[88] (*footnote original*) This is not a case where EDC Corporate Account support necessarily confers a benefit, and where the only discretion available is that of not providing the support at all. We do not express a view as to whether our approach in this case would be equally applicable in such factual circumstances. Rather, this is a case where Canada has discretion to operate the EDC Corporate Account in such a manner that it does not confer a benefit. Further, we note that the facts before us are unlike those before the Appellate Body in *Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items*. In that case, the Appellate Body was reviewing mandatory legislation. (*See Argentina – Measures Affecting Imports of Footwear, Textiles, Apparel and Other Items*, Report of the Appellate Body, WT/DS56/AB/R, adopted 22 April 1998, paras. 49 and 54.)

[89] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.111.

> we do not consider that Brazil's 'as applied' claims are independent of its claims regarding 'specific transactions'. Indeed, Brazil itself acknowledges that '[i]n order for Brazil to prevail on its "as applied" claims, the Panel must find that the challenged programmes have been *applied in specific transactions* in a manner that is inconsistent with the SCM Agreement'. Since Brazil's 'as applied' claims are not independent of its claims against 'specific transactions', and since we make findings regarding 'specific transactions', we see no practical purpose in making 'as applied' findings.
>
> . . . [W]e recall our earlier remarks regarding the application of the mandatory / discretionary distinction. Further, we recall the statement of the panel in *United States – Export Restraints* that 'the distinction between mandatory and discretionary legislation has a rational objective in ensuring predictability of conditions for trade. It allows parties to challenge measures that will necessarily result in action inconsistent with GATT/WTO obligations, *before* such action is actually taken.'[90] The conclusion by a panel that a programme is discretionary and therefore is not inconsistent with the WTO Agreement and a subsequent conclusion, by the same panel, that the programme 'as applied' (i.e., the manner in which the discretion inherent in that programme has been applied) is inconsistent with the WTO Agreement would be of little value. In our view, findings regarding a programme 'as applied' would undermine the utility of the mandatory / discretionary distinction."[91]

(d) Passing the benefit through

65. In *US – Lead and Bismuth II*, the European Communities challenged the administrative review of the imposition of countervailing duties by United States' authorities. The United States' investigating authorities had imposed countervailing duties on products of a company which had received subsidized equity infusions from the United Kingdom Government while still under state control, but for which a fair market value price had been paid in a subsequent privatization by the buyers. Both the equity infusion and the privatization had occurred prior to the initiation of the investigation of the United States' authorities. The applicable United States' statutory provisions contained an "'irrebuttable presumption that nonrecurring subsidies benefit merchandise produced by the recipient over time', without requiring any re-evaluation of those subsidies based on the use or effect of those subsidies or subsequent events in the marketplace".[92] As a consequence, the competent United States' authority examined whether "potentially allocable subsidies . . . could have travelled with the productive unit" following a change in ownership and concluded that a benefit indeed still existed, accruing to the new owners of the privatized corporation. In its report, the Panel first found that, in general, there could not be an irrebuttable presumption that a benefit "continues to flow from untied, non-recurring 'financial contributions', even after changes in ownership".[93] The Panel then stated that it also failed to see how, in the specific case at hand, the new owners of the producing facility could be deemed to have obtained a benefit by previous subsidies bestowed upon the enterprise, if a fair market value had been paid for all productive assets in the course of the privatization.[94] Upon appeal, the Appellate Body held that it saw "no error in the Panel's conclusion".[95]

66. Discussing the payment of value by owners of companies, rather than the companies themselves, the Panel on *US – Lead and Bismuth II*, in a statement not addressed by the Appellate Body, held that "[i]n the context of privatizations negotiated at arm's length, for fair market value, and consistent with commercial principles, the distinction between a company and its owners is redundant for the purpose of establishing 'benefit'".[96]

67. In *US – Softwood Lumber III,* the Panel, basing itself on the findings of the Appellate Body in *US – Lead and Bismuth II*,[97] examined whether, considering the facts of this case, the Member conducting a countervailing duty investigation was required to examine if the alleged benefit to the *tenure holders* from the stumpage programmes were "passed through" to the *softwood lumber producer*s.[98] In the Panel's view, an authority "may not assume that a subsidy provided to producers of the 'upstream' input product automatically benefits unrelated producers of downstream products, especially if there is evidence on the record of arm's-length transactions between the two". For the Panel, in such circumstances the investigating authority should "examine whether and to what extent the subsidies bestowed on the upstream producers benefited the downstream producers".[99]

68. The Panel on *US – Softwood Lumber III* concluded that where there is "complete identity between the tenure holder/logger and the lumber producer, no pass-through analysis is required". The Panel found that "where a downstream producer of subject merchandise is unrelated to the allegedly subsidized upstream producer of the input, an authority is not allowed to simply

assume that a benefit has passed through". The Panel concluded that by "not examining whether the independent lumber producers 'paid arm's-length prices' for the logs that they purchased", the Member defined the benefit to the producers of the subject merchandise inconsistently with the SCM Agreement.[100]

69. The Appellate Body on *US – Softwood Lumber IV* explained that "pass-through" issues concern situations where the activities of harvesting standing timber, processing logs into softwood lumber, and further processing lumber into remanufactured lumber products "are not carried out by vertically integrated enterprises". In other words, the appeal concerned "only arm's length sales of logs and lumber by tenured common ownership or in any other way".[101] Furthermore, the Appellate Body rejected the United States' argument that no pass-through analysis was required, because the tenured harvester/sawmill processes *some* logs into softwood *lumber* in its own sawmill, and is thus a producer of the product subject to the investigation. In this regard, the Appellate Body did "not see why the mere fact that a tenured harvesters owns – or does not own – a sawmill, should affect whether a pass-through analysis is necessary with respect to logs sold at arm's length".

(e) Rebuttal of a prima facie case of benefit

70. Considering whether a party has rebutted a prima facie case of subsidization established against it, the Panel on *Canada – Aircraft* stated:

> "In order to rebut the *prima facie* case of 'benefit', we consider that Canada must do more than simply demonstrate that the amount of specific 'benefit' estimated by Brazil may be incorrect, or that TPC's rate of return covers Canada's cost of funds. Rather, Canada must demonstrate that no 'benefit' is conferred, in the sense that the terms of the contribution provide for a commercial rate of return."[102]

71. In *Canada – Aircraft Credits and Guarantees*, the Panel noted the statements made by a Member's government official that the programme financing under consideration would be at a "better rate" than loans available commercially. For the Panel, these statements were an *indication* that the financing confers a "benefit":

> "We recall that a 'benefit' is conferred when a recipient receives a 'financial contribution' on terms more favourable than those available to the recipient in the market. In our view, Minister Tobin's statements indicate that the Canada Account financing to Air Wisconsin, which will take the form of a loan, will confer a 'benefit' because it will be on terms more favourable than those available to the recipient in the market. This is confirmed by the fact that, in these proceedings, Canada itself initially considered the terms of the Canada Account financing to Air Wisconsin to be more favourable than those available in the market."[103]

(f) Relationship with Article 1.1(a)(1)

72. The Appellate Body on *Canada – Aircraft* found Article 1.1(a)(1) a relevant context for interpreting the term "benefit" in Article 1.1(b):

> "The structure of Article 1.1 as a whole confirms our view that Article 1.1(b) is concerned with the 'benefit' to the recipient, and not with the 'cost to government'. The definition of 'subsidy' in Article 1.1 has two discrete elements: 'a financial contribution by a government or any public body' and 'a benefit is thereby conferred'. The first element of this definition is concerned with whether the *government* made a 'financial contribution', as that term is defined in Article 1.1(a). The focus of the first element is on the action of the government in making the 'financial contribution'. That being so, it seems to us logical that the second element in Article 1.1 is concerned with the 'benefit . . . conferred' on the *recipient* by that governmental action. Thus, subparagraphs (a) and (b) of Article 1.1 define a 'subsidy' by reference, first, to the action of the granting authority and, second, to what was conferred on the recipient. Therefore, Canada's argument that 'cost to *government*' is relevant to the question of whether there is a 'benefit' to the *recipient* under Article 1.1(b) disregards the overall structure of Article 1.1."[104]

(g) Relationship with other Articles

(i) Article 14

73. Both the Panel and the Appellate Body in *Canada – Aircraft* held that Article 14 was relevant context for interpretation of the term "benefit". The Appellate Body considered the explicit reference to Article 1.1 contained in Article 14:

> "Although the opening words of Article 14 state that the guidelines it establishes apply '[f]or the purposes of Part V' of the *SCM Agreement*, which relates to 'countervailing measures', our view is that Article 14, nonetheless, constitutes relevant context for the interpretation of 'benefit' in Article 1.1(b). The guidelines set forth in Article 14 apply to the calculation of the 'benefit *to the recipient* conferred *pursuant to paragraph 1 of Article 1*'. (emphasis added) This explicit textual reference to Article 1.1 in Article 14 indicates to us that 'benefit' is used in the same sense in Article 14 as it is in Article 1.1. Therefore, the reference to 'benefit *to the recipient*' in Article 14 also implies that the word 'benefit', *as used in Article 1.1*, is concerned with the

[100] Panel Report on *US – Softwood Lumber III*, paras. 7.72 and 7.74.
[101] Appellate Body Report on *US – Softwood Lumber IV*, para. 124.
[102] Panel Report on *Canada – Aircraft*, para. 9.312.
[103] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.144.
[104] Appellate Body Report on *Canada – Aircraft*, para. 156.

'benefit *to the recipient*' and not with the 'cost to government' . . . .

. . .

Article 14, which we have said is relevant context in interpreting Article 1.1(b), supports our view that the marketplace is an appropriate basis for comparison. The guidelines set forth in Article 14 relate to equity investments, loans, loan guarantees, the provision of goods or services by a government, and the purchase of goods by a government. A 'benefit' arises under each of the guidelines if the recipient has received a 'financial contribution' on terms more favourable than those available to the recipient in the market."[105]

(ii) Article 14(c)

74. With regard to establishing the existence of a benefit relating to equity guarantees in the framework of the *SCM Agreement*, the Panel on *Canada – Aircraft Credits and Guarantees* noted the relevance of Article 14(c). Accordingly, it considered that a "benefit" could arise if there is a difference between the cost of equity with and without an equity guarantee programme, provided that such difference is not topped by the fees charged by the programme for providing the equity guarantee.[106]

(iii) Article 14(d)

75. With regard to the existence of a benefit in *US – Softwood Lumber III*, the Panel considered that the text of Article 14(d) clarifies that the prevailing market conditions to be used as a benchmark are those in the country of provision of the goods. The Panel therefore found that the ordinary meaning of this provision "excludes an analysis based on market conditions other than those in the country of provision of the goods". Therefore, the Panel concluded that a Member's stumpage prices cannot be considered to constitute "prevailing market conditions" in the other Member's territory.[107] (See paragraphs 262–264 below.)

(iv) Annex I, item (k)

76. The Panel on *Canada – Aircraft* rejected the use of item (k) in the interpretation of the term "benefit". The Panel noted:

"[W]e are unable to accept . . . [the] argument that item (k) of the Illustrative List of Annex I of the SCM Agreement constitutes contextual guidance for determining the existence of 'benefit' in the specific context of government credit under Article 1. In our view, item (k) of the Illustrative List applies in determining whether or not a prohibited export subsidy exists. We do not consider . . . that item (k) determines whether or not a 'subsidy' exists within the meaning of Article 1 of the SCM Agreement."[108]

77. In *Brazil – Aircraft*, the Appellate Body rejected the Panel's interpretation of the "material advantage" clause in item (k) of the Illustrative List of Export Subsidies as effectively the same interpretation of the term "benefit" in Article 1.1(b) adopted by the Panel on *Canada – Aircraft*.[109] (See paragraphs 443–444 below.)

(v) Annex IV

78. The Appellate Body on *Canada – Aircraft* agreed with the Panel "that Annex IV is not useful context for interpreting Article 1.1(b)",[110] stating:

"We fail to see the relevance of this provision to the interpretation of 'benefit' in Article 1.1(b) of the *SCM Agreement*. Annex IV provides a method for calculating the total *ad valorem* subsidization of a product under the 'serious prejudice' provisions of Article 6 of the *SCM Agreement*, with a view to determining whether a subsidy is used in such a manner as to have 'adverse effects'. Annex IV, therefore, has nothing to do with whether a '*benefit*' has been conferred, nor with whether a measure constitutes a subsidy within the meaning of Article 1.1."[111]

9. Relationship of Article 1.1 with other Articles

(i) Article 14

79. The Panel on *US – Softwood Lumber III* found that because the United States had included its own data in the examination of the claimant's stumpage prices, it had acted inconsistently with Article 14 and 14(d) and "therefore also acted inconsistently with Article 1.1 of the SCM Agreement in determining the existence of a subsidy".[112]

(ii) Footnote 1 and Footnote 59

80. The Appellate Body on *US – FSC* rejected the argument that footnote 59 to the *SCM Agreement*, rather than Article 1.1, was the "controlling legal provision" for the definition of the term "subsidy". In doing so, the Appellate Body distinguished between the general definition of the term "subsidy" under Article 1.1 and the specific regime which footnote 59 establishes with respect to a certain type of *export* subsidies:

"Article 1.1 sets forth the general definition of the term 'subsidy' which applies 'for the purpose of this Agreement'. This definition, therefore, applies wherever the

[105] Appellate Body Report on *Canada – Aircraft*, paras. 155 and 158.
[106] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.345.
[107] Panel Report on *US – Softwood Lumber III*, para. 7.5.
[108] Panel Report on *Canada – Aircraft*, para. 9.117.
[109] Appellate Body Report on *Brazil – Aircraft*, para. 179.
[110] Appellate Body Report on *Canada – Aircraft*, para. 159.
[111] Appellate Body Report on *Canada – Aircraft*, para. 159.
[112] Panel Report on *US – Softwood Lumber III*, para. 7.59.

word 'subsidy' occurs throughout the *SCM Agreement* and conditions the application of the provisions of that Agreement regarding *prohibited* subsidies in Part II, *actionable* subsidies in Part III, *non-actionable* subsidies in Part IV and countervailing measures in Part V. By contrast, footnote 59 relates to one item in the Illustrative List of Export Subsidies. Even if footnote 59 means – as the United States also argues – that a measure, such as the FSC measure, is *not* a prohibited *export* subsidy, footnote 59 does not purport to establish an exception to the general definition of a '*subsidy*' otherwise applicable throughout the entire *SCM Agreement*. Under footnote 5 of the *SCM Agreement*, where the Illustrative List indicates that a measure is not a prohibited *export* subsidy, that measure is *not* deemed, for that reason alone, not to be a 'subsidy'. Rather, the measure is simply *not prohibited* under the Agreement. Other provisions of the *SCM Agreement* may, however, still apply to such a 'subsidy'."[113]

81. After distinguishing between the general definition of a subsidy under Article 1.1 and the special regime applicable to a *particular type* of *export* subsidy pursuant to footnote 59, the Appellate Body in *US – FSC* opined that footnote 1 of the *SCM Agreement* was equally not relevant in the case at hand, given that the United States' measure at issue provided for exemptions from *corporate income* taxes:

"We note, moreover, that, under footnote 1 of the *SCM Agreement*, 'the exemption of an exported *product* from duties or taxes *borne by the like product* when destined for domestic consumption . . . shall not be deemed to be a subsidy'. (emphasis added) The tax measures identified in footnote 1 as not constituting a '*subsidy*' involve the exemption of exported *products* from *product-based* consumption taxes. The tax exemptions under the FSC measure relate to the taxation of *corporations* and not *products*. Footnote 1, therefore, does *not* cover measures such as the FSC measure."[114]

10. Relationship with other WTO Agreements

(a) Article XVI of the WTO Agreement

82. The Appellate Body on *US – FSC* upheld the Panel's finding on whether the term "otherwise due" must be interpreted in accordance with the 1981 Understanding adopted by the GATT Council in conjunction with four panel reports on tax legislation, but modified the reasoning.[115] First, the Appellate Body examined and confirmed the Panel's finding that the 1981 Council action is not part of the *GATT 1994*; in so doing, the Appellate Body considered whether the Council action is "another decision" within the meaning of paragraph 1(b)(iv) of the language incorporating the *GATT 1994* into the *WTO Agreement*. The Appellate Body rejected this claim, recalling its holding in *Japan – Alcoholic Beverages* that GATT Panel reports are only binding as between the parties to the dispute; nevertheless, in the specific case at hand, it noted a certain ambiguity in this regard:

"The opening clause of the 1981 Council action states: 'The Council adopts *these reports* on the understanding that *with respect to these cases, and in general* . . .'. The 1981 Council action is, therefore, somewhat equivocal in tenor. On the one hand, it is clear from the text that the 1981 Council action relates specifically to the *Tax Legislation Cases* and is an integral part of the resolution of those disputes. This would suggest that, consistently with our Report in *Japan – Alcoholic Beverages*, the Council action is binding only on the parties to those disputes, and only for the purposes of those disputes.

On the other hand, we note that the opening clause of the 1981 Council action also prefaces the substance of the statement with the words '*in general*'. The United States argues that these words indicate that the 1981 Council action was an 'authoritative interpretation' of Article XVI:4 of the GATT 1947 that has 'general' application and that, therefore, bound all the contracting parties . . .

. . .

[However,] [w]hen the 1981 Council action was adopted, the Chairman of the GATT 1947 Council stated, *inter alia*, that 'the adoption of these reports together with the understanding *does not affect the rights and obligations of contracting parties under the General Agreement*.' In our view, if the contracting parties had intended to make an *authoritative* interpretation of Article XVI:4 of the GATT 1947, binding on all contracting parties, they would have said so in reasonably recognizable terms . . . Thus, we are of the view that the statement of the GATT 1947 Council Chairman is consistent with a reading of the 1981 Council action which views that action as an integral part of the resolution of the *Tax Legislation Cases*, binding only the parties to those disputes."[116]

83. After upholding the Panel's finding that the 1981 Council action did not represent another decision within the meaning of Article 1(b)(iv) of the language

[113] Appellate Body Report on *US – FSC*, para. 93.
[114] Appellate Body Report on *US – FSC*, para. 93.
[115] Panel Report on *US – FSC*, para. 7.85. The Panel rejected the argument that the Understanding made clear that the exemption of foreign source income from taxation did not constitute the foregoing of revenue that is "otherwise due" and that the Understanding adopted by the GATT Council in conjunction with four panel reports on tax legislation had been incorporated into *GATT 1994* or, in the alternative, constituted "subsequent practice" in the application of *GATT 1947* within the meaning of the *Vienna Convention*. The Panel gave as their reason that although the 1981 Understanding was a "decision" within the meaning of Article XVI:1 of the *WTO Agreement*, it could not "provide guidance in understanding detailed provisions of the SCM Agreement which did not exist at the time the understanding was adopted".
[116] Appellate Body Report on *US – FSC*, paras. 109–110 and 112.

incorporating GATT 1994 into the WTO Agreements, the Appellate Body in *US – FSC* proceeded to examine the status of the 1981 Council action as a "decision" within the meaning of Article XVI:1 of the WTO Agreement. In doing so, the Appellate Body addressed the relationship between Article XVI:4 of the *GATT 1994* and Articles 1.1(a)(1) and 3.1(a) of the *SCM Agreement*:

> "We recognize that, as 'decisions' within the meaning of Article XVI:1 of the *WTO Agreement*, the adopted panel reports in the *Tax Legislation Cases*, together with the 1981 Council action, could provide 'guidance' to the WTO. . . .
>
> . . .
>
> [T]he provisions of the *SCM Agreement* do not provide explicit assistance as to the relationship between the export subsidy provisions of the *SCM Agreement* and Article XVI:4 of the GATT 1994. In the absence of any such specific textual guidance, we must determine the relationship between Articles 1.1(a)(1) and 3.1(a) of the *SCM Agreement* and Article XVI:4 of the GATT 1994 on the basis of the texts of the relevant provisions as a whole. It is clear from even a cursory examination of Article XVI:4 of the GATT 1994 that it differs very substantially from the subsidy provisions of the *SCM Agreement*, and, in particular, from the export subsidy provisions of both the *SCM Agreement* and the *Agreement on Agriculture*. First of all, the *SCM Agreement* contains an express definition of the term 'subsidy' which is not contained in Article XVI:4. In fact, as we have observed previously, the *SCM Agreement* contains a broad package of new export subsidy disciplines that 'go well beyond merely applying and interpreting Articles VI, XVI and XXIII of the GATT 1947'.[117] Next, Article XVI:4 prohibits export subsidies only when they result in the export sale of a product at a price lower than the 'comparable price charged for the like product to buyers in the domestic market.' In contrast, the *SCM Agreement* establishes a much broader prohibition against *any* subsidy which is 'contingent upon export performance'. To say the least, the rule contained in Article 3.1(a) of the *SCM Agreement* that all subsidies which are 'contingent upon export performance' are prohibited is significantly different from a rule that prohibits only those subsidies which result in a lower price for the exported product than the comparable price for that product when sold in the domestic market. Thus, whether or not a measure is an export subsidy under Article XVI:4 of the GATT 1947 provides no guidance in determining whether that measure is a prohibited export subsidy under Article 3.1(a) of the *SCM Agreement*. Also, and significantly, Article XVI:4 of the GATT 1994 does not apply to 'primary products', which include agricultural products. Unquestionably, the explicit export subsidy disciplines, relating to agricultural products, contained in Articles 3, 8, 9 and 10 of the *Agreement on Agriculture* must clearly take precedence over the *exemption* of primary products from export subsidy disciplines in Article XVI:4 of the GATT 1994.
>
> Furthermore, as the Panel observed, the text of the 1981 Council action itself contains reference only to Article XVI:4, and the Chairman of the GATT 1947 Council stated expressly that the 1981 Council action did *not* affect the *Tokyo Round Subsidies Code*. We share the Panel's view that, in these circumstances, it would be incongruous to extend the scope of the action, beyond that intended, to the *SCM Agreement*. If the 1981 Council action did not affect the *Tokyo Round Subsidies Code*, which existed in 1981, it is difficult to see how that action could be seen to affect the *SCM Agreement*, which did not."[118]

II. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Specificity

2.1 In order to determine whether a subsidy, as defined in paragraph 1 of Article 1, is specific to an enterprise or industry or group of enterprises or industries (referred to in this Agreement as "certain enterprises") within the jurisdiction of the granting authority, the following principles shall apply:

(a) Where the granting authority, or the legislation pursuant to which the granting authority operates, explicitly limits access to a subsidy to certain enterprises, such subsidy shall be specific.

(b) Where the granting authority, or the legislation pursuant to which the granting authority operates, establishes objective criteria or conditions[2] governing the eligibility for, and the amount of, a subsidy, specificity shall not exist, provided that the eligibility is automatic and that such criteria and conditions are strictly adhered to. The criteria or conditions must be clearly spelled out in law, regulation, or other official document, so as to be capable of verification.

