant parts of them*' defines the appropriate focus of an analysis to determine whether a relevant international standard has been used 'as a basis for' a technical regulation. In other words, the examination must be limited to those parts of the relevant international standards that relate to the subject-matter of the challenged prescriptions or requirements. In addition, the examination must be broad enough to address all of those relevant parts; the regulating Member is not permitted to select only *some* of the 'relevant parts' of an international standard. If a part is relevant, then it must be one of the elements which is a basis for the technical regulation."[30]

(e) "ineffective or inappropriate means" of fulfilment of "legitimate objectives"

(i) "ineffective or inappropriate means"

20. The Appellate Body on *EC – Sardines* upheld the Panel's statement regarding "ineffective or inappropriate means". The Panel pointed out that the term "ineffective" "refers to something that does not 'hav[e] the function of accomplishing', 'having a result', or 'brought to bear', whereas [the term] 'inappropriate' refers to something which is not 'specially suitable', 'proper', or 'fitting'":

> "Thus, in the context of Article 2.4, an ineffective means is a means which does not have the function of accomplishing the legitimate objective pursued, whereas an inappropriate means is a means which is not specially suitable for the fulfilment of the legitimate objective pursued. An inappropriate means will not necessarily be an ineffective means and vice versa. That is, whereas it may not be *specially suitable* for the fulfilment of the legitimate objective, an inappropriate means may nevertheless be *effective* in fulfilling that objective, despite its 'unsuitability'. Conversely, when a relevant international standard is found to be an effective means, it does not automatically follow that it is also an appropriate means. The question of effectiveness bears upon the *results* of the means employed, whereas the question of appropriateness relates more to the *nature* of the means employed."[31]

21. In addition, the Appellate Body, in *EC – Sardines*, shared the Panel's view that the terms "ineffective" and "inappropriate" have different meanings, and "that it is conceptually possible that a measure could be effective but inappropriate, or appropriate but ineffective."[32]

[32] Panel Report on *EC – Sardines*, para. 7.116, and Appellate Body Report on *EC – Sardines*, para. 289.

(ii) "legitimate objectives pursued"

22. In *EC – Sardines*, the Appellate Body agreed with the Panel's interpretation of the meaning of the phrase "legitimate objectives pursued". The Panel stated that the "'legitimate objectives' referred to in Article 2.4 must be interpreted in the context of Article 2.2", which provides an illustrative, open list of objectives considered "legitimate".[33] Also, the Panel indicated that Article 2.4 of the *TBT Agreement* requires an examination and a determination whether the objectives of the measure at issue are "legitimate".[34] The Appellate Body further concurred with the panel in concluding that "the 'legitimate objectives' referred to in Article 2.4 must be interpreted in the context of Article 2.2"[35], which refers also to "legitimate objectives", and includes a description of what the nature of some such objectives can be:

> "Two implications flow from the Panel's interpretation. First, the term 'legitimate objectives' in Article 2.4, as the Panel concluded, must cover the objectives explicitly mentioned in Article 2.2, namely: 'national security requirements; the prevention of deceptive practices; protection of human health or safety, animal or plant life or health, or the environment.' Second, given the use of the term '*inter alia*' in Article 2.2, the objectives covered by the term 'legitimate objectives' in Article 2.4 extend beyond the list of the objectives specifically mentioned in Article 2.2. Furthermore, we share the view of the Panel that the second part of Article 2.4 implies that there must be an examination and a determination on the legitimacy of the objectives of the measure."[36]

3. Article 2.5

23. In *EC – Sardines*, the Panel, in a reasoning supported by the Appellate Body, referred to Article 2.5, as contextual support for its conclusion that Article 2.4 applies to existing technical regulations:

> "There is contextual support for the interpretation that Article 2.4 applies to technical regulations that are already in existence. The context provided by Article 2.5, which explicitly refers to Article 2.4, speaks of 'preparing, adopting or *applying*' a technical regulation and is not limited to, as the European Communities claims, to preparing and adopting. A technical regulation can only be applied if it is already in existence. The first sentence imposes an obligation on a Member 'preparing, adopting or applying' a technical regulation that may have a significant effect on trade of other Members to provide the justification for that technical regulation. The second sentence of Article 2.5 states that whenever a technical regulation is 'prepared, adopted or *applied*' for one of the legitimate objectives explicitly set out in Article 2.2 and is in accordance with relevant international standards, it is to be rebuttably presumed not to create an unnecessary obstacle to trade. The use of the term 'apply', in our view, confirms that the requirement contained in Article 2.4 is applicable to existing technical regulations."[37]

4. Article 2.6

24. In *EC – Sardines*, the Panel, in a reasoning confirmed by the Appellate Body, referred to Article 2.6 as providing contextual support for its conclusion that Article 2.4 applied to existing technical regulations:

> "Article 2.6 provides another contextual support. It states that Members are to participate in preparing international standards by the international standardizing bodies for products which they have either '*adopted*, or expect to adopt technical regulations.' Those Members that have in place a technical regulation for a certain product are expected to participate in the development of a relevant international standard. Article 2.6 would be redundant and it would be contrary to the principle of effectiveness, which is a corollary of the general rule of interpretation in the Vienna Convention, if a Member is to participate in the development of a relevant international standard and then claim that such standard need not be used as a basis for its technical regulation on the ground that it was already in existence before the standard was adopted. Such reasoning would allow Members to avoid using international standards as a basis for their technical regulations simply by enacting preemptive measures and thereby undermine the object and purpose of developing international standards."[38]

25. See also the Decision of the TBT Committee on principles for the development of international standards, guides and recommendations with relation to Articles 2, 5 and Annex 3 of the Agreement.[39]

5. Article 2.9

26. The TBT Committee has adopted a number of recommendations and decisions concerning notification procedures for draft technical regulations and conformity assessment procedures, as described hereafter.[40]

(a) Notification format and guidelines

27. The procedures for notification under the Agreement have been kept under constant review by the Committee. In order to ensure a uniform and efficient operation of these procedures the Committee agreed on a format and guidelines for notifications.[41]

[40] The text of these recommendations and decisions is contained in G/TBT/1/Rev.8, p. 11.
[41] The text of the relevant recommendations and decisions is contained in G/TBT/1/Rev.8, pp. 11–14.

(b) Decision relating to notifications – labelling requirements

28. With the purpose of clarifying the coverage of the Agreement with respect to labelling requirements, the TBT Committee took the following decision:

> "In conformity with Article 2.9 of the Agreement, Members are obliged to notify all mandatory labelling requirements that are not based substantially on a relevant international standard and that may have a significant effect on the trade of other Members. That obligation is not dependent upon the kind of information which is provided on the label, whether it is in the nature of a technical specification or not."[42]

(c) Timing of notifications

29. The TBT Committee issued the following recommendation with respect to the timing of notifications:

> "When implementing the provisions of Articles 2.9.2, 3.2 (in relation to Article 2.9.2), 5.6.2 and 7.2 (in relation to Article 5.6.2), a notification should be made when a draft with the complete text of a proposed technical regulation or procedures for assessment of conformity is available and when amendments can still be introduced and taken into account."[43]

(d) Application of Articles 2.9 and 5.6 (Preambular part)

30. With a view to ensuring a consistent approach to the selection of proposed technical regulations and procedures for assessment of conformity to be notified, the TBT Committee established the following criteria in order to define the term "significant effect on trade of other Members":

> "For the purposes of Articles 2.9 and 5.6, the concept of 'significant effect on trade of other Members' may refer to the effect on trade:
>
> (a) Of one technical regulation or procedure for assessment of conformity only, or of various technical regulations or procedures for assessment of conformity in combination;
>
> (b) in a specific product, group of products or products in general; and
>
> (c) between two or more Members.
>
> When assessing the significance of the effect on trade of technical regulations, the Member concerned should take into consideration such elements as the value or other importance of imports in respect of the importing and/or exporting Members concerned, whether from other Members individually or collectively, the potential growth of such imports, and difficulties for producers in other Members to comply with the proposed technical regulations. The concept of a significant effect on trade of other Members should include both import-enhancing and import-reducing effects on the trade of other Members, as long as such effects are significant."[44]

(e) Translation of documents relating to notifications and address of body supplying the documents

31. The TBT Committee also agreed on certain procedures designed to address the difficulties that can arise due to the fact that the documentation relevant to technical regulations, standards and procedures for assessment of conformity is not available in one of the WTO working languages and that a body other than the enquiry point may be responsible for such documentation.[45]

(f) Processing of requests for documentation

32. The TBT Committee addressed the problems of supplying and obtaining requested documentation on notified technical regulations and procedures for assessment of conformity and endorsed the electronic processing of such requests.[46]

(g) Length of time allowed for comments

33. The TBT Committee set the following time-limits for presentation of comments on notified technical regulations and procedures for assessment of conformity:

> "The normal time limit for comments on notifications should be 60 days. Any Member which is able to provide a time limit beyond 60 days, such as 90 days, is encouraged to do so and should indicate this in the notification."[47]

(h) Handling of comments on notifications

34. In order to improve the handling of comments on proposed technical regulations and procedures for assessment of conformity submitted under Articles 2.9.4, 2.10.3, 3.1 (in relation to 2.9.4 and 2.10.3), 5.6.4, 5.7.3 and 7.1 (in relation to 5.6.4 and 5.7.3) of the *TBT Agreement*, the TBT Committee agreed on the following procedures.

> "(a) Each Member should notify the WTO secretariat of the authority or agency (e.g. its enquiry point) which it has designated to be in charge for handling of comments received; and
>
> (b) a Member receiving comments through the designated body should without further request
>
> (i) acknowledge the receipt of such comments,
>
> (ii) explain within a reasonable time to any Member from which it has received comments,

[42] G/TBT/1/Rev.8, p. 18.
[43] G/TBT/1/Rev.8, p. 15.
[44] G/TBT/1/Rev.8, p. 15.
[45] G/TBT/1/Rev.8, p. 16.
[46] G/TBT/1/Rev.8, pp. 15–16.
[47] G/TBT/1/Rev.8, p. 17.

how it will proceed in order to take these comments into account and, where appropriate, provide additional relevant information on the proposed technical regulations or procedures for assessment of conformity concerned, and

(iii) provide to any Member from which it has received comments, a copy of the corresponding technical regulations or procedures for assessment of conformity as adopted or information that no corresponding technical regulations or procedures for assessment of conformity will be adopted for the time being."[48]

(i) Monthly listing of notifications issued

35. With a view to providing a brief indication of the notifications issued, the TBT Committee agreed that the Secretariat be requested to prepare a monthly table of notifications issued, indicating the notification numbers, notifying Members, Articles notified under, products covered, objectives and final dates for comments.[49]

(j) Enhancement of electronic transmission of information

36. In order to facilitate access to information by Members, as well as to strengthen the notification process, including the time needed for the publication and circulation of notification by the Secretariat, the TBT Committee agreed that electronic transmission of information was the preferred method of filing notifications.[50]

6. Article 2.12

37. At its meeting of 15 March 2002, the Committee took note of the Ministerial Decision (made at the Ministerial Conference of 14 November 2001) regarding the implementation of Article 2.12 of the Agreement:

"Subject to the conditions specified in paragraph 12 of Article 2 of the Agreement on Technical Barriers to Trade, the phrase 'reasonable interval' shall be understood to mean normally a period of not less than 6 months, except when this would be ineffective in fulfilling the legitimate objectives pursued."[51]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Preparation, Adoption and Application of Technical Regulations by Local Government Bodies and Non-Governmental Bodies

With respect to their local government and non-governmental bodies within their territories:

3.1 Members shall take such reasonable measures as may be available to them to ensure compliance by such bodies with the provisions of Article 2, with the exception of the obligation to notify as referred to in paragraphs 9.2 and 10.1 of Article 2.

3.2 Members shall ensure that the technical regulations of local governments on the level directly below that of the central government in Members are notified in accordance with the provisions of paragraphs 9.2 and 10.1 of Article 2, noting that notification shall not be required for technical regulations the technical content of which is substantially the same as that of previously notified technical regulations of central government bodies of the Member concerned.

3.3 Members may require contact with other Members, including the notifications, provision of information, comments and discussions referred to in paragraphs 9 and 10 of Article 2, to take place through the central government.

3.4 Members shall not take measures which require or encourage local government bodies or non-governmental bodies within their territories to act in a manner inconsistent with the provisions of Article 2.

3.5 Members are fully responsible under this Agreement for the observance of all provisions of Article 2. Members shall formulate and implement positive measures and mechanisms in support of the observance of the provisions of Article 2 by other than central government bodies.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

No jurisprudence or decision of a competent WTO body.

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Preparation, Adoption and Application of Standards

4.1 Members shall ensure that their central government standardizing bodies accept and comply with the Code of Good Practice for the Preparation, Adoption and Application of Standards in Annex 3[52] to this Agreement (referred to in this Agreement as the "Code of Good Practice"). They shall take such reasonable measures as may be available to them to ensure that local government and non-

[48] G/TBT/1/Rev.8, p. 17.
[49] G/TBT/1/Rev.8, pp. 17–18.
[50] G/TBT/1/Rev.8, p. 18.
[51] G/TBT/1/Rev.8, p. 30.
[52] In connection with the Code of Good Practice for the Preparation, Adoption and Application of Standards, the Marrakesh Ministerial Conference adopted two decisions on 15 December 1994. See Sections XVII and XXI.

governmental standardizing bodies within their territories, as well as regional standardizing bodies of which they or one or more bodies within their territories are members, accept and comply with this Code of Good Practice. In addition, Members shall not take measures which have the effect of, directly or indirectly, requiring or encouraging such standardizing bodies to act in a manner inconsistent with the Code of Good Practice. The obligations of Members with respect to compliance of standardizing bodies with the provisions of the Code of Good Practice shall apply irrespective of whether or not a standardizing body has accepted the Code of Good Practice.

4.2 Standardizing bodies that have accepted and are complying with the Code of Good Practice shall be acknowledged by the Members as complying with the principles of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

38. The TBT Committee adopted a decision in respect of the principles to be observed, when international standards, guidelines and recommendations (as mentioned under Articles 2, 5 and Annex 3 of the *TBT Agreement*) are developed, so as to take account of, *inter alia*, transparency, openness, impartiality and consensus, and to ensure that the concerns of developing countries are considered.[53]

39. The TBT Committee also decided, in order to keep abreast of the activities of regional standardizing bodies and systems for conformity assessment, that representatives of such bodies and systems may be invited to address the Committee on their procedures and how they relate to those embodied in the Agreement, on the basis of agreed lists of questions.[54]

40. See also the Section on Annex 3 (paragraph 67 below).

CONFORMITY WITH TECHNICAL REGULATIONS AND STANDARDS

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Procedures for Assessment of Conformity by Central Government Bodies

5.1 Members shall ensure that, in cases where a positive assurance of conformity with technical regulations or standards is required, their central government bodies apply the following provisions to products originating in the territories of other Members:

5.1.1 conformity assessment procedures are prepared, adopted and applied so as to grant access for suppliers of like products originating in the territories of other Members under conditions no less favourable than those accorded to suppliers of like products of national origin or originating in any other country, in a comparable situation; access entails suppliers' right to an assessment of conformity under the rules of the procedure, including, when foreseen by this procedure, the possibility to have conformity assessment activities undertaken at the site of facilities and to receive the mark of the system;

5.1.2 conformity assessment procedures are not prepared, adopted or applied with a view to or with the effect of creating unnecessary obstacles to international trade. This means, *inter alia*, that conformity assessment procedures shall not be more strict or be applied more strictly than is necessary to give the importing Member adequate confidence that products conform with the applicable technical regulations or standards, taking account of the risks non-conformity would create.

5.2 When implementing the provisions of paragraph 1, Members shall ensure that:

5.2.1 conformity assessment procedures are undertaken and completed as expeditiously as possible and in a no less favourable order for products originating in the territories of other Members than for like domestic products;

5.2.2 the standard processing period of each conformity assessment procedure is published or that the anticipated processing period is communicated to the applicant upon request; when receiving an application, the competent body promptly examines the completeness of the documentation and informs the applicant in a precise and complete manner of all deficiencies; the competent body transmits as soon as possible the results of the assessment in a precise and complete manner to the applicant so that corrective action may be taken if necessary; even when the application has deficiencies, the competent body proceeds as far as practicable with the conformity assessment if the applicant so requests; and that, upon request, the applicant is informed of the stage of the procedure, with any delay being explained;

[53] See G/TBT/1/Rev.8, pp. 26–29.
[54] See G/TBT/1/Rev.8, p. 23.

5.2.3 information requirements are limited to what is necessary to assess conformity and determine fees;

5.2.4 the confidentiality of information about products originating in the territories of other Members arising from or supplied in connection with such conformity assessment procedures is respected in the same way as for domestic products and in such a manner that legitimate commercial interests are protected;

5.2.5 any fees imposed for assessing the conformity of products originating in the territories of other Members are equitable in relation to any fees chargeable for assessing the conformity of like products of national origin or originating in any other country, taking into account communication, transportation and other costs arising from differences between location of facilities of the applicant and the conformity assessment body;

5.2.6 the siting of facilities used in conformity assessment procedures and the selection of samples are not such as to cause unnecessary inconvenience to applicants or their agents;

5.2.7 whenever specifications of a product are changed subsequent to the determination of its conformity to the applicable technical regulations or standards, the conformity assessment procedure for the modified product is limited to what is necessary to determine whether adequate confidence exists that the product still meets the technical regulations or standards concerned;

5.2.8 a procedure exists to review complaints concerning the operation of a conformity assessment procedure and to take corrective action when a complaint is justified.

5.3 Nothing in paragraphs 1 and 2 shall prevent Members from carrying out reasonable spot checks within their territories.

5.4 In cases where a positive assurance is required that products conform with technical regulations or standards, and relevant guides or recommendations issued by international standardizing bodies exist or their completion is imminent, Members shall ensure that central government bodies use them, or the relevant parts of them, as a basis for their conformity assessment procedures, except where, as duly explained upon request, such guides or recommendations or relevant parts are inappropriate for the Members concerned, for, *inter alia*, such reasons as: national security requirements; the prevention of deceptive practices; protection of human health or safety, animal or plant life or health, or the environment; fundamental climatic or other geographical factors; fundamental technological or infrastructural problems.

5.5 With a view to harmonizing conformity assessment procedures on as wide a basis as possible, Members shall play a full part, within the limits of their resources, in the preparation by appropriate international standardizing bodies of guides and recommendations for conformity assessment procedures.

5.6 Whenever a relevant guide or recommendation issued by an international standardizing body does not exist or the technical content of a proposed conformity assessment procedure is not in accordance with relevant guides and recommendations issued by international standardizing bodies, and if the conformity assessment procedure may have a significant effect on trade of other Members, Members shall:

5.6.1 publish a notice in a publication at an early appropriate stage, in such a manner as to enable interested parties in other Members to become acquainted with it, that they propose to introduce a particular conformity assessment procedure;

5.6.2 notify other Members through the Secretariat of the products to be covered by the proposed conformity assessment procedure, together with a brief indication of its objective and rationale. Such notifications shall take place at an early appropriate stage, when amendments can still be introduced and comments taken into account;

5.6.3 upon request, provide to other Members particulars or copies of the proposed procedure and, whenever possible, identify the parts which in substance deviate from relevant guides or recommendations issued by international standardizing bodies;

5.6.4 without discrimination, allow reasonable time for other Members to make comments in writing, discuss these comments upon request, and take these written comments and the results of these discussions into account.

5.7 Subject to the provisions in the lead-in to paragraph 6, where urgent problems of safety, health, environmental protection or national security arise or threaten to arise for a Member, that Member may omit such of the steps enumerated in paragraph 6 as it finds necessary, provided that the Member, upon adoption of the procedure, shall:

5.7.1 notify immediately other Members through the Secretariat of the particular procedure and the products covered, with a brief indication of the objective and the rationale of the procedure, including the nature of the urgent problems;

5.7.2 upon request, provide other Members with copies of the rules of the procedure;

5.7.3 without discrimination, allow other Members to present their comments in writing, discuss these comments upon request, and take these written comments and the results of these discussions into account.

5.8 Members shall ensure that all conformity assessment procedures which have been adopted are published promptly or otherwise made available in such a manner as to enable interested parties in other Members to become acquainted with them.

5.9 Except in those urgent circumstances referred to in paragraph 7, Members shall allow a reasonable interval between the publication of requirements concerning conformity assessment procedures and their entry into force in order to allow time for producers in exporting Members, and particularly in developing country Members, to adapt their products or methods of production to the requirements of the importing Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. General

(a) Technical Working Group

41. At its meeting of 16 and 22 October 1996, the TBT Committee agreed to establish a Technical Working Group to study certain ISO/IEC Guides on conformity assessment procedures and how they might contribute to furthering the objectives of Articles 5 and 6 of the *TBT Agreement*.[55]

2. Article 5.5 and 5.6

42. The TBT Committee adopted a decision in respect of the principles to be observed, when international standards, guidelines and recommendations (as mentioned under Articles 2, 5 and Annex 3 of the *TBT Agreement*) are developed, so as to ensure transparency, openness, impartiality and consensus, effectiveness and relevance, coherence, and to take account of the concerns of developing countries.[56]

3. Article 5.6

43. With reference to the notification of draft conformity assessment procedures, see the recommendations and decisions adopted by the TBT Committee, as described in paragraphs 26–36 above.[57] See in particular the recommendation concerning the application of Articles 2.9 and 5.6 (preambular part).[58]

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6

Recognition of Conformity Assessment by Central Government Bodies

With respect to their central government bodies:

6.1 Without prejudice to the provisions of paragraphs 3 and 4, Members shall ensure, whenever possible, that results of conformity assessment procedures in other Members are accepted, even when those procedures differ from their own, provided they are satisfied that those procedures offer an assurance of conformity with applicable technical regulations or standards equivalent to their own procedures. It is recognized that prior consultations may be necessary in order to arrive at a mutually satisfactory understanding regarding, in particular:

6.1.1 adequate and enduring technical competence of the relevant conformity assessment bodies in the exporting Member, so that confidence in the continued reliability of their conformity assessment results can exist; in this regard, verified compliance, for instance through accreditation, with relevant guides or recommendations issued by international standardizing bodies shall be taken into account as an indication of adequate technical competence;

6.1.2 limitation of the acceptance of conformity assessment results to those produced by designated bodies in the exporting Member.

6.2 Members shall ensure that their conformity assessment procedures permit, as far as practicable, the implementation of the provisions in paragraph 1.

6.3 Members are encouraged, at the request of other Members, to be willing to enter into negotiations for the conclusion of agreements for the mutual recognition of results of each other's conformity assessment procedures. Members may require that such agreements fulfil the criteria of paragraph 1 and give mutual satisfaction regarding their potential for facilitating trade in the products concerned.

6.4 Members are encouraged to permit participation of conformity assessment bodies located in the territories

[55] G/TBT/M/6, para. 8.
[56] See G/TBT/1/Rev.8, pp. 26–29.
[57] See G/TBT/1/Rev.8, pp. 11–18.
[58] See G/TBT/1/Rev.8, p. 15.

of other Members in their conformity assessment procedures under conditions no less favourable than those accorded to bodies located within their territory or the territory of any other country.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

No jurisprudence or decision of a competent WTO body.

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Procedures for Assessment of Conformity by Local Government Bodies

With respect to their local government bodies within their territories:

7.1 Members shall take such reasonable measures as may be available to them to ensure compliance by such bodies with the provisions of Articles 5 and 6, with the exception of the obligation to notify as referred to in paragraphs 6.2 and 7.1 of Article 5.

7.2 Members shall ensure that the conformity assessment procedures of local governments on the level directly below that of the central government in Members are notified in accordance with the provisions of paragraphs 6.2 and 7.1 of Article 5, noting that notifications shall not be required for conformity assessment procedures the technical content of which is substantially the same as that of previously notified conformity assessment procedures of central government bodies of the Members concerned.

7.3 Members may require contact with other Members, including the notifications, provision of information, comments and discussions referred to in paragraphs 6 and 7 of Article 5, to take place through the central government.

7.4 Members shall not take measures which require or encourage local government bodies within their territories to act in a manner inconsistent with the provisions of Articles 5 and 6.

7.5 Members are fully responsible under this Agreement for the observance of all provisions of Articles 5 and 6. Members shall formulate and implement positive measures and mechanisms in support of the observance of the provisions of Articles 5 and 6 by other than central government bodies.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Procedures for Assessment of Conformity by Non-Governmental Bodies

8.1 Members shall take such reasonable measures as may be available to them to ensure that non-governmental bodies within their territories which operate conformity assessment procedures comply with the provisions of Articles 5 and 6, with the exception of the obligation to notify proposed conformity assessment procedures. In addition, Members shall not take measures which have the effect of, directly or indirectly, requiring or encouraging such bodies to act in a manner inconsistent with the provisions of Articles 5 and 6.

8.2 Members shall ensure that their central government bodies rely on conformity assessment procedures operated by non-governmental bodies only if these latter bodies comply with the provisions of Articles 5 and 6, with the exception of the obligation to notify proposed conformity assessment procedures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

No jurisprudence or decision of a competent WTO body.

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
International and Regional Systems

9.1 Where a positive assurance of conformity with a technical regulation or standard is required, Members shall, wherever practicable, formulate and adopt international systems for conformity assessment and become members thereof or participate therein.

9.2 Members shall take such reasonable measures as may be available to them to ensure that international and regional systems for conformity assessment in which relevant bodies within their territories are members or participants comply with the provisions of Articles 5 and 6. In addition, Members shall not take any measures which have the effect of, directly or indirectly, requiring or encouraging such systems to act in a manner inconsistent with any of the provisions of Articles 5 and 6.

9.3 Members shall ensure that their central government bodies rely on international or regional conformity assessment systems only to the extent that these systems comply with the provisions of Articles 5 and 6, as applicable.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

No jurisprudence or decision of a competent WTO body.

INFORMATION AND ASSISTANCE

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Information About Technical Regulations, Standards and Conformity Assessment Procedures

10.1 Each Member shall ensure that an enquiry point exists which is able to answer all reasonable enquiries from other Members and interested parties in other Members as well as to provide the relevant documents regarding:

10.1.1 any technical regulations adopted or proposed within its territory by central or local government bodies, by non-governmental bodies which have legal power to enforce a technical regulation, or by regional standardizing bodies of which such bodies are members or participants;

10.1.2 any standards adopted or proposed within its territory by central or local government bodies, or by regional standardizing bodies of which such bodies are members or participants;

10.1.3 any conformity assessment procedures, or proposed conformity assessment procedures, which are operated within its territory by central or local government bodies, or by non-governmental bodies which have legal power to enforce a technical regulation, or by regional bodies of which such bodies are members or participants;

10.1.4 the membership and participation of the Member, or of relevant central or local government bodies within its territory, in international and regional standardizing bodies and conformity assessment systems, as well as in bilateral and multilateral arrangements within the scope of this Agreement; it shall also be able to provide reasonable information on the provisions of such systems and arrangements;

10.1.5 the location of notices published pursuant to this Agreement, or the provision of information as to where such information can be obtained; and

10.1.6 the location of the enquiry points mentioned in paragraph 3.

10.2 If, however, for legal or administrative reasons more than one enquiry point is established by a Member, that Member shall provide to the other Members complete and unambiguous information on the scope of responsibility of each of these enquiry points. In addition, that Member shall ensure that any enquiries addressed to an incorrect enquiry point shall promptly be conveyed to the correct enquiry point.

10.3 Each Member shall take such reasonable measures as may be available to it to ensure that one or more enquiry points exist which are able to answer all reasonable enquiries from other Members and interested parties in other Members as well as to provide the relevant documents or information as to where they can be obtained regarding:

10.3.1 any standards adopted or proposed within its territory by non-governmental standardizing bodies, or by regional standardizing bodies of which such bodies are members or participants; and

10.3.2 any conformity assessment procedures, or proposed conformity assessment procedures, which are operated within its territory by non-governmental bodies, or by regional bodies of which such bodies are members or participants;

10.3.3 the membership and participation of relevant non-governmental bodies within its territory in international and regional standardizing bodies and conformity assessment systems, as well as in bilateral and multilateral arrangements within the scope of this Agreement; they shall also be able to provide reasonable information on the provisions of such systems and arrangements.

10.4 Members shall take such reasonable measures as may be available to them to ensure that where copies of documents are requested by other Members or by interested parties in other Members, in accordance with the provisions of this Agreement, they are supplied at an equitable price (if any) which shall, apart from the real cost of delivery, be the same for the nationals[1] of the Member concerned or of any other Member.

(*footnote original*) [1] "Nationals" here shall be deemed, in the case of a separate customs territory Member of the WTO, to mean persons, natural or legal, who are domiciled or who have a real and effective industrial or commercial establishment in that customs territory.

10.5 Developed country Members shall, if requested by other Members, provide, in English, French or Spanish, translations of the documents covered by a specific notification or, in case of voluminous documents, of summaries of such documents.

10.6 The Secretariat shall, when it receives notifications in accordance with the provisions of this Agreement, circulate copies of the notifications to all Members and interested international standardizing and conformity assessment bodies, and draw the attention of developing country Members to any notifications relating to products of particular interest to them.

10.7 Whenever a Member has reached an agreement with any other country or countries on issues related to technical regulations, standards or conformity assessment procedures which may have a significant effect on trade, at least one Member party to the agreement shall notify other Members through the Secretariat of the products to be covered by the agreement and include a brief description of the agreement. Members concerned are encouraged to enter, upon request, into consultations with other Members for the purposes of concluding similar agreements or of arranging for their participation in such agreements.

10.8 Nothing in this Agreement shall be construed as requiring:

10.8.1 the publication of texts other than in the language of the Member;

10.8.2 the provision of particulars or copies of drafts other than in the language of the Member except as stated in paragraph 5; or

10.8.3 Members to furnish any information, the disclosure of which they consider contrary to their essential security interests.

10.9 Notifications to the Secretariat shall be in English, French or Spanish.

10.10 Members shall designate a single central government authority that is responsible for the implementation on the national level of the provisions concerning notification procedures under this Agreement except those included in Annex 3.

10.11 If, however, for legal or administrative reasons the responsibility for notification procedures is divided among two or more central government authorities, the Member concerned shall provide to the other Members complete and unambiguous information on the scope of responsibility of each of these authorities.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. General

44. At its meeting of 21 April 1995, the TBT Committee decided on the modalities for regular meetings of persons responsible for information exchange.[59]

2. Article 10.1 and 10.3

(a) "enquiry points"

45. At its meeting of 14 July 1995, and with a view to encouraging the uniform application of Articles 10.1 and 10.3, the TBT Committee adopted the following recommendations:

"(a) (i) An enquiry should be considered 'reasonable' when it is limited to a specific product, or group of products, but not when it goes beyond that and refers to an entire business branch or field of regulations, or procedures for assessment of conformity; and

(ii) when an enquiry refers to a composite product, it is desirable that the parts or components, for which information is sought, are defined to the extent possible. When a request is made concerning the use of a product it is desirable that the use is related to a specific field.

(b) The Enquiry Point(s) of a Member should be prepared to answer enquiries regarding the membership and participation of that Member, or of relevant bodies within its territory, in international and regional standardizing bodies and conformity assessment systems as well as in bilateral arrangements, with respect to a specific product or group of products. They should likewise be prepared to provide reasonable information on the provisions of such systems and arrangement."[60]

46. At its meeting of 14 July 1995, with respect to the handling of requests received under Article 10.1 and 10.3, the TBT Committee adopted the recommendation that an enquiry point should, without further request, acknowledge the receipt of the enquiry.[61]

47. See also the recommendations of the TBT Committee concerning booklets on enquiry points and the List of Enquiry Points prepared by the Secretariat.[62]

3. Article 10.5

48. See the recommendation and decisions of the TBT Committee concerning translation of documents relating to notifications, referenced in paragraph 31 above.[63]

4. Article 10.7

49. The TBT Committee agreed on a notification format concerning agreements reached by a member

[59] The text of the decision is contained in G/TBT/1/Rev.8, p. 19.
[60] G/TBT/1/Rev.8, p. 21.
[61] The text of the decision is contained in G/TBT/1/Rev.8, p. 21.
[62] The text of the relevant decisions is contained in G/TBT/1/Rev.8, pp. 19–21.
[63] The text of the relevant recommendation and decisions is contained in G/TBT/1/Rev.8, p. 16.

with another country or countries on issues related to technical regulations, standards or conformity assessment procedures.[64]

XII. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Technical Assistance to Other Members

11.1 Members shall, if requested, advise other Members, especially the developing country Members, on the preparation of technical regulations.

11.2 Members shall, if requested, advise other Members, especially the developing country Members, and shall grant them technical assistance on mutually agreed terms and conditions regarding the establishment of national standardizing bodies, and participation in the international standardizing bodies, and shall encourage their national standardizing bodies to do likewise.

11.3 Members shall, if requested, take such reasonable measures as may be available to them to arrange for the regulatory bodies within their territories to advise other Members, especially the developing country Members, and shall grant them technical assistance on mutually agreed terms and conditions regarding:

11.3.1 the establishment of regulatory bodies, or bodies for the assessment of conformity with technical regulations; and

11.3.2 the methods by which their technical regulations can best be met.

11.4 Members shall, if requested, take such reasonable measures as may be available to them to arrange for advice to be given to other Members, especially the developing country Members, and shall grant them technical assistance on mutually agreed terms and conditions regarding the establishment of bodies for the assessment of conformity with standards adopted within the territory of the requesting Member.

11.5 Members shall, if requested, advise other Members, especially the developing country Members, and shall grant them technical assistance on mutually agreed terms and conditions regarding the steps that should be taken by their producers if they wish to have access to systems for conformity assessment operated by governmental or non-governmental bodies within the territory of the Member receiving the request.

11.6 Members which are members or participants of international or regional systems for conformity assessment shall, if requested, advise other Members, especially the developing country Members, and shall grant them technical assistance on mutually agreed terms and conditions regarding the establishment of the institutions and legal framework which would enable them to fulfil the obligations of membership or participation in such systems.

11.7 Members shall, if so requested, encourage bodies within their territories which are members or participants of international or regional systems for conformity assessment to advise other Members, especially the developing country Members, and should consider requests for technical assistance from them regarding the establishment of the institutions which would enable the relevant bodies within their territories to fulfil the obligations of membership or participation.

11.8 In providing advice and technical assistance to other Members in terms of paragraphs 1 to 7, Members shall give priority to the needs of the least-developed country Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

50. In considering the ways in which the provisions of Article 11 could be put into practice, the TBT Committee laid down parameters for exchanging information on technical assistance.[65]

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Special and Differential Treatment of Developing Country Members

12.1 Members shall provide differential and more favourable treatment to developing country Members to this Agreement, through the following provisions as well as through the relevant provisions of other Articles of this Agreement.

12.2 Members shall give particular attention to the provisions of this Agreement concerning developing country Members' rights and obligations and shall take into account the special development, financial and trade needs of developing country Members in the implementation of this Agreement, both nationally and in the operation of this Agreement's institutional arrangements.

12.3 Members shall, in the preparation and application of technical regulations, standards and conformity assessment procedures, take account of the special development, financial and trade needs of developing country Members, with a view to ensuring that such technical regulations, standards and conformity assessment procedures do not create unnecessary obstacles to exports from developing country Members.

12.4 Members recognize that, although international standards, guides or recommendations may exist, in

[64] G/TBT/1/Rev.8, p. 24.
[65] G/TBT/1/Rev.8, p. 22.

their particular technological and socio-economic conditions, developing country Members adopt certain technical regulations, standards or conformity assessment procedures aimed at preserving indigenous technology and production methods and processes compatible with their development needs. Members therefore recognize that developing country Members should not be expected to use international standards as a basis for their technical regulations or standards, including test methods, which are not appropriate to their development, financial and trade needs.

12.5 Members shall take such reasonable measures as may be available to them to ensure that international standardizing bodies and international systems for conformity assessment are organized and operated in a way which facilitates active and representative participation of relevant bodies in all Members, taking into account the special problems of developing country Members.

12.6 Members shall take such reasonable measures as may be available to them to ensure that international standardizing bodies, upon request of developing country Members, examine the possibility of, and, if practicable, prepare international standards concerning products of special interest to developing country Members.

12.7 Members shall, in accordance with the provisions of Article 11, provide technical assistance to developing country Members to ensure that the preparation and application of technical regulations, standards and conformity assessment procedures do not create unnecessary obstacles to the expansion and diversification of exports from developing country Members. In determining the terms and conditions of the technical assistance, account shall be taken of the stage of development of the requesting Members and in particular of the least-developed country Members.

12.8 It is recognized that developing country Members may face special problems, including institutional and infrastructural problems, in the field of preparation and application of technical regulations, standards and conformity assessment procedures. It is further recognized that the special development and trade needs of developing country Members, as well as their stage of technological development, may hinder their ability to discharge fully their obligations under this Agreement. Members, therefore, shall take this fact fully into account. Accordingly, with a view to ensuring that developing country Members are able to comply with this Agreement, the Committee on Technical Barriers to Trade provided for in Article 13 (referred to in this Agreement as the "Committee") is enabled to grant, upon request, specified, time-limited exceptions in whole or in part from obligations under this Agreement. When considering such requests the Committee shall take into account the special problems, in the field of preparation and application of technical regulations, standards and conformity assessment procedures, and the special development and trade needs of the developing country Member, as well as its stage of technological development, which may hinder its ability to discharge fully its obligations under this Agreement. The Committee shall, in particular, take into account the special problems of the least-developed country Members.

12.9 During consultations, developed country Members shall bear in mind the special difficulties experienced by developing country Members in formulating and implementing standards and technical regulations and conformity assessment procedures, and in their desire to assist developing country Members with their efforts in this direction, developed country Members shall take account of the special needs of the former in regard to financing, trade and development.

12.10 The Committee shall examine periodically the special and differential treatment, as laid down in this Agreement, granted to developing country Members on national and international levels.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

No jurisprudence or decision of a competent WTO body.

INSTITUTIONS, CONSULTATION AND DISPUTE SETTLEMENT

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13

The Committee on Technical Barriers to Trade

13.1 A Committee on Technical Barriers to Trade is hereby established, and shall be composed of representatives from each of the Members. The Committee shall elect its own Chairman and shall meet as necessary, but no less than once a year, for the purpose of affording Members the opportunity of consulting on any matters relating to the operation of this Agreement or the furtherance of its objectives, and shall carry out such responsibilities as assigned to it under this Agreement or by the Members.

13.2 The Committee shall establish working parties or other bodies as may be appropriate, which shall carry out such responsibilities as may be assigned to them by the Committee in accordance with the relevant provisions of this Agreement.

13.3 It is understood that unnecessary duplication should be avoided between the work under this Agreement and that of governments in other technical bodies. The Committee shall examine this problem with a view to minimizing such duplication.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

1. General

(a) Rules of procedure

51. At its meeting on 1 January 1996, the Council for Trade in Goods approved the Rules of Procedure adopted by the TBT Committee on 21 April 1995.[66]

(b) Observer status

52. Annexes 1 and 2 to the Rules of Procedure adopted by the TBT Committee contain Guidelines for Observer Status for Governments in the WTO (Annex 1) and for Intergovernmental Organizations in the WTO (Annex 2).[67]

XV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Consultation and Dispute Settlement

14.1 Consultations and the settlement of disputes with respect to any matter affecting the operation of this Agreement shall take place under the auspices of the Dispute Settlement Body and shall follow, *mutatis mutandis*, the provisions of Articles XXII and XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding.

14.2 At the request of a party to a dispute, or at its own initiative, a panel may establish a technical expert group to assist in questions of a technical nature, requiring detailed consideration by experts.

14.3 Technical expert groups shall be governed by the procedures of Annex 2.

14.4 The dispute settlement provisions set out above can be invoked in cases where a Member considers that another Member has not achieved satisfactory results under Articles 3, 4, 7, 8 and 9 and its trade interests are significantly affected. In this respect, such results shall be equivalent to those as if the body in question were a Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

1. Invocation of the TBT Agreement in disputes

53. The following table lists the disputes in which Appellate Body and/or panel reports have been adopted where the provisions of the *TBT Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Gasoline*	WT/DS2	Articles 2.1, 2.2
2	*Argentina – Textiles and Apparel*	WT/DS56	Articles 2.1, 2.2
3	*EC – Hormones (US)*	WT/DS26	Articles 2.1, 2.2
4	*EC – Hormones (Canada)*	WT/DS48	Articles 2.1, 2.2
5	*EC – Asbestos*	WT/DS135	Articles 2.1, 2.2, 2.4, 2.8
6	*EC – Sardines*	WT/DS231	Articles 2.1, 2.2, 2.4

2. Article 14.2

54. In *EC – Asbestos*, the Panel, having determined that the case raised scientific or technical issues, decided to consult experts on an individual basis, rather than in the form of a technical expert group, as foreseen in Article 14 and Annex 2 of the *TBT Agreement*. In response to an argument by the European Communities that expert consultations under the *TBT Agreement* should be conducted in the form of technical expert groups, the Panel observed:

> "[T]hat, if the measure at issue should be deemed to fall under the TBT Agreement, which the Communities contest, Article 14.2 of that Agreement would require the establishment of an expert review group for any scientific or technical matter, and the EC position that pursuant to Article 1:2 of the DSU, that provision would prevail over those of Article 13 to the DSU. Article 14:2 of the TBT Agreement is among the provisions mentioned in Appendix 2 to the DSU and which, under Article 1:2 of that Understanding, will prevail over the provisions of the Understanding to the extent that there is a difference between the two. The Panel notes, however, that it is only 'to the extent that there is a difference' between the rules and procedures of the Understanding and a special or additional rule or procedure in Appendix 2 to the DSU that the latter will prevail. Yet, as stated by the Appellate Body, it is only where the provisions of the DSU and the special or additional rules of Appendix 2 cannot be read as complementing each other that the special or additional provisions will prevail over those of the DSU, that is, in a situation where the two provisions would be mutually incompatible.[68] In the present case, Article 14:2 of the TBT Agreement provides that a panel 'may' establish a technical expert group. Like Article 13:2 of the DSU, this text envisages the

[66] G/C/M/7, para. 2.2. The text of the Rules of Procedures for the meetings of the TBT Committee is also contained in G/TBT/1/Rev.8, pp. 2–9.

[67] The text of the guidelines is contained in G/TBT/1/Rev.8, pp. 8 and 9. See also G/TBT/M/1, para. 22.

[68] (*footnote original*) Appellate Body Report on *Guatemala – Cement*, paras. 65–66.

possibility of establishing a technical expert group and lays down the procedures that would be applicable in the event. Nevertheless, it does not exclusively prescribe the establishment of a technical expert group, and this possibility, in our opinion, is not incompatible with the general authorization given under Article 13 of the DSU to consult with individual experts. The two provisions can be read as complementing each other.

The Panel believes that in this case the consultation of experts on an individual basis is the more appropriate form of consultation, inasmuch as it is the one that will better enable the panel usefully to gather opinions and information on the scientific or technical issues raised by this dispute. Considering in particular the range of areas of competence that might be required, it is appropriate in this case to gather information and different individual opinions rather than asking for a collective report on the various scientific or technical matters in question. In the light of the foregoing, the Panel wishes to underline that its decision to consult experts on an individual basis is without prejudice to the applicability of the TBT Agreement to the measure in question, on which the parties disagree."[69]

FINAL PROVISIONS

XVI. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15
Final Provisions

Reservations

15.1 Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

Review

15.2 Each Member shall, promptly after the date on which the WTO Agreement enters into force for it, inform the Committee of measures in existence or taken to ensure the implementation and administration of this Agreement. Any changes of such measures thereafter shall also be notified to the Committee.

15.3 The Committee shall review annually the implementation and operation of this Agreement taking into account the objectives thereof.

15.4 Not later than the end of the third year from the date of entry into force of the WTO Agreement and at the end of each three-year period thereafter, the Committee shall review the operation and implementation of this Agreement, including the provisions relating to transparency, with a view to recommending an adjustment of the rights and obligations of this Agreement where necessary to ensure mutual economic advantage and balance of rights and obligations, without prejudice to the provisions of Article 12. Having regard, *inter alia,* to the experience gained in the implementation of the Agreement, the Committee shall, where appropriate, submit proposals for amendments to the text of this Agreement to the Council for Trade in Goods.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

1. Article 15.2

55. The TBT Committee agreed on the following decision concerning the contents of written statements to be made by members in response to Article 15.2 of the *TBT Agreement*:

"1. The statement should cover the legislative, regulatory and administrative action taken as a result of the negotiation of the Agreement or currently in existence to ensure that the provisions of the Agreement are applied. If the Agreement itself has been incorporated into domestic law, the statement should indicate how this has been done. In other cases, the statement should describe the content of the relevant laws, regulations, administrative orders, etc. All necessary references should also be provided.

2. In addition, the statement should specify

(a) The names of the publications used to announce that work is proceeding on draft technical regulations or standards and procedures for assessment of conformity and those in which the texts of technical regulations and standards or procedures for assessment of conformity are published under Articles 2.9.1, 2.11; 3.1 (in relation to 2.9.1 and 2.11); 5.6.1, 5.8; 7.1, 8.1 and 9.2 (in relation to 5.6.1 and 5.8); and paragraphs J, L and O of Annex 3 of the Agreement;

(b) the expected length of time allowed for presentation of comments in writing on technical regulations, standards or procedures for assessment of conformity under Articles 2.9.4 and 2.10.3; 3.1 (in relation to 2.9.4 and 2.10.3); 5.6.4 and 5.7.3; 7.1, 8.1 and 9.2 (in relation to 5.6.4 and 5.7.3); and paragraph L of Annex 3 of the Agreement;

(c) the name and address of the enquiry point(s) foreseen in Articles 10.1 and 10.3 of the Agreement with an indication as to whether it is/they are fully operational; if for legal or administrative reasons more than one enquiry point is established, complete and unambiguous information on the scope of responsibilities of each of them;

(d) the name and address of any other agencies that have specific functions under the Agreement, including those foreseen in Articles 10.10 and 10.11 of the Agreement; and

[69] Panel Report on *EC – Asbestos*, paras. 5.18–5.19.

(e) measures and arrangements to ensure that national and sub-national authorities preparing new technical regulations or procedures for assessment of conformity, or substantial amendments to existing ones, provide early information on their proposals in order to enable the Member in question to fulfil its obligations on notifications under Articles 2.9, 2.10, 3.2, 5.6, 5.7 and 7.2 of the Agreement."[70]

2. Article 15.3

56. The Committee carried out, at its meeting of 23 March 2004, the Ninth Annual Review of the Implementation and Operation of the Agreement under Article 15.3[71] and the Ninth Annual Review of the Code of Good Practice for the Preparation, Adoption and Application of Standards based on the following background documents: a list of standardizing bodies that have accepted the Code in 2003[72], a list of standardizing bodies that have accepted the Code since 1 January 1995[73] and the ninth edition of the WTO TBT Standards Code Directory prepared by the ISO/IEC Information Centre.

3. Article 15.4

57. The Committee concluded the First,[74] Second[75] and Third[76] Triennial Reviews of the Operation and Implementation of the Agreement on Technical Barriers to Trade on 13 November 1997, 10 November 2000, and 7 November 2003, respectively.

XVII. ANNEX 1

A. TEXT OF ANNEX 1

ANNEX 1
TERMS AND THEIR DEFINITIONS FOR THE PURPOSE OF THIS AGREEMENT

The terms presented in the sixth edition of the ISO/IEC Guide 2: 1991, General Terms and Their Definitions Concerning Standardization and Related Activities, shall, when used in this Agreement, have the same meaning as given in the definitions in the said Guide taking into account that services are excluded from the coverage of this Agreement.

For the purpose of this Agreement, however, the following definitions shall apply:

1. *Technical regulation*

Document which lays down product characteristics or their related processes and production methods, including the applicable administrative provisions, with which compliance is mandatory. It may also include or deal exclusively with terminology, symbols, packaging, marking or labelling requirements as they apply to a product, process or production method.

Explanatory note

The definition in ISO/IEC Guide 2 is not self-contained, but based on the so-called "building block" system.

2. *Standard*

Document approved by a recognized body, that provides, for common and repeated use, rules, guidelines or characteristics for products or related processes and production methods, with which compliance is not mandatory. It may also include or deal exclusively with terminology, symbols, packaging, marking or labelling requirements as they apply to a product, process or production method.

Explanatory note

The terms as defined in ISO/IEC Guide 2 cover products, processes and services. This Agreement deals only with technical regulations, standards and conformity assessment procedures related to products or processes and production methods. Standards as defined by ISO/IEC Guide 2 may be mandatory or voluntary. For the purpose of this Agreement standards are defined as voluntary and technical regulations as mandatory documents. Standards prepared by the international standardization community are based on consensus. This Agreement covers also documents that are not based on consensus.

3. *Conformity assessment procedures*

Any procedure used, directly or indirectly, to determine that relevant requirements in technical regulations or standards are fulfilled.

Explanatory note

Conformity assessment procedures include, *inter alia*, procedures for sampling, testing and inspection; evaluation, verification and assurance of conformity; registration, accreditation and approval as well as their combinations.

4. *International body or system*

Body or system whose membership is open to the relevant bodies of at least all Members.

5. *Regional body or system*

Body or system whose membership is open to the relevant bodies of only some of the Members.

[70] G/TBT/1/Rev.8, p. 10.
[71] G/TBT/14.
[72] G/TBT/CS/1/Add.8.
[73] G/TBT/CS/2/Rev.10.
[74] First Triennial Review of the Operation and Implementation of the Agreement on Technical Barriers to Trade, G/TBT/5.
[75] Second Triennial Review of the Operation and Implementation of the Agreement on Technical Barriers to Trade, G/TBT/9.
[76] Third Triennial Review of the Operation and Implementation of the Agreement on Technical Barriers to Trade, G/TBT/13.

6. *Central government body*

Central government, its ministries and departments or any body subject to the control of the central government in respect of the activity in question.

Explanatory note:

In the case of the European Communities the provisions governing central government bodies apply. However, regional bodies or conformity assessment systems may be established within the European Communities, and in such cases would be subject to the provisions of this Agreement on regional bodies or conformity assessment systems.

7. *Local government body*

Government other than a central government (e.g. states, provinces, Länder, cantons, municipalities, etc.), its ministries or departments or any body subject to the control of such a government in respect of the activity in question.

8. *Non-governmental body*

Body other than a central government body or a local government body, including a non-governmental body which has legal power to enforce a technical regulation.

B. INTERPRETATION AND APPLICATION OF ANNEX 1

1. Technical regulation

58. In *EC – Asbestos*, the Appellate Body clarified the term "technical regulation" and held, *inter alia*, that "[a] 'technical regulation' must . . . regulate the 'characteristics' of products in a binding or compulsory fashion":

> "The heart of the definition of a 'technical regulation' is that a 'document' must 'lay down' – that is, set forth, stipulate or provide – 'product *characteristics*'. The word 'characteristic' has a number of synonyms that are helpful in understanding the ordinary meaning of that word, in this context. Thus, the 'characteristics' of a product include, in our view, any objectively definable 'features', 'qualities', 'attributes', or other 'distinguishing mark' of a product. Such 'characteristics' might relate, *inter alia*, to a product's composition, size, shape, colour, texture, hardness, tensile strength, flammability, conductivity, density, or viscosity. In the definition of a 'technical regulation' in Annex 1.1, the *TBT Agreement* itself gives certain examples of 'product characteristics' – 'terminology, symbols, packaging, marking or labelling requirements'. These examples indicate that 'product characteristics' include, not only features and qualities intrinsic to the product itself, but also related 'characteristics', such as the means of identification, the presentation and the appearance of a product. In addition, according to the definition in Annex 1.1 of the *TBT Agreement*, a 'technical regulation' may set forth the 'applicable administrative provisions' for products which have certain 'characteristics'. Further, we note that the definition of a 'technical regulation' provides that such a regulation 'may also include or deal *exclusively* with terminology, symbols, packaging, marking *or* labelling requirements'. (emphasis added) The use here of the word 'exclusively' and the disjunctive word 'or' indicates that a 'technical regulation' may be confined to laying down only one or a few 'product characteristics'. The definition . . . also states that '*compliance*' with the 'product characteristics' laid down in the 'document' must be '*mandatory*'. A 'technical regulation' must, in other words, regulate the 'characteristics' of products in a binding or compulsory fashion. It follows that, with respect to products, a 'technical regulation' has the effect of *prescribing* or *imposing* one or more 'characteristics' – 'features', 'qualities', 'attributes', or other 'distinguishing mark'.
>
> 'Product characteristics' may . . . be prescribed or imposed with respect to products in either a positive or a negative form. That is, the document may provide, positively, that products *must possess* certain 'characteristics', or the document may require, negatively, that products *must not possess* certain 'characteristics'. In both cases, the legal result is the same: the document 'lays down' certain binding 'characteristics' for products, in one case affirmatively, and in the other by negative implication."[77]

59. Regarding the products to which a technical regulation applies, the Appellate Body in *EC – Asbestos* further held that while a technical regulation must be applicable to an identifiable product or groups of products, this did not signify that the products in question must be actually named or identified in the regulation at issue:

> "A 'technical regulation' must, of course, be applicable to an *identifiable* product, or group of products. Otherwise, enforcement of the regulation will, in practical terms, be impossible. This consideration also underlies the formal obligation, in Article 2.9.2 of the *TBT Agreement*, for Members to notify other Members, through the WTO Secretariat, of 'the *products to be covered*' by a proposed 'technical regulation'. (emphasis added) Clearly, compliance with this obligation requires identification of the product coverage of a technical regulation. However, in contrast to what the Panel suggested, this does not mean that a 'technical regulation' must apply to '*given*' products which are actually *named*, *identified* or *specified* in the regulation. (emphasis added) Although the *TBT Agreement* clearly applies to 'products' generally, nothing in the text of that Agreement suggests that those products need be named or otherwise *expressly* identified in a 'technical regulation'. Moreover, there may be perfectly sound administrative reasons for formulating a 'technical regulation' in a way that does *not* expressly identify products by name, but

[77] Appellate Body Report on *EC – Asbestos*, paras. 67–69.

simply makes them identifiable – for instance, through the 'characteristic' that is the subject of regulation."[78]

60. In *EC – Sardines*, the Appellate Body summarized its interpretation of the definition of a "technical regulation":

"We interpreted this definition in *EC – Asbestos*. In doing so, we set out *three criteria* that a document must meet to fall within the definition of 'technical regulation' in the *TBT Agreement*. *First*, the document must apply to an identifiable product or group of products. The *identifiable* product or group of products need not, however, be expressly *identified* in the document. *Second*, the document must lay down one or more characteristics of the product. These product characteristics may be intrinsic, or they may be related to the product. They may be prescribed or imposed in either a positive or a negative form. *Third*, compliance with the product characteristics must be mandatory. As we stressed in *EC – Asbestos*, these three criteria are derived from the wording of the definition in Annex 1.1. At the oral hearing, both participants confirmed that they agree with these criteria for determining whether a document is a 'technical regulation' under the *TBT Agreement*."[79]

61. In *EC – Asbestos*, the Appellate Body further elaborated on the first criterion – the requirement that the document apply to an identifiable product or group of products – confirming that "the product does not necessarily have to be mentioned explicitly in a document for that product to be an identifiable product. Identifiable does not mean expressly identified".[80] The Appellate Body noted:

"The European Communities argues that the Panel erred in failing to acknowledge that the EC Regulation uses the term 'preserved sardines' to mean – exclusively – preserved *Sardina pilchardus*. The European Communities is of the view that preserved *Sardina pilchardus* and preserved *Sardinops sagax* are not like products. The European Communities reasons that preserved *Sardinops sagax* can neither be an identified nor an identifiable product under the EC Regulation.

. . .

As we explained in *EC – Asbestos*, the requirement that a 'technical regulation' be applicable to *identifiable* products relates to aspects of compliance and enforcement, because it would be impossible to comply with or enforce a 'technical regulation' without knowing to what the regulation applied. As the Panel record shows, the EC Regulation has been enforced against preserved fish products imported into Germany containing *Sardinops sagax*. This confirms that the EC Regulation is applicable to preserved *Sardinops sagax*, and demonstrates that preserved *Sardinops sagax* is an *identifiable product* for purposes of the EC Regulation. Indeed, the European Communities admits that the EC Regulation is applicable to *Sardinops sagax*, when it states in its appellant's submission that '[t]he only legal consequence of the [EC] Regulation for preserved *Sardinops sagax* is that they may not be called "preserved sardines" '.

Therefore, we reject the contention of the European Communities that preserved *Sardinops sagax* is not an identifiable product under the EC Regulation."[81]

62. With regard to the second criterion – the requirement that the document must lay down one or more characteristic of the product – the Appellate Body rejected, in *EC – Sardines*, an argument by the European Communities that the measure at issue did not lay down product characteristics, but rather constituted a "naming rule". The Appellate Body found that "product characteristics include not only 'features and qualities intrinsic to the product', but also those that are related to it, such as 'means of identification'."[82] It agreed with the panel's ruling that the measure at issue did lay down product characteristics:

"As we stated earlier, the EC Regulation expressly identifies a product, namely 'preserved sardines'. Further, Article 2 of the EC Regulation provides that, to be marketed as 'preserved sardines', products must be prepared exclusively from fish of the species *Sardina pilchardus*. We are of the view that this requirement – to be prepared exclusively from fish of the species *Sardina pilchardus* – is a product characteristic 'intrinsic to' preserved sardines that is laid down by the EC Regulation. . . .

In any event, as we said in *EC – Asbestos*, a 'means of identification' *is* a product characteristic. A name clearly identifies a product; indeed, the European Communities concedes that a name is a 'means of identification'. . . . the European Communities itself underscored the important role that a 'name' plays as a 'means of identification' when it argued before the Panel that one of the objectives pursued by the European Communities through the EC Regulation is to provide precise information to avoid misleading the consumer . . . . "[83]

2. Standards

(a) Relationship between the definitions under the TBT Agreement and the definitions in the ISO/IEC Guide

63. In *EC – Sardines*, in the context of an analysis relating to the notion of "relevant international standard" under Article 2.4, the Appellate Body considered the relationship between the definitions under Annex 1 of the TBT Agreement and the ISO/IEC Guide:

[78] Appellate Body Report on *EC – Asbestos*, para. 70.
[79] Appellate Body Report on *EC – Sardines*, para. 176.
[80] Appellate Body Report on *EC – Sardines*, para. 180.
[81] Appellate Body Report on *EC – Sardines*, paras. 181–186.
[82] Appellate Body Report on *EC – Sardines*, para. 189.
[83] Appellate Body Report on *EC – Sardines*, paras. 190–191.

"[A]ccording to the chapeau [of Annex 1], the terms defined in Annex 1 apply for the purposes of the *TBT Agreement* only if their definitions *depart* from those in the ISO/IEC Guide 2:1991 (the 'ISO/IEC Guide'). This is underscored by the word 'however'. The definition of a standard in Annex 1 to the *TBT Agreement* departs from that provided in the ISO/IEC Guide precisely in respect of whether consensus is expressly required."[84]

(b) Consensus

64. With respect to whether consensus is required to meet the definition of "standard" under Annex 1.2, the Appellate Body observed in *EC – Sardines* that:

"The term 'standard' is defined in the ISO/IEC Guide as follows:

> Document, established by *consensus* and approved by a *recognized* body, that provides, for common and repeated use, rules, guidelines or characteristics for activities or their results, aimed at the achievement of the optimum degree of order in a given context. (original emphasis)

Thus, the definition of a 'standard' in the ISO/IEC Guide expressly includes a consensus requirement. Therefore, the logical conclusion, in our view, is that the omission of a consensus requirement in the definition of a standard in Annex 1.2 of the TBT Agreement was a deliberate choice on the part of the drafters of the TBT Agreement, and that the last two phrases of the Explanatory note were included to give effect to this choice. Had the negotiators considered consensus to be necessary to satisfy the definition of 'standard', we believe they would have said so explicitly in the definition itself, as is the case in the ISO/IEC Guide. Indeed, there would, in our view, have been no point in the negotiators adding the last sentence of the Explanatory note."[85]

65. See also the section on the notion of "relevant international standards" under Article 2.4 (paragraphs 10–12 above).

XVIII. ANNEX 2

A. TEXT OF ANNEX 2

ANNEX 2
TECHNICAL EXPERT GROUPS

The following procedures shall apply to technical expert groups established in accordance with the provisions of Article 14.

1. Technical expert groups are under the panel's authority. Their terms of reference and detailed working procedures shall be decided by the panel, and they shall report to the panel.

2. Participation in technical expert groups shall be restricted to persons of professional standing and experience in the field in question.

3. Citizens of parties to the dispute shall not serve on a technical expert group without the joint agreement of the parties to the dispute, except in exceptional circumstances when the panel considers that the need for specialized scientific expertise cannot be fulfilled otherwise. Government officials of parties to the dispute shall not serve on a technical expert group. Members of technical expert groups shall serve in their individual capacities and not as government representatives, nor as representatives of any organization. Governments or organizations shall therefore not give them instructions with regard to matters before a technical expert group.

4. Technical expert groups may consult and seek information and technical advice from any source they deem appropriate. Before a technical expert group seeks such information or advice from a source within the jurisdiction of a Member, it shall inform the government of that Member. Any Member shall respond promptly and fully to any request by a technical expert group for such information as the technical expert group considers necessary and appropriate.

5. The parties to a dispute shall have access to all relevant information provided to a technical expert group, unless it is of a confidential nature. Confidential information provided to the technical expert group shall not be released without formal authorization from the government, organization or person providing the information. Where such information is requested from the technical expert group but release of such information by the technical expert group is not authorized, a non-confidential summary of the information will be provided by the government, organization or person supplying the information.

6. The technical expert group shall submit a draft report to the Members concerned with a view to obtaining their comments, and taking them into account, as appropriate, in the final report, which shall also be circulated to the Members concerned when it is submitted to the panel.

B. INTERPRETATION AND APPLICATION OF ANNEX 2

66. On the issue of whether the establishment of a technical expert group is required under Article 14, see paragraph 54 above.

[85] Appellate Body Report on *EC – Sardines*, para. 225.

XIX. ANNEX 3

A. TEXT OF ANNEX 3

ANNEX 3
CODE OF GOOD PRACTICE FOR THE PREPARATION, ADOPTION AND APPLICATION OF STANDARDS

General Provisions

A. For the purposes of this Code the definitions in Annex 1 of this Agreement shall apply.

B. This Code is open to acceptance by any standardizing body within the territory of a Member of the WTO, whether a central government body, a local government body, or a non-governmental body; to any governmental regional standardizing body one or more members of which are Members of the WTO; and to any non-governmental regional standardizing body one or more members of which are situated within the territory of a Member of the WTO (referred to in this Code collectively as "standardizing bodies" and individually as "the standardizing body").

C. Standardizing bodies that have accepted or withdrawn from this Code shall notify this fact to the ISO/IEC Information Centre in Geneva. The notification shall include the name and address of the body concerned and the scope of its current and expected standardization activities. The notification may be sent either directly to the ISO/IEC Information Centre, or through the national member body of ISO/IEC or, preferably, through the relevant national member or international affiliate of ISONET, as appropriate.

Substantive Provisions

D. In respect of standards, the standardizing body shall accord treatment to products originating in the territory of any other Member of the WTO no less favourable than that accorded to like products of national origin and to like products originating in any other country.

E. The standardizing body shall ensure that standards are not prepared, adopted or applied with a view to, or with the effect of, creating unnecessary obstacles to international trade.

F. Where international standards exist or their completion is imminent, the standardizing body shall use them, or the relevant parts of them, as a basis for the standards it develops, except where such international standards or relevant parts would be ineffective or inappropriate, for instance, because of an insufficient level of protection or fundamental climatic or geographical factors or fundamental technological problems.

G. With a view to harmonizing standards on as wide a basis as possible, the standardizing body shall, in an appropriate way, play a full part, within the limits of its resources, in the preparation by relevant international standardizing bodies of international standards regarding subject matter for which it either has adopted, or expects to adopt, standards. For standardizing bodies within the territory of a Member, participation in a particular international standardization activity shall, whenever possible, take place through one delegation representing all standardizing bodies in the territory that have adopted, or expect to adopt, standards for the subject matter to which the international standardization activity relates.

H. The standardizing body within the territory of a Member shall make every effort to avoid duplication of, or overlap with, the work of other standardizing bodies in the national territory or with the work of relevant international or regional standardizing bodies. They shall also make every effort to achieve a national consensus on the standards they develop. Likewise the regional standardizing body shall make every effort to avoid duplication of, or overlap with, the work of relevant international standardizing bodies.

I. Wherever appropriate, the standardizing body shall specify standards based on product requirements in terms of performance rather than design or descriptive characteristics.

J. At least once every six months, the standardizing body shall publish a work programme containing its name and address, the standards it is currently preparing and the standards which it has adopted in the preceding period. A standard is under preparation from the moment a decision has been taken to develop a standard until that standard has been adopted. The titles of specific draft standards shall, upon request, be provided in English, French or Spanish. A notice of the existence of the work programme shall be published in a national or, as the case may be, regional publication of standardization activities.

The work programme shall for each standard indicate, in accordance with any ISONET rules, the classification relevant to the subject matter, the stage attained in the standard's development, and the references of any international standards taken as a basis. No later than at the time of publication of its work programme, the standardizing body shall notify the existence thereof to the ISO/IEC Information Centre in Geneva.

The notification shall contain the name and address of the standardizing body, the name and issue of the publication in which the work programme is published, the period to which the work programme applies, its price (if any), and how and where it can be obtained. The notification may be sent directly to the ISO/IEC Information Centre, or, preferably, through the relevant national member or international affiliate of ISONET, as appropriate.

K. The national member of ISO/IEC shall make every effort to become a member of ISONET or to appoint another body to become a member as well as to acquire the most advanced membership type possible for the ISONET member. Other standardizing bodies shall make every effort to associate themselves with the ISONET member.

L. Before adopting a standard, the standardizing body shall allow a period of at least 60 days for the submission of comments on the draft standard by interested parties within the territory of a Member of the WTO. This period may, however, be shortened in cases where urgent problems of safety, health or environment arise or threaten to arise. No later than at the start of the comment period, the standardizing body shall publish a notice announcing the period for commenting in the publication referred to in paragraph J. Such notification shall include, as far as practicable, whether the draft standard deviates from relevant international standards.

M. On the request of any interested party within the territory of a Member of the WTO, the standardizing body shall promptly provide, or arrange to provide, a copy of a draft standard which it has submitted for comments. Any fees charged for this service shall, apart from the real cost of delivery, be the same for foreign and domestic parties.

N. The standardizing body shall take into account, in the further processing of the standard, the comments received during the period for commenting. Comments received through standardizing bodies that have accepted this Code of Good Practice shall, if so requested, be replied to as promptly as possible. The reply shall include an explanation why a deviation from relevant international standards is necessary.

O. Once the standard has been adopted, it shall be promptly published.

P. On the request of any interested party within the territory of a Member of the WTO, the standardizing body shall promptly provide, or arrange to provide, a copy of its most recent work programme or of a standard which it produced. Any fees charged for this service shall, apart from the real cost of delivery, be the same for foreign and domestic parties.

Q. The standardizing body shall afford sympathetic consideration to, and adequate opportunity for, consultation regarding representations with respect to the operation of this Code presented by standardizing bodies that have accepted this Code of Good Practice. It shall make an objective effort to solve any complaints.

B. INTERPRETATION AND APPLICATION OF ANNEX 3

1. Notification procedure under paragraph J

67. The TBT Committee adopted the following decision relating to the communication of the work programme of standardizing bodies via the Internet:

> "The communication of the work programmes of standardizing bodies via the Internet would be another possibility to fulfil paragraph J obligations on transparency. Hard copies of such work programmes would, nevertheless, always be made available on request in accordance with paragraph P of the Code of Code of Good Practice."[86]

XX. DECISION ON PROPOSED UNDERSTANDING ON WTO-ISO STANDARDS INFORMATION SYSTEM

A. TEXT OF THE DECISION

Decision on Proposed Understanding on WTO-ISO Standards Information System

Ministers,

Decide to recommend that the Secretariat of the World Trade Organization reach an understanding with the International Organization for Standardization ("ISO") to establish an information system under which:

1. ISONET members shall transmit to the ISO/IEC Information Centre in Geneva the notifications referred to in paragraphs C and J of the Code of Good Practice for the Preparation, Adoption and Application of Standards in Annex 3 to the Agreement on Technical Barriers to Trade, in the manner indicated there;

2. the following (alpha)numeric classification systems shall be used in the work programmes referred to in paragraph J:

   (a) *a standards classification system* which would allow standardizing bodies to give for each standard mentioned in the work programme an (alpha)numeric indication of the subject matter;

   (b) *a stage code system* which would allow standardizing bodies to give for each standard mentioned in the work programme an (alpha)numeric indication of the stage of development of the standard; for this purpose, at least five stages of development should be distinguished: (1) the stage at which the decision to develop a standard has been taken, but technical work has not yet begun; (2) the stage

[86] See G/TBT/1/Rev.8, p. 25.

at which technical work has begun, but the period for the submission of comments has not yet started; (3) the stage at which the period for the submission of comments has started, but has not yet been completed; (4) the stage at which the period for the submission of comments has been completed, but the standard has not yet been adopted; and (5) the stage at which the standard has been adopted;

(c) *an identification system* covering all international standards which would allow standardizing bodies to give for each standard mentioned in the work programme an (alpha)numeric indication of the international standard(s) used as a basis;

3. the ISO/IEC Information Centre shall promptly convey to the Secretariat copies of any notifications referred to in paragraph C of the Code of Good Practice;

4. the ISO/IEC Information Centre shall regularly publish the information received in the notifications made to it under paragraphs C and J of the Code of Good Practice; this publication, for which a reasonable fee may be charged, shall be available to ISONET members and through the Secretariat to the Members of the WTO.

B. INTERPRETATION AND APPLICATION OF THE DECISION

No jurisprudence or decision of a competent WTO body.

XXI. DECISION ON REVIEW OF THE ISO/IEC INFORMATION CENTRE PUBLICATION

A. TEXT OF THE DECISION

Decision on Review of the ISO/IEC Information Centre Publication

Ministers,

Decide that in conformity with paragraph 1 of Article 13 of the Agreement on Technical Barriers to Trade in Annex 1A of the Agreement Establishing the World Trade Organization, the Committee on Technical Barriers to Trade established thereunder shall, without prejudice to provisions on consultation and dispute settlement, at least once a year review the publication provided by the ISO/IEC Information Centre on information received according to the Code of Good Practice for the Preparation, Adoption and Application of Standards in Annex 3 of the Agreement, for the purpose of affording Members opportunity of discussing any matters relating to the operation of that Code.

In order to facilitate this discussion, the Secretariat shall provide a list by Member of all standardizing bodies that have accepted the Code, as well as a list of those standardizing bodies that have accepted or withdrawn from the Code since the previous review.

The Secretariat shall also distribute promptly to the Members copies of the notifications it receives from the ISO/IEC Information Centre.

B. INTERPRETATION AND APPLICATION OF THE DECISION

No jurisprudence or decision of a competent WTO body.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Considering that Ministers agreed in the Punta del Este Declaration that "Following an examination of the operation of GATT Articles related to the trade restrictive and distorting effects of investment measures, negotiations should elaborate, as appropriate, further provisions that may be necessary to avoid such adverse effects on trade";

Desiring to promote the expansion and progressive liberalisation of world trade and to facilitate investment across international frontiers so as to increase the economic growth of all trading partners, particularly developing country Members, while ensuring free competition;

Taking into account the particular trade, development and financial needs of developing country Members, particularly those of the least-developed country Members;

Recognizing that certain investment measures can cause trade-restrictive and distorting effects;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Coverage

This Agreement applies to investment measures related to trade in goods only (referred to in this Agreement as "TRIMs").

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. "Investment measures"

1. In *Indonesia – Autos*, the Panel examined the consistency of an Indonesian subsidy programme with the *TRIMs Agreement*. Indonesia, arguing that the measures at issue were not trade-related investment measures, stated that while its subsidies may, at times, indirectly affect investment decisions of the recipient of the subsidy or other parties, these decisions are not the object, but rather the unintended result, of the subsidy. Also, Indonesia argued that the *TRIMs Agreement* is basically designed to govern and provide a level playing field for foreign investment, and that therefore measures relating to internal taxes or subsidies cannot be trade-related investment measures. The Panel rejected this view, stating that the term "investment measures" was not limited to measures applying specifically to *foreign* investment:

> "We note that the use of the broad term 'investment measures' indicates that the TRIMs Agreement is not limited to measures taken specifically in regard to *foreign* investment. . . . [N]othing in the TRIMs Agreement suggests that the nationality of the ownership of enterprises subject to a particular measure is an element in deciding whether that measure is covered by the Agreement. We therefore find without textual support in the TRIMs Agreement the argument that since the TRIMs Agreement is basically designed to govern and provide a level playing field for foreign investment, measures relating to internal taxes or subsidies cannot be construed to be a trade-related investment measure. We recall in this context that internal tax advantages or subsidies are only one of many types of advantages which may be tied to a local content requirement which is a principal focus of the TRIMs Agreement. The TRIMs Agreement is not concerned with subsidies and internal taxes as such but rather with local content requirements, compliance with which may be encouraged through providing any type of advantage. Nor, in any case, do we see why an internal measure would necessarily not govern the treatment of foreign investment."[1]

2. In examining whether the measures in question were "investment measures", the Panel on *Indonesia – Autos* reviewed the legislative provisions relating to these measures. The Panel concluded that the measures were "aimed at encouraging the development of a local manufacturing capability for finished motor vehicles and parts and components in Indonesia" and that "that there is nothing in the text of the *TRIMs Agreement* to suggest that a measure is not an investment measure simply on the grounds that a Member does not characterize the measure as such, or on the grounds that the measure is not explicitly adopted as an investment regulation":

> "On the basis of our reading of these measures applied by Indonesia under the 1993 and the 1996 car programmes, which have investment objectives and investment features and which refer to investment programmes, we find that these measures are aimed at encouraging the development of a local manufacturing capability for finished motor vehicles and parts and components in Indonesia. Inherent to this objective is that these measures necessarily have a significant impact on investment in these sectors. For this reason, we consider that these measures fall within any reasonable interpretation of the term 'investment measures'. We do not intend to provide an overall definition of what constitutes an investment measure. We emphasize that our characterization of the measures as 'investment measures' is based on an examination of the manner in which the measures at issue in this case relate to investment. There may be other measures which qualify as investment measures within the meaning of the TRIMs Agreement because they relate to investment in a different manner.
>
> With respect to the arguments of Indonesia that the measures at issue are not investment measures because the Indonesian Government does not regard the programmes as investment programmes and because the measures have not been adopted by the authorities responsible for investment policy, we believe that there is nothing in the text of the TRIMs Agreement to suggest that a measure is not an investment measure simply on the grounds that a Member does not characterize the measure as such, or on the grounds that the measure is not explicitly adopted as an investment regulation. In any event, we note that some of the regulations and decisions adopted pursuant to these car programmes were adopted by investment bodies."[2]

2. "related to trade"

3. In examining whether the measures at issue in the dispute before it were "trade-related", the Panel on *Indonesia – Autos* held that local content requirements were necessarily trade-related:

> "[I]f these measures are local content requirements, they would necessarily be 'trade-related' because such requirements, by definition, always favour the use of

[1] Panel Report on *Indonesia – Autos*, para. 14.73.
[2] Panel Report on *Indonesia – Autos*, paras. 14.80–14.81.

domestic products over imported products, and therefore affect trade.

An examination of whether these measures are covered by Item (1) of the Illustrative List of TRIMs annexed to the TRIMs Agreement, which refers amongst other situations to measures with local content requirements, will not only indicate whether they are trade-related but also whether they are inconsistent with Article III:4 and thus in violation of Article 2.1 of the TRIMs Agreement."[3]

3. Necessity of separate analysis on whether a measure is a trade-related investment measure

4. In *Indonesia – Autos*, the Panel noted that differing views had been expressed by the parties to that dispute on the question "whether any requirement by an enterprise to purchase or use a domestic product in order to obtain an advantage, by definition falls within the Illustrative List or whether the *TRIMs Agreement* requires a separate analysis of the nature of a measure as a trade-related investment measure before proceeding to an examination of whether the measure is covered by the Illustrative List."[4] The Panel considered that it was not necessary for it to decide this question, and noted in this regard:

"[I]f we were to consider that the measures in dispute in this case are in any event trade-related investment measures, it would not be necessary to decide this basic issue of interpretation. We note in this regard that the United States and the European Communities have also argued in the alternative that, even if it is necessary to show a relationship of a measure to investment, any such requirement would be satisfied in the case under consideration.

Therefore, we will first determine whether the Indonesian measures are TRIMs. To this end, we address initially the issue of whether the measures at issue are 'investment measures'. Next, we consider whether they are 'trade-related'. Finally, we shall examine whether any measure found to be a TRIM is inconsistent with the provisions of Article III and thus violates the TRIMs Agreement."[5]

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
National Treatment and Quantitative Restrictions

1. Without prejudice to other rights and obligations under GATT 1994, no Member shall apply any TRIM that is inconsistent with the provisions of Article III or Article XI of GATT 1994.

2. An illustrative list of TRIMs that are inconsistent with the obligation of national treatment provided for in paragraph 4 of Article III of GATT 1994 and the obligation of general elimination of quantitative restrictions provided for in paragraph 1 of Article XI of GATT 1994 is contained in the Annex[6] to this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. Illustrative List

(a) Paragraph 1(a)

5. The Panel on *Indonesia – Autos* concluded from its analysis of the measures in question that "under these measures compliance with the provisions for the purchase and use of particular products of domestic origin is necessary to obtain the tax and customs duty benefits on these car programmes, as referred to in Item 1(a) of the Illustrative List of TRIMs."[7] The Panel then concluded that the tax and customs duty benefits were "advantages" within the meaning of the chapeau of paragraph 1 of the Illustrative List:

"In the context of the claims under Article III:4 of GATT, Indonesia has argued that the reduced customs duties are not internal regulations and as such cannot be covered by the wording of Article III:4. We do not consider that the matter before us in connection with Indonesia's obligations under the TRIMs Agreement is the customs duty relief as such but rather the internal regulations, i.e. the provisions on purchase and use of domestic products, compliance with which is necessary to obtain an advantage, which advantage here is the customs duty relief. The lower duty rates are clearly 'advantages' in the meaning of the chapeau of the Illustrative List to the TRIMs Agreement and as such, we find that the Indonesian measures fall within the scope of the Item 1 of the Illustrative List of TRIMs.

Indonesia also argues that the local content requirements of its car programmes do not constitute classic local content requirements within the meaning of the *FIRA* panel (which involved a binding contract between the investor and the Government of Canada) because they leave companies free to decide from which source to purchase parts and components. We note that the Indonesian producers or assemblers of motor vehicles (or motor vehicle parts) must satisfy the local content targets of the relevant measures in order to take advantage of the customs duty and tax benefits offered by the Government. The wording of the Illustrative List of the TRIMs Agreement makes it clear that a simple advantage conditional on the use of domestic goods is considered to

[3] Panel Report on *Indonesia – Autos*, paras. 14.82–14.83.
[4] Panel Report on *Indonesia – Autos*, para. 14.71.
[5] Panel Report on *Indonesia – Autos*, paras. 14.71–14.72.
[6] See Section XII.
[7] Panel Report on *Indonesia – Autos*, para. 14.88.

be a violation of Article 2 of the TRIMs Agreement even if the local content requirement is not binding as such. We note in addition that this argument has also been rejected in the Panel Report on *Parts and Components.*[8]

We thus find that the tax and tariff benefits contingent on meeting local requirements under these car programmes constitute 'advantages'."[9]

6. In *Canada – Wheat Exports and Grain Imports* the question arose, whether Section 87 of the Canada Grain Act was an investment measure inconsistent with Article 2.1 of the *TRIMs Agreement*. With respect to this issue, the Panel made reference to its previous findings[10] that the United States had not established that Section 87 is, as such, inconsistent with Article III:4 of the *GATT 1994*. Since a violation of Article III:4 of the *GATT 1994* was not established, the Panel concluded that no inconsistency with Article 2.1 of the *TRIMs Agreement* could be found.

"The United States has not established that Section 87 is inconsistent with Article III:4 of the GATT 1994. In view of these findings, it is clear that, even if Section 87 could be considered an investment measure related to trade in goods within the meaning of the *TRIMs Agreement*, the United States has not established that Section 87 is, as such, inconsistent with Article 2.1 of the *TRIMs Agreement*. Moreover, since the United States has not established that Section 87 of the *Canada Grain Act* legally precludes producers of foreign grain or foreign producers of grain from gaining access to producer railway cars, the United States has also failed to establish that Section 87 requires the use by an enterprise of products of domestic origin or from any domestic source within the meaning of paragraph 1(a) of the Annex to the *TRIMs Agreement*."[11]

2. Relationship with GATT 1994

7. With respect to the relationship between Article III.4 of the *GATT 1994* and Article 2 of the *TRIMs Agreement*, see paragraphs 25–36 below.

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Exceptions

All exceptions under GATT 1994 shall apply, as appropriate, to the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

8. In *Indonesia – Autos*, the Panel referred to Article 3 in discussing the relationship between the *TRIMs Agreement* and *GATT 1994*. See excerpts from the report of the Panel referenced in paragraphs 28–30 below.

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Developing Country Members

A developing country Member shall be free to deviate temporarily from the provisions of Article 2 to the extent and in such a manner as Article XVIII of GATT 1994, the Understanding on the Balance-of-Payments Provisions of GATT 1994, and the Declaration on Trade Measures Taken for Balance-of-Payments Purposes adopted on 28 November 1979 (BISD 26S/205–209) permit the Member to deviate from the provisions of Articles III and XI of GATT 1994.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

No jurisprudence or decision of a competent WTO body.

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Notification and Transitional Arrangements

1. Members, within 90 days of the date of entry into force of the WTO Agreement, shall notify the Council for Trade in Goods of all TRIMs they are applying that are not in conformity with the provisions of this Agreement. Such TRIMs of general or specific application shall be notified, along with their principal features.[1]

(*footnote original*) [1] In the case of TRIMs applied under discretionary authority, each specific application shall be notified. Information that would prejudice the legitimate commercial interests of particular enterprises need not be disclosed.

2. Each Member shall eliminate all TRIMs which are notified under paragraph 1 within two years of the date of entry into force of the WTO Agreement in the case of a developed country Member, within five years in the case of a developing country Member, and within seven years in the case of a least-developed country Member.

---

[8] (*footnote original*) In *Parts and Components*, the panel recognized that requirements that an enterprise voluntarily accepts to gain government-provided advantages are nonetheless "requirements" (italics in original): "5.21 The Panel noted that Article III:4 refers to 'all laws, regulations or requirements affecting (the) internal sale, offering for sale, purchase, transportation, distribution or use.' The Panel considered that the comprehensive coverage of '*all* laws, regulations or requirements *affecting*' the internal sale, etc. of imported products suggests that not only requirements which an enterprise is legally bound to carry out, but also those which an enterprise voluntarily accepts in order to obtain an advantage from the government constitute 'requirements' within the meaning of that provision . . . ." Panel Report on *EEC – Parts and Components*.

[9] Panel Report on *Indonesia – Autos*, paras. 14.88–14.91.

[10] Panel Report on *Canada – Wheat*, para. 6.375

[11] Panel Report on *Canada – Wheat*, para. 6.381.

3. On request, the Council for Trade in Goods may extend the transition period for the elimination of TRIMs notified under paragraph 1 for a developing country Member, including a least-developed country Member, which demonstrates particular difficulties in implementing the provisions of this Agreement. In considering such a request, the Council for Trade in Goods shall take into account the individual development, financial and trade needs of the Member in question.

4. During the transition period, a Member shall not modify the terms of any TRIM which it notifies under paragraph 1 from those prevailing at the date of entry into force of the WTO Agreement so as to increase the degree of inconsistency with the provisions of Article 2. TRIMs introduced less than 180 days before the date of entry into force of the WTO Agreement shall not benefit from the transitional arrangements provided in paragraph 2.

5. Notwithstanding the provisions of Article 2, a Member, in order not to disadvantage established enterprises which are subject to a TRIM notified under paragraph 1, may apply during the transition period the same TRIM to a new investment (*i*) where the products of such investment are like products to those of the established enterprises, and (*ii*) where necessary to avoid distorting the conditions of competition between the new investment and the established enterprises. Any TRIM so applied to a new investment shall be notified to the Council for Trade in Goods. The terms of such a TRIM shall be equivalent in their competitive effect to those applicable to the established enterprises, and it shall be terminated at the same time.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Article 5.1

9. At its meeting of 20 February 1995, the Council for Trade in Goods adopted a standard format for notifications required under Article 5.1[12], which had been recommended by the Preparatory Committee for the World Trade Organization.[13]

10. With respect to Article 5.1 notifications, at its meeting on 3 April 1995, the General Council adopted the recommendation of the TRIMs Committee relating to notifications required under Article 5.1.[14]

2. Article 5. 3

11. At its meeting of 3 and 8 May 2000, the General Council agreed to "direct the Council for Trade in Goods to give positive consideration to individual requests presented in accordance with Article 5.3 by developing countries for extension of transition periods for implementation of the TRIMs Agreement."[15]

12. At its meeting of 31 July 2001, the Council for Trade in Goods adopted an extension of the transitional period for the elimination of TRIMs for seven developing countries at their request.[16] The extension lasted until the end of 2001. At its meeting of 5 November 2001, the Council for Trade in Goods adopted an additional extension of the transition period for six of these Members and for Thailand.[17] The length of the extension varied depending on the Member concerned.[18]

13. At its meeting of 20 December 2001 Colombia was granted by the General Council a waiver of its TRIMS obligations for certain bean products until 31 December 2003.[19]

14. On 22 December 2003, Pakistan made a request to the Council for Trade in Goods for a three-year extension of the transition period in which to eliminate its remaining TRIMs. As of December 2004, a decision on this request is still pending.[20]

3. Article 5.5

15. A standard format has been adopted for notifications made pursuant to this provision.[21] However, to date no such notifications have been made to the Council for Trade in Goods.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Transparency

1. Members reaffirm, with respect to TRIMs, their commitment to obligations on transparency and notification in Article X of GATT 1994, in the undertaking on "Notification" contained in the Understanding Regarding Notification, Consultation, Dispute Settlement and

[12] G/C/M/1, Section 2(A).
[13] PC/IPL/8.
[14] WT/GC/M/3, Section 5. The text of the decision can be found in WT/L/64.
[15] WT/GC/M/55, Annex II, the third bullet point.
[16] These seven countries were: Argentina (G/L/460), Colombia (G/L/461),Malaysia (G/L/462), Mexico (G/L/463), Philippines (G/L/464), Romania (G/L/465), Pakistan (G/L/466).
[17] The first extension to Thailand was granted in a waiver, adopted by the General Council at its meeting of 31 July 2001 (WT/L/410). The waiver expired the 31 December 2002. The waiver stated that after this period, if another extension proved necessary, it would be granted by a decision of the Council of Trade in Goods. This new extension was adopted by the Council for Trade in Goods at its meeting of 5 November 2001 (G/L/504).
[18] Argentina – G/L/497 (31 December 2003),, Malaysia – G/L/499 (31 December 2003), Mexico – G/L/500 (31 December 2003), Pakistan – G/L/501 (31 December 2003), Philippines – G/L/502 (31 June 2003), Romania – G/L/503 (31 May 2003), Thailand – G/L/504 (31 December 2003).
[19] G/L/441. The waiver confirmed the decision to extend the transitional period for the elimination of TRIMs for Colombia that the Council of Trade in Goods had adopted at its meeting of 5 November 2001. G/L/498.
[20] G/C/W/501.
[21] G/TRIMS/3.

Surveillance adopted on 28 November 1979 and in the Ministerial Decision on Notification Procedures adopted on 15 April 1994.

2. Each Member shall notify the Secretariat of the publications in which TRIMs may be found, including those applied by regional and local governments and authorities within their territories.

3. Each Member shall accord sympathetic consideration to requests for information, and afford adequate opportunity for consultation, on any matter arising from this Agreement raised by another Member. In conformity with Article X of GATT 1994 no Member is required to disclose information the disclosure of which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Article 6.2

16. At its meetings of 30 September and 1 November 1996, the TRIMs Committee decided that Members would provide the Secretariat with the name(s) of publication(s) in which TRIMs may be found.[22]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Committee on Trade-Related Investment Measures

1. A Committee on Trade-Related Investment Measures (referred to in this Agreement as the "Committee") is hereby established, and shall be open to all Members. The Committee shall elect its own Chairman and Vice-Chairman, and shall meet not less than once a year and otherwise at the request of any Member.

2. The Committee shall carry out responsibilities assigned to it by the Council for Trade in Goods and shall afford Members the opportunity to consult on any matters relating to the operation and implementation of this Agreement.

3. The Committee shall monitor the operation and implementation of this Agreement and shall report thereon annually to the Council for Trade in Goods.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. General

(a) Rules of procedure

17. At its meeting on 1 December 1995, the Council for Trade in Goods approved the rules of procedure for the TRIMs Committee.[23]

18. The TRIMs Committee reports to the Council for Trade in Goods on an annual basis.[24]

(b) Observership

19. With respect to the observership for the TRIMs Committee, see Chapter on *WTO Agreement*, Section XII.B.1(b) and Section XXVI.[25]

2. Article 7.2

20. At its meeting on 20 February 1995 the Council for Trade in Goods, in approving the standard format for notifications specified under Article 5.1 and 5.5 of the Agreement, agreed to a proposal made by the Chairman of the Committee to the effect that the TRIMs Committee would carry out the task assigned to the Council for Trade in Goods with respect to notifications of TRIMs.[26]

21. At its meeting of 7 May 2002, the Council for Trade in Goods adopted a decision in order to assign to the Committee on TRIMs the work for continued discussion on implementation issues, relating to special treatment for developing countries. The decision stated that:

> "Members agree in accordance with Article 7.2 of the TRIMs Agreement, the CTG will assign to the Committee on TRIMs the responsibility for conducting the work on the outstanding implementation issues contained in tirets 37–40 of the document JOB(01)152/Rev.1. The TRIMs committee shall report regularly on the progress of its work to the CTG, which will report to the Trade Negotiating Committee in accordance with paragraph 12 of the Doha Ministerial Declaration."[27]

22. In its report to the General Council, the TRIMs Committee noted that it had considered two proposals on special and differential treatment submitted by the African Group[28] with respect to Article 4 and Article 5.3 of the TRIMs Agreement.

---

[22] G/TRIMS/M/5, Section B. The text of the decision can be found in G/TRIMS/5.
[23] G/C/M/7, Section 2.
[24] The reports are contained in documents G/L/37, 133, 193, 259, 319, 390, 589, 649, 705 and 705/Corr.1.
[25] On 17 March 1999, the TRIMs Committee granted regular observer status to those organizations which had observer status on an ad hoc basis, see G/TRIMS/M/6.
[26] G/C/M/1, para. 2.1.
[27] G/C/M/60, Section VI.
[28] TN/CTD/W/3/Rev.2.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Consultation and Dispute Settlement

The provisions of Articles XXII and XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding, shall apply to consultations and the settlement of disputes under this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

23. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *TRIMs Agreement* were invoked:

Case Name	Case Number	Invoked Articles
1 *EC – Bananas III*	WT/DS27	Articles 2.1 and 5
2 *Indonesia – Autos*	WT/DS54, WT/DS55, WT/DS59, WT/DS64	Articles 2.1 and 5.4
3 *Canada – Autos*	WT/DS139, WT/DS142	Article 2
4 *India – Autos*	WT/DS146, WT/DS175	Articles 2.1 and 2.2
5 *Canada – Wheat Exports and Grain Imports*	WT/DS276	Article 2.1

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Review by the Council for Trade in Goods

Not later than five years after the date of entry into force of the WTO Agreement, the Council for Trade in Goods shall review the operation of this Agreement and, as appropriate, propose to the Ministerial Conference amendments to its text. In the course of this review, the Council for Trade in Goods shall consider whether the Agreement should be complemented with provisions on investment policy and competition policy.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

24. In accordance with Article 9, at its meeting of 15 October 1999, the Council for Trade in Goods launched the review of the operation of the *TRIMs Agreement*.[29] Upon request by Members, a study on the use and effects of TRIMs and other performance requirements was jointly prepared by the WTO and UNCTAD Secretariats, which served as input for discussions under the Article 9 review of the *TRIMs Agreement*.[30]

XI. RELATIONSHIP WITH OTHER WTO AGREEMENTS

A. GATT 1994

1. Whether conflict exists

25. The Panel on *EC – Bananas III*, the Panel examined the import licensing procedures of the European Communities under GATT 1994, the Licensing Agreement and the *TRIMs Agreement*. After determining that the Licensing Agreement applied to tariff quotas, the Panel addressed the question whether GATT 1994 as well as the Licensing Agreement and the *TRIMs Agreement* applied to the European Communities import licensing procedures. The Panel defined the term "conflict" between WTO agreements, as laid down in the General Interpretative Note to Annex 1A; it held that a conflict exists when two obligations are mutually exclusive and where a rule in one agreement prohibits what a rule in another agreement explicitly permits:

> "As a preliminary issue, it is necessary to define the notion of 'conflict' laid down in the General Interpretative Note. In light of the wording, the context, the object and the purpose of this Note, we consider that it is designed to deal with (i) clashes between obligations contained in GATT 1994 and obligations contained in agreements listed in Annex 1A, where those obligations are mutually exclusive in the sense that a Member cannot comply with both obligations at the same time, and (ii) the situation where a rule in one agreement prohibits what a rule in another agreement explicitly permits.[31]
>
> However, we are of the view that the concept of 'conflict' as embodied in the General Interpretative Note does not relate to situations where rules contained in one of the Agreements listed in Annex 1A provide for

[29] G/C/M/41, Section 7.
[30] G/C/W/307 and G/C/W/307/Add.1.
[31] (*footnote original*) For instance, Article XI:1 of GATT 1994 prohibits the imposition of quantitative restrictions, while Article XI:2 of GATT 1994 contains a rather limited catalogue of exceptions. Article 2 of the Agreement on Textiles and Clothing ("ATC") authorizes the imposition of quantitative restrictions in the textiles and clothing sector, subject to conditions specified in Article 2:1–21 of the ATC. In other words, Article XI:1 of GATT 1994 prohibits what Article 2 of the ATC permits in equally explicit terms. It is true that Members could theoretically comply with Article XI:1 of GATT, as well as with Article 2 of the ATC, simply by refraining from invoking the right to impose quantitative restrictions in the textiles sector because Article 2 of the ATC authorizes rather than mandates the imposition of quantitative restrictions. However, such an interpretation would render whole Articles or sections of Agreements covered by the WTO meaningless and run counter to the object and purpose of many agreements listed in Annex 1A which were negotiated with the intent to create rights and obligations which in parts differ substantially from those of the GATT 1994. Therefore, in the case described above, we consider that the General Interpretative Note stipulates that an obligation or authorization embodied in the ATC or any other of the agreements listed in Annex 1A prevails over the conflicting obligation provided for by GATT 1994.

different or complementary obligations in addition to those contained in GATT 1994. In such a case, the obligations arising from the former and GATT 1994 can both be complied with at the same time without the need to renounce explicit rights or authorizations. In this latter case, there is no reason to assume that a Member is not capable of, or not required to, meet the obligations of both GATT 1994 and the relevant Annex 1A Agreement."[32]

26. Based on its reading of the term "conflict" contained in the General Interpretative Note to Annex 1A, as referenced in paragraph 25 above, the Panel on *EC – Bananas III* went on to examine whether such conflict existed between the *Licensing Agreement* and the *TRIMs Agreement*, on the one hand, and provisions of the *GATT 1994*, on the other. The Panel concluded that this was not the case and that, consequently, "the provisions of GATT 1994, the Licensing Agreement and Article 2 of the TRIMS Agreement all apply to the EC's import licensing procedures for bananas":

"Proceeding on this basis, we have to ascertain whether the provisions of the Licensing Agreement and the TRIMs Agreement, to the extent they are within the coverage of the terms of reference of this Panel, contain any conflicting obligations which are contrary to those stipulated by Articles I, III, X, or XIII of GATT 1994, in the sense that Members could not comply with the obligations resulting from both Agreements at the same time or that WTO Members are authorized to act in a manner that would be inconsistent with the requirements of GATT rules. Wherever the answer to this question is affirmative, the obligation or authorization contained in the Licensing or TRIMs Agreement would, in accordance with the General Interpretative Note, prevail over the provisions of the relevant article of GATT 1994. Where the answer is negative, both provisions would apply equally.

Based on our detailed examination of the provisions of the Licensing Agreement, Article 2 of the TRIMs Agreement as well as GATT 1994, we find that no conflicting, i.e. mutually exclusive, obligations arise from the provisions of the three Agreements that the parties to the dispute have put before us. Indeed, we note that the first substantive provision of the Licensing Agreement, Article 1.2, requires Members to conform to GATT rules applicable to import licensing.

In the light of the foregoing discussion, we find that the provisions of GATT 1994, the Licensing Agreement and Article 2 of the TRIMS Agreement all apply to the EC's import licensing procedures for bananas."[33]

2. Relationship between Article III:4 of the GATT 1994 and Article 2 of the TRIMs Agreement

27. The Panel on *EC – Bananas III* found that the allocation of import licences to a particular category of operators was inconsistent with Article III:4 of *GATT 1994*.[34] With respect to the claim that this measure was also inconsistent with Article 2 of the *TRIMs Agreement*, the Panel, further to noting that the *TRIMs Agreement* essentially interprets and clarifies the provisions of Article III where trade-related investment measures are concerned, decided to resort to judicial economy:

"[W]e first examine the relationship of the TRIMs Agreement to the provisions of GATT. We note that with the exception of its transition provisions[35] the TRIMs Agreement essentially interprets and clarifies the provisions of Article III (and also Article XI) where trade-related investment measures are concerned. Thus the TRIMs Agreement does not add to or subtract from those GATT obligations, although it clarifies that Article III:4 may cover investment-related matters.

We emphasize that in view of the importance of the TRIMs Agreement in the framework of the agreements covered by the WTO, we have examined the claims and legal arguments advanced by the parties under the TRIMs Agreement carefully. However, for the reasons stated in the previous paragraph, we do not consider it necessary to make a specific ruling under the TRIMs Agreement with respect to the eligibility criteria for the different categories of operators and the allocation of certain percentages of import licences based on operator categories. On the one hand, a finding that the measure in question would not be considered a trade-related investment measure for the purposes of the TRIMs Agreement would not affect our findings in respect of Article III:4 since the scope of that provision is not limited to TRIMs and, on the other hand, steps taken to bring EC licensing procedures into conformity with Article III:4 would also eliminate the alleged non-conformity with obligations under the TRIMs Agreement."[36]

28. In *Indonesia – Autos*, the European Communities and the United States claimed that the Indonesian 1993 car programme, by providing for tax benefits for finished cars incorporating a certain percentage value of domestic parts and components, and for customs duty benefits for imported parts and components used in cars incorporating a certain percentage value of domestic products, violated the provisions of Article 2 of the *TRIMs Agreement*, and Article III:4 of the *GATT 1994*. Japan, the European Communities and the United States also claimed that the Indonesian 1996 car programme, by providing for local content requirements

[32] Panel Report on *EC – Bananas III*, paras. 7.159–7.160.
[33] Panel Report on *EC – Bananas III*, paras. 7.161–7.163.
[34] Panel Report on *EC – Bananas III*, para. 7.182.
[35] (*footnote original*) We have already dismissed the Complainants' claim under the transition provisions of Article 5 of the TRIMs Agreement because Article 5 was not listed in the request for the establishment of the Panel as required by Article 6.2 of the DSU.
[36] Panel Report on *EC – Bananas III*, paras. 7.185–7.186.

linked to tax benefits for National Cars (which by definition incorporated a certain percentage value of domestic products), and to customs duty benefits for imported parts and components used in National Cars, violated the provisions of Article 2 of the *TRIMs Agreement* and Article III:4 of the *GATT 1994*. In response to these claims, the Panel analysed the relationship between the *TRIMs Agreement* and Article III of *GATT 1994*, holding that "on its face the TRIMs Agreement is a fully fledged agreement in the WTO system":

> "Since the complainants have raised claims that the local content requirements of the car programmes violate both the provisions of Article III:4 of GATT and Article 2 of the TRIMs Agreement, we must consider which claims to examine first. In deciding which claims to examine first, we must, initially, address the relationship between Article III of GATT and the TRIMs Agreement.
>
> In this regard, we note first that on its face the TRIMs Agreement is a fully fledged agreement in the WTO system. The TRIMs Agreement is not an 'Understanding to GATT 1994', unlike the six Understandings which form part of the GATT 1994. The TRIMs Agreement and Article III:4 prohibit local content requirements that are TRIMs and therefore can be said to cover the same subject matter. But when the TRIMs Agreement refers to 'the provisions of Article III', it refers to the substantive aspects of Article III; that is to say, conceptually, it is the ten paragraphs of Article III that are referred to in Article 2.1 of the TRIMs Agreement, and not the application of Article III in the WTO context as such. Thus if Article III is not applicable for any reason not related to the disciplines of Article III itself, the provisions of Article III remain applicable for the purpose of the TRIMs Agreement. This view is reinforced by the fact that Article 3 of the TRIMs Agreement contains a distinct and explicit reference to the general exceptions to GATT. If the purpose of the TRIMs Agreement were to refer to Article III as applied in the light of other (non Article III) GATT rules, there would be no need to refer to such general exceptions.[37]"[38]

29. The Panel on *Indonesia – Autos* found confirmation for its finding that the *TRIMs Agreement* was "a fully fledged agreement in the WTO system" in the fact that the *TRIMs Agreement* had introduced "special transitional provisions including notification requirements". Subsequently, referring to the Appellate Body Report in *EC – Bananas III*, the Panel then held that it would begin its analysis with the *TRIMs Agreement*, because "the TRIMs Agreement is more specific than Article III:4 as far as the claims under consideration are concerned":

> "Moreover, it has to be recognized that the TRIMs Agreement, in addition to interpreting and clarifying the provisions of Article III where trade-related investment measures are concerned, has introduced special transitional provisions including notification requirements.[39] This reinforces the conclusion that the TRIMs Agreement has an autonomous legal existence, independent from that of Article III. Consequently, since the TRIMs Agreement and Article III remain two legally distinct and independent sets of provisions of the WTO Agreement, we find that even if either of the two sets of provisions were not applicable the other one would remain applicable. And to the extent that complainants have raised separate and distinct claims under Article III:4 of GATT and the TRIMs Agreement, each claim must be addressed separately.
>
> As to which claims, those under Article III:4 of GATT or Article 2 of the TRIMs Agreement, to examine first, we consider that we should first examine the claims under the TRIMs Agreement since the TRIMs Agreement is more specific than Article III:4 as far as the claims under consideration are concerned. A similar issue was presented in *Bananas III*, where the Appellate Body discussed the relationship between Article X of GATT and Article 1.3 of the Licensing Agreement and concluded that the Licensing Agreement being more specific it should have been applied first.[40] This is also in line with the approach of the panel and the Appellate Body in the *Hormones* dispute, where the measure at issue was examined first under the SPS Agreement since the measure was alleged to be an SPS measure."[41]

30. The Panel on *Indonesia – Autos* found that the tax and tariff benefits contingent on meeting local requirements under the Indonesian car programmes constituted "advantages" within the meaning of the chapeau of paragraph 1 of the Illustrative List of TRIMs, and as a result were inconsistent with Article 2.1 of the *TRIMs Agreement*.[42] The Panel then decided that it was unnec-

---

[37] (*footnote original*) We note that a similar drafting technique was used with the TRIPS Agreement which cross-refers to provisions of other international treaties.

[38] Panel Report on *Indonesia – Autos*, paras. 14.60–14.61.

[39] (*footnote original*) We note that Indonesia has put emphasis on a particular statement of the *Bananas III* panel concerning the relationship between Article III of GATT and the TRIMs Agreement. We consider that that statement has to be understood in the particular context of that dispute between two developed countries (no transition period was therefore applicable) where the panel had already reached a conclusion that the measure at issue violated Article III:4 of GATT. Therefore there was no need to further discuss the TRIMs Agreement since any action to remedy the inconsistency found under Article III:4 of GATT would necessarily remedy inconsistencies under the TRIMs Agreement. In the present case, we have to address the legal relationship between these two agreements.

[40] (*footnote original*) The Appellate Body in *EC – Bananas III* stated in paragraph 204: "Although Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures. If the Panel had done so, then there would have been no need for it to address the alleged inconsistency with Article X:3(a) of the GATT 1994."

[41] Panel Report on *Indonesia – Autos*, paras. 14.62–14.63.

[42] Panel Report on *Indonesia – Autos*, paras. 14.91–14.92.

essary to consider claims raised with respect to these measures under Article III:4 of *GATT 1994*:

> "The complainants have claimed that the local content requirements under examination, and which we find are inconsistent with the TRIMs Agreement, also violate the provisions of Article III:4 of GATT. Under the principle of judicial economy,[43] a panel only has to address the claims that must be addressed to resolve a dispute or which may help a losing party in bringing its measures into conformity with the WTO Agreement. The local content requirement aspects of the measures at issue have been addressed pursuant to the claims of the complainants under the TRIMs Agreement. We consider therefore that action to remedy the inconsistencies that we have found with Indonesia's obligations under the TRIMs Agreement would necessarily remedy any inconsistency that we might find with the provisions of Article III:4 of GATT. We recall our conclusion that non applicability of Article III would not affect as such the application of the TRIMs Agreement. We consider therefore that we do not have to address the claims under Article III:4, nor any claim of conflict between Article III:4 of GATT and the provisions of the SCM Agreement."[44]

31. In *Canada – Autos*, the complainants raised claims pertaining to conditions concerning the level of Canadian value added and the maintenance of a certain ratio between the net sales value of vehicles produced in Canada and the net sales value of vehicles sold for consumption in Canada. These claims were based upon both Article III:4 of the *GATT 1994* and the *TRIMs Agreement*. The Panel, in noting that claims were raised under both Article III:4 of *GATT 1994* and the *TRIMs Agreement*, decided to examine first the claims raised under Article III:4 of *GATT 1994*. The Panel first took note of the findings of the previous two panels on the issue of the relationship between Article III:4 of the *GATT 1994* and the *TRIMs Agreement*:

> "We note that, in two recent dispute settlement proceedings, consideration has been given to the issue of the sequence of the examination of claims raised with respect to the same measure under Article III:4 of the GATT and the TRIMs Agreement.
>
> In *EC – Bananas III* (ECU), claims were raised under Article III:4 of the GATT and Article 2.1 of the TRIMs Agreement regarding aspects of the European Communities import licensing procedures for bananas. The panel in that dispute decided to treat the claims under Article 2.1 of the TRIMs Agreement together with its consideration of the claims under Article III:4 of the GATT. The panel found that the allocation to certain operators of a percentage of the licences allowing the importation of third-country and non-traditional ACP bananas at in-quota tariff rates was inconsistent with the requirements of Article III:4 of the GATT. In light of that finding, the panel did not consider it necessary to make a specific ruling on whether this aspect of these import licensing procedures was also inconsistent with Article 2.1 of the TRIMs Agreement.
>
> In *Indonesia – Autos*, claims under Article III:4 of the GATT and Article 2.1 of the TRIMs Agreement were raised with respect to certain local content measures applied by Indonesia regarding automobiles. The panel in that dispute decided that it should first examine the claims under the TRIMs Agreement on the grounds that 'the TRIMs Agreement is more specific than Article III:4 as far as the claims under consideration are concerned'. After finding that the measures at issue were inconsistent with Article 2.1 of the TRIMs Agreement, the panel determined that it was not necessary to make a finding on the question of whether these measures were inconsistent with Article III:4 of the GATT."[45]

32. After reviewing previous panel findings on the relationship between Article III:4 of the *GATT 1994* and the *TRIMs Agreement*, the Panel on *Canada – Autos* held that it was not "persuaded that the TRIMs Agreement can be properly characterized as being more specific than Article III:4 in respect of the claims raised by the complainants in the present case".

> "In the present dispute, the parties have not explicitly addressed this question of which of the claims raised under Article III:4 of the GATT and Article 2.1 of the TRIMs Agreement should be examined first. Implicit in the order in which they have presented their claims is the view that these claims should be addressed first under Article III:4 of the GATT. While we are aware of the statement made by the Appellate Body in *EC – Bananas III*, and referred to by the panel in *Indonesia – Autos,* that a claim should be examined first under the agreement which is the most specific with respect to that claim, we are not persuaded that the TRIMs Agreement can be properly characterized as being more specific than Article III:4 in respect of the claims raised by the complainants in the present case. Thus, we note that there is disagreement between the parties not only on whether the measures at issue can be considered to be 'trade-related investment measures' but also on whether the Canadian value added requirements and ratio requirements are explicitly covered by the Illustrative List annexed to the TRIMs Agreement. It would thus appear that, assuming that the measures at issue are 'trade-related investment measures', their consistency with Article III:4 of the GATT may not be able to be determined simply on the basis of the text of the Illustrative List but may require an analysis based on the wording of Article III:4. Consequently, we doubt that examining the claims first under the TRIMs Agreement will enable us to resolve the dispute before us in a more efficient manner than examining these claims under Article III:4.

---

[43] (*footnote original*) As defined by the Appellate Body in *US – Wool Shirts and Blouses*, pp. 17–20.

[44] Panel Report on *Indonesia – Autos*, para. 14.93.

[45] Panel Report on *Canada – Autos*, paras. 10.60–10.62.

In light of the foregoing considerations, we decide that, consistent with the approach of the panel in *EC – Bananas III*, we will examine the claims in question first under Article III:4 of the GATT."[46]

33. After finding that certain requirements concerning domestic value added were inconsistent with Article III:4 of the *GATT 1994*,[47] the Panel on *Canada – Autos* addressed the issue of why it considered that it was not necessary to address claims that had been raised with respect to these requirements under the *TRIMs Agreement*. The Panel stated:

"In light of the finding in the preceding paragraph, we do not consider it necessary to make a specific ruling on whether the CVA requirements provided for in the MVTO 1998 and the SROs are inconsistent with Article 2.1 of the TRIMs Agreement. We believe that the Panel's reasoning in *EC – Bananas III* as to why it did not make a finding under the TRIMs Agreement after it had found that certain aspects of the EC licensing procedures were inconsistent with Article III:4 of the GATT also applies to the present case. Thus, on the one hand, a finding in the present case that the CVA requirements are not trade-related investment measures for the purposes of the TRIMs Agreement would not affect our finding in respect of the inconsistency of these requirements with Article III:4 of the GATT since the scope of that provision is not limited to trade-related investment measures. On the other hand, steps taken by Canada to bring these measures into conformity with Article III:4 would also eliminate the alleged inconsistency with obligations under the TRIMs Agreement."[48]

34. The Panel on *Canada – Autos* rejected a claim that the application of certain requirements regarding the ratio of sales of vehicles produced by a manufacturer in Canada to the net sales value of vehicles of the same class sold for consumption in Canada by the manufacturer was in violation of Article III:4 of the *GATT 1994*. In view of that finding, the Panel considered that it also had to dismiss the claim raised under Article 2.1 of the *TRIMs Agreement* with respect to this measure. The Panel noted:

"In light of the foregoing considerations, we find that the European Communities has failed to demonstrate that, by applying ratio requirements under the MVTO 1998 and the SROs as one of the conditions determining the eligibility of duty-free importation of motor vehicles, Canada is according to motor vehicles imported duty free less favourable treatment with respect to their internal sale than to like domestic motor vehicles. The claim of the European Communities regarding the inconsistency of the ratio requirements with Article III:4 must therefore be rejected. Because of this finding with respect to the claim of the European Communities regarding the consistency of the ratio requirements with Article III:4 of the GATT, we must also reject the claim of the European Communities that these requirements are inconsistent with Article 2.1 of the TRIMs Agreement. We note in this regard that the European Communities claims that these ratio requirements are trade-related investment measures which are inconsistent with Article 2.1 of the TRIMs Agreement because they violate Article III:4 of the GATT."[49]

35. In *India – Autos*, the United States and the European Communities alleged violations of Articles III:4 and XI:1 of the *GATT 1994* and Article 2 of the *TRIMs Agreement* in relation to certain Indian measures affecting trade and investment in the automotive industry, that India maintained on balance-of-payment grounds. The Panel, in noting that the measures at issue could violate both the *GATT 1994* and the *TRIMs Agreement*, decided to first examine *GATT 1994* provisions. The Panel, commenced its analysis of the relationship between the *GATT 1994* and the *TRIMs Agreement* in the light of the Panel Report on *Canada – Autos*[50] and held that it was "not convinced that, as a general matter, the TRIMS Agreement could inherently be characterised as more specific than the relevant GATT provisions":

"As a general matter, even if there was some guiding principle to the effect that a specific covered Agreement might appropriately be examined before a general one where both may apply to the same measure, it might be difficult to characterize the TRIMs Agreement as necessarily more 'specific' than the relevant GATT provisions. Although the TRIMS Agreement 'has an autonomous legal existence', independent from the relevant GATT provisions, as noted by the *Indonesia – Autos* panel, the substance of its obligations refers directly to Articles III and XI of the GATT, and clarifies their meaning, *inter alia*, through an Illustrative list. On one view, it simply provides additional guidance as to the identification of certain measures considered to be inconsistent with Articles III:4 and XI:1 of the GATT 1994. On the other hand, the TRIMs Agreement also introduces rights and obligations that are specific to it, through its notification mechanism and related provisions. An interpretative question also arises in relation to the TRIMs Agreement as to whether a complainant must separately prove that the measure in issue is a 'trade-related investment measure'. For either of these reasons, the TRIMs Agreement might be arguably more specific in that it provides additional rules concerning the specific measures it covers. The Panel is therefore not convinced that, as a general matter, the TRIMs Agreement could inherently be characterized as more specific than the relevant GATT provisions."[51]

[51] Panel Report on *India – Autos*, para. 7.157.

36. After noticing that this case was not one of those in which the order of examination of claims could have any practical significance, the Panel in *India – Autos* took into consideration the order given by the complainants in their replies to specific questions from the Panel on the proper order of the examination of their claims and the impact that the order selected could have on the potential application of the principle of judicial economy in the case. As a result, the Panel decided first to examine the *GATT 1994* provisions.[52] After finding that both the indigenization and the neutralization conditions were inconsistent with Articles III:4 and XI:1 of the *GATT 1994*, the Panel in *India – Autos* applied the principle of judicial economy and did not separately consider whether such conditions also violated the provisions of the *TRIMs Agreement*.[53]

B. SCM AGREEMENT

37. In *Indonesia – Autos*, claims regarding various Indonesian measures adopted pursuant to the Indonesian National Car programmes were raised under the *GATT 1994*, the *SCM Agreement* and the *TRIMs Agreement*. In considering an argument advanced by Indonesia that that the measures in dispute were covered only by the *SCM Agreement*, the Panel discussed *inter alia* whether a measure can be covered at the same time by the provisions of the *TRIMs Agreement* and those of the *SCM Agreement*. The Panel began by considering whether there was a conflict between the *SCM Agreement* and the *TRIMs Agreement*. The Panel first noted that the *General Interpretative Note to Annex 1A* did not apply to the relationship between these two agreements and that this relationship would have to be considered "in the light of the general international law presumption against conflicts":

> "In considering this issue ... we need to examine whether there is a general conflict between the SCM Agreement and the TRIMs Agreement. We note first that the interpretative note to Annex IA of the WTO Agreement is not applicable to the relationship between the SCM Agreement and the TRIMs Agreement. The issue of whether there might be a general conflict between the SCM Agreement and the TRIMs Agreement would therefore need to be examined in the light of the general international law presumption against conflicts and the fact that under public international law a conflict exists in the narrow situation of mutually exclusive obligations for provisions that cover the same type of subject matter."[54]

38. The Panel on *Indonesia – Autos* then went on to hold that "the SCM Agreement and the TRIMs Agreement are concerned with different types of obligations and cover different subject matters":

> "In this context the fact that the drafters included an express provision governing conflicts between GATT and the other Annex 1A Agreements, but did not include any such provision regarding the relationship between the other Annex 1A Agreements, at a minimum reinforces the presumption in public international law against conflicts. With respect to the nature of obligations, we consider that, with regard to local content requirements, the SCM Agreement and the TRIMs Agreement are concerned with different types of obligations and cover different subject matters. In the case of the SCM Agreement, what is prohibited is the grant of a subsidy contingent on use of domestic goods, not the requirement to use domestic goods as such. In the case of the TRIMs Agreement, what is prohibited are TRIMs in the form of local content requirements, not the grant of an advantage, such as a subsidy.
>
> A finding of inconsistency with Article 3.1(b) of the SCM Agreement can be remedied by removal of the subsidy, even if the local content requirement remains applicable. By contrast, a finding of inconsistency with the TRIMs Agreement can be remedied by a removal of the TRIM that is a local content requirement even if the subsidy continues to be granted. Conversely, for instance, if a Member were to apply a TRIM (in the form of local content requirement), as a condition for the receipt of a subsidy, the measure would continue to be a violation of the TRIMs Agreement if the subsidy element were replaced with some other form of incentive. By contrast, if the local content requirements were dropped, the subsidy would continue to be subject to the SCM Agreement, although the nature of the relevant discipline under the SCM Agreement might be affected. Clearly, the two agreements prohibit different measures. We note also that under the TRIMs Agreement, the advantage made conditional on meeting a local content requirement may include a wide variety of incentives and advantages, other than subsidies. There is no provision contained in the SCM Agreement that obliges a Member to violate the TRIMs Agreement, or vice versa.
>
> We consider that the SCM and TRIMs Agreements cannot be in conflict, as they cover different subject matters and do not impose mutually exclusive obligations. The TRIMs Agreement and the SCM Agreement may have overlapping coverage in that they may both apply to a single legislative act, but they have different focus, and they impose different types of obligations."[55]

39. The Panel on *Indonesia – Autos* found support for its finding referenced in paragraphs 37 and 38 above in the Appellate Body Reports in *Canada – Periodicals* and *EC – Bananas III*:

---

[52] Panel Report *India – Autos*, paras. 7.158–7.162.
[53] Panel Report *India – Autos*, paras. 7.323–7.324.
[54] Panel Report on *Indonesia – Autos*, para. 14.49.
[55] Panel Report on *Indonesia – Autos*, paras. 14.50–14.52.

"In support of this finding, we agree with the principles developed in the *Periodicals*[56] and *Bananas III*[57] cases concerning the relationship between two WTO agreements at the same level within the structure of WTO agreements. It was made clear that, while the same measure could be scrutinized both under GATT and under GATS, the specific aspects of that measure to be examined under each agreement would be different. In the present case, there are in fact two different, albeit linked, aspects of the car programmes for which the complainants have raised claims. Some claims relate to the existence of local content requirements, alleged to be in violation of the TRIMs Agreement, and the other claims relate to the existence of subsidies, alleged to cause serious prejudice within the meaning of the SCM Agreement.

[W]e do not consider that the application of the TRIMs Agreement to this dispute would reduce the SCM Agreement, and Article 27.3 thereof, to 'inutility'. On the contrary, with Article 27.3 of the SCM Agreement, those subsidy measures of developing countries that are contingent on compliance with TRIMs (in the form of local content requirement) and that are permitted during the transition period provided under Article 5 of the TRIMs Agreement, are not prohibited by Article 3.1(b) of the SCM Agreement, for the transition period specified in Article 27.3 of the SCM Agreement.

We find that there is no general conflict between the SCM Agreement and the TRIMs Agreement. Therefore, to the extent that the Indonesian car programmes are TRIMs and subsidies, both the TRIMs Agreement and the SCM Agreement are applicable to this dispute."[58]

XII. ANNEX I

A. TEXT OF ANNEX I

ILLUSTRATIVE LIST

1. TRIMs that are inconsistent with the obligation of national treatment provided for in paragraph 4 of Article III of GATT 1994 include those which are mandatory or enforceable under domestic law or under administrative rulings, or compliance with which is necessary to obtain an advantage, and which require:

(a) the purchase or use by an enterprise of products of domestic origin or from any domestic source, whether specified in terms of particular products, in terms of volume or value of products, or in terms of a proportion of volume or value of its local production; or

(b) that an enterprise's purchases or use of imported products be limited to an amount related to the volume or value of local products that it exports.

2. TRIMs that are inconsistent with the obligation of general elimination of quantitative restrictions provided for in paragraph 1 of Article XI of GATT 1994 include those which are mandatory or enforceable under domestic law or under administrative rulings, or compliance with which is necessary to obtain an advantage, and which restrict:

(a) the importation by an enterprise of products used in or related to its local production, generally or to an amount related to the volume or value of local production that it exports;

(b) the importation by an enterprise of products used in or related to its local production by restricting its access to foreign exchange to an amount related to the foreign exchange inflows attributable to the enterprise; or

(c) the exportation or sale for export by an enterprise of products, whether specified in terms of particular products, in terms of volume or value of products, or in terms of a proportion of volume or value of its local production.

B. INTERPRETATION AND APPLICATION OF ANNEX I

40. With respect to references to the Illustrative List contained in Annex I, see paragraphs 5 and 30 above.

---

[56] (*footnote original*) In *Canada – Periodicals*, the Appellate Body stated at page 19: "The entry into force of the GATS, as Annex 1B of the WTO Agreement, does not diminish the scope of application of the GATT 1994".

[57] (*footnote original*) In *EC – Bananas III*, the Appellate Body stated in paragraph 221: "The second issue is whether the GATS and the GATT are mutually exclusive agreements. (. . .) Given the respective scope of application of the two agreements, they may or may not overlap, depending on the nature of the measures at issue. Certain measures could be found to fall exclusively within the scope of the GATT 1994, when they affect trade in goods. certain measures could be found to fall exclusively within the scope of the GATS, when they affect the supply of services as services. There is yet a third category of measures that could be found to fall within the scope of both the GATT 1994 and the GATS. (. . .) [W]hile the same measure could be scrutinized under both agreements, the specific aspects of that measure examined under each agreement could be different."

Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 (Anti-Dumping Agreement)

I. ARTICLE 1 523
A. TEXT OF ARTICLE 1 523
B. INTERPRETATION AND APPLICATION OF ARTICLE 1 523
1. General 523
(a) "anti-dumping measure" 523
(b) "initiated and conducted in accordance with the provisions of this Agreement" 523
(c) Relationship with other Articles 524

II. ARTICLE 2 524
A. TEXT OF ARTICLE 2 524
B. INTERPRETATION AND APPLICATION OF ARTICLE 2 526
1. General 526
(a) Period of data collection 526
(i) Recommendation by the Committee on Anti-Dumping Practices 526
(ii) The role of the investigation period 527
(b) Relationship with other paragraphs of Article 2 527
2. Article 2.1 528
(a) Conditions on sales transactions for the calculation of normal value 528
(i) Use of downstream sales 528
(b) Sales "in the ordinary course of trade" 528
(i) Definition of sales "in the ordinary course of trade" 528
(ii) Investigating authorities' discretion under Article 2.1 529
(iii) Sales not in the ordinary course of trade 529
Purpose of excluding sales not in the ordinary course of trade 529
Prices above or below the ordinary course of trade price 529
Scope of the investigating authorities' duties under Article 2.1 530
Sales between affiliated companies 530
(c) *Request for information* 530
(d) Relationship with other paragraphs of Article 2 530
(i) Article 2.2.1 530
(ii) Article 2.4 530
3. Article 2.2 530
(a) Request for cost information 530
(b) Article 2.2.1 530
(i) Article 2.2.1.1 531
Cost data requirements or elements 531
Positive obligations on investigating authorities 531
Consider all available evidence on the proper allocation of costs 531
Burden of proof 532
(c) Article 2.2.2 532
(i) Amounts based on actual data pertaining to production and sales of the like product 532
(ii) Use of low volume sales Selling, General and Administrative costs (SG&A) and profits data in constructing normal value 532
(iii) Priority of options 532
(iv) Relationship with Article 2.2.2 533
(v) Article 2.2.2(i) – "same general category of products" 533
(vi) Article 2.2.2(ii) – "weighted average" and data from "other exporters or producers" 534
(vii) Article 2.2.2(ii) – production and sales amounts "incurred and realized" 534
(viii) Article 2.2.2(ii) – should "weighted" average be based on the value or the volume of sales? 535
(ix) No separate "reasonability" test 535
(d) Relationship with other paragraphs of Article 2 536
4. Article 2.3 537
5. Article 2.4 537
(a) First sentence 537
(i) Fair comparison of export price and normal value 537
(ii) Relationship with other sentences 538
(b) Second sentence 538
(i) "sales made at as nearly as possible the same time" 538
(c) Third sentence: "Due allowance" 538
(i) "in each case, on its merits" 538
(ii) "differences which affect price comparability" 539
(iii) Differences in "terms and conditions of sale" 539
(d) Fourth sentence 541
(i) Legal effect 541
(ii) "costs . . . incurred between importation and resale" 541
(e) Fifth sentence 542
(f) Article 2.4.1 542
(i) Scope of Article 2.4.1 542
(ii) "required" 543
(iii) Relationship with Article 2.4 543
(g) Article 2.4.2 543
(i) "margins" 543
(ii) Weighted average normal value / weighted average export price 544
"comparable export transactions" 545
Non-comparable types 545
Sampling of domestic transactions 546
Multiple averages 546
Length of averaging periods 548
(iii) Weighted average / individual transactions 548
Targeted dumping 548
(h) Relationship between subparagraphs of Article 2.4 549
(i) Relationship with other paragraphs of Article 2 549

6. Article 2.6 549
7. Relationship with other Articles 549
8. Relationship with other WTO Agreements 549
(a) Article VI of the GATT 1994 549
(b) Article X of the GATT 1994 550

III. ARTICLE 3 550
A. TEXT OF ARTICLE 3 550
B. INTERPRETATION AND APPLICATION OF ARTICLE 3 551
1. General 551
(a) Relationship with other paragraphs of Article 3 551
(b) Period of data collection 551
(i) Jurisprudence 551
(ii) Recommendation by the Committee on Anti-Dumping Practices 552
2. Footnote 9 552
3. Article 3.1 552
(a) Significance of paragraph 1 within the context of Article 3 552
(b) Investigating authorities' obligation under Article 3.1 552
(i) "positive evidence" 552
Meaning of positive evidence 552
Scope of positive evidence 552
(ii) "Objective examination" 554
Concept of objective examination 554
Extent of the objective examination 554
Relationship with Article 3.4 555
(c) An objective examination based on positive evidence of "dumped imports" 555

PART I

I. ARTICLE 1

A. TEXT OF ARTICLE 1

Members hereby *agree* as follows:

Article 1[1]
Principles

An anti-dumping measure shall be applied only under the circumstances provided for in Article VI of GATT 1994 and pursuant to investigations initiated[1] and conducted in accordance with the provisions of this Agreement. The following provisions govern the application of Article VI of GATT 1994 in so far as action is taken under anti-dumping legislation or regulations.

(*footnote original*) [1] The term "initiated" as used in this Agreement means the procedural action by which a Member formally commences an investigation as provided in Article 5.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. General

(a) "anti-dumping measure"

1. The Appellate Body in *US – 1916 Act* rejected the argument that, based on the history of Article 1, "the phrase 'anti-dumping measure' refers *only* to definitive anti-dumping duties, price undertakings and provisional measures."[2] The Appellate Body stated that "the ordinary meaning of the phrase 'anti-dumping measure' seems to encompass all measures taken against dumping. We do not see in the words 'an anti-dumping measure' any explicit limitation to particular types of measures."[3]

(b) "initiated and conducted in accordance with the provisions of this Agreement"

2. Regarding a claim raised under Article 1, the Panel on *US – 1916 Act (EC)* noted that "if we find a violation of other provisions of the *Anti-Dumping Agreement*, it will be demonstrated that the anti-dumping investigation ... is not 'initiated and conducted in accordance with the provisions of this Agreement' and a breach of Article 1 will be established."[4]

3. The Panel on *EC – Tube or Pipe Fittings* rejected the assertion that in case of a devaluation in the fourth quarter of the period of investigation, Article 1 of the *Anti-Dumping Agreement* and Article VI of the *GATT*

[1] In Marrakesh, the Ministers adopted the Decision on Anti-Circumvention, see Section XXIV.
[2] Appellate Body Report on *US – 1916 Act*, para. 119.
[3] Appellate Body Report on *US – 1916 Act*, para. 119.
[4] Panel Report on *US – 1916 Act (EC)*, para. 6.208.

1994 require the investigating authority to base its determination only on the period following the devaluation to examine whether there was present dumping causing injury. The Panel stated that "Article 1 of the *Anti-Dumping Agreement* does not require an investigating authority to re-assess its own determination made on the basis of an examination of data pertaining to the IP prior to the imposition of an anti-dumping measure in the light of an event that occurred during the IP".[5]

(c) Relationship with other Articles

4. In *EC – Bed Linen*, the Panel touched on the relationship between Articles 1 and 15 in interpreting Article 15. See paragraph 585 below.

5. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with Articles 3, 5, 6, 7, 12, and paragraph 2 of Annex I of the *Anti-Dumping Agreement*. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement. There would be no basis to Mexico's claims under Articles 1, 9 and 18 of the AD Agreement, and Article VI of GATT 1994, if Guatemala were not found to have violated other provisions of the AD Agreement."[6] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims.

6. In *US – Stainless Steel*, addressing Korea's claim that "*because* certain provisions of the *AD Agreement* have been violated, Article VI of the GATT 1994 and Article 1 of the *AD Agreement* are consequently violated"[7], the Panel also stated: "[b]ecause of their dependent nature, we can perceive of no useful purpose that would be served by ruling on these claims. Accordingly, we do not consider it necessary to address them."[8]

7. The relationship between Article 1 and other provisions of the *Anti-Dumping Agreement* was discussed in *Guatemala – Cement II* and *US – Stainless Steel*. See paragraphs 5–6 above.

II. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Determination of Dumping

2.1 For the purpose of this Agreement, a product is to be considered as being dumped, i.e. introduced into the commerce of another country at less than its normal value, if the export price of the product exported from one country to another is less than the comparable price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country.

2.2 When there are no sales of the like product in the ordinary course of trade in the domestic market of the exporting country or when, because of the particular market situation or the low volume of the sales in the domestic market of the exporting country[2], such sales do not permit a proper comparison, the margin of dumping shall be determined by comparison with a comparable price of the like product when exported to an appropriate third country, provided that this price is representative, or with the cost of production in the country of origin plus a reasonable amount for administrative, selling and general costs and for profits.

(*footnote original*) [2] Sales of the like product destined for consumption in the domestic market of the exporting country shall normally be considered a sufficient quantity for the determination of the normal value if such sales constitute 5 per cent or more of the sales of the product under consideration to the importing Member, provided that a lower ratio should be acceptable where the evidence demonstrates that domestic sales at such lower ratio are nonetheless of sufficient magnitude to provide for a proper comparison.

2.2.1 Sales of the like product in the domestic market of the exporting country or sales to a third country at prices below per unit (fixed and variable) costs of production plus administrative, selling and general costs may be treated as not being in the ordinary course of trade by reason of price and may be disregarded in determining normal value only if the authorities[3] determine that such sales are made within an extended period of time[4] in substantial quantities[5] and are at prices which do not provide for the recovery of all costs within a reasonable period of time. If prices which are below per unit costs at the time of sale are above weighted average per unit costs for the period of investigation, such prices shall be considered to provide for recovery of costs within a reasonable period of time.

(*footnote original*) [3] When in this Agreement the term "authorities" is used, it shall be interpreted as meaning authorities at an appropriate senior level.
(*footnote original*) [4] The extended period of time should normally be one year but shall in no case be less than six months.
(*footnote original*) [5] Sales below per unit costs are made in substantial quantities when the authorities establish that the weighted average selling price of the transactions under consideration for the determination of the normal value is below the weighted average per unit costs, or that the volume of sales

[5] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.107.
[6] Panel Report on *Guatemala – Cement II*, para. 8.296.
[7] Panel Report on *US – Stainless Steel*, para. 6.138.
[8] Panel Report on *US – Stainless Steel*, para. 6.138.

below per unit costs represents not less than 20 per cent of the volume sold in transactions under consideration for the determination of the normal value.

2.2.1.1 For the purpose of paragraph 2, costs shall normally be calculated on the basis of records kept by the exporter or producer under investigation, provided that such records are in accordance with the generally accepted accounting principles of the exporting country and reasonably reflect the costs associated with the production and sale of the product under consideration. Authorities shall consider all available evidence on the proper allocation of costs, including that which is made available by the exporter or producer in the course of the investigation provided that such allocations have been historically utilized by the exporter or producer, in particular in relation to establishing appropriate amortization and depreciation periods and allowances for capital expenditures and other development costs. Unless already reflected in the cost allocations under this sub-paragraph, costs shall be adjusted appropriately for those non-recurring items of cost which benefit future and/or current production, or for circumstances in which costs during the period of investigation are affected by start-up operations.[6]

(*footnote original*) [6] The adjustment made for start-up operations shall reflect the costs at the end of the start-up period or, if that period extends beyond the period of investigation, the most recent costs which can reasonably be taken into account by the authorities during the investigation.

2.2.2 For the purpose of paragraph 2, the amounts for administrative, selling and general costs and for profits shall be based on actual data pertaining to production and sales in the ordinary course of trade of the like product by the exporter or producer under investigation. When such amounts cannot be determined on this basis, the amounts may be determined on the basis of:

(i) the actual amounts incurred and realized by the exporter or producer in question in respect of production and sales in the domestic market of the country of origin of the same general category of products;

(ii) the weighted average of the actual amounts incurred and realized by other exporters or producers subject to investigation in respect of production and sales of the like product in the domestic market of the country of origin;

(iii) any other reasonable method, provided that the amount for profit so established shall not exceed the profit normally realized by other exporters or producers on sales of products of the same general category in the domestic market of the country of origin.

2.3 In cases where there is no export price or where it appears to the authorities concerned that the export price is unreliable because of association or a compensatory arrangement between the exporter and the importer or a third party, the export price may be constructed on the basis of the price at which the imported products are first resold to an independent buyer, or if the products are not resold to an independent buyer, or not resold in the condition as imported, on such reasonable basis as the authorities may determine.

2.4 A fair comparison shall be made between the export price and the normal value. This comparison shall be made at the same level of trade, normally at the ex-factory level, and in respect of sales made at as nearly as possible the same time. Due allowance shall be made in each case, on its merits, for differences which affect price comparability, including differences in conditions and terms of sale, taxation, levels of trade, quantities, physical characteristics, and any other differences which are also demonstrated to affect price comparability.[7] In the cases referred to in paragraph 3, allowances for costs, including duties and taxes, incurred between importation and resale, and for profits accruing, should also be made. If in these cases price comparability has been affected, the authorities shall establish the normal value at a level of trade equivalent to the level of trade of the constructed export price, or shall make due allowance as warranted under this paragraph. The authorities shall indicate to the parties in question what information is necessary to ensure a fair comparison and shall not impose an unreasonable burden of proof on those parties.

(*footnote original*) [7] It is understood that some of the above factors may overlap, and authorities shall ensure that they do not duplicate adjustments that have been already made under this provision.

2.4.1 When the comparison under paragraph 4 requires a conversion of currencies, such conversion should be made using the rate

of exchange on the date of sale[8], provided that when a sale of foreign currency on forward markets is directly linked to the export sale involved, the rate of exchange in the forward sale shall be used. Fluctuations in exchange rates shall be ignored and in an investigation the authorities shall allow exporters at least 60 days to have adjusted their export prices to reflect sustained movements in exchange rates during the period of investigation.

(*footnote original*) [8] Normally, the date of sale would be the date of contract, purchase order, order confirmation, or invoice, whichever establishes the material terms of sale.

2.4.2 Subject to the provisions governing fair comparison in paragraph 4, the existence of margins of dumping during the investigation phase shall normally be established on the basis of a comparison of a weighted average normal value with a weighted average of prices of all comparable export transactions or by a comparison of normal value and export prices on a transaction-to-transaction basis. A normal value established on a weighted average basis may be compared to prices of individual export transactions if the authorities find a pattern of export prices which differ significantly among different purchasers, regions or time periods, and if an explanation is provided as to why such differences cannot be taken into account appropriately by the use of a weighted average-to-weighted average or transaction-to-transaction comparison.

2.5 In the case where products are not imported directly from the country of origin but are exported to the importing Member from an intermediate country, the price at which the products are sold from the country of export to the importing Member shall normally be compared with the comparable price in the country of export. However, comparison may be made with the price in the country of origin, if, for example, the products are merely transshipped through the country of export, or such products are not produced in the country of export, or there is no comparable price for them in the country of export.

2.6 Throughout this Agreement the term "like product" ("produit similaire") shall be interpreted to mean a product which is identical, i.e. alike in all respects to the product under consideration, or in the absence of such a product, another product which, although not alike in all respects, has characteristics closely resembling those of the product under consideration.

2.7 This Article is without prejudice to the second Supplementary Provision to paragraph 1 of Article VI in Annex I to GATT 1994.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

(a) Period of data collection

(i) Recommendation by the Committee on Anti-Dumping Practices

8. At its meeting of 4–5 May 2000, regarding appropriate periods of data collection, the Committee on Anti-Dumping Practices recommended with respect to original investigations to determine the existence of dumping and consequent injury:

"1. As a general rule:

(a) the period of data collection for dumping investigations normally should be twelve months, and in any case no less than six months, ending as close to the date of initiation as is practicable;

(b) the period of data collection for investigating sales below cost, and the period of data collection for dumping investigations, normally should coincide in a particular investigation;

(c) the period of data collection for injury investigations normally should be at least three years, unless a party from whom data is being gathered has existed for a lesser period, and should include the entirety of the period of data collection for the dumping investigation;

(d) In all cases the investigating authorities should set and make known in advance to interested parties the periods of time covered by the data collection, and may also set dates certain for completing collection and/or submission of data. If such dates are set, they should be made known to interested parties.

2. In establishing the specific periods of data collection in a particular investigation, investigating authorities may, if possible, consider practices of firms from which data will be sought concerning financial reporting and the effect this may have on the availability of accounting data. Other factors that may be considered include the characteristics of the product in question, including seasonality and cyclicality, and the existence of special order or customized sales.

3. In order to increase transparency of proceedings, investigating authorities should include in public notices or in the separate reports provided pursuant to Article 12.2 of the Agreement, an explanation of the reason for the selection of a particular period for data collection if it differs from that provided for in: paragraph 1 of this recommendation, national legislation, regulation, or established national guidelines."[9]

[9] G/ADP/M/16, Section I, in particular, para. 84. The text of the recommendation can be found in G/ADP/6, para. 3.

(ii) The role of the investigation period

9. The Appellate Body on *EC – Tube or Pipe Fittings* rejected an argument made by Brazil that the investigating authority was obliged to base its export price determination on data relating to only that part of the period of investigation that followed an important devaluation of the Brazilian currency. According to the Appellate Body "certain anomalous results would flow from Brazil's assertion that when a major change, such as in this case a steep and lasting devaluation, occurs at a late stage of the POI, the dumping determination should be confined to and based on the data following that major change. If such a change were to take place at the very end of the POI, Brazil's approach would imply that the determination would have to be based on the data of a very short period."[10] The Appellate Body reached the following conclusion with regard to the role of the period of investigation:

> "Permitting such discretionary selection of data from a period of time within the POI would defeat the objectives underlying investigating authorities' reliance on a POI for the purposes of a dumping determination. As the Panel correctly noted, the POI 'form[s] the basis for an objective and unbiased determination by the investigating authority.' Like the Panel and the parties to this dispute, we understand a POI to provide data collected over a sustained period of time, which period can allow the investigating authority to make a dumping determination that is less likely to be subject to market fluctuations or other vagaries that may distort a proper evaluation. We agree with the Panel that the standardized reliance on a POI, although not fixed in duration by the *Anti-Dumping Agreement*, assures the investigating authority and exporters of 'a consistent and reasonable methodology for determining present dumping', which anti-dumping duties are intended to offset. In contrast to this consistency and reliability, Brazil's approach would introduce a significant level of subjectivity on the part of the investigating authority to determine when data from a subset of the POI may be a reliable indicator of an exporter's future pricing behaviour. As the European Communities points out, the 'broad judgmental role' accorded investigating authorities by Brazil's approach is not consistent with the detailed nature of the rules and obligations of the *Anti-Dumping Agreement* governing various aspects of the dumping determination."[11]

10. The Appellate Body in *EC – Tube or Pipe Fittings* further considered that "the *Anti-Dumping Agreement* takes into account the possibility of such major changes occurring at a late stage of the POI, or even after the POI, not by allowing investigating authorities to pick and choose a subset of data or sub-periods of a POI according to their subjective considerations, but by review mechanisms."[12]

(b) Relationship with other paragraphs of Article 2

11. In *US – Stainless Steel*, the Panel found the United States treatment of unpaid export sales as direct selling costs to be inconsistent with Article 2.4. In the context of this finding, the Panel explained the relationship between Articles 2.1, 2.3 and 2.4, as follows:

> "In our view, both Article 2.3 and Article 2.4 play an important role in respect of the construction of export prices. When determining whether dumping exists, Article 2.1 usually requires a comparison of the *export price* with the comparable price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country. Article 2.3, however, authorizes a Member to *construct* the export price where, *inter alia*, the actual export price is unreliable because of association between the exporter and the importer. As discussed in section VI.C.2.(b)(i), it was pursuant to this authorization that the DOC disregarded the export price charged by POSCO to its affiliated importer POSAM in these investigations and instead constructed the export price.
>
> Further, Article 2.3 specifies that the export price may be constructed *on the basis of* the price at which the imported products are first resold to an independent buyer. It is clear from this language that, while the price charged to the first independent buyer is a starting-point for the construction of an export price, it is not *itself* the constructed export price. Nor does Article 2.3 itself contain any guidance regarding the methodology to be employed in order to construct the export price. Rather, the only rules governing the methodology for construction of an export price are set forth in Article 2.4 of the *AD Agreement*, which provides that, '[i]n the cases referred to in paragraph 3, allowances for costs, including duties and taxes, incurred between importation and resale, and for profits accruing, should also be made.' Although the United States repeatedly refers to these allowances as 'Article 2.3 adjustments', the provision governing these allowances is found in Article 2.4 and it is therefore evident to us that a claim regarding the appropriateness of allowances made to construct an export price may be made pursuant to that Article.[13]"[14]

[10] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 78
[11] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 80.
[12] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 81.
[13] (*footnote original*) The United States' perception seems to be based on the assumption that there is a watertight separation between the provision relating to construction of the export price (Article 2.3) and that relating to comparison between export price/constructed export price and normal value (Article 2.4). It is evident from the face of the text, however, that the rules regarding allowances related to construction of the export price are found in the paragraph relating to comparison.
[14] Panel Report on *US – Stainless Steel*, paras. 6.90–6.91.

2. Article 2.1

(a) Conditions on sales transactions for the calculation of normal value

12. In *US – Hot-Rolled Steel*, the Appellate Body considered that "[t]he text of Article 2.1 expressly imposes four conditions on sales transactions in order that they may be used to calculate normal value: first, the sale must be 'in the ordinary course of trade'; second, it must be of the 'like product'; third, the product must be 'destined for consumption in the exporting country'; and, fourth, the price must be 'comparable'".[15]

(i) Use of downstream sales

13. In *US – Hot-Rolled Steel*, the United States authorities, in calculating the normal value, discarded certain sales by exporters to their affiliates because these sales were not "in the ordinary course of trade". The authorities replaced the discarded sales with downstream sales of the product, transacted between the affiliate and the first independent buyer, which had been made "in the ordinary course of trade". Japan objected to the use of these sales in calculating normal value, under Article 2.1, because, according to it, it is implicit in that Article that the exporter must be the seller in order that a sales transaction may properly be used to calculate normal value and this was not the case here. The Appellate Body, reversing the Panel's finding, considered that Article 2.1 is silent in that respect and that, provided all four explicit conditions (see paragraph 12 above) in Article 2.1 are satisfied, the identity of the "seller of the 'like product' is not a ground for precluding the use of a downstream sales transaction when calculating normal value". However, the Appellate Body stressed that the identity of the seller is not irrelevant when calculating normal value since it may affect comparability, although that aspect is taken care by Article 2.4:

> "The text of Article 2.1 is, however, silent as to *who* the parties to relevant sales transactions should be. Thus, Article 2.1 does not expressly mandate that the sale be made by the exporter for whom a margin of dumping is being calculated. Nor does Article 2.1 expressly preclude that relevant sales transactions might be made downstream, between affiliates of the exporter and independent buyers. In our view, provided that all of the explicit conditions in Article 2.1 of the *Anti-Dumping Agreement* are satisfied, the *identity* of the seller of the 'like product' is not a ground for precluding the use of a downstream sales transaction when calculating normal value. In short, we see no reason to read into Article 2.1 an additional condition that is not expressed.
>
> We do not mean to suggest that the identity of the seller is irrelevant in calculating normal value under Article 2.1 of the *Anti-Dumping Agreement*. However, to ensure that prices are 'comparable', the *Anti-Dumping Agreement* provides a mechanism, in Article 2.4, which allows investigating authorities to take full account of the fact, as appropriate, that a relevant sale was not made by the exporter or producer itself, but was made by another party . . .
>
> . . .
>
> . . . the use of downstream sales prices may necessitate the provision of appropriate 'allowances', under Article 2.4, which take into account any differences demonstrated to affect price comparability. We will explore this issue further below."[16]

(b) Sales "in the ordinary course of trade"

(i) Definition of sales "in the ordinary course of trade"

14. In *US – Hot-Rolled Steel*, the Appellate Body confirmed that the *Anti-Dumping Agreement* does not define the term "in the ordinary course of trade".[17] In this dispute, Japan, the complainant, had agreed with the definition of this term given by the United States authorities, namely: "[g]enerally, sales are in the ordinary course of trade if made under conditions and practices that, for a reasonable period of time prior to the date of sale of the subject merchandise, have been normal for sales of the foreign like product."[18] The Appellate Body considered that for the purpose of the appeal, it was content with that definition.[19]

15. The Appellate Body in *US – Hot-Rolled Steel*, when looking into the meaning of "sales in the ordinary course of trade" under Article 2.1 of the *Anti-Dumping Agreement*, noted that Article 2.2.1 does provide for a method to determine whether "sales below cost" are "in the ordinary course of trade". However, the Appellate Body considered that the said provision does not purport to exhaust the range of methods for determining whether sales are "in the ordinary course of trade" and it does not cover the more specific issue of sales between affiliated parties:

> "We note that Article 2.2.1 of the *Anti-Dumping Agreement* itself provides for a method for determining whether *sales below cost* are 'in the ordinary course of trade'. However, that provision does not purport to exhaust the range of methods for determining whether sales are 'in the ordinary course of trade', nor even the

[15] Appellate Body Report on *US – Hot-Rolled Steel*, para. 165.
[16] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 166, 167 and 169. The Appellate Body could not, however, continue the analysis of whether the United States authorities had made any specific allowances in this case so as to make a fair comparison under Article 2.4 because it found that there was not an adequate factual record for it to complete the analysis. Para. 180.
[17] Appellate Body Report on *US – Hot-Rolled Steel*, para. 139.
[18] Appellate Body Report on *US – Hot-Rolled Steel*, para. 139.
[19] Appellate Body Report on *US – Hot-Rolled Steel*, para. 139.

range of possible methods for determining whether low-priced sales are 'in the ordinary course of trade'. Article 2.2.1 sets forth a method for determining whether sales between *any* two parties are 'in the ordinary course of trade'; it does *not* address the more specific issue of transactions between affiliated parties. In transactions between such parties, the affiliation itself may signal that *sales above cost*, but below the usual market price, might not be in the ordinary course of trade. Such transactions may, therefore, be the subject of special scrutiny by the investigating authorities."[20]

(ii) Investigating authorities' discretion under Article 2.1

16. The Appellate Body in *US – Hot-Rolled Steel* noted that the investigating authorities' discretion under Article 2.1 to determine how to avoid distortions in the normal value should be exercised in a even-handed way that is fair to all parties:

"Although we believe that the *Anti-Dumping Agreement* affords WTO Members discretion to determine how to ensure that normal value is not distorted through the inclusion of sales that are not 'in the ordinary course of trade', that discretion is not without limits. In particular, the discretion must be exercised in an *even-handed* way that is fair to all parties affected by an anti-dumping investigation. If a Member elects to adopt general rules to prevent distortion of normal value through sales between affiliates, those rules must reflect, even-handedly, the fact that both high and low-priced sales between affiliates might not be 'in the ordinary course of trade'."[21]

(iii) Sales not in the ordinary course of trade

Purpose of excluding sales not in the ordinary course of trade

17. In *US – Hot-Rolled Steel*, the Appellate Body explained that the exclusion of sales not in the ordinary course of trade from the calculation of the normal value is mandated by Article 2.1 in order to ensure that the normal value is indeed "normal":

"Article 2.1 requires investigating authorities to exclude sales not made 'in the ordinary course of trade', from the calculation of normal value, precisely to ensure that normal value is, indeed, the 'normal' price of the like product, in the home market of the exporter. Where a sales transaction is concluded on terms and conditions that are incompatible with 'normal' commercial practice for sales of the like product, in the market in question, at the relevant time, the transaction is not an appropriate basis for calculating 'normal' value."[22]

Prices above or below the ordinary course of trade price

18. In *US – Hot-Rolled Steel*, Japan had challenged the so-called "arm's length" test which allowed the United States authorities to automatically disregard the sales of a given exporter to individual affiliated parties as not being in the ordinary course of trade when the weighted average selling price to that affiliated party is below 99.5 percent of the weighted average price of sales to all non-affiliated parties. Japan claimed that the application of this test was inconsistent with Article 2.1 of the *Anti-Dumping Agreement* because, first, the test excluded only low-priced affiliated sales, thereby inflating normal value, and, second, the test operated on the basis of an arbitrary threshold that did not take account of usual variation of prices in the marketplace. The Panel found that the application of the 99.5 percent test "does not rest on a permissible interpretation of the term 'sales in the ordinary course of trade'."[23] The Appellate Body upheld the Panel's finding, although it followed a different reasoning.[24]

19. The Appellate Body in *US – Hot-Rolled Steel* considered that determining "whether a sales price is higher or lower than the 'ordinary course' price is not simply a question of comparing prices" and that the other terms

[20] Appellate Body Report on *US – Hot-Rolled Steel*, para. 147.
[21] Appellate Body Report on *US – Hot-Rolled Steel*, para. 148
[22] Appellate Body Report on *US – Hot-Rolled Steel*, para. 140. The Appellate Body also gives some examples of what it could be considered as sales not in the ordinary course of trade: "We can envisage many reasons for which transactions might not be 'in the ordinary course of trade'. For instance, where the parties to a transaction have common ownership, although they are legally distinct persons, usual commercial principles might not be respected between them. Instead of a sale between these parties being a transfer of goods between two enterprises which are economically *independent*, transacted at market prices, the sale effectively involves a transfer of goods within a *single* economic enterprise. In that situation, there is reason to suppose that the sales price *might* be fixed according to criteria which are not those of the marketplace. The sales transaction might be used as a vehicle for transferring resources within the single economic enterprise. Thus, the sales price may be *lower* than the 'ordinary course' price, if the purpose is to shift resources to the buyer, who then receives goods worth more than the actual sales price. Or, conversely, the sales price may be *higher* than the 'ordinary course' price, if the purpose is to shift resources to the seller, who receives higher revenues for the sale than would be the case in the marketplace. There are many reasons relating to corporate law and strategy, and to fiscal law, which may lead to resources being allocated, in these ways, within a single economic enterprise." Para. 141.
[23] Panel Report on *US – Hot-Rolled Steel*, para. 7.112.
[24] Appellate Body Report on *US – Hot-Rolled Steel*, para. 158. The Appellate Body also looked at another method used by the authorities, although not used in this case, which regards *high*-priced sales between affiliates. This so-called "aberrationally high" test excludes *high*-priced sales between affiliates from the calculation of normal value only if they were "*aberrationally*" or "*artificially*" high. The Appellate Body conclude that "[i]n our view, there is a lack of *even-handedness* in the two tests applied by the United States, in this case, to establish whether sales made to affiliates were 'in the ordinary course of trade'. The combined application of these two rules operated systematically to raise normal value, through the automatic exclusion of marginally low-priced sales, coupled with the automatic inclusion of all high-priced sales, except those proved, upon request, to be aberrationally high priced. The application of the two tests, thereby, disadvantaged exporters." Para. 154. As regards the Appellate Body's conclusions as to the investigating authorities' duty to exercise their discretion in an even-handed way, see para. 16 of this Chapter.

and conditions of the transaction must be taken into account:

> "We note that determining whether a sales price is higher or lower than the 'ordinary course' price is not simply a question of comparing prices. Price is merely one of the terms and conditions of a transaction. To determine whether the price is high or low, the price must be assessed in light of the other terms and conditions of the transaction. Thus, the volume of the sales transaction will affect whether a price is high or low. Or, the seller may undertake additional liability or responsibilities in some transactions, for instance for transport or insurance. These, and a number of other factors, may be expected to affect an assessment of the price."[25]

20. The Appellate Body in *US – Hot-Rolled Steel* further considered that nothing excludes that, even in the absence of any common ownership, "a sales transaction *might* not be 'in the ordinary course of trade', either because the sales price is higher than the 'ordinary course' price, or because it is lower than that price":

> "Clearly, the lower the degree of common ownership, implying common control, between the parties to a sales transaction, the less likely it is that the transaction will not be 'in the ordinary course of trade'. However, even where the parties to a sales transaction are entirely independent, a transaction might not be 'in the ordinary course of trade'.[26] In this appeal, we do not need to define all the circumstances in which transactions might not be 'in the ordinary course of trade'. It suffices to recognize that, *as between affiliates*, a sales transaction *might* not be 'in the ordinary course of trade', either because the sales price is higher than the 'ordinary course' price, or because it is lower than that price."[27]

Scope of the investigating authorities' duties under Article 2.1

21. The Appellate Body in *US – Hot-Rolled Steel* described the duties of the investigating authorities under Article 2.1 as follows:

> "In our view, the duties of investigating authorities, under Article 2.1 of the *Anti-Dumping Agreement*, are precisely the *same*, whether the sales price is higher or lower than the 'ordinary course' price, and irrespective of the reason why the transaction is not 'in the ordinary course of trade'. Investigating authorities must exclude, from the calculation of normal value, *all* sales which are not made 'in the ordinary course of trade'. To include such sales in the calculation, whether the price is high or low, would distort what is defined as '*normal* value'.
>
> In view of the many different types of transaction not 'in the ordinary course of trade' – some including affiliated parties, others not; some including high prices, others low prices; some including prices below cost, others not – investigating authorities need not, under the *Anti-Dumping Agreement*, scrutinize, according to *identical* rules, *each and every* category of sale that is potentially not 'in the ordinary course of trade'."[28]

Sales between affiliated companies

22. In *US – Hot-Rolled Steel*, the Appellate Body upheld the Panel's findings (albeit for different reasons) that the application by the United States authorities of its 99.5 per cent test to determine whether the sales between affiliated companies were in the ordinary course of trade did not rest upon a permissible interpretation of Article 2.1. See paragraphs 18–20 above.

23. In *US – Hot-Rolled Steel*, the United States authorities, in calculating the normal value, discarded certain sales by exporters to their affiliates because these sales were not "in the ordinary course of trade". The authorities had replaced the discarded sales with downstream sales of the product, transacted between the affiliate and the first independent buyer, which had been made "in the ordinary course of trade". See paragraph 13 above.

(c) Request for information

24. In *Guatemala – Cement II*, the Panel rejected Mexico's argument that the request for cost data was not justified under Articles 2.1 and 2.2 because the application did not contain any allegation that Mexican producers were selling below cost, and stated that "[n]othing in those provisions prevents an investigating authority from requesting cost information, even if the applicant does not allege sales below cost."[29]

(d) Relationship with other paragraphs of Article 2

(i) Article 2.2.1

25. See paragraph 15 above.

(ii) Article 2.4

26. See paragraph 13 above.

3. Article 2.2

(a) Request for cost information

27. With respect to the request for cost information by investigating authorities, see paragraph 24 above.

(b) Article 2.2.1

28. In *US – Hot-Rolled Steel*, the Appellate Body, when looking into the meaning of "sales in the ordinary

[25] Appellate Body Report on *US – Hot-Rolled Steel*, para. 142.
[26] (*footnote original*) One example of such a transaction is a liquidation sale by an enterprise to an independent buyer, which may not reflect "normal" commercial principles.
[27] Appellate Body Report on *US – Hot-Rolled Steel*, para. 143.
[28] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 145–146.
[29] Panel Report on *Guatemala – Cement II*, para. 8.183.

course of trade" under Article 2.1, noted that Article 2.2.1 of the *Anti-Dumping Agreement* "itself provides for a method for determining whether *sales below cost* are 'in the ordinary course of trade'. However, that provision does not purport to exhaust the range of methods for determining whether sales are 'in the ordinary course of trade', nor even the range of possible methods for determining whether low-priced sales are 'in the ordinary course of trade'." See paragraph 15 above.

(i) Article 2.2.1.1

Cost data requirements or elements

29. The Panel on *US – DRAMS* addressed Korea's claim that the United States' authority had acted inconsistently with the first sentence of Article 2.2.1.1 by disregarding cost data which met with the two requirements set forth in the proviso of that Article, namely, "in accordance with generally accepted accounting principles" and "reasonably reflect costs". The Panel considered that the first sentence is only applicable to "records kept by the exporter or producer under investigation", and thus refused to apply this Article to cost data prepared by an outside consultant on behalf of the producer.[30]

30. In *Egypt – Steel Rebar*, the Panel noted that both Articles 2.2.1.1 and 2.2.2 "emphasize two elements, first, that cost of production is to be calculated based on the actual books and records maintained by the company in question so long as these are in keeping with generally accepted accounting principles but that second, the costs to be included are those that reasonably reflect the costs *associated with* the production and sale of the product under consideration".[31]

Positive obligations on investigating authorities

31. The Panel on *US – Lumber V* considered that Article 2.2.1.1 contained only a limited obligation to base the cost on the records of the exporter or producer under investigation under certain circumstances. The Panel was of the view that Article 2.2.1.1 does not require that costs be calculated in accordance with Generally Accepted Accounting Principles (GAAP) nor that they reasonably reflect the costs associated with the production and sale of the product under consideration:

> "In our view, Article 2.2.1.1 imposes certain positive obligations on investigating authorities, including the obligation to calculate costs on the basis of records kept by the exporter or producer under investigation and to consider all available evidence on the proper allocation of costs. Neither of these obligations is absolute, however, as in both cases the obligations apply only if ('*provided*') certain conditions are met. The role of these conditions is therefore *not* to impose positive obligations on Members, but to set forth the circumstances under which certain positive obligations do or do not apply. Thus, Article 2.2.1.1 does not in our view require that costs be calculated in accordance with GAAP nor that they reasonably reflect the costs associated with the production and sale of the product under consideration. Rather, it simply requires that costs be calculated on the basis of the exporter or producer's records, *in so far as* those records are in accordance with GAAP and reasonably reflect the costs associated with the production and sale of the product under consideration. Similarly, Article 2.2.1.1 does *not* require that all allocations made by an investigating authority have been historically utilised by the exporter or producer; rather it simply provides that investigating authorities must consider all available evidence on the proper allocation of costs, including that made available by respondents, *insofar as* such allocations have been historically utilised by the exporter or producer. Bearing this in mind, we shall examine Canada's arguments relating to Article 2.2.1.1."[32]

Consider all available evidence on the proper allocation of costs

32. The Appellate Body on *US – Lumber V* considered that the requirement to consider all available evidence on the proper allocation of costs may in certain circumstances require the authorities to compare advantages and disadvantages of alternative cost allocation methodologies:

> "In our view, the parameters of the obligation to 'consider all available evidence' will vary case-by-case. It may well be that, in the light of the facts of a particular case, the requirement to 'consider all available evidence' may be satisfied by the investigating authority without comparing allocation methodologies or aspects thereof. However, in other instances – such as where there is compelling evidence available to the investigating authority that more than one allocation methodology potentially may be appropriate to ensure that there is a proper allocation of costs – the investigating authority may be required to 'reflect on' and 'weigh the merits of' evidence that relates to such alternative allocation methodologies, in order to satisfy the requirement to 'consider all available evidence'. Thus, although the second sentence of Article 2.2.1.1 does not, as a general rule, require investigating authorities to compare allocation methodologies to assess their respective advantages and disadvantages in each and every case, there may be particular instances in which the investigating authority may be required to compare them in order to satisfy the explicit requirement of the second sentence of Article 2.2.1.1 to 'consider all available evidence on the proper allocation of costs'."[33]

[31] Panel Report on *Egypt – Steel Rebar*, para. 7.393.
[32] Panel Report on *US – Lumber V*, para. 7.237.
[33] Appellate Body Report on *US – Lumber V*, para. 138.

Burden of proof

33. Referring to *EC – Hormones*[34], the Panel on *US – DRAMS* noted that the burden of establishing a prima facie case of inconsistency with Article 2.2.1.1 was on the complaining party.[35]

(c) Article 2.2.2

(i) Amounts based on actual data pertaining to production and sales of the like product

34. The Panel on *US – Lumber V* was of the view that amounts for general and administrative expenses *pertain to* the production and sale of the like product unless it can be demonstrated that the product under investigation did not benefit from a particular General and Administrative costs (G&A) cost item[36]:

> "We next examine the term 'pertain to' within the meaning of the chapeau of Article 2.2.2. 'Pertain' is defined as '**1 a** relate or have reference to'.[37] In our view, a meaningful interpretation of the term 'pertain[ing] to' must take into account the nature of those costs because, as Canada acknowledges, they 'are not directly attributable to the product under investigation or [to] any particular product'. Thus, it would appear to us that, unless a particular G&A cost can be tied to a particular product manufactured by a company, G&A costs – because normally they cannot be attributed to any particular product but are costs incurred by the company in the production and sale of goods – pertain or relate to all of those goods. Canada's argument that G&A costs 'benefit all products that a company (or division within a company) may produce rather than specific products' supports our view. If G&A costs benefit the production and sale of all goods that a company may produce, they must certainly relate or pertain to those goods, including in part to the product under investigation."[38]

(ii) Use of low volume sales Selling, General and Administrative costs (SG&A) and profits data in constructing normal value

35. In its report on *EC – Tube or Pipe Fittings*, the Appellate Body was asked to examine whether an investigating authority must exclude data from low-volume sales when determining the amounts for SG&A and profits under the chapeau of Article 2.2.2, having disregarded such low-volume sales for normal value determination under Article 2.2. The Appellate Body reasoned as follows:

> "Examining the text of the chapeau of Article 2.2.2, we observe that this provision imposes a general obligation ('shall') on an investigating authority to use 'actual data pertaining to production and sales in the ordinary course of trade' when determining amounts for SG&A and profits. Only '[w]hen such amounts cannot be determined on this basis' may an investigating authority proceed to employ one of the other three methods provided in sub-paragraphs (i)–(iii). In our view, the language of the chapeau indicates that an investigating authority, when determining SG&A and profits under Article 2.2.2, must first attempt to make such a determination using the 'actual data pertaining to production and sales in the ordinary course of trade'. If actual SG&A and profit data for sales in the ordinary course of trade do exist for the exporter and the like product under investigation, an investigating authority is obliged to use that data for purposes of constructing normal value; it may not calculate constructed normal value using SG&A and profit data by reference to different data or by using an alternative method.
>
> As the Panel correctly observed, it is meaningful for the interpretation of Article 2.2.2 that Article 2.2 specifically identifies low-volume sales *in addition to* sales outside the ordinary course of trade. In contrast to Article 2.2, the chapeau of Article 2.2.2 explicitly excludes only sales outside the ordinary course of trade. The absence of any qualifying language related to low volumes in Article 2.2.2 implies that an exception for low-volume sales should not be read into Article 2.2.2."[39]

36. The Appellate Body in *EC – Tube or Pipe Fittings* conluded that it is "significant that Article 2.2.2 specifies the data to be used by an investigating authority when constructing normal value. The text of that provision excludes actual data outside the ordinary course of trade, but does not exclude data from low-volume sales. The negotiators' express reference to sales outside the ordinary course of trade *and* to low-volume sales in Article 2.2, and the omission of a reference to low-volume sales in the chapeau of Article 2.2.2, confirms our view that low-volume sales are not excluded from the chapeau of Article 2.2.2 for the calculation of SG&A profits."[40] Thus, the Appellate Body found that in cases where low-volume sales are in the ordinary course of trade, an investigating authority does not act inconsistently with the chapeau of Article 2.2.2 by including actual data from those sales to derive SG&A and profits for the construction of normal value.

(iii) Priority of options

37. In response to the argument that the order of methodological options for calculating reasonable amount for profit set out in Article 2.2.2 reflects a pref-

[34] Appellate Body Report on *EC – Hormones*, para. 98.
[35] Panel Report on *US – DRAMS*, paras. 6.68–6.69.
[36] Panel Report on *US – Lumber V*, para. 7.267.
[37] (*footnote original*) *The Concise Oxford Dictionary of Current English* (Clarendon Press, 1995), p. 1021.
[38] Panel Report on *US – Lumber V*, para. 7.265.
[39] Appellate Body Report on *EC – Tube or Pipe Fittings*, paras. 97–98.
[40] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 101.

erence for one option over another, the Panel on *EC – Bed Linen*, in a finding subsequently not addressed by the Appellate Body, concluded that "the order in which the three options are set out in Article 2.2.2(i)–(iii) is without any hierarchical significance and that Members have complete discretion as to which of the three methodologies they use in their investigations."[41] The Panel set out the following reasoning:

> "Looking first at the text of Article 2.2.2, we see nothing that would indicate that there is a hierarchy among the methodological options listed in subparagraphs (i) to (iii). Of course, they are listed in a sequence, but this is an inherent characteristic of any list, and does not in and of itself entail any preference of one option over others. Moreover, we note that where the drafters intended an order of preference, the text clearly specifies it. . . . Had the drafters wished to indicate a hierarchy among the three options, surely they would have done so in a manner that made that hierarchy explicit. Certainly, we would have expected something more than simply a numbered listing. Thus, in context, it seems clear to us that the mere order in which the options appear in Article 2.2.2 has no preferential significance.
>
> . . . Paragraphs (i)–(iii) provide three alternative methods for calculating the profit amount, which, in our view, are intended to constitute close approximations of the general rule set out in the chapeau of Article 2.2.2. These approximations differ from the chapeau rule in that they relax, respectively, the reference to the like product, the reference to the exporter concerned, or both references, spelled out in that rule . . .
>
> In our view, there is no basis on which to judge which of these three options is 'better'. Certainly, there were differing views during the negotiations as to how this issue was to be resolved, and there is no specific language in the Agreement to suggest that the drafters considered one option preferable to the others. Given, as explained above, that each of the three options is in some sense 'imperfect' in comparison with the chapeau methodology, there is, in our opinion, no meaningful way to judge which option is less imperfect – or of greater authority – than another and, thus, no obvious basis for a hierarchy. And it is, in our view, for the drafters of an Agreement to set out a hierarchy or order of preference among admittedly imperfect approximations of a preferred result, and not for a panel to impose such a choice where it is not apparent from the text."[42]

(iv) Relationship with Article 2.2.2

38. See paragraph 30 above.

(v) Article 2.2.2(i) – "same general category of products"

39. In *Thailand – H-Beams*, in a finding not reviewed by the Appellate Body, the Panel rejected Poland's argument that the Thai authority had, for the purpose of calculating profit in constructed normal value, adopted too narrow a definition of the term "same general category of products". The Panel stated:

> "[W]e note that the text of Article 2.2.2 (i) simply refers without elaboration to 'the same general category of products' produced by the producer or exporter under investigation. Thus, the text of this subparagraph provides no precise guidance as to the required breadth or narrowness of the product category, and therefore provides no support for Poland's argument that a broader rather than a narrower definition is *required*."[43]

40. The Panel on *Thailand – H-Beams* went on to explain the contextual bases for its interpretation of Article 2.2.2(i) quoted in paragraph 39 above. The Panel first opined that the context of Article 2.2.2 (i) supports a narrow rather than a broad interpretation of the term "same general category of products":

> "We do find a certain amount of guidance in other provisions of Article 2.2.2, in particular its chapeau and its overall structure, however. In particular, we note that, in general, Article 2.2 and Article 2.2.2 concern the establishment of an appropriate proxy for the price 'of the like product in the ordinary course of trade in the domestic market of the exporting country' when that price cannot be used. As such, as the drafting of the provisions makes clear, the preferred methodology which is set forth in the chapeau is to use *actual* data of the exporter or producer under investigation for the *like product*. Where this is not possible, subparagraphs (i) and (ii) respectively provide for the database to be broadened, either as to the product (i.e., the same general category of products produced by the producer or exporter in question) or as to the producer (i.e., other producers or exporters subject to investigation in respect of the like product), but not both. Again this confirms that the intention of these provisions is to obtain results that approximate as closely as possible the price of the like product in the ordinary course of trade in the domestic market of the exporting country.
>
> This context indicates to us that the use under subparagraph (i) of a *narrower* rather than a *broader* 'same general category of products' certainly is permitted. Indeed, the narrower the category, the fewer products other than the like product will be included in the category, and this would seem to be fully consistent with the goal of obtaining results that approximate as closely as possible the price of the like product in the ordinary course of trade in the domestic market of the exporting country."[44]

[41] Panel Report on *EC – Bed Linen*, para. 6.62.
[42] Panel Report on *EC – Bed Linen*, paras. 6.59–6.61.
[43] Panel Report on *Thailand – H-Beams*, para. 7.111.
[44] Panel Report on *Thailand – H-Beams*, paras. 7.112–7.113.

41. The Panel on *Thailand – H-Beams* found additional contextual support in Article 3.6 for its finding that the term "same general category of products" under Article 2.2.2(i) permits a narrower rather than a broader approach:

> "Additional contextual support can be found in Article 3.6 (a provision related to data concerning injury), which provides that when available data on 'criteria such as the production process, producers' sales and profits' do not permit the separate identification of production of the like product, 'the effects of the dumped imports shall be assessed by the examination of the production of the *narrowest* group or range of products, which includes the like product, for which the necessary information can be provided' (emphasis supplied). Although this provision concerns information relevant to injury rather than dumping, and although we do not mean to suggest that use of the narrowest possible category including the like product is *required* under Article 2.2.2(i), in our view Article 3.6 provides contextual support for the conclusion that use of a narrow rather than a broader category is permitted.
>
> We note Poland's argument that a broader category is more likely than a narrower one to yield 'representative' results (by which we presume Poland to mean representative of the price of the like product in the ordinary course of trade in the domestic market of the exporting country), but we believe that as a matter of logic the opposite more often is likely to be true. The broader the category, the more products other than the like product will be included, and thus in our view the more potential there will be for the constructed normal value to be unrepresentative of the price of the like product. We therefore disagree with Poland that Article 2.2.2(i) requires the use of broader rather than narrower categories, and believe to the contrary that the use even of the narrowest general category that includes the like product is permitted."[45]

(vi) Article 2.2.2(ii) – "weighted average" and data from "other exporters or producers"

42. In *EC – Bed Linen*, the Appellate Body reversed the Panel's finding under Article 2.2.2(ii) that the existence of data for more than one other exporter or producer is not a necessary prerequisite for application of the approach using "weighted average" in calculating the amount for administrative, selling and general costs ("SG&A") to determine the constructed normal value of subject products. The Appellate Body stated:

> "In our view, the phrase 'weighted average' in Article 2.2.2(ii) precludes, in this particular provision, understanding the phrase 'other exporters or producers' in the plural as including the singular case. To us, the use of the phrase 'weighted average' in Article 2.2.2(ii) makes it impossible to read 'other exporters or producers' as 'one exporter or producer'. First of all, and obviously, an 'average' of amounts for SG&A and profits *cannot* be calculated on the basis of data on SG&A and profits relating to only *one* exporter or producer. Moreover, the textual directive to 'weight' the average further supports this view because the 'average' which results from combining the data from different exporters or producers must reflect the relative importance of these different exporters or producers in the overall mean. In short, it is simply not possible to calculate the 'weighted average' relating to only one exporter or producer. Indeed, we note that, at the oral hearing in this appeal, the European Communities conceded that the phrase 'weighted average' envisages a situation where there is more than one exporter or producer.
>
> The requirement to calculate a 'weighted average' in Article 2.2.2(ii) is, in our view, the key to interpreting that provision. It is indispensable to the calculation method set forth in this provision, and, thus, it is indispensable to the entire provision – which deals only with the mechanics of that calculation. We disagree with the Panel that 'the concept of weighted averaging is relevant only *when there is information from more than one other producer or exporter* available to be considered.' (emphasis in the original) We see no justification, textual or otherwise, for concluding that amounts for SG&A and profits are to be determined on the basis of the weighted average *some* of the time but not *all* of the time. In so interpreting Article 2.2.2(ii), the Panel, in effect, reads the requirement of calculating a 'weighted average' out of the text in some circumstances. In those circumstances, this would substantially empty the phrase 'weighted average' of meaning.[46]
>
> In our view, then, the use of the phrase 'weighted average', combined with the use of the words 'amounts' and 'exporters or producers' in the plural in the text of Article 2.2.2(ii), clearly anticipates the use of data from *more than one* exporter or producer. We conclude that the method for calculating amounts for SG&A and profits set out in this provision can only be used if data relating to more than one other exporter or producer is available."[47]

(vii) Article 2.2.2(ii) – production and sales amounts "incurred and realized"

43. In *EC – Bed Linen*, the Appellate Body reversed the Panel's conclusion that "an interpretation of Article

[45] Panel Report on *Thailand – H-Beams*, paras. 7.114–7.115.

[46] (*footnote original*) We note that in a case where there is data relating to only one other exporter or producer, a Member may have recourse to the calculation method set forth in Article 2.2.2(iii), provided, of course, that the specific requirements for the use of this calculation method are met. We recall that Article 2.2.2(iii) states that amounts for SG&A and profits may be calculated on the basis of : "any other reasonable method, provided that the amount for profit so established shall not exceed the profit normally realized by other exporters or producers on sales of products of the same general category in the domestic market of the country of origin."

[47] Appellate Body Report on *EC – Bed Linen*, paras. 74–75.

2.2.2(ii) under which sales not in the ordinary course of trade are excluded from the determination of the profit amount to be used in the calculation of a constructed normal value is permissible".[48] The Appellate Body emphasized that Article 2.2.2(ii) refers to "actual amounts incurred and realized by other exporters and producers" and concluded that, in the light of this wording, in the calculation of weighted average all of the actual amounts have to be included, regardless of whether the underlying sales were made in the ordinary course of trade or not:

> "Here, we note especially that Article 2.2.2(ii) refers to 'the weighted average of *the actual amounts incurred and realized* by other exporters or producers'. (emphasis added) In referring to 'the actual amounts incurred and realized', this provision does not make any exceptions or qualifications. In our view, the ordinary meaning of the phrase '*actual* amounts incurred and realized' includes the *SG&A actually incurred*, and the *profits or losses actually realized*[49] by other exporters or producers in respect of production and sales of the like product in the domestic market of the country of origin. There is no basis in Article 2.2.2(ii) for excluding *some* amounts that were actually incurred or realized from the 'actual amounts incurred or realized'. It follows that, in the calculation of the 'weighted average', *all* of 'the actual amounts incurred and realized' by other exporters or producers must be included, *regardless* of whether those amounts are incurred and realized on production and sales made in the ordinary course of trade or not. Thus, in our view, a Member is not allowed to exclude those sales that are not made in the ordinary course of trade from the calculation of the 'weighted average' under Article 2.2.2(ii)."[50]

44. The Appellate Body in *EC – Bed Linen* also discussed the first sentence of the chapeau of Article 2.2.2 as part of the context supporting its interpretation of Article 2.2.2(ii) quoted in paragraph 43 above. The Appellate Body stated:

> "In contrast to Article 2.2.2(ii), the first sentence of the chapeau of Article 2.2.2 refers to 'actual data pertaining to production and sales *in the ordinary course of trade*'. (emphasis added) Thus, the drafters of the *Anti-Dumping Agreement* have made clear that sales *not* in the *ordinary course of trade* are to be *excluded* when calculating amounts for SG&A and profits using the method set out in the chapeau of Article 2.2.2.
>
> The exclusion in the chapeau leads us to believe that, where there is no such explicit exclusion elsewhere in the same Article of the *Anti-Dumping Agreement*, no exclusion should be implied. And there is no such explicit exclusion in Article 2.2.2(ii). Article 2.2.2(ii) provides for an *alternative* calculation method that can be employed precisely when the method contemplated by the chapeau cannot be used. Article 2.2.2(ii) contains its own specific requirements. On their face, these requirements do not call for the exclusion of sales not made in the ordinary course of trade. Reading into the text of Article 2.2.2(ii) a requirement provided for *in the chapeau* of Article 2.2.2 is not justified either by the text or by the context of Article 2.2.2(ii)."[51]

(viii) Article 2.2.2(ii) – should "weighted" average be based on the value or the volume of sales?

45. The Panel on *EC – Bed Linen (Article 21.5 – India)* rejected India's claim that the weighting of averages under Article 2.2.2 (ii) was to be perfomed on the basis of sales volume rather than value data. According to the Panel,

> "It is clear from the text of Article 2.2.2(ii) that the amounts for SG&A and for profits to be used in constructing normal value must be weighted averages. However, nothing in the text specifies the factor to be used in calculating those weighted averages. There is clearly no specific direction requiring that the averages be weighted on the basis of volume, rather than value. Article 2.2.2(ii) is simply silent on this issue.Article 2.2.2 (ii) does not specify the factor, volume or value, to be used in calculating weighted averages."[52]

46. The Panel on *EC – Bed Linen (Article 21.5 – India)* further explained that, in its view, "either volume or value may be relevant in the context of Article 2.2.2(ii), and both are 'neutral' in the sense that the weighted average will reflect the relative importance of the companies with respect to that factor".[53] According to the Panel, "the fact that the choice of the factor used in calculating the weighted average will affect the outcome is simply irrelevant to the question whether Article 2.2.2(ii) requires the use of one volume rather than value as the weighting factor."[54]

(ix) No separate "reasonability" test

47. The Panel on *EC – Bed Linen*, in a finding subsequently not addressed by the Appellate Body, rejected the argument by India that "the results of a proper calculation under Article 2.2.2(ii) are subject to a separate test of 'reasonability' before they may be used in constructing a normal value for other producers"[55]. The Panel was unable to find a basis for such a separate reasonability test in the wording of Article 2.2.2:

---

[48] (*footnote original*) Panel Report on *EC – Bed Linen*, para. 6.87.
[49] (*footnote original*) It is worthwhile noting that "realized" is a word used with respect to both gains (profits) and losses. See *Black's Law Dictionary* (West Group, 1999), p. 1271, which speaks of both "realized gain" and "realized loss".
[50] Appellate Body Report on *EC – Bed Linen*, para. 80.
[51] Appellate Body Report on *EC – Bed Linen*, paras. 82–83. Following the excerpted paragraphs, the Appellate Body cited its Report on *India – Patents*, para. 45.
[52] Panel Report, *EC – Bed Linen (Article 21.5 – India)*, para. 6.81.
[53] Panel Report, *EC – Bed Linen (Article 21.5 – India)*, para. 6.84.
[54] Panel Report, *EC – Bed Linen (Article 21.5 – India)*, para. 6.84.
[55] Panel Report on *EC – Bed Linen*, para. 6.94.

"The text . . . indicates that the methodologies set out in Article 2.2.2 are outlined 'for the purpose' of calculating a *reasonable* profit amount pursuant to Article 2.2. There is no specific language establishing a separate reasonability test, or indicating how such a test should be conducted. In these circumstances, we consider that there is no textual basis for such a requirement. Thus, the ordinary meaning of the text indicates that if one of the methods of Article 2.2.2 is properly applied, the results are by definition 'reasonable' as required by Article 2.2.

Further, we note that Article 2.2.2(iii) provides for the use of 'any *other* reasonable method', without specifying such method, subject to a cap, defined as 'the profit normally realized by other exporters or producers on sales of products of the same general category in the domestic market of the country of origin'. To us, the inclusion of a cap where the methodology is not defined indicates that where the methodology is defined, in subparagraphs (i) and (ii), the application of those methodologies yields reasonable results. If those methodologies did not yield reasonable results, presumably the drafters would have included some explicit constraint on the results, as they did for subparagraph (iii).

Thus, we conclude that the text indicates that, if a Member bases its calculations on either the chapeau or paragraphs (i) or (ii), there is no need to separately consider the reasonability of the profit rate against some benchmark. In particular, there is no need to consider the limitation set out in paragraph (iii). That limitation is triggered only when a Member does not apply one of the methods set out in the chapeau or paragraphs (i) and (ii) of Article 2.2.2. Indeed, it is arguably precisely because no specific method is outlined in paragraph (iii) that the limitation on the profit rate exists in that provision."[56]

48. Similarly to the Panel on *EC – Bed Linen*, the Panel on *Thailand – H-Beams* also considered that no separate "reasonability" test is required under Article 2.2.2, and rejected Poland's argument that the results of applying any of the specified methodologies are at best rebuttably presumed to be reasonable. The Panel stated:

"We find no trace in the texts of the relevant provisions of such a rebuttable presumption, however. To the contrary, the ordinary meaning of the text seems rather to indicate that, if one of the methodologies is applied, the result is by definition reasonable. First, as noted, the phrase 'for the purpose of paragraph 2' is without qualification in the text. In our view, this phrase is straightforward and means that Article 2.2.2 gives the specific instructions as to how to fulfil the basic but unelaborated requirement in Article 2.2 to use no more than a 'reasonable' amount for profit.

Second, we note that the chapeau of Article 2.2.2 provides that where the methodology in the chapeau 'cannot' be used, one of the methodologies in subparagraphs (i), (ii) or (iii) 'may' be used. Poland argues that the word 'may' only provides for the possibility of using such methodologies and implies that any results derived thereby would be subject to a reasonability test arising under Article 2.2. We disagree, as in our view the word 'may' constitutes authorization to use the methodologies in the subparagraphs where the methodology in the chapeau, which is the preferred methodology, 'cannot' be used. We note that the text of Article 2.2.2 establishes no hierarchy among the subparagraphs and that there is no disagreement between the parties concerning this issue."[57]

49. The Panel on *Thailand – H-Beams*, similarly to the Panel on *EC – Bed Linen*, went on to find that the existence of a "cap" under subparagraph (iii) of Article 2.2.2. with respect to "any other reasonable method" implied that the methodologies under subparagraphs (i) and (ii) *ipso facto* yielded "reasonable" results, such that no separate constraint existed in respect of these paragraphs.[58] The Panel, in a finding subsequently not reviewed by the Appellate Body, then also noted the requirement to use "actual data" under the Article 2.2.2 chapeau and subparagraphs (i) and (ii):

"We note also the requirement in the chapeau of Article 2.2.2 as well as in subparagraphs (i) and (ii) that *actual data* be used. In our view, the notion of a separate reasonability test is both illogical and superfluous where the Agreement requires the use of specific types of actual data. That is, where actual data are used and the other requirements of the relevant provision(s) are fulfilled (e.g., that the 'same general category of products' is defined in a permissible way where 2.2.2(i) is applied), a *correct* or *accurate* result is obtained, and the requirement to use actual data *is itself* the mechanism that ensures reasonability in the sense of Article 2.2 of that (correct) result. By contrast, under subparagraph (iii) where no specific methodology or data source is required, and the use of 'any other reasonable method' is permitted, the provision itself contains what is in effect a separate reasonability test, namely the cap on the profit amount based on the actual experience of other exporters or producers. Thus, in our view, Article 2.2.2's requirement that actual data be used (and its establishment of a cap where this is not the case) are intended precisely to avoid the outcome that Poland seeks, namely subjective judgements by national authorities as to the 'reasonability' of given amounts used in constructed value calculations."[59]

(d) Relationship with other paragraphs of Article 2

50. In *Egypt – Steel Rebar*, the Panel indicated that, in its view, what might be necessary to take into account by

[56] Panel Report on *EC – Bed Linen*, paras. 6.96–6.98.
[57] Panel Report on *Thailand – H-Beams*, paras. 7.122–7.123.
[58] Panel Report on *Thailand – H-Beams*, para. 7.124.
[59] Panel Report on *Thailand – H-Beams*, paras. 7.122–7.125.

way of due allowance in a particular investigation in order to comply with the obligation to ensure a fair comparison under Article 2.4 could not be limited by the simplistic characterisation of a normal value as being one arrived at by way of a construction under Article 2.2:

> "[W]e do not think that the construction of a normal value under Article 2.2 precludes consideration of the making of various adjustments as between that normal value and the export price with which it is to be compared. A constructed normal value is, in effect, a notional price, 'built up' by adding costs of production, administrative, selling and other costs, and a profit. In any given case, such a built-up price might or might not reflect credit costs. Thus, what might be necessary to take into account by way of due allowance in a particular investigation in order to comply with the obligation to ensure a fair comparison under Article 2.4 cannot be limited by the simplistic characterisation of a normal value as being one arrived at by way of a construction under Article 2.2."[60]

51. The Panel on *EC – Tube or Pipe Fittings* found that the definition of "like product" in Article 2.6 governs how an investigating authority identifies the scope of the "like product" for the purposes of the investigation and of the Agreement. The Panel considered that, since the chapeau of Article 2.2.2 requires the use of actual data from all relevant sales of the like product, "actual data from relevant transactions relating to sales of the 'like product' – as a whole – may be taken into account to construct normal value. There is no provision to the effect that constructed normal value is to be based only on a limited subset of data relating to sales of certain selective product types falling within the definition of like product, but excluding data relating to sales of other such types."[61]

4. Article 2.3

52. In *US – Stainless Steel*, the Panel explained the status of paragraph 3 in Article 2. See paragraph 11 above.

5. Article 2.4

(a) First sentence

(i) Fair comparison of export price and normal value

53. In *Egypt – Steel Rebar*, the Panel considered that "Article 2.4 in its entirety, including its burden of proof requirement, has to do with ensuring a fair comparison, through various adjustments as appropriate, of export price and normal value".[62] The Panel indicated that the ordinary meaning of this provision confirms that it has to do with the nature of the comparison of export price and normal value. In the Panel's view, "the immediate context of this provision, namely Articles 2.4.1 and 2.4.2 confirms that Article 2.4 and in particular its burden of proof requirement, applies to . . . the calculation of the dumping margin". The Panel thus found that this provision did not apply to the investigating authority's establishment of normal value as such:

> "Article 2.4, on its face, refers to the *comparison* of export price and normal value, i.e., the calculation of the dumping margin, and in particular, requires that such a comparison shall be 'fair'. A straightforward consideration of the ordinary meaning of this provision confirms that it has to do not with the basis for and basic establishment of the export price and normal value (which are addressed in detail in other provisions)[63], but with the nature of the comparison of export price and normal value. First, the emphasis in the first sentence is on the *fairness* of the *comparison*. The next sentence, which starts with the words '[t]his comparison', clearly refers back to the 'fair comparison' that is the subject of the first sentence. The second sentence elaborates on considerations pertaining to the 'comparison', namely level of trade and timing of sales on both the normal value and export price sides of the dumping margin equation. The third sentence has to do with allowances for 'differences which affect *price comparability*', and provides an illustrative list of possible such differences. The next two sentences have to do with ensuring 'price comparability' in the particular case where a constructed export price has been used. The final sentence, where the reference to burden of proof at issue appears, also has to do with 'ensur[ing] a fair comparison'. In particular, the sentence provides that when collecting from the parties the particular information necessary to ensure a fair comparison, the authorities shall not impose an unreasonable burden of proof on the parties.
>
> The immediate context of this provision, namely Articles 2.4.1 and 2.4.2 confirms that Article 2.4 and in particular its burden of proof requirement, applies to the comparison of export price and normal value, that is, the calculation of the dumping margin. Article 2.4.1 contains the relevant provisions for the situation where 'the *comparison* under paragraph 4 requires a conversion of currencies' (emphasis added). Article 2.4.2 specifically refers to Article 2.4 as 'the provisions governing fair comparison', and then goes on to establish certain rules for the method by which that comparison is made (i.e., the calculation of dumping margins on a weighted-average to weighted-average or other basis)."[64]

---

[60] Panel Report on *Egypt – Steel Rebar*, para. 7.388.
[61] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.150.
[62] Panel Report on *Egypt – Steel Rebar*, para. 7.335.
[63] (*footnote original*) In this regard, we note that earlier provisions in Article 2, namely Article 2.2 including all of its sub-paragraphs, and Article 2.3, have to do exclusively and in some detail with the establishment of normal value and export price, and in addition that Article 2.1 has to do in part with the establishment of the export price.
[64] Panel Report on *Egypt – Steel Rebar*, paras. 7.333–7.334.

(ii) Relationship with other sentences

54. In *US – Stainless Steel*, having found a violation of the third and fourth sentence of Article 2.4 in respect of certain allowances, the Panel considered that it was "not . . . necessary to examine Korea's claims that the United States' treatment of bad debt breached a more general 'fair comparison' requirement under Article 2.4 of the *AD Agreement*."[65]

(b) Second sentence

(i) "sales made at as nearly as possible the same time"

55. The Panel on *US – Stainless Steel* rejected the United States argument that the "same time" requirement of Article 2.4 implies a preference for shorter rather than longer averaging periods when calculating the dumping margin pursuant to the weighted average/weighted average method in Article 2.4.2, first sentence. See paragraph 86 below.

(c) Third sentence: "Due allowance"

(i) "in each case, on its merits"

56. In *Argentina – Ceramic Tiles*, the Panel analysed the meaning of the requirement to make "due allowance in each case, on its merits" for differences in physical characteristics affecting price comparability. The Panel concluded that this requirement "means at a minimum that the authority has to evaluate identified differences in physical characteristics" and not only the most important ones:

> "Article 2.4 places the obligation on the investigating authority to make due allowance, in each case on its merits, for differences which affect price comparability, including differences in physical characteristics. The last sentence of Article 2.4 provides that the authorities shall indicate to the parties in question what information is necessary to ensure a fair comparison. We believe that the requirement to make due allowance for such differences, in each case on its merits, means at a minimum that the authority has to evaluate identified differences in physical characteristics to see whether an adjustment is required to maintain price comparability and to ensure a fair comparison between normal value and export price under Article 2.4 of the AD Agreement, and to adjust where necessary.
>
> . . .
>
> . . . We do not agree with Argentina's view that Article 2.4, through the qualifying language that due allowance shall be made 'in each case' 'on its merits', permits an investigating authority to adjust only for the most important of the physical differences that affect price comparability, even if making the remaining adjustments would have been, as the parties agree, complex. The DCD chose not to conduct a model-by-model comparison and it was then left to find other means to account for the remaining physical differences affecting price comparability. It did not do so."[66]

57. In *Egypt – Steel Rebar*, the Panel read Article 2.4 as explicitly requiring a fact-based, case-by-case analysis of differences that affect price comparability:

> "[W]e read Article 2.4 as explicitly requiring a fact-based, case-by-case analysis of differences that affect price comparability. In this regard, we take note in particular of the requirement in Article 2.4 that '[d]ue allowance shall be made *in each case, on its merits*, for differences which affect price comparability' (emphasis added). We note as well that in addition to an illustrative list of possible such differences, Article 2.4 also requires allowances for 'any other differences which are also *demonstrated* to affect price comparability' (emphasis added). Finally, we note the affirmative information-gathering burden on the investigating authority in this context, that it 'shall indicate to the parties in question *what information is necessary* to ensure a fair comparison and shall not impose an unreasonable burden of proof on those parties' (emphasis added). In short, where it is demonstrated by one or another party in a particular case, or by the data itself that a given difference affects price comparability, an adjustment must be made. In identifying to the parties the data that it considers would be necessary to make such a demonstration, the investigating authority is not to impose an unreasonable burden of proof on the parties. Thus, the process of determining what kind or types of adjustments need to be made to one or both sides of the dumping margin equation to ensure a fair comparison, is something of a dialogue between interested parties and the investigating authority, and must be done on a case-by-case basis, grounded in factual evidence."[67]

58. The Panel on *EC – Tube or Pipe Fittings* considered that Article 2.4 did not set forth any particular methodology for calculating adjustments and that a Panel could therefore only examine whether the investigating authority acted in an unbiased and even-handed manner when calculating the adjustments made:

---

[65] Panel Report on *US – Stainless Steel*, para. 6.104.

[66] Panel Report on *Argentina – Ceramic Tiles*, paras. 6.113 and 6.116. A similar view was expressed by the Panel on *EC – Tube or Pipe Fittings* which considered that "the requirement to make due allowance for such differences, in each case on its merits, means that the authority must at least evaluate identified differences in taxation with a view to determining whether or not an adjustment is required to ensure a fair comparison between normal value and export price under Article 2.4 of the *Anti-Dumping Agreement*, and then to make an adjustment where it determines this to be necessary on the basis of this evaluation". Panel Report on *EC – Tube or Pipe Fittings*, para. 7.157. See also Panel Report on *US – Lumber V*, paras. 7.165–7.167.

[67] Panel Report on *Egypt – Steel Rebar*, para. 7.352.

"An investigating authority must act in an unbiased, even-handed manner and must not exercise its discretion in an arbitrary manner. This obligation also applies where an investigating authority confronts practical difficulties and time constraints. We do not find, in Article 2.4, or in any other relevant provision in the Agreement, any specific rules governing the methodology to be applied by an investigating authority in calculating adjustments. In the absence of any precise textual guidance in the Agreement concerning how adjustments are to be calculated, and in the absence of any textual prohibition on the use of any particular methodology adopted by an investigating authority with a view to ensuring a fair comparison, we consider that an unbiased and objective authority could have applied this methodology applied by the European Communities and calculated this adjustment on the basis of the actual data in the record of this investigation. Moreover, Tupy had an opportunity to substantiate its claimed adjustment."[68]

(ii) "differences which affect price comparability"

59. In *US – Hot-Rolled Steel*, the Appellate Body ruled that the investigating authorities cannot exclude any differences affecting price comparability from being the object of an allowance:

"Article 2.4 of the *Anti-Dumping Agreement* provides that, where there are 'differences' between export price and normal value, which affect the 'comparability' of these prices, '[d]ue allowance shall be made' for those differences. The text of that provision gives certain examples of factors which may affect the comparability of prices: 'differences in conditions and terms of sale, taxation, levels of trade, quantities, physical characteristics, and any other differences'. However, Article 2.4 expressly requires that 'allowances' be made for '*any other differences* which are also demonstrated to affect price comparability.' (emphasis added) There are, therefore, no differences 'affect[ing] price comparability' which are precluded, as such, from being the object of an 'allowance'."[69]

60. The Panel on *US – Lumber V* considered that there is no requirement to adjust for any and all differences but rather only those differences demonstrated to have affected the price comparability:

"We consider that Article 2.4 does *not* require that an adjustment be made automatically in all cases where a difference is found to exist, but only where – based on the merits of the case – that difference is demonstrated to affect price comparability. An interpretation that an adjustment would have to be made automatically where a difference in physical characteristics is found to exist would render the term 'which affect price comparability' nugatory. Further, such an interpretation would make little sense in practice, as not all differences in physical characteristics necessarily affect price comparability "[70]

61. Reflecting further on the meaning of the term *comparability* in Article 2.4, the Panel on *US – Lumber V* concluded that an investigating authority must, based on the facts before it, on a case-by-case basis decide whether a certain factor is demonstrated to affect price comparability:

"The identified differences concerning the products sold in the two markets must affect the *comparability* of normal value and export price for the obligation to make due allowance to apply. Article 2.4 does not define what *comparability* means, but includes a non-exhaustive list of factors which may affect price comparability. Comparability is a term which, in our view, cannot be defined in the abstract. Rather, an investigating authority must, based on the facts before it, on a case-by-case basis decide whether a certain factor is demonstrated to affect price comparability. We can imagine of situations where although differences exist, they do not affect price comparability. For instance, this could occur where in the exporting country all cars sold are painted in red, while cars exported are all black. The difference is obvious; in fact, it is one of those differences listed in Article 2.4 itself – a difference in physical characteristics. However, there might be no variable cost difference among the two cars because the cost of the paint – whether red or black – might be the same. If instead of differences in cost, we were looking at market value differences, we might reach the same conclusion if, either the seller or the purchaser, would be willing to sell or purchase at the same price, regardless whether the car is red or black."[71]

(iii) Differences in "terms and conditions of sale"

62. In *US – Stainless Steel*, the Panel examined Korea's argument that in violation of the third sentence of Article 2.4, which permits an adjustment "for differences affecting price comparability, including differences in conditions and terms of sales . . .", the United States treated export sales which had not been paid because the customer had gone bankrupt later, as "direct selling expenses", and allocated these direct selling expenses over all United States' sales. The Panel rejected the United States' argument that bad debts are expenses directly related to the payment terms of the contract, and stated:

"We do not consider that the phrase 'differences in conditions and terms of sale', interpreted in accordance with customary rules of interpretation of public international law, can be understood to encompass differences arising from the unforeseen bankruptcy of a customer and consequent failure to pay for certain sales. In this respect, we note that Article 2.4 refers to the 'terms and conditions

[68] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.178.
[69] Appellate Body Report on *US – Hot-Rolled Steel*, para. 177.
[70] Panel Report on *US – Lumber V*, para. 7.165
[71] Panel Report on *US – Lumber V*, para. 7.357.

of sale'. Although of course both words – 'term' and 'condition' – have many meanings, both are commonly used in relation to contracts and agreements. Thus, 'term' is defined, *inter alia*, to mean 'conditions with regard to payment for goods or services', while 'condition' is defined, *inter alia*, as 'a provision in a will, contract, etc., on which the force or effect of the document depends'. Thus, we consider that, read as a whole, the phrase 'conditions and terms of sale' refers to the bundle of rights and obligations created by the sales agreement, and 'differences in conditions and terms of sale' refers to differences in that bundle of contractual rights and obligations. Thus, to the extent that there are, for example, differences in payment terms in the two markets, a difference in the conditions and terms of sale exists. The failure of a customer to pay is not a condition or term of sale in this sense, however. Rather, non-payment involves a situation where the purchaser has violated the 'conditions and terms of sale' by breaching its obligation to pay for the merchandise in question."[72]

63. The Panel on *US – Stainless Steel* specifically responded to the United States' argument that unpaid export sales were to be treated as "direct selling expenses" in distinguishing between "differences in conditions and terms of sale" and the "mode or state of being" of such sales:

"We perceive no textual basis for the United States' effort to characterize all differences in costs associated with the terms of the contract and expenses directly related to the sale as 'differences in terms and conditions of sale'. The United States contends that 'conditions' of sale can be read in this context to mean the 'mode or state of being' of sales, such that 'differences in conditions and terms of sale' include the 'mode or circumstances' under which sales are made. Assuming this interpretation to be a permissible one, it might allow for adjustments for 'differences in conditions and terms of sale' in cases where the contractual provisions governing sales in the two markets were identical but the seller was aware from circumstances existing at the time of sale that those provisions would likely entail different costs.[73] Thus to take an example often cited by the United States in this dispute, a seller might extend identical warranties in different markets or to different customers, knowing in advance that the costs related to those warranties in one market would likely be higher than in the other. Similarly, a seller might extend sales on the same credit terms in two different markets or to two different customers in the awareness that the risk of default – and thus the likely costs associated with the extension of credit – would be higher in one case than in the other. However, we fail to see how the fact that a customer who has purchased on credit subsequently went bankrupt and failed to pay for his purchases could be deemed a 'circumstance under which sales are made', at least in a case such as this one where the seller had no knowledge of the precarious financial situation of the purchaser.

We consider that an examination of the context in which the phrase 'differences in conditions and terms of sale' is used supports our understanding of the ordinary meaning of this phrase. We recall that Article 2.4 identifies 'differences in conditions and terms of sale' as one of several 'differences which affect price comparability'. Thus, the notion of price comparability informs our interpretation of 'differences in conditions and terms of sale'. In our view, the requirement to make due allowance for differences that affect price comparability is intended to neutralise differences in a transaction that an exporter could be expected to have reflected in his pricing. A difference that could not reasonably have been anticipated and thus taken into account by the exporter when determining the price to be charged for the product in different markets or to different customers is not a difference that affects the comparability of *prices* within the meaning of Article 2.4. This reinforces our view that the phrase 'differences in conditions and terms of sale' cannot permissibly be interpreted to encompass an unanticipated failure of a customer to pay for certain sales."[74]

64. Further, the Panel on *US – Stainless Steel* rejected the United States' argument that its methodology for the treatment of bad debt was simply a practical way to address differing levels of risks between markets in cases where sales are made on credit. The Panel opined that differences in risk of non-payment might be a difference relevant for the purposes of Article 2.4 and that actual bad debt could be evidence for establishing such different levels of risk of non-payment. However, it found that the United States' methodology did not base its determination on these factors:

"[W]e agree with the United States that a difference in risk of non-payment between markets that was known at the time of sale might represent a difference for which due allowance could properly be made under Article 2.4. Nor do we preclude that actual bad debt experience during the period of investigation might be evidence relevant to establishing the existence of such a difference.[75] The United States did not however treat actual experience with respect to levels of unpaid sales as *evidence* of different levels of risk in the two markets in these investigations. Rather, it stated that it was the DOC's practice to treat bad debt as a direct selling expense when the expense was incurred in respect of the subject merchandise. Thus, even assuming that the US methodology was somehow intended to address differences in *risk* of non-payment, we do not accept the proposition that the exis-

[72] Panel Report on *US – Stainless Steel*, para. 6.75.
[73] (*footnote original*) We note however that such a situation might more properly be considered to be an "other difference . . . affecting price comparability".
[74] Panel Report on *US – Stainless Steel*, paras. 6.76–6.77.
[75] (*footnote original*) Although in our view the existence of different levels of non-payment during prior periods would appear to be much more relevant.

tence of a higher level of non-payment in one market than in another during the period of investigation may be *deemed* to demonstrate the existence of such differences in risk and thus represent a permissible adjustment for 'differences in conditions and terms of sale'.[76]"[77]

(d) Fourth sentence

(i) Legal effect

65. In *US – Stainless Steel*, the United States argued that the fourth sentence of Article 2.4 is not mandatory since it provides that allowances for costs and profits "should" be made in constructing an export price. The Panel agreed that the *Anti-Dumping Agreement* permits, but does not require such allowances, but opined that a Member may not make allowances other than those authorized by Article 2.4:

> "The term 'should' in its ordinary meaning generally is non-mandatory, i.e., its use in this sentence indicates that a Member is not *required* to make allowance for costs and profits when constructing an export price.[78] We believe that, because the failure to make allowance for costs and profits could only result in a higher export price – and thus a lower dumping margin – the *AD Agreement* merely permits, but does not require, that such allowances be made.[79]
>
> . . . In our view, that the *AD Agreement* does not require such allowances does not mean that a Member is free to make any allowances it desires, including allowances not specified in this provision. To the contrary, we view this sentence as providing an *authorization* to make certain specific allowances. We therefore consider that allowances not within the scope of that authorization cannot be made.[80] If a Member were free to make any additional allowances it desired, there would be no effective disciplines on the methodology for construction of an export price and the provision in question would in our view be reduced to inutility.[81] Thus, we conclude that it would be inconsistent with Article 2.4 of the *AD Agreement* to make allowances in the construction of the export price that are not within the scope of the authorization found in that Article.
>
> Our conclusion that Article 2.4 contains binding obligations regarding the scope of the permissible allowances that can be made in constructing an export price does not mean that we equate allowances for differences which affect price comparability with allowances relating to the construction of the export price. Rather, the third sentence of Article 2.4 requires due allowance to be made for differences affecting price comparability, while the fourth sentence provides that in the cases referred to in paragraph 3 – i.e., when constructing an export price – allowance for certain costs and profits should *also* be made. Finally, the fifth sentence of Article 2.4 makes clear that allowances relating to the construction of the export price could in fact *reduce* price comparability, such that one of several compensating steps should be taken. For all these reasons, it is clear to us that allowances in respect of construction of the export price are separate and distinct from allowances for differences which affect price comparability and are governed by different substantive rules."[82]

(ii) "costs . . . incurred between importation and resale"

66. In *US – Stainless Steel*, the Panel agreed with Korea's argument that it was inconsistent with Article 2.4 to treat export sales unpaid as a result of the bankruptcy of a customer as direct selling costs, because the related costs were not "incurred between importation and resale" mentioned in the fourth sentence of Article 2.4. The Panel established the "foreseeability" of costs as the decisive factor:

> "[W]e note that Article 2.4 uses the word 'between'. That term is defined to mean, *inter alia*, '[i]n the interval separating two points of time, events, etc.'. Thus, the phrase costs 'incurred between importation and resale' in its ordinary meaning is most naturally read to refer to costs that were incurred between the date of importation and the date of resale. Under this reading, it might be difficult to conclude that a cost incurred after the date

---

[76] (*footnote original*) The United States contends that, "during the period of investigation, POSCO actually recognized greater bad debt expenses, as a proportion of sales, in the US market than in the Korean market. This evidence would indicate that POSCO should be charging higher prices in the US market than in the Korean market." In the absence of any evidence in the record that the level of non-payment in the US market was foreseeable or that the historical risk of non-payment was higher in the US than the Korean market, the conclusion that POSCO *should* have been charging higher prices in the US than in the Korean market seems unwarranted.

[77] Panel Report on *US – Stainless Steel*, para. 6.78.

[78] (*footnote original*) *But see* Appellate Body Report on *US – FSC*, fn. 124.

[79] (*footnote original*) It can be assumed that a Member will use this authorization where appropriate without being legally constrained to do so. By contrast, the *AD Agreement* provides that due allowance "shall" be made for differences affecting price comparability. Mandatory language is used here because the failure to make such allowances could generate or inflate dumping margins to the detriment of the interests of other Members.

[80] (*footnote original*) That the use of the non-mandatory phrase "should" does not support the conclusion advanced by the United States can be confirmed by replacing "should" with another non-mandatory term, "may". That a Member "may" make certain allowances would indicate that the Member was authorized but not required to make those allowances. It does not follow, however, that the Member was free also to make any other allowances not within the scope of the authorization. *Cf.* Appellate Body Report on *US – 1916 Act*, paras. 112–117 (that Article VI:2 of GATT 1994 makes imposition of anti-dumping duties permissive does not mean that a Member may impose measures other than anti-dumping duties to counteract dumping).

[81] (*footnote original*) As the Appellate Boy stated in *United States – Standards for Reformulated and Conventional Gasoline*, "[a]n interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to inutility." Appellate Body Report on *US – Gasoline*, p. 23.

[82] Panel Report on *US – Stainless Steel*, paras. 6.93–6.95.

of resale was a cost incurred 'between importation and resale'.

We are cognizant, however, that dictionary definitions can only take the interpreter so far, and that in interpreting a provision of a treaty we must take into account both context and object and purpose.[83] As discussed above, it is clear that the purpose of allowances to construct an export price is not to insure price comparability *per se*. Rather, an export price is constructed, and the appropriate allowances made, because it appears to the investigating authorities that the export price is unreliable because of association or a compensatory arrangement between the exporter and the importer or third party. By working backwards from the price at which the imported products are first resold to an independent buyer, it is possible to remove the unreliability. Thus, we agree with the United States that the purpose of these allowances is to construct a reliable export price to use in lieu of the actual export price or, as expressed by the EC as third party, to arrive at the price that would have been paid by the related importer had the sale been made on a commercial basis.

Read in light of this object and purpose, we recognize that costs related to the resale transaction but not incurred in a temporal sense between the date of importation and resale could as a general matter be considered to be 'incurred between importation and resale' and thus deducted in order to construct an export price. Nor do we preclude that an amount to cover the risk of non-payment might be considered to be such a cost. We do not believe, however, that this interpretation of costs 'incurred between importation and resale' can be stretched to include costs that not only were not incurred in an accounting sense until after the date of resale but which were entirely unforeseen at that time. In this regard, we observe that, while we agree with the United States that as a general principle a related importer may be expected to establish price based on costs plus profit, a price certainly cannot be expected to reflect an amount for costs that were entirely unforeseen at the time the price was set. To deduct costs which not only were incurred after the date of resale but which were entirely unforeseen at that time would not result in a 'reliable' export price in the sense of the price that would have been paid by the related exporter had the sale been made on a commercial basis."[84]

(e) Fifth sentence

67. In *US – Hot-Rolled Steel*, the Appellate Body considered that "the obligation to ensure a 'fair comparison'" under Article 2.4 "lies on the *investigating authorities*, and not the exporters. It is those authorities which, as part of their investigation, are charged with comparing normal value and export price and determining whether there is dumping of imports."[85]

(f) Article 2.4.1

(i) Scope of Article 2.4.1

68. In *US – Stainless Steel*, the complainant, Korea, argued that Article 2.4.1 is the only provision of the *Anti-Dumping Agreement* that addresses exchange rates and the permissible modification to the dumping calculation methodology to account for exchange rate fluctuations, and thus, that the use of multiple averaging periods to account for the depreciation of the Korean won during the period of investigation was inconsistent with Article 2.4.1. The Panel responded as follows:

> "In our view, Article 2.4.1 relates to the selection of exchange rates to be used where currency conversions are required. It establishes a general rule – conversion should be made using the rate of exchange on the date of sale – and an exception to this general rule for sales on forward markets. It also establishes special rules in the case of fluctuations and sustained movements in exchange rates. We note Korea's view that the requirements of the second sentence of Article 2.4.1 prescribe specific results, rather than describing a method for selecting exchange rates. It appears to us, however, that, read in context, these special rules also relate to the selection of exchange rates, and not to the construction of averages. Rather, the permissibility of the use of multiple averaging is an issue addressed by Article 2.4.2.
>
> Even if Article 2.4.1 were not restricted to the issue of the selection of exchange rates, we find nothing in that Article that would prohibit a Member from addressing, through multiple averaging, a situation arising from a currency depreciation. Korea contends, and the United States does not dispute, that the provision of Article 2.4.1 requiring Members to allow exporters sixty days to adjust their export prices to sustained movements in exchange rates applies only in the case of currency appreciation, and not in the case of currency depreciation. Assuming that the parties are correct in this regard, the requirement that a Member take certain actions in the case of currency appreciation does not in our view mean that Members are prohibited from taking any action to address a situation arising from a currency depreciation.[86]"[87]

---

[83] (*footnote original*) As the Appellate Body has noted, "dictionary meanings leave many interpretive questions open." Appellate Body Report on *Canada – Aircraft*, para. 153.

[84] Panel Report on *US – Stainless Steel*, paras. 6.98–6.100.

[85] Appellate Body Report on *US – Hot-Rolled Steel*, para. 178.

[86] (*footnote original*) The provision relied upon by Korea is the language in Article 2.4.1 stating that, "in an investigation the authorities shall allow exporters at least 60 days to have adjusted their export prices to reflect sustained movements in exchange rates during the period of investigation". Korea is in effect asking us to read this provision to further say that "in an investigation the authorities shall take no actions to address currency depreciations". We can perceive no textual basis to imply such an additional rule into Article 2.4.1.

[87] Panel Report on *US – Stainless Steel*, paras. 6.129–6.130.

(ii) "required"

69. In *US – Stainless Steel*, the complainant, Korea, argued that while Article 2.4.1 permits currency conversions only when such conversions are "required", i.e., when there is no other reasonable alternative, the United States' authority had performed an unnecessary "double conversion" of Korean local sales by converting the dollar amounts appearing in their invoices into won at one exchange rate and converting them back into dollars at a different exchange rate, in order to compare the prices of the local sales with those of exports to the United States. The Panel found that the conversions were not required because the prices being compared were in the same currency (dollars), and thus concluded that the currency conversions were inconsistent with Article 2.4.1:

> "While Article 2.4.1 does not spell out the precise circumstances under which currency conversions are to be avoided, we consider that it does establish a general – and in our view, self-evident – principle that currency conversions are permitted only where they are required in order to effect a comparison between the export price and the normal value. We note that a contrary interpretation would call into doubt the utility of the introductory clause of Article 2.4.1. If the drafters had not intended to establish a rule that currency conversions be performed only when required, they could easily have drafted Article 2.4.1 to provide that 'Currency conversions should be made using the rate of exchange on the date of sale . . . .' Further, such an interpretation could result in the unusual situation where currency conversions that were required in order to perform a comparison under Article 2.4 would be subject to the rules set forth in Article 2.4.1, but unnecessary currency conversions could be performed without regard to the rules of Article 2.4.1.
>
> We need not here arrive at any general understanding as to when currency conversions are or are not required within the meaning of Article 2.4.1, nor do we express any view regarding Korea's 'reasonable alternative' test. . . ."[88]

70. In *US – Stainless Steel*, one of the issues in the context of Article 2.4.1 was whether the Korean local sales had been made for United States dollars or Korean won. The Panel stated that "if the amount of won actually paid was based on the dollar amount identified in the invoice at the market rate of exchange on the date of *payment* (which, because the local sales in question were letter of credit sales, came some months after the date of invoice), then the controlling amount would be the dollar amount appearing in the invoice."[89]

(iii) Relationship with Article 2.4

71. In *US – Stainless Steel*, the complainant, Korea, argued that certain factual determinations of the United States' authority on currency conversion were inconsistent with Article 2.4 as well as Article 2.4.1. The Panel held that the United States' determination which it found consistent with Article 2.4.1 was also consistent with Article 2.4[90], but that with respect to the other determination, which it found in violation of Article 2.4.1, "we do not consider it necessary to examine Korea's claim that those double conversions breached a more general 'fair comparison' requirement under Article 2.4 of the AD Agreement."[91]

72. In *EC – Tube or Pipe Fittings*, the Panel found that Article 2.4.1 "refers to currency conversion in connection with the prices of export sales, rather than to any conversion that may occur in the calculation of specific adjustments to either the normal value or the export price".[92] It thus concluded that "the obligations concerning currency conversions in Article 2.4.1 do not apply to *all* conversions made in order to calculate adjustments under Article 2.4.1 – we can conceive of certain situations in which differences affecting price comparability that might lead to an adjustment under Article 2.4 might not correspond precisely with the date of the export sale (e.g. credit and warranty expenses), and where conversion of all currency data as at the date of export sale might therefore distort a fair comparison."[93]

(g) Article 2.4.2

(i) "margins"

73. In *EC – Bed Linen*, the Panel interpreted the word "margins" in Article 2.4.2 as meaning the individual margin of dumping determined for each of the investigated exporters and producers of the product under investigation, for that particular product. The Appellate Body agreed with this interpretation.[94]

74. In *EC – Bed Linen*, the Appellate Body stated with reference to the text of Article 2.4.2, that "[f]rom the wording of this provision, it is clear to us that the *Anti-Dumping Agreement* concerns the dumping of a *product*, and that, therefore, the margins of dumping to which Article 2.4.2 refers are the margins of dumping for a *product*."[95]

---

[88] Panel Report on *US – Stainless Steel*, paras. 6.11–6.12.
[89] Panel Report on *US – Stainless Steel*, para. 6.25. However, pursuant to Article 17.6(i), the Panel did not find one factual determination of the US authority on this issue in violation of Article 2.4.1. See para. 636 of this Chapter.
[90] Panel Report on *US – Stainless Steel*, para. 6.44.
[91] Panel Report on *US – Stainless Steel*, para. 6.45.
[92] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.198.
[93] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.199.
[94] Panel Report on *EC – Bed Linen*, para. 6.118. Appellate Body Report on *EC – Bed Linen*, para. 53. This interpretation was also confirmed by the Appellate Body in *US – Hot-Rolled Steel*, para. 118.
[95] (*footnote original*) Appellate Body Report on *EC – Bed Linen*, para. 51.

75. In *US – Lumber V*, the Appellate Body further clarified its position that "'margins of dumping' can be found only for the product under investigation as a whole, and cannot be found to exist for a product type, model, or category of that product".[96] On this basis, the Appellate Body rejected the argument that zeroing would be allowed as long as all comparable transactions had been taken into consideration at the model or type level:

> "It is clear that an investigating authority may undertake multiple averaging to establish margins of dumping for a product under investigation. In our view, the results of the multiple comparisons at the sub-group level are, however, not 'margins of dumping' within the meaning of Article 2.4.2. Rather, those results reflect only intermediate calculations made by an investigating authority in the context of establishing margins of dumping for the product under investigation. Thus, it is only on the basis of aggregating *all* these 'intermediate values' that an investigating authority can establish margins of dumping for the product under investigation as a whole.
>
> We fail to see how an investigating authority could properly establish margins of dumping for the product under investigation as a whole without aggregating *all* of the 'results' of the multiple comparisons for *all* product types. There is no textual basis under Article 2.4.2 that would justify taking into account the 'results' of only some multiple comparisons in the process of calculating margins of dumping, while disregarding other 'results'. If an investigating authority has chosen to undertake multiple comparisons, the investigating authority necessarily has to take into account the results of *all* those comparisons in order to establish margins of dumping for the product as a whole under Article 2.4.2. Thus we disagree with the United States that Article 2.4.2 does not apply to the aggregation of the results of multiple comparisons."[97]

(ii) Weighted average normal value / weighted average export price

76. In *EC – Bed Linen* the Appellate Body examined the first method under Article 2.4.2 for establishing the existence of margins of dumping, i.e. the comparison of a weighted average normal value with a weighted average of prices of all comparable export transactions. The Appellate Body found the European Communities' practice of "zeroing"[98] inconsistent with this method because by, *inter alia*, zeroing the negative dumping margins, the European Communities had not taken fully into account the entirety of the prices of some export transactions:

> "[W]e recall that Article 2.4.2, first sentence, provides that 'the existence of margins of dumping' for the product under investigation shall normally be established according to one of two methods. At issue in this case is the first method set out in that provision, under which 'the existence of margins of dumping' must be established:
>
> '. . . on the basis of a comparison of a weighted average normal value with a weighted average of prices of all comparable export transactions . . .'
>
> Under this method, the investigating authorities are required to compare the weighted average normal value with the weighted average of prices of *all* comparable export transactions. Here, we emphasize that Article 2.4.2 speaks of 'all' comparable export transactions. As explained above, when 'zeroing', the European Communities counted as zero the 'dumping margins' for those models where the 'dumping margin' was 'negative'. As the Panel correctly noted, for those models, the European Communities counted 'the weighted average export price to be equal to the weighted average normal value . . . despite the fact that it was, in reality, higher than the weighted average normal value.'[99] By 'zeroing' the 'negative dumping margins', the European Communities, therefore, did *not* take fully into account the entirety of the prices of *some* export transactions, namely, those export transactions involving models of cotton-type bed linen where 'negative dumping margins' were found. Instead, the European Communities treated those export prices as if they were less than what they were. This, in turn, inflated the result from the calculation of the margin of dumping. Thus, the European Communities did *not* establish 'the existence of margins of dumping' for cotton-type bed linen on the basis of a comparison of the weighted average normal value with the weighted average of prices of *all* comparable export transactions – that is, for *all* transactions involving *all* models or types of the product under investigation. Furthermore, we are also of the view that a comparison between export price and normal value that does *not*

[96] Appellate Body Report, *US – Lumber V*, para. 96

[97] Appellate Body Report, *US – Lumber V*, paras. 97 – 98.

[98] The European Communities practice of "zeroing" was summarized in the Panel Report on *EC – Bed Linen* as follows: first, the European Communities identified with respect to the product under investigation – cotton-type bed linen – a certain number of different "models" or "types" of that product. Next, the European Communities calculated, for each of these models, a *weighted average* normal value and a *weighted average* export price. Then, the European Communities compared the weighted average normal value with the weighted average export price for each model. For some models, normal value was *higher* than export price; by subtracting export price from normal value for these models, the European Communities established a "*positive* dumping margin" for each model. For other models, normal value was *lower* than export price; by subtracting export price from normal value for these other models, the European Communities established a "*negative* dumping margin" for each model. For these latter models, in other words, dumping had not occurred, as the *export price exceeded the normal value.* The European Communities then calculated the overall dumping margin by averaging the individually calculated results for the different models, but counting "negative dumping margins" as zero in the process. The Panel found that this practice was inconsistent with Article 2.4.2. Panel Report on *EC – Bed Linen*, para. 7.1(g).

[99] (*footnote original*) Panel Report on *EC – Bed Linen*, para. 6.115.

take fully into account the prices of *all* comparable export transactions – such as the practice of 'zeroing' at issue in this dispute – is *not* a 'fair comparison' between export price and normal value, as required by Article 2.4 and by Article 2.4.2."[100]

77. In *US – Lumber V*, the Appellate Body confirmed its view that an authority is not allowed to practice zeroing when using the weighted-average to weighted-average comparison methodology for calculating the margin of dumping:

"Zeroing means, *in effect*, that at least in the case of *some* export transactions, the export prices are treated as if they were less than what they actually are. Zeroing, therefore, does not take into account the *entirety* of the *prices* of *some* export transactions, namely, the prices of export transactions in those sub-groups in which the weighted average normal value is less than the weighted average export price.[101] Zeroing thus inflates the margin of dumping for the product as a whole."[102]

"comparable export transactions"

78. In *EC – Bed Linen*, the Appellate Body specifically addressed the term "comparable" used in Article 2.4.2, which the European Communities referred to as a basis for its appeal. More specifically, the European Communities claimed that Article 2.4.2 requires a comparison with a "weighted average of prices of all *comparable* export transactions" which, in the view of the European Communities, was not the same as requiring a comparison with a weighted average of *all* export transactions:

"In our view, the word 'comparable' in Article 2.4.2 does not affect, or diminish in any way, the obligation of investigating authorities to establish the existence of margins of dumping on the basis of 'a comparison of the weighted average normal value with the weighted average of prices of *all* comparable export transactions'. (emphasis added)

The ordinary meaning of the word 'comparable' is 'able to be compared'. 'Comparable export transactions' within the meaning of Article 2.4.2 are, therefore, export transactions that are able to be compared. . . .

. . .

. . . All types or models falling within the scope of a 'like' product must necessarily be 'comparable', and export transactions involving those types or models must therefore be considered 'comparable export transactions' within the meaning of Article 2.4.2."[103]

79. In support of its proposition that the term "comparable" in Article 2.4.2 did not detract from the obligation of investigating authorities to consider *all* relevant transactions, the Appellate Body in *EC – Bed Linen* referred to Article 2.4 as part of the context of Article 2.4.2:

"Article 2.4 sets forth a general obligation to make a 'fair comparison' between export price and normal value. This is a general obligation that, in our view, informs all of Article 2, but applies, in particular, to Article 2.4.2 which is specifically made 'subject to the provisions governing fair comparison in [Article 2.4]'. Moreover, Article 2.4 sets forth specific obligations to make comparisons at the same level of trade and at, as nearly as possible, the same time. Article 2.4 also requires that 'due allowance' be made for differences affecting 'price comparability'. We note, in particular, that Article 2.4 requires investigating authorities to make due allowance for 'differences in . . . physical characteristics'.

We note that, while the word 'comparable' in Article 2.4.2 relates to the comparability of export transactions, Article 2.4 deals more broadly with a 'fair comparison' between export price and normal value and 'price comparability'. Nevertheless, and with this qualification in mind, we see Article 2.4 as useful context sustaining the conclusions we draw from our analysis of the word 'comparable' in Article 2.4.2. In our view, the word 'comparable' in Article 2.4.2 relates back to both the general and the specific obligations of the investigating authorities when comparing the export price with the normal value. The European Communities argues on the basis of the 'due allowance' required by Article 2.4 for 'differences in physical characteristics' that distinctions can be made among different types or models of cotton-type bed linen when determining 'comparability'. But here again we fail to see how the European Communities can be permitted to see the physical characteristics of cotton-type bed linen in one way for one purpose and in another way for another."[104]

Non-comparable types

80. In *EC – Bed Linen*, the Panel found that the European Communities "zeroing" practice was inconsistent with Article 2.4.2.[105] The European Communities appealed this finding on the ground that the word "comparable" in Article 2.4.2 indicates that, where the product under investigation consists of various "non-comparable" types or models, the investigating authorities should first calculate "margins of dumping" for each of the "non-comparable" types or models, and, then, at a subsequent stage, combine those "margins" in order to calculate an overall margin of dumping for the product under investigation. The Appellate Body disagreed with the European Communities:

[100] Appellate Body Report on *EC – Bed Linen*, paras. 54–55.
[101] (*footnote original*) We note that the Panel reached the same conclusion in para. 7.216 of its Report.
[102] Appellate Body Report on *US – Lumber V*, para. 101.
[103] Appellate Body Report on *EC – Bed Linen*, paras. 56–58.
[104] Appellate Body Report on *EC – Bed Linen*, paras. 59–60.
[105] Panel Report on *EC – Bed Linen*, para. 7.1(g). For the description of the zeroing practice, see footnote 98.

"We see nothing in Article 2.4.2 or in any other provision of the *Anti-Dumping Agreement* that provides for the establishment of 'the existence of margins of dumping' for *types or models* of the product under investigation; to the contrary, all references to the establishment of 'the existence of margins of dumping' are references to the *product* that is subject of the investigation. Likewise, we see nothing in Article 2.4.2 to support the notion that, in an anti-dumping investigation, two different stages are envisaged or distinguished in any way by this provision of the *Anti-Dumping Agreement*, nor to justify the distinctions the European Communities contends can be made among *types or models* of the same product on the basis of these 'two stages'. Whatever the method used to calculate the margins of dumping, in our view, these margins must be, and can only be, established for the *product* under investigation as a whole. We are unable to agree with the European Communities that Article 2.4.2 provides no guidance as to how to calculate an *overall* margin of dumping for the product under investigation."[106]

81. In *US – Lumber V*, the Appellate Body clearly stated that multiple averaging, using models or types, is as such permitted under Article 2.4.2 to establish the existence of margins of dumping for the product under investigation:

"We agree with the participants in this dispute that multiple averaging is permitted under Article 2.4.2 to establish the existence of margins of dumping for the product under investigation. We disagree with those who suggest that the Appellate Body Report in *EC – Bed Linen* is premised on an assumption that multiple averaging is prohibited. The issue of multiple averaging was not before the Appellate Body in *EC – Bed Linen* and the reasoning of the Appellate Body in that case should therefore not be read as prohibiting that practice. This is not to say that *EC – Bed Linen* is not relevant in this appeal. Indeed, there are a number of relevant findings to which we refer to below. However, the Appellate Body did not rule on multiple averaging in that case and therefore it is incorrect to argue, as the United States does, that '[t]he agreement of both parties to this dispute and a unanimous Panel that Article 2.4.2 permits multiple comparisons is a fundamental departure from the premise' of the Appellate Body Report in *EC – Bed Linen*."[107]

Sampling of domestic transactions

82. The Panel on *Argentina – Poultry Anti-Dumping Duties* addressed the issue of whether or not a Member must include all domestic sales transactions when establishing "a weighted average normal value" for the purpose of Article 2.4.2:

"In examining what is meant by 'a weighted average normal value', we attach particular importance to the meaning of the term 'normal value'. We note that Article 2.1 of the *AD Agreement* refers to normal value as 'the comparable price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country'. Article 2.1 therefore defines normal value in terms of domestic sales transactions in the exporting Member (although Article 2.2 provides that alternative methods to establish normal value may be used in certain circumstances).[108] Article 2.1 does not specify, however, whether or not all domestic sales transactions need be included. This issue is addressed by Article 2.2.1, which sets out the conditions to be met before domestic sales may be treated as not in 'the ordinary course of trade', and therefore excluded for the purpose of establishing normal value in accordance with Article 2.1. Article 2.2.1 states that domestic sales 'may be disregarded in determining normal value only if' the relevant conditions are met. We understand these provisions to mean that there are only specific circumstances in which domestic sales transactions may be excluded from normal value. We consider that these provisions constitute relevant context for interpreting the phrase 'a weighted average normal value', since they indicate that 'a weighted average normal value' is a weighted average of all domestic sales other than those which may be disregarded pursuant to Article 2.2.1 of the *AD Agreement*."[109]

83. The Panel on *Argentina – Poultry Anti-Dumping Duties* thus came to the conclusion that "the strict rules in Article 2 regarding the determination of normal value require that, in the usual case, normal value should be established by reference to all domestic sales of the like product in the ordinary course of trade".[110]

Multiple averages

84. In *US – Stainless Steel*, the Panel examined Korea's argument that Article 2.4.2 prohibits the following method used by the United States authorities: (i) dividing a period of investigation into two sub-periods corresponding to the pre- and post-devaluation periods; (ii) calculating a weighted average margin of dumping for each sub-period; and (iii) combining these weighted averages of margin of dumping, however, treating sub-periods where the average export price was higher than the average normal value as sub-periods of zero dumping. In this regard, the Panel rejected Korea's claim that Article 2.4.2 prohibits the use of multiple averaging *per se*:

"Article 2.4.2 provides that the existence of dumping shall normally be established 'on the basis of a compar-

[106] Appellate Body Report on *EC – Bed Linen*, para. 53.
[107] Appellate Body Report on *US – Lumber V*, para. 81.
[108] (*footnote original*) These methods are not relevant in the present proceedings, since the DCD established normal value on the basis of domestic sales transactions.
[109] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para.7.272.
[110] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para.7.274.

ison of a weighted average normal value with a weighted average of all *comparable* export transactions' (emphasis added). The inclusion of the word 'comparable' is in our view highly significant, as in its ordinary meaning it indicates that a weighted average normal value is not to be compared to a weighted average export price that includes non-comparable export transactions.[111] It flows from this conclusion that a Member is not required to compare a single weighted average normal value to a single weighted average export price in cases where certain export transactions are not comparable to transactions that represent the basis for the calculation of the normal value.

We recall Korea's view that the reference in the singular to 'a weighted average normal value' means that the use of multiple averages is prohibited. In our view, however, the reference in the singular to 'a weighted average normal value' means simply that there must be a single weighted average normal value and export price in respect of comparable transactions. It does not mean that a Member is required to compare a single weighted average normal value to a single weighted average export price in cases where some of the export transactions are not comparable to the transactions that represent the basis for the normal value.

An examination of the context of the provision in question and of its object and purpose in our view provide further support for the above conclusion. The chapeau of Article 2.4 states that '[a] fair comparison shall be made between the export price and the normal value.' Whatever the relationship of the fair comparison language of the chapeau to the specific requirements of Article 2.4 – an issue of dispute between the parties – it is evident to us that the provisions of Article 2.4.2 must be read against the background of this basic principle. In fact, the provisions of Article 2.4.2 itself are 'subject to the provisions governing fair comparison in paragraph 4.' An interpretation of Article 2.4.2 that required a Member to compare transactions that were not comparable would run counter to this basic principle.

Accordingly, we conclude – and by the later phases of this dispute the parties agreed – that Article 2.4.2 does not preclude the use of multiple averages *per se*. Rather, Article 2.4.2 requires a Member to compare a single weighted average normal value to a single weighted average export price in respect of all *comparable* transactions. A Member may however use multiple averages in cases where it has determined that non-comparable transactions are involved."[112]

85. Despite rejecting Korea's argument in *US – Stainless Steel*, that Article 2.4.2 precludes the use of multiple averages *per se* (see paragraph 84 above), the Panel found a violation of Article 2.4.2 by the United States investigating authorities. The Panel examined whether the existence of significant differences in normal value over the course of an investigation is, in and of itself, a sufficient basis to conclude – as the United States authorities had done – that export and home market transactions at different points in the period of investigation are not "comparable":

> "In examining this question, we first note that the term 'comparable' has been defined to mean 'able to be compared (with)'. This definition however does not cast great light on the meaning of the term as used in Article 2 of the *AD Agreement*. Thus, we consider it useful to turn to the context in which this term appears. In this respect, we agree with the parties that the meaning of the term 'comparable' as used in Article 2.4.2 can best be established by an examination of other provisions of Article 2 of the *AD Agreement* that address the issue of comparability. We further note that the chapeau to Article 2.4 provides that the comparison between the export price and the normal value shall be made 'in respect of sales made at as nearly as possible the same time'. Thus, we consider it clear that the timing of sales may have implications in respect of the comparability of export and home market transactions.[113]
>
> This does not mean, however, that where an average to average comparison methodology is used, individual home market and export sales that are not made at the same time necessarily are not comparable and thus cannot be included in the weighted averages. To the contrary, it is in the very nature of an average to average comparison that, for example, transactions made at the beginning of the averaging period in the export market will be made at a different moment in time than sales in the home market made at the end of averaging period. If the drafters had considered that this situation would necessarily give rise to a problem of comparability, surely they would not have explicitly authorized the use of averaging in Article 2.4.2. Thus we consider that, in the context of weighted average to weighted average comparisons, the requirement that a comparison be made between sales made at as nearly as possible the same

[111] (*footnote original*) We note that insertion of the word "comparable" into Article 2.4.2 represented the only modification to that Article between the date of the Draft Final Act and the text as adopted. *See Draft Final Act Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations*, MTN.TNC/W/FA, 20 December 1991. This suggests that its inclusion was not merely incidental but reflected careful consideration by the drafters.

[112] Panel Report on *US – Stainless Steel*, paras. 6.111–6.114.

[113] (*footnote original*) As an additional contextual argument, Korea argues that devaluation cannot be considered to affect comparability because there is no provision in the *AD Agreement* specifying that sales made at one exchange rate cannot be compared with sales at another exchange rate. Rather, the only provision of the *AD Agreement* that addresses exchange rates is Article 2.4.1, which the United States concedes does not establish a limit on what sales may be considered comparable. We do not however place any weight on Korea's argument in this respect. In our view – and absent the unusual situation of multiple exchange rates – there will at any given moment in time be only one exchange rate. Thus, any problem of comparability does not relate to exchange rates *per se*, but rather to differences in timing of sales. Thus it is on this issue that we focus.

time requires *as a general matter* that the periods on the basis of which the weighted average normal value and the weighted average export price are calculated must be the same."[114]

Length of averaging periods

86. The Panel on *US – Stainless Steel* rejected the United States' argument that the "same time" requirement of Article 2.4 implies a preference for shorter rather than longer averaging periods, and stated:

". . . If the requirement to compare sales at 'as nearly as possible the same time' means that sales within an averaging period covering a [period of investigation ('POI')] are not comparable, then a Member presumably would be *obligated* to break a POI into as many sub-periods as possible. Yet to interpret the word 'comparable', when combined with the requirement that sales be compared 'at as nearly as possible the same time', to obligate Members to perform numerous average to average comparisons based on the shortest possible time periods would in effect read the Article 2.4.2 authorization to perform average to average comparisons out of the *AD Agreement,* leaving Members with only the second option, the comparison of normal values and export prices on a transaction-by-transaction basis.[115]"[116]

87. Having found that Members are not obliged to divide a period of investigation into as many sub-periods as possible, the Panel on *US – Stainless Steel* nevertheless placed the following caveat:

"We do not preclude that there may be factual circumstances where the use of multiple averaging periods could be appropriate in order to insure that comparability is not affected by differences in the timing of sales within the averaging periods in the home and export markets. We note that, where changes in normal value, export price or constructed export price during the course of the POI are combined with differences in the relative weights by volume within the POI of sales in the home market as compared to the export market, the use of weighted averages for the entire POI could indicate the existence of a margin of dumping that did not reflect the situation at any given moment within the POI.[117] In this situation a Member might in our view be justified in concluding that differences in timing of sales in the home and export markets give rise to a problem of comparability that could be addressed through multiple averaging periods.[118] We recall however that this situation only arises where two elements – a change in prices *and* differences in the relative weights by volume within the POI of sales in the home market as compared to the export market – exist. Thus, while a change in normal value, export price or constructed export price may be a *necessary* condition for the conclusion that the passage of time affects comparability in the case of an average-to-average comparison, the existence of such a change is not in itself a *sufficient* condition to conclude that the export transactions are not comparable to the normal value."[119]

(iii) Weighted average / individual transactions

Targeted dumping

88. The Appellate Body in *EC – Bed Linen* rejected the European Communities appeal that the Panel's interpretation would not allow Members to counter dumping "targeted" to certain types of the product under investigation. With respect to the notion of "targeted" dumping, the Appellate Body referred to Article 2.4.2, second sentence, and stated:

"This provision allows Members, in structuring their anti-dumping investigations, to address three kinds of 'targeted' dumping, namely dumping that is targeted to certain purchasers, targeted to certain regions, or targeted to certain time periods. However, neither Article 2.4.2, second sentence, nor any other provision of the *Anti-Dumping Agreement* refers to dumping 'targeted' to certain 'models' or 'types' of the same product under investigation. It seems to us that, had the drafters of the *Anti-Dumping Agreement* intended to authorize Members to respond to such kind of 'targeted' dumping, they would have done so explicitly in Article 2.4.2, second sentence. The European Communities has not demonstrated that any provision of the Agreement implies that

[114] Panel Report on *US – Stainless Steel*, paras. 6.120–6.121.

[115] (*footnote original*) The United States' argument seems to be posited on its view that the best comparison for measuring dumping is a transaction-to-transaction comparison, and that average-to-average comparisons are a second-best approach allowed because of practical problems with the transaction-to-transaction methodology. *See* US answer to question 2 from the Panel posed at the second meeting of the Panel with the parties. We perceive no valid textual basis for such a conclusion, however. To the contrary, the *AD Agreement* sets forth two options for a comparison methodology – average-to-average and transaction-to transaction – and expresses no preference between them.

[116] Panel Report on *US – Stainless Steel*, para. 6.122.

[117] (*footnote original*) A particularly dramatic example of this situation would arise where, during a substantial portion of the POI, there were *no* sales in one of the two markets.

[118] (*footnote original*) The combination of these two factors could even result in a situation where, although at any given moment in time throughout the POI, the exporter was charging an identical price (after all appropriate allowances had been made), a margin of dumping could nevertheless be found to exist. For example, imagine that there were two home market sales (HM-1 and HM-2) and two export sales (EX-1 and EX-2) during the POI. HM-1 and EX-1 occurred on day 1 and were both at a price of $10. HM-2 and EX-2 occurred on day 90 and were both at a price of $15. Thus, neither of the individual export transactions was dumped when compared to the simultaneous home market transactions. If all these sales were in the same volumes, then a weighted average to weighted average would also show no dumping. Assume however that HM-1 and EX-2 involved a volume of ten units, while HM-2 and EX-1 involved a volume of twenty units. In this case, the weighted average normal value would be (10 units × $10/unit) + (20 units × $15/unit) = $400/30 units = $13.33/unit. The weighted average export price would be (20 units × $10/unit) + (10 units × $15/unit) = $350/30 units = $11.27/unit. Thus, the weighted average margin of dumping would be 18 per cent.

[119] Panel Report on *US – Stainless Steel*, para. 6.123.

targeted dumping may be examined in relation to specific types or models of the product under investigation. Furthermore, we are bound to add that, if the European Communities wanted to address, in particular, dumping of certain types or models of bed linen, it could have defined, or redefined, the *product* under investigation in a narrower way.[120]"[121]

(h) Relationship between subparagraphs of Article 2.4

89. With respect to the relationship between Article 2.4 and Article 2.4.1, see paragraph 71 above.

90. With respect to the relationship between Article 2.4 and Article 2.4.2, see paragraph 86 above.

(i) Relationship with other paragraphs of Article 2

91. With respect to the relationship between Article 2.4 and Article 2.2, see paragraph 50 above.

6. Article 2.6

92. The Panel on *US – Lumber V* considered that the "like product" to the product under consideration has to be determined on the basis of Article 2.6, but that this provision does not provide any guidance on the way in which the "product under investigation" is to be determined:

> "Article 2.6 therefore defines the basis on which the product to be compared to the 'product under consideration' is to be determined, that is, a product which is either identical to the product under consideration, or in the absence of such a product, another product which has characteristics closely resembling those of the product under consideration. As the definition of 'like product' implies a comparison with another product, it seems clear to us that the starting point can only be the 'other product', being the allegedly dumped product. Therefore, once the product under consideration is defined, the 'like product' to the product under consideration has to be determined on the basis of Article 2.6. However, in our analysis of the *AD Agreement*, we could not find any guidance on the way in which the 'product under consideration' should be determined."[122]

7. Relationship with other Articles

93. With respect to the relationship between Article 2 and Articles 6.1, 6.2 and 6.9, see paragraph 441 below.

94. With respect to the relationship between Article 6.8 and Articles 2.2 and 2.4, the Panel on *US – Steel Plate*, having found a violation of Article 6.8, considered it unnecessary to determine, in addition, whether the circumstances of that violation also constituted a violation of Article 2.4 (and Article 9.3, and Articles VI:1 and 2 of GATT 1994). In the Panel's view, findings on these claims would serve no useful purpose, as they would neither assist the Member found to be in violation of its obligations to implement the ruling of the Panel, nor would they add to the overall understanding of the obligations found to have been violated. The Panel also declined to rule on India's claim under Article 2.2.[123]

95. With respect to the relationship between Article 2.4 and Article 6.10, see paragraph 443 below.

96. With respect to the relationship between Articles 2.4.1 and 12, see paragraph 564 below.

8. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

97. The Panel on *US – 1916 Act (EC)* found that where the complainant had not established a prima facie case of violation of Article 2.1 and 2.2, "[t]he fact that we found a violation of Article VI:1 of the *GATT 1994* is not as such sufficient to conclude that Articles 2.1 and 2.2 of the Anti-Dumping Agreement have been breached, in the absence of more specific arguments and evidence."[124]

98. The Appellate Body on *EC – Tube or Pipe Fittings* considered that the "precise rules relating to the determination as to whether there is dumping and, if dumping exists, how the dumping margin is to be calculated, are set out, not in Article VI:2 of the GATT 1994, but rather in Article 2 of the *Anti-Dumping Agreement*, which is the agreement on the implementation of Article VI of the GATT 1994." The Appellate Body in this case rejected the argument that the opening sentence of Article VI:2 of *GATT 1994*, "in order to offset or prevent dumping" imposed an obligation on an investigating authority to select a particular comparison methodology under Article 2.4.2 of the *Anti-Dumping Agreement*:

> "In our view, therefore, Article 2 is a more appropriate source than the opening phrase '[i]n order to offset or prevent dumping' of Article VI:2, for ascertaining specifically

[120] (*footnote original*) The European Communities also argues in its appellant's submission, paras. 42–45, that the Panel's interpretation of Article 2.4.2 would disadvantage those importing Members which collect anti-dumping duties on a "prospective" basis when compared to those importing Members which collect anti-dumping duties on a "retrospective" basis. We note, though, that Article 2.4.2 is not concerned with the collection of anti-dumping duties, but rather with the determination of "the existence of margins of dumping". Rules relating to the "prospective" and "retrospective" collection of anti-dumping duties are set forth in Article 9 of the *Anti-Dumping Agreement*. The European Communities has not shown how and to what extent these rules on the "prospective" and "retrospective" collection of anti-dumping duties bear on the issue of the establishment of "the existence of dumping margins" under Article 2.4.2.

[121] Appellate Body Report on *EC – Bed Linen*, para. 62.

[122] Panel Report on *US – Lumber V*, para. 7.153.

[123] Panel Report on *US – Steel Plate*, para. 7.103.

[124] Panel Report on *US – 1916 Act (EC)*, para. 6.209.

what is required for the proper determination of dumping by an investigating authority. We are unable to see an obligation flowing from the opening phrase of Article VI:2 of the GATT 1994 to Article 2 of the *Anti-Dumping Agreement* that the determination of dumping must be based on the standard of a 'reasonable assumption for the future', or that this, in turn, would require that a particular methodology be chosen under Article 2.4.2."[125]

(b) Article X of the GATT 1994

99. The Panel on *US – Stainless Steel* touched on the relationship between Article X:3(a) of the *GATT 1994* and Article 2.4.1 of the *Anti-Dumping Agreement*. See the Chapter on the *GATT 1994*, Section XI.B.D.2.

III. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Determination of Injury[9]

(*footnote original*) [9] Under this Agreement the term "injury" shall, unless otherwise specified, be taken to mean material injury to a domestic industry, threat of material injury to a domestic industry or material retardation of the establishment of such an industry and shall be interpreted in accordance with the provisions of this Article.

3.1 A determination of injury for purposes of Article VI of GATT 1994 shall be based on positive evidence and involve an objective examination of both *(a)* the volume of the dumped imports and the effect of the dumped imports on prices in the domestic market for like products, and *(b)* the consequent impact of these imports on domestic producers of such products.

3.2 With regard to the volume of the dumped imports, the investigating authorities shall consider whether there has been a significant increase in dumped imports, either in absolute terms or relative to production or consumption in the importing Member. With regard to the effect of the dumped imports on prices, the investigating authorities shall consider whether there has been a significant price undercutting by the dumped imports as compared with the price of a like product of the importing Member, or whether the effect of such imports is otherwise to depress prices to a significant degree or prevent price increases, which otherwise would have occurred, to a significant degree. No one or several of these factors can necessarily give decisive guidance.

3.3 Where imports of a product from more than one country are simultaneously subject to anti-dumping investigations, the investigating authorities may cumulatively assess the effects of such imports only if they determine that *(a)* the margin of dumping established in relation to the imports from each country is more than *de minimis* as defined in paragraph 8 of Article 5 and the volume of imports from each country is not negligible and *(b)* a cumulative assessment of the effects of the imports is appropriate in light of the conditions of competition between the imported products and the conditions of competition between the imported products and the like domestic product.

3.4 The examination of the impact of the dumped imports on the domestic industry concerned shall include an evaluation of all relevant economic factors and indices having a bearing on the state of the industry, including actual and potential decline in sales, profits, output, market share, productivity, return on investments, or utilization of capacity; factors affecting domestic prices; the magnitude of the margin of dumping; actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital or investments. This list is not exhaustive, nor can one or several of these factors necessarily give decisive guidance.

3.5 It must be demonstrated that the dumped imports are, through the effects of dumping, as set forth in paragraphs 2 and 4, causing injury within the meaning of this Agreement. The demonstration of a causal relationship between the dumped imports and the injury to the domestic industry shall be based on an examination of all relevant evidence before the authorities. The authorities shall also examine any known factors other than the dumped imports which at the same time are injuring the domestic industry, and the injuries caused by these other factors must not be attributed to the dumped imports. Factors which may be relevant in this respect include, *inter alia*, the volume and prices of imports not sold at dumping prices, contraction in demand or changes in the patterns of consumption, trade restrictive practices of and competition between the foreign and domestic producers, developments in technology and the export performance and productivity of the domestic industry.

3.6 The effect of the dumped imports shall be assessed in relation to the domestic production of the like product when available data permit the separate identification of that production on the basis of such criteria as the production process, producers' sales and profits. If such separate identification of that production is not possible, the effects of the dumped imports shall be assessed by the examination of the production of the narrowest group or range of products, which includes the like product, for which the necessary information can be provided.

3.7 A determination of a threat of material injury shall be based on facts and not merely on allegation, conjecture or remote possibility. The change in circumstances which would create a situation in which the dumping would cause injury must be clearly foreseen and imminent.[10] In making a determination regarding the exis-

[125] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 76.

tence of a threat of material injury, the authorities should consider, *inter alia*, such factors as:

(*footnote original*) [10] One example, though not an exclusive one, is that there is convincing reason to believe that there will be, in the near future, substantially increased importation of the product at dumped prices.

(i) a significant rate of increase of dumped imports into the domestic market indicating the likelihood of substantially increased importation;

(ii) sufficient freely disposable, or an imminent, substantial increase in, capacity of the exporter indicating the likelihood of substantially increased dumped exports to the importing Member's market, taking into account the availability of other export markets to absorb any additional exports;

(iii) whether imports are entering at prices that will have a significant depressing or suppressing effect on domestic prices, and would likely increase demand for further imports; and

(iv) inventories of the product being investigated.

No one of these factors by itself can necessarily give decisive guidance but the totality of the factors considered must lead to the conclusion that further dumped exports are imminent and that, unless protective action is taken, material injury would occur.

3.8 With respect to cases where injury is threatened by dumped imports, the application of anti-dumping measures shall be considered and decided with special care.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. General

(a) Relationship with other paragraphs of Article 3

100. In *Thailand – H-Beams*, the Appellate Body explained the relationship between the paragraphs of Article 3:

> "Article 3 as a whole deals with obligations of Members with respect to the determination of injury. Article 3.1 is an overarching provision that sets forth a Member's fundamental, substantive obligation in this respect. Article 3.1 informs the more detailed obligations in succeeding paragraphs. These obligations concern the determination of the volume of dumped imports, and their effect on prices (Article 3.2), investigations of imports from more than one country (Article 3.3), the impact of dumped imports on the domestic industry (Article 3.4), causality between dumped imports and injury (Article 3.5), the assessment of the domestic production of the like product (Article 3.6), and the determination of the threat of material injury (Articles 3.7 and 3.8). The focus of Article 3 is thus on *substantive* obligations that a Member must fulfill in making an injury determination."[126]

101. In *Egypt – Steel Rebar*, the Panel confirmed the role of Article 3.1 and explained the relationship between paragraph 5 and paragraphs 2 and 4:

> ". . . It is clear that Article 3.1 provides overarching general guidance as to the nature of the injury investigation and analysis that must be conducted by an investigating authority. Article 3.5 makes clear, through its cross-references, that Articles 3.2 and 3.4 are the provisions containing the specific guidance of the AD Agreement on the examination of the volume and price effects of the dumped imports, and of the consequent impact of the imports on the domestic industry, respectively . . ."[127]

(b) Period of data collection

(i) Jurisprudence

102. In *Egypt – Steel Rebar*, Turkey claimed that because the period of investigation for dumping ended on 31 December 1998, and most of the injury found by the investigating authorities occurred in the first quarter of 1999, the investigating authorities had failed to demonstrate that dumping and injury occurred at the same point in time and that there was a link between the imports that were specifically found to be dumped and the injury found, violating Articles 3.5 and 3.1.[128] The Panel disagreed:

> ". . . neither of the articles cited in this claim [Articles 3.1 and 3.5], nor any other provision of the AD Agreement, contains any specific rule as to the time periods to be covered by the injury or dumping investigations, or any overlap of those time periods.[129]
>
> In fact, the only provisions that provide guidance as to how the price effects and effects on the domestic industry of the dumped imports are to be gauged are (as cross-referenced in Article 3.5), Articles 3.2 (volume and price effects of dumped imports), and Article 3.4 (impact of the dumped imports on the domestic industry). Neither of these provisions specifies particular time periods for these analyses . . ."[130]

103. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that "there is a *prima facie* case that an investigating authority fails to conduct an 'objective' examination if it examines different injury factors using different periods. Such a *prima facie* case may be

[126] Appellate Body Report on *Thailand – H-Beams*, para. 106.
[127] Panel Report on *Egypt – Steel Rebar*, para. 7.102.
[128] Panel Report on *Egypt – Steel Rebar*, para. 7.127.
[129] (*footnote original*) See *Recommendation Concerning the Periods of Data Collection for Anti-Dumping Investigations*, G/ADP/6, adopted 5 May 2000 by the Committee on Anti-Dumping Practices.
[130] Panel Report on *Egypt – Steel Rebar*, paras. 7.130–7.131.

rebutted if the investigating authority demonstrates that the use of different periods is justifiable on the basis of objective grounds (because, for example, data for more recent periods was not available for certain injury factors)."[131]

104. The Panel on *Argentina – Poultry Anti-Dumping Duties* rejected the argument that the periods of review used for the separate dumping and injury determination must end at the same time, and considered that "there is nothing in the *AD Agreement* to suggest that the periods of review for dumping and injury must necessarily end at the same point in time. Indeed, since there may be a time-lag between the entry of dumped imports and the injury caused by them, it may not be appropriate to use identical periods of review for the dumping and injury analyses in all cases."[132]

(ii) Recommendation by the Committee on Anti-Dumping Practices

105. With respect to the recommendation by the Committee on Anti-Dumping Practices on the period of data collection, see paragraph 8 above.

2. Footnote 9

106. Referring to footnote 9 to Article 3 and to Article 4.1, the Panel on *Mexico – Corn Syrup* stated: "These two provisions inescapably require the conclusion that the domestic industry with respect to which injury is considered and determined must be the domestic industry defined in accordance with Article 4.1".[133]

3. Article 3.1

(a) Significance of paragraph 1 within the context of Article 3

107. In *Thailand – H-Beams*, the Appellate Body explained the legal status of paragraph 1 in the provisions of Article 3. See paragraph 100 above.[134] See also paragraph 101 above.

108. The Panel on *US – Softwood Lumber VI* considered that in the absence of independent argument supporting overarching claims under Article 3.1, the resolution of these claims is substantively dependent on the resolution of the specific claims under the other paragraphs of Article 3:

> "Thus, in the absence of any additional arguments supporting the allegations of violation of Articles 3.1 and 15.1, if we find that the facts give rise to a conclusion of no violation under one of Canada's specific claims, we will also consider that those facts give rise to the same conclusion, no violation, with respect to the overarching claims under Article 3.1 of the AD Agreement and Article 15.1 of the SCM Agreement. With respect to any aspect of the determination that is found to be inconsistent with any other provision of Articles 3 and 15 of the Agreements asserted by Canada, we can see no reason to conclude, in addition, that it also violates Article 3.1 of the AD Agreement and Article 15.1 of the SCM Agreement. In the absence of additional arguments in support of these claims, to say that a violation of a specific provision of the Agreements also violates the overarching obligations in Articles 3.1 and 15.1 does not clarify the obligation set out in Articles 3.1 of the AD Agreement and 15.1 of the SCM Agreement. Nor would it provide any guidance in the context of implementation of any recommendation of the DSB. Therefore, we will make no findings with respect to these claims."[135]

(b) Investigating authorities' obligation under Article 3.1

109. In *US – Hot-Rolled Steel*, the Appellate Body ruled that "the thrust of the investigating authorities' obligation, in Article 3.1, lies in the requirement that they base their determination on 'positive evidence' and conduct an 'objective examination'".[136]

(i) "positive evidence"

Meaning of positive evidence

110. In *US – Hot-Rolled Steel*, the Appellate Body ruled that "the term 'positive evidence' relates, in our view, to the quality of the evidence that authorities may rely upon in making a determination." It further explained that "[t]he word 'positive' means, to us, that the evidence must be of an affirmative, objective and verifiable character, and that it must be credible."[137]

Scope of positive evidence

111. In *Thailand – H-Beams*, the Appellate Body reversed the Panel's finding that an injury determination must be based only upon evidence disclosed to, or discernible by, the parties to the investigation, and concluded that "Article 3.1 ... permits an investigating authority making an injury determination to base its

[134] See also Appellate Body Report on *US – Hot-Rolled Steel*, para. 192.
[135] Panel Report on *US – Softwood Lumber VI*, para. 7.26.
[136] Appellate Body Report on *US – Hot-Rolled Steel*, para. 192.
[137] Appellate Body Report on *US – Hot-Rolled Steel*, para. 192. In *Egypt – Steel Rebar*, Turkey had argued that for a price undercutting analysis to be based on positive evidence as required by Article 3.1, an investigating authority must justify its choice of the basis for the price comparison it makes. The Panel considered that it did not need to opine on the exact nature of the "positive evidence" requirement of Article 3.2 (see para. 134 of this Chapter) and dismissed Turkey's claim. The Panel found that Turkey had not established that an objective and unbiased investigating authority could not have found price undercutting on the basis of the evidence of record. Panel Report on *Egypt – Steel Rebar*, paras. 7.70 and 7.75.

determination on *all* relevant reasoning and facts before it."[138] The Appellate Body explained:

> "Even if we accept that the ordinary meaning of these terms is reflected in the dictionary definitions cited by the Panel, in our view, the ordinary meaning of these terms does not suggest that an investigating authority is required to base an injury determination only upon evidence disclosed to, or discernible by, the parties to the investigation. An anti-dumping investigation involves the commercial behaviour of firms, and, under the provisions of the *Anti-Dumping Agreement*, involves the collection and assessment of *both* confidential and non-confidential information. An injury determination conducted pursuant to the provisions of Article 3 of the *Anti-Dumping Agreement* must be based on the totality of that evidence. We see nothing in Article 3.1 which limits an investigating authority to base an injury determination only upon non-confidential information."[139]

112. In *Thailand – H-Beams*, the Appellate Body provided the following contextual support for its finding that a determination of injury pursuant to Article 3.1 need not be based exclusively on evidence which has been disclosed to the parties to the investigation:

> "Contextual support for this interpretation of Article 3.1 can be found in Article 3.7, which states that a threat of material injury must be 'based on facts and not merely on allegation, conjecture or remote possibility'. This choice of words shows that, as in Article 3.1, which overarches and informs it, it is the *nature* of the evidence that is being addressed in Article 3.7. A similar requirement for an investigating authority can be found in Article 5.2, which requires that an application for initiation of an anti-dumping investigation may not be based on '[s]imple assertion, unsubstantiated by relevant evidence'. Article 5.3 requires an investigating authority to 'examine the accuracy and adequacy' of the evidence provided in such an application.
>
> Further contextual support for this reading of Article 3.1 is provided by other provisions of the *Anti-Dumping Agreement*. Article 6 (entitled 'Evidence') establishes a framework of procedural and due process obligations which, amongst other matters, requires investigating authorities to disclose certain evidence, during the investigation, to the interested parties. Article 6.2 requires that parties to an investigation 'shall have a full opportunity for the defence of their interests'. Article 6.9 requires that, before a final determination is made, authorities shall 'inform all interested parties of the essential facts under consideration which form the basis for the decision'. There is no justification for reading these obligations, which appear in Article 6, into the substantive provisions of Article 3.1. We do *not*, however, imply that the injury determination by the Thai authorities in this case necessarily met the requirements of Article 6. As the Panel found that Poland's claim under Article 6 did not meet the requirements of Article 6.2 of the DSU, the issue was not considered by the Panel.
>
> Article 12 (entitled 'Public Notice and Explanation of Determinations') also provides contextual support for our interpretation of the meaning of 'positive evidence' and 'objective examination' in Article 3.1. In a similar manner to Article 6, Article 12 establishes a framework of procedural and due process obligations concerning, notably, the contents of a final determination. Article 12.2.2 requires, in particular, that a final determination contain 'all relevant information on the matters of fact and law and reasons which have led to the imposition of final measures', and 'the reasons for the acceptance or rejection of relevant arguments or claims made by the exporters and importers'. Article 12, like Article 6, sets forth important procedural and due process obligations. However, as in the case of Article 6, there is no justification for reading these obligations into the substantive provisions of Article 3.1. We do *not*, however, imply that the injury determination of the Thai authorities in this case necessarily met the requirements of Article 12. This issue was not considered by the Panel, since Poland did not make a claim under this provision."[140]

113. Further, in *Thailand – H-Beams*, the Appellate Body rejected the Panel's reasoning that in reviewing the determination of injury by the investigating authority under Article 3, the Panel "is required, under Article 17.6(i), in assessing whether the *establishment of facts* is proper, to ascertain whether the 'factual basis' of the determination is 'discernible' from the documents that were available to the interested parties and/or their legal counsel in the course of the investigation and at the time of the final determination; and, in assessing whether the *evaluation of the facts* is unbiased and objective, to examine the 'analysis and reasoning' in only those documents 'to ascertain the connection between the disclosed factual basis and the findings.'"[141] The Panel had linked the obligation of national authorities under Article 3.1 to base the determination of injury on positive evidence, i.e. excluding confidential information not disclosed to the parties to the investigation, to the Panel's obligation under Articles 17.5 and 17.6, stating that "we as a panel should base our review on the reasoning and analysis reflected in the final determination and in communications and disclosures to which the Polish firms had access in the course of the investigation or at the time of the final determination". The Appellate Body had already found that under Article 3.1, contrary to the Panel's finding, the investigating authority was

[138] Appellate Body Report on *Thailand – H-Beams*, para. 111.
[139] Appellate Body Report on *Thailand – H-Beams*, para. 107. With respect to the treatment of confidential information in the context of Panel and Appellate Body proceedings, see Chapter on *DSU*, Section XVIII.B(d).
[140] Appellate Body Report on *Thailand – H-Beams*, paras. 108–110.
[141] Appellate Body Report on *Thailand – H-Beams*, para. 119.

not precluded from basing its determination of injury on information not disclosed to the parties to the investigation. The Appellate Body then also disagreed with the link, established by the Panel, between Article 3.1 on the one hand and Articles 17.5 and 17.6 on the other:

> "[W]hile the obligations in Article 3.1 apply to *all* injury determinations undertaken by Members, those in Articles 17.5 and 17.6 apply only when an injury determination is examined by a WTO panel. The obligations in Articles 17.5 and 17.6 are distinct from those in Article 3.1."[142]

114. In *Thailand – H-Beams*, the Appellate Body then also reversed the Panel's findings that the Panel was precluded from examining facts not disclosed to interested parties in the national investigation:

> "Articles 17.5 and 17.6(i) require a panel to examine the facts made available to the investigating authority of the importing Member. These provisions do not prevent a panel from examining facts that were not disclosed to, or discernible by, the interested parties at the time of the final determination."[143]

(ii) "Objective examination"

Concept of objective examination

115. In *US – Hot-Rolled Steel*, the Appellate Body analysed the concept of "objective assessment" as compared to "positive evidence", indicating that the latter is concerned with the investigating process itself as opposed to the facts justifying the injury determination:

> "The term 'objective examination' aims at a different aspect of the investigating authorities' determination. While the term 'positive evidence' focuses on the facts underpinning and justifying the injury determination, the term 'objective examination' is concerned with the investigative process itself. The word 'examination' relates, in our view, to the way in which the evidence is gathered, inquired into and, subsequently, evaluated; that is, it relates to the conduct of the investigation generally. The word 'objective', which qualifies the word 'examination', indicates essentially that the 'examination' process must conform to the dictates of the basic principles of good faith and fundamental fairness.[144] In short, an 'objective examination' requires that the domestic industry, and the effects of dumped imports, be investigated in an unbiased manner, without favouring the interests of any interested party, or group of interested parties, in the investigation. The duty of the investigating authorities to conduct an 'objective examination' recognizes that the determination will be influenced by the objectivity, or any lack thereof, of the investigative process.[145]"[146]

Extent of the objective examination

116. In *US – Hot-Rolled Steel*, Japan had challenged Section 771(7)(C)(iv) of the United States Tariff Act of 1930, as amended, (the so-called "captive production provision") which provided that, in certain statutorily defined circumstances, the investigating authorities when conducting an injury determination "shall focus primarily" on a particular segment of the "domestic industry", when "determining market share and the factors affecting financial performance". The Appellate Body examined whether the investigating authorities could make a sectoral examination of the domestic industry when conducting an injury determination under Article 3.1. As indicated in paragraph 144 below the Appellate Body concluded by reference to Article 3.4 that it may be highly pertinent to examine the domestic industry by part, sector or segment provided that such an examination be conducted in an "objective" manner as mandated by Article 3.1. The Appellate Body interprets the obligation to make an "objective" assessment in this regard as meaning that "where investigating authorities undertake an examination of one part of a domestic industry, they should, in principle, examine, in like manner, all of the other parts that make up the industry, as well as examine the industry as a whole" or, "in the alternative," provide "a satisfactory explanation as to why it is not necessary to examine directly or specifically the other parts. . .". It therefore found that an examination of only certain parts of a domestic industry does not ensure a proper evaluation of the state of the domestic industry as a whole, and does not, therefore, satisfy the requirements of "objectiv[ity]" in Article 3.1 of the *Anti-Dumping Agreement:*

> ". . . it may be highly pertinent for investigating authorities to examine a domestic industry by part, sector or segment. However, as with all other aspects of the evaluation of the domestic industry, Article 3.1 of the *Anti-Dumping Agreement* requires that such a sectoral examination be conducted in an 'objective' manner. In our view, this requirement means that, where investigating authorities undertake an examination of one part of a domestic industry, they should, in principle, examine, in like manner, all of the other parts that make up the industry, as well as examine the industry as a whole. Or, in the alternative, the investigating authorities should

---

[142] Appellate Body Report on *Thailand – H-Beams*, para. 114.
[143] Appellate Body Report on *Thailand – H-Beams*, para. 118.
[144] (*footnote original*) This provision is yet another expression of the general principle of good faith in the *Anti-Dumping Agreement*. See, *supra*, para. 101.
[145] (*footnote original*) In this respect, we recall that panels are under a similar duty, under Article 11 of the DSU, to make an "objective assessment of the matter . . . including an objective assessment of the facts". In our Report in *EC Measures Concerning Meat and Meat Products (Hormones)*, we indicated that the obligation to make an "objective assessment" includes an obligation to act in "good faith", respecting "fundamental fairness". (Appellate Body Report, WT/DS26/AB/R, WT/DS48/AB/R, adopted 13 February 1998, DSR 1998:I, 135, para. 133)
[146] Appellate Body Report on *US – Hot-Rolled Steel*, para. 193.

provide a satisfactory explanation as to why it is not necessary to examine directly or specifically the other parts of the domestic industry. Different parts of an industry may exhibit quite different economic performance during any given period. Some parts may be performing well, while others are performing poorly. To examine only the poorly performing parts of an industry, even if coupled with an examination of the whole industry, may give a misleading impression of the data relating to the industry as a whole, and may overlook positive developments in other parts of the industry. Such an examination may result in highlighting the negative data in the poorly performing part, without drawing attention to the positive data in other parts of the industry. We note that the reverse may also be true – to examine only the parts of an industry which are performing well may lead to overlooking the significance of deteriorating performance in other parts of the industry.

Moreover, by examining only one part of an industry, the investigating authorities may fail properly to appreciate the economic relationship between that part of the industry and the other parts of the industry, or between one or more of those parts and the whole industry. For instance, we can envisage that an industry, with two parts, may be overall in mild recession, where one part is performing very poorly and the other part is performing very well. It may be that the relationship between the two parts is such that the healthier part will lead the other part, and the industry as a whole, out of recession. Alternatively, the healthy part may follow the other part, and the industry as a whole, into recession.

Accordingly, an examination of only certain parts of a domestic industry does not ensure a proper evaluation of the state of the domestic industry as a whole, and does not, therefore, satisfy the requirements of 'objectiv[ity]' in Article 3.1 of the *Anti-Dumping Agreement*."[147]

Relationship with Article 3.4

117. In *US – Hot-Rolled Steel*, the Appellate Body explained that "an important aspect of the 'objective examination' required by Article 3.1 is further elaborated in Article 3.4 as an obligation to 'examin[e] the impact of the dumped imports on the domestic industry' through 'an evaluation of all relevant economic factors and indices having a bearing on the state of the industry'." See also paragraphs 116 above and 144 below.

118. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that "to the extent that a Member failed to conduct a proper 'examination of the impact of dumped imports' for the purpose of Article 3.4, that Member also failed to conduct an 'objective examination of … the consequent impact of the[] imports' within the meaning of Article 3.1(b)."[148]

(c) An objective examination based on positive evidence of "dumped imports"

119. The Panel on *EC – Bed Linen*, in a finding subsequently not reviewed by the Appellate Body, rejected the argument advanced by India that the term "dumped imports" must be understood to refer only to imports which are the subject of transactions in which the export price was below normal value. Rather, the Panel endorsed the argument by the European Communities that once a determination has been made that a product in question from particular producers is being dumped, this conclusion will then apply to *all* imports of that product from that source:

"[W]e consider that dumping is a determination made with reference to a *product* from a particular producer/exporter, and not with reference to individual transactions. That is, the determination of dumping is made on the basis of consideration of transactions involving a particular product from particular producers/exporters. If the result of that consideration is a conclusion that the product in question from particular producers/exporters is dumped, we are of the view that the conclusion applies to all imports of that product from such source(s), at least over the period for which dumping was considered. Thus, we consider that the investigating authority is entitled to consider all such imports in its analysis of 'dumped imports' under Articles 3.1, 3.4, and 3.5 of the AD Agreement."[149]

120. The Panel on *EC – Bed Linen* also indicated some practical reasons for why the phrase "dumped imports" could not refer only to those imports attributable to transactions in which export price was below normal value:

"Our conclusion that investigating authorities may treat all imports from producers/exporters for which an affirmative determination of dumping is made as 'dumped imports' for purposes of injury analysis under Article 3 is bolstered by our view that the interpretation proposed by India, which entails the conclusion that the phrase 'dumped imports' refers *only* to those imports attributable to *transactions* in which export price is below normal value, would lead to an unworkable result in certain cases. One of the objects and purposes of the AD Agreement is to establish the conditions under which Members may impose anti-dumping duties in cases of

[147] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 204–206.
[148] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.325.
[149] Panel Report on *EC – Bed Linen*, para. 6.136. The Panel on *Argentina – Poultry Anti-Dumping Duties* also considered that "the term 'dumped imports' refers to all imports attributable to producers or exporters for which a margin of dumping greater than *de minimis* has been calculated. The term 'dumped imports' excludes imports from producers / exporters found in the course of the investigation not to have dumped." Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.303.

injurious dumping. An interpretation which would, in many cases, make it impossible to assess one of the necessary elements, injury, is not consistent with that object and purpose.