(*footnote original*) [2] Objective criteria or conditions, as used herein, mean criteria or conditions which are neutral, which do not favour certain enterprises over others, and which are economic in nature and horizontal in application, such as number of employees or size of enterprise.

(c) If, notwithstanding any appearance of non-specificity resulting from the application of the principles laid down in subparagraphs (a) and (b), there are reasons to believe that the subsidy may in fact be specific, other factors may be considered. Such factors are: use of a subsidy programme by a limited number of certain

[117] (*footnote original*) Appellate Body Report on *Brazil – Desiccated Coconut*, fn. 50.
[118] Appellate Body Report on *US – FSC*, paras. 115 and 117–118.

enterprises, predominant use by certain enterprises, the granting of disproportionately large amounts of subsidy to certain enterprises, and the manner in which discretion has been exercised by the granting authority in the decision to grant a subsidy.[3] In applying this subparagraph, account shall be taken of the extent of diversification of economic activities within the jurisdiction of the granting authority, as well as of the length of time during which the subsidy programme has been in operation.

(*footnote original*) [3] In this regard, in particular, information on the frequency with which applications for a subsidy are refused or approved and the reasons for such decisions shall be considered.

2.2 A subsidy which is limited to certain enterprises located within a designated geographical region within the jurisdiction of the granting authority shall be specific. It is understood that the setting or change of generally applicable tax rates by all levels of government entitled to do so shall not be deemed to be a specific subsidy for the purposes of this Agreement.

2.3 Any subsidy falling under the provisions of Article 3 shall be deemed to be specific.

2.4 Any determination of specificity under the provisions of this Article shall be clearly substantiated on the basis of positive evidence.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. Article 2.1(c)

(a) General

84. In *US – Softwood Lumber IV*, Canada argued that a subsidy is "specific" only when the government "deliberately limits" access to certain enterprises. This argument was rejected by the Panel on the grounds that Article 2 of the *SCM Agreement* is concerned with the distortion that is created by a subsidy which, either in law or in fact, is not broadly available. Furthermore, in the view of the Panel, there is:

> "[N]o basis in the text of Article 2, and 2.1 (c) SCM Agreement in particular, for Canada's argument that if the inherent characteristics of the good provided limit the possible use of the subsidy to a certain industry, the subsidy will not be specific unless access to this subsidy is limited to a sub-set of this industry, i.e. to certain enterprises within the potential users of the subsidy engaged in the manufacture of similar products."[119]

(b) "other factors may be considered"

85. On the argument by Canada that an investigating authority is required to examine all four factors mentioned in Article 2.1(c) in order to determine *de facto* specificity, the Panel on *US – Softwood Lumber IV* stated that Article 2.1(c) provides that if there are reasons to believe that the subsidy may in fact be specific, other factors "may" be considered. In the view of the Panel, the use of the verb "may", rather than "shall" indicates that if there are reasons to believe that the subsidy may in fact be specific, an authority *may* want to look at any of the four factors or indicators of specificity.[120]

(c) "account be taken of"

86. Finally, the Panel on *US – Softwood Lumber IV* found that the Department of Commerce had satisfied the requirement that "account be taken of" the extent of economic diversification by noting that the vast majority of companies and industries in Canada did not receive benefits under the programmes at issue. This indicated to the Panel that the Department of Commerce showed that it had taken account of the publicly known fact that the Canadian economy and the Canadian provincial economies in particular were diversified economies.[121]

2. Article 2.3: subsidies falling under Article 3 deemed to be specific

87. The Panel on *Indonesia – Autos* was called upon to decide whether the Indonesian subsidies contingent upon the use of domestic over imported goods were specific:

> "As with any analysis under the SCM Agreement, the first issue to be resolved is whether the measures in question are subsidies within the meaning of Article 1 that are specific to an enterprise or industry or group of enterprises or industries within the meaning of Article 2 . . . In this case, the European Communities, the United States and Indonesia agree that these measures are specific subsidies within the meaning of those articles . . . Further, the European Communities, the United States and Indonesia agree that these subsidies are contingent upon the use of domestic over imported goods within the meaning of Article 3.1(b), and that they are therefore deemed to be specific pursuant to Article 2.3 of the Agreement. In light of the views of the parties, and given that nothing in the record would compel a different conclusion, we find that the measures in question are specific subsidies within the meaning of Articles 1 and 2 of the SCM Agreement."[122]

PART II: PROHIBITED SUBSIDIES

III. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Prohibition

3.1 Except as provided in the Agreement on Agriculture, the following subsidies, within the meaning of Article 1, shall be prohibited:

(a) subsidies contingent, in law or in fact,[4] whether solely or as one of several other conditions, upon export performance, including those illustrated in Annex I;[5]

(*footnote original*) [4] This standard is met when the facts demonstrate that the granting of a subsidy, without having been made legally contingent upon export performance, is in fact tied to actual or anticipated exportation or export earnings. The mere fact that a subsidy is granted to enterprises which export shall not for that reason alone be considered to be an export subsidy within the meaning of this provision.
(*footnote original*) [5] Measures referred to in Annex I as not constituting export subsidies shall not be prohibited under this or any other provision of this Agreement.

(b) subsidies contingent, whether solely or as one of several other conditions, upon the use of domestic over imported goods.

3.2 A Member shall neither grant nor maintain subsidies referred to in paragraph 1.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.1(a)

(a) General

88. In *Canada – Aircraft Credits and Guarantees*, the Panel first recalled the text of Article 3.1(a) of the *SCM Agreement* and found that to "prove the existence of an export subsidy within the meaning of this provision, a Member must . . . establish (i) the existence of a subsidy within the meaning of Article 1 of the SCM and (ii) contingency of that subsidy upon export performance".[123]

89. The Appellate Body on *US – FSC (Article 21.5 – EC)* noted that Article 3.1(a) provides that "subsidies contingent, in law or in fact, whether solely or as one of several other conditions, upon export performance" are prohibited. The Appellate Body referred also to its statement in *Canada – Aircraft* that "contingent" means "conditional" or "dependent for its existence on something else" and said that the grant of the subsidy must be conditional or dependent upon export performance.[124] The Appellate Body provided:

> "We start with the text of Article 3.1(a) of the *SCM Agreement*, which provides that 'subsidies contingent, in law or in fact, whether solely or as one of several other conditions, upon export performance' are prohibited. We have considered this provision in several previous appeals.[125] In *Canada – Aircraft*, we said that the key word in Article 3.1(a) is 'contingent', which means 'conditional' or 'dependent for its existence on something else'.[126] The grant of the subsidy must be conditional or dependent upon export performance. Footnote 4 of the *SCM Agreement*, attached to Article 3.1(a), describes the relationship of contingency by stating that the grant of a subsidy must be 'tied to' export performance. Article 3.1(a) further provides that such export contingency may be the 'sole []' condition governing the grant of a prohibited subsidy or it may be 'one of several other conditions'."[127]

(b) "contingent in law . . . upon export performance"

90. In *Canada – Autos*, the Appellate Body addressed the precise distinction between a *de jure* and a *de facto* subsidy with reference to the wording of a particular measure:

> "In our view, a subsidy is contingent 'in law' upon export performance when the existence of that condition can be demonstrated on the basis of the very words of the relevant legislation, regulation or other legal instrument constituting the measure. The simplest, and hence,

[123] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.16.

[124] Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.54–8.55. On this issue, the Panel on *US – FSC (Article 21.5 – EC)* recalled that:

> "[T]he meaning of 'contingent' in that provision is 'conditional' or 'dependent for its existence upon'. We further recall that the legal standard expressed by the word 'contingent' is the same for both *de jure* or *de facto* contingency. There is a difference, however, in what evidence may be employed to establish that a subsidy is export-contingent.
>
> We recall the Appellate Body's [*Canada – Autos*] statement that '*de jure* export contingency' is demonstrated on the basis of the words of the relevant legislation, regulation or other legal instrument, as opposed to the 'total configuration of the facts constituting and surrounding the grant of the subsidy.' The Appellate Body [in *Canada – Autos*] has also recently stated,
>
> 'that a subsidy is also properly held to be *de jure* export contingent where the condition to export is clearly, though implicitly, in the instrument comprising the measure. Thus, for a subsidy to be *de jure* export contingent, the underlying legal instrument does not always have to provide *expressis verbis* that the subsidy is available only upon fulfilment of the condition of export performance. Such conditionality can also be derived by necessary implication from the words actually used in the measure.'" [See Appellate Body Report on *Canada – Autos*, para. 118].

[125] (*footnote original*) Appellate Body Report, *Canada – Measures Affecting the Export of Civilian Aircraft* ("*Canada – Aircraft*"), WT/DS70/AB/R, adopted 20 August 1999, paras. 162–180; Appellate Body Report, *US – FSC, supra*, footnote 3 paras. 96–121; Appellate Body Report, *Canada – Autos*, *supra*, footnote 56, paras. 95–117; Appellate Body Report, *Canada – Aircraft (Article 21.5 – Brazil)*, *supra*, footnote 62, paras. 25–52.

[126] (*footnote original*) Appellate Body Report, *supra*, footnote 86, para. 166.

[127] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 111.

perhaps, the uncommon, case is one in which the condition of exportation is set out expressly, in so many words, on the face of the law, regulation or other legal instrument. We believe, however, that a subsidy is also properly held to be *de jure* export contingent where the condition to export is clearly, though implicitly, in the instrument comprising the measure. Thus, for a subsidy to be *de jure* export contingent, the underlying legal instrument does not always have to provide *expressis verbis* that the subsidy is available only upon fulfillment of the condition of export performance. Such conditionality can also be derived by necessary implication from the words actually used in the measure."[128]

91. The Appellate Body on *Canada – Autos* concluded that "as the import duty exemption is simply not available to a manufacturer unless it exports motor vehicles, the import duty exemption is clearly conditional, or dependent upon, exportation and, therefore, is contrary to Article 3.1(a) . . .".[129]

92. Before the Panel on *Canada – Aircraft*, Canada stated that the mandate of one of its agencies was "to offer a full range of risk management services and financing products 'for the purpose of supporting and developing, directly or indirectly, Canada's export trade'".[130] Basing itself on this statement by Canada, the Panel held that "export credits granted 'for the purpose of supporting and developing, directly or indirectly, Canada's export trade' are expressly contingent in law on export performance".[131]

93. In examining whether a subsidy is contingent "in law" upon export performance, the Appellate Body in *Canada – Autos* noted that "footnote 4 . . . uses the words 'tied to' as a synonym for 'contingent' or 'conditional'. As the legal standard is the same for *de facto* and *de jure* export contingency, we believe that a 'tie', amounting to the relationship of contingency, between the granting of the subsidy and actual or anticipated exportation meets the legal standard of 'contingent' in Article 3.1(a) . . . ."[132]

(c) "contingent . . . in fact . . . upon export performance"

(i) De facto contingency

94. Regarding the interpretation of the term "contingent . . . in fact", the Panel on *Australia – Automotive Leather II* established a standard of "close connection" between the grant or maintenance of a subsidy and export performance. It added that a subsidy, in order to be export contingent in fact, must be "conditioned" upon export performance:

> "An inquiry into the meaning of the term 'contingent . . . in fact' in Article 3.1(a) of the SCM Agreement must, therefore, begin with an examination of the ordinary meaning of the word 'contingent'. The ordinary meaning of 'contingent' is 'dependent for its existence on something else', 'conditional; dependent on, upon'. The text of Article 3.1(a) also includes footnote 4, which states that the standard of 'in fact' contingency is met if the facts demonstrate that the subsidy is 'in fact tied to actual or anticipated exportation or export earnings'. The ordinary meaning of 'tied to' is 'restrain or constrain to or from an action; limit or restrict as to behaviour, location, conditions, etc.'. Both of the terms used – 'contingent . . . in fact' and 'in fact tied to' – suggest an interpretation that requires a close connection between the grant or maintenance of a subsidy and export performance."[133]

95. In *Canada – Aircraft*, the Panel also considered the "tied to" language of footnote 4 to be equivalent to a relationship of "conditionality" between the grant of a subsidy and export performance.[134] The Appellate Body agreed with the term "conditioned" and linked it to the concept of contingency under Article 3.1(a):

> "The ordinary meaning of 'tied to' confirms the linkage of 'contingency' with 'conditionality' in Article 3.1(a). Among the many meanings of the verb 'tie', we believe that, in this instance, because the word 'tie' is immediately followed by the word 'to' in footnote 4, the relevant ordinary meaning of 'tie' must be to 'limit or restrict as to . . . conditions'. This element of the standard set forth in footnote 4, therefore, emphasizes that a relationship of conditionality or dependence must be demonstrated. The second substantive element is at the very heart of the legal standard in footnote 4 and cannot be overlooked. In any given case, the facts must 'demonstrate' that the granting of a subsidy is *tied to* or *contingent upon* actual or anticipated exports. It does *not* suffice to demonstrate solely that a government granting a subsidy *anticipated* that exports would result. The prohibition in Article 3.1(a) applies to subsidies that are *contingent* upon export performance."[135]

96. While the Appellate Body in *Canada – Aircraft* largely agreed with the findings of the Panel on the interpretation of the term "contingency", it nevertheless criticized the "but for" test established by the Panel on the basis of the term "tied to":

[131] Panel Report on *Canada – Aircraft*, para. 9.230.

[132] Appellate Body Report on *Canada – Autos*, para. 107. See also Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.365 and 7.367–7.368.

[133] Panel Report on *Australia – Automotive Leather II*, para. 9.55.

[134] Panel Report on *Canada – Aircraft*, para. 9.331.

[135] Appellate Body Report on *Canada – Aircraft*, para. 171.

> "We note that the Panel considered that the most effective means of demonstrating whether a subsidy is contingent in fact upon export performance is to examine whether the subsidy would have been granted *but for* the anticipated exportation or export earnings. . . . While we consider that the Panel did not err in its overall approach to *de facto* export contingency, we, and panels as well, must interpret and apply the language actually used in the treaty."[136]

97. The Appellate Body on *Canada – Aircraft* provided its own reasoning with respect to the ordinary meaning of the text "contingent . . . in fact . . . on export performance". In doing so, it first emphasized the term "contingent" as a "key word", held that the legal standard encapsulated by this term is the same for both *de jure* or *de facto* contingency and framed the distinction between these two types of contingency in terms of the evidence upon which such determination would rest:

> "In our view, the key word in Article 3.1(a) is 'contingent'. As the Panel observed, the ordinary connotation of 'contingent' is 'conditional' or 'dependent for its existence on something else'. This common understanding of the word 'contingent' is borne out by the text of Article 3.1(a), which makes an explicit link between 'contingency' and 'conditionality' in stating that export contingency can be the sole or 'one of several other *conditions*'.
>
> . . . In our view, the legal standard expressed by the word 'contingent' is the same for both *de jure* or *de facto* contingency. There is a difference, however, in what evidence may be employed to prove that a subsidy is export contingent. *De jure* export contingency is demonstrated on the basis of the words of the relevant legislation, regulation or other legal instrument. Proving *de facto* export contingency is a much more difficult task. There is no single legal document which will demonstrate, on its face, that a subsidy is 'contingent . . . in fact . . . upon export performance'. Instead, the existence of the relationship of contingency, between the subsidy and export performance, must be *inferred* from the total configuration of the facts constituting and surrounding the granting of the subsidy, none of which on its own is likely to be decisive in any given case."[137]

98. The Appellate Body on *Canada – Aircraft* examined footnote 4 more closely as "a standard . . . for determining when a subsidy is 'contingent . . . in fact . . . upon export performance'". It identified three elements, i.e. "granting of a subsidy", "tied to" and "anticipated":

> "We note that satisfaction of the standard for determining *de facto* export contingency set out in footnote 4 requires proof of three different substantive elements: first, the '*granting* of a subsidy'; second, 'is . . . *tied to* . . .'; and, third, 'actual or anticipated exportation or export earnings'. (emphasis added) . . . .
>
> The first element of the standard for determining *de facto* export contingency is the '*granting* of a subsidy'. In our view, the initial inquiry must be on whether the *granting authority* imposed a condition based on export performance in providing the subsidy. In the words of Article 3.2 and footnote 4, the prohibition is on the '*granting* of a subsidy', and not on receiving it. The treaty obligation is imposed on the *granting* Member, and not on the recipient. Consequently, we do not agree . . . that an analysis of 'contingent . . . in fact . . . upon export performance' should focus on the reasonable knowledge of the recipient.[138]
>
> The second substantive element in footnote 4 is 'tied to'. The ordinary meaning of 'tied to' confirms the linkage of 'contingency' with 'conditionality' in Article 3.1(a). Among the many meanings of the verb 'tie', we believe that, in this instance, because the word 'tie' is immediately followed by the word 'to' in footnote 4, the relevant ordinary meaning of 'tie' must be to 'limit or restrict as to . . . conditions'. This element of the standard set forth in footnote 4, therefore, emphasizes that a relationship of conditionality or dependence must be demonstrated. The second substantive element is at the very heart of the legal standard in footnote 4 and cannot be overlooked. In any given case, the facts must 'demonstrate' that the granting of a subsidy is *tied to* or *contingent upon* actual or anticipated exports. It does *not* suffice to demonstrate solely that a government granting a subsidy *anticipated* that exports would result. The prohibition in Article 3.1(a) applies to subsidies that are *contingent* upon export performance.
>
> We turn now to the third substantive element provided in footnote 4. The dictionary meaning of the word 'anticipated' is 'expected'. The use of this word, however, does *not* transform the standard for 'contingent . . . in fact' into a standard merely for ascertaining 'expectations' of exports on the part of the granting authority. Whether exports were anticipated or 'expected' is to be gleaned from an examination of objective evidence. This examination is quite separate from, *and should not be confused with*, the examination of whether a subsidy is 'tied to' actual or anticipated exports. A subsidy may well be granted in the knowledge, or with the anticipation, that exports will result. Yet, that alone is not sufficient, because that alone is not proof that the granting of the subsidy is *tied to* the anticipation of exportation."[139]

99. The Panel on *Canada – Aircraft*, in a statement not specifically addressed by the Appellate Body, also noted that "the nature of the required conditionality [is]

---

[136] Appellate Body Report on *Canada – Aircraft*, para. 171, footnote 102.

[137] Appellate Body Report on *Canada – Aircraft*, paras. 166–167.

[138] (*footnote original*) In finding that the knowledge of the recipient is not part of the legal standard of *de facto* export contingency, we do not suggest that relevant objective evidence relating to the recipient can never be considered by a panel.

[139] Appellate Body Report on *Canada – Aircraft*, paras. 169–172.

that 'one of the *conditions* for the grant of the subsidy is the *expectation* that exports will flow thereby'".[140] In the case at hand, the Panel came to the conclusion that "the facts available demonstrate that one of the conditions of the grant of ... contributions to the ... industry is indeed such an expectation, in the form of projected export sales anticipated to 'flow' directly from these contributions".[141]

100. The Panel on *Canada – Aircraft Credits and Guarantees* considered that a Member's awareness that its domestic market is too small to absorb its domestic production of a subsidized product "may indicate" that the subsidy is granted upon export performance (see paragraph 107 below). However, after referring to statements by the Appellate Body in *Canada – Aircraft*,[142] the Panel clarified that even if a Member was to anticipate that exports would result from the grant of a subsidy, such anticipation "alone is not proof that the granting of the subsidy is *tied to* the anticipation of exportation" within the meaning of the footnote 4 to Article 3.1(a).[143]

(ii) Treatment of facts in the determination of de facto export contingency

Case-by-case approach

101. The Panel on *Australia – Automotive Leather II* held that the language of footnote 4 of the SCM Agreement required it "to examine all the facts concerning the grant or maintenance of the challenged subsidy", emphasizing that the Panel was not precluded from considering any particular fact. The Panel also held that the specific facts to be considered will vary on a case-by-case basis:

> "In our view, the concept of 'contingent ... in fact ... upon export performance', and the language of footnote 4 of the SCM Agreement, require us to examine all of the facts that actually surround the granting or maintenance of the subsidy in question, including the terms and structure of the subsidy, and the circumstances under which it was granted or maintained. A determination whether a subsidy is in fact contingent upon export performance cannot, in our view, be limited to an examination of the terms of the legal instruments or the administrative arrangements providing for the granting or maintenance of the subsidy in question. Such a determination would leave wide open the possibility of evasion of the prohibition of Article 3.1(a), and render meaningless the distinction between 'in fact' and 'in law' contingency. Moreover, while the second sentence of footnote 4 makes clear that the mere fact that a subsidy is granted to enterprises which export cannot be the sole basis for concluding that a subsidy is 'in fact' contingent upon export performance, it does not preclude the consideration of that fact in a panel's analysis. Nor does it preclude consideration of the level of a particular company's exports. This suggests to us that factors other than the specific legal or administrative arrangements governing the granting or maintenance of the subsidy in question must be considered in determining whether a subsidy is 'in fact' contingent upon export performance.
>
> Based on the explicit language of Article 3.1(a) and footnote 4 of the SCM Agreement, in our view the determination of whether a subsidy is 'contingent ... in fact' upon export performance requires us to examine all the facts concerning the grant or maintenance of the challenged subsidy, including the nature of the subsidy, its structure and operation, and the circumstances in which it was provided. In this context, Article 11 of the DSU requires a panel to make an objective assessment of the facts of the case. Obviously, the facts to be considered will depend on the specific circumstances of the subsidy in question, and will vary from case to case. In our view, all facts surrounding the grant and/or maintenance of the subsidy in question may be taken into consideration in the analysis. However, taken together, the facts considered must demonstrate that the grant or maintenance of the subsidy is conditioned upon actual or anticipated exportation or export earnings. The outcome of this analysis will obviously turn on the specific facts relating to each subsidy examined."[144]

102. The Panel on *Australia – Automotive Leather II* drew a temporal limit to this broad standard of factual analysis. It opined that "the pertinent consideration is the facts at the time the conditions for the grant payments were established, and not possible subsequent developments".[145]

103. The Panel on *Canada – Aircraft*, in a finding expressly endorsed by the Appellate Body,[146] confirmed this broad and case-by-case approach to the factual analysis of the Panel on *Australia – Automotive Leather II*. While it also emphasized that no factual considerations should prevail over others, it pointed out that its finding that a broad range of facts should be considered as relevant did not mean that "the *de facto* export contingency standard is easily met":

> "In our view, no fact should automatically be rejected when considering whether the facts demonstrate that a subsidy would not have been granted but for anticipated exportation or export earnings. We note that footnote 4 provides that the 'facts' must demonstrate *de facto* export contingency. Footnote 4 therefore refers to 'facts'

[140] Panel Report on *Canada – Aircraft*, para. 9.326.
[141] Panel Report on *Canada – Aircraft*, para. 9.346.
[142] Appellate Body Report on *Canada – Aircraft*, paras. 169–173. See paragraph 96 above.
[143] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.370–7.376.
[144] Panel Report on *Australia – Automotive Leather II*, paras. 9.56–9.57.
[145] Panel Report on *Australia – Automotive Leather II*, para. 9.70.
[146] Appellate Body Report on *Canada – Aircraft*, para. 169.