An assessment of the volume, price effects, and consequent impact, only of imports attributable to transactions for which a positive margin was calculated would be, in many cases, impossible, or at least impracticable. Attempting to segregate individual transactions as to whether they were 'dumped' or not, even assuming it could be done, would leave investigating authorities in a quandary in cases in which the dumping investigation is undertaken for a sample of companies or products. Such sampling is specifically provided for in the AD Agreement, yet it would not be possible, in such cases, accurately to determine the volume of imports attributable to 'dumped' transactions. Similarly, if dumping is determined on the basis of a comparison of weighted average normal value to weighted average export price, there would be no comparisons concerning individual transactions which could serve as the basis for segregating imports in 'dumped' and 'not-dumped' categories."[150]

121. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body reversed the finding by the Panel that in case of an investigation based on a sample, an investigating authority is entitled to consider the total volume of imports from non-examined producers and exporters as being dumped for the purposes of an Article 3 injury analysis, as long as a dumping margin had been established for any of the examined producers or exporters.[151] Contrary to the Panel, the Appellate Body considered that Article 9.4 does not provide justification for considering *all* imports from *non*-examined producers as *dumped* for purposes of Article 3. According to the Appellate Body:

"Article 9.4 provides no guidance for determining the volume of dumped imports from producers that *were not* individually examined on the basis of 'positive evidence' and an 'objective examination' under Article 3. The exception in Article 9.4, which authorizes the imposition of anti-dumping *duties* on imports from producers for which *no* individual dumping margin has been calculated, *cannot be assumed* to extend to Article 3, and, in particular, in this dispute, to paragraphs 1 and 2 of Article 3. For the same reasons, we do not see why the volume of imports that has been found to be dumped by non-examined producers, for purposes of determining *injury* under paragraphs 1 and 2 of Article 3, must be *congruent* with the volume of imports from those non-examined producers that is subject to the *imposition of anti-dumping duties* under Article 9.4, as contended by the European Communities and the Panel."[152]

122. In the view of the Appellate Body on *EC – Bed Linen (Article 21.5 – India)*, while paragraphs 1 and 2 of Article 3 do not set forth a specific methodology for examining the volume of dumped imports in case the investigating authority carries out its investigation on the basis of a sample, they do "require investigating authorities to make a determination of injury on the basis of 'positive evidence' and to ensure that the injury determination results from an 'objective examination' of the volume of dumped imports, the effects of the dumped imports on prices, and, ultimately, the state of the domestic industry. Thus, whatever methodology investigating authorities choose for determining the volume of dumped imports, if that methodology fails to ensure that a determination of injury is made on the basis of 'positive evidence' and involves an 'objective examination' of *dumped* imports – rather than imports that are found *not* to be dumped – it is not consistent with paragraphs 1 and 2 of Article 3."[153]

123. The Appellate Body on *EC – Bed Linen (Article 21.5 – India)* thus came to the conclusion that the European Communities' approach whereby it had considered all imports from non-examined exporters or producers as dumped because a number of exporters included in the sample were found to have been dumping was inconsistent with the obligation to conduct an "objective examination":

"The examination was not 'objective' because its result is predetermined by the methodology itself. Under the approach used by the European Communities, whenever the investigating authorities decide to *limit* the examination to some, but not all, producers – as they are entitled to do under Article 6.10 – *all* imports from *all non*-examined producers will *necessarily always be included* in the volume of dumped imports under Article 3, as long as any of the producers examined individually were found to be dumping. This is so because Article 9.4 permits the imposition of the 'all others' duty rate on imports from *non*-examined producers, *regardless* of which alternative in the second sentence of Article 6.10 is applied. In other words, under the European Communities' approach, imports attributable to *non*-examined producers are simply *presumed*, in all circumstances, to

[150] Panel Report on *EC – Bed Linen*, paras. 6.139–140.

[151] The Panel had considered highly relevant that "Article 9.4 allows anti-dumping duties to be **collected** on imports from producers for which an individual determination of dumping, based on the calculation of a dumping margin under Article 2, was not made. It also establishes an upper limit for any such duties. In our view, the fact that an anti-dumping duty may properly be collected on imports from producers for which an individual calculation of dumping was not made, necessarily entails that such producers are properly considered to be dumping. Consequently, we consider inescapable the conclusion that the imports from those producers are properly considered as 'dumped imports' for the purposes of Articles 3.1 and 3.2." Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.137.

[152] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 126.

[153] Appellate Body Report on *EC – Bed Linen (Article 21.5 – India)*, para. 113.

> be *dumped*, for purposes of Article 3, solely because they are subject to the imposition of anti-dumping duties under Article 9.4. This approach makes it 'more likely [that the investigating authorities] will determine that the domestic industry is injured', and, therefore, it cannot be 'objective'. Moreover, such an approach tends to favour methodologies where *small numbers* of producers are examined individually. This is because the *smaller* the number of individually-examined producers, the *larger* the amount of imports attributable to *non*-examined producers, and, therefore, the larger the amount of imports *presumed* to be *dumped*. Given that the *Anti-Dumping Agreement* generally requires examination of *all* producers, and only exceptionally permits examination of only *some* of them, it seems to us that the interpretation proposed by the European Communities cannot have been intended by the drafters of the Agreement.
>
> For these reasons, we conclude that the European Communities' determination that *all* imports attributable to *non*-examined producers were dumped – even though the evidence from *examined* producers showed that producers accounting for 53 percent of imports attributed to examined producers were *not* dumping – did not lead to a result that was *unbiased*, *even-handed*, and *fair*. Therefore, the European Communities did not satisfy the requirements of paragraphs 1 and 2 of Article 3 to determine the volume of dumped imports on the basis of an examination that is '*objective*'."[154]

(d) "the effect of dumped imports"

124. In *Guatemala – Cement II*, Mexico claimed that Guatemala's investigating authority had violated Articles 3.1 and 3.2 by not considering at all, in its investigation, certain other cement imports. The Panel understood the Mexican claim to be that the Guatemalan authorities considered the type of cement under the not scrutinized imports as being "unlike" the cement under the imports subject to investigation, an assessment which Mexico considered erroneous. Mexico further claimed that the erroneous exclusion of certain imports from the investigation resulted in the following consequences: (i) the resulting volume of total imports of the product under investigation was lower; (ii) the share of allegedly dumped imports in total imports of the product under investigation was artificially inflated; (iii) the consideration of a faulty and incomplete figure for total imports of the product under investigation yielded a distorted figure for apparent domestic consumption; and (iv) because of this incorrect figure for apparent domestic consumption, the relationship between the increase in dumped imports and consumption was ultimately incorrect.[155] The Panel considered that consequences (i) through (iv), if proven, would constitute a violation of Articles 3.1 and 3.2, in that an exclusion of the imports at issue from the figures for domestic consumption of the like product affected the comparison that was made with the figures for volume of dumped imports for purposes of determining that there had been a significant increase in dumped imports relative to domestic consumption in the importing Member.[156] After reviewing the evidence submitted by Mexico and inconsistencies in Guatemala's replies in this regard, the Panel ultimately found that Mexico had established a prima facie case of inconsistency with respect to Articles 3.1 and 3.2.[157]

(e) Relationship with other paragraphs of Article 3

125. In *Thailand – H-Beams*, the Appellate Body referred to Article 3.7 as well as Articles 5.2, 5.3, 6 and 12 in interpreting Article 3.1. See paragraph 112 above.

4. Article 3.2

(a) Choice of analytical methodology

(i) General

126. With respect to Article 3.2, the Panel on *Thailand – H-Beams* stated that "it is for the investigating authorities in the first instance to determine the analytical methodologies that will be applied in the course of an investigation, as Article 3 contains no requirements concerning the methodology to be used."[158]

127. In *Egypt – Steel Rebar*, the Panel did not find on the plain text of Article 3.2 any requirement that the price undercutting analysis must be conducted at any particular level of trade. See paragraph 134 below.

(ii) Frequency of analysis

128. The Panel on *Thailand – H-Beams* considered that a quarterly analysis of the trend in import volume is not required under Article 3.2, and went on to state that "[g]iven that on an annual basis over a multi-year period, imports from Poland increased in every period examined, we do not believe that quarter-to-quarter fluctuation in import volumes during one of the twelve-month periods examined invalidates the Thai authorities' finding that the import volume of the subject imports 'increased continuously'."[159]

[155] Panel Report on *Guatemala – Cement II*, paras. 8.268–8.272. The Panel also found a violation of Article 3.5 with respect to the failure by Guatemala's authority to take into account certain non-dumped imports. See paras. 124 and 131 of this Chapter.
[156] Panel Report on *Guatemala – Cement II*, para. 8.269.
[157] Panel Report on *Guatemala – Cement II*, para. 8.272.
[158] Panel Report on *Thailand – H-Beams*, para. 7.159.
[159] Panel Report on *Thailand – H-Beams*, para. 7.168.

(iii) Length of period of investigation

129. In *Guatemala – Cement II*, the Panel did not agree with Mexico's argument that Guatemala's authority had acted inconsistently with Article 3.2 by examining import data only for the one-year period of investigation. The Panel explained:

> "A recent recommendation of the Committee on Anti-Dumping Practices calls on Members to use a data collection period of at least three years. This recommendation reflects the common practice of Members.[160] That said, there is no provision in the Agreement which specifies the precise duration of the period of data collection. Thus, it cannot be said *a priori* that the use of a one-year period of data collection would not be consistent with the requirement of Article 3.2 to consider whether there has been a significant increase in the volume of dumped imports in the circumstances of a particular case. In this case, Guatemala argues that the reason for the short period of data collection was that exports by Cruz Azul did not become significant until 1995. The record of the investigation supports this conclusion."[161]

With respect to the recommendation by the Committee on Anti-Dumping Practices on this topic, see paragraph 8 above.

(b) "a significant increase in dumped imports"

130. In *Thailand – H-Beams*, the Panel considered that Article 3.2 does not require that the term "significant" be used to characterize a subject increase in imports in the determination of an investigating authority. The Panel explained:

> "We note that the text of Article 3.2 requires that the investigating authorities 'consider whether there has been a significant increase in dumped imports'. The *Concise Oxford Dictionary* defines 'consider' as, *inter alia*: 'contemplate mentally, especially in order to reach a conclusion'; 'give attention to'; and 'reckon with; take into account'. We therefore do not read the textual term 'consider' in Article 3.2 to require an explicit 'finding' or 'determination' by the investigating authorities as to whether the increase in dumped imports is 'significant'. While it would certainly be preferable for a Member explicitly to characterize whether any increase in imports as 'significant', and to give a reasoned explanation of that characterization, we believe that the word 'significant' does not necessarily need to appear in the text of the relevant document in order for the requirements of this provision to be fulfilled. Nevertheless, we consider that it must be apparent in the relevant documents in the record that the investigating authorities have given attention to and taken into account whether there has been a significant increase in dumped imports, in absolute or relative terms."[162]

131. In *Guatemala – Cement II*, the Panel agreed with Mexico that Guatemala's authority had acted inconsistently with Articles 3.1 and 3.2 by not taking into account imports other than those from the supplier under investigation. See paragraph 124 above.[163]

(c) "the effect of the dumped imports on prices"

132. In *Guatemala – Cement II*, disagreeing with Mexico's claim that in violation of Article 3.2, Guatemala's authority did not properly examined the effect of dumped imports on the price of domestic sales, the Panel stated that "[b]ased on the evidence of declining prices and inability to achieve established price levels, coinciding with imports at lower prices we find that an objective and unbiased investigating authority could have properly concluded that the dumped imports were having a negative effect on the prices of the domestic industry."[164]

133. In *Guatemala – Cement II*, the Panel also rejected Mexico's argument that Guatemala's authority conducted the examination of the price effect of dumped imports at the regional level only and not also at the national level and therefore acted inconsistently with Article 3.2. Rather, the Panel found that Guatemala had not limited its analysis to a particular region. The Panel also added that there was only one cement producer in Guatemala, and thus, even if the negative effect of the dumped imports on the prices of the domestic like product was only evidenced in one particular region (where that producer was located), this could still be viewed as causing injury to that producer.[165]

(d) "price undercutting"

134. In *Egypt – Steel Rebar*, Turkey had argued that, to satisfy the requirements of Article 3.2, a price undercutting analysis must be made on a delivered-to-the-customer basis, as, in its view, it is only at that level that

---

[160] (*footnote original*) The recommendation provides that:

> "(c) the period of data collection for injury investigations normally should be at least three years, unless a party from whom data is being gathered has existed for a lesser period, and should include the entirety of the period of data collection for the dumping investigation; (Recommendation Concerning the Periods of Data Collection for Anti-Dumping Investigations, adopted by the ADP Committee on 5 May 2000, G/ADP/6)."

We note that this recommendation is a relevant, but non-binding, indication of the understanding of Members as to appropriate implementation practice regarding the period of data collection for an anti-dumping investigation.

[161] Panel Report on *Guatemala – Cement II*, para. 8.266.

[162] Panel Report on *Thailand – H-Beams*, para. 7.161.

[163] The Panel also found a violation of Article 3.5 with respect to the failure by Guatemala's authority to take into account certain non-dumped imports. See paras. 124 and 131 of this Chapter.

[164] Panel Report on *Guatemala – Cement II*, para. 8.276.

[165] Panel Report on *Guatemala – Cement II*, para. 8.277.

any such undercutting can influence customers' purchasing decisions. The Panel did not find on the basis of the plain text of Article 3.2 any requirement that the price undercutting analysis must be conducted in any particular way, that is, at any particular level of trade.[166]

135. The Panel on *EC – Tube or Pipe Fittings* similarly stated that "unlike Article 2 (in particular Article 2.4.2) of the *Anti-Dumping Agreement*, which contains specific requirements relating to the calculation of the dumping margin, Article 3.2 requires the investigating authorities to consider whether price undercutting is 'significant' but does not set out any specific requirement relating to the calculation of a margin of undercutting, or provide a particular methodology to be followed in this consideration"[167] The Panel reasoned as follows:

> "The text of Article 3.2 refers to domestic 'prices' (in the plural rather than singular). This textual element supports our view that there is no requirement under Article 3.2 to establish one single margin of undercutting on the basis of an examination of every transaction involving the product concerned and the like product. In addition, the text of Article 3.2 refers to the 'dumped imports', that is, the imports of the product concerned from an exporting producer that has been determined to be dumping. Thus, investigating authorities may treat any imports from producers/exporters for which an affirmative determination of dumping is made as 'dumped imports' for purposes of injury analysis under Article 3. There is, however, no requirement to take each and every transaction involving the 'dumped imports' into account, nor that the 'dumped imports' examined under Article 3.2 are limited to those precise transactions subject to the dumping determination. This view is supported by the absence of a specific provision concerning time periods in the Agreement; an importing Member may investigate price effects of imports in an injury investigation period which may be different than the IP for dumping. These considerations do not, of course, diminish the obligation of an investigating authority to conduct an unbiased and even-handed price undercutting analysis.
>
> We take note of the shared view of the parties that 'the Panel should accord a considerable discretion to the investigating authorities to choose a methodology which produces a meaningful result while avoiding unfairness'. One purpose of a price undercutting analysis is to assist an investigating authority in determining whether dumped imports have, through the effects of dumping, caused material injury to a domestic industry. In this part of an anti-dumping investigation, an investigating authority is trying to discern whether the prices of dumped imports have had an impact on the domestic industry. The interaction of two variables would essentially determine the extent of impact of price undercutting on the domestic industry: the quantity of sales at undercutting prices; and the margin of undercutting of such sales. Sales at undercutting prices could have an impact on the domestic industry (for example, in terms of lost sales) irrespective of whether other sales might be made at prices above those charged by the domestic industry. The fact that certain sales may have occurred at 'non-underselling prices' does not eradicate the effects in the importing market of sales that *were* made at underselling prices. Thus, a requirement that an investigating authority must base its price undercutting analysis on a methodology that offset undercutting prices with 'overcutting' prices would have the result of requiring the investigating authority to conclude that no price undercutting existed when, in fact, there might be a considerable number of sales at undercutting prices which might have had an adverse effect on the domestic industry."[168]

(e) Relationship with other paragraphs of Article 3

136. With respect to the relationship of paragraph 2 with paragraphs 1, 3, 4 and 5 of Article 3, see paragraphs 100–101 above.

5. Article 3.3

(a) Relationship with other paragraphs of Article 3

137. With respect to the relationship of paragraph 3 with paragraphs 1, 2, 4 and 5 of Article 3, see paragraph 100 above.

138. In its report on *EC – Tube or Pipe Fittings*, the Appellate Body stated that in case of a cumulated injury analysis, there is no indication in the text of Article 3.2 that the analyses of volume and prices must be performed on a country-by-country basis where an investigation involves imports from several countries.[169] The Appellate Body thus confirmed the Panel's position in this case that it is possible for the analyses of volume and prices envisaged under Article 3.2 to be done on a cumulative basis, as opposed to an individual country basis, when dumped imports originate from more than one country.[170]

(b) Conditions for cumulation – general

139. The Panel on *EC – Tube or Pipe Fittings* came to the conclusion, on the basis of the text in Article 3.3, and citing contextual support in Articles 3.4 and 3.5, that the conditions identified in Article 3.3 are the *sole* conditions that must be satisfied by an investigating authority in order to undertake a cumulative assessment of the

[166] Panel Report on *Egypt – Steel Rebar*, paras. 7.70 and 7.73.
[167] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.281.
[168] Panel Report on *EC – Tube or Pipe Fittings*, paras. 7.276–7.277.
[169] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 111.
[170] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.231.

effects of dumped imports.[171] In particular, the Panel rejected Brazil's allegation that an investigating authority must first consider whether country-specific import volumes have significantly increased before cumulating them.[172] The Appellate Body agreed with the Panel and reached the following conclusion:

> "The text of Article 3.3 expressly identifies three conditions that must be satisfied before an investigating authority is permitted under the *Anti-Dumping Agreement* to assess cumulatively the effects of imports from several countries. These conditions are:
>
> (a) the dumping margin from each individual country must be more than *de minimis*;
>
> (b) the volume of imports from each individual country must not be negligible; and
>
> (c) cumulation must be appropriate in the light of the conditions of competition
>
> (i) between the imported products; and
>
> (ii) between the imported products and the like domestic product.
>
> By the terms of Article 3.3, it is 'only if' the above conditions are established that an investigating authority 'may' make a cumulative assessment of the effects of dumped imports from several countries.
>
> We find no basis in the text of Article 3.3 for Brazil's assertion that a country-specific analysis of the potential negative effects of volumes and prices of dumped imports is a pre-condition for a cumulative assessment of the effects of all dumped imports. Article 3.3 sets out expressly the conditions that must be fulfilled before the investigating authorities may cumulatively assess the effects of dumped imports from more than one country. There is no reference to the country-by-country volume and price analyses that Brazil contends are pre-conditions to cumulation. In fact, Article 3.3 expressly requires an investigating authority to examine country-specific volumes, not in the manner suggested by Brazil, but for purposes of determining whether the 'volume of imports from each country is not negligible'."[173]

140. In support of its finding, the Appellate Body in *EC – Tube or Pipe Fittings* further elaborated on the rationale behind the practice of cumulation:

> "The apparent rationale behind the practice of cumulation confirms our interpretation that both volume and prices qualify as 'effects' that may be cumulatively assessed under Article 3.3. A cumulative analysis logically is premised on a recognition that the domestic industry faces the impact of the 'dumped imports' as a whole and that it may be injured by the total impact of the dumped imports, even though those imports originate from various countries. If, for example, the dumped imports from some countries are low in volume or are declining, an exclusively country-specific analysis may not identify the causal relationship between the dumped imports from those countries and the injury suffered by the domestic industry. The outcome may then be that, because imports from such countries could not *individually* be identified as causing injury, the dumped imports from these countries would not be subject to anti-dumping duties, even though they are in fact causing injury. In our view, therefore, by expressly providing for cumulation in Article 3.3 of the *Anti-Dumping Agreement*, the negotiators appear to have recognized that a domestic industry confronted with dumped imports originating from several countries may be injured by the cumulated effects of those imports, and that those effects may not be adequately taken into account in a country-specific analysis of the injurious effects of dumped imports. Consistent with the rationale behind cumulation, we consider that changes in import volumes from individual countries, and the effect of those country-specific volumes on prices in the importing country's market, are of little significance in determining whether injury is being caused to the domestic industry by the dumped imports as a whole.[174]"[175]

(c) Conditions for cumulation – appropriate in light of the "conditions of competition"

141. The Panel on *EC – Tube or Pipe Fittings* examined the nature and scope of the requirement in Article 3.3(b) that a cumulative assessment of the effects of the imports is appropriate in light of the conditions of competition between the imported products and the conditions of competition between the imported products and the like domestic product. It considered that, "[I]n light of the general wording of the provision and the nature of the term 'appropriate', an investigating authority enjoys a certain degree of discretion in making that determination on the basis of the record before it. However, it is clear to us that cumulation must be suitable or fitting in the particular circumstances of a given case in light of the particular conditions of competition extant in the marketplace."[176]

---

[171] Panel Report on *EC – Tube or Pipe Fittings*, paras. 7.234–7.235.

[172] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.234.

[173] Appellate Body Report on *EC – Tube or Pipe Fittings*, paras. 109–110.

[174] (*footnote original*) We do not suggest that trends in country-specific volumes are always irrelevant for an investigating authority's consideration. For example, such trends may be relevant in the context of an investigating authority's evaluation of the conditions of competition between imported products, and between imported products and the domestic like product, as provided for in Article 3.3(b). Brazil raised the relationship between import volumes and conditions of competition as the basis for a claim under that provision before the Panel. (Panel Report, para. 7.252) The Panel found that the divergences in volume trends between Brazilian imports and those of other countries did not compel a finding by the European Commission that the effects of Brazilian imports could not be appropriately assessed on a cumulated basis with the effects of imports from other countries. (*Ibid.*, paras. 7.253–7.256) Brazil has not appealed the Panel's finding in this respect.

[175] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 116.

[176] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.241.

142. The Panel on *EC – Tube or Pipe Fittings* understood the phrase "conditions of competition" to refer to the dynamic relationship between products in the marketplace and added that this phrase is not accompanied by any sort fo qualifier such as "identical" or "similar". It concluded that Article 3.3 contains no express indicators by which to assess the "conditions of competition", much less any fixed rules dictating precisely the relative percentages or levels of such indicators that must be present:

> "While we note that a broadly parallel evolution and a broadly similar volume and price trend might well indicate that imports may appropriately be cumulated, we find no basis in the text of the Agreement for Brazil's assertion that 'only a comparable evolution and a similarity of the significantly increased import volumes and/or the significant price effects . . . would indicate that these imports might have a joint impact on the situation of the domestic industry and may be assessed cumulatively'. Moreover, the provision contains no express indicators by which to assess the 'conditions of competition', much less any fixed rules dictating precisely and exhaustively the relative percentages or levels of such indicators that must be present. Unlike the lists of factors that guide an authority's examination under, for example, Articles 3.2, 3.4 and 3.5, Article 3.3 does not provide even an indicative list of factors that might be relevant in the assessment called for under that provision, in particular, the assessment of 'conditions of competition'.[177] We note that Article 3.2 explicitly concentrates on volume and price trends, and that Article 3.3 is neither specific nor limited in this way. Thus, while price and volume considerations may well be relevant in this context, we find no explicit reference thereto in Article 3.3(b)."[178]

6. Article 3.4

(a) "dumped imports"

143. In *EC – Bed Linen*, the Panel rejected the argument that "dumped imports" must be understood to refer only to imports which are the subject of transactions in which the export price was below normal value. See paragraph 119 above.

(b) "domestic industry"

(i) Sectoral analysis

144. The Appellate Body in *US – Hot-Rolled Steel* ruled that investigating authorities can undertake "an evaluation of particular parts, sectors or segments within a domestic industry", provided they respect the fundamental obligation in Article 3.1 to conduct an "objective assessment"[179]:

> ". . . it seems to us perfectly compatible with Article 3.4 for investigating authorities to undertake, or for a Member to require its investigating authorities to undertake, an evaluation of particular parts, sectors or segments within a domestic industry.[180] Such a sectoral analysis may be highly pertinent, from an economic perspective, in assessing the state of an industry as a whole.
>
> However, the investigating authorities' evaluation of the relevant factors must respect the fundamental obligation, in Article 3.1, of those authorities to conduct an 'objective examination'. If an examination is to be 'objective', the identification, investigation and evaluation of the relevant factors must be even-handed. Thus, investigating authorities are not entitled to conduct their investigation in such a way that it becomes more likely that, as a result of the fact-finding or evaluation process, they will determine that the domestic industry is injured.
>
> Instead, Articles 3.1 and 3.4 indicate that the investigating authorities must determine, objectively, and on the basis of positive evidence, the importance to be attached to *each* potentially relevant factor and the weight to be attached to it. In every investigation, this determination turns on the 'bearing' that the relevant factors have 'on the state of the [domestic] industry'."[181]

(ii) Domestic producers outside the "sample"

145. In *EC – Bed Linen*, the Panel examined whether, further to having defined the Community industry as a group of 35 producers and resorted to a sample of those producers, the European Communities was precluded from considering information relating to producers not within that sample, or not within the Community industry.[182] The Panel, in a finding subsequently not addressed by the Appellate Body, resolved the issue whether "consideration of evidence for domestic producers outside the selected sample *but within the domestic industry* constitutes, *ipso facto*, a violation of Article 3.4"[183], as follows:

---

[177] (*footnote original*) In this regard, we take note of Exhibits EC-8 through 11 containing submissions made by certain Members as part of discussions in the Ad Hoc Group on Implementation within the ADP Committee, which we observe reflect somewhat divergent practices of Members. These discussions show, at a minimum, that price and volume are not accepted by all Members as appropriate indicators of the "conditions of competition" (as they arguably reflect the outcome of competition and not whether competition is occurring). It appears, therefore, that Members themselves have not yet arrived at a common understanding of the content of these terms. Indeed, we note that this is a topic which has been proposed for negotiations and it is not our task to presuppose the outcome of those negotiations.

[178] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.242.

[179] As regards the meaning of the term "objective examination" under Article 3.1, see paras. 115–116.

[180] (*footnote original*) We note that the panel in *Mexico – High Fructose Corn Syrup*, *supra*, footnote 30, para. 7.154, took a similar view.

[181] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 195–197.

[182] The Panel also indicated that "[they] express no opinion as to the correctness *vel non* of the European Communities' interpretation of Article 4 of the AD Agreement or its application in this case". Panel Report on *EC – Bed Linen*, para. 6.175.

[183] Panel Report on *EC – Bed Linen*, para. 6.180.

"[I]t is clear from the language of the AD Agreement, in particular Articles 3.1, 3.4, and 3.5, that the determination of injury has to be reached for the *domestic industry* that is the subject of the investigation. . . . In our view, it would be anomalous to conclude that, because the [investigating Member] chose to consider a sample of the domestic industry, it was required to close its eyes to and ignore other information available to it concerning the domestic industry it had defined. Such a conclusion would be inconsistent with the fundamental underlying principle that anti-dumping investigations should be fair and that investigating authorities should base their conclusions on an objective evaluation of the evidence. It is not possible to have an objective evaluation of the evidence if some of the evidence is required to be ignored, even though it relates precisely to the issues to be resolved. Thus, we consider that the [investigating authority] did not act inconsistently with Articles 3.1, 3.4, and 3.5 of the AD Agreement by taking into account in its analysis information regarding the . . . industry as a whole, including information pertaining to companies that were not included in the sample."[184]

(iii) Companies outside the domestic industry

146. Regarding the issue of information concerning Article 3.4 factors for companies outside the domestic industry, the Panel on *EC – Bed Linen* held that information about companies which are not part of the domestic industry "provides no basis for conclusions about the impact of dumped imports on the domestic industry":

"In our view, information concerning companies that are not within the domestic industry is irrelevant to the evaluation of the 'relevant economic factors and indices having a bearing on the state of the industry' required under Article 3.4. This is true even though those companies may presently produce, or may have in the past produced, the like product . . . . Information concerning the Article 3.4 factors for companies outside the domestic industry provides no basis for conclusions about the impact of dumped imports on the domestic industry itself."[185]

147. The Panel on *EC – Tube or Pipe Fittings* held that if like product-specific information was not available, investigating authorities could use other broader data:

"[W]hile data and information pertaining specifically to the 'like product' is to be used to the extent possible, the Agreement also envisages resort to a broader spectrum of data where separate identification of like product specific data is not possible. It is therefore permissible for an investigating authority to assess the effects of the dumped imports by the examination of the production of a broader range of products, which includes the like product, for which the necessary information can be provided if like-product-specific information is not available."[186]

(c) "all relevant economic factors and indices having a bearing on the state of the industry"

(i) Mandatory or illustrative nature of the list of factors

148. The Panel on *EC – Bed Linen*, in a finding not addressed by the Appellate Body[187], considered whether the list of factors in Article 3.4 is illustrative or mandatory. Further to concluding that the list is mandatory, the Panel addressed the issue of whether only the four groups of "factors" represented by the subgroups separated by semicolons in Article 3.4 must be evaluated, or whether each individual factor listed must be considered:

"The use of the phrase 'shall include' in Article 3.4 strongly suggests to us that the evaluation of the listed factors in that provision is properly interpreted as mandatory in all cases. That is, in our view, the ordinary meaning of the provision is that the examination of the impact of dumped imports must include an evaluation of all the listed factors in Article 3.4.

. . .

With regard to the use of the word 'including', we consider that this simply emphasises that there may be other 'relevant factors and indices having a bearing on the state of the industry' among 'all' such factors that must be evaluated. We recall that, in the Tokyo Round AD Code, the same list of factors was preceded by the

[184] Panel Report on *EC – Bed Linen*, para. 6.181.
[185] Panel Report on *EC – Bed Linen*, para. 6.182.
[186] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.327.
[187] However, the Appellate Body in *US – Wheat Gluten* had held that all the factors in the list of economic factors to be considered as having a bearing on the state of the domestic industry under Article 4.2(a) of the Safeguards Agreement must be considered:

"The use of the word 'all' in the phrase 'all relevant factors' in Article 4.2(a) indicates that the effects of *any* factor may be relevant to the competent authorities' determination, irrespective of whether the particular factor relates to imports specifically or to the domestic industry more generally. This conclusion is borne out by the list of factors which Article 4.2(a) stipulates are, 'in particular', relevant to the determination. This list includes factors that relate *both* to imports specifically *and* to the overall situation of the domestic industry more generally. The language of the provision does not distinguish between, or attach special importance or preference to, any of the listed factors. In our view, therefore, Article 4.2(a) of the *Agreement on Safeguards* suggests that all these factors are to be *included* in the determination and that the contribution of each relevant factor is to be counted in the determination of serious injury according to its 'bearing' or effect on the situation of the domestic industry. Thus, we consider that Article 4.2(a) does not support the Panel's conclusion that some of the 'relevant factors' – those related exclusively to increased imports – should be counted towards an affirmative determination of serious injury, while others – those not related to increased imports – should be excluded from that determination."

Appellate Body Report on *US – Wheat Gluten*, para. 72. See also Chapter on the *Agreement on Safeguards*, Section V.B.4(a)(ii).

> phrase 'such as', which was changed to the word 'including' that now appears in Article 3.4 of the AD Agreement. . . . We thus read the phrase 'shall include an evaluation of all relevant factors and indices having a bearing on the state of the industry, including . . .' as introducing a mandatory list of relevant factors which must be evaluated in every case. The change in the wording that was introduced in the Uruguay Round in our view supports an interpretation of the current text of Article 3.4 as setting forth a list that is mandatory, and not merely indicative or illustrative.
>
> . . . [I]n our view, neither the presence of semicolons separating certain groups of factors in the text of Article 3.4, nor the presence of the word 'or' within the first and fourth of these groups, serves to render the mandatory list in Article 3.4 a list of only four 'factors'. We further note that the two 'ors' appear within – rather than between – the groups of factors separated by semicolons. Thus, we consider that the use of the term 'or' here does not detract from the mandatory nature of the textual requirement that 'all relevant economic factors' shall be evaluated. With respect to the second 'or,' it appears in the phrase 'ability to raise capital or investments', which clearly indicates that the factor that an investigating authority must examine is the 'ability to raise capital' or the 'ability to raise investments', or both.
>
> . . .
>
> Based on the foregoing, we conclude that *each* of the fifteen factors listed in Article 3.4 of the AD Agreement must be evaluated by the investigating authorities in each case in examining the impact of the dumped imports on the domestic industry concerned."[188]

149. The Panel on *Mexico – Corn Syrup* confirmed the mandatory nature of the list of factors in Article 3.4. The Panel indicated that, in its view, the language of Article 3.4 makes it clear that the listed factors in Article 3.4 must be considered in all cases "even though such consideration may lead the investigating authority to conclude that a particular factor is not probative in the circumstances of a particular industry or a particular case, and therefore is not relevant to the actual determination. Moreover, the consideration of each of the Article 3.4 factors must be apparent in the final determination of the investigating authority.[189]"[190]

150. The Panel on *Thailand – H-Beams*, in a finding subsequently explicitly endorsed by the Appellate Body[191], also confirmed that Article 3.4 requires the examination of *all* the listed factors:

> "We note Thailand's argument that the list of factors in Article 3.4 is illustrative only, and that no change in meaning was intended in the change in drafting from the 'such as' that appeared in the corresponding provision in the Tokyo Round Antidumping Code to the 'including' that now appears in Article 3.4 of the AD Agreement.[192] The term 'such as' is defined as '[o]f the kind, degree, category being or about to be specified' . . . 'for example'. By contrast, the verb 'include' is defined to mean 'enclose'; 'contain as part of a whole or as a subordinate element; contain by implication, involve'; or 'place in a class or category; treat or regard as part of a whole'. We thus read the Article 3.4 phrase 'shall include an evaluation of all relevant factors and indices having a bearing on the state of the industry, including . . .' as introducing a mandatory list of relevant factors which must be evaluated in every case. We are of the view that the change that occurred in the wording of the relevant provision during the Uruguay Round (from 'such as' to 'including') was made for a reason and that it supports an interpretation of the current text of Article 3.4 as setting forth a list that is not merely indicative or illustrative, but, rather, mandatory.[193]"[194]

151. Also, in support of its proposition referenced in paragraph 150 above, in *Thailand – H-Beams*, the Panel examined the presence of the word "or" in Article 3.4, but concluded that the use of this word did not serve to detract from the mandatory nature of the list of factors under this provision:

---

[188] Panel Report on *EC – Bed Linen*, paras. 6.154–6.159. *See* also Panel Report on *Mexico – Corn Syrup*, para. 7.128; Panel Report on *Egypt – Steel Rebar*, para. 7.36. With respect to a very similar issue concerning the term "all relevant factors" under Article 4.2(a) of the Safeguards Agreement, see the Chapter on the *Agreement on Safeguards*, Section IV.B.4(a).

[189] (*footnote original*) In this regard, we note the text of Article 12.2.2, which provides:

> "A public notice of conclusion or suspension of an investigation in the case of an affirmative determination providing for the imposition of a definitive duty or the acceptance of a price undertaking shall contain, or otherwise make available through a separate report, all relevant information on the matters of fact and law and reasons which have led to the imposition of final measures . . .".

[190] Panel Report on *Mexico – Corn Syrup*, para. 7.128.

[191] Appellate Body Report on *Thailand – H-Beams*, paras. 121–128.

[192] (*footnote original*) As a third party, the European Communities was also of the view that the list in Article 3.4 was illustrative despite the change in language from "such as" in the relevant Tokyo Round Code provision to "including" in current Article 3.4. See EC third party submission, Annex 3–1, para. 41 and EC Response to Panel Question 13, Annex 3–7. Japan submitted that the change in terminology indicated that each factor listed in Article 3.4 must be evaluated. See Response of Japan to Panel Question 13, Annex 3–8. The United States was of the view that the change in terminology "clarified the need for the authority to evaluate each and every listed factor that is relevant to the state of the industry". See US Response to Panel Question 13, Annex 3–9.

[193] (*footnote original*) Article 3.2 DSU directs panels to clarify the provisions of the covered agreements "in accordance with customary rules of interpretation of public international law", which are set out in Articles 31 and 32 of the Vienna Convention on the Law of Treaties. See e.g. Appellate Body Report on *Japan – Alcoholic Beverages II*, pp.10–12. Here, we look to negotiating history pursuant to Article 32 of the *Vienna Convention* in order to confirm the meaning resulting from the application of the general rule of interpretation in Article 31 of the *Vienna Convention*.

[194] Panel Report on *Thailand – H-Beams*, para. 7.225. Also see Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.314.

"We are of the view that the language in Article 3.4 makes it clear that all of the listed factors in Article 3.4 must be considered in all cases. The provision is specific and mandatory in this regard. We do not consider that the presence of semi-colons separating certain groups of factors in the text of Article 3.4, nor the presence of the word 'or' within the first and fourth of these groups serve to render the mandatory list in Article 3.4 a list of only four 'factors'. We note that the two 'ors' appear within – rather than between – the groups of factors separated by semi-colons. The first 'or' in Article 3.4 appears at the end of a group of factors that may indicate declines in the domestic industry (i.e. 'actual and potential decline in sales, profits, output, market share, productivity, return on investments, *or* utilization of capacity' (emphasis added)). In our view, the use of the word 'or' here is textually linked to the phrase 'actual and potential decline', and may indicate that such 'declines' need not occur in respect of each and every one of the factors listed in this group in order to support a finding of injury. Thus, we do not consider that the use of the term 'or' here detracts from the textual requirement that 'all relevant economic factors' be evaluated. Moreover, we note that this first group of factors in Article 3.4 contains factors that all relate to, and are indicative of, the state of the industry.[195]

With respect to the second 'or,' we note that it appears in the phrase 'ability to raise capital or investments'. In our view, this 'or' indicates that the factor that an investigating authority must examine is 'ability to raise capital' or 'ability to raise investments', or both."[196]

152. In *Guatemala – Cement II*, the Panel found that in violation of Article 3.4, Guatemala's authority had not considered certain factors among those enumerated in that Article. In doing so, the Panel agreed with the finding of the Panel on *Mexico – Corn Syrup* referenced in paragraph 149 above. In further support of its finding, the Panel also noted a finding of the Panel on *Korea – Dairy* with respect to Article 4.2 of the Agreement on Safeguards, "which is very similar to Article 3.4 of the AD Agreement."[197]

153. The Panel on *EC – Bed Linen (Article 21.5 – India)* underlined that "there is no requirement in Article 3.4 that each and every injury factor, individually, must be indicative of injury".[198] The Panel concluded that:

"[. . . .] an analysis of injury does not rest on the evaluation of the Article 3.4 factors individually, or in isolation. Nor is it necessary that all factors show negative trends or declines. Rather, the analysis and conclusions must consider each factor, determine the relevance of each factor, or lack thereof, to the analysis, and consider the relevant factors together, in the context of the particular industry at issue, to make a reasoned conclusion as to the state of the domestic industry."[199]

(ii) Other factors not listed in Article 3.4

154. The Panel on *Mexico – Corn Syrup* indicated that, in a particular case, the examination of relevant economic factors other than those listed in Article 3.4 could be required:

"In our view, this language [of Article 3.4] makes it clear that the listed factors in Article 3.4 must be considered in all cases. There may be other relevant economic factors in the circumstances of a particular case, consideration of which would also be required. In a threat of injury case, for instance, the AD Agreement itself establishes that consideration of the Article 3.7 factors is also required . . ."[200]

155. In *US – Hot-Rolled Steel*, the Appellate Body ruled that the obligation of evaluation that Article 3.4 imposes on investigating authorities is not confined to the listed factors, but extends to "all relevant economic factors":

"Article 3.4 lists certain factors which are deemed to be relevant in every investigation and which must always be evaluated by the investigating authorities.[201] However, the obligation of evaluation imposed on investigating authorities, by Article 3.4, is not confined to the listed factors, but extends to 'all relevant economic factors'. We see nothing in the *Anti-Dumping Agreement* which prevents a Member from requiring that its investigating authorities examine, in every investigation, the potential relevance of a particular 'other factor', not listed in Article 3.4, as part of its overall 'examination' of the state of the domestic industry."[202]

---

[195] (*footnote original*) We note that Article 4.2(a) of the Agreement on Safeguards, which contains a requirement that the investigating authorities "shall evaluate all relevant factors . . . having a bearing on the situation of that industry, in particular, . . . changes in the level of sales, production, productivity, capacity utilization, profits and losses, and employment" has been interpreted to require an evaluation of each of these listed factors having a bearing on the state of the industry. See Appellate Body Report on *Argentina – Footwear (EC)*, para. 136 and Panel Report on *Argentina – Footwear (EC)*, para. 8.123. While the standard for injury in safeguards cases ("serious injury") is different from that applied to injury determinations in the anti-dumping context ("material injury"), the same type of analysis is provided for in the respective covered agreements, i.e. evaluation or examination of a listed series of factors in order to determine whether the requisite injury exists.

[196] Panel Report on *Thailand – H-Beams*, paras. 7.229–7.230.

[197] Panel Report on *Guatemala – Cement II*, fn. 884, where the Panel refers to Panel Report on *Korea – Dairy*, para. 7.55. With respect to the term "all relevant factors" under Article 4.2(a) of the *Safeguards Agreement*, see Chapter on the *Agreement on Safeguards*, Section V.B.4(a).

[202] (*footnote original*) Appellate Body Report on *US – Hot-Rolled Steel*, para. 195.

(iii) "having a bearing on"

156. In *Egypt – Steel Rebar*, the Panel rejected Turkey's argument that Article 3.4 required a full causation analysis, including a non-attribution analysis, which, according to the Panel, stemmed from Turkey's reading of the words "having a bearing on" as having to do exclusively with causation:

> "Turkey's argument that Article 3.4 requires a full 'non-attribution' analysis appears to stem from its reading of the term 'having a bearing on' as having to do exclusively with causation, (i.e., as meaning factors *having an effect on* the state of the industry). There is another meaning of this term which we find more pertinent in the overall context of Article 3.4, however. In particular, the term 'having a bearing on' can mean *relevant to* or *having to do with* the state of the industry[203], and this meaning is consistent with the fact that many of the factors listed in Article 3.4 are descriptors or indicators *of* the state of the industry, rather than being factors *having an effect* thereon. For example, sales levels, profits, output, etc. are not in themselves *causes* of an industry's condition. They are, rather, among the factual indicators by which that condition can be judged and assessed as injured or not. Put another way, taken as a whole, these factors are more in the nature of *effects* than *causes*.
>
> This reading of 'having a bearing on' finds contextual support in the wording of the last group of factors in Article 3.4, namely 'actual and potential negative *effects on* cash flow, inventories, . . .' (emphasis added). Further contextual support is found in the cross-reference to Article 3.4 contained in the first sentence of Article 3.5: '. . . the *effects* of dumping as set forth in paragraph [] 4 [of Article 3]'.(emphasis added)
>
> We note in addition that if Turkey were correct that the full causation analysis, including non-attribution, were required by Article 3.4, this would effectively render redundant Article 3.5, which explicitly addresses causation, including non-attribution. Such an outcome would not be in keeping with the relevant principles of international treaty law interpretation, or with consistent practice in WTO dispute settlement.[204]"[205]

(d) Evaluation of relevant factors

(i) Concept of evaluation

157. In *Thailand – H-Beams*, the Panel opined that each of the factors listed in Article 3.4 must be evaluated, not merely as to whether it is "relevant" or "irrelevant", but on the basis of a "thorough evaluation" of the state of the industry at issue. While the Appellate Body in *Thailand – H-Beams* explicitly endorsed the Panel's finding that consideration of all factors listed under Article 3.4 is mandatory, it did not address this particular finding:

> ". . . Article 3.4 requires the authorities properly to establish whether a factual basis exists to support a well-reasoned and meaningful analysis of the state of the industry and a finding of injury. This analysis does not derive from a mere characterization of the degree of 'relevance or irrelevance' of each and every individual factor, but rather must be based on a thorough evaluation of the state of the industry and, in light of the last sentence of Article 3.4[206], must contain a persuasive explanation as to how the evaluation of relevant factors led to the determination of injury."[207]

158. In *Egypt – Steel Rebar*, the Panel faced the question of whether the mere presentation of tables of data, without more, constitutes an "evaluation" in the sense of Article 3.4. Egypt had gathered data on all of the listed factors but could not adduce sufficient evidence of its authorities' evaluation of all those factors. The Panel considered that "the 'evaluation' to which Article 3.4 refers is the process of analysis and interpretation of the facts established in relation to each listed factor". Since, in spite of having gathered data on all of the factors listed in Article 3.4, the Egyptian investigating authority failed to evaluate a number of listed factors, the Panel found that Egypt acted inconsistently with Article 3.4:[208]

> "We first consider the ordinary meaning of the word 'evaluation'. The Oxford English Dictionary defines 'evaluation' as follows:
>
> '(1) The action of appraising or valuing (goods, etc.); a calculation or statement of value. (2) The action of evaluating or determining the value of (a mathematical expression, a physical quantity, etc.), or of estimating the force of (probabilities, *evidence*).'[209](emphasis added)
>
> The Merriam-Webster's Collegiate Dictionary defines 'evaluation' as follows:
>
> '(1) To determine or fix the value of. (2) To determine the significance, worth, or condition of *usually by careful appraisal or study.*'[210] (emphasis added)

---

[203] For example, *Webster's New World Dictionary*, 2nd College Edition, 1986, at p.123, includes as a definition of "bearing": "relevant meaning, appreciation, relation [the evidence had no bearing on the case]".

[204] (*footnote original*) Appellate Body Report, *United States – Standards for Reformulated and Conventional Gasoline ("US – Gasoline")*, WT/DS2/AB/R, adopted 20 May 1996, DSR 1996:I,3. On page 23 of the Appellate Body Report it is stated: ". . . One of the corollaries of the 'general rule of interpretation' in the *Vienna Convention* is that interpretation must give meaning and effect to all the terms of the treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility."

[205] Panel Report on *Egypt – Steel Rebar*, paras. 7.62–7.64.

[206] (*footnote original*) This sentence reads: "This list is not exhaustive, nor can one or several of these factors necessarily give decisive guidance."

[207] Panel Report on *Thailand – H-Beams*, para. 7.236.

[208] Panel Report on *Egypt – Steel Rebar*, para. 7.51.

[209] (*footnote original*) Oxford English Dictionary Online: http://dictionary.oed.com.

[210] (*footnote original*) Merriam-Webster's Collegiate Dictionary online: http://www.m-w.com.

> The Merriam-Webster's Thesaurus lists as synonyms for 'evaluation' the following:
>
> '(1) appraisal, appraisement, assessment, estimation, valuation (with related words: interpreting; judging, rating); (2) appraisal, appraisement, assessment, estimate, judgement, stock (with related words: appreciation; interpretation; decision).'[211]
>
> We find significant that all of these definitions and synonyms connote, particularly in the context of 'evaluation' of evidence, the act of analysis, judgement, or assessment. That is, the first definition recited above refers to 'estimating the force of' evidence, evoking a process of weighing evidence and reaching conclusions thereon. The second definition recited above – to determine the significance, worth, or condition of, usually by careful appraisal or study – confirms this meaning. Thus, for an investigating authority to 'evaluate' evidence concerning a given factor in the sense of Article 3.4, it must not only gather data, but it must analyze and interpret those data.
>
> We nevertheless do recognize that, in addition to the dictionary meanings of 'evaluation' that we have cited, the definitions set forth above also refer to a purely quantitative process (i.e., calculating, stating, determining or fixing the value of something). If this were the definition applicable to the word 'evaluation' as used in Article 3.4, arguably mere compilation of data on the listed factors, without any narrative explanation or analysis, might suffice to satisfy the requirements of Article 3.4. We find, however, contextual support in Article 17.6(i) of the AD Agreement for our reading that 'evaluation' is something different from, and more than, simple compilation of tables of data. We recognize that Article 17.6(i) does not apply directly to investigating authorities, and that instead, it is part of the standard of review to be applied by panels in reviewing determinations of investigating authorities. However, Article 17.6(i) identifies as the object of a panel's review two basic components of a determination: first, the investigating authority's 'establishment of the facts', and second, the investigating authority's 'evaluation of those facts'. Thus, Article 17.6(i)'s characterization of the essential components of a determination juxtaposes 'establishment of the facts' with the 'evaluation of those facts'. That panels are instructed to determine whether an investigating authority's 'establishment of the facts' was proper connotes an assessment by the panel of the means by which the data before the investigating authority were gathered and compiled. By contrast, the fact that panels are instructed to determine whether an investigating authority's 'evaluation of those facts' was objective and unbiased, provides further support for our view that the 'evaluation' to which Article 3.4 refers is the process of analysis and interpretation of the facts established in relation to each listed factor."[212]

159. A similar view was expressed by the Panel on *EC – Tube or Pipe Fittings*. The Panel considered that "an evaluation of a factor, in our view, is not limited to a mere characterisation of its relevance or irrelevance. Rather, we believe that an 'evaluation' also implies the analysis of data through placing it in context in terms of the particular evolution of the data pertaining to each factor individually, as well as in relation to other factors examined".[213] According to the Panel, "a meaningful investigation must also take into account the actual intervening trends in each of the injury factors and indices – rather than just a comparison of 'end-points'. There must a streamlined, genuine and undistorted picture drawn from the facts before the investigating authority. Only on the basis of such a thorough and dynamic evaluation of data capturing the current state of the industry in the determination would a reviewing panel be able to assess whether the conclusions drawn from the examination are those of an unbiased and objective authority".[214]

(ii) Evaluation of all listed factors

Evaluation of all listed factors must be apparent in the authorities' conclusions

160. The Panel on *EC – Bed Linen*, in a finding not specifically addressed by the Appellate Body, stated that the evaluation of all the factors by the investigating authorities must be apparent in the final determination:

> "[W]hile the authorities may determine that some factors are not relevant or do not weigh significantly in the decision, the authorities may not simply disregard such factors, but must explain their conclusion as to the lack of relevance or significance of such factors. . . . [W]e are of the view that every factor in Article 3.4 must be considered, and that the nature of this consideration, including whether the investigating authority considered the factor relevant in its analysis of the impact of dumped imports on the domestic industry, must be apparent in the final determination."[215]

161. Similarly, the Panel on *Guatemala – Cement II* stated that "the consideration of the factors in Article 3.4 must be apparent in the determination so the Panel may assess whether the authority acted in accordance with Article 3.4 at the time of the investigation."[216]

162. On the other hand, in its Report on *EC – Tube or Pipe Fittings*, the Appellate Body stated that Article 3.4

---

[211] (*footnote original*) Merriam-Webster's Thesaurus online: http://www.m-w.com.

[212] Panel Report on *Egypt – Steel Rebar*, paras. 7.42–7.45. For a similar view see Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.162; Panel Report on *EC – Tube or Pipe Fittings*, para. 7.314.

[213] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.314.

[214] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.316.

[215] Panel Report on *EC – Bed Linen*, para. 6.162.

[216] Panel Report on *Guatemala – Cement II*, para. 8.283.

"requires an investigating authority to evaluate all relevant economic factors in its examination of the impact of the dumped imports. By its terms, it does not address the manner in which the results of this evaluation are to be set out, nor the type of evidence that may be produced before a panel for the purpose of demonstrating that this evaluation was indeed conducted"[217]. In other words, the Appellate Body considered that the text of Article 3.4 "does not address the *manner* in which the results of the investigating authority's analysis of each injury factor are to be set out in the published documents"[218]. This led the Appellate Body to reject Brazil's claims that the absence of an explicit evaluation in the published record of the investigation of one of the factors of Article 3.4 – i.e. the factor "growth" – was inconsistent with Article 3.4:

> "Accordingly, because Articles 3.1 and 3.4 do not regulate the *manner* in which the results of the analysis of each injury factor are to be set out in the published documents, we share the Panel's conclusion that it is not required that in every anti-dumping investigation a separate record be made of the evaluation of each of the injury factors listed in Article 3.4. Whether a panel conducting an assessment of an anti-dumping measure is able to find in the record sufficient and credible evidence to satisfy itself that a factor has been evaluated, even though a separate record of the evaluation of that factor has not been made, will depend on the particular facts of each case. Having said this, we believe that, under the particular facts of this case, it was reasonable for the Panel to have concluded that the European Commission addressed and evaluated the factor 'growth'.
>
> Having regard to the nature of the factor 'growth', we believe that an evaluation of that factor necessarily entails an analysis of certain other factors listed in Article 3.4. Consequently, the evaluation of those factors could cover also the evaluation of the factor 'growth'."[219]

163. The Panel on *EC – Bed Linen (Article 21.5 – India)* addressed the question of the adequacy of the evaluation in the case of a redetermination by the investigating authority in order to implement a recommendation by the DSB to bring the measure into conformity. In doing so, the Panel made the following finding:

> "With respect to the adequacy of the evaluation of the elements as an overall matter, we look to the explanation of the EC regarding its conclusions, based on the combination of elements discussed in the original determination and redetermination. While this is perhaps less straightforward than we might wish, it is clear to us that merely because the redetermination confirms or adopts certain findings made in the original determination does not **demonstrate** a failure to carry out an overall evaluation of the information in making the injury redetermination."[220]

Checklist approach

164. In *EC – Bed Linen*, the European Community objected to what it termed the "checklist" approach to the list of factors under Article 3.4 and argued that the relevance of some factors may be apparent early in the investigation. The Panel, in a finding not reviewed by the Appellate Body, concluded that "as long as the lack of relevance or materiality of the factors not central to the decision is at least implicitly apparent from the final determination, the Agreement's requirements are satisfied. While a checklist would perhaps increase an authority's and a panel's confidence that all factors were considered, we believe that it is not a required approach to decision-making under Article 3.4."[221]

165. In *US – Hot-Rolled Steel*, the issue was whether the US investigating authority had violated Article 3.4 by failing to explicitly discuss, in its determination, certain factors for each year of the period of investigation. In that case, according to the Panel, the authority had discussed each of the factors for the final two years of the three-year period of investigation, and only some of them for the first year of that period. The Panel found that the determination explained the particular relevance of the second and third years of the period, and that the authority's failure to explicitly address each factor in its discussion of the first year of the period did not constitute a violation of Article 3.4.[222] The Panel thus found that each of the listed Article 3.4 factors was explicitly discussed in the authority's determination, and given the explanations provided in that determination for the particular emphasis on a part of the period of investigation, the evaluation of the facts was deemed adequate by the panel.[223]

[218] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 157.
[219] Appellate Body Report on *EC – Tube or Pipe Fittings*, paras. 161–162.
[220] Panel Report on *EC – Bed Linen (Article 21.5 – India)*, para. 6.173.
[221] Panel Report on *EC – Bed Linen*, para. 6.163. *See also* Panel Report on *Thailand – H-Beams*, para. 7.236 where the Panel concluded: "We are of the view that the 'evaluation of all relevant factors' required under Article 3.4 must be read in conjunction with the overarching requirements imposed by Article 3.1 of 'positive evidence' and 'objective examination' in determining the existence of injury. Therefore, in determining that Article 3.4 contains a mandatory list of fifteen factors to be looked at, we do not mean to establish a mere 'checklist approach' that would consist of a mechanical exercise of merely ensuring that each listed factor is in some way referred to by the investigating authority. It may well be in the circumstances of a particular case that certain factors enumerated in Article 3.4 are not relevant, that their relative importance or weight can vary significantly from case to case, or that some other non-listed factors could be deemed relevant . . ."
[222] Panel Report on *US – Hot-Rolled Steel*, paras.7.235–7.236.
[223] *See also* Panel Report on *Egypt – Steel Rebar*, para. 7.47.

Relevance of written record of authorities' evaluation

166. In *Egypt – Steel Rebar*, Egypt had gathered data on all of the listed factors but could not adduce sufficient evidence of its authorities' evaluation of all those factors on its written analysis. See paragraph 158 above. The Panel stressed the importance of the written record in the context of an anti-dumping investigation for burden of proof purposes.

> "Here we must emphasize that in the context of an anti-dumping investigation, which is by definition subject to multilateral rules and multilateral review, a Member is placed in a difficult position in rebutting a *prima facie* case that an evaluation has *not* taken place if it is unable to direct the attention of a panel to some contemporaneous written record of that process. If there is no such written record – whether in the disclosure documents, in the published determination, or in other internal documents – of how certain factors have been interpreted or appreciated by an investigating authority during the course of the investigation, there is no basis on which a Member can rebut a *prima facie* case that its 'evaluation' under Article 3.4 was inadequate or did not take place at all. In particular, without a written record of the analytical process undertaken by the investigating authority, a panel would be forced to embark on a *post hoc* speculation about the thought process by which an investigating authority arrived at its ultimate conclusions as to the impact of the dumped imports on the domestic industry. A speculative exercise by a panel is something that the special standard of review in Article 17.6 is intended to prevent. Thus, while Egypt attempts to derive support from the panel report in the *US – Hot-Rolled Steel* dispute for its position that Article 3.4 does not require an explicit written analysis of all of the factors listed therein[224], to us, the findings in that dispute confirms our interpretation, in that what was at issue, was the substantive adequacy of the authority's written analysis of *each* of those factors."[225]

167. In *Egypt – Steel Rebar*, the Panel rejected the argument of one of the parties whereby the requirement of a written analysis of the Article 3.4 factors would be exclusively governed by Article 12 of the *Anti-Dumping Agreement*:

> "Nor do we consider, as suggested by Egypt [footnote omitted], that the requirement of a written analysis of the Article 3.4 factors is exclusively governed by Article 12 of the AD Agreement (public notice and explanation of determinations). While Article 12 contains a requirement to *publish*, and to make available to the interested parties in the investigation, some form of a report on the investigating authority's determination, this is, as the Appellate Body has noted, a procedural requirement having to do with due process[226], rather than with the relevant substantive analytical requirements (which in the context of this claim are found in Article 3.4)."[227]

Evaluation of specific listed factors

"profits"

168. In *Egypt – Steel Rebar*, Turkey claimed that Egypt had violated Article 3.4 because its investigating authorities had not examined all factors affecting profits. The Panel disagreed:

> "We recall that Turkey's claim is that Egypt violated Article 3.4 because the IA did not examine *all factors affecting profits*, and did not examine *all factors affecting domestic prices*. The above text indicates to us, however, a different requirement on an investigating authority. In particular, the text is straightforward in that the requirement is to examine all relevant factors and indices *having a bearing on the state of the industry*. The text then lists a variety of such factors and indices that are presumptively relevant to the investigation and must be examined, one of which is

[224] (*footnote original*) Written Response, dated 13 March 2002, of Egypt to Question 9 to Egypt and Question 3 to Both Parties of the *Written Questions of the Panel*, of 27 February 2002 – Annex 8–2. Egypt contends in its response that "[t]he *Confidential Injury Analysis* therefore constitutes an evaluation of the factors that it covers in the sense of Article 3.4" and that this approach is consistent with the findings of the panel in *US – Hot-Rolled Steel*. However, the facts in the *US – Hot-Rolled Steel* dispute differ significantly from those in this dispute. In this dispute the allegation is that the IA did not properly evaluated all of the factors listed in Article 3.4 of the AD Agreement, whereas in the *US – Hot-Rolled Steel* case, all Article 3.4 factors were evaluated, but Japan claimed that the discussion did not sufficiently evaluate certain factors by failing to discuss date for all three years which comprised the period of investigation for the determination of injury – paras. 7.231–7.236 of the Panel Report, *ibid.*

[225] Panel Report on *Egypt – Steel Rebar*, para. 7.49.

[226] (*footnote original*) In the Appellate Body Report in *Thailand – H-Beams*, para.110, the Appellate Body stated that ". . . Article 12 establishes a framework of procedural and due process obligations concerning, notably, the contents of a *final determination*". We note that what is at issue before us is not the adequacy of the *final determination* or any other published document, as such, but rather, the adequacy of the *substance* of the analysis performed by the Egyptian investigating authority, in whatever document such analysis might be found. Moreover, the basic issue before the Appellate Body in *Thailand – H-Beams* was very different from that before us. In that appeal, the issue raised was whether the panel was limited by the language of Articles 3.1 and 17.6 to reviewing the Thai investigating authority's injury determination exclusively on the basis of facts and analysis discernible in documents that had been published or otherwise made available to the respondents in the investigation or their counsel, or whether in addition, the panel could and should take into account internal analysis memoranda and similar documents prepared by and for the exclusive use of the authority during the investigation, the contents of which were not discernible in any documents available to the respondents. Thus, the issue there was essentially about how a panel should address confidential information, an issue not before us in this dispute. Thus, while Egypt cites *Thailand – H-Beams* as support for its position in the present dispute, in our view that dispute pertains to a different issue entirely. To the extent that it may touch upon issues before us, it does not detract in any way from our interpretation of the substantive requirements of Article 3.4 – paras.98 *et al* of the Appellate Body Report.

[227] Panel Report on *Egypt – Steel Rebar*, para. 7.50.

'profits'. The text does not say, as argued by Turkey, 'all factors affecting profits'. To us, this text means that in its evaluation of the state of the industry, an investigating authority must include an analysis of the domestic industry's profits. Turkey has raised no claim that the IA failed to conduct such an analysis in the rebar investigation."[228]

"factors affecting domestic prices"

169. In *Egypt – Steel Rebar*, Turkey claimed that Egypt had violated Article 3.4 because its investigating authorities had not examined all factors affecting prices. The Panel disagreed:

"We recall that Turkey's claim is that Egypt violated Article 3.4 because the IA did not examine . . . *all factors affecting domestic prices*.

. . . Here again, we note that contrary to Turkey's argument, the text does not read 'all factors affecting domestic prices'. Rather, what is required is that there be *an* evaluation of factors affecting domestic prices. This requirement is clearly linked to the requirements of Articles 3.1 and 3.2 for an 'objective examination' of 'the effect of dumped imports on prices in the domestic market for like products'. . .

In our view, this means that in its evaluation of the state of the industry, an investigating authority must in every case include a price analysis of the type required by Articles 3.1 and 3.2. Turkey has raised no claim that the IA failed to conduct such an analysis in the rebar investigation. In addition, in our view, an investigating authority must consider generally the question of 'factors affecting domestic prices'. . ."[229]

170. The Panel on *EC – Tube or Pipe Fittings* stated that it saw "no basis in the text of the Agreement for Brazil's argument that would require an analysis of factors affecting domestic prices beyond an Article 3.2 price analysis, and observe that certain of the factors potentially affecting price may be more in the way of causal factors to be analysed under Article 3.5, rather than under 3.4."[230]

"growth"

171. In *Egypt – Steel Rebar*, the Panel considered that Article 3.4 threshold as regards addressing the factor "growth" had been satisfied by Egypt since its authorities had addressed sales volume and market share in their final determinations.[231]

(e) Relationship with other paragraphs of Article 3

172. With respect to the relationship of paragraph 4 with paragraphs 1, 2, 3 and 5 of Article 3, see paragraphs 100–101 above.

173. With respect to the relationship between Article 3.4 and Article 3.7, see paragraphs 195–196 below.

7. Article 3.5

(a) Article 3.5 requirements for investigating authorities

174. In *US – Hot-Rolled Steel*, the Appellate Body laid down the requirements that Article 3.5 imposes on the investigating authorities when performing a causation analysis as follows:

"This provision requires investigating authorities, as part of their causation analysis, first, to examine *all* 'known factors', 'other than dumped imports', which are causing injury to the domestic industry 'at the same time' as dumped imports. Second, investigating authorities must ensure that injuries which are caused to the domestic industry by known factors, other than dumped imports, are not '*attributed* to the dumped imports.' (emphasis added)"[232]

(b) Scope of the non-attribution language in Article 3.5

175. The Appellate Body in *US – Hot-Rolled Steel* delimitated the situations where the non-attribution language of Article 3.5 plays a role. In this regard, the Appellate Body specified that this language applies "solely [to] situations where dumped imports and other known factors are causing injury to the domestic industry *at the same time*".[233]

(c) "dumped imports"

176. In *EC – Bed Linen*, the Panel rejected the argument that "dumped imports" must be understood to refer only to imports which are the subject of transactions in which the export price was below normal value. See paragraph 119 above.

(d) "any known factors other than dumped imports"

(i) Concept of known factors

177. On the issue of what are "known factors" other than the dumped imports, the Panel on *Thailand – H-Beams*, in a finding not reviewed by the Appellate Body, found that other "known factors" would include factors "clearly raised before the investigating authorities by interested parties in the course of an AD investigation" and that investigating authorities are not required to seek out such factors on their own initiative:

"We consider that other 'known' factors would include those causal factors that are clearly raised before the

[228] Panel Report on *Egypt – Steel Rebar*, para. 7.60.
[229] Panel Report on *Egypt – Steel Rebar*, paras. 7.60–7.61.
[230] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.335.
[231] Panel Report on *Egypt – Steel Rebar*, para. 7.37.
[232] Appellate Body Report on *US – Hot-Rolled Steel*, para. 222.
[233] Appellate Body Report on *US – Hot-Rolled Steel*, para. 223.

> investigating authorities by interested parties in the course of an AD investigation. We are of the view that there is no express requirement in Article 3.5 AD that investigating authorities seek out and examine in each case *on their own initiative* the effects of *all* possible factors other than imports that may be causing injury to the domestic industry under investigation.[234] . . . We note that there may be cases where, at the time of the investigation, a certain factor may be 'known' to the investigating authorities without being known to the interested parties. In such a case, an issue might arise as to whether the authorities would be compelled to examine such a known factor that is affecting the state of the domestic industry. However, it has not been argued that such factors are present in this case."[235]

178. The Appellate Body on *EC – Tube or Pipe Fittings* disagreed with the Panel's understanding of the term "known" in Article 3.5. The Panel had considered that the alleged causal factor *was* "known" to the European Commission in the context of its dumping and injury analyses, but that the factor was nevertheless not "known" in the context of its causality analysis.[236] The Appellate Body disagreed with this approach and considered that "a factor is either 'known' to the investigating authority, or it is not 'known'; it cannot be 'known' in one stage of the investigation and unknown in a subsequent stage."[237]

179. In *Guatemala – Cement II*, the Panel agreed with Mexico's claim that Guatemala's authority failed to take into account certain undumped imports, and accordingly, failed to assess other factors which were injuring the domestic industry at the same time, in violation of Article 3.5.[238]

(ii) Illustrative list of known factors

180. In *Thailand – H-Beams*, in a finding not reviewed by the Appellate Body, the Panel further stated that "[t]he text of Article 3.5 indicates that the list of other possible causal factors enumerated in that provision is illustrative."[239]

(e) Non-attribution methodology

181. In *US – Hot-Rolled Steel*, the Appellate Body considered that the Panel had erred in its interpretation of the non-attribution language by finding that this language does not require the investigating authorities to separate and distinguish the injurious effects of the other known causal factors from the injurious effects of the dumped imports. The Panel had followed the interpretive approach set forth by the GATT Panel in *US – Norwegian Salmon AD* which the Appellate Body thus also presumably considered erroneous. The Appellate Body ruled that "in order to comply with the non-attribution language in that provision, investigating authorities must make an appropriate assessment of the injury caused to the domestic industry by the other known factors, and they must separate and distinguish the injurious effects of the dumped imports from the injurious effects of those other factors. This requires a satisfactory explanation of the nature and extent of the injurious effects of the other factors, as distinguished from the injurious effects of the dumped imports":[240]

> "The non-attribution language in Article 3.5 of the *Anti-Dumping Agreement* applies solely in situations where dumped imports and other known factors are causing injury to the domestic industry *at the same time*. In order that investigating authorities, applying Article 3.5, are able to ensure that the injurious effects of the other known factors are not 'attributed' to dumped imports, they must appropriately assess the injurious effects of those other factors. Logically, such an assessment must involve separating and distinguishing the injurious effects of the other factors from the injurious effects of the dumped imports. If the injurious effects of the dumped imports are not appropriately separated and distinguished from the injurious effects of the other factors, the authorities will be unable to conclude that the injury they ascribe to dumped imports is actually caused by those imports, rather than by the other factors. Thus, in the absence of such separation and distinction of the different injurious effects, the investigating authorities would have no rational basis to conclude that the dumped imports are indeed causing the injury which, under the *Anti-Dumping Agreement*, justifies the imposition of anti-dumping duties.
>
> We emphasize that the particular methods and approaches by which WTO Members choose to carry out the process of separating and distinguishing the injuri-

[234] (*footnote original*) The panel in *US – Norwegian Salmon AD*, para. 550 stated: "there is no express requirement that investigating authorities examine in each case on their own initiative the effects of all other possible factors other than imports under investigation." That panel was examining Article 3.4 of the Tokyo Round Anti-Dumping Code, which contained different language than Article 3.5 of the WTO AD Agreement.

[235] Panel Report on *Thailand – H-Beams*, para. 7.273. The "clearly raised" standard in the context of national investigations has been rejected by the Appellate Body under the *Safeguards Agreement* which contains different language. See Chapter on the *Agreement on Safeguards*, Section IV.B.2(a).

[236] The Panel on *EC – Tube or Pipe Fittings* found:

> In light of these findings, these factors, although "known" to them in the context of the dumping and injury analysis, would not be a "known" causal factor, that is, a factor that the European Communities was aware would possibly be causing injury to the domestic industry.

Panel Report on *EC – Tube or Pipe Fittings*, para. 7.362.

[237] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 178.

[238] Panel Report on *Guatemala – Cement II*, paras. 8.268–8.272. The Panel also found a violation of Articles 3.1 and 3.2 with respect to the failure by Guatemala's authority to take into account certain undumped imports. See paras. 124 and 131 of this Chapter.

[239] Panel Report on *Thailand – H-Beams*, para. 7.274. See also Panel Report on *Egypt – Steel Rebar*, para. 7.115.

[240] Appellate Body Report on *US – Hot-Rolled Steel*, para. 226.

> ous effects of dumped imports from the injurious effects of the other known causal factors are not prescribed by the *Anti-Dumping Agreement*. What the Agreement requires is simply that the obligations in Article 3.5 be respected when a determination of injury is made."[241]

182. The Appellate Body in *US – Hot-Rolled Steel* acknowledged the practical difficulty of separating and distinguishing the injurious effects of different causal factors but indicated that "although this process may not be easy, this is precisely what is envisaged by the non-attribution language. If the injurious effects of the dumped imports and the other known factors remain lumped together and indistinguishable, there is simply no means of knowing whether injury ascribed to dumped imports was, in reality, caused by other factors. Article 3.5, therefore, requires investigating authorities to undertake the process of assessing appropriately, and separating and distinguishing, the injurious effects of dumped imports from those of other known causal factors."[242]

183. The Appellate Body in *US – Hot-Rolled Steel* supported its interpretation of the non-attribution language of Article 3.5 by referring to its decisions in two safeguards Reports, *US – Wheat Gluten* and *US – Lamb* where it interpreted the non-attribution language in Article 4.2(b) of the Agreement on Safeguards in a similar manner.[243]

184. The Appellate Body on *EC – Tube or Pipe Fittings* addressed the question whether the non-attribution language of Article 3.5 requires an investigating authority, in conducting its causality analysis, to examine the effects of the other causal factors collectively after having examined them individually. The Appellate Body first reiterated its basic view that non-attribution requires separation and distinguishing of the effects of other causal factors from those of the dumped imports so that injuries caused by the dumped imports and those caused by other factors are not "lumped together" and made "indistinguishable". It further stated that "provided that an investigating authority does not attribute the injuries of other causal factors to dumped imports, it is free to choose the methodology it will use in examining the 'causal relationship' between dumped imports and injury."[244] On this basis, the Appellate Body did not find that "an examination of *collective* effects is necessarily required by the non-attribution language of the *Anti-Dumping Agreement*. In particular, we are of the view that Article 3.5 does not compel, *in every case*, an assessment of the *collective* effects of other causal factors, because such an assessment is not always necessary to conclude that injuries ascribed to dumped imports are actually caused by those imports and not by other factors."[245] At the same time, the Appellate Body recognized that "there may be cases where, because of the specific factual circumstances therein, the failure to undertake an examination of the collective impact of other causal factors would result in the investigating authority improperly attributing the effects of other causal factors to dumped imports".[246]

(f) Relationship with other paragraphs of Article 3

185. With respect to the relationship of paragraph 5 with paragraphs 1, 2, 3 and 4 of Article 3, see paragraphs 100–101 above.

8. Article 3.6

(a) Domestic industry production

186. The Panel on *Mexico – Corn Syrup* addressed the issue of allowing the determination of injury on the basis of the portion of the domestic industry's production sold in one sector of the domestic market, as follows:

> "Article 3.6 does not, on its face, allow the determination of injury or threat of injury on the basis of the portion of the domestic industry's production sold in one sector of the domestic market, rather than on the basis of the industry as a whole. Indeed, Article 3.6 relates to a situation different from that at issue here. Article 3.6 provides for the situation where information concerning the production of the like product, such as producers' profits and sales, cannot be separately identified. In such cases, Article 3.6 allows the authority to consider information concerning production of a *broader* product group than the like product produced by the domestic industry, which includes the like product, in evaluating the effect of imports. Nothing in Article 3.6 allows the investigating authority to consider information concerning production of a product sub-group that is *narrower* than the like product produced by the domestic

[241] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 223–224.
[242] Appellate Body Report on *US – Hot-Rolled Steel*, para. 228.
[243] According to the Appellate Body, "[a]lthough the text of the *Agreement on Safeguards* on causation is by no means identical to that of the *Anti-Dumping Agreement*, there are considerable similarities between the two Agreements as regards the non-attribution language. Under both Article 3.5 of the *Anti-Dumping Agreement* and Article 4.2(b) of the *Agreement on Safeguards*, any injury caused to the domestic industry, at the same time, by factors other than imports, must not be attributed to imports. Moreover, under both Agreements, the domestic authorities seek to ensure that a determination made concerning the injurious effects of imports relates, in fact, to those imports and not to other factors. In these circumstances, we agree with the Panel that adopted panel and Appellate Body Reports relating to the non-attribution language in the *Agreement on Safeguards* can provide guidance in interpreting the non-attribution language in Article 3.5 of the *Anti-Dumping Agreement*." Appellate Body Report on *US – Hot-Rolled Steel*, para. 230.
[244] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 189.
[245] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 191.
[246] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 192.

> industry. In particular, nothing in Article 3.6 allows the investigating authority to limit its examination of injury to an analysis of the portion of domestic production of the like product sold in the particular market sector where competition with the dumped imports is most direct."[247]

187. In *US – Hot-Rolled Steel*, the Appellate Body examined whether the investigating authorities could make a sectoral examination of the domestic industry. See paragraphs 116 and 144 above.

9. Article 3.7: threat of material injury

(a) "change in circumstances"

188. In *Egypt – Steel Rebar*, the Panel considered that the text of Article 3.7 makes explicit that the central question in a threat of injury investigation is whether there will be a "change in circumstances" that would cause the dumping to begin to injure the domestic industry:

> "[T]he text of this provision makes explicit that in a threat of injury investigation, the central question is whether there will be a 'change in circumstances' that would cause the dumping to begin to injure the domestic industry. Solely as a matter of logic, it would seem necessary, in order to assess the likelihood that a particular change in circumstances would cause an industry to begin experiencing present material injury, to know about the condition of the domestic industry at the outset. For example, if an industry is increasing its production, sales, employment, etc., and is earning a record level of profits, even if dumped imports are increasing rapidly, presumably it would be more difficult for an investigating authority to conclude that it is threatened with imminent injury than if its production, sales, employment, profits and other indicators are low and/or declining."[248]

189. The Panel on *US – Softwood Lumber VI* after first noting that the text of Article 3.7 concerning "change of circumstances" is "not a model of clarity"[249], went on to find that Articles 3.7 and 15.7 required that some change in circumstances must be both foreseen and imminent and that this change of circumstances would lead to a situation in which injury would occur:

> "[T]he relevant 'change in circumstances' referred to in Articles 3.7 and 15.7 is one element to be considered in making a determination of threat of material injury. However, we can find no support for the conclusion that such a change in circumstances must be identified as a single or specific event. Rather, in our view, the change in circumstances that would give rise to a situation in which injury would occur encompasses a single event, or a series of events, or developments in the situation of the industry, and/or concerning the dumped or subsidized imports, which lead to the conclusion that injury which has not yet occurred can be predicted to occur imminently."[250]

(b) Requirement to "consider" factors of Article 3.7

190. The Panel on *US – Softwood Lumber VI* was of the view that while investigating authorities are not required to make an explicit determination with respect to factors considered under Articles 3.7 and 15.7, they must however do more than simply recite the facts in the abstract:

> "[I]n order to conclude that the investigating authorities have 'considered' the factors set out in Articles 3.7 and 15.7, it must be apparent from the determination before us that the investigating authorities have given attention to and taken into account those factors. That consideration must go beyond a mere recitation of the facts in question, and put them into context. However, the investigating authorities are not required by Articles 3.7 and 15.7 to make an explicit 'finding' or 'determination' with respect to the factors considered."[251]

191. Moreover, according to the Panel on *US – Softwood Lumber VI*, due to the use of the word "should" in Article 3.7, consideration of each of the factors listed in Articles 3.7 and 15.7 is not mandatory:

> "Whether a violation existed would depend on the particular facts of the case, in light of the totality of the factors considered and the explanations given. In this case, it is clear from the face of the determination that the USITC in fact addressed the facts concerning each of the factors set out in Articles 3.7 and 15.7 of the Agreements. Indeed, Canada does not argue that any relevant factor was ignored by the USITC, or not addressed in the determination. Thus, we cannot conclude that the USITC failed to consider the factors set forth in Articles 3.7 and 15.7, in the sense of not taking them into account at all."[252]

192. The Panel on *US – Softwood Lumber VI* hastened to add that the fact that the Article 3.7 factors were "considered" does not answer the question "whether the USITC's overall determination of a threat of material injury is consistent with the requirement of Articles 3.7 that the totality of the factors considered lead to the conclusion that further dumped and subsidized exports are imminent and that, unless protective action was taken, material injury would occur".[253]

---

[251] Panel Report on *US – Softwood Lumber VI*, para. 7.67.
[252] Panel Report on *US – Softwood Lumber VI*, para. 7.68.
[253] Panel Report on *US – Softwood Lumber VI*, para. 7.69.

(c) Article 3.7(i): "likelihood of substantially increased importation"

193. The Panel on *Mexico – Corn Syrup* found that the investigating authority had failed to adequately address the likelihood of substantially increased imports by failing to properly evaluate the facts concerning, and to provide a reasoned explanation of its conclusions regarding the potential effects of the alleged restraint agreement. The Panel considered as follows:[254]

> "In our view, the question for purposes of an anti-dumping investigation is not whether an alleged restraint agreement in violation of Mexican law existed, an issue which might well be beyond the jurisdiction of an anti-dumping authority to resolve, but whether there was evidence of and arguments concerning the effect of the alleged restraint agreement[255], which, if it existed, would be relevant to the analysis of the likelihood of increased dumped imports in the near future. If the latter is the case, in our view, the investigating authority is obliged to consider the effects of such an alleged agreement, assuming it exists."[256]

(d) Analysis of the "consequent impact" of dumped imports on the domestic industry

194. The Panel on *Mexico – Corn Syrup* considered the requirements imposed upon investigating authorities in a determination of a "threat of injury" under Article 3.7. One of the issues which arose in this context was whether a specific analysis of the consequent impact of the dumped imports on the domestic industry is required in a threat of injury determination. Referring to Article 3.7, the Panel stated that "[t]his language, in our view, recognizes that factors other than those set out in Article 3.7 itself will necessarily be relevant to the determination."[257] The Panel concluded that "an analysis of the consequent impact of imports is required in a threat of material injury determination":

> "[I]t is clear that in making a determination regarding the threat of material injury, the investigating authority must conclude that '*material injury would occur*' (emphasis added) in the absence of an anti-dumping duty or price undertaking. A determination that material injury would occur cannot, in our view, be made solely on the basis of consideration of the Article 3.7 factors. Rather, it must include consideration of the likely impact of further dumped imports on the domestic industry.
>
> While an examination of the Article 3.7 factors is required in a threat of injury case, that analysis alone is not a sufficient basis for a determination of threat of injury, because the Article 3.7 factors do not relate to the consideration of the impact of the dumped imports on the domestic industry. The Article 3.7 factors relate specifically to the questions of the likelihood of increased imports (based on the rate of increase of imports, the capacity of exporters to increase exports, and the availability of other export markets), the effects of imports on future prices and likely future demand for imports, and inventories. They are not, in themselves, relevant to a decision concerning what the 'consequent impact' of continued dumped imports on the domestic industry is likely to be. However, it is precisely this latter question – whether the 'consequent impact' of continued dumped imports is likely to be material injury to the domestic industry – which must be answered in a threat of material injury analysis. Thus, we conclude that an analysis of the consequent impact of imports is required in a threat of material injury determination."[258]

195. Having established that an analysis of the impact of imports on the domestic industry is required also in the context of the determination of a "threat of injury", the Panel on *Mexico – Corn Syrup* held that this analysis is to be performed pursuant to Article 3.4, since "[n]othing in the text or context of Article 3.4 limits consideration of the Article 3.4 factors to cases involving material injury":

> "Turning to the question of the nature of the analysis required, we note that Article 3.4 of the AD Agreement sets forth factors to be evaluated in the examination of the impact of dumped imports on the domestic industry. Nothing in the text or context of Article 3.4 limits consideration of the Article 3.4 factors to cases involving material injury. To the contrary, as noted above, Article 3.1 requires that a determination of 'injury', which includes threat of material injury, involve an examination of the impact of imports, while Article 3.4 sets forth

---

[254] Panel Report on *Mexico – Corn Syrup*, paras. 7.173–7.178. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Panel considered the factual determination of likelihood of substantially increased imports made by the Mexican investigating authority in their redetermination. The Panel indicated that "in assessing the redetermination, we must judge whether, in light of the explanations given in the redetermination, an unbiased and objective investigating authority could reach the conclusions reached by [the investigating authority] on the evidence before it. As stated by the Panel on the original dispute, the relevant question is 'whether [the investigating authority]'s analysis provides a reasoned explanation for its conclusion that, assuming [a restraint] agreement existed, there was nonetheless a likelihood of substantially increased importation'." The Panel further indicated that "the reasoned explanation required to satisfy us under the standard of review must respect [the] elements of Article 3.7 as well". The Panel, in a finding upheld by the Appellate Body (Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 135.(b)), determined that the investigating authority's conclusion that there was a significant likelihood of increased importation in the redetermnination was not consistent with Article 3.7(i) of the *Anti-Dumping Agreement*. Paras. 6.14–6.23.

[255] (*footnote original*) We note in this regard that Article 12.2.2 of the AD Agreement requires that the notice of final determination contain "the reasons for the acceptance of relevant arguments or claims made by the exporters and importers". It is clear that the arguments concerning the alleged restraint agreement were relevant.

[256] Panel Report on *Mexico – Corn Syrup*, para. 7.174.

[257] Panel Report on *Mexico – Corn Syrup*, para. 7.124.

[258] Panel Report on *Mexico – Corn Syrup*, paras. 7.125–7.126.

factors relevant to that examination. Article 3.7 requires that the investigating authorities determine whether, in the absence of protective action, material injury would occur. In our view, consideration of the Article 3.4 factors in examining the consequent impact of imports is required in a case involving threat of injury in order to make a determination consistent with the requirements of Articles 3.1 and 3.7."[259]

196. The Panel on *Mexico – Corn Syrup* concluded that consideration of the factors in Article 3.4 "is necessary in order to establish a background against which the investigating authority can evaluate whether imminent further dumped imports will affect the industry's condition in such a manner that material injury would occur in the absence of protective actions, as required by Article 3.7."[260] It further indicated that "[t]he text of the AD Agreement requires consideration of the Article 3.4 factors in a threat determination. Article 3.7 sets out additional factors that must be considered in a threat case, but does not eliminate the obligation to consider the impact of dumped imports on the domestic industry in accordance with the requirements of Article 3.4".[261]

197. The Panel on *US – Softwood Lumber VI* agreed with the views expressed by the Panel on *Mexico – Corn Syrup* (see paragraph 196 above), while emphasizing at the same time that there is no requirement under Article 3.7 to conduct a second Article 3.4 analysis:

"It seems clear to us that, as the Panel found in *Mexico – Corn Syrup*, there must, in every case in which threat of material injury is found, be an evaluation of the condition of the industry in light of the Article 3.4/15.4 factors to establish the background against which the impact of future dumped/subsidized imports must be assessed, in addition to an assessment of specific threat factors. However, once such an analysis has been carried out, we do not read the relevant provisions of the Agreements to require an assessment of the likely impact of future imports by reference to a consideration of projections regarding each of the Article 3.4/15.4 factors. There is certainly nothing in the text of either Article 3.7 of the AD Agreement and Article 15.7 of the SCM Agreement, or Article 3.4 of the AD Agreement and Article 15.4 of the SCM Agreement, setting out an obligation to conduct a second analysis of the injury factors in cases involving threat of material injury. Of course, such an assessment could be undertaken, to the extent available information permitted, and might be useful. However, in many instances, it seems likely that the necessary information would not be available, for instance projected productivity, return on investment, projected cash flow, etc. Even if projections are made on the basis of the information gathered in the investigation, this might result in a degree of speculation in the decision–making process, which is not consistent with the requirements of the Agreements."[262]

198. The Panel on *US – Softwood Lumber VI* came to a similar conclusion with respect to the absence of a requirement for a second Article 3.2 analysis:

"With respect to the factors set out in Article 3.2 of the AD Agreement and Article 15.2 of the SCM Agreement, we see even less basis for concluding that they must be directly considered in a 'predictive' context in making a threat of material injury determination. These provisions require the investigating authorities to consider events in the past, during the period investigated, in making a determination regarding present material injury. Thus, the text directs the investigating authorities to consider whether there 'has been' a significant increase in imports, whether there 'has been' significant price undercutting, or whether the effect of imports is otherwise to depress prices or prevent price increases which otherwise 'would have' occurred. As with the consideration of the Article 3.4/15.4 factors, the consideration of the Article 3.2/15.2 factors forms part of the background against which the investigating authorities can evaluate the effects of future dumped and/or subsidized imports.[263]"[264]

(e) Distinction between the roles of the investigating authorities and the Panel

199. In *Mexico – Corn Syrup (Article 21.5 – US)*, Mexico had requested the Appellate Body to reverse the finding of the Panel regarding the likelihood of increased imports on the grounds that the Panel had wrongly interpreted Article 3.7 of the *Anti-Dumping Agreement* and incorrectly applied the standard of review prescribed by Articles 17.5 and 17.6 of that Agreement. The Appellate Body drew the line between the roles of the investigating authorities and the panel in respect to Article 3.7 of the *Anti-Dumping Agreement* as follows:

"In previous anti-dumping cases, we have emphasized the importance of distinguishing between the different roles of panels and investigating authorities.[265] We note, in this regard, that Article 3.7 of the *Anti-Dumping Agreement* sets forth a number of requirements that

[259] Panel Report on *Mexico – Corn Syrup*, para. 7.127. In this regard, see also paras. 149 and 154 of this Chapter. See also Panel Report on *Egypt – Steel Rebar*, paras. 7.93–7.94.
[260] Panel Report on *Mexico – Corn Syrup*, para. 7.132.
[261] Panel Report on *Mexico – Corn Syrup*, para. 7.137.
[262] Panel Report on *US – Softwood Lumber VI*, para. 7.105.
[263] (*footnote original*) Of course, the proper establishment of a background under Articles 3.2 and 3.4 and 15.2 and 15.4 of the AD and SCM Agreements does not determine whether the evaluation of the effects of future imports is consistent with the requirements governing determinations of threat of material injury set out in Articles 3.7 and 15.7 of the AD and SCM Agreements.
[264] Panel Report on *US – Softwood Lumber VI*, para. 7.111.
[265] (*footnote original*) Appellate Body Report, *United States – Anti-Dumping Measures on Certain Hot-Rolled Steel Products from Japan* ("*United States – Hot-Rolled Steel*"), WT/DS184/AB/R, adopted 23 August 2001, para. 55.

must be respected in order to reach a valid determination of a threat of material injury. The third sentence of Article 3.7 explicitly recognizes that it is the *investigating authorities* who make a determination of threat of material injury, and that such determination – by the investigating authorities – 'must be based on facts and not merely on allegation, conjecture or remote possibility'. Consequently, Article 3.7 is not addressed to panels, but to the national investigating authorities which determine the existence of a threat of material injury.

The *Anti-Dumping Agreement* imposes a specific standard of review on *panels*. With respect to facts, Articles 17.5 and 17.6(i) of the *Anti-Dumping Agreement*, together with Article 11 of the DSU[266], set out the standard to be applied by panels when assessing whether a Member's investigating authorities have 'established' and 'evaluated' the facts consistently with that Member's obligations under the covered agreements.[267] These provisions do not authorize panels to engage in a new and independent fact-finding exercise. Rather, in assessing the measure, panels must consider, in the light of the claims and arguments of the parties, whether, *inter alia,* the 'establishment' of the facts by the investigating authorities was 'proper', in accordance with the obligations imposed on such investigating authorities under the *Anti-Dumping Agreement*.[268]

In our view, the 'establishment' of facts by investigating authorities includes both affirmative findings of events that took place during the period of investigation as well as assumptions relating to such events made by those authorities in the course of their analyses. In determining the existence of a *threat* of material injury, the investigating authorities will necessarily have to make assumptions relating to the 'occurrence of future events' since such *future* events 'can never be definitively proven by facts'.[269] Notwithstanding this intrinsic uncertainty, a 'proper establishment' of facts in a determination of threat of material injury must be based on events that, although they have not yet occurred, must be 'clearly foreseen and imminent', in accordance with Article 3.7 of the *Anti-Dumping Agreement*.[270]"[271]

(f) Relationship with other paragraphs of Article 3

200. In *Thailand – H-Beams*, the Appellate Body referred to Article 3.7 in interpreting Article 3.1. See paragraph 112 above.

201. With respect to the relationship between paragraphs 4 and 7 of Article 3, see paragraphs 195–196 above.

10. Article 3.8

202. The Panel on *US – Softwood Lumber VI* examined the meaning of the requirement under Article 3.8 to consider and decide the application of anti-dumping measures in a threat of injury case with "special care":

> "The adjective 'special' is defined as, *inter alia*, 'Exceptional in quality or degree; unusual; out of the ordinary'.[272] The noun 'care' is defined, *inter alia*, as 'Serious attention, heed; caution, pains, regard'.[273] Thus, it seems clear to us that a degree of attention over and above that required of investigating authorities in all anti-dumping and countervailing duty injury cases is required in the context of cases involving threat of material injury."[274]

203. The Panel on *US – Softwood Lumber VI*, further considered that, in spite of the fact that Article 3.8 provides that the application of a measure has to be considered with special care, the "special care" obligation of Article 3.8 applies "during the process of investigation and determination of threat of material injury, that is, in the establishment of whether the prerequisites for application of a measure exist, and not merely afterward when final decisions whether to apply a measure are taken".[275] Faced with the question of what is entailed by this obligation to act with an enhanced degree of attention, so as to demonstrate compliance with the "special care" obligation, the Panel made the following finding:

> "The Agreements require, as noted above, an objective evaluation based on positive evidence in making **any** injury determination, including one based on threat of material injury. Canada has not asserted any specific legal requirements with respect to special care – it has made no arguments as to what it considers might constitute the special care required by the Agreements in threat cases. It is not clear to us what the parameters of such 'special care' in the context of an objective evaluation based on positive evidence would be. In these

---

[266] (*footnote original*) Article 11 of the DSU provides in relevant part that "a panel should make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements".

> circumstances, we consider it appropriate to consider alleged violations of Articles 3.8 and 15.8 only after consideration of the alleged violations of specific provisions. While we do not consider that a violation of the special care obligation could not be demonstrated in the absence of a violation of the more specific provision of the Agreements governing injury determinations, we believe such a demonstration would require additional or independent arguments concerning the asserted violation of the special care requirement beyond the arguments in support of the specific violations."[276]

11. Relationship with other Articles

(a) Article 1

204. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 3. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[277] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

(b) Article 4

205. In *Mexico – Corn Syrup*, the Panel discussed the relationship between footnote 9 to Article 3 and Article 4.1. See paragraph 106 above.

(c) Article 5

206. In *Thailand – H-Beams*, the Appellate Body referred to Articles 5.2 and 5.3, as well as to Articles 3.7, 6 and 12 in interpreting Article 3.1. See paragraph 112 above.

207. The Panel on *Mexico – Corn Syrup* touched on the relationship between Articles 3.2 and 5.2. See paragraph 238 below.

208. The Panel on *Mexico – Corn Syrup* also discussed the relationship between Articles 3.4 and 5.2. See paragraph 238 below.

209. In *Guatemala – Cement II*, the relationship between Article 3.7 and Articles 5.2 and 5.3 was discussed. See paragraphs 253–255 below.

(d) Article 6

210. In *Thailand – H-Beams*, the Appellate Body referred to Article 6 as well as Articles 3.7, 5.2, 5.3 and 12 in interpreting Article 3.1. See paragraph 112 above.

(e) Article 9

211. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 3. The Panel then asserted that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[278] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

(f) Article 11

212. The Panel on *US – DRAMS* discussed the relationship between Articles 3.5 and 11.2. See paragraph 506 below.

213. Further in *US – DRAMS*, the Panel discussed the relationship between footnote 9 to Article 3 and Article 11.2. See paragraph 506 below.

(g) Article 12

214. In *Thailand – H-Beams*, the Appellate Body referred to Article 12 as well as Articles 3.7, 5.2, 5.3 and 6 in interpreting Article 3.1. See paragraph 112 above.

215. The Panels on *EC – Bed Linen* and *Egypt – Steel Rebar* touched on the relationship between Articles 3.4 and 12.2. See paragraphs 566 below and 167 above respectively.

(h) Article 17

216. The Appellate Body in *Thailand – H-Beams* compared the obligation set forth in Article 3.1 with those in Articles 17.5 and 17.6. See paragraph 113 above.

217. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body drew a line between the roles of investigating authorities and the panels as regards Article 3.7 threat of injury analysis. In doing so, the Appellate Body referred to Articles 17.5 and 17.6(i). See paragraph 199 above.

(i) Article 18

218. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 3. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 18, were

[276] Panel Report on *US – Softwood Lumber VI*, para. 7.34.
[277] Panel Report on *Guatemala – Cement II*, para. 8.296.
[278] Panel Report on *Guatemala – Cement II*, para. 8.296.

"dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[279] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

12. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

219. The Panel on *US – 1916 Act (EC)* explained its exercise of judicial economy with respect to Article 3 as follows:

> "Since we found above that the 1916 Act violated Article VI:1 by not providing for an injury test compatible with the terms of that Article and since Article 3 simply addresses in more detail the requirement of 'material injury' contained in Article VI:1, we do not find it necessary to make specific findings under Article 3 and therefore exercise judicial economy, as we are entitled to do under GATT panel practice and WTO panel and Appellate Body practice."[280]

220. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 3. The Panel then determined that Mexico's claims under other articles of the *Anti-Dumping Agreement* and under Article VI of the *GATT 1994* were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[281] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

(b) Agreement on Safeguards

221. The Appellate Body in *US – Hot-Rolled Steel* supported its interpretation of the non-attribution language of Article 3.5 by referring to its decisions in two safeguards Reports, *US – Wheat Gluten* and *US – Lamb* where it interpreted the non-attribution language in Article 4.2(b) of the Agreement on Safeguards in a similar manner. See also the Panel Report in *Guatemala – Cement II*, paragraph 152 above.

IV. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Definition of Domestic Industry

4.1 For the purposes of this Agreement, the term "domestic industry" shall be interpreted as referring to the domestic producers as a whole of the like products or to those of them whose collective output of the products constitutes a major proportion of the total domestic production of those products, except that:

(i) when producers are related[11] to the exporters or importers or are themselves importers of the allegedly dumped product, the term "domestic industry" may be interpreted as referring to the rest of the producers;

(*footnote original*) [11] For the purpose of this paragraph, producers shall be deemed to be related to exporters or importers only if *(a)* one of them directly or indirectly controls the other; or *(b)* both of them are directly or indirectly controlled by a third person; or *(c)* together they directly or indirectly control a third person, provided that there are grounds for believing or suspecting that the effect of the relationship is such as to cause the producer concerned to behave differently from non-related producers. For the purpose of this paragraph, one shall be deemed to control another when the former is legally or operationally in a position to exercise restraint or direction over the latter.

(ii) in exceptional circumstances the territory of a Member may, for the production in question, be divided into two or more competitive markets and the producers within each market may be regarded as a separate industry if *(a)* the producers within such market sell all or almost all of their production of the product in question in that market, and *(b)* the demand in that market is not to any substantial degree supplied by producers of the product in question located elsewhere in the territory. In such circumstances, injury may be found to exist even where a major portion of the total domestic industry is not injured, provided there is a concentration of dumped imports into such an isolated market and provided further that the dumped imports are causing injury to the producers of all or almost all of the production within such market.

4.2 When the domestic industry has been interpreted as referring to the producers in a certain area, i.e. a market as defined in paragraph 1(ii), anti-dumping duties shall be levied[12] only on the products in question consigned for final consumption to that area. When the constitutional law of the importing Member does not permit the levying of anti-dumping duties on such a basis, the importing Member may levy the anti-dumping duties without limitation only if *(a)* the exporters shall have been given an opportunity to cease exporting at dumped prices to the area concerned or otherwise give assurances pursuant to Article 8 and adequate assurances in this regard have not been promptly given, and *(b)* such duties cannot be levied only on products of specific producers which supply the area in question.

[279] Panel Report on *Guatemala – Cement II*, para. 8.296.
[280] Panel Report on *US – 1916 Act (EC)* para. 6.211; Panel Report on *US – 1916 Act (Japan)*, para. 6.254.
[281] Panel Report on *Guatemala – Cement II*, para. 8.296.

(*footnote original*) [12] As used in this Agreement "levy" shall mean the definitive or final legal assessment or collection of a duty or tax.

4.3 Where two or more countries have reached under the provisions of paragraph 8(a) of Article XXIV of GATT 1994 such a level of integration that they have the characteristics of a single, unified market, the industry in the entire area of integration shall be taken to be the domestic industry referred to in paragraph 1.

4.4 The provisions of paragraph 6 of Article 3 shall be applicable to this Article.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. Article 4.1

(a) "domestic industry"

222. Referring to Article 4.1 and footnote 9 to Article 3, the Panel on *Mexico – Corn Syrup* stated: "These two provisions inescapably require the conclusion that the domestic industry with respect to which injury is considered and determined must be the domestic industry defined in accordance with Article 4.1".[282]

223. As regards domestic industry production, see paragraphs 186–187 above.

(b) "domestic producers"

224. Referring to provisions which use the plural form, but are applicable in the singular case, the Panel on *EC – Bed Linen*, in a finding not reviewed by the Appellate Body, stated that "Article 4.1 of the AD Agreement defines the domestic industry in terms of 'domestic producers' in the plural. Yet we consider it indisputable that a single domestic producer may constitute the domestic industry under the AD Agreement, and that the provisions concerning domestic industry under Article 4 continue to apply in such a factual situation."[283]

225. The Panel on *EC – Bed Linen* examined whether, further to having defined the Community industry as a group of 35 producers and resorted to a sample of those producers, the European Communities was precluded from considering information relating to producers not within that sample, or not within the Community industry. See paragraphs 145–147 above.

(c) "a major proportion of the total domestic production"

226. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered whether or not the phrase "a major proportion" implies that the "domestic industry" refers to domestic producers whose collective output constitutes the majority, that is, more than 50 per cent, of domestic total production. The Panel considered different dictionary definitions and noted that the the word "major" is also defined as "important, serious, or significant".[284] The Panel therefore found that "an interpretation that defines the domestic industry in terms of domestic producers of an important, serious or significant proportion of total domestic production is permissible.[285]"[286]

2. Relationship with other Articles

227. In *Mexico – Corn Syrup*, the Panel referred to footnote 9 to Article 3 in interpreting Article 4.1. See paragraph 222 above.

228. The Panel on *Argentina – Poultry Anti-Dumping Duties* rejected the argument that Article 4.1 does not contain an obligation, but is merely a definition which, as such, cannot be violated. The Panel considered that:

> "Article 4.1 provides that the term 'domestic industry' 'shall' be interpreted in a specific manner. In our view, this imposes an express obligation on Members to interpret the term 'domestic industry' in that specified manner. Thus, if a Member were to interpret the term differently in the context of an anti-dumping investigation, that Member would violate the obligation set forth in Article 4.1."[287]

V. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Initiation and Subsequent Investigation

5.1 Except as provided for in paragraph 6, an investigation to determine the existence, degree and effect of any alleged dumping shall be initiated upon a written application by or on behalf of the domestic industry.

5.2 An application under paragraph 1 shall include evidence of *(a)* dumping, *(b)* injury within the meaning of Article VI of GATT 1994 as interpreted by this Agreement and *(c)* a causal link between the dumped imports and the alleged injury. Simple assertion, unsubstantiated by relevant evidence, cannot be considered sufficient to meet the requirements of this paragraph. The applica-

[282] Panel Report on *Mexico – Corn Syrup*, para. 7.147. The Panel on *EC – Bed Linen* indicated that "[they] express no opinion as to the correctness *vel non* of the European Communities' interpretation of Article 4 of the AD Agreement or its application in this case". Panel Report on *EC – Bed Linen*, para. 6.175.

[283] Panel Report on *EC – Bed Linen*, para. 6.72.

[284] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.341.

[285] (*footnote original*) We recall that, in accordance with Article 17.6(ii) of the *AD Agreement*, if an interpretation is "permissible", then we are compelled to accept it.

[286] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.341.

[287] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.338.

tion shall contain such information as is reasonably available to the applicant on the following:

(i) the identity of the applicant and a description of the volume and value of the domestic production of the like product by the applicant. Where a written application is made on behalf of the domestic industry, the application shall identify the industry on behalf of which the application is made by a list of all known domestic producers of the like product (or associations of domestic producers of the like product) and, to the extent possible, a description of the volume and value of domestic production of the like product accounted for by such producers;

(ii) a complete description of the allegedly dumped product, the names of the country or countries of origin or export in question, the identity of each known exporter or foreign producer and a list of known persons importing the product in question;

(iii) information on prices at which the product in question is sold when destined for consumption in the domestic markets of the country or countries of origin or export (or, where appropriate, information on the prices at which the product is sold from the country or countries of origin or export to a third country or countries, or on the constructed value of the product) and information on export prices or, where appropriate, on the prices at which the product is first resold to an independent buyer in the territory of the importing Member;

(iv) information on the evolution of the volume of the allegedly dumped imports, the effect of these imports on prices of the like product in the domestic market and the consequent impact of the imports on the domestic industry, as demonstrated by relevant factors and indices having a bearing on the state of the domestic industry, such as those listed in paragraphs 2 and 4 of Article 3.

5.3 The authorities shall examine the accuracy and adequacy of the evidence provided in the application to determine whether there is sufficient evidence to justify the initiation of an investigation.

5.4 An investigation shall not be initiated pursuant to paragraph 1 unless the authorities have determined, on the basis of an examination of the degree of support for, or opposition to, the application expressed[13] by domestic producers of the like product, that the application has been made by or on behalf of the domestic industry.[14] The application shall be considered to have been made "by or on behalf of the domestic industry" if it is supported by those domestic producers whose collective output constitutes more than 50 per cent of the total production of the like product produced by that portion of the domestic industry expressing either support for or opposition to the application. However, no investigation shall be initiated when domestic producers expressly supporting the application account for less than 25 per cent of total production of the like product produced by the domestic industry.

(*footnote original*) [13] In the case of fragmented industries involving an exceptionally large number of producers, authorities may determine support and opposition by using statistically valid sampling techniques.

(*footnote original*) [14] Members are aware that in the territory of certain Members employees of domestic producers of the like product or representatives of those employees may make or support an application for an investigation under paragraph 1.

5.5 The authorities shall avoid, unless a decision has been made to initiate an investigation, any publicizing of the application for the initiation of an investigation. However, after receipt of a properly documented application and before proceeding to initiate an investigation, the authorities shall notify the government of the exporting Member concerned.

5.6 If, in special circumstances, the authorities concerned decide to initiate an investigation without having received a written application by or on behalf of a domestic industry for the initiation of such investigation, they shall proceed only if they have sufficient evidence of dumping, injury and a causal link, as described in paragraph 2, to justify the initiation of an investigation.

5.7 The evidence of both dumping and injury shall be considered simultaneously *(a)* in the decision whether or not to initiate an investigation, and *(b)* thereafter, during the course of the investigation, starting on a date not later than the earliest date on which in accordance with the provisions of this Agreement provisional measures may be applied.

5.8 An application under paragraph 1 shall be rejected and an investigation shall be terminated promptly as soon as the authorities concerned are satisfied that there is not sufficient evidence of either dumping or of injury to justify proceeding with the case. There shall be immediate termination in cases where the authorities determine that the margin of dumping is *de minimis*, or that the volume of dumped imports, actual or potential, or the injury, is negligible. The margin of dumping shall be considered to be *de minimis* if this margin is less than 2 per cent, expressed as a percentage of the export price. The volume of dumped imports shall normally be regarded as negligible if the volume of dumped imports from a particular country is found to account for less than 3 per cent of imports of the like product in the importing Member, unless countries which individually account for less than 3 per cent of the imports of the like product in the importing Member collectively account for more than 7 per cent of imports of the like product in the importing Member.

5.9 An anti-dumping proceeding shall not hinder the procedures of customs clearance.

5.10 Investigations shall, except in special circumstances, be concluded within one year, and in no case more than 18 months, after their initiation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. General

(a) The Doha mandate

229. Paragraph 7.1 of the Doha Ministerial Decision of 14 November 2001 on Implementation-Related Issues and Concerns provides that the Ministerial Conference "agrees that investigating authorities shall examine with special care any application for the initiation of an anti-dumping investigation where an investigation of the same product from the same Member resulted in a negative finding within the 365 days prior to the filing of the application and that, unless this pre-initiation examination indicates that circumstances have changed, the investigation shall not proceed."[288]

2. Article 5.2

(a) General

230. In *Guatemala – Cement II*, in examining Mexico's claim that Guatemala's authority, in violation of Article 5.2, had initiated the anti-dumping investigation without sufficient evidence of dumping having been including in the application, the Panel interpreted Article 5.2 with reference to Article 2, which outlines the elements that describe the existence of dumping. The Panel stated that "evidence on the ... elements necessary for the imposition of an anti-dumping measure may be inferred into Article 5.3 by way of Article 5.2."[289] See paragraph 248 below.

231. On the issue of what evidence was necessary to justify the initiation of an investigation under Article 5, the Panel on *Guatemala – Cement I* had reached the same conclusion as the Panel on *Guatemala – Cement II*.[290] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 5.[291] The Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[292]

232. In *Guatemala – Cement II*, the Panel further agreed that "statements of conclusion unsubstantiated by facts do not constitute evidence of the type required by Article 5.2."[293]

233. The Panel on *US – Lumber V* considered that an application need only include such reasonably available information on the relevant matters as the applicant deems necessary to substantiate its allegations of dumping, injury and causality, and not *all* information available to the applicant:

> "We note that the words 'such information as is reasonably available to the applicant', indicate that, if information on certain of the matters listed in sub-paragraphs (i) to (iv) is not reasonably available to the applicant in any given case, then the applicant is not obligated to include it in the application. It seems to us that the 'reasonably available' language was intended to avoid putting an undue burden on the applicant to submit information which is not reasonably available to it. It is not, in our view, intended to require an applicant to submit *all* information that is reasonably available to it. Looking at the purpose of the application, we are of the view that an application need only include such reasonably available information on the relevant matters as the applicant deems necessary to substantiate its allegations of dumping, injury and causality. As the purpose of the application is to provide an evidentiary basis for the initiation of the investigative process, it would seem to us unnecessary to require an applicant to submit *all* information reasonably available to it to substantiate its allegations.[294] This is particularly true where such information might be redundant or less reliable than, information contained in the application."[295]

(b) "evidence of ... dumping"

234. In *Guatemala – Cement II*, the Panel addressed the issue of whether the elements of "dumping" require sufficient evidence under Article 5.3, and based its analysis upon its reading of the term "dumping", under Article 5.2, as a reference to dumping as within the meaning of Article 2. See paragraphs 248–249 below.

235. On this issue, the Panel on *Guatemala – Cement I* also reached the same conclusion[296], but the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 2.4.[297] The Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[298]

[296] See para. 249 of this Chapter.
[297] Appellate Body Report on *Guatemala – Cement I*, para. 89.
[298] WT/DSB/M/51, section 9(a).

(c) "evidence of . . . injury"

236. The Panel on *Guatemala – Cement I*, in response to Mexico's claim of violation of Articles 5.2 and 5.3, addressed the issue of the evidence of injury in an application necessary under Article 5.2.[299] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 5.[300] The Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[301]

237. The Panel on *Guatemala – Cement II* also addressed the issue of the evidence of threat of injury necessary in an application under Article 5.2, and the closely related issue of the amount of evidence necessary under Article 5.3 to justify the initiation of an investigation. See paragraphs 253–254 below.

(d) "evidence of . . . causal link" – subparagraph (iv)

238. In considering what information regarding the existence of a causal link must be provided in an application pursuant to Article 5.2, the Panel on *Mexico – Corn Syrup* found that "the quantity and quality of the information provided by the applicant need not be such as would be required in order to make a preliminary or final determination of injury":

> "[T]he inclusion in Article 5.2(iv) of the word 'relevant' and the phrase 'such as' in the reference to the factors and indices in Articles 3.2 and 3.4 in our view makes it clear that an application is *not* required to contain information on *all* the factors and indices set forth in Articles 3.2 and 3.4. Rather, Article 5.2(iv) requires that the application contain information on factors and indices relating to the impact of imports on the domestic industry, and refers to Articles 3.2 and 3.4 as illustrative of factors which may be relevant. Which factors and indices are relevant to demonstrate the consequent impact of imports on the domestic industry will vary depending on the nature of the allegations made by the industry, and the nature of the industry itself. If the industry provides information reasonably available to it concerning factors which are relevant to the allegation of injury (or threat of injury) it makes in the application, and the information concerning those factors demonstrates, that is, 'shows evidence of', the consequent impact of dumped imports on the domestic industry, we believe that Article 5.2(iv) is satisfied.
>
> Obviously, the quantity and quality of the information provided by the applicant need not be such as would be required in order to make a preliminary or final determination of injury. Moreover, the applicant need only provide such information as is 'reasonably available' to it with respect to the relevant factors. Since information regarding the factors and indices set out in Article 3.4 concerns the state of the domestic industry and its operations, such information would generally be available to applicants. Nevertheless, we note that an application which is consistent with the requirements of Article 5.2 will not necessarily contain sufficient evidence to justify initiation under Article 5.3."[302]

239. In *Mexico – Corn Syrup*, the Panel distinguished, for the purposes of Article 5.2, between information and analysis:

> "Article 5.2 does not require an application to contain analysis, but rather to contain information, in the sense of evidence, in support of allegations. While we recognize that some analysis linking the information and the allegations would be helpful in assessing the merits of an application, we cannot read the text of Article 5.2 as requiring such an analysis in the application itself.[303]"[304]

240. In *Thailand – H-Beams*, the Panel agreed with the view of the Panel on *Mexico – Corn Syrup* referenced in paragraph 239 above.[305] Further, the Panel rejected Poland's argument that paragraph (iv) of Article 5.2 implies that some sort of analysis of data is required in the application, and stated that "we do not read this provision as imposing any additional *requirement* that the application contain analysis of the data submitted in support of the application."[306] The Appellate Body did not review these findings of the Panel.

(e) "simple assertion, unsubstantiated by relevant evidence"

241. In *Thailand – H-Beams*, the Panel stated that "raw numerical data would constitute 'relevant evidence' rather than merely a 'simple assertion' within the meaning of this provision."[307]

(f) Relationship with other paragraphs of Article 5

242. The Panel on *Guatemala – Cement II* discussed the relationship between Articles 5.2 and 5.3 in order to clarify the requirements under both Articles 5.2 and 5.3. See paragraph 248 below.

243. Also, in *Guatemala – Cement II*, the Panel stated that "[i]n light of our finding that the Ministry's

[301] WT/DSB/M/51, section 9(a).
[302] Panel Report on *Mexico – Corn Syrup*, paras. 7.73–7.74.
[303] (*footnote original*) Of course, the investigating authority must examine the accuracy and adequacy of the information in the application to determine whether there is sufficient evidence to justify initiation, pursuant to Article 5.3, a question which is addressed further below. However, this obligation falls on the investigating authority, and does not imply a requirement for analysis resting on the applicant.
[304] Panel Report on *Mexico – Corn Syrup*, para. 7.76.
[305] Panel Report on *Thailand – H-Beams*, paras. 7.75–7.76.
[306] Panel Report on *Thailand – H-Beams*, para. 7.77.
[307] Panel Report on *Thailand – H-Beams*, para. 7.77.

determination that it had sufficient evidence to justify the initiation of an investigation was inconsistent with Article 5.3, we do not consider it necessary to rule on Mexico's Article 5.2 claims regarding the sufficiency of Cementos Progreso's application."[308]

3. Article 5.3

(a) "sufficient evidence to justify the initiation of an investigation"

(i) Distinction from the requirements under Article 5.2

244. In *Guatemala – Cement II*, in examining the claim that Guatemala's investigating authority based its initiation decision on insufficient evidence in violation of Article 5.3, the Panel stated:

> "Article 5.2 requires that the application contain sufficient evidence on dumping, injury and causation, while Article 5.3 requires the investigating authority to satisfy itself as to the accuracy and adequacy of the evidence to determine that it is sufficient to justify initiation."[309]

245. On the relationship between Articles 5.2 and 5.3, the Panel on *Guatemala – Cement I* commented to the same effect that the fact than an application satisfied the requirements of Article 5.2 did not demonstrate that there was "sufficient evidence" to justify initiation under Article 5.3.[310] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 5.[311] The Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[312]

246. The Panel on *Guatemala – Cement II* held that the appropriate legal standard under Article 5.3 was not the adequacy and accuracy *per se* of the evidence in the application, but the sufficiency of the evidence:

> "[I]n accordance with our standard of review, we must determine whether an objective and unbiased investigating authority, looking at the facts before it, could properly have determined that there was sufficient evidence to justify the initiation of an anti-dumping investigation. Article 5.3 requires the authority to examine, in making this determination, the accuracy and adequacy of the evidence in the application. Clearly, the accuracy and adequacy of the evidence is relevant to the investigating authorities' determination whether there is sufficient evidence to justify the initiation of an investigation. It is however the sufficiency of the evidence, and not its adequacy and accuracy *per se*, which represents the legal standard to be applied in the case of a determination whether to initiate an investigation."[313]

247. In *Guatemala – Cement II*, on the basis of the distinction between Articles 5.2 and 5.3 described in the excerpt in paragraph 248 below, the Panel stated that "[o]ne of the consequences of this difference in obligations is that investigating authorities need not content themselves with the information provided in the application but may gather information on their own in order to meet the standard of sufficient evidence for initiation in Article 5.3."[314] In support of this proposition, the Panel cited the panel's finding on *Guatemala – Cement I*.[315]

(ii) Sufficient evidence for "dumping"

248. In *Guatemala – Cement II*, in examining the issue of whether Articles 2.1 and 2.4 are applicable to the decision to initiate an investigation, i.e. which specific elements of dumping need to be supported by sufficient evidence under Article 5.3, the Panel first held that what constitutes necessary evidence for the purposes of Article 5.3 can be inferred from Article 5.2. The Panel then found that "in order to determine that there is sufficient evidence of dumping, the investigating authority cannot entirely disregard the elements that configure the existence of this practice as outlined in Article 2":

> "[W]e first observe that, although there is no express reference to evidence of dumping in Article 5.3, evidence on the three elements necessary for the imposition of an anti-dumping measure may be inferred into Article 5.3 by way of Article 5.2. In other words, Article 5.2 requires that the application contain sufficient evidence on dumping, injury and causation, while Article 5.3 requires the investigating authority to satisfy itself as to the accuracy and adequacy of the evidence to determine that it is sufficient to justify initiation. Thus, reading Article 5.3 in the context of Article 5.2, the evidence mentioned in Article 5.3 must be evidence of dumping, injury and causation. We further observe that the only clarification of the term 'dumping' in the AD Agreement is that contained in Article 2. In consequence, in order to determine that there is sufficient evidence of dumping, the investigating authority cannot entirely disregard the elements that configure the existence of this practice as outlined in Article 2. This analysis is done not with a view to making a determination that Article 2 has been violated through the initiation of an investigation, but rather to provide guidance in our review of the Ministry's determination that there was sufficient evidence of dumping to warrant an investigation. We do not of course mean to suggest that an

[308] Panel Report on *Guatemala – Cement II*, para. 8.59.

[311] Appellate Body Report on *Guatemala – Cement I*, para. 89.
[312] WT/DSB/M/51, section 9(a).
[313] Panel Report on *Guatemala – Cement II*, para. 8.31. Also see Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.60.
[314] Panel Report on *Guatemala – Cement II*, para. 8.62.
[315] Panel Report on *Guatemala – Cement I*, para. 7.53.

> investigating authority must have before it at the time it initiates an investigation evidence of dumping within the meaning of Article 2 of the quantity and quality that would be necessary to support a preliminary or final determination. An anti-dumping investigation is a process where certainty on the existence of all the elements necessary in order to adopt a measure is reached gradually as the investigation moves forward. However, the evidence must be such that an unbiased and objective investigating authority could determine that there was sufficient evidence of dumping within the meaning of Article 2 to justify initiation of an investigation.
>
> We note that Article 2.1 states that a product is to be considered as dumped 'if the export price . . . is less than the *comparable* price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country.' (emphasis added). Other provisions of Article 2 that further elaborate on this basic definition include Article 2.4, which sets forth certain principles regarding the comparability of export prices and normal value. In particular, Article 2.4 specifies that comparisons between the export price and the normal value shall be made at the same level of trade, and that due allowance shall be made in each case, on its merits, for differences which affect price comparability, including differences in level of trade and quantity. Consistent with our discussion above, we consider that, although these provisions of Article 2 do not 'apply' as such to initiation determinations, they are certainly relevant to an investigating authorities' consideration as to whether sufficient evidence of dumping exists to justify the initiation of an investigation.[316]"[317]

249. The Panel on *Guatemala – Cement I* reached the same conclusion as the Panel on *Guatemala – Cement II* on the issue of which specific elements of dumping need to be supported by sufficient evidence under Article 5.3 (see paragraph 248 above)[318], but the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 2.4.[319] The Panel Report on *Guatemala – Cement I* was accordingly adopted as reversed by the Appellate Body.[320]

250. The Panel on *Argentina – Poultry Anti-Dumping Duties* rejected Brazil's claim that an investigation cannot be initiated based on an application including only normal value data related to sales in one city and expressed the view that "it is sufficient for an investigating authority to base its decision to initiate on evidence concerning domestic sales in a major market of the exporting country subject to the investigation, without necessarily having data for sales throughout that country".[321]

251. The Panel on *Argentina – Poultry Anti-Dumping Duties* also examined the compatibility with Article 5.3, read in light of Article 2.4.2, of an inititation based on a weighted average export price that was calculated using only those transactions with a price lower than the normal value. As the weighted average export price was therefore not based on the totality of comparable export transactions, the Panel considered that "the use of such a practice would not allow an objective and impartial investigating authority to properly conclude that there was sufficient evidence of dumping to justify the initiation of an investigation".[322] The Panel thus also rejected the argument that, in order to initiate, an investigating authority need only satisfy itself that there has been some dumping, in the sense that certain transactions were dumped:

> "We recall that, 'in order to determine whether or not there is sufficient evidence of dumping for the purpose of initiation, an investigating authority cannot entirely disregard the elements that configure the existence of [dumping] outlined in Article 2'.[323] A determination of dumping should be made in respect of the product as a whole, for a given period, and not for individual transactions concerning that product. An investigating authority therefore cannot disregard export transactions at the time of initiation simply because they are equal to or greater than normal value. Disregarding such transactions does not provide a proper basis for determining whether or not there is sufficient evidence of dumping to justify initiation."[324]

---

316 (*footnote original*) We understand Guatemala to agree to our approach concerning the relationship between Article 2 and Article 5.3. At para. 136 of its first written submission, Guatemala asserted that it is "not suggesting that Articles 2 and 3 are totally irrelevant during the initiation phase. Articles 2 and 3 contain definitions which give meaning to the expressions 'dumping', 'injury' and 'causal link' used in Article 5.2. When the authorities examine the accuracy and adequacy of the evidence submitted in the application, those definitions help to establish whether there is 'sufficient evidence' in the meaning of Article 5.3 to justify the initiation of the investigation."

317 Panel Report on *Guatemala – Cement II*, paras. 8.35–8.36. The Panel on *Argentina – Poultry Anti-Dumping Duties* fully agreed with this view expressed by the Panel on *Guatemala – Cement II* while adding that it did not mean to suggest that "an investigating authority must have before it at the time it initiates an investigation evidence of dumping within the meaning of Article 2 of the *quantity* and *quality* that would be necessary to support a preliminary or final determination. However, the evidence must be such that an unbiased and objective investigating authority could determine that there was sufficient evidence of dumping within the meaning of Article 2 to justify initiation of an investigation." Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.62.

318 Panel Report on *Guatemala – Cement I*, paras. 7.64–7.66.

319 Appellate Body Report on *Guatemala – Cement I*, para. 89.

320 WT/DSB/M/51, section 9(a).

321 Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.67.

322 Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.78.

323 (*footnote original*) Panel Report, *Guatemala – Cement II*, para. 8.35.

324 Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.80.

252. On the question of whether a comparison between normal value for one day and and export price for a period of several months constitutes a proper basis for determining whether there is sufficient evidence of dumping to justify the inititiation of the investigation, the Panel on *Argentina – Poultry Anti-Dumping Duties* recalled that Article 2.4 requires that a fair comparison be made between the export price and the normal value in respect of sales "made at as nearly as possible the same time". It concluded that "there should be a substantial degree of overlap in the periods considered in order for the comparison of =normal value and export price to be fair within the meaning of Article 2.4".[325] For a product in respect of which there are many transactions taking place on a daily basis, it was "not persuaded that domestic sales data for one day provides sufficient overlap with export price data for several months for the purpose of Article 5.3."[326]

(iii) Sufficient evidence for "injury"

253. In *Guatemala – Cement II*, the Panel examined Mexico's argument that the Guatemalan authority did not have sufficient evidence of threat of material injury to justify the initiation of an investigation. In rebuttal, Guatemala argued that Article 3.7 does not apply to the determination of the investigating authorities on this issue, because Article 5.2(iv), which requires that an application contain certain information, does not refer to Article 3.7, but only to Articles 3.2 and 3.4. The Panel responded:

> "[W]hen considering whether there is sufficient evidence of threat of injury to justify the initiation of an investigation, an investigating authority cannot totally disregard the elements that configure the existence of threat of injury outlined in Article 3. We do not mean to suggest that an investigating authority must have before it at the time it initiates an investigation evidence of threat of material injury within the meaning of Article 3 of the quantity and quality that would be necessary to support a preliminary or final determination of threat of injury. However, the investigating authority must have before it evidence of threat of material injury, as defined in Article 3, sufficient to justify the initiation of an investigation."[327]

254. However, with respect to Article 3.7, the Panel added a caveat to its finding quoted under paragraph 253 above, in stating that the investigating authority need not have before it information on all Article 3.7 factors where there is an allegation of threat of injury:

> "Article 3.7 provides specific guidance on the factors to be considered by an investigating authority when making a determination of threat of injury. Although we do not necessarily believe that an investigating authority must have before it information on all Article 3.7 factors in a case where initiation of an investigation is requested on the basis of an alleged threat of injury, a consideration of those factors is certainly pertinent to an evaluation of whether there was sufficient evidence of threat of material injury to justify the initiation of an investigation."[328]

255. On the issue of which specific elements of dumping need to be supported by sufficient evidence under Article 5.3, the Panel on *Guatemala – Cement I* reached the same conclusion as the Panel on *Guatemala – Cement II* (see paragraphs 253–254 above).[329] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach any conclusion on the Panel's discussion of Article 5[330], and accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[331]

(iv) Standard of review – relationship with Article 17.6

256. In determining what constitutes "sufficient evidence to justify the initiation of an investigation" under Article 5.3, the Panel on *Guatemala – Cement I* applied the standard of review set out in Article 17.6(i)[332], referring, in so doing, to the GATT Panel Report on *US – Softwood Lumber II*.[333] The Panel also agreed with the view expressed by the Panel on *US – Softwood Lumber II* that "the quantum and quality of the evidence required at the time of initiation is less than that required for a preliminary, or final, determination of dumping, injury, and causation, made after the investigation".[334] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the interpretation of Article 17.6 by the Panel[335], and accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[336]

---

[325] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.84. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that Article 5.3, read in light of Article 2.4, cannot be interpreted to require that data on normal value and export price cover *identical* periods of time. Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.84.

[326] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.85.

[327] Panel Report on *Guatemala – Cement II*, para. 8.45.

[328] Panel Report on *Guatemala – Cement II*, para. 8.52.

[329] Panel Report on *Guatemala – Cement I*, paras. 7.75–7.77.

[330] Appellate Body Report on *Guatemala – Cement I*, para. 89.

[331] WT/DSB/M/51, section 9(a).

[332] Panel Report on *Guatemala – Cement I*, para. 7.57. See paras. 629–641 of this Chapter.

[333] (*footnote original*) Panel Report on US – Softwood Lumber II, para. 331.

[334] Panel Report on *Guatemala – Cement I*, para. 7.57.

[335] Appellate Body Report on *Guatemala – Cement I*, para. 89.

[336] WT/DSB/M/51, section 9(a).

257. Referring to the approach of the Panel on *Guatemala – Cement I*[337], which took into account the reasoning of the GATT Panel on *US – Softwood Lumber II*, the Panel on *Mexico – Corn Syrup* stated that "[o]ur approach in this dispute will similarly be to examine whether the evidence before [the investigating authority] at the time it initiated the investigation was such that an unbiased and objective investigating authority evaluating that evidence, could properly have determined that sufficient evidence of dumping, injury, and causal link existed to justify initiation."[338]

258. In *Guatemala – Cement II*, the Panel found that "[i]t is clear on the face of these documents that the invoices reflecting prices in Mexico are for sales occurring at the very end of the commercialisation chain and the import certificates reflect prices at the point of importation which is the beginning of the commercialisation chain for Mexican cement in Guatemala".[339] The Panel subsequently found, applying the standard of review set forth in Article 17.6(i):

> "[T]he fact that the sales in the Mexican and Guatemalan markets were at different levels of trade was apparent from the application itself, and an unbiased and objective investigating authority should have recognized this fact without the need for it to be pointed out. Nor do we consider that an investigating authority can completely ignore obvious differences that could affect the comparability of the prices cited in an application on the ground that the foreign exporter has not demonstrated that they have affected price comparability. Moreover, at the point where the investigating authority is considering whether there is sufficient evidence to initiate an investigation, potentially affected exporters have not even been notified of the existence of an application, much less been provided a copy thereof. Thus, the logical implication of Guatemala's argument is that an investigating authority need never take into account issues of price comparability when considering whether there is sufficient evidence of dumping to initiate an investigation. We cannot agree with such an interpretation of the AD Agreement, particularly in light of the criteria set out in para. 8.36 above.
>
> After a thorough review of all the actions by the Ministry leading up to the initiation of the investigation, we find that no attempt was made to take into account glaring differences in the levels of trade and sales quantities and their possible effects on price comparability. Under these circumstances, an unbiased and objective investigating authority could not in our view have concluded that there was sufficient evidence of dumping to justify the initiation of an anti-dumping investigation."[340]

259. Having found that the Guatemalan investigating authority should have considered the issue of price comparability when considering whether there was sufficient evidence of dumping to initiate an investigation, the Panel emphasized that it did not expect:

> "[I]nvestigating authorities at the initiation phase to ferret out all possible differences that might affect the comparability of prices in an application and perform or request complex adjustments to them. We do however expect that, when from the face of an application it is obvious that there are substantial questions of comparability between the export and home market prices being compared, the investigating authority will at least acknowledge that differences in the prices generate questions with regards to their comparability, and either give some consideration as to the impact of those differences on the sufficiency of the evidence of dumping or seek such further information as might be necessary to do so."[341]

(b) "shall examine the accuracy and adequacy of the evidence provided in the application"

260. The Panel on *Guatemala – Cement I* considered whether there had been sufficient evidence to justify an anti-dumping investigation under Article 5.3.[342] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the discussion of Article 5.3 by the Panel[343], and accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[344]

261. In determining what the parameters are of the requirement to "examine" the accuracy and adequacy of the evidence, and on what basis an assessment can be made regarding whether the necessary examination was carried out, the Panel on *EC – Bed Linen*, in a finding subsequently not reviewed by the Appellate Body, stated:

> "The only basis, in our view, on which a panel can determine whether a Member's investigating authority has examined the accuracy and adequacy of the information in the application is by reference to the determination that examination is in aid of – the determination whether there is sufficient evidence to justify initiation. That is, if the investigating authority properly determined that

---

[337] The Panel on *Mexico – Corn Syrup* cited Panel Report on *Guatemala – Cement I*, paras. 7.54–7.55. The Panel stated:

> "We recognize that, because the Appellate Body reversed the *Guatemala-Cement* Panel's conclusion on the issue of whether the dispute was properly before it, that Panel's conclusions in this regard have no legal status. However, the Panel's report sets out a standard that we consider instructive in this case."

Panel Report on *Mexico – Corn Syrup*, para. 7.94.

[339] Panel Report on *Guatemala – Cement II*, para. 8.37.

[340] Panel Report on *Guatemala – Cement II*, paras. 8.38–8.39.

[341] Panel Report on *Guatemala – Cement II*, para. 8.40.

[342] Panel Report on *Guatemala – Cement I*, para. 7.71.

[343] Appellate Body Report on *Guatemala – Cement I*, para. 89.

[344] WT/DSB/M/51, section 9(a).

> there was sufficient evidence to justify initiation, that determination can only have been made based on an examination of the accuracy and adequacy of the information in the application, and consideration of additional evidence (if any) before it."[345]

262. Regarding a determination under Article 5.3, the Panel on *Mexico – Corn Syrup* stated that "Article 5.3 does not impose an obligation on the investigating authority to set out its resolution of *all* underlying issues considered".[346] Applied to the facts of the dispute, the Panel concluded that "Article 5.3 does not establish a requirement for the investigating authority to state specifically the resolution of questions concerning the exclusion of certain producers involved in defining the relevant domestic industry in the course of examining the accuracy and adequacy of the evidence to determine whether there was sufficient evidence to justify initiation."[347]

263. In *Guatemala – Cement II*, the Panel agreed that "statements of conclusion unsubstantiated by facts do not constitute evidence of the type . . . which allows an objective examination of its adequacy and accuracy by an investigating authority as provided in Article 5.3."[348]

(c) Relationship with other paragraphs of Article 5

264. The Panel on *Guatemala – Cement II* discussed the relationship between Articles 5.2 and 5.3. See paragraphs 248–249 above.

265. The Panel on *Guatemala – Cement II* rejected Mexico's argument that a violation of Article 5.3 due to the initiation of an investigation in the absence of sufficient evidence necessarily constitutes a violation of Article 5.7. See paragraph 281 below.

266. The Panel on *Mexico – Corn Syrup* touched on the relationship between Articles 5.3 and 5.8. See paragraph 283 below.

4. Article 5.4

(a) General

267. The Appellate Body on *US – Offset Act (Byrd Amendment)* considered that Article 5.4 requires "no more than a formal examination of whether a sufficient number of domestic producers have expressed support for an application".[349] The Appellate Body went on to note that Article 5.4 contains no requirement for investigating authorities to examine the motives of producers that elect to support (or to oppose) an application.[350] The Appellate Body recalled that "there may be a number of reasons why a domestic producer could choose to support an investigation."[351] The Appellate Body strongly disagreed with the approach taken by the Panel in relation to the concept of support[352] and reached the following conclusion:

> "A textual examination of Article 5.4 of the *Anti-Dumping Agreement* and Article 11.4 of the *SCM Agreement* reveals that those provisions contain no requirement that an investigating authority examine the motives of domestic producers that elect to support an investigation. Nor do they contain any explicit requirement that support be based on certain motives, rather than on others. The use of the terms 'expressing support' and 'expressly supporting' clarify that Articles 5.4 and 11.4 require only that authorities 'determine' that support has been 'expressed' by a sufficient number of domestic producers. Thus, in our view, an 'examination' of the 'degree' of support, and not the 'nature' of support is required. In other words, it is the 'quantity', rather than the 'quality', of support that is the issue."[353]

(b) Relationship with Article 11.4 of the SCM Agreement

268. In *US – Offset Act (Byrd Amendment)*, the Appellate Body further to noting that both Article 5.4 of the *Anti-Dumping Agreement* and Article 11.4 of the *SCM Agreement* are "identical" provisions, analysed them jointly. See paragraph 267 above.

5. Article 5.5

(a) "before proceeding to initiate"

269. In *Guatemala – Cement II*, Mexico claimed that in violation of Article 5.5, Guatemala did not notify the Government of Mexico before proceeding to initiate the investigation. Guatemala argued that that the effective date of initiation of the investigation was not 11 January 1996, the date alleged by Mexico, and maintained that according to its own Constitution and legislation, the investigating authority could not have initiated the investigation until the Government of Mexico had been officially notified. Referring to footnote 1 of the *Anti-Dumping Agreement*, the Panel first determined at what

[345] Panel Report on *EC – Bed Linen*, para. 6.199.
[346] Panel Report on *Mexico – Corn Syrup*, para. 7.102.
[347] Panel Report on *Mexico – Corn Syrup*, para. 7.105.
[348] Panel Report on *Guatemala – Cement II*, para. 8.53.
[349] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 286.
[350] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 291.
[351] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 290.
[352] The Panel on *US – Offset Act (Byrd Amendment)* was of the view that the Offset Act defeated the object and purpose of Article 5.4 as it considered that Article 5.4 was "introduced precisely to ensure that support was not just assumed to exist but actually existed, and that the support expressed by domestic producers was evidence of the industry-wide concern of injury being caused by dumped or subsidized imports." Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.65.
[353] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 283.

specific point in time the Guatemalan investigation had been initiated within the meaning of the *Anti-Dumping Agreement*:

> "[T]he date of initiation is the date of the procedural action by which Guatemala formally commenced the investigation. We are of the view that in the case before us the action by which the investigation was formally commenced is the date of publication of the notice of initiation which occurred on 11 January 1996."[354]

270. The Panel on *Guatemala – Cement I*, like the Panel on *Guatemala – Cement II*, also reached the conclusion that the date of initiation for purposes of Article 5.5 is the date of action by which the Guatemalan authorities formally commenced the investigation.[355] The Appellate Body, however, found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the discussion of Article 5.5 by the Panel,[356] and accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[357]

271. The Panel on *Guatemala – Cement II* further rejected Guatemala's argument that "[it] could not have initiated the investigation until after it had notified Mexico"[358], because its own Constitution and laws mandated it to do so:

> "In acceding to the WTO, Guatemala undertook to be bound by the rules contained in the AD Agreement, and our mandate is to review Guatemala's compliance with those rules. The fact that the Constitution of Guatemala mandates that the investigating authorities proceed in a way which is consistent with its international obligations, does not validate the actions actually carried out by those authorities if those actions violate Guatemala's commitments under the WTO. Whether Mexico chose not to pursue its rights under Guatemalan law is of no concern to us, as this would not affect its rights under the WTO Agreements. . . ."[359]

272. In *Guatemala – Cement II*, the Panel also stated, with respect to Guatemala's assertion that "in some cases Mexico has failed to notify the government of the investigated exporters in a timely fashion under Article 5.5"[360], that "[w]e are of the view that Mexico's actions regarding notifications is of no relevance to issues before us in this case, which requires us to review the actions of the Guatemalan authorities.[361]"[362]

(b) "notify the government"

(i) General

273. At its meeting of 29 October 1998, the Committee on Anti-Dumping Practices adopted a recommendation on the timing of notifications required under Article 5.5.[363]

(ii) "Oral" notification

274. In *Thailand – H-Beams*, the Panel, in a finding not reviewed by the Appellate Body, considered that a notification required under Article 5.5 can be made orally. The Panel stated:

> "Article 5.5 AD does not specify the form that the notification must take. The *Concise Oxford Dictionary* defines the term 'notify' as: 'inform or give notice to (a person)'; 'make known, announce or report (a thing)'. We consider that the form of the notification under Article 5.5 must be sufficient for the importing Member to 'inform' or 'make known' to the exporting Member certain facts. While a written notification might arguably best serve this goal and the promotion of transparency and certainty among Members, and might also provide a written record upon which an importing Member could rely in the event of a subsequent claim of inconsistency with Article 5.5 of the AD Agreement, the text of Article 5.5 does not expressly require that the notification be in writing.[364]"[365]

(iii) Content of notification

275. In *Thailand – H-Beams*, the Panel examined what must be notified under Article 5.5, as follows:

> "The text of Article 5.5 does not specify the contents of the notification. It provides: 'after receipt of a properly documented application and before proceeding to initiate an investigation, the authorities shall notify the government of the exporting Member concerned'.[366] Because the text of the provision specifies that notification necessarily follows the receipt of a properly documented application, we consider that the fact of the receipt of a properly documented application would be

an essential element of the contents of the notification."[367]

(c) "Harmless error" with respect to Article 5.5 violation/Rebuttal against nullification or impairment presumed from a violation of Article 5.5

276. In *Guatemala – Cement II*, Guatemala argued that the alleged violations of Articles 5.5, 12.1.1 and 6.1.3, had not affected the course of the investigation, and thus, (a) the alleged violations were not harmful according to the principle of harmless error, (b) Mexico "convalidated" the alleged violations by not objecting immediately after their occurrence, and (c) the alleged violations did not cause nullification or impairment of benefits accruing to Mexico under the *Anti-Dumping Agreement*. The Panel first responded to the argument on "harmless error", concluding that "the concept of 'harmless error' as presented by Guatemala" had not "attained the status of a general principle of public international law":

> "In our view, the GATT panel referred to by Guatemala in support of its position merely stated that it did not wish 'to exclude that the concept of harmless error could be applicable in dispute settlement proceedings under the Agreement.'[368] It therefore cannot be concluded that the GATT panel referred to 'recognized the principle of harmless error 'as alleged by Guatemala. We do not consider that the concept of 'harmless error' as presented by Guatemala has attained the status of a general principle of public international law. In any event, we consider that our first task in this dispute is to determine whether Guatemala has acted consistently with its obligations under the relevant provisions of the AD Agreement. To the extent that Mexico can demonstrate that Guatemala has not respected its obligations under the relevant provisions of that Agreement, we must next consider arguments raised by Guatemala in respect of the nullification or impairment of benefits accruing to Mexico thereunder. Thus, while arguments regarding the existence and extent of the possible harm suffered by Mexico may be relevant to the issue of nullification or impairment,[369] we do not consider that an argument of harmless error represents a defence in itself to an alleged infringement of a provision of the WTO Agreement."[370]

277. On the second argument put forward by Guatemala in the context of the alleged violations of Articles 5.5, 12.1.1 and 6.1.3, namely the lack of reaction from Mexico, the Panel found that "Mexico was under no obligation to object immediately to the violations it now alleges before the Panel":

> "Guatemala uses both the concepts of 'acquiescence' and 'estoppel' in support of this argument. We note that 'acquiescence' amounts to 'qualified silence', whereby silence in the face of events that call for a reaction of some sort may be interpreted as a presumed consent.[371] The concept of estoppel, also relied on by Guatemala in support of its argument, is akin to that of acquiescence. Estoppel is premised on the view that where one party has been induced to act in reliance on the assurances of another party, in such a way that it would be prejudiced were the other party later to change its position, such a change in position is 'estopped', that is precluded.[372]
>
> Regarding both arguments of acquiescence and estoppel we note that Mexico was under no obligation to object immediately to the violations it now alleges before the Panel.[373] Mexico raised claims concerning Articles 5.5, 12.1.1 and 6.1.3 at an appropriate moment under the dispute settlement procedure envisaged by the AD Agreement and the DSU. Thus, Mexico cannot therefore be considered as having acquiesced to belated notification by Guatemala, to insufficiency in the public notice or to delay in providing the full text of the application, much less to have given 'assurances' to Guatemala that it would not later challenge these actions in WTO dispute settlement. Since Mexico raised its claims at an appropriate moment under the WTO dispute settlement procedures, Guatemala could not have reasonably relied upon Mexico's alleged lack of protest to conclude that Mexico would not bring a WTO complaint. In any event, Guatemala has not satisfied us that, had Mexico complained after the fact, but during the course of the investigation, Guatemala could or would have taken action to remedy the situation. Specifically, with respect to the delay in the Article 5.5 notification, Guatemala asserts that had Mexico objected to the notification delay in a timely manner, the Guatemalan authorities would have reinitiated the investigation after presenting Mexico with the notification under Article 5.5. We are of the view that this argument presented by Guatemala is highly speculative and note that the Panel has been established to rule on the WTO conformity of the actions by Guatemala and not on the WTO conformity of the actions Guatemala alleges it could have taken. In any event, Guatemala states at para. 217 of its first written submission that Mexico first raised the Article 5.5 issue on 6 June 1996, that is at a relatively early stage of the Ministry's investigation, and precedes the Ministry's preliminary affirmative determination. Nevertheless, Guatemala failed to take any steps to address the delayed Article 5.5 notification at that time. Based

[373] (*footnote original*) Regarding acquiescence we note that the precise scope and applicability of this concept is still a matter of debate, and it is clear that not any silence can be considered to constitute consent.

> on these considerations the Panel rejects Guatemala's defence that Mexico 'convalidated' the alleged violations of Articles 5.5, 6.1.3 and 12.1.1 of the AD Agreement."[374]

278. The Panel on *Guatemala – Cement II* then considered the third element of Guatemala's argument in the context of the alleged violations of Articles 5.5, 12.1.1 and 6.1.3, namely that no nullification or impairment resulted from the alleged violation of Article 5.5. The Panel found that Guatemala did not rebut the presumption of nullification or impairment under Article 3.8 of the *DSU*, stating:

> "There is no way to ascertain what Mexico might have done if it had received a timely notification. The extension of time for response to the questionnaire granted to Cruz Azul has no bearing on the fact that Mexico was not informed in time. Thus, we do not consider that Guatemala has rebutted the presumption of nullification or impairment with respect to violations of Article 5.5."[375]

279. The Panel also rejected Guatemala's argument "that the Panel should examine Guatemala's acts and decide whether the non-fulfilment of a procedural obligation should be overlooked on the grounds that the omission did not prejudice the rights of Mexico or [the Mexican producer on whose products anti-dumping duties had been imposed]":

> "We could find no basis for such a distinction in the DSU, as suggested by Guatemala between substantive and 'mere' procedural violations. There is no reason to regard violations of procedural obligations differently than obligation of a substantial nature. Compliance with the complete set of procedural rules relating to anti-dumping investigations, including those concerning notification and enhanced transparency, is required. This obligation to comply with all provisions, both procedural and substantive should not be taken lightly if one is not to devoid of all meaning the AD Agreement itself. As detailed in sections ... above we have found that Guatemala violated Articles 5.5, 6.1.3 and 12.1.1 of the AD Agreement by failing to timely notify Mexico of the decision to initiate an investigation, to timely provide Mexico and Cruz Azul a copy of the application, and to publish an adequate notice of initiation. We consider that a key function of the transparency requirements of the AD Agreement is to ensure that interested parties, including Members, are able to take whatever steps they deem appropriate to defend their interests. Where a required notification is not made in a timely fashion, or the application is not provided in time, or the public notice is inadequate the ability of the interested party to take such steps is vitiated. It is not for us to now speculate on what steps Mexico might have taken had it been timely notified or provided with the application, or had the public notice been adequate, and how Guatemala might have responded to those steps. Thus, while there is a possibility that the investigation would have proceeded in the same manner had Guatemala complied with its transparency obligations, we cannot state with certainty that the course of the investigation would not have been different."[376]

280. The Panel on *Guatemala – Cement I* also addressed the argument for the concept of "harmless error".[377] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the discussion of Article 5.5 by the Panel.[378] The Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[379]

6. Article 5.7

281. In *Guatemala – Cement II*, with the understanding that Mexico argued that "the initiation of an investigation in the absence of sufficient evidence to justify initiation (contrary to Article 5.3) necessarily constitutes a violation of Article 5.7", the Panel held :

> "Article 5.7 requires the investigating authority to examine the evidence before it on dumping and injury simultaneously, rather than sequentially. We do not consider that the fulfilment of this requirement is conditioned in any way on the substantive nature of that evidence."[380]

282. The Panel on *Argentina – Poultry Anti-Dumping Duties* rejected the argument that evidence of dumping and injury must cover simultaneous periods. It was thus of the view that an argument which concerned the substantive nature of the evidence considered by the authorities in the decision whether or not to initiate an investigation, rather than the timing of the consideration itself, was "outside the scope of the obligation contained in Article 5.7".[381] The Panel considered that:

> "Article 5.7 imposes a procedural obligation on the investigating authority to examine the evidence before it of dumping and injury simultaneously, rather than sequentially, *inter alia* in the decision whether or not to initiate an investigation. We are of the view that Article 5.7 is not concerned with the substance of the decision to initiate an investigation, which is dealt with in Article 5.3 of the *AD Agreement*."[382]

[382] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.118.

7. Article 5.8

(a) Rejection of an application to initiate an investigation

283. The Panel on *Mexico – Corn Syrup* noted that "Article 5.8 does not impose additional substantive obligations beyond those in Article 5.3 on the authority in connection with the initiation of an investigation. That is, if there is sufficient evidence to justify initiation under Article 5.3, there is no violation of Article 5.8 in not rejecting the application."[383]

284. In *Guatemala – Cement II*, the Panel addressed the question of applicability of Article 5.8 before the initiation of an investigation, in order to examine Mexico's claim that Guatemala violated Article 5.8 by not rejecting the application made by a Guatemalan producer and by not refraining from initiating the investigation due to the lack of sufficient evidence of dumping and threat of material injury to justify initiation. Citing the finding of the Panel on *Mexico – Corn Syrup* referenced in paragraph 285 below, Guatemala argued that Article 5.8 applies only after the initiation of an investigation. The Panel rejected this argument, and stated:

> "We note that Article 5.8 makes specific reference to the rejection of an application as soon as the authorities conclude that there is not sufficient evidence of dumping or injury to justify proceeding with the case. This language on rejection of an application seems to be in contrast with Guatemala's argument that Article 5.8 applies only after initiation. We are of the view that, if the drafters intended that Article 5.8 apply only after initiation, the reference to promptly terminating an investigation would have sufficed. By referring to the rejection of an application Article 5.8 addresses the situation where an application has been received but an investigation has not yet been initiated. That the text of Article 5.8 continues after the quoted section to describe situations in which an initiated investigation should be terminated, does not support Guatemala's argument that the whole of Article 5.8 applies only after the investigation has been initiated. On the contrary, the second sentence of Article 5.8, by specifying that 'there shall be immediate termination in cases' confirms that the first sentence of Article 5.8 expressly contemplates its application pre-initiation by including a reference to the rejection of an application. Otherwise, mere reference to the termination of an investigation, as in the second sentence of Article 5.8, would have been all that was needed in the first sentence to make it clear that it applied once an investigation was underway."[384]

285. With respect to the finding of the Panel on *Mexico – Corn Syrup* cited by Guatemala, the Panel stated:

> "In our view, the findings in *Mexico – HFCS* on this issue do not support the interpretation that Article 5.8 applies only after an investigation has been initiated.
>
> . . .
>
> The panel in *Mexico – HFCS* determined that there had not been a violation of Article 5.3 as there was sufficient evidence to justify initiation. After having made that determination the *Mexico – HFCS* panel proceeded to find that given that there was sufficient evidence to justify initiation under Article 5.3, there was no possible violation of Article 5.8. This in no way detracts from our position that Article 5.8 applies pre-initiation. The Panel in *Mexico – HFCS* would not have even considered the question of whether rejection of the application was warranted if it had not considered that Article 5.8 applies before initiation."[385]

286. On the issue of whether Article 5.8 applied only after the initiation of an investigation, the Panel on *Guatemala – Cement I* reached the same conclusion as the Panel on *Guatemala – Cement II*.[386] However, the Appellate Body found that the dispute was not properly before the Panel and did not reach any conclusion on the interpretation of Article 5.8 by the Panel[387], and accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[388]

287. The Panel on *US – Lumber V* stated that Article 5.8 does not require an investigating authority, after initation, to continue to assess the sufficiency of the evidence *in the application* and to terminate the investigation on the grounds that other information undermines the sufficiency of that evidence:

> "We can however find no basis to conclude that Article 5.8 imposes upon an investigating authority a continuing obligation after initiation to continue to assess the sufficiency of the evidence *in the application* and to terminate the investigation on the grounds that other information undermines the sufficiency of that evidence. Once an investigation has been initiated on the basis of sufficient evidence of dumping, the application has served its purpose. Logically, the continuing obligation to terminate an investigation where an investigating authority is satisfied that there is not sufficient evidence to justify proceeding must be based on an assessment of the overall state of the evidence deduced before it in the investigation, not on an assessment of the continuing sufficiency of the information in the application. We are of the view that it could not have been the intention of the drafters of Article 5.8 that its interpretation could result in that an investigation could have been initiated on the basis of sufficient evidence, but that the very same investigation had to be terminated if additional evidence was made available by the

[383] Panel Report on *Mexico – Corn Syrup*, para. 7.99.
[384] Panel Report on *Guatemala – Cement II*, para. 8.72.

[388] WT/DSB/M/51, section 9(a).

respondents at a later stage, while the evidence being gathered during the course of the investigation, indicates dumping".[389]

(b) "cases"

288. The Panel on *US – DRAMS* was called upon to decide whether the scope of Article 5.8, as defined by the word "cases" in the second sentence, includes both anti-dumping investigations and Article 9.3 duty assessment procedures. The Panel held that it did not see "how the sufficiency of evidence concerning a subsequent duty assessment could be relevant to the treatment of an 'application' or the conduct of an 'investigation'":

> "First, the term 'case' is used in the first sentence of Article 5.8. The first sentence is concerned explicitly and exclusively with the circumstances in which an 'application' ('under [Article 5,] paragraph 1') shall be rejected and an 'investigation' terminated as a result of insufficient evidence to justify proceeding with the 'case'. As the treatment of the 'application' and conduct of the 'investigation' is dependent on the sufficiency of evidence concerning the 'case', we consider that the term 'case' in the first sentence must at least encompass the notions of 'application' and 'investigation'. In our view, it would [be] meaningless for the term 'case' in the first sentence to also encompass the concept of an Article 9.3 duty assessment procedure, since we fail to see how the sufficiency of evidence concerning a subsequent duty assessment could be relevant to the treatment of an 'application' or the conduct of an 'investigation', both of which precede the Article 9.3 duty assessment procedure. As we consider that the term 'case' in the first sentence of Article 5.8 does not include the concept of 'duty assessment', we see no reason to adopt a different approach to the term 'cases' in the second sentence of that provision."[390]

(c) "*de minimis*" test

289. Having determined that that term "cases" in Article 5.8 does not encompass the concept of an Article 9.3 duty assessment procedure[391], as referenced in paragraph 288 above, the Panel on *US – DRAMS* then concluded that "Article 5.8, second sentence, does not require Members to apply a *de minimis* test in Article 9.3 duty assessment procedures".[392] The Panel described the function of the Article 5.8 *de minimis* test as "to determine whether or not an exporter is subject to an anti-dumping order" and clearly distinguished this from any *de minimis* test applied under Article 9.3 duty assessment procedures.[393]

290. For further discussion of this issue by the Panel on *US – DRAMS*, see also paragraphs 461–462 below.

(d) Negligible import volumes

291. On 27 November 2002, the Committee on Anti-Dumping Practices adopted the "Recommendation concerning the time-period to be considered in making a determination of negligible import volumes for purposes of Article 5.8 of the Agreement".[394] In this Recommendation, the Committee on Anti-Dumping Practices notes that Article 5.8 of the *Anti-Dumping Agreement*, which provides that there shall be immediate termination in cases where the authorities determine that the volume of dumped imports, actual or potential, is negligible, does define the volume of dumped imports from a particular country that shall normally be regarded as negligible but does not however establish a period of time over which imports are to be counted in determining whether the volume of imports is negligible. The Committee therefore considered that guidance regarding an appropriate time-period for that determination would be useful. Accordingly, the Committee on Anti-Dumping Practices recommends:

> ". . . with respect to original investigations to determine the existence of dumping and consequent injury, whether the volume of dumped imports, actual or potential, from a particular country is regarded as negligible shall be determined with reference to the volume of dumped imports from that country during:
>
> (a) the period of data collection for the dumping investigation; or
>
> (b) the most recent 12 consecutive months prior to initiation for which data are available; or
>
> (c) the most recent 12 consecutive months prior to the date on which the application was filed, for which data are available, provided that the lapse of time between the filing of the application and the initiation of the investigation is no longer than 90 days.
>
> Not later than 60 days after the approval of this recommendation Members shall notify to the Committee on Anti-Dumping Practices which of the time-periods set out above, they will use in all investigations thereafter. If in any investigation the chosen methodology is not utilized, one of the two other methodologies shall be adopted, and an explanation shall be made in the public notice or separate public report of that investigation. Members which adopt the time-period mentioned in item (c) above shall also notify which of the other two time-periods they shall use in any case in which the lapse

[394] G/ADP/10.

> of time between the filing of the application and the initiation of the investigation is longer than 90 days, unless a Member's domestic law prohibits such a lapse."[395]

(e) Relationship with other paragraphs of Article 5

292. With respect to the relationship between Articles 5.3 and 5.8, see paragraph 283 above.

8. Relationship with other Articles

(a) Article 1

293. The *Guatemala – Cement II* Panel referred to footnote 1 to Article 1 in interpreting Article 5.5. See paragraph 269 above.

294. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 5. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[396] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

(b) Article 2

295. The Panel on *Guatemala – Cement II* discussed the relationship between Articles 2, 5.2 and 5.3 in order to clarify the requirements under Article 5.3. See paragraph 248 above.

(c) Article 3

296. The relationship between Article 5.2(iv) and Articles 3.2 and 3.4 was discussed in *Mexico – Corn Syrup*. See paragraph 238 above.

297. In *Thailand – H-Beams*, the Appellate Body referred to Articles 3.7, 5.2 and 5.3 in interpreting Article 3.1. See paragraph 112 above.

298. Article 3 was discussed in interpreting which elements of "injury" have to be supported by sufficient evidence under Article 5.3 in *Guatemala – Cement II*. See paragraphs 253–254 above.

(d) Article 6

299. In *Guatemala – Cement II*, the Panel referred to Article 5.10 in examining Mexico's claim under Article 6.1.3. See paragraph 325 below.

(e) Article 9

300. Also, in *US – DRAMS*, the Panel discussed the relationship between Articles 5.8 and 9.3. See paragraphs 288–289 above, and 461–462 below.

301. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 5. The Panel then determined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[397] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

(f) Article 10

302. In *US – Hot-Rolled Steel*, the Panel interpreted the term "sufficient evidence" in Article 10.7 by reference to Article 5.3. See paragraph 483 below.

(g) Article 12

303. The Panel on *Guatemala – Cement II* touched on the relationship between Articles 5.3 and 12.1 in addressing a claim under Article 12.1. See paragraph 548 below.

304. In *Thailand – H-Beams*, the Panel examined Poland's argument that Article 12 of the *Anti-Dumping Agreement* is "useful context" in connection with its Article 5.5 claim. The Panel responded as follows:

> "We note that both Articles 5.5 and 12.1 contain a requirement to notify the government of the exporting Member concerned of certain events connected with the initiation of an investigation at a certain point in time. However, it is clear that the requirements as to the timing, form and content of these notifications is different. Article 5.5 makes it clear that the notification referred to in that provision must take place 'after receipt of a properly documented application and before proceeding to initiate an investigation'. By contrast, Article 12.1 of the AD Agreement concerns notification of initiation, as it requires notification to 'the Member or Members the products of which are subject to such investigation . . .', '[w]hen the authorities are satisfied that there is sufficient evidence to justify the initiation of an anti-dumping investigation pursuant to Article 5 . . .' and requires 'public notice' of initiation. As Article 12.1 provides that such 'public notice' must 'contain, or otherwise make available through a separate report, adequate information. . . .',

[395] G/ADP/10.
[396] Panel Report on *Guatemala – Cement II*, para. 8.296.
[397] Panel Report on *Guatemala – Cement II*, para. 8.296.

the notice must presumably be in writing. Furthermore, Article 12 involves the notification of a decision to initiate, which a Member may not yet have taken at the time of an Article 5.5 notification. That Article 12 specifically enumerates certain requirements with respect to the contents and form of the notice it requires, and Article 5.5 does not, strongly suggests to us that the requirements of Article 12 do not apply to notification under Article 5.5, and in no way changes our interpretation of the requirements concerning the timing, form and content of the notification to be given under Article 5.5."[398]

(h) Article 17

305. With respect to the application of Article 17 in the examination required under Article 5.3, see paragraphs 256–259 above.

(i) Article 18

306. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 5. The Panel then found that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 18, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[399] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

9. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

307. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, among them Article 5. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement* and under Article VI of *GATT 1994*, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[400] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See also paragraph 5 above.

VI. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Evidence

6.1 All interested parties in an anti-dumping investigation shall be given notice of the information which the authorities require and ample opportunity to present in writing all evidence which they consider relevant in respect of the investigation in question.

6.1.1 Exporters or foreign producers receiving questionnaires used in an anti-dumping investigation shall be given at least 30 days for reply.[15] Due consideration should be given to any request for an extension of the 30–day period and, upon cause shown, such an extension should be granted whenever practicable.

(*footnote original*) [15] As a general rule, the time-limit for exporters shall be counted from the date of receipt of the questionnaire, which for this purpose shall be deemed to have been received one week from the date on which it was sent to the respondent or transmitted to the appropriate diplomatic representative of the exporting Member or, in the case of a separate customs territory Member of the WTO, an official representative of the exporting territory.

6.1.2 Subject to the requirement to protect confidential information, evidence presented in writing by one interested party shall be made available promptly to other interested parties participating in the investigation.

6.1.3 As soon as an investigation has been initiated, the authorities shall provide the full text of the written application received under paragraph 1 of Article 5 to the known exporters[16] and to the authorities of the exporting Member and shall make it available, upon request, to other interested parties involved. Due regard shall be paid to the requirement for the protection of confidential information, as provided for in paragraph 5.

(*footnote original*) [16] It being understood that, where the number of exporters involved is particularly high, the full text of the written application should instead be provided only to the authorities of the exporting Member or to the relevant trade association.

6.2 Throughout the anti-dumping investigation all interested parties shall have a full opportunity for the defence of their interests. To this end, the authorities shall, on request, provide opportunities for all interested parties to meet those parties with adverse interests, so that opposing views may be presented and rebuttal arguments offered. Provision of such opportunities must take account of the need to preserve confidentiality and of the convenience to the parties. There shall be no obligation on any party to attend a meeting, and failure to do so shall not be prejudicial to that party's case. Interested parties shall also have the right, on justification, to present other information orally.

[398] Panel Report on *Thailand – H-Beams*, para. 7.93.
[399] Panel Report on *Guatemala – Cement II*, para. 8.296.
[400] Panel Report on *Guatemala – Cement II*, para. 8.296.

6.3 Oral information provided under paragraph 2 shall be taken into account by the authorities only in so far as it is subsequently reproduced in writing and made available to other interested parties, as provided for in subparagraph 1.2.

6.4 The authorities shall whenever practicable provide timely opportunities for all interested parties to see all information that is relevant to the presentation of their cases, that is not confidential as defined in paragraph 5, and that is used by the authorities in an anti-dumping investigation, and to prepare presentations on the basis of this information.

6.5 Any information which is by nature confidential (for example, because its disclosure would be of significant competitive advantage to a competitor or because its disclosure would have a significantly adverse effect upon a person supplying the information or upon a person from whom that person acquired the information), or which is provided on a confidential basis by parties to an investigation shall, upon good cause shown, be treated as such by the authorities. Such information shall not be disclosed without specific permission of the party submitting it.[17]

(*footnote original*) [17] Members are aware that in the territory of certain Members disclosure pursuant to a narrowly-drawn protective order may be required.

6.5.1 The authorities shall require interested parties providing confidential information to furnish non-confidential summaries thereof. These summaries shall be in sufficient detail to permit a reasonable understanding of the substance of the information submitted in confidence. In exceptional circumstances, such parties may indicate that such information is not susceptible of summary. In such exceptional circumstances, a statement of the reasons why summarization is not possible must be provided.

6.5.2 If the authorities find that a request for confidentiality is not warranted and if the supplier of the information is either unwilling to make the information public or to authorize its disclosure in generalized or summary form, the authorities may disregard such information unless it can be demonstrated to their satisfaction from appropriate sources that the information is correct.[18]

(*footnote original*) [18] Members agree that requests for confidentiality should not be arbitrarily rejected.

6.6 Except in circumstances provided for in paragraph 8, the authorities shall during the course of an investigation satisfy themselves as to the accuracy of the information supplied by interested parties upon which their findings are based.

6.7 In order to verify information provided or to obtain further details, the authorities may carry out investigations in the territory of other Members as required, provided they obtain the agreement of the firms concerned and notify the representatives of the government of the Member in question, and unless that Member objects to the investigation. The procedures described in Annex I[401] shall apply to investigations carried out in the territory of other Members. Subject to the requirement to protect confidential information, the authorities shall make the results of any such investigations available, or shall provide disclosure thereof pursuant to paragraph 9, to the firms to which they pertain and may make such results available to the applicants.

6.8 In cases in which any interested party refuses access to, or otherwise does not provide, necessary information within a reasonable period or significantly impedes the investigation, preliminary and final determinations, affirmative or negative, may be made on the basis of the facts available. The provisions of Annex II[402] shall be observed in the application of this paragraph.

6.9 The authorities shall, before a final determination is made, inform all interested parties of the essential facts under consideration which form the basis for the decision whether to apply definitive measures. Such disclosure should take place in sufficient time for the parties to defend their interests.

6.10 The authorities shall, as a rule, determine an individual margin of dumping for each known exporter or producer concerned of the product under investigation. In cases where the number of exporters, producers, importers or types of products involved is so large as to make such a determination impracticable, the authorities may limit their examination either to a reasonable number of interested parties or products by using samples which are statistically valid on the basis of information available to the authorities at the time of the selection, or to the largest percentage of the volume of the exports from the country in question which can reasonably be investigated.

6.10.1 Any selection of exporters, producers, importers or types of products made under this paragraph shall preferably be chosen in consultation with and with the consent of the exporters, producers or importers concerned.

6.10.2 In cases where the authorities have limited their examination, as provided for in this paragraph, they shall nevertheless determine an individual margin of dumping for any exporter or producer not initially selected who submits the necessary information in time for that information to be

[401] See Section XIX.
[402] See Section XX.

considered during the course of the investigation, except where the number of exporters or producers is so large that individual examinations would be unduly burdensome to the authorities and prevent the timely completion of the investigation. Voluntary responses shall not be discouraged.

6.11 For the purposes of this Agreement, "interested parties" shall include:

(i) an exporter or foreign producer or the importer of a product subject to investigation, or a trade or business association a majority of the members of which are producers, exporters or importers of such product;

(ii) the government of the exporting Member; and

(iii) a producer of the like product in the importing Member or a trade and business association a majority of the members of which produce the like product in the territory of the importing Member.

This list shall not preclude Members from allowing domestic or foreign parties other than those mentioned above to be included as interested parties.

6.12 The authorities shall provide opportunities for industrial users of the product under investigation, and for representative consumer organizations in cases where the product is commonly sold at the retail level, to provide information which is relevant to the investigation regarding dumping, injury and causality.

6.13 The authorities shall take due account of any difficulties experienced by interested parties, in particular small companies, in supplying information requested, and shall provide any assistance practicable.

6.14 The procedures set out above are not intended to prevent the authorities of a Member from proceeding expeditiously with regard to initiating an investigation, reaching preliminary or final determinations, whether affirmative or negative, or from applying provisional or final measures, in accordance with relevant provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Article 6.1

(a) General

(i) Failure to indicate the information required

308. In *Argentina – Ceramic Tiles*, the Panel, when examining whether the investigating authorities were entitled to resort to facts available pursuant to Article 6.8, concluded that an investigating authority could not fault an interested party for not providing information it was not clearly requested to submit:

> "Article 6.1 of the AD Agreement thus requires that interested parties be given notice of the information which the authorities require. In our view, it follows that, independently of the purpose for which the information or documentation is requested, an investigating authority may not fault an interested party for not providing information it was not clearly requested to submit."[403]

(ii) Failure to set time-limits for the presentation of arguments and evidence

309. In *Guatemala – Cement II*, Mexico argued that Guatemala's investigating authority had violated Article 6.1 by failing to set a time-limit for the presentation of arguments and evidence during the final stage of the investigation while it had fixed a time-limit for the submission of arguments and evidence for the early part of the investigation. The Panel rejected this argument:

> "In our view, Article 6.1 of the AD Agreement does not require investigating authorities to set time-limits for the presentation of arguments and evidence during the final stage of the investigation. The only time-limit provided for in Article 6.1 is that contained in Article 6.1.1, whereby exporters shall be given at least 30 days for replying to questionnaires. . . .
>
> Article 6.1 requires investigating authorities to provide interested parties 'ample opportunity' to present in writing certain evidence. Article 6.1 does not explicitly require an investigating authority to set time limits for the submission of arguments and evidence during the final stage of an investigation.[404] Article 6.1 simply requires that interested parties shall have 'ample' opportunity to present evidence and 'full' opportunity to defend their interests. Interested parties may have such opportunity without the investigating authority setting time limits for the submission of evidence. In other words, these provisions impose substantive obligations, without requiring those obligations to be met through any particular form (except as provided for in subparagraphs 1 through 3 of Article 6.1). What counts is whether, in practice, sufficient opportunity was provided, not whether time limits for the submission of evidence were set. Thus, even if the Ministry had failed to set time-limits for the submission of arguments and evidence during the final stage of the investigation, this would not *ipso facto* constitute a violation of Article 6.1 of the AD Agreement."[405]

[403] Panel Report on *Argentina – Ceramic Tiles*, para. 6.54.

[404] (*footnote original*) This does not, of course, preclude an authority from establishing such limits, so long as the basic requirements (such as "ample opportunity", or 30 days in respect of questionnaire replies) are respected.

[405] Panel Report on *Guatemala – Cement II*, paras. 8.118–8.119.

310. The Panel further rejected Mexico's argument that "the Ministry's public notice of initiation granted interested parties 30 days in which to defend their interests, whereas no such time-limit was included in the public notice concerning the imposition of a provisional measure":[406]

> "We would note that Article 12.1.1(vi) explicitly provides that a public notice of the initiation of an investigation shall include adequate information on the 'time-limits allowed to interested parties for making their views known'. No such obligation is included in Article 12.2.1, concerning the contents of public notices on the imposition of provisional measures. We consider that Article 12.2.1 constitutes useful context when examining Mexico's claim under Article 6.1. In particular, the fact that there is no requirement for investigating authorities to include time-limits for the submission of evidence in the public notice of their preliminary determinations confirms the conclusion set forth in the preceding paragraph."[407]

(iii) Failure to provide information concerning the extension of the period of investigation

311. In *Guatemala – Cement II*, Mexico argued that because Guatemala's authority extended the period of investigation during the investigation procedure, and did not respond to requests for information from a Mexican producer concerning the extension, the Mexican producer was unable to defend its interests in respect of the extension of the period of investigation contrary to Articles 6.1 and 6.2. The Panel rejected this argument, stating:

> "[W]e consider that Mexico's interpretation of that provision is too expansive. The plain language of Article 6.1 merely requires that interested parties be given (1) notice of the information which the authorities require, and (2) ample opportunity to present in writing all evidence which they consider relevant in respect of the investigation. First, we note that Cruz Azul [the Mexican producer] was given two weeks in which to present data concerning the extended POI. Cruz Azul therefore had two weeks' notice of the information required by the Ministry in respect of the extended POI.[408] Second, Mexico has made no claim to the effect that Cruz Azul was prevented from adducing written 'evidence' concerning the extended POI. Whereas Mexico claims that Cruz Azul was denied any opportunity to comment on the extension of the POI *per se*, Article 6.1 does not explicitly require the provision of opportunities for interested parties to comment on decisions taken by the investigating authority in respect of the information it requires."[409]

(iv) Failure to allow interested parties access to information

312. In *Guatemala – Cement II*, the Panel examined Mexico's argument that Guatemala's authority acted inconsistently with Articles 6.1, 6.2 and 6.4 by failing to allow a Mexican producer "proper access" to the information submitted by a Guatemalan domestic producer at the public hearing it held. Noting that it had found a violation of Articles 6.1.2 and 6.4 on the same factual foundation, as referenced in paragraphs 321–322 below, the Panel stated:

> "Since we consider [Articles 6.1.2 and 6.4] to be the specific provisions of the AD Agreement governing an interested party's right to information submitted by another interested party, we do not consider it necessary to address Mexico's claims under Articles 6.1 and 6.2. These provisions do not specifically address an interested party's right of access to information submitted by another interested party."[410]

313. In *Guatemala – Cement II*, the Panel rejected Mexico's claim that Guatemala's authority had acted inconsistently with Articles 6.1, 6.2 and 6.9 by changing its injury determination from a preliminary determination of threat of material injury to a final determination of actual material injury during the course of the investigation, without informing a Mexican producer of that change, and without giving the producer a full and ample opportunity to defend itself. Referring to Article 12.2, the Panel first made the following general observation:

> "We do not consider that an investigating authority need inform interested parties in advance when, having issued a preliminary affirmative determination on the basis of threat of material injury, it subsequently makes a final determination of actual material injury. No provision of the AD Agreement requires an investigating authority to inform interested parties, during the course of the investigation, that it has changed the legal basis for its injury determination. Investigating authorities are instead required to forward to interested parties a public notice, or a separate report, setting forth 'in sufficient detail the findings and conclusions reached on all issues of fact and law considered material by the investigating authorities', consistent with Article 12.2 of the AD Agreement. If decisions on issues of law had to be disclosed to interested parties during the course of the

[406] Panel Report on *Guatemala – Cement II*, para. 8.120.
[407] Panel Report on *Guatemala – Cement II*, para. 8.120.
[408] (*footnote original*) We note that Mexico has not alleged that a failure to provide Cruz Azul with at least 30 days to respond to the Ministry's supplementary questionnaire (which required the provision of data for an additional six-month POI) constitutes a violation of Article 6.1.1 of the AD Agreement. That being the case, we shall refrain from making any findings on this matter.
[409] Panel Report on *Guatemala – Cement II*, para. 8.178.
[410] Panel Report on *Guatemala – Cement II*, para. 8.216.

investigation, there would be little need for interested parties to receive the notice provided for in Article 12.2. Furthermore, to the extent that there is any difference between the preliminary determination of injury and the final determination of injury, that change will be apparent to interested parties comparing the public notice of the investigating authority's preliminary determination with the public notice of its final determination."[411]

314. The Panel on *Guatemala – Cement II* then went on to draw a distinction, in regard to Article 6.1, between "information", "evidence" and "essential facts" on the one hand and "legal determinations" on the other:

"We note that Articles 6.1 and 6.9 impose certain obligations on investigating authorities in respect of 'information', 'evidence' and 'essential facts'. However, Mexico's claim does not concern interested parties' right to have access to certain factual information during the course of an investigation. Mexico's claim concerns interested parties' alleged right to be informed of an investigating authority's legal determinations during the course of an investigation."[412]

(b) Article 6.1.1

(i) "questionnaires"

315. In *Egypt – Steel Rebar*, the Panel addressed the question of whether "questionnaires" as referred to in Article 6.1.1 are only the original questionnaires in an investigation, or whether this term would also include all other requests for information, or certain types of requests, including requests in addition and subsequent to original questionnaires.[413] The Panel, which noted that the term "questionnaire" was not defined anywhere in the *Anti-Dumping Agreement*, considered that the references in Annex I, paragraphs 6 and 7, to this term provide strong contextual support for its interpretation in Article 6.1.1 as referring only to the original questionnaires sent to interested parties at the outset of an investigation:

"The term 'questionnaire' as used in Article 6.1.1 is not defined in the AD Agreement, and in fact, this term only appears in Article 6.1.1, and in paragraphs 6 and 7 of Annex I. In our view, the references in Annex I, paragraphs 6 and 7 provide strong contextual support for interpreting the term 'questionnaires' in Article 6.1.1 as referring only to the original questionnaires sent to interested parties at the outset of an investigation. In particular, both of these provisions refer to 'the questionnaire' in the singular, implying that there is only one document that constitutes a 'questionnaire' in a dumping investigation, namely the initial questionnaire, at least as far as the foreign companies (producers and exporters) that might be visited are concerned. Paragraph 6 refers to visits by an investigating authority to the territory of an exporting Member 'to explain *the questionnaire*'. Paragraph 7 provides that 'on-the-spot investigation . . . should be carried out after the response to *the questionnaire* has been received . . .'

If any requests for information other than the initial questionnaire were to be considered 'questionnaires' in the sense of Article 6.1.1, a number of operational and logistical problems would arise in respect of other obligations under the AD Agreement. First, there is no basis in the AD Agreement on which to determine that some, but not all, information requests other than the initial questionnaire also would constitute 'questionnaires'. Thus, even if an investigating authority was not obligated to provide the minimum time-period in Article 6.1.1 in respect of every request for information, it would not be able to determine from the Agreement which of its requests were and were not subject to that time-period. On the other hand, if all requests for information in an investigation were 'questionnaires' in the sense of Article 6.1.1, this could make it impossible for an investigation to be completed within the maximum one year (or exceptionally, 18 months) allowed by the AD Agreement in Article 5.10. Moreover, a 30– or 37–day deadline for requests for information made in the context of an on-the-spot verification – i.e., the 'obtain[ing of] further details' explicitly referred to in Article 6.7 to as one of the purposes of such verifications – obviously would be completely illogical as well as unworkable. Finally, such an interpretation would render superfluous the requirement in Annex II, paragraph 6 to allow a 'reasonable period . . .' for the provision of any explanations concerning identified deficiencies in submitted information."[414]

316. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that Article 6.1.1 does not, however, address what sort of questionnaires are to be sent to exporters or foreign producers. According to the Panel, the first sentence of Article 6.1.1 means "that if questionnaires are sent to exporters or foreign producers, they shall be given at least 30 days for reply", and, accordingly, "the failure to send a particular questionnaire to exporters or foreign producers does not constitute a violation of Article 6.1.1."[415]

(ii) Deadlines

317. In *US – Hot-Rolled Steel*, the United States authorities had rejected certain information provided by two Japanese exporters which was submitted beyond the

[411] Panel Report on *Guatemala – Cement II*, para. 8.237.
[412] Panel Report on *Guatemala – Cement II*, para. 8.238. In regard to the Panel's finding regarding the claims under Articles 6.2 and 6.9, see the excerpts referenced in paras. 314, 336 and 432 of this Chapter.
[413] Panel Report on *Egypt – Steel Rebar*, para. 7.275.
[414] Panel Report on *Egypt – Steel Rebar*, paras. 7.276–7.277.
[415] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.145.

deadlines for responses to the questionnaires and thus applied "facts available" in the calculation of the dumping margins. The United States interpreted Article 6.8[416] as permitting investigating authorities to rely upon reasonable, pre-established deadlines for the submission of data and argued that such an interpretation is supported by Article 6.1.1. The Appellate Body agreed with the Panel that "in the interest of orderly administration investigating authorities do, and indeed must establish such deadlines".[417] It further considered that those deadlines are "*not* necessarily absolute and immutable":

> "We observe that Article 6.1.1 does not explicitly use the word 'deadlines'. However, the *first* sentence of Article 6.1.1 clearly contemplates that investigating authorities may impose appropriate time-limits on interested parties for responses to questionnaires. That first sentence also prescribes an absolute minimum of 30 days for the initial response to a questionnaire. Article 6.1.1, therefore, recognizes that it is fully consistent with the *Anti-Dumping Agreement* for investigating authorities to impose time-limits for the submission of questionnaire responses. Investigating authorities must be able to control the conduct of their investigation and to carry out the multiple steps in an investigation required to reach a final determination. Indeed, in the absence of time-limits, authorities would effectively cede control of investigations to the interested parties, and could find themselves unable to complete their investigations within the time-limits mandated under the *Anti-Dumping Agreement*. We note, in that respect, that Article 5.10 of the *Anti-Dumping Agreement* stipulates that anti-dumping investigations shall normally be completed within one year, and in any event in no longer than 18 months, after initiation. Furthermore, Article 6.14 provides generally that the procedures set out in Article 6 'are not intended to prevent the authorities of a Member from proceeding *expeditiously*'. (emphasis added) We, therefore, agree with the Panel that 'in the interest of orderly administration investigating authorities do, and indeed must establish such deadlines.'[418]
>
> While the United States stresses the significance of the *first* sentence of Article 6.1.1, we believe that importance must also be attached to the *second* sentence of that provision. According to the express wording of the second sentence of Article 6.1.1, investigating authorities must extend the time-limit for responses to questionnaires 'upon *cause shown* ', where granting such an extension is '*practicable* '. (emphasis added) This second sentence, therefore, indicates that the time-limits imposed by investigating authorities for responses to questionnaires are *not* necessarily absolute and immutable."[419]

318. The Panel on *US – Corrosion-Resistant Steel Sunset Review* stated that "the right of interested parties to submit information in a sunset review cannot be unlimited. One of the important limitations that can legitimately be imposed on that right is deadlines for the submission of information"[420]. The Panel considered that by virtue of the cross-reference in Article 11.4, the requirements of Article 6.1 and 6.2 also applied in the case of sunset reviews.[421] According to the Panel, in a sunset review as well, "there must be a balance struck between the rights of the investigating authorities to control and expedite the investigating process, and the legitimate interests of the parties to submit information and to have that information taken into account".[422]

319. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* also considered that Articles 6.1 and 6.2 do not provide for indefinite rights so as to enable respondents to submit relevant evidence, attend hearings, or participate in the inquiry as and when they choose:

> "Therefore, the 'ample' and 'full' opportunities guaranteed by Articles 6.1 and 6.2, respectively, cannot extend indefinitely and must, at some point, legitimately cease to exist. This point must be determined by reference to the right of investigating authorities to rely on deadlines in the conduct of their investigations and reviews. Where the continued granting of opportunities to present evidence and attend hearings would impinge on an investigating authority's ability to 'control the conduct' of its inquiry and to 'carry out the multiple steps' required to reach a timely completion of the sunset review, a respondent will have reached the limit of the 'ample' and 'full' opportunities provided for in Articles 6.1 and 6.2 of the *Anti-Dumping Agreement*."[423]

320. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* was of the view that the right to present evidence and request a hearing cannot be said to have been "denied" to a respondent that is given an

[417] Panel Report on *US – Hot-Rolled Steel*, para. 7.54. Appellate Body Report, para. 73.

[418] (*footnote original*) Panel Report, para. 7.54.

[419] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 73–74.

[420] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.258.

[421] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 7.254–7.255.

[422] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.258. On appeal, the Appellate Body agreed that claims under Article 6 may be made in relation to sunset review determinations on the basis of the cross-reference to Article 6 found in Article 11.4. Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 152.

[423] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 237. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* thus considered that disregarding evidence presented by a respondent in a sunset review because it is "incomplete" is incompatible with the respondent's right under Article 6.1 to present evidence that it considers relevant in respect of the sunset review. As the respondent will also be denied any opportunity to confront parties with adverse interests in a hearing, this respondent is denied its rights, pursuant to Article 6.2, to the "full opportunity for the defence of its interest". See Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 246.

opportunity to submit an initial response to the notice of initiation simply because it must do so by a deadline that is conceded to be reasonable:

> "We do not see it as an unreasonable burden on respondents to require them to file a timely submission in order to preserve their rights for the remainder of the sunset review. Indeed, even an incomplete submission will serve to preserve those rights. Accordingly, we are of the view that, if a respondent decides not to undertake the necessary initial steps to avail itself of the 'ample' and 'full' opportunities available for the defence of its interests, the fault lies with the respondent, and not with the deemed waiver provision."[424]

(c) Article 6.1.2

(i) "evidence presented . . . by one party shall be made available promptly to other interested parties"

321. In *Guatemala – Cement II*, Mexico claimed that Guatemala's authority violated Articles 6.1.2, 6.2 and 6.4 by (a) refusing a Mexican producer access to the file at a certain date during the investigation, and (b) failing to promptly provide the producer with a copy of a submission made by the applicant. In examining this claim, the Panel juxtaposed the notion of "access to the file" on the one hand and, on the other hand, the requirements that evidence presented by one interested party be "made available promptly" and that parties shall have "timely opportunities" to see all relevant information:

> "Article 6.1.2 of the AD Agreement provides that evidence presented by one interested party shall be 'made available promptly' to other interested parties. Article 6.4 provides that an interested party shall have 'timely opportunities' to see all information that is relevant to the presentation of its case. On their face, neither Article 6.1.2 nor Article 6.4 necessarily require access to the file. For example, if an investigating authority required each interested party to serve its submissions on all other interested parties, or if the investigating authority itself undertook to provide copies of each interested party's submission to other interested parties, there may be no need for interested parties to have access to the file. If, however, there is no service of evidence by interested parties, or no provision of copies by the investigating authority, access to the file may be the only practical means by which evidence presented by one interested party could be 'made available promptly' to other interested parties (consistent with Article 6.1.2), or by which interested parties could have 'timely opportunities' to see information relevant to the presentation of their cases (consistent with Article 6.4). Assuming access to the file is the only practical means of complying with Articles 6.1.2 and 6.4, access to the file need not necessarily be unlimited. Nor need the file be made available on demand. Provided access to the file is regular and routine, we consider that the requirements of Articles 6.1.2 and 6.4 would be satisfied."[425]

322. The Panel on *Guatemala – Cement II* then stated that "[i]n principle, . . . a 20–day delay is inconsistent with . . . Article 6.1.2 obligation [of Guatemala's authority] to make [the subject] submission available to [other interested parties] 'promptly'."[426]

(ii) "interested parties participating in the investigation"

323. The Panel on *Argentina – Poultry Anti-Dumping Duties* underlined that Article 6.1.2 does not refer to "interested parties" but to "interested parties participating in the investigation". It thus considered that had the drafters intended to extend the obligation imposed by Article 6.1.2 to all interested parties as defined in Article 6.11 of the *AD Agreement*, they would not have included the term "participating". According to the Panel the term "participating" suggests that, a party must undertake some action. In the view of the Panel, "the mere knowledge by an interested party of an ongoing investigation does not make that party an interested party 'participating in the investigation' within the meaning of Article 6.1.2 unless it actively takes part in the investigation".[427] According to the Panel, an investigating authority is not required to promptly make evidence presented in writing by other interested parties available to exporters which were not even aware of the investigation such that they could participate in it.[428]

(iii) "subject to the requirement to protect confidential information"

324. With respect to the claim by Mexico that the failure to make a submission available to a Mexican producer was inconsistent with Article 6.1.2, the Panel on *Guatemala – Cement II* rejected Guatemala's argument that the failure was justified because the submission contained confidential information:

---

[424] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 252.

[425] Panel Report on *Guatemala – Cement II*, para. 8.133.

[426] Panel Report on *Guatemala – Cement II*, para. 8.142.

[427] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.153.

[428] In a footnote, the Panel on *Argentina – Poultry Anti-Dumping Duties* expressed the view that "a violation of Article 12.1 does not automatically entail a violation of Article 6.1.2. The fact that interested parties were not participating in the investigation because they were not notified of the initiation of the investigation does not change the fact that the beneficiaries of the obligations in Articles 12.1 and 6.1.2 are different. We consider that the Brazilian exporters were not aware of the investigation because they had not been notified in accordance with Article 12.1 of the *AD Agreement*." Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.153, fn. 128.

"In this regard, we note that the obligation in Article 6.1.2 is qualified by the words '[s]ubject to the requirement to protect confidential information'. In principle, therefore, evidence presented by one interested party need not be made available 'promptly' to other interested parties if it is 'confidential'. However, insofar as confidentiality is concerned, Article 6.1.2 must be read in the context of Article 6.5, which governs the treatment of confidential information. We examine Article 6.5 in detail . . . below. We have noted that Article 6.5 reserves special treatment for 'confidential' information only 'upon good cause shown', and we have determined that the requisite 'good cause' must be shown by the interested party which submitted the information at issue. Guatemala has not demonstrated, or even argued, that Cementos Progreso [the applicant] requested confidential treatment for its . . . submission, or that 'good cause' for confidential treatment was otherwise shown.[429] The Article 6.1.2 proviso regarding the 'requirement to protect confidential information', when read in the context of Article 6.5, cannot be interpreted to allow an investigating authority to delay making available evidence submitted by one interested party to another interested party for 20 days simply because of the possibility – which is unsubstantiated[430] by any request for confidential treatment from the party submitting the evidence – that the evidence contains confidential information. We do not believe that the specific requirement of Article 6.1.2 may be circumvented simply by an investigating authority determining that there is a possibility that the evidence at issue contains confidential information. Such an interpretation could undermine the purpose of Article 6.1.2, since in principle there is a possibility that any evidence could contain confidential information (and therefore not be 'made available promptly' to interested parties). Accordingly, we find that the Ministry violated Article 6.1.2 of the AD Agreement by failing to make Cementos Progreso's 19 December 1996 submission available to Cruz Azul until 8 January 1997."[431]

(d) Article 6.1.3

325. In *Guatemala – Cement II*, the Panel found the communication of Guatemala of the full text of the application at the earliest 18 days after initiation of the investigation to be inconsistent with Article 6.1.3. The Panel based its findings under Article 6.1.3 on the interpretation of the phrase that the text of the application be provided "as soon as an investigation has been initiated":

"We note that Article 6.1.3 does not specify the number of days within which the text of the application shall be provided. What it does specify is that the text of the application be provided 'as soon as' the investigation has been initiated. In this regard, the term 'as soon as' conveys a sense of substantial urgency. In fact, the terms 'immediately' and 'as soon as' are considered to be interchangeable. We do not consider that providing the text of the application 24 or even 18 days after the date of initiation fulfils the requirement of Article 6.1.3 that the text be provided 'as soon as an investigation has been initiated.'

We further consider that the timeliness of the provision of the text of the application should be evaluated in the context of its purpose and function. Timely access to the application is important for the exporters to enable preparation of the arguments in defence of their interests before the investigating authorities. Moreover, once the investigation has been initiated the timetable of the investigation commences and the timing for many events in the proceeding are counted from initiation including the 12 or 18 months total for completion of the investigation provide for in Article 5.10. Since deadlines in the timetable of the investigation are counted from the date of initiation it is critical that the investigating authority provide the text of the application 'as soon as an investigation has been initiated', for the exporter to be able to devise a strategy to defend the allegations it is being confronted with. Also, Article 7.3 of the AD Agreement allows a Member to impose provisional measures as early as sixty days after the date of initiation of an investigation. Access to the text of the application is crucial for the exporter to prepare its defence, and even more so if the authorities are likely to consider applying a provisional measure which may come as early as 60 days after initiation.[432]"[433]

---

[429] (*footnote original*) Even if Cementos Progreso had requested confidential treatment, the Ministry should (consistent with 6.5.1) have required it to furnish a non-confidential version thereof which could have been made available to Cruz Azul "promptly", or to provide "a statement of the reasons why [non-confidential] summarization is not possible".

[430] (*footnote original*) The Cementos Progreso submission at issue was made at a public hearing on 19 December 1996. Guatemala argues that, although the Ministry authorized parties to make submissions in writing, the Ministry had not specified whether such written submissions could contain confidential information or not. According to Guatemala, this justified the Ministry in assuming that the Cementos Progreso submission may contain confidential information. We are not at all convinced by this argument. The instructions issued by the Ministry concerning the public hearing state that "[t]he hearing is being organized for the purpose of receiving the final arguments of the parties, which may submit *a written version thereof*" (emphasis supplied). Thus, any written submission was simply to be a written version of arguments presented orally. Arguments made by a party at a public hearing will presumably not contain confidential information. Similarly, therefore, written versions of arguments presented orally will also not contain information. Thus, to the extent that Cementos Progreso would not have included confidential information in its oral presentation, similarly its written version of that oral presentation also would not have included confidential information. In these circumstances, we fail to see how Cementos Progreso's written submission – which, consistent with the Ministry's instructions, was to be a written version of its oral presentation – could have contained confidential information.

[431] Panel Report on *Guatemala – Cement II*, para. 8.143.

[432] (*footnote original*) On a similar issue the *Korea-Dairy Safeguards* panel found that a 14 day delay on notification to the WTO Safeguards Committee as required by Article 12.1 of the Safeguards Agreement did not satisfy the requirement that the notification be provided "immediately" after initiation. See Panel Report on *Korea – Dairy*, para. 7.134.

[433] Panel Report on *Guatemala – Cement II*, paras. 8.101–8.102.

326. The Panel on *Argentina – Poultry Anti-Dumping Duties* addressed the meaning of the term "to provide" in the first sentence of Article 6.1.3. The Panel considered that "the term 'provide' would require a positive action on the part of the investigating authority akin to that of furnishing or supplying something (i.e., the full text of the application) to someone (i.e., known exporters and authorities of the exporting Member). Therefore, we cannot agree with Argentina that the term 'provide' in the English text of the *AD Agreement* or 'facilitar' in its Spanish text can be interpreted as meaning 'permitting access'. In our view, an investigating authority cannot comply with the obligation to 'provide the (. . .) application (. . .) to the known exporters and to the authorities of the exporting Member' simply by permitting them access to that application."[434] The Panel distinguished between the obligation to provide the application to the known exporters and to the authorities of the exporting Member, and the obligation to "make available" the application to other interested parties upon request. According to the Panel, "with the use of different verbs in the first sentence of Article 6.1.3, 'provide' on the one hand and 'make available' on the other, the drafters intended to impose different obligations on investigating authorities depending on the party concerned. The first obligation requires a positive action on the part of the investigating authority, while the second envisages only a passive act".[435]

327. In *Guatemala – Cement II*, the Panel rejected Guatemala's argument that the actions of its investigating authority under Articles 5.5, 12.1.1 and 6.1.3, even if the Panel were to find that they constituted violations of the *Anti-Dumping Agreement*, had not affected the course of the investigation, and thus: (a) the alleged violations were not harmful according to the principle of "harmless error"; (b) Mexico "convalidated" the alleged violations by not objecting immediately after their occurrence; and (c) the alleged violations did not cause nullification or impairment of benefits accruing to Mexico under the *Anti-Dumping Agreement*. See paragraphs 276–279 above.

(e) Relationship with other paragraphs of Article 6

328. The Panel on *Guatemala – Cement II* addressed Mexico's claims of violations of Articles 6.1, 6.2, 6.4, 6.5, 6.5.1 and 6.5.2, all of which were based on the same factual foundation. See paragraph 360 below.

329. In *Guatemala – Cement II*, Mexico claimed that Guatemala's investigating authority violated Articles 6.1, 6.2, 6.8 and Annex II(5) and (6) of the *Anti-Dumping Agreement* by rejecting certain technical accounting evidence submitted by a Mexican interested party one day before the public hearing held by Guatemala's authority. The Panel considered it unnecessary to address this claim, on the ground that the claim was dependent on the issue of whether the cancellation by the authority of its verification visit to the Mexican producer was inconsistent with Article 6.8, and the Panel had already found the cancellation in violation of Article 6.8.[436]

330. In *Guatemala – Cement II*, the Panel considered it unnecessary to examine Article 6.2 claims because it had already found violations of Article 6.1.2, 6.1.3, 6.4 and 6.5.1 on the same sets of facts. See paragraph 341 below.

331. The Panel on *Guatemala – Cement II* addressed Mexico's claims of violations of Articles 6.1, 6.2, 6.4, 6.5, 6.5.1 and 6.5.2, all of which were based on the same factual foundation. See paragraph 360 below.

332. The Panel on *Argentina – Ceramic Tiles,* when examining whether the investigating authorities were entitled to resort to facts available pursuant to Article 6.8, referred to Article 6.1 to support its conclusion that the investigating authorities could not do so when they did not clearly request the relevant information from the party in question. See paragraphs 308 above and 384 below. The Appellate Body in *US – Hot-Rolled Steel* further analysed the relationship of Article 6.8 and Annex II with Article 6.1.1. See paragraphs 317 above and 397 and 400 below.

333. The Panel on *Guatemala – Cement II* further referred to Article 6.5 in interpreting Article 6.1.2. See paragraph 324 above.

334. In *Guatemala – Cement II*, having found that Guatemala's failure to disclose the "essential facts" forming the basis of its final determination was in violation of Article 6.9, as referenced in paragraphs 429, 430 and 432 below, the Panel considered it unnecessary to examine whether it was also inconsistent with Articles 6.1 and 6.2.[437]

2. Article 6.2

(a) "shall have a full opportunity for the defence of their interests"

(i) Article 6.2, first sentence as a fundamental due process provision

335. In *Guatemala – Cement II*, Mexico argued that because Guatemala's authority extended the period of

[434] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.169.
[435] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.170.
[436] Panel Report on *Guatemala – Cement II*, para. 8.125.
[437] Panel Report on *Guatemala – Cement II*, para. 8.232.

investigation during the investigation procedure, and did not respond to requests for information from a Mexican producer concerning the extension, the Mexican producer was not given any opportunity to comment on the applicant's request for extension of the period of investigation contrary to Article 6.2. The Panel, which agreed with this argument, interpreted the first sentence of Article 6.2 "as a fundamental due process provision":

> "We interpret the first sentence of Article 6.2 of the AD Agreement as a fundamental due process provision. In our view, when a request for an extension of the POI comes from one interested party, due process requires that the investigating authority seeks the views of other interested parties before acting on that request. Failure to respect the requirements of due process would conflict with the requirement to provide interested parties with 'a full opportunity for the defence of their interests', consistent with Article 6.2.[438] Clearly, an interested party is not able to defend its interests if it is prevented from commenting on requests made by other interested parties in pursuit of their interests. In the present case, Cementos Progreso's request for extension of the POI was made on 1 October 1996. The Ministry's decision to extend the POI was made on 4 October 1996, only three days after Cementos Progreso's request. There is no evidence to suggest that the Ministry sought the views of Cruz Azul [the Mexican producer], or other interested parties, before deciding to extend the POI. Accordingly, we find that by extending the POI pursuant to a request from Cementos Progreso without seeking the views of other interested parties in respect of that request, the Ministry failed to provide Cruz Azul with 'a full opportunity for the defence of [its] interests', contrary to Guatemala's obligations under Article 6.2 of the AD Agreement."[439]

(ii) General nature and extent of the obligations under Article 6.2

336. In *Guatemala – Cement II*, the Panel rejected Mexico's claim that Guatemala's authority was in violation of Articles 6.1, 6.2 and 6.9 by changing its injury determination from a preliminary determination of threat of material injury to a final determination of actual material injury during the course of the investigation, without informing the Mexican producer of that change, and without giving the producer a full and ample opportunity to defend itself. Following the observation based upon Article 12.2, quoted in paragraph 313 above, the Panel explained that the first sentence of Article 6.2 is very general in nature:

> "As for Article 6.2, we note that the first sentence of that provision is very general in nature. We are unable to interpret such a general sentence in a way that would impose a specific obligation on investigating authorities to inform interested parties of the legal basis for its final determination on injury during the course of an investigation, when the express wording of Article 12.2 only imposes such a specific obligation on investigating authorities at the end of the investigation."[440]

337. In *Egypt – Steel Rebar*, the Panel emphasized that "the language of the provision at issue creates an obligation on the [investigating authorities] to *provide opportunities* for interested parties to defend their interests." The Panel further considered that the "[f]ailure by respondents to take the initiative to defend their own interests in an investigation cannot be equated, through WTO dispute settlement, with failure by an investigating authority to provide opportunities for interested parties to defend their interests".[441]

(b) Relationship with other paragraphs of Article 6

338. In *Guatemala – Cement II*, the Panel examined Mexico's argument that Guatemala's authority was in violation of Articles 6.1, 6.2 and 6.4 by failing to allow the Mexican producer "proper access" to the information submitted by the Guatemalan domestic producer at the public hearing it held. Noting that it had found a violation of Articles 6.1.2 and 6.4 on the same factual foundation, the Panel considered it unnecessary to examine the claim of a violation of Articles 6.1 and 6.2 because these provisions, in the view of the Panel, did not specifically address the issue. See paragraph 312 above.

339. The Panel on *Guatemala – Cement II* addressed Mexico's claims of violations of Articles 6.1, 6.2, 6.4, 6.5, 6.5.1 and 6.5.2, all of which were based on the same factual foundation. See paragraph 360 below.

340. In *Guatemala – Cement II*, Mexico claimed that Guatemala's investigating authority violated Articles 6.1, 6.2, 6.8 and Annex II(5) and (6) of the *Anti-*

---

[438] (*footnote original*) We do not consider that the obligation in the first sentence of Article 6.2 is qualified by the second sentence of that provision. Thus, we do not consider that the obligation in the first sentence of Article 6.2 is concerned exclusively with "providing opportunities for all interested parties to meet those parties with adverse interests. . .". Although the words "[t]o this end" at the beginning of the second sentence suggest that such meetings are one way in which the obligation of the first sentence can be fulfilled, it does not follow that such meetings provide the only means by which the obligation of the first sentence may be fulfilled. If that were the case, there would be no need for the first sentence of Article 6.2.

[439] Panel Report on *Guatemala – Cement II*, para. 8.179. See also para. 311 of this Chapter with respect to the same issue in the context of Article 6.1.

[440] Panel Report on *Guatemala – Cement II*, para. 8.238. In regard to the Panel's finding regarding the claims under Articles 6.1 and 6.9, see the excerpts referenced in paras. 314 and 432 of this Chapter. See also Panel Report on *Egypt – Steel Rebar*, paras. 7.77–7.96.

[441] Panel Report on *Egypt – Steel Rebar*, para. 7.88.

Dumping Agreement by rejecting certain technical accounting evidence submitted by a Mexican producer one day before the public hearing held by Guatemala's authority. The Panel considered it unnecessary to address this claim, on the grounds that the claim was dependent on the issue of whether the cancellation by the authority of its verification visit to the Mexican producer was inconsistent with Article 6.8, and the Panel had found the cancellation in violation of Article 6.8.[442]

341. The Panel on *Guatemala – Cement II* touched on the relationship between the obligations under Article 6.2 and other provisions. See paragraph 343 below. The Panel went on to find it unnecessary to examine Article 6.2 claims because it had already found violations of Article 6.1.2, 6.1.3, 6.4 and 6.5.1 on the same set of facts.[443]

342. In *Guatemala – Cement II*, having found that Guatemala's failure to disclose the "essential facts" forming the basis of its final determination was in violation of Article 6.9, as referenced in paragraphs 429, 430 and 432 below, the Panel considered it unnecessary to examine whether it was also inconsistent with Articles 6.1 and 6.2.[444]

(c) Relationship with other provisions of the Anti-Dumping Agreement

343. Addressing Mexico's claim that Guatemala's authority had violated Article 6.2, the Panel on *Guatemala – Cement II* decided to exercise judicial economy because it had already made findings concerning the conduct allegedly violating Article 6.2 under other, more specific provisions of the *Anti-Dumping Agreement*:

> "Whereas this provision clearly imposes a general duty on investigating authorities to ensure that interested parties have a full opportunity throughout an anti-dumping investigation for the defence of their interests, it provides no specific guidance as to what steps investigating authorities must take in practice. By contrast, other more specific provisions apply to the facts at hand, in respect of which Mexico has also made claims. Although there may be cases in which a panel will nevertheless need to address claims under Article 6.2, we do not consider it necessary for us to do when we have already made findings concerning the conduct allegedly violating Article 6.2 under other, more specific provisions of the AD Agreement.[445]"[446]

3. Article 6.4

(a) "shall . . . provide timely opportunities for all interested parties to see all information"

344. In *Guatemala – Cement II*, Mexico claimed that Guatemala's authority violated Articles 6.1.2, 6.2 and 6.4 by: (a) refusing the Mexican producer access to the file on a certain date during the investigation; and (b) failing to promptly provide the producer with a copy of a submission made by the applicant for the investigation. Mexico also claimed that Guatemala's investigating authority violated Article 6.4 by: (a) failing to provide the Mexican producer with copies of the file; and (b) failing to provide the producer with a full record of a public hearing held by the authority. In examining these claims, the Panel explained the scope and precise meaning of the relevant provisions. See paragraph 321 above.

345. In *Guatemala – Cement II*, in response to Mexico's claim that in violation of Article 6.4, Guatemala's authority did not provide copies of the file to the Mexican producer, Guatemala argued that it was justified in doing so because the producer had not paid the required fee. The Panel found a violation of Article 6.4 because the Mexican producer had offered to pay for the copies it requested. In so doing, the Panel noted that "[t]here are various ways in which an investigating authority could satisfy the Article 6.4 obligation to provide 'whenever practicable . . . timely opportunities for all interested parties to see all information that is relevant to the presentation of their cases . . .'"[447]

346. In *Guatemala – Cement II*, Mexico's argued that Guatemala's authority had acted inconsistently with Article 6.4 by not providing the Mexican producer with a complete copy of the record of its public hearing. The copy of the record of the public hearing which had been transmitted to Mexico was missing two identified individual pages, such that the words at the beginning of one page did not follow on from the phrase at the end of the immediately preceding page. Guatemala argued that even if the copy was incomplete, the Mexican producer could have requested a complete copy as soon as it realized that an omission had occurred. The Panel did not find a violation of Article 6.4:

---

[442] Panel Report on *Guatemala – Cement II*, para. 8.125.
[443] Panel Report on *Guatemala – Cement II*, para. 8.164.
[444] Panel Report on *Guatemala – Cement II*, para. 8.232.
[445] (*footnote original*) In this regard, we recall that the Appellate Body stated in *EC – Bananas III* that "[a]lthough Article X:3(a) of the GATT 1994 and Article 1.3 of the *Licensing Agreement* both apply, the Panel, in our view, should have applied the *Licensing Agreement* first, since this agreement deals specifically, and in detail, with the administration of import licensing procedures" (Appellate Body Report on *EC – Bananas III*, para. 204). Furthermore, the panel in *US – 1916 Act (EC)* stated that "[i]t is a general principle of international law that, when applying a body of norms to a given factual situation, one should consider that factual situation under the norm which most specifically addresses it" (Panel Report on *US – 1916 Act (EC)*) (footnote deleted).
[446] Panel Report on *Guatemala – Cement II*, para. 8.162.
[447] Panel Report on *Guatemala – Cement II*, para. 8.151.

"Despite the factual accuracy of Mexico's argument, we do not consider that [the Ministry's action] amounts to a violation of Article 6.4 of the AD Agreement, as Mexico has failed to adduce any evidence that the Ministry's failure to provide a full copy of its record of the public hearing was anything other than inadvertent. Although we consider that an interested party is entitled to see a full version of the investigating authority's record of any public hearing, it is not inconceivable that an investigating authority which chooses to provide interested parties with a copy of the record could inadvertantly fail to provide a complete copy. In our view, such an inadvertent omission on the part of an investigating authority does not constitute a violation of Article 6.4. Although a violation could arise if an investigating authority failed to correct its omission after having been informed of that omission by an interested party, there is no evidence that Cruz Azul informed the Ministry of its omission in the present case."

347. Referring to its finding quoted in paragraph 276 above, the Panel emphasized that it was not finding a "harmless error", an argument put forward previously by Guatemala in a different context:

"In order to avoid any uncertainty, we wish to emphasize that we do not consider that the inadvertent nature of the Ministry's omission renders that omission 'harmless', in the sense of being a defence to a violation of Article 6.4 of the AD Agreement . . . . Our position is not that there was a violation of Article 6.4, but that such violation should be disregarded because it was 'harmless'. Rather, our position is that the factual circumstances before us do not amount to a violation. The question of whether or not any violation is 'harmless' therefore does not arise."[448]

(b) "to see all information that is relevant to the presentation of their cases"

348. The Appellate Body on *EC – Tube or Pipe Fittings* stated that the issue of what information is relevant such that it has to be disclosed must be examined from the perspective of *the interested parties*. It thus reversed the Panel's finding in this case that the investigating authority was not obliged to disclose certain information that *the investigating authority* considered not relevant to its conclusions:

"Article 6.4 refers to 'provid[ing] timely opportunities for all interested parties to see all information that is relevant to the presentation of *their* cases'. (emphasis added) The possessive pronoun 'their' clearly refers to the earlier reference in that sentence to 'interested parties'. The investigating authorities are not mentioned in Article 6.4 until later in the sentence, when the provision refers to the additional requirement that the information be 'used by the authorities'. Thus, whether or not the investigating authorities regarded the information in Exhibit EC-12 to be relevant does not determine whether the information would in fact have been 'relevant' for the purposes of Article 6.4."[449]

349. In addition, the Appellate Body on *EC – Tube or Pipe Fittings* was of the view that information relating to the Article 3.4 injury factors was necessarily "relevant" information which is to be disclosed under Article 6.4:

"This conclusion is supported by our reasoning in *US – Hot Rolled Steel*, where we explained that 'Article 3.4 lists certain factors *which are deemed to be relevant in every investigation* and which must always be evaluated by the investigating authorities.'[450] Thus, because Exhibit EC-12 contains information on some of the injury factors listed in Article 3.4, and the injury factors listed in that provision 'are deemed to be relevant in every investigation', Exhibit EC-12 must be considered to contain information that is relevant to the investigation carried out by the European Commission. As such, the information in Exhibit EC-12 was necessarily relevant to the presentation of the interested parties' cases and is, therefore, 'relevant' for purposes of Article 6.4."[451]

350. The Panel on *EC – Tube or Pipe Fittings* distinguished between information already in the possession of an interested party and information that must be available to interested parties within the meaning of Article 6.4:

"We do not view information that is already in the possession of an interested party and that has been submitted by an interested party to an investigating authority in the course of an anti-dumping proceeding as information that an investigating authority must provide opportunities for that same interested parties to see within the meaning of Article 6.4. This provision relates to information that would not initially be in the possession of an interested party and would therefore be unknown or unfamiliar to an interested party if it were not disclosed to that party in the course of an investigation."[452]

(c) Relationship with other paragraphs of Article 6

351. The Panel on *Guatemala – Cement II* addressed Mexico's claims of violations of Articles 6.1, 6.2, 6.4, 6.5, 6.5.1 and 6.5.2, all of which were based on the same factual foundation. See paragraph 360 below.

352. In *Guatemala – Cement II*, the Panel examined Mexico's argument that Guatemala's authority was in violation of Articles 6.1, 6.2 and 6.4 by failing to allow

[448] Panel Report on *Guatemala – Cement II*, para. 8.158.

[451] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 146.
[452] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.208.

the Mexican producer "proper access" to the information submitted by the Guatemalan domestic producer at the public hearing it held. Noting that it had found a violation of Articles 6.1.2 and 6.4 on the same factual foundation, the Panel considered it unnecessary to examine the claim of a violation of Articles 6.1 and 6.2 because these provisions do not specifically address the issue. See paragraph 312 above.

353. In *Guatemala – Cement II*, the Panel addressed Mexico's claim that Guatemala's delay in making a submission of the applicant available to the Mexican producer was inconsistent with Articles 6.1.2 and 6.4. After having found a violation of Article 6.1.2, the Panel considered it unnecessary to examine whether the subject facts also constituted a violation of Article 6.4.[453]

354. In *Guatemala – Cement II*, the Panel also considered it unnecessary to examine Article 6.2 claims because it had already found violations of Article 6.1.2, 6.1.3, 6.4 and 6.5.1 on the same sets of facts. See paragraph 341 above.

355. The Panel on *Guatemala – Cement II* touched on the relationship between the obligations under Articles 6.4 and 6.9. See paragraph 430 below.

356. The Appellate Body on *EC – Tube or Pipe Fittings* expressed the view that a finding of violation in that case under Article 6.4 would necessarily entail a violation of Article 6.2.[454]

4. Article 6.5

(a) Showing of "good cause" for confidential treatment

357. In *Guatemala – Cement II*, the Panel examined the claim that Guatemala's authority violated Articles 6.5, 6.5.1 and 6.5.2 by granting a submission from the domestic producer confidential treatment on its own initiative, i.e. without "good cause" having been shown by the producer. The Panel upheld this claim, stating:

> "The text of Article 6.5 distinguishes between two types of confidential information: (1) 'information which is by nature confidential', and (2) information 'which is provided on a confidential basis'. Article 6.5 then provides that the provision of confidential treatment is conditional on 'good cause' being shown. Logically, one might expect that 'good cause' for confidential treatment of information which is 'by nature confidential' could be presumed, and that 'good cause' need only be shown for information which is not 'by nature confidential' (but for which confidential treatment is nonetheless sought). It is presumably for this reason that, in rejecting Mexico's claim, Guatemala argues that the relevant information was 'clearly of a confidential nature'. While we have some sympathy for Guatemala's argument, given the logical appeal of such an interpretation of Article 6.5, we note that Article 6.5 is not drafted in a way which suggests this approach. Instead, the requirement to show 'good cause' appears to apply for both types of confidential information, such that even information 'which is by nature confidential' cannot be afforded confidential treatment unless 'good cause' has been shown.[455]
>
> In our view, the requisite 'good cause' must be shown by the interested party submitting the confidential information at issue. We do not consider that Article 6.5 envisages 'good cause' being shown by the investigating authority itself, since – with respect to information that is not 'by nature confidential' in particular – the investigating authority may not even know whether or why there is cause to provide confidential treatment."[456]

(b) Article 6.5.1

(i) Purpose of non-confidential summaries

358. In *Argentina – Ceramic Tiles*, the Panel, while examining whether the authorities were allowed to based themselves on confidential information in their determination (see paragraph 416 below), considered that the purpose of the non-confidential summaries is to inform the interested parties so as to enable them to defend their interests:

> "Consistent with our view that authorities may rely on confidential information in making their determination, the purpose of the non-confidential summaries provided for in Article 6.5.1 is to inform the interested parties so as to enable them to defend their interests. We do not consider that the purpose of the non-confidential summaries is to enable the authorities to arrive at public conclusions, as Argentina contends. [footnote omitted] Thus, an authority would not in our view be justified in rejecting the exporters' responses simply because the information in the non-confidential summaries was not sufficient to allow the calculation of normal value, export price, and the margin of dumping."[457]

(ii) Requirement to provide reasons for confidentiality

359. In *Guatemala – Cement II*, Mexico argued that Guatemala's authority violated Article 6.5.2 by failing to require the domestic producer to provide reasons why certain information could not be made public. The Panel agreed with this argument, stating:

---

[453] Panel Report on *Guatemala – Cement II*, para. 8.145.
[454] Appellate Body Report on *EC – Tube or Pipe Fittings*, para. 149.
[455] (*footnote original*) Although we will now consider who must show "good cause", we make no findings as to how "good cause" may be shown in respect of information which is "by nature" confidential.
[456] Panel Report on *Guatemala – Cement II*, paras. 8.219–8.220.
[457] Panel Report on *Argentina – Ceramic Tiles*, para. 6.39.

"Although Article 6.5.1 does not explicitly provide that 'the authorities shall require' interested parties to provide a statement of the reasons why summarization is not possible, any meaningful interpretation of Article 6.5.1 must impose such an obligation on the investigating authorities. It is certainly not possible to conclude that the obligation concerning the need to provide a statement of reasons is an obligation imposed exclusively on the interested party submitting the information, and not the investigating authority, since the AD Agreement is not addressed at interested parties. The AD Agreement imposes obligations on WTO Members and their investigating authorities. Accordingly, in our view Article 6.5.1 imposes an obligation on investigating authorities to require parties that indicate that information is not susceptible of summary to provide a statement of the reasons why summarization is not possible. . . . In making this finding, we attach no importance whatsoever to Guatemala's assertions concerning the alleged treatment of similar information by other WTO Members. Whether or not other WTO Members act in conformity with Article 6.5.1 is of no relevance to the present dispute, which concerns the issue of whether or not the Ministry acted in conformity with that provision."[458]

360. The Panel then considered it unnecessary to address Mexico's claim under Articles 6.1, 6.2, 6.4, 6.5 and 6.5.2 on the same factual ground, because "the need for a statement of the reasons why the information is not susceptible of summary is specifically addressed by Article 6.5.1."[459]

(c) Article 6.5.2

361. In *Guatemala – Cement II*, the Panel rejected Mexico's claim that Guatemala's authority had violated Article 6.5.2 by agreeing to provide confidential treatment for certain information submitted during the verification visit at the domestic producer's premises. Mexico's claim of violation was based on the domestic producer's alleged failure to justify its request for confidential treatment. The Panel held:

"Article 6.5.2 does not require any justification to be provided by the interested party requesting confidential treatment. If any such obligation exists, it derives from Article 6.5, not 6.5.2. Mexico has not based this claim on Article 6.5. Article 6.5.2 speaks only to events when 'the authorities find that a request for confidentiality is not warranted'."[460]

(d) Relationship with other paragraphs of Article 6

362. The Panel on *Guatemala – Cement II* addressed Mexico's claims of violations of Articles 6.1, 6.2, 6.4, 6.5, 6.5.1 and 6.5.2, all of which were based on the same factual foundation. See paragraph 360 above.

363. In *Guatemala – Cement II*, the Panel considered it unnecessary to examine Article 6.2 claims because it had already found violations of Article 6.1.2, 6.1.3, 6.4 and 6.5.1 on the same sets of facts. See paragraph 341 above.

364. The Panel, in *Argentina – Ceramic Tiles*, referred to Articles 6.5 and 6.5.1 of the *Anti-Dumping Agreement* as support of its conclusion that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information. See paragraph 416 below.

5. Article 6.6

(a) "satisfy themselves as to the accuracy of the information"

365. In support of its opinion that the text of Article 6.6 does not explicitly require verification of all information relied upon, the Panel on *US – DRAMS* stated:

"Article 6.6 simply requires Members to 'satisfy themselves as to the accuracy of the information'. In our view, Members could 'satisfy themselves as to the accuracy of the information' in a number of ways without proceeding to some type of formal verification, including for example reliance on the reputation of the original source of the information. Indeed, we consider that anti-dumping investigations would become totally unmanageable if investigating authorities were required to actually verify the accuracy of all information relied on.[461]"[462]

366. In *Guatemala – Cement II*, addressing Mexico's claim under Article 6.6, the Panel explained the nature of the obligation under this Article:

"In our view, it is important to distinguish between the accuracy of information, and the substantive relevance of such information. Once an investigating authority has determined what information is of substantive relevance to its investigation, Article 6.6 requires the investigating authority to satisfy itself (except when 'best information available' is used) that the substantively relevant information is accurate. Thus, Article 6.6 applies once an initial determination has been made that the information is of substantive relevance to the investigation. Article 6.6 provides no guidance in respect of the initial determination of whether information is, or is not, of substantive relevance to the investigation."[463]

---

[458] Panel Report on *Guatemala – Cement II*, para. 8.213.
[459] Panel Report on *Guatemala – Cement II*, para. 6.215.
[460] Panel Report on *Guatemala – Cement II*, para. 8.209.
[461] (*footnote original*) For example, we query whether investigating authorities should be required to verify import statistics from a different government office. We also query whether investigating authorities should be required to verify "official" exchange rates obtained from a central bank.
[462] Panel Report on *US – DRAMS*, para. 6.78.
[463] Panel Report on *Guatemala – Cement II*, para. 8.172.

(b) Burden on the investigating authorities

367. In *Argentina – Ceramic Tiles*, the Panel confirmed that "the burden of satisfying oneself of the accuracy of the information" is "on the investigating authority":

> "Article 6.6 of the AD Agreement thus places the burden of satisfying oneself of the accuracy of the information on the investigating authority. As a general rule, the exporters are therefore entitled to assume that unless otherwise indicated they are not required to also automatically and in all cases submit evidence to demonstrate the accuracy of the information they are supplying. . . .[464] We believe that if no on-the-spot verification is going to take place but certain documents are required for verification purposes, the authorities should in a similar manner inform the exporters of the nature of the information for which they require such evidence and of any further documents they require."[465]

6. Article 6.7 and Annex I

(a) Relationship between Article 6.7 and Annex I

368. As regards the relationship between Article 6.7 and Annex I, in *Egypt – Steel Rebar*, the Panel came to the same conclusion as with the relationship between Article 6.8 and Annex II (see paragraph 379 below), i.e. that Annex I is incorporated by reference into Article 6.7:

> "Concerning the relationship of Annex I to Article 6.7, we come to the same conclusion as in respect of Annex II and Article 6.8.[466] In particular, we note Article 6.7's explicit cross-reference to Annex I: '[T]he procedures described in Annex I shall apply to investigations carried out in the territory of other Members'. This language thus establishes that the specific parameters that must be respected in carrying out foreign verifications in compliance with Article 6.7 are found in Annex I."[467]

(b) On-the-spot verifications as an option

369. The Panel on *Argentina – Ceramic Tiles*, indicated in a footnote that, although common practice, there is no requirement to carry out on-the-spot verifications:

> "There does not exist a requirement in the Agreement to carry out investigations in the territory of other Members for verification purposes. Article 6.7 of the AD Agreement merely provides for this possibility. While such on-site verification visits are common practice, the Agreement does not say that this is the only way or even the preferred way for an investigating authority to fulfil its obligation under Article 6.6 to satisfy itself as to the accuracy of the information supplied by interested parties on which its findings are based."[468]

370. The Panel on *EC – Tube or Pipe Fittings* rejected the argument that Article 2.4 required the investigating authority to base the adjustment on a visual/physical inspection of the working activities and practices in the packaging area at the company's premises. The Panel stated that it viewed verification as an essentially "documentary" exercise that may be supplemented by an actual on-site visit, which is not mandated by the Agreement. According to the Panel, "[a]n essentially documentary approach to verification – which focuses upon documented support for claims for adjustment – seems to us to be entirely consistent with the nature of an anti-dumping investigation[469]"[470]

(c) Information verifiable on-the-spot

371. In *Guatemala – Cement II*, Mexico argued Guatemala's authority had acted inconsistently with Article 6.7 and paragraph 7 of Annex I by seeking to verify certain information that was not submitted by the Mexican producer subject to the investigation because it pertained to a period of investigation newly added during the course of the investigation. The Panel rejected this argument:

> "Although Annex I(7) provides that the 'main purpose' of the verification visit is to verify information already provided, or to obtain further details in respect of that information, it also provides that an investigating authority may 'prior to the visit . . . advise the firms concerned . . . of any further information which needs to be provided'. Since there would be little point in advising a firm of 'further information . . . to be provided' in advance of the verification visit if the investigating authority were precluded from examining that 'further information' during the visit, we consider that the phrase 'further information . . . to be provided' refers to information to be provided during the course of the verification. Mexico's view that an investigating authority may only verify information submitted prior to the verification visit is not consistent with this interpretation of Annex I(7).

---

[464] (*footnote original*) There does not exist a requirement in the Agreement to carry out investigations in the territory of other Members for verification purposes. Article 6.7 of the AD Agreement merely provides for this possibility. While such on-site verification visits are common practice, the Agreement does not say that this is the only way or even the preferred way for an investigating authority to fulfill its obligation under Article 6.6 to satisfy itself as to the accuracy of the information supplied by interested parties on which its findings are based.

[465] Panel Report on *Argentina – Ceramic Tiles*, para. 6.57.

[466] (*footnote original*) *See* paras. 7.152–7.154.

[467] Panel Report on *Egypt – Steel Rebar*, para. 7.325.

[468] Panel Report on *Argentina – Ceramic Tiles*, footnote 65. See also Panel Report on *Egypt – Steel Rebar*, paras. 7.326–7.327.

[469] (*footnote original*) Article 6.7 of the *Anti-dumping Agreement*, which deals with verification visits, states that "authorities shall make the results of any such investigations available, or shall provide disclosure thereof . . . to the firms to which they pertain and may make such results available to the applicants." This supports our view that the nature of verification exercise is primarily documentary.

[470] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.192

> In response to a question from the Panel, Mexico argues that the phrase 'any further information . . . to be provided' refers to accounting information to be provided by the verified company during verification in order to substantiate the information previously supplied to the investigating authority. We note, however, that the phrase does not read 'any further accounting information . . . to be provided'. The term 'information' is not qualified in any way by the express wording of Annex I(7), and there are no elements in the context which plead for such qualification.
>
> Furthermore, we note that the last phrase of Annex I(7) refers to on-the-spot requests for further details to be provided in light of 'information obtained'. Thus, although it should be 'standard practice' to advise firms of additional information to be provided in advance of the verification visit, this does not preclude an investigating authority from requesting 'further details' during the course of the investigation, 'in light of the information obtained'. In our view, the reference to 'information obtained' cannot mean the information obtained from the exporter in advance of the verification visit, since (consistent with 'standard practice') requests regarding that information should be made prior to the visit, and not during the course of the investigation. Accordingly, the 'information obtained' must refer to information obtained during the course of the verification visit, since it is only information obtained during the course of a verification visit which may prompt a request for further details during the course of the verification visit. The last phrase of Annex I(7) therefore confirms our understanding that an investigating authority may seek new information during the course of the verification visit."[471]

(d) Participation of non-governmental experts in the on-the-spot verification

372. In *Guatemala – Cement II*, Mexico claimed that a verification visit by Guatemala's authority to the Mexican producer's site was inconsistent with Article 6.7 and Annex I(2), (3), (7) and (8) because the authority included non-governmental experts with an alleged conflict of interest in its verification team. The Panel rejected this claim because none of the cited provisions explicitly prohibits such conduct.[472] However, the Panel found that given the participation of non-governmental experts with an alleged conflict of interest in Guatemala's verification team, the investigating authority could not argue that the Mexican producer's refusal to allow the verification meant that the producer was "significantly impeding" the investigation within the meaning of Article 6.8. See also paragraph 410 below.

373. In *Guatemala – Cement II*, the Panel considered that under paragraph 2 of Annex I, a national authority is required to inform the government of exporting Members of its intention to include non-governmental experts in the verification team for visit to foreign producers/exporters.[473] With respect to the burden of proof on this point, referring to a finding of the Panel on *US – Section 301 Trade Act*[474], the Panel stated:

> "In principle, Mexico bears the burden to prove that the Ministry failed to inform it of the inclusion of non-governmental experts in the Ministry's verification team. As a practical matter, this burden is impossible for Mexico to meet: one simply cannot prove that one was not informed of something. Although Mexico cannot establish definitively that it was not informed by the Ministry of the Ministry's intention to include non-governmental experts in its verification team, there is sufficient evidence before us to suggest strongly that it was not so informed. Although an investigating authority should normally be able to demonstrate that it complied with a formal requirement to inform the authorities of another Member, Guatemala has failed to rebut the strong suggestion that it failed to do so. In fact, Guatemala has simply referred to the very letter which suggests strongly that Mexico was *not* notified by Guatemala.[475] In these circumstances, we do not consider that the evidence and arguments of the parties 'remain in equipoise'. Accordingly, we find that the Ministry violated paragraph 2 of Annex I of the AD Agreement by failing to inform the Government of Mexico of the inclusion of non-governmental experts in the Ministry's verification team.[476]"[477]

374. In *Guatemala – Cement II*, the Panel disagreed with Mexico's argument that under paragraph 2 of Annex I, Guatemala's authority should have informed the Government of Mexico not only of the Guatemalan

---

[471] Panel Report on *Guatemala – Cement II*, paras. 8.203–8.205.
[472] Panel Report on *Guatemala – Cement II*, para. 8.189.
[473] Panel Report on *Guatemala – Cement II*, para. 8.193.
[474] Panel Report on *US – Section 301*, para. 7.14.
[475] (*footnote original*) The fact that the Mexican authorities knew of the inclusion of non-governmental experts in the Ministry's verification team (by virtue of Cruz Azul sending SECOFI a copy of the 26 November 1996 letter Cruz Azul had received from the Ministry) is not relevant to Mexico's claim. This is because Annex I(2) requires that the authorities of the exporting Member be "informed" of the inclusion of non-governmental experts. In our view, the obligation to "inform" is clearly on the authorities of the investigating Member. Those authorities cannot rely on exporters informing their own authorities of the inclusion of non-governmental experts in order to establish compliance with Annex I(2).
[476] (*footnote original*) Paragraph 2 of Annex I provides that exporting Members "should" be informed of the inclusion of non-governmental experts in a verification team. It does not provide that exporting Members "shall" be so informed. Although the word "should" is often used colloquially to imply an exhortation, it can also be used "to express a duty [or] obligation" (See The Concise Oxford English Dictionary, Clarendon Press, 1995, page 1283). Since Article 6.7 provides in relevant part that the provisions of Annex I "shall" apply, we see no reason why Annex I (2) should not be interpreted in the mandatory sense. In our view, a hortatory interpretation of the provisions of Annex I would be inconsistent with Article 6.7. Furthermore, Guatemala has not argued that paragraph 2 of Annex I is merely hortatory. Accordingly, we proceed on the basis that paragraph 2 of Annex I should be interpreted in a mandatory sense.
[477] Panel Report on *Guatemala – Cement II*, para. 8.196.

authority's intention to include non-governmental experts in its verification team, but also of the exceptional circumstances justifying the participation of these experts in the investigating team:

> "Whereas paragraph 2 of Annex I requires the exporting Member to be 'so informed', the logical conclusion from the structure of that provision is that the exporting Member need only be informed of the intention to include non-governmental experts in the investigating team. If the intention of the drafters had been to impose an obligation on authorities to inform exporting Members of the 'exceptional circumstances' at issue, presumably the first sentence of Annex I(2) would have been drafted in a manner that clearly provided for that obligation."[478]

7. Article 6.8 and Annex II: "facts available"

(a) General

(i) Function of Article 6.8 and Annex II

375. In *US – Hot-Rolled Steel*, the Panel indicated that "[o]ne of the principle elements governing anti-dumping investigations that emerges from the whole of the AD Agreement is the goal of ensuring objective decision-making based on facts. Article 6.8 and Annex II advance that goal by ensuring that even where the investigating authority is unable to obtain the 'first-best' information as the basis of its decision, it will nonetheless base its decision on facts, albeit perhaps 'second-best' facts."[479]

376. In *Egypt – Steel Rebar*, the Panel stated that Article 6.8 "addresses the dilemma in which investigating authorities might find themselves – they must base their calculations of normal value and export price on some data, but the necessary information may not have been submitted". The Panel indicated that "Article 6.8 identifies the circumstances in which an [investigating authority] may overcome this lack of necessary information by relying on facts which are otherwise available to the investigating authority."[480] The Panel also concluded that it is clear that the provisions of Annex II that address what information can be used as facts available "have to do with ensuring the reliability of the information used by the investigating authority" and referred to the negotiating history of Annex II as confirmation of its conclusions:

> "It is clear that the provisions of Annex II that address what information can be used as facts available (which, along with the other provisions of Annex II, 'shall be observed') have to do with ensuring the reliability of the information used by the investigating authority. This view may further be confirmed, as foreseen in Article 32 of the Vienna Convention on the Law of Treaties[481], by the negotiating history of Annex II. In particular, this Annex was originally developed by the Tokyo Round Committee on Anti-Dumping Practices, which adopted it on 8 May 1984 as a 'Recommendation Concerning Best Information Available in Terms of Article 6:8'.[482] During the Uruguay Round negotiations, the substantive provisions of the original recommendation were incorporated with almost no changes as Annex II to the AD Agreement. A preambular paragraph to the original recommendation, which was not retained when Annex II was created, in our view, provides some insight into the intentions of the drafters concerning its application. This paragraph reads as follows:
>
> > 'The authorities of the importing country have a right and an obligation to make decisions on the basis of the best information available during the investigation from whatever source, even where evidence has been supplied by the interested party. The Anti-Dumping Code recognizes the right of the importing country to base findings on the facts available when any interested party refuses access to or does not provide the necessary information within a reasonable period, or significantly impedes the investigation (Article 6:8). However, all reasonable steps should be taken by the authorities of the importing countries to avoid the use of information from unreliable sources.'
>
> To us, this preambular language conveys that the *full* package of provisions in the recommendation, applicable in implementing Article 6:8 of the Tokyo Round Anti-Dumping Code, was intended, *inter alia,* to ensure that in using facts available (i.e, in applying Article 6:8), information from unreliable sources would be avoided."[483]

(ii) Relationship between Article 6.8 and Annex II

377. In *US – Hot-Rolled Steel*, the Appellate Body ruled that Annex II "is incorporated by reference into Article 6.8".[484]

---

[478] Panel Report on *Guatemala – Cement II*, para. 8.198.
[479] Panel Report on *US – Hot-Rolled Steel*, para. 7.72 and 7.55.
[480] Panel Report on *Egypt – Steel Rebar*, para. 7.146.
[481] (*footnote original*) Art. 32 of the Vienna Convention of the Law of Treaties provides:

> "Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when the interpretation according to article 31:
>
> (a) leaves the meaning ambiguous or obscure; or
>
> (b) leads to a result which is manifestly absurd or unreasonable".

[482] (*footnote original*) ADP/21.
[483] Panel Report on *Egypt – Steel Rebar*, para. 7.154.
[484] Appellate Body Report on *US – Hot-Rolled Steel*, para. 75. The Panel on *Egypt – Steel Rebar* indicated that its "view of the relationship of Annex II to Article 6.8 is consistent with that of the Appellate Body in *United States – Hot-Rolled Steel*. In that case, the Appellate Body stated that Annex II is 'incorporated by reference' into Article 6.8, i.e., that it forms part of Article 6.8." Panel Report on *Egypt – Steel Rebar,* para. 7.153.

378. In *US – Steel Plate*, the Panel explained the relationship between Article 6.8 and Annex II of the *Anti-Dumping Agreement* and concluded that the provisions of Annex II inform the investigating authority's evaluation whether necessary information has been provided and whether resort to facts available with respect to that element of information is justified:

> "In our view, the failure to provide necessary information, that is information which is requested by the investigating authority and which is relevant to the determination to be made,[485] triggers the authority granted by Article 6.8 to make determinations on the basis of facts available. The provisions of Annex II, which set out conditions on the use of facts available, inform the question of whether necessary information has not been provided, by establishing considerations for when information submitted must be used by the investigating authority. Thus, the provisions of Annex II inform an investigating authority's evaluation whether necessary information, in the sense of Article 6.8, has been provided, and whether resort to facts available with respect to that element of information is justified. If, after considering the provisions of Annex II, and in particular the criteria of paragraph 3, the conclusion is that information provided satisfies the conditions therein, the investigating authority must use that information in its determinations, and may not resort to facts available with respect to that element of information. That is, the investigating authority may not conclude, with respect to that information, that 'necessary information' has not been provided."[486]

379. In *Egypt – Steel Rebar*, the Panel considered that the cross-reference in Article 6.8 to Annex II, "[t]he provisions of Annex II shall be observed in the application of this paragraph" indicates that Annex II applies to Article 6.8 in its entirety:

> "[W]e find significant the specific wording of that cross-reference: '[t]he provisions of Annex II *shall* be observed in the application *of this paragraph*' (emphasis added). In other words, the reference to 'this paragraph' indicates that Annex II applies to Article 6.8 in its entirety, and thus contains certain substantive parameters for the application of the individual elements of that article. The phrase 'shall be observed' indicates that these parameters, which address both when facts available can be used, and what information can be used as facts available, must be followed.
>
> Our view of the relationship of Annex II to Article 6.8 is consistent with that of the Appellate Body in *United States – Hot-Rolled Steel*. In that case, the Appellate Body stated that Annex II is 'incorporated by reference' into Article 6.8,[487] i.e., that it forms part of Article 6.8."[488]

(iii) Mandatory nature of Annex II provisions

380. In *US – Steel Plate*, the Panel considered that the wording of Article 6.8 reference to Annex II provisions establishes that the provisions of Annex II are mandatory:

> "We note that there is disagreement between the parties as to whether the provisions of Annex II, which are largely phrased in the conditional tense ('should') are mandatory. We consider that Article 6.8 itself answers this question. Article 6.8. explicitly provides that 'The provisions of Annex II **shall** be observed in the application of this paragraph' (emphasis added). In our view, the use of the word 'shall' in this context establishes that the provisions of Annex II are mandatory. Indeed, this would seem a necessary conclusion. The alternative reading would mean that investigating authorities are required ('shall') to apply provisions which are not themselves required, an interpretation that makes no sense.[489] Moreover, the provisions of Annex II, while worded in the conditional, give specific guidance to investigating authorities regarding certain aspects of their determinations which, without more, clearly establish the operational requirements. Thus, we consider that that the provisions of Annex II are mandatory, not because of the wording of those provisions themselves, but because of the obligation to observe them set out in Article 6.8."[490][491]

(b) Authorities' duty to "specify in detail the information required from an interested party"

(i) "as soon as possible"

381. In *Guatemala – Cement II*, Mexico pointed out that paragraph 1 of Annex II requires "[a]s soon as possible after the initiation of the investigation" that the investigating authorities specify in detail the information

---

[485] (*footnote original*) We are not dealing here with the possibility that the investigating authority might request irrelevant information. Obviously, such information would not be "necessary" in the sense of Article 6.8. However, there is no suggestion in this case that the investigating authority requested information beyond that which was necessary to the determinations it had to make.

[486] Panel Report on *US – Steel Plate*, para. 7.55.

[487] (*footnote original*) Appellate Body Report, *US – Hot-Rolled Steel*, para.75.

[488] Panel Report on *Egypt – Steel Rebar*, paras. 7.152–7.153.

[489] (*footnote original*) We note that the Panel on, *Argentina – Definitive Anti-Dumping Measures on Imports of Ceramic Floor Tiles from Italy* ("*Argentina – Ceramic Tiles*"), WT/DS189/R, adopted 5 November 2001, treated the provisions of Annex II as obligations in its analysis and findings.

[490] (*footnote original*) We note in this regard the Appellate Body's statement that "Article 6.8 requires that the provisions of Annex II of the *Anti-Dumping Agreement* be observed in the use of facts available." Appellate Body Report, *US – Hot-Rolled Steel*, at para 78. The Appellate Body appears to have treated the provisions of Annex II which are phrased in the conditional as mandatory, but did not specifically address the question, which was not raised before it, or indeed before the *Hot-Rolled Steel* Panel.

[491] Panel Report on *US – Steel Plate*, para. 7.56.

required from interested parties. Mexico argued that, in the light of this requirement, investigating authorities are effectively precluded from extending the period of investigation during the course of the investigation. The Panel disagreed with Mexico's argument, agreeing with Guatemala that there may be a number of circumstances in which the investigating authority will need updated information during the course of its investigation:

> "We are not persuaded that paragraph 1 of Annex II, or any other provision of the AD Agreement, prevents an investigating authority from extending the POI during the course of an investigation. We agree with Guatemala that there may be a number of circumstances in which the investigating authority will need updated information during the course of its investigation. In this regard, we would also note that the extension of a POI may in certain cases lead to negative findings of dumping and/or injury, to the benefit of exporters. The fact that the POI may be extended after the imposition of provisional measures is not necessarily problematic, since even without any extension of the POI there is no guarantee that the factual basis for the preliminary determination will be the same as that of the final determination. The factual basis may change, for example, if a preliminary affirmative determination of injury is made on the basis of data provided by the complainant, and if some (or all) of that data are shown to be erroneous during verification of the domestic industry. Indeed, in such cases differences in the factual bases of the preliminary and final determinations would normally be necessary in order to preserve the integrity of the investigation. Although Annex II(1) provides that interested parties should be informed of the information required by the investigating authority 'as soon as possible after the initiation of the investigation', this does not mean that information concerning a particular period of time may only be required if the request for that information is made immediately after initiation. We interpret the first sentence of paragraph 1 of Annex II to mean that any request for specific information should be communicated to interested parties 'as soon as possible'. Since Mexico has not advanced any argument that it was possible for the Ministry to have requested information concerning the extended POI before it actually did so, we reject Mexico's claim that the Ministry's extension of the POI violated Guatemala's obligations under paragraph 1 of Annex II of the AD Agreement."[492]

382. In *Egypt – Steel Rebar*, the Panel indicated that paragraph 1 of Annex II sets forth rules to be followed by the authority, in particular that it must specify the required information "in detail", "as soon as possible after the initiation of the investigation", and that it also must specify "the manner in which that information should be structured by the interested party in its response". Thus, in the Panel's view, "there is a clear burden on the authority to be both prompt and precise in identifying the information that it needs from a given interested party".[493]

383. In *Egypt – Steel Rebar*, the investigating authorities had requested certain supplemental cost information as well as explanations concerning certain of the cost information originally submitted in response to the questionnaires. The Panel found "no basis on which to conclude that an investigating authority is precluded by paragraph 1 of Annex II or by any other provision from seeking additional information during the course of an investigation".[494]

(ii) Failure to specify in detail the information required

384. In *Argentina – Ceramic Tiles*, the Panel, when analysing whether the investigating authorities were entitled to resort to facts available because the alleged failure on a party to provide sufficient supporting documentation, considered that "a basic obligation concerning the evidence-gathering process is for the investigating authorities to indicate to the interested parties the information they require for their determination", as set forth in Article 6.1. The Panel concluded that, "independently of the purpose for which the information or documentation is requested, an investigating authority may not fault an interested party for not providing information it was not clearly requested to submit."[495] The Panel further stated that:

> "In our view, the inclusion, in an Annex relating specifically to the use of best information available under Article 6.8, of a requirement to specify in detail the information required, strongly implies that investigating authorities are *not* entitled to resort to best information available in a situation where a party does not provide certain information if the authorities failed to specify in detail the information which was required.
>
> . . .
>
> . . . we conclude that an investigating authority may not disregard information and resort to facts available under Article 6.8 on the grounds that a party has failed to provide sufficient supporting documentation in respect of information provided unless the investigating authority has clearly requested that the party provide such supporting documentation."[496]

(c) When to resort to facts available

385. In *Argentina – Ceramic Tiles*, the Panel enunciated the conditions under which the investigating authorities may resort to facts available:

---

[492] Panel Report on *Guatemala – Cement II*, para. 8.177.
[493] Panel Report on *Egypt – Steel Rebar*, para. 7.155.
[494] Panel Report on *Egypt – Steel Rebar*, para. 7.320.
[495] Panel Report on *Argentina – Ceramic Tiles*, paras. 6.53–6.54.
[496] Panel Report on *Argentina – Ceramic Tiles*, paras. 6.55 and 6.58.

> "It is clear to us, and both parties agree, that an investigating authority may disregard the primary source information and resort to the facts available only under the specific conditions of Article 6.8 and Annex II of the AD Agreement. Thus, an investigating authority may resort to the facts available only where a party: (i) refuses access to necessary information; (ii) otherwise fails to provide necessary information within a reasonable period; or (iii) significantly impedes the investigation."[497]

386. In *Egypt – Steel Rebar*, the Panel explained that paragraphs 3 and 5 of Annex II "together . . . provide key elements of the substantive basis" for the investigating authority to determine whether it can resort to facts available.

> "These two paragraphs together thus provide key elements of the substantive basis for an IA to determine whether it can justify rejecting respondents' information and resorting to facts available in respect of some item, or items, of information, or whether instead, it must rely on the information submitted by respondents 'when determinations are made'. Some of the elements referred to in these paragraphs have to do with the inherent quality of the information itself, and some have to do with the nature and quality of the interested party's participation in the IA's information-gathering process. Where all of the mentioned elements are satisfied, resort to facts available is not justified under Article 6.8."[498]

387. In *Egypt – Steel Rebar*, the Panel reiterated that paragraph 3 of Annex II applies to an investigating authority's decision to use "facts available" in respect of certain elements of information and stressed that "it does not have to do with determining which particular facts available will be used for those elements of information once that decision has been made".[499]

(d) When not to resort to facts available

388. In *US – Hot-Rolled Steel*, the Appellate Body concluded that, according to paragraph 3 of Annex II, investigating authorities are directed to use information if three, and, in some circumstances, four, conditions are satisfied. These conditions are that the information is (i) verifiable, (ii) appropriately submitted so that it can be used in the investigation without undue difficulties, (iii) supplied in a timely fashion, and, where applicable, (iv) supplied in a medium or computer language requested by the authorities. The Appellate Body concluded that, in its view, "if these conditions are met, investigating authorities are *not* entitled to reject information submitted, when making a determination".[500]

389. In *US – Steel Plate*, the Panel analysed the extent of the limitation that paragraph 3 of Annex II puts on investigating authorities to reject information submitted and instead resort to facts available. The Panel concluded that the "Members [do not] have an unlimited right to reject all information submitted in a case where some necessary information is not provided":

> "Paragraph 3 states that all information provided that satisfies the criteria set out in that paragraph is to be taken into account when determinations are made. We consider in this regard that the use of the final connector 'and' in the list of criteria makes it clear to us that an investigating authority, when making determinations, is only **required** to take into account information which satisfies all of the applicable criteria of paragraph 3.[501] In order to assess the limitations this provision puts on the right of an investigating authority to reject information submitted and instead resort to facts available,[502] we look to the ordinary meaning of the text, in its context and in light of its object and purpose. Paragraph 3 starts with the phrase 'all information'. 'All' means 'the whole amount, quantity, extent or compass of' and 'the entire number of, the individual constituents of, without exception . . . every'.[503] To 'take into account' is defined as 'take into consideration, notice'.[504] Thus, a straightforward reading of paragraph 3 leads to the understanding that it requires that every element of information submitted which satisfies the criteria set out therein must be considered by the investigating authority when making its determinations. If information must be considered under paragraph 3, an investigating authority may not conclude, with respect to that information, that necessary information has not been provided, in the sense of Article 6.8. Consequently, we do not accept the United States' position that 'information' in Article 6.8 means all information, such that Members have an unlimited right to reject all information submitted in a case where some necessary information is not provided.
>
> Of course, we do not mean to suggest that the investigating authority must, in every case, scrutinize each item

---

[497] Panel Report on *Argentina – Ceramic Tiles*, para. 6.20. See also Panel Report on *US – Steel Plate*, para. 7.55, in para. 378 of this Chapter; Panel Report on *Egypt – Steel Rebar*, para. 7.147.

[498] Panel Report on *Egypt – Steel Rebar*, para. 7.159.

[501] (*footnote original*) The Appellate Body has stated explicitly that:

> "according to paragraph 3 of Annex II, investigating authorities are directed to use information if three, and, in some circumstances, four, conditions are satisfied. In our view, it follows that if these conditions are met, investigating authorities are *not* entitled to reject information submitted, when making a determination."

Appellate Body Report, *US – Hot-Rolled Steel*, at para 81.

[502] (*footnote original*) We note in this context the statement of the Appellate Body that paragraph 3 of Annex II bears on the issue of "when the investigating authorities are entitled to *reject* information submitted by interested parties." Appellate Body Report, *US – Hot-Rolled Steel*, at para 80.

[503] (*footnote original*) New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993.

[504] (*footnote original*) New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993.

of information submitted in order explicitly to determine whether it satisfies the criteria of paragraph 3 of Annex II before it uses it in its determination. Clearly, if the authority is satisfied with the information submitted, and concludes that an interested party has fully complied with the requests for information, there is no need to undertake any separate analysis under paragraph 3 of Annex II. However, to the extent the authority is not satisfied with the information submitted, it must examine those elements of information with which it is **not** satisfied, in light of the criteria of paragraph 3."[505]

390. In *US – Steel Plate*, the Panel further qualified its conclusions by stating that the investigating authorities were not obliged to judge each category of information separately. The Panel however indicated that the various elements, or categories, of information necessary to an anti-dumping determination are often interconnected, and a failure to provide certain information may have ramifications beyond the category into which it falls:

"... we also do not accept India's view that each category of information submitted must be judged separately. India recognizes that there may be cases where a piece of information submitted which otherwise satisfies paragraph 3 is so minor an element of the information necessary to make determinations that it cannot be used in the investigation without undue difficulties, and that it is possible that so much of the information submitted in a particular 'category' fails to satisfy the criteria of paragraph 3, for instance, cannot be verified, that the entire category of information cannot be used without undue difficulty.[footnote omitted]

We consider in addition that the various elements, or categories, of information necessary to an anti-dumping determination are often interconnected, and a failure to provide certain information may have ramifications beyond the category into which it falls. For instance, a failure to provide cost of production information would leave the investigating authority unable to determine whether sales were in the ordinary course of trade, and further unable to calculate a constructed normal value. Thus, a failure to provide cost of production information might justify resort to facts available with respect to elements of the determination beyond just the calculation of cost of production. Moreover, without considering any particular 'categories' of information, it seems clear to us that if certain information is not submitted, and facts available are used instead, this may affect the relative ease or difficulty of using the information that has been submitted and which might, in isolation, satisfy the requirements of paragraph 3 of Annex II. However, to accept that view does not necessarily require the further conclusion, espoused by the United States, that in a case in which any 'essential' element of requested information is not provided in a timely fashion, the investigating authority may disregard all the information submitted and base its determination exclusively on facts available. To conclude otherwise would fly in the face of one of the fundamental goals of the AD Agreement as a whole, that of ensuring that objective determinations are made, based to the extent possible on facts.[506]

... In a case in which some information is rejected and facts available used instead, the ... question may arise whether the fact that some information submitted was rejected has consequences for the remainder of the information submitted. In particular, the investigating authority may need to consider whether the fact that some information is rejected results in other information failing to satisfy the criteria of paragraph 3. In this context, we consider to be critical the question of whether information which itself may satisfy the criteria of paragraph 3 can be used without undue difficulties in light of its relationship to rejected information.[507]"[508]

391. In *US – Steel Plate*, the Panel faced the question of whether a conclusion that some information submitted fails to satisfy the criteria of paragraph 3 of Annex II, and thus may be rejected, can in any case justify a decision to reject other information submitted which, in isolation, satisfies that criteria:

"... The more difficult question, presented in this dispute, is whether a conclusion that some information submitted fails to satisfy the criteria of paragraph 3, and thus may be rejected, can in any case justify a decision to reject other information submitted which, if considered in isolation, would satisfy the criteria of paragraph 3. We consider that the answer to this question is yes, in some cases, but that the result in any given case will depend on the specific facts and circumstances of the investigation at hand."[509]

(e) Information which is "verifiable"

(i) General

392. In *Guatemala – Cement II*, the Panel indicated that recourse to "best information available" should not be had when information is "verifiable", and when "it can be used in the investigation without undue difficulties":

"Furthermore, Annex II(3) provides that all information which is 'verifiable', and 'appropriately submitted so that it can be used in the investigation without undue difficulties', should be taken into account by the investigating authority when determinations are made. In other words, 'best information available' should not be used when information is 'verifiable', and when 'it can be used in the investigation without undue difficulties'. In

[505] Panel Report on *US – Steel Plate*, paras. 7.57–7.58.
[506] The Panel refers to the Panel Report on *US – Hot-Rolled Steel*, para. 7.55, *see* para. 375 of this Chapter.
[507] (*footnote original*) In addition, as discussed below, the explanation of such findings is vital.
[508] Panel Report on *US – Steel Plate*, paras. 7.59–7.61.
[509] Panel Report on *US – Steel Plate*, para. 7.62.

our view, the information submitted by Cruz Azul was 'verifiable'. The fact that it was not actually verified as a result of the Ministry's response to reasonable concerns raised by Cruz Azul does not change this. In addition, there is nothing in the Ministry's final determination to suggest that the information submitted by Cruz Azul could not be used in the investigation 'without undue difficulties'. Since the information was 'verifiable', and since the Ministry did not demonstrate that it could not be used 'without undue difficulties', Annex II(3) provides strong contextual support for the above conclusion that the Ministry violated Article 6.8 in using the 'best information available' as a result of the cancelled verification visit."

(ii) When is information verifiable?

393. In *US – Steel Plate*, the Panel considered that the information is "verifiable" when "the accuracy and reliability of the information can be assessed by an objective process of examination" and that this process does not require an on-the-spot verification. In a footnote to its report, the Panel stated:

"While the parties have addressed this concept in terms of the 'on the spot' verification process provided for in Article 6.7 and Annex I of the Agreement, we note that such verification is not in fact required by the AD Agreement. Thus, the use of the term in paragraph 3 of Annex II is somewhat unclear. However, Article 6.6 establishes a general requirement that, unless they are proceeding under Article 6.8 by relying on facts available, the authorities shall 'satisfy themselves as to the accuracy supplied by interested parties upon which their findings are based'. 'Verify' is defined as 'ascertain or test the accuracy or correctness of, esp. by examination of by comparison of data etc; check or establish by investigation'. New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993. Thus, even in the absence of on-the-spot verification, the authorities are, in a more general sense of assessing the accuracy of information relied upon, required to base their decisions on information which is 'verified'."[510]

(iii) Relevance of good faith cooperation

394. In *Egypt – Steel Rebar*, the Panel considered that, pursuant to paragraphs 3 and 5 of Annex II, if read together[511], "information that is of a very high quality, although not perfect, must not be considered unverifiable solely because of its minor flaws, so long as the submitter has acted to the best of its ability. That is, so long as the level of good faith cooperation by the interested party is high, slightly imperfect information should not be dismissed as unverifiable."[512]

(f) Information "appropriately submitted so that it can be used in the investigation without undue difficulties"

395. In *US – Steel Plate*, the Panel considered that the question of whether information submitted can be used in the investigation "without undue difficulties" is a highly fact-specific issue. It thus concluded that the investigating authority must explain, as required by paragraph 6 of Annex II, the basis of a conclusion that information which is verifiable and timely submitted cannot be used in the investigation without undue difficulties:

"The second criterion of paragraph 3 requires that the information be 'appropriately submitted so that it can be used in the investigation without undue difficulties.' In our view, 'appropriately' in this context has the sense of 'suitable for, proper, fitting'.[513] That is, the information is suitable for the use of the investigating authority in terms of its form, is submitted to the correct authorities, etc. More difficult is the requirement that the information can be 'used without undue difficulties'. 'Undue' is defined as 'going beyond what is warranted or natural, excessive, disproportionate'.[514] Thus, 'undue difficulties' are difficulties beyond what is otherwise the norm in an anti-dumping investigation. This recognizes that difficulties in using the information submitted in an anti-dumping investigation are not, in fact, unusual. This conclusion is hardly surprising, given that enterprises that become interested parties in an anti-dumping investigation and are asked to provide information are not likely to maintain their internal books and records in exactly the format and with precisely the items of information that are eventually requested in the course of an anti-dumping investigation. Thus, it is frequently necessary for parties submitting information to collect and organize raw data in a form that responds to the information request of the investigating authorities. Similarly, it is frequently necessary for the investigating authority to make adjustments of its own in order to be able to take into account information that does not fully comply with its request. This is part of the obligation on both sides to cooperate, recognized by the Appellate Body in the *US – Hot-Rolled Steel* case.[515]

. . .

[510] Panel Report on *US – Steel Plate*, footnote 67. See also paras. 369–374 of this Chapter about on-the-spot verifications.
[511] See para. 386 of this Chapter.
[512] (*footnote original*) We note that there is an interplay between the concepts of acting to the best of one's ability in Annex II, paragraph 5, and "refusing access to" necessary information or "significantly impeding" an investigation in Article 6.8. That is, the behaviour of the interested party is relevant to the right to use facts available in a given situation.
[513] (*footnote original*) New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993.
[514] (*footnote original*) New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993.
[515] *See* para. 411 of this Chapter.

> In our view, it is not possible to determine in the abstract what 'undue difficulties' might attach to an effort to use information submitted. We consider the question of whether information submitted can be used in the investigation 'without undue difficulties' is a highly fact-specific issue. Thus, we consider that it is imperative that the investigating authority explain, as required by paragraph 6 of Annex II, the basis of a conclusion that information which is verifiable and timely submitted cannot be used in the investigation without undue difficulties."[516]

396. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that "the reference to the terms 'appropriately submitted' is designed to cover *inter alia* information which is submitted in accordance with relevant procedural provisions of WTO Members' domestic laws"[517]:

> "In our view, paragraph 3 of Annex II to the *AD Agreement* can be interpreted to mean that information not 'appropriately submitted' in accordance with relevant procedural provisions of WTO Members' domestic laws may be disregarded. In the circumstances of this case, we consider that information submitted by Catarinense was not 'appropriately submitted' within the meaning of paragraph 3 of Annex II to the *AD Agreement* because Catarinense had not complied with Argentina's accreditation requirements. Accordingly, the DCD was entitled to reject that information."[518]

(g) Necessary information submitted in a timely fashion

(i) Timeliness

397. The Appellate Body in *US – Hot-Rolled Steel* concluded that paragraph 3 of Annex II directs investigating authorities not to resort to reject information submitted by the parties if this is submitted "in a timely fashion" and interpreted this as a reference to a "reasonable period" of Article 6.8 or a "reasonable time" of paragraph 1 of Annex II (see paragraphs 401–403 below). The Appellate Body also refers to Article 6.1.1, second sentence which requires investigating authorities to extend deadlines "upon cause shown", if "practicable":

> ". . . according to paragraph 3 of Annex II, investigating authorities are directed to use information if three, and, in some circumstances, four, conditions are satisfied. In our view, it follows that if these conditions are met, investigating authorities are *not* entitled to reject information submitted, when making a determination. One of these conditions is that information must be submitted 'in a *timely* fashion'.
>
> The text of paragraph 3 of Annex II of the *Anti-Dumping Agreement* is silent as to the appropriate measure of 'timeliness' under that provision. In our view, 'timeliness' under paragraph 3 of Annex II must be read in light of the collective requirements, in Articles 6.1.1 and 6.8, and in Annex II, relating to the submission of information by interested parties. Taken together, these provisions establish a coherent framework for the treatment, by investigating authorities, of information submitted by interested parties. Article 6.1.1 establishes that investigating authorities may fix time-limits for responses to questionnaires, but indicates that, 'upon cause shown', and if 'practicable', these time-limits are to be extended. Article 6.8 and paragraph 1 of Annex II provide that investigating authorities may use facts available only if information is not submitted within a reasonable period of time, which, in turn, indicates that information which *is* submitted in a reasonable period of time should be used by the investigating authorities.
>
> That being so, we consider that, under paragraph 3 of Annex II, investigating authorities should not be entitled to reject information as untimely if the information is submitted within a reasonable period of time. In other words, we see, 'in a timely fashion', in paragraph 3 of Annex II as a reference to a 'reasonable period' or a 'reasonable time'. This reading of 'timely' contributes to, and becomes part of, the coherent framework for fact-finding by investigating authorities. Investigating authorities *may* reject information under paragraph 3 of Annex II only in the same circumstances in which they are entitled to overcome the lack of this information through recourse to facts available, under Article 6.8 and paragraph 1 of Annex II of the *Anti-Dumping Agreement*. The coherence of this framework is also secured through the second sentence of Article 6.1.1, which requires investigating authorities to extend deadlines 'upon cause shown', if 'practicable'. In short, if the investigating authorities determine that information was submitted within a reasonable period of time, Article 6.1.1 calls for the extension of the time-limits for the submission of information."[519]

(ii) "necessary information"

398. In *Egypt – Steel Rebar*, the Panel examined the concept of "necessary information" in the sense of Article 6.8 and stressed that "Article 6.8 refers to 'necessary' information, and not to 'required' or 'requested' information". Since Article 6.8 itself does not define the concept of "necessary" information, the Panel considered whether there is guidance on this point anywhere else in the *Anti-Dumping Agreement*, in particular in Annex II, given Article 6.8's explicit cross-reference to it.[520] The Panel concluded that, subject to the requirements of Annex II, paragraph 1, it is left to the discretion of the

---

[516] Panel Report on *US – Steel Plate*, paras. 7.72 and 7.74.
[517] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.191.
[518] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.191.
[519] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 81–83. See also Panel Report on *US – Steel Plate*, para. 7.76; Panel Report on *Egypt – Steel Rebar*, para. 7.153.
[520] Panel Report on *Egypt – Steel Rebar*, paras. 7.150–7.151.

investigating authority to specify what information is "necessary" in the sense of Article 6.8:

> "On the question of the 'necessary' information, reading Article 6.8 in conjunction with Annex II, paragraph 1, it is apparent that it is left to the discretion of an investigating authority, in the first instance, to determine what information it deems necessary for the conduct of its investigation (for calculations, analysis, etc.), as the authority is charged by paragraph 1 to 'specify . . . the information required from any interested party'. This paragraph also sets forth rules to be followed by the authority, in particular that it must specify the required information 'in detail', 'as soon as possible after the initiation of the investigation', and that it also must specify 'the manner in which that information should be structured by the interested party in its response'. Thus, there is a clear burden on the authority to be both prompt and precise in identifying the information that it needs from a given interested party . . ."[521]

399. In *Egypt – Steel Rebar*, Turkey had claimed that because the basis for initially questioning and then rejecting Turkish respondents' costs was unfounded, resort to facts available by the investigating authorities was unjustified under Article 6.8 of the Agreement. Egypt argued that its investigating authority was not in a position to make this determination because the required information to enable it to make the determination was not submitted by the respondents in their responses to the initial questionnaire. The Panel considered that, "[o]n its face, this justification for seeking the detailed cost information appears plausible to us, given, as noted, that a below-cost test is explicitly provided for in Articles 2.2 and 2.2.1 of the AD Agreement". The Panel thus concluded that "the requested information would seem to be 'necessary' in the sense of Article 6.8".[522]

(iii) Information submitted after a deadline

400. In *US – Hot-Rolled Steel*, the United States authorities had rejected certain information provided by two Japanese companies which was submitted beyond the deadlines for responses to the questionnaires and thus applied "facts available" in the calculation of the dumping margins. The United States interpreted Article 6.8 as permitting investigating authorities to rely upon reasonable, pre-established deadlines for the submission of data and that this is supported by Article 6.1.1. The Appellate Body, although it upheld the Panel's finding that the United States had infringed Article 6.8 by rejecting that information and applying best facts available, did so following a different line of reasoning.[523] As regards the Appellate Body's interpretation of Article 6.1.1 in this context, see paragraph 317 above. The Appellate Body considered that deadlines are indeed relevant in determining whether information had been submitted within a reasonable period of time but that a balance needs to be made between the rights of the investigating authorities to control and expedite the investigation and the legitimate interest of the parties to submit information and to have it taken into account:

> "In determining whether information is submitted within a reasonable period of time, it is proper for investigating authorities to attach importance to the time-limit fixed for questionnaire responses, and to the need to ensure the conduct of the investigation in an orderly fashion. Article 6.8 and paragraph 1 of Annex II are not a license for interested parties simply to disregard the time-limits fixed by investigating authorities.[524] Instead, Articles 6.1.1 and 6.8, and Annex II of the *Anti-Dumping Agreement*, must be read together as striking and requiring a balance between the rights of the investigating authorities to control and expedite the investigating process, and the legitimate interests of the parties to submit information and to have that information taken into account."[525]

(iv) "within reasonable period" and "within reasonable time"

401. In *US – Hot-Rolled Steel*, the Appellate Body looked into the issue of when investigating authorities are entitled to reject information submitted by the parties after a deadline established by the investigating authorities, and instead resort to facts available, as the United States did in this case. The Appellate Body considered that when information is provided "within a reasonable period of time" as mandated by Article 6.8, the investigating authorities cannot resort to best facts available:

---

[521] Panel Report on *Egypt – Steel Rebar*, para. 7.155.

[522] Panel Report on *Egypt – Steel Rebar*, para. 7.217.

[523] Appellate Body Report on *US – Hot-Rolled Steel*, para. 90. The Appellate Body found that the United States authorities had "acted inconsistently with Article 6.8 of the *Anti-Dumping Agreement* through its failure to consider whether, in the light of all the facts and circumstances, the weight conversion factors submitted by [the Japanese exporters] were submitted within a reasonable period of time." It however pointed out that "[i]n reaching this conclusion, we are *not* finding that[United States authorities] *could not*, consistently with the *Anti-Dumping Agreement*, have rejected the weight conversion factors submitted by [the Japanese exporters]. Rather, we conclude simply that, under Article 6.8, [United States authorities were] not entitled to reject this information *for the sole reason* that it was submitted beyond the deadlines for responses to the questionnaires." Para. 89.

[524] (*footnote original*) Indeed, as we have already noted, *supra*, para. 73, Article 6.14 of the *Anti-Dumping Agreement* provides that:

> The procedures set out above are not intended to prevent the authorities of a Member from proceeding expeditiously with regard to initiating an investigation, reaching preliminary or final determinations, whether affirmative or negative, or from applying provisional or final measures, in accordance with relevant provisions of this Agreement.

[525] Appellate Body Report on *US – Hot-Rolled Steel*, para. 86.

"Article 6.8 identifies the circumstances in which investigating authorities may overcome a lack of information, in the responses of the interested parties, by using 'facts' which are otherwise 'available' to the investigating authorities. According to Article 6.8, where the interested parties do not 'significantly impede' the investigation, recourse may be had to facts available only if an interested party fails to submit necessary information 'within a reasonable period'. Thus, if information is, in fact, supplied 'within a reasonable period', the investigating authorities *cannot* use facts available, but must use the information submitted by the interested party."[526]

402. The Appellate Body in *US – Hot-Rolled Steel* also drew from paragraph 1 of Annex II to support its conclusion that investigating authorities may resort to facts available only "if information is not supplied within a reasonable time":

"Although [. . .] paragraph [1 of Annex II] is specifically concerned with ensuring that respondents receive proper notice of the rights of the investigating authorities to use facts available, it underscores that resort may be had to facts available only 'if information is not supplied within a reasonable time'. Like Article 6.8, paragraph 1 of Annex II indicates that determinations may *not* be based on facts available when information is supplied within a 'reasonable time' but should, instead, be based on the information submitted."[527]

403. As regards the meaning of "reasonable period" under Article 6.8 and "reasonable time" under paragraph 1 of Annex II, the Appellate Body in *US – Hot-Rolled Steel* considered that both concepts should be approached on a case-by-case basis "in the light of the specific circumstances of each investigation":

". . . The word 'reasonable' implies a degree of flexibility that involves consideration of all of the circumstances of a particular case. What is 'reasonable' in one set of circumstances may prove to be less than 'reasonable' in different circumstances. This suggests that what constitutes a reasonable period or a reasonable time, under Article 6.8 and Annex II of the *Anti-Dumping Agreement*, should be defined on a case-by-case basis, in the light of the specific circumstances of each investigation.

In sum, a 'reasonable period' must be interpreted consistently with the notions of flexibility and balance that are inherent in the concept of 'reasonableness', and in a manner that allows for account to be taken of the particular circumstances of each case. In considering whether information is submitted within a reasonable period of time, investigating authorities should consider, in the context of a particular case, factors such as: (i) the nature and quantity of the information submitted; (ii) the difficulties encountered by an investigated exporter in obtaining the information; (iii) the verifiability of the information and the ease with which it can be used by the investigating authorities in making their determination; (iv) whether other interested parties are likely to be prejudiced if the information is used; (v) whether acceptance of the information would compromise the ability of the investigating authorities to conduct the investigation expeditiously; and (vi) the numbers of days by which the investigated exporter missed the applicable time-limit."[528]

(h) Information submitted in the medium or computer language requested

404. In *US – Steel Plate*, the Panel refer to this fourth criterion of paragraph 3 of Annex II but it did not consider it further because it seemed to it to be straightforward and it was not in dispute in this case.[529]

(i) Non-cooperation: "refuse access to" or "otherwise fail to provide"

(i) Meaning of cooperation

405. In *US – Hot-Rolled Steel*, the United States authorities had resorted to "adverse"[530] facts available to calculate the dumping margins of an exporter as a punishment for not having cooperated by failing to provide certain data as requested. The Appellate Body, which upheld the Panel's finding to the effect that the authorities' conclusion that the exporter failed to "cooperate" in the investigation "did not rest on a permissible interpretation of that word"[531], looked into the meaning of cooperation under paragraph 7 of Annex II. The Appellate Body considered that cooperation is a process which is "in itself not determinative of the end result of the cooperation":

"Paragraph 7 of Annex II indicates that a lack of 'cooperation' by an interested party may, by virtue of the use made of facts available, lead to a result that is 'less favourable' to the interested party than would have been the case had that interested party cooperated. We note that the Panel referred to the following dictionary meaning of 'cooperate': to 'work together for the same purpose or in the same task.'[532] This meaning suggests that cooperation is a *process*, involving joint effort, whereby parties work together towards a common goal. In that respect, we note that parties may very well 'cooperate' to a high degree, even though the requested information is, ultimately, not obtained. This is because the fact of 'cooperating' is in itself not determinative of

[526] Appellate Body Report on *US – Hot-Rolled Steel*, para. 77.
[527] Appellate Body Report on *US – Hot-Rolled Steel*, para. 79.
[528] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 84 – 85.
[529] Panel Report on *US – Steel* Plate, para. 7.77.
[530] See para. 413 of this Chapter.
[531] Panel Report on *US – Hot-Rolled Steel*, para. 8.1(b).
[532] (*footnote original*) *The New Shorter Oxford English Dictionary*, Lesley Brown (ed.) (Clarendon Press, 1993), Vol. I, p. 506; Panel Report, para. 7.73.

the end result of the cooperation. Thus, investigating authorities should not arrive at a 'less favourable' outcome simply because an interested party fails to furnish requested information if, in fact, the interested party has 'cooperated' with the investigating authorities, within the meaning of paragraph 7 of Annex II of the *Anti-Dumping Agreement*."[533]

(ii) Degree of cooperation: "to the best of its ability"

406. The Appellate Body in *US – Hot-Rolled Steel*, when analysing the concept of cooperation under paragraph 7 of Annex II, noted that this provision does not indicate the degree of cooperation which is expected from interested parties to avoid the possibility of the investigating authorities resorting to "less favourable" result. The Appellate Body considered that, on the basis of the wording of paragraph 5 of Annex II, the degree of cooperation required is to cooperate to the "'best' of their abilities". The Appellate Body also draws from paragraph 2 of Annex II to maintain that the principle of good faith commands for a balance to be kept by the investigating authorities between the effort that they can expect interested parties to make in responding to questionnaires, and the practical ability of those interested parties to comply fully with all demands made of them by the investigating authorities:

"Paragraph 7 of Annex II does not indicate what *degree* of 'cooperation' investigating authorities are entitled to expect from an interested party in order to preclude the possibility of such a 'less favourable' outcome. To resolve this question we scrutinize the context found in Annex II. In this regard, we consider it relevant that paragraph 5 of Annex II prohibits investigating authorities from discarding information that is 'not ideal in all respects' if the interested party that supplied the information has, nevertheless, acted 'to the *best* of its ability'. (emphasis added) This provision suggests to us that the level of cooperation required of interested parties is a high one – interested parties must act to the 'best' of their abilities.

We note, however, that paragraph 2 of Annex II authorizes investigating authorities to request responses to questionnaires in a particular medium (for example, computer tape) but, at the same time, states that such a request should not be 'maintained' if complying with that request would impose an '*unreasonable extra burden*' on the interested party, that is, would 'entail *unreasonable additional cost and trouble*'. (emphasis added) This provision requires investigating authorities to strike a balance between the effort that they can expect interested parties to make in responding to questionnaires, and the practical ability of those interested parties to comply fully with all demands made of them by the investigating authorities. We see this provision as another detailed expression of the principle of good faith, which is, at once, a general principle of law and a principle of general international law, that informs the provisions of the *Anti-Dumping Agreement*, as well as the other covered agreements.[534] This organic principle of good faith, in this particular context, restrains investigating authorities from imposing on exporters burdens which, in the circumstances, are not reasonable."[535]

407. In *US – Steel Plate*, India had argued that even if information submitted fails to satisfy the criteria of paragraph 3 of Annex II to some degree, if the party submitting that information acted to the best of its ability, the investigating authority is required under paragraph 5 of Annex II to make "more concerted efforts" to use it. The Panel did not agree with India:

"Paragraph 5 establishes that information provided which is not ideal is not to be disregarded if the party submitting it has acted to the best of its ability. As the Appellate Body found in *US – Hot-Rolled Steel*, the degree of effort demanded of interested parties by this provision is significant.[536] We are somewhat troubled by the implications of India's view of this provision, which might be understood to require that information which fails to satisfy the criteria of paragraph 3, and therefore need not be taken into account when determinations are made, must nonetheless 'not be disregarded' if the party submitting it has acted to the best of its ability. We find it difficult to conclude that an investigating authority must use information which is, for example, not verifiable, or not submitted in a timely fashion, or regardless of the difficulties incumbent upon its use, merely because the party supplying it has acted to the best of its ability. This would seem to undermine the recognition that the investigating authority must be able to complete its investigation and must make determinations based to the extent possible on facts, the accuracy of which has been established to the authority's satisfaction.

However, if we understand paragraph 5 to emphasize the obligation on the investigating authority to cooperate with interested parties, and particularly to actively make efforts to use information submitted if the interested party has acted to the best of its ability, we believe that it does not undo the framework for use of information submitted and resort to facts available set out in the AD Agreement overall. Similarly, paragraph 5 can be understood to highlight that information that satisfies the requirements of paragraph 3, but which is not perfect, must nonetheless not be disregarded."[537]

---

[533] Appellate Body Report on *US – Hot-Rolled Steel*, para. 99.

[534] (*footnote original*) Appellate Body Report, *United States – Import Prohibition of Certain Shrimp Products*, WT/DS58/AB/R, adopted 6 November 1998, para. 158; Appellate Body Report, *United States – Tax Treatment for "Foreign Sales Corporations"*, WT/DS108/AB/R, adopted 20 March 2000, para. 166.

[535] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 100–101.

[536] (*footnote original*) Appellate Body Report, *US – Hot-Rolled Steel*, at para. 102.

[537] Panel Report on *US – Steel Plate*, paras. 7.64–7.65.

408. In *Egypt – Steel Rebar*, the Panel considered that the phrase "acted to the best of its ability" in paragraph 5 of Annex II does not exist in isolation, either from other paragraphs of Annex II or from Article 6.8 itself. The Panel indicated that "this is because an interested party's level of effort to submit certain information does not necessarily have anything to do with the substantive *quality* of the information submitted":

> "[P]aragraph 5 [of Annex II] does not exist in isolation, either from other paragraphs of Annex II, or from Article 6.8 itself. Nor, *a fortiori*, does the phrase 'acted to the best of its ability'. In particular, even if, with the best possible intentions, an interested party has acted to the very best of its ability in seeking to comply with an investigating authority's requests for information, that fact, by itself, would not preclude the investigating authority from resorting to facts available in respect of the requested information. This is because an interested party's level of effort to submit certain information does not necessarily have anything to do with the substantive *quality* of the information submitted, and in any case is not the *only* determinant thereof. We recall that the Appellate Body, in *US – Hot-Rolled Steel*, recognized this principle (although in a slightly different context), stating that 'parties may very well "cooperate" to a high degree, even though the requested information is, ultimately, not obtained. This is because the fact of "cooperating" is in itself not determinative of the end result of the cooperation'.[538]"[539]

409. In *Egypt – Steel Rebar*, the Panel looked at the dictionary meaning of the phrase to the "best" of an interested party's ability:

> "Considering in more detail the concrete meaning of the phrase to the 'best' of an interested party's ability, we note that the *Concise Oxford Dictionary* defines the expression 'to the best of one's ability' as 'to the *highest level* of one's *capacity* to do something' (emphasis added). In similar vein, the *Shorter Oxford Dictionary* defines this phrase as 'to the *furthest extent* of one's *ability*; so far as one can do'. We note that in a legal context, the concept of 'best endeavours', is often juxtaposed with the concept of 'reasonable endeavours' in defining the degree of effort a party is expected to exert. In that context, 'best endeavours' connotes efforts going beyond those that would be considered 'reasonable' in the circumstances. We are of the opinion that the phrase the 'best' of a party's ability in paragraph 5 connotes a similarly high level of effort."[540]

(iii) Justification for non-cooperation

410. In *Guatemala – Cement II*, the Panel examined whether Guatemala's authority had made recourse to the "best information available" in compliance with Article 6.8. In rejecting Guatemala's argument that the Mexican producer concerned significantly impeded the investigation of the authority by failing to cooperate with the authority's verification visit to its premises, the Panel found that the objection of the Mexican producer to the verification visit was reasonable:

> "[W]e do not consider that an objective and impartial investigating authority could properly have found that Cruz Azul significantly impeded its investigation by objecting to the inclusion of non-governmental experts with a conflict of interest in its verification team. We do not consider that a failure to cooperate necessarily constitutes significant impediment of an investigation, since in our view the AD Agreement does not require cooperation by interested parties at any cost. Although there are certain consequences (under Article 6.8) for interested parties if they fail to cooperate with an investigating authority, in our view such consequences only arise if the investigating authority itself has acted in a reasonable, objective and impartial manner. In light of the facts of this case, we find that the Ministry did not act in such a manner."[541]

(iv) Cooperation as a two-way process

411. The Appellate Body in *US – Hot-Rolled Steel* also considered that both paragraphs 2 and 5 of Annex II and Article 6.13 of the *Anti-Dumping Agreement* call for a "balance between the interests of investigating authorities and exporters" and therefore see "cooperation" as "a two-way process involving joint effort":

> "We, therefore, see paragraphs 2 and 5 of Annex II of the *Anti-Dumping Agreement* as reflecting a careful balance between the interests of investigating authorities and exporters. In order to complete their investigations, investigating authorities are entitled to expect a very significant degree of effort – to the 'best of their abilities' – from investigated exporters. At the same time, however, the investigating authorities are not entitled to insist upon *absolute* standards or impose *unreasonable* burdens upon those exporters.
>
> . . .
>
> Article 6.13 thus underscores that 'cooperation' is, indeed, a two-way process involving joint effort. This provision requires investigating authorities to make certain allowances for, or take action to assist, interested parties in supplying information. If the investigating authorities fail to 'take due account' of genuine 'difficulties' experienced by interested parties, and made known to the investigating authorities, they cannot, in our view, fault the interested parties concerned for a lack of cooperation."[542]

[542] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 102 and 104.