> in general, without any suggestion that certain factual considerations should prevail over others. In our opinion, it is clear from the ordinary meaning of footnote 4 that any fact could be relevant, provided it 'demonstrates' (either individually or in conjunction with other facts) whether or not a subsidy would have been granted but for anticipated exportation or export earnings. We consider that this is true of the export-orientation of the recipient, or of the reason for the grant of the subsidy, just as it is true of a host of other facts potentially surrounding the grant of the subsidy in question. In any given case, the relative importance of each fact can only be determined in the context of that case, and not on the basis of generalities.
>
> We would emphasise, however, that our finding that a broad range of facts could be relevant in this context does not mean that the *de facto* export contingency standard is easily met. On the contrary, footnote 4 of the SCM Agreement makes it clear that the facts must "demonstrate" *de facto* export contingency. That is, *de facto* export contingency must be demonstrable on the basis of the factual evidence adduced.[147]

104. The Appellate Body on *Canada – Aircraft* approved and strengthened the finding of the Panel on the fact that a subsidy is granted to enterprises which export may be considered in a determination whether or not a subsidy is *de facto* export contingent, but that this "does not mean that export-orientation alone can necessarily be determinative":[148]

> "There is a logical relationship between the second sentence of footnote 4 and the 'tied to' requirement set forth in the first sentence of that footnote. The second sentence of footnote 4 precludes a panel from making a finding of *de facto* export contingency for the sole reason that the subsidy is 'granted to enterprises which export'. In our view, merely knowing that a recipient's sales are export-oriented does not demonstrate, without more, that the granting of a subsidy is tied to actual or anticipated exports. The second sentence of footnote 4 is, therefore, a specific expression of the requirement in the first sentence to demonstrate the 'tied to' requirement. We agree with the Panel that, under the second sentence of footnote 4, the export orientation of a recipient may be taken into account as *a* relevant fact, provided that it is one of several facts which are considered and is not the only fact supporting a finding."[149]

Which facts to consider

105. The Panel on *Australia – Automotive Leather II* held that "the fact of expectation cannot be the sole determinative fact on the evaluation".[150] The Panel also considered the extent to which circumstances surrounding a loan contract can be facts on the basis of which the determination of an export contingent subsidy can be made:

> "[T]he mere fact that one possible source of funds to pay off the loan is potential export earnings is insufficient to conclude that the loan was contingent in fact upon anticipated exportation or export earnings. . . . We recognize that other facts are relevant to our consideration of the nature of the loan contract. Included among these is the significance of exports in Howe's business, and the fact that the loan was part of the overall 'assistance package' given to Howe, which Australia acknowledged would probably not have occurred if Howe had not been removed from eligibility under the . . . programmes. . . . Moreover, there is nothing in the terms of the loan contract itself which suggests a specific link to actual or anticipated exportation or export earnings . . . These factors persuade us that there is not a sufficiently close tie between the loan and anticipated exportation or export earnings."[151]

106. While the Panel on *Canada – Aircraft* found that no one factual consideration should prevail over others in the determination of *de facto* export contingency, it nevertheless held that "the closer a subsidy brings a product to sale on the export market, the greater the possibility that the facts may demonstrate that the subsidy would not have been granted but for anticipated exportation or export earnings". In this respect, the Panel noted that subsidies for "pure research" or "for general purposes such as improving efficiency or adopting new technology" would be less likely to give rise to *de facto* export contingency than "subsidies that directly assist companies in bringing specific products to the (export) market".[152] The Appellate Body did not object to the consideration of this factor by the Panel, but cautioned that "the mere presence . . . of this factor" will not create "a presumption that a subsidy is '*de facto* contingent upon export performance':

> "We recall that the Panel added that 'the further removed a subsidy is from sales on the export market, *the less the possibility* that the facts may demonstrate that the subsidy is 'contingent . . . in fact . . . upon export performance'. (emphasis added) By these statements, the Panel appears to us to apply what could be read to be a legal presumption. While we agree that this nearness-to-the-export-market factor *may*, in certain circumstances, be a relevant fact, we do not believe that it should be regarded as a legal presumption. It is, for instance, no '*less . . . possible*' that the facts, taken together, may demonstrate that a pre-production subsidy for research and development is 'contingent . . . in fact . . . upon export performance'. If a panel takes this factor into account, it should treat it with considerable

[147] Panel Report on *Canada – Aircraft*, paras. 9.337–9.338.
[148] Panel Report on *Canada – Aircraft*, para. 9.336.
[149] Appellate Body Report on *Canada – Aircraft*, para. 173.
[150] Panel Report on *Australia – Automotive Leather II*, para. 9.66.
[151] Panel Report on *Australia – Automotive Leather II*, para. 9.75.
[152] Panel Report on *Canada – Aircraft*, paras. 9.337–9.339.

caution. In our opinion, the mere presence or absence of this factor in any given case does not give rise to a presumption that a subsidy is or is not *de facto* contingent upon export performance. The legal standard to be applied remains the same: it is necessary to establish each of the three substantive elements in footnote 4."[153]

Relevance of the size of the domestic industry

107. The Panel on *Canada – Aircraft Credits and Guarantees* referred to the findings of the Panel on *Australia – Automotive Leather II*[154] (see paragraphs 101 and 105) and noted that a Member's awareness that its domestic market is too small to absorb the domestic production of a subsidized product may "indicate", although not prove (see paragraph 100 above), that the subsidy is granted on the condition that it be exported:

"In addressing Brazil's de facto export contingency claim, we shall be guided by note 4 to Article 3.1(a) of the SCM Agreement, whereby a subsidy is 'contingent . . . in fact . . . upon export performance' when

> the facts demonstrate that the granting of a subsidy, without having been made legally contingent upon export performance, is in fact tied to actual or anticipated exportation or export earnings. The mere fact that a subsidy is granted to enterprises which export shall not for that reason alone be considered to be an export subsidy within the meaning of this provision.

. . . a Member's awareness that its domestic market is too small to absorb domestic production of a subsidised product may indicate that the subsidy is granted on the condition that it be exported."[155]

(d) "Export performance"

(i) General

108. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)*, in a finding not specifically addressed by the Appellate Body, drew a distinction between "general technological or economic benefits" on the one hand and "export performance" on the other:

"Thus, whereas TPC assistance is conditional on a project having certain technological or net economic benefits . . ., in our view this simply cannot be assumed to be synonymous with export performance, and therefore it does not mean *ipso facto* that such assistance is contingent on export performance. This remains true even though TPC administrators know that fulfilment of net economic benefits in certain cases may be likely to result in increased exports. The fact that they will have no concrete quantifiable information on exports in our view will act in practical terms to limit their discretion to select projects on the basis of export performance."[156]

109. The Panel on *Canada – Aircraft* rejected the argument that the subsidy programme at issue was not conditional on exports taking place on the grounds that "there are no penalties if export sales are not realised".[157] The Panel supported its rejection with the following statement:

"While this argument may be relevant in determining whether a subsidy would not have been granted but for actual exportation or export earnings, we find this argument insufficient to rebut a *prima facie* case that a subsidy would not have been granted but for anticipated exportation or export earnings."[158]

(ii) "produced within or outside the Member"

110. The Appellate Body on *US – FSC (Article 21.5 – EC)*, upholding the findings of the Panel, observed that there are two different factual situations, one involving property produced *within* the Member and the other involving property produced *outside* it, which are subject to distinct conditions for receipt of the subsidy. The Appellate Body considered it appropriate to examine these two situations separately:

"In respect of property produced within the United States, the taxpayer can obtain the subsidy only by satisfying the conditions in the measure relating to this property and, for this property, the measure provides only one set of conditions governing the grant of subsidy. The conditions for the grant of subsidy with respect to property produced *outside* the United States are distinct from those governing the grant of subsidy in respect of property produced *within* the United States.

In our view, it is hence appropriate, indeed necessary, under Article 3.1(a) of the *SCM Agreement*, to examine separately the conditions pertaining to the grant of the subsidy in the two different situations addressed by the measure."[159]

111. Examining the measure with respect to property produced *within* the Member, the Appellate Body in *US – FSC (Article 21.5 – EC)*, noted that in order to obtain the subsidy, the goods must be sold, leased or rented for direct use, consumption or disposition "outside the United States". Thus for the Appellate Body to be eligible for the subsidy, "the property must be exported". In this way, the requirement of use outside the Member state makes the subsidy contingent upon export. Accordingly, the Appellate Body held that since property produced within the United States must be exported to satisfy this condition, "then, the require-

[154] Panel Report on *Australia – Leather II*, para. 9.67.
[155] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.370 and 7.372.
[156] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.33.
[157] Panel Report on *Canada – Aircraft*, para. 9.343.
[158] Panel Report on *Canada – Aircraft*, para. 9.343.
[159] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 114–115.

ment of use outside the United States makes the grant of the tax benefit contingent upon export".[160]

112. The Appellate Body on *US – FSC (Article 21.5 – EC)* noted that its conclusion was not affected by the fact that the subsidy could also be obtained through production abroad, and that there was no export contingency in this second situation.[161] The Appellate Body recalled:

> "[T]he measure at issue in the original proceedings in *US – FSC* contained an almost identical condition relating to 'direct use . . . outside the United States' for property produced in the United States. In that appeal, we upheld the panel's finding that the combination of the requirements to produce property in the United States and use it outside the United States gave rise to export contingency under Article 3.1(a) of the *SCM Agreement*. We see no reason, in this appeal, to reach a conclusion different from our conclusion in the original proceedings, namely that there is export contingency, under Article 3.1(a), where the grant of a subsidy is conditioned upon a requirement that property produced in the United States be used outside the United States.
>
> We recall that the ETI measure grants a tax exemption in two different sets of circumstances: (a) where property is produced *within* the United States and held for use *outside* the United States; and (b) where property is produced *outside* the United States and held for use outside the United States. Our conclusion that the ETI measure grants subsidies that are export contingent in the first set of circumstances is not affected by the fact that the subsidy can also be obtained in the second set of circumstances. The fact that the subsidies granted in the second set of circumstances *might* not be export contingent does not dissolve the export contingency arising in the first set of circumstances. Conversely, the export contingency arising in these circumstances has no bearing on whether there is an export contingent subsidy in the second set of circumstances. Where a United States taxpayer is simultaneously producing property within and outside the United States, for direct use outside the United States, subsidies may be granted under the ETI measure in respect of both sets of property. The subsidy granted with respect to the property produced within the United States, and exported from there, is export contingent within the meaning of Article 3.1(a) of the *SCM Agreement*, irrespective of whether the subsidy given in respect of property produced outside the United States is also export contingent."

(e) Relationship with other Articles

(i) Article 4.7

113. In *Canada – Dairy (Article 21.5 – New Zealand and US)*, the Panel noted that a finding of violation with respect to Article 3.1 of the *SCM Agreement* would affect the specificity of the recommendation to be made by the Panel, due to the more precise implementation requirements under Article 4.7 of the *SCM Agreement*, providing that an export subsidy be withdrawn without delay. However, the Panel observed that because of the context of the case, it would *not* be able to recommend that Canada "withdraw" measures constituting an export subsidy exclusively in respect of agricultural products. The Panel stated:

> "Since the Panel, in case it would make an affirmative finding in respect of Article 3.1 of the *SCM Agreement*, would not be able to make the withdrawal recommendation provided for in the first sentence of Article 4.7 of the *SCM Agreement*, the Panel does not need to consider the first sentence of Article 4.7 to determine whether or not it should exercise judicial economy. Having found that it would not be able make a recommendation to withdraw the subsidy, in accordance with the first sentence of Article 4.7, the Panel considers that, *a fortiori*, it would not be able to specify a *time-period for* withdrawal, in accordance with the second sentence of Article 4.7."[162]

(ii) Article 27

114. The Panel on *Brazil – Aircraft* addressed the relationship between Articles 3.1(a), 27.2(b) and 27.4. More specifically, the Panel was called upon to determine the allocation of burden of proof applicable to the special provision of Article 27.2, which establishes that the

---

[160] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 117.

[161] See also Panel Report on *US – FSC (Article 21.5 – EC)*, paras. 8.64 and 8.72. Citing the Report of the Appellate Body in *Canada – Aircraft*, the Panel in *US – FSC (Article 21.5 – EC)* found that the fact that the measures at stake also involve subsidies with respect to goods produced *outside* the Member does not "vitiate" the export contingency with respect to *Member-produced* goods.

> "We do not believe that it is necessary that the Act involves exclusively subsidies that are export-dependent in order to make a finding that the Act involves a defined segment of subsidies. . . . The fact that the Act also involves subsidies with respect to goods produced outside the United States . . . does not, in our view, vitiate the export-contingency of the Act that we find in respect of US-produced goods. We find support for our view that export-contingent subsidies may exist in the context of a broader subsidies scheme in the reasoning of the Appellate Body in *Canada – Aircraft*. [para 179] and
>
> . . .
>
> [I]n our view, a way to cure export-contingency in this case would be to eliminate the conditionality on export by making the subsidy available irrespective of whether a product of national origin is sold in the domestic market or abroad. It is the differential treatment provided for in the Act – that is, if US-produced goods are exported, the subsidy is available, while if they are sold in the domestic market, it is not – that renders the Act contingent upon export performance within the meaning of Article 3.1(a). The addition of other circumstances or products in respect of which the subsidy may be available – i.e. foreign-produced goods – does not eliminate the conditionality of the subsidy upon export, and thus does not cure the inconsistency with Article 3.1(a) of the *SCM Agreement*."

[162] Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 6.100.

prohibition contained in Article 3.1(a) shall not apply to developing country Members, provided that the requirements of Article 27.4 are met. The Panel in a finding upheld by the Appellate Body considered that "until non-compliance with the conditions set out in Article 27.4 is demonstrated, there is also, on the part of a developing country Member within the meaning of Article 27.2(b), no inconsistency with Article 3.1(a)".[163]

115. The Appellate Body on *Brazil – Aircraft* emphasized that "the conditions set forth in paragraph 4 are positive obligations for developing country Members, not affirmative defenses. If a developing country Member complies with the obligations in Article 27.4, the prohibition on export subsidies in Article 3.1(a) simply does not apply."[164]

116. The Appellate Body on *Brazil – Aircraft* agreed with the Panel "that the burden [of proof] is on the complaining party (*in casu* Canada) to demonstrate that the developing country Member (*in casu* Brazil) is not in compliance with at least one of the elements set forth in Article 27.4. If such non-compliance is demonstrated, then, and only then, does the prohibition of Article 3.1(a) *apply* to that developing country Member."[165]

117. As regards the extension of the Article 27.4 transition period for developing and least-developed countries of the export subsidy prohibition, see paragraphs 341 and 366–373 below. With regard to the graduation methodology from Annex VII(b), see paragraphs 491–495 below.

(iii) Footnote 59

118. In *US – FSC*, the Appellate Body addressed the United States' claim that footnote 59 exempts a measure from being an export subsidy within the meaning of Article 3.1(a) and that the 1981 Council Action serves as a confirmation for this exemption. In rejecting this argument, the Appellate Body proceeded to examine footnote 59 sentence by sentence:

> "The first sentence of footnote 59 is specifically related to the statement in item (e) of the Illustrative List that the 'full or partial exemption remission, or deferral specifically related to exports, of direct taxes' is an export subsidy. The first sentence of footnote 59 qualifies this by stating that 'deferral need not amount to an export subsidy where, for example, appropriate interest charges are collected.' Since the FSC measure does not involve the *deferral* of direct taxes, we do not believe that this sentence of footnote 59 bears upon the characterization of the FSC measure as constituting, or not, an 'export subsidy'.
>
> The second sentence of footnote 59 'reaffirms' that, in allocating export sales revenues, for tax purposes, between exporting enterprises and controlled foreign buyers, the price for the goods shall be determined according to the 'arm's length' principle to which that sentence of the footnote refers. Like the Panel, we are willing to accept, for the sake of argument, the United States' position that it is 'implicit' in the requirement to use the arm's length principle that Members of the WTO are not obliged to tax foreign-source income, and also that Members may tax such income less than they tax domestic-source income. We would add that, even in the absence of footnote 59, Members of the WTO are *not* obliged, by WTO rules, to tax *any* categories of income, whether foreign- or domestic-source income. The United States argues that, since there is no requirement to tax export-related foreign-source income, a government cannot be said to have 'foregone' revenue if it elects not to tax that income. It seems to us that, taken to its logical conclusion, this argument by the United States would mean that there could *never* be a foregoing of revenue 'otherwise due' because, in principle, under WTO law generally, *no* revenues are ever due and *no* revenue would, in this view, ever be 'foregone'. That cannot be the appropriate implication to draw from the requirement to use the arm's length principle."[166]

119. The Appellate Body further found that the arm's-length principle contained in the second sentence of footnote 59 could not shed light on the issue before the Panel, namely whether the United States' tax measure was a prohibited export subsidy:

> "Furthermore, we do not believe that the requirement to use the arm's length principle resolves the issue that arises here. That issue is *not*, as the United States suggests, whether a Member is or is not obliged to tax a particular category of foreign-source income. As we have said, a Member is not, in general, under any such obligation. Rather, the issue in dispute is whether, *having decided to tax a particular category of foreign-source income*, namely foreign-source income that is 'effectively connected with a trade or business within the United States', the United States is *permitted to carve out an export contingent exemption from the category of foreign-source income that is taxed under its other rules of taxation*. Unlike the United States, we do not believe that the second sentence of footnote 59 addresses this question. It plainly does not do so expressly; neither, as far as we can see, does it do so by necessary implication. As the United States indicates, the arm's length principle operates when a Member chooses not to tax, or to tax less, certain categories of foreign-source income. However, the operation of the arm's length principle is unaffected by the choice a Member makes as to *which* categories of foreign-source income, if any, it will not tax, or will tax less. Likewise, the oper-

[163] Panel Report on *Brazil – Aircraft*, para. 7.56.
[164] Appellate Body Report on *Brazil – Aircraft*, para. 140.
[165] Appellate Body Report on *Brazil – Aircraft*, para. 141.
[166] Appellate Body Report on *US – FSC*, paras. 97–98.

ation of the arm's length principle is unaffected by the choice a Member might make to grant exemptions from the generally applicable rules of taxation of foreign-source income that it has selected for itself. In short, the requirement to use the arm's length principle does not address the issue that arises here, nor does it authorize the type of export contingent tax exemption that we have just described. Thus, this sentence of footnote 59 does not mean that the FSC subsidies are not export subsidies within the meaning of Article 3.1(a) of the *SCM Agreement*.

The third and fourth sentences of footnote 59 set forth rules that relate to remedies. In our view, these rules have no bearing on the substantive obligations of Members under Articles 1.1 and 3.1 of the *SCM Agreement*."[167]

120. The Appellate Body on *US – FSC* then declined to examine the United States' claim under the fifth sentence of footnote 59, namely that the United States' measure was one taken to avoid double taxation of foreign-source income. The Appellate Body noted that the issue had not been properly litigated before the Panel and therefore declined to address the United States' claim.[168]

(f) Annex VII(b)

121. With regard to the graduation methodology from Annex VII(b), see paragraphs 491–495 below.

(g) Footnote 4

122. With respect to the relationship between "tied to" in footnote 4 and "contingent . . . in law", see paragraphs 93–95 above.

123. With respect to the three substantive elements in footnote 4 as identified by the Appellate Body in *Canada – Aircraft*, see paragraph 98 above.

124. With respect to the requirement to examine all facts concerning the grant or maintenance of a subsidy, see paragraph 101 above. As regards the significance of the phrase "enterprises which export" within the *de facto* export contingency analysis, see paragraphs 101, 104 and 107 above.

2. Relationship with other WTO Agreements

(a) GATT 1994

125. In *Canada – Autos*, the Panel, after finding violations of Article III:4 of the *GATT 1994* and Article XVII of the *GATS*, exercised judicial economy with respect to alternative claims under Article 3.1(a). The Appellate Body upheld this exercise of judicial economy:

"In our view, it was not necessary for the Panel to make a determination on the . . . *alternative* claim relating to the CVA requirements under Article 3.1(a) . . . in order 'to secure a positive solution' to this dispute. The Panel had already found that the CVA requirements violated both Article III:4 of the GATT 1994 and Article XVII of the GATS. Having made these findings, the Panel, in our view, exercising the discretion implicit in the principle of judicial economy, could properly decide not to examine the *alternative* claim . . . that the CVA requirements are inconsistent with Article 3.1(a) of the *SCM Agreement*."[169]

(b) Agreement on Agriculture

126. In *Canada – Dairy (Article 21.5 – New Zealand and US)*, the Panel considered that Article 9.1 of the *Agreement on Agriculture* and Articles 1.1 and 3.1 of the *SCM Agreement* can be said to be "closely related" and "part of a logical continuum". Thus, the Panel considered that its reasoning regarding the claims made under Article 10.1 of the *Agreement on Agriculture* was equally relevant for the claims made under Articles 1.1 and 3.1 of the *SCM Agreement*. The Panel noted that:

"[T]he facts underlying the Article 9.1(c) and Article 10.1 claims are, in this case, fully co-extensive. The Panel believes that this conclusion also applies to the facts underlying the claims made under the *Agreement on Agriculture*, on the one hand, and those made under Articles 1.1 and 3.1 of the *SCM Agreement*, on the other. In addition, the Panel considers that Article 9.1 of the *Agreement on Agriculture* and Articles 1.1 and 3.1 of the *SCM Agreement* can be said to be 'closely related' and 'part of a logical continuum'. Thus, the Panel's reasoning set forth *supra* regarding the claims made under Article 10.1 of the *Agreement on Agriculture* is equally relevant for the claims made under Articles 1.1 and 3.1 of the *SCM Agreement*."[170]

127. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* noted that with regard to agricultural products, the WTO-consistency of an export subsidy has to be determined, in the first place, under the Agriculture Agreement. In this case, the Appellate Body recalled that it was unable to determine whether the measures at issue "conform[] fully" to Articles 9.1(c) or 10.1 of the *Agreement on Agriculture*. Therefore, the Appellate Body "decline[d] to examine" the claim under Article 3.1(a) of the *SCM Agreement*.[171] The Appellate Body held:

[167] Appellate Body Report on *US – FSC*, paras. 99–100.
[168] Appellate Body Report on *US – FSC*, paras. 101 and 103.
[169] Appellate Body Report on *Canada – Autos*, para. 116.
[170] Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 6.92.
[171] See also Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 6.101. where the Panel exercised judicial economy on the claims made under Articles 1.1 and 3.1 of the *SCM Agreement* after having made an affirmative finding regarding the claim made under Article 9.1(c) of the *Agreement on Agriculture*.

"The relationship between the *Agreement on Agriculture and the* SCM Agreement is defined, in part, by Article 3.1 of the *SCM Agreement*, which states that certain subsidies are 'prohibited' '[e]xcept as provided in the Agreement on Agriculture'. This clause, therefore, indicates that the WTO-consistency of an export subsidy for agricultural products has to be examined, in the first place, under the *Agreement on Agriculture*.