(j) Information used in case of resorting to facts available

(i) "secondary source . . . with special circumspection"

412. In *Egypt – Steel Rebar*, Egypt has resorted to facts available in the calculation of the cost of production and constructed value of a Turkish company concerned. In particular, Egypt had added a 5 per cent for inflation to that company reported costs when constructing its normal value. Turkey had claimed that the addition of 5 per cent was arbitrary and, as information from a "secondary source", should have been used with "special circumspection", and in particular, should have been "check[ed] . . . from other independent sources at [the investigating authority's] disposal". The Panel rejected Turkey's claim and emphasized that "applying 'special circumspection' does not mean that only one outcome is possible on a given point in an investigation. Rather, even while using special circumspection, an investigating authority may have a number of equally credible options in respect of a given question. In our view, when no bias or lack of objectivity is identified in respect of the option selected by an investigating authority, the option preferred by the complaining Member cannot be preferred by a panel."[543]

(ii) "Adverse" facts available

413. In *US – Hot-Rolled Steel*, the United States authorities had resorted to "adverse" facts available to calculate the dumping margins of an exporter as a punishment for not having cooperated by failing to provide certain data as requested. In this case, Japan had not contested the possibility of resorting to "adverse" facts available in case of non-cooperation by a party. Its claim was that the Japanese exporter concerned had cooperated and thus the United States authorities should have not declared them non-cooperating parties and thus used "adverse" facts available. The Panel focussed its analysis on whether or not the Japanese exporter had cooperated without entering into an analysis of the compatibility of resorting to "adverse" effects with the *Anti-Dumping Agreement*. The Panel held that the authorities' conclusion that the exporter failed to "cooperate" in the investigation "did not rest on a permissible interpretation of that word".[544] The Appellate Body, which upheld the Panel's finding, indicated in a footnote to its Report, that "the term 'adverse' does not appear in the *Anti-Dumping Agreement* in connection with the use of facts available. Rather, the term appears in the provision of the United States Code that applies to the use of facts available".[545] It however indicated that it would not consider "whether, or to what extent, it is permissible, under the *Anti-Dumping Agreement*, for investigating authorities consciously to choose facts available that are *adverse* to the interests of the party concerned"[546] The Appellate Body stressed that its analysis was circumscribed to using the term "adverse" facts available simply to denote that the authorities had drawn "an inference that was adverse to the interests of the non-cooperating party 'in selecting among the facts otherwise available' ".[547] For its analysis of the term non-cooperation, see paragraphs 405–411 above.

(k) Authorities' duty to inform on reasons for disregarding information

414. In *Argentina – Ceramic Tiles*, the Panel considered that "Article 6.8, read in conjunction with paragraph 6 of Annex II, requires an investigating authority to inform the party supplying information of the reasons why evidence or information is not accepted, to provide an opportunity to provide further explanations within a reasonable period, and to give, in any published determinations, the reasons for the rejection of evidence or information".[548]

415. In *Egypt – Steel Rebar*, the Panel considered that "the fact that an investigating authority may request information in several tranches during an investigation[549] cannot, however, relieve of it of its Annex II, paragraph 6 obligations in respect of the second and later tranches, as that requirement applies to 'information and evidence' without temporal qualification.[550]"[551]

---

[543] Panel Report on *Egypt – Steel Rebar*, para. 7.305.

[544] Panel Report on *US – Hot-Rolled Steel*, para. 8.1(b).

[545] Appellate Body Report on *US – Hot-Rolled Steel*, footnote 45. This footnote further indicates that "[p]ursuant to 19 U.S.C. § 1677e(b), if the investigating authorities find that 'an interested party has failed to cooperate by not acting to the best of its ability to comply with a request for information', then they may, in reaching their determination, 'use an inference that is *adverse* to the interests of that party in selecting from among the facts otherwise available'. (emphasis added) The United States explained to us at the oral hearing that, in practice, an 'adverse inference' is used because it is assumed that the information that a non-cooperative party did not provide would have been adverse to its interests . . ."

[546] Appellate Body Report on *US – Hot-Rolled Steel*, footnote 45.

[547] Appellate Body Report on *US – Hot-Rolled Steel*, footnote 60.

[548] Panel Report on *Argentina – Ceramic Tiles*, para. 6.21.

[549] See paras. 699–700 of this Chapter concerning paragraph 6 of Annex II.

[550] (*footnote original*) We do not mean to imply here that an interested party can impose on an investigating authority an Annex II, paragraph 6 requirement simply by submitting new information *sua sponte* during an investigation. Rather, the role of paragraph 6 of Annex II, namely that it forms part of the basis for an eventual decision pursuant to Article 6.8 whether or not to use facts available, makes it clear that its requirements to inform interested parties that information is being rejected and to give them an opportunity to provide explanations, pertain to "necessary" information in the sense of Article 6.8. As discussed above, "necessary" information is left to the discretion of the investigating authority to specify, subject to certain requirements, notably those in Annex II, paragraph 1.

[551] Panel Report on *Egypt – Steel Rebar*, para. 7.262.

(l) Confidential *versus* non-confidential information

416. In *Argentina – Ceramic Tiles*, Argentina had argued that the failure to provide a non-confidential summary which is sufficiently detailed to permit the calculation of normal value, export price and the margin of dumping amounts to a refusal to provide access to information that is necessary for the authority in the determination of a dumping margin determination. The Panel disagreed with Argentina and supported its position by reference to Article 6.5 of the *Anti-Dumping Agreement* which requires an investigating authority to treat information which is by nature confidential or which is provided on a confidential basis as confidential information and prescribes that such information shall not be disclosed without specific permission of the party submitting it. The Panel considered that it would be contradictory to suggest that the *Anti-Dumping Agreement* creates a mechanism for the protection of confidential information, but precludes investigating authorities from relying on such information in making its determinations. It further concluded that nothing in this Article authorises a Member to disregard confidential information solely on the basis that the non-confidential summary does not permit dumping calculations:

> "In our view, the presence in [Article 6.5] the AD Agreement of a requirement to protect confidential information indicates that investigating authorities might need to rely on such information in making the determinations required under the AD Agreement. The AD Agreement therefore contains a mechanism that allows parties to provide investigating authorities with such information for the purposes of making their determinations, while ensuring that the information is not used for other purposes. In accordance with the accepted principles of treaty interpretation, we are to give meaning to all the terms of the Agreement.[552] It would be contradictory to suggest that the AD Agreement creates a mechanism for the protection of confidential information, but precludes investigating authorities from relying on such information in making its determinations. If that were the case, then there would be no reason for the investigating authority to seek such information in the first place.
>
> . . .
>
> We are aware that, for the purpose of transparency, Article 6.5.1 obliges an authority to require the parties providing confidential information to furnish non-confidential summaries which shall be in sufficient detail to permit a reasonable understanding of the substance of the information submitted in confidence. We consider that this is an important element of the AD Agreement which reflects the balance struck by the Agreement between the need to protect the confidentiality of certain information, on the one hand, and the need to ensure that all parties have a full opportunity to defend their interests, on the other. However, we see nothing in Article 6.5.1, nor elsewhere in Article 6.5, that authorizes a Member to disregard confidential information solely on the basis that the non-confidential summary of that information contains insufficient detail to permit authorities to calculate normal value, export price and the margin of dumping.[553]"[554]

417. The Panel, in *Argentina – Ceramic Tiles*, further referred to Article 12 of the *Anti-Dumping Agreement*, which sets forth requirements regarding the contents of public notices in confirmation of its conclusion above that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information:

> "Thus, the transparency requirement which obligates the authority to explain its determination in a public notice is subject to the need to have regard to the requirement for the protection of confidential information of Article 6.5 of the AD Agreement. Confidentiality of the information submitted therefore limits the manner in which the authority explains its decision and supports its determination in a public notice. In sum, Article 12 implies, to our mind, that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information."[555]

418. The Panel, in *Argentina – Ceramic Tiles*, also found support for its view on the Appellate Body decision in *Thailand – H-Beams*, which addressed the question of the use of confidential information by the investigating authorities as a basis for its final determinations under Article 3 of the *Anti-Dumping Agreement*.

---

[552] (*footnote original*) As the Appellate Body noted in the case of *United States – Standards for reformulated and Conventional Gasoline*, "one of the corollaries of the 'general rule of interpretation' in the *Vienna Convention* is that interpretation must give meaning and effect to all terms of the treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility." Appellate Body Report, *United States – Standards for Reformulated and Conventional Gasoline*, WT/DS2/AB/R, adopted on 20 May 1996, p. 21.

[553] (*original footnote)* We note that Article 6.5.2 of the AD Agreement specifically provides for a situation in which the authorities may disregard confidentially submitted information: in case the authorities consider that a request for confidentiality is not warranted and the supplier of the information is either unwilling to make the information public or to authorize its disclosure in generalized or summary form. We note, however, that the DCD considered the request for confidential treatment was warranted and treated the information as such. Argentina has not invoked Article 6.5.2 as a justification for the DCD's rejection of the exporters' information either.

[554] Panel Report on *Argentina – Ceramic Tiles*, paras. 6.34 and 6.38.

[555] Panel Report on *Argentina – Ceramic Tiles*, para. 6.36.

(m) Scope of Panel's review: national authorities' justification at the time of its determination

419. With respect to the use of "best information available", the Panel on *Guatemala – Cement II* restricted the scope of its examination to the reasoning provided by Guatemala's authority in its determination, citing the finding of the Panel on *Korea – Dairy*.[556] The Panel stated that "[e]ven if the additional factors identified by Guatemala before the Panel could justify the use of 'best information available', such *ex post* justification by Guatemala should not form part of our assessment of the conduct of the Ministry leading up to the imposition of the January 1997 definitive anti-dumping measure."[557] Subject to this limitation, however, the Panel stated that "[a]n impartial and objective investigating authority could not properly rely on 'best information available' sales data for the original [period of investigation], simply on the basis of [the] failure [of the subject Mexican producer] to provide sales data for the extended [period of investigation]."[558]

(n) Consistency of domestic legislation with Article 6.8 and Annex II

420. In *US – Steel Plate*, the Panel was asked to consider the consistency of United States law with Article 6.8 and Annex II of the *Anti-Dumping Agreement*. In reference to the existing jurisprudence on mandatory *versus* discretionary legislation[559], the Panel considered that the question before it was whether the US statutory provision at issue *required* the US authorities to resort to facts available in circumstances other than the circumstances in which Article 6.8 and paragraph 3 of Annex II permit resort to facts available.[560] The Panel found that the "practice" of the US authorities concerning the application of "total facts available" was not a measure which can give rise to an independent claim of violation of the *Anti-Dumping Agreement*.[561]

(o) Relationship with other paragraphs of Article 6

421. In *Guatemala – Cement II*, the Panel addressed Mexico's claim that Guatemala's investigating authority violated Articles 6.1, 6.2, 6.8 and Annex II(5) and (6) of the *Anti-Dumping Agreement* by rejecting certain technical accounting evidence submitted by the Mexican producer one day before the public hearing held by Guatemala's authority. See paragraph 328 above.

422. In *US – Hot-Rolled Steel*, the Appellate Body referred to Article 6.13 as support for its view that paragraphs 2 and 5 of Annex II call for a balance between the interests of investigating authorities and exporters as regards cooperation in anti-dumping investigations. See paragraph 409 above.

423. The Panel on *Argentina – Ceramic Tiles*, when examining whether the investigating authorities were entitled to resort to facts available pursuant to Article 6.8, referred to Article 6.1 to support its conclusion that the investigating authorities could not do so when they did not clearly request the relevant information to the party in question. See paragraphs 308 above and 384 above. The Appellate Body in *US – Hot-Rolled Steel* further analysed the relationship of Article 6.8 and Annex II with Article 6.1.1. See paragraphs 314, 397 and 400 above.

424. The Panel, in *Argentina – Ceramic Tiles*, referred to Article 6.5 of the *Anti-Dumping Agreement* as support of its conclusion above that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information. See paragraph 416 above.

425. In *Egypt – Steel Rebar*, the Panel addressed the relationship of Article 6.2 with Annex II and Article 6.8. See paragraph 704 below.

8. Article 6.9

(a) "shall, before a final determination is made, inform all interested parties of the essential facts under consideration"

(i) Means to inform all interested parties of the essential facts

426. In Argentina – Ceramic Tiles, the Panel, further to noting that Article 6.9 does not prescribe the manner in which the investigating authority is to comply with the disclosure obligation, provided some examples of how investigating authorities may comply with this requirement:

> "We agree with Argentina that the requirement to inform all interested parties of the essential facts under consideration may be complied with in a number of ways. Article 6.9 of the AD Agreement does not pre-

[556] Panel Report on *Korea – Dairy*, para. 7.67.
[557] Panel Report on *Guatemala – Cement II*, para. 8.245.
[558] Panel Report on *Guatemala – Cement II*, para. 8.254.
[559] *See* Section VI.B.3(c)(ii) of the Chapter on the *DSU*. The Panel also indicated that it kept "in mind that it is a well accepted principle of international law that for the purposes of international adjudication national law is to be considered as a fact. Our analysis of the consistency of the US statute with the AD Agreement takes into account, therefore, the principles of statutory interpretation applied by the administering agency and judicial authorities of the United States". Panel Report on *US – Steel Plate*, paras. 7.88–7.90.
[560] Panel Report on *US – Steel Plate*, para. 7.92.
[561] Panel Report on *US – Steel Plate*, para. 8.3.

scribe the manner in which the authority is to comply with this disclosure obligation. The requirement to disclose the 'essential facts under consideration' may well be met, for example, by disclosing a specially prepared document summarizing the essential facts under consideration by the investigating authority or through the inclusion in the record of documents – such as verification reports, a preliminary determination, or correspondence exchanged between the investigating authorities and individual exporters – which actually disclose to the interested parties the essential facts which, being under consideration, are anticipated by the authorities as being those which will form the basis for the decision whether to apply definitive measures. This view is based on our understanding that Article 6.9 anticipates that a final determination will be made and that the authorities have identified and are considering the essential facts on which that decision is to be made. Under Article 6.9, these facts must be disclosed so that parties can defend their interests, for example by commenting on the completeness of the essential facts under consideration."[562]

(ii) "the essential facts . . . which form the basis for the decision whether to apply definitive measures"

427. The Panel on *Argentina – Poultry Anti-Dumping Duties* stated that facts which do not form the basis for the decision whether to apply definitive measures cannot be considered to be "essential facts" within the meaning of Article 6.9 of the *AD Agreement*. The Panel was thus of the view that data which "is not going to be relied on in making a final determination is not a fact which forms the basis for the decision whether to apply definitive measures".[563] In other words, while the Panel accepted that normal value and export price data ultimately used in the final determination are essential facts which form the basis for the decision whether to apply definitive measures, "the fact that certain normal value and export price data is not going to be used is not".[564]

428. The Panel on *Argentina – Poultry Anti-Dumping Duties* further considered that the term "essential facts" refers to "factual information" rather than "reasoning". In the Panel's view, the failure to inform an interested party of the reasons why the authority failed to use certain data does not equate to a failure to inform an interested party of an essential fact:

> "We do not believe that the ordinary meaning of the word 'fact' would support a conclusion that Article 6.9, when using the term 'fact', refers not only to 'facts' in the sense of 'things which are known to have occurred, to exist or to be true', but also to 'motives, causes or justifications'."[565]

(iii) Relevance of the fact that information is made available in the authorities' record

429. In *Guatemala – Cement II*, the Panel considered that, although the information of the essential facts under consideration may be available in the authorities' file, interested parties with access to that file will not know whether a particular information in that file forms the basis of the authorities' determination. In the Panel's view, one purpose of Article 6.9 is to resolve this problem. Accordingly, the Panel rejected Guatemala's argument that interested parties had been informed that a certain directorate would make a technical study on the basis of the evidence in the file, and that copies of the file had been available. The Panel explained:

> "We note that an investigating authority's file is likely to contain vast amounts of information, some of which may not be relied on by the investigating authority in making its decision whether to apply definitive measures. For example, the file may contain information submitted by an interested party that was subsequently shown to be inaccurate upon verification. Although that information will remain in the file, it would not form the basis of the investigating authority's decision whether to apply definitive measures. The difficulty for an interested party with access to the file, however, is that it will not know whether particular information in the file forms the basis of the authority's final determination. One purpose of Article 6.9 is to resolve this difficulty for interested parties. . . . An interested party will not know whether a particular fact is 'important' or not unless the investigating authority has explicitly identified it as one of the 'essential facts' which form the basis of the authority's decision whether to impose definitive measures."[566]

---

[562] Panel Report on *Argentina – Ceramic Tiles*, para. 6.125.

[563] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.224.

[564] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.224.

[565] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.225.

[566] Panel Report on *Guatemala – Cement II*, para. 8.229. In *Argentina – Ceramic Tiles*, the Argentine authorities had relied primarily upon evidence submitted by petitioners and derived from secondary sources, rather than upon information provided by the exporters, as the factual basis for a determination of the existence of dumping. The Panel found that, in light of the state of the record, "the exporters could not be aware in this case, simply by reviewing the complete record of the investigation, that evidence submitted by petitioners and derived from secondary sources, rather than facts submitted by the exporters, would, despite the responses of the exporters to the DCD's information requests as summarized above, form the primary basis for the determination of the existence and extent of dumping. . . . Under these circumstances, we find that the DCD did not, by referring the exporters to the complete file of the investigation, fulfil its obligation under Article 6.9 to inform the exporters of the 'essential facts under consideration which form the basis for the decision whether to apply definitive measures'." Panel Report on *Argentina – Ceramic Tiles*, para. 6.129.

430. In support of its rejection of Guatemala's argument that it had disclosed the facts forming the basis of its definitive determination by merely allowing access to the file, the Panel referred to Article 6.4 and found that if Guatemala's interpretation were accepted, there would be "little, if any, practical difference between Article 6.9 and Article 6.4":

> "Furthermore, if the disclosure of 'essential facts' under Article 6.9 could be undertaken simply by providing access to all information in the file, there would be little, if any, practical difference between Article 6.9 and Article 6.4. Guatemala is effectively arguing that it complied with Article 6.9 by complying with Article 6.4, *i.e.*, by providing 'timely opportunities for interested parties to see all information that is relevant to the presentation of their cases . . . and that is used by the authorities . . .'. We do not accept an interpretation of Article 6.9 that would effectively reduce its substantive requirements to those of Article 6.4. In our view, an investigating authority must do more than simply provide 'timely opportunities for interested parties to see all information that is relevant to the presentation of their cases . . . and that is used by the authorities . . .' in order to 'inform all interested parties of the essential facts under consideration which form the basis for the decision whether to apply definitive measures'."[567]

(iv) Disclosure of information forming the basis of a preliminary ruling

431. In *Guatemala – Cement II*, Mexico claimed that Guatemala's authority acted inconsistently with Article 6.9 by failing to inform the Mexican producer subject to investigation of the "essential facts under consideration". In response, Guatemala first argued that the "essential facts under consideration" had been disclosed to interested parties in a detailed report setting out its authority's preliminary rulings. The Panel rejected Guatemala's justification, pointing out, among other things, that while the preliminary measures had been based on a threat of material injury, the final determination was based on actual material injury:

> "Article 6.9 provides explicitly for disclosure of the 'essential facts . . . which form the basis for the decision whether to apply *definitive* measures' (emphasis supplied). Disclosure of the 'essential facts' forming the basis of a preliminary determination is clearly inadequate in circumstances where the factual basis of the provisional measure is significantly different from the factual basis of the definitive measure. In the present case, the preliminary measure was based on a preliminary determination of *threat* of material injury, whereas the final determination was based on *actual* material injury. Furthermore, the Ministry's preliminary determination (16 August 1996) was based on a [period of investigation ('POI')] different from that used for its final determination, since the POI was extended on 4 October 1996. Indeed, Guatemala has cited the United States' assertion that '[i]n the course of an anti-dumping investigation, the bulk of the evidence which forms the basis of the final determination is generally gathered after the preliminary determination'. If the bulk of the evidence which forms the basis of the final determination is generally gathered after the preliminary determination, we fail to see how disclosure of the 'essential facts' forming the basis of the preliminary determination could amount to disclosure of the 'essential facts' forming the basis of the final determination, since the 'bulk' of the 'essential facts' underlying the final determination would not yet have been gathered. In these circumstances, we do not consider that the Ministry could satisfy the Article 6.9 obligation to 'inform all interested parties of the essential facts under consideration which form the basis for the decision whether to apply definitive measures' by providing disclosure of the essential facts forming the basis of its preliminary determination."[568]

(v) Failure to inform the changes in factual foundation from a preliminary determination to final determination

432. In *Guatemala – Cement II*, the Panel rejected Mexico's claim that Guatemala's authority was in violation of Articles 6.1, 6.2 and 6.9 by changing its injury determination from a preliminary determination of threat of material injury to a final determination of actual material injury during the course of the investigation, without informing the Mexican producer of that change, and without giving the producer a full and ample opportunity to defend itself. Following the observation based upon Article 12.2, as referenced in paragraph 313 above, the Panel explained with regard to Article 6.9, as follows:

> "We note that Articles 6.1 and 6.9 impose certain obligations on investigating authorities in respect of 'information', 'evidence' and 'essential facts'. However, Mexico's claim does not concern interested parties' right to have access to certain factual information during the course of an investigation. Mexico's claim concerns interested parties' alleged right to be informed of an investigating authority's legal determinations during the course of an investigation."[569]

(b) Relationship with other paragraphs of Article 6

433. In *Guatemala – Cement II*, having found that Guatemala's failure to disclose the "essential facts" forming the basis of its final determination was in vio-

[567] Panel Report on *Guatemala – Cement II*, para. 8.230.
[568] Panel Report on *Guatemala – Cement II*, para. 8.228.
[569] Panel Report on *Guatemala – Cement II*, para. 8.238. In regard to the Panel's finding regarding the claims under Articles 6.1 and 6.2, see the excerpts quoted in paras. 314 and 336 of this Chapter.

lation of Article 6.9, as referenced in paragraphs 429, 430 and 432 above, the Panel considered it unnecessary to examine whether it was also inconsistent with Articles 6.1 and 6.2.[570]

434. The Panel on *Guatemala – Cement II* touched on the relationship between the obligations under Articles 6.4 and 6.9. See paragraph 430 above.

9. Article 6.10

(a) General

435. In *Argentina – Ceramic Tiles*, the Panel explained the structure of the obligations set forth in Article 6.10 as follows:

> "The first sentence of Article 6.10 of the AD Agreement sets forth a general rule that the authorities determine an individual margin of dumping for each known exporter or producer of the product under investigation. The second sentence of Article 6.10 permits an investigating authority to deviate from the general rule by permitting the investigating authorities to 'limit their examination either to a reasonable number of interested parties or products by using samples . . . or to the largest percentage of the volume of the exports from the country in question which can reasonably be investigated', in cases where the number of exporters, producers, importers or types of products involved is so large as to make such a determination impracticable . . ."[571]

436. The Panel, in *Argentina – Ceramic Tiles*, put the second sentence of Article 6.10 in context by referring to Article 9.4:

> "Article 9.4 provides that, where the authorities have limited their examination in accordance with the second sentence of Article 6.10, the anti-dumping duty applied to imports from exporters or producers not included in the examination shall not exceed an amount calculated on the basis of the margins of dumping for exporters or producers that were included in the examination. Finally, in cases where the authorities have limited their examination under Article 6.10, subparagraph 2 of Article 6.10 provides that the authorities shall nevertheless determine an individual margin of dumping for any exporter not initially selected who submits the necessary information in time for that information to be considered, except where the number of exporters is so large that individual examination would be unduly burdensome to the authorities and prevent timely completion of the investigation."[572]

(b) "individual margin of dumping for each known exporter or producer"

437. In *Argentina – Ceramic Tiles*, the Argentine authorities had established a dumping margin for three size categories of ceramic tile irrespective of the exporter. The Panel concluded that "[w]hile the second sentence of Article 6.10 allows an investigating authority to limit its examination to certain exporters or producers, it does not provide for a deviation from the general rule that individual margins be determined for those exporters or producers that are examined":[573]

> "In our view, the general rule in the first sentence of Article 6.10, that individual margins of dumping be determined for each known exporter or producer of the product under investigation, is fully applicable to exporters who are selected for examination under the second sentence of Article 6.10. While the second sentence of Article 6.10 allows an investigating authority to limit its examination to certain exporters or producers, it does not provide for a deviation from the general rule that individual margins be determined for those exporters or producers that are examined. To the contrary, Article 9.4 provides that, where the authorities limit their examination under Article 6.10, the anti-dumping duty for exporters or producers that are not examined shall not exceed a level determined on the basis of the results of the examination of those exporters or producers that were examined. That Article 9.4 does not provide any methodology for determining the level of duties applicable to exporters or producers that are examined in our view confirms that the general rule requiring individual margins remains applicable to those exporters or producers. We find further confirmation in Article 6.10.2, which requires that, in general, an individual margin of dumping must be calculated even for the producers/exporters not initially included in the sample, if they provide the necessary information and if to do so is not unduly burdensome. If even producers not included in the original sample are entitled to an individual margin calculation, then it follows that producers that were included in the original sample are so entitled as well.[574]"

438. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that Article 6.10 is purely procedural

---

[570] Panel Report on *Guatemala – Cement II*, para. 8.232.

[571] Panel Report on *Argentina – Ceramic Tiles*, para. 6.89. The Panel on *Argentina – Poultry Anti-Dumping Duties* agreed with the view that Article 6.10, first sentence, imposes a general obligation on investigating authorities to calculate individual margins of dumping for each known exporter or producer concerned of the product under investigation. Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.214.

[572] Panel Report on *Argentina – Ceramic Tiles*, para. 6.90.

[573] The Panel acknowledged the "usefulness of grouping (by size, model, type) for the purpose of making a fair comparison under Article 2.4" but indicated that this should not be confused with "the requirement under Article 6.10 to determine an individual margin of dumping for the product as a whole." Panel Report on *Argentina – Ceramic Tiles*, para. 6.99.

[574] As the Panel on *EC – Bed Linen* stated:

> "[T]he fact that Article 2.4.2 refers to the existence of margins of dumping in the plural is a general statement, taking account of the fact that, as is made clear in Article 6.10 and 9 of the AD Agreement, individual dumping margins are determined for each producer or exporter under investigation, and for each product under investigation." (emphasis added)

Panel Report on *EC – Bed Linen*, para. 6.118.

in nature, in the sense that it imposes a procedural obligation on the investigating agency to determine individual margins of dumping for each known exporter or producer concerned of the product under investigation. According to the Panel "Article 6.10 is *not* concerned with substantive issues concerning the determination of individual margins, such as the availability of the relevant data. Such issues are addressed by provisions such as Articles 2 and 6.8 of the *AD Agreement*."[575] The Panel thus rejected the argument that for the requirement under Article 6.10 to apply, the exporter or producer concerned should supply the documentation needed to determine an individual margin of dumping.

10. Article 6.13

(a) Relationship with paragraphs 2 and 5 of Annex II

439. In *US – Hot-Rolled Steel*, the Appellate Body referred to Article 6.13 as support for its view that paragraphs 2 and 5 of Annex II call for a balance between the interests of investigating authorities and exporters as regards cooperation in anti-dumping investigations. See paragraph 411 above.

11. Relationship with other Articles

(a) Article 1

440. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the AD Agreement, including Article 6. The Panel then opined that Mexico's claims under other articles of the AD Agreement, including Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[576] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

(b) Article 2

441. In *US – Stainless Steel*, the Panel considered that it was unnecessary to examine Korea's claim using Articles 6.1, 6.2 and 6.9 with respect to the United States' methodologies which the Panel had already found in violation of Article 2.[577]

442. With respect to the relationship between Article 6.8 and Articles 2.2 and 2.4, see paragraph 94 above.

443. In *Argentina – Ceramic Tiles,* the Argentine authorities had established a dumping margin for three size categories of ceramic tiles irrespective of the exporter. The Panel, when analysing the compatibility of Argentina's measure with Article 6.10, acknowledged the "usefulness of grouping (by size, model, type) for the purpose of making a fair comparison under Article 2.4" but indicated that this should not be confused with "the requirement under Article 6.10 to determine an individual margin of dumping for the product as a whole."[578]

(c) Article 3

444. In *Thailand – H-Beams*, the Appellate Body referred to Article 6 in interpreting Article 3.1. See paragraph 112 above.

(d) Article 9

445. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 6. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement,* including Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[579] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

446. With respect to the relationship between Article 6.8 and Article 9.3 and 9.4, see paragraphs 476–477 below.

447. As regards the relationship between Article 9.4 and Article 6.10, see paragraphs 436–437 above.

(e) Article 12

448. In *Guatemala – Cement II*, the Panel referred to Article 12.2 in rejecting Mexico's claim of a violation of Articles 6.1, 6.2 and 6.9. See paragraph 313 above.

449. The Panel, in *Argentina – Ceramic Tiles,* referred to Article 12 of the *Anti-Dumping Agreement* as support of its conclusion above that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information. See paragraph 417 above.

(f) Article 18

450. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 6. The Panel then opined that Mexico's claims under other articles of the *Anti-*

[575] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.215.
[576] Panel Report on *Guatemala – Cement II*, para. 8.296.
[577] Panel Report on *US – Stainless Steel*, para. 6.137.
[578] Panel Report on *Argentina – Ceramic Tiles*, para. 6.99.
[579] Panel Report on *Guatemala – Cement II*, para. 8.296.

Dumping Agreement, including Article 18, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[580] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

12. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

451. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 6. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement* and under Article VI of GATT 1994, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[581] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

VII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Provisional Measures

7.1 Provisional measures may be applied only if:

(i) an investigation has been initiated in accordance with the provisions of Article 5, a public notice has been given to that effect and interested parties have been given adequate opportunities to submit information and make comments;

(ii) a preliminary affirmative determination has been made of dumping and consequent injury to a domestic industry; and

(iii) the authorities concerned judge such measures necessary to prevent injury being caused during the investigation.

7.2 Provisional measures may take the form of a provisional duty or, preferably, a security – by cash deposit or bond – equal to the amount of the anti-dumping duty provisionally estimated, being not greater than the provisionally estimated margin of dumping. Withholding of appraisement is an appropriate provisional measure, provided that the normal duty and the estimated amount of the anti-dumping duty be indicated and as long as the withholding of appraisement is subject to the same conditions as other provisional measures.

7.3 Provisional measures shall not be applied sooner than 60 days from the date of initiation of the investigation.

7.4 The application of provisional measures shall be limited to as short a period as possible, not exceeding four months or, on decision of the authorities concerned, upon request by exporters representing a significant percentage of the trade involved, to a period not exceeding six months. When authorities, in the course of an investigation, examine whether a duty lower than the margin of dumping would be sufficient to remove injury, these periods may be six and nine months, respectively.

7.5 The relevant provisions of Article 9 shall be followed in the application of provisional measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. General

452. In *Guatemala – Cement II*, after having found that the subject definitive measure was inconsistent with the *Anti-Dumping Agreement*, the Panel considered it unnecessary to address claims concerning the provisional measure, stating:

> "At most, Mexico's claims concerning the provisional measure could only result in a ruling with respect to part of the definitive measure insofar as it relates to retrospective collection of the provisional measure (i.e., where it is mandated that the 'provisional anti-dumping duties collected would remain in favor of the treasury'). Since we have already made findings that give rise to a recommendation concerning the totality of the definitive measure, we do not consider it necessary to further address claims (i.e. concerning the provisional measure) that could only result in a ruling concerning only part of the definitive measure."[582]

2. Relationship with other Articles

(a) Article 1

453. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 7. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[583] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

[580] Panel Report on *Guatemala – Cement II*, para. 8.296.
[581] Panel Report on *Guatemala – Cement II*, para. 8.296.
[582] Panel Report on *Guatemala – Cement II*, para. 8.298.
[583] Panel Report on *Guatemala – Cement II*, para. 8.296.

(b) Article 6

454. In *Guatemala – Cement II*, the Panel referred to Article 7.3 in examining Mexico's claim under Article 6.1.3. See paragraph 325 above.

(c) Article 9

455. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 7. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[584] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

(d) Article 17

456. In *Mexico – Corn Syrup*, the Panel touched on the relationship between Article 7 (Articles 7.1 and 7.4) and Article 17.4. See paragraphs 615–616 below.

(e) Article 18

457. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 7. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 18, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[585] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

3. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

458. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 7. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement* and Article VI of GATT 1994 were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[586] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

VIII. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Price Undertakings

8.1 Proceedings may[19] be suspended or terminated without the imposition of provisional measures or anti-dumping duties upon receipt of satisfactory voluntary undertakings from any exporter to revise its prices or to cease exports to the area in question at dumped prices so that the authorities are satisfied that the injurious effect of the dumping is eliminated. Price increases under such undertakings shall not be higher than necessary to eliminate the margin of dumping. It is desirable that the price increases be less than the margin of dumping if such increases would be adequate to remove the injury to the domestic industry.

(*footnote original*) [19] The word "may" shall not be interpreted to allow the simultaneous continuation of proceedings with the implementation of price undertakings except as provided in paragraph 4.

8.2 Price undertakings shall not be sought or accepted from exporters unless the authorities of the importing Member have made a preliminary affirmative determination of dumping and injury caused by such dumping.

8.3 Undertakings offered need not be accepted if the authorities consider their acceptance impractical, for example, if the number of actual or potential exporters is too great, or for other reasons, including reasons of general policy. Should the case arise and where practicable, the authorities shall provide to the exporter the reasons which have led them to consider acceptance of an undertaking as inappropriate, and shall, to the extent possible, give the exporter an opportunity to make comments thereon.

8.4 If an undertaking is accepted, the investigation of dumping and injury shall nevertheless be completed if the exporter so desires or the authorities so decide. In such a case, if a negative determination of dumping or injury is made, the undertaking shall automatically lapse, except in cases where such a determination is due in large part to the existence of a price undertaking. In such cases, the authorities may require that an undertaking be maintained for a reasonable period consistent with the provisions of this Agreement. In the event that an affirmative determination of dumping and injury is made, the undertaking shall continue consistent with its terms and the provisions of this Agreement.

8.5 Price undertakings may be suggested by the authorities of the importing Member, but no exporter shall be forced to enter into such undertakings. The fact that exporters do not offer such undertakings, or do not

[584] Panel Report on *Guatemala – Cement II*, para. 8.296.
[585] Panel Report on *Guatemala – Cement II*, para. 8.296.
[586] Panel Report on *Guatemala – Cement II*, para. 8.296.

accept an invitation to do so, shall in no way prejudice the consideration of the case. However, the authorities are free to determine that a threat of injury is more likely to be realized if the dumped imports continue.

8.6 Authorities of an importing Member may require any exporter from whom an undertaking has been accepted to provide periodically information relevant to the fulfilment of such an undertaking and to permit verification of pertinent data. In case of violation of an undertaking, the authorities of the importing Member may take, under this Agreement in conformity with its provisions, expeditious actions which may constitute immediate application of provisional measures using the best information available. In such cases, definitive duties may be levied in accordance with this Agreement on products entered for consumption not more than 90 days before the application of such provisional measures, except that any such retroactive assessment shall not apply to imports entered before the violation of the undertaking.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

459. The Panel on *US – Offset Act (Byrd Amendment)* considered the extent of the obligation under Article 8.3 of the *Anti-Dumping Agreement* concerning price undertakings. According to the Panel, under Article 8:

> "[W]hen offered, the investigating authority need not accept the undertaking if it considers it impractical or if for other reasons it does not want to accept the undertaking. The decision to accept an undertaking or not under the Agreements is one the investigating authority is to take, and it may reject an undertaking for various reasons, including reasons of general policy. The fact that domestic producers may or may not be influenced by the CDSOA to suggest to the authority not to accept the undertaking, does not affect the possibility for interested parties concerned to offer an undertaking or for that undertaking to be accepted, in light of the non-decisive role of the domestic industry in this process."[587]

IX. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Imposition and Collection of Anti-Dumping Duties

9.1 The decision whether or not to impose an anti-dumping duty in cases where all requirements for the imposition have been fulfilled, and the decision whether the amount of the anti-dumping duty to be imposed shall be the full margin of dumping or less, are decisions to be made by the authorities of the importing Member. It is desirable that the imposition be permissive in the territory of all Members, and that the duty be less than the margin if such lesser duty would be adequate to remove the injury to the domestic industry.

9.2 When an anti-dumping duty is imposed in respect of any product, such anti-dumping duty shall be collected in the appropriate amounts in each case, on a non-discriminatory basis on imports of such product from all sources found to be dumped and causing injury, except as to imports from those sources from which price undertakings under the terms of this Agreement have been accepted. The authorities shall name the supplier or suppliers of the product concerned. If, however, several suppliers from the same country are involved, and it is impracticable to name all these suppliers, the authorities may name the supplying country concerned. If several suppliers from more than one country are involved, the authorities may name either all the suppliers involved, or, if this is impracticable, all the supplying countries involved.

9.3 The amount of the anti-dumping duty shall not exceed the margin of dumping as established under Article 2.

9.3.1 When the amount of the anti-dumping duty is assessed on a retrospective basis, the determination of the final liability for payment of anti-dumping duties shall take place as soon as possible, normally within 12 months, and in no case more than 18 months, after the date on which a request for a final assessment of the amount of the anti-dumping duty has been made.[20] Any refund shall be made promptly and normally in not more than 90 days following the determination of final liability made pursuant to this sub-paragraph. In any case, where a refund is not made within 90 days, the authorities shall provide an explanation if so requested.

(*footnote original*) [20] It is understood that the observance of the time-limits mentioned in this subparagraph and in subparagraph 3.2 may not be possible where the product in question is subject to judicial review proceedings.

9.3.2 When the amount of the anti-dumping duty is assessed on a prospective basis, provision shall be made for a prompt refund, upon request, of any duty paid in excess of the margin of dumping. A refund of any such duty paid in excess of the actual margin of dumping shall normally take place within 12 months, and in no case more than 18 months, after the date on which a request for a refund, duly supported by evidence, has been made by an importer of the product subject to the anti-dumping duty. The refund authorized

[587] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.80.

should normally be made within 90 days of the above-noted decision.

9.3.3 In determining whether and to what extent a reimbursement should be made when the export price is constructed in accordance with paragraph 3 of Article 2, authorities should take account of any change in normal value, any change in costs incurred between importation and resale, and any movement in the resale price which is duly reflected in subsequent selling prices, and should calculate the export price with no deduction for the amount of anti-dumping duties paid when conclusive evidence of the above is provided.

9.4 When the authorities have limited their examination in accordance with the second sentence of paragraph 10 of Article 6, any anti-dumping duty applied to imports from exporters or producers not included in the examination shall not exceed:

(i) the weighted average margin of dumping established with respect to the selected exporters or producers or,

(ii) where the liability for payment of anti-dumping duties is calculated on the basis of a prospective normal value, the difference between the weighted average normal value of the selected exporters or producers and the export prices of exporters or producers not individually examined,

provided that the authorities shall disregard for the purpose of this paragraph any zero and *de minimis* margins and margins established under the circumstances referred to in paragraph 8 of Article 6. The authorities shall apply individual duties or normal values to imports from any exporter or producer not included in the examination who has provided the necessary information during the course of the investigation, as provided for in subparagraph 10.2 of Article 6.

9.5 If a product is subject to anti-dumping duties in an importing Member, the authorities shall promptly carry out a review for the purpose of determining individual margins of dumping for any exporters or producers in the exporting country in question who have not exported the product to the importing Member during the period of investigation, provided that these exporters or producers can show that they are not related to any of the exporters or producers in the exporting country who are subject to the anti-dumping duties on the product. Such a review shall be initiated and carried out on an accelerated basis, compared to normal duty assessment and review proceedings in the importing Member. No anti-dumping duties shall be levied on imports from such exporters or producers while the review is being carried out. The authorities may, however, withhold appraisement and/or request guarantees to ensure that, should such a review result in a determination of dumping in respect of such producers or exporters, anti-dumping duties can be levied retroactively to the date of the initiation of the review.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

1. Article 9.2

(a) Relationship with Article 9.3

460. The Panel on *Argentina – Poultry Anti-Dumping Duties* made the following observations concerning the relationship between Article 9.2 and Article 9.3:

> "We note that Article 9.3 contains a specific obligation regarding the amount of anti-dumping duty to be imposed, whereas Article 9.2 employs far more general language in referring to the collection of duties in 'appropriate' amounts. In particular, Article 9.2 provides no guidance on what an 'appropriate' amount of duty may be in a given case. In the absence of any other guidance regarding the appropriateness of the amount of anti-dumping duties, it would appear reasonable to conclude that an anti-dumping duty meeting the requirements of Article 9.3 (i.e., not exceeding the margin of dumping) would be 'appropriate' within the meaning of Article 9.2.agreed with the argument made by one of the parties that a violation of Article 9.2 is entirely dependent on a violation of Article 9.3".[588]

2. Article 9.3

(a) "*de minimis*" test

461. The Panel on *US – DRAMS* concluded that "Article 5.8, second sentence, does not apply in the context of Article 9.3 duty assessment procedures. As Article 5.8, second sentence, does not require Members to apply a *de minimis* test in Article 9.3 duty assessment procedures, it certainly cannot require Members to apply a particular *de minimis* standard in such procedures."[589]

462. The Panel on *US – DRAMS* further stated: "A *de minimis* test in the context of an Article 9.3 duty assessment will not remove an exporter from the scope of the order. Thus, the implication of the *de minimis* test required by Article 5.8, and any *de minimis* test that Members choose to apply in Article 9.3 duty assessment procedures, differ significantly."[590]

463. The Panel on *US – DRAMS* discussed the different functions of the *de minimis* test in Article 5.8 and Article 9.3, respectively. See paragraph 289 above.

[588] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.365.
[589] Panel Report on *US – DRAMS*, para. 6.89.
[590] Panel Report on *US – DRAMS*, para. 6.90.

(b) variable duties

464. The Panel on *Argentina – Poultry Anti-Dumping Duties* addressed the argument that variable anti-dumping duties are inconsistent with Article 9.3 because they are collected by reference to a margin of dumping established at the time of collection (i.e., the difference between a "minimum export price", or reference normal value, and actual export price), rather than by reference to the margin of dumping established during the investigation. Brazil argued that from the moment the anti-dumping duty is imposed until a review of the imposition of that duty is made, the only margin of dumping available, calculated pursuant to Article 2, is the margin assessed in the investigation, and found in the final determination. The Panel rejected this argument and concluded that Article 9.3 does not prohibit the use of variable anti-dumping duties:

> "In addressing this claim, we note that nothing in the *AD Agreement* explicitly identifies the form that anti-dumping duties must take. In particular, nothing in the *AD Agreement* explicitly prohibits the use of variable anti-dumping duties. Brazil's Claim 29 is based on Article 9.3 of the *AD Agreement*. As the title of Article 9 of the *AD Agreement* suggests, Article 9.3 is a provision concerning the imposition and collection of anti-dumping duties. Article 9.3 provides that a duty may not be collected in excess of the margin of dumping as established under Article 2. The modalities for ensuring compliance with this obligation are set forth in sub-paragraphs 1, 2 and 3 of Article 9.3, each of which addresses duty assessment and the reimbursement of excess duties. The primary focus of Article 9.3, read together with sub-paragraphs 1–3, is to ensure that final anti-dumping duties shall not be assessed in excess of the relevant margin of dumping, and to provide for duty refund in cases where excessive anti-dumping duties would otherwise be collected. Our understanding that Article 9.3 is concerned primarily with duty assessment is confirmed by the fact that the broadly equivalent provision in the *SCM Agreement* (i.e., Article 19.4) refers to the 'lev[ying]' of duties, and footnote 51 to that provision states that '"levy" shall mean the definitive or final legal **assessment or collection** of a duty or tax' (emphasis added).[591] When viewed in this light, it is not obvious that – as Brazil effectively argues – Article 9.3 prohibits variable anti-dumping duties by ensuring that anti-dumping duties do not exceed the margin of dumping established during 'the investigation phase' pursuant to Article 2.4.2. Neither the ordinary meaning of Article 9.3, nor its context (i.e., sub-paragraphs 1–3), supports that view. If Article 9.3 were designed to prohibit the use of variable customs duties, presumably that prohibition would have been clearly spelled out."[592]

465. The Panel also pointed to Article 9.3.1 dealing with retrospective duty assessment as support for its view that duties may be collected on the basis of a margin of dumping established after the end of the investigation.[593] Similarly, the Panel considered that the Article 9.3.2 refund mechanism in the case of a prospective duty assessment would include refunds of anti-dumping duties paid in excess of the margin of dumping prevailing at the time the duty is collected and drew the following conclusions:

> "This therefore further undermines Brazil's argument that the only margin of dumping relevant until such time that there is an Article 11.2 review is the margin established during the investigation. If the basis for duty refund is the margin of dumping prevailing at the time of duty collection, we see no reason why a Member should not use the same basis for duty collection. Brazil has noted that refunds do not imply modification of the duty, and are only available if requested by the importer.[594] While these points may be correct, they do not change the fact that the refund mechanism operates by reference to the margin of dumping prevailing at the time of duty collection. It is this aspect of the refund mechanism that renders it contextually relevant to the issue before us. Accordingly, we see no reason why it is not permissible[595] for a Member to levy anti-dumping duties on the basis of the actual margin of dumping prevailing at the time of duty collection."[596]

(c) Relationship with Article 9.2

466. In this regard, see paragraph 460 above.

3. Article 9.4

(a) Purpose of Article 9.4

467. In *US – Hot-Rolled Steel*, the Appellate Body indicated that "Article 9.4 seeks to prevent the exporters, who were *not* asked to cooperate in the investigation, from being prejudiced by gaps or shortcomings in the information supplied by the investigated exporters."[597]

---

[591] (*footnote original*) The Tokyo Round *AD Agreement* is also instructive, since Article 8.3 of that Agreement stated "[t]he amount of the anti-dumping duty must not exceed the margin of dumping as established under Article 2. **Therefore**, if subsequent to the application of the anti-dumping duty it is found that the duty so collected exceeds the actual dumping margin, the amount in excess of the margin shall be reimbursed as quickly as possible" (emphasis added). This provision clearly demonstrates that the general requirement that anti-dumping duties shall not exceed the margin of dumping is concerned with duty assessment.

[592] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.355.

[593] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.361.

[594] (*footnote original*) Brazil's second written submission, para. 141.

[595] (*footnote original*) We use this term with particular regard to the Article 17.6(ii) standard of review.

[596] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.361.

[597] Appellate Body Report on *US – Hot-Rolled Steel*, para. 123.

(b) Ceiling for "all others" rate

468. In *US – Hot-Rolled Steel*, the Appellate Body explained that Article 9.4 does not provide for a method to calculate "all others" rate but simply provides for a "ceiling" for such a rate and establishes two "prohibitions" on the use of certain margins in the calculation of the "all others" rate, i.e. not to use (i) zero or *de minimis* margins and (ii) margins established on the basis of best facts available:

> "Article 9.4 does not prescribe any method that WTO Members must use to establish the 'all others' rate that is actually applied to exporters or producers that are not investigated. Rather, Article 9.4 simply identifies a maximum limit, or ceiling, which investigating authorities '*shall not exceed*' in establishing an 'all others' rate. Sub-paragraph (i) of Article 9.4 states the general rule that the relevant ceiling is to be established by calculating a 'weighted average margin of dumping established' with respect to those exporters or producers who *were* investigated. However, the clause beginning with 'provided that', which follows this sub-paragraph, qualifies this general rule. This qualifying language mandates that, 'for the purpose of this paragraph', investigating authorities '*shall disregard*', first, zero and *de minimis* margins and, second, 'margins established under the circumstances referred to in paragraph 8 of Article 6.' Thus, in determining the amount of the ceiling for the 'all others' rate, Article 9.4 establishes two *prohibitions*. The first prevents investigating authorities from calculating the 'all others' ceiling using zero or *de minimis* margins; while the second precludes investigating authorities from calculating that ceiling using 'margins established under the circumstances referred to' in Article 6.8."[598]

(i) Article 9.4(i): "weighted average margin of dumping with respect to selected exporters or producers"

"margins"

469. In *US – Hot-Rolled Steel*, the Appellate Body looked into the meaning of the word "margins" under Article 9.4. The Appellate Body recalled the interpretation made by the Panel of the word "margins" under Article 2.4.2 in *EC – Bed Linen* and considered that the same meaning should apply to the word "margins" under Article 9.4:

> "[W]e recall that the word 'margins', which appears in Article 2.4.2 of that Agreement, has been interpreted in *European Communities – Bed Linen*. The Panel found, in that dispute, and we agreed, that 'margins' means the individual margin of dumping determined for each of the investigated exporters and producers of the product under investigation, for that particular product.[599] This margin reflects a comparison that is based upon examination of all of the relevant home market and export market transactions. We see no reason, in Article 9.4, to interpret the word 'margins' differently from the meaning it has in Article 2.4.2, and the parties have not suggested one."[600]

"exporters or producers"

470. Referring to provisions which use the plural form, but which are also applicable in the singular case, the Panel on *EC – Bed Linen* stated that "Article 9.4(i) provides that the dumping duty applied to imports from producers/exporters not examined as part of a sample shall not exceed 'the weighted average margin of dumping established with respect to the selected exporters or producers'. We consider that this provision does not become inoperative if there is only one selected exporter or producer – rather, the dumping margin for that exporter or producer may be applied."[601] However, see paragraph 42 above for a reversal by the Appellate Body of a panel finding under Article 2.2.2(ii) that the plural form "other exporters and producers" could also be interpreted as referring to one single exporter or producer.

(ii) Prohibitions in the calculation of "all others" rate: zero and de minimis margins, margins based on facts available

Margins established under the circumstances referred to in paragraph 8 of Article 6

471. In *US – Hot-Rolled Steel*, Japan had claimed that the United States statutory method for calculating the "all others" rate in section 735(c)(5)(A) of the United States Tariff Act of 1930, as amended[602], as well as the authorities' application of the statutory method were inconsistent with Article 9.4 because they require the consideration of margins based in part on facts available in the calculation of the "all others" rate. The United States contended that only those margins which are calculated entirely on the basis of facts available could not be taken into account for the "all others" rate.[603] The Panel found that the phrase in Article 9.4 excludes, from the calculation of the ceiling for the "all others" rate, any

---

[598] Appellate Body Report on *US – Hot-Rolled Steel*, para. 116.

[599] (*footnote original*) Panel Report, *European Communities – Bed Linen*, WT/DS141/R, adopted 12 March 2001, as modified by the Appellate Body Report, WT/DS141/AB/R, para. 6.118; Appellate Body Report, *European Communities – Bed Linen, supra*, footnote 36, para. 53.

[600] Appellate Body Report on *US – Hot-Rolled Steel*, para. 118.

[601] Panel Report on *EC – Bed Linen*, para. 6.72.

[602] See also para. 597 of this Chapter.

[603] The United States interpreted this sentence of Article 9.4 as meaning to cover only those margins which are calculated *entirely* on the basis of the facts available, that is, where *both* components of the calculation of a dumping margin – normal value and export price – are determined *exclusively* using facts available. Appellate Body Report on *US – Hot-Rolled Steel*, para. 117.

margins which are calculated, *even in part*, using facts available.[604] The Appellate Body, which upheld the Panel's finding, found that "the application of Article 6.8, authorizing the use of facts available, is *not* confined to cases where the *entire* margin is established using *only* facts available":

> "We proceed to examine the phrase 'margins established under the circumstances referred to in paragraph 8 of Article 6.' This provision permits investigating authorities, in certain situations, to reach 'preliminary or final determinations . . . on the basis of the facts available'. There is, however, no requirement in Article 6.8 that resort to facts available be limited to situations where there is *no* information whatsoever which can be used to calculate a margin. Thus, the application of Article 6.8, authorizing the use of facts available, is *not* confined to cases where the *entire* margin is established using *only* facts available. Rather, under Article 6.8, investigating authorities are entitled to have recourse to facts available *whenever* an interested party does not provide some necessary information within a reasonable period, or significantly impedes the investigation. Whenever such a situation exists, investigating authorities may remedy the lack of *any* necessary information by drawing appropriately from the 'facts available'. . ."

Circumstances referred to in Article 6.8

472. On the basis of its conclusions above, the Appellate Body in *US – Hot-Rolled Steel* considered that the circumstances referred to in Article 6.8 cover all circumstances under which an investigating authority can have recourse to facts available, even if it involves only a small amount of information used in the calculation of an individual dumping margin:

> "In consequence, we are of the view that the '*circumstances* referred to' in Article 6.8 are the circumstances in which the investigating authorities properly have recourse to 'facts available' to overcome a lack of necessary information in the record, and that these 'circumstances' may, in fact, involve only a small amount of information to be used in the calculation of the individual margin of dumping for an exporter or producer."[605]

"established"

473. The Appellate Body in *US – Hot-Rolled Steel* then considered what "established" meant in the context of Article 9.4 as regards the "margins established under the circumstances referred to in Article 6.8". The Appellate Body concluded that "a margin does not cease to be 'established under the circumstances referred to' in Article 6.8 simply because not every aspect of the calculation involved the use of 'facts available'". The Appellate Body further concluded that the purpose of Article 9.4 is to prevent the exporters, who were not asked to cooperate in the investigation, from being prejudiced by gaps or shortcomings in the information supplied by the investigated exporters:

> "We turn to the word 'established' in the phrase 'margins established under the circumstances' referred to in Article 6.8. The essence of the United States' argument is that this word should be read as if it were qualified by the word 'entirely', or 'exclusively', or 'wholly': only where a margin is established 'entirely' under the 'circumstances' of Article 6.8 must that margin be disregarded.
>
> We have noted that Article 9.4 establishes a prohibition, in calculating the ceiling for the all others rate, on using 'margins established under the circumstances referred to' in Article 6.8. Nothing in the text of Article 9.4 supports the United States' argument that the scope of this prohibition should be narrowed so that it would be limited to excluding only margins established 'entirely' on the basis of facts available. As noted earlier, Article 6.8 applies even in situations where only limited use is made of facts available. To read Article 9.4 in the way the United States does is to overlook the many situations where Article 6.8 allows a margin to be calculated, *in part*, using facts available. Yet, the text of Article 9.4 simply refers, in an open-ended fashion, to 'margins established under the circumstances' in Article 6.8. Accordingly, we see no basis for limiting the scope of this prohibition in Article 9.4, by reading into it the word 'entirely' as suggested by the United States. In our view, a margin does not cease to be 'established under the circumstances referred to' in Article 6.8 simply because not every aspect of the calculation involved the use of 'facts available'.
>
> Our reading of Article 9.4 is consistent with the purpose of the provision. Article 6.8 authorizes investigating authorities to make determinations by remedying gaps in the record which are created, in essence, as a result of deficiencies in, or a lack of, information supplied by the investigated exporters. Indeed, in some circumstances, as set forth in paragraph 7 of Annex II of the *Anti-Dumping Agreement*, 'if an interested party *does not cooperate* and thus relevant information is being withheld from the authorities, this situation could lead to a result which is *less favourable* to the party than if the party did cooperate.' (emphasis added) Article 9.4 seeks to prevent the exporters, who were *not* asked to cooperate in the investigation, from being prejudiced by gaps or shortcomings in the information supplied by the investigated exporters. This objective would be compromised if the ceiling for the rate applied to 'all others' were, as the United States suggests, calculated – due to the failure of investigated parties to supply certain information – using margins 'established' even in part on the basis of the facts available."[606]

[604] As regards the use of facts available under Article 6.8, see paras. 375–425 of this Chapter.
[605] Appellate Body Report on *US – Hot-Rolled Steel*, para. 120.
[606] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 121–123.

4. Relationship with other Articles

474. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with Articles 3, 5, 6, 7, 12, and paragraph 2 of Annex I of the *Anti-Dumping Agreement*. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement. There would be no basis to Mexico's claims under Articles 1, 9 and 18 of the AD Agreement, and Article VI of *GATT 1994*, if Guatemala were not found to have violated other provisions of the AD Agreement."[607] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims.

(a) Article 9.3 with Article 5.8

475. The Panel on *US – DRAMS* discussed the relationship between Articles 5.8 and 9.3. See paragraphs 288–289 above.

(b) Article 9.3 with Article 6.8

476. With respect to the relationship between Article 6.8 and Article 9.3, the Panel on *US – Steel Plate*, having found a violation of Article 6.8, considered it unnecessary to determine, in addition, whether the circumstances of that violation also constituted a violation of Article 9.3 (and Article 2.4 and Articles VI:1 and 2 of GATT 1994). In the Panel's view, findings on these claims would serve no useful purpose, as they would neither assist the Member found to be in violation of its obligations to implement the ruling of the Panel, nor would they add to the overall understanding of the obligations found to have been violated.[608]

(c) Article 9.4 with Article 6.8

477. In *US – Hot-Rolled Steel*, both the Panel and the Appellate Body analysed the relationship between Article 9.4 and Article 6.8 as regards the prohibition to calculate the "all others" rate in sample cases on the basis of margins calculated on facts available pursuant to Article 6.8. See 471–473 above.

(d) Article 9.4 with Article 6.10

478. In *Argentina – Ceramic Tiles*, the Panel analysed the relationship between Article 9.4 and Article 6.10 as regards the authorities' duty to calculate a dumping margin per known exporter (see paragraphs 436–437 above).

5. Relationship with other WTO Agreements

(a) Article VI:2 of the GATT 1994

479. The Appellate Body in *US – 1916 Act* addressed the argument that the phrase "may levy on any dumped product an anti-dumping duty not greater in amount than the margin of dumping in respect of such product" in Article VI:2 of the GATT 1994 implies that a Member is permitted to impose a measure other than an anti-dumping measure:

> "We believe that the meaning of the word 'may' in Article VI:2 is clarified by Article 9 of the *Anti-Dumping Agreement* . . . . Article VI of the GATT 1994 and the *Anti-Dumping Agreement* are part of the same treaty, the *WTO Agreement*. As its full title indicates, the *Anti-Dumping Agreement* is an 'Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994'. Accordingly, Article VI must be read in conjunction with the provisions of the *Anti-Dumping Agreement*, including Article 9."[609]

X. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Retroactivity

10.1 Provisional measures and anti-dumping duties shall only be applied to products which enter for consumption after the time when the decision taken under paragraph 1 of Article 7 and paragraph 1 of Article 9, respectively, enters into force, subject to the exceptions set out in this Article.

10.2 Where a final determination of injury (but not of a threat thereof or of a material retardation of the establishment of an industry) is made or, in the case of a final determination of a threat of injury, where the effect of the dumped imports would, in the absence of the provisional measures, have led to a determination of injury, anti-dumping duties may be levied retroactively for the period for which provisional measures, if any, have been applied.

10.3 If the definitive anti-dumping duty is higher than the provisional duty paid or payable, or the amount estimated for the purpose of the security, the difference shall not be collected. If the definitive duty is lower than the provisional duty paid or payable, or the amount estimated for the purpose of the security, the difference shall be reimbursed or the duty recalculated, as the case may be.

10.4 Except as provided in paragraph 2, where a determination of threat of injury or material retardation is

[607] Panel Report on *Guatemala – Cement II*, para. 8.296.
[608] Panel Report on *US – Steel Plate*, para. 7.103.
[609] Appellate Body Report on *US – 1916 Act*, para. 114.

made (but no injury has yet occurred) a definitive anti-dumping duty may be imposed only from the date of the determination of threat of injury or material retardation, and any cash deposit made during the period of the application of provisional measures shall be refunded and any bonds released in an expeditious manner.

10.5 Where a final determination is negative, any cash deposit made during the period of the application of provisional measures shall be refunded and any bonds released in an expeditious manner.

10.6 A definitive anti-dumping duty may be levied on products which were entered for consumption not more than 90 days prior to the date of application of provisional measures, when the authorities determine for the dumped product in question that:

(i) there is a history of dumping which caused injury or that the importer was, or should have been, aware that the exporter practises dumping and that such dumping would cause injury, and

(ii) the injury is caused by massive dumped imports of a product in a relatively short time which in light of the timing and the volume of the dumped imports and other circumstances (such as a rapid build-up of inventories of the imported product) is likely to seriously undermine the remedial effect of the definitive anti-dumping duty to be applied, provided that the importers concerned have been given an opportunity to comment.

10.7 The authorities may, after initiating an investigation, take such measures as the withholding of appraisement or assessment as may be necessary to collect anti-dumping duties retroactively, as provided for in paragraph 6, once they have sufficient evidence that the conditions set forth in that paragraph are satisfied.

10.8 No duties shall be levied retroactively pursuant to paragraph 6 on products entered for consumption prior to the date of initiation of the investigation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. Article 10.1

480. In *US – Hot-Rolled Steel*, Japan had challenged the consistency with Articles 10.6 and 10.7 of the United States statutory provisions on preliminary critical circumstances determination[610] and their application by the authorities in this case. Japan claimed that by violating these two provisions, the United States' authorities also acted inconsistently with Article 10.1. The Panel, in a finding not reviewed by the Appellate Body, concluded that neither the statutory provision nor its application in that case were inconsistent with Article 10.6 and Article 10.7. The Panel further found that the statutory provision was not, on its face, inconsistent with, *inter alia*, Article 10.1[611] and that the authorities preliminary critical circumstances determination "was not inconsistent with Article 10.1 of the AD Agreement either since it complied with the conditions of Article 10.7 of the AD Agreement".[612]

2. Article 10. 6

481. In *US – Hot-Rolled Steel*, the Panel, in a finding not reviewed by the Appellate Body, analysed the conditions imposed by Article 10.6 in the context of the retroactive imposition of anti-dumping duties permitted by Article 10.7. This provision requires, *inter alia*, that national authorities provide sufficient evidence that all the conditions of Article 10.6 are satisfied. See paragraphs 482–488 below.

3. Article 10.7

(a) "such measures"

482. In *US – Hot-Rolled Steel*, the Panel, whose interpretation was not reviewed by the Appellate Body, interpreted Article 10.7 "as allowing the authority to take certain necessary measures of a purely conservatory or precautionary kind which serve the purpose of preserving the possibility of later deciding to collect duties retroactively under Article 10.6":

> "Article 10.7 provides that once the authorities have sufficient evidence that the conditions of Article 10.6 are satisfied, they may take such measures as, for example, the withholding of appraisement or assessment, as may be necessary to collect anti-dumping duties retroactively. We read this provision as allowing the authority to take certain necessary measures of a purely conservatory or precautionary kind which serve the purpose of preserving the possibility of later deciding to collect duties retroactively under Article 10.6. Unlike provisional measures, Article 10.7 measures are not primarily intended to prevent injury being caused during the investigation. They are taken in order to make subsequent retroactive duty collection possible as a practical matter. Measures taken under Article 10.7 are not based on evaluation of the same criteria as final measures that may be imposed at the end of the investigation. They are of a different kind – they preserve the possibility of imposing anti-dumping duties retroactively, on the basis of a determination additional to the ultimate final determination.

---

[610] Section 733(e)(1) of the Tariff Act of 1930, as amended, requires the United States' authorities to make certain preliminary determinations in a case in which a petitioner requests the imposition of anti-dumping duties retroactively for 90 days prior to a preliminary determination of dumping. Panel Report on *US – Hot-Rolled Steel*, para. 7.139.

[611] Panel Report on *US – Hot-Rolled Steel*, para. 7.150.

[612] Panel Report on *US – Hot-Rolled Steel*, para. 7.168.

Our understanding in this regard is confirmed by the fact that, unlike provisional measures, which can only be imposed after a preliminary affirmative determination of dumping and injury, Article 10.7 measures may be taken at any time 'after initiating an investigation'. . . ."[613]

(b) "sufficient evidence" that the conditions of Article 10.6 are satisfied

(i) Concept of "sufficient evidence"

483. In *US – Hot-Rolled Steel*, the Panel interpreted the term "sufficient evidence" in Article 10.7. The Panel, whose interpretation was not reviewed by the Appellate Body, explained that Article 10.7 does not define "sufficient evidence". The Panel then referred to Article 5.3 which also reflects this standard by requiring "sufficient evidence to initiate an investigation". In this regard, the Panel considered past GATT and WTO Panels' approach to this standard and concluded that "what constitutes 'sufficient evidence' must be addressed in light of the timing and effect of the measure imposed or the determination made." Furthermore, in the Panel's view, "the possible effect of the measures an authority is entitled to take under Article 10.7 of the AD Agreement informs what constitutes sufficient evidence" and it therefore "is not a standard that can be determined in the abstract":

"Article 10.7 of the AD Agreement does not define 'sufficient evidence'. However, Article 5.3 also reflects this standard, in requiring that the authorities examine the accuracy and adequacy of the evidence provided in the application 'to determine whether there is sufficient evidence to justify the initiation of an investigation'. The Article 5.3 requirement of 'sufficient evidence to initiate an investigation' has been addressed by previous GATT and WTO panels. Their approach to understanding this standard has been to examine whether the evidence before the authority at the time it made its determination was such that an unbiased and objective investigating authority evaluating that evidence could properly have made the determination.[614] These Panels have noted that what will be sufficient evidence varies depending on the determination in question. The Panel on *Mexico – HFCS* quoted with approval from the Panel's report in the *Guatemala – Cement I* case that 'the type of evidence needed to justify initiation is the same as that needed to make a preliminary or final determination of threat of injury, although the quality and quantity is less'.[615]

. . . We are of the view that what constitutes 'sufficient evidence' must be addressed in light of the timing and effect of the measure imposed or the determination made. Evidence that is sufficient to warrant initiation of an investigation may not be sufficient to conclude that provisional measures may be imposed. In a similar vein, the possible effect of the measures an authority is entitled to take under Article 10.7 of the AD Agreement informs what constitutes sufficient evidence. Whether evidence is sufficient or not is determined by what the evidence is used for. In sum, whether evidence is sufficient to justify initiation or to justify taking certain necessary precautionary measures under Article 10.7 is not a standard that can be determined in the abstract . . ."[616]

(ii) Extent of the authorities' determination

484. In *US – Hot-Rolled Steel*, the Panel, whose interpretation was not reviewed by the Appellate Body, considered that the requirement of "sufficient evidence that the conditions of Article 10.6 are satisfied" did not require the authorities to make a preliminary affirmative determination of dumping and consequent injury to the domestic industry:

". . . In light of the timing and effect of the measures that are taken on the basis of Article 10.7, we consider that the Article 10.7 requirement of 'sufficient evidence that the conditions of Article 10.6 are satisfied' does not require an authority to first make a preliminary affirmative determination within the meaning of Article 7 of the AD Agreement of dumping and consequent injury to a domestic industry. If it were necessary to wait until after such a preliminary determination, there would, in our view, be no purpose served by the Article 10.7 determination. The opportunity to preserve the possibility of applying duties to a period prior to the preliminary determination would be lost, and the provisional measure that could be applied on the basis of the preliminary

[613] Panel Report on *US – Hot-Rolled Steel*, paras. 7.155–7.156.

[614] (*footnote original*) Panel Report, *Mexico – HFCS*, para. 7.95. (referring to *Guatemala – Cement I*, para. 7.57 and *United States – Softwood Lumber*, SCM/162, BISD 40S/358, para. 335, (adopted 27–28 October 1993)). The Panel on *Guatemala – Cement I* also stated that "the quantum and quality of evidence required at the time of initiation is less than that required for a preliminary, or final, determination of dumping, injury and causation. made after investigation", Panel Report, *Guatemala – Cement I*, para. 7.57, referring to *United States – Softwood Lumber*, para. 332.

[615] (*footnote original*) Panel Report, *Mexico – HFCS*, para. 7.97; Panel Report, *Guatemala – Cement I*, para 7.77

[616] Panel Report on *US – Hot-Rolled Steel*, paras. 7.153–7.154. The Panel considered that "'sufficient evidence' refers to the quantum of evidence necessary to make a determination." The Panel made this statement in its analysis of the comparability of the terms "sufficient evidence" and the term used by the statutory provision at issue, namely "a reasonable basis to believe or suspect". The Panel found that "'sufficient evidence' refers to the quantum of evidence necessary to make a determination. 'A reasonable basis to believe or suspect' on the other hand, seems to refer to the conclusion reached on the basis of evidence presented, that is, a legal mindset that certain facts exist, based on the evidence presented. It appears that in past cases the US authorities have applied the standard as set out in the statute interchangeably with a standard expressed as 'sufficient evidence' and have made affirmative determinations when sufficient evidence was adduced that the conditions of application were satisfied. We therefore consider that the US statute, as it has been applied is not inconsistent with the requirement of the AD Agreement that the investigating authority must have sufficient evidence of the conditions of Article 10.6 before taking measures necessary to collect the duties retroactively." Panel Report on *US – Hot-Rolled Steel*, para. 7.144.

affirmative determination under Article 7 would prevent further injury during the course of the investigation. Moreover, the requirement in Article 7 that provisional measures may not be applied until 60 days after initiation cannot be reconciled with the right, under Article 10.6, to apply duties retroactively to 90 days prior to the date on which a provisional measure is imposed, if a preliminary affirmative determination is a prerequisite to the Article 10.7 measures which preserve the possibility of retroactive application of duties under Article 10.6."[617]

(iii) Conditions of Article 10.6

485. The Panel, in *US – Hot-Rolled Steel*, noted that Japan had not challenged the initiation of the investigation which, pursuant to Article 5.3, was based on a determination that there was sufficient evidence of dumping, injury and causal link. The Panel, whose interpretation was not reviewed by the Appellate Body, indicated that, "given the precautionary nature of the measures that may be taken under Article 10.7", it "can perceive of no reason ... why that same information might not justify a determination of sufficient evidence of dumping and consequent injury in the context of Article 10.6 as required by Article 10.7."[618]

Importers' knowledge of exporters' dumping

486. The Panel, in *US – Hot-Rolled Steel*, commenced its analysis of whether the United States authorities had sufficient evidence that all conditions of Article 10.6 were satisfied by looking at the first condition: whether the importers knew or should have known that exporters were dumping and that such dumping would cause injury. The Panel considered that the evidence of dumping in the petition was "sufficient for an unbiased and objective investigating authority to reach this conclusion". The Panel also noted that Japan, the complainant, had "not alleged that an imputed knowledge of dumping is, *per se*, inconsistent with Article 10.7, but rather argues that [the United States' authorities] did not have sufficient evidence of dumping at all, for the purposes of Article 10.7."[619]

"injury caused"

487. In *US – Hot-Rolled Steel*, the United States authorities had adopted certain measures to collect anti-dumping duties retroactively. These authorities had made a preliminary determination of, *inter alia*, threat of serious injury. The Panel considered whether threat of serious injury fell within the concept of injury for the purpose of satisfying the conditions of Article 10.6 as required by Article 10.7. The Panel concluded that sufficient evidence of threat of injury is enough to justify a determination to apply protective measures under Article 10.7:

"[W]e note that Article 10.6 itself refers to a determination that an importer knew or should have known that there was dumping that would cause injury. The term 'injury' is defined in footnote 9 to Article 3 of the Agreement to include threat of material injury or material retardation of the establishment of an industry, unless otherwise specified. Article 10.6 does not 'otherwise specify'. Consequently, in our view, sufficient evidence of threat of injury would be enough to justify a determination to apply protective measures under Article 10.7.

The role of Article 10.7 in the overall context of the AD Agreement confirms this interpretation. This provision is clearly aimed at preserving the possibility to impose and collect anti-dumping duties retroactively to 90 days prior to the date of application of provisional measures. Thus, Article 10.7 preserves the option provided in Article 10.6 to impose definitive duties even beyond the date of provisional measures. Assume *arguendo* Article 10.7 were understood to require sufficient evidence of actual material injury. In a situation in which, at the time Article 10.7 measures are being considered, there is evidence only of threat of material injury, no measures under Article 10.7 could be taken. Assume further that in this same investigation, there was a final determination of actual material injury caused by dumped imports. At that point, it would be impossible to apply definitive anti-dumping duties retroactively, even assuming the conditions set out in Article 10.6 were satisfied, as the necessary underlying Article 10.7 measures had not been taken.[620] Thus, in a sense, Article 10.7 measures serve the same purpose as an order at the beginning of a lawsuit to preserve the *status quo* – they ensure that at the end of the process, effective measures can be put in place should the circumstances warrant."[621]

"massive imports in a relatively short period of time"

488. The Panel on *US – Hot-Rolled Steel*, in a conclusion not reviewed by the Appellate Body, analysed the third condition of Article 10.6 of which sufficient evidence is required by Article 10.7, namely that the injury be caused by massive dumped imports in a relatively short period of time. The Panel noted that the *Anti-Dumping Agreement* does not indicate what period should be used in order to assess whether there were massive imports over a short period of time. Nevertheless, the Panel concluded that "massive imports that were not made *in tempore non suspectu* but at a moment in time where it had become public knowledge that an

[617] Panel Report on *US – Hot-Rolled Steel*, para. 7.155.
[618] Panel Report on *US – Hot-Rolled Steel*, paras. 7.158.
[619] Panel Report on *US – Hot-Rolled Steel*, paras. 7.160.
[620] (*footnote original*) We note that our findings concern the obligations regarding determinations of whether to apply "such measures ... as may be necessary" under Article 10.7. We are not ruling on the obligations regarding retroactive application of final anti-dumping duties under Article 10.6.
[621] Panel Report on *US – Hot-Rolled Steel*, paras. 7.162–7.163.

investigation was imminent may be taken into consideration in assessing whether Article 10.7 measures may be imposed":

> "The Agreement does not determine what period should be used in order to assess whether there were massive imports over a short period of time. Japan asserts that the latter part of Article 10.6 (ii) of the AD Agreement, referring to whether the injury caused by massive imports is likely to seriously undermine the remedial effect of the duty, implies that the period for comparison is the months before and after the initiation of the investigation. Japan argues that since the duty cannot be imposed retroactively to the period before the initiation, the remedial effect of the duty cannot be undermined by massive imports before initiation.
>
> We disagree with this conclusion. Article 10.7 allows for certain necessary measures to be taken **at any time after initiation of the investigation**. In order to be able to make any determination concerning whether there are massive dumped imports, a comparison of data is obviously necessary. However, if a Member were required to wait until information concerning the volume of imports for some period after initiation were available, this right to act at any time after initiation would be vitiated. By the time the necessary information on import volumes for even a brief period after initiation were available, as a practical matter, the possibility to impose final duties retroactively to initiation would be lost, as there would be no Article 10.7 measures in place. Moreover, as with the situation if a Member were required to wait the minimum 60 days and make a preliminary determination under Article 7 before applying measures under Article 10.7, the possibility of retroactively collecting duties under Article 10.6 at the final stage would have been lost.
>
> Moreover, in our view, it is not unreasonable to conclude that the remedial effect of the definitive duty could be undermined by massive imports that entered the country before the initiation of the investigation but at a time at which it had become clear that an investigation was imminent. We consider that massive imports that were not made *in tempore non suspectu* but at a moment in time where it had become public knowledge that an investigation was imminent may be taken into consideration in assessing whether Article 10.7 measures may be imposed. Again, we emphasize that we are not addressing the question whether this would be adequate for purposes of the final determination to apply duties retroactively under Article 10.6."[622]

4. Relationship with other Articles

489. In *US – Hot-Rolled Steel*, the Panel interpreted the term "sufficient evidence" of Article 10.7 by reference to Article 5.3. See paragraph 483 above.

XI. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Duration and Review of Anti-Dumping Duties and Price Undertakings

11.1 An anti-dumping duty shall remain in force only as long as and to the extent necessary to counteract dumping which is causing injury.

11.2 The authorities shall review the need for the continued imposition of the duty, where warranted, on their own initiative or, provided that a reasonable period of time has elapsed since the imposition of the definitive anti-dumping duty, upon request by any interested party which submits positive information substantiating the need for a review.[21] Interested parties shall have the right to request the authorities to examine whether the continued imposition of the duty is necessary to offset dumping, whether the injury would be likely to continue or recur if the duty were removed or varied, or both. If, as a result of the review under this paragraph, the authorities determine that the anti-dumping duty is no longer warranted, it shall be terminated immediately.

(*footnote original*) [21] A determination of final liability for payment of anti-dumping duties, as provided for in paragraph 3 of Article 9, does not by itself constitute a review within the meaning of this Article.

11.3 Notwithstanding the provisions of paragraphs 1 and 2, any definitive anti-dumping duty shall be terminated on a date not later than five years from its imposition (or from the date of the most recent review under paragraph 2 if that review has covered both dumping and injury, or under this paragraph), unless the authorities determine, in a review initiated before that date on their own initiative or upon a duly substantiated request made by or on behalf of the domestic industry within a reasonable period of time prior to that date, that the expiry of the duty would be likely to lead to continuation or recurrence of dumping and injury.[22] The duty may remain in force pending the outcome of such a review.

(*footnote original*) [22] When the amount of the anti-dumping duty is assessed on a retrospective basis, a finding in the most recent assessment proceeding under subparagraph 3.1 of Article 9 that no duty is to be levied shall not by itself require the authorities to terminate the definitive duty.

11.4 The provisions of Article 6 regarding evidence and procedure shall apply to any review carried out under this Article. Any such review shall be carried out expeditiously and shall normally be concluded within 12 months of the date of initiation of the review.

11.5 The provisions of this Article shall apply *mutatis mutandis* to price undertakings accepted under Article 8.

[622] Panel Report on *US – Hot-Rolled Steel*, paras. 7.165–7.168.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

1. Article 11.1

(a) Necessity

490. The Panel on *US – DRAMS* described the requirement in Article 11.1 whereby anti-dumping duties "shall remain in force only as long as and to the extent necessary" to counteract injurious dumping, as "a general necessity requirement."[623]

491. In assessing the essential character of the necessity involved in Article 11.1, the Panel on *US – DRAMS* stated the following:

> "We note that the necessity of the measure is a function of certain objective conditions being in place, *i.e.* whether circumstances require continued imposition of the anti-dumping duty. That being so, such continued imposition must, in our view, be essentially dependent on, and therefore assignable to, a foundation of positive evidence that circumstances demand it. In other words, the need for the continued imposition of the duty must be demonstrable on the basis of the evidence adduced."[624]

492. The Panel on *US – DRAMS* held that "the necessity of the continued imposition of the anti-dumping duty can only arise in a defined situation pursuant to Article 11.2: *viz* to offset dumping".[625] See paragraph 500 below.

493. With respect to the relationship between Article 11.1 and 11.2, see paragraph 494 below.

(b) Relationship with other paragraphs of Article 11

494. The Panel on *US – DRAMS* examined the relationship between Articles 11.1 and 11.2 by considering whether the terms of Article 11.2 preclude the continued imposition of anti-dumping duties on the basis that an authority fails to satisfy itself that recurrence of dumping is "not likely". Referring to the general necessity requirement in Article 11.1, the Panel further noted that "the application of the general rule in Article 11.1 is specified in Article 11.2".[626]

495. The Panel on *EC – Tube or Pipe Fittings* considered that "Article 11.1 does not set out an independent or additional obligation for Members"[627] but rather "furnishes the basis for the review procedures contained in Article 11.2 (and 11.3) by stating a general and overarching principle, the modalities of which are set forth in paragraph 2 (and 3) of that Article".[628]

2. Article 11.2

(a) "whether the continued imposition of the duty is necessary to offset dumping"

496. Considering whether Article 11.2 precludes an anti-dumping duty being deemed "necessary to offset dumping" where there is no present dumping to offset, the Panel on *US – DRAMS* addressed the issue as follows:

> "First, we note that the second sentence of Article 11.2 refers to an examination of 'whether the continued imposition of the duty is necessary to offset dumping.' We note further that this sentence is expressed in the present tense. In addition, the second sentence of Article 11.2 does not explicitly include any reference to dumping being 'likely' to 'recur', as is the case with the injury review envisaged by that sentence.
>
> However, the second sentence of Article 11.2 requires an investigating authority to examine whether the 'continued imposition' of the duty is necessary to offset dumping. The word 'continued' covers a temporal relationship between past and future. In our view, the word 'continued' would be redundant if the investigating authority were restricted to considering only whether the duty was necessary to offset *present* dumping. Thus, the inclusion of the word 'continued' signifies that the investigating authority is entitled to examine whether imposition of the duty may be applied henceforth to offset dumping.
>
> Furthermore, with regard to injury, Article 11.2 provides for a review of 'whether the injury would be likely to continue or *recur* if the duty were removed or varied' (emphasis supplied). In conducting an Article 11.2 injury review, an investigating authority may examine the causal link between injury and dumped imports. If, in the context of a review of such a causal link, the only injury under examination is injury that may recur following revocation (*i.e.*, future rather than present injury), an investigating authority must necessarily be examining whether that future injury would be caused by dumping with a commensurately prospective timeframe. To do so, the investigating authority would first need to have established a status regarding the prospects of dumping. For these reasons, we do not agree that Article 11.2 precludes *a priori* the justification of continued imposition of anti-dumping duties when there is no present dumping.
>
> In addition, we note that there is nothing in the text of Article 11.2 of the AD Agreement that explicitly limits a Member to a 'present' analysis, and forecloses a prospective analysis, when conducting an Article 11.2 review."[629]

[623] Panel Report on *US – DRAMS*, para. 6.41.
[624] Panel Report on *US – DRAMS*, para. 6.42.
[625] Panel Report on *US – DRAMS*, para. 6.43.

[628] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.113.
[629] Panel Report on *US – DRAMS*, paras. 6.26–6.29.

497. The Panel on *US – DRAMS* considered Article 11.3 to be particularly relevant in giving support for, and reinforcing, its interpretation of Article 11.2 regarding the issue whether Article 11.2 precludes an anti-dumping duty being deemed "necessary to offset dumping" where there is no present dumping to offset.[630] The Panel stated the following regarding Article 11.3:

> "We note that with regard to dumping, the 'sunset provision' in Article 11.3 of the AD Agreement envisages *inter alia* an examination of whether the expiry of an anti-dumping duty would be likely to lead to 'continuation or *recurrence*' of dumping. If, as argued . . ., an anti-dumping duty must be revoked as soon as present dumping is found to have ceased, the possibility (explicitly envisaged by Article 11.3) of the expiry of that duty causing dumping to *recur* could never arise. This is because the reference to 'expiry' in Article 11.3 assumes that the duty is still in force, and the reference to 'recurrence' of dumping assumes that dumping has ceased, but may 'recur' as a result of revocation. [This] textual interpretation of Article 11.2 would effectively exclude the possibility of an Article 11.3 review in circumstances where dumping has ceased but the duty remains in force. [This] interpretation therefore renders part of Article 11.3 ineffective. As stated by the Appellate Body in *Gasoline*, '[a]n interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility'. An interpretation of Article 11.2 which renders part of Article 11.3 meaningless is contrary to the customary or general rules of treaty interpretation, and thus should be rejected."[631]

498. The Panel on *US – DRAMS* also rejected the argument that Article 11.2 requires the immediate revocation of an anti-dumping duty in case of a finding of "no dumping". The Panel opined that such interpretation would render footnote 22 under Article 11.3 meaningless:

> "Furthermore, [the] argument that Article 11.2 requires the immediate revocation of an anti-dumping duty in case of a finding of 'no dumping' (*e.g.,* when a retrospective assessment finds that no duty is to be levied) is also inconsistent with note 22 of the AD Agreement. Note 22 states that, in cases where anti-dumping duties are levied on a retrospective basis, 'a finding in the most recent assessment proceeding . . . that no duty is to be levied shall not by itself require the authorities to terminate the definitive duty'. If [this] interpretation of Article 11.2 were accurate, then an investigating authority would be obligated under Article 11.2 to terminate an anti-dumping duty upon making such a finding, and note 22 would be meaningless. In our view, this confirms a finding that the absence of present dumping does not in and of itself require the immediate termination of an anti-dumping duty pursuant to Article 11.2."[632]

499. As a result of its findings quoted in paragraphs 496–498 above, the Panel on *US – DRAMS* rejected the argument that "Article 11.2 of the AD Agreement requires revocation as soon as an exporter is found to have ceased dumping, and that the continuation of an anti-dumping duty is precluded *a priori* in any circumstances other than where there is present dumping."[633]

500. Referring to the general necessity requirement in Article 11, the Panel on *US – DRAMS* held that such necessity can only arise "in a defined situation pursuant to Article 11.2". While "the necessity involved in Article 11.2 is not to be construed in some absolute and abstract sense", it should nevertheless "be demonstrable on the basis of the evidence adduced":

> "The necessity of the continued imposition of the anti-dumping duty can only arise in a defined situation pursuant to Article 11.2: *viz* to offset dumping. Absent the prescribed situation, there is no basis for continued imposition of the duty: the duty cannot be 'necessary' in the sense of being demonstrable on the basis of the evidence adduced because it has been deprived of its essential foundation. In this context, we recall our finding that Article 11.2 does not preclude *a priori* continued imposition of anti-dumping duties in the absence of present dumping. However, it is also clear from the plain meaning of the text of Article 11.2 that the continued imposition must still satisfy the 'necessity' standard, even where the need for the continued imposition of an anti-dumping duty is tied to the 'recurrence' of dumping. We recognize that the certainty inherent to such a prospective analysis could be conceivably somewhat less than that attached to purely retrospective analysis, reflecting the simple fact that analysis involving prediction can scarcely aspire to a standard of inevitability. This is, in our view, a discernable distinction in the degree of certainty, but not one which would be sufficient to preclude that the standard of necessity could be met. In our view, this reflects the fact that the necessity involved in Article 11.2 is not to be construed in some absolute and abstract sense, but as that appropriate to circumstances of practical reasoning intrinsic to a review process. Mathematical certainty is not required, but the conclusions should be demonstrable on the basis of the evidence adduced. This is as much applicable to a case relating to the prospect of recurrence of dumping as to one of present dumping."[634]

501. With respect to other findings of the Panel on *US – DRAMS* concerning "necessity" under Article 11, see paragraphs 490–491 above.

[632] Panel Report on *US – DRAMS*, para. 6.32.
[633] Panel Report on *US – DRAMS*, para. 6.34.
[634] Panel Report on *US – DRAMS*, para. 6.43.

(b) "injury"

502. In *US – DRAMS*, the Panel stated that "by virtue of note 9 of the AD Agreement, the term 'injury' in Article 11.2 'shall be interpreted in accordance with the provisions of' Article 3."[635] See further the excerpt quoted in paragraph 506 below.

(c) "likely to lead to continuation or recurrence"

503. The Panel on *US – DRAMS* considered Korea's claim that the test applied by the United States' authorities was inconsistent with the "likely to lead to continuation or recurrence" language of Article 11.2. The Panel noted that under United States' law, the competent authority will not revoke anti-dumping duties unless it is "satisfied that future dumping is *not likely*."[636] (emphasis added) Korea argued that this "not likely" test is inconsistent with Article 11.2, because Article 11.2 mentions a likelihood test only with respect to *injury*. Furthermore, Korea argued that, even if the "likely" standard, established under Article 11.2 only in the context of *injury*, applied also in the context of *dumping*, the United States' "not likely" test was in any case incompatible with the "likely" standard set forth in Article 11.2. The Panel found that the "'not likely'-standard is not in fact equivalent to, and falls decisively short of, establishing that dumping is 'likely to recur if the order is revoked'."[637] In reaching this finding, the Panel considered both the "clear conceptual difference between establishing something as a positive finding and failing to establish something as a negative finding"[638], and the common usage of the relevant terms.[639] The Panel noted that situations could exist where the "not likely" standard would be satisfied, while the "likely" standard would not be and concluded by stating that the United States' "not likely" test did not provide a "demonstrable basis for consistently and reliably determining that the likelihood criterion is satisfied".[640]

504. After finding that the United States' test of "not likely" was inconsistent with the "likely" test mandated by the *Anti-Dumping Agreement*, the Panel on *US – DRAMS* decided not to address the issue whether the "likely" standard in the *dumping context* (as opposed to the injury context, where it is explicitly established) is consistent with the terms of Article 11.2 of the *Anti-Dumping Agreement*. The Panel then made the following observations, stating that a "likelihood" standard, applied in the context of injury under Article 11.2, could be applicable also in the anti-dumping context. More specifically, the Panel held, *inter alia*, that "there could be reason to support a view that authorities are entitled to apply the same test concerning the likelihood of recurrence or continuation of dumping for both Article 11.2 and 11.3 reviews":

> "We note that Article 11.3 provides for termination of a definitive anti-dumping duty five years from its imposition. However, such termination is conditional. First, the terms of Article 11.3 itself lay down that this should occur unless the authorities determine that the expiry would be 'likely to lead to continuation or recurrence of dumping and injury.' Where there is a determination that both are likely, the duty may remain in force, and the five year clock is reset to start again from that point. Second, Article 11.3 provides also for another situation whereby this five year period can be otherwise effectively extended, viz in a situation where a review under paragraph 2 covering both dumping and injury has taken place. If, for instance, such a review took place at the four year point, it could effectively extend the sunset review until 9 years from the original determination. In the first case, we note that the provisions of Article 11.3 explicitly conditions the prolongation of the five year period on a finding that there is <u>likelihood</u> of dumping and injury continuing or recurring. In the second case, where there is reference to review under Article 11.2, there is no such explicit reference.
>
> However, we note that both instances of review have the same practical effect of prolonging the application of anti-dumping duties beyond the five year point of an initial sunset review. This at the very least suggests, in our view, that there could be reason to support a view that authorities are entitled to apply the same test concerning the likelihood of recurrence or continuation of dumping for both Article 11.2 and 11.3 reviews. There certainly appears to be nothing that explicitly provides to the contrary. Nor do we see any reason why this conclusion would be materially affected by whether or not the dumping review occurred in conjunction with an injury review. There is nothing in the text of Article 11 which suggests there should be some fundamental bifurcation of the applicable standard for dumping review contingent on whether there is also an Article 11.2 injury review being undertaken.
>
> We also note that 'likelihood' or 'likely' carries with it the ordinary meaning of 'probable'. That being so, it seems to us that a 'likely standard' amounts to the view that where recurrence of dumping is found to be probable as a consequence of revocation of an anti-dumping duty, this probability would constitute a proper basis for entitlement to maintain that anti-dumping duty in force. Without prejudice to the legal status of such a view in terms of its consistency with the terms of Article 11.2 – a matter on which we are not required to rule as noted in the text above – we feel obliged to at least take note that, at least as a practical matter, rejection of such a

[640] Panel Report on *US – DRAMS*, para. 6.47.

view would effectively amount to a systematic requirement that reviewing authorities are obliged to revoke anti-dumping duties precisely where doing so would render recurrence of dumping probable."[641]

(d) "warranted"

505. In deciding whether "Article 11.2 necessarily requires an investigating authority, following three years and six months' findings of no dumping, to find an ex officio Article 11.2 review of 'whether the injury would be likely to continue or recur if the duty were removed or varied' is 'warranted'"[642], the Panel on *US – DRAMS* stated whether such "injury" review would be "warranted" would be entirely dependent upon a determination of whether dumping will recur:

"A review of 'whether the injury would be likely to continue or recur if the duty were removed or varied' could include a review of whether (1) injury that is (2) caused by dumped imports would be likely to continue or recur if the duty were removed or varied. With regard to injury, we believe that an absence of dumping during the preceding three years and six months is not in and of itself indicative of the likely state of the relevant domestic industry if the duty were removed or varied. With regard to causality, an absence of dumping during the preceding three years and six months is not in and of itself indicative of causal factors other than the absence of dumping. If the only causal factor under consideration is three years and six months' no dumping, the issue of causality becomes whether injury caused by dumped imports will recur. This necessarily requires a determination of whether dumping will recur. Thus, the 'injury' review that [is believed to be] 'warranted' on the basis of three years and six months' no dumping would be entirely dependent upon a determination of whether dumping will recur. . . . The mere fact of three years and six months' findings of no dumping does not require the investigating authority to, in addition, self-initiate a review of 'whether the injury would be likely to continue or recur if the duty were removed or varied'."[643]

506. In a footnote to the statement quoted in paragraph 507 below, the Panel on *US – DRAMS* noted:

"[B]y virtue of note 9 of the AD Agreement, the term 'injury' in Article 11.2 'shall be interpreted in accordance with the provisions of' Article 3. Article 3.5 of the AD Agreement requires the establishment of a causal link between the dumped imports and the injury found to exist. Thus, we consider that the Article 11.2 examination of 'whether the injury would be likely to continue or recur if the duty were removed or varied' may also involve an examination of whether any injury that is found to be likely to continue or recur is caused by dumped imports. We can envisage circumstances, however, when an Article 11.2 injury review need not necessarily include an examination of causal link."[644]

507. The Panel on *EC – Tube or Pipe Fittings* understood the "phrase 'where warranted' in Article 11.2 to denote circumstances furnishing good and sufficient grounds for, or justifying, the self-initiation of a review. Where an investigating authority determines such circumstances to exist, an investigating authority must self-initiate a review. Such a review, once initiated, will examine whether continued imposition of the duty is necessary to offset dumping, whether the dumping would be likely to continue or recur, or both. Article 11.2 therefore provides a review mechanism to ensure that Members comply with the rule contained in Article 11.1."[645] As the Panel pointed out, "the determination of whether or not good and sufficient grounds exist for the self-initiation of a review necessarily depends upon the factual situation in a given case and will necessarily vary from case to case".[646]

(e) Relationship with other paragraphs of Article 11

508. The *US – DRAMS* Panel touched on the relationship between Article 11.1 and Article 11.2. See paragraph 494 above.

509. The relationship between Article 11.2 and Article 11.3 was also discussed in *US – DRAMS*. See the excerpts quoted in paragraphs 497 and 504 above. The relationship between Article 11.2 and footnote 22 to Article 11.3 was addressed by the Panel on *US – DRAMS*. See paragraph 498 above.

3. Article 11.3

(a) General

(i) Mandating rule / exception

510. The Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* considered that Article 11.3 lays down a mandatory rule with an exception and thus imposes a temporal limitation on the imposition of anti-dumping duties:

"Specifically, Members are required to terminate an anti-dumping duty within five years of its imposition '*unless*' the following conditions are satisfied: first, that a review be initiated before the expiry of five years from the date of the imposition of the duty; second, that in the review the authorities determine that the expiry of the duty would be likely to lead to continuation or recurrence of *dumping*; and third, that in the review the authorities determine that the expiry of the duty would be likely to

[642] Panel Report on *US – DRAMS*, para. 6.58.
[643] Panel Report on *US – DRAMS*, para. 6.59.
[644] Panel Report on *US – DRAMS*, fn 501.
[645] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.112.
[646] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.115.

lead to continuation or recurrence of *injury*. If any one of these conditions is not satisfied, the duty must be terminated.[647]"[648]

511. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* also viewed the continuation of an anti-dumping duty as "an exception to the otherwise mandated expiry of the duty after five years".[649]

(ii) Difference between original investigation and sunset reviews

512. With respect to the determination of a likelihood of recurrence or continuation of dumping and injury, the Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* noted that, as this likelihood determination is a prospective determination, "the authorities must undertake a forward-looking analysis and seek to resolve the issue of what would be likely to occur if the duty were terminated".[650] In this respect, the Appellate Body pointed to the important difference between original investigations and sunset reviews:

"In an original anti-dumping investigation, investigating authorities must determine whether *dumping exists* during the period of investigation. In contrast, in a sunset review of an anti-dumping duty, investigating authorities must determine whether the expiry of the duty that was imposed at the conclusion of an original investigation would be *likely to lead to continuation or recurrence of dumping*."[651]

(iii) Active role of investigating authorities

513. Based on an analysis of the various terms used in Article 11.3, the Appellate Body on *US – Corrosion-Resistant Steel Sunset Review*, then reached the following general conclusions:

"This language in Article 11.3 makes clear that it envisages a process combining *both* investigatory and adjudicatory aspects. In other words, Article 11.3 assigns an active rather than a passive decision-making role to the authorities. The words 'review' and 'determine' in Article 11.3 suggest that authorities conducting a sunset review must act with an appropriate degree of diligence and arrive at a reasoned conclusion on the basis of information gathered as part of a process of reconsideration and examination. In view of the use of the word 'likely' in Article 11.3, an affirmative likelihood determination may be made only if the evidence demonstrates that dumping would be probable if the duty were terminated – and not simply if the evidence suggests that such a result might be possible or plausible."[652]

514. The Panel on *US – Corrosion-Resistant Steel Sunset Review* also underlined the importance of the need for sufficient positive evidence on which to base the likelihood determination:

"The requirement to make a 'determination' concerning likelihood therefore precludes an investigating authority from simply assuming that likelihood exists. In order to continue the imposition of the measure after the expiry of the five-year application period, it is clear that the investigating authority has to determine, on the basis of positive evidence, that termination of the duty is likely to lead to continuation or recurrence of dumping and injury. An investigating authority must have a sufficient factual basis to allow it to draw reasoned and adequate conclusions concerning the likelihood of such continuation or recurrence."[653]

(iv) Positive evidence

515. The Panel on *US – Corrosion-Resistant Steel Sunset Review* expressed its view on the use of historical data as a basis for the inherently prospective likelihood determination of Article 11.3:

"Future 'facts' do not exist. The only type of facts that exist and that may be established with certainty and precision relate to the past and, to the extent they may be accurately recorded and evaluated, to the present. We recall that one of the fundamental goals of the *Anti-dumping Agreement* as a whole is to ensure that objective determinations are made, based, to the extent possible, on facts.[654] Thus, to the extent that it will rest upon a factual foundation, the prospective likelihood determination will inevitably rest on a factual foundation

[647] (*footnote original*) We note that Article 11.3 is textually identical to Article 21.3 of the *SCM Agreement*, except that, in Article 21.3, the word "countervailing" is used in place of the word "anti-dumping" and the word "subsidization" is used in place of the word "dumping". Given the parallel wording of these two articles, we believe that the explanation, in our Report in *US – Carbon Steel*, of the nature of the sunset review provision in the *SCM Agreement* also serves, *mutatis mutandis*, as an apt description of Article 11.3 of the *Anti-Dumping Agreement*. (Appellate Body Report, *US – Carbon Steel*, paras. 63 and 88)

[648] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 104.

[649] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 178.

[650] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 105.

[651] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 107. The Panel on *US – Corrosion-Resistant Steel Sunset Review* also pointed to the fact that orginal investigations and sunset reviews are distinct processes with different purposes and it stated that "[I]n light of the fundamental qualitative differences in the nature of these two distinct processes, [. . .] it would not be surprising to us that the textual obligations pertaining to each of the two processes may differ". Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.8.

[652] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 111. Also see Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 179.

[653] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.271. The Appellate Body agreed with this view. Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 114.

[654] (*footnote original*) See Panel Report, *United States – Countervailing Duties on Certain Corrosion-Resistant Carbon Steel Flat Products from Germany* ("*US – Carbon Steel* "), *WT/DS213/R and Corr.1, adopted 19 December 2002 as modified by Appellate Body Report*, supra, note 22, para. 8.94 and Panel Report, *US – Hot-Rolled Steel*, supra, note 204, para. 7.55.

relating to the past and present. The investigating authority must evaluate this factual foundation and come to a reasoned conclusion about likely future developments."[655]

516. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* adopted a similar approach to the need to base a prospective likelihood determination on "positive evidence":

"The requirements of 'positive evidence' must, however, be seen in the context that the determinations to be made under Article 11.3 are prospective in nature and that they involve a 'forward-looking analysis'.[656] Such an analysis may inevitably entail assumptions about or projections into the future. Unavoidably, therefore, the inferences drawn from the evidence in the record will be, to a certain extent, speculative. In our view, that some of the inferences drawn from the evidence on record are projections into the future does not necessarily suggest that such inferences are not based on 'positive evidence'."[657]

(b) No specific methodology

517. The Panel on *US – Corrosion-Resistant Steel Sunset Review* considered that Article 11.3 does not expressly prescribe any specific methodology for investigating authorities to use in making a likelihood determination in a sunset review:

"Similarly, we observe that Article 11.3 is silent as to how an authority should or must establish that dumping is likely to continue or recur in a sunset review. That provision itself prescribes no parameters as to any methodological requirements that must be fulfilled by a Member's investigating authority in making such a 'likelihood' determination."[658]

518. This view was confirmed by the Appellate Body on *US – Corrosion-Resistant Steel Sunset Review*. It thus considered that "no obligation is imposed on investigating authorities to calculate or rely on dumping margins in a sunset review."[659] According to the Appellate Body, "in a sunset review, dumping margins may well be relevant to, but they will not necessarily be conclusive of, whether the expiry of the duty would be likely to lead to continuation or recurrence of dumping".[660]

519. However, the Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* added, should investigating authorities choose to rely upon dumping margins in making their likelihood determination, the calculation of these margins must conform to the disciplines of Article 2 in general and Article 2.4 in particular:

"It follows that we disagree with the Panel's view that the disciplines in Article 2 regarding the calculation of dumping margins do not apply to the likelihood determination to be made in a sunset review under Article 11.3."[661]

520. The Panel on *US – Oil Country Tubular Goods Sunset Reviews* came to a similar conclusion with respect to the likelihood of injury determination. According to the Panel, obligations contained in the various paragraphs of Article 3 do not "normally" apply to sunset reviews:

"Just as the Appellate Body stated that an investigating authority is not required to make a dumping determination in a sunset review, we consider that an investigating authority is not required to make an injury determination in a sunset review. It follows, then, that the obligations set out in Article 3 do not normally apply to sunset reviews"[662]

521. However, the Panel was of the view that, to the extent that an investigating authority relies on a determination of injury when conducting a sunset review, the obligations of Article 3 would apply to that determination:

"If, however, an investigating authority decides to conduct an injury determination in a sunset review, or if it uses a past injury determination as part of its sunset determination, it is under the obligation to make sure that its injury determination or the past injury determination it is using conforms to the relevant provisions of Article 3.[663] For instance, Article 11.3 does not mention whether an investigating authority is required to calculate the price effect of future dumped imports on the prices of the domestic industry. In our view, this means that an investigating authority is not necessarily required to carry out that calculation in a sunset review. However, if the investigating authority decides to do such a calculation, then it would be bound by the relevant provisions of Article 3 of the Agreement. Similarly, if, in its sunset injury determinations, an investigating authority uses a price effect calculation made in the original investigation or in the intervening reviews, it has to assure the consis-

tency of that calculation with the existing provisions of Article 3."[664]

522. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* agreed with this approach by the Panel. The Appellate Body considered that "when Article 11.3 requires a determination as to the likelihood of continuation or recurrence of 'injury', the investigating authority must consider the continuation or recurrence of 'injury' as defined in footnote 9."[665] According to the Appellate Body, "it does not follow, however, from this single definition of 'injury', that all of the provisions of Article 3 are applicable in their entirety to sunset review determinations under Article 11.3"[666]:

> "In our view, however, the *Anti-Dumping Agreement* distinguishes between 'determination[s] of injury', addressed in Article 3, and determinations of likelihood of 'continuation or recurrence . . . of injury', addressed in Article 11.3. In addition, Article 11.3 does not contain any cross-reference to Article 3 to the effect that, in making the likelihood-of-injury determination, all the provisions of Article 3 – or any particular provisions of Article 3 – *must* be followed by investigating authorities. Nor does any provision of Article 3 indicate that, wherever the term 'injury' appears in the *Anti-Dumping Agreement*, a determination of injury must be made following the provisions of Article 3."[667]

523. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* concluded that "investigating authorities are not *mandated* to follow the provisions of Article 3 when making a likelihood-of-injury determination".[668] However, the Appellate Body added, this does not imply that in a sunset review determination, an investigating authority is never required to examine any of the factors listed in the paragraphs of Article 3:

> "Certain of the analyses mandated by Article 3 and necessarily relevant in an original investigation may prove to be probative, or possibly even required, in order for an investigating authority in a sunset review to arrive at a 'reasoned conclusion'. In this respect, we are of the view that the fundamental requirement of Article 3.1 that an injury determination be based on 'positive evidence' and an 'objective examination' would be equally relevant to likelihood determinations under Article 11.3. It seems to us that factors such as the volume, price effects, and the impact on the domestic industry of dumped imports, taking into account the conditions of competition, may be relevant to varying degrees in a given likelihood-of-injury determination. An investigating authority may also, in its own judgement, consider other factors contained in Article 3 when making a likelihood-of-injury determination. But the necessity of conducting such an analysis in a given case results from the requirement imposed by *Article 11.3* – not Article 3 – that a likelihood-of-injury determination rest on a 'sufficient factual basis' that allows the agency to draw 'reasoned and adequate conclusions'."[669]

(c) Use of presumptions in a likelihood determination

524. The Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* clearly stated that the use of presumptions may be inconsistent with an obligation to make a particular determination in each case using positive evidence. It considered "that a firm evidentiary foundation is required in each case for a proper determination under Article 11.3 of the likelihood of continuation or recurrence of dumping. Such a determination cannot be based solely on the mechanistic application of presumptions."[670]

525. The Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* saw no problem in investigating authorities being instructed to examine, in every sunset review, dumping margin and import volumes.[671] However, it noted that the significance and probative value of the two factors for a likelihood determination in a sunset review will necessarily vary from case to case. It stated that it "would have difficulty accepting that dumping margins and import volumes are always 'highly probative' in a sunset review by USDOC if this means that either or both of these factors are presumed, by themselves, to constitute sufficient evidence that the expiry of the duty would be likely to lead to continuation or recurrence of dumping"[672] The Appellate Body thus concluded that the consistency of the provisions of a measure with Article 11.3 hinges upon whether those provisions instruct the investigating authority to treat "dumping margins and/or import volumes as determinative or conclusive, on the one hand, or merely

---

[664] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7. 274.

[665] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 276.

[666] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 277.

[667] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 278.

[668] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 281.

[669] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 284.

[670] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 178.

[671] The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* was of the view that "'volume of dumped imports' and 'dumping margins', before and after the issuance of anti-dumping duty orders, are highly important factors for any determination of likelihood of continuation or recurrence of dumping in sunset reviews, although other factors may also be as important, depending on the circumstances of the case". Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 208.

[672] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 177

indicative or probative, on the other hand, of the likelihood of future dumping."[673]

526. The Panel on *US – Oil Country Tubular Goods Sunset Reviews* considered that a scheme that attributes a "determinative" / "conclusive" value to certain factors in sunset determinations – as opposed to only an indicative value – is likely to violate Article 11.3 of the *Anti-Dumping Agreement*.[674] On appeal, the Appellate Body considered that the Panel had correctly articulated the standard for determining whether a measure was inconsistent, as such, with Article 11.3 of the *Anti-Dumping Agreement*.[675]

527. The Panel on *US – Oil Country Tubular Goods Sunset Reviews* considered that both the so-called deemed waiver and affirmative waiver provisions of United States law were inconsistent with Article 11.3 because they required an authority to make an affirmative determination of likelihood of continuation or recurrence of dumping, without taking into consideration the facts submitted by the exporter filing an incomplete submission, or without any further inquiry in the event where the exporter filed no submission or declared its intention not to participate in the review.[676] On appeal, the Appellate Body agreed with the Panel's analysis:

> "Because the waiver provisions require the USDOC to arrive at affirmative company-specific determinations without regard to any evidence on record, these determinations are merely *assumptions* made by the agency, rather than findings supported by evidence. The United States contends that respondents waiving the right to participate in a sunset review do so 'intentionally', with full knowledge that, as a result of their failure to submit evidence, the evidence placed on the record by the domestic industry is likely to result in an unfavourable determination on an order-wide basis. In these circumstances, we see no fault in making an unfavourable order-wide determination by taking into account evidence provided by the domestic industry in support thereof. However, the USDOC also takes into account, in such circumstances, statutorily-mandated *assumptions*. Thus, even assuming that the USDOC takes into account the totality of record evidence in making its order-wide determination, it is clear that, as a result of the operation of the waiver provisions, certain *order-wide* likelihood determinations made by the USDOC will be based, at least in part, on statutorily-mandated *assumptions* about a company's likelihood of dumping. In our view, this result is inconsistent with the obligation of an investigating authority under Article 11.3 to 'arrive at a reasoned conclusion' on the basis of 'positive evidence'."[677]

(d) Order-wide basis of a likelihood determination

528. In its report on *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body addressed the question whether authorities must make a separate determination, for each individual exporter or producer, on whether the expiry of the duty would be likely to lead to continuation or recurrence of dumping by that exporter or producer or whether it would be possible to make a single order-wide determination on whether revocation of a particular anti-dumping duty order would be likely to lead to continuation or recurrence of dumping. The Appellate Body considered that, on its face, Article 11.3 does not oblige investigating authorities in a sunset review to make "company-specific" likelihood determinations:

> "We reiterate that Article 11.3 does not prescribe any particular methodology to be used by investigating authorities in making a likelihood determination in a sunset review. In particular, Article 11.3 does not expressly state that investigating authorities must determine that the expiry of the duty would be likely to lead to dumping *by each known exporter or producer concerned*. In fact, Article 11.3 contains no express reference to individual exporters, producers, or interested parties. This contrasts with Article 11.2, which does refer to 'any interested party' and '[i]nterested parties'. We also note that Article 11.3 does not contain the word 'margins', which might implicitly refer to individual exporters or producers. On its face, Article 11.3 therefore does not oblige investigating authorities in a sunset review to make 'company-specific' likelihood determinations in the manner suggested by Japan."[678]

---

[673] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 178.

[674] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, paras. 7.142–7.143.

[675] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 197.

[676] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, paras. 7.93–7.99.

[677] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 234.

[678] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 149. The Appellate Body rejected the argument that Article 6.10 would require such company-specific sunset review determinations:

> "We have already concluded that investigating authorities are not *required* to calculate or rely on *dumping margins* in making a likelihood determination in a sunset review under Article 11.3. This means that the requirement in Article 6.10 that dumping margins, 'as a rule', be calculated 'for each known exporter or producer concerned' is not, in principle, relevant to sunset reviews. Therefore, the reference in Article 11.4 to '[t]he provisions of Article 6 regarding evidence and procedure' does not import into Article 11.3 an obligation for investigating authorities to calculate dumping margins (on a company-specific basis or otherwise) in a sunset review. Nor does Article 11.4 import into Article 11.3 an obligation for investigating authorities to make their likelihood determination on a company-specific basis."
>
> Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 155.

(e) No prescribed time-frame for likelihood of continuation or recurrence of injury

529. The Panel on *US – Oil Country Tubular Goods Sunset Reviews* noted that Article 11.3 of the *Anti-Dumping Agreement* does not prescribe any time-frame for likelihood of continuation or recurrence of injury; nor does it require investigating authorities to specify the time-frame on which their likelihood determination is based:

> "As we already stated, Article 11.3 does not impose a particular time-frame on which the investigating authority has to base its likelihood determination. Further, in our view, the investigating authority does not have to base its likelihood determination on a uniform time-frame with respect to each injury factor that it takes into consideration. The time-frame regarding different injury factors may be different from one another depending on the circumstances of each sunset review. For instance, in a case where the exporters have excessive inventories, the investigating authority's evaluation of likely volume of dumped imports can be based on a relatively short time-frame. On the other hand, an analysis regarding the cash flows or productivity of the domestic industry may necessarily have to be based on a longer time-frame."[679]

530. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* agreed with the Panel that "an assessment regarding whether injury is likely to recur that focuses 'too far in the future would be highly speculative'[680], and that it might be very difficult to justify such an assessment. However, like the Panel, we have no reason to believe that the standard of a 'reasonably foreseeable time' set out in the United States statute is inconsistent with the requirements of Article 11.3."[681] The Appellate Body rejected the argument that the requirement set out in Article 3.7 that the threat of material injury be "imminent" is to be imported into Article 11.3 in the form of a temporal limitation on the time-frame within which "injury" must be determined to continue or recur. The Appellate Body considered that "sunset reviews are not subject to the detailed disciplines of Article 3, which include the specific requirement of Article 3.7".[682]

531. In addition, the Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* rejected the argument that an authority would be required to specify the relevant time-frame for injury to continue or recur for the authority's determination to be a "properly reasoned and supported determination":

> "As we have noted above, the text of Article 11.3 does not establish any requirement for the investigating authority to specify the timeframe on which it bases its determination regarding injury. Thus, the mere fact that the timeframe of the injury analysis is not presented in a sunset review determination is not sufficient to undermine that determination. Article 11.3 requires that a determination of likelihood of continuation or recurrence of injury rest on a sufficient factual basis to allow the investigating authority to draw reasoned and adequate conclusions. A determination of injury can be properly reasoned and rest on a sufficient factual basis even though the timeframe for the injury determination is not explicitly mentioned."[683]

(f) Applicability of procedural obligations

(i) Evidentiary standards for initiation

532. The Panel on *US – Corrosion-Resistant Steel Sunset Review* rejected the argument that the same evidentiary standards that apply to the self-initiation of original investigations under Article 5.6 also apply to the self-initiation of sunset reviews under Article 11.3. The Panel based itself on the text of Article 11.3:

> "As Japan concedes, Article 11.3, on its face, does not mention, either explicitly or by way of reference, any evidentiary standard that should or must apply to the self-initiation of sunset reviews. Article 11.3 contemplates initiation of a sunset review in two alternative ways, as is evident through the use of the word 'or'. Either the authorities make their determination in a review initiated 'on their own initiative', or they make their determination in a review initiated 'upon a duly substantiated request made by or on behalf of the domestic industry'. Although Article 11.3 provides for a certain qualification regarding initiations based on complaints lodged by the domestic industry – that such requests be 'duly substantiated' – the text clearly indicates that this qualification is germane only to that specific situation and does not apply to self-initiations. Consequently, since the drafters did not set forth any evidentiary requirements for the self-initiation of sunset reviews in the text of Article 11.3 itself, at first blush, it seems to us that they intended not to impose any evidentiary standards in respect of the self-initiation of a sunset review."[684]

533. The Panel on *US – Corrosion-Resistant Steel Sunset Review* found further support for its conclusion in the absence of any cross-referencing in Article 11 to the evidentiary standards concerning original investigations in Article 5.6:

---

[679] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7.187

[680] (*footnote original*) Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7.185.

[681] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 360.

[682] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 358.

[683] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 364.

[684] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.26.

"Although paragraphs 4 and 5 of Article 11 contain several cross-references to other articles in the *Anti-dumping Agreement*, no such cross-reference has been made in the text of Article 11 to Article 5.6. These cross-references (as well as other cross-references in the *Anti-dumping Agreement*, such as, for example, in Article 12.3) indicate that, when the drafters intended to make a particular provision also applicable in a different context, they did so explicitly. Therefore, their failure to include a cross-reference in the text of Article 11.3, or, for that matter, in any other paragraph of Article 11, to Article 5.6 (or *vice versa*) demonstrates that they did not intend to make the evidentiary standards of Article 5.6 applicable to sunset reviews."[685]

(ii) De minimis standard in sunset reviews

534. The Panel on *US – Corrosion-Resistant Steel Sunset Review* rejected the argument that the *Anti-Dumping Agreement* requires that the same de minimis standard that applies to investigating authorities under Article 5.8 also applies to sunset reviews under Article 11.3:

"On its face, Article 11.3 does not provide, either explicitly or by way of reference, for any *de minimis* standard in making the likelihood of continuation or recurrence of dumping determinations in sunset reviews. Therefore, Article 11.3 itself is silent as to whether the *de minimis* standard of Article 5.8 (or any other *de minimis* standard) is applicable to sunset reviews. However, '[s]uch silence does not exclude the possibility that the requirement was intended to be included by implication.'

We therefore look to the context of Article 11.3. The immediate context of Article 11.3 does not, however, yield a different result. Article 11.1 sets out the general rule that an anti-dumping duty can remain in force only as long as and to the extent necessary to counteract injurious dumping. Articles 11.2 and 11.3 reflect the application of that general rule under different circumstances. Article 11.4 contains a cross-reference to Article 6, which sets forth rules relating to evidence and procedure applicable to investigations. Given that, similar to Article 6, Article 5 also contains rules applicable to original investigations, we consider the absence in Article 11.4 of a similar cross-reference to Article 5 to indicate that the drafters did not intend to have the obligations in Article 5 apply also to sunset reviews."[686]

535. In the view of the Panel on *US – Corrosion-Resistant Steel Sunset Review*, it was clear that Article 5.8 did not suggest that the de minimis standard set out for investigations also applied to sunset reviews:

"In particular, the text of paragraph 8 of Article 5 refers expressly to the termination of an *investigation* in the event of *de minimis* dumping margins. There is, therefore, no textual indication in Article 5.8 that would suggest or require that the obligation in Article 5.8 also applies to sunset reviews. Nor is there any such suggestion or requirement in the other provisions of Article 5."[687]

536. On the basis of this textual analysis of the relevant provisions of the *Anti-Dumping Agreement*, the Panel on *US – Corrosion-Resistant Steel Sunset Review* concluded that the 2 per cent *de minimis* standard of Article 5.8 does not apply in the context of sunset reviews.[688]

(iii) Cumulation

Whether cumulation is permissible in sunset reviews

537. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* examined the question whether cumulation is permissible in sunset reviews. It found that, while Articles 3.3 and 11.3 are silent on this issue, this silence "cannot be understood to imply that cumulation is prohibited in sunset reviews".[689] The Appellate Body, recalling the apparent rationale behind the practice of cumulation in injury investigations as discussed by the Appellate Body on *EC – Tube or Tube or Pipe Fittings*[690] considered that this rationale is equally applicable to likelihood of injury determinations in sunset reviews. The Appellate Body thus concluded that cumulation in sunset reviews is permissible:

"Therefore, notwithstanding the differences between original investigations and sunset reviews, cumulation remains a useful tool for investigating authorities in both inquiries to ensure that all sources of injury and their cumulative impact on the domestic industry are taken into account in an investigating authority's determination as to whether to impose – or continue to impose – anti-dumping duties on products from those sources. Given the rationale for cumulation – a rationale that we consider applies to original investigations as well as to sunset reviews – we are of the view that it would be anomalous for Members to have limited authorization for cumulation in the *Anti-Dumping Agreement* to original investigations".[691]

---

[685] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.27. With respect to Article 5.6, the Panel noted that "the text of Article 5.6 gives no indication that its evidentiary standards apply to anything but the self-initiation of investigations". Panel Report on *United States – Corrosion Resistant Steel Sunset Review*, para. 7.36.

[686] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 7.67–7.68.

[687] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.70.

[688] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.85.

[689] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 294.

[690] See Appellate Body Report on *EC – Tube or Tube or Pipe Fittings*, para. 116.

[691] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 297.

Non-application of negligibility standards

538. The Panel on *US – Corrosion-Resistant Steel Sunset Review* considered that the negligibility standards under Article 5.8 for the purposes of a cumulative injury assessment under Article 3.3 in original investigations, do not apply to sunset reviews under Article 11.3:

> "Article 11.3 speaks of a review to determine, *inter alia*, the likelihood of continuation or recurrence of injury. On its face, Article 11.3 does not mention, either explicitly or by way of reference, any negligibility standard that applies to the likelihood of continuation or recurrence of injury determinations in sunset reviews. Nor does the immediate context of Article 11.3 yield a different result. Article 11.1 sets out the general rule that an anti-dumping duty can remain in force only as long as and to the extent necessary to counteract injurious dumping. Articles 11.2 and 11.3 reflect the application of that general rule under different circumstances. Although paragraphs 4 and 5 of Article 11 contain several cross-references to other articles of the *Anti-Dumping Agreement*, no such cross-reference has been made to Articles 3.3 or 5.8."[692]

539. The Panel on *US – Corrosion-Resistant Steel Sunset Review* considered that "Article 3.3, by its own terms, is limited in application to investigations and does not apply to sunset reviews. It follows that the cross-reference in Article 3.3 to the negligibility standard in Article 5.8 does not apply to sunset reviews".[693]

540. The Panel on *US – Oil Country Tubular Goods Sunset Reviews* similarly found that cumulation, when used in sunset reviews, does not need to satisfy the conditions of Article 3.3 because "by its own terms Article 3.3 limits its scope of application to investigations".[694] The Appellate Body agreed with the Panel "that the conditions of Article 3.3 do not apply to likelihood-of-injury determinations in sunset reviews".[695]

(g) "likely"

541. The *US – DRAMS* Panel interpreted the term "likely" in Article 11.2 with reference to Article 11.3. See paragraph 504 above.

542. The Appellate Body on *US – Oil Country Tubular Goods Sunset Reviews* considered "that the 'likely' standard of Article 11.3 applies to the overall determinations regarding dumping and injury; it need not necessarily apply to each factor considered in rendering the overall determinations on dumping and injury".[696]

(h) Relationship with other paragraphs of Article 11

543. The relationship between Article 11.3 and Article 11.2 was addressed in *US – DRAMS*. See paragraphs 497 and 504 above.

544. The Panel on *US – DRAMS* also referred to footnote 22 to Article 11.3 in interpreting Article 11.2. See paragraph 498 above.

4. Relationship with other Articles

(a) Article 3

545. The Panel on *US – DRAMS* discussed the relationship between footnote 9 to Article 3 and Article 11.2. See paragraph 506 above.

546. The Panel on *US* – DRAMS also discussed the relationship between Articles 3.5 and 11.2. See paragraph 506 above.

XII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Public Notice and Explanation of Determinations

12.1 When the authorities are satisfied that there is sufficient evidence to justify the initiation of an anti-dumping investigation pursuant to Article 5, the Member or Members the products of which are subject to such investigation and other interested parties known to the investigating authorities to have an interest therein shall be notified and a public notice shall be given.

12.1.1 A public notice of the initiation of an investigation shall contain, or otherwise make available through a separate report[23], adequate information on the following:

(*footnote original*) [23] Where authorities provide information and explanations under the provisions of this Article in a separate report, they shall ensure that such report is readily available to the public.

(i) the name of the exporting country or countries and the product involved;

---

[692] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.95.

[693] Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.102. The Panel was of the view that:

> "even assuming *arguendo* that the provisions of Article 3 may be generally applicable throughout the *Anti-dumping Agreement*, an issue we need not and do not decide, this would not necessarily make every single provision in that article applicable throughout the Agreement. An article that has been found generally to apply throughout the Agreement may well contain certain specific provisions whose scope of application is limited, by their own terms, in certain respects. In our view, Article 3.3 is such a specific provision, which limits its scope of application by its own terms."

Panel Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 7.101.

[694] Panel Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 7.336.

[695] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 302.

[696] Appellate Body Report on *US – Oil Country Tubular Goods Sunset Reviews*, para. 323.

(ii) the date of initiation of the investigation;

(iii) the basis on which dumping is alleged in the application;

(iv) a summary of the factors on which the allegation of injury is based;

(v) the address to which representations by interested parties should be directed;

(vi) the time-limits allowed to interested parties for making their views known.

12.2 Public notice shall be given of any preliminary or final determination, whether affirmative or negative, of any decision to accept an undertaking pursuant to Article 8, of the termination of such an undertaking, and of the termination of a definitive anti-dumping duty. Each such notice shall set forth, or otherwise make available through a separate report, in sufficient detail the findings and conclusions reached on all issues of fact and law considered material by the investigating authorities. All such notices and reports shall be forwarded to the Member or Members the products of which are subject to such determination or undertaking and to other interested parties known to have an interest therein.

12.2.1 A public notice of the imposition of provisional measures shall set forth, or otherwise make available through a separate report, sufficiently detailed explanations for the preliminary determinations on dumping and injury and shall refer to the matters of fact and law which have led to arguments being accepted or rejected. Such a notice or report shall, due regard being paid to the requirement for the protection of confidential information, contain in particular:

(i) the names of the suppliers, or when this is impracticable, the supplying countries involved;

(ii) a description of the product which is sufficient for customs purposes;

(iii) the margins of dumping established and a full explanation of the reasons for the methodology used in the establishment and comparison of the export price and the normal value under Article 2;

(iv) considerations relevant to the injury determination as set out in Article 3;

(v) the main reasons leading to the determination.

12.2.2 A public notice of conclusion or suspension of an investigation in the case of an affirmative determination providing for the imposition of a definitive duty or the acceptance of a price undertaking shall contain, or otherwise make available through a separate report, all relevant information on the matters of fact and law and reasons which have led to the imposition of final measures or the acceptance of a price undertaking, due regard being paid to the requirement for the protection of confidential information. In particular, the notice or report shall contain the information described in subparagraph 2.1, as well as the reasons for the acceptance or rejection of relevant arguments or claims made by the exporters and importers, and the basis for any decision made under subparagraph 10.2 of Article 6.

12.2.3 A public notice of the termination or suspension of an investigation following the acceptance of an undertaking pursuant to Article 8 shall include, or otherwise make available through a separate report, the non-confidential part of this undertaking.

12.3 The provisions of this Article shall apply *mutatis mutandis* to the initiation and completion of reviews pursuant to Article 11 and to decisions under Article 10 to apply duties retroactively.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

1. Article 12.1

(a) General

547. In *Guatemala – Cement II*, Mexico argued that Guatemala had acted inconsistently with the requirements of Article 12.1 by failing to publish a notice of initiation and notify Mexico and its exporter when the Guatemalan authority was satisfied that there was sufficient evidence to justify the initiation of an investigation. The Panel clarified the meaning of Article 12.1:

> "[T]his provision can most reasonably be read to require notification and public notice once a Member has decided to initiate an investigation. This interpretation is confirmed by the fact that the public notice to be provided is a 'notice of initiation of an investigation'. We can conceive of no logical reason why the AD Agreement would require a Member to publish a notice of the initiation of an investigation *before* the decision had been taken that such an investigation should be initiated."[697]

[697] Panel Report on *Guatemala – Cement II*, para. 8.87.

548. The Panel further rejected Mexico's argument that Guatemala was in violation of Article 12.1 by failing to satisfy itself as to the sufficiency of the evidence before giving notice of initiation, stating:

> "Given the function and context of Article 12.1 in the AD Agreement, we interpret this provision as imposing a procedural obligation on the investigating agency to publish a notice and notify interested parties after it has taken a decision that there is sufficient evidence to proceed with an initiation. The Panel is of the view that Article 12.1 is not concerned with the substance of the decision to initiate an investigation, which is dealt with in Article 5.3. By issuing a public notice of initiation in the case before us, the Guatemalan authorities complied with their procedural obligation under Article 12.1 to notify known interested parties and publish a public notice after they had decided to initiate an investigation. Whether or not Guatemala was justified in initiating an investigation on the basis of the evidence before it is an issue governed by Article 5.3."[698]

549. The Panel on *Argentina – Poultry Anti-Dumping Duties* rejected the argument that by fulfilling the requirement to publish a notice of initiation of an investigation, a Member has fulfilled the obligation to notify. According to the Panel, Article 12.1 clearly imposes two separate obligations, one to notify and another to give public notice, and it considered that these separate obligations "must both be fulfilled in any given investigation".[699]

(b) Obligation to notify "interested parties known to the investigating parties to have an interest" in the investigation

550. The Panel on *Argentina – Poultry Anti-Dumping Duties* considered that, by definition, "interested parties" necessarily have an interest in the investigation and should therefore be notified if they are known to the investigating authorities. The Panel rejected the argument that absence of contact details for such interested parties implied that the authority was not able to comply with its notification obligation:

> "We accept that there may be circumstances in which an investigating authority may not have sufficient information to allow it to notify all interested parties known to have an interest in an investigation. In this sense, the fact that an exporter is 'known' by the investigating authority to have an interest in an investigation does not necessarily mean that sufficient details concerning the exporter are 'known' to the investigating authority such that it may make the Article 12.1 notification. In other words, knowledge of an exporter's interest in an investigation does not necessarily imply knowledge of contact details regarding that exporter. In such circumstances, however, we consider that the nature of the Article 12.1 notification obligation is such that the investigating authority should make all reasonable efforts to obtain the requisite contact details. Sending a letter with only a very general request for assistance, without specifying the exporters for which contact details are required, does not satisfy the need to make all reasonable efforts."[700]

(c) Article 12.1.1

(i) General

551. In *Guatemala – Cement II*, Guatemala argued that even if a public notice itself is insufficient, a separate report can satisfy the requirements of Article 12.1.1. The Panel disagreed on the basis of the following analysis:

> "There is no reference to a separate report in the public notice of initiation. Under Article 12.1.1, it is the 'public notice', and not the Member, that must 'make available through a separate report', certain information. We take this to mean that the public notice must at a minimum refer to a separate report. This conclusion is logical in that the separate report is a substitute for certain elements of the public notice and thus should perform a notice function comparable to that of the public notice itself. If there were no reference to a separate report in the public notice, how would the public and the interested parties concerned become aware of its existence? If the public and interested parties do not know of the existence of the report, how can it be considered that the required information was properly made available to them?"[701]

552. In support of its proposition that in order to fulfil the requirements of Article 12.1.1, the public notice must, at a minimum, refer to a separate report, the Panel referred to footnote 23 of the *Anti-Dumping Agreement*, and stated that "[i]t cannot be said that the separate report was 'readily available' to the public, if the public is not informed about where, when and how to have access to this report, leave alone if they were not even publicly informed of its existence."[702]

553. In *Guatemala – Cement II*, the Panel rejected Guatemala's argument that the alleged violations of Articles 5.5, 12.1.1 and 6.1.3, even if found to be violations, had not affected the course of the investigation, and thus: (a) the alleged violations were not harmful according to the principle of harmless error; (b) Mexico "convalidated" the alleged violations by not objecting immediately after their occurrence; and (c) the alleged violations did not cause nullification or impairment of

[698] Panel Report on *Guatemala – Cement II*, para. 8.89.
[699] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.133.
[700] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.132.
[701] Panel Report on *Guatemala – Cement II*, para. 8.95.
[702] Panel Report on *Guatemala – Cement II*, para. 8.96.

benefits accruing to Mexico under the *Anti-Dumping Agreement*. See paragraphs 276–279 above.

(ii) Article 12.1.1(iv): "a summary of the factors on which the allegation of injury is based"

554. The Panel on *Mexico – Corn Syrup* rejected the argument that the notice of initiation of an investigation must set forth the investigating authority's conclusion regarding the relevant domestic industry, and the bases on which that conclusion was reached. The Panel stated:

> "Article 12.1.1(iv) merely requires that the notice of initiation contain 'a *summary* of the factors on which the *allegation* of injury is based' (emphasis added). It does not require a summary of the *conclusion* of the investigating authority regarding the definition of the relevant domestic industry. Nor does it require a summary of the factors and analysis on which the investigating authority based that conclusion. Still less does it require a summary of the factors and analysis on which the investigating authority based its conclusion regarding exclusion of some producers from consideration as the relevant domestic industry. In other words, in our view, Article 12.1.1 cannot reasonably be read to require that the notice of initiation contain an explanation of the factors underlying, or the investigating authority's conclusion regarding, the definition of the relevant domestic industry."[703]

555. The Panel on *Mexico – Corn Syrup* noted that "a notice of preliminary or final determination must set forth explanations for *all* material elements of the determination. A notice of initiation, on the other hand, pursuant to Article 12.1, must set forth specific information regarding certain factors, but need not contain explanations of or reasons for the resolution of *all* questions of fact underlying the determination that there is sufficient evidence to justify initiation."[704]

2. Article 12.2

(a) General

556. Regarding an explanation in public notices of the reason for a particular period for data collection, the Committee on Anti-Dumping Practices adopted a recommendation at its meeting of 4–5 May 2000. See paragraph 8 above.

(b) Article 12.2.1

557. In *Guatemala – Cement II*, Article 12.2.1 was referred to as part of the context of Article 6.1. See paragraph 310 above.

(c) Article 12.2.2

558. Rejecting the view that Article 12.2.2 requires explanations relating to initiation of the investigation to be set out in the notice of final determination, the Panel on *EC – Bed Linen* stated:

> "There is no reference to the initiation decision among the elements to be addressed in notices under Article 12.2. Moreover, in our view, it would be anomalous to interpret Article 12.2 as also requiring, in addition to the detailed information concerning the decisions of which notice is being given, explanations concerning the initiation of the investigation, of which notice has previously been given under Article 12.1. This is particularly the case with respect to elements which are not within the scope of the information to be disclosed in the notice of initiation itself."[705]

559. The Panel on *EC – Bed Linen* concluded that "[w]e do not believe that Article 12.2.2 requires a Member to explain, in the notice of final determination, aspects of its decision to initiate the investigation in the first place."[706]

560. The Panel on *EC – Tube or Pipe Fittings* considered that the findings and conclusions on issues of fact and law which are to be included in the public notices, or separate report, are those considered "material" by the investigating authority:

> "We understand a 'material' issue to be an issue that has arisen in the course of the investigation that must necessarily be resolved in order for the investigating authorities to be able to reach their determination. We observe that the list of topics in Article 12.2.1 is limited to matters associated with the determinations of dumping and injury, while Article 12.2.2 is more generally phrased ('all relevant information on matters of fact and law and reasons which have led to the imposition of final measures, or the acceptance of a price undertaking'). Nevertheless, the phrase 'have led to', implies those matters on which a factual or legal determination must necessarily be made in connection with the decision to impose a definitive anti-dumping duty. While it would certainly be desirable for an investigating authority to set out steps it has taken with a view to exploring possibilities of constructive remedies, such exploration is not a matter on which a factual or legal determination must necessarily be made since, at most, it might lead to the imposition of remedies other than anti-dumping duties."[707]

3. Relationship with other Articles

(a) General

561. In *Guatemala – Cement II*, the Panel considered it unnecessary to examine Mexico's claim of a violation

[703] Panel Report on *Mexico – Corn Syrup*, para. 7.87.
[704] Panel Report on *Mexico – Corn Syrup*, para. 7.103.
[705] Panel Report on *EC – Bed Linen*, para. 6.260.
[706] Panel Report on *EC – Bed Linen*, para. 6.260.
[707] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.424.

of Articles 12.2 and 12.2.2 because "the issue of Guatemala's' compliance with the transparency obligations deriving from its decision to impose definitive anti-dumping measures on imports of cement from Mexico would only be relevant if the decision to impose the measure itself had been consistent with the AD Agreement."[708]

562. The Panel on *US – Softwood Lumber VI* held a similar view, considering that if it were to find no violation with respect to a particular specific claim, such a conclusion would be based on the USITC's published determination which was then *ipso facto* sufficient. On the contrary, the Panel considered that if it did find a violation of a specific substantive requirement, the question of whether the notice of the determination "sufficient" under Article 12.2.2 of the AD Agreement would be immaterial:

> "In evaluating these claims, we note that our conclusions with respect to each of the alleged substantive violations asserted by Canada rest on our examination of the USITC's published determination, which constitutes the notices provided by the United States under Article 12.2.2 of the AD Agreement and Article 22.5 of the SCM Agreement with respect to the injury determination in this case. No additional materials have been cited to us with respect to the determination for consideration in determining whether or not the USITC's determination are consistent with the relevant provisions of the Agreements. Thus, if we find no violation with respect to a particular specific claim, such a conclusion must rest on the USITC's published determination. In this circumstance, it is clear to us that no violation of Articles 12.2.2 and 22.5 could be found to exist in this case, where it is not disputed that the USITC determination accurately reflects the analysis and determination in the investigations. On the other hand, if we find a violation of a specific substantive requirement, the question of whether the notice of the determination is 'sufficient' under Article 12.2.2 of the AD Agreement or Article 22.5 of the SCM Agreement is, in our view, immaterial."[709]

(b) Article 1

563. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 12. The Panel then opined that that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 1, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[710] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

(c) Article 2

564. In *US – Stainless Steel*, after having found that there was inconsistency with Article 2.4.1 if an unnecessary "double conversion" was carried out in order to calculate the prices of local sales which were to be compared to alleged dumping exports (see paragraphs 69–70 above and paragraph 634 below), the Panel considered it unnecessary to examine the claim on the same factual basis under Article 12, referring to a finding of the Appellate Body concerning judicial economy.[711]

(d) Article 3

565. In *Thailand – H-Beams*, the Appellate Body referred to Article 12 in interpreting Article 3.1. See paragraph 112 above.

566. The Panel on *EC – Bed Linen*, after finding a violation of Article 3.4 by the European Communities, found it "neither necessary nor appropriate" to make a finding with respect to a claim of inadequate notice under Article 12.2.2. The Panel held that while a notice may adequately explain the determination that was made, the adequacy of the notice is nevertheless meaningless where the determination was substantively inconsistent with the relevant legal obligations. Furthermore, even if the notice itself was inconsistent with the *Anti-Dumping Agreement*, such a finding "does not add anything to the finding of violation, the resolution of the dispute before us, or to the understanding of the obligations imposed by the AD Agreement."[712]

(e) Article 5

567. The Panel on *Guatemala – Cement II* touched on the relationship between Articles 5.3 and 12.1. See paragraph 548 above.

568. The Panel on *Thailand – H-Beams* compared the notification requirements under Articles 5.5 and 12. See paragraph 304 above.

(f) Article 6

569. In *Guatemala – Cement II*, the Panel referred to Article 12.2 in rejecting Mexico's claim of a violation of Articles 6.1, 6.2 and 6.9. See paragraph 313 above.

---

[708] Panel Report on *Guatemala – Cement II*, para. 8.291. Also see Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.207.

[709] Panel Report on *US – Softwood Lumber VI*, para. 7.41.

[710] Panel Report on *Guatemala – Cement II*, para. 8.296.

[711] Panel Report on *US – Stainless Steel*, para. 6.55. The Panel cited Appellate Body Report on *US – Wool Shirts and Blouses*, p. 19. With respect to judicial economy in general, see the Chapter on the *DSU*, Section XXXVI.F.

[712] Panel Report on *EC – Bed Linen*, para. 6.259. See also Panel Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 6.40; and Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.293.

570. The Panel, in *Argentina – Ceramic Tiles,* referred to Articles 6.5 and Article 12 of the *Anti-Dumping Agreement* as support of its conclusion that an investigating authority may rely on confidential information in making determinations while respecting its obligation to protect the confidentiality of that information. See paragraph 416 above.

(g) Article 9

571. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 12. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 9, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[713] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

(h) Article 15

572. The Panel on *EC – Tube or Pipe Fittings* considered that while it would certainly be desirable for an investigating authority to set out the steps it has taken with a view to exploring the possibilities for constructive remedies, but that "such exploration is not a matter on which a factual or legal determination must necessarily be made since, at most, it might lead to the imposition of remedies other than anti-dumping duties".[714] The Panel concluded that the elements of Article 15 were not of a "material" nature and thus did not consider that "the European Communities erred by not treating these elements as 'material' within the meaning of that term used in Article 12 and [we] thus do not view it as having erred by not having included these in its published final determination".[715]

(i) Article 17

573. In *Thailand – H-Beams*, the Appellate Body referred to Article 12 in interpreting Articles 17.5 and 17.6. See paragraph 633 below.

(j) Article 18

574. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 12. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, including Article 18, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[716] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

4. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

575. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with several articles of the *Anti-Dumping Agreement*, including Article 12. The Panel then opined that that Mexico's claims under other articles of the *Anti-Dumping Agreement* and Article VI of GATT 1994 were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement."[717] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims. See paragraph 5 above.

XIII. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Judicial Review

Each Member whose national legislation contains provisions on anti-dumping measures shall maintain judicial, arbitral or administrative tribunals or procedures for the purpose, *inter alia*, of the prompt review of administrative actions relating to final determinations and reviews of determinations within the meaning of Article 11. Such tribunals or procedures shall be independent of the authorities responsible for the determination or review in question.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

No jurisprudence or decision of a competent WTO body.

XIV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Anti-Dumping Action on Behalf of a Third Country

14.1 An application for anti-dumping action on behalf of a third country shall be made by the authorities of the third country requesting action.

14.2 Such an application shall be supported by price information to show that the imports are being dumped and by detailed information to show that the alleged

[713] Panel Report on *Guatemala – Cement II*, para. 8.296.
[714] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.424.
[715] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.425.
[716] Panel Report on *Guatemala – Cement II*, para. 8.296.
[717] Panel Report on *Guatemala – Cement II*, para. 8.296.

dumping is causing injury to the domestic industry concerned in the third country. The government of the third country shall afford all assistance to the authorities of the importing country to obtain any further information which the latter may require.

14.3 In considering such an application, the authorities of the importing country shall consider the effects of the alleged dumping on the industry concerned as a whole in the third country; that is to say, the injury shall not be assessed in relation only to the effect of the alleged dumping on the industry's exports to the importing country or even on the industry's total exports.

14.4 The decision whether or not to proceed with a case shall rest with the importing country. If the importing country decides that it is prepared to take action, the initiation of the approach to the Council for Trade in Goods seeking its approval for such action shall rest with the importing country.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

No jurisprudence or decision of a competent WTO body.

XV. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15
Developing Country Members

It is recognized that special regard must be given by developed country Members to the special situation of developing country Members when considering the application of anti-dumping measures under this Agreement. Possibilities of constructive remedies provided for by this Agreement shall be explored before applying anti-dumping duties where they would affect the essential interests of developing country Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

1. General

(a) The Doha Mandate

576. Paragraph 7.2 of the Doha Ministerial Decision of 14 November 2001 on Implementation-Related Issues and Concerns states that the Ministerial Conference "recognizes that, while Article 15 of the Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 is a mandatory provision, the modalities for its application would benefit from clarification. Accordingly, the Committee on Anti-Dumping Practices is instructed, through its working group on Implementation, to examine this issue and to draw up appropriate recommendations within twelve months on how to operationalize this provision."

2. First sentence

(a) Extent of Members' obligation

577. In *US – Steel Plate*, in a decision not reviewed by the Appellate Body, the Panel considered that there are no specific legal requirements for specific action in the first sentence of Article 15 and that, therefore, "Members cannot be expected to comply with an obligation whose parameters are entirely undefined". According to the Panel, "the first sentence of Article 15 imposes no specific or general obligation on Members to undertake any particular action."[718]"[719]

578. A similar view was expressed by the Panel on *EC – Tube or Pipe Fittings* as follows:

> "We agree with Brazil that there is no requirement for any specific outcome set out in the first sentence of Article 15. We are furthermore of the view that, even assuming that the first sentence of Article 15 imposes a general obligation on Members, it clearly contains no operational language delineating the precise extent or nature of that obligation or requiring a developed country Member to undertake any specific action. The second sentence serves to provide operational indications as to the nature of the specific action required. Fulfilment of the obligations in the second sentence of Article 15 would therefore necessarily, in our view, constitute fulfilment of any general obligation that might arguably be contained in the first sentence. We do not see this as a 'reduction' of the first sentence into the second sentence, as suggested to us by Brazil. Rather the second sentence articulates certain operational modalities of the first sentence."[720]

(b) When and to whom "special regard" should be given

579. In *US – Steel Plate*, in a decision not reviewed by the Appellate Body, the Panel addressed the question of

---

[718] (*footnote original*) In this regard, we note the decision of the GATT Panel that considered similar arguments in the *EEC-Cotton Yarn* dispute. That Panel, in considering Article 13 of the Tokyo Round Agreement, which is substantively identical to it successor, Article 15 of the AD Agreement, stated:

> "582. . . . The Panel was of the view that Article 13 should be interpreted as a whole. In the view of the Panel, assuming arguendo that an obligation was imposed by the first sentence of Article 13, **its wording contained no operative language delineating the extent of the obligation**. Such language was only to be found in the second sentence of Article 13 whereby it is stipulated that 'possibilities of constructive remedies provided for by this Code shall be explored before applying anti-dumping duties where they would affect the essential interests of developing countries'."

Panel Report, *European Economic Community – Imposition of Anti-Dumping Duties on Imports of Cotton Yarn from Brazil* ("*EEC – Cotton Yarn*"), adopted 30 October 1995, BISD 42S/17, para. 582 (emphasis added).

[719] Panel Report on *US – Steel Plate*, para. 7.110.

[720] Panel Report on *EC – Tube or Pipe Fittings*, para. 7.68.

when and to whom special regard should be given under Article 15. The Panel concluded that Article 15 only requires special regard in respect of the final decision whether to apply a final measure and that such a special regard is to be given to the situation of developing country Members, and not to the situation of companies operating in developing countries:

> "India's arguments as to when and to whom this 'special regard' must be given disregard the text of Article 15 itself. Thus, the suggestion that special regard must be given throughout the course of the investigation, for instance in deciding whether to apply facts available, ignores that Article 15 only requires special regard 'when considering the application of anti-dumping measures under this Agreement'. In our view, the phrase 'when considering the application of anti-dumping measures under this Agreement' refers to the final decision whether to apply a final measure, and not intermediate decisions concerning such matters as investigative procedures and choices of methodology during the course of the investigation. Finally, India's argument focuses on the exporter, arguing that special regard must be given in considering aspects of the investigation relevant to developing country exporters involved in the case. However, Article 15 requires that special regard must be given 'to the special situation of developing country **Members**'. We do not read this as referring to the situation of companies operating in developing countries. Simply because a company is operating in a developing country does not mean that it somehow shares the 'special situation' of the developing country Member."[721]

3. Second sentence

(a) "constructive remedies provided for by this Agreement"

580. The Panel on *EC – Bed Linen*, in a decision not reviewed by the Appellate Body, rejected the argument that a "constructive remedy" might be a decision not to impose anti-dumping duties at all. The Panel stated that "Article 15 refers to 'remedies' in respect of injurious dumping. A decision not to impose an anti-dumping duty, while clearly within the authority of a Member under Article 9.1 of the *Anti-Dumping Agreement*, is not a 'remedy' of any type, constructive or otherwise" for injurious dumping:

> "'Remedy' is defined as, *inter alia*, 'a means of counteracting or removing something undesirable; redress, relief'.[722] 'Constructive' is defined as 'tending to construct or build up something non-material; contributing helpfully, not destructive'.[723] The term 'constructive remedies' might consequently be understood as helpful means of counteracting the effect of injurious dumping. However, the term as used in Article 15 is limited to constructive remedies 'provided for under this Agreement'. . . . In our view, Article 15 refers to 'remedies' in respect of injurious dumping."[724]

581. Discussing what might be encompassed by the phrase "constructive remedies provided for by this Agreement", the Panel on *EC – Bed Linen* mentioned the examples of the imposition of a "lesser duty" or a price undertaking:

> "The Agreement provides for the imposition of anti-dumping duties, either in the full amount of the dumping margin, or desirably, in a lesser amount, or the acceptance of price undertakings, as means of resolving an anti-dumping investigation resulting in a final affirmative determination of dumping, injury, and causal link. Thus, in our view, imposition of a lesser duty, or a price undertaking would constitute 'constructive remedies' within the meaning of Article 15. We come to no conclusions as to what other actions might in addition be considered to constitute 'constructive remedies' under Article 15, as none have been proposed to us."[725]

(b) "shall be explored"

582. The Panel on *EC – Bed Linen*, in interpreting the term "explore", stated that, while the concept of "explore" does not imply any particular outcome, the developed country authorities must actively undertake the exploration of possibilities with a willingness to reach a positive outcome:

> "In our view, while the exact parameters of the term are difficult to establish, the concept of 'explore' clearly does not imply any particular outcome. We recall that Article 15 does not require that 'constructive remedies' must be explored, but rather that the 'possibilities' of such remedies must be explored, which further suggests that the exploration may conclude that no possibilities exist, or that no constructive remedies are possible, in the particular circumstances of a given case. Taken in its context, however, and in light of the object and purpose of Article 15, we do consider that the 'exploration' of possibilities must be actively undertaken by the developed country authorities with a willingness to reach a positive

---

[721] Panel Report on *US – Steel Plate*, para. 7.111.

[722] (*footnote original*) The New Shorter Oxford English Dictionary, Clarendon Press, Oxford, 1993.

[723] (*footnote original*) Id.

[724] Panel Report on *EC – Bed Linen*, para. 6.228. In *US – Steel Plate*, the Panel agreed with the above conclusions and, applying it in the circumstances of this case, "consider[ed] that the possibility of applying different choices of methodology is not a 'remedy' of any sort under the AD Agreement". Panel Report on *US – Steel Plate*, para. 7.112.

[725] Panel Report on *EC – Bed Linen*, para. 6.229. A similar view was expressed by the Panel on *EC – Tube or Pipe Fittings*, para. 7.71–7.72. The Panel on *EC – Tube or Pipe Fittings* considered that Article 15 does not impose any obligation to explore undertakings other than price undertakings in the case of developing country Members. Panel Report on *EC – Tube or Pipe Fittings*, para. 7.78.

outcome. Thus, in our view, Article 15 imposes no obligation to actually provide or accept any constructive remedy that may be identified and/or offered.[726] It does, however, impose an obligation to actively consider, with an open mind, the possibility of such a remedy prior to imposition of an anti-dumping measure that would affect the essential interests of a developing country."[727]

583. The Panel on *EC – Bed Linen* concluded that "[p]ure passivity is not sufficient, in our view, to satisfy the obligation to 'explore' possibilities of constructive remedies, particularly where the possibility of an undertaking has already been broached by the developing country concerned." The Panel consequently regarded the failure of a Member "to respond in some fashion other than bare rejection *particularly once the desire to offer undertakings had been communicated to it*" as a failure to "explore constructive remedies".[728]

584. In *US – Steel Plate*, India had argued that the United States authorities should have considered applying a lesser duty in this case, despite the fact that US law does not provide for application of a lesser duty in any case. The Panel, in a decision not reviewed by the Appellate Body, noted that "consideration and application of a lesser duty is deemed desirable by Article 9.1 of the [Anti-Dumping] Agreement, but is not mandatory." Therefore, it stated, a Member is not obligated to have the possibility of a lesser duty in its domestic legislation. The Panel concluded that "the second sentence of Article 15 [cannot] be understood to require a Member to consider an action that is not required by the WTO Agreement and is not provided for under its own municipal law."[729]

(c) "before applying anti-dumping duties"

585. The Panel on *EC – Bed Linen*, in a decision not reviewed by the Appellate Body, interpreted the phrase "before applying anti-dumping duties" as follows:

> "In our view, [Article 1] implies that the phrase 'before applying anti-dumping duties' . . . means before the application of definitive anti-dumping measures. Looking at the whole of the AD Agreement, we consider that the term 'provisional measures' is consistently used where the intention is to refer to measures imposed before the end of the investigative process. Indeed, in our view, the AD Agreement clearly distinguishes between provisional measures and anti-dumping duties, which term consistently refers to definitive measures. We find no instance in the Agreement where the term 'anti-dumping duties' is used in a context in which it can reasonably be understood to refer to provisional measures. Thus, in our view, the ordinary meaning of the term 'anti-dumping duties' in Article 15 is clear – it refers to the imposition of definitive anti-dumping measures at the end of the investigative process.
>
> Consideration of practical elements reinforces this conclusion. Provisional measures are based on a preliminary determination of dumping, injury, and causal link. While it is certainly permitted, and may be in a foreign producer's or exporter's interest to offer or enter into an undertaking at this stage of the proceeding, we do not consider that Article 15 can be understood to *require* developed country Members to explore the possibilities of price undertakings prior to imposition of provisional measures. In addition to the fact that such exploration may result in delay or distraction from the continuation of the investigation, in some cases, a price undertaking based on the preliminary determination of dumping could be subject to revision in light of the final determination of dumping. However, unlike a provisional duty or security, which must, under Article 10.3, be refunded or released in the event the final dumping margin is lower than the preliminarily calculated margin (as is frequently the case), a 'provisional' price undertaking could not be retroactively revised. We do not consider that an interpretation of Article 15 which could, in some cases, have negative effects on the very parties it is intended to benefit, producers and exporters in developing countries, is required."[730]

4. Relationship with other Articles

586. The *EC – Bed Linen* Panel touched on the relationship between Article 15 and Article 1. See the first paragraph of the quote in paragraph 585 above.

PART II

XVI. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16
Committee on Anti-Dumping Practices

16.1 There is hereby established a Committee on Anti-Dumping Practices (referred to in this Agreement as

[726] (*footnote original*) We note that our interpretation of Article 15 in this regard is consistent with that of a GATT Panel which considered the predecessor of that provision, Article 13 of the Tokyo Round Anti-Dumping Code, which provision is substantively identical to present Article 15. That Panel found:

> "The Panel noted that if the application of anti-dumping measures 'would affect the essential interests of developing countries', the obligation that then arose was to explore the 'possibilities' of 'constructive remedies'. *It was clear from the words '[p]ossibilities' and 'explored' that the investigating authorities were not required to adopt constructive remedies merely because they were proposed.*" *EC – Cotton Yarn*, para. 584 (emphasis added).

[727] Panel Report on *EC – Bed Linen*, para. 6.233. *See* also Panel Report on *US – Steel Plate*, paras. 7.113–7.115 and Panel Report on EC – Tube or Pipe Fittings, para. 7.72. With respect to the related concept of good faith in general, see Chapter on *DSU*, Section III.B.1(vi).

[728] Panel Report on *EC – Bed Linen*, para. 6.238.

[729] Panel Report on *US – Steel Plate*, para. 7.116.

[730] Panel Report on *EC – Bed Linen*, paras. 6.231–6.232. Also see Panel Report on *EC – Tube or Pipe Fittings*, para. 7.82.

the "Committee") composed of representatives from each of the Members. The Committee shall elect its own Chairman and shall meet not less than twice a year and otherwise as envisaged by relevant provisions of this Agreement at the request of any Member. The Committee shall carry out responsibilities as assigned to it under this Agreement or by the Members and it shall afford Members the opportunity of consulting on any matters relating to the operation of the Agreement or the furtherance of its objectives. The WTO Secretariat shall act as the secretariat to the Committee.

16.2 The Committee may set up subsidiary bodies as appropriate.

16.3 In carrying out their functions, the Committee and any subsidiary bodies may consult with and seek information from any source they deem appropriate. However, before the Committee or a subsidiary body seeks such information from a source within the jurisdiction of a Member, it shall inform the Member involved. It shall obtain the consent of the Member and any firm to be consulted.

16.4 Members shall report without delay to the Committee all preliminary or final anti-dumping actions taken. Such reports shall be available in the Secretariat for inspection by other Members. Members shall also submit, on a semi-annual basis, reports of any anti-dumping actions taken within the preceding six months. The semi-annual reports shall be submitted on an agreed standard form.

16.5 Each Member shall notify the Committee *(a)* which of its authorities are competent to initiate and conduct investigations referred to in Article 5 and *(b)* its domestic procedures governing the initiation and conduct of such investigations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16

1. Article 16.1

(a) Rules of procedure

587. At its meeting of 22 May 1996, the Council for Trade in Goods approved rules of procedure for the meetings of the Committee on Anti-Dumping Practices (the "Rules of Procedure").[731]

(b) "shall meet not less than twice a year and otherwise"

588. The Rules of Procedure require that the Committee "shall meet not less than twice a year in regular session, and otherwise as appropriate."[732]

2. Article 16.4

(a) Minimum information to be provided in reporting without delay all preliminary or final anti-dumping actions

589. At its meeting of 30 October 1995, the Committee on Anti-Dumping Practices adopted guidelines for the minimum information to be provided under Article 16.4 of the Agreement in the reports on all preliminary or final anti-dumping actions.[733]

(b) "The semi-annual reports shall be submitted on an agreed standard form"

590. At its meeting of 30 October 1995, the Committee on Anti-Dumping Practices adopted guidelines for the format of, and information to be provided in, the semi-annual reports.[734]

XVII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17
Consultation and Dispute Settlement

17.1 Except as otherwise provided herein, the Dispute Settlement Understanding is applicable to consultations and the settlement of disputes under this Agreement.[735]

17.2 Each Member shall afford sympathetic consideration to, and shall afford adequate opportunity for consultation regarding, representations made by another Member with respect to any matter affecting the operation of this Agreement.

17.3 If any Member considers that any benefit accruing to it, directly or indirectly, under this Agreement is being nullified or impaired, or that the achievement of any objective is being impeded, by another Member or Members, it may, with a view to reaching a mutually satisfactory resolution of the matter, request in writing consultations with the Member or Members in question. Each Member shall afford sympathetic consideration to any request from another Member for consultation.

17.4 If the Member that requested consultations considers that the consultations pursuant to paragraph 3 have failed to achieve a mutually agreed solution, and if

731 G/C/M/10, section 1(ii). The text of the adopted rules of procedure can be found in G/ADP/4 and G/L/143.
732 G/L/143, chapter I, rule 1.
733 G/ADP/M/4, section D. The text of the adopted guidelines can be found in G/ADP/2.
734 G/ADP/M/4, section D. The text of the adopted format and guidelines can be found in G/ADP/1.
735 With respect to dispute settlement, in Marrakesh, the Ministers adopted the Declaration on Dispute Settlement pursuant to the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 or Part V of the Agreement on Subsidies and Countervailing Measures. See Section XXII.

final action has been taken by the administering authorities of the importing Member to levy definitive anti-dumping duties or to accept price undertakings, it may refer the matter to the Dispute Settlement Body ("DSB"). When a provisional measure has a significant impact and the Member that requested consultations considers that the measure was taken contrary to the provisions of paragraph 1 of Article 7, that Member may also refer such matter to the DSB.

17.5 The DSB shall, at the request of the complaining party, establish a panel to examine the matter based upon:

(i) a written statement of the Member making the request indicating how a benefit accruing to it, directly or indirectly, under this Agreement has been nullified or impaired, or that the achieving of the objectives of the Agreement is being impeded, and

(ii) the facts made available in conformity with appropriate domestic procedures to the authorities of the importing Member.

17.6 In examining the matter referred to in paragraph 5:

(i) in its assessment of the facts of the matter, the panel shall determine whether the authorities' establishment of the facts was proper and whether their evaluation of those facts was unbiased and objective. If the establishment of the facts was proper and the evaluation was unbiased and objective, even though the panel might have reached a different conclusion, the evaluation shall not be overturned;

(ii) the panel shall interpret the relevant provisions of the Agreement in accordance with customary rules of interpretation of public international law. Where the panel finds that a relevant provision of the Agreement admits of more than one permissible interpretation, the panel shall find the authorities' measure to be in conformity with the Agreement if it rests upon one of those permissible interpretations.[736]

17.7 Confidential information provided to the panel shall not be disclosed without formal authorization from the person, body or authority providing such information. Where such information is requested from the panel but release of such information by the panel is not authorized, a non-confidential summary of the information, authorized by the person, body or authority providing the information, shall be provided.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

1. General

(a) Concurrent application of Article 17 of the *Anti-Dumping Agreement* and the rules and procedures of the *DSU*

591. The Appellate Body in *Guatemala – Cement I* rejected the finding by the Panel that "the provisions of Article 17 provides for a coherent set of rules for dispute settlement specific to anti-dumping cases, … that *replaces* the more general approach of the DSU (emphasis added)."[737] The Appellate Body first held that the special or additional rules within the meaning of Article 1.2 shall prevail over the provisions of the *DSU* only "to the extent that there is a difference between the two sets of provisions":

> "Article 1.2 of the DSU provides that the 'rules and procedures of this Understanding shall apply *subject to such special or additional rules and procedures* on dispute settlement contained in the covered agreements as are identified in Appendix 2 to this Understanding.' (emphasis added) It states, furthermore, that these special or additional rules and procedures 'shall prevail' over the provisions of the DSU '[t]o the extent that there is a *difference* between' the two sets of provisions (emphasis added) Accordingly, if there is no 'difference', then the rules and procedures of the DSU apply *together with* the special or additional provisions of the covered agreement. In our view, it is only where the provisions of the DSU and the special or additional rules and procedures of a covered agreement *cannot* be read as *complementing* each other that the special or additional provisions are to *prevail*. A special or additional provision should only be found to *prevail* over a provision of the DSU in a situation where adherence to the one provision will lead to a violation of the other provision, that is, in the case of a *conflict* between them. An interpreter must, therefore, identify an *inconsistency* or a *difference* between a provision of the DSU and a special or additional provision of a covered agreement *before* concluding that the latter *prevails* and that the provision of the DSU does not apply.
>
> We see the special or additional rules and procedures of a particular covered agreement as fitting together with the generally applicable rules and procedures of the DSU to form a comprehensive, integrated dispute settlement system for the *WTO Agreement*. The special or additional provisions listed in Appendix 2 of the DSU are

[736] With respect to Article 17.6, in Marrakesh, the Ministers adopted the Decision on Review of Article 17.6 of the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994. See Section XXIII.

[737] Appellate Body Report on *Guatemala – Cement I*, para. 58, quoting from the Panel Report on *Guatemala – Cement I*, para. 7.16.

designed to deal with the particularities of dispute settlement relating to obligations arising under a specific covered agreement, while Article 1 of the DSU seeks to establish an integrated and comprehensive dispute settlement system for all of the covered agreements of the *WTO Agreement* as a whole. It is, therefore, only in the specific circumstance where a provision of the DSU and a special or additional provision of another covered agreement are mutually inconsistent that the special or additional provision may be read to *prevail* over the provision of the DSU."[738]

592. The Appellate Body in *Guatemala – Cement I* then found that Article 17 of the *Anti-Dumping Agreement* does not replace the "more general approach of the DSU".

"Clearly, the consultation and dispute settlement provisions of a covered agreement are not meant to *replace*, as a coherent system of dispute settlement for that agreement, the rules and procedures of the DSU. To read Article 17 of the *Anti-Dumping Agreement* as *replacing* the DSU system as a whole is to deny the integrated nature of the WTO dispute settlement system established by Article 1.1 of the DSU. To suggest, as the Panel has, that Article 17 of the *Anti-Dumping Agreement* replaces the 'more general approach of the DSU' is also to deny the application of the often more detailed provisions of the DSU to anti-dumping disputes. The Panel's conclusion is reminiscent of the fragmented dispute settlement mechanisms that characterized the previous GATT 1947 and Tokyo Round agreements; it does not reflect the *integrated* dispute settlement system established in the WTO."[739]

(b) Challenge against anti-dumping legislation as such

593. One of the main issues which arose in the *US – 1916 Act* dispute was whether an anti-dumping statute could, in the light of Article 17 of the *Anti-Dumping Agreement*, be challenged "as such", rather than a specific *application* of such a statute in a particular anti-dumping investigation. Discussing the legal basis for claims brought under the *Anti-Dumping Agreement*, the Appellate Body in *US – 1916 Act* stated:

"Article 17 of the *Anti-Dumping Agreement* addresses dispute settlement under that Agreement. Just as Articles XXII and XXIII of the GATT 1994 create a legal basis for claims in disputes relating to provisions of the GATT 1994, so also Article 17 establishes the basis for dispute settlement claims relating to provisions of the *Anti-Dumping Agreement*. In the same way that Article XXIII of the GATT 1994 allows a WTO Member to challenge *legislation* as such, Article 17 of the *Anti-Dumping Agreement* is properly to be regarded as allowing a challenge to legislation as such, unless this possibility is excluded. No such *express* exclusion is found in Article 17 or elsewhere in the *Anti-Dumping Agreement*."[740]

594. In considering whether Article 17 contains an implicit restriction on challenges to anti-dumping legislation as such, the Appellate Body, in *US – 1916 Act*, noted the following:

"Article 17.1 refers, without qualification, to 'the settlement of disputes' under the *Anti-Dumping Agreement*. Article 17.1 does not distinguish between disputes relating to Anti-Dumping legislation as such and disputes relating to anti-dumping measures taken in the implementation of such legislation. Article 17.1 therefore implies that Members can challenge the consistency of legislation as such with the *Anti-Dumping Agreement* unless this action is excluded by Article 17.

Similarly, Article 17.2 of the *Anti-Dumping Agreement* does not distinguish between disputes relating to anti-dumping legislation as such and disputes relating to anti-dumping measures taken in the implementation of such legislation. On the contrary, it refers to consultations with respect to 'any matter affecting the operation of this Agreement'.[741]

. . .

Article 17.3 does not explicitly address challenges to legislation as such. . . . Articles XXII and XXIII allow challenges to be brought under the GATT 1994 against legislation as such. Since Article 17.3 is the 'equivalent provision' to Articles XXII and XXIII of the GATT 1994, Article 17.3 provides further support for our view that challenges may be brought under the *Anti-Dumping Agreement* against legislation as such unless such challenges are otherwise excluded."[742]

595. After finding that Article 17.3 supported its view that challenges may be brought under the *Anti-Dumping Agreement* against legislation as such, unless such challenges are explicitly excluded, the Appellate Body also addressed Article 17.4:

"Article 17.4 sets out certain conditions that must exist before a Member can challenge action taken by a national investigating authority in the context of an anti-dumping investigation. However, Article 17.4 does not address or affect Member's right to bring a claim of inconsistency with the *Anti-Dumping Agreement* against anti-dumping legislation as such."[743]

---

[738] Appellate Body Report on *Guatemala – Cement I*, paras. 65–66.
[739] Appellate Body Report on *Guatemala – Cement I*, para. 67. The Panels on *US – 1916 Act* followed the approach of the Appellate Body. Panel Report on *US – 1916 Act (EC)*, para. 5.21; and Panel Report on *US – 1916 Act (Japan)*, para. 6.85. See also Appellate Body Report on *US – Hot-Rolled Steel*, para. 51.
[740] Appellate Body Report on *US – 1916 Act*, para. 62.
[741] Appellate Body Report on *US – 1916 Act*, paras. 64–65.
[742] Appellate Body Report on *US – 1916 Act*, para. 68.
[743] Appellate Body Report on *US – 1916 Act*, para. 74.

596. The Appellate Body in *US – 1916 Act* finally referred to Articles 18.1 and 18.4 of the *Anti-Dumping Agreement* as contextual support for its reading of Article 17 as allowing Members to bring claims against anti-dumping legislation as such:

> "Nothing in Article 18.4 or elsewhere in the *Anti-Dumping Agreement* excludes the obligation set out in Article 18.4 from the scope of matters that may be submitted to dispute settlement.
>
> If a Member could not bring a claim of inconsistency under the *Anti-Dumping Agreement* against legislation as such until one of the three anti-dumping measures specified in Article 17.4 had been adopted and was also challenged, then examination of the consistency with Article 18.4 of anti-dumping legislation as such would be deferred, and the effectiveness of Article 18.4 would be diminished.
>
> . . .
>
> Article 18.1 contains a prohibition on 'specific action against dumping' when such action is not taken in accordance with the provisions of the GATT 1994, as interpreted by the *Anti-Dumping Agreement*. Specific action against dumping could take a wide variety of forms. If specific action against dumping is taken in a form other than a form authorized under Article VI of the GATT 1994, as interpreted by the *Anti-Dumping Agreement*, such action will violate Article 18.1. We find nothing, however, in Article 18.1 or elsewhere in the *Anti-Dumping Agreement*, to suggest that the consistency of such action with Article 18.1 may only be challenged when one of the three measures specified in Article 17.4 has been adopted. Indeed, such an interpretation must be wrong since it implies that, if a Member's legislation provides for a response to dumping that does *not* consist of one of the three measures listed in Article 17.4, then it would be impossible to test the consistency of that legislation, and of particular responses thereunder, with Article 18.1 of the *Anti-Dumping Agreement*.
>
> Therefore, we consider that Articles 18.1 and 18.4 support our conclusion that a Member may challenge the consistency of legislation as such with the provisions of the *Anti-Dumping Agreement*."[744]

597. In *US – Hot-Rolled Steel*, Japan had challenged Section 735(c)(5)(A) of the United States Tariff Act of 1930, as amended, which provided for a method for calculating the "all others" rate (see paragraphs 471–473 above) as inconsistent with Article 9.4. The Panel found that Section 735(c)(5)(A), as amended, was, *on its face*, inconsistent with Article 9.4 "in so far as it requires the consideration of margins based in part on facts available in the calculation of the all others rate". The Panel further found that, in maintaining this Section following the entry into force of the *Anti-Dumping Agreement*, the United States had acted inconsistently with Article 18.4 of this Agreement as well as with Article XVI:4 of the WTO Agreement.[745] The Appellate Body upheld these findings.[746]

598. For more information about challenging legislation as such, see Section VI.B.3(c)(ii) of the Chapter on *DSU*.

(c) Mandatory versus discretionary legislation[747]

(i) General

599. The Appellate Body and the Panels addressed the issue of mandatory versus discretionary legislation with respect to the United States Antidumping Act of 1916. This United States legislation provided for civil and criminal proceedings to counteract predatory pricing from abroad. In addition, the Panel on *US – 1916 Act (EC)*, in a finding explicitly endorsed by the Appellate Body[748], rejected the United States' argument, according to which the 1916 Act was a non-mandatory law, because the US Department of Justice had the discretion to initiate, or not, a case under the 1916 Act:

> "The EC also refers to the panel report in *EC – Audio Cassettes*, which was not adopted.[749] This report stated why the mere fact that the initiation of anti-dumping investigations was discretionary would not make the EC legislation non-mandatory. The panel stated that:
>
> > '[it] did not consider in any event that its task in this case was to determine whether the EC's Basic Regulation was non-mandatory in the sense that the initiation of investigations and impositions of duties were not mandatory functions. Should panels accept this approach, they would be precluded from ever reviewing the content of a party's anti-dumping legislation.'[750]
>
> The *EC – Audio Cassettes* panel based its reasoning on the fact that this would undermine the obligation contained in Article 16.6 of the Tokyo Round Anti-Dumping Agreement. That provision provided that parties had to bring their laws, regulations and administrative procedures into conformity with the provisions of the Tokyo

[750] (*footnote original*) Panel Report on *EC – Audio Cassette*, para. 362.

> Round Anti-Dumping Agreement.[751] We note that almost identical terms are found in Article 18.4 of the WTO Anti-Dumping Agreement, . . .
>
> . . .
>
> Since we found that Article VI and the WTO Anti-Dumping Agreement are applicable to the 1916 Act, we consider that the reasoning of the panel in the *EC – Audio Cassettes* case should apply in the present case. Interpreting the provisions of Article 18.4 differently would undermine the obligations contained in that Article and would be contrary to the general principle of useful effect by making all the disciplines of the Anti-Dumping Agreement non-enforceable as soon as a Member would claim that the investigating authority has discretion to initiate or not an anti-dumping investigation."[752]

600. In *US – DRAMS*, Korea challenged certain certification requirements under the United States anti-dumping law. The provision challenged by Korea required exporters to certify, upon removal of anti-dumping duties, that they agree to the reinstatement of the anti-dumping duties on the products of their company if, after revocation of the original anti-dumping duties, the United States authorities find dumping. The Panel rejected the Korean arguments, noting that the certification requirement was not a mandatory requirement for revocation under United States anti-dumping law in general. The Panel held that other provisions of United States anti-dumping law and regulations of the United States authorities make revocation of an anti-dumping order possible contingent upon a different set of requirements, not including the certification requirement:

> "We note section 751(b) of the 1930 Tariff Act (as amended) and section 353.25(d) of the DOC's regulations, whereby an anti-dumping order may be revoked on the basis of 'changed circumstances'. We note that neither of these provisions imposes a certification requirement. In other words, an anti-dumping order may be revoked under these provisions absent fulfilment of the section 353.25(a)(2)(iii) certification requirement. We also note that Korea has not challenged the consistency of these provisions with the WTO Agreement. Thus, because of the existence of legislative avenues for Article 11.2-type reviews that do not impose a certification requirement, and which have not been found inconsistent with the WTO Agreement, we are precluded from finding that the section 353.25(a)(2)(iii) certification requirement in and of itself amounts to a mandatory requirement inconsistent with Article 11.2 of the AD Agreement."[753]

601. In *US – Section 129(c)(1) URAA*, Canada had claimed that certain United States legislation as such violated WTO law. The Panel[754] decided to analyse first whether the United States legislation at issue was mandatory, before analysing whether the behaviour mandated would be inconsistent with the relevant WTO provisions.[755]

(ii) Rejection of the distinction?

602. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body, for the first time, did not follow the traditional mandatory v. discretionary rule and found that it saw no reason for concluding that, in principle, non-mandatory measures cannot be challenged "as such". In this case, the measure at issue was the United States Sunset Policy Bulletin which the Panel had found not to be challengeable as such because it was not mandatory for the competent authorities. The Appellate Body obviously disagreed:

> "We also believe that the provisions of Article 18.4 of the Anti-Dumping Agreement are relevant to the question of the type of measures that may, as such, be submitted to dispute settlement under that Agreement. Article 18.4 contains an explicit obligation for Members to 'take all necessary steps, of a general or particular character' to ensure that their 'laws, regulations and

[751] (*footnote original*) Article 16.6(a) ("National Legislation") of the Tokyo Round Anti-Dumping Agreement provided as follows:

> "Each government accepting or acceding to this Agreement shall take all necessary steps, of a general or particular character, to ensure, not later than the date of entry into force of this Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement as they may apply to the Party in question."

[752] Panel Report on *US – 1916 Act (EC)*, para. 6.168. See also Panel Report on *US – 1916 Act (Japan)*, paras. 6.188–6.189. See also, Panel Report on *US – Steel Plate*, paras. 7.88–7.89 and 8.3. In this case, the Panel concluded that the "practice" of the US authorities concerning the application of "total facts available" (Article 6.8 Anti-dumping Agreement) is not a measure which can give rise to an independent claim of violation of the AD Agreement. *See also*, Panel Report on *US – Section 129(c)(1) URAA*, para. 6.22.

[753] Panel Report on *US – DRAMS*, para. 6.53.

[754] The Panel decided not to follow the approach of the Panel on *US – Export Restraints*, which had considered that identifying and addressing the relevant WTO obligations first would facilitate its assessment of the manner in which the legislation addresses those obligations, and whether any violation is involved (Panel Report on *US – Export Restraints*, paras. 8.10–8.13). The Panel on *US – Section 129(c)(1) URAA* justified the different approach as follows: "We note that the Panel on *United States – Measures Treating Exports Restraints as Subsidies* first considered whether certain action was in conformity with WTO requirements and only then addressed whether the measure at issue mandated such action. . . . In the circumstances of the case at hand, where there is a major *factual* dispute regarding whether section 129(c)(1) requires and/or precludes certain action, we think that a panel is of most assistance to the DSB if it examines the factual issues first. Moreover, we do not see how addressing first whether certain actions identified by Canada would contravene particular WTO provisions would facilitate our assessment of whether section 129(c)(1) mandates the United States to take certain action or not to take certain action. Finally, we have taken into account the fact that, in the present case, our ultimate conclusions with respect to Canada's claims would not differ depending on the order of analysis we decided to follow". Panel Report on *US – Section 129(c)(1) URAA*, footnote 72.

[755] Panel Report on *US – Section 129(c)(1) URAA*, para. 6.22–6.25.

administrative procedures' are in conformity with the obligations set forth in the Anti-Dumping Agreement. Taken as a whole, the phrase 'laws, regulations and administrative procedures' seems to us to encompass the entire body of generally applicable rules, norms and standards adopted by Members in connection with the conduct of anti-dumping proceedings.[756] If some of these types of measure could not, as such, be subject to dispute settlement under the Anti-Dumping Agreement, it would frustrate the obligation of 'conformity' set forth in Article 18.4.

This analysis leads us to conclude that there is no basis, either in the practice of the GATT and the WTO generally or in the provisions of the *Anti-Dumping Agreement*, for finding that only certain types of measure can, as such, be challenged in dispute settlement proceedings under the *Anti-Dumping Agreement*. Hence we see no reason for concluding that, in principle, non-mandatory measures cannot be challenged 'as such'. To the extent that the Panel's findings in paragraphs 7.145, 7.195, and 7.246 of the Panel Report suggest otherwise, we consider them to be in error.

We observe, too, that allowing measures to be the subject of dispute settlement proceedings, whether or not they are of a mandatory character, is consistent with the comprehensive nature of the right of Members to resort to dispute settlement to 'preserve [their] rights and obligations . . . under the covered agreements, and to clarify the existing provisions of those agreements'.[757] As long as a Member respects the principles set forth in Articles 3.7 and 3.10 of the DSU, namely, to exercise their 'judgement as to whether action under these procedures would be fruitful' and to engage in dispute settlement in good faith, then that Member is entitled to request a panel to examine measures that the Member considers nullify or impair its benefits. We do not think that panels are obliged, as a preliminary jurisdictional matter, to examine whether the challenged measure is mandatory. This issue is relevant, if at all, only as part of the panel's assessment of whether the measure is, as such, inconsistent with particular obligations. It is to this issue that we now turn."[758]

603. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body, referring to its previous report in *US – 1916 Act* where it did follow mandatory/discretionary rule, indicated that it had yet to pronounce itself generally upon the continuing relevance of such a distinction and warned against its "mechanic application":

> "We explained in *US – 1916 Act* that this analytical tool existed prior to the establishment of the WTO, and that a number of GATT panels had used it as a technique for evaluating claims brought against legislation as such.[759] As the Panel seemed to acknowledge[760], we have not, as yet, been required to pronounce generally upon the continuing relevance or significance of the mandatory/discretionary distinction.[761] Nor do we consider that this appeal calls for us to undertake a comprehensive examination of this distinction. We do, nevertheless, wish to observe that, as with any such analytical tool, the import of the 'mandatory/discretionary distinction' may vary from case to case. For this reason, we also wish to caution against the application of this distinction in a mechanistic fashion."[762]

(d) Challenge of a "practice" as such

604. In *US – Steel Plate*, the United States, referring to the Panel's decision in *US – Export Restraints*[763], argued that United States "practice" (in this case its practice as

[756] (*footnote original*) We observe that the scope of each element in the phrase "laws, regulations and administrative procedures" must be determined for purposes of WTO law and not simply by reference to the label given to various instruments under the domestic law of each WTO Member. This determination must be based on the content and substance of the instrument, and not merely on its form or nomenclature. Otherwise, the obligations set forth in Article 18.4 would vary from Member to Member depending on each Member's domestic law and practice.

[757] Article 3.2 of the DSU.

[758] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, paras. 87–89.

[759] (*footnote original*) Appellate Body Report, *US – 1916 Act*, paras. 61 and 88.

[760] (*footnote original*) In footnote 95 to para. 7.114, the Panel quoted the following statement from para. 7.88 of the Panel Report in *US – Steel Plate*: "[t]he Appellate Body has recognized the distinction, but has not specifically ruled that it is determinative in consideration of whether a statute is inconsistent with relevant WTO obligations."

[761] (*footnote original*) In our Report in *US – 1916 Act*, we examined the challenged legislation and found that the alleged "discretionary" elements of that legislation were not of a type that, even under the mandatory/discretionary distinction, would have led to the measure being classified as "discretionary" and therefore consistent with the *Anti-Dumping Agreement*. In other words, we *assumed* that the distinction could be applied because it did not, in any event, affect the outcome of our analysis. We specifically indicated that it was not necessary, in that appeal, for us to answer "the question of the continuing relevance of the distinction between mandatory and discretionary legislation for claims brought under the *Anti-Dumping Agreement*". (Appellate Body Report, *US – 1916 Act*, para. 99) We also expressly declined to answer this question in footnote 334 to paragraph 159 of our Report in *US – Countervailing Measures on Certain EC Products*. Furthermore, the appeal in *US – Section 211 Appropriations Act* presented a unique set of circumstances. In that case, in defending the measure challenged by the European Communities, the United States unsuccessfully argued that discretionary regulations, issued under a separate law, cured the discriminatory aspects of the measure at issue.

[762] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 93.

[763] In *US – Export Restraints*, Canada had claimed that the US "practice" of treating export restraints as meeting the "financial contribution" requirement of Article 1.1(a)(1)(iv) of the *SCM Agreement* was a measure and could be challenged as such. Canada defined US "practice" as "an institutional commitment to follow declared interpretations or methodologies that is reflected in cumulative determinations" and claimed that this "practice" has an "operational existence in and of itself". The Panel considered whether the alleged US practice required the US authorities to treat export restraints in a certain way and therefore had "independent operational status". The Panel, which concluded that there was no measure in the form of US practice, indicated:

regards total facts available)[764] could not be the subject of a claim because it does not have "independent operational status" and therefore it is not a "measure".[765] India, on the contrary, claimed that a "practice" becomes a "measure" through repeated similar responses to the same situation.[766] The Panel concluded that "[t]he challenged practice in this case is, in our view, no different from that considered in the *US – Export Restraints* case. It can be departed from so long as a reasoned explanation is given. It therefore lacks independent operational status, as it cannot require USDOC to do something, or refrain from doing something."[767]

2. Article 17.1

(a) "settlement of disputes"

605. Article 17.1 was discussed by the Appellate Body in *US – 1916 Act*. See paragraph 594 above.

3. Article 17.2

(a) "any matter affecting the operation of this Agreement"

606. Article 17.2 was discussed by the Appellate Body in *US – 1916 Act*. See paragraph 594 above.

4. Article 17.3

(a) Exclusion of Article 17.3 of the Anti-Dumping Agreement from Appendix 2 of the DSU

607. In analysing the Panel's interpretation of the relationship between Article 17 of the *Anti-Dumping Agreement* and the *DSU*, the Appellate Body in *Guatemala – Cement I* referred to the exclusion of Article 17.3 from Appendix 2 of the *DSU*, which lists the special or additional rules and procedures contained in the covered agreements:

> "The *Anti-Dumping Agreement* is a covered agreement listed in Appendix 1 of the DSU; the rules and procedures of the DSU, therefore, apply to disputes brought pursuant to the consultation and dispute settlement provisions contained in Article 17 of that Agreement . . . [Article 17.3] is not listed [in Appendix 2 of the DSU,] precisely because it provides the legal basis for consultations to be requested by a complaining Member under the *Anti-Dumping Agreement*. Indeed, it is the equivalent provision in the *Anti-Dumping Agreement* to Articles XXII and XXIII of the GATT 1994, which serve as the basis for consultations and dispute settlement under the GATT 1994, under most of the other agreements in Annex 1A of the . . . *WTO Agreement*, and under the . . . *TRIPS Agreement*."[768]

5. Article 17.4

(a) General

608. In *US – 1916 Act*, the Panel and the Appellate Body were called upon to determine whether the *Anti-Dumping Agreement* allowed challenges to anti-dumping legislation "as such", rather than merely to the specific application of such legislation in individual anti-dumping investigations. The Panel on *US – 1916 Act* found that it had jurisdiction to consider claims "as such".[769] The United States based its objections to the Panel's jurisdiction on Article 17.4. More specifically, the United States argued that Members could not bring a claim of inconsistency with the *Anti-Dumping Agreement* "against legislation as such independently from a claim with respect to one of the three measures identified in Article 17.4, i.e. a definitive anti-dumping duty, a price undertaking, or a provisional measure."[770] Moreover, the United States relied on the Appellate Body's findings in *Guatemala – Cement I*, where the Appellate Body had held that "[a]ccording to Article 17.4, a 'matter' may be referred to the DSB *only if* one of the relevant three anti-dumping measures is in place. This provision, when read together with Article 6.2 of the DSU requires a panel request in a dispute brought under the *Anti-Dumping Agreement* to identify, as the

---

Footnote 763 (*cont.*)

> "[W]hile Canada may be right that under US law, 'practice must normally be followed, and those affected by US [CVD] law . . . therefore have reason to expect that it will be', past practice can be departed from as long as a reasoned explanation, which prevents such practice from achieving independent operational status in the sense of *doing* something or *requiring* some particular action. The argument that expectations are created on the part of foreign governments, exporters, consumers, and petitioners as a result of any particular practice that the DOC 'normally' follows would not be sufficient to accord such a practice an independent operational existence. Nor do we see how the DOC's references in its determinations to its practice gives 'legal effect to that "practice" as determinative of the interpretations and methodologies it applies'. US 'practice' therefore does not appear to have independent operational status such that it could independently give rise to a WTO violation as alleged by Canada."

Panel Report on *US – Export Restraints*, para. 8.126.

764 In *US – Hot-Rolled Steel*, Japan had also challenged the "general" practice of the US investigating authorities regarding total facts available. The Panel did not rule on whether a general practice could be challenged separately from the statutory measure on which it is based because it concluded that Japan's claim in this regard was outside its terms of reference. Indeed, the Panel found that there was no mention of such a claim in Japan's request for the establishment of a panel. Panel Report on *US – Hot-Rolled Steel*, para. 7.22.

765 Panel Report on *US – Steel Plate*, para. 7.14.

766 Panel Report on *US – Steel Plate*, para. 7.15.

767 Panel Report on *US – Steel Plate*, para. 7.23.

768 Appellate Body Report on *Guatemala – Cement I*, para. 64.

769 Panel Report on *US – 1916 Act (EC)*, para. 5.27; Panel Report on *US – 1916 Act (Japan)*, para. 6.91.

770 Appellate Body Report on *US – 1916 Act*, para. 55

specific measure at issue, either a definitive anti-dumping duty, the acceptance of a price undertaking, or a provisional measure."[771] The Appellate Body upheld the Panels' findings; in doing so, it first clarified its own findings in *Guatemala – Cement I*:

> "In *Guatemala – Cement*, Mexico had challenged Guatemala's *initiation* of anti-dumping proceedings, and its *conduct* of the investigation, without identifying any of the measures listed in Article 17.4 . . .
>
> . . .
>
> Nothing in our Report in *Guatemala – Cement* suggests that Article 17.4 precludes review of anti-dumping legislation as such. Rather, in that case, we simply found that, for Mexico to challenge Guatemala's initiation and conduct of the anti-dumping investigation, Mexico was required to identify one of the three anti-dumping measures listed in Article 17.4 in its request for establishment of a panel. Since it did not do so, the panel in that case did not have jurisdiction."[772]

609. After clarifying its own findings in *Guatemala – Cement I* with respect to Article 17.4, the Appellate Body turned to the considerations underlying the restrictions contained in Article 17.4:

> "In the context of dispute settlement proceedings regarding an anti-dumping investigation, there is tension between, on the one hand, a complaining Member's right to seek redress when illegal action affects its economic operators and, on the other hand, the risk that a responding Member may be harassed or its resources squandered if dispute settlement proceedings could be initiated against it in respect of each step, however small, taken in the course of an anti-dumping investigation, even before any concrete measure had been adopted.[773] In our view, by limiting the availability of dispute settlement proceedings related to an anti-dumping investigation to cases in which a Member's request for establishment of a panel identifies a definitive anti-dumping duty, a price undertaking or a provisional measure[774], Article 17.4 strikes a balance between these competing considerations.
>
> Therefore, Article 17.4 sets out certain conditions that must exist before a Member can challenge action taken by a national investigating authority in the context of an anti-dumping investigation. However, Article 17.4 does not address or affect a Member's right to bring a claim of inconsistency with the *Anti-Dumping Agreement* against anti-dumping legislation as such."[775]

610. After setting out the function of Article 17.4 within the *Anti-Dumping Agreement*, the Appellate Body also stated that it failed to see, in the light of firmly established GATT and WTO jurisprudence according to which claims can be brought against legislation as such, which particular characteristics should distinguish anti-dumping legislation from other legislation so as to render the established case law practice inapplicable in the context of anti-dumping legislation. Finally, the Appellate Body also referred to Articles 18.1 and 18.4 as context for its findings.[776]

611. Noting that Article 17.4 does not refer to "claims", the Panel on *Mexico – Corn Syrup* stated that "Article 17.4 does not, in our view, set out any further or additional requirements with respect to the degree of specificity with which claims must be set forth in a request for establishment challenging a final anti-dumping measure."[777] The Panel concluded that "a request for establishment that satisfies the requirements of Article 6.2 of the *DSU* in this regard also satisfies the requirements of Article 17.4 of the AD Agreement."[778]

(b) Panel terms of reference

(i) Concept of "matter"

612. In *Guatemala – Cement I*, Mexico's complaint related to various aspects of the anti-dumping investigation by Guatemala applied in a specific case. Guatemala requested that the complaint be rejected, because (i) while a provisional anti-dumping measure was identified in the request for panel establishment, Mexico had not asserted and demonstrated that the measure had had a "significant impact" as required under Article 17.4, and (ii) neither of a final anti-dumping measure and a price undertaking had been identified in Mexico's request for the establishment of the panel. The Appellate Body described the word "matter" in paragraphs 2, 3, 4, 5 and 6 of Article 17 as "the key concept in defining the scope of a dispute that may be referred to the DSB under the *Anti-Dumping Agreement* and, therefore, in identifying the parameters of a Panel's terms of reference in an anti-dumping dispute."[779]

---

[771] Appellate Body Report on *Guatemala – Cement I*, para. 79. (See also para. 614 of this Chapter).

[772] Appellate Body Report on *US – 1916*, paras. 71–72.

[773] (*footnote original*) An unrestricted right to have recourse to dispute settlement during an anti-dumping investigation would allow a multiplicity of dispute settlement proceedings arising out of the same investigation, leading to repeated disruption of that investigation.

[774] (*footnote original*) Once one of the three types of measure listed in Article 17.4 is identified in the request for establishment of a panel, a Member may challenge the consistency of any preceding action taken by an investigating authority in the course of an anti-dumping investigation.

[775] Appellate Body Report on *US – 1916 Act*, paras. 73–74.

[776] Appellate Body Report on *US – 1916 Act*, paras. 75–83.

[777] Panel Report on *Mexico – Corn Syrup*, para. 7.14.

[778] Panel Report on *Mexico – Corn Syrup*, para. 7.14. With respect to specificity of requests for the establishment of a panel pursuant to Article 6.2 of the *DSU*, see Chapter on *DSU*, Sections VI.B.3(d) and XXII.3(a).

[779] Appellate Body Report on *Guatemala – Cement I*, para. 70.

613. Regarding the ordinary meaning of "matter", the Appellate Body in *Guatemala – Cement I* stated that "the most appropriate [ordinary meaning] in this context is 'substance' or 'subject-matter'. Although the ordinary meaning is rather broad, it indicates that the 'matter' is the substance or subject-matter of the dispute."[780] The Appellate Body then linked the term "matter" to a panel's terms of reference under Article 7 of the *DSU* and defined matter as consisting of (i) the specific measures at issue and (ii) the legal basis of the complaint or the claims:

> "The word 'matter' appears in Article 7 of the DSU, which provides the standard terms of reference for Panels. Under this provision, the task of a Panel is to examine 'the matter referred to the DSB'. These words closely echo those of Article 17.4 of the *Anti-Dumping Agreement* and, in view of the integrated nature of the dispute settlement system, form part of the context of that provision. Article 7 of the DSU itself does not shed any further light on the meaning of the term 'matter'. However, when that provision is read together with Article 6.2 of the DSU, the precise meaning of the term 'matter' becomes clear. Article 6.2 specifies the requirements under which a complaining Member may refer a 'matter' to the DSB: in order to establish a Panel to hear its complaint, a Member must make, in writing, a 'request for the establishment of a Panel' (a 'Panel request'). In addition to being the document which enables the DSB to establish a Panel, the Panel request is also usually identified in the Panel's terms of reference as the document setting out 'the matter referred to the DSB'. Thus, 'the matter referred to the DSB' for the purposes of Article 7 of the DSU and Article 17.4 of the *Anti-Dumping Agreement* must be the 'matter' identified in the request for the establishment of a Panel under Article 6.2 of the DSU. That provision requires the complaining Member, in a Panel request, to 'identify the *specific measures at issue* and provide a brief summary of the *legal basis of the complaint* sufficient to present the problem clearly.' (emphasis added) The '*matter* referred to the DSB', therefore, consists of two elements: the specific *measures* at issue and the *legal basis of the complaint* (or the *claims*).
>
> In our Report in *Brazil – Coconut*, we agreed with previous Panels established under the GATT 1947, as well as under the [AD Agreement], 'that the "matter" referred to a Panel for consideration consists of the specific claims stated by the parties to the dispute in the relevant documents specified in the terms of reference.'[781] Statements in two of the Panel reports cited by us in that case clarify further the relationship between the 'matter', the 'measures' at issue and the 'claims'. In *United States – Imposition of Anti-Dumping Duties on Imports of Fresh and Chilled Atlantic Salmon from Norway*[782], the Panel found that 'the "matter" consisted of *the specific claims* stated by Norway . . . with respect to *the imposition of these duties*'. (emphasis added) A distinction is therefore to be drawn between the 'measure' and the 'claims'. Taken together, the 'measure' and the 'claims' made concerning that measure constitute the 'matter referred to the DSB', which forms the basis for a Panel's terms of reference."[783]

Concept of "measure"

Relationship with Article 6.2 of the DSU: "specific measure at issue"

614. The Panel on *Guatemala – Cement I* found that Article 17.4 of the *Anti-Dumping Agreement* is a "timing provision", meaning that Article 17.4 established *when* a panel may be requested, rather than a provision setting forth the appropriate subject of a request for establishment of a panel.[784] The Appellate Body disagreed with this finding and stated that "Article 6.2 of the DSU requires 'the specific measures at issue' to be identified in the Panel request."[785] In determining what may constitute a "specific measure" for the purposes of the *Anti-Dumping Agreement*, the Appellate Body in *Guatemala – Cement I* stated:

> "According to Article 17.4, a 'matter' may be referred to the DSB *only if* one of the relevant three anti-dumping measures is in place. This provision, when read together with Article 6.2 of the DSU, requires a Panel request in a dispute brought under the *Anti-Dumping Agreement* to identify, as the specific measure at issue, either a definitive anti-dumping duty, the acceptance of a price undertaking, or a provisional measure. This requirement to identify a specific anti-dumping measure at issue in a Panel request in no way limits the nature of the *claims* that may be brought concerning alleged nullification or impairment of benefits or the impeding of the achievement of any objective in a dispute under the *Anti-Dumping Agreement*. As we have observed earlier, there is a difference between the specific measures at issue – in the case of the *Anti-Dumping Agreement*, one of the three types of anti-dumping measure described in Article 17.4 – and the claims or the legal basis of the complaint referred to the DSB relating to those specific measures. In coming to this conclusion, we note that the language of Article 17.4 of the *Anti-Dumping Agreement* is unique to that Agreement.
>
> [I]n disputes under the *Anti-Dumping Agreement* relating to the initiation and conduct of anti-dumping investigations, a definitive anti-dumping duty, the acceptance

[780] Appellate Body Report on *Guatemala – Cement I*, para. 71.
[781] (*footnote original*) Appellate Body Report on *Brazil – Desiccated Coconut*, p. 22.

[783] Appellate Body Report on *Guatemala – Cement I*, paras. 72–73.
[784] Appellate Body Report on *Guatemala – Cement I*, para. 77, quoting the Panel Report on *Guatemala – Cement I*, para. 7.15.
[785] Appellate Body Report on *Guatemala – Cement I*, para. 77.

of a price undertaking or a provisional measure must be identified as part of the matter referred to the DSB pursuant to the provisions of Article 17.4 of the *Anti-Dumping Agreement* and Article 6.2 of the DSU."[786]

615. In *Mexico – Corn Syrup*, the question arose whether, in a dispute where the specific measure challenged is a definitive anti-dumping duty, a Member may assert a claim of violation of Article 7.4 of the *Anti-Dumping Agreement*, a provision establishing maximum time-periods for the imposition of provisional measures. Article 17.4 establishes the possibility of challenging definitive anti-dumping duties, price undertakings or provisional measures; with respect to the latter, Article 17.4 establishes that "[w]hen a provisional measure has a significant impact and [a] Member ... considers that the measure was taken contrary to the provisions of paragraph 1 of Article 7, that Member may also refer such matter to the DSB". The Panel, in a decision not reviewed by the Appellate Body, discussed to what extent the United States' claim under Article 7.4 was "related to" Mexico's definitive anti-dumping duty:

"The Appellate Body Report in *Guatemala – Cement* indicates that a complainant may, having identified a specific anti-dumping duty in its request for establishment, bring any claims under the AD Agreement *relating to* that specific measure. That there should be a relationship between the measure challenged in a dispute and the claims asserted in that dispute would appear necessary, given that Article 19.1 of the DSU requires that, 'where a panel or the Appellate Body concludes that a measure is inconsistent with a covered agreement, it shall recommend that the Member concerned bring the measure into conformity with the agreement'.

[W]e consider that the United States' claim under Article 7.4 of the AD Agreement is nevertheless *related to* Mexico's definitive anti-dumping duty. In this regard, we recall that, under Article 10 of the AD Agreement, a provisional measure represents a basis under which a Member may, if the requisite conditions are met, levy anti-dumping duties retroactively. At the same time, a Member may not, except in the circumstances provided for in Article 10.6 of the AD Agreement, retroactively levy a definitive anti-dumping duty for a period during which provisional measures were not applied. Consequently, because the period of time for which a provisional measure is applied is generally determinative of the period for which a definitive anti-dumping duty may be levied retroactively, we consider that a claim regarding the duration of a provisional measure relates to the definitive anti-dumping duty."[787]

616. The Panel on *Mexico – Corn Syrup* then considered the fact that Article 17.4 refers only to paragraph 1 of Article 7 and decided that it would be incorrect to interpret Article 17.4 in a manner "which would leave Members without any possibility to pursue dispute settlement in respect of a claim alleging a violation of a requirement of the AD Agreement":

"Read literally, this provision could be taken to mean that in a dispute where the specific measure being challenged is a provisional measure, the *only* claim that a Member may pursue is a claim under Article 7.1 of the AD Agreement (and not a claim under Article 7.4 of the AD Agreement). If this conclusion is correct, a ruling that a claim under Article 7.4 could not be pursued in a dispute where the specific measure challenged is a definitive anti-dumping duty would mean that a Member would never be able to pursue an Article 7.4 claim. In our view, it would be incorrect to interpret Article 17.4 of the AD Agreement in a manner which would leave Members without any possibility to pursue dispute settlement in respect of a claim alleging a violation of a requirement of the AD Agreement."[788]

Measure not identified in terms of reference

617. In *US – Hot-Rolled Steel*, the issue arose as to whether the "general" practice of the United States investigating authorities regarding best facts available was within the terms of reference of the Panel. The Panel, which did not rule on whether a general practice could be challenged separately from the statutory measure on which it is based, concluded that Japan's claim in this regard was outside its terms of reference because there was no mention of such a claim in Japan's request for the establishment of a panel.[789]

Claims

618. As regards the concept of claims or legal basis of the complaint, see paragraphs 161–169 of the Chapter on the *DSU*.

Abandoned claims

619. In *US – Steel Plate*, India indicated in its first written submission that it would not pursue several claims that had been set out in its request for establishment of the Panel. However, India changed its position later on and informed the Panel of its intention to pursue one of these claims during the first substantive meeting of the Panel with the parties and in its rebuttal submission. In spite of the lack of specific objection by the US which had noted that the claim was within the Panel's terms of reference, the Panel, in a decision not reviewed by the Appellate Body, concluded that it would not rule on India's abandoned claim:

[786] Appellate Body Report on *Guatemala – Cement I*, paras. 79–80.
[787] Panel Report on *Mexico – Corn Syrup*, paras. 7.52–7.53.
[788] Panel Report on *Mexico – Corn Syrup*, para. 7.54.
[789] Panel Report on *US – Hot-Rolled Steel*, para. 7.22.

"This situation is not explicitly addressed in either the DSU or any previous panel or Appellate Body report. We do note, however, the ruling of the Appellate Body in *Bananas* to the effect that a claim may not be raised for the first time in a first written submission, if it was not in the request for establishment.[790] One element of the Appellate Body's decision in that regard was the notice aspect of the request for establishment. The request for establishment is relied upon by Members in deciding whether to participate in the dispute as third parties. To allow a claim to be introduced in a first written submission would deprive Members who did not choose to participate as third parties from presenting their views with respect to such a new claim.

The situation here is, in our view, analogous. That is, to allow a party to resurrect a claim it had explicitly stated, in its first written submission, that it would not pursue would, in the absence of significant adjustments in the Panel's procedures, deprive other Members participating in the dispute settlement proceeding of their full opportunities to defend their interest with respect to that claim. Paragraphs 4 and 7 of Appendix 3 to the DSU provide that parties shall 'present the facts of the case and their arguments' in the first written submission, and that written rebuttals shall be submitted prior to the second meeting. These procedures, in our view, envision that initial arguments regarding a claim should be presented for the first time in the first written submission, and not at the meeting of the panel with the parties or in rebuttal submissions.

With respect to the interests of third parties, the unfairness of allowing a claim to be argued for the first time at the meeting of the panel with the parties, or in rebuttal submissions, is even more pronounced. In such a circumstance, third parties would be entirely precluded from responding to arguments with respect to such a resurrected claim, as they would not have access to those arguments under the normal panel procedures set out in paragraph 6 of Appendix 3 to the DSU. Further, India has identified no extenuating circumstances to justify the reversal of its abandonment of this claim.[791] Thus, in our view, it would be inappropriate in these circumstances to allow India to resurrect its claim in this manner. Therefore, we will not rule on India's claim under AD Agreement Articles 6.6 and 6.8 and Annex II, paragraph 7 regarding failure to exercise special circumspection in using information supplied in the petition.[792]"[793]

6. Article 17.5

(a) Article 17.5(i)

620. In considering what requirements, if any, must be fulfilled by virtue of Article 17.5(i) of the *Anti-Dumping Agreement* in addition to requirements existing under Article 6.2 of the *DSU*, the Panel on *Mexico – Corn Syrup* stated:

"In our view, Article 17.5(i) does not require a complaining Member to use the words 'nullify' or 'impair' in a request for establishment. However, it must be clear from the request that an allegation of nullification or impairment is being made, and the request must explicitly indicate how benefits accruing to the complaining Member are being nullified or impaired."[794]

621. The Panel on *Mexico – Corn Syrup* went on to state that, in their view, "a request for establishment that alleges violations of the AD Agreement which, if demonstrated, will constitute a *prima facie* case of nullification or impairment under Article 3.8 of the *DSU*, contains a sufficient allegation of nullification or impairment for purposes of Article 17.5(i). In addition, as noted above, the request must indicate how benefits accruing to the complaining Member are being nullified or impaired."[795]

(b) Article 17.5(ii)

(i) Documents not available to the investigating authorities

622. In *US – Hot-Rolled Steel*, the Panel found that, under Article 17.5(ii), "a panel may not, when examining a claim of violation of the AD Agreement[796] in a particular determination, consider facts or evidence presented to it by a party in an attempt to demonstrate error in the determination concerning questions that were investigated and decided by the authorities, unless they had been made available in conformity with the appropriate domestic procedures to the authorities of the investigating country during the investigation".[797] The Panel further concluded that its duty not to consider new evidence with respect to claims under the *Anti-Dumping Agreement* "flows not only from Article 17.5(ii), but also from the fact that a panel is not to perform a *de novo* review of the issues considered and decided by the investigating authorities".[798]

---

[790] (*footnote original*) Appellate Body Report, *European Communities – Regime for the Importation, Sale and Distribution of Bananas* ("*EC – Bananas III*"), WT/DS27/AB/R, adopted 25 September 1997, DSR 1997:II, 591, at para. 143.

[791] (*footnote original*) This is **not**, for example, a case where a complainant obtained, through the dispute settlement process, information in support of a claim to which it did not otherwise have access.

[792] (*footnote original*) We note that, since we do not reach India's alternative claims in this dispute, as discussed below in para. 7.80, we also would not have reached this claim in any event.

[793] Panel Report on *US – Steel Plate*, paras. 7.27–7.29.

[794] Panel Report on *Mexico – Corn Syrup*, para. 7.26.

[795] Panel Report on *Mexico – Corn Syrup*, para. 7.28.

[796] (*footnote original*) We note that there is no claim under Article VI of GATT 1994 in this case, so we need not consider whether Article 17.5(ii) has implications for the evidence a panel may consider in that context.

[797] Panel Report on *US – Hot-Rolled Steel*, para. 7.6.

[798] Panel Report on *US – Hot-Rolled Steel*, para. 7.7. See also Panel Report on *Egypt – Steel Rebar*, paras. 7.15–7.21.

(ii) Undisclosed facts

623. In *Thailand – H-Beams*, in reversing the Panel's finding that an injury determination must be based exclusively upon evidence disclosed to, or discernible by, the parties to the investigation, the Appellate Body explained the scope of facts which panels are required to review pursuant to Article 17.5(ii), as follows:

> "Article 17.5 specifies that a panel's examination must be based upon the 'facts made available' to the domestic authorities. Anti-dumping investigations frequently involve both confidential and non-confidential information. The wording of Article 17.5 does not specifically exclude from panel examination facts made available to domestic authorities, but not disclosed or discernible to interested parties by the time of the final determination. Based on the wording of Article 17.5, we can conclude that a panel must examine the facts before it, whether in confidential documents or non-confidential documents."[799]

See also paragraphs 111–114 above.

(iii) Documents created for the purpose of a dispute

624. In deciding whether a document created *post hoc* for the purposes of a dispute could be considered by the Panel, the Panel on *EC – Bed Linen* stated that Article 17.5(ii) "does not require . . . that a panel consider those facts exclusively in the format in which they were originally available to the investigating authority. Indeed, the very purpose of the submissions of the parties to the Panel is to marshal the relevant facts in an organized and comprehensible fashion to elucidate the parties' positions and in support of their arguments."[800] The Panel concluded that "the form of the document, (*i.e.*, a new document) does not preclude us from considering its substance, which comprises facts made available to the investigating authority during the investigation."[801]

(c) Relationship with other paragraphs of Article 17

625. In *Thailand – H-Beams*, the Appellate Body discussed the relationship between Articles 17.5 and 17.6. See paragraphs 113–114 above and 633 below.

7. Article 17.6

(a) Relationship with the standard of review in Article 11 of the DSU

626. In *US – Hot Rolled Steel*, the Appellate Body compared the standards of review under Article 17.6 of the *Anti-Dumping Agreement* and Article 11 of the DSU when considering to what extent Article 17.6 may conflict with Article 11 of the DSU.[802] The Appellate Body explained that, whilst Article 17.6 lays down rules relating to a panel's examination of "matters" arising under only one of the covered agreements, i.e. the *Anti-Dumping Agreement*, Article 11 of the DSU rules applies to a panel's examination of "matters" arising under any of the covered agreements.[803] The Appellate Body then focussed on the different structure of both provisions and indicated:

> "Article 11 of the DSU imposes upon panels a comprehensive obligation to make an 'objective assessment of the matter', an obligation which embraces all aspects of a panel's examination of the 'matter', both factual and legal. . . . . Article 17.6 is divided into two separate subparagraphs, each applying to different aspects of the panel's examination of the matter. The first subparagraph covers the *panel's* '*assessment* of the *facts* of the matter', whereas the second covers its '*interpret[ation* of] the *relevant provisions*'. (emphasis added) The structure of Article 17.6, therefore, involves a clear distinction between a panel's assessment of the facts and its legal interpretation of the *Anti-Dumping Agreement*."[804]

627. The Panel on *US – Softwood Lumber VI* addressed the question whether the application of the standard of review under Article 11 of the *DSU* to a determination could, in appropriate factual circumstances, lead to differing outcomes compared to the application of the Article 11 of the *DSU* and Article 17.6(i) of the *Anti-Dumping Agreement* standards together to the same determination:

> "Under the Article 17.6 standard, with respect to claims involving questions of fact, Panels have concluded that whether the measures at issue are consistent with relevant provisions of the AD Agreement depends on whether the investigating authority properly established the facts, and evaluated the facts in an unbiased and objective manner. This latter has been defined as assessing whether an unbiased and objective decision maker, taking into account the facts that were before the investigating authority, and in light of the explanations given, could have reached the conclusions that were reached. A panel's task is not to carry out a *de novo* review of the information and evidence on the record of the underlying investigation. Nor may a panel substitute its judgment for that of the investigating authorities, even though the Panel might have arrived at a different determination were it considering the record evidence for itself.
>
> Similarly, the Appellate Body has explained that, under Article 11 of the DSU, a panel's role is not to substitute

[799] Appellate Body Report on *Thailand – H-Beams*, para. 115.
[800] Panel Report on *EC – Bed Linen*, para. 6.43.
[801] Panel Report on *EC – Bed Linen*, para. 6.43.
[802] In this analysis, the Appellate Body applied its conclusions on the relationship between the provisions of the DSU and the special or additional rules and procedures of a covered agreement developed in *Guatemala – Cement II*, paras. 65–67. *See* para. 591 of this Chapter.
[803] Appellate Body Report on *US – Hot Rolled Steel*, para. 53.
[804] Appellate Body Report on *US – Hot Rolled Steel*, para. 54.

its analysis for that of the investigating authority.[805] The Appellate Body has stated:

> "We wish to emphasize that, although panels are not entitled to conduct a *de novo* review of the evidence, nor to *substitute* their own conclusions for those of the competent authorities, this does *not* mean that panels must simply *accept* the conclusions of the competent authorities".[806]

In light of Canada's clarification of its position, and based on our understanding of the applicable standards of review under Article 11 of the DSU and Article 17.6 of the AD Agreement, we do not consider that it is either necessary or appropriate to conduct separate analyses of the USITC determination under the two Agreements.

We consider this result appropriate in view of the guidance in the Declaration of Ministers relating to Dispute Settlement under the AD and SCM Agreements. While the Appellate Body has clearly stated that the Ministerial Declaration does not require the application of the Article 17.6 standard of review in countervailing duty investigations,[807] it nonetheless seems to us that in a case such as this one, involving a single injury determination with respect to both subsidized and dumped imports, and where most of Canada's claims involve identical or almost identical provisions of the AD and SCM Agreements, we should seek to avoid inconsistent conclusions."[808]

628. As regards the relationship of Article 11 of the DSU with Articles 17.6(i) and 17.6(ii) respectively, see paragraphs 640–641 and 644 below respectively.

(b) Article 17.6(i)

(i) General

629. In *Guatemala – Cement II*, the Panel defined the standard of review applicable by virtue of Article 17.6(i):

> "We consider that it is not our role to perform a *de novo* review of the evidence which was before the investigating authority in this case. Rather, Article 17 makes it clear that our task is to review the determination of the investigating authorities. Specifically, we must determine whether its establishment of the facts was proper and the evaluation of those facts was unbiased and objective.[809] In other words, we must determine whether an unbiased and objective investigating authority evaluating the evidence before it at the time of the investigation could properly have made the determinations made by Guatemala in this case. In our review of the investigating authorities' evaluation of the facts, we will first need to examine evidence considered by the investigating authority, and second, this examination is limited by Article 17.5(ii) to the facts before the investigating authority. That is, we are not to examine any new evidence that was not part of the record of the investigation.[810]"[811]

630. In *EC – Bed Linen (Article 21.5 – India)*, the Appellate Body stated clearly that it "will not interfere lightly with [a] panel's exercise of its discretion under Article 17.6(i) of the *Anti-Dumping Agreement*."[812] In that appeal, it also explained that "[a]n appellant must persuade us, with sufficiently compelling reasons, that we should disturb a panel's assessment of the facts or inter-

[805] (*footnote original*) Appellate Body Report, *United States – Transitional Safeguard Measure on Combed Cotton Yarn from Pakistan* ("*US – Cotton Yarn*"), WT/DS192/AB/R, adopted 5 November 2001, para. 74; Appellate Body Report, *United States – Safeguard Measures on Imports of Fresh, Chilled or Frozen Lamb Meat from New Zealand and Australia* ("*US – Lamb*"), WT/DS177/AB/R, WT/DS178/AB/R, adopted 16 May 2001, para. 106.

[806] (*footnote original*) Appellate Body Report, *US – Cotton Yarn*, para. 69, n.42, citing Appellate Body Report, *US – Lamb*, para. 106.

[807] (*footnote original*) Appellate Body Report, *United States – Imposition of Countervailing Duties on Certain Hot-Rolled Lead and Bismuth Carbon Steel Products Originating in the United Kingdom* ("*US – Lead and Bismuth II*"), WT/DS138/AB/R, adopted 7 June 2000, DSR 2000:V, 2601 at para. 49.

[808] Panel Report on *US – Softwood Lumber VI*, paras. 7.15–7.18.

[809] (*footnote original*) We note that, in the context of safeguard measures, the panel in *Korea – Dairy*, said the following of the need for a panel to perform an objective assessment pursuant to Article 11 of the DSU:

> "7.30 We consider that for the Panel to adopt a policy of total deference to the findings of the national authorities could not ensure an 'objective assessment' as foreseen by Article 11 of the DSU. This conclusion is supported, in our view, by previous panel reports that have dealt with this issue. However, we do not see our review as a substitute for the proceedings conducted by national investigating authorities. Rather, we consider that the Panel's function is to assess objectively the review conducted by the national investigating authority, in this case the KTC. For us, an objective assessment entails an examination of whether the KTC had examined all facts in its possession or which it should have obtained in accordance with Article 4.2 of the Agreement on Safeguards (including facts which might detract from an affirmative determination in accordance with the last sentence of Article 4.2 of the Agreement on Safeguards), whether adequate explanation had been provided of how the facts as a whole supported the determination made, and, consequently, whether the determination made was consistent with the international obligations of Korea. Finally, we consider that the Panel should examine the analysis performed by the national authorities at the time of the investigation on the basis of the various national authorities' determinations and the evidence it had collected."

[810] (*footnote original*) We note that this standard is consistent with the approach followed by the panel in *Guatemala – Cement I* in para. 7.57 of its report. In that instance the panel was of the opinion that its role was:

> ". . . to examine whether the evidence relied on by the Ministry was sufficient, that is, whether an unbiased and objective investigating authority evaluating that evidence could properly have determined that sufficient evidence of dumping, injury, and causal link existed to justify initiating the investigation."

[811] Panel Report on *Guatemala – Cement II*, para. 8.19. See also Panel Report on *US – Stainless Steel*, para. 6.18, Panel Report on *Argentina – Ceramic Tiles*, paras. 6.2 – 6.3 and Panel Report on *Egypt – Steel Rebar*, paras. 7.8–7.14.

[812] Appellate Body Report, *EC – Bed Linen (Article 21.5 – India)*, para. 169, quoting Appellate Body Report, *US – Wheat Gluten*, para. 151.

fere with a panel's discretion as the trier of facts."[813] Applying this standard in the case of *EC – Tube or Pipe Fittings*, the Appellate Body rejected Brazil's claim that the Panel failed to assess whether the establishment of the facts was proper pursuant to Article 17.6(i) of the *Anti-Dumping Agreement*, when it found that an internal note which contained analysis of certain injury factors and which was not disclosed to the interested parties during the investigation, was part of the record of the underlying anti-dumping investigation. The Appellate Body considered highly relevant the fact that the Panel had not just accepted at face value the assertion of the EC that this internal note was contemporaneous to the investigation and formed part of the record of the investigation, but had taken steps to assure itself of the validity of this exhibit and of the fact that it formed part of the contemporaneous written record of the EC investigation.[814]

(ii) "establishment of the facts was proper"

Record of the investigating authority

631. In *Guatemala – Cement I*, in order to examine the claim that the initiation of an investigation was not consistent with Article 5, the Panel "scrutinized all the information which was on the record before the Ministry at the time of initiation in examining whether an unbiased and objective investigating authority could properly have made the determination that was reached by the Ministry."[815] The Appellate Body found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the interpretation of Article 17 by the Panel.[816] Accordingly, the Panel Report on *Guatemala – Cement I* was adopted as reversed by the Appellate Body.[817] However, the panels on *EC – Bed Linen*, *US – Stainless Steel*, *Guatemala – Cement II*, and *Thailand – H-Beams* also based their factual review of decisions of the investigating authority on the evidence before the authority at the time of the determination.[818] See also paragraphs 622–624 above dealing with Article 17.5(ii) which orders Panels to consider a dispute under the *Anti-Dumping Agreement* on the basis of the facts made available to the investigating authorities.

Treatment of undisclosed facts

632. In *Thailand – H-Beams*, in discussing whether an injury determination must be based only upon evidence disclosed to the parties to the investigation, the Appellate Body interpreted the term "establishment of the facts was proper", as follows:

> "The ordinary meaning of 'establishment' suggests an action to 'place beyond dispute; ascertain, demonstrate, prove'; the ordinary meaning of 'proper' suggests 'accurate' or 'correct'. Based on the ordinary meaning of these words, the proper establishment of the facts appears to have no logical link to whether those facts are disclosed to, or discernible by, the parties to an anti-dumping investigation prior to the final determination."[819]

633. The Appellate Body elaborated on the aim of Article 17.6(i), stating that its function is to "prevent a panel from 'second-guessing' a determination of a national authority when the establishment of the facts is proper and the evaluation of those facts is unbiased and objective":

> "There is a clear connection between Articles 17.6(i) and 17.5(ii). The facts of the matter referred to in Article 17.6(i) are 'the facts made available in conformity with appropriate domestic procedures to the authorities of the importing Member' under Article 17.5(ii). Such facts do not exclude confidential facts made available to the authorities of the importing Member. Rather, Article 6.5 explicitly recognizes the submission of confidential information to investigating authorities and its treatment and protection by those authorities. Article 12, in paragraphs 2.1, 2.2 and 2.3, also recognizes the use, treatment and protection of confidential information by investigating authorities. The 'facts' referred to in Articles 17.5(ii) and 17.6(i) thus embrace 'all facts confidential and non-confidential', made available to the authorities of the importing Member in conformity with the domestic procedures of that Member. Article 17.6(i) places a limitation on the panel in the circumstances defined by the Article. The aim of Article 17.6(i) is to prevent a panel from 'second-guessing' a determination of a national authority when the establishment of the facts is proper and the evaluation of those facts is unbiased and objective. Whether evidence or reasoning is disclosed or made discernible to interested parties by the final determination is a matter of *procedure* and *due process*. These matters are very important, but they are comprehensively dealt with in other provisions, notably Articles 6 and 12 of the *Anti-Dumping Agreement*."[820]

(iii) "the evaluation of facts was unbiased and objective"

634. In *US – Stainless Steel*, the Panel examined the determinations of the United States authorities on the issue of whether certain local sales were in dollars or

[813] Appellate Body Report, *EC – Bed Linen (Article 21.5 – India)*, para. 170.

[816] Appellate Body Report on *Guatemala – Cement I*, para. 89.
[817] WT/DSB/M/51, section 9(a).
[818] Panel Report on *EC – Bed Linen*, para. 6.45; Panel Report on *US – Stainless Steel*, para. 6.3; Panel Report on *Guatemala – Cement II*, para. 8.19; and Panel Report on *Thailand – H-Beams*, para. 7.51; Panel Report on *Argentina – Ceramic Tiles*, para. 6.27.
[819] Appellate Body Report on *Thailand – H-Beams*, para. 116. With respect to a related topic under Article 3.1, see also paras. 111–114 of this Chapter.
[820] Appellate Body Report on *Thailand – H-Beams*, para. 117. With respect to a related topic under Article 3.1, see also paras. 111–114 of this Chapter.

won. The Panel rejected Korea's argument that Article 17.6(i) did not apply to the examination of this issue because the United States decision on this point was not a factual determination. The Panel stated:

> "Korea's view appears to be that Article 17.6(i) applies only in respect of the establishment of certain objectively-ascertainable underlying facts, e.g., did the invoices express the sales values in terms of dollars or won, in what currency payment was made, etc. We consider that this interpretation does not however coincide with the language of Article 17.6(i). That Article speaks not only to the establishment of the facts, but also to their evaluation. Therefore, the Panel must check not merely whether the national authorities have properly established the relevant facts but also the value or weight attached to those facts and whether this was done in an unbiased and objective manner. This concerns the according of a certain weight to the facts in their relation to each other; it is not a legal evaluation."[821]

635. In *Thailand – H-Beams*, in discussing whether an injury determination must be based only upon evidence disclosed to the parties to the investigation, the Appellate Body touched on the term "unbiased and objective". The Appellate Body stated that "[t]he ordinary meaning of the words 'unbiased' and 'objective' also appears to have no logical link to whether those facts are disclosed to, or discernible by, the parties to an anti-dumping investigation at the time of the final determination."[822] See also the excerpt from the Appellate Body Report on *Thailand – H-Beams* referenced in paragraph 633 above.

(iv) Relevance of the different roles of panels and investigating authorities

636. In *US – Hot-Rolled Steel*, when defining the task of panels under Article 17.6(i), the Appellate Body recalled the importance "to bear in mind the different roles of panels and investigating authorities".[823]

> "Although the text of Article 17.6(i) is couched in terms of an obligation on *panels* – panels 'shall' make these determinations – the provision, at the same time, in effect defines when *investigating authorities* can be considered to have acted inconsistently with the *Anti-Dumping Agreement* in the course of their 'establishment' and 'evaluation' of the relevant facts. In other words, Article 17.6(i) sets forth the appropriate standard to be applied by *panels* in examining the WTO-consistency of the *investigating authorities'* establishment and evaluation of the facts under other provisions of the *Anti-Dumping Agreement*. Thus, panels must assess if the establishment of the facts by the investigating authorities was *proper* and if the evaluation of those facts by those authorities was *unbiased and objective*. If these broad standards have not been met, a panel must hold the investigating authorities' establishment or evaluation of the facts to be inconsistent with the *Anti-Dumping Agreement*."[824]

637. As regards the different roles of investigating authorities and panels in the context of Article 3.7 (threat of serious injury), see paragraph 199 above.

(v) No ex post rationalization

638. On the question of whether *ex post* rationalization should be taken into account in order to assess an authority's compliance with the provisions of the *Anti-Dumping Agreement*, the Panel on *Argentina – Ceramic Tiles* stated:

> "Under Article 17.6 of the AD Agreement we are to determine whether the DCD established the facts properly and whether the evaluation performed by the DCD was unbiased and objective. In other words, we are asked to review the evaluation of the DCD made at the time of the determination as set forth in a public notice or in any other document of a public or confidential nature. We do not believe that, as a panel reviewing the evaluation of the investigating authority, we are to take into consideration any arguments and reasons that did not form part of the evaluation process of the investigating authority, but instead are *ex post facto* justifications which were not provided at the time the determination was made."[825] (emphasis in original)

639. The Panel on *Argentina – Poultry Anti-Dumping Duties* agreed with the view expressed by the Panel on *Argentina – Ceramic Tiles*, concluding that as a panel reviewing the evaluation of the investigating authority, it did not believe it was to "take into consideration any arguments and reasons that are not demonstrated to have formed part of the evaluation process of the investigating authority"[826]

(vi) Relationship of Article 17.6(i) with Article 11 of the DSU

640. In *US – Hot-Rolled Steel*, the Appellate Body defined the task of panels under Article 17.6(i) by comparing it to their task under Article 11 of the DSU:

> "Under Article 17.6(i), the task of panels is simply to review the investigating authorities' 'establishment' and

[821] Panel Report on *US – Stainless Steel*, para. 6.18.
[822] Appellate Body Report on *Thailand – H-Beams*, para. 116.
[823] Appellate Body Report on *US – Hot Rolled Steel*, para. 55.
[824] Appellate Body Report on *US – Hot Rolled Steel*, para. 56.
[825] Panel Report on *Argentina – Ceramic Tiles*, para. 6.27.
[826] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.49. The Panel thus rejected various arguments that were based on an ex post rationalization by the defendant, such as those put forward with respect to the evaluation of the magnitude of the margin of dumping as an Article 3.4 factor:

> "We note that Argentina has failed to indicate where such arguments are set forth in the CNCE's Record No. 576, or to point us to any other document in which the CNCE is alleged to have considered such arguments. Such arguments therefore constitute *ex post* rationalization which we are precluded from taking into account. [. . .]"

Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.321.

'evaluation' of the facts. To that end, Article 17.6(i) requires panels to make an '*assessment* of the *facts*'. The language of this phrase reflects closely the obligation imposed on panels under Article 11 of the DSU to make an '*objective assessment* of the *facts*'. Thus the text of both provisions requires panels to 'assess' the facts and this, in our view, clearly necessitates an active review or examination of the pertinent facts. Article 17.6(i) of the *Anti-Dumping Agreement* does not expressly state that panels are obliged to make an assessment of the facts which is '*objective*'. However, it is inconceivable that Article 17.6(i) should require anything other than that panels make an *objective* 'assessment of the facts of the matter'. In this respect, we see no 'conflict' between Article 17.6(i) of the *Anti-Dumping Agreement* and Article 11 of the DSU."[827]

641. In *US – Steel Plate*, India requested the Panel to conduct an "active review" of the facts before the US investigating authorities pursuant to both Article 11 of the DSU and Article 17.6(i). India based its request in the Appellate Body's decisions on the application of Article 11 in *US – Cotton Yarn*[828] and of Article 17.6(i) in *US – Hot-Rolled Steel*.[829] The US was opposed to such a request since it considered that India was trying to add to the obligations of investigating authorities. The Panel considered that there was no question that it had to apply Article 17.6 to the dispute and recalled the Appellate Body's decision in *US – Hot-Rolled Steel* to the effect that Article 17.6(i) is not in conflict with Article 11 of the DSU[830] and that Article 17.6(ii) supplemented Article 11 of the DSU.[831] [832] The Panel found:

"[W]e do not consider that India's reference to Article 11 of the DSU constitutes an argument that we apply some other or different standard of review in considering the factual aspects of this dispute than that set out in Article 17.6 of the AD Agreement, which India recognizes is applicable in all anti-dumping disputes. That standard requires us to assess the facts to determine whether the investigating authorities' own establishment of facts was proper, and to assess the investigating authorities' own evaluation of those facts to determine if it was unbiased and objective. What is clear from this is that we are precluded from establishing facts and evaluating them for ourselves – that is, we may not engage in *de novo* review. However, this does not limit our examination of the matters in dispute, but only the manner in which we conduct that examination. In this regard, we keep in mind that Article 17.5(ii) of the AD Agreement establishes that we are to examine the matter based upon 'the facts made available in conformity with appropriate domestic procedures to the authorities of the importing Member.' "[833]

(c) Article 17.6(ii)

(i) First sentence: customary rules of interpretation

642. In *US – Hot-Rolled Steel*, the Appellate Body looked into the first sentence of Article 17.6(ii) which provides that the Panel "shall" interpret the provisions of the *Anti-Dumping Agreement* "in accordance with customary rules of interpretation", and considered that it echoed closely Article 3.2 of the DSU (See Section III.B.1 of the Chapter on the *DSU*). The Appellate Body stated that such customary rules are embodied in Article 31 and 32 of the Vienna Convention on the Law of the Treaties. On a further note, the Appellate Body indicated that "[c]learly, this aspect of Article 17.6(ii) involves no 'conflict' with the DSU but, rather, confirms that the usual rules of treaty interpretation under the DSU also apply to the *Anti-Dumping Agreement*".[834]

(ii) Second sentence: more than one permissible interpretation

643. The second sentence of Article 17.6(ii) deals with the situation where there is more than one permissible interpretation of a provision of the *Anti-Dumping Agreement*.[835] In *US – Hot-Rolled Steel*, the Appellate Body defined the term "permissible interpretation" as "one which is found to be appropriate *after* application of the pertinent rules of the *Vienna Convention*".[836] The Appellate Body considered:

"This second sentence of Article 17.6(ii) *presupposes* that application of the rules of treaty interpretation in Articles 31 and 32 of the *Vienna Convention* could give rise to, at least, two interpretations of some provisions of the *Anti-Dumping Agreement*, which, under that Convention, would both be '*permissible* interpretations'. In that event, a measure is deemed to be in conformity with the *Anti-Dumping Agreement* 'if it rests upon one of those permissible interpretations.'

It follows that, under Article 17.6(ii) of the *Anti-Dumping Agreement*, panels are obliged to determine whether a measure rests upon an interpretation of the relevant provisions of the *Anti-Dumping Agreement* which is

[827] Appellate Body Report on *US – Hot Rolled Steel*, para. 55.
[828] See Section XI of the Chapter on *DSU*.
[829] See para. 640 of this Chapter.
[830] See para. 640 of this Chapter.
[831] See para. 644 of this Chapter.
[832] Panel Report on *US – Steel Plate*, paras. 7.1–7.5.
[833] Panel Report on *US – Steel Plate*, para. 7.6.
[834] Appellate Body Report on *US – Hot Rolled Steel*, para. 57. See also Panel Report on *US – Steel Plate*, para. 7.7.
[835] In *EC – Bed Linen*, the EC argued that the Panel had failed to apply the standard of review laid down in Article 17.6(ii) because it had not established that the interpretation of Article 2.4.2 of the Anti-Dumping Agreement was "impermissible". The Appellate Body upheld the Panel's finding and indicated that the Panel had not viewed the interpretation given by the EC of Article 2.4.2 as a "permissible interpretation" within the meaning of Article 17.6(ii). The Appellate Body considered that "the Panel was not faced with a choice of multiple 'permissible' interpretations which would have required it, under Article 17.6(ii), to give deference to the interpretation relied upon by the European Communities. Rather, the Panel was faced with a situation in which the interpretation relied upon by the European Communities was, . . ., 'impermissible'." Appellate Body Report on *EC – Bed Linen*, paras. 63 – 66.
[836] Appellate Body Report on *US – Hot Rolled Steel*, para. 60.

permissible under the rules of treaty interpretation in Articles 31 and 32 of the *Vienna Convention*."[837]

(iii) Relationship with standard of review in Article 11 of the DSU

644. In *US – Hot-Rolled Steel*, the Appellate Body considered the relationship between Article 17.6(ii) and the DSU, in particular Article 11. The Appellate Body stated:

"[A]lthough the second sentence of Article 17.6(ii) of the *Anti-Dumping Agreement* imposes obligations on panels which are not found in the DSU, we see Article 17.6(ii) as supplementing, rather than replacing, the DSU, and Article 11 in particular. Article 11 requires panels to make an 'objective assessment of the matter' as a whole. Thus, under the DSU, in examining claims, panels must make an 'objective assessment' of the legal provisions at issue, their 'applicability' to the dispute, and the 'conformity' of the measures at issue with the covered agreements. Nothing in Article 17.6(ii) of the *Anti-Dumping Agreement* suggests that panels examining claims under that Agreement should not conduct an 'objective assessment' of the legal provisions of the Agreement, their applicability to the dispute, and the conformity of the measures at issue with the Agreement. Article 17.6(ii) simply adds that a panel shall find that a measure is in conformity with the *Anti-Dumping Agreement* if it rests upon one permissible interpretation of that Agreement."[838]

645. With respect to the question of the legal interpretation under Article 17.6 (ii), the Panel on *US – Softwood Lumber VI* considered that under the *Anti--Dumping Agreement*, a panel is to follow the same rules of treaty interpretation as in any other dispute:

"Thus, it is clear to us that under the AD Agreement, a panel is to follow the same rules of treaty interpretation as in any other dispute. The difference is that if a panel finds more than one permissible interpretation of a provision of the AD Agreement, it may uphold a measure that rests on one of those interpretations. It is not clear whether the same result could be reached under Articles 3.2 and 11 of the DSU. However, it seems to us that there might well be cases in which the application of the Vienna Convention principles together with the additional provisions of Article 17.6 of the AD Agreement could result in a different conclusion being reached in a dispute under the AD Agreement than under the SCM Agreement. In this case, it has not been necessary for us to resolve this question, as we did not find any instances where the question of violation turned on the question whether there was more than one permissible interpretation of the text of the relevant Agreements."[839]

(d) Relationship between subparagraphs (i) and (ii) of Article 17.6

646. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body ruled that "the requirements of the standard of review provided for in Article 17.6(i) and 17.6(ii) are cumulative. In other words, a panel must find a determination made by the investigating authorities to be consistent with relevant provisions of the *Anti-Dumping Agreement* if it finds that those investigating authorities have properly established the facts and evaluated those facts in an unbiased and objective manner, *and* that the determination rests upon a 'permissible' interpretation of the relevant provisions."[840]

8. Relationship with other Articles

(a) Article 3

647. In *Thailand – H-Beams*, the Appellate Body addressed the relationship between Articles 3.1, and 17.5 and 17.6. See paragraph 113 above.

(b) Article 5

648. The Panel on *Guatemala – Cement I* addressed the relationship between Articles 5.3 and 17.6. In determining what constitutes "sufficient evidence to justify the initiation of an investigation" under Article 5.3, the Panel on *Guatemala – Cement I* applied the standard of review set out in Article 17.6(i).[841] The Panel also considered that the standard of review for the initiation of an investigation under Article 5 is less strict than that for preliminary or final determination of dumping, injury and causation.[842] However, the Appellate Body found that the dispute was not properly before the Panel and therefore did not reach a conclusion on the interpretation of Article 17.6. See paragraph 256 above.

(c) Article 7

649. The relationship between Articles 7.1 and 17.4 was discussed in *Mexico – Corn Syrup*. See paragraph 616 above.

650. Also, the relationship between Articles 7.4 and 17.4 was discussed in *Mexico – Corn Syrup*. See paragraphs 615–616 above.

(d) Article 18

651. Further, the relationship between Articles 17.4, and 18.1 and 18.4 was discussed in *US – 1916 Act*. See paragraph 596 above.

[837] Appellate Body Report on *US – Hot Rolled Steel*, paras. 59–60.
[838] Appellate Body Report on *US – Hot Rolled Steel*, para. 62.
[839] Panel Report on *US – Softwood Lumber VI*, para. 7.22.
[840] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 130.
[841] Panel Report on *Guatemala – Cement I*, para. 7.57.
[842] Panel Report on *Guatemala – Cement I*, para. 7.57.

9. Relationship with other WTO Agreements

(a) GATT 1994

(i) Articles XXII and XXIII

652. The Appellate Body in *Guatemala – Cement I* noted the following regarding the relationship between Article 17 and Articles XXII and XXIII of the GATT 1994:

> "Articles XXII and XXIII of the GATT 1994 are *not* expressly incorporated by reference into the *Anti-Dumping Agreement* as they are into all of the other Annex 1A agreements . . . As a result, . . . Article XXIII of the GATT 1994 does *not* apply to disputes brought under the *Anti--Dumping Agreement*. On the contrary, Articles 17.3 and 17.4 of the *Anti-Dumping Agreement* are the 'consultation and dispute settlement provisions' pursuant to which disputes may be brought under that covered agreement."[843]

653. The Appellate Body, in *Guatemala – Cement I*, further addressed this issue. See paragraph 607 above. Also, this issue was addressed in US – *1916 Act*. See paragraphs 593–594 above.

(b) DSU

(i) Article 1

654. The Appellate Body in *Guatemala – Cement I* considered the concurrent application of Article 17 and the rules and procedures of the DSU. See paragraph 591 above.

(ii) Article 3.8

655. In *Mexico – Corn Syrup*, the Panel touched on the relationship between Article 17.5 of the *Anti-Dumping Agreement* and Article 3.8 of the *DSU*. See paragraph 621 above.

(iii) Article 6.2

656. The Appellate Body in *Guatemala – Cement I* rejected the Panel's conclusion that Article 17.5 of the *Anti-Dumping Agreement* prevails over Article 6.2 of the *DSU* and went on to state that both provisions apply cumulatively:

> "The fact that Article 17.5 contains these additional requirements, which are not mentioned in Article 6.2 of the DSU, does not nullify, or render inapplicable, the specific requirements of Article 6.2 of the DSU in disputes brought under the *Anti-Dumping Agreement*. In our view, there is no *inconsistency* between Article 17.5 of the *Anti-Dumping Agreement* and the provisions of Article 6.2 of the DSU. On the contrary, they are complementary and should be applied together. A Panel request made concerning a dispute brought under the *Anti-Dumping Agreement* must therefore comply with the relevant dispute settlement provisions of both that Agreement and the DSU. Thus, when a 'matter' is referred to the DSB by a complaining party under Article 17.4 of the *Anti-Dumping Agreement*, the Panel request must meet the requirements of Articles 17.4 and 17.5 of the *Anti-Dumping Agreement* as well as Article 6.2 of the DSU."[844]

657. The Panel on *Mexico – Corn Syrup* discussed the relationship between Article 17.4 of the *Anti-Dumping Agreement*, and Article 6.2 of the DSU. See paragraph 611 above.

658. This issue was also discussed by the Appellate Body in *Guatemala – Cement I*. See paragraph 656 above.

(iv) Article 7

659. The Appellate Body in *Guatemala – Cement I* linked the term "matter" in Article 7 of the *DSU*, which provides the standard terms of reference for Panels, to the same word in Article 17.4 of the *Anti-Dumping Agreement*.[845] It specifically stated:

> "[T]he word 'matter' has the same meaning in Article 17 of the *Anti-Dumping Agreement* as it has in Article 7 of the DSU. It consists of two elements: the specific 'measure' and the 'claims' relating to it, both of which must be properly identified in a Panel request as required by Article 6.2 of the DSU."[846]

660. The Appellate Body addressed further this issue. See paragraph 613 above.

(v) Article 11

661. For the relationship between Article 17.6 and the standard of review provision of the DSU, i.e. Article 11, see paragraphs 626, 640, 644 and 627 above. See also Section XI of the Chapter on the *DSU*.

(vi) Article 19.1

662. In *Guatemala – Cement I*, it was disputed whether a complaint of non-compliance in an anti-dumping investigation should be examined even if neither a final anti-dumping measure, a provisional measure nor a price undertaking is identified in the request for panel establishment, as referenced in paragraph 612 above. In this regard, the Panel rejected Guatemala's argument that a final or provisional duty or a price undertaking must be identified in a request for panel establishment in order for a panel to be able to issue a recommendation in terms of Article 19.1 of the *DSU*:

> "This [argument] is clearly in conflict with our conclusion regarding the interpretation of the provisions of the ADP Agreement as *not* limited to disputes involving only specific 'measures'. A restrictive reading of Article 19.1

[843] Appellate Body Report on *Guatemala – Cement I*, para. 64, fn 43.
[844] Appellate Body Report on *Guatemala – Cement I*, para. 75.
[845] Appellate Body Report on *Guatemala – Cement I*, para. 72.
[846] Appellate Body Report on *Guatemala – Cement I*, para. 76.

would mean that, while the ADP Agreement provides for consultations and establishment of a Panel to consider a matter without limitation to a specific 'measure', the Panel so established is not empowered to make a recommendation with respect to that matter. This would clearly run counter to the intention of the drafters of the DSU to establish an effective dispute resolution system for the WTO. In addition, it would undermine the special or additional rules for dispute settlement in anti-dumping cases provided for in the ADP Agreement. A broader reading of Article 19.1, on the other hand, *would* give effect to the special or additional dispute settlement provisions of the ADP Agreement, by allowing Panels in anti-dumping disputes to consider the 'matter' referred to them, and issue a recommendation with respect to that matter. As discussed below, the DSU provisions relied on . . . do not, in our view, limit Panels to the consideration only of certain types of specified 'measures' in disputes."[847]

663. The Appellate Body in *Guatemala – Cement I* found that the dispute was not properly before the Panel and therefore did not come to any conclusion as to the broad reading of Article 19.1 by the Panel.[848] The Appellate Body concluded that the Panel did not consider whether the complainant, Mexico, had properly identified a relevant anti-dumping measure in its panel request, and the Panel had therefore erred in finding the dispute properly before it.[849]

10. List of disputes under the Anti-Dumping Agreement

664. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *Anti-Dumping Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*Guatemala – Cement I*	WT/DS60	Articles 5.3 and 5.5
2	*US – DRAMS*	WT/DS99	Articles 2, 3, 5.3 and 7.1
3	*Thailand – H-Beams*	WT/DS122	Articles 2.2, 2.2.2, 3.1, 3.4, 3.5, 5.2, 5.5 and 5.5
4	*Mexico – Corn Syrup*	WT/DS132	Articles 5.1, 5.2, 5.3, 5.4, 5.8, 10.2, 10.4, 17.4 and 17.5
5	*US – 1916 Act*	WT/DS136, WT/DS162	Articles 1, 2.1, 2.2, 3, 4.1, 5.1, 5.2, 5.4, 18.1 and 18.4
6	*EC – Bed Linen*	WT/DS141	Articles 2.2, 2.2.2, 2.4.2, 3.1, 3.4, 3.5, 5.3, 5.5, 6.10, 6.11, 12.2.1, 12.2.2 and 15
7	*Guatemala – Cement II*	WT/DS156	Articles 1, 2, 2.1, 2.2, 3, 5, 6.1, 6.1.2, 6.1.3, 6.2, 6.3, 6.4, 6.5, 6.6, 6.7, 6.8, 6.9, 9, 12 and 18
8	*US – Stainless Steel*	WT/DS179	Articles 2.3, 2.4, 2.4.1, 2.4.2, 6.1, 6.2, 6.9, and 12.2
9	*US – Hot-Rolled Steel*	WT/DS184	Articles 2.1, 3.1, 3.4, 3.5, 4, 6.8, 9.4, 10, 17.5(i), 17.6, 17.6(i), 17.6(ii), 18, Annex I, Annex II
10	*Argentina – Ceramic Tiles*	WT/DS189	Articles 2, 6.5, 6.8, 6.9, 6.10, 17.5(ii), 17.6(i), 17.6(ii)
11	*US – Steel Plate*	WT/DS206	Articles 1, 2.2, 2.4, 6.6, 6.8, 9.3, 12, 15, 17.6(i), 17.6(ii), 18, Annex II
12	*Egypt – Steel Rebar*	WT/DS211	Articles 2.2.1.1, 2.2.2, 2.4, 3.1, 3.2, 3.4, 3.5, 6.1, 6.2, 6.8, 17.6, 17.6(i), 17.6(ii), Annex I, Annex II
13	*EC – Tube or Pipe Fittings*	WT/DS219	Articles 1, 2.2, 2.4, 2.4.1, 2.4.2, 3.1, 3.2, 3.3, 3.4, 3.5, 5.2, 5.3, 5.8, 6.2, 6.4, 6.6, 6.9, 9.3, 11.1, 11.2, 12.2, 12.2.2
14	*US – Section 129(c)(1) URAA*	WT/DS221	Articles 1, 9.3, 11.1, 18.1, 18.4
15	*US – Offset Act (Byrd Amendment)*	WT/DS234, WT/DS217	Articles 5.4, 8, 18.1, 18.4
16	*Argentina – Poultry Anti-Dumping Duties*	WT/DS241	Articles 2.4, 5.2, 5.3, 5.7, 5.8, 6.1.1, 6.1.2, 6.1.3, 6.2, 6.8, 6.9, 6.10, 12.2.2, Annex II
17	*US – Corrosion-Resistant Steel Sunset Review*	WT/DS244	Articles 2, 2.4, 3.3, 5.6, 5.8, 6.1, 6.2, 6.6, 6.10, 11.1, 11.2, 11.3, 12.1, 12.3, 18.3, 18.4
18	*US – Softwood Lumber V*	WT/DS264	Articles 1, 2, 2.1, 2.2, 2.2.1, 2.2.1.1, 2.2.2, 2.4, 2.4.2, 3, 4.1, 5, 5.2, 5.3, 5.8, 6.10, 9, 9.3, 18.1
19	*US – Oil Country Tubular Goods Sunset Reviews*	WT/DS268	Articles 2, 3.1, 3.2, 3.4, 3.5, 3.7, 3.8, 6.1, 6.2, 6.8, 6.9, 11.1, 11.3, 11.4, 12.2, 12.2.2, 18, Annex II
20	*US – Softwood Lumber VI*	WT/DS277	Articles 1, 3.1, 3.2, 3.4, 3.5, 3.7, 3.8, 12 and 18.1

[847] Panel Report on *Guatemala – Cement I*, para. 7.21. With respect to the issue of repayment of anti-dumping duties under Article 19.1 of the *DSU*, see Panel Report on *Guatemala – Cement II*, paras. 9.4–9.7.

[848] Appellate Body Report on *Guatemala – Cement I*, para. 89.

[849] Appellate Body Report on *Guatemala – Cement I*, para. 88.

PART III

XVIII. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Final Provisions

18.1 No specific action against dumping of exports from another Member can be taken except in accordance with the provisions of GATT 1994, as interpreted by this Agreement.[24]

(*footnote original*) [24] This is not intended to preclude action under other relevant provisions of GATT 1994, as appropriate.

18.2 Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

18.3 Subject to subparagraphs 3.1 and 3.2, the provisions of this Agreement shall apply to investigations, and reviews of existing measures, initiated pursuant to applications which have been made on or after the date of entry into force for a Member of the WTO Agreement.

18.3.1 With respect to the calculation of margins of dumping in refund procedures under paragraph 3 of Article 9, the rules used in the most recent determination or review of dumping shall apply.

18.3.2 For the purposes of paragraph 3 of Article 11, existing anti-dumping measures shall be deemed to be imposed on a date not later than the date of entry into force for a Member of the WTO Agreement, except in cases in which the domestic legislation of a Member in force on that date already included a clause of the type provided for in that paragraph.

18.4 Each Member shall take all necessary steps, of a general or particular character, to ensure, not later than the date of entry into force of the WTO Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement as they may apply for the Member in question.

18.5 Each Member shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

18.6 The Committee shall review annually the implementation and operation of this Agreement taking into account the objectives thereof. The Committee shall inform annually the Council for Trade in Goods of developments during the period covered by such reviews.

18.7 The Annexes to this Agreement constitute an integral part thereof.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

1. General

(a) Rules on interpretation of the Anti-Dumping Agreement

665. Regarding the interpretation of the *Anti-Dumping Agreement*, the Panel on *US – DRAMS* referred to Article 3.2 of the *DSU*:

> "[W]e bear in mind that Article 3.2 of the DSU requires Panels to interpret 'covered agreements', including the AD Agreement, 'in accordance with customary rules of interpretation of public international law'. We recall that the rules of treaty interpretation set forth in Article 31 of the Vienna Convention expressly defines the context of the treaty to include the text of the treaty. Thus, the entire text of the AD Agreement may be relevant to a proper interpretation of any particular provision thereof."[850]

2. Article 18.1

(a) "specific action against dumping"

666. The Appellate Body in *US – 1916 Act* considered that "the scope of application of Article VI [of the GATT 1994] is clarified, in particular, by Article 18.1 of the *Anti-Dumping Agreement*".[851] The Appellate Body then found "that Article 18.1 of the *Anti-Dumping Agreement* requires that any 'specific action against dumping' be in accordance with the provisions of Article VI of the GATT 1994 concerning dumping, as those provisions are interpreted by the *Anti-Dumping Agreement*":

> "In our view, the ordinary meaning of the phrase 'specific action against dumping' of exports within the meaning of Article 18.1 is action that is taken in response to situations presenting the constituent elements of 'dumping'. 'Specific action against dumping' of exports must, at a minimum, encompass action that may be taken *only* when the constituent elements of 'dumping' are present. Since intent is not a constituent element of 'dumping', the *intent* with which action against dumping is taken is not relevant to the determination of whether such action is 'specific action against dumping' of exports within the meaning of Article 18.1 of the *Anti-Dumping Agreement*.
>
> . . .
>
> We note that footnote 24 refers generally to 'action' and not, as does Article 18.1, to 'specific action against dumping' of exports. 'Action' within the meaning of footnote 24 is to be distinguished from 'specific action against dumping' of exports, which is governed by Article 18.1 itself.

[850] Panel Report on *US – DRAMS*, para. 6.21.
[851] Appellate Body Report on *US – 1916 Act*, para. 121.

> Article 18.1 of the *Anti-Dumping Agreement* contains a prohibition on the taking of any 'specific action against dumping' of exports when such specific action is not 'in accordance with the provisions of GATT 1994, as interpreted by this Agreement'. Since the only provisions of the GATT 1994 'interpreted' by the *Anti-Dumping Agreement* are those provisions of Article VI concerning dumping, Article 18.1 should be read as requiring that any 'specific action against dumping' of exports from another Member be in accordance with the relevant provisions of *Article VI* of the GATT 1994, as interpreted by the *Anti-Dumping Agreement*.
>
> We recall that footnote 24 to Article 18.1 refers to '*other* relevant provisions of GATT 1994' (emphasis added). These terms can only refer to provisions other than the provisions of Article VI concerning dumping. Footnote 24 thus confirms that the 'provisions of GATT 1994' referred to in Article 18.1 are in fact the provisions of Article VI of the GATT 1994 concerning dumping.
>
> We have found that Article 18.1 of the *Anti-Dumping Agreement* requires that any 'specific action against dumping' be in accordance with the provisions of Article VI of the GATT 1994 concerning dumping, as those provisions are interpreted by the *Anti-Dumping Agreement*. It follows that Article VI is applicable to any 'specific action against dumping' of exports, i.e., action that is taken in response to situations presenting the constituent elements of 'dumping'.[852]

667. In *US – Offset Act (Byrd Amendment)*, the Appellate Body reiterated its view that "a measure that may be taken only when the constituent elements of dumping or a subsidy are present, is a 'specific action' in response to dumping within the meaning of Article 18.1 of the *Anti-Dumping Agreement*".[853] This implied that the measure must be inextricably linked to, or have a strong correlation with, the constituent elements of dumping. According to the Appellate Body, "such link or correlation may, as in the 1916 Act, be derived from the text of the measure itself".[854] However, not all action taken *in response to* dumping is necessarily action *against* dumping.[855] The Panel on *US – Offset Act (Byrd Amendment)* took the position that an action operates "against" dumping or a subsidy within the meaning of Article 18.1 of the *Anti-Dumping Agreement* if it has an *adverse bearing* on dumping.[856] The Appellate Body agreed with the Panel's interpretation of the term "against" and reached the following conclusion with respect to the Continued Dumping and Subsidy Offset Act (CDSOA):

> "All these elements lead us to conclude that the CDSOA has an adverse bearing on the foreign producers/exporters in that the imports into the United States of the dumped or subsidized products (besides being subject to anti-dumping or countervailing duties) result in the financing of United States competitors – producers of like products – through the transfer to the latter of the duties collected on those exports. Thus, foreign producers/exporters have an incentive not to engage in the practice of exporting dumped or subsidized products or to terminate such practices. Because the CDSOA has an adverse bearing on, and, more specifically, is designed and structured so that it dissuades the practice of dumping or the practice of subsidization, and because it creates an incentive to terminate such practices, the CDSOA is undoubtedly an action 'against' dumping or a subsidy, within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*."[857]

668. In *US – Offset Act (Byrd Amendment)*, the Appellate Body also emphasized that in order to determine whether a specific action is "against" dumping or subsidization, it is neither necessary, nor relevant, to examine the conditions of competition under which domestic products and dumped/subsidized imports compete, and to assess the impact of the measure on the competitive relationship between them. An analysis of the term "against", in the view of the Appellate Body, "is more appropriately centred on the design and structure of the measure; such an analysis does not mandate an economic assessment of the implications of the measure on the conditions of competition under which domestic product and dumped/subsidized imports compete".[858] However, as the Appellate Body also clearly stated, "a measure cannot be against dumping or a subsidy simply because it facilitates or induces the exercise of rights that are WTO-consistent"[859], such as the filing of anti-dumping applications.

(b) "except in accordance with the provisions of GATT 1994"

669. The Panel on *US – 1916 Act (EC)* considered that Article 18.1 of the *Anti-Dumping Agreement* confirms the

[859] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 258.

purpose of Article VI as "to define the conditions under which counteracting dumping *as such* is allowed."[860]

(c) Footnote 24

670. The Panel on *US – 1916 Act (Japan)* considered that "footnote 24 does not prevent Members from addressing the causes or effects of dumping through other trade policy instruments allowed under the WTO Agreement. Nor does it prevent Members from adopting other types of measures which are compatible with the WTO Agreement. Such a possibility does not affect our conclusion that, when a law of a Member addresses the type of price discrimination covered by Article VI and makes it the cause for the imposition of anti-dumping measures, that Member has to abide by the requirements of Article VI and the *Anti-Dumping Agreement*."[861]

671. The Appellate Body on *US – Offset Act (Byrd Amendment)* clarified that footnotes 24 and 56 are clarifications of the main provisions, and were added so as to avoid ambiguity:

> "[T]hey confirm what is implicit in Article 18.1 of the *Anti-Dumping Agreement* and in Article 32.1 of the *SCM Agreement*, namely, that an action that is *not* 'specific' within the meaning of Article 18.1 of the *Anti-Dumping Agreement* and of Article 32.1 of the *SCM Agreement*, but is nevertheless related to dumping or subsidization, is not prohibited by Article 18.1 of the *Anti-Dumping Agreement* or Article 32.1 of the *SCM Agreement*."[862]

672. In *US – 1916 Act*, the Appellate Body referred to footnote 24 in order to clarify the scope of Article VI of *GATT 1994*. See paragraph 666 above.

3. Article 18.3

(a) "reviews of existing measures"

673. Referring to its statement that the *Anti-Dumping Agreement* applies only to "reviews of existing measures" initiated pursuant to applications made on or after the date of entry into force of the *Anti-Dumping Agreement* for the Member concerned, the Panel on *US – DRAMS* drew a comparison with the findings of the Panel on *Brazil – Desiccated Coconut*:

> "We note that this approach is in line with that adopted by the Panel on *Desiccated Coconut* in respect of Article 32.3 of the SCM Agreement, which is virtually identical to Article 18.3 of the AD Agreement. That Panel stated that 'Article 32.3 defines comprehensively the situations in which the SCM Agreement applies to measures which were imposed pursuant to investigations not subject to that Agreement. Specifically, the SCM Agreement applies to reviews of existing measures initiated pursuant to applications made on or after the date of entry into force of the WTO Agreement. It is thus through the mechanism of reviews provided for in the SCM Agreement, and only through that mechanism, that the Agreement becomes effective with respect to measures imposed pursuant to investigations to which the SCM Agreement does not apply' (*Brazil – Measures Affecting Desiccated Coconut*, WT/DS22/R, para. 230, upheld by the Appellate Body in WT/DS22/AB/R, adopted on 20 March 1997)."[863]

(b) Application of the Anti-Dumping Agreement

674. Regarding the application of the *Anti-Dumping Agreement* to pre- and post-WTO measures, the Panel on *US – DRAMS* emphasized that the *Anti-Dumping Agreement* applies only to reviews and existing measures initiated pursuant to applications made on or after the date of entry into force of the Agreement with respect to the Member concerned:

> "In our view, pre-WTO measures do not become subject to the AD Agreement simply because they continue to be applied on or after the date of entry into force of the WTO Agreement for the Member concerned. Rather, by virtue of the ordinary meaning of the terms of Article 18.3, the AD Agreement applies only to 'reviews of existing measures' initiated pursuant to applications made on or after the date of entry into force of the AD Agreement for the Member concerned ('post-WTO reviews'). However, we do not believe that the terms of Article 18.3 provide for the application of the AD Agreement to all aspects of a pre-WTO measure simply because parts of that measure are under post-WTO review. Instead, we believe that the wording of Article 18.3 only applies the AD Agreement to the post-WTO review. In other words, the scope of application of the AD Agreement is determined by the scope of the post-WTO review, so that pursuant to Article 18.3, the AD Agreement only applies to those parts of a pre-WTO measure that are included in the scope of a post-WTO review. Any aspects of a pre-WTO measure that are not covered by the scope of the post-WTO review do not become subject to the AD Agreement by virtue of Article 18.3 of the AD Agreement. By way of example, a pre-WTO injury determination does not become subject to the AD Agreement merely because a post-WTO review is conducted relating to the pre-WTO determination of the margin of dumping."[864]

4. Article 18.4

(a) Maintenance of inconsistent legislation after entry into force of WTO Agreement

675. In *US – Hot-Rolled Steel*, Japan had challenged Section 735(c)(5)(A) of the United States Tariff Act of

[860] Panel Report on *US – 1916 Act (EC)*, para. 6.114.
[861] Panel Report on *US – 1916 Act (Japan)*, para. 6.218.
[862] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 262.
[863] Panel Report on *US – DRAMS*, para. 6.14, fn 477.
[864] Panel Report on *US – DRAMS*, para. 6.14.

1930, as amended, which provided for a method for calculating the "all others" rate (see paragraphs 471–473 above) as inconsistent with Article 9.4 and, accordingly with Articles XVI:4 of the WTO Agreement and 18.4 of the *Anti-Dumping Agreement*. The Panel found that Section 735(c)(5)(A), as amended, was, *on its face*, inconsistent with Article 9.4 "in so far as it requires the consideration of margins based in part on facts available in the calculation of the all others rate". The Panel further found that, in maintaining this Section following the entry into force of the *Anti-Dumping Agreement*, the United States had acted inconsistently with Article 18.4 of this Agreement as well as with Article XVI:4 of the WTO Agreement.[865] The Appellate Body upheld these findings.[866]

(b) Mandatory versus discretionary legislation

676. In *US – 1916 Act (EC)*, the Panel referred to Article 18.4 in stating that the mere fact that the initiation of anti-dumping investigations was discretionary would not make the legislation at issue non-mandatory. See paragraph 599 above.

(c) Measures subject to dispute settlement

677. In the view of the Appellate Body on *US – Corrosion-Resistant Steel Sunset Review,* all laws, regulations and administrative procedures mentioned in Article 18.4 may, as such, be submitted to dispute settlement. The Appellate Body considered that "the phrase 'laws, regulations and administrative procedures' seems to us to encompass the entire body of generally applicable rules, norms and standards adopted by Members in connection with the conduct of anti-dumping proceedings.[867] If some of these types of measure could not, as such, be subject to dispute settlement under the *Anti-Dumping Agreement*, it would frustrate the obligation of 'conformity' set forth in Article 18.4."[868]

678. As regards, the concept of measures subject to WTO dispute settlement, see Section VI.B.3(c) of the Chapter on the *DSU*. See also Sections XVII.B.1(b) and (c) of this Chapter.

5. Article 18.5

679. Article 18.5 of the Agreement provides that "Each Member shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations". Pursuant to a decision of the Committee in February 1995, all Members having new or existing legislation and/or regulations which apply in whole or in part to anti-dumping duty investigations or reviews covered by the Agreement are requested to notify the full and integrated text of such legislation and/or regulations to the Committee. Changes in a Member's legislation and/or regulations are to be notified to the Committee as well. Pursuant to that same decision of the Committee, if a Member has no such legislation or regulations, the Member is to inform the Committee of this fact. The Committee also decided that Observer governments should comply with these notification obligations.

680. As of 29 October 2004, 105 Members had notified the Committee regarding their domestic anti-dumping legislation.[869] Of these 105 Members, 29 had notified the Committee that they had no anti-dumping legislation. Members' communications in this regard can be found in document series G/ADP/N/1/. . . . 28 Members had not, as yet, made any notification of anti-dumping legislation and/or regulations. Annex A sets out the status of notifications concerning legislation under Article 18.5 of the Agreement, and sets out the reference symbol of the document(s) containing each Member's current notification in this regard.

6. Article 18.6

(a) Annual reviews

681. Paragraph 7.4 of the Doha Ministerial Decision of 14 November 2001 on Implementation-Related Issues and Concerns states that the Ministerial Conference "[t]akes note that Article 18.6 of the Agreement on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 requires the Committee on Anti-Dumping Practices to review annually the implementation and operation of the Agreement taking into account the objectives thereof. The Committee on Anti-dumping Practices is instructed to draw up guide-

[865] Panel Report on *US – Hot-Rolled Steel*, para. 7.90.
[866] Appellate Body Report on *US – Hot-Rolled Steel*, para. 129.
[867] (*footnote original*) We observe that the scope of each element in the phrase "laws, regulations and administrative procedures" must be determined for purposes of WTO law and not simply by reference to the label given to various instruments under the domestic law of each WTO Member. This determination must be based on the content and substance of the instrument, and not merely on its form or nomenclature. Otherwise, the obligations set forth in Article 18.4 would vary from Member to Member depending on each Member's domestic law and practice.
[868] Appellate Body Report on *United States – Corrosion Resistant Steel Sunset Review*, para. 87.
[869] The European Communities is counted as one Member. Prior to 1 May 2004, the member-States of the EC were the following: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden and the United Kingdom. As of 1 May 2004, the member-States of the EC included in addition to the afore-listed, the following: Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic, and Slovenia. This annual report includes a period both before and after the accession of these Members to the European Communities. Therefore, these Members' separate notifications of legislation, submitted prior to their accession to the EC, are listed in this report. See document G/ADPN/1/EEC/2/Suppl.6 for updated information on the current status of laws and regulations of these Members.

lines for the improvement of annual reviews and to report its views and recommendations to the General Council for subsequent decision within 12 months."[870]

682. Further to the Doha mandate, the Committee on Anti-Dumping Practices adopted on 27 November 2002, the "Recommendation regarding Annual Reviews of the Anti-Dumping Agreement".[871] In its recommendation, the Committee on Anti-Dumping Practices considers that "improvements in the reporting of anti-dumping activity under the Agreement and in the Committee's annual reviews are important to promoting transparency". Accordingly, the Recommendation includes the following improvements aimed at providing useful information to Members and the public, and enhancing transparency under the Agreement:

> "1. The Committee's annual report under Article 18.6 should include in the Summary of Anti-Dumping Actions[872], in addition to the column currently included that lists the initiations reported by each Member, a comparable column listing the number of anti-dumping revocations reported by each Member during the reporting period. Where a Member has not provided such information, the report should note this omission. Members are already requested to report the number of revocations in a separate table as an annex to their semi-annual reports of anti-dumping activity. Consequently, such information should be included in the Article 18.6 annual report.
>
> 2. The Committee's Article 18.6 annual report should also include a chart comparing for each Member the number of preliminary and final measures reported in its semi-annual reports with the number of notices of preliminary and final measures the Member submitted to the Secretariat for the comparable period.
>
> 3. Developed country Members should include, when reporting anti-dumping actions in the semi-annual report that Members are required to submit under Article 16.4, the manner in which the obligations of Article 15 have been fulfilled. Without prejudice to the scope and application of Article 15, price undertakings and lesser duty rules are examples of constructive remedies that could be included in such Members' semi-annual reports. The Committee's annual report under Article 18.6 should include, in a separate table, a compilation of the information reported by each Member in this respect during the reporting period. Where a Member has not provided such information, the report should note this omission.
>
> 4. This recommendation does not prejudge the ability of Members to submit other proposals and to agree in the future on other recommendations aimed at improving annual reviews in the Committee on Anti-dumping Practices."[873]

7. Relationship with other Articles

(a) General

683. The relationship between Article 18.1 and other provisions in the *Anti-Dumping Agreement* was discussed in *Guatemala – Cement II*. The Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with Articles 3, 5, 6, 7,12, and paragraph 2 of Annex I of the *Anti-Dumping Agreement*. The Panel then opined that Mexico's claims under other articles of the *Anti-Dumping Agreement*, among them Article 18, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement. There would be no basis to Mexico's claims under Articles 1, 9 and 18 of the AD Agreement, and Article VI of GATT 1994, if Guatemala were not found to have violated other provisions of the AD Agreement."[874] In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims.

684. The Panel on *US – 1916 Act (Japan)* stated that "[t]he meaning of Article 18.4 which immediately comes to mind when reading that Article is that when a law, regulation or administrative procedure of a Member has been found incompatible with the provisions of the *Anti-Dumping Agreement*, that Member is also in breach of its obligations under Article 18.4."[875]

685. The Panel on *US – 1916 Act (Japan)* stated in a footnote that "we did not exercise judicial economy with respect to Article 18.4 because, in that context, a violation of Article 18.4 automatically results from the breach of another provision of the *Anti-Dumping Agreement*."[876]

(b) Article 17

686. In *US – 1916 Act*, the Appellate Body referred to Article 18.1 and 18.4 as contextual support for its reading of Article 17.4 as allowing Members to bring claims against anti-dumping legislation as such.[877]

8. Relationship with other WTO Agreements

(a) Article VI of the GATT 1994

687. The relationship between Article 18 and Article VI of the *GATT 1994* was discussed in *US – 1916 Act*. See paragraphs 666–670 above and 707 below.

---

[870] WT/MIN(01)/17.
[871] G/ADP/9.
[872] (*footnote original*) *See* Report (2001) of the Committee on Anti-Dumping Practices, Annex C, G/L/495 (31 October 2001).
[873] G/ADP/9.
[874] Panel Report on *Guatemala – Cement II*, para. 8.296.
[875] Panel Report on *US – 1916 Act (Japan)*, para. 6.286.
[876] Panel Report on *US – 1916 Act (Japan)*, para. 6.286, fn 595.
[877] Appellate Body Report on *US – 1916 Act*, paras. 78–82. See also paras. 596 and 610 of this Chapter.

(b) SCM Agreement

688. The Panel on *US – DRAMS* referred to the applicability of the *SCM Agreement* to measures initiated before the entry into force of the *WTO Agreement*, in deciding on a similar issue under the *Anti-Dumping Agreement*. See paragraph 673 above.

XIX. ANNEX I

A. TEXT OF ANNEX I

ANNEX I
PROCEDURES FOR ON-THE-SPOT INVESTIGATIONS PURSUANT TO PARAGRAPH 7 OF ARTICLE 6

1. Upon initiation of an investigation, the authorities of the exporting Member and the firms known to be concerned should be informed of the intention to carry out on-the-spot investigations.

2. If in exceptional circumstances it is intended to include non-governmental experts in the investigating team, the firms and the authorities of the exporting Member should be so informed. Such non-governmental experts should be subject to effective sanctions for breach of confidentiality requirements.

3. It should be standard practice to obtain explicit agreement of the firms concerned in the exporting Member before the visit is finally scheduled.

4. As soon as the agreement of the firms concerned has been obtained, the investigating authorities should notify the authorities of the exporting Member of the names and addresses of the firms to be visited and the dates agreed.

5. Sufficient advance notice should be given to the firms in question before the visit is made.

6. Visits to explain the questionnaire should only be made at the request of an exporting firm. Such a visit may only be made if *(a)* the authorities of the importing Member notify the representatives of the Member in question and *(b)* the latter do not object to the visit.

7. As the main purpose of the on-the-spot investigation is to verify information provided or to obtain further details, it should be carried out after the response to the questionnaire has been received unless the firm agrees to the contrary and the government of the exporting Member is informed by the investigating authorities of the anticipated visit and does not object to it; further, it should be standard practice prior to the visit to advise the firms concerned of the general nature of the information to be verified and of any further information which needs to be provided, though this should not preclude requests to be made on the spot for further details to be provided in the light of information obtained.

8. Enquiries or questions put by the authorities or firms of the exporting Members and essential to a successful on-the-spot investigation should, whenever possible, be answered before the visit is made.

B. INTERPRETATION AND APPLICATION OF ANNEX I

1. On-the-spot verifications as an option

689. The Panel on *Argentina – Ceramic Tiles*, indicated in a footnote that, although common practice, there is no requirement to carry out on-the-spot verifications. See paragraph 369 above.

2. Participation of non-governmental experts in the on-the-spot verification

690. In *Guatemala – Cement II*, Mexico claimed that a verification visit by Guatemala's authority to a Mexican producer's site was inconsistent with Article 6.7 and Annex I(2), (3), (7) and (8) because the authority included non-governmental experts with an alleged conflict of interest in its verification team. See paragraphs 372–374 above.

3. Information verifiable on-the-spot

691. In Guatemala – Cement II, Mexico argued that in violation of Article 6.7 and paragraph 7 of Annex I, the Guatemalan authority sought to verify certain information not submitted by the Mexican producer under investigation because it pertained to the period of investigation newly added during the course of the investigation. See paragraph 371 above.

4. Relationship with other Articles

692. In *Guatemala – Cement II*, the Panel found that the subject anti-dumping duty order of Guatemala was inconsistent with Articles 3, 5, 6, 7, 12, and paragraph 2 of Annex I of the *Anti-Dumping Agreement*. The Panel then opined that Mexico's claims under Articles 1, 9 and 18 of the AD Agreement, and Article VI of GATT 1994, were "dependent claims, in the sense that they depend entirely on findings that Guatemala has violated other provisions of the AD Agreement. There would be no basis to Mexico's claims under Articles 1, 9 and 18 of the AD Agreement, and Article VI of GATT 1994, if Guatemala were not found to have violated other provisions of the AD Agreement." In light of this dependent nature of Mexico's claim, the Panel considered it not necessary to address these claims.[878]

693. With respect to the relationship of Annex I and Article 6.7, in *Egypt – Steel Rebar*, the Panel came to the same conclusion as with the relationship between Arti-

[878] Panel Report on *Guatemala – Cement II*, para. 8.296.

cle 6.8 and Annex II (see paragraph 379 above), i.e. that Annex I is incorporated by reference into Article 6.7. See paragraph 368 above.

XX. ANNEX II

A. TEXT OF ANNEX II

ANNEX II
BEST INFORMATION AVAILABLE IN TERMS OF PARAGRAPH 8 OF ARTICLE 6

1. As soon as possible after the initiation of the investigation, the investigating authorities should specify in detail the information required from any interested party, and the manner in which that information should be structured by the interested party in its response. The authorities should also ensure that the party is aware that if information is not supplied within a reasonable time, the authorities will be free to make determinations on the basis of the facts available, including those contained in the application for the initiation of the investigation by the domestic industry.

2. The authorities may also request that an interested party provide its response in a particular medium (e.g. computer tape) or computer language. Where such a request is made, the authorities should consider the reasonable ability of the interested party to respond in the preferred medium or computer language, and should not request the party to use for its response a computer system other than that used by the party. The authority should not maintain a request for a computerized response if the interested party does not maintain computerized accounts and if presenting the response as requested would result in an unreasonable extra burden on the interested party, e.g. it would entail unreasonable additional cost and trouble. The authorities should not maintain a request for a response in a particular medium or computer language if the interested party does not maintain its computerized accounts in such medium or computer language and if presenting the response as requested would result in an unreasonable extra burden on the interested party, e.g. it would entail unreasonable additional cost and trouble.

3. All information which is verifiable, which is appropriately submitted so that it can be used in the investigation without undue difficulties, which is supplied in a timely fashion, and, where applicable, which is supplied in a medium or computer language requested by the authorities, should be taken into account when determinations are made. If a party does not respond in the preferred medium or computer language but the authorities find that the circumstances set out in paragraph 2 have been satisfied, the failure to respond in the preferred medium or computer language should not be considered to significantly impede the investigation.

4. Where the authorities do not have the ability to process information if provided in a particular medium (e.g. computer tape), the information should be supplied in the form of written material or any other form acceptable to the authorities.

5. Even though the information provided may not be ideal in all respects, this should not justify the authorities from disregarding it, provided the interested party has acted to the best of its ability.