This is borne out by Article 13(c)(ii) of the *Agreement on Agriculture*, which provides that 'export subsidies that conform fully to the [export subsidy] provisions of Part V' of the *Agreement on Agriculture*, 'as reflected in each Member's Schedule, shall be . . . exempt from actions based on Article XVI of GATT 1994 or Articles 3, 5 and 6 of the Subsidies Agreement.'

In this appeal, we are unable to determine whether the measure at issue 'conforms fully' to Articles 9.1(c) or 10.1 of Part V of the *Agreement on Agriculture*. In these circumstances, we decline to examine the claim made by the United States that the measure is inconsistent with Article 3.1 of the *SCM Agreement*."[172]

128. In *Canada – Dairy (Article 21.5 – New Zealand and US)*, the Panel considered that when a Member exceeded its quantity commitment levels, the Panel could only recommend that the Member bring its measures into conformity with its obligations under the *Agreement on Agriculture*, and it could not require "withdrawal". Alternatively, assuming for the sake of argument, that it could make a recommendation to the Member to "withdraw" the export subsidy, the Panel considered that, pursuant to Article 21.1 of the *Agreement on Agriculture* and Article 3.1 of the *SCM Agreement*, the Panel could only do so with respect to that portion of the subsidized exports that exceeded the Member's reduction commitment levels under the *Agreement on Agriculture*.[173]

3. Article 3.1(b)

(a) "subsidies contingent . . . upon the use of domestic over imported goods"

(i) Contingency

129. Referring to its Report on *Canada – Aircraft* where it had held that "the ordinary connotation of 'contingent' is 'conditional' or 'dependent for its existence on something else'",[174] the Appellate Body in *Canada – Autos* opined that "this legal standard applies not only to 'contingency' under Article 3.1(a), but also to 'contingency' under Article 3.1(b)".[175]

(ii) De facto contingency

130. In *Canada – Autos*, the Panel had found that "contingency" under Article 3.1(b) extended only to *de jure* contingency and not also to *de facto* contingency. In making this finding, the Panel relied on the fact that Article 3.1(a) referred explicitly to both subsidies contingent "in law or in fact", while Article 3.1(b) did not contain such an explicit reference.[176] The Appellate Body reversed this finding and held that "contingency" under Article 3.1(b) includes *both* contingency in law and contingency in fact. In its analysis, the Appellate Body first agreed with the Panel that an omission (of an express provision) must have some meaning, but emphasized that the significance of such omission can vary from one case to another:

"In examining this issue, the Panel appears to have taken the view that the terms of Article 3.1(b), on their own, do not answer the question, and, therefore, it turned to the context provided by Article 3.1(a). In this respect, the Panel relied on the fact that, in Article 3.1(a), there is explicit language applying to subsidies contingent 'in law or in fact' while in Article 3.1(b) there is not. In the view of the Panel, the absence of such an explicit reference in the adjacent and closely-related provision of Article 3.1(b) indicates that the drafters intended Article 3.1(b) to apply only to those subsidies which are contingent 'in law' upon the use of domestic over imported goods.

In our view, the Panel's analysis was incomplete. As we have said, and as the Panel recalled, 'omission must have some meaning.' Yet omissions in different contexts may have different meanings, and omission, in and of itself, is not necessarily dispositive. Moreover, while the Panel rightly looked to Article 3.1(a) as relevant context in interpreting Article 3.1(b), the Panel failed to examine other contextual elements for Article 3.1(b) and to consider the object and purpose of the *SCM Agreement*."[177]

131. Having found that the omission of an explicit reference to *de facto* contingency in Article 3.1(b) was not dispositive of the question whether Article 3.1(b) actually extended to *de facto* contingency, the Appellate Body in *Canada – Autos* then considered the ordinary meaning and the context of this provision. While the Appellate Body agreed with the Panel that Article 3.1(a) was relevant context for Article 3.1(b), it held that "other contextual aspects should also be examined":

"We look first to the text of Article 3.1(b). In doing so, we observe that the ordinary meaning of the phrase 'contingent . . . upon the use of domestic over imported goods' is not conclusive as to whether Article 3.1(b) covers both subsidies contingent 'in law' and subsidies

[172] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, paras. 123–125.
[173] Panel Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 6.101.
[174] Appellate Body Report on *Canada – Aircraft*, para. 166. See para. 90 of this Chapter.
[175] Appellate Body Report on *Canada – Autos*, para. 123.
[176] Panel Report on *Canada – Autos*, paras. 10.220–10.222.
[177] Appellate Body Report on *Canada – Autos*, paras. 137–138.

contingent 'in fact' upon the use of domestic over imported goods. Just as there is nothing in the language of Article 3.1(b) that specifically *includes* subsidies contingent 'in fact', so, too, is there nothing in that language that specifically *excludes* subsidies contingent 'in fact' from the scope of coverage of this provision. As the text of the provision is not conclusive on this point, we must turn to additional means of interpretation. Accordingly, we look for guidance to the relevant context of the provision.

Although we agree with the Panel that Article 3.1(a) is relevant context, we believe that other contextual aspects should also be examined. First, we note that Article III:4 of the GATT 1994 also addresses measures that favour the use of domestic over imported goods, albeit with different legal terms and with a different scope. Nevertheless, both Article III:4 of the GATT 1994 and Article 3.1(b) of the *SCM Agreement* apply to measures that require the use of domestic goods over imports. Article III:4 of the GATT 1994 covers both *de jure* and *de facto* inconsistency. Thus, it would be most surprising if a similar provision in the *SCM Agreement* applied only to situations involving *de jure* inconsistency.

. . . The fact that Article 3.1(a) refers to 'in law or in fact', while those words are absent from Article 3.1(b), does not necessarily mean that Article 3.1(b) extends only to *de jure* contingency.

Finally, we believe that a finding that Article 3.1(b) extends only to contingency 'in law' upon the use of domestic over imported goods would be contrary to the object and purpose of the *SCM Agreement* because it would make circumvention of obligations by Members too easy.

. . .

For all these reasons, we believe that the Panel erred in finding that Article 3.1(b) does not extend to subsidies contingent 'in fact' upon the use of domestic over imported goods. We, therefore, reverse the Panel's broad conclusion that 'Article 3.1(b) extends only to contingency in law.'"[178]

(b) Relationship with other Articles

(i) Article 3.1(a)

132. As regards the use of Article 3.1(a) as context for the interpretation of Article 3.1(b), see paragraphs 130–131 above.

(ii) Article 27

133. As regards the transition period exemptions for developing and least developed countries, see paragraph 347 below.

4. Article 3.2

(a) "grant"

134. As the *Canada – Aircraft* dispute illustrates, under the *SCM Agreement* a Member may challenge a subsidy programme of another Member "as such" or, alternatively, "as applied". In addressing Brazil's challenge of certain Canadian subsidies "as such", the Panel on *Canada – Aircraft* recalled the distinction between mandatory and discretionary legislation. In so doing, the Panel invoked what it considered consistent GATT/WTO practice and emphasized that it "must first determine whether the . . . programme *per se* mandates the grant of prohibited export subsidies in a manner inconsistent with Articles 3.1(a) and 3.2 of the SCM Agreement".[179] The Panel continued as follows:

"In this regard, we recall the distinction that GATT/WTO panels have consistently drawn between discretionary legislation and mandatory legislation. For example, in *United States – Tobacco* the panel 'recalled that panels had consistently ruled that legislation which mandated action inconsistent with the General Agreement could be challenged as such, whereas legislation which merely gave the discretion to the executive authority . . . to act inconsistently with the General Agreement could not be challenged as such; only the actual application of such legislation inconsistent with the General Agreement could be subject to challenge'."[180]

135. In applying this standard to the facts of the case before it, the Panel on *Canada – Aircraft* concluded that "a mandate to support and develop Canada's export trade does not amount to a mandate to grant subsidies, since such support and development could be provided in a broad variety of ways".[181] As a consequence, the Panel on *Canada – Aircraft* held that it "may not make any findings on the EDC programme *per se*".[182]

136. The Panel on *Brazil – Aircraft* was called upon to decide whether Brazil had increased its level of export subsidies within the meaning of Article 27.4; because footnote 55 to Article 27.4 refers to the "grant" of export subsidies, the Panel addressed the question concerning at which particular point in time Brazil had actually been "granting" the disputed subsidies. Under the part of the Brazilian PROEX programme relating to interest equalization payments, the Brazilian Government would first approve a particular export transaction (between the Brazilian manufacturer and a foreign buyer) and issue a "letter of commitment" to the manufacturer; this letter would commit the Government to

[178] Appellate Body Report on *Canada – Autos*, paras. 139–143.
[179] Panel Report on *Canada – Aircraft*, para. 9.124.
[180] Panel Report on *Canada – Aircraft*, para. 9.124.
[181] Panel Report on *Canada – Aircraft*, para. 9.127.
[182] Panel Report on *Canada – Aircraft*, para. 9.129.

providing support, on the condition that the contract would indeed be concluded under the terms previously approved by the Government and entered into within a specific period of time. If these conditions were not fulfilled, the letter of commitment would expire. The actual interest equalization payments began after the aircraft had been exported and paid for under the relevant contract. The Brazilian Government, acting through the Brazilian National Treasury, would then issue bonds in the name of the bank financing the transaction; the bonds could be redeemed on a semi-annual basis for the duration of financing or sold for a discount in the securities market. In its analysis, the Panel began by comparing the term "grant" under Articles 3.2 and 27.4:

> "We note that Article 3.2 and Article 27.4 are provisions of the same Agreement. Further, both provisions relate to the prohibition on export subsidies set out under that Agreement. We do not perceive any basis to attribute to the term 'grant' as used in Article 3.2 of the *SCM Agreement* a meaning different from that attributed to that term by this Panel and the Appellate Body as used in Article 27.4 of the *SCM Agreement*."[183]

137. The Panel on *Brazil – Aircraft*, in a finding subsequently upheld by the Appellate Body,[184] then found that the "granting" of the subsidy at issue occurred when the bonds were issued by the Brazilian National Treasury to the bank financing the export transaction:

> "It is clear to us, however, that PROEX payments have not yet been 'granted' at the time a letter of commitment is issued. We note that the issuance of a letter of commitment, even if legally binding on the Government of Brazil in the event certain conditions are fulfilled, provides no assurance that PROEX payments will actually be made . . . [T]he right to receive the PROEX payments only arises after the conditions relating to receipt of PROEX payments, and specifically the condition that the product in question actually be exported, has been fulfilled . . .
>
> The question remains whether PROEX payments are 'granted' when the bonds are issued or whether they are granted only when the bonds are redeemed on a semi-annual basis. In our view, PROEX payments should be considered to be 'granted' when bonds are issued and title to those bonds is transferred to the lender financial institution . . . [W]e note that, while the bonds cannot be immediately redeemed, they are freely negotiable. The parties agree that lenders may exercise their right to sell these bonds – albeit at a discount as determined by the market – to other entities rather than waiting until maturity to redeem the bonds themselves. Thus, at the point that title to the bonds is passed to the lenders, those lenders are the holders of a property right with a market value which is immediately realisable. Accordingly, we conclude that PROEX payments are 'granted' at that point, and we will calculate Brazil's PROEX expenditures on that basis."[185]

138. In *Brazil – Aircraft*, while agreeing with the Panel on *when* the subsidy in question was granted, the Appellate Body criticized the Panel for making findings on *whether* a subsidy *existed*. More specifically, the Appellate Body held that in the case at hand, the Panel, in its findings on Article 27.4, did not have to make findings on the existence of a subsidy within the meaning of Article 1 of the *SCM Agreement*, because the export subsidies in that case were already deemed to "exist".[186]

139. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* built on this distinction made by the Appellate Body in *Brazil – Aircraft* between the question of the *existence* of a subsidy and the question of the precise moment of the "granting" of such subsidy and held that this distinction, drawn by the Appellate Body in the context of Article 27.4, applied equally with respect to Article 3.2 of the *SCM Agreement*:

> "We recognize that the distinction made by the Appellate Body was between the existence of a subsidy and when a subsidy is granted related to when a subsidy is granted *for the purposes of Article 27.4* of the *SCM Agreement*, and not when it was granted *for the purposes of Article 3.2*. As a matter of logic, however, we cannot perceive . . . any basis for us to conclude that, while the existence of a subsidy is a legally distinct issue from when it is granted for the purposes of Article 27.4, it is *not* a legally distinct issue from when it is granted for the purposes of Article 3.2. In other words, if the issue of when a subsidy is 'granted' *for the purposes of Article 27.4* is legally distinct from when it 'exists' for the purposes of Article 1, then it follows that the issue of when a subsidy is granted *for the purposes of Article 3.2* is also legally distinct from the issue when it exists for the purposes of Article 1."[187]

(b) Relationship with other Articles

(i) Article 3.1

140. In *US – FSC (Article 21.5 – EC)*, the Panel concluded that by maintaining prohibited export subsidies, the defendant also acted inconsistently with Article 3.2 of the *SCM Agreement*. The Panel stated:

> "We therefore view this claim as wholly dependent upon our resolution of the claims under Article 3.1 of the *SCM Agreement*. Recalling our finding that the Act involves prohibited export subsidies in breach of Article 3.1(a) of

[183] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 6.11.
[184] Appellate Body Report on *Brazil – Aircraft*, para. 159.
[185] Panel Report on *Brazil – Aircraft*, paras. 7.71–7.72.
[186] Appellate Body Report on *Brazil – Aircraft*, paras. 156–157.
[187] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 6.14.

the *SCM Agreement* by reason of the requirement of 'use outside the United States', we find that by maintaining the subsidies under the Act, the United States has acted inconsistently with its obligation under Article 3.2 of the *SCM Agreement* not to maintain subsidies referred to in paragraph 1 of Article 3 of the *SCM Agreement*."[188]

(ii) Article 27.4

141. With respect to the relationship with Article 27.4, see paragraphs 136–138 above.

IV. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Remedies

4.1 Whenever a Member has reason to believe that a prohibited subsidy is being granted or maintained by another Member, such Member may request consultations with such other Member.

4.2 A request for consultations under paragraph 1 shall include a statement of available evidence with regard to the existence and nature of the subsidy in question.

4.3 Upon request for consultations under paragraph 1, the Member believed to be granting or maintaining the subsidy in question shall enter into such consultations as quickly as possible. The purpose of the consultations shall be to clarify the facts of the situation and to arrive at a mutually agreed solution.

4.4 If no mutually agreed solution has been reached within 30 days[6] of the request for consultations, any Member party to such consultations may refer the matter to the Dispute Settlement Body ("DSB") for the immediate establishment of a panel, unless the DSB decides by consensus not to establish a panel.

(*footnote original*) [6] Any time-periods mentioned in this Article may be extended by mutual agreement.

4.5 Upon its establishment, the panel may request the assistance of the Permanent Group of Experts[7] (referred to in this Agreement as the "PGE") with regard to whether the measure in question is a prohibited subsidy. If so requested, the PGE shall immediately review the evidence with regard to the existence and nature of the measure in question and shall provide an opportunity for the Member applying or maintaining the measure to demonstrate that the measure in question is not a prohibited subsidy. The PGE shall report its conclusions to the panel within a time-limit determined by the panel. The PGE's conclusions on the issue of whether or not the measure in question is a prohibited subsidy shall be accepted by the panel without modification.

(*footnote original*) [7] As established in Article 24.

4.6 The panel shall submit its final report to the parties to the dispute. The report shall be circulated to all Members within 90 days of the date of the composition and the establishment of the panel's terms of reference.

4.7 If the measure in question is found to be a prohibited subsidy, the panel shall recommend that the subsidizing Member withdraw the subsidy without delay. In this regard, the panel shall specify in its recommendation the time-period within which the measure must be withdrawn.

4.8 Within 30 days of the issuance of the panel's report to all Members, the report shall be adopted by the DSB unless one of the parties to the dispute formally notifies the DSB of its decision to appeal or the DSB decides by consensus not to adopt the report.

4.9 Where a panel report is appealed, the Appellate Body shall issue its decision within 30 days from the date when the party to the dispute formally notifies its intention to appeal. When the Appellate Body considers that it cannot provide its report within 30 days, it shall inform the DSB in writing of the reasons for the delay together with an estimate of the period within which it will submit its report. In no case shall the proceedings exceed 60 days. The appellate report shall be adopted by the DSB and unconditionally accepted by the parties to the dispute unless the DSB decides by consensus not to adopt the appellate report within 20 days following its issuance to the Members.[8]

(*footnote original*) [8] If a meeting of the DSB is not scheduled during this period, such a meeting shall be held for this purpose.

4.10 In the event the recommendation of the DSB is not followed within the time-period specified by the panel, which shall commence from the date of adoption of the panel's report or the Appellate Body's report, the DSB shall grant authorization to the complaining Member to take appropriate[9] countermeasures, unless the DSB decides by consensus to reject the request.

(*footnote original*) [9] This expression is not meant to allow countermeasures that are disproportionate in light of the fact that the subsidies dealt with under these provisions are prohibited.

4.11 In the event a party to the dispute requests arbitration under paragraph 6 of Article 22 of the Dispute Settlement Understanding ("DSU"), the arbitrator shall determine whether the countermeasures are appropriate.[10]

(*footnote original*) [10] This expression is not meant to allow countermeasures that are disproportionate in light of the fact that the subsidies dealt with under these provisions are prohibited.

4.12 For purposes of disputes conducted pursuant to this Article, except for time-periods specifically prescribed in this Article, time-periods applicable under the DSU for the conduct of such disputes shall be half the time prescribed therein.

[188] Panel Report on *US – FSC (Article 21.5 – EC)*, para. 8.110.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. General

(a) Accelerated procedure and the deadline for the submission of new evidence, allegations and affirmative defences

142. The Panel on *Canada – Aircraft* rejected the request for a preliminary ruling that the complaining party may not adduce new evidence or allegations after the end of the first substantive meeting of the panel with the parties. Canada had argued that given the accelerated procedure under Article 4 of the *SCM Agreement*, the late submission of allegations or evidence by Brazil, the other party in the dispute, would be prejudicial to Canada's position, as Canada would effectively be denied an adequate opportunity to respond to these allegations or evidence.[189] The Panel referred to the Appellate Body's finding in *Argentina – Textiles and Apparel* that "neither Article 11 of the DSU, nor the Working Procedures in Appendix 3 of the DSU, establish precise deadlines for the presentation of evidence by parties to a dispute",[190] and concluded that "[t]here is nothing in the DSU, or in the Appendix 3 Working Procedures, to suggest that a different approach should be taken in 'fast-track' cases under Article 4 of the SCM Agreement".[191]

143. The Panel on *Canada – Aircraft* followed the reasoning set out in the previous paragraph regarding the submission of new allegations and stated that "[w]e can see nothing in the DSU, or in the Appendix 3 Working Procedures, that would require the submission of new allegations to be treated any differently than the submission of new evidence".[192]

144. In the Panel proceedings in *Canada – Aircraft*, Brazil requested the Panel not to accept any affirmative defences by Canada, the responding party, which had not been submitted prior to the end of the first substantive meeting,[193] on the basis that "this is particularly important in this fast-track proceeding".[194] The Panel stated that "there is nothing in the DSU, or in Appendix 3 Working Procedures, to prevent a party submitting new evidence or allegations after the first substantive meeting. We can see no basis in the DSU to treat the submission of affirmative defences after the first substantive meeting any differently."[195] However, the Panel added that "Brazil's due process rights would not be respected if Canada were able to submit an affirmative defence ... after the second substantive meeting with the Panel."[196]

145. The Panel on *US – FSC* had found that the European Communities' request for consultations under Article 4.1 of the *SCM Agreement* contained a sufficient statement of available evidence within the meaning of Article 4.2, and, consequently, rejected the United States' request that the Panel dismiss the European Communities' claim as not properly before it as a result of the alleged insufficiency of the statement of available evidence. Upon appeal, the Appellate Body rejected the United States' appeal with respect to the second point and, as a result, declined to rule on the United States' appeal on the first point, i.e. whether the European Communities had given a sufficient statement of available evidence within the meaning of Article 4.2. In its analysis, the Appellate Body distinguished between the requirements imposed on the complaining party under Article 4.4 of the *DSU* and Article 4.2 of the *SCM Agreement* and held that the Panel had not differentiated between these requirements carefully enough:

> "Article 1.2 of the DSU states that 'the rules and procedures of the DSU shall apply subject to the special or additional rules and procedures on dispute settlement contained in the covered agreements as are identified in Appendix 2 to this Understanding'. Article 4.2 of the *SCM Agreement* is listed as a 'special or additional rule or procedure' in Appendix 2 to the DSU. In our Report in *Guatemala – Cement*, we said that 'the rules and procedures of the DSU apply *together with* the special or additional provisions of the covered agreement' except that, 'in the case of a *conflict* between them', the special or additional provision prevails.[197] Article 4.4 of the DSU requires that all requests for consultations, under the covered agreements, 'give reasons for the request, including *identification of the measures at issue* and an *indication of the legal basis for the complaint*.' (emphasis added) It is clear to us that Article 4.4 of the DSU and Article 4.2 of the *SCM Agreement* can and should be read and applied together, so that a request for consultations relating to a prohibited subsidy claim under the *SCM Agreement* must satisfy the requirements of both provisions.
>
> Article 4 of the *SCM Agreement* provides for accelerated dispute settlement procedures for claims involving prohibited subsidies under Article 3 of the *SCM Agreement*. The determination of whether a prohibited subsidy is being granted or maintained under Article 3 of the *SCM Agreement* raises complex factual questions, particularly in the case of subsidies that are claimed to be *de facto* contingent upon export performance. Also, Article 4.5

[189] Panel Report on *Canada – Aircraft*, para. 9.70.
[190] Panel Report on *Canada – Aircraft*, para. 9.72.

of the *SCM Agreement* allows a panel to request the assistance of the Permanent Group of Experts on whether the measure is a prohibited subsidy. Given the accelerated timeframes for disputes involving claims of prohibited subsidies, and given that the issue of whether a measure is a prohibited subsidy often requires a detailed examination of facts, it is important to stress the requirement of Article 4.2 that there be 'a statement of available evidence with regard to the existence and nature of the subsidy in question' at the consultation stage in a dispute.