6. If evidence or information is not accepted, the supplying party should be informed forthwith of the reasons therefor, and should have an opportunity to provide further explanations within a reasonable period, due account being taken of the time-limits of the investigation. If the explanations are considered by the authorities as not being satisfactory, the reasons for the rejection of such evidence or information should be given in any published determinations.

7. If the authorities have to base their findings, including those with respect to normal value, on information from a secondary source, including the information supplied in the application for the initiation of the investigation, they should do so with special circumspection. In such cases, the authorities should, where practicable, check the information from other independent sources at their disposal, such as published price lists, official import statistics and customs returns, and from the information obtained from other interested parties during the investigation. It is clear, however, that if an interested party does not cooperate and thus relevant information is being withheld from the authorities, this situation could lead to a result which is less favourable to the party than if the party did cooperate.

B. INTERPRETATION AND APPLICATION OF ANNEX II

1. "best information available"

694. With respect to Annex II and recourse to "best information available" pursuant to Article 6.8, see paragraphs 375–425 above.

2. Paragraph 1

695. As regards the interpretation of paragraph 1 of Annex II, see paragraphs 381–383, 397–398 and 400–403 above.

3. Paragraph 3

696. As regards the interpretation of paragraph 3, see paragraphs 378 and 388–395 above.

4. Paragraph 5

697. Concerning the interpretation of the concept of cooperation "to the best of its ability", see paragraphs 406–409 above. As regards co-operation as a two-way process, see paragraph 411 above.

5. Paragraph 6

(a) Duty to inform of reasons for disregarding evidence or information

698. See paragraphs 395 and 414–415 above.

(b) "reasonable period, due account being taken of the time-limits of the investigation"

699. In *Egypt – Steel Rebar*, the Panel considered that the text of paragraph 6 of Annex II "makes clear that the obligation for an investigating authority to provide a reasonable period for the provision of further explanations is not open-ended or absolute. Rather, this obligation exists within the overall time constraints of the investigation." The Panel concluded that "in determining a 'reasonable period' an investigating authority must balance the need to provide an adequate period for the provision of the explanations referred to against the time constraints applicable to the various phases of the investigation and to the investigation as a whole."[879]

700. In *Egypt – Steel Rebar*, the Panel considered that the issue of whether the two-to-five day deadline fixed by the investigating authority was unreasonable "must be judged on the basis of the overall factual situation that existed at the time". In this case, the Panel considered whether the information requested was new information, whether any of the other respondents received a longer period in which to respond and what was the attitude of the respondents concerned, and concluded that the deadline in question was not unreasonable.[880]

6. Paragraph 7

701. As regards the possibility of resorting to a "secondary source", see paragraph 412 above.

702. Concerning the concept of cooperation, see paragraphs 405–406 above.

7. Relationship with Article 6

(a) Relationship with Article 6.1

703. In *Egypt – Steel Rebar*, Turkey had claimed a violation of paragraph 1 of Annex II outside the context of Article 6.8. The Panel decided not to rule on whether paragraph 1 could be invoked separately from Article 6.8.[881]

(b) Relationship with Article 6.2

704. In *Egypt – Steel Rebar*, Turkey had made a number of claims of violation of both paragraph 6 of Annex II and Article 6.2. The Panel, who did not take a position on whether paragraph 6 of Annex II can be invoked separately from Article 6.8, considered as follows.

> "As for the claim of violation of the requirement in Annex II, paragraph 6 to provide a 'reasonable period', we recall that this provision forms part of the required procedural and substantive basis for a decision as to whether resort to facts available pursuant to Article 6.8. We further recall that we have found, *supra*[882], that the [investigating authority]'s decision to resort to facts available . . . did not violate Article 6.8, based on considerations under Annex II, paragraphs 3 and 5. Thus, we would not necessarily need to address this aspect of this claim for its own sake. Nonetheless, a full analysis of Annex II, paragraph 6 as it pertains to the factual basis of this claim, appears necessary to evaluate the merits of the claimed violation of Article 6.2 resulting from the deadline for responses to the 23 September requests. In performing this analysis, however, we note that we again do not here take a position on whether Annex II, paragraph 6 can be invoked separately from Article 6.8. We would need to do so only if we find that as a factual matter, the deadline in question was unreasonable."[883]

(c) Relationship with Article 6.8

705. As regards the relationship between Annex II and Article 6.8, see paragraphs 375–425 above.

XXI. RELATIONSHIP WITH OTHER WTO AGREEMENTS

A. ARTICLE VI OF THE GATT 1994

706. Regarding the relationship between Article VI of the GATT 1994 and the *Anti-Dumping Agreement*, the Panel on *US – 1916 Act (EC)*, referring to the Appellate Body Report on *Argentina – Footwear (EC)*, used the term an "inseparable package of rights and disciplines":

> "In our opinion, Article VI and the Anti-Dumping Agreement are part of the same treaty or, as the panel and the Appellate Body put it in *Argentina – Footwear (EC)* with respect to Article XIX and the Agreement on Safeguards, an 'inseparable package of rights and disciplines'. In application of the customary rules of interpretation of international law, we are bound to *interpret* Article VI of the GATT 1994 as part of the WTO Agreement and the Anti-Dumping Agreement is part of the context of Article VI. This implies that Article VI should not be interpreted in a way that would deprive it or the Anti-Dumping Agreement of meaning. Rather, we should give meaning and legal effect to all the relevant provisions. However, the requirement does not prevent us from making *findings* in relation to Article VI only, or in relation to specific provisions of the Anti-Dumping Agreement, as required by our terms of reference."[884]

---

[879] Panel Report on *Egypt – Steel Rebar*, para. 7.282.
[880] Panel Report on *Egypt – Steel Rebar*, paras. 7.289–7.295.
[881] Panel Report on *Egypt – Steel Rebar*, para. 7.321.
[882] (*footnote original*) Para.7.248.
[883] Panel Report on *Egypt – Steel Rebar*, para. 7.288.
[884] Panel Report on *US – 1916 Act (EC)*, para. 6.97. See also *US – 1916 Act (Japan)*, para. 6.93.

707. The Panel on *US – 1916 Act (EC)* considered the *Anti-Dumping Agreement* as context in interpreting Article VI of the *GATT 1994* and explained its reasoning as follows:

> "The official title of the Anti-Dumping Agreement is 'Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994'. This agreement is essential for the interpretation of Article VI. Articles 1 and 18.1 confirm the close link between Article VI and the Anti-Dumping Agreement. Moreover, as was recalled by the Appellate Body in the *Brazil – Coconuts* case, the WTO Agreement is a single treaty instrument which was accepted by the WTO Members as a single undertaking. As a result, Article 18.1 of the Anti-Dumping Agreement is part of the context of Article VI since Article 31.2 of the Vienna Convention provides that 'the context for the purpose of the interpretation of a treaty shall comprise, [. . .] the text [of the treaty], including its preamble and annexes. . .'. We are therefore not only entitled to consider Articles 1 and 18.1 of the Anti-Dumping Agreement even though the European Communities did not mention those provisions as part of its claims in its request for establishment of a panel, but we are also *required* to do so under the general principles of interpretation of public international law."[885]

708. In examining the scope of Article VI of the *GATT 1994*, the Panel on *US – 1916 Act (EC)* stated that Article 1 of the *Anti-Dumping Agreement* "supports the view that Article VI is about what Members are entitled to do when they counteract dumping within the meaning of Article VI . . . by referring to 'anti-dumping *measure[s]*' which may be applied by Members."[886] (emphasis in original) The Panel concluded that "a law that would counteract 'dumping' as defined in Article VI:1 would fall within the scope of Article VI."[887]

709. The Appellate Body in *US – 1916 Act* concluded that "[s]ince an 'Anti-dumping measure' must, according to Article 1 of the *Anti-Dumping Agreement*, be consistent with Article VI of the GATT 1994 and the provisions of the *Anti-Dumping Agreement*, it seems to follow that Article VI would apply to 'an anti-dumping measure', i.e., a measure against dumping."[888]

710. The Panel on *US – 1916 Act (EC)* considered that the first sentence of Article 1 of the *Anti-Dumping Agreement* confirms the purpose of Article VI as "to define the conditions under which counteracting dumping *as such* is allowed."[889]

711. Regarding the relationship between Article VI of the *GATT 1994* and the *Anti-Dumping Agreement*, the Panel on *US – 1916 Act (Japan)* noted that "Article 1.1 of the Anti-Dumping Agreement establishes a link between Article VI and the Anti-Dumping Agreement."[890]

712. The Appellate Body in *US – 1916 Act* agreed with the Panel's conclusion that "[g]iven the link between Article VI of the GATT 1994 and the *Anti-Dumping Agreement*, we find that the applicability of Article VI to the 1916 Act also implies the applicability of the *Anti-Dumping Agreement*."[891]

B. ARTICLE XI OF THE GATT 1994

713. The Panel on *US – 1916 Act (Japan)*, after finding that the measure at issue was inconsistent with provisions of the *Anti-Dumping Agreement* (and Article VI of GATT), exercised judicial economy with respect to a claim under Article XI of *GATT*.[892]

C. ARTICLE 3.2 OF THE DSU

714. The Panel on *US – DRAMS* discussed the interpretation of provisions of the *Anti-Dumping Agreement* in the light of the wording of Article 3.2 of the *DSU*.

D. ARTICLE 11 OF THE DSU

715. As regards the different standard of review under Article 17.6 of the *Anti-Dumping Agreement* and the general standard of review of Article 11 of the DSU, see paragraphs 626–627 above.

E. AGREEMENT ON SAFEGUARDS

716. The Appellate Body in *US – Hot-Rolled Steel* supported its interpretation of the non-attribution language of Article 3.5 by referring to its decisions in two safeguards Reports, *US – Wheat Gluten* and *US – Lamb* where it interpreted the non-attribution language in Article 4.2(b) of the Agreement on Safeguards in a similar manner. See paragraph 183 above. See also the Panel Report in *Guatemala – Cement II*, paragraph 152 above.

F. SCM AGREEMENT

717. The Panel on *US – DRAMS* referred to the applicability of the *SCM Agreement* to measures initiated before the entry into force of the *WTO Agreement*, in deciding on a similar issue under the *Anti-Dumping Agreement*. See paragraph 673 above.

XXII. DECLARATION ON DISPUTE SETTLEMENT PURSUANT TO THE AGREEMENT ON IMPLEMENTATION OF ARTICLE VI OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994 OR PART V OF THE AGREEMENT ON SUBSIDIES AND COUNTERVAILING MEASURES

A. TEXT

Ministers recognize, with respect to dispute settlement pursuant to the Agreement on Implementation of Article VI of GATT 1994 or Part V of the Agreement on Subsidies and Countervailing Measures, the need for the consistent resolution of disputes arising from anti-dumping and countervailing duty measures.

B. INTERPRETATION AND APPLICATION

No jurisprudence or decision of a competent WTO body.

XXIII. DECISION ON REVIEW OF ARTICLE 17.6 OF THE AGREEMENT ON IMPLEMENTATION OF ARTICLE VI OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE 1994

A. TEXT

Ministers decide as follows:

The standard of review in paragraph 6 of Article 17 of the Agreement on Implementation of Article VI of GATT 1994 shall be reviewed after a period of three years with a view to considering the question of whether it is capable of general application.

B. INTERPRETATION AND APPLICATION

No jurisprudence or decision of a competent WTO body.

XXIV. DECISION ON ANTI-CIRCUMVENTION

A. TEXT OF THE DECISION ON ANTI-CIRCUMVENTION

DECISION ON ANTI-CIRCUMVENTION

Ministers,

Noting that while the problem of circumvention of anti-dumping duty measures formed part of the negotiations which preceded the Agreement on Implementation of Article VI of GATT 1994, negotiators were unable to agree on specific text,

Mindful of the desirability of the applicability of uniform rules in this area as soon as possible,

Decide to refer this matter to the Committee on Anti-Dumping Practices established under that Agreement for resolution.

B. INTERPRETATION AND APPLICATION OF THE DECISION ON ANTI-CIRCUMVENTION

No jurisprudence or decision of a competent WTO body.

I. GENERAL INTRODUCTORY COMMENTARY

A. TEXT OF GENERAL INTRODUCTORY COMMENTARY

1. The primary basis for customs value under this Agreement is "transaction value" as defined in Article 1. Article 1 is to be read together with Article 8 which provides, *inter alia*, for adjustments to the price actually paid or payable in cases where certain specific elements which are considered to form a part of the value for customs purposes are incurred by the buyer but are not included in the price actually paid or payable for the imported goods. Article 8 also provides for the inclusion in the transaction value of certain considerations which may pass from the buyer to the seller in the form of specified goods or services rather than in the form of money. Articles 2 through 7 provide methods of determining the customs value whenever it cannot be determined under the provisions of Article 1.

2. Where the customs value cannot be determined under the provisions of Article 1 there should normally be a process of consultation between the customs administration and importer with a view to arriving at a basis of value under the provisions of Article 2 or 3. It may occur, for example, that the importer has information about the customs value of identical or similar imported goods which is not immediately available to the customs administration in the port of importation. On the other hand, the customs administration may have information about the customs value of identical or similar imported goods which is not readily available to the importer. A process of consultation between the two parties will enable information to be exchanged, subject to the requirements of commercial confidentiality, with a view to determining a proper basis of value for customs purposes.

3. Articles 5 and 6 provide two bases for determining the customs value where it cannot be determined on the basis of the transaction value of the imported goods or of identical or similar imported goods. Under paragraph 1 of Article 5 the customs value is determined on the basis of the price at which the goods are sold in the condition as imported to an unrelated buyer in the country of importation. The importer also has the right to have goods which are further processed after importation valued under the provisions of Article 5 if the importer so requests. Under Article 6 the customs value is determined on the basis of the computed value. Both these methods present certain difficulties and because of this the importer is given the right, under the provisions of Article 4, to choose the order of application of the two methods.

4. Article 7 sets out how to determine the customs value in cases where it cannot be determined under the provisions of any of the preceding Articles.

Members,

Having regard to the Multilateral Trade Negotiations;

Desiring to further the objectives of GATT 1994 and to secure additional benefits for the international trade of developing countries;

Recognizing the importance of the provisions of Article VII of GATT 1994 and desiring to elaborate rules for their application in order to provide greater uniformity and certainty in their implementation;

Recognizing the need for a fair, uniform and neutral system for the valuation of goods for customs purposes that precludes the use of arbitrary or fictitious customs values;

Recognizing that the basis for valuation of goods for customs purposes should, to the greatest extent possible, be the transaction value of the goods being valued;

Recognizing that customs value should be based on simple and equitable criteria consistent with commercial practices and that valuation procedures should be of general application without distinction between sources of supply;

Recognizing that valuation procedures should not be used to combat dumping;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE GENERAL INTRODUCTORY COMMENTARY

1. General

(a) Implementation of the Agreement

1. At its meeting of 18–19 October 2000, the General Council requested the Committee on Customs Valuation to consider three proposals relating to the implementation of the *Customs Valuation Agreement.*[1]

(b) Adoption of the decisions of the Tokyo Round Committee

2. At its meeting of 12 May 1995, the Committee on Customs Valuation also agreed, *inter alia*, to adopt the decisions adopted by the Tokyo Round Committee on Customs Valuation relating to the interpretation and administration of the of the *Customs Valuation Agreement.*[2]

PART I
RULES ON CUSTOMS VALUATION

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1

1. The customs value of imported goods shall be the transaction value, that is the price actually paid or payable for the goods when sold for export to the country of importation adjusted in accordance with the provisions of Article 8, provided:

(a) that there are no restrictions as to the disposition or use of the goods by the buyer other than restrictions which:

(i) are imposed or required by law or by the public authorities in the country of importation;

(ii) limit the geographical area in which the goods may be resold; or

(iii) do not substantially affect the value of the goods;

(b) that the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued;

(c) that no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of Article 8; and

(d) that the buyer and seller are not related, or where the buyer and seller are related, that the transaction value is acceptable for customs purposes under the provisions of paragraph 2.

2. (a) In determining whether the transaction value is acceptable for the purposes of paragraph 1, the fact that the buyer and the seller are related within the meaning of Article 15 shall not in itself be grounds for regarding the transaction value as unacceptable. In such case the circumstances surrounding the sale shall be examined and the transaction value shall be accepted provided that the relationship did not influence the price. If, in the light of information provided by the importer or otherwise, the customs administration has grounds for considering that the relationship influenced the price, it shall communicate its grounds to the importer and the importer shall be given a reasonable opportunity to respond.

[1] WT/GC/M/59, paras. 22–26.
[2] G/VAL/M/1, Section J. Those decisions are referred to in paragraphs 3, 4, 9, 10, 11, 20, 26, 33 and 34 of this Chapter.

If the importer so requests, the communication of the grounds shall be in writing.

(b) In a sale between related persons, the transaction value shall be accepted and the goods valued in accordance with the provisions of paragraph 1 whenever the importer demonstrates that such value closely approximates to one of the following occurring at or about the same time:

(i) the transaction value in sales to unrelated buyers of identical or similar goods for export to the same country of importation;

(ii) the customs value of identical or similar goods as determined under the provisions of Article 5;

(iii) the customs value of identical or similar goods as determined under the provisions of Article 6.

In applying the foregoing tests, due account shall be taken of demonstrated differences in commercial levels, quantity levels, the elements enumerated in Article 8 and costs incurred by the seller in sales in which the seller and the buyer are not related that are not incurred by the seller in sales in which the seller and the buyer are related.

(c) The tests set forth in paragraph 2(b) are to be used at the initiative of the importer and only for comparison purposes. Substitute values may not be established under the provisions of paragraph 2(b).

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 1

Note to Article 1
Price Actually Paid or Payable

1. The price actually paid or payable is the total payment made or to be made by the buyer to or for the benefit of the seller for the imported goods. The payment need not necessarily take the form of a transfer of money. Payment may be made by way of letters of credit or negotiable instruments. Payment may be made directly or indirectly. An example of an indirect payment would be the settlement by the buyer, whether in whole or in part, of a debt owed by the seller.

2. Activities undertaken by the buyer on the buyer's own account, other than those for which an adjustment is provided in Article 8, are not considered to be an indirect payment to the seller, even though they might be regarded as of benefit to the seller. The costs of such activities shall not, therefore, be added to the price actually paid or payable in determining the customs value.

3. The customs value shall not include the following charges or costs, provided that they are distinguished from the price actually paid or payable for the imported goods:

(a) charges for construction, erection, assembly, maintenance or technical assistance, undertaken after importation on imported goods such as industrial plant, machinery or equipment;

(b) the cost of transport after importation;

(c) duties and taxes of the country of importation.

4. The price actually paid or payable refers to the price for the imported goods. Thus the flow of dividends or other payments from the buyer to the seller that do not relate to the imported goods are not part of the customs value.

Paragraph 1(a)(iii)

Among restrictions which would not render a price actually paid or payable unacceptable are restrictions which do not substantially affect the value of the goods. An example of such restrictions would be the case where a seller requires a buyer of automobiles not to sell or exhibit them prior to a fixed date which represents the beginning of a model year.

Paragraph 1(b)

1. If the sale or price is subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued, the transaction value shall not be acceptable for customs purposes. Some examples of this include:

(a) the seller establishes the price of the imported goods on condition that the buyer will also buy other goods in specified quantities;

(b) the price of the imported goods is dependent upon the price or prices at which the buyer of the imported goods sells other goods to the seller of the imported goods;

(c) the price is established on the basis of a form of payment extraneous to the imported goods, such as where the imported goods are semi-finished goods which have been provided by the seller on condition that the seller will receive a specified quantity of the finished goods.

2. However, conditions or considerations relating to the production or marketing of the imported goods shall not result in rejection of the transaction value. For example, the fact that the buyer furnishes the seller with engineering and plans undertaken in the country of importation shall not result in rejection of the transaction value for the purposes of Article 1. Likewise, if the buyer undertakes on the buyer's own account, even though by agreement with the seller, activities relating to the marketing of the imported goods, the value of these activities is not part of the customs value nor shall such activities result in rejection of the transaction value.

Paragraph 2

1. Paragraphs 2(a) and 2(b) provide different means of establishing the acceptability of a transaction value.

2. Paragraph 2(a) provides that where the buyer and the seller are related, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted as the customs value provided that the relationship did not influence the price. It is not intended that there should be an examination of the circumstances in all cases where the buyer and the seller are related. Such examination will only be required where there are doubts about the acceptability of the price. Where the customs administration have no doubts about the acceptability of the price, it should be accepted without requesting further information from the importer. For example, the customs administration may have previously examined the relationship, or it may already have detailed information concerning the buyer and the seller, and may already be satisfied from such examination or information that the relationship did not influence the price.

3. Where the customs administration is unable to accept the transaction value without further inquiry, it should give the importer an opportunity to supply such further detailed information as may be necessary to enable it to examine the circumstances surrounding the sale. In this context, the customs administration should be prepared to examine relevant aspects of the transaction, including the way in which the buyer and seller organize their commercial relations and the way in which the price in question was arrived at, in order to determine whether the relationship influenced the price. Where it can be shown that the buyer and seller, although related under the provisions of Article 15, buy from and sell to each other as if they were not related, this would demonstrate that the price had not been influenced by the relationship. As an example of this, if the price had been settled in a manner consistent with the normal pricing practices of the industry in question or with the way the seller settles prices for sales to buyers who are not related to the seller, this would demonstrate that the price had not been influenced by the relationship. As a further example, where it is shown that the price is adequate to ensure recovery of all costs plus a profit which is representative of the firm's overall profit realized over a representative period of time (e.g. on an annual basis) in sales of goods of the same class or kind, this would demonstrate that the price had not been influenced.

4. Paragraph 2(b) provides an opportunity for the importer to demonstrate that the transaction value closely approximates to a "test" value previously accepted by the customs administration and is therefore acceptable under the provisions of Article 1. Where a test under paragraph 2(b) is met, it is not necessary to examine the question of influence under paragraph 2(a). If the customs administration has already sufficient information to be satisfied, without further detailed inquiries, that one of the tests provided in paragraph 2(b) has been met, there is no reason for it to require the importer to demonstrate that the test can be met. In paragraph 2(b) the term "unrelated buyers" means buyers who are not related to the seller in any particular case.

Paragraph 2(b)

A number of factors must be taken into consideration in determining whether one value "closely approximates" to another value. These factors include the nature of the imported goods, the nature of the industry itself, the season in which the goods are imported, and, whether the difference in values is commercially significant. Since these factors may vary from case to case, it would be impossible to apply a uniform standard such as a fixed percentage, in each case. For example, a small difference in value in a case involving one type of goods could be unacceptable while a large difference in a case involving another type of goods might be acceptable in determining whether the transaction value closely approximates to the "test" values set forth in paragraph 2(b) of Article 1.

C. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Valuation of carrier media bearing software for data-processing equipment

3. At its meeting of 12 May 1995, the Committee on Customs Valuation adopted the decision of the Tokyo Round Committee on the valuation of carrier media bearing software for data-processing equipment.[3]

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2

1. (a) If the customs value of the imported goods cannot be determined under the provisions of Article 1, the customs value shall be the transaction value of identical goods sold for export to the same country of importation and exported at or about the same time as the goods being valued.

(b) In applying this Article, the transaction value of identical goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the customs value. Where no such sale is found, the transaction value of identical goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable

[3] G/VAL/M/1, paras. 66–67; see also G/VAL/W/1, Section A.4. The text of the decision can be found in G/VAL/5, Section A.4.

to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in paragraph 2 of Article 8 are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of identical goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 2

Note to Article 2

1. In applying Article 2, the customs administration shall, wherever possible, use a sale of identical goods at the same commercial level and in substantially the same quantities as the goods being valued. Where no such sale is found, a sale of identical goods that takes place under any one of the following three conditions may be used:

(a) a sale at the same commercial level but in different quantities;

(b) a sale at a different commercial level but in substantially the same quantities; or

(c) a sale at a different commercial level and in different quantities.

2. Having found a sale under any one of these three conditions adjustments will then be made, as the case may be, for:

(a) quantity factors only;

(b) commercial level factors only; or

(c) both commercial level and quantity factors.

3. The expression "and/or" allows the flexibility to use the sales and make the necessary adjustments in any one of the three conditions described above.

4. For the purposes of Article 2, the transaction value of identical imported goods means a customs value, adjusted as provided for in paragraphs 1(b) and 2, which has already been accepted under Article 1.

5. A condition for adjustment because of different commercial levels or different quantities is that such adjustment, whether it leads to an increase or a decrease in the value, be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustments, e.g. valid price lists containing prices referring to different levels or different quantities. As an example of this, if the imported goods being valued consist of a shipment of 10 units and the only identical imported goods for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's price list and using that price applicable to a sale of 10 units. This does not require that a sale had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a customs value under the provisions of Article 2 is not appropriate.

C. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

(a) Rectification of the French text of paragraph 1 of the Note to Article 2

4. At its meeting of 12 May 1995, the Committee on Customs Valuation adopted the decision of the Tokyo Round Committee on Customs Valuation relating to the rectification of the French text of paragraph 1 of the Note to Articles 2 and 3.[4]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3

1. (a) If the customs value of the imported goods cannot be determined under the provisions of Articles 1 and 2, the customs value shall be the transaction value of similar goods sold for export to the same country of importation and exported at or about the same time as the goods being valued.

(b) In applying this Article, the transaction value of similar goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the customs value. Where no such sale is found, the transaction value of similar goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which

[4] G/VAL/M/1, paras. 66–67; see also G/VAL/W/1, Section A.5. The decision can be found in G/VAL/5, Section A.5.

clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in paragraph 2 of Article 8 are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the similar goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of similar goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 3

Note to Article 3

1. In applying Article 3, the customs administration shall, wherever possible, use a sale of similar goods at the same commercial level and in substantially the same quantities as the goods being valued. Where no such sale is found, a sale of similar goods that takes place under any one of the following three conditions may be used:

(a) a sale at the same commercial level but in different quantities;

(b) a sale at a different commercial level but in substantially the same quantities; or

(c) a sale at a different commercial level and in different quantities.

2. Having found a sale under any one of these three conditions adjustments will then be made, as the case may be, for:

(a) quantity factors only;

(b) commercial level factors only; or

(c) both commercial level and quantity factors.

3. The expression "and/or" allows the flexibility to use the sales and make the necessary adjustments in any one of the three conditions described above.

4. For the purpose of Article 3, the transaction value of similar imported goods means a customs value, adjusted as provided for in paragraphs 1(b) and 2, which has already been accepted under Article 1.

5. A condition for adjustment because of different commercial levels or different quantities is that such adjustment, whether it leads to an increase or a decrease in the value, be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustment, e.g. valid price lists containing prices referring to different levels or different quantities. As an example of this, if the imported goods being valued consist of a shipment of 10 units and the only similar imported goods for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's price list and using that price applicable to a sale of 10 units. This does not require that a sale had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a customs value under the provisions of Article 3 is not appropriate.

C. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. General

(a) Rectification of the French text of paragraph 1 of the Note to Article 3

5. With respect to the rectification of the French text of paragraph 1 of the Note to Article 3, see paragraph 4 above.

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4

If the customs value of the imported goods cannot be determined under the provisions of Articles 1, 2 and 3, the customs value shall be determined under the provisions of Article 5 or, when the customs value cannot be determined under that Article, under the provisions of Article 6 except that, at the request of the importer, the order of application of Articles 5 and 6 shall be reversed.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

6. Paragraph 3 of Annex III allows developing countries to make a reservation that would allow customs administrations the right to deny an importer's request to reverse the sequential order of the Articles 5 and 6. See interpretation and application of paragraph 3 of Annex III paragraph 40 below.

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5

1. (a) If the imported goods or identical or similar imported goods are sold in the country of importation in the condition as imported, the customs value of the imported goods under the provisions of this

Article shall be based on the unit price at which the imported goods or identical or similar imported goods are so sold in the greatest aggregate quantity, at or about the time of the importation of the goods being valued, to persons who are not related to the persons from whom they buy such goods, subject to deductions for the following:

(i) either the commissions usually paid or agreed to be paid or the additions usually made for profit and general expenses in connection with sales in such country of imported goods of the same class or kind;

(ii) the usual costs of transport and insurance and associated costs incurred within the country of importation;

(iii) where appropriate, the costs and charges referred to in paragraph 2 of Article 8; and

(iv) the customs duties and other national taxes payable in the country of importation by reason of the importation or sale of the goods.

(b) If neither the imported goods nor identical nor similar imported goods are sold at or about the time of importation of the goods being valued, the customs value shall, subject otherwise to the provisions of paragraph 1(a), be based on the unit price at which the imported goods or identical or similar imported goods are sold in the country of importation in the condition as imported at the earliest date after the importation of the goods being valued but before the expiration of 90 days after such importation.

2. If neither the imported goods nor identical nor similar imported goods are sold in the country of importation in the condition as imported, then, if the importer so requests, the customs value shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in the country of importation who are not related to the persons from whom they buy such goods, due allowance being made for the value added by such processing and the deductions provided for in paragraph 1(a).

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 5

Note to Article 5

1. The term "unit price at which . . . goods are sold in the greatest aggregate quantity" means the price at which the greatest number of units is sold in sales to persons who are not related to the persons from whom they buy such goods at the first commercial level after importation at which such sales take place.

2. As an example of this, goods are sold from a price list which grants favourable unit prices for purchases made in larger quantities.

Sale quantity	*Unit price*	*Number of sales*	*Total quantity sold at each price*
1–10 units	100	10 sales of 5 units 5 sales of 3 units	65
11–25 units	95	5 sales of 11 units	55
over 25 units	90	1 sale of 30 units	80
		1 sale of 50 units	

The greatest number of units sold at a price is 80; therefore, the unit price in the greatest aggregate quantity is 90.

3. As another example of this, two sales occur. In the first sale 500 units are sold at a price of 95 currency units each. In the second sale 400 units are sold at a price of 90 currency units each. In this example, the greatest number of units sold at a particular price is 500; therefore, the unit price in the greatest aggregate quantity is 95.

4. A third example would be the following situation where various quantities are sold at various prices.

(a) Sales

Sale quantity	*Unit price*
40 units	100
30 units	90
15 units	100
50 units	95
25 units	105
35 units	90
5 units	100

(b) Totals

Total quantity sold	*Unit price*
65	90
50	95
60	100
25	105

In this example, the greatest number of units sold at a particular price is 65; therefore, the unit price in the greatest aggregate quantity is 90.

5. Any sale in the importing country, as described in paragraph 1 above, to a person who supplies directly or indirectly free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods any of the elements specified in paragraph 1(b) of Article 8, should not be taken into account in establishing the unit price for the purposes of Article 5.

6. It should be noted that "profit and general expenses" referred to in paragraph 1 of Article 5 should be taken as a whole. The figure for the purposes of this deduction should be determined on the basis of information supplied by or on behalf of the importer unless the importer's figures are inconsistent with those

obtained in sales in the country of importation of imported goods of the same class or kind. Where the importer's figures are inconsistent with such figures, the amount for profit and general expenses may be based upon relevant information other than that supplied by or on behalf of the importer.

7. The "general expenses" include the direct and indirect costs of marketing the goods in question.

8. Local taxes payable by reason of the sale of the goods for which a deduction is not made under the provisions of paragraph 1(a)(iv) of Article 5 shall be deducted under the provisions of paragraph 1(a)(i) of Article 5.

9. In determining either the commissions or the usual profits and general expenses under the provisions of paragraph 1 of Article 5, the question whether certain goods are "of the same class or kind" as other goods must be determined on a case-by-case basis by reference to the circumstances involved. Sales in the country of importation of the narrowest group or range of imported goods of the same class or kind, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of Article 5, "goods of the same class or kind" includes goods imported from the same country as the goods being valued as well as goods imported from other countries.

10. For the purposes of paragraph 1(b) of Article 5, the "earliest date" shall be the date by which sales of the imported goods or of identical or similar imported goods are made in sufficient quantity to establish the unit price.

11. Where the method in paragraph 2 of Article 5 is used, deductions made for the value added by further processing shall be based on objective and quantifiable data relating to the cost of such work. Accepted industry formulas, recipes, methods of construction, and other industry practices would form the basis of the calculations.

12. It is recognized that the method of valuation provided for in paragraph 2 of Article 5 would normally not be applicable when, as a result of the further processing, the imported goods lose their identity. However, there can be instances where, although the identity of the imported goods is lost, the value added by the processing can be determined accurately without unreasonable difficulty. On the other hand, there can also be instances where the imported goods maintain their identity but form such a minor element in the goods sold in the country of importation that the use of this valuation method would be unjustified. In view of the above, each situation of this type must be considered on a case-by-case basis.

C. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Article 5.2

7. Paragraph 4 of Annex III allows developing countries to make a reservation with respect to the application of paragraph 2. See interpretation and application of paragraph 4 of Annex III, paragraph 41 below.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6

1. The customs value of imported goods under the provisions of this Article shall be based on a computed value. Computed value shall consist of the sum of:

(a) the cost or value of materials and fabrication or other processing employed in producing the imported goods;

(b) an amount for profit and general expenses equal to that usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation;

(c) the cost or value of all other expenses necessary to reflect the valuation option chosen by the Member under paragraph 2 of Article 8.

2. No Member may require or compel any person not resident in its own territory to produce for examination, or to allow access to, any account or other record for the purposes of determining a computed value. However, information supplied by the producer of the goods for the purposes of determining the customs value under the provisions of this Article may be verified in another country by the authorities of the country of importation with the agreement of the producer and provided they give sufficient advance notice to the government of the country in question and the latter does not object to the investigation.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 6

Note to Article 6

1. As a general rule, customs value is determined under this Agreement on the basis of information readily available in the country of importation. In order to determine a computed value, however, it may be necessary to examine the costs of producing the goods being valued and other information which has to be obtained from outside the country of importation. Furthermore, in most cases the producer of the goods will be outside the jurisdiction of the authorities of the country of importation. The use

of the computed value method will generally be limited to those cases where the buyer and seller are related, and the producer is prepared to supply to the authorities of the country of importation the necessary costings and to provide facilities for any subsequent verification which may be necessary.

2. The "cost or value" referred to in paragraph 1(a) of Article 6 is to be determined on the basis of information relating to the production of the goods being valued supplied by or on behalf of the producer. It is to be based upon the commercial accounts of the producer, provided that such accounts are consistent with the generally accepted accounting principles applied in the country where the goods are produced.

3. The "cost or value" shall include the cost of elements specified in paragraphs 1(a)(ii) and (iii) of Article 8. It shall also include the value, apportioned as appropriate under the provisions of the relevant note to Article 8, of any element specified in paragraph 1(b) of Article 8 which has been supplied directly or indirectly by the buyer for use in connection with the production of the imported goods. The value of the elements specified in paragraph 1(b)(iv) of Article 8 which are undertaken in the country of importation shall be included only to the extent that such elements are charged to the producer. It is to be understood that no cost or value of the elements referred to in this paragraph shall be counted twice in determining the computed value.

4. The "amount for profit and general expenses" referred to in paragraph 1(b) of Article 6 is to be determined on the basis of information supplied by or on behalf of the producer unless the producer's figures are inconsistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation.

5. It should be noted in this context that the "amount for profit and general expenses" has to be taken as a whole. It follows that if, in any particular case, the producer's profit figure is low and the producer's general expenses are high, the producer's profit and general expenses taken together may nevertheless be consistent with that usually reflected in sales of goods of the same class or kind. Such a situation might occur, for example, if a product were being launched in the country of importation and the producer accepted a nil or low profit to offset high general expenses associated with the launch. Where the producer can demonstrate a low profit on sales of the imported goods because of particular commercial circumstances, the producer's actual profit figures should be taken into account provided that the producer has valid commercial reasons to justify them and the producer's pricing policy reflects usual pricing policies in the branch of industry concerned. Such a situation might occur, for example, where producers have been forced to lower prices temporarily because of an unforeseeable drop in demand, or where they sell goods to complement a range of goods being produced in the country of importation and accept a low profit to maintain competitivity. Where the producer's own figures for profit and general expenses are not consistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation, the amount for profit and general expenses may be based upon relevant information other than that supplied by or on behalf of the producer of the goods.

6. Where information other than that supplied by or on behalf of the producer is used for the purposes of determining a computed value, the authorities of the importing country shall inform the importer, if the latter so requests, of the source of such information, the data used and the calculations based upon such data, subject to the provisions of Article 10.

7. The "general expenses" referred to in paragraph 1(b) of Article 6 covers the direct and indirect costs of producing and selling the goods for export which are not included under paragraph 1(a) of Article 6.

8. Whether certain goods are "of the same class or kind" as other goods must be determined on a case-by-case basis with reference to the circumstances involved. In determining the usual profits and general expenses under the provisions of Article 6, sales for export to the country of importation of the narrowest group or range of goods, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of Article 6, "goods of the same class or kind" must be from the same country as the goods being valued.

C. INTERPRETATION AND APPLICATION OF ARTICLE 6

No jurisprudence or decision of a competent WTO body.

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7

1. If the customs value of the imported goods cannot be determined under the provisions of Articles 1 through 6, inclusive, the customs value shall be determined using reasonable means consistent with the principles and general provisions of this Agreement and of Article VII of GATT 1994 and on the basis of data available in the country of importation.

2. No customs value shall be determined under the provisions of this Article on the basis of:

(a) the selling price in the country of importation of goods produced in such country;

(b) a system which provides for the acceptance for customs purposes of the higher of two alternative values;

(c) the price of goods on the domestic market of the country of exportation;

(d) the cost of production other than computed values which have been determined for identical or similar goods in accordance with the provisions of Article 6;

(e) the price of the goods for export to a country other than the country of importation;

(f) minimum customs values; or

(g) arbitrary or fictitious values.

3. If the importer so requests, the importer shall be informed in writing of the customs value determined under the provisions of this Article and the method used to determine such value.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 7

Note to Article 7

1. Customs values determined under the provisions of Article 7 should, to the greatest extent possible, be based on previously determined customs values.

2. The methods of valuation to be employed under Article 7 should be those laid down in Articles 1 through 6 but a reasonable flexibility in the application of such methods would be in conformity with the aims and provisions of Article 7.

3. Some examples of reasonable flexibility are as follows:

(a) *Identical goods* – the requirement that the identical goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; identical imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of identical imported goods already determined under the provisions of Articles 5 and 6 could be used.

(b) *Similar goods* – the requirement that the similar goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; similar imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of similar imported goods already determined under the provisions of Articles 5 and 6 could be used.

(c) *Deductive method* – the requirement that the goods shall have been sold in the "condition as imported" in paragraph 1(a) of Article 5 could be flexibly interpreted; the "90 days" requirement could be administered flexibly.

C. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. Article 7.2(f)

8. Developing countries can suspend the application of this paragraph making a reservation to established minimum values, in accordance with paragraph 2 of Annex III. See below interpretation and application of paragraph 2 of Annex III, paragraphs 38–39 below.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8

1. In determining the customs value under the provisions of Article 1, there shall be added to the price actually paid or payable for the imported goods:

(a) the following, to the extent that they are incurred by the buyer but are not included in the price actually paid or payable for the goods:

(i) commissions and brokerage, except buying commissions;

(ii) the cost of containers which are treated as being one for customs purposes with the goods in question;

(iii) the cost of packing whether for labour or materials;

(b) the value, apportioned as appropriate, of the following goods and services where supplied directly or indirectly by the buyer free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods, to the extent that such value has not been included in the price actually paid or payable:

(i) materials, components, parts and similar items incorporated in the imported goods;

(ii) tools, dies, moulds and similar items used in the production of the imported goods;

(iii) materials consumed in the production of the imported goods;

(iv) engineering, development, artwork, design work, and plans and sketches undertaken elsewhere than in the country of importation and necessary for the production of the imported goods;

(c) royalties and licence fees related to the goods being valued that the buyer must pay, either directly or indirectly, as a condition of sale of the goods being valued, to the extent that such royalties and fees are not included in the price actually paid or payable;

(d) the value of any part of the proceeds of any subsequent resale, disposal or use of the imported goods that accrues directly or indirectly to the seller.

2. In framing its legislation, each Member shall provide for the inclusion in or the exclusion from the customs value, in whole or in part, of the following:

(a) the cost of transport of the imported goods to the port or place of importation;

(b) loading, unloading and handling charges associated with the transport of the imported goods to the port or place of importation; and

(c) the cost of insurance.

3. Additions to the price actually paid or payable shall be made under this Article only on the basis of objective and quantifiable data.

4. No additions shall be made to the price actually paid or payable in determining the customs value except as provided in this Article.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 8

Note to Article 8

Paragraph 1(a)(i)

The term "buying commissions" means fees paid by an importer to the importer's agent for the service of representing the importer abroad in the purchase of the goods being valued.

Paragraph 1(b)(ii)

1. There are two factors involved in the apportionment of the elements specified in paragraph 1(b)(ii) of Article 8 to the imported goods – the value of the element itself and the way in which that value is to be apportioned to the imported goods. The apportionment of these elements should be made in a reasonable manner appropriate to the circumstances and in accordance with generally accepted accounting principles.

2. Concerning the value of the element, if the importer acquires the element from a seller not related to the importer at a given cost, the value of the element is that cost. If the element was produced by the importer or by a person related to the importer, its value would be the cost of producing it. If the element had been previously used by the importer, regardless of whether it had been acquired or produced by such importer, the original cost of acquisition or production would have to be adjusted downward to reflect its use in order to arrive at the value of the element.

3. Once a value has been determined for the element, it is necessary to apportion that value to the imported goods. Various possibilities exist. For example, the value might be apportioned to the first shipment if the importer wishes to pay duty on the entire value at one time. As another example, the importer may request that the value be apportioned over the number of units produced up to the time of the first shipment. As a further example, the importer may request that the value be apportioned over the entire anticipated production where contracts or firm commitments exist for that production. The method of apportionment used will depend upon the documentation provided by the importer.

4. As an illustration of the above, an importer provides the producer with a mould to be used in the production of the imported goods and contracts with the producer to buy 10,000 units. By the time of arrival of the first shipment of 1,000 units, the producer has already produced 4,000 units. The importer may request the customs administration to apportion the value of the mould over 1,000 units, 4,000 units or 10,000 units.

Paragraph 1(b)(iv)

1. Additions for the elements specified in paragraph 1(b)(iv) of Article 8 should be based on objective and quantifiable data. In order to minimize the burden for both the importer and customs administration in determining the values to be added, data readily available in the buyer's commercial record system should be used in so far as possible.

2. For those elements supplied by the buyer which were purchased or leased by the buyer, the addition would be the cost of the purchase or the lease. No addition shall be made for those elements available in the public domain, other than the cost of obtaining copies of them.

3. The ease with which it may be possible to calculate the values to be added will depend on a particular firm's structure and management practice, as well as its accounting methods.

4. For example, it is possible that a firm which imports a variety of products from several countries maintains the records of its design centre outside the country of importation in such a way as to show accurately the costs attributable to a given product. In such cases, a direct adjustment may appropriately be made under the provisions of Article 8.

5. In another case, a firm may carry the cost of the design centre outside the country of importation as a general overhead expense without allocation to specific products. In this instance, an appropriate adjustment could be made under the provisions of Article 8 with

respect to the imported goods by apportioning total design centre costs over total production benefiting from the design centre and adding such apportioned cost on a unit basis to imports.

6. Variations in the above circumstances will, of course, require different factors to be considered in determining the proper method of allocation.

7. In cases where the production of the element in question involves a number of countries and over a period of time, the adjustment should be limited to the value actually added to that element outside the country of importation.

Paragraph 1(c)

1. The royalties and licence fees referred to in paragraph 1(c) of Article 8 may include, among other things, payments in respect to patents, trade marks and copyrights. However, the charges for the right to reproduce the imported goods in the country of importation shall not be added to the price actually paid or payable for the imported goods in determining the customs value.

2. Payments made by the buyer for the right to distribute or resell the imported goods shall not be added to the price actually paid or payable for the imported goods if such payments are not a condition of the sale for export to the country of importation of the imported goods.

Paragraph 3

Where objective and quantifiable data do not exist with regard to the additions required to be made under the provisions of Article 8, the transaction value cannot be determined under the provisions of Article 1. As an illustration of this, a royalty is paid on the basis of the price in a sale in the importing country of a litre of a particular product that was imported by the kilogram and made up into a solution after importation. If the royalty is based partially on the imported goods and partially on other factors which have nothing to do with the imported goods (such as when the imported goods are mixed with domestic ingredients and are no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the buyer and the seller), it would be inappropriate to attempt to make an addition for the royalty. However, if the amount of this royalty is based only on the imported goods and can be readily quantified, an addition to the price actually paid or payable can be made.

C. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. Article 8.1

(a) Treatment of interest charges in the customs value of imported goods

9. At its meeting of 12 May 1995, the Committee on Customs Valuation adopted the decision of the Tokyo Round Committee on Customs Valuation relating to the treatment of interest charges in the customs value of imported goods.[5]

(b) Article 8.1(b)(iv)

10. At its meeting of 12 May 1995, the Committee on Customs Valuation adopted the decision of the Tokyo Round Committee on Customs Valuation relating to the interpretation of the term "undertaken" used in Article 8.1(b)(iv).[6]

11. At the same meeting, the Committee on Customs Valuation adopted the decision of the Tokyo Round Committee on Customs Valuation relating to the linguistic consistency of the item "development" in Article 8.1(b)(iv).[7]

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9

1. Where the conversion of currency is necessary for the determination of the customs value, the rate of exchange to be used shall be that duly published by the competent authorities of the country of importation concerned and shall reflect as effectively as possible, in respect of the period covered by each such document of publication, the current value of such currency in commercial transactions in terms of the currency of the country of importation.

2. The conversion rate to be used shall be that in effect at the time of exportation or the time of importation, as provided by each Member.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 9

Note to Article 9

For the purposes of Article 9, "time of importation" may include the time of entry for customs purposes.

C. INTERPRETATION AND APPLICATION OF ARTICLE 9

No jurisprudence or decision of a competent WTO body.

[5] G/VAL/M/1, paras. 66–67; see also G/VAL/W/1, Section A.3. The text of the decision can be found in G/VAL/5, Section A.3.
[6] G/VAL/M/1, paras. 66–67; see also G/VAL/W/1, Section A.1. The text of the decision can be found in G/VAL/5, Section A.1.
[7] G/VAL/M/1, paras. 66–67; see also G/VAL/W/1, Section A.2. The text of the decision can be found in G/VAL/5, Section A.2.

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10

All information which is by nature confidential or which is provided on a confidential basis for the purposes of customs valuation shall be treated as strictly confidential by the authorities concerned who shall not disclose it without the specific permission of the person or government providing such information, except to the extent that it may be required to be disclosed in the context of judicial proceedings.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

No jurisprudence or decision of a competent WTO body.

XII. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11

1. The legislation of each Member shall provide in regard to a determination of customs value for the right of appeal, without penalty, by the importer or any other person liable for the payment of the duty.

2. An initial right of appeal without penalty may be to an authority within the customs administration or to an independent body, but the legislation of each Member shall provide for the right of appeal without penalty to a judicial authority.

3. Notice of the decision on appeal shall be given to the appellant and the reasons for such decision shall be provided in writing. The appellant shall also be informed of any rights of further appeal.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 11

Note to Article 11

1. Article 11 provides the importer with the right to appeal against a valuation determination made by the customs administration for the goods being valued. Appeal may first be to a higher level in the customs administration, but the importer shall have the right in the final instance to appeal to the judiciary.

2. "Without penalty" means that the importer shall not be subject to a fine or threat of fine merely because the importer chose to exercise the right of appeal. Payment of normal court costs and lawyers' fees shall not be considered to be a fine.

3. However, nothing in Article 11 shall prevent a Member from requiring full payment of assessed customs duties prior to an appeal.

C. INTERPRETATION AND APPLICATION OF ARTICLE 11

No jurisprudence or decision of a competent WTO body.

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12

Laws, regulations, judicial decisions and administrative rulings of general application giving effect to this Agreement shall be published in conformity with Article X of GATT 1994 by the country of importation concerned.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

No jurisprudence or decision of a competent WTO body.

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13

If, in the course of determining the customs value of imported goods, it becomes necessary to delay the final determination of such customs value, the importer of the goods shall nevertheless be able to withdraw them from customs if, where so required, the importer provides sufficient guarantee in the form of a surety, a deposit or some other appropriate instrument, covering the ultimate payment of customs duties for which the goods may be liable. The legislation of each Member shall make provisions for such circumstances.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

12. In *US – Certain EC Products*, the Panel examined whether the increased bonding requirements imposed by the United States on certain products imported from the European Communities were consistent with, among others, Article II of *GATT 1994* and certain provisions in the *DSU*. The United States put forward Article 13 of the *Customs Valuation Agreement* as a defence, arguing "that the non-compliance of the European Communities [with a certain DSB recommendation] created a risk, which allowed the United States to have concerns over its ability to collect the full amount of duties which might be due"[8], and that the increased bonding requirements were consistent with that Article. The Panel stated as follows:

> "In the present dispute the United States is not claiming that, as of 3 March, it required additional guarantees

[8] Panel Report on *US – Certain EC Products*, para. 6.75.

because the customs value of the EC listed imports had increased or changed on 3 March 1999. In the present dispute, there is no disagreement between the parties on the customs value of the EC listed imports. Article 13 of the Customs Valuation Agreement allows for a guarantee system when there is uncertainty regarding the customs value of the imported products, but is not concerned with the level of tariff obligations as such. Article 13 of the Customs Valuation Agreement does not authorise changes in the applicable tariff levels between the moment imports arrive at a US port of entry and a later date once imports have entered the US market. As we discuss further below, the applicable tariff (the applicable WTO obligation, the applicable law for that purpose), must be the one in force on the day of importation, the day the tariff is applied. In other words, Article 13 of the Customs Valuation Agreement is of no relevance to the present dispute. We reject, therefore, this US defense."[9]

XV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14

The notes at Annex I to this Agreement form an integral part of this Agreement and the Articles of this Agreement are to be read and applied in conjunction with their respective notes. Annexes II and III also form an integral part of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

13. The text of Annex I is contained in Sections II.B, III.B, IV.B, VI.B, VII.B, VIII.B, IX.B, X.B, XII.B, and XXVI.A. With respect to the interpretation and application of Annex I, see the respective sections referring to paragraphs of Annex I.

14. With respect to Annex II, see Section XXVII.A below.

15. With respect to Annex III, Section XXVIII.A below.

XVI. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15

1. In this Agreement:

   (a) "customs value of imported goods" means the value of goods for the purposes of levying ad valorem duties of customs on imported goods;

   (b) "country of importation" means country or customs territory of importation; and

   (c) "produced" includes grown, manufactured and mined.

2. In this Agreement:

   (a) "identical goods" means goods which are the same in all respects, including physical characteristics, quality and reputation. Minor differences in appearance would not preclude goods otherwise conforming to the definition from being regarded as identical;

   (b) "similar goods" means goods which, although not alike in all respects, have like characteristics and like component materials which enable them to perform the same functions and to be commercially interchangeable. The quality of the goods, their reputation and the existence of a trademark are among the factors to be considered in determining whether goods are similar;

   (c) the terms "identical goods" and "similar goods" do not include, as the case may be, goods which incorporate or reflect engineering, development, artwork, design work, and plans and sketches for which no adjustment has been made under paragraph 1(b)(iv) of Article 8 because such elements were undertaken in the country of importation;

   (d) goods shall not be regarded as "identical goods" or "similar goods" unless they were produced in the same country as the goods being valued;

   (e) goods produced by a different person shall be taken into account only when there are no identical goods or similar goods, as the case may be, produced by the same person as the goods being valued.

3. In this Agreement "goods of the same class or kind" means goods which fall within a group or range of goods produced by a particular industry or industry sector, and includes identical or similar goods.

4. For the purposes of this Agreement, persons shall be deemed to be related only if:

   (a) they are officers or directors of one another's businesses;

   (b) they are legally recognized partners in business;

   (c) they are employer and employee;

   (d) any person directly or indirectly owns, controls or holds 5 per cent or more of the outstanding voting stock or shares of both of them;

   (e) one of them directly or indirectly controls the other;

[9] Panel Report on *US – Certain EC Products*, para. 6.77.

(f) both of them are directly or indirectly controlled by a third person;

(g) together they directly or indirectly control a third person; or

(h) they are members of the same family.

5. Persons who are associated in business with one another in that one is the sole agent, sole distributor or sole concessionaire, however described, of the other shall be deemed to be related for the purposes of this Agreement if they fall within the criteria of paragraph 4.

B. TEXT OF INTERPRETATIVE NOTE TO ARTICLE 15

Note to Article 15
Paragraph 4

For the purposes of Article 15, the term "persons" includes a legal person, where appropriate.

Paragraph 4(e)

For the purposes of this Agreement, one person shall be deemed to control another when the former is legally or operationally in a position to exercise restraint or direction over the latter.

C. INTERPRETATION AND APPLICATION OF ARTICLE 15

No jurisprudence or decision of a competent WTO body.

XVII. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16

Upon written request, the importer shall have the right to an explanation in writing from the customs administration of the country of importation as to how the customs value of the importer's goods was determined.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16

No jurisprudence or decision of a competent WTO body.

XVIII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17

Nothing in this Agreement shall be construed as restricting or calling into question the rights of customs administrations to satisfy themselves as to the truth or accuracy of any statement, document or declaration presented for customs valuation purposes.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

16. Pursuant to the Ministerial mandate at Marrakesh, at its meeting of 12 May 1995, the Committee on Customs Valuation adopted the following decision:[10]

"**Decision regarding cases where Customs Administrations have reasons to doubt the truth or accuracy of the declared value**

Ministers invite the Committee on Customs Valuation established under the Agreement on Implementation of Article VII of GATT 1994 to take the following decision:

The Committee on Customs Valuation,

Reaffirming that the transaction value is the primary basis of valuation under the Agreement on Implementation of Article VII of GATT 1994 (hereinafter referred to as the 'Agreement');

Recognizing that the customs administration may have to address cases where it has reason to doubt the truth or accuracy of the particulars or of documents produced by traders in support of a declared value;

Emphasizing that in so doing the customs administration should not prejudice the legitimate commercial interests of traders;

Taking into account Article 17 of the Agreement, paragraph 6 of Annex III to the Agreement, and the relevant decisions of the Technical Committee on Customs Valuation;

Decides as follows:

1. When a declaration has been presented and where the customs administration has reason to doubt the truth or accuracy of the particulars or of documents produced in support of this declaration, the customs administration may ask the importer to provide further explanation, including documents or other evidence, that the declared value represents the total amount actually paid or payable for the imported goods, adjusted in accordance with the provisions of Article 8. If, after receiving further information, or in the absence of a response, the customs administration still has reasonable doubts about the truth or accuracy of the declared value, it may, bearing in mind the provisions of Article 11, be deemed that the customs value of the imported goods cannot be determined under the provisions of Article 1. Before taking a final decision, the customs administration shall communicate to the importer, in writing if requested, its grounds for doubting the truth or accuracy of the particulars or documents produced and the importer shall be given a reasonable opportunity to respond. When a final decision is made, the customs

[10] G/VAL/M/1, Section F. The text of the decision can be found in G/VAL/1.

administration shall communicate to the importer in writing its decision and the grounds therefor.

2. It is entirely appropriate in applying the Agreement for one Member to assist another Member on mutually agreed terms."

17. Further to this Decision, at the Doha Ministerial Conference Members decided that the Agreement on the Implementation of Article VII of GATT 1994:

"[U]nderlines the importance of strengthening cooperation between the customs administrations of Members in the prevention of customs fraud. In this regard, it is agreed that, further to the 1994 Ministerial Decision Regarding Cases Where Customs Administrations Have Reasons to Doubt the Truth or Accuracy of the Declared Value, when the customs administration of an importing Member has reasonable grounds to doubt the truth of accuracy of the declared value, it may seek assistance from the customs administration of an exporting Member shall offer cooperation and assistance, consistent with its domestic laws and procedures, including furnishing information on the export value of the good concerned. Any information provided in this context shall be treated in accordance with Article 10 of the Customs Valuation Agreement. Furthermore, recognizing the legitimate concerns expressed by the customs administrations of several importing Members on the accuracy of the declared value, the Committee on customs Valuation is directed to identify and assess practical means to address such concerns, including the exchange of information on export values and to report to the General Council by the end of 2002 at the latest."[11]

18. At its meeting on 10–12 and 20 December 2002, the General Council took note of the report of the Customs Valuation Committee[12], and authorized the Committee to continue its work under the existing mandate[13] and to report to the General Council when it had completed this work.

PART II
ADMINISTRATION, CONSULTATIONS AND DISPUTE SETTLEMENT

XIX. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Institutions

1. There is hereby established a Committee on Customs Valuation (referred to in this Agreement as "the Committee") composed of representatives from each of the Members. The Committee shall elect its own Chairman and shall normally meet once a year, or as is otherwise envisaged by the relevant provisions of this Agreement, for the purpose of affording Members the opportunity to consult on matters relating to the administration of the customs valuation system by any Member as it might affect the operation of this Agreement or the furtherance of its objectives and carrying out such other responsibilities as may be assigned to it by the Members. The WTO Secretariat shall act as the secretariat to the Committee.

2. There shall be established a Technical Committee on Customs Valuation (referred to in this Agreement as "the Technical Committee") under the auspices of the Customs Co-operation Council (referred to in this Agreement as "the CCC"), which shall carry out the responsibilities described in Annex II to this Agreement and shall operate in accordance with the rules of procedure contained therein.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

1. Article 18.1

(a) Observer status

19. With respect to observer status in meetings of the Committee on Customs Valuation, see Chapter on the *WTO Agreement*, Section V.B.6.[14]

20. At its meeting of 12 May 1995, the Committee on Customs Valuation agreed on observership in its meetings.[15]

(b) Rules of procedure

21. On 1 December 1995, the Council for Trade in Goods approved the Rules of Procedure for meetings of the Committee on Customs Valuation adopted by the Committee on Customs Valuation.[16]

22. The Committee on Customs Valuation reports to the Council for Trade in Goods on an annual basis.[17]

(c) Monitoring of the Agreement on Preshipment Inspection

23. At its meeting of 15 June 1999, the General Council adopted the recommendation of the Working Party on Preshipment Inspection[18] that the future monitoring

[11] WT/MIN(01)/17, paragraph 8.3.
[12] G/VAL/50.
[13] WT/GC/70, paragraph 1.i).
[14] In April 1997, the Committee on Customs Valuation granted regular observer status to those organizations which had observer status on an ad hoc basis, see G/VAL/M/5.
[15] G/VAL/M/1, Sections D and E.
[16] G/C/M/7. The text of the adopted rules of procedure can be found in G/L/146.
[17] The reports are contained in documents G/L/55, 121, 205, 323, 414, 488, 590, 654 and 718.
[18] WT/GC/M/40/Add.3, section 5. The text of the recommendation can be found in G/L/300, para. 23.

of the *Agreement on Preshipment Inspection* should be undertaken initially by the Committee on Customs Valuation, and that Preshipment Inspection should be a standing item on its agenda.

XX. ARTICLE 19

A. TEXT OF ARTICLE 19

Article 19
Consultations and Dispute Settlement

1. Except as otherwise provided herein, the Dispute Settlement Understanding is applicable to consultations and the settlement of disputes under this Agreement.

2. If any Member considers that any benefit accruing to it, directly or indirectly, under this Agreement is being nullified or impaired, or that the achievement of any objective of this Agreement is being impeded, as a result of the actions of another Member or of other Members, it may, with a view to reaching a mutually satisfactory solution of this matter, request consultations with the Member or Members in question. Each Member shall afford sympathetic consideration to any request from another Member for consultations.

3. The Technical Committee shall provide, upon request, advice and assistance to Members engaged in consultations.

4. At the request of a party to the dispute, or on its own initiative, a panel established to examine a dispute relating to the provisions of this Agreement may request the Technical Committee to carry out an examination of any questions requiring technical consideration. The panel shall determine the terms of reference of the Technical Committee for the particular dispute and set a time period for receipt of the report of the Technical Committee. The panel shall take into consideration the report of the Technical Committee. In the event that the Technical Committee is unable to reach consensus on a matter referred to it pursuant to this paragraph, the panel should afford the parties to the dispute an opportunity to present their views on the matter to the panel.

5. Confidential information provided to the panel shall not be disclosed without formal authorization from the person, body or authority providing such information. Where such information is requested from the panel but release of such information by the panel is not authorized, a non-confidential summary of this information, authorized by the person, body or authority providing the information, shall be provided.

B. INTERPRETATION AND APPLICATION OF ARTICLE 19

24. The following table lists the dispute in which the panel and Appellate Body reports have been adopted where the provisions of the *Customs Valuation Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Certain EC Products*	WT/DS165	Article 13

PART III
SPECIAL AND DIFFERENTIAL TREATMENT

XXI. ARTICLE 20

A. TEXT OF ARTICLE 20

Article 20

1. Developing country Members not party to the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade done on 12 April 1979 may delay application of the provisions of this Agreement for a period not exceeding five years from the date of entry into force of the WTO Agreement for such Members. Developing country Members who choose to delay application of this Agreement shall notify the Director-General of the WTO accordingly.

2. In addition to paragraph 1, developing country Members not party to the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade done on 12 April 1979 may delay application of paragraph 2(b)(iii) of Article 1 and Article 6 for a period not exceeding three years following their application of all other provisions of this Agreement. Developing country Members that choose to delay application of the provisions specified in this paragraph shall notify the Director-General of the WTO accordingly.

3. Developed country Members shall furnish, on mutually agreed terms, technical assistance to developing country Members that so request. On this basis developed country Members shall draw up programmes of technical assistance which may include, *inter alia,* training of personnel, assistance in preparing implementation measures, access to sources of information regarding customs valuation methodology, and advice on the application of the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 20

1. General

25. At its meeting of 31 January 1995, the General Council took a decision on the Continued Application under the WTO Customs Valuation Agreement of Invocations of Provisions for Developing Countries for Delayed Application and Reservations under the Customs Valuation Agreement 1979.[19]

[19] WT/GC/M/1, section 11. The text of the adopted decision can be found in WT/L/38.

26. At its meeting of 12 May 1995, the Committee on Customs Valuation agreed to continue the practice established by the Tokyo Round Committee on Information on Technical Assistance, in order to ensure transparency on technical assistance activities.[20]

2. Article 20.1

27. Pursuant to paragraph 1 of Article 20, 58 developing country Members, which were not party to the 1979 Agreement on Implementation of Article VII of the GATT, requested a five-year delay of the application of the WTO Customs Valuation Agreement. This five-year delay was computed from the date of entry into force of the *WTO Agreement* for each of the Members concerned.[21] However, 22 Members requested a further extension of this five-year period pursuant to paragraph 1 of Annex III. The length of this additional extension varied by Member.[22]

28. At its meeting of 15 December 2000, the General Council adopted a decision concerning implementation-related issues and concerns in respect of several WTO Agreements.[23] With respect to the *Customs Valuation Agreement*, the General Council decided:

> "Noting that the process of examination and approval, in the Customs Valuation Committee, of individual requests from Members for extension of the five-year delay period in Article 20.1 is proceeding well, the General Council encourages the Committee to continue this work."[24]

3. Article 20.2

29. Pursuant to paragraph 2 of Article 20, 51 developing country Members delayed application of paragraph 2(b)(ii) of Article 1 and of Article 6 for three years from the date of entry into force of the WTO Agreement for each of them.[25]

4. Article 20.3

30. At its meeting on 24 July 2001 the Committee agreed on resuming its work on technical assistance in response to a proposal from the European Communities and adopted its work programme on technical assistance[26]. On 26 February 2002, the Committee decided

[20] G/VAL/M/1, para. 80–81; see also G/VAL/W/1, Section B.7. The text of the agreement can be found in G/VAL/5, Section B.4. Its revisions can be found in G/VAL/8.

[21] These 58 developing Members which requested a five-year extension were: Bahrain, Bangladesh, Benin, Bolivia, Brunei Darussalam, Burkina Faso, Burundi, Cameroon, Central Africa Republic, Chad, Chile, Colombia, Costa Rica, Côte d'Ivoire, Cuba, Djibouti, Dominican Republic, Ecuador, Egypt, El Salvador, Gabon, Ghana, Guatemala, Guyana, Haiti, Honduras, Indonesia, Israel, Jamaica, Kenya, Kuwait, Madagascar, Malaysia, Mali, Maldives, Malta, Mauritania, Mauritius, Morocco, Myanmar, Nicaragua, Nigeria, Pakistan, Paraguay, Peru, Philippines, Senegal, Singapore, Sri Lanka, Thailand, Togo, Tunisia, Uganda, United Arab Emirates, Uruguay, Venezuela, Zambia. On 25 April 2002 none of them maintained this special and differential treatment provision, G/L/590 pf 5. See G/VAL/W/3, 13, 22, 29, 43, 77, 89, 108, 124, 136 and G/VAL/2/Rev.19.

[22] The following eight Members, for which the five-year delay period expired before or on 1 January 2000, requested an additional extension pursuant to paragraph 1 of Annex III: (i) Bahrain (requested three years (consultation pending) – G/VAL/W/57 and Adds.1–4); (ii) Côte d'Ivoire (requested five years, extension granted for 18 months (expired 01.07.01) – G/VAL/32); (iii) Kuwait (requested two years, extension granted for one year (expired 01.01.01) – G/VAL/18); (iv) Myanmar (requested five years, extension granted for two years (expired on 01.01.02) – G/VAL/28); (v) Paraguay (requested two years, extension granted for one year (expired 01.01.01) – G/VAL/17/Rev.1); (vi) Senegal (requested five years, extension granted for six months (expired 30.06.01) – G/VAL/39); (vii) Sri Lanka (requested one year, extension granted for one year – G/VAL/23, requested second year extension, granted for 10 months – G/VAL/41, requested third extension, granted for 6 months to 30.04.02 – G/VAL/42, requested fourth extension, granted for six months to 31.10.02 – G/L/46, requested fifth extension, four months expired 28.02.03); and (viii) Tanzania (extension granted for one year (expired 01.01.01) – G/VAL/19). Also, the following 14 Members, for which this delay period expired during 2000 and 2001, requested extension: (i) Bolivia (requested two years, extension granted for 15 months (expired 31.12.01) – G/VAL/37); (ii) Burundi (requested two years, extension granted for two years to 01.08.02 – G/VAL/38); (iii) Cameroon (requested six months – G/VAL/W/80, G/C/W/245 and Add.1 – granted for six months (expired 01.07.01) – WT/L/396); (iv) Dominican Republic (requested two years, extension granted for 16 months (expired 01.07.01) – G/VAL/22); (v) El Salvador (requested two years, extension granted for 16 months (expired 07.09.01) – G/VAL/30); (vi) Egypt (requested three years, extension granted for one year (expired 30.06.01) – G/VAL/31); (vii) Guatemala (requested two years, extension granted for 16 months (expired 21.11.01) – G/VAL/33); (viii) Haiti (requested three years, extension granted for two years to 30.01.03 – G/C/W/256 and Rev.1, was granted by the General Council as Article IX waiver – WT/L/439); (ix) Jamaica (requested one year extension, extension granted for one year (expired 09.03.01) – G/VAL/24); (x) Mauritania (requested three years, extension granted for two years to 31.05.02– G/VAL/29); (xi) Maldives (requested two years, extension granted for two years to 31.05.02– G/VAL/35); (xii) Rwanda (requested three years – G/VAL/W/84); (xiii) Tunisia (requested three years, extension granted for 18 months (expired 28.09.01) – G/VAL/27); and (xiv) United Arab Emirates (expired 01.01.04,, G/VAL/55). On 21 October 2004, no Member had either requested an extension or maintained an extension under Annex III, paragraph 1.

[23] WT/GC/M/62, para. 17. The text of the decision can be found in WT/L/384. *See also* Chapter on *WTO Agreement*, refer to the text on Articles IV:1, IV:2 and IX:1 of the *WTO* on the powers of the General Council more generally.

[24] WT/L/384, para. 4.

[25] Members requesting an extension were: Bahrain, Bangladesh, Bolivia, Brunei Darussalam, Burkina Faso, Burundi, Cameroon, Chile, Colombia, Costa Rica, Côte d'Ivoire, Djibouti, Dominican Republic, Egypt, Ecuador, El Salvador, Gabon, Guatemala, Guyana, Haiti, Honduras, Indonesia, Israel, Jamaica, Kenya, Kuwait, Madagascar, Malaysia, Mali, Malta, Mauritania, Mexico, Morocco, Myanmar, Nicaragua, Nigeria, Pakistan, Peru, Philippines, Senegal, Singapore, Sri Lanka, Tanzania, Thailand, Togo, Tunisia, Turkey, United Arab Emirates, Uruguay, Venezuela, Zambia. See G/VAL/W/3, 13, 22, 29, 43, 77, 89, 108, 124, and 136.

[26] G/VAL/M/21. The technical assistance programme, which started in May 1997, was created with a view to enhancing the capacity of developing countries to implement and to administer the Agreement on Customs Valuation. It was a demand-driven programme. The activities in the early years "focused on improving awareness and understanding of the activities already carried out or being carried out by international organizations and Members either bilaterally or regionally"; G/VAL/W/70. The new phase of the programme is oriented on promoting the coordination and cooperation between providers and donors; G/VAL/W/82/Rev.1.

to start its work programme with a seminar on technical assistance[27].

5. Annex III

31. The special and differential treatment for developing countries in respect of the application of Customs Valuation Agreement is also developed in Annex III. See Section XXVII below.

PART IV
FINAL PROVISIONS

XXII. ARTICLE 21

A. TEXT OF ARTICLE 21

Article 21
Reservations

Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE 21

32. At its meeting on 12 May 1995, the Committee on Customs Valuation adopted the decisions of the Tokyo Round Committee on Customs Valuation on reservations.[28]

XXIII. ARTICLE 22

A. TEXT OF ARTICLE 22

Article 22
National Legislation

1. Each Member shall ensure, not later than the date of application of the provisions of this Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement.

2. Each Member shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 22

1. General

(a) Notification

33. At its meeting on 12 May 1995, the Committee on Customs Valuation agreed to adopt for all WTO Members the procedures regarding notification and circulation of national legislation that had been in use by the Tokyo Round Committee on Customs Valuation.[29]

(b) Checklist of Issues

34. As the basis of an initial examination of national legislation, the Committee on Customs Valuation agreed to adopt the checklist of issues elaborated by the Tokyo Round Committee on Customs Valuation.[30] It also decided that in the cases of Members who were Tokyo Round signatories and whose legislation had already been examined, a communication from those Members could be sent to the Secretariat indicating that their responses to the Checklist of Issues remained valid under the WTO Customs Valuation Agreement.[31]

XXIV. ARTICLE 23

A. TEXT OF ARTICLE 23

Article 23
Review

The Committee shall review annually the implementation and operation of this Agreement taking into account the objectives thereof. The Committee shall annually inform the Council for Trade in Goods of developments during the period covered by such reviews[32].

B. INTERPRETATION AND APPLICATION OF ARTICLE 23

No jurisprudence or decision of a competent WTO body.

XXV. ARTICLE 24

A. TEXT OF ARTICLE 24

Article 24
Secretariat

This Agreement shall be serviced by the WTO Secretariat except in regard to those responsibilities specifically assigned to the Technical Committee, which will be serviced by the CCC Secretariat.

B. INTERPRETATION AND APPLICATION OF ARTICLE 24

No jurisprudence or decision of a competent WTO body.

[32] See above footnote 17.

XXVI. ANNEX I

A. TEXT OF ANNEX I

ANNEX I
INTERPRETATIVE NOTES

General Note

Sequential Application of Valuation Methods

1. Articles 1 through 7 define how the customs value of imported goods is to be determined under the provisions of this Agreement. The methods of valuation are set out in a sequential order of application. The primary method for customs valuation is defined in Article 1 and imported goods are to be valued in accordance with the provisions of this Article whenever the conditions prescribed therein are fulfilled.

2. Where the customs value cannot be determined under the provisions of Article 1, it is to be determined by proceeding sequentially through the succeeding Articles to the first such Article under which the customs value can be determined. Except as provided in Article 4, it is only when the customs value cannot be determined under the provisions of a particular Article that the provisions of the next Article in the sequence can be used.

3. If the importer does not request that the order of Articles 5 and 6 be reversed, the normal order of the sequence is to be followed. If the importer does so request but it then proves impossible to determine the customs value under the provisions of Article 6, the customs value is to be determined under the provisions of Article 5, if it can be so determined.

4. Where the customs value cannot be determined under the provisions of Articles 1 through 6 it is to be determined under the provisions of Article 7.

Use of Generally Accepted Accounting Principles

1. "Generally accepted accounting principles" refers to the recognized consensus or substantial authoritative support within a country at a particular time as to which economic resources and obligations should be recorded as assets and liabilities, which changes in assets and liabilities should be recorded, how the assets and liabilities and changes in them should be measured, what information should be disclosed and how it should be disclosed, and which financial statements should be prepared. These standards may be broad guidelines of general application as well as detailed practices and procedures.

2. For the purposes of this Agreement, the customs administration of each Member shall utilize information prepared in a manner consistent with generally accepted accounting principles in the country which is appropriate for the Article in question. For example, the determination of usual profit and general expenses under the provisions of Article 5 would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of importation. On the other hand, the determination of usual profit and general expenses under the provisions of Article 6 would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of production. As a further example, the determination of an element provided for in paragraph 1(b)(ii) of Article 8 undertaken in the country of importation would be carried out utilizing information in a manner consistent with the generally accepted accounting principles of that country.

. . .

B. INTERPRETATION AND APPLICATION OF ANNEX I

35. See Sections II.B, III.B, IV.B, VI.B, VII.B, VIII.B, IX.B, X.B, XII.B, and XVI.B which contain the respective parts of Annex I.

XXVII. ANNEX II

A. TEXT OF ANNEX II

ANNEX II
TECHNICAL COMMITTEE ON CUSTOMS VALUATION

1. In accordance with Article 18 of this Agreement, the Technical Committee shall be established under the auspices of the CCC with a view to ensuring, at the technical level, uniformity in interpretation and application of this Agreement.

2. The responsibilities of the Technical Committee shall include the following:

(a) to examine specific technical problems arising in the day-to-day administration of the customs valuation system of Members and to give advisory opinions on appropriate solutions based upon the facts presented;

(b) to study, as requested, valuation laws, procedures and practices as they relate to this Agreement and to prepare reports on the results of such studies;

(c) to prepare and circulate annual reports on the technical aspects of the operation and status of this Agreement;

(d) to furnish such information and advice on any matters concerning the valuation of imported goods for customs purposes as may be requested by any Member or the Committee. Such information and advice may take the form of advisory opinions, commentaries or explanatory notes;

(e) to facilitate, as requested, technical assistance to Members with a view to furthering the international acceptance of this Agreement;

(f) to carry out an examination of a matter referred to it by a panel under Article 19 of this Agreement; and

(g) to exercise such other responsibilities as the Committee may assign to it.

General

3. The Technical Committee shall attempt to conclude its work on specific matters, especially those referred to it by Members, the Committee or a panel, in a reasonably short period of time. As provided in paragraph 4 of Article 19, a panel shall set a specific time period for receipt of a report of the Technical Committee and the Technical Committee shall provide its report within that period.

4. The Technical Committee shall be assisted as appropriate in its activities by the CCC Secretariat.

Representation

5. Each Member shall have the right to be represented on the Technical Committee. Each Member may nominate one delegate and one or more alternates to be its representatives on the Technical Committee. Such a Member so represented on the Technical Committee is referred to in this Annex as a "member of the Technical Committee". Representatives of members of the Technical Committee may be assisted by advisers. The WTO Secretariat may also attend such meetings with observer status.

6. Members of the CCC which are not Members of the WTO may be represented at meetings of the Technical Committee by one delegate and one or more alternates. Such representatives shall attend meetings of the Technical Committee as observers.

7. Subject to the approval of the Chairman of the Technical Committee, the Secretary-General of the CCC (referred to in this Annex as "the Secretary-General") may invite representatives of governments which are neither Members of the WTO nor members of the CCC and representatives of international governmental and trade organizations to attend meetings of the Technical Committee as observers.

8. Nominations of delegates, alternates and advisers to meetings of the Technical Committee shall be made to the Secretary-General.

Technical Committee Meetings

9. The Technical Committee shall meet as necessary but at least two times a year. The date of each meeting shall be fixed by the Technical Committee at its preceding session. The date of the meeting may be varied either at the request of any member of the Technical Committee concurred in by a simple majority of the members of the Technical Committee or, in cases requiring urgent attention, at the request of the Chairman. Notwithstanding the provisions in sentence 1 of this paragraph, the Technical Committee shall meet as necessary to consider matters referred to it by a panel under the provisions of Article 19 of this Agreement.

10. The meetings of the Technical Committee shall be held at the headquarters of the CCC unless otherwise decided.

11. The Secretary-General shall inform all members of the Technical Committee and those included under paragraphs 6 and 7 at least 30 days in advance, except in urgent cases, of the opening date of each session of the Technical Committee.

Agenda

12. A provisional agenda for each session shall be drawn up by the Secretary-General and circulated to the members of the Technical Committee and to those included under paragraphs 6 and 7 at least 30 days in advance of the session, except in urgent cases. This agenda shall comprise all items whose inclusion has been approved by the Technical Committee during its preceding session, all items included by the Chairman on the Chairman's own initiative, and all items whose inclusion has been requested by the Secretary-General, by the Committee or by any member of the Technical Committee.

13. The Technical Committee shall determine its agenda at the opening of each session. During the session the agenda may be altered at any time by the Technical Committee.

Officers and Conduct of Business

14. The Technical Committee shall elect from among the delegates of its members a Chairman and one or more Vice-Chairmen. The Chairman and Vice-Chairmen shall each hold office for a period of one year. The retiring Chairman and Vice-Chairmen are eligible for re-election. The mandate of a Chairman or Vice-Chairman who no longer represents a member of the Technical Committee shall terminate automatically.

15. If the Chairman is absent from any meeting or part thereof, a Vice-Chairman shall preside. In that event, the latter shall have the same powers and duties as the Chairman.

16. The Chairman of the meeting shall participate in the proceedings of the Technical Committee as such and not as the representative of a member of the Technical Committee.

17. In addition to exercising the other powers conferred upon the Chairman by these rules, the Chairman shall declare the opening and closing of each meeting, direct the discussion, accord the right to speak, and, pursuant to these rules, have control of the proceedings. The Chairman may also call a speaker to order if the speaker's remarks are not relevant.

18. During discussion of any matter a delegation may raise a point of order. In this event, the Chairman shall immediately state a ruling. If this ruling is challenged, the Chairman shall submit it to the meeting for decision and it shall stand unless overruled.

19. The Secretary-General, or officers of the CCC Secretariat designated by the Secretary-General, shall perform the secretarial work of meetings of the Technical Committee.

Quorum and Voting

20. Representatives of a simple majority of the members of the Technical Committee shall constitute a quorum.

21. Each member of the Technical Committee shall have one vote. A decision of the Technical Committee shall be taken by a majority comprising at least two thirds of the members present. Regardless of the outcome of the vote on a particular matter, the Technical Committee shall be free to make a full report to the Committee and to the CCC on that matter indicating the different views expressed in the relevant discussions. Notwithstanding the above provisions of this paragraph, on matters referred to it by a panel, the Technical Committee shall take decisions by consensus. Where no agreement is reached in the Technical Committee on the question referred to it by a panel, the Technical Committee shall provide a report detailing the facts of the matter and indicating the views of the members.

Languages and Records

22. The official languages of the Technical Committee shall be English, French and Spanish. Speeches or statements made in any of these three languages shall be immediately translated into the other official languages unless all delegations agree to dispense with translation. Speeches or statements made in any other language shall be translated into English, French and Spanish, subject to the same conditions, but in that event the delegation concerned shall provide the translation into English, French or Spanish. Only English, French and Spanish shall be used for the official documents of the Technical Committee. Memoranda and correspondence for the consideration of the Technical Committee must be presented in one of the official languages.

23. The Technical Committee shall draw up a report of all its sessions and, if the Chairman considers it necessary, minutes or summary records of its meetings. The Chairman or a designee of the Chairman shall report on the work of the Technical Committee at each meeting of the Committee and at each meeting of the CCC.

B. INTERPRETATION AND APPLICATION OF ANNEX II

No jurisprudence or decision of a competent WTO body.

1. Reference to GATT practice

36. With respect to the practice developed under the *GATT 1947*, see GATT Analytical Index, page 265.

XXVIII. ANNEX III

A. TEXT OF ANNEX III

ANNEX III

1. The five-year delay in the application of the provisions of the Agreement by developing country Members provided for in paragraph 1 of Article 20 may, in practice, be insufficient for certain developing country Members. In such cases a developing country Member may request before the end of the period referred to in paragraph 1 of Article 20 an extension of such period, it being understood that the Members will give sympathetic consideration to such a request in cases where the developing country Member in question can show good cause.

2. Developing countries which currently value goods on the basis of officially established minimum values may wish to make a reservation to enable them to retain such values on a limited and transitional basis under such terms and conditions as may be agreed to by the Members.

3. Developing countries which consider that the reversal of the sequential order at the request of the importer provided for in Article 4 of the Agreement may give rise to real difficulties for them may wish to make a reservation to Article 4 in the following terms:

> "The Government of …… reserves the right to provide that the relevant provision of Article 4 of the Agreement shall apply only when the customs authorities agree to the request to reverse the order of Articles 5 and 6."

If developing countries make such a reservation, the Members shall consent to it under Article 21 of the Agreement.

4. Developing countries may wish to make a reservation with respect to paragraph 2 of Article 5 of the Agreement in the following terms:

> "The Government of …… reserves the right to provide that paragraph 2 of Article 5 of the Agreement shall be applied in accordance with the provisions of the relevant note thereto whether or not the importer so requests."

If developing countries make such a reservation, the Members shall consent to it under Article 21 of the Agreement.

5. Certain developing countries may have problems in the implementation of Article 1 of the Agreement insofar as it relates to importations into their countries by

sole agents, sole distributors and sole concessionaires. If such problems arise in practice in developing country Members applying the Agreement, a study of this question shall be made, at the request of such Members, with a view to finding appropriate solutions.

6. Article 17 recognizes that in applying the Agreement, customs administrations may need to make enquiries concerning the truth or accuracy of any statement, document or declaration presented to them for customs valuation purposes. The Article thus acknowledges that enquiries may be made which are, for example, aimed at verifying that the elements of value declared or presented to customs in connection with a determination of customs value are complete and correct. Members, subject to their national laws and procedures, have the right to expect the full cooperation of importers in these enquiries.

7. The price actually paid or payable includes all payments actually made or to be made as a condition of sale of the imported goods, by the buyer to the seller, or by the buyer to a third party to satisfy an obligation of the seller.

B. INTERPRETATION AND APPLICATION OF ANNEX III

1. Paragraph 1

37. With respect to the extension of the five-year delay in the application of the Customs Valuation Agreement under paragraph 1 of Annex III, see paragraph 27 above.

2. Paragraph 2

38. Pursuant to the Ministerial Decision at Marrakesh, at its meeting of 12 May 1995, the Committee on Customs Valuation adopted the following decision:[33]

> "Decision on Texts relating to Minimum Values and Imports by Sole Agents, Sole Distributors and Solve Concessionaires
>
> *Ministers decide* to refer the following texts to the Committee on Customs Valuation established under the Agreement on Implementation of Article VII of GATT 1994, for adoption.
>
> I
>
> Where a developing country makes a reservation to retain officially established minimum values within the terms of paragraph 2 of Annex III and shows good cause, the Committee shall give the request for the reservation sympathetic consideration.
>
> Where a reservation is consented to, the terms and conditions referred to in paragraph 2 of Annex III shall take full account of the development, financial and trade needs of the developing country concerned.
>
> II
>
> 1. A number of developing countries have a concern that problems may exist in the valuation of imports by sole agents, sole distributors and sole concessionaires. Under paragraph 1 of Article 20, developing country Members have a period of delay of up to five years prior to the application of the Agreement. In this context, developing country Members availing themselves of this provision could use the period to conduct appropriate studies and to take such other actions as are necessary to facilitate application.
>
> 2. In consideration of this, the Committee recommends that the Customs Co-operation Council assist developing country Members, in accordance with the provisions of Annex II, to formulate and conduct studies in areas identified as being of potential concern, including those relating to importations by sole agents, sole distributors and sole concessionaires."

39. Pursuant to paragraph 2 of Annex III, 38 Members made reservations regarding officially established minimum values.[34] The establishment of minimum values allows developing countries to apply the same minimum values to all identical products, without the need to look for the value that the products would have in the event of the application of the mandates contained in the present Agreement. On 21 October 2004, only five Members maintained exceptions in accordance with the terms of this paragraph.[35]

3. Paragraph 3

40. Pursuant to paragraph 3 of Annex III, at the time of the 2004 annual review meeting of the implementation and operation of the Agreement on Customs Valuation, 53 Members maintained reservations concerning reversal of sequential order of Articles 5 and 6.[36]

---

[33] G/VAL/M/1, Section F. The text of the decision can be found also in G/VAL/1.

[34] Members requesting a reservation were: Bahrain, Bangladesh, Burkina Faso, Chile, Colombia, Côte d'Ivoire, Djibouti, Dominican Republic, Gabon, Guatemala, Guyana, Haiti, Indonesia, Jamaica, Kenya, Madagascar, Maldives, Mali, Malaysia, Malta, Mauritania, Morocco, Myanmar, Niger, Pakistan, Paraguay, Peru, Philippines, Senegal, Singapore, Sri Lanka, Thailand, Togo, Tunisia, Uganda, Uruguay, Venezuela, Zambia. See G/VAL/W/3, 13, 22, 29, 43, 77, 89 and 108.

[35] The five Members at issue were: El Salvador (reservation granted as Article IX waiver in WT/L/476), Guatemala (reservation granted in G/VAL/43), Pakistan (reservation requested under Article IX waiver in G/C/W/246), Senegal (reservation granted under Article IX waiver in WT/L/571), and Sri Lanka (reservation granted in G/VAL/53). See also G/VAL/2/Rev.19.

[36] These Members were: Argentina, Bahrain, Bangladesh, Benin Brazil, Brunei Darussalam, Burkina Faso, Cameroon, Chile, Colombia, Costa Rica, Côte d'Ivoire, Djibouti, Dominican Republic, Ecuador, Egypt, El Salvador, Gabon, Guatemala, Guyana, Haiti, Honduras, India, Indonesia, Israel, Jamaica, Kenya, Madagascar, Maldives, Malawi, Malaysia, Mali, Mexico, Morocco, Myanmar, Nicaragua, Niger, Pakistan, Panama, Peru, Philippines, Senegal, Sri Lanka, Thailand, Togo, Tunisia, Turkey, Uganda, United Arab Emirates, Uruguay, Venezuela, Zambia, Zimbabwe. See G/VAL/W/136; and for previous years see G/VAL/W/3, 13, 22, 29, 43, 77, 89, 108, and 124.

4. Paragraph 4

41. Pursuant to paragraph 4 of Annex III, at the time of the 2004 annual review meeting of the implementation and operation of the Agreement on Customs Valuation, 50 Members maintained reservations concerning application of Article 5.2 whether or not the importer so requests.[37]

5. Paragraph 6

42. See Interpretation and Application of Article 17, paragraphs 16–17 above.

[37] These Members were: Argentina, Bahrain, Bangladesh, Benin, Brazil, Brunei Darussalam, Burkina Faso, Cameroon, Chile, Colombia, Costa Rica, Côte d'Ivoire, Djibouti, Dominican Republic, Ecuador, Egypt, El Salvador, Gabon, Guatemala, Guyana, Haiti, Honduras, India, Indonesia, Israel, Jamaica, Kenya, Madagascar, Maldives, Malaysia, Mali, Mexico, Morocco, Myanmar, Nicaragua, Niger, Nigeria, Pakistan, Peru, Philippines, Senegal, Sri Lanka, Thailand, Togo, Tunisia, Turkey, Uruguay, Venezuela, Zambia, Zimbabwe. See G/VAL/W/136; and for previous years see G/VAL/W/3, 13, 22, 29, 43, 77, 89, 108, and 124.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Noting that Ministers on 20 September 1986 agreed that the Uruguay Round of Multilateral Trade Negotiations shall aim to "bring about further liberalization and expansion of world trade", "strengthen the role of GATT" and "increase the responsiveness of the GATT system to the evolving international economic environment";

Noting that a number of developing country Members have recourse to preshipment inspection;

Recognizing the need of developing countries to do so for as long and in so far as it is necessary to verify the quality, quantity or price of imported goods;

Mindful that such programmes must be carried out without giving rise to unnecessary delays or unequal treatment;

Noting that this inspection is by definition carried out on the territory of exporter Members;

Recognizing the need to establish an agreed international framework of rights and obligations of both user Members and exporter Members;

Recognizing that the principles and obligations of GATT 1994 apply to those activities of preshipment inspection entities that are mandated by governments that are Members of the WTO;

Recognizing that it is desirable to provide transparency of the operation of preshipment inspection entities and of laws and regulations relating to preshipment inspection;

Desiring to provide for the speedy, effective and equitable resolution of disputes between exporters and preshipment inspection entities arising under this Agreement;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Coverage – Definitions

1. This Agreement shall apply to all preshipment inspection activities carried out on the territory of Mem-

bers, whether such activities are contracted or mandated by the government, or any government body, of a Member.

2. The term "user Member" means a Member of which the government or any government body contracts for or mandates the use of preshipment inspection activities.

3. Preshipment inspection activities are all activities relating to the verification of the quality, the quantity, the price, including currency exchange rate and financial terms, and/or the customs classification of goods to be exported to the territory of the user Member.

4. The term "preshipment inspection entity" is any entity contracted or mandated by a Member to carry out preshipment inspection activities.[1]

(*footnote original*) [1] It is understood that this provision does not obligate Members to allow government entities of other Members to conduct preshipment inspection activities on their territory.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

No jurisprudence or decision of a competent WTO body.

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Obligations of User Members

Non-discrimination

1. User Members shall ensure that preshipment inspection activities are carried out in a non-discriminatory manner, and that the procedures and criteria employed in the conduct of these activities are objective and are applied on an equal basis to all exporters affected by such activities. They shall ensure uniform performance of inspection by all the inspectors of the preshipment inspection entities contracted or mandated by them.

Governmental Requirements

2. User Members shall ensure that in the course of preshipment inspection activities relating to their laws, regulations and requirements, the provisions of paragraph 4 of Article III of GATT 1994 are respected to the extent that these are relevant.

Site of Inspection

3. User Members shall ensure that all preshipment inspection activities, including the issuance of a Clean Report of Findings or a note of non-issuance, are performed in the customs territory from which the goods are exported or, if the inspection cannot be carried out in that customs territory given the complex nature of the products involved, or if both parties agree, in the customs territory in which the goods are manufactured.

Standards

4. User Members shall ensure that quantity and quality inspections are performed in accordance with the standards defined by the seller and the buyer in the purchase agreement and that, in the absence of such standards, relevant international standards[2] apply.

(*footnote original*) [2] An international standard is a standard adopted by a governmental or non-governmental body whose membership is open to all Members, one of whose recognized activities is in the field of standardization.

Transparency

5. User Members shall ensure that preshipment inspection activities are conducted in a transparent manner.

6. User Members shall ensure that, when initially contacted by exporters, preshipment inspection entities provide to the exporters a list of all the information which is necessary for the exporters to comply with inspection requirements. The preshipment inspection entities shall provide the actual information when so requested by exporters. This information shall include a reference to the laws and regulations of user Members relating to preshipment inspection activities, and shall also include the procedures and criteria used for inspection and for price and currency exchange-rate verification purposes, the exporters' rights vis-à-vis the inspection entities, and the appeals procedures set up under paragraph 21. Additional procedural requirements or changes in existing procedures shall not be applied to a shipment unless the exporter concerned is informed of these changes at the time the inspection date is arranged. However, in emergency situations of the types addressed by Articles XX and XXI of GATT 1994, such additional requirements or changes may be applied to a shipment before the exporter has been informed. This assistance shall not, however, relieve exporters from their obligations in respect of compliance with the import regulations of the user Members.

7. User Members shall ensure that the information referred to in paragraph 6 is made available to exporters in a convenient manner, and that the preshipment inspection offices maintained by preshipment inspection entities serve as information points where this information is available.

8. User Members shall publish promptly all applicable laws and regulations relating to preshipment inspection activities in such a manner as to enable other governments and traders to become acquainted with them.

Protection of Confidential Business Information

9. User Members shall ensure that preshipment inspection entities treat all information received in the

course of the preshipment inspection as business confidential to the extent that such information is not already published, generally available to third parties, or otherwise in the public domain. User Members shall ensure that preshipment inspection entities maintain procedures to this end.

10. User Members shall provide information to Members on request on the measures they are taking to give effect to paragraph 9. The provisions of this paragraph shall not require any Member to disclose confidential information the disclosure of which would jeopardize the effectiveness of the preshipment inspection programmes or would prejudice the legitimate commercial interest of particular enterprises, public or private.

11. User Members shall ensure that preshipment inspection entities do not divulge confidential business information to any third party, except that preshipment inspection entities may share this information with the government entities that have contracted or mandated them. User Members shall ensure that confidential business information which they receive from preshipment inspection entities contracted or mandated by them is adequately safeguarded. Preshipment inspection entities shall share confidential business information with the governments contracting or mandating them only to the extent that such information is customarily required for letters of credit or other forms of payment or for customs, import licensing or exchange control purposes.

12. User Members shall ensure that preshipment inspection entities do not request exporters to provide information regarding:

(a) manufacturing data related to patented, licensed or undisclosed processes, or to processes for which a patent is pending;

(b) unpublished technical data other than data necessary to demonstrate compliance with technical regulations or standards;

(c) internal pricing, including manufacturing costs;

(d) profit levels;

(e) the terms of contracts between exporters and their suppliers unless it is not otherwise possible for the entity to conduct the inspection in question. In such cases, the entity shall only request the information necessary for this purpose.

13. The information referred to in paragraph 12, which preshipment inspection entities shall not otherwise request, may be released voluntarily by the exporter to illustrate a specific case.

Conflicts of Interest

14. User Members shall ensure that preshipment inspection entities, bearing in mind also the provisions on protection of confidential business information in paragraphs 9 through 13, maintain procedures to avoid conflicts of interest:

(a) between preshipment inspection entities and any related entities of the preshipment inspection entities in question, including any entities in which the latter have a financial or commercial interest or any entities which have a financial interest in the preshipment inspection entities in question, and whose shipments the preshipment inspection entities are to inspect;

(b) between preshipment inspection entities and any other entities, including other entities subject to preshipment inspection, with the exception of the government entities contracting or mandating the inspections;

(c) with divisions of preshipment inspection entities engaged in activities other than those required to carry out the inspection process.

Delays

15. User Members shall ensure that preshipment inspection entities avoid unreasonable delays in inspection of shipments. User Members shall ensure that, once a preshipment inspection entity and an exporter agree on an inspection date, the preshipment inspection entity conducts the inspection on that date unless it is rescheduled on a mutually agreed basis between the exporter and the preshipment inspection entity, or the preshipment inspection entity is prevented from doing so by the exporter or by *force majeure*.[3]

(*footnote original*) [3] It is understood that, for the purposes of this Agreement, "*force majeure*" shall mean "irresistible compulsion or coercion, unforeseeable course of events excusing from fulfilment of contract".

16. User Members shall ensure that, following receipt of the final documents and completion of the inspection, preshipment inspection entities, within five working days, either issue a Clean Report of Findings or provide a detailed written explanation specifying the reasons for non-issuance. User Members shall ensure that, in the latter case, preshipment inspection entities give exporters the opportunity to present their views in writing and, if exporters so request, arrange for re-inspection at the earliest mutually convenient date.

17. User Members shall ensure that, whenever so requested by the exporters, preshipment inspection entities undertake, prior to the date of physical inspection, a preliminary verification of price and, where applicable, of currency exchange rate, on the basis of the contract between exporter and importer, the *pro forma* invoice and, where applicable, the application for import authorization. User Members shall ensure that a price or currency exchange rate that has been accepted by a preshipment inspection entity on the basis of such preliminary verification is not withdrawn, providing the

goods conform to the import documentation and/or import licence. They shall ensure that, after a preliminary verification has taken place, preshipment inspection entities immediately inform exporters in writing either of their acceptance or of their detailed reasons for non-acceptance of the price and/or currency exchange rate.

18. User Members shall ensure that, in order to avoid delays in payment, preshipment inspection entities send to exporters or to designated representatives of the exporters a Clean Report of Findings as expeditiously as possible.

19. User Members shall ensure that, in the event of a clerical error in the Clean Report of Findings, preshipment inspection entities correct the error and forward the corrected information to the appropriate parties as expeditiously as possible.

Price Verification

20. User Members shall ensure that, in order to prevent over- and under-invoicing and fraud, preshipment inspection entities conduct price verification[4] according to the following guidelines:

(*footnote original*) [4] The obligations of user Members with respect to the services of preshipment inspection entities in connection with customs valuation shall be the obligations which they have accepted in GATT 1994 and the other Multilateral Trade Agreements included in Annex 1A of the WTO Agreement.

(a) preshipment inspection entities shall only reject a contract price agreed between an exporter and an importer if they can demonstrate that their findings of an unsatisfactory price are based on a verification process which is in conformity with the criteria set out in subparagraphs (b) through (e);

(b) the preshipment inspection entity shall base its price comparison for the verification of the export price on the price(s) of identical or similar goods offered for export from the same country of exportation at or about the same time, under competitive and comparable conditions of sale, in conformity with customary commercial practices and net of any applicable standard discounts. Such comparison shall be based on the following:

  (i) only prices providing a valid basis of comparison shall be used, taking into account the relevant economic factors pertaining to the country of importation and a country or countries used for price comparison;

  (ii) the preshipment inspection entity shall not rely upon the price of goods offered for export to different countries of importation to arbitrarily impose the lowest price upon the shipment;

  (iii) the preshipment inspection entity shall take into account the specific elements listed in subparagraph (c);

  (iv) at any stage in the process described above, the preshipment inspection entity shall provide the exporter with an opportunity to explain the price;

(c) when conducting price verification, preshipment inspection entities shall make appropriate allowances for the terms of the sales contract and generally applicable adjusting factors pertaining to the transaction; these factors shall include but not be limited to the commercial level and quantity of the sale, delivery periods and conditions, price escalation clauses, quality specifications, special design features, special shipping or packing specifications, order size, spot sales, seasonal influences, licence or other intellectual property fees, and services rendered as part of the contract if these are not customarily invoiced separately; they shall also include certain elements relating to the exporter's price, such as the contractual relationship between the exporter and importer;

(d) the verification of transportation charges shall relate only to the agreed price of the mode of transport in the country of exportation as indicated in the sales contract;

(e) the following shall not be used for price verification purposes:

  (i) the selling price in the country of importation of goods produced in such country;

  (ii) the price of goods for export from a country other than the country of exportation;

  (iii) the cost of production;

  (iv) arbitrary or fictitious prices or values.

Appeals Procedures

21. User Members shall ensure that preshipment inspection entities establish procedures to receive, consider and render decisions concerning grievances raised by exporters, and that information concerning such procedures is made available to exporters in accordance with the provisions of paragraphs 6 and 7. User Members shall ensure that the procedures are developed and maintained in accordance with the following guidelines:

(a) preshipment inspection entities shall designate one or more officials who shall be available during normal business hours in each city or port in which they maintain a preshipment inspection administrative office to receive, consider and render decisions on exporters' appeals or grievances;

(b) exporters shall provide in writing to the designated official(s) the facts concerning the specific transaction in question, the nature of the grievance and a suggested solution;

(c) the designated official(s) shall afford sympathetic consideration to exporters' grievances and shall render a decision as soon as possible after receipt of the documentation referred to in subparagraph (b).

Derogation

22. By derogation to the provisions of Article 2, user Members shall provide that, with the exception of part shipments, shipments whose value is less than a minimum value applicable to such shipments as defined by the user Member shall not be inspected, except in exceptional circumstances. This minimum value shall form part of the information furnished to exporters under the provisions of paragraph 6.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. In its first report (2 December 1997), the PSI Working Party[1] made a set of recommendations to user Members to ensure that they comply with their obligations under Article 2 of the *PSI Agreement*.[2]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Obligations of Exporter Members

Non-discrimination

1. Exporter Members shall ensure that their laws and regulations relating to preshipment inspection activities are applied in a non-discriminatory manner.

Transparency

2. Exporter Members shall publish promptly all applicable laws and regulations relating to preshipment inspection activities in such a manner as to enable other governments and traders to become acquainted with them.

Technical Assistance

3. Exporter Members shall offer to provide to user Members, if requested, technical assistance directed towards the achievement of the objectives of this Agreement on mutually agreed terms.[5]

(*footnote original*) [5] It is understood that such technical assistance may be given on a bilateral, plurilateral or multilateral basis.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.3

2. In its first report (2 December 1997), the PSI Working Party considered that "[t]echnical assistance activities, which should be administered on a request basis, could include areas such as tariff and customs administration reforms; simplification and modernization of systems and procedures; and the development of an adequate legal, administrative, and physical infrastructure."[3]

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Independent Review Procedures

Members shall encourage preshipment inspection entities and exporters mutually to resolve their disputes. However, two working days after submission of the grievance in accordance with the provisions of paragraph 21 of Article 2, either party may refer the dispute to independent review. Members shall take such reasonable measures as may be available to them to ensure that the following procedures are established and maintained to this end:

(a) these procedures shall be administered by an independent entity constituted jointly by an organization representing preshipment inspection entities and an organization representing exporters for the purposes of this Agreement;

(b) the independent entity referred to in subparagraph (a) shall establish a list of experts as follows:

(i) a section of members nominated by an organization representing preshipment inspection entities;

(ii) a section of members nominated by an organization representing exporters;

(iii) a section of independent trade experts, nominated by the independent entity referred to in subparagraph (a).

The geographical distribution of the experts on this list shall be such as to enable any disputes raised under these procedures to be dealt with expeditiously. This list shall be drawn up within two months of the entry into force of the WTO Agreement and shall be updated annually. The

[1] With respect to the PSI Working Party more generally, see paragraph 8 below.
[2] G/L/214, section B.
[3] G/L/214, page 4.

list shall be publicly available. It shall be notified to the Secretariat and circulated to all Members;

(c) an exporter or preshipment inspection entity wishing to raise a dispute shall contact the independent entity referred to in subparagraph (a) and request the formation of a panel. The independent entity shall be responsible for establishing a panel. This panel shall consist of three members. The members of the panel shall be chosen so as to avoid unnecessary costs and delays. The first member shall be chosen from section (i) of the above list by the preshipment inspection entity concerned, provided that this member is not affiliated to that entity. The second member shall be chosen from section (ii) of the above list by the exporter concerned, provided that this member is not affiliated to that exporter. The third member shall be chosen from section (iii) of the above list by the independent entity referred to in subparagraph (a). No objections shall be made to any independent trade expert drawn from section (iii) of the above list;

(d) the independent trade expert drawn from section (iii) of the above list shall serve as the chairman of the panel. The independent trade expert shall take the necessary decisions to ensure an expeditious settlement of the dispute by the panel, for instance, whether the facts of the case require the panelists to meet and, if so, where such a meeting shall take place, taking into account the site of the inspection in question;

(e) if the parties to the dispute so agree, one independent trade expert could be selected from section (iii) of the above list by the independent entity referred to in subparagraph (a) to review the dispute in question. This expert shall take the necessary decisions to ensure an expeditious settlement of the dispute, for instance taking into account the site of the inspection in question;

(f) the object of the review shall be to establish whether, in the course of the inspection in dispute, the parties to the dispute have complied with the provisions of this Agreement. The procedures shall be expeditious and provide the opportunity for both parties to present their views in person or in writing;

(g) decisions by a three-member panel shall be taken by majority vote. The decision on the dispute shall be rendered within eight working days of the request for independent review and be communicated to the parties to the dispute. This time-limit could be extended upon agreement by the parties to the dispute. The panel or independent trade expert shall apportion the costs, based on the merits of the case;

(h) the decision of the panel shall be binding upon the preshipment inspection entity and the exporter which are parties to the dispute.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

3. At its meeting of 13 and 15 December 1995, the General Council established an "Independent Entity" as a subsidiary body of the Council for Trade in Goods.[4] The International Chamber of Commerce (representing exporters) and the International Federation of Inspections Agencies (representing PSI entities) accepted, in an Agreement concluded with the WTO[5], to constitute jointly the Independent Entity. In consultations with those organizations, the WTO defined the structure and functioning of the Independent Entity[6] and determined the rules of procedure applicable to the conduct of independent reviews by the Independent Entity.[7]

4. The Rules of Procedure for the Independent Entity are included in Annex III to the decision by the General Council establishing the Independent Entity.[8]

5. The Independent Entity reports to the Council for Trade in Goods on an annual basis.[9]

6. As envisaged in Article 4(b), the Independent Entity drew up its list in March 1996[10] and updated it in April 1997.[11]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Notification

Members shall submit to the Secretariat copies of the laws and regulations by which they put this Agreement into force, as well as copies of any other laws and regulations relating to preshipment inspection, when the WTO Agreement enters into force with respect to the Member concerned. No changes in the laws and regulations relating to preshipment inspection shall be enforced before such changes have been officially published. They shall be notified to the Secretariat immediately after their

[9] The reports of the Independent Entity are numbered G/L/120, 208, 269, 330 and 410.
[10] G/PSI/IE/1.
[11] G/PSI/IE/1/Rev.1.

publication. The Secretariat shall inform the Members of the availability of this information.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

7. In its first report (2 December 1997), the PSI Working Party stated that when Members notify their laws and regulations, they "should endeavour to provide additional descriptive information on how they are implementing the Agreement".[12] [13]

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Review

At the end of the second year from the date of entry into force of the WTO Agreement and every three years thereafter, the Ministerial Conference shall review the provisions, implementation and operation of this Agreement, taking into account the objectives thereof and experience gained in its operation. As a result of such review, the Ministerial Conference may amend the provisions of the Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

8. At its meeting of 7, 8 and 13 November 1996, the General Council established a working party under the Council for Trade in Goods to conduct the review provided for under Article 6 of the *PSI Agreement*.[14] The terms of reference of the PSI Working Party were as follows:

"[T]o conduct the review provided for under Article 6 of the Agreement on Preshipment Inspection and to report to the General Council through the Council for Trade in Goods in December 1997".[15]

9. The PSI Working Party issued three reports[16], all of which were approved by the General Council.[17]

10. At its December 1997 meeting the General Council agreed that the life of the Working Party on Preshipment Inspection be extended for one year for the purposes described in paragraph 8 of Section B of the report in G/L/214.[18]

11. In December 1998, the General Council agreed to a further extension of the life of the Working Party until 31 March 1999.[19]

12. The Working Party concluded its final Article 6 review of the Agreement on Preshipment Inspection at its meeting held on 12 March 1999.[20]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Consultation

Members shall consult with other Members upon request with respect to any matter affecting the operation of this Agreement. In such cases, the provisions of Article XXII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding, are applicable to this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Dispute Settlement

Any disputes among Members regarding the operation of this Agreement shall be subject to the provisions of Article XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

No jurisprudence or decision of a competent WTO body.

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Final Provisions

1. Members shall take the necessary measures for the implementation of the present Agreement.

2. Members shall ensure that their laws and regulations shall not be contrary to the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

No jurisprudence or decision of a competent WTO body.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Noting that Ministers on 20 September 1986 agreed that the Uruguay Round of Multilateral Trade Negotiations shall aim to "bring about further liberalization and expansion of world trade", "strengthen the role of GATT" and "increase the responsiveness of the GATT system to the evolving international economic environment";

Desiring to further the objectives of GATT 1994;

Recognizing that clear and predictable rules of origin and their application facilitate the flow of international trade;

Desiring to ensure that rules of origin themselves do not create unnecessary obstacles to trade;

Desiring to ensure that rules of origin do not nullify or impair the rights of Members under GATT 1994;

Recognizing that it is desirable to provide transparency of laws, regulations, and practices regarding rules of origin;

Desiring to ensure that rules of origin are prepared and applied in an impartial, transparent, predictable, consistent and neutral manner;

Recognizing the availability of a consultation mechanism and procedures for the speedy, effective and equitable resolution of disputes arising under this Agreement;

Desiring to harmonize and clarify rules of origin;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

PART I
DEFINITIONS AND COVERAGE

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Rules of Origin

1. For the purposes of Parts I to IV of this Agreement, rules of origin shall be defined as those laws, regulations and administrative determinations of general application applied by any Member to determine the country of origin of goods provided such rules of origin are not related to contractual or autonomous trade regimes leading to the granting of tariff preferences[1] going beyond the application of paragraph 1 of Article I of GATT 1994.

2. Rules of origin referred to in paragraph 1 shall include all rules of origin used in non-preferential commercial policy instruments, such as in the application of: most-favoured-nation treatment under Articles I, II, III, XI and XIII of GATT 1994; anti-dumping and countervailing duties under Article VI of GATT 1994; safeguard measures under Article XIX of GATT 1994; origin marking requirements under Article IX of GATT 1994; and any discriminatory quantitative restrictions or tariff quotas. They shall also include rules of origin used for government procurement and trade statistics.[1]

(*footnote original*) [1] It is understood that this provision is without prejudice to those determinations made for purposes of defining "domestic industry" or "like products of domestic industry" or similar terms wherever they apply.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

No jurisprudence or decision of a competent WTO body.

PART II
DISCIPLINES TO GOVERN THE APPLICATION OF RULES OF ORIGIN

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Disciplines During the Transition Period

Until the work programme for the harmonization of rules of origin set out in Part IV is completed, Members shall ensure that:

(a) when they issue administrative determinations of general application, the requirements to be fulfilled are clearly defined. In particular:

  (i) in cases where the criterion of change of tariff classification is applied, such a rule of origin, and any exceptions to the rule, must clearly specify the subheadings or headings within the tariff nomenclature that are addressed by the rule;

  (ii) in cases where the ad valorem percentage criterion is applied, the method for calculating this percentage shall also be indicated in the rules of origin;

  (iii) in cases where the criterion of manufacturing or processing operation is prescribed, the operation that confers origin on the good concerned shall be precisely specified;

(b) notwithstanding the measure or instrument of commercial policy to which they are linked, their rules of origin are not used as instruments to pursue trade objectives directly or indirectly;

(c) rules of origin shall not themselves create restrictive, distorting, or disruptive effects on international trade. They shall not pose unduly strict requirements or require the fulfilment of a certain condition not related to manufacturing or processing, as a prerequisite for the determination of the country of origin. However, costs not directly related to manufacturing or processing may be included for the purposes of the application of an ad valorem percentage criterion consistent with subparagraph (a);

(d) the rules of origin that they apply to imports and exports are not more stringent than the rules of origin they apply to determine whether or not a good is domestic and shall not dis-

[1] With respect to preferential rules of origin, see Annex II (Section XII).

criminate between other Members, irrespective of the affiliation of the manufacturers of the good concerned[2];

(*footnote original*) [2] It is understood that this provision is without prejudice to those determinations made for purposes of defining "domestic industry" or "like products of domestic industry" or similar terms wherever they apply.

(e) their rules of origin are administered in a consistent, uniform, impartial and reasonable manner;

(f) their rules of origin are based on a positive standard. Rules of origin that state what does not confer origin (negative standard) are permissible as part of a clarification of a positive standard or in individual cases where a positive determination of origin is not necessary;

(g) their laws, regulations, judicial decisions and administrative rulings of general application relating to rules of origin are published as if they were subject to, and in accordance with, the provisions of paragraph 1 of Article X of GATT 1994;

(h) upon the request of an exporter, importer or any person with a justifiable cause, assessments of the origin they would accord to a good are issued as soon as possible but no later than 150 days[3] after a request for such an assessment provided that all necessary elements have been submitted. Requests for such assessments shall be accepted before trade in the good concerned begins and may be accepted at any later point in time. Such assessments shall remain valid for three years provided that the facts and conditions, including the rules of origin, under which they have been made remain comparable. Provided that the parties concerned are informed in advance, such assessments will no longer be valid when a decision contrary to the assessment is made in a review as referred to in subparagraph (j). Such assessments shall be made publicly available subject to the provisions of subparagraph (k);

(*footnote original*) [3] In respect of requests made during the first year from the date of entry into force of the WTO Agreement, Members shall only be required to issue these assessments as soon as possible.

(i) when introducing changes to their rules of origin or new rules of origin, they shall not apply such changes retroactively as defined in, and without prejudice to, their laws or regulations;

(j) any administrative action which they take in relation to the determination of origin is reviewable promptly by judicial, arbitral or administrative tribunals or procedures, independent of the authority issuing the determination, which can effect the modification or reversal of the determination;

(k) all information that is by nature confidential or that is provided on a confidential basis for the purpose of the application of rules of origin is treated as strictly confidential by the authorities concerned, which shall not disclose it without the specific permission of the person or government providing such information, except to the extent that it may be required to be disclosed in the context of judicial proceedings.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. Article 2

(a) Negative list of disciplines prescribed by Article 2(b) through (d) of the Agreement on Rules of Origin

1. With respect to the provisions prescribed by Article 2 of the *Agreement on Rules of Origin*, the Panel on *US – Textiles Rules of Origin* explained that subparagraphs (b) through (d) lay down a negative set of disciplines that apply during the transition period. According to the Panel, during the transition period members enjoy "considerable discretion in designing and applying their rules of origin":

> "With regard to the provisions of Article 2 at issue in this case – subparagraphs (b) through (d) – we note that they set out what rules of origin should not do: rules of origin should not pursue trade objectives directly or indirectly; they should not themselves create restrictive, distorting or disruptive effects on international trade; they should not pose unduly strict requirements or require the fulfilment of a condition unrelated to manufacturing or processing; and they should not discriminate between other Members. These provisions do not prescribe what a Member must do.
>
> By setting out what Members cannot do, these provisions leave for Members themselves discretion to decide what, within those bounds, they can do. In this regard, it is common ground between the parties that Article 2 does not prevent Members from determining the criteria which confer origin, changing those criteria over time, or applying different criteria to different goods.
>
> Accordingly, in assessing whether the relevant United States rules of origin are inconsistent with the provisions of Article 2, we will bear in mind that, while during the post-harmonization period Members will be constrained by the result of the harmonization work programme, during the transition period, Members retain consider-

able discretion in designing and applying their rules of origin."[2]

2. Article 2(b)

(a) Purpose of Article 2(b)

2. The Panel on *US – Textiles Rules of Origin* explained that Article 2(b) is intended to preclude Members from using rules of origin "to substitute for, or to supplement, the intended effect of trade policy instruments":

> "In our view, Article 2(b) is intended to ensure that rules of origin are used to implement and support trade policy instruments, rather than to substitute for, or to supplement, the intended effect of trade policy instruments. Allowing Members to use rules of origin to pursue the objectives of 'protecting the domestic industry against import competition' or 'favouring imports from one Member over imports from another' would be to substitute for, or supplement, the intended effect of a trade policy instrument and, hence, be contrary to the objective of Article 2(b)."[3]

(b) Pursuit of trade objectives

(i) General

3. In *US – Textiles Rules of Origin* India claimed that both Section 334 of the United States Uruguay Agreement Act and Section 405 of the United States Trade and Development Act of 2000 are inconsistent with Article 2(b) of the *Agreement on Rules of Origin*. The Panel agreed with both India and the United States that the operative clause of Article 2(b) is the obligation that rules of origin must not be used as instruments to pursue trade objectives:

> "The Panel agrees with the parties that the operative part of Article 2(b) is the phrase 'rules of origin are not [to be] used as instruments to pursue trade objectives directly or indirectly'. It is clear from this phrase that in order to establish a violation of Article 2(b), a Member needs to demonstrate that another Member is using rules of origin for a specified purpose, *viz*., to pursue trade objectives."[4]

(ii) Panel's duty to conduct an inquiry into the objectives of the measure

4. The Panel on *US – Textiles Rules of Origin* noted the statements of the Appellate Body on *Chile – Alcoholic Beverages* on how Panels should carry on an inquiry into the objectives of a measure. While the *Chile – Alcoholic Beverages* interpretation was related to the second sentence of Article III:2 of the *GATT 1994*, the Panel said that this reasoning also applies in the context of Article 2(b) of the *Agreement on Rules of Origin*:

> "[W]e agree with India that the Appellate Body has already taken a position on how panels should conduct an inquiry into the objectives of a measure. The Appellate Body did so in the context of an analysis under Article III:2, second sentence, of the GATT 1994. In examining whether a tax measure was applied 'so as to afford protection to domestic production', the Appellate Body stated that:
>
> > '[. . .] it is not necessary for a panel to sort through the many reasons legislators and regulators often have for what they do and weigh the relative significance of those reasons to establish legislative or regulatory intent.' The *subjective* intentions inhabiting the minds of individual legislators or regulators do not bear upon the inquiry, if only because they are not accessible to treaty interpreters. It does not follow, however, that the statutory purposes or objectives – that is, the purpose or objectives of a Member's legislature and government as a whole – to the extent that they are given *objective* expression in the statute itself, are not pertinent. To the contrary, as we also stated in *Japan – Alcoholic Beverages*:
> >
> > Although it is true that the aim of a measure may not be easily ascertained, nevertheless its protective application can most often be discerned from the *design*, the *architecture*, and the revealing *structure* of a measure. (emphasis added)'[5]
>
> The reasons cited by the Appellate Body in support of its view do not appear to be specific to the provisions of Article III:2, second sentence, of the GATT 1994. Hence, these reasons apply with equal force in the context of Article 2(b) of the *RO Agreement*. Accordingly, in applying Article 2(b), we will follow the above-quoted statement by the Appellate Body."[6]

(iii) An incidental trade effect should not be inferred as a trade objective

5. In addressing India's claim that that Section 405 of the United States Trade and Development Act of 2000 is being used to pursue the trade objective of favouring imports from the European Communities over imports from other countries, and particularly imports from developing countries such as India, the Panel on *US – Textiles Rules of Origin* ruled that an incidental effect should not be inferred as a trade objective:

> "[W]e note, finally, that even if section 405 had the practical effect of favouring goods imported from the European Communities over competitive goods imported from other Members, that effect might be incidental

[6] Panel Report on *US – Textiles Rules of Origin*, paras. 6.37–6. 38.

rather than intentional. In other words, we do not think that the mere effect of favouring European Communities imports over imports from other Members would in itself justify the inference that creating such an effect is an objective pursued by the United States."[7]

3. Article 2(c), first sentence

(a) "themselves"

6. The Panel on *US – Textiles Rules of Origin* interpreted several terms used in the first sentence of Article 2(c), and considered that the term "themselves" specifically relates to a Member's rules of origin as opposed to something like a commercial policy. The Panel discussed the term "themselves" as follows:

> "[W]e consider that, in the first sentence of Article 2(c), the pronoun 'themselves' is used mainly to emphasise the preceding term 'rules of origin'. By emphasising the term 'rules of origin', the pronoun 'themselves' brings out very clearly that the first sentence of Article 2(c) is concerned with a Member's rules of origin, as distinct from something other than rules of origin, and that it is rules of origin, as opposed to something other than rules of origin, that must not 'create restrictive, distorting, or disruptive effects on international trade'.
>
> . . .
>
> [T]he term 'themselves' is meant to highlight that, although there may be commercial policy measures which create restrictive, distorting, or disruptive effects on international trade, the rules of origin used to implement and support these commercial policy measures must not create restrictive, distorting, or disruptive effects on international trade additional to those which may be caused by the underlying commercial policy measures.[8] Similarly, in cases where an underlying commercial policy measure does not cause any restrictive, distorting, or disruptive effects on international trade, the word 'themselves' would serve to underscore that rules of origin must not create any new restrictive, distorting, or disruptive effects on international trade."[9]

(b) "create"

7. The Panel on *US – Textiles Rules of Origin* continued exploring the interpretation of terms used in Article 2(c) first sentence, and explained that the term "create" ensures that there should be a "causal link" between a certain rule of origin and a prohibited trade effect for that rule of origin to be considered inconsistent with the first sentence of Article 2(c):

> "The next element of the text of the first sentence of Article 2(c) to be considered is the term 'create'. The ordinary meaning of the term 'create' is to 'cause, occasion, produce, give rise to'.[10] Thus, it is implicit in the term 'create' that a Member's rules of origin only contravene the first sentence of Article 2(c) if there is a causal link between those rules and the prohibited effects specified in the first sentence.[11]"[12]

(c) "restrictive, distorting or disruptive effects"

8. The Panel on *US – Textiles Rules of Origin* explained that the prohibited trade effects "restrictive, distorting or disruptive effects" listed in the first sentence of Article 2(c) form "alternative bases" for a claim:

> "Turning to the prohibited effects – *i.e.*, 'restrictive, distorting, or disruptive effects' – the Panel notes that these effects constitute alternative bases for a claim under the first sentence of Article 2(c), as is confirmed by the use of the disjunctive 'or'. Accordingly, independent meaning and effect should be given to the concepts of 'restriction', 'distortion' and 'disruption'. In this regard, we note that the ordinary meaning of the term 'restrict' is to 'limit, bound, confine'; that of the term 'distort' is to 'alter to an unnatural shape by twisting'; and that of the term to 'disrupt' is to 'interrupt the normal continuity of'.[13] Thus, the first sentence of Article 2(c) prohibits rules of origin which create the effect of limiting the level of international trade ('restrictive' effects); of interfering with the natural pattern of international trade ('distorting' effects); or of interrupting the normal continuity of international trade ('disruptive' effects)."[14]

(d) "effects on international trade"

9. The Panel on *US – Textiles Rules of Origin* determined that the term "effects on international trade" could not be interpreted as covering adverse effects on trade in different goods:

> "[W]e cannot assume that Members intended to bring adverse effects on different types of goods within the ambit of the prohibition set out in the first sentence of Article 2(c). Indeed, as the Appellate Body has said in a different context, '[t]o sustain such an assumption and to warrant such a far-reaching interpretation, treaty

---

[7] Panel Report on *US – Textiles Rules of Origin*, para. 6.117.

[8] (*footnote original*) It is worth noting in this context that Article 3.2 of the *Agreement on Import Licensing Procedures* on non-automatic licensing contains provisions along these lines. Specifically, it states that "[n]on-automatic licensing shall not have trade-restrictive or -distortive effects on imports *additional* to those caused by the imposition of the restriction" (emphasis added).

[9] Panel Report on *US – Textiles Rules of Origin*, paras. 6.136–6.137.

[10] (*footnote original*) *The New Shorter Oxford English Dictionary*, L. Brown, ed., Clarendon Press, 1993, Vol. I, p. 198.

[11] (*footnote original*) It is relevant to point out here that the Appellate Body has given a similar interpretation to the previously mentioned Article 3.2 of the *Agreement on Import Licensing Procedures*. Appellate Body Report, *European Communities – Measures Affecting the Importation of Certain Poultry Products* ("*EC – Poultry*"), WT/DS69/AB/R, adopted 23 July 1998, DSR 1998:V, 2031, paras. 126–127.

[12] Panel Report on *US – Textiles Rules of Origin*, para. 6.140.

[13] (*footnote original*) *The New Shorter Oxford English Dictionary*, L. Brown, ed., Clarendon Press, 1993, Vol. II, p. 2569; Vol. I, pp. 707 and 702, respectively.

[14] Panel Report on *US – Textiles Rules of Origin*, para. 6.141.

language far more specific [. . .] would be necessary'.[15] We consider that the same could be said of Article 2(c), first sentence.[16]

Therefore, we consider that it would not be appropriate to interpret the phrase 'effects on international trade' as covering adverse effects on trade in different (but closely similar) types of finished goods. We construe the phrase 'effects on international trade' to cover trade in the goods to which the relevant rule of origin is applied (*e.g.*, cotton bed linen)"[17]

4. Article 2(c), second sentence

(a) "unduly strict requirements"

10. In *US – Textiles Rules of Origin*, the Panel explained the meaning of the phrase "unduly strict requirement" in the context of India's claim that the United States' measures at issue imposed strict requirements that did not assist the United States in determining the country with which the product had the most significant economic link. The Panel explored the meaning of the sentence examining each term:

"First, we need to examine what kind of 'requirements' are covered by the obligation that Members must ensure that their rules of origin not 'pose unduly strict requirements'. In this regard, we note the view of the United States that the clause 'as a prerequisite for the determination of the country of origin' qualifies also the phrase '[rules of origin] shall not pose unduly strict requirements'. While the English version of Article 2(c) may be susceptible of such an interpretation, the equally authentic French version is not.[18] Nevertheless, the clause 'as a prerequisite for the determination of the country of origin' is part of the immediate context of the term 'requirements'. Considered as relevant context, the clause at issue lends force to the argument that the 'requirements' which must not be unduly strict include the kind of requirements which must be fulfilled as a prerequisite for the determination of the country of origin. Article 2(a) of the *RO Agreement* provides further contextual support for such an interpretation. The first sentence of that provision states that the 'requirements to be fulfilled' must be clearly defined. It is clear to us that these requirements include the substantive requirements which must be met for a good to be determined to originate in a particular country. For these reasons, we read the term 'requirements' in the second sentence of Article 2(c) as encompassing the substantive origin requirements[19] that must be met for a good to obtain origin status.[20]

Another issue presented by the phrase 'unduly strict requirements' is the interpretation to be given to the adjective 'strict'. The most pertinent dictionary definitions of the term 'strict' are 'exacting'[21] and 'rigorous'[22]. Thus, a 'strict' requirement is an exacting or rigorous requirement. In the specific context of Article 2 of the *RO Agreement*, and also bearing in mind our interpretation of the term 'requirements', 'strict' requirements are, therefore, those requirements which make the conferral of origin conditional on conformity with an exacting or rigorous (technical) standard.[23]

The second sentence of Article 2(c) only precludes Members from imposing requirements which are 'unduly' strict. The dictionary meaning of the adverb 'unduly' is 'more than is warranted or natural; excessively, dispro-

[15] (*footnote original*) Appellate Body Report, *EC Measures Concerning Meat and Meat Products (Hormones)* ("*EC – Hormones*"), WT/DS26/AB/R, WT/DS48/AB/R, adopted 13 February 1998, DSR 1998:I, 135, para. 165.

[16] (*footnote original*) In response to a question from the Panel, India argues that the plural in Article 2(c) means that that provision applies both to an individual rule of origin as well as to a Member's system of rules of origin. India's reply to Panel question No. 48. Since India, in developing its claim, does not rely on this interpretation of the text of Article 2(c), it is sufficient to note that we understand the plural in Article 2(c), first sentence, to refer to a Member's "rules of origin" taken individually, *i.e.*, to individual rules of origin as they apply to individual goods. Indeed, provisions like the second sentence of Article 2(c), the first clause of Article 2(d), Article 2(f) and Article 3(a) of the *RO Agreement* cannot reasonably be read to lay down disciplines for anything other than individual rules of origin.

[17] Panel Report on *US – Textiles Rules of Origin*, paras. 6.1466.147. See also para. 6.172.

[18] (*footnote original*) The French version of Article 2(c), second sentence, reads as follows:

"[Les règles d'origine] n'imposeront pas de prescriptions indûment rigoureuses ni n'exigeront, comme condition préalable à la détermination du pays d'origine, le respect d'une certaine condition non liée à la fabrication ou à l'ouvraison."

The Spanish text of Article 2(c), second sentence, seems to track the French version rather than the English version. It reads:

"[Las normas de origen] [n]o impondrán condiciones indebidamente estrictas ni exigirán el cumplimiento de una determinada condición no relacionada con la fabricación o elaboración como requisito previo para la determinación del país de origen."

[19] (*footnote original*) For the purposes of this dispute, we need not decide whether the "requirements" mentioned in the second sentence of Article 2(c) would also encompass the formal, or administrative, requirements which may be imposed in order to assess compliance with rules of origin (e.g., documentation requirements).

[20] (*footnote original*) The negotiating history of the *RO Agreement* tends to confirm that the term "requirements" refers to the substantive origin requirements that must be met for a good to obtain origin status. The first clause of Article 2(c), second sentence, appears to originate in two provisions proposed by Japan. The first of these proposed provisions states that "the *requirements to be fulfilled in the determination of origin* shall be clearly defined. [. . .] Rules of origin which state only what does not confer origin [. . .] or state only abstract conditions or *unduly strict conditions* shall be prohibited". MTN.GNG/NG2/W/52, p. 5 (emphasis added). The other provision proposed by Japan states that "[t]echnically excessive requirements as a prerequisite for the determination of country of origin shall be prohibited". *Ibid.*

[21] (*footnote original*) *Black's Law Dictionary*, B. A. Garner (ed.), West Group, 1999, p. 1434.

[22] (*footnote original*) *Merriam-Webster OnLine Thesaurus*, http://www.m-w.com (March 2003). We note that the French version of the second sentence of Article 2(c) also uses the adjective "rigoureux".

[23] (*footnote original*) In other words, we think that the "strictness" of requirements is to be assessed from the perspective of countries wanting to obtain origin status, rather than from the perspective of countries wanting to lose origin status.

portionately'.[24] Accordingly, an origin requirement can be considered to be 'unduly' strict if it is excessively strict."[25]

(i) "fulfilment of a certain condition not related to manufacturing or processing"

11. In *US – Textiles Rules of Origin*, the Panel noted that the sentence "fulfilment of a certain condition not related to manufacturing or processing" requires Members to ensure that the conditions that their rules of origin impose as a prerequisite for the conferral of origin do not include a condition unrelated to the manufacturing or processing:

> "[W]e consider that the ordinary meaning of the second clause is clear. It requires Members to ensure that the conditions their rules of origin impose as a prerequisite for the conferral of origin not include a condition which is unrelated to manufacturing or processing.[26] We note the example offered by the United States that a rule of origin would not conform to this requirement if it stated that a good can only be ascribed the origin of a country if the good has been certified by several authorities through a time-consuming process in the exporting country."[27]

5. Article 2(d)

(a) Scope of application of non-discrimination rule

12. In *US – Textiles Rules of Origin*, India argued that rules of origin violate Article 2(d) if they result in unjustifiably differential treatment of "closely related (Indian and European Communities) products". The Panel rejected India's claim and explained that India's argument was partly based on the erroneous assumption that Members should apply "the same rule of origin, or at least equally advantageous rules, to 'closely related' products imported from different Members". The Panel then determined that Article 2(d) does not intend to preclude discrimination across different (but closely related) goods imported from different Members:

> "[W]e recall that the second clause of Article 2(d) states that rules of origin 'shall not discriminate between other Members, irrespective of the affiliation of the manufacturers of the good concerned'. It does not state that rules of origin 'shall not discriminate between closely related goods of other Members [. . .]'. Thus, the plain terms of the second clause do not support India's reading.
>
> Moreover, the expression 'the good concerned' in the singular indicates that the second clause of Article 2(d) is not concerned with discrimination across different (but closely related) goods. Were it otherwise, the second clause would arguably have referred to 'the goods concerned' in the plural. In our view, the use of the singular suggests that, for the purposes of assessing whether there is discrimination 'between Members', a comparison should be made between the rule of origin applicable to a particular good when imported from one or more Members and the rule(s) of origin applicable to the same good – 'the good concerned' – when imported from one or more other Members.
>
> If the second clause of Article 2(c) were intended to preclude discrimination across different (but closely related) goods, we consider it likely that the drafters would have provided some textual guidance as to the product scope of the prohibition set forth in the second clause. Indeed, we note that other WTO non-discrimination provisions, such as Articles I, III and IX of the GATT 1994, do specify the product scope of the prohibitions they contain.[28]
>
> Finally, our reading of the second clause of Article 2(d) is consistent with the objective of that clause. In our view, the principal objective of the second clause of Article 2(d) is to ensure that, for a given good, the strictness of the requirements that must be satisfied for that good to be accorded the origin of a particular Member is the same, regardless of the provenance of the good in question (*i.e.*, Member from which the good is imported, affiliation of the manufacturers of the good, etc.).[29]"[30]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Disciplines after the Transition Period

Taking into account the aim of all Members to achieve, as a result of the harmonization work programme set out in Part IV, the establishment of harmonized rules of origin, Members shall ensure, upon the implementation of the results of the harmonization work programme, that:

(a) they apply rules of origin equally for all purposes as set out in Article 1;

(b) under their rules of origin, the country to be determined as the origin of a particular good is either the country where the good has been wholly obtained or, when more than one country is concerned in the

[24] (*footnote original*) *The New Shorter Oxford English Dictionary*, L. Brown (ed.), Clarendon Press, 1993, Vol. 2, p. 3480.
[25] Panel Report on *US – Textiles Rules of Origin*, paras. 6.204–6.206.
[26] (*footnote original*) We are aware that the third sentence of Article 2(c) states that "costs not directly related to manufacturing or processing may be included for the purposes of the application of an ad valorem percentage criterion consistent with subparagraph (a)". But the third sentence opens with the word "however", which implies a contrast between the second and third sentences.
[27] Panel Report on *US – Textiles Rules of Origin*, para. 6.208.
[28] (*footnote original*) For instance, Article I of the GATT 1994 prohibits discrimination as between "like" products only.
[29] (*footnote original*) The Panel notes that this is consistent with its view that Article 2 is intended to leave Members a considerable measure of discretion in designing and applying their rules of origin. *Supra*, para. 6.25.
[30] Panel Report on *US – Textiles Rules of Origin*, paras. 6.245–6.248.

production of the good, the country where the last substantial transformation has been carried out;

(c) the rules of origin that they apply to imports and exports are not more stringent than the rules of origin they apply to determine whether or not a good is domestic and shall not discriminate between other Members, irrespective of the affiliation of the manufacturers of the good concerned;

(d) the rules of origin are administered in a consistent, uniform, impartial and reasonable manner;

(e) their laws, regulations, judicial decisions and administrative rulings of general application relating to rules of origin are published as if they were subject to, and in accordance with, the provisions of paragraph 1 of Article X of GATT 1994;

(f) upon the request of an exporter, importer or any person with a justifiable cause, assessments of the origin they would accord to a good are issued as soon as possible but no later than 150 days after a request for such an assessment provided that all necessary elements have been submitted. Requests for such assessments shall be accepted before trade in the good concerned begins and may be accepted at any later point in time. Such assessments shall remain valid for three years provided that the facts and conditions, including the rules of origin, under which they have been made remain comparable. Provided that the parties concerned are informed in advance, such assessments will no longer be valid when a decision contrary to the assessment is made in a review as referred to in subparagraph (h). Such assessments shall be made publicly available subject to the provisions of subparagraph (i);

(g) when introducing changes to their rules of origin or new rules of origin, they shall not apply such changes retroactively as defined in, and without prejudice to, their laws or regulations;

(h) any administrative action which they take in relation to the determination of origin is reviewable promptly by judicial, arbitral or administrative tribunals or procedures, independent of the authority issuing the determination, which can effect the modification or reversal of the determination;

(i) all information which is by nature confidential or which is provided on a confidential basis for the purpose of the application of rules of origin is treated as strictly confidential by the authorities concerned, which shall not disclose it without the specific permission of the person or government providing such information, except to the extent that it may be required to be disclosed in the context of judicial proceedings.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

No jurisprudence or decision of a competent WTO body.

PART III
PROCEDURAL ARRANGEMENTS ON NOTIFICATION, REVIEW, CONSULTATION AND DISPUTE SETTLEMENT

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Institutions

1. There is hereby established a Committee on Rules of Origin (referred to in this Agreement as "the Committee") composed of the representatives from each of the Members. The Committee shall elect its own Chairman and shall meet as necessary, but not less than once a year, for the purpose of affording Members the opportunity to consult on matters relating to the operation of Parts I, II, III and IV or the furtherance of the objectives set out in these Parts and to carry out such other responsibilities assigned to it under this Agreement or by the Council for Trade in Goods. Where appropriate, the Committee shall request information and advice from the Technical Committee referred to in paragraph 2 on matters related to this Agreement. The Committee may also request such other work from the Technical Committee as it considers appropriate for the furtherance of the above-mentioned objectives of this Agreement. The WTO Secretariat shall act as the secretariat to the Committee.

2. There shall be established a Technical Committee on Rules of Origin (referred to in this Agreement as "the Technical Committee") under the auspices of the Customs Co-operation Council (CCC) as set out in Annex I.[31] The Technical Committee shall carry out the technical work called for in Part IV and prescribed in Annex I. Where appropriate, the Technical Committee shall request information and advice from the Committee on matters related to this Agreement. The Technical Committee may also request such other work from the Committee as it considers appropriate for the furtherance of the above-mentioned objectives of the Agreement. The CCC Secretariat shall act as the secretariat to the Technical Committee.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. Observers

13. At its meeting on 4 April 1995, the Committee on Rules of Origin agreed that governments granted

[31] See Section XI.

observer status by the WTO General Council would be allowed to attend meetings of the Committee as observers, without prejudice to the possibility of holding closed sessions without observers.[32]

2. Rules of procedure

14. At its meeting of 16 November 1995, the Committee on Rules of Origin adopted its Rules of Procedure[33], which were subsequently approved by the Council for Trade in Goods at its meeting of 1 December 1995.[34]

15. The Committee on Rules of Origin reports to the Council for Trade in Goods on an annual basis.[35]

3. Drafting Group on Rules of Origin

16. At its meeting on 27 June 1995, the Committee on Rules of Origin set up a Drafting Group to elaborate a definition of the term "country" for the purposes of the *Agreement on Rules of Origin*.[36] At its meeting on 16 November 1995, the Committee on Rules of Origin agreed to adopt the following recommendation from the Drafting Group:

> "[T]he Committee requests the Technical Committee to fully proceed with its Harmonization Work Programme in the absence of an abstractly constructed definition of the term 'country'; and to forward to it unresolved issues relating to the definition of the term 'country', for a final determination; and
>
> the Committee may request the Drafting Group to address particular issues relating to the definition of the term 'country' and, in that connection, to offer clarification that may enhance the work of the Technical Committee;"[37]

4. Working Group

17. At its meeting on 16 November 1995, the Committee on Rules of Origin agreed, as concerned the process of reviewing the reports submitted to the Committee by the Technical Committee on Rules of Origin in Brussels, to establish an open-ended Working Group to deal with bracketed interpretations and opinions of the Technical Committee, and consequently forward appropriate recommendations to the Committee on Rules of Origin for final consideration and decision.[38]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Information and Procedures for Modification and Introduction of New Rules of Origin

1. Each Member shall provide to the Secretariat, within 90 days after the date of entry into force of the WTO Agreement for it, its rules of origin, judicial decisions, and administrative rulings of general application relating to rules of origin in effect on that date. If by inadvertence a rule of origin has not been provided, the Member concerned shall provide it immediately after this fact becomes known. Lists of information received and available with the Secretariat shall be circulated to the Members by the Secretariat.

2. During the period referred to in Article 2, Members introducing modifications, other than *de minimis* modifications, to their rules of origin or introducing new rules of origin, which, for the purpose of this Article, shall include any rule of origin referred to in paragraph 1 and not provided to the Secretariat, shall publish a notice to that effect at least 60 days before the entry into force of the modified or new rule in such a manner as to enable interested parties to become acquainted with the intention to modify a rule of origin or to introduce a new rule of origin, unless exceptional circumstances arise or threaten to arise for a Member. In these exceptional cases, the Member shall publish the modified or new rule as soon as possible.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Notification procedures

18. At its meeting of 4 April 1995, the Committee on Rules of Origin agreed that, if a notification under Article 5.1 and paragraph 4 of Annex II were to be made in a language other than one of the WTO working languages, such notification should be accompanied by a summary in one of the WTO working languages.[39]

19. As of 31 December 2004, 84 Members have made notifications of non-preferential rules of origin and 89 Members have made notifications of preferential rules of origin pursuant to Article 5 and paragraph 4 of Annex II.[40]

20. At its meeting of 1 February 1996, the Committee on Rules of Origin adopted a procedure to deal with queries by Members in respect of national legislation;

---

[32] G/RO/M/1, para. 11. In addition, Representatives of the ACP, EFTA, IADB, IMF, ITCB, OECD, UNCTAD, WCO and the World Bank were invited to attend meetings of the Committee on Rules of Origin in 2000 in an observer capacity. See G/L/413, para. 1.

such queries should be communicated to the Secretariat ten working days in advance of the meeting at which they are to be raised.[41]

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Review

1. The Committee shall review annually the implementation and operation of Parts II and III of this Agreement having regard to its objectives. The Committee shall annually inform the Council for Trade in Goods of developments during the period covered by such reviews.

2. The Committee shall review the provisions of Parts I, II and III and propose amendments as necessary to reflect the results of the harmonization work programme.

3. The Committee, in cooperation with the Technical Committee, shall set up a mechanism to consider and propose amendments to the results of the harmonization work programme, taking into account the objectives and principles set out in Article 9. This may include instances where the rules need to be made more operational or need to be updated to take into account new production processes as affected by any technological change.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Article 6.1

21. As of 31 December 2004, the Committee on Rules of Origin has conducted ten reviews of the implementation and operation of the Agreement.[42]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Consultation

The provisions of Article XXII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding, are applicable to this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

No jurisprudence or decision of a competent WTO body.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Dispute Settlement

The provisions of Article XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding, are applicable to this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

22. The following table lists the dispute in which the panel report has been adopted where the provisions of the *Agreement on Rules of Origin* were invoked:

	Case Name	Case Number	Invoked Articles
1	*US – Textiles Rules of Origin*	WT/DS165	Article 2

PART IV
HARMONIZATION OF RULES OF ORIGIN

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Objectives and Principles

1. With the objectives of harmonizing rules of origin and, *inter alia*, providing more certainty in the conduct of world trade, the Ministerial Conference shall undertake the work programme set out below in conjunction with the CCC, on the basis of the following principles:

(a) rules of origin should be applied equally for all purposes as set out in Article 1;

(b) rules of origin should provide for the country to be determined as the origin of a particular good to be either the country where the good has been wholly obtained or, when more than one country is concerned in the production of the good, the country where the last substantial transformation has been carried out;

(c) rules of origin should be objective, understandable and predictable;

(d) notwithstanding the measure or instrument to which they may be linked, rules of origin should not be used as instruments to pursue trade objectives directly or indirectly. They should not themselves create restrictive, distorting or dis-

[41] G/RO/M/5, para. 1.3.
[42] See G/RO/3, G/RO/12, G/RO/21, G/RO/28, G/RO/43, G/RO/47, G/RO/50 and G/RO/55.

ruptive effects on international trade. They should not pose unduly strict requirements or require the fulfilment of a certain condition not relating to manufacturing or processing as a prerequisite for the determination of the country of origin. However, costs not directly related to manufacturing or processing may be included for purposes of the application of an ad valorem percentage criterion;

(e) rules of origin should be administrable in a consistent, uniform, impartial and reasonable manner;

(f) rules of origin should be coherent;

(g) rules of origin should be based on a positive standard. Negative standards may be used to clarify a positive standard.

Work Programme

2. (a) The work programme shall be initiated as soon after the entry into force of the WTO Agreement as possible and will be completed within three years of initiation.

(b) The Committee and the Technical Committee provided for in Article 4 shall be the appropriate bodies to conduct this work.

(c) To provide for detailed input by the CCC, the Committee shall request the Technical Committee to provide its interpretations and opinions resulting from the work described below on the basis of the principles listed in paragraph 1. To ensure timely completion of the work programme for harmonization, such work shall be conducted on a product sector basis, as represented by various chapters or sections of the Harmonized System (HS) nomenclature.

(i) *Wholly Obtained and Minimal Operations or Processes*

The Technical Committee shall develop harmonized definitions of:

- the goods that are to be considered as being wholly obtained in one country. This work shall be as detailed as possible;
- minimal operations or processes that do not by themselves confer origin to a good.

The results of this work shall be submitted to the Committee within three months of receipt of the request from the Committee.

(ii) *Substantial Transformation – Change in Tariff Classification*

- The Technical Committee shall consider and elaborate upon, on the basis of the criterion of substantial transformation, the use of change in tariff subheading or heading when developing rules of origin for particular products or a product sector and, if appropriate, the minimum change within the nomenclature that meets this criterion.
- The Technical Committee shall divide the above work on a product basis taking into account the chapters or sections of the HS nomenclature, so as to submit results of its work to the Committee at least on a quarterly basis. The Technical Committee shall complete the above work within one year and three months from receipt of the request of the Committee.

(iii) *Substantial Transformation – Supplementary Criteria*

Upon completion of the work under subparagraph (ii) for each product sector or individual product category where the exclusive use of the HS nomenclature does not allow for the expression of substantial transformation, the Technical Committee:

- shall consider and elaborate upon, on the basis of the criterion of substantial transformation, the use, in a supplementary or exclusive manner, of other requirements, including ad valorem percentages[4] and/or manufacturing or processing operations[5], when developing rules of origin for particular products or a product sector;
- may provide explanations for its proposals;
- shall divide the above work on a product basis taking into account the chapters or sections of the HS nomenclature, so as to submit results of its work to the Committee at least on a quarterly basis. The Technical Committee shall complete the above work within two years and three months of receipt of the request from the Committee.

(*footnote original*) [4] If the ad valorem criterion is prescribed, the method for calculating this percentage shall also be indicated in the rules of origin.

(*footnote original*) [5] If the criterion of manufacturing or processing operation is prescribed, the operation that confers origin on the product concerned shall be precisely specified.

Role of the Committee

3. On the basis of the principles listed in paragraph 1:

(a) the Committee shall consider the interpretations and opinions of the Technical Committee periodically in accordance with the time-frames provided in subparagraphs (i), (ii) and (iii) of paragraph 2(c) with a view to endorsing such interpretations and opinions. The Committee

may request the Technical Committee to refine or elaborate its work and/or to develop new approaches. To assist the Technical Committee, the Committee should provide its reasons for requests for additional work and, as appropriate, suggest alternative approaches;

(b) upon completion of all the work identified in subparagraphs (i), (ii) and (iii) of paragraph 2(c), the Committee shall consider the results in terms of their overall coherence.

Results of the Harmonization Work Programme and Subsequent Work

4. The Ministerial Conference shall establish the results of the harmonization work programme in an annex as an integral part of this Agreement.[6] The Ministerial Conference shall establish a time-frame for the entry into force of this annex.

(*footnote original*) [6] At the same time, consideration shall be given to arrangements concerning the settlement of disputes relating to customs classification.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

23. The Committee on Rules of Origin has pursued work on the harmonization of non-preferential rules of origin.[43] At its meeting of 10 May 1996, the Committee on Rules of Origin decided to establish an Integrated Negotiating Text for the Harmonization Work Programme.[44]

24. At its meeting of 15 December 2000, with respect to implementation-related issues and concerns, the General Council made a decision relating to several WTO Agreements.[45] Specifically, with respect to the *Agreement on Rules of Origin*, the General Council decided:

"Members undertake to expedite the remaining work on the harmonization of non-preferential rules of origin, so as to complete it by the time of the Fourth Ministerial Conference, or by the end of 2001 at the latest. The Chairman of the Committee on Rules of Origin shall report regularly, on his own responsibility, to the General Council on the progress being made. The first such report would be submitted to the Council at its first regular meeting in 2001, and subsequently at each regular meeting until the completion of the work programme."[46]

25. The Chairman of the Committee on Rules of Origin submitted a progress report on the harmonization work programme to the General Council in December 2001.[47] Following the discussion on the report, the General Council agreed that the Committee on Rules of Origin would hold two additional sessions in the first half of 2002 to resolve remaining issues, so that it might identify a limited number of core policy-level issues that in its view needed to be reported to the General Council for discussion and decision at that level. It also agreed that the outcome of the Committee on Rules of Origin's further work would be reported by the Chairman of the Committee, on his own responsibility, to the General Council at its first regular meeting after the end of June 2002, at which point the matter would be in the hands of the General Council, and that the deadline for completion of the harmonization work programme would be extended to the end of 2002.[48]

26. At its meeting in July 2002, the General Council took note of a report by the Chairman of the Committee on Rules of Origin and of the recommendations contained therein[49], and agreed to hold a first meeting on the 12 core policy-level issues identified in paragraph 5.1 of that report.[50]

27. At its meeting in December 2002, the General Council considered a report from its Chairman and the Chairman of the Committee on Rules of Origin on the progress to date. Following the discussion, and taking into account the importance of the issues to be resolved and the implications to be considered, and in the full knowledge of the consequences of a failure to meet another new deadline, the General Council agreed to extend, to July 2003, the deadline for completion of negotiations on the core policy issues identified in the Committee on Rules of Origin Chair's report to the General Council of 15 July 2002. The General Council also agreed that following resolution of these core policy issues, the Committee on Rules of Origin complete its remaining technical work, including the work referred to in Article 9.3(b) of the Agreement on Rules of Origin, by 31 December 2003.[51]

[43] The General Council adopted to date recommendations by the Committee on Rules of Origin to continue its work on this matter, in July 1998 (WT/GC/M/29, Section 4(a)) and October 2000 (WT/GC/M/59, Section 1(e)).

XI. ANNEX I

A. TEXT OF ANNEX I

ANNEX I
TECHNICAL COMMITTEE ON RULES OF ORIGIN

Responsibilities

1. The ongoing responsibilities of the Technical Committee shall include the following:

(a) at the request of any member of the Technical Committee, to examine specific technical problems arising in the day-to-day administration of the rules of origin of Members and to give advisory opinions on appropriate solutions based upon the facts presented;

(b) to furnish information and advice on any matters concerning the origin determination of goods as may be requested by any Member or the Committee;

(c) to prepare and circulate periodic reports on the technical aspects of the operation and status of this Agreement; and

(d) to review annually the technical aspects of the implementation and operation of Parts II and III.

2. The Technical Committee shall exercise such other responsibilities as the Committee may request of it.

3. The Technical Committee shall attempt to conclude its work on specific matters, especially those referred to it by Members or the Committee, in a reasonably short period of time.

Representation

4. Each Member shall have the right to be represented on the Technical Committee. Each Member may nominate one delegate and one or more alternates to be its representatives on the Technical Committee. Such a Member so represented on the Technical Committee is hereinafter referred to as a "member" of the Technical Committee. Representatives of members of the Technical Committee may be assisted by advisers at meetings of the Technical Committee. The WTO Secretariat may also attend such meetings with observer status.

5. Members of the CCC which are not Members of the WTO may be represented at meetings of the Technical Committee by one delegate and one or more alternates. Such representatives shall attend meetings of the Technical Committee as observers.

6. Subject to the approval of the Chairman of the Technical Committee, the Secretary-General of the CCC (referred to in this Annex as "the Secretary-General") may invite representatives of governments which are neither Members of the WTO nor members of the CCC and representatives of international governmental and trade organizations to attend meetings of the Technical Committee as observers.

7. Nominations of delegates, alternates and advisers to meetings of the Technical Committee shall be made to the Secretary-General.

Meetings

8. The Technical Committee shall meet as necessary, but not less than once a year.

Procedures

9. The Technical Committee shall elect its own Chairman and shall establish its own procedures.

B. INTERPRETATION AND APPLICATION OF ANNEX I

No jurisprudence or decision of a competent WTO body.

XII. ANNEX II

A. TEXT OF ANNEX II

ANNEX II
COMMON DECLARATION WITH REGARD TO PREFERENTIAL RULES OF ORIGIN

1. Recognizing that some Members apply preferential rules of origin, distinct from non-preferential rules of origin, the Members hereby *agree* as follows.

2. For the purposes of this Common Declaration, preferential rules of origin shall be defined as those laws, regulations and administrative determinations of general application applied by any Member to determine whether goods qualify for preferential treatment under contractual or autonomous trade regimes leading to the granting of tariff preferences going beyond the application of paragraph 1 of Article I of GATT 1994.

3. The Members *agree* to ensure that:

(a) when they issue administrative determinations of general application, the requirements to be fulfilled are clearly defined. In particular:

(i) in cases where the criterion of change of tariff classification is applied, such a preferential rule of origin, and any exceptions to the rule, must clearly specify the subheadings or headings within the tariff nomenclature that are addressed by the rule;

(ii) in cases where the ad valorem percentage criterion is applied, the method for calculating this percentage shall also be indicated in the preferential rules of origin;

(iii) in cases where the criterion of manufacturing or processing operation is prescribed, the operation that confers

preferential origin shall be precisely specified;

(b) their preferential rules of origin are based on a positive standard. Preferential rules of origin that state what does not confer preferential origin (negative standard) are permissible as part of a clarification of a positive standard or in individual cases where a positive determination of preferential origin is not necessary;

(c) their laws, regulations, judicial decisions and administrative rulings of general application relating to preferential rules of origin are published as if they were subject to, and in accordance with, the provisions of paragraph 1 of Article X of GATT 1994;

(d) upon request of an exporter, importer or any person with a justifiable cause, assessments of the preferential origin they would accord to a good are issued as soon as possible but no later than 150 days[7] after a request for such an assessment provided that all necessary elements have been submitted. Requests for such assessments shall be accepted before trade in the good concerned begins and may be accepted at any later point in time. Such assessments shall remain valid for three years provided that the facts and conditions, including the preferential rules of origin, under which they have been made remain comparable. Provided that the parties concerned are informed in advance, such assessments will no longer be valid when a decision contrary to the assessment is made in a review as referred to in subparagraph (f). Such assessments shall be made publicly available subject to the provisions of subparagraph (g);

(*footnote original*) [7] In respect of requests made during the first year from entry into force of the WTO Agreement, Members shall only be required to issue these assessments as soon as possible.

(e) when introducing changes to their preferential rules of origin or new preferential rules of origin, they shall not apply such changes retroactively as defined in, and without prejudice to, their laws or regulations;

(f) any administrative action which they take in relation to the determination of preferential origin is reviewable promptly by judicial, arbitral or administrative tribunals or procedures, independent of the authority issuing the determination, which can effect the modification or reversal of the determination;

(g) all information that is by nature confidential or that is provided on a confidential basis for the purpose of the application of preferential rules of origin is treated as strictly confidential by the authorities concerned, which shall not disclose it without the specific permission of the person or government providing such information, except to the extent that it may be required to be disclosed in the context of judicial proceedings.

4. Members *agree* to provide to the Secretariat promptly their preferential rules of origin, including a listing of the preferential arrangements to which they apply, judicial decisions, and administrative rulings of general application relating to their preferential rules of origin in effect on the date of entry into force of the WTO Agreement for the Member concerned. Furthermore, Members agree to provide any modifications to their preferential rules of origin or new preferential rules of origin as soon as possible to the Secretariat. Lists of information received and available with the Secretariat shall be circulated to the Members by the Secretariat.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Having regard to the Multilateral Trade Negotiations;

Desiring to further the objectives of GATT 1994;

Taking into account the particular trade, development and financial needs of developing country Members;

Recognizing the usefulness of automatic import licensing for certain purposes and that such licensing should not be used to restrict trade;

Recognizing that import licensing may be employed to administer measures such as those adopted pursuant to the relevant provisions of GATT 1994;

Recognizing the provisions of GATT 1994 as they apply to import licensing procedures;

Desiring to ensure that import licensing procedures are not utilized in a manner contrary to the principles and obligations of GATT 1994;

Recognizing that the flow of international trade could be impeded by the inappropriate use of import licensing procedures;

Convinced that import licensing, particularly non-automatic import licensing, should be implemented in a transparent and predictable manner;

Recognizing that non-automatic licensing procedures should be no more administratively burdensome than absolutely necessary to administer the relevant measure;

Desiring to simplify, and bring transparency to, the administrative procedures and practices used in international trade, and to ensure the fair and equitable application and administration of such procedures and practices;

Desiring to provide for a consultative mechanism and the speedy, effective and equitable resolution of disputes arising under this Agreement;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. In *EC – Poultry*, Brazil argued before the Appellate Body that Articles 1.2 and 3.2 of the *Licensing Agreement* were not applicable to over-quota trade. In addressing these issues, the Appellate Body referred to the Preamble of the *Licensing Agreement*:

> "The preamble to the *Licensing Agreement* stresses that the Agreement aims at ensuring that import licensing procedures 'are not utilized in a manner contrary to the principles and obligations of GATT 1994' and are 'implemented in a transparent and predictable manner'."[1]

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
General Provisions

1. For the purpose of this Agreement, import licensing is defined as administrative procedures[1] used for the operation of import licensing regimes requiring the submission of an application or other documentation (other than that required for customs purposes) to the relevant administrative body as a prior condition for importation into the customs territory of the importing Member.

(*footnote original*) [1] Those procedures referred to as "licensing" as well as other similar administrative procedures.

2. Members shall ensure that the administrative procedures used to implement import licensing regimes are in conformity with the relevant provisions of GATT 1994 including its annexes and protocols, as interpreted by this Agreement, with a view to preventing trade distortions that may arise from an inappropriate operation of those procedures, taking into account the economic development purposes and financial and trade needs of developing country Members.[2]

(*footnote original*) [2] Nothing in this Agreement shall be taken as implying that the basis, scope or duration of a measure being implemented by a licensing procedure is subject to question under this Agreement.

3. The rules for import licensing procedures shall be neutral in application and administered in a fair and equitable manner.

4. (a) The rules and all information concerning procedures for the submission of applications, including the eligibility of persons, firms and institutions to make such applications, the administrative body(ies) to be approached, and the lists of products subject to the licensing requirement shall be published, in the sources notified to the Committee on Import Licensing provided for in Article 4 (referred to in this Agreement as "the Committee"), in such a manner as to enable governments[3] and traders to become acquainted with them. Such publication shall take place, whenever practicable, 21 days prior to the effective date of the requirement but in all events not later than such effective date. Any exception, derogations or changes in or from the rules concerning licensing procedures or the list of products subject to import licensing shall also be published in the same manner and within the same time periods as specified above. Copies of these publications shall also be made available to the Secretariat.

(*footnote original*) [3] For the purpose of this Agreement, the term "governments" is deemed to include the competent authorities of the European Communities.

(b) Members which wish to make comments in writing shall be provided the opportunity to discuss these comments upon request. The concerned Member shall give due consideration to these comments and results of discussion.

5. Application forms and, where applicable, renewal forms shall be as simple as possible. Such documents and information as are considered strictly necessary for the proper functioning of the licensing regime may be required on application.

6. Application procedures and, where applicable, renewal procedures shall be as simple as possible. Applicants shall be allowed a reasonable period for the submission of licence applications. Where there is a closing date, this period should be at least 21 days with provision for extension in circumstances where insufficient applications have been received within this period. Applicants shall have to approach only one administrative body in connection with an application. Where it is strictly indispensable to approach more than one administrative body, applicants shall not need to approach more than three administrative bodies.

7. No application shall be refused for minor documentation errors which do not alter basic data contained

[1] Appellate Body Report on *EC – Poultry*, para. 121.

therein. No penalty greater than necessary to serve merely as a warning shall be imposed in respect of any omission or mistake in documentation or procedures which is obviously made without fraudulent intent or gross negligence.

8. Licensed imports shall not be refused for minor variations in value, quantity or weight from the amount designated on the licence due to differences occurring during shipment, differences incidental to bulk loading and other minor differences consistent with normal commercial practice.

9. The foreign exchange necessary to pay for licensed imports shall be made available to licence holders on the same basis as to importers of goods not requiring import licences.

10. With regard to security exceptions, the provisions of Article XXI of GATT 1994 apply.

11. The provisions of this Agreement shall not require any Member to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1

(a) Scope of the Licensing Agreement

(i) Tariff quotas procedures

2. In *EC – Bananas III*, the Appellate Body considered that the European Communities licensing procedures for tariff quotas were within the scope of the *Licensing Agreement*. After quoting the definition of "import licensing" set out in Article 1.1, the Appellate Body concluded that licensing procedures for tariff quotas fell under the provisions of the *Licensing Agreement*:

> "Although the precise terms of Article 1.1 do not say explicitly that licensing procedures for tariff quotas are within the scope of the *Licensing Agreement*, a careful reading of that provision leads inescapably to that conclusion. The EC import licensing procedures require 'the submission of an application' for import licences as 'a prior condition for importation' of a product at the lower, in-quota tariff rate. The fact that the importation of that product is possible at a high out-of-quota tariff rate without a licence does not alter the fact that a licence is required for importation at the lower in-quota tariff rate.
>
> We note that Article 3.2 of the *Licensing Agreement* provides that:
>
> > 'Non-automatic licensing shall not have trade-restrictive or -distortive effects on imports additional to those caused by the imposition of *the restriction*.' (emphasis added)
>
> We note also that Article 3.3 of the *Licensing Agreement* reads:
>
> > 'In the case of licensing requirements for purposes *other than the implementation of quantitative restrictions,* Members shall publish sufficient information for other Members and traders to know the basis for granting and/or allocating licences.' (emphasis added)
>
> We see no reason to exclude import licensing procedures for the administration of tariff quotas from the scope of the *Licensing Agreement* on the basis of the use of the term 'restriction' in Article 3.2. We agree with the Panel that, in the light of the language of Article 3.3 of the *Licensing Agreement* and the introductory words of Article XI of the GATT 1994, the term 'restriction' as used in Article 3.2 should not be interpreted to encompass only quantitative restrictions, but should be read also to include tariff quotas.
>
> For these reasons, we agree with the Panel that import licensing procedures for tariff quotas are within the scope of the *Licensing Agreement*."[2]

(ii) Licensing procedures for over-quota trade

3. In *EC – Poultry*, the European Communities regulation at issue applied, by its terms, only to in-quota trade in frozen poultry meat. The Panel had found that "the *Licensing Agreement*, as applied to this particular case, only relates to in-quota trade".[3] Brazil claimed that nothing in the text or context of Articles 1.2 and 3.2 of the *Licensing Agreement* limits to in-quota trade the requirement in Article 1.2 that licensing systems be implemented "with a view to preventing trade distortions" or the prohibition in Article 3.2 of additional trade-restrictive or trade-distortive effects. The Appellate Body stated as follows:

> "The preamble to the *Licensing Agreement* stresses that the Agreement aims at ensuring that import licensing procedures 'are not utilized in a manner contrary to the principles and obligations of GATT 1994' and are 'implemented in a transparent and predictable manner'. Moreover, Articles 1.2 and 3.2 make it clear that the *Licensing Agreement* is also concerned, with, among other things, preventing trade distortions that may be caused by licensing procedures. It follows that wherever an import licensing regime is applied, these requirements must be observed. The requirement to prevent trade distortion found in Articles 1.2 and 3.2 of the *Licensing Agreement* refers to *any* trade distortion that may be caused by the introduction or operation of licensing procedures, and is not necessarily limited to that part of trade to which the

[2] Appellate Body Report on *EC – Bananas III*, paras. 193–195.
[3] Panel Report on *EC – Poultry*, para. 249.

licensing procedures themselves apply. There may be situations where the operation of licensing procedures, in fact, have restrictive or distortive effects on that part of trade that is not strictly subject to those procedures.

In the case before us, the licensing procedure established in Article 1 of Regulation 1431/94 applies, by its terms, only to in-quota trade in frozen poultry meat. No licensing is required by Regulation 1431/94 for out-of-quota trade in frozen poultry meat. To the extent that the Panel intended merely to reflect the fairly obvious fact that this licensing procedure applies only to in-quota trade, we uphold the finding of the Panel that '[t]he Licensing Agreement, as applied to this particular case, only relates to in-quota trade'."[4]

(iii) Licensing "rules"

4. In *EC – Bananas III*, the Appellate Body reversed the Panel's finding that Article 1.3 of the *Licensing Agreement* "preclude[s] the imposition of one system of import licensing procedures in respect of a product originating in certain Members and a different system of import licensing procedures on the same product originating in other Members".[5] In doing so, the Appellate Body drew a distinction between licensing rules *per se*, on the one hand, and their application and administration, on the other:

"By its very terms, Article 1.3 of the *Licensing Agreement* clearly applies to the *application* and *administration* of import licensing procedures, and requires that this application and administration be 'neutral . . . fair and equitable'. Article 1.3 of the *Licensing Agreement* does not require the import licensing *rules*, as such, to be neutral, fair and equitable. Furthermore, the context of Article 1.3 – including the preamble, Article 1.1 and, in particular, Article 1.2 of the *Licensing Agreement* – supports the conclusion that Article 1.3 does not apply to import licensing *rules*. Article 1.2 provides, in relevant part, as follows:

> 'Members shall ensure that the administrative procedures used to implement import licensing régimes are in conformity with the relevant provisions of GATT 1994 . . . as interpreted by this Agreement, . . .'

As a matter of fact, none of the provisions of the *Licensing Agreement* concerns import licensing *rules*, *per se*. As is made clear by the title of the *Licensing Agreement*, it concerns import licensing *procedures*. The preamble of the *Licensing Agreement* indicates clearly that this agreement relates to import licensing procedures and their administration, not to import licensing rules. Article 1.1 of the *Licensing Agreement* defines its scope as the *administrative procedures* used for the operation of import licensing regimes.

We conclude, therefore, that the Panel erred in finding that Article 1.3 of the *Licensing Agreement* precludes the imposition of different import licensing systems on like products when imported from different Members."[6]

5. In *Korea – Various Measures on Beef*, the Panel followed the distinction between licensing rules *per se* and their administration, set out in the finding of the Appellate Body referenced in paragraph 4 above. The Panel examined the United States' claim that Korea's regulatory regime was inconsistent with Article 3.2 of the *Licensing Agreement* by granting exclusive authority to the LPMO and the SBS system to import beef, holding:

"[T]he Panel notes that many of the US claims regarding alleged violations of the *Licensing Agreement* are concerned with the substantive provisions of Korea's import (and distribution) regime (by the LPMO or SBS supergroups). It has been said repeatedly that such substantive matters are of no relevance to the *Licensing Agreement* which is concerned with the administrative rules of import licensing systems.[7]

For these reasons, the Panel does not reach any general conclusion on the compatibility of Korea's import licensing system with the WTO Agreement."[8]

6. With respect to the distinction between licensing rules *per se* and their administration, see also paragraph 13 below.

2. Article 1.2

(a) Interpretation

7. The Panel on *EC – Bananas III* addressed the issue of whether Article 1.2 in itself creates obligations additional to those arising from GATT. The Panel considered the historical developments of the GATT/WTO rules on licensing and concluded that, except for a reference to developing Members, "Article 1.2 of the WTO Licensing Agreement has become largely duplicative of the obligations already provided for in GATT" and "Article 1.2 . . . has lost most of its legal significance":

"[Article 1.2] derives from the 1979 Tokyo Round Agreement on Import Licensing Procedures which was negotiated as a self-standing agreement without a formal legal link to GATT 1947. Accordingly, membership was open not only to GATT contracting parties and the European Communities, but also to any other government.[9] Therefore, provisions of GATT 1947 applied between the signatories of the 1979 Licensing Agreement, by virtue of that agreement, only to the extent that they had been explicitly referred to and incorporated into the 1979 Licensing Agreement. In this context, Articles 1.10 and 4.2 of the 1979 Licensing Agreement mention, *inter alia*,

[4] Appellate Body Report on *EC – Poultry*, paras. 121–122.
[5] Panel Report on *EC – Bananas III*, para. 7.261.
[6] Appellate Body Report on *EC – Bananas III*, paras. 197–198.
[7] (*footnote original*) Appellate Body Report on *EC – Bananas III*, para. 197.
[8] Panel Report on *Korea – Various Measures on Beef*, paras. 784–785.
[9] (*footnote original*) 1979 Licensing Agreement, Article 5.

Articles XXI, XXII and XXIII of GATT 1947. Accordingly, the general rule that administrative procedures used to implement import licensing regimes had to conform with the relevant GATT provisions in fact added only to the obligations which any non-GATT contracting parties among the signatories of the 1979 Licensing Agreement would have been subject to.

The wording of Article 1.2 remained unchanged in the Uruguay Round. Given that the Agreement Establishing the WTO and all the agreements listed in Annexes 1 through 3 thereto constitute a single undertaking, however, Article 1.2 of the WTO Licensing Agreement has become largely duplicative of the obligations already provided for in GATT, except for the reference to developing country Members. Given this context, Article 1.2 of the WTO Licensing Agreement has lost most of its legal significance."[10]

8. Despite its finding that Article 1.2 of the *Licensing Agreement* merely duplicates already existing obligations, the Panel recalled the principle of effective treaty interpretation:

"However, the Appellate Body has endorsed the principle of effective treaty interpretation by stating that 'an interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility'.[11] In light of this, we have to give effect and meaning to Article 1.2 of the Licensing Agreement.

For this reason, to the extent that we find that specific aspects of the EC licensing procedures are not in conformity with Articles I, III or X of GATT, we necessarily also find an inconsistency with the requirements of Article 1.2 of the Licensing Agreement."[12]

9. The Panel on *EC – Bananas III* also addressed the legal significance of the reference in Article 1.2 to developing country Members:

"With respect to Article 1.2's requirement that account should be taken of 'economic development purposes and financial and trade needs of developing country Members', the Licensing Agreement does not give guidance as to how that obligation should be applied in specific cases. We believe that this provision could be interpreted as a recognition of the difficulties that might arise for developing country Members, in imposing licensing procedures, to comply fully with the provisions of GATT and the Licensing Agreement. In the alternative, Article 1.2 could also be read to authorize, but not to require, developed country Members to apply preferential licensing procedures to imports from developing country Members. In any event, even if we accept the latter interpretation, we have not been presented with evidence suggesting that, in its licensing procedures, there were factors that the EC should have but did not take into account under Article 1.2.

Therefore, we do not make a finding on whether the EC failed to take into account the needs of developing countries in a manner inconsistent with the requirements of Article 1.2 of the Licensing Agreement."[13]

10. In *EC – Poultry*, Brazil argued that the European Communities had violated the prohibition of trade distortion contained in Articles 1.2 and 3.2 of the *Licensing Agreement*. The Panel had rejected Brazil's claim. On appeal, Brazil argued that the Panel had failed to address or examine properly certain evidence, including evidence concerning Brazil's falling share of the poultry market in the European Communities, and had examined whether this falling market share was caused by the introduction of the European Communities licensing procedures for the tariff-rate quota for frozen poultry meat. The Appellate Body found that Brazil had failed to establish a causal link between the decline in market share and other indicators, on the one hand, and the licensing requirements at issue, on the other:

"Under Regulation 1431/94, Brazil's share in the EC tariff-rate quota for frozen poultry meat is 7,100 tonnes out of the total tariff-rate quota of 15,500 tonnes. This share is equal to approximately 45 per cent of the tariff-rate quota. This is the same as Brazil's percentage share of the total exports of frozen poultry meat to the European Communities during the reference period of the preceding three years. In addition, the Panel noted, licences issued by the European Communities for imports of frozen poultry meat from Brazil have been fully utilized. This means that Brazil's percentage share in the tariff-rate quota has remained at the same level as Brazil's share in the total trade over the relevant period. Moreover, the absolute volume of exports of frozen poultry meat by Brazil in the total exports of this product to the European Communities has been rising since the imposition of the tariff-rate quota for frozen poultry meat.

Brazil has not, in our view, clearly explained, either before the Panel or before us, how the licensing procedure *caused* the decline in market share. Brazil has not offered any persuasive evidence that its falling market share could, in this particular case – with a constant percentage share of the tariff-rate quota, full utilization of the tariff-rate quota and a growing total volume of exports – be viewed as constituting trade distortion attributable to the licensing procedure. In other words, Brazil has not proven a violation of the prohibition of trade distortion in Articles 1.2 and 3.2 of the *Licensing Agreement* by the European Communities.

Brazil argues that the Panel did not consider a number of other arguments in its examination of the existence

[10] Panel Report on *EC – Bananas III*, paras. 7.268–7.269.
[11] (*footnote original*) Appellate Body Report on *US – Gasoline*, p. 23.
[12] Panel Report on *EC – Bananas III*, paras. 7.270–7.271.
[13] Panel Report on *EC – Bananas III*, paras. 7.272–7.273.

> of trade distortion: that licences have been apportioned in non-economic quantities; that there have been frequent changes to the licensing rules; that licence entitlement has been based on export performance; and that there has been speculation in licences. These arguments, however, do not address the problem of establishing a causal relationship between imposition of the EC licensing procedure and the claimed trade distortion. Even if conceded *arguendo*, these arguments do not provide proof of the essential element of causation.
>
> For these reasons, we uphold the finding of the Panel that Brazil has not established that the European Communities has acted inconsistently with either Article 1.2 or Article 3.2 of the *Licensing Agreement*."[14]

11. With respect to the legal implication of Article 1.2 for interpreting the scope of the *Licensing Agreement*, see also the excerpt referenced in paragraph 3 above.

(b) Relationship with GATT provisions

12. With respect to the relationship between Article 1.2 and provisions of the *GATT 1994*, see paragraph 7 above.

3. Article 1.3

(a) Import licensing on the basis of export performance

13. In *EC – Poultry*, the Panel, in a finding not reviewed by the Appellate Body, examined Brazil's claim that the European Communities allocation of import licences on the basis of export performance was inconsistent with Articles 1.3 and 3.5(j) of the *Licensing Agreement*:

> "The requirement of export performance for the issuance of import licences on its face does seem unusual. However, Brazil has not elaborated on how the export performance requirement was administered and how it has affected the in-quota exports of poultry products from Brazil.
>
> We also note that the Appellate Body in the *Banana III* case made the following observation:
>
> > 'By its very terms, Article 1.3 of the Licensing Agreement clearly applies to the *application* and *administration* of import licensing procedures, and requires that this application and administration be 'neutral . . . fair and equitable'. Article 1.3 of the Licensing Agreement does not require the import licensing *rules*, as such, to be neutral, fair and equitable. Furthermore, the context of Article 1.3 – including the preamble, Article 1.1 and, in particular, Article 1.2 of the Licensing Agreement – supports the conclusion that Article 1.3 does not apply to import licensing *rules*.'[15]
>
> In our view, the issue of licence entitlement based on export performance is clearly that of rules, not that of application or administration of import licensing procedures. Thus, Article 1.3 is not applicable on this specific issue."[16]

14. With respect to the distinction between licensing rules *per se* and their application, see also paragraph 4 above.

4. Article 1.4(a)

(a) General

15. In *EC – Poultry*, the Panel examined the claim that the European Communities had failed to notify the necessary information regarding the poultry tariff quotas to the Committee on Import Licensing under Article 1.4(a) of the *Licensing Agreement*. The European Communities responded that it had not made a notification because it was unclear, prior to the Appellate Body report in the *Banana III* case, whether the *Licensing Agreement* applied to tariff rate quotas ("TRQs"). The Panel rejected the European Communities defence:

> "While we note the EC's explanation for non-notification, we find this omission to be inconsistent with Article 1.4(a) of the Licensing Agreement. The fact that all the relevant information is published and that the administration of all agricultural TRQs in the EC has been notified to the WTO Committee on Agriculture does not in our view excuse the EC from notifying the sources of publication pursuant to this subparagraph."[17]

16. Further, the Panel on *EC – Poultry*, in a finding not addressed by the Appellate Body, rejected the claim by Brazil that frequent changes to the licensing rules and procedures regarding the poultry TRQ had made it difficult for governments and traders to become familiar with the rules, contrary to the provisions of Articles 1.4, 3.3, 3.5(b), 3.5(c) and 3.5(d):

> "We note that the transparency requirement under the cited provisions is limited to publication of rules and other relevant information. While we have sympathy for Brazil regarding the difficulties caused by frequent changes to the rules, we find that changes in rules *per se* do not constitute a violation of Article 1.4, 3.3, 3.5(b), 3.5(c) or 3.5(d)."[18]

(b) Procedures for notification and review

17. At its meeting of 12 October 1995, the Committee on Import Licensing agreed on procedures for

notification and review under the *Licensing Agreement.*[19]

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Automatic Import Licensing[4]

(*footnote original*) [4] Those import licensing procedures requiring a security which have no restrictive effects on imports are to be considered as falling within the scope of paragraphs 1 and 2.

1. Automatic import licensing is defined as import licensing where approval of the application is granted in all cases, and which is in accordance with the requirements of paragraph 2(a).

2. The following provisions,[5] in addition to those in paragraphs 1 through 11 of Article 1 and paragraph 1 of this Article, shall apply to automatic import licensing procedures:

(*footnote original*) [5] A developing country Member, other than a developing country Member which was a Party to the Agreement on Import Licensing Procedures done on 12 April 1979, which has specific difficulties with the requirements of subparagraphs (a)(ii) and (a)(iii) may, upon notification to the Committee, delay the application of these subparagraphs by not more than two years from the date of entry into force of the WTO Agreement for such Member.

(a) automatic licensing procedures shall not be administered in such a manner as to have restricting effects on imports subject to automatic licensing. Automatic licensing procedures shall be deemed to have trade-restricting effects unless, *inter alia*:

  (i) any person, firm or institution which fulfils the legal requirements of the importing Member for engaging in import operations involving products subject to automatic licensing is equally eligible to apply for and to obtain import licences;

  (ii) applications for licences may be submitted on any working day prior to the customs clearance of the goods;

  (iii) applications for licences when submitted in appropriate and complete form are approved immediately on receipt, to the extent administratively feasible, but within a maximum of 10 working days;

(b) Members recognize that automatic import licensing may be necessary whenever other appropriate procedures are not available. Automatic import licensing may be maintained as long as the circumstances which gave rise to its introduction prevail and as long as its underlying administrative purposes cannot be achieved in a more appropriate way.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

(a) Application of Article 2 to developing country Members

18. The following developing country Members invoked the provisions for delayed application under footnote 5 to Article 2.2 of the Agreement on Import Licensing Procedures: Bangladesh (1 January 1995), Bolivia (13 September 1995), Brazil (1 January 1995), Burkina Faso (3 June 1995), Cameroon (13 December 1995), Colombia (30 April 1995), Costa Rica (1 January 1995), Côte d'Ivoire (1 January 1995), Dominican Republic (9 March 1995), El Salvador (7 May 1995), Gabon (1 January 1995), Guatemala (21 June 1995), Honduras (1 January 1995), Indonesia (1 January 1995), Kenya (1 January 1995), Malaysia (1 January 1995), Myanmar (1 January 1995), Sri Lanka (1 January 1995), Thailand (1 January 1995), Tunisia (29 March 1995), Turkey (26 March 1995), United Arab Emirates (10 April 1996), Uruguay (1 January 1995) and Venezuela (1 January 1995).[20]

19. In its annual report for 1998, with reference to the delay in application, the Committee on Import Licensing stated the following:

> "It was noted that the two-year period of delay allowed under the Agreement had expired for all these Members, and accordingly the obligations of Article 2.2(a)(ii) and (a)(iii) apply to all current WTO Members. It was recalled that the invocation of the above provisions did not exempt the Members concerned from the obligation to notify under the Agreement. The mandatory notifications included publications and legislation relevant to import licensing, and replies to the Questionnaire on Import Licensing Procedures by 30 September each year. Those Members that had not yet made the necessary notifications under the Agreement were urged to do so at the earliest opportunity."[21]

[19] G/LIC/M/2, paras. 8–9, and 21–23. The text of the agreed procedures for notifications and review can be found in G/LIC/3, para. (1). Also, notifications filed under Article 1.4(a) and (Article 8.2(b)) are numbered G/LIC/N/1/-.

[20] G/LIC/1, and its addenda 1–3. The date in brackets indicates the date of entry into force of the *WTO Agreement* for the Member concerned. In this regard, with respect to the "date of entry into force of the WTO Agreement", see Chapter on *WTO Agreement*, Section XV.B.2.

[21] G/L/264, para. 8.

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Non-Automatic Import Licensing

1. The following provisions, in addition to those in paragraphs 1 through 11 of Article 1, shall apply to non-automatic import licensing procedures. Non-automatic import licensing procedures are defined as import licensing not falling within the definition contained in paragraph 1 of Article 2.

2. Non-automatic licensing shall not have trade-restrictive or -distortive effects on imports additional to those caused by the imposition of the restriction. Non-automatic licensing procedures shall correspond in scope and duration to the measure they are used to implement, and shall be no more administratively burdensome than absolutely necessary to administer the measure.

3. In the case of licensing requirements for purposes other than the implementation of quantitative restrictions, Members shall publish sufficient information for other Members and traders to know the basis for granting and/or allocating licences.

4. Where a Member provides the possibility for persons, firms or institutions to request exceptions or derogations from a licensing requirement, it shall include this fact in the information published under paragraph 4 of Article 1 as well as information on how to make such a request and, to the extent possible, an indication of the circumstances under which requests would be considered.

5. (a) Members shall provide, upon the request of any Member having an interest in the trade in the product concerned, all relevant information concerning:

(i) the administration of the restrictions;

(ii) the import licences granted over a recent period;

(iii) the distribution of such licences among supplying countries;

(iv) where practicable, import statistics (i.e. value and/or volume) with respect to the products subject to import licensing. Developing country Members would not be expected to take additional administrative or financial burdens on this account;

(b) Members administering quotas by means of licensing shall publish the overall amount of quotas to be applied by quantity and/or value, the opening and closing dates of quotas, and any change thereof, within the time periods specified in paragraph 4 of Article 1 and in such a manner as to enable governments and traders to become acquainted with them;

(c) in the case of quotas allocated among supplying countries, the Member applying the restrictions shall promptly inform all other Members having an interest in supplying the product concerned of the shares in the quota currently allocated, by quantity or value, to the various supplying countries and shall publish this information within the time periods specified in paragraph 4 of Article 1 and in such a manner as to enable governments and traders to become acquainted with them;

(d) where situations arise which make it necessary to provide for an early opening date of quotas, the information referred to in paragraph 4 of Article 1 should be published within the time-periods specified in paragraph 4 of Article 1 and in such a manner as to enable governments and traders to become acquainted with them;

(e) any person, firm or institution which fulfils the legal and administrative requirements of the importing Member shall be equally eligible to apply and to be considered for a licence. If the licence application is not approved, the applicant shall, on request, be given the reason therefor and shall have a right of appeal or review in accordance with the domestic legislation or procedures of the importing Member;

(f) the period for processing applications shall, except when not possible for reasons outside the control of the Member, not be longer than 30 days if applications are considered as and when received, i.e. on a first-come first-served basis, and no longer than 60 days if all applications are considered simultaneously. In the latter case, the period for processing applications shall be considered to begin on the day following the closing date of the announced application period;

(g) the period of licence validity shall be of reasonable duration and not be so short as to preclude imports. The period of licence validity shall not preclude imports from distant sources, except in special cases where imports are necessary to meet unforeseen short-term requirements;

(h) when administering quotas, Members shall not prevent importation from being effected in accordance with the issued licences, and shall not discourage the full utilization of quotas;

(i) when issuing licences, Members shall take into account the desirability of issuing licences for products in economic quantities;

(j) in allocating licences, the Member should consider the import performance of the applicant. In this regard, consideration should be given as to whether licences issued to applicants in the past have been fully utilized during a recent representative period. In cases where licences have not been fully utilized, the Member shall examine the reasons for this and take these reasons into consideration when allocating new licences. Consideration shall also be given to ensuring a reasonable distribution of licences to new importers, taking into

account the desirability of issuing licences for products in economic quantities. In this regard, special consideration should be given to those importers importing products originating in developing country Members and, in particular, the least-developed country Members;

(k) in the case of quotas administered through licences which are not allocated among supplying countries, licence holders[6] shall be free to choose the sources of imports. In the case of quotas allocated among supplying countries, the licence shall clearly stipulate the country or countries;

(*footnote original*) [6] Sometimes referred to as "quota holders".

(l) in applying paragraph 8 of Article 1, compensating adjustments may be made in future licence allocations where imports exceeded a previous licence level.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.1

(a) Scope of Article 3

20. With respect to the scope of Article 3, see paragraphs 2, 3 and 5 above.

2. Article 3.2

21. Regarding the application of Article 3.2, see paragraph 10 above.

22. With respect to the legal implication of Article 3.2 for the scope of the *Licensing Agreement*, see paragraph 3 above.

3. Article 3.3

23. Concerning the issue of whether frequent changes in licensing procedures are inconsistent with Article 3.3, see paragraph 16 above.

4. Article 3.5(a)

24. In *EC – Poultry*, Brazil argued on appeal that the Panel had erred in restricting Brazil's "comprehensive claim in relation to a violation of the general principle of transparency underlying the Licensing Agreement" to an analysis of Article 3.5(a) of the *Licensing Agreement*. The contention of Brazil was that "the administration of import licences in such a way that the exporter does not know what trade rules apply is a breach of the fundamental objective of the Licensing Agreement". The Appellate Body, however, upheld the Panel's approach and the Panel's finding that the European Communities measure was not inconsistent with Article 3.5(a) of the *Licensing Agreement*:

> "Brazil's notice of appeal contained no reference to a general issue of transparency in relation to the *Licensing Agreement*. However, Brazil argued in its appellant's submission that the Panel erred in restricting Brazil's 'comprehensive claim in relation to a violation of the general principle of transparency underlying the Licensing Agreement' to an analysis of Article 3.5(a) of the *Licensing Agreement*. The contention of Brazil is that 'the administration of import licenses in such a way that the exporter does not know what trade rules apply is a breach of the fundamental objective of the Licensing Agreement'.
>
> Brazil argued before the Panel that 'underlying the Licensing Agreement was the principle of transparency.' Brazil submitted, in particular, that the European Communities was obliged under either Article 3.5(a)(iii) or (iv) of the *Licensing Agreement* to provide complete and relevant information on the distribution of licences among supplying countries and statistics on volumes and values. According to Brazil, the European Communities failed to fulfil this obligation. The Panel found that Brazil had not demonstrated that the European Communities had violated either Article 3.5(a)(iii) or (iv) of the *Licensing Agreement*.[22] In the light of the existence of express provisions in Article 3.5(a) of the *Licensing Agreement* relating to transparency on which the Panel did in fact make findings, we do not believe that the Panel erred by refraining from examining Brazil's 'comprehensive' claim relating to a general principle of transparency purportedly underlying the *Licensing Agreement*."[23]

5. Article 3.5(b)

25. With respect to the issue of whether frequent changes in licensing procedures are consistent with Article 3.5(b), see paragraph 16 above.

6. Article 3.5(c)

26. Regarding the issue of whether frequent changes in licensing procedures are consistent with Article 3.5(c), see paragraph 16 above.

7. Article 3.5(d)

27. Concerning the issue of whether frequent changes in licensing procedures are consistent with Article 3.5(d), see paragraph 16 above.

8. Article 3.5(h)

28. In *EC – Poultry*, Brazil claimed that speculation in licences discouraged full utilization of the poultry TRQ in violation of Articles 3.5(h) and 3.5(j). The European Communities responded that licences awarded under the regulation at issue were non-transferable, so as to avoid such speculation. The Panel, in a finding not reviewed by the Appellate Body, rejected Brazil's claim:

> "While it may be true that Brazilian exporters have had additional difficulties in exporting to the EC market due

[22] (*footnote original*) Panel Report on *EC – Poultry*, para. 265.
[23] Appellate Body Report on *EC – Poultry*, paras. 129–130.

to the speculation in licences, we note that the licences allocated to imports from Brazil have been fully utilized. In other words, the speculation in licences has not discouraged the full utilization of the TRQ. Thus, we do not find that the EC has acted inconsistently with Articles 3.5(h) or 3.5(j) of the Licensing Agreement in this regard."[24]

9. Article 3.5(i)

29. In *EC – Poultry*, Brazil claimed that the allocation of licences where each applicant received a licence allowing imports of about 5 tonnes was inconsistent with Article 3.5(i) regarding issuance of licences in economic quantities. As a related matter, Brazil claimed that the absence of a newcomer provision in the regulation regarding the operation of the poultry TRQ was inconsistent with Article 3.5(j) of the *Licensing Agreement*. The European Communities responded that licences for the quantity of about 5 tonnes were indeed being issued to newcomers and that the allocation of licences in small quantities was made in response to an ever increasing number of importers. The Panel, in a finding not reviewed by the Appellate Body, responded:

"We note Brazil's argument that its exporters are facing difficulties in dealing with licences for small quantities, which is echoed in Thailand's third-party submission also. While the decline in the average quantity per licence may cause problems for traders, we note at the same time that the total TRQ has been fully utilized. The very fact that the licences have been fully utilized suggests to us that the quantities involved are still 'economic', particularly in combination with the significant amount of the over-quota trade."[25]

10. Article 3.5(j)

30. The Panel on *EC – Poultry* examined Brazil's claim that the European Communities allocation of import licences on the basis of export performance was inconsistent with Articles 1.3 and 3.5(j) of the *Licensing Agreement*. While the Panel opined that "the requirement of export performance for the issuance of import licences on its face does seem unusual", it nevertheless held:

"[T]he provision of Article 3.5(j) in this regard is hortatory and does not necessarily prohibit the consideration of other factors than import performance."[26]

31. Also, the Panel addressed Brazil's claim that the absence of a newcomer provision in the regulation was inconsistent with Article 3.5(j) of the *Licensing Agreement*. See the excerpt referenced in paragraph 29 above.

32. With respect to the issue of speculation in licences, see paragraph 28 above.

C. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. GATT 1994

33. In *Canada – Dairy*, the Panel addressed the United States' claim that Canada was in violation of Article II of the *GATT 1994* and Article 3 of the *Licensing Agreement* because it restricted access to tariff quotas to certain cross-border imports by Canadians. Having found that the restriction was inconsistent with Article II:1(b) of the *GATT 1994*, the Panel did not find it necessary to examine whether in so doing Canada also violated Article 3 of the *Licensing Agreement*.[27]

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Institutions

There is hereby established a Committee on Import Licensing composed of representatives from each of the Members. The Committee shall elect its own Chairman and Vice-Chairman and shall meet as necessary for the purpose of affording Members the opportunity of consulting on any matters relating to the operation of this Agreement or the furtherance of its objectives.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. Rules of procedure

34. At its meeting of 1 December 1995, the Council for Trade in Goods approved the rules of procedure for meetings of the Committee on Import Licensing, where the Committee follows, *mutatis mutandis*, the rules of procedure for meetings of the General Council with certain exceptions.[28]

35. The Committee on Import Licensing held 16 meetings from 1 January 1995 to 31 December 2002.[29] The Committee reported to the Council for Trade in Goods on an annual basis.[30]

2. Procedures for the review of notifications

36. At its meeting on 23 October 1996, the Committee on Import Licensing adopted the Understanding on Procedures for the Review of Notifications Submitted

[24] Panel Report on *EC – Poultry*, para. 259.
[25] Panel Report on *EC – Poultry*, para. 262.
[26] Panel Report on *EC – Poultry*, para. 255.
[27] Panel Report on *Canada – Dairy*, para. 7.157.
[28] G/C/M/7, para. 2.2. The text of the adopted rules of procedure can be found in G/L/147.
[29] The minutes are contained in documents G/LIC/M/1–16.

under the Agreement on Import Licensing Procedures.[31]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Notification

1. Members which institute licensing procedures or changes in these procedures shall notify the Committee of such within 60 days of publication.

2. Notifications of the institution of import licensing procedures shall include the following information:

(a) list of products subject to licensing procedures;

(b) contact point for information on eligibility;

(c) administrative body(ies) for submission of applications;

(d) date and name of publication where licensing procedures are published;

(e) indication of whether the licensing procedure is automatic or non-automatic according to definitions contained in Articles 2 and 3;

(f) in the case of automatic import licensing procedures, their administrative purpose;

(g) in the case of non-automatic import licensing procedures, indication of the measure being implemented through the licensing procedure; and

(h) expected duration of the licensing procedure if this can be estimated with some probability, and if not, reason why this information cannot be provided.

3. Notifications of changes in import licensing procedures shall indicate the elements mentioned above, if changes in such occur.

4. Members shall notify the Committee of the publication(s) in which the information required in paragraph 4 of Article 1 will be published.

5. Any interested Member which considers that another Member has not notified the institution of a licensing procedure or changes therein in accordance with the provisions of paragraphs 1 through 3 may bring the matter to the attention of such other Member. If notification is not made promptly thereafter, such Member may itself notify the licensing procedure or changes therein, including all relevant and available information.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. General

37. Since the entry into force of the *WTO Agreement*, the Committee on Import Licensing has received notifications from 26 Members pursuant to Article 5 of the Agreement.[32]

2. Duplication or overlapping of notifications

38. On the question of possible duplication or overlapping of notifications, i.e. whether import licensing aspects associated with the administration of tariff quotas resulting from "tariffication" in agriculture should be notified to the Committee on Import Licensing or to the Committee on Agriculture, at its meeting of 12 October 1995, the Committee on Import Licensing agreed as follows:

> "[A]ll import licensing procedures, including those dealing with the administration of tariff quotas in agriculture, should be notified to the Committee on Import Licensing. Any problem that might arise relating to duplication or overlapping of notifications, as well as related questions of simplification, could be taken up as necessary, at the appropriate body, i.e. the Working Group on Notification Obligations and Procedures."[33]

39. In its report to the Council for Trade in Goods, dated 21 August 1996, the Working Group on Notification Obligations and Procedures concluded that efforts to remove the possible duplication were not warranted.[34]

40. At its meeting of 19 February 1998, the General Council adopted the following decision pursuant to the recommendation of the Council for Trade in Goods:

> "The notification obligations resulting from the Decision of the CONTRACTING PARTIES to the GATT 1947 taken at their twenty-eighth Session in November 1972 (SR.28/6, item 3) to adopt the report of the Committee on Trade in Industrial Products, including the Committee's proposal regarding notification obligations on licensing systems (L/3756, paragraph 76),[35] are hereby eliminated."[36]

41. With regard to Procedures for the Review of Notifications, see the excerpt referenced in paragraph 36 above.

---

[31] G/LIC/M/4, para. 5. The text of the adopted Understanding can be found in G/LIC/4. Questions and replies circulated under these procedures are numbered G/LIC/Q/-.

[32] The notifications may be found in document series G/LIC/N/2.

[33] G/LIC/M/2, paras. 21–23. With respect to the Working Group on Notification Obligations and Procedures, see the Chapter on the *WTO Agreement*, Section V.B.6.

[34] G/NOP/W/16/Rev.1, paras. 25–28.

[35] (*footnote original*) The paragraph reads as follows: "In addition, it [the Committee on Trade in Industrial Products] proposes to the Council that contracting parties should notify changes of licensing systems at the same time as notifications are made on import restrictions, i.e. 30 September of each year."

[36] WT/L/261.

3. Counter-notifications

42. With reference to Paragraph 5 of Article 5 of the *Licensing Agreement* addressing the issue of so-called counter-notifications, in its fourth biennial review, the Committee on Import Licensing noted that so far, the Committee has not received any notifications under this provision.[37]

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Consultation and Dispute Settlement

Consultations and the settlement of disputes with respect to any matter affecting the operation of this Agreement shall be subject to the provisions of Articles XXII and XXIII of GATT 1994, as elaborated and applied by the Dispute Settlement Understanding.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

43. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *Licensing Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*EC – Bananas III*	WT/DS27	Articles 1.2, 1.3, 3.2 and 3.5
2	*EC – Poultry*	WT/DS69	Articles 1.2, 1.3, 1.4, 3.2 and 3.5
3	*India – Quantitative Restrictions*	WT/DS90	Article 3[38]
4	*Canada – Dairy*	WT/DS103, WT/DS113	Article 3
5	*Korea – Various Measures on Beef*	WT/DS161, WT/DS169	Articles 1 and 3

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Review

1. The Committee shall review as necessary, but at least once every two years, the implementation and operation of this Agreement, taking into account the objectives thereof, and the rights and obligations contained therein.

2. As a basis for the Committee review, the Secretariat shall prepare a factual report based on information provided under Article 5, responses to the annual questionnaire on import licensing procedures[39] and other relevant reliable information which is available to it. This report shall provide a synopsis of the aforementioned information, in particular indicating any changes or developments during the period under review, and including any other information as agreed by the Committee.

3. Members undertake to complete the annual questionnaire on import licensing procedures promptly and in full.

4. The Committee shall inform the Council for Trade in Goods of developments during the period covered by such reviews.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. Article 7.1

44. At its meeting on 12 October 1995, the Committee on Import Licensing agreed on procedures for review under Article 7.1 of the *Licensing Agreement*.[40] At its meeting on 23 October 1996, the Committee concluded its first biennial review under Article 7.1 of the *Licensing Agreement*.[41] At its meetings on 20 October 1998,[42] 11 October 2000[43] and 24 September 2002,[44] the Committee concluded its second, third and fourth biennial reviews.

2. Article 7.3

45. At its meeting on 12 October 1995, the Committee on Import Licensing agreed on procedures for notification under Article 7.3 of the *Licensing Agreement*.[45] Article 7.3 of the Agreement requires all Members to provide replies to the Questionnaire on Import Licensing Procedures[46] by 30 September each year. Since the entry into force of the WTO Agreement, 84 Members[47] have made notifications under this provision. This

[37] G/LIC/9/Rev.1, para.15.
[38] The Panel stated:

> "A claim of violation of Article 3 of the Import Licensing Agreement is contained in the United States' request for establishment of a panel and thus, in our terms of reference. The United States, however, did not develop any legal arguments relating to such claim at any point of the proceedings, nor did it request a finding on the basis of that provision. We therefore do not address that claim."

Panel Report on *India – Quantitative Restrictions*, para. 5.16.

[47] The European Communities and its member States counted as one Member.

includes replies to the Questionnaire from 11 Members in 1995, 22 Members in 1996, 25 Members in 1997, 26 Members in 1998, 20 Members in 1999, 32 Members in 2000, 23 Members in 2001, 41 Members in 2002, 25 Members in 2003 and 16 Members in 2004.[48] At the same meeting, the Committee agreed on the standard form of the annual questionnaire which Members are required to complete under Article 7.3.[49]

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Final Provisions

Reservations

1. Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

Domestic Legislation

2. (a) Each Member shall ensure, not later than the date of entry into force of the WTO Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement.

(b) Each Member shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. Procedures for notification and review

46. At its meeting on 12 October 1995, the Committee on Import Licensing agreed on procedures for notification under Article 8.2(b) of the *Licensing Agreement*.[50]

47. With regard to Procedures for the Review of Notifications, see paragraph 36 above.

[48] These notifications may be found in document series G/LIC/N/3/-.

[49] G/LIC/M/2, paras. 17–18. The form of the annual questionnaire can be found in G/LIC/2. Notifications submitted under Article 7.3 are numbered G/LIC/N/3/-.

[50] G/LIC/M/2, paras. 6–16. The agreed rules are set out in G/LIC/3, para. 4. Notifications filed under Article 8.2(b) (and Article 1.4(a)) are numbered G/LIC/N/1/-.

Agreement on Subsidies and Countervailing Measures

I. ARTICLE 1 751
A. TEXT OF ARTICLE 1 751
B. INTERPRETATION AND APPLICATION OF ARTICLE 1 751
1. Article 1 751
(a) General 751
(i) "mandatory/discretionary subsidization" 751
2. Article 1.1 752
(a) General 752
(i) Object and purpose of Article 1.1 752
(ii) Distinction between "financial contribution" and "benefit" 752
3. Article 1.1(a)(1): "financial contribution" 752
(a) General 752
(b) Concept of "financial contribution" 753
4. Article 1.1(a)(1)(i): transfer of funds 753
(a) "Direct transfer of funds" 753
(b) "Potential direct transfers of funds" 753
(c) Timing of the transfer 754
5. Article 1.1(a)(1)(ii): "government revenue otherwise due is foregone or not collected" 754
(a) General 754
(b) "Categories of revenue" 754
(c) Members' tax rules as normative benchmark 755
(d) "But for" test 756
(e) Tax exclusion of extraterritorial income as revenue foregone 757
(f) Footnote 1 to Article 1.1(a)(1)(ii) 757
6. Article 1.1(a)(1)(iii): government provision of goods or services 758
(a) General 758
(b) "provides" 758
(c) "goods" 758
(i) Concept of "goods" 758
(ii) Exception 759
7. Article 1.1(a)(1)(iv): funding mechanism, private bodies 759
(a) Purpose of Article 1.1(a)(1)(iv) 759
(b) Requirement for the existence of a financial contribution under Article 1.1(a)(1)(iv) 760
(i) Government-entrusted or government-directed provision of goods 760
(ii) "Private body" 760
(iii) "Type of functions" 761
(c) Relationship with Article 1.1(b) 761
8. Article 1.1(b): "benefit is thereby conferred" 761
(a) "benefit" 761
(b) "recipient of a benefit" 763
(c) "is . . . conferred" 764
(i) General 764
(ii) Mandatory/discretionary conferral of a benefit 764
Challenging subsidy programmes "as such" 764
Relevance of the mandatory/discretionary distinction 764
Order of analysis when applying the mandatory/discretionary distinction 765
"Substantive context" in the application of the mandatory/discretionary distinction 765
Extent of the complainant's burden of proof 765
Fiscal advantages 766
Compliance with the OECD Arrangement 766
Provision of services not available in the market 766
Challenging subsidy programmes "as applied" 766
(d) Passing the benefit through 767
(e) Rebuttal of a prima facie case of benefit 768
(f) Relationship with Article 1.1(a)(1) 768
(g) Relationship with other Articles 768
(i) Article 14 768
(ii) Article 14(c) 769
(iii) Article 14(d) 769
(iv) Annex I, item (k) 769
(v) Annex IV 769
9. Relationship of Article 1.1 with other Articles 769
(i) Article 14 769
(ii) Footnote 1 and Footnote 59 769
10. Relationship with other WTO Agreements 770
(a) Article XVI of the WTO Agreement 770

II. ARTICLE 2 771
A. TEXT OF ARTICLE 2 771
B. INTERPRETATION AND APPLICATION OF ARTICLE 2 772
1. Article 2.1(c) 772
(a) General 772
(b) "other factors may be considered" 772
(c) "account be taken of" 772
2. Article 2.3: subsidies falling under Article 3 deemed to be specific 772

III. ARTICLE 3 773
A. TEXT OF ARTICLE 3 773
B. INTERPRETATION AND APPLICATION OF ARTICLE 3 773
1. Article 3.1(a) 773
(a) General 773
(b) "contingent in law . . . upon export performance" 773
(c) "contingent . . . in fact . . . upon export performance" 774

A. OBJECT AND PURPOSE OF THE SCM AGREEMENT 879

PART I: GENERAL PROVISIONS

I. ARTICLE 1

A. TEXT OF ARTICLE 1

Members hereby *agree* as follows:

Article 1
Definition of a Subsidy

1.1 For the purpose of this Agreement, a subsidy shall be deemed to exist if:

(a)(1) there is a financial contribution by a government or any public body within the territory of a Member (referred to in this Agreement as "government"), i.e. where:

(i) a government practice involves a direct transfer of funds (e.g. grants, loans, and equity infusion), potential direct transfers of funds or liabilities (e.g. loan guarantees);

(ii) government revenue that is otherwise due is foregone or not collected (e.g. fiscal incentives such as tax credits);[1]

(*footnote original*) [1] In accordance with the provisions of Article XVI of GATT 1994 (Note to Article XVI) and the provisions of Annexes I through III of this Agreement, the exemption of an exported product from duties or taxes borne by the like product when destined for domestic consumption, or the remission of such duties or taxes in amounts not in excess of those which have accrued, shall not be deemed to be a subsidy.

(iii) a government provides goods or services other than general infrastructure, or purchases goods;

(iv) a government makes payments to a funding mechanism, or entrusts or directs a private body to carry out one or more of the type of functions illustrated in (i) to (iii) above which would normally be vested in the government and the practice, in no real sense, differs from practices normally followed by governments;

or

(a)(2) there is any form of income or price support in the sense of Article XVI of GATT 1994;

and

(b) a benefit is thereby conferred.

1.2 A subsidy as defined in paragraph 1 shall be subject to the provisions of Part II or shall be subject to the provisions of Part III or V only if such a subsidy is specific in accordance with the provisions of Article 2.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1

(a) General

(i) "mandatory/discretionary subsidization"

1. As regards the relevance of the mandatory/discretionary distinction[1] when challenging subsidy programmes as such, see paragraphs 56–64 below. As regards

[1] For information on the latest jurisprudence departing from the mandatory/discretionary distinction, see Section VI.B.3(c)(ii) of the Chapter on the *DSU*.

this distinction in general, see Section VI.B.3(c)(ii) of the Chapter on the *DSU*. Concerning the mandatory/discretionary distinction in the context of an affirmative defence under paragraph 2 of item (k) of the Illustrative List of Export Subsidies, see paragraphs 478–479 below.

2. Article 1.1

(a) General

(i) Object and purpose of Article 1.1

2. In *US – Softwood Lumber III*, the Panel stated that "[t]he object and purpose of Article 1.1 SCM Agreement is to provide a definition of a subsidy for the purposes of the SCM Agreement".[2]

(ii) Distinction between "financial contribution" and "benefit"

3. In *Brazil – Aircraft*, the Appellate Body indicated that it considers "a 'financial contribution' and a 'benefit' as two separate legal elements in Article 1.1 of the *SCM Agreement*, which *together* determine whether a subsidy *exists*".[3]

4. In *Brazil – Aircraft (Article 21.5 – Canada II)* the Panel first examined whether the measure at stake constituted a "subsidy", as defined in Article 1.1. To this effect, the Panel examined whether both elements in the definition of a subsidy can be found: (i) a "financial contribution" by a government; and (ii) a "benefit" is thereby conferred. The Panel examined each element in turn and stated:

> "Article 1.1 of the *SCM Agreement* sets out a general definition of a subsidy. It provides that a subsidy is deemed to exist, *inter alia*, if there is 'a financial contribution by a government' and 'a benefit is thereby conferred'."[4]

5. This approach was followed by the Panel on *US – Export Restraints*, where the Panel stated:

> "Article 1.1 makes clear that the definition of a subsidy has two distinct elements (i) a financial contribution (or income or price support), (ii) which confers a benefit. The Appellate Body emphasised this point in *Brazil – Aircraft*, stating that financial contribution and benefit are 'separate legal elements in Article 1.1 . . . which *together* determine whether a "subsidy" exists',[5] which the panel in that case had erroneously blended together by importing the concept of benefit into the definition of financial contribution."[6]

6. This was further recalled in *Canada – Aircraft Credits and Guarantee* where the Panel considered that Article 1.1 of the *SCM Agreement* makes clear that the definition of a subsidy has two distinct elements: (i) a financial contribution, (ii) which confers a benefit. In this instance the Panel considered that the complainant must demonstrate that the measures under consideration mandate (i) a financial contribution, (ii) which confers a benefit, and a subsidy therefore exists, and (iii) that subsidy is contingent upon export performance. The Panel stated:

> "[In] this case, Brazil would have to demonstrate that the legal instruments governing the establishment and operation of the programmes at issue are mandatory in respect of the alleged violation, i. e., the grant of prohibited export subsidies. In other words, Brazil would have to demonstrate that the legal instruments mandate (i) a financial contribution; (ii) which confers a benefit, and a subsidy therefore exists, and (iii) that subsidy is contingent upon export performance."[7]

7. The Panel on *Canada – Aircraft Credits and Guarantees* further distinguished the two elements and concluded that to demonstrate the existence of a "benefit", a complaining party must do more than establish the existence of a "financial contribution."[8]

3. Article 1.1(a)(1): "financial contribution"

(a) General

8. In *US – Export Restraints*, the Panel considered the negotiating history of Article 1 and found that the inclusion of "financial contribution" in the text of the provision was meant to guarantee that not all government measures that confer benefits would be considered to be subsidies and to avoid the countervailing of benefits from government measures by restricting the kinds of such measures that would constitute subsidies if they conferred benefits:

> "The negotiating history of Article 1 confirms our interpretation of the term 'financial contribution'. This negotiating history demonstrates, in the first place, that the requirement of a financial contribution from the outset was intended by its proponents precisely to ensure that not all government measures that conferred benefits could be deemed to be subsidies. This point was extensively discussed during the negotiations, with many participants consistently maintaining that only government actions constituting financial contributions should be subject to the multilateral rules on subsidies and countervailing measures.

---

[2] Panel Report on *US – Softwood Lumber III*, para. 7.24. Concerning the object and purpose of the *SCM Agreement*, see paras. 496–497 below.
[3] Appellate Body Report on *Brazil – Aircraft*, para. 157.
[4] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.18.
[5] (*footnote original*) Appellate Body Report on *Brazil – Aircraft*, para. 157 (emphasis in original).
[6] Panel Report on *US – Exports Restraints*, para. 8.20.
[7] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.65.
[8] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.396. Also see paras. 7.64–7.65.

> [T]he negotiating history confirms that the introduction of the two-part definition of subsidy, consisting of 'financial contribution' and 'benefit', was intended specifically to prevent the countervailing of *benefits* from any sort of (formal, enforceable) government measures, by restricting to a finite list the *kinds* of government measures that would, if they conferred benefits, constitute subsidies. The negotiating history confirms that items (i)–(iii) of that list limit these kinds of measures to the transfer of economic resources from a government to a private entity. Under subparagraphs (i)–(iii), the government acting on its own behalf is effecting that transfer by directly providing something of value – either money, goods, or services – to a private entity. Subparagraph (iv) ensures that the same kinds of *government* transfers of economic resources, when undertaken through explicit *delegation of those* functions to a private entity, do not thereby escape disciplines."[9]

(b) Concept of "financial contribution"

9. The Panel on *US – Softwood Lumber III* described the concept of "financial contribution" under Article 1.1(a)(1) of the *SCM Agreement* in general terms:

> "Article 1.1(a)(1) SCM Agreement provides that the first element of a subsidy is a 'financial contribution by the government'. Subparagraphs (i) through (iv) then explain that a financial contribution can exist in a wide variety of circumstances including, of course, the direct transfer of funds. But subparagraphs (ii) and (iii) show that a financial contribution will also exist if the government does not collect the revenue which it is entitled to or when it gives something or does something for an enterprise or purchases something from an enterprise or a group of enterprises. Subparagraph (iv) ensures that government directed transfers effected through a private entity do not thereby cease to be government transfers. In other words, Article 1.1(a)(1) SCM Agreement provides that a *financial* contribution can exist not only when there is an act or an omission involving the transfer of money, but also in case goods or certain services are provided by the government."[10]

10. The Panel on *US – Export Restraints* considered that the principal significance of the concept of financial contribution was foreclosing "the possibility of the treatment of *any* government action that resulted in a benefit as a subsidy":

> "[B]y introducing the notion of financial contribution, the drafters foreclosed the possibility of the treatment of *any* government action that resulted in a benefit as a subsidy. Indeed, this is arguably the principal significance of the concept of financial contribution, which can be characterised as one of the 'gateways' to the SCM Agreement, along with the concepts of benefit and specificity. To hold that the concept of financial contribution is about the effects, rather than the nature, of a government action would be effectively to write it out of the Agreement, leaving the concepts of benefit and specificity as the sole determinants of the scope of the Agreement."[11]

4. Article 1.1(a)(1)(i): transfer of funds

(a) "Direct transfer of funds"

11. In *Canada – Aircraft Credits and Guarantees*, the parties agreed that some of the programmes at issue were direct transfers of funds within the meaning of Article 1.1(a)(1)(i).[12]

12. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* considered that certain payments made in the form of bonds constituted direct transfers of funds under Article 1.1(a)(1)(i) of the *SCM Agreement*.[13]

13. In *Canada – Aircraft*, the Panel concluded that TPC (Technology Partners Canada) contributions constituted direct transfers of funds by the Government of Canada in the sense of Article 1.1(a)(1)(i).[14]

14. With regard to the granting of subsidies for the purpose of Article 27.4 of the *SCM Agreement*, see paragraphs 353–354 below.

(b) "Potential direct transfers of funds"

15. In *Brazil – Aircraft*, the Panel had found that "a 'potential direct transfer of funds' exists only where the action in question gives rise to a benefit and thus confers a subsidy irrespective of whether any payment occurs", and that "the existence of a 'potential direct transfer of funds' does not depend upon the probability that a payment will subsequently occur".[15] The Appellate Body however considered that the Panel did not have to determine whether the export subsidies at issue constituted a "direct transfer of funds" or a "potential direct transfer of funds", within the meaning of Article 1.1(a)(i), in order to determine when the subsidies are "granted" for the purposes of Article 27.4 and thus this analysis was not relevant.[16]

16. In *Canada – Aircraft Credits and Guarantees*, the parties agreed that the so-called *IQ* equity guarantees were "potential direct transfers of funds" within the meaning of Article 1.1(a)(1)(i).[17]

[16] Appellate Body Report on *Brazil – Aircraft*, para. 157.
[17] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.320.

(c) Timing of the transfer

17. The Panel on *Brazil – Aircraft*, in a finding subsequently not addressed by the Appellate Body, rejected the argument that a subsidy exists only when the transfer of funds has actually been effectuated:

> "[A]ccording to Article 1:1(i) a subsidy exists if a government practice involves a direct transfer of funds or a potential direct transfer of funds and not only when a government actually effectuates such a transfer or potential transfer (otherwise the text of (i) would read: 'a government directly transfers funds . . . or engages in potential direct transfers of funds or liabilities') . . . As soon as there is such a practice, a subsidy exists, and the question whether the practice involves a direct transfer of funds or a potential direct transfer of funds is not relevant to the existence of a subsidy. One or the other is sufficient. If subsidies were deemed to exist only once a direct or potential direct transfer of funds had actually been effectuated, the Agreement would be rendered totally ineffective and even the typical WTO remedy (i.e. the cessation of the violation) would not be possible."[18]

5. Article 1.1(a)(1)(ii): "government revenue otherwise due is foregone or not collected"

(a) General

18. The Appellate Body on *US – FSC (Article 21.5 – EC)*, considered the legal standard for "foregoing revenue" that is "otherwise due" and emphasized certain principles based on the understanding that: (i) "a financial contribution" does not arise simply because a government does not raise revenue which it could have raised; and (ii) the term "otherwise due" implies a comparison with a "defined normative benchmark":

> "[U]nder Article 1.1(a)(1)(ii), a 'financial contribution' does not arise simply because a government does not raise revenue which it could have raised. It is true that, from a *fiscal* perspective, where a government chooses not to tax certain income, no revenue is 'due' on that income. However, although a government might, in a sense, be said to 'forego' revenue in this situation, this alone gives no indication as to whether the revenue foregone was 'otherwise due'. In other words, the mere fact that revenues are not 'due' from a fiscal perspective does not determine that the revenues are or are not 'otherwise due' within the meaning of Article 1.1(a)(1)(ii) of the *SCM Agreement*."[19]

19. The Panel on *US – FSC (Article 21.5 – EC)*, in findings not reviewed by the Appellate Body, considered that the examination whether there is revenue foregone that is "otherwise due" must be based on actual substantive realities and not be restricted to a formalistic approach. Otherwise it would have the effect of reducing paragraph (ii) of Article 1.1(a)(1) of the *SCM Agreement* to "redundancy and inutility":

> "To give due meaning and effect to Article 1.1 of the *SCM Agreement*, our examination as to whether there is revenue foregone that is 'otherwise due' must be based on actual substantive realities and not be restricted to pure formalism.
>
> . . .
>
> [A] government could opt to bestow financial contributions in the form of fiscal incentives simply by modulating the 'outer boundary' of its 'tax jurisdiction' or by manipulating the definition of the tax base to accommodate any 'exclusion' or 'exemption' or 'exception' it desired, so that there could *never* be a foregoing of revenue 'otherwise due'. This would have the effect of reducing paragraph (ii) of Article 1.1(a)(1) of the *SCM Agreement* to 'redundancy and inutility' and cannot be the appropriate implication to draw from the stipulation as to what constitutes one of the enumerated forms of 'financial contribution' under Article 1.1 of the *SCM Agreement*. Furthermore, the consequences of this reasoning would also entirely undermine Article 3.1(a) of the *SCM Agreement*, as there could never be, in this situation, a subsidy contingent upon export in the form of a financial contribution involving a foregoing of revenue that is otherwise due. As such, it is inherently contradictory to what may be viewed as the object and purpose of the *SCM Agreement* in terms of disciplining trade-distorting subsidies in a way that provides legally binding security of expectations to Members. . . . In short, such an approach would eviscerate the subsidies disciplines in the *SCM Agreement*."[20]

(b) "Categories of revenue"

20. The Appellate Body on *US – FSC* referred on several occasions to the concept of "categories of revenue" and indicated that a Member is free not to tax any particular category of revenues:

> "A Member, in principle, has the sovereign authority to tax any particular categories of revenue it wishes. It is also free *not* to tax any particular categories of revenues. But, in both instances, the Member must respect its WTO obligations. What is 'otherwise due', therefore, depends on the rules of taxation that each Member, by its own choice, establishes for itself.
>
> . . .
>
> Members of the WTO are *not* obliged, by WTO rules, to tax *any* categories of income, whether foreign- or domestic-source income."[21]

---

[18] Panel Report on *Brazil – Aircraft*, para. 7.13.
[19] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 88.
[20] Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.37 and 8.39.
[21] Appellate Body Report on *US – FSC*, paras. 90 and 98.

21. Considering the operation of the arm's length principle when a Member chooses whether to tax or not certain categories of revenues, the Appellate Body in *US – FSC* considered:

> "[T]he arm's length principle operates when a Member chooses not to tax, or to tax less, certain categories of foreign-source income. However, the operation of the arm's length principle is unaffected by the choice a Member makes as to *which* categories of foreign-source income, if any, it will not tax, or will tax less. Likewise, the operation of the arm's length principle is unaffected by the choice a Member might make to grant exemptions from the generally applicable rules of taxation of foreign-source income that it has selected for itself. In short, the requirement to use the arm's length principle does not address the issue that arises here, nor does it authorize the type of export contingent tax exemption that we have just described. Thus, this sentence of footnote 59 does not mean that the FSC subsidies are not export subsidies within the meaning of Article 3.1(a) of the *SCM Agreement*."[22]

22. In findings not reviewed by the Appellate Body, the Panel on *US – FSC (Article 21.5 – EC)*, noting that the concept of "categories of revenue" is not actual treaty language, followed the Appellate Body's interpretation in *US – FSC* and rejected the argument that foreign-source income is a "category" of income that may be excluded from taxation consistently with the *SCM Agreement*:

> "We turn now to whether utilization of the term 'category' would in any way alter the nature of our analysis to this point. However, before considering these issues, we first observe that the concept of 'categories' of revenue to which the Appellate Body referred is not actual treaty language. We further note that the Appellate Body also emphasized that, regardless of any 'category' of revenue that may be under consideration, a Member is bound at all times to respect its WTO obligations.
>
> . . .
>
> [E]ven if one applies the term of 'category' to the measure at issue, this linguistic or formal distinction in no way alters the underlying substance of the actual relationship between the measure at issue and the default tax regime as outlined above. Employment of the terminology in no way substantively modifies that relationship. Nor does it introduce any new elements or rationale to the measure at issue that change its essential character."[23]

(c) Members' tax rules as normative benchmark

23. In *US – FSC*, the Appellate Body, interpreting the phrase "foregoing of revenue otherwise due", partly agreed with the Panel's interpretation that the term "otherwise" referred to a "normative benchmark" as established by the tax rules applied by the Member in question. The Appellate Body rejected the use of a benchmark other than the tax rules of the Member in question, holding that to do otherwise would be contrary to a Member's sovereignty of taxation:

> "In our view, the '*foregoing*' of revenue '*otherwise* due' implies that less revenue has been raised by the government than would have been raised in a different situation, or, that is, 'otherwise'. Moreover, the word 'foregone' suggests that the government has given up an entitlement to raise revenue that it could 'otherwise' have raised. This cannot, however, be an entitlement in the abstract, because governments, in theory, could tax *all* revenues. There must, therefore, be some defined, normative benchmark against which a comparison can be made between the revenue actually raised and the revenue that would have been raised 'otherwise'. We, therefore, agree with the Panel that the term 'otherwise due' implies some kind of comparison between the revenues due under the contested measure and revenues that would be due in some other situation. We also agree with the Panel that the basis of comparison must be the tax rules applied by the Member in question. To accept the argument of the United States that the comparator in determining what is 'otherwise due' should be something other than the prevailing domestic standard of the Member in question would be to imply that WTO obligations somehow compel Members to choose a particular kind of tax system; this is not so. A Member, in principle, has the sovereign authority to tax any particular categories of revenue it wishes. It is also free *not* to tax any particular categories of revenues. But, in both instances, the Member must respect its WTO obligations.[24] What is 'otherwise due', therefore, depends on the rules of taxation that each Member, by its own choice, establishes for itself."[25]

24. The Appellate Body on *US – FSC (Article 21.5 – EC)* stated that Article 1.1(a)(1)(ii) does not require panels to identify a "general" rule of taxation and "exceptions" to that "general" rule. Rather, they should compare the domestic fiscal treatment of "legitimately comparable income" to ascertain whether the measure under consideration involves the foregoing of revenue that is "otherwise due". The Appellate Body further

---

[23] Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.32 and 8.41.

[24] (*footnote original*) See Appellate Body Reports on *Japan – Alcoholic Beverages II*, p. 16; and *Chile – Alcoholic Beverages*, paras. 59 and 60.

[25] Appellate Body Report on *US – FSC*, para. 90. In *Canada – Autos*, the Appellate Body applied these same principles to decide "whether government revenue that is otherwise due is foregone". Appellate Body Report on *Canada – Autos*, para. 91.

considered that the comparison ought to be made with respect to taxpayers in "comparable situations":[26]

> "[T]he treaty phrase 'otherwise due' implies a comparison with a 'defined, normative benchmark'. The purpose of this comparison is to distinguish between situations where revenue foregone *is* 'otherwise due' and situations where such revenue is *not* 'otherwise due'. As Members, in principle, have the sovereign authority to determine their own rules of taxation, the comparison under Article 1.1(a)(1)(ii) of the *SCM Agreement* must necessarily be between the rules of taxation contained in the contested measure and other rules of taxation of the Member in question. Such a comparison enables panels and the Appellate Body to reach an objective conclusion, on the basis of the rules of taxation established by a Member, by its own choice, as to whether the contested measure involves the foregoing of revenue that would be due in some other situation or, in the words of the *SCM Agreement*, 'otherwise due'.
>
> In our Report in *US – FSC*, we recognized that it may be difficult to identify the appropriate normative benchmark for comparison under Article 1.1(a)(1)(ii) because domestic rules of taxation are varied and complex. In identifying the appropriate benchmark for comparison, panels must obviously ensure that they identify and examine fiscal situations which it is legitimate to compare. In other words, there must be a rational basis for comparing the fiscal treatment of the income subject to the contested measure and the fiscal treatment of certain other income. In general terms, in this comparison, like will be compared with like. For instance, if the measure at issue involves income earned in sales transactions, it might not be appropriate to compare the treatment of this income with employment income.
>
> As we said earlier, under Article 1.1(a)(1)(ii) of the *SCM Agreement*, the normative benchmark for determining whether revenue foregone is otherwise due must allow a comparison of the fiscal treatment of comparable income, in the hands of taxpayers in similar situations. . . . In other words, our inquiry under Article 1.1(a)(1)(ii) is not simply ended at this stage of analysis because the measure involves an allocation of income between domestic- and foreign-source income. Rather, we must compare the way the United States taxes the portion of the income covered by the measure, which it treats as foreign-source, with the way it taxes other foreign-source income under its own rules of taxation."[27]

(d) "But for" test

25. The Appellate Body on *US – FSC* expressed some reservations about the Panel's "but for" test. The Panel had interpreted the term "otherwise due" as referring to the situation that would prevail "but for" the United States' tax measures under consideration. The Panel held that it would determine whether, absent these measures, there would be a higher tax liability, meaning that it would examine the situation "that would exist but for the measure in question".[28] The Appellate Body noted that this "but for" test established by the Panel was not actual treaty language and cautioned that the test may "not work in other cases":[29]

> "The Panel found that the term 'otherwise due' establishes a 'but for' test, in terms of which the appropriate

[26] Bearing in mind the Appellate Body's findings on the word "foregone", the Panel in *US – FSC (Article 21.5 – EC)* found that the key to determine whether a revenue is otherwise due is to apply critical judgement to the facts of the matter, using the tax rules applied by the Member in question as the "basis". See Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.17–8.19:

> "[O]ne cannot simply assert that revenue is otherwise due in the abstract. It cannot be presumed. The key is to apply critical judgment to the facts of the matter. In so doing, we follow the reasoning of the Appellate Body *viz* that the comparison to be made involves revenues due under the contested measure and those that would be due in some other situation and that the basis of the comparison must be the tax rules applied by the Member in question.
>
> In following this reasoning, we underline that while the inquiry cannot be inherently presumptive or speculative, neither can it be so exacting or confining that it is necessary to attain the level of establishing a mathematical deductive relationship between the contested measure and the default situation. To interpret the *SCM Agreement* in the latter manner would expose a panel to precisely the manifestly absurd consequence referred to in paragraph 8.15 above. The key point is that the tax rules applied by the Member in question are the *basis* for the comparison. Thus, any finding that revenue has been foregone must be securely grounded on that foundation.
>
> That, in our view, provides a sound basis for exercising reasonable judgment as to whether or not a defending Member's assertion that no revenue was due in the first place is, in fact, valid or whether the contested measure in effect masks the substance of what is actually the foregoing of revenue that is otherwise due."

[27] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 89–90 and 98.

[28] Panel Report on *US – FSC*, para. 7.45.

[29] The Appellate Body on *US – FSC (Article 21.5 – EC)* reiterated its reservations on the "but for test". See Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 91–92:

> "In identifying the normative benchmark, there may be situations where the measure at issue might be described as an 'exception' to a 'general' rule of taxation. In such situations, it may be possible to apply a 'but for' test to examine the fiscal treatment of income absent the contested measure. We do not, however, consider that Article 1.1(a)(1)(ii) always *requires* panels to identify, with respect to any particular income, the 'general' rule of taxation prevailing in a Member. Given the variety and complexity of domestic tax systems, it will usually be very difficult to isolate a 'general' rule of taxation and 'exceptions' to that 'general' rule. Instead, we believe that panels should seek to compare the fiscal treatment of legitimately comparable income to determine whether the contested measure involves the foregoing of revenue which is 'otherwise due', in relation to the income in question.
>
> In addition, it is important to ensure that the examination under Article 1.1(a)(1)(ii) involves a comparison of the fiscal treatment of the relevant income for taxpayers in comparable situations. For instance, if the measure at issue is concerned with the taxation of foreign-source income in the hands of a domestic corporation, it might not be appropriate to compare the measure with the fiscal treatment of such income in the hands of a foreign corporation."

basis of comparison for determining whether revenues are 'otherwise due' is 'the situation that would prevail but for the measures in question'.[30] In the present case, this legal standard provides a sound basis for comparison because it is not difficult to establish in what way the foreign-source income of an FSC would be taxed 'but for' the contested measure. However, we have certain abiding reservations about applying any legal standard, such as this 'but for' test, in the place of the actual treaty language. Moreover, we would have particular misgivings about using a 'but for' test if its application were limited to situations where there actually existed an alternative measure, under which the revenues in question would be taxed, absent the contested measure. It would, we believe, not be difficult to circumvent such a test by designing a tax regime under which there would be *no* general rule that applied formally to the revenues in question, absent the contested measures. We observe, therefore, that, although the Panel's 'but for' test works in this case, it may not work in other cases. We note, however, that, in this dispute, the European Communities does not contest either the Panel's interpretation of the term 'otherwise due' or the Panel's application of that term to the facts of this case. The United States also accepts the Panel's interpretation of that term as a general proposition."[31]

(e) Tax exclusion of extraterritorial income as revenue foregone

26. The Panel on *US – FSC (Article 21.5 – EC)* considered, in a finding upheld by the Appellate Body,[32] whether the exclusion of extraterritorial income constitutes the foregoing of revenue. The Panel considered that income provided by the United States regulations at issue through the tax "exclusion" of the United States foregoes revenue that is otherwise due within the meaning of Article 1.1(a)(1)(ii), and therefore a "financial contribution" exists. The Panel indicated that in order to assess the nature of the relationship between the measure at issue and the party's overall tax regime, it had looked at the "essential shape and the rationale that is exhibited":

> "For instance – and without prejudice to what the status of such a measure might be under the *SCM Agreement* – the Act manifestly does not represent a coherent approach to corporate earnings derived from offshore activities only. The conditionality is such that the eligibility is, in fact, circumscribed carefully to render it only effective, for example, with respect to goods, only with respect to *certain* goods – i.e. *certain* 'qualifying foreign trade property' – produced within or outside the United States, where those goods are for 'use outside the United States' and where those goods fulfill the foreign articles/labor limitation included in the definition of qualifying foreign trade property. In short, one is left with the perspective simply of certain carve-outs being provided for in relation to what would otherwise be the prevailing regime of revenue liability in respect of the income concerned.
>
> We add that while, in our view, the terms of the *SCM Agreement* are clear enough, their application to the facts of the multiplicity of Members' regimes will not necessarily be self-evident. Indeed, discerning what might be described as "the prevailing domestic standard" for a particular tax regime may be a particularly exacting exercise. In more common usage, it might be rather difficult to discern what is the exception, as it were, and what is the rule. But the terms of the *SCM Agreement* are clearly of general application: there is nothing which states that they are only to be applied when the results are self-evident. Be that as it may, we are not, in this dispute, presented with a situation of such complexity. This dispute does not involve a debatable call as to whether the glass is half-full or half-empty. As outlined above, we have looked at the essential shape and the rationale that is exhibited. In examining that, we have weighed such considerations as the degree of conditionality, the range of limitations and the manner in which the measure at issue relates to the overall regime. Taken together, they enable us to assess the nature of the relationship of the measure at issue and the overall regime. That is precisely how one is in a position to arrive at the judgment required by the terms of the *SCM Agreement*.
>
> In light of these considerations, we are of the view that, through the tax 'exclusion' provided by the Act, the United States government foregoes revenue that is otherwise due within the meaning of Article 1.1(a)(1)(ii). In our view, a 'financial contribution' thereby arises within the meaning of Article 1.1 *SCM Agreement*."[33]

(f) Footnote 1 to Article 1.1(a)(1)(ii)

27. The measure at issue in *Canada – Autos* consisted of the exemption of import duties for motor vehicles imported into Canada by Canadian car manufacturers who fulfilled certain conditions. The Appellate Body rejected the argument that the Canadian measure was "'analogous' to the situation described in footnote 1".[34] The Appellate Body stated: "Footnote 1 . . . deals with duty and tax exemptions or remissions for *exported* products. The measure at issue applies, in contrast, to *imports*. . . . For this reason, we do not consider that footnote 1 bears upon the import duty exemption at issue in this case."[35]

---

[30] (*footnote original*) Panel Report on *US – FSC*, para. 7.45.
[31] Appellate Body Report on *US – FSC*, para. 91.
[32] The Appellate Body upheld the Panel' s findings at issue although under a different focus partly because, on appeal, the thrust of the United States' arguments had been directed towards the role of the measure in allocating income as either domestic- or foreign-source. See Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 106.
[33] Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.28–8.30.
[34] Appellate Body Report on *Canada – Autos*, para. 92.
[35] Appellate Body Report on *Canada – Autos*, para. 92.

6. Article 1.1(a)(1)(iii): government provision of goods or services

(a) General

28. In *US – Softwood Lumber IV*, the Appellate Body, after noting that "[a]n evaluation of the existence of a financial contribution involves consideration of the nature of the transaction through which something of economic value is transferred by a government",[36] explained that this provision foresees two types of transaction, and made the following general remarks on the scope of Article 1(a)(1)(iii) in this regard:

> "As such, the Article contemplates two distinct types of transaction. The first is where a government provides goods or services other than general infrastructure. Such transactions have the potential to lower artificially the cost of producing a product by providing, to an enterprise, inputs having a financial value. The second type of transaction falling within Article 1.1(a)(1)(iii) is where a government purchases goods from an enterprise. This type of transaction has the potential to increase artificially the revenues gained from selling the product."[37]

(b) "provides"

29. In *US – Softwood Lumber III*, the Panel addressed the issue of whether a government that allows the exercise of harvesting rights to a company is actually providing goods within the meaning of Article 1.1(a)(1)(iii). The Panel considered that when a government does allow this, it is "providing" timber to the harvesting companies. For the Panel, "from the tenure holder's point of view, there is no difference between receiving from the government the right to harvest standing timber and the actual supply by the government of standing timber through the tenure holder's exercise of this right".[38] The Panel stated:

> "In sum, and in the context of Article 1.1(a) (1)(iii) SCM Agreement, we are of the view that where a government allows the exercise of harvesting rights, it is providing standing timber to the harvesting companies. From the perspective of the harvesting company the situation is clear: most forest land is Crown land, and if the company wants to cut the trees for processing or sale, it will need to enter into a stumpage contract with the provincial government, under which it will have to take on a number of obligations in addition to paying a stumpage fee for the trees actually harvested. We thus view the service and maintenance obligations, the obligations to undertake various forestry management, conservation and other measures, combined with the stumpage fees required by the stumpage agreements, as the price the tenure holder has to pay for obtaining and exercising its harvesting rights."[39]

(c) "goods"

(i) Concept of "goods"

30. The Panel on *US – Softwood Lumber III*, addressing the issue whether standing timber is a "good" in the sense of Article 1.1(a)(1)(iii), concluded that it was after considering the ordinary meaning of the term "goods" in its context and in the light of the object and purpose of the provision at issue. For this purpose, the Panel at the outset referred to several dictionary definitions and opined that "[t]he ordinary meaning of the word 'goods' is ... very broad and in and of itself does not seem to place any limits on the kinds of 'tangible or movable personal property, other than money' that could be considered a 'good'".[40]

31. The Panel on *US – Softwood Lumber III* drew further support for its conclusions from the context in which the term "goods" is used in Article 1.1(a)(1)(iii):

> "In Article 1.1(a)(1)(iii) SCM Agreement, 'goods' is used in the context of 'goods or services other than general infrastructure'. We consider that the context in which the term 'goods' is used in Article 1.1(a)(1)(iii) SCM Agreement confirms the broad ordinary meaning of 'goods' as tangible or movable personal property, other than money. In our view, the sentence 'goods or services other than general infrastructure' refers to a very broad spectrum of things a government may provide. The fact that the only exception provided for in subparagraph (iii) is general infrastructure reinforces our view concerning the unqualified meaning of the term goods as used in this provision."[41]

32. The Panel on *US – Softwood Lumber III* further considered that the word "goods" in the context of "goods or services" is intended to ensure that the term "financial contribution" is not interpreted to mean only a money-transferring action, but encompasses as well an in-kind transfer of resources, with the exception of general infrastructure.[42]

33. In addition, the Panel on *US – Softwood Lumber III* rejected the argument that "goods" are limited to products with an actual or potential tariff line:

> "[A]lthough in many cases the general word 'good' may indeed be used as an equivalent of the term 'products', this does not imply that this necessarily is always so, precisely because 'goods' is a term with a broad and general meaning . . . Although 'goods' in Article 1.1(a)(1)(iii) SCM Agreement certainly includes tradable products,

[36] Appellate Body Report on *US – Softwood Lumber IV*, para. 52.
[37] Appellate Body Report on *US – Softwood Lumber IV*, para. 53.
[38] Panel Report on *US – Softwood Lumber III*, para. 7.16.
[39] Panel Report on *US – Softwood Lumber III*, para. 7.18.
[40] Panel Report on *US – Softwood Lumber III*, para. 7.22.
[41] Panel Report on *US – Softwood Lumber III*, para. 7.23.
[42] Panel Report on *US – Softwood Lumber III*, para. 7.24.

there is no reason to limit its meaning to only such products, particularly where the immediate context in which the term is used does not suggest such a limitation. In particular, this provision states that when the government provides 'goods or services', this constitutes a financial contribution. The 'goods' in question are not imported or exported, simply provided by the government, and nothing suggests therefore that the goods in question need to be tradeable products with a potential or actual tariff line. Goods in this context are distinguished from services, and in our view the two cover the full spectrum of in-kind transfers the government may undertake by providing resources to an enterprise. Our view is reinforced by the fact that there is only one exception among all possible goods and services that could be provided by the government – general infrastructure – which is explicitly defined as not constituting a financial contribution. We thus find that there is no basis in the text of the SCM Agreement to conclude that 'goods' in Article 1.1 is limited to products with an actual or potential tariff line."[43]

(ii) Exception

34. Following a similar approach, the Panel and the Appellate Body on *US – Softwood Lumber IV* reached the same conclusion that standing timber is a "good" in the sense of Article 1.1(a)(1)(iii). In doing so, the Appellate Body agreed with the Panel that "the ordinary meaning of the term 'goods', as used in Article 1.1(a)(1)(iii), includes items that are tangible and capable of being possessed", although it cautioned about the usage of dictionary definitions of a term:

"We note, however, as we have done on previous occasions, that dictionary definitions have their limitations in revealing the ordinary meaning of a term. This is especially true where the meanings of terms used in the different authentic texts of the *WTO Agreement* are susceptible to differences in scope. . . . As we have observed previously, in accordance with the customary rule of treaty interpretation reflected in Article 33(3) of the *Vienna Convention on the Law of Treaties* (the '*Vienna Convention*'), the terms of a treaty authenticated in more than one language – like the *WTO Agreement* – are presumed to have the same meaning in each authentic text. It follows that the treaty interpreter should seek the meaning that gives effect, simultaneously, to all the terms of the treaty, as they are used in each authentic language. With this in mind, we find that the ordinary meaning of the term "goods" in the English version of Article 1.1(a)(1)(iii) of the *SCM Agreement* should not be read so as to exclude tangible items of property, like trees, that are severable from land."[44]

35. In the same vein, the Panel on *US – Softwood Lumber III*, rejecting Canada's argument, considered that the text of the *SCM Agreement* provides no exception for "*harvesting right*s" mentioned in a working paper from the Uruguay Round negotiations, which, in the Panel's view, at any rate, "has little if any probative value":[45]

"Canada argues that rights to exploit *in situ* natural resources are not covered by Article 1.1(a)(1)(iii) SCM Agreement. Canada can not point to any provision in particular in the Agreement in support of this view, but instead reaches this conclusion on the basis of a working paper from the time of the Uruguay Round negotiations which explicitly mentioned *harvesting rights* separately from goods or services.

We note that the text of the SCM Agreement does not in any way provide an exception for the right to exploit natural resources. The only exception from the term 'goods or services' provided for in Article 1.1(a)(1)(iii) SCM Agreement is general infrastructure, not natural resources."[46]

36. The Appellate Body on *US – Softwood Lumber IV* further agreed with the Panel that the context of the term "goods" supports this interpretation and emphasized that "[i]n the context of Article 1.1(a)(1)(iii), all goods that might be used by an enterprise to its benefit – including even goods that might be considered *infrastructure* – are to be considered "goods" within the meaning of the provision, unless they are infrastructure of a *general* nature".[47]

7. Article 1.1(a)(1)(iv): funding mechanism, private bodies

(a) Purpose of Article 1.1(a)(1)(iv)

37. The Panel on *US – Export Restraints* considered that the purpose of subparagraph (iv) of Article 1.1(a)(i) to the *SCM Agreement* is to avoid circumvention of subparagraphs (i)–(iii) of the same Article by a government operating through a private body:

"[W]e find no support in the text of the Agreement for the US reading of the word 'type'. Rather, in our view, the phrase 'type of functions' refers to the physical functions identified in subparagraphs (i)–(iii). In this regard, we believe that the intention of subparagraph (iv) is to avoid circumvention of subparagraphs (i)–(iii) by a government simply by acting through a private body. Thus, ultimately, the scope of the actions (the physical functions) covered by subparagraph (iv) must be the same as those covered by subparagraphs (i)–(iii). That is, the difference between subparagraphs (i)–(iii) on the one hand, and subparagraph (iv) on the other, has to do with the identity of the *actor*, and not with the nature of the *action*. The phrase 'type of functions' ensures that this is

[43] Panel Report on *US – Softwood Lumber III*, para. 7.28.
[44] Appellate Body Report on *US – Softwood Lumber IV*, para. 59.
[45] Panel Report on *US – Softwood Lumber III*, para. 7.26.
[46] Panel Report on *US – Softwood Lumber III*, paras. 7.25–7.26.
[47] Appellate Body Report on *US – Softwood Lumber IV*, para. 60.

the case, that is, that Article 1 covers the types of functions identified in subparagraphs (i)–(iii) whether those functions are performed by the government itself or are delegated to a private body by the government."[48]

(b) Requirement for the existence of a financial contribution under Article 1.1(a)(1)(iv)

38. In *US – Export Restraints*, the Panel examined the text and context of Article 1.1(a)(1)(iv) and noted that it contains five requirements in order for a financial contribution to exist:

> "The definition of financial contribution in Article 1.1(a)(1)(iv)contains five requirements:
>
> (i) a government 'entrusts or directs'
>
> (ii) 'a private body'
>
> (iii) 'to carry out one or more of the type of functions illustrated in' subparagraphs (i)–(iii) of Article 1.1(a)(1) (in this case the provision of goods)
>
> (iv) 'which would normally be vested in the government' and
>
> (v) 'the practice, in no real sense, differs from practices normally followed by governments'[49]

(i) Government-entrusted or government-directed provision of goods

39. The Panel on *US – Export Restraints* addressed the issue of whether an export restraint could constitute a financial contribution in the sense of Article 1.1(a)(1)(iv). In considering whether export restraints involve government "entrustment" or "direction", the Panel stated that this requirement refers "to the situation in which the government executes a particular policy by operating through a private body". Following dictionary definitions of these terms, the Panel stated that the action taken by the government must contemplate the concept of "delegation", and must include three separate elements: (i) "an explicit and affirmative action, be it delegation or command"; (ii) "addressed to a particular party"; and (iii) "the objective of which is a particular task or duty". The Panel concluded that "an export restraint as defined in this dispute cannot constitute government-entrusted or government-directed provision of goods in the sense of subparagraph (iv) and hence does not constitute a financial contribution in the sense of Article 1.1(a) of the SCM Agreement."[50]

> "In our view, the requirement of 'entrustment' or 'direction' in subparagraph (iv) refers to the situation in which the government executes a particular policy by operating through a private body.
>
> It follows from the ordinary meanings of the two words 'entrust' and 'direct' that the action of the government must contain a notion of delegation (in the case of entrustment) or command (in the case of direction). To our minds, both the act of entrusting and that of directing therefore necessarily carry with them the following three elements: (i) an explicit and affirmative action, be it delegation or command; (ii) addressed to a particular party; and (iii) the object of which action is a particular task or duty. In other words, the ordinary meanings of the verbs 'entrust' and 'direct' comprise these elements – *something* is necessarily delegated, and it is necessarily delegated *to someone*; and, by the same token, *someone* is necessarily commanded, and he is necessarily commanded *to do something*. We therefore do not believe that either entrustment or direction could be said to have occurred until all of these three elements are present.
>
> Having said that, it is clearly the first element – an explicit and affirmative action of delegation or command – that is determinative. The second and third elements – addressed to a particular party and of a particular task – are *aspects* of the first."[51]

40. The Panel on *US – Export Restraints* concluded that the meaning of the words "entrusts" and "directs" requires an "explicit and affirmative action of delegation or command", and that an export restraint in the sense that the term is used in this dispute cannot fulfil the "entrusts or directs" standard of subparagraph (iv) of Article 1.1(a)(1) of the *SCM Agreement*. The Panel stated:

> "[T]he ordinary meanings of the words 'entrusts' and 'directs' require an explicit and affirmative action of delegation or command. Moreover, we find that the 'effects' test (i.e., a proximate causal relationship) advanced by the United States as the definition of 'entrusts or directs' has implications which in our view would be contrary to the intended scope and coverage of the SCM Agreement, in that it would effectively read out of the text of Article 1 the financial contribution requirement. Thus, we find that an export restraint in the sense that the term is used in this dispute cannot satisfy the 'entrusts or directs' standard of subparagraph (iv)."[52]

(ii) "Private body"

41. As to the requirement that there be a "private body" that is "entrusted or directed", the Panel on *US – Export Restraints* stated that the term "private body" is used in Article 1.1(a)(1)(iv) as a counterpoint to the terms "government" or "any public body" as used in Article 1.1. The Panel concluded that the companies or other entities affected by or reacting to an export restraint could be "private bodies" in this sense. The Panel stated:

---

[48] Panel Report on *US – Exports Restraints*, para. 8.53.
[49] Panel Report on *US – Exports Restraints*, para. 8.25.
[50] Panel Report on *US – Exports Restraints*, para. 8.75.
[51] Panel Report on *US – Exports Restraints*, paras. 8.28–8.30.
[52] Panel Report on *US – Exports Restraints*, para. 8.44.

"We believe that the term 'private body' is used in Article 1.1(a)(1)(iv) as a counterpoint to 'government' or 'any public body' as the actor. That is, any entity that is neither a government nor a public body would be a private body. Under this reading of the term 'private body', there is no room for circumvention in subparagraph (iv). As it is a government or a public body that would have to entrust or direct under subparagraph (iv), any entity other than a government or a public body could receive the entrustment or direction and could constitute a 'private body'."[53]

(iii) "Type of functions"

42. The Panel on *US – Export Restraints* took the view that the scope of the functions covered by subparagraph (iv) is the same as those in subparagraphs (i) to (iii). In the Panel's view, the differences between subparagraphs (i) to (iii) and (iv) have to do with the identity of the actions:

"In this regard, we believe that the intention of subparagraph (iv) is to avoid circumvention of subparagraphs (i)–(iii) by a government simply by acting through a private body. Thus, ultimately, the scope of the actions (the physical functions) covered by subparagraph (iv) must be the same as those covered by subparagraphs (i)–(iii). That is, the difference between subparagraphs (i)–(iii) on the one hand, and subparagraph (iv) on the other, has to do with the identity of the *actor*, and not with the nature of the *action*. The phrase 'type of functions' ensures that this is the case, that is, that Article 1 covers the types of functions identified in subparagraphs (i)–(iii) whether those functions are performed by the government itself or are delegated to a private body by the government."[54]

43. With regard to the word "type", the Panel on *US – Export Restraints* further clarified that this word refers to the fact that each subparagraph (i)–(iii) constitutes by itself a general "type of functions" encompassing one or more categories of behaviour:

"The subsequent phrase 'illustrated in (i) to (iii) above' confirms this. In particular, subparagraphs (i)–(iii) each refer to *multiple* government actions and provide examples thereof. Subparagraph (i), for instance, refers to three general categories (direct transfers of funds; potential direct transfers of funds; and potential direct transfers of liabilities) of the 'type of function' of transfers of funds and liabilities.

We therefore find that the phrase 'type of functions' refers to the physical functions encompassed by subparagraphs (i)–(iii), and does not expand the scope of subparagraph (iv) beyond these, to encompass other kinds of 'government mechanisms'."[55]

(c) Relationship with Article 1.1(b)

44. With respect to the relationship with Article 1.1(b), see paragraph 15 above ("potential direct transfer of funds") and paragraphs 46 and 72 below ("ordinary meaning of 'benefit'").

8. Article 1.1(b): "benefit is thereby conferred"

(a) "benefit"

45. In *Canada – Aircraft*, the Appellate Body quoted approvingly the Panel's focus on the recipient of the subsidy in its interpretation of the term "benefit" under Article 1.1(b):[56]

"[T]he ordinary meaning of 'benefit' clearly encompasses some form of advantage. . . . In order to determine whether a financial contribution (in the sense of Article 1.1(a)(i)) confers a 'benefit', *i.e.*, an advantage, it is necessary to determine whether the financial contribution places the recipient in a more advantageous position than would have been the case but for the financial contribution. In our view, the only logical basis for determining the position the recipient would have been in absent the financial contribution is the market. Accordingly, a financial contribution will only confer a 'benefit', *i.e.*, an advantage, if it is provided on terms that are more advantageous than those that would have been available to the recipient on the market."[57]

46. The Appellate Body on *Canada – Aircraft* agreed with the Panel's findings rejecting an interpretation of benefit based on whether there was a "net cost" to the government and focusing rather on the recipient of the subsidy. The Panel added that interpreting the term "benefit" with a view to the granting government – rather than with a view to the recipient – was not consistent with the object and purpose of the *SCM Agreement*.[58] In so doing, it first considered the dictionary meaning of the term "benefit":

---

[53] Panel Report on *US – Exports Restraints*, para. 8.49.
[54] Panel Report on *US – Exports Restraints*, para. 8.53.
[55] Panel Report on *US – Exports Restraints*, paras. 8.54–8.55.
[56] Appellate Body Report on *Canada – Aircraft*, para. 161.
[57] Appellate Body Report on *Canada – Aircraft*, para. 149.
[58] Panel Report on *Canada – Aircraft*, paras. 9.119 – (referring to Canada's first submission) – and 9.120:

"[W]e note that the SCM Agreement does not contain any express statement of its object and purpose. We therefore consider it unwise to attach undue importance to arguments concerning the object and purpose of the SCM Agreement. In our view, however, the avoidance of net cost to government is not the object and purpose of the multilateral disciplines contained in the SCM Agreement. Rather, . . . we consider that the object and purpose of the SCM Agreement could more appropriately be summarised as the establishment of multilateral disciplines 'on the premise that some forms of government intervention distort international trade, [or] have the potential to distort [international trade]'.

[L]eaving aside situations of alleged 'income or price supports' within the meaning of Article 1.1(a)(2), we consider that a 'financial contribution' by a government or public body confers a 'benefit', and therefore constitutes a 'subsidy' within the meaning of Article 1 of the SCM Agreement, when it confers an advantage on the recipient relative to applicable commercial benchmarks, *i.e.*, when it is provided on terms that are more advantageous than those that would be available to the recipient on the market."

"The dictionary meaning of 'benefit' is 'advantage', 'good', 'gift', 'profit', or, more generally, 'a favourable or helpful factor or circumstance'. Each of these alternative words or phrases gives flavour to the term 'benefit' and helps to convey some of the essence of that term. These definitions also confirm that the Panel correctly stated that 'the ordinary meaning of "benefit" clearly encompasses some form of advantage.' Clearly, however, dictionary meanings leave many interpretive questions open."[59]

47. The Appellate Body on *Canada – Aircraft* then confirmed the Panel's focus on the recipient of a subsidy in determining the existence of a benefit:

"A 'benefit' does not exist in the abstract, but must be received and enjoyed by a beneficiary or a recipient. Logically, a 'benefit' can be said to arise only if a person, natural or legal, or a group of persons, has in fact received something. The term 'benefit', therefore, implies that there must be a recipient. This provides textual support for the view that the focus of the inquiry under Article 1.1(b) of the *SCM Agreement* should be on the recipient and not on the granting authority. The ordinary meaning of the word 'confer', as used in Article 1.1(b), bears this out. 'Confer' means, *inter alia*, 'give', 'grant' or 'bestow'. The use of the past participle 'conferred' in the passive form, in conjunction with the word 'thereby', naturally calls for an inquiry into *what was conferred on the recipient*. Accordingly, we believe that Canada's argument that 'cost to government' is one way of conceiving of 'benefit' is at odds with the ordinary meaning of Article 1.1(b), which focuses on the *recipient* and not on the *government* providing the 'financial contribution'."[60]

48. The Appellate Body on *Canada – Aircraft* finally held that a determination whether a benefit exists for the recipient of a subsidy implies a comparison with market conditions:

"We also believe that the word 'benefit', as used in Article 1.1(b), implies some kind of comparison. This must be so, for there can be no 'benefit' to the recipient unless the 'financial contribution' makes the recipient 'better off' than it would otherwise have been, absent that contribution. In our view, the marketplace provides an appropriate basis for comparison in determining whether a 'benefit' has been 'conferred', because the trade-distorting potential of a 'financial contribution' can be identified by determining whether the recipient has received a 'financial contribution' on terms more favourable than those available to the recipient in the market."[61]

49. The Panel on *US – Lead and Bismuth II*, in its interpretation of the term "benefit" – subsequently upheld by the Appellate Body[62] – considered that the existence or lack of benefits rests on whether the potential recipient or beneficiary has received a financial contribution on more favourable terms. The Panel further indicated that consideration should also be given to Articles VI:3 of the *GATT 1994* and footnote 36 to Article 10 of the *SCM Agreement*:

"[T]he existence or non-existence of 'benefit' rests on whether the potential recipient or beneficiary, which 'logically' must be a legal or natural person, or group of persons, has received a 'financial contribution' on terms more favourable than those available to the potential recipient or beneficiary in the market. Moreover, in the particular context of countervailing duties, we believe that consideration should also be given to Article VI:3 of the GATT 1994, and footnote 36 to Article 10 of the SCM Agreement.

Article VI:3 of the GATT 1994 provides in relevant part:

'The term "countervailing duty" shall be understood to mean a special duty levied for the purpose of offsetting any bounty or subsidy bestowed, directly, or indirectly, upon the manufacture, production or export of any merchandise.'

Footnote 36 to Article 10 of the SCM Agreement provides that:

'The term "countervailing duty" shall be understood to mean a special duty levied for the purpose of offsetting any subsidy bestowed directly or indirectly upon the manufacture, production or export of any merchandise, as provided for in paragraph 3 of Article VI of GATT 1994.'

These provisions state that countervailing duties levied on imported products are intended to offset (countervailable) subsidies found to have been bestowed on *inter alia* the production of such imported products. The notion of 'subsidy' comprises two elements: (1) 'financial contribution', and (2) 'benefit'. As noted above, 'benefit' is determined by reference to the terms on which a 'financial contribution' would have been made available to a particular legal or natural person, or group of persons, in the market. Full consideration of Article VI:3 of the GATT 1994 and footnote 36 to Article 10 of the SCM Agreement leads us to conclude that, in the context of countervailing duty investigations, the existence of a 'benefit' should be determined by reference to the market terms on which a 'financial contribution' bestowed directly or indirectly upon the production of any merchandise would have been made available to the producer of that merchandise."[63]

[63] Panel Report on *US – Lead and Bismuth II*, paras. 6.66–6.69.

50. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel noted that under the programme at issue the borrower is free to select the lender that offers the best terms, and that payments under the programme allow that lender to offer better export credit terms than it could otherwise provide. As a result, the Panel concluded that from a theoretical standpoint, such payments may be expected to enable purchasers to obtain export credits on terms more favourable than those available to them in the commercial market, and thus may confer a benefit:

> "[T]hat the borrower is free to select the lender, whether Brazilian or otherwise, that offers him the best terms, and that PROEX III payments allow that lender to offer better export credit terms than he could otherwise provide . . .
>
> . . .
>
> We recognise the theoretical possibility that a *particular* purchaser of Brazilian regional aircraft might be able to obtain export credit financing at (or even below) CIRR rates in the commercial marketplace. Even if, as a result, PROEX III did not *always* confer a benefit on the buyer of Brazilian regional aircraft, it is important to bear in mind that this Panel's task is to review the PROEX III programme as such (insofar as it relates to exports of regional aircraft), not just specific situations which may arise under it. We are concerned, in this case, with *all* situations in which PROEX III may reasonably be expected to be involved. Thus, to the extent that PROEX III required Brazil, in *some* situations, to make PROEX III payments that *would* result in a benefit being conferred in respect of regional aircraft, the PROEX III programme would be mandatory legislation (in respect of the conferral of a benefit) and thus a subsidy potentially inconsistent with the *SCM Agreement*."[64]

51. The Panel on *Canada – Aircraft Credits and Guarantees* considered whether the repayment terms and interest rate spread offered by the programme under consideration conferred a "benefit" and rejected Brazil's argument that a repayment term of more than ten years is in itself positive evidence of a "benefit" within the meaning of Article 1.1(b) of the *SCM Agreement*. The Panel considered evidence demonstrating that repayment terms of up to 18.25 years were available in the market. Thus, for the Panel, the fact that a given repayment term may exceed the ten-year term provided for in the regulation under consideration does not mean *ipso facto* that financing is provided on terms more favourable than those available to the recipient on the market.[65]

(b) "recipient of a benefit"

52. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel considered that, although the text of Article 1.1(b) does not define which participant in a subsidized transaction is a recipient of a benefit, that in itself does not mean that a benefit can be found to be provided to *any* participant to a transaction that receives a financial contribution:[66]

> "In considering whether PROEX III payments confer a benefit, the Panel notes that the financial contribution in this case is in the form of a (non-refundable) payment, rather than in the form of a loan. As a usual matter, of course, a non-refundable payment will confer a benefit. Thus, there would be no need for complex benefit analysis if PROEX III payments were made directly to producers or to purchasers of Brazilian regional aircraft. In this case, however, the payment is not provided to a producer of regional aircraft. Rather, PROEX III payments are provided *to a lender* in support of an export credit transaction relating to Brazilian regional aircraft. Thus, while there can be no doubt that PROEX III payments confer a benefit, we consider that the question remains whether PROEX III payments confer a benefit to *producers of regional aircraft*.
>
> . . . whether the financial contribution has conferred a benefit to producers of regional aircraft – as opposed merely to a benefit to suppliers of financial services – depends upon the impact of PROEX III payments on the terms and conditions of the export credit financing available to purchasers of Brazilian regional aircraft."[67]

53. In *Canada – Aircraft Credits and Guarantees*, the Panel considered whether a "benefit" is conferred on a company by virtue of a "benefit" being conferred on the *customer* purchasing the product of such company:

> "In examining Brazil's claims in this case, we shall consider whether or not a 'benefit' is conferred on Bombardier by virtue of a 'benefit' being conferred on the airline customer purchasing Bombardier aircraft. . . . In our view, the fact that Bombardier may arrange financing in the form of government support does not necessarily confer a "benefit" simply because Bombardier is 'reliev[ed] . . . of the necessity of providing or arranging its own financing'. If that were the case, a 'benefit' would be conferred whenever Bombardier arranged external financing – even through commercial banks – since any external financing would 'reliev[e] it of the necessity of providing or arranging its own financing'. We find it difficult to accept that the existence of 'benefit' (in the context of financing) is determined on the basis of whether or not Bombardier provides internal or external financing. The existence of 'benefit' (in the

[66] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 4.4.
[67] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.27–5.28.

context of financing) is determined by reference to the terms at which similar financing is available to the airline customer in the market."[68]

(c) "is . . . conferred"

(i) General

54. In *US – Lead and Bismuth II*, the United States argued that the present tense of the verb "is conferred" in Article 1.1 of the *SCM Agreement* shows that an investigating authority must demonstrate the existence of "benefit" only at the time the "financial contribution" was made.[69] The consequence of this argument was that an investigating authority would not be required to make a finding of benefit in a (subsequent) *review* of the countervailing measure. The Appellate Body on *US – Lead and Bismuth II* rejected this, holding that "Article 1.1 does not address the *time* at which the 'financial contribution' and/or the 'benefit' must be shown to exist."[70]

55. As regards the timing of the transfer of goods, see paragraph 17 above.

(ii) Mandatory/discretionary conferral of a benefit

Challenging subsidy programmes "as such"

Relevance of the mandatory/discretionary distinction

56. In *Canada – Aircraft Credits and Guarantees*, Brazil claimed that certain Canadian programmes were "as such" prohibited export subsidies contrary to Article 3.1(a) of the *SCM Agreement*. The Panel considered that, as Brazil's claims regarded programmes as such, the mandatory/discretionary distinction[71] "would traditionally apply", i.e., that only legislation that *requires* a violation of GATT/WTO rules could be found to be inconsistent with those rules:

> "We recall that Brazil claims that the EDC Canada and Corporate Accounts and *IQ* are 'as such' prohibited export subsidies contrary to Article 3.1(a) of the SCM Agreement. Given that Brazil's claims are in respect of the programmes as such, the mandatory/discretionary distinction would traditionally apply. Under that distinction – employed in both GATT and WTO cases over the years[72] – only legislation that requires a violation of GATT/WTO rules could be found to be inconsistent with those rules.
>
> In this regard, we recall that the panel in *United States – Export Restraints* stated:
>
> > There is a considerable body of dispute settlement practice under both GATT and WTO standing for the principle that only legislation that *mandates* a violation of GATT/WTO obligations can be found as such to be inconsistent with those obligations. This principle was recently noted and applied by the Appellate Body in *United States – Anti-Dumping Act of 1916* ('*1916 Act*'):
> >
> > [T]he concept of mandatory as distinguished from discretionary legislation was developed by a number of GATT panels as a threshold consideration in determining when legislation as such – rather than a specific application of that legislation – was inconsistent with a Contracting Party's *GATT 1947* obligations.
> >
> > . . .
> >
> > [P]anels developed the concept that mandatory and discretionary legislation should be distinguished from each other, reasoning that only legislation that mandates a violation of GATT obligations can be found as such to be inconsistent with those obligations.[73]"[74]

[71] As regards the mandatory/discretionary distinction, see Section VI.B.3(c)(ii) of the Chapter on the *DSU*. As regards the mandatory/discretionary distinction in the context of an affirmative defence under paragraph 2 of item (K) of the Illustrative List of Export Subsidies, see paras. 478–479 below.

[72] (*footnote original*) *See United States – Anti-Dumping Act of 1916*, Report of the Panel, WT/DS136/R-WT/DS162/R, and Report of the Appellate Body, WT/DS136/AB/R-WT/DS162/AB/R, adopted 26 September 2000, *United States – Measures Affecting the Importation, Internal Sale, and Use of Tobacco*, Report of the Panel, BISD 41S/131, adopted 4 October 1994, *Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes*, Report of the Panel, BISD 37S/200, adopted 7 November 1990, *European Economic Community – Regulation on Imports of Parts and Components*, Report of the Panel, BISD 37S/132, adopted 16 May 1990, *United States – Taxes on Petroleum and Certain Imported Substances (Superfund)*, Report of the Panel, BISD 34S/136, adopted 17 June 1987.

We also note the statement of the Appellate Body in *US – Hot-Rolled Steel* that "[t]he captive production provision does not, by itself, *require* an exclusive focus on the merchant market, nor does it *compel* a selective approach to the analysis of the merchant market that *excludes* an equivalent examination of the captive market. The provision also does not itself *mandate* that particular weight be accorded to data pertaining to the merchant market. Rather, as explained above, the provision allows the USITC to examine the merchant market *and* the captive market, with the same degree of care and attention, as part of a broader examination of the domestic industry as a whole . . . Accordingly, if and to the extent that it is interpreted in a manner consistent with our reasoning, as set forth in paragraphs 203 to 208 of this Report, we see no necessary inconsistency between the captive production provision, *on its face*, and the *Anti-Dumping Agreement*" (*United States – Anti-Dumping Measures on Certain Hot-Rolled Steel Products from Japan* ("*United States – Hot-Rolled Steel*"), Report of the Appellate Body, WT/DS184/AB/R, adopted 23 August 2001, para. 208) (footnote omitted, emphasis in original).

[73] (*footnote original*) *United States – Measures Treating Export Restraints as Subsidies* ("*United States – Export Restraints*") Report of the Panel, WT/DS194/R, adopted 23 August 2001, para. 8.4 (footnotes omitted).

[74] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.56–7.57.

Order of analysis when applying the mandatory/discretionary distinction

57. The Panel on *Canada – Aircraft Credits and Guarantees* further explained that it would examine each of the programmes at issue to see if they mandated a benefit within the meaning of Article 1, and, if so, it would then examine whether that subsidy was contingent upon export performance:[75]

> "[W]e shall apply the mandatory/discretionary distinction in this dispute in determining whether the Canadian programmes at issue are as such inconsistent with WTO obligations, i. e., whether the legal texts governing the establishment and operation of these programmes are mandatory in respect of the violations alleged by Brazil. In other words, to assess Brazil's claim against the EDC as such, we must determine whether the EDC programme mandates the grant of prohibited export subsidies in a manner inconsistent with Article 3.1(a) of the SCM Agreement."[76]

"Substantive context" in the application of the mandatory/discretionary distinction

58. In *Canada – Aircraft Credits and Guarantees*, Brazil argued that the mandatory/discretionary distinction should be applied in the "substantive context" of the Canadian programme at issue further to the Panel report in *US – Export Restraints*.[77] The Panel disagreed with Brazil's interpretation of the Panel report in that case and considered that the relevant "substantive context" in applying the mandatory/discretionary distinction would be the obligations set forth in Article 3.1(a) of the *SCM Agreement*, and not the programmes under review:

> "We note, . . ., that the Panel in [*United States – Export Restraints*] was primarily addressing the issue of whether the mandatory/discretionary distinction had to be addressed by a panel as a threshold matter as argued by the United States in that case, or whether a panel could address this distinction after considering the legal requirements of the applicable provisions of the WTO Agreement. In other words, the phrase 'substantive context' refers to Articles 1 and 3 of the SCM Agreement,[78] and not the measure under review. The point made by the panel in *United States – Export Restraints* is simply that it may be difficult to determine whether non-conforming conduct is mandated, without first determining what the obligations are against which conformity is measured. In the present case, the relevant 'substantive context' in applying the mandatory/discretionary distinction would be the obligations set forth in Article 3.1(a) of the SCM Agreement, and not the programmes under review.
>
> We shall therefore apply the mandatory/discretionary distinction in light of Article 3.1(a) of the SCM Agreement. In other words, the question we must address is whether the EDC – the EDC Canada Account and the EDC Corporate Account – or *IQ* requires Canada to provide subsidies contingent upon export performance within the meaning of Article 3.1(a) of the SCM Agreement."[79]

Extent of the complainant's burden of proof

59. The Panel on *Canada – Aircraft Credits and Guarantees* considered that, to prove that a given programme "as such" provides export subsidies, the complainant must establish, on the basis of the pertinent legal instruments, that the programmes at issue "mandate subsidisation, in particular, the conferral of a benefit":

> "Whatever the reason for the existence of export credit agencies, to prove that the EDC as such provides export subsidies, Brazil would have to establish that to be the case on the basis of the various legal texts regarding the establishment and operation of the EDC (i. e., both its Canada and its Corporate Accounts).
>
> We consider that, despite the fact that Brazil has the burden of proof, it has not pointed to any specific provision in those legal texts that suggests that these programmes mandate subsidisation, in particular, the conferral of a benefit within the meaning of Article 1 of the SCM Agreement. We have nonetheless examined the various legal texts submitted by Brazil and found nothing that points to mandatory subsidisation on the part of the EDC."[80]

60. The Panel on *Canada – Aircraft Credits and Guarantees* clarified that "[t]o satisfy the 'benefit' element of

---

[75] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.56–7.59 and 7.68

[76] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.59.

[77] Brazil cited paragraph 8.11 of the Panel Report on *US – Export Restraints* which reads:

> "We are not aware of any GATT/WTO precedent that would require a panel to consider whether legislation is mandatory or discretionary *before* examining the substance of the provisions at issue. To the contrary, we note that a number of panels, in disputes concerning the consistency of legislation, have *not* considered the mandatory/discretionary question in the abstract and as a necessarily threshold issue. Rather, the panels in those cases first resolved any controversy as to the requirements of the GATT/WTO obligations at issue, and only then considered *in light of those findings* whether the defending party had demonstrated adequately that it had sufficient discretion to conform with those rules. That is, the mandatory/discretionary distinction was applied *in a given substantive context*."

[78] (*footnote original*) The Panel in *United States – Export Restraints* stated: "[I]dentifying and addressing the relevant WTO obligations first will facilitate our assessment of the manner in which the legislation addresses those obligations, and whether any violation is involved. That is, it is after we have considered both the substance of the claims in respect of WTO provisions and the relevant provisions of the legislation at issue that we will be in the best position to determine whether the legislation requires a treatment of export restraints that violates those provisions."(*United States – Export Restraints*, para. 8.12).

[79] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.61–7.62.

[80] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.76–7.77.

Article 1.1 of the SCM Agreement for purposes of a challenge to [the programme at issue] as such, [the complainant] must show that the programme requires conferral of a benefit, not that it could be used to do so, or even that it is used to do so".[81]

Fiscal advantages

61. The Panel on *Canada – Aircraft Credits and Guarantees* clarified that the granting of fiscal advantages *per se* does not prove that the entity is required to pass on those advantages to its clients in the form of Article 1 subsidies and that even if the programme may have provided subsidies in the past, it does not then follow that the programme under consideration is *required* to provide such subsidies:

> "Brazil submits that ECAs benefit from a competitive advantage over their private sector competitors (because ECAs do not pay taxes, for example), and this enables them to offer more favourable terms than those available in the private sector. According to Brazil, 'not paying taxes is illustrative of, and an essential prerequisite to, an ECA's capability to perform its normal mission – to provide export subsidies'.[82] Brazil also implies that there would be no need for the EDC if it did not provide support on terms more favourable than those available on the market.[83] Whether or not these arguments are factually correct, however, we do not see how they establish mandatory subsidization. That an entity enjoys certain fiscal advantages does not in and of itself prove that that entity is required to pass on those advantages to its clients in the form of subsidies within the meaning of Article 1 of the SCM Agreement.[84]
>
> In our opinion, the fact that ECAs may have a competitive advantage that allows them to undercut private sector competitors does not mean that they are necessarily required to do so. Furthermore, although the EDC may have provided subsidies in the form of loan guarantees, financial services or debt financing in specific transactions,[85] it does not follow from this that the EDC is required to provide such subsidies."[86]

Compliance with the OECD Arrangement

62. The Panel on *Canada – Aircraft Credits and Guarantees* further considered that "[w]hile it may be true that even when a programme complies with the OECD Arrangement, it may – pursuant to the findings of the panel in *Canada – Aircraft (Article 21.5 – Brazil)* – involve the grant of prohibited export subsidies contrary to Article 3.1(a) of the SCM Agreement, that is not necessarily the case."[87]

Provision of services not available in the market

63. The Panel on *Canada – Aircraft Credits and Guarantees* rejected the complainant's argument that the programme provided a subsidy by providing services that were not available on the market and clarified that, even if the particular programme had the potential to offer such other services, that fact did not necessarily mean that it was *required* to do so:

> "Even assuming that the provision of services not available on the market necessarily confers a benefit, the fact that the EDC Corporate Account has the 'ability' to provide such services does not necessarily mean that it is required to do so. As noted above, to satisfy the 'benefit' element of Article 1.1 of the SCM Agreement for purposes of a challenge to the EDC Corporate Account as such, Brazil would have to show that the program requires conferral of a benefit, not that it could be used to do so, or even that it is used to do so.[88]"[89]

Challenging subsidy programmes "as applied"

64. The Panel on *Canada – Aircraft Credits and Guarantees* considered it inappropriate to make a finding on the subsidies programmes under consideration "as applied" because the complainant's "as applied" claims were based on evidence from specific transactions, and these claims were not independent from claims regarding specific transactions for which the Panel did make findings. The Panel considered that "findings regarding a programme 'as applied' would undermine the utility of the mandatory/discretionary distinction":

> "In our view, there are a number of reasons why it would not be appropriate for us to make separate findings regarding the EDC and *IQ* programmes 'as applied'. *First*,

---

[81] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.107. See also paras. 7.123–7.125 and Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.43 and 5.50.

[82] (*footnote original*) Second Written Submission of Brazil, para. 47 (Annex A-10).

[83] (*footnote original*) *See* Exhibit BRA-54.

[84] (*footnote original*) Further, to the extent that Brazil might be implying that all ECAs grant prohibited export subsidies, we consider that such an argument blurs the distinction between financial contribution and benefit. That an ECA provides export credits demonstrates the existence of a financial contribution, not the conferral of a benefit thereby.

[85] (*footnote original*) We are making no findings, however, in this respect at this juncture.