We emphasize that this additional requirement of 'a statement of available evidence' under Article 4.2 of the *SCM Agreement* is distinct from – and not satisfied by compliance with – the requirements of Article 4.4 of the DSU. Thus, as well as giving the reasons for the request for consultations and identifying the measure and the legal basis for the complaint under Article 4.4 of the DSU, a complaining Member must also indicate, in its request for consultations, the evidence that it has available to it, at that time, 'with regard to the existence and nature of the subsidy in question'. In this respect, it is available evidence of the character of the measure as a 'subsidy' that must be indicated, and not merely evidence of the existence of the measure. We would have preferred that the panel give less relaxed treatment to this important distinction."[198]

2. Article 4.2

(a) "include a statement of available evidence"

(i) Concept of statement of available evidence

146. The Panel on *US – FSC*, in a finding confirmed by the Appellate Body,[199] considered the ordinary meaning of the terms "statement of available evidence" and indicated that a complainant must identify but need not annex available evidence to its request for consultations. It also considered that there is no need to use explicitly the words "statement of available evidence" provided that the relevant evidence is itself referred to. The Panel considered:

"We note that the word 'evidence' has been defined as 'available facts, circumstances, etc., supporting or otherwise a belief, proposition, etc.', the word 'available' has been defined as 'at one's disposal', and the word 'statement' has been defined as 'expression in words'.[200] Thus, in its ordinary meaning Article 4.2 requires that a Member include in its request for consultations an expression in words of the facts at its disposal at the time it requests consultations in support of its view that it has, in the words of Article 4.1, 'reason to believe that a prohibited subsidy is being granted or maintained'. On the basis of the ordinary meaning of Article 4.2, it is evident that a complainant must identify, but need not annex, available evidence to its request for consultations.

. . . Although the European Communities did not recite the formulation 'statement of available evidence' when referring to these materials, we do not consider that the explicit use of that descriptive term is necessary provided that the relevant evidence is itself referred to. It is true, of course, that the European Communities in its first submission referred to a variety of additional materials, primarily in the form of secondary sources,[201] and that these additional materials were not identified in the request for consultations. Even assuming that these materials represent "evidence" and that a Member is required to identify *all* available evidence in its request for consultations, we are not in a position to determine whether as a factual matter these materials were at the disposal of the European Communities at the time it made its request for consultations and that the European Communities knew at that time that it would rely on those materials. In short, it may well be that the European Communities' request for consultations does contain a statement of available evidence."[202]

147. In *US – FSC*, the Appellate Body rejected the United States' argument that a complaint should be dismissed because the complainant failed to "include a statement of available evidence" in its request for consultations. The Appellate Body pointed out a variety of facts, for example, that "[f]ollowing the European Communities' request for consultations, the United States and the European Communities held three separate sets of consultations over a period of nearly five months".[203] The Appellate Body also invoked Article 3.10 of the *DSU* and the principle of good faith:

"Article 3.10 of the DSU commits Members of the WTO, if a dispute arises, to engage in dispute settlement procedures 'in good faith in an effort to resolve the dispute'. This is another specific manifestation of the principle of good faith which, we have pointed out, is at once a general principle of law and a principle of general international law.[204] This pervasive principle requires both

[199] Appellate Body Report on *US – FSC*, paras. 155–166.

[200] (*footnote original*) Concise Oxford Dictionary, Ninth edition, 1995.

[201] (*footnote original*) The materials in questions were comprised of testimony before the US Congress, reports and other descriptive materials relating to the FSC prepared by US government officials, articles in tax, legal and business publications about the FSC, copies of the requests for consultations and establishment of a panel in this dispute, and excerpts from OECD *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*. All of these materials are explanatory of the FSC except for the OECD *Guidelines*, which were submitted in support of the European Communities' view of the meaning of the concept of the "arm's length" principle referred to in footnote 59 to the SCM Agreement.

[202] Panel Report on *US – FSC*, paras. 7.5–7.6.

[203] Appellate Body Report on *US – FSC*, para. 162.

[204] (*footnote original*) Appellate Body Report on *US – Shrimp*, fn, 99. In that report, we addressed the issue of good faith in the context of the chapeau of Article XX of the GATT 1994.

complaining and responding Members to comply with the requirements of the DSU (and related requirements in other covered agreements) in good faith. By good faith compliance, complaining Members accord to the responding Members the full measure of protection and opportunity to defend, contemplated by the letter and spirit of the procedural rules. The same principle of good faith requires that responding Members seasonably and promptly bring claimed procedural deficiencies to the attention of the complaining Member, and to the DSB or the panel, so that corrections, if needed, can be made to resolve disputes. The procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes."[205]

148. Rejecting the argument that Article 4.2 "imposes an obligation on the complainant to disclose in its request for consultations, not only facts, but also the argumentation why such facts lead the complainant to believe there is a violation of Article 3.1",[206] the Panel on *Australia – Automotive Leather II* (a case which was not appealed) stated that "[t]he ordinary meaning of the phrase 'include a statement of available evidence' does not, on its face, require disclosure of arguments in the request for consultations. Nothing in the context or object and purpose of Article 4.2 . . . suggests a different conclusion."[207] The Panel on *Australia – Automotive Leather II* then addressed the claim that Article 4.2 requires the disclosure of all facts and evidence upon which the complaining Member intends to rely in the course of the dispute settlement proceedings:

"Turning to the question of what is required as a 'statement of available evidence', we note that Australia reads this to require disclosure of all facts and evidence on which the complaining Member will rely in the course of the dispute. Indeed, Australia asserts that any exhibits should have been provided at the time consultations were requested. The ordinary meaning of the phrase 'statement of available evidence' does not support Australia's position. The word 'evidence' is defined as 'available facts, circumstances, etc., supporting or otherwise a belief, proposition, etc.' 'Available' is defined as 'at one's disposal', and 'statement' is defined as 'expression in words'. Thus, based on the ordinary meaning of the terms, Article 4.2 requires a complaining Member to include in the request for consultations an expression in words of the facts at its disposal at the time it requests consultations in support of the conclusion that it has, in the words of Article 4.1, 'reason to believe that a prohibited subsidy is being granted or maintained'. . . .

Moreover, nothing in the context or object and purpose of Article 4.2 suggests to us that the statement of available evidence must be as comprehensive as Australia would require. The mere fact that proceedings under Article 4 of the SCM Agreement are accelerated by comparison to dispute settlement proceedings under the DSU does not, in our view, require us to read into Article 4.2 a requirement that the complainant disclose all facts and arguments in its request for consultations. . . . To the extent that the additional requirement of Article 4.2 can be linked to the expedited nature of the proceedings, the additional requirement of a statement of available evidence satisfies the need adequately to apprise the responding Member of the information upon which the complaining Member bases its request for consultations, and serves in addition to inform the resulting consultations."[208]

149. The Panel on *Australia – Automotive Leather II* also rejected the arguments that "the requirement of Article 4.2, that a request for consultations 'include a statement of available evidence', in conjunction with the expedited nature of the proceedings, [requires] a panel to limit the complaining Member to using the evidence and arguments set forth in the request for consultations",[209] and "that to allow a complainant to come forward with additional facts and arguments in its first submission is inconsistent with Article 4 of the SCM Agreement".[210] In so holding, the Panel referred to its obligation under Article 11 of the *DSU* to conduct an objective assessment of the matter before it; specifically, the Panel held that "a decision to limit the facts and arguments that the United States may present during the course of this proceeding to those set forth in the request for consultations would make it difficult, if not impossible, for us to fulfill our obligation to conduct an 'objective assessment' of the matter before us".[211]

150. In rejecting Australia's claim that in the light of the requirement under Article 4.2 to make a "statement of available evidence", a complainant was disallowed from coming forward with additional facts and arguments in its first submission, the Panel did not rely exclusively on Article 11 of the *DSU* (see paragraph 149 above). The Panel on *Australia – Automotive Leather II* also referred to the right of panels, under Article 13.2 of the *DSU*, to seek information from any relevant source, a right which, in the opinion of the Panel, is in no way curtailed by Article 4 of the *SCM Agreement*. Finally, the Panel also considered the requirements with respect to the request for consultations:

"Article 4.2 does contain a requirement, not present in the DSU, that a complainant include a 'statement of available evidence' in its request for consultations. How-

[205] Appellate Body Report on *US – FSC*, para. 166.
[206] Panel Report on *Australia – Automotive Leather II*, para. 9.17.
[207] Panel Report on *Australia – Automotive Leather II*, para. 9.18.
[208] Panel Report on *Australia – Automotive Leather II*, paras. 9.19–9.20.
[209] Panel Report on *Australia – Automotive Leather II*, para. 9.24.
[210] Panel Report on *Australia – Automotive Leather II*, para. 9.24.
[211] Panel Report on *Australia – Automotive Leather II*, para. 9.25.

ever, we do not consider that the scope of the evidence that a panel may consider is limited in any way by such a statement of available evidence. In this respect, we note Article 4.3 of the SCM Agreement, which explicitly states that one of the purposes of consultations 'shall be to *clarify the facts of the situation*. . .'. (emphasis added) This provision implies that additional facts or evidence will be developed during consultations. Moreover, the Appellate Body has recognized that consultations play a significant role in developing the facts in a dispute settlement proceeding. For example, in *India – Patents*, the Appellate Body observed that 'the claims that are made *and the facts that are established during consultations* do much to shape the substance and the scope of subsequent panel proceedings'. (emphasis added) This is consistent with the view that a central purpose of consultations in general, and of consultations under Article 4 of the SCM Agreement in particular, is to clarify and develop the facts of the situation.

Moreover, we note that panels have, under Article 13.2 of the DSU, a general right to seek information 'from any relevant source'. Indeed, it is a common feature of panel proceedings for panelists to question parties about the facts and arguments underlying their positions. There is nothing in Article 4 of the SCM Agreement to suggest that this right is somehow limited by the expedited nature of dispute settlement proceedings conducted under that provision. If Australia's position were correct, a panel might be constrained from seeking out replacement information from the party . . . that was limited to reliance on the facts set forth in its request for consultations. Similarly, under Australia's view, the defending party might introduce information during the panel proceedings, which the complaining party . . . would not be able to rebut, as it would be limited to reliance on the facts set forth in its request for consultations. We do not believe Article 4.2 requires this result."[212]

151. Finally, the Panel on *Australia – Automotive Leather II* pointed out that a complaining Member is not required to include facts and arguments in its request for the establishment of a panel, noting that such request comes considerably later in the dispute settlement process than the request for consultations.[213]

(ii) Relation with request for establishment of a Panel

152. Evaluating the suggestion that "any impact on Canada's due process rights caused by the alleged absence of specificity in Brazil's request for establishment is compounded in an accelerated timetable",[214] the Panel on *Canada – Aircraft*, in a statement subsequently not addressed by the Appellate Body, noted that "although Article 4.2 of the SCM Agreement requires the Member requesting consultations to provide a 'statement of available evidence', there is nothing in either the DSU or the *SCM Agreement* to suggest that requests for establishment of panels for 'fast-track' cases should be any more precise than requests for establishment of panels in 'standard' WTO dispute settlement cases."[215]

(b) Relationship with other WTO Agreements

(i) DSU

153. With respect to the different evidence to be submitted in the course of consultations under Article 4.4 of the *DSU* and Article 4.2 of the *SCM Agreement*, respectively, see paragraph 145 above.

3. Article 4.3

(a) "shall be to clarify the facts of the situation"

154. With respect to this phrase, see paragraph 150 above.

4. Article 4.4

(a) Relationship between the matter before a panel as defined by its terms of reference and the matter consulted upon

155. In *Brazil – Aircraft*, the Panel was presented with the issue regarding "the relationship between the matter before a panel as defined by its terms of reference and the matter consulted upon."[216] Specifically, the Panel had to consider "whether and to what extent a panel is limited in its consideration of the matter identified in its terms of reference by the scope of the matter with respect to which consultations were held".[217] The Appellate Body agreed with the Panel's finding in this regard and stated as follows:

"In our view, Articles 4 and 6 of the DSU, as well as paragraphs 1 to 4 of Article 4 of the *SCM Agreement*, set forth a process by which a complaining party must request consultations, and consultations must be held, before a matter may be referred to the DSB for the establishment of a panel. Under Article 4.3 of the *SCM Agreement*, moreover, the purpose of consultations is 'to clarify the facts of the situation and to arrive at a mutually agreed solution.'

We do not believe, however, that Articles 4 and 6 of the DSU, or paragraphs 1 to 4 of Article 4 of the *SCM Agreement*, require a *precise and exact identity* between the specific measures that were the subject of consultations and the specific measures identified in the request for the establishment of a panel."[218]

[212] Panel Report on *Australia – Automotive Leather II*, para. 9.29.
[213] Panel Report on *Australia – Automotive Leather II*, para. 9.29.
[214] Panel Report on *Canada – Aircraft*, para. 9.29.
[215] Panel Report on *Canada – Aircraft*, para. 9.29.
[216] Panel Report on *Brazil – Aircraft*, para. 7.6.
[217] Panel Report on *Brazil – Aircraft*, para. 7.6.
[218] Appellate Body Report on *Brazil – Aircraft*, paras. 131–132. See also Panel Report on *Brazil – Aircraft*, paras. 7.9–7.11.

156. The Panel on *Canada – Aircraft* adopted a very similar approach to the relationship between a panel's terms of reference and the matter consulted upon:

> "In our view, a panel's terms of reference would only fail to be determinative of a panel's jurisdiction if, in light of Article 4.1 – 4.4 of the SCM Agreement applied together with Article 4.2 – 4.7 of the DSU, the complaining party's request for establishment were found to cover a 'dispute' that had not been the subject of a request for consultations. Article 4.4 of the SCM Agreement permits a Member to refer a 'matter' to the DSB if 'no mutually agreed solution' is reached during consultations. In our view, this provision complements Article 4.7 of the DSU, which allows a Member to refer a 'matter' to the DSB if 'consultations fail to settle a dispute'. Read together, these provisions prevent a Member from requesting the establishment of a panel with regard to a 'dispute' on which no consultations were requested. In our view, this approach seeks to preserve due process while also recognising that the 'matter' on which consultations are requested will not necessarily be identical to the 'matter' identified in the request for establishment of a panel. The two 'matters' may not be identical because, as noted by the Appellate Body in *India – Patents*, 'the claims that are made and the facts that are established during consultations do much to shape the substance and the scope of subsequent panel proceedings'."[219]

(b) Relationship with other WTO Agreements

157. With respect to the relationship between Article 4 of the *SCM Agreement* on the one hand and Articles 4 and 6 of the *DSU* on the other, see paragraphs 155–156 above. Concerning differences between the request for consultations and the establishment of a panel, see Section VI.B.3(d) in the Chapter on the *DSU*.

5. Article 4.5

(a) Relationship with other Articles

158. As regards the establishment of the Permanent Group of Experts by Article 24.3, see paragraph 325 below.

6. Article 4.7

(a) "withdraw the subsidy"

159. The Appellate Body on *Brazil – Aircraft (Article 21.5 – Canada)* analysed the meaning of the word "withdraw": "[W]e observe first that this word has been defined as 'remove', or 'take away', and as 'to take away what has been enjoyed; to take from.' This definition suggests that 'withdrawal' of a subsidy, under Article 4.7 of the *SCM Agreement*, refers to the 'removal' or 'taking away' of that subsidy."[220] Applied to the facts of the dispute, the Appellate Body stated: "In our view, to continue to make payments under an export subsidy measure found to be prohibited is not consistent with the obligation to 'withdraw' prohibited export subsidies, in the sense of 'removing' or 'taking away'."[221]

160. The Appellate Body on *Brazil – Aircraft (Article 21.5 – Canada)* considered the argument by Brazil that Brazil had a contractual obligation under domestic law to issue PROEX bonds pursuant to commitments that had already been made, and that Brazil could be liable for damages for breach of contract under Brazilian law if it failed to respect its contractual obligations. The Appellate Body considered that these issues were not relevant to the "issue of whether the DSB's recommendation to 'withdraw' the prohibited export subsidies permitted the continued issuance of NTN-I bonds under letters of commitment issued before [the date set by the Panel for the withdrawal of the prohibited subsidies]".[222]

161. In contrast to the findings of the Panel on *Brazil – Aircraft (Article 21.5 – Canada)*, the Panel on *Australia – Automotive Leather II (Article 21.5 – US)* did not limit its findings to a situation in which a Member *continues* to grant a prohibited subsidy. Rather, the Panel addressed the issue whether the term "withdraw the subsidy" is limited to a recommendation with purely prospective effect, or whether it also encompasses repayment:

> "Turning first to the ordinary meaning of the term, the word 'withdraw' has been defined as: 'pull aside or back . . .; take away, remove . . .; retract . . .' This definition does not suggest that 'withdraw the subsidy' necessarily requires only some prospective action. To the contrary, it suggests that the ordinary meaning of 'withdraw the subsidy' may encompass 'taking away' or 'removing' the financial contribution found to give rise to a prohibited subsidy. Consequently, an interpretation of 'withdraw the subsidy' that encompasses repayment of the prohibited subsidy seems a straightforward reading of the text of the provision.
>
> . . . In the case of 'actionable' subsidies, Members whose trade interests are adversely affected may, under Part III of the SCM Agreement, pursue multilateral dispute settlement in order to establish whether the subsidy in question has resulted in adverse effects to the interests of the complaining Member. If such a finding is made, the subsidizing Member 'shall take appropriate steps to remove the adverse effects *or shall withdraw the subsidy*'. Alternatively, a Member whose domestic industry

[220] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 45.
[221] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 45. See also Panel Report on *US – FSC (Article 21.5 – EC)*, para. 8.170.
[222] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 45.

> is injured by subsidized imports may impose a countervailing measure under Part V of the SCM Agreement, '*unless the subsidy or subsidies are withdrawn*'. In both cases, withdrawal of the subsidy is an alternative, available to the subsidizing Member, to some other action. Repayment of the subsidy would certainly effectuate withdrawal of the subsidy by a subsidizing Member so as to allow it to avoid action by the complaining Member. . . . Thus, the use of the term 'withdraw' elsewhere in the SCM Agreement further supports the suggestion that it may encompass repayment. (original emphasis)
>
> . . .
>
> . . . An interpretation of Article 4.7 of the SCM Agreement which would allow exclusively 'prospective' action would make the recommendation to 'withdraw the subsidy' under Article 4.7 indistinguishable from the recommendation to 'bring the measure into conformity' under Article 19.1 of the DSU, thus rendering Article 4.7 redundant."[223]

162. After rejecting the argument that the phrase "withdraw the subsidy" under Article 4.7 of the *SCM Agreement* refers to a recommendation with exclusively "prospective effect",[224] the Panel on *Australia – Automotive Leather II (Article 21.5 – US)* also rejected the notion that a repayment of portions of a subsidy which are deemed allocated over future periods of time should be considered a "prospective" remedy:

> "[W]e do not find meaningful the distinction proposed . . . between repayment of 'prospective' and 'retrospective' portions of past subsidies in the context of Article 4.7 of the SCM Agreement. We do not agree that it is possible to conclude that repayment of the 'prospective portion' of prohibited subsidies paid in the past is a remedy having only prospective effect. In our view, where any repayment of any amount of a past subsidy is required or made, this by its very nature is *not* a purely prospective remedy. No theoretical construct allocating the subsidy over time can alter this fact. In our view, if the term 'withdraw the subsidy' can properly be understood to encompass repayment of *any* portion of a prohibited subsidy, 'retroactive effect' exists."[225]

163. The Panel on *Brazil – Aircraft (Article 21.5 – Canada)* rejected Brazil's contention that requiring Brazil to cease issuing bonds pursuant to commitments made prior to the withdrawal date amounted to a retroactive remedy. Rather, the Panel opined that "the obligation to cease performing illegal acts in the future is a fundamentally prospective remedy".[226]

164. Addressing the question whether partial repayment can be sufficient, if repayment is necessary to "withdraw the subsidy", the Panel on *Australia – Automotive Leather II (Article 21.5 – US)* stated: "Having concluded that Article 4.7 of the SCM Agreement encompasses repayment, we can find no basis for concluding that anything less than full repayment would suffice to satisfy the requirement to 'withdraw the subsidy' in a case where repayment is necessary."[227] The Panel, however, rejected the inclusion of interest in the repayment of prohibited subsidies, opining that the remedy under Article 4.7 was not designed to fully restore the *status quo ante* nor was it a remedy intended to provide for reparation or compensation.[228]

(b) Time-period for withdrawal of measures

165. The Panel on *Brazil – Aircraft* determined that "taking into account the nature of the measures and the procedures which may be required to implement our recommendation, on the one hand, and the requirement that Brazil withdraw its subsidies 'without delay' on the other, we conclude that Brazil shall withdraw the subsidies within 90 days".[229] Agreeing with the Panel's conclusion and recommendation, the Appellate Body in *Brazil – Aircraft* noted that "there is a significant difference between the relevant rules and procedures of the DSU and the special or additional rules and procedures set forth in Article 4.7 of the *SCM Agreement*. Therefore, the provisions of Article 21.3 of the DSU are not relevant in determining the period of time for implementation of a finding of inconsistency with the prohibited subsidies provisions of Part II of the *SCM Agreement*."[230] See paragraph 171 below.

166. In *Australia – Automotive Leather II*, Australia suggested seven and a half months (half of what Australia considered the "normal" period of time for implementation of panel decisions) as the time-period for withdrawal under Article 4.7. The Panel disagreed:

> "Even assuming Australia is correct in its consideration of fifteen months as the 'normal' period of time for implementation of panel decisions, a question we do not reach, we do not agree that one-half of that period is appropriate in a dispute involving export subsidies. In the first place, Article 4.12 specifically provides that 'except

[230] Appellate Body Report on *Brazil – Aircraft*, para. 192.

> for time periods specifically prescribed in this Article' the time periods otherwise provided for in the DSU should be halved in export subsidy disputes. Article 4.7, which provides that the subsidy shall be withdrawn 'without delay', and that the panel shall specify the time-period for withdrawal of the measure in its recommendation, in our view establishes that the time-period for withdrawal is 'specifically prescribed in this Article', that is, in Article 4 of the SCM Agreement itself. Moreover, we do not, as a factual matter, believe that a period of seven and one-half months can reasonably be described as corresponding to the requirement that the measure must be withdrawn 'without delay'."[231]

167. In *US – FSC (Article 21.5 – EC)*, the Appellate Body clarified that the text of Article 4.7 requires withdrawal "without delay". The Appellate Body considered there was "no basis" for extending the time-period prescribed for withdrawal: (1) either to protect the contractual interests of private parties, or (2) to ensure an orderly transition to the regime of the new measure. The Appellate Body recalled that it had rejected similar arguments in *Brazil – Aircraft (Article 21.5 – Canada)*, because the obligation to withdraw prohibited subsidies "without delay" is "unaffected by contractual obligations that the Member itself may have assumed under municipal law". The Appellate Body stated:

> "Article 4.7 of the *SCM Agreement* requires prohibited subsidies to be withdrawn 'without delay', and provides that a time-period for such withdrawal shall be specified by the panel. We can see no basis in Article 4.7 of the *SCM Agreement* for extending the time-period prescribed for withdrawal of prohibited subsidies for the reasons cited by the United States. In that respect, we recall that, in *Brazil – Aircraft (Article 21.5 – Canada)*, Brazil made a similar argument to the one made by the United States in these proceedings. Brazil argued that, after the expiration of the time period for withdrawal of the prohibited export subsidies, it should be permitted to continue to grant certain of these subsidies because it had assumed contractual obligations, under municipal law, to do so.[232] We rejected this argument, and observed that:
>
> > . . . to continue to make payments under an export subsidy measure found to be prohibited is not consistent with the obligation to 'withdraw' prohibited export subsidies, in the sense of 'removing' or 'taking away'.[233]
>
> [A] Member's obligation under Article 4.7 of the *SCM Agreement* to withdraw prohibited subsidies "without delay" is unaffected by contractual obligations that the Member itself may have assumed under municipal law. Likewise, a Member's obligation to withdraw prohibited export subsidies, under Article 4.7 of the *SCM Agreement*, cannot be affected by contractual obligations which private parties may have assumed *inter se* in reliance on laws conferring prohibited export subsidies. Accordingly, we see no legal basis for extending the time-period for the United States to withdraw fully the prohibited FSC subsidies."[234]

168. In the same vein, with regard to the concept of "without delay" in Article 4.7, the Panel on *Canada – Aircraft Credits and Guarantees* took the view that because it "[is] required to make the recommendation provided for in Article 4.7 of the SCM Agreement, . . . [it] recommend[s] that Canada withdraw the subsidies identified above without delay"[235] and further clarified that Article 4.7

> "[P]rovides that 'the panel shall specify in its recommendation the time-period within which the measure must be withdrawn'. In other words, we are required to specify what period would represent withdrawal 'without delay'. Taking into account the procedures that may be required to implement our recommendation on the one hand, and the requirement that Canada withdraw its subsidies "without delay" on the other, we conclude that Canada shall withdraw the subsidies identified in sub-paragraphs (e), (f), and (g) of paragraph within 90 days."[236]

(c) Relationship with other Articles

(i) Article 7.8

169. The Panel on *Australia – Automotive Leather II (Article 21.5 – US)* referred to Article 7.8 in support of its finding in relation to the phrase "withdraw the subsidy" under Article 4.7. The Panel noted the wording of Article 7.8 that in case of a finding of adverse effects to the interests of another Member within the meaning of Article 5 of the *SCM Agreement*, the subsidizing Member "shall take appropriate steps to remove the adverse effects or shall withdraw the subsidy". The Panel drew the conclusion that "withdrawal of the subsidy is an alternative, available to the subsidizing Member, to some other action. Repayment of the subsidy would certainly effectuate withdrawal of the subsidy by a subsidizing Member so as to allow it to avoid action by the complaining Member."[237]

---

[236] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 8.4.
[237] Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, para. 6.28.

(ii) Article 19.1

170. The Panel on *Australia – Automotive Leather II (Article 21.5 – US)*, in the context of considering whether Article 4.7 allowed "retroactive" remedies, rejected the argument that "Article 19.1 of the DSU, even in conjunction with Article 3.7 of the DSU, requires the limitation of the specific remedy provided for in Article 4.7 of the SCM Agreement to purely prospective action. An interpretation of Article 4.7 of the SCM Agreement which would allow exclusively 'prospective' action would make the recommendation to 'withdraw the subsidy' under Article 4.7 indistinguishable from the recommendation to 'bring the measure into conformity' under Article 19.1 of the DSU, thus rendering Article 4.7 redundant."[238]

(d) Relationship with other WTO Agreements

(i) DSU

171. In *Brazil – Aircraft*, the Appellate Body noted that "the provisions of Article 21.3 of the DSU are not relevant in determining the period of time for implementation of a finding of inconsistency with the prohibited subsidies provisions of Part II of the SCM Agreement". See paragraph 165 above.

172. The Panel on *US – FSC (Article 21.5 – EC)* found that since the Member failed to comply with the required recommendations under Article 4.7 of the SCM Agreement, it had also "failed to comply with Article 21 of the DSU". The Panel stated:

> "Having found that the United States has not fully withdrawn the FSC subsidies as required by the recommendations and rulings of the DSB made pursuant to Article 4.7 *SCM Agreement*, we do not believe that it is necessary to also determine whether the United States 'failed to comply with the DSB recommendations and rulings within the period of time specified by the DSB and has therefore also failed to comply with Article 21 *DSU*'."[239]

(ii) Agreement on Agriculture

173. Regarding the relationship between the *Agreement on Agriculture* and Article 4.7 of the *SCM Agreement*, see paragraph 113 above.

7. Article 4.10

(a) "appropriate countermeasures"

(i) Countermeasure

174. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators looked at the word "countermeasure" as context for finding a meaning for the word "appropriate". The Arbitrators disregarded the dictionary meaning of the word and preferred to refer to its general meaning in international law and to the work of the International Law Commission on state responsibility:

> "While the parties have referred to dictionary definitions for the term 'countermeasures', we find it more appropriate to refer to its meaning in general international law[240] and to the work of the International Law Commission (ILC) on state responsibility, which addresses the notion of countermeasures.[241] We note that the ILC work is based on relevant state practice as well as on judicial decisions and doctrinal writings, which constitute recognized sources of international law.[242] When considering the definition of 'countermeasures' in Article 47 of the Draft Articles,[243] we note that countermeasures are meant to 'induce [the State which has committed an internationally wrongful act] to comply with its obligations under articles 41 to 46'. We note in this respect that the Article 22.6 arbitrators in the EC – Bananas (1999) arbitration made a similar statement.[244] We conclude that a countermeasure is 'appropriate' inter alia if it effectively induces compliance."[245]

175. In *US – FSC (Article 22.6 – US)*, the Arbitrators looked into the ordinary meaning of the word "countermeasure":

---

[238] Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, para. 6.31.

[239] Panel Report on *US – FSC (Article 21.5 – EC)*, para. 8.171.

[240] (*footnote original*) See, e.g., the *Naulilaa* arbitral award (1928), UN Reports of International Arbitral Awards, Vol. II, p. 1028 and *Case Concerning the Air Services Agreement of 27 March 1946 (France v. United States of America)* (1978) International Law Reports, Vol. 54 (1979), p. 338. See also, *inter alia*, the Draft Articles on State Responsibility With Commentaries Thereto Adopted by the International Law Commission on First Reading (January 1997), hereinafter the "Draft Articles" and the draft articles provisionally adopted by the Drafting Committee on second reading, A/CN.4/L 600, 11 August 2000. Even though the latter modify a number of provisions of the Draft Articles, they do not affect the terms to which we refer in this report.

[241] (*footnote original*) We also note that, on the basis of the definition of "countermeasures" in the Draft Articles, the notion of "appropriate countermeasures" would be more general than the term "equivalent to the level of nullification or impairment". It would basically include it. Limiting its meaning to that given to the term "equivalent to the level of nullification or impairment" would be contrary to the principle of effectiveness in interpretation of treaties.

[242] (*footnote original*) See Article 38 of the Statute of the ICJ.

[243] (*footnote original*) We note that Canada objects to us using the Draft Articles in this interpretation process. Canada argues that the Draft Articles are not "relevant rules of international law applicable to the relations between the parties" within the meaning of Article 31.3(c) of the Vienna Convention. As already mentioned, we use the Draft Articles as an indication of the agreed meaning of certain terms in general international law.

[244] (*footnote original*) *Op. cit.*, para. 6.3. In that case, the arbitrators had to determine the level of nullification or impairment. Since the Article 22.6 arbitrators in the *EC – Bananas* case considered that measures equivalent to the level of nullification or impairment can induce compliance, it could be argued that in the present case too, countermeasures equivalent to the level of nullification or impairment should be sufficient to induce compliance. However, the arbitrators in *EC – Bananas* were instructed by Article 22.7 to determine whether the proposed measures were equivalent to the level of nullification or impairment.

[245] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.44.

"Dictionary definitions of 'countermeasure' suggest that a countermeasure is essentially defined by reference to the wrongful action to which it is intended to respond. The New Oxford Dictionary defines 'countermeasure' as 'an action taken to counteract a danger, threat, etc'.[246] The meaning of 'counteract' is to 'hinder or defeat by contrary action; neutralize the action or effect of'.[247] Likewise, the term 'counter' used as a prefix is defined *inter alia* as: 'opposing, retaliatory'.[248] The ordinary meaning of the term thus suggests that a countermeasure bears a relationship with the action to be counteracted, or with its effects (cf. 'hinder or defeat by contrary action; neutralize the action or effect of').[249]

In the context of Article 4 of the *SCM Agreement*, the term 'countermeasures' is used to define temporary measures which a prevailing Member may be authorized to take in response to a persisting violation of Article 3 of the *SCM Agreement*, pending full compliance with the DSB's recommendations. This use of the term is in line with its ordinary dictionary meaning as described above: these measures are authorized to counteract, in this context, a wrongful action in the form of an export subsidy that is prohibited *per se,* or the effects thereof.

It would be consistent with a reading of the plain meaning of the concept of countermeasure to say that it can be directed either at countering the measure at issue (in this case, at effectively neutralizing the export subsidy) or at counteracting its effects on the affected party, or both.

We need, however, to broaden our textual analysis in order to see whether we can find more precision in how countermeasures are to be construed in this context. We thus turn to an examination of the expression '*appropriate*' countermeasures with a view to clarifying what level of countermeasures may be legitimately authorized."[250]

(ii) "appropriate"

176. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Canada had proposed adopting countermeasures based on the amount of subsidy per aircraft granted by Brazil instead of basing them on the level of nullification or impairment suffered. The Arbitrators examined the meaning of the term appropriate and concluded that "a countermeasure is 'appropriate' *inter alia* if it *effectively* induces compliance":

"In accordance with Article 3.2 of the DSU, we proceed with an analysis of the meaning of the term 'appropriate' based on Article 31 of the Vienna Convention.

Examining only the ordinary meaning of the term 'appropriate' does not allow us to reply to the question before us, since dictionary definitions are insufficiently specific. Indeed, the relevant dictionary definitions of the word 'appropriate' are 'specially suitable; proper'.[251] However, they point in the direction of meeting a particular objective.

The first context of the term 'appropriate' is the word 'countermeasures', of which it is an adjective. While the parties have referred to dictionary definitions for the term 'countermeasures', we find it more appropriate to refer to its meaning in general international law[252] and to the work of the International Law Commission (ILC) on state responsibility, which addresses the notion of countermeasures.[253] We note that the ILC work is based on relevant state practice as well as on judicial decisions and doctrinal writings, which constitute recognized sources of international law.[254] When considering the definition of 'countermeasures' in Article 47 of the Draft Articles,[255] we note that countermeasures are meant to 'induce [the State which has committed an internationally wrongful act] to comply with its obligations under articles 41 to 46'. We note in this respect that the Article 22.6 arbitrators in the *EC – Bananas (1999)* arbitration made a similar statement.[256] We conclude that a

United States of America)* (1978) International Law Reports, Vol. 54 (1979), p. 338. See also, *inter alia*, the Draft Articles on State Responsibility With Commentaries Thereto Adopted by the International Law Commission on First Reading (January 1997), hereinafter the "Draft Articles" and the draft articles provisionally adopted by the Drafting Committee on second reading, A/CN.4/L 600, 11 August 2000. Even though the latter modify a number of provisions of the Draft Articles, they do not affect the terms to which we refer in this report.

[253] (*footnote original*) We also note that, on the basis of the definition of "countermeasures" in the Draft Articles, the notion of "appropriate countermeasures" would be more general than the term "equivalent to the level of nullification or impairment". It would basically include it. Limiting its meaning to that given to the term "equivalent to the level of nullification or impairment" would be contrary to the principle of effectiveness in interpretation of treaties.

[254] (*footnote original*) See Article 38 of the Statute of the ICJ.

[255] (*footnote original*) We note that Canada objects to us using the Draft Articles in this interpretation process. Canada argues that the Draft Articles are not "relevant rules of international law applicable to the relations between the parties" within the meaning of Article 31.3(c) of the Vienna Convention. As already mentioned, we use the Draft Articles as an indication of the agreed meaning of certain terms in general international law.

[256] (*footnote original*) *Op. cit.*, para. 6.3. In that case, the arbitrators had to determine the level of nullification or impairment. Since the Article 22.6 arbitrators in the *EC – Bananas* case considered that measures equivalent to the level of nullification or impairment can induce compliance, it could be argued that in the present case too, countermeasures equivalent to the level of nullification or impairment should be sufficient to induce compliance. However, the arbitrators in *EC – Bananas* were instructed by Article 22.7 to determine whether the proposed measures were equivalent to the level of nullification or impairment.

countermeasure is 'appropriate' *inter alia* if it *effectively* induces compliance."[257]

177. Applying their general finding referenced in paragraph 176 above that a countermeasure is appropriate *inter alia* if it effectively induces compliance, the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* found that in the case of Article 4.7 of the *SCM Agreement*, "inducing compliance" meant "inducing the withdrawal of the prohibited subsidy":

"In this respect, we recall that the measure in respect of which the right to take countermeasures has been requested is a prohibited export subsidy falling under Article 3.1(a) of the SCM Agreement. Article 4.7 of the SCM Agreement provides in this respect that if a measure is found to be a prohibited subsidy, it shall be withdrawn without delay. In such a case, effectively 'inducing compliance' means inducing the withdrawal of the prohibited subsidy.

In contrast, other illegal measures do not have to be withdrawn without delay. As specified in Article 3.8 of the DSU, if a measure violates a provision of a covered agreement, the measure is considered *prima facie* to cause nullification or impairment. However, if the defendant succeeds in rebutting the charge, no nullification or impairment will be found in spite of the violation. Such a rebuttal may be impossible to make in a number of cases. Yet, this does not change the fact that the concept of nullification or impairment is not found in Articles 3 and 4 of the SCM Agreement. The Arbitrators are of the view that meaning must be given to the fact that the negotiators did not include the concept of nullification or impairment in those articles, whilst it is expressly mentioned in Article 5 of the SCM Agreement, which deals with the adverse effects of actionable subsidies."[258]

178. The Arbitrators in *US – FSC (Article 22.6 – US)* considered the dictionary meaning of the word "appropriate" and concluded that, as far as the amount or level of countermeasures is concerned, the expression "appropriate" does not in and of itself predefine the precise and exhaustive conditions for the application of countermeasures.[259] According to them, Article 4.10 and 4.11 are not designed to lay down a precise formula or otherwise quantified benchmark or amount of countermeasures which might be legitimately authorized in each and every instance.[260] The Arbitrators indicated:

"Based on the plain meaning of the word, this means that countermeasures should be adapted to the particular case at hand. The term is consistent with an intent not to prejudge what the circumstances might be in the specific context of dispute settlement in a given case. To that extent, there is an element of flexibility, in the sense that there is thereby an eschewal of any rigid *a priori* quantitative formula. But it is also clear that there is, nevertheless, an objective relationship which must be absolutely respected: the countermeasures must be suitable or fitting by way of response to the case at hand."[261]

(iii) Footnote 9 of the SCM Agreement

179. In *US – FSC (Article 22.6 – US)*, the Arbitrators considered that the term "appropriate" countermeasures in Article 4.10 is informed by footnote 9, which provides guidance as to what the expression "appropriate" should be understood to mean. In the Arbitrators' view, "these two elements are part of a single assessment and . . . the meaning of the expression 'appropriate countermeasures' should result from a combined examination of these terms of the text in light of its footnote".[262] The Arbitrators thus concluded that "[t]his footnote effectively clarifies further how the term 'appropriate' is to be interpreted. We understand it to mean that countermeasures that would be 'disproportionate in light of the fact that the subsidies dealt with under these provisions are prohibited' could not be considered "appropriate" within the meaning of Article 4.10 of the SCM Agreement."[263] Further to analysing the dictionary meaning of the word "disproportionate" in footnote 9, the Arbitrators considered that footnote 9 "confirms that, while the notion of 'appropriate countermeasures' is intended to ensure sufficient flexibility of response to a particular case, it is a flexibility that is distinctly bounded" and that "[t]hose bounds are set by the relationship of appropriateness". In their view, "[t]hat appropriateness, in turn, entails an avoidance of disproportion between the proposed countermeasures and, as our analysis to this point has brought us, either the actual violating measure itself, the effects thereof on the affected Member, or both".[264]

180. In *US – FSC (Article 22.6 – US)*, the Arbitrators further looked at the text of the final part of footnote 9 and considered that this text directed them "to consider the 'appropriateness' of countermeasures under Article 4.10 from this perspective of countering a wrongful act and taking into account its essential nature as an upsetting of the rights and obligations as between

[257] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.42–3.44.
[258] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.45–3.46.
[259] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.10.
[260] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.11.
[261] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.12.
[262] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.8.
[263] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.16.
[264] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.19.

Members".[265] The Arbitrators further noted that "the negative formulation of the requirement under footnote 9 is consistent with a greater degree of latitude than a positive requirement may have entailed: footnote 9 clarifies that Article 4.10 is not intended to allow countermeasures that would be 'disproportionate'. It does not require strict proportionality.[266]"[267]

(b) Amount of subsidy as the basis for the calculation of countermeasures

(i) Exception to the requirement of equivalence to level of nullification or impairment

181. The Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* rejected Brazil's argument that the countermeasures must be equivalent to the level of nullification or impairment pursuant to Article 22.4 of the *DSU*, noting that the concept of nullification or impairment is not found in Articles 3 and 4 of the *SCM Agreement*. The Arbitrators explained:

> "A first approach would be to consider that the concept of nullification or impairment does not apply to Article 4 of the SCM Agreement. We note in this respect that, in relation to actionable subsidies, Article 5 refers to nullification or impairment as only one of the three categories of adverse effects. This could mean that another test than nullification or impairment could also apply in the context of Article 4 of the SCM Agreement.
>
> That said, we note that the Original Panel concluded that, since a violation had been found, a *prima facie* case of nullification or impairment had been made within the meaning of Article 3.8 of the DSU, which Brazil had not rebutted. In that context, we are more inclined to consider that no reference was expressly made to nullification or impairment in Article 4 of the SCM Agreement for the following reasons:
>
> (a) a violation of Article 3 of the SCM Agreement entails an irrebuttable presumption of nullification or impairment. It is therefore not necessary to refer to it;
>
> (b) the purpose of Article 4 is to achieve the *withdrawal* of the prohibited subsidy. In this respect, we consider that the requirement to withdraw a prohibited subsidy is of a different nature than removal of the specific nullification or impairment caused to a Member by the measure.[268] The former aims at removing a measure which is presumed under the WTO Agreement to cause negative trade effects, irrespective of who suffers those trade effects and to what extent. The latter aims at eliminating the effects of a measure on the trade of a given Member;
>
> (c) the fact that nullification or impairment is established with respect to a measure does not necessarily mean that, in the presence of an obligation to withdraw that measure, the level of appropriate countermeasures should be based only on the level of nullification or impairment suffered by the Member requesting the authorisation to take countermeasures."[269]

182. In their finding that the concept of nullification or impairment is not found in Articles 3 and 4 of the *SCM Agreement*, the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* also noted that a different term than "appropriate countermeasures" was being used in a comparable context in Articles 7.9 and 10 of the *SCM Agreement*:

---

[265] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.23.

[266] (*footnote original*) We note in this regard the view of the commentator, Sir James Crawford, on the relevant Article of the ILC text on State Responsibility, reflected in a resolution adopted on 12 December 2001 by the UN General Assembly (A/RES/56/83), which expresses – but only in positive terms – a requirement of proportionality for countermeasures:

> "the positive formulation of the proportionality requirement is adopted in Article 51. A negative formulation might allow too much latitude." (J. Crawford, The ILC's Articles on State Responsibility, Introduction, Text and Commentaries 2002, CUP, para. 5 on Article 51).

Article 51 of the ILC Articles on State responsibility (entitled "*Proportionality*") reads as follows:

> "countermeasures must be commensurate with the injury suffered, taking into account the gravity of the internationally wrongful act and the rights in question". (emphasis added)

We also note in this respect that, while that provision expressly refers – contrary to footnote 9 of the *SCM Agreement* – to the injury suffered, it also requires the gravity of the wrongful act and the right in question to be taken into account. This has been understood to entail a qualitative element to the assessment, even where commensurateness with the injury suffered is at stake. We note the view of Sir James Crawford on this point in his Commentaries to the ILC Articles:

> "Considering the need to ensure that the adoption of countermeasures does not lead to inequitable results, proportionality must be assessed taking into account not only the purely 'quantitative' element of the injury suffered, but also 'qualitative' factors such as the importance of the interest protected by the rule infringed and the seriousness of the breach. Article 51 relates proportionality primarily to the injury suffered but 'taking into account' two further criteria: the gravity of the internationally wrongful act, and the rights in question. The reference to 'the rights in question' has a broad meaning, and includes not only the effect of a wrongful act on the injured State but also on the rights of the responsible State. Furthermore, the position of other States which may be affected may also be taken into consideration." (*op. cit.*, para. 6 of the commentaries on Article 51).

[267] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 5.27.

[268] (*footnote original*) We note that Article 3.7 of the DSU refers to the "withdrawal of the measures concerned" as a first objective. However, we also note that, contrary to Article 3.7 of the DSU, Article 4.7 of the SCM Agreement does not provide for any alternative than the withdrawal of the measure once it has been found to be a prohibited subsidy.

[269] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.47–3.48.

"We also note that, when the negotiators have intended to limit countermeasures to the effect caused by the subsidy on a Member's trade, they have used different terms than 'appropriate countermeasures'. Article 7.9 and 10, which is the provision equivalent for actionable subsidies to Article 4.9 and 10 for prohibited subsidies, uses the terms 'commensurate with the degree and nature of the adverse effects determined to exist'. In that context, we do not consider the arguments made by Brazil in its oral presentation and based on the central position of the notion of nullification in the GATT to be compelling. As we have seen above, the term 'appropriate countermeasures' does not impose similar constraints."[270]

183. Further, the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* addressed the relevance of footnotes 9 and 10 to Article 4.10 and 4.11, respectively:

"We agree that, as those footnotes are drafted, it seems difficult to clearly identify how the second part of the sentence ('in light of the fact that the subsidies dealt with under these provisions are prohibited') relates to the first part of the sentence ('This expression is not meant to allow countermeasures that are disproportionate'). This is probably due to the use of the words 'in light of the fact that'. However, since the text of the treaty is supposed to be the most achieved expression of the intent of the parties, we should refrain from second guessing the negotiators at this point. We can nonetheless note that the reference to the fact that the subsidies dealt with are prohibited can most probably be considered more as an aggravating factor than as a mitigating factor. We also find the use of the word 'disproportionate' to be interesting in light of the term 'out of proportion' used in Article 49 of the Draft Articles. We do not draw any firm conclusions as to the meaning of footnotes 9 and 10. However, we note that footnotes 9 and 10 at least confirm that the term 'appropriate' in Articles 4.10 and 4.11 of the SCM Agreement should not be given the same meaning as the term 'equivalent' in Article 22 of the DSU.[271]"[272]

184. The Arbitrators in *US – FSC (Article 22.6 – US)* found that an assessment of the proposed countermeasures in relation to the initial violating measures was sufficient to conclude that the countermeasures were appropriate. In this regard, they compared Articles 7.9 and 9.4 of the *SCM Agreement* with Article 10 and concluded that the clear reference to trade effects in Article 7.9 "highlights" the lack of any such indication in Article 4.10. The Arbitrators then concluded that Article 4.10 does not "require" that trade effects be the standard by which "appropriateness" is determined. However, they found that Article 4.10 does not "preclude" a Member from adopting countermeasures that are "tailored" to offset adverse "trade effects":

"Recourse to countermeasures is foreseen in three provisions of the *SCM Agreement*: Article 4.10, which we are concerned with here, Article 7.9 and Article 9.[273] As regards actionable subsidies, Article 7.9 provides for authorization of countermeasures 'commensurate with the degree and nature of the adverse effects determined to exist . . .'. In a similar vein, Article 9.4 provides, in relation to non-actionable subsidies, for the authorization of countermeasures 'commensurate with the nature and degree of the effects determined to exist'. The explicit precision of these indications clearly highlights the lack of any analogous explicit textual indication in Article 4.10 and contrasts with the broader and more general test of 'appropriateness' found in Articles 4.10 and 4.11.

In short, as far as prohibited subsidies are concerned, there is no reference whatsoever in remedies foreseen under Article 4 to such concepts as 'trade effects', 'adverse effects' or 'trade impact'. Yet, by contrast, such a concept is to be found very clearly in the context of remedies under Article 7, through the notion of 'adverse effects'.

We believe that this difference must be given a meaning and that we should give due consideration to the fact that the drafters – who obviously could have used other terms in order to quantify precisely the permissible amount of countermeasures in the context of Article 4.10 – chose not to do so. It is not our task to read into the treaty text words that are not there.[274] We are also cognizant that the terms that do appear in the text of the treaty must be presumed to have meaning and must be read effectively.[275] The implications of the use of the term 'appropriate' must therefore be acknowledged and we must give this expression in Article 4.10 its full meaning.[276]

. . .

---

[270] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.49.

[271] (*footnote original*) We are mindful of the fact that, from the point of view of a textual interpretation, "equivalent" and "appropriate" should not be given the same meaning. Interpreters are not permitted to assume such a thing. What we mean is that the term "appropriate", read in the light of footnotes 9 and 10, may allow for more leeway than the word "equivalent" in terms of assessing the appropriate level of countermeasures. A countermeasure remains "appropriate" as long as it is not *disproportionate*, having also regard to the fact that the measure at issue is a prohibited subsidy.

[272] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.51.

[273] (*footnote original*) We are aware of the provisions of Article 31 of the *SCM Agreement* and that Members took no action to extend the application of the provisions of Articles 8 and 9 of the Agreement concerning non-actionable subsidies beyond the period of five years from the date of entry into force of the *WTO Agreement*. However, these provisions can nevertheless be helpful, in our view, in understanding the overall architecture of the Agreement with respect to the different types of subsidies it sought and seeks to address.

[274] (*footnote original*) See for example the reports of the Appellate Body in *India – Quantitative Restrictions*, WT/DS90/AB/R, DSR 1999:IV, 1763, para 94; *EC – Hormones*, WT/DS26/AB/R, and WT/DS48/AB/R, DSR 1998:I, 135, para. 181; *India – Patents (US)*, WT/DS50/AB/R, DSR, 1998:I, 9, para. 45.

[275] (*footnote original*) See for example the reports of the Appellate Body on *US – Gasoline*, WT/DS2/AB/R, DSR 1996:I, 3, at 21 and *Korea – Dairy*, WT/DS98/AB/R, DSR 2000:I, 3, para. 81.

[276] (*footnote original*) See paras. 4.24–4.26 above.

> This reading of the text in its context confirms us in our view that, rather than there being any requirement to confine 'appropriate countermeasures' to offsetting the effects of the measure on the relevant Member, there is a clear rationale exhibited that reinforces our textual interpretation that the Member concerned is entitled to take countermeasures that are tailored to neutralizing the offending measure *qua* measure as a wrongful act. The expression 'appropriate countermeasures', in our view, would entitle the complaining Member to countermeasures which would at least counter the injurious effect of the persisting illegal measure on it. However, it does not *require* trade effects to be the effective standard by which the appropriateness of countermeasures should be ascertained. Nor can the relevant provisions be interpreted to *limit* the assessment to this standard. Members may take countermeasures that are not disproportionate in light of the gravity of the initial wrongful act and the objective of securing the withdrawal of a prohibited export subsidy, so as to restore the balance of rights and obligations upset by that wrongful act."[277]

185. In *US – FSC (Article 22.6 – US)*, the Arbitrators considered that, since Articles 4.10 and 4.11 of the *SCM Agreement* may prevail over those of the DSU, there can be no presumption that the drafters intended the standard under Article 4.10 to be necessarily coextensive with that under Article 22.4:

> "It should be recalled here that Articles 4.10 and 4.11 of the *SCM Agreement* are 'special or additional rules' under Appendix 2 of the *DSU*, and that in accordance with Article 1.2 of the *DSU*, it is possible for such rules or procedures to prevail over those of the *DSU*. There can be no presumption, therefore, that the drafters intended the standard under Article 4.10 to be necessarily coextensive with that under Article 22.4 so that the notion of 'appropriate countermeasures' under Article 4.10 would limit such countermeasures to an amount 'equivalent to the level of nullification or impairment' suffered by the complaining Member. Rather, Articles 4.10 and 4.11 of the *SCM Agreement* use distinct language and that difference must be given meaning.
>
> Indeed, reading the text of Article 4.10 in its context, one might reasonably observe that if the drafters had intended the provision to be construed in this way, they could certainly have made it clear. Indeed, relevant provisions both elsewhere in the *SCM Agreement* and in the *DSU* use distinct terms to convey precisely such a standard as described by the United States, in so many words. Yet the drafters chose terms for this provision in the *SCM Agreement* different from those found in Article 22.4 of the DSU. It would not be consistent with effective treaty interpretation to simply read away such differences in terminology.
>
> We therefore find no basis in the language itself or in the context of Article 4.10 of the *SCM Agreement* to conclude that it can or should be read as amounting to a 'trade effect-oriented' provision where explicitly alternative language is to be read away in order to conform it to a different wording to be found in Article 22.4 of the *DSU*.
>
> We would simply add that, while we consider that the precise difference in language must be given proper meaning, this goes no further than that. Our interpretation of Article 4.10 of the *SCM Agreement* as embodying a different rule from Article 22.4 of the *DSU* does not make the *DSU* otherwise inapplicable or redundant."[278]

186. Finally, the Arbitrators in *US – FSC (Article 22.6 – US)* considered that under Article 4.10, a Member is entitled to act with countermeasures that properly take into account the seriousness and nature of the breach. However, they warned that Article 4.10 "does not amount to a blank cheque". The Arbitrators concluded that from the perspective of the measures' trade effects on the part of the complainant there was no reason to reach a different conclusion from that already reached:[279]

> "Thus, as we interpret Article 4.10 of the *SCM Agreement*, a Member is entitled to act with countermeasures that properly take into account the gravity of the breach and the nature of the upset in the balance of rights and obligations in question. This cannot be reduced to a requirement that constrains countermeasures to trade effects, for the reasons we have set out above.
>
> At the same time, Article 4.10 of the *SCM Agreement* does not amount to a blank cheque. There is nothing in the text or in its context which suggests an entitlement to manifestly punitive measures. On the contrary, footnote 9 specifically guards us against such an unbounded interpretation by clarifying that the expression 'appropriate' cannot be understood to allow 'disproportionate' countermeasures. However, to read this indication as effectively reintroducing into that provision a quantitative limit equivalent to that found in other provisions of the *SCM Agreement* or Article 22.4 of the DSU would effectively read the specific language of Article 4.10 of the *SCM Agreement* out of the text. Countermeasures under Article 4.10 of the *SCM Agreement* are not even, strictly speaking, obliged to be 'proportionate' but not to be 'disproportionate'. Not only is a Member entitled to take countermeasures that are tailored to offset the original wrongful act and the upset of the balancing of rights and obligations which that wrongful act entails, but in assessing the 'appropriateness' of such countermeasures – in light of the gravity of the breach – a margin of appreciation is to be granted, due to the severity of that breach."[280]

[278] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, paras. 5.47–5.50.
[279] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, paras. 6.31 and 6.60.
[280] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, paras. 5.61–5.62.

(ii) Factors relevant for the calculation of countermeasures

187. Further, the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)* addressed Brazil's argument that certain sales should be excluded because competition was based upon factors other than price, or that there was no competition with the Canadian manufacturer:

> "Since we selected the amount of the subsidy as the basis for the countermeasures and not the level of nullification or impairment suffered by Canada, it is appropriate and logical to include in our calculation all the sales of subsidised aircraft, whether they compete or not with Bombardier's production. However, consistent with our approach on the burden of proof, we excluded all the sales where Brazil demonstrated that no PROEX interest rate equalization payments had been made and we assumed that future sales of the xxx xxxxxxx and xxx would not benefit from the PROEX interest rate equalization payments."[281]

188. The Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)* also rejected Brazil's argument that only sales of aircraft subsequent to the implementation period should be considered although they were delivered after that period:

> "We note that, in its report within the framework of the proceedings under Article 21.5 of the DSU, the Appellate Body made the following findings:
>
> > '[the Appellate Body] upholds the conclusion of the Article 21.5 Panel that as a result of the continued issuance by Brazil of NTN-I bonds, after 18 November 1999, pursuant to letters of commitment issued before 18 November 1999, Brazil has failed to implement the recommendation of the DSB that it withdraw the prohibited export subsidies under PROEX within 90 days'[282]
>
> We, therefore, consider that we have to include in the calculation of the appropriate countermeasures the firm sales for which PROEX letters of commitment were issued before 18 November 1999 and which had not yet been delivered (since the NTN-I bonds are issued at the time of the delivery of the aircraft).[283] We do not consider the arguments based on Brazil's contractual obligations to be compelling. Obligations under internal law are no justification for not performing international obligations.[284]"[285]

(b) Relationship with other Articles

189. With respect to the relationship with Article 7.9, see paragraph 184 above.

(c) Relationship with other WTO Agreements

(i) DSU

190. As regards the requirement of equivalence of the suspension of concessions to the level of nullification or impairment in Article 22.6 arbitrations, see Section XXII.B.9 of the Chapter on the *DSU*. See also paragraphs 197–198 below.

8. Article 4.11

(a) Task of the Arbitrators under Article 4.11

191. In *Brazil – Aircraft (Article 22.6 – Brazil)*, a case which dealt with Canada's request for authorization to take "appropriate countermeasures" under Article 4.10 of the *SCM Agreement*, the Arbitrators described their task under Article 4.11 of the *SCM Agreement* in the following terms:

> "As to our task, we follow the approach adopted by previous arbitrators under Article 22.6 of the DSU.[286] We will have not only to determine whether Canada's proposal constitutes 'appropriate countermeasures', but also to determine the level of countermeasures we consider to be appropriate in case we find that Canada's level of countermeasures is not appropriate, if necessary by applying our own methodology."[287]

(b) Article 4.11 provisions as special or additional rules

192. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators indicated that they read the provisions of Article 4.11 of the *SCM Agreement* as special or additional rules:

> "We read the provisions of Article 4.11 of the SCM Agreement as special or additional rules. In accordance with the reasoning of the Appellate Body in *Guatemala – Cement*,[288] we must read the provisions of the DSU and the special or additional rules in the SCM Agreement so as to give meaning to all of them, except if there is a conflict or a difference . . ."[289]

193. In *US – FSC (Article 22.6 – US)*, the Arbitrators recalled Article 30 of the *SCM Agreement* and concluded

[282] (*footnote original*) Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 82(a).

[283] (*footnote original*) This clarification is made in relation to the use by the Arbitrators of the delivery data provided by Brazil rather than on information relating specifically to the issuance of the NTN-I bonds. Our choice is consistent with the factual finding of the Original Panel (*op. cit.*, para. 7.71) and the Appellate Body report in the original proceedings (*op. cit.* para. 154).

[284] (*footnote original*) See Article 27 of the Vienna Convention:

> "A party may not invoke the provisions of its internal law as justification for the failure to perform a treaty. [. . .]"

[285] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.64–3.65.

[286] (*footnote original*) See Article 22.6 arbitrations in *EC – Hormones (Article 22.6 – EC)*, para. 12.

[287] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.18.

[288] (*footnote original*) *Op. cit.*, para. 65.

[289] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, para. 3.57.

that Article 22.6 of the *DSU* applies to arbitrations pursuant to Article 4.11 of the *SCM Agreement* although this latter provision would prevail in case of conflict:

> "We also recall the terms of Article 30 of the *SCM Agreement*, which clarifies that the provisions of the *DSU* are applicable to proceedings concerning measures covered by the *SCM Agreement*. Article 22.6 of the *DSU* therefore remains relevant to arbitral proceedings under Article 4.11 of the *SCM Agreement*, as illustrated by the textual reference made to Article 22.6 of the *DSU* in that provision. However, the special or additional rules and procedures of the *SCM Agreement*, including Articles 4.10 and 4.11, would prevail to the extent of any difference between them.[290]"[291]

194. With respect to arbitration under Article 22.6 of the *DSU* in general, see Chapter on the *DSU*, Section XXII.B.8.

(c) Burden of proof

195. In *Brazil – Aircraft (Article 22.6 – Brazil)*, Canada requested that the DSB authorize it to take appropriate "countermeasures" pursuant to Article 4.10 of the *SCM Agreement*, and Article 22.2 of the *DSU*, in the amount of Can$700 million, in relation to Brazil's subsidy granted to its domestic producer of aircraft. In response to Brazil's request, the DSB referred the matter to an arbitrator in accordance with Article 22.6 of the *DSU*. With respect to the burden of proof, the Arbitrators held that it was up to Brazil to demonstrate that the countermeasures that Canada was proposing to take were not "appropriate":

> "In application of the well-established WTO practice on the burden of proof in dispute resolution, it is for the Member claiming that another has acted inconsistently with the WTO rules to prove that inconsistency.[292] In the present case, the action at issue is the Canadian proposal to suspend concessions and other obligations in the amount of C$700 million as 'appropriate countermeasures' within the meaning of Article 4.10 of the SCM Agreement.[293] Brazil challenges the conformity of this proposal with Article 22 of the DSU and Article 4.10 of the SCM Agreement. It is therefore up to Brazil to submit evidence sufficient to establish a *prima facie* case or 'presumption' that the countermeasures that Canada proposes to take are not 'appropriate'. Once Brazil has done so, it is for Canada to submit evidence sufficient to rebut that 'presumption'. Should the evidence remain in equipoise on a particular claim, the Arbitrators would conclude that the claim has not been established. Should all evidence remain in equipoise, Brazil, as the party bearing the original burden of proof, would lose the case.
>
> An issue to be distinguished from the question of who bears the burden of proof is that of the duty that rests on both parties to produce evidence and to collaborate in presenting evidence to the Arbitrators. This is why, even though Brazil bears the original burden of proof, we expected Canada to come forward with evidence explaining why its proposal constitutes appropriate countermeasures and we requested it to submit a 'methodology paper' describing how it arrived at the level of countermeasures it proposes.[294]"[295]

(d) Treatment of data supplied by private entities

196. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators evaluated the trustworthiness of data supplied by Brazil, and stated that they "could not treat statements from that company as [they] would have if [the statements] had originated from a subject of international law":

> "A related problem faced by the Arbitrators in this case was that, in many instances, the original data necessary for the calculations or assessments was solely in the hands of Brazil. When this information originated in the Brazilian government, we assumed good faith and accepted the information and the supporting evidence provided by Brazil to the extent Canada also accepted it or did not provide sufficient evidence to put in doubt the accuracy of Brazil's statements and/or evidence.
>
> However, since this case relates to subsidies granted for the purchase of aircraft produced by the Brazilian aircraft manufacturer, Embraer, a large number of data essential for the resolution of our task is only available to that company. We assumed that Embraer was independent from the Brazilian government and, for that reason, we could not treat statements from that company as we would have if they had originated from a subject of international law.[296] When Brazil only provided statements regarding information available solely to Embraer, we

---

[290] (*footnote original*) On the notion of "difference", see Report of the Appellate Body on *Guatemala – Anti-Dumping Investigation Regarding Portland Cement from Mexico ("Guatemala – Cement I")*, WT/DS60/AB/R, adopted 25 November 1998, DSR 1998:IX, paras. 65 and 66.

[291] Decision by the Arbitrators on *US – FSC (Article 22.6 – US)*, para. 2.6.

[292] (*footnote original*) See also how this issue is addressed in the decisions by the arbitrators in *EC – Hormones (Article 22.6 – EC)*, paras. 8 to 11.

[293] (*footnote original*) See WT/DS/46/16.

[294] (*footnote original*) This approach is similar to those followed in the arbitrators' decisions in *EC – Bananas (1999)* and *EC – Hormones (Article 22.6 – EC)*.

[295] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 2.8–2.9.

[296] (*footnote original*) See preceding paragraph, where we apply a presumption of good faith to statements and evidence originating in subjects of international law (on production and appraisal of evidence, see, *inter alia*, International Court of Justice ("ICJ") judgement of 9 April 1949 *Corfu Channel Case*, ICJ Reports 1949, p. 32; ICJ judgement of 11 September 1992 *Land, Island and Maritime Frontier Dispute (El Salvador v. Honduras, Nicaragua intervening)*, ICJ Reports 1992, p. 399, para. 63; ICJ judgement on merits *Military and Paramilitary Activities in and Against Nicaragua (Nicaragua v. United States of America)*, ICJ Reports 1986, p. 40, para. 60).

requested that Brazil support those statements with materials usually regarded as evidence, such as articles or statements reproduced in the specialized press, company annual reports or any other certified information originating in Embraer or other reliable sources. When Brazil was not in a position to provide documentary evidence, we requested a detailed explanation of the reasons why such evidence was not available and expressed our willingness to consider written declarations from authorised Embraer officials, if duly certified. We then weighed this evidence against the evidence submitted by Canada."[297]

(e) Relationship with other WTO Agreements

(i) DSU

Article 22.4

197. In *Brazil – Aircraft (Article 22.6 – Brazil)*, the Arbitrators addressed Canada's request for authorization to take "appropriate countermeasures" under Article 4.10 of the *SCM Agreement*. Referring to Article 22.4 of the *DSU*, Brazil argued that the "countermeasures" must be equivalent to the level of nullification or impairment (which argument was rejected by the Arbitrators as referenced in paragraph 178 above). The Arbitrators explained the relationship between Article 4.11 of the *SCM Agreement* and Article 22.4 of the *DSU* by characterizing Article 4.11 of the *SCM Agreement* as "special or additional rules" and held that the concept of "nullification or impairment" was absent from Articles 3 and 4 of the SCM Agreement and that the principle of effectiveness would be counteracted if the "appropriate countermeasures" had to be necessarily limited to the level of nullification or impairment:

> "We read the provisions of Article 4.11 of the SCM Agreement as special or additional rules. In accordance with the reasoning of the Appellate Body in *Guatemala – Cement*,[298] we must read the provisions of the DSU and the special or additional rules in the SCM Agreement so as to give meaning to all of them, except if there is a conflict or a difference. While we agree that in practice there may be situations where countermeasures equivalent to the level of nullification of impairment will be appropriate, we recall that the concept of nullification or impairment is absent from Articles 3 and 4 of the SCM Agreement. In that framework, there is no legal obligation that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment.
>
> On the contrary, requiring that countermeasures in the form of suspension of concessions or other obligations be equivalent to the level of nullification or impairment would be contrary to the principle of effectiveness by significantly limiting the efficacy of countermeasures in the case of prohibited subsidies. Indeed, as shown in the present case,[299] other countermeasures than suspension of concessions or obligations may not always be feasible because of their potential effects on other Members. This would be the case of a counter-subsidy granted in a sector where other Members than the parties compete with the products of the parties. In such a case, the Member taking the countermeasure may not be in a position to induce compliance.
>
> We are mindful that our interpretation may, at a first glance, seem to cause some risk of disproportionality in case of multiple complainants. However, in such a case, the arbitrator could allocate the amount of appropriate countermeasures among the complainants in proportion to their trade in the product concerned. The 'inducing' effect would most probably be very similar."[300]

Article 22.6 and 22.7

198. With respect to the relationship with Article 22.6 of the *DSU*, see paragraphs 192–194 above. For more information on the suspension of concessions under the *DSU*, see Section XXII.B of the Chapter on the *DSU*.

PART III: ACTIONABLE SUBSIDIES

V. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Adverse Effects

No Member should cause, through the use of any subsidy referred to in paragraphs 1 and 2 of Article 1, adverse effects to the interests of other Members, i.e.:

(a) injury to the domestic industry of another Member;[11]

(*footnote original*) [11] The term "injury to the domestic industry" is used here in the same sense as it is used in Part V.

(b) nullification or impairment of benefits accruing directly or indirectly to other Members under GATT 1994, in particular the benefits of concessions bound under Article II of GATT 1994;[12]

(*footnote original*) [12] The term "nullification or impairment" is used in this Agreement in the same sense as it is used in the relevant provisions of GATT 1994, and the existence of such nullification or impairment shall be established in accordance with the practice of application of these provisions.

---

[297] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 2.10–2.11.

[298] (*footnote original*) Appellate Body on *Guatemala – Cement I*, para. 65.

[299] (*footnote original*) Canada mentioned that it could have applied a counter-subsidy but refrained from doing so for a number of reasons.

[300] Decision by the Arbitrators on *Brazil – Aircraft (Article 22.6 – Brazil)*, paras. 3.57–3.59.

(c) serious prejudice to the interests of another Member.[13]

(*footnote original*) [13] The term "serious prejudice to the interests of another Member" is used in this Agreement in the same sense as it is used in paragraph 1 of Article XVI of GATT 1994, and includes threat of serious prejudice.

This Article does not apply to subsidies maintained on agricultural products as provided in Article 13 of the Agreement on Agriculture.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. General

199. In *US – Offset Act (Byrd Amendment)*, the Panel explained that "a measure constitutes an actionable subsidy if it is a subsidy, if it is "specific", and if its use causes "adverse effects".[301]

2. Article 5(b)

(a) "nullification or impairment"

(i) General

200. In *US – Offset Act (Byrd Amendment)*, with respect to "adverse effects", Mexico made arguments of both violation and non-violation nullification or impairment. In relation to claims of violation nullification or impairment, the Panel stated that any presumption arising under Article 3.8 of the *DSU* stemming from these violations would relate to nullification or impairment caused "*by the violation at issue*" (emphasis in original). The Panel rejected the argument by Mexico on the grounds that, for the purpose of Article 5(b) of the *SCM Agreement*, Mexico must demonstrate that "*the use of a subsidy*" caused nullification or impairment (emphasis in original).[302]

(ii) Application of a measure

201. In *US – Offset Act (Byrd Amendment)*, the Panel clarified that the drafters of Article 5 of the *SCM Agreement* had envisaged the possibility of nullification or impairment resulting from the "use" of a subsidy. Furthermore, the Panel noted that Article 7.1 of the *SCM Agreement* provides useful context by clarifying that the "use" of a subsidy is to be equated with the grant or maintaining of a subsidy. In this sense, the Panel stated "[e]ven if disbursements have not been granted under the [Offset Act], the maintenance of the [offset programme] constitutes 'application' of a measure for the purpose of a 'non-violation' nullification or impairment claim under SCM Article 5(b)".[303] The Panel went on to find that the existence of a subsidy programme, and the potential use of that subsidy programme, is sufficient for that programme to "apply".[304]

(iii) Existence of a benefit

202. The Panel on *US – Offset Act (Byrd Amendment)* explained that there was no reason why the Panel should not find that the requirement of existence of a benefit had been met, since the United States had not disputed that benefits resulting from the negotiated tariff concessions accrued to Mexico under Articles II and VI of the *GATT 1994*.[305]

(iv) Nullification or impairment of a benefit

203. The Panel on *US – Offset Act (Byrd Amendment)* recalled one adopted GATT panel report, namely *EEC – Oilseeds*, where the panel "considered that non-violation nullification or impairment would arise when the effect of a tariff concession is systematically offset or counteracted by a subsidy programme".[306] The Panel found the approach of the panel on *EEC – Oilseeds* to be reasonable.

3. Relationship with other Articles

(a) Article 6.3(c)

204. The Panel on *Indonesia – Autos* determined the existence of serious prejudice within the meaning of Article 5(c) upon finding a significant price undercutting under Article 6.3(c):

> "We note that under Article 6.3(c) serious prejudice may arise only where the price undercutting is 'significant.' Although the term 'significant' is not defined, the inclusion of this qualifier in Article 6.3(c) presumably was intended to ensure that margins of undercutting so small that they could not meaningfully affect suppliers of the imported product whose price was being undercut are not considered to give rise to serious prejudice. This clearly is not an issue here. To the contrary, it is our view that, even taking into account the possible effects of these physical differences on price comparability, the price undercutting by the Timor of the Optima and 306 cannot reasonably be deemed to be other than significant.
>
> For the foregoing reasons, we find that the effect of the subsidies to the Timor pursuant to the National Car programme is to cause serious prejudice to the interests of the European Communities in the sense of Article 5(c) of the SCM Agreement through a significant price undercutting as compared with the price of EC-origin like products in the Indonesian market."[307]

[301] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.106.
[302] Panel Report on *US – Offset Act (Byrd Amendment)*, paras. 7.118–119.
[303] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.122.
[304] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.123.
[305] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.124.
[306] Panel Report on *US – Offset Act (Byrd Amendment)*, para. 7.127.
[307] Panel Report on *Indonesia – Autos*, paras. 14.254–14.255.

(b) Article 7.1

205. See paragraph 201 above.

VI. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Serious Prejudice

6.1 Serious prejudice in the sense of paragraph (c) of Article 5 shall be deemed to exist in the case of:

(a) the total ad valorem subsidization[14] of a product exceeding 5 per cent;[15]

(*footnote original*) [14] The total ad valorem subsidization shall be calculated in accordance with the provisions of Annex IV.
(*footnote original*) [15] Since it is anticipated that civil aircraft will be subject to specific multilateral rules, the threshold in this subparagraph does not apply to civil aircraft.

(b) subsidies to cover operating losses sustained by an industry;

(c) subsidies to cover operating losses sustained by an enterprise, other than one-time measures which are non-recurrent and cannot be repeated for that enterprise and which are given merely to provide time for the development of long-term solutions and to avoid acute social problems;

(d) direct forgiveness of debt, i.e. forgiveness of government-held debt, and grants to cover debt repayment.[16]

(*footnote original*) [16] Members recognize that where royalty-based financing for a civil aircraft programme is not being fully repaid due to the level of actual sales falling below the level of forecast sales, this does not in itself constitute serious prejudice for the purposes of this subparagraph.

6.2 Notwithstanding the provisions of paragraph 1, serious prejudice shall not be found if the subsidizing Member demonstrates that the subsidy in question has not resulted in any of the effects enumerated in paragraph 3.

6.3 Serious prejudice in the sense of paragraph (c) of Article 5 may arise in any case where one or several of the following apply:

(a) the effect of the subsidy is to displace or impede the imports of a like product of another Member into the market of the subsidizing Member;

(b) the effect of the subsidy is to displace or impede the exports of a like product of another Member from a third country market;

(c) the effect of the subsidy is a significant price undercutting by the subsidized product as compared with the price of a like product of another Member in the same market or significant price suppression, price depression or lost sales in the same market;

(d) the effect of the subsidy is an increase in the world market share of the subsidizing Member in a particular subsidized primary product or commodity[17] as compared to the average share it had during the previous period of three years and this increase follows a consistent trend over a period when subsidies have been granted.

(*footnote original*) [17] Unless other multilaterally agreed specific rules apply to the trade in the product or commodity in question.

6.4 For the purpose of paragraph 3(b), the displacement or impeding of exports shall include any case in which, subject to the provisions of paragraph 7, it has been demonstrated that there has been a change in relative shares of the market to the disadvantage of the non-subsidized like product (over an appropriately representative period sufficient to demonstrate clear trends in the development of the market for the product concerned, which, in normal circumstances, shall be at least one year). "Change in relative shares of the market" shall include any of the following situations: *(a)* there is an increase in the market share of the subsidized product; *(b)* the market share of the subsidized product remains constant in circumstances in which, in the absence of the subsidy, it would have declined; *(c)* the market share of the subsidized product declines, but at a slower rate than would have been the case in the absence of the subsidy.

6.5 For the purpose of paragraph 3(c), price undercutting shall include any case in which such price undercutting has been demonstrated through a comparison of prices of the subsidized product with prices of a non-subsidized like product supplied to the same market. The comparison shall be made at the same level of trade and at comparable times, due account being taken of any other factor affecting price comparability. However, if such a direct comparison is not possible, the existence of price undercutting may be demonstrated on the basis of export unit values.

6.6 Each Member in the market of which serious prejudice is alleged to have arisen shall, subject to the provisions of paragraph 3 of Annex V, make available to the parties to a dispute arising under Article 7, and to the panel established pursuant to paragraph 4 of Article 7, all relevant information that can be obtained as to the changes in market shares of the parties to the dispute as well as concerning prices of the products involved.

6.7 Displacement or impediment resulting in serious prejudice shall not arise under paragraph 3 where any of the following circumstances exist[18] during the relevant period:

(*footnote original*) [18] The fact that certain circumstances are referred to in this paragraph does not, in itself, confer upon them any legal status in terms of either GATT 1994 or this Agreement. These circumstances must not be isolated, sporadic or otherwise insignificant.

(a) prohibition or restriction on exports of the like product from the complaining Member or on imports from the complaining Member into the third country market concerned;

(b) decision by an importing government operating a monopoly of trade or state trading in the product concerned to shift, for non-commercial reasons, imports from the complaining Member to another country or countries;

(c) natural disasters, strikes, transport disruptions or other *force majeure* substantially affecting production, qualities, quantities or prices of the product available for export from the complaining Member;

(d) existence of arrangements limiting exports from the complaining Member;

(e) voluntary decrease in the availability for export of the product concerned from the complaining Member (including, *inter alia*, a situation where firms in the complaining Member have been autonomously reallocating exports of this product to new markets);

(f) failure to conform to standards and other regulatory requirements in the importing country.

6.8 In the absence of circumstances referred to in paragraph 7, the existence of serious prejudice should be determined on the basis of the information submitted to or obtained by the panel, including information submitted in accordance with the provisions of Annex V.

6.9 This Article does not apply to subsidies maintained on agricultural products as provided in Article 13 of the Agreement on Agriculture.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Article 6.1

(a) Expiry of Article 6.1

206. This provision has lapsed pursuant to Article 31. In this respect, see paragraph 391 below.

(b) Relationship with other Articles

(i) Article 27

207. With regard to the relationship between Article 6.1 and Article 27, see paragraph 382 below.

(ii) Article 31

208. With regard to the relationship between Article 6.1 and Article 31, see paragraph 391 below.

2. Article 6.3

(a) "The effect of the subsidy"

209. The Panel on *Indonesia – Autos* rejected the argument that it was precluded from considering the effects of a subsidy programme which had expired when analysing whether the subsidies caused serious prejudice to the interests of the complainants.[308] The Panel stated:

> "[W]e must assess the 'effect of the subsidies' on the interests of another Member to determine whether serious prejudice exists, not the effect of 'subsidy programmers'. We note that at any given moment in time some payments of subsidies have occurred in the past while others have yet to occur in the future. If we were to consider that past subsidies were not relevant to our serious prejudice analysis as they were 'expired measures' while future measures could not yet have caused actual serious prejudice, it is hard to imagine any situation where a panel would be able to determine the existence of actual serious prejudice."[309]

(b) "like product"

210. See paragraphs 270–274 below. With respect to the burden of proof regarding the determination of "like product", see paragraph 382 below.

3. Article 6.3(a)

(a) Standing as claimant

211. The Panel on *Indonesia – Autos* considered whether "the United States may claim that it has suffered serious prejudice as a result of displacement/impedance or of price undercutting with respect to a product which does not originate in the United States solely on the basis that the producer of that product is a 'US company'".[310] The Panel drew a distinction between United States products and United States companies/producers and rejected the claim that the nationality of producers is relevant to establishing the existence of serious prejudice:

> "In our view, the text of Article XVI [of the GATT 1994] and of Part III of the SCM Agreement make clear that serious prejudice may arise where a Member's trade interests have been affected by subsidization. We see nothing in Article XVI or in Part III that would suggest that the United States may claim that it has suffered

[308] With respect to the treatment of expired measures in general, see Chapter on the *DSU*, Section VII.B.2.
[309] Panel Report on *Indonesia – Autos*, para. 14.206.
[310] Panel Report on *Indonesia – Autos*, para. 14.198.

adverse effects merely because it believes that the interests of US *companies* have been harmed where US *products* are not involved. The United States has cited no language in Article XVI:1 or Part III suggesting that the nationality of producers is relevant to establishing the existence of serious prejudice. Accordingly, given that serious prejudice may only arise in the case at hand where there is 'displacement or impedance of imports of a like product from another Member' or price undercutting 'as compared with the like product of another Member', we do not consider that the United States can convert such effects on products from the European Communities into serious prejudice to US interests merely by alleging that the products affected were produced by US companies."[311] (emphasis original)

(b) Demonstration of displacement or impedance

212. The Panel on *Indonesia – Autos* explored the meaning of the terms "displacement" and "impedance" and considered that:

> "[A] complainant need not demonstrate a decline in sales in order to demonstrate displacement or impedance. This is inherent in the ordinary meaning of those terms. Thus, displacement relates to a situation where sales volume has declined, while impedance relates to a situation where sales which otherwise would have occurred were impeded. . . ."[312]

(c) Relationship with other Articles

(i) Article 6.4

213. The Panel on *Indonesia – Autos* addressed the argument that "there is no reason why the type of analysis set forth in Article 6.4 should not be appropriate also in the case of claims of displacement and impedance of imports from the market of the subsidizing country".[313] The Panel rejected this argument, but nevertheless agreed that market share data may be "highly relevant" for an analysis pursuant to Article 6.3(a):

> "Article 6.4 is not relevant in this case. The drafting of the provision is unambiguous, and the specific reference to Article 6.3(b) creates a strong inference that an Article 6.4 type of analysis is *not* appropriate in the case of Article 6.3(a) claims. The complainants have identified nothing in the context of the provision or the object and purpose of the SCM Agreement that would suggest a different conclusion.
>
> Our conclusion does not of course mean that market share data are irrelevant to the analysis of displacement or impedance into a subsidizing Member's market. To the contrary, market share data may be highly relevant evidence for the analysis of such a claim. However, such data are no more than evidence of displacement and impedance caused by subsidization, and a demonstration that the market share of the subsidized product in the subsidizing Member has increased does not *ipso facto* satisfy the requirements of Article 6.3(a)."[314]

4. Article 6.3(c)

(a) Standing as claimant

214. With respect to what interest is necessary for standing as claimants under Article 6.3(c), see paragraph 211 above.

(b) "significant price undercutting"

215. The Panel on *Indonesia – Autos* stated the following on the use of the term 'significant' in connection with the term "price undercutting" in Article 6.3(c): "Although the term 'significant' is not defined, the inclusion of this qualifier in Article 6.3(c) presumably was intended to ensure that margins of undercutting so small that they could not meaningfully affect suppliers of the imported product whose price was being undercut are not considered to give rise to serious prejudice."[315]

(c) Relationship with other Articles

216. With respect to the relationship with Article 5(c), see paragraph 204 above.

5. Article 6.7

(a) "imports from the complaining Member" and "exports from the complaining Member"

217. The Panel on *Indonesia – Autos* addressed the question whether the *SCM Agreement* allows a Member to bring a claim that *another* Member has "suffered serious prejudice as a result of subsidization".[316] The Panel stated the following:

> "It is clear from Article 7.2 that the dispute settlement procedures set forth in Article 7 may only be invoked by a Member where that Member believes that it has itself suffered serious prejudice as a result of subsidization.
>
> Our view on these issues is confirmed by Article 6.4, which allows a subsidising Member to raise a defence to a displacement/impedance claim where "imports from the complaining Member" or "exports from the complaining Member" are affected by such factors as export prohibitions or restrictions, natural disasters, and arrangements limiting exports. These provisions or restrictions of Article 6.7 assume that the product subject to a claim of serious prejudice arising from displacement or impedance originates in the complaining Member."[317]

[317] Panel Report on *Indonesia – Autos*, paras. 14.202–14.203.

VII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Remedies

7.1 Except as provided in Article 13 of the Agreement on Agriculture, whenever a Member has reason to believe that any subsidy referred to in Article 1, granted or maintained by another Member, results in injury to its domestic industry, nullification or impairment or serious prejudice, such Member may request consultations with such other Member.

7.2 A request for consultations under paragraph 1 shall include a statement of available evidence with regard to (a) the existence and nature of the subsidy in question, and (b) the injury caused to the domestic industry, or the nullification or impairment, or serious prejudice[19] caused to the interests of the Member requesting consultations.

(*footnote original*) [19] In the event that the request relates to a subsidy deemed to result in serious prejudice in terms of paragraph 1 of Article 6, the available evidence of serious prejudice may be limited to the available evidence as to whether the conditions of paragraph 1 of Article 6 have been met or not.

7.3 Upon request for consultations under paragraph 1, the Member believed to be granting or maintaining the subsidy practice in question shall enter into such consultations as quickly as possible. The purpose of the consultations shall be to clarify the facts of the situation and to arrive at a mutually agreed solution.

7.4 If consultations do not result in a mutually agreed solution within 60 days,[20] any Member party to such consultations may refer the matter to the DSB for the establishment of a panel, unless the DSB decides by consensus not to establish a panel. The composition of the panel and its terms of reference shall be established within 15 days from the date when it is established.

(*footnote original*) [20] Any time-periods mentioned in this Article may be extended by mutual agreement.

7.5 The panel shall review the matter and shall submit its final report to the parties to the dispute. The report shall be circulated to all Members within 120 days of the date of the composition and establishment of the panel's terms of reference.

7.6 Within 30 days of the issuance of the panel's report to all Members, the report shall be adopted by the DSB[21] unless one of the parties to the dispute formally notifies the DSB of its decision to appeal or the DSB decides by consensus not to adopt the report.

(*footnote original*) [21] If a meeting of the DSB is not scheduled during this period, such a meeting shall be held for this purpose.

7.7 Where a panel report is appealed, the Appellate Body shall issue its decision within 60 days from the date when the party to the dispute formally notifies its intention to appeal. When the Appellate Body considers that it cannot provide its report within 60 days, it shall inform the DSB in writing of the reasons for the delay together with an estimate of the period within which it will submit its report. In no case shall the proceedings exceed 90 days. The appellate report shall be adopted by the DSB and unconditionally accepted by the parties to the dispute unless the DSB decides by consensus not to adopt the appellate report within 20 days following its issuance to the Members.[22]

(*footnote original*) [22] If a meeting of the DSB is not scheduled during this period, such a meeting shall be held for this purpose.

7.8 Where a panel report or an Appellate Body report is adopted in which it is determined that any subsidy has resulted in adverse effects to the interests of another Member within the meaning of Article 5, the Member granting or maintaining such subsidy shall take appropriate steps to remove the adverse effects or shall withdraw the subsidy.

7.9 In the event the Member has not taken appropriate steps to remove the adverse effects of the subsidy or withdraw the subsidy within six months from the date when the DSB adopts the panel report or the Appellate Body report, and in the absence of agreement on compensation, the DSB shall grant authorization to the complaining Member to take countermeasures, commensurate with the degree and nature of the adverse effects determined to exist, unless the DSB decides by consensus to reject the request.

7.10 In the event that a party to the dispute requests arbitration under paragraph 6 of Article 22 of the DSU, the arbitrator shall determine whether the countermeasures are commensurate with the degree and nature of the adverse effects determined to exist.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. Article 7.8

(a) General

218. The Panel on *Indonesia – Autos* referred in its conclusions and recommendations to the remedy in Article 7.8 as follows:

> "With respect to the conclusion of serious prejudice to the interests of the European Communities, Article 7.8 of the SCM Agreement provides that, '[W]here a panel report or an Appellate Body report is adopted in which it is determined that any subsidy has resulted in adverse effects to the interests of another Member within the meaning of Article 5, the Member granting or maintaining the subsidy shall take appropriate steps to remove the adverse effects or shall withdraw the subsidy.'"[318]

[318] Panel Report on *Indonesia – Autos*, para. 15.3.

(b) Relationship with other Articles

(i) Article 4.7

219. In the context of its finding that the phrase "withdraw the subsidy" under Article 4.7 referred to retroactive remedies (repayment), the Panel on *Australia – Automotive Leather II (Article 21.5 – US)* considered Article 7.8 and the phrase "shall take appropriate steps to remove the adverse effects or shall withdraw the subsidy" therein. See paragraph 161 above.

2. Article 7.9

(a) "commensurate with the degree and nature of the adverse effects determined to exist"

220. In the context of determining the meaning of the term "appropriate countermeasures" under Article 4.10 of the *SCM Agreement*, the Arbitrators in *Brazil – Aircraft (Article 22.6 – Brazil)* referred to Article 7.9 and the phrase "commensurate with the degree and nature of the adverse effects determined to exist". See paragraph 182 above.

221. The Arbitrators in *US – FSC (Article 22.6 – US)* also referred to this phrase in Article 7.9 (as well as to Article 9) as context for the interpretation of Article 4.10 and considered that "the explicit precision of these indications clearly highlights the lack of any analogous explicit textual indication in Article 4.10 and contrasts with the broader and more general test of 'appropriateness' found in Articles 4.10 and 4.11". For the Arbitrators, such a difference in the text "must be given a meaning".[319] See also paragraph 184 above.

(b) Relationship with other Articles

222. With respect to the relationship with Article 4.10, see paragraph 184 above.

PART IV: NON-ACTIONABLE SUBSIDIES

VIII. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Identification of Non-Actionable Subsidies

8.1 The following subsidies shall be considered as non-actionable:[23]

(*footnote original*) [23] It is recognized that government assistance for various purposes is widely provided by Members and that the mere fact that such assistance may not qualify for non-actionable treatment under the provisions of this Article does not in itself restrict the ability of Members to provide such assistance.

(a) subsidies which are not specific within the meaning of Article 2;

(b) subsidies which are specific within the meaning of Article 2 but which meet all of the conditions provided for in paragraphs 2(a), 2(b) or 2(c) below.

8.2 Notwithstanding the provisions of Parts III and V, the following subsidies shall be non-actionable:

(a) assistance for research activities conducted by firms or by higher education or research establishments on a contract basis with firms if:[24,25,26]

(*footnote original*) [24] Since it is anticipated that civil aircraft will be subject to specific multilateral rules, the provisions of this subparagraph do not apply to that product.
(*footnote original*) [25] Not later than 18 months after the date of entry into force of the WTO Agreement, the Committee on Subsidies and Countervailing Measures provided for in Article 24 (referred to in this Agreement as "the Committee") shall review the operation of the provisions of subparagraph 2(a) with a view to making all necessary modifications to improve the operation of these provisions. In its consideration of possible modifications, the Committee shall carefully review the definitions of the categories set forth in this subparagraph in the light of the experience of Members in the operation of research programmes and the work in other relevant international institutions.
(*footnote original*) [26] The provisions of this Agreement do not apply to fundamental research activities independently conducted by higher education or research establishments. The term "fundamental research" means an enlargement of general scientific and technical knowledge not linked to industrial or commercial objectives.

the assistance covers[27] not more than 75 per cent of the costs of industrial research[28] or 50 per cent of the costs of pre-competitive development activity;[29,30]

(*footnote original*) [27] The allowable levels of non-actionable assistance referred to in this subparagraph shall be established by reference to the total eligible costs incurred over the duration of an individual project.
(*footnote original*) [28] The term "industrial research" means planned search or critical investigation aimed at discovery of new knowledge, with the objective that such knowledge may be useful in developing new products, processes or services, or in bringing about a significant improvement to existing products, processes or services.
(*footnote original*) [29] The term "pre-competitive development activity" means the translation of industrial research findings into a plan, blueprint or design for new, modified or improved products, processes or services whether intended for sale or use, including the creation of a first prototype which would not be capable of commercial use. It may further include the conceptual formulation and design of products, processes or services alternatives and initial demonstration or pilot projects, provided that these same projects cannot be converted or used for industrial application or commercial exploitation. It does not

[319] Panel Report on *US – FSC (Article 22.6 – US)*, paras. 5.32–5.34.

include routine or periodic alterations to existing products, production lines, manufacturing processes, services, and other ongoing operations even though those alterations may represent improvements.

(*footnote original*) [30] In the case of programmes which span industrial research and pre-competitive development activity, the allowable level of non-actionable assistance shall not exceed the simple average of the allowable levels of non-actionable assistance applicable to the above two categories, calculated on the basis of all eligible costs as set forth in items (i) to (v) of this subparagraph.

and provided that such assistance is limited exclusively to:

(i) costs of personnel (researchers, technicians and other supporting staff employed exclusively in the research activity);

(ii) costs of instruments, equipment, land and buildings used exclusively and permanently (except when disposed of on a commercial basis) for the research activity;

(iii) costs of consultancy and equivalent services used exclusively for the research activity, including bought-in research, technical knowledge, patents, etc.;

(iv) additional overhead costs incurred directly as a result of the research activity;

(v) other running costs (such as those of materials, supplies and the like), incurred directly as a result of the research activity.

(b) assistance to disadvantaged regions within the territory of a Member given pursuant to a general framework of regional development[31] and non-specific (within the meaning of Article 2) within eligible regions provided that:

(*footnote original*) [31] A "general framework of regional development" means that regional subsidy programmes are part of an internally consistent and generally applicable regional development policy and that regional development subsidies are not granted in isolated geographical points having no, or virtually no, influence on the development of a region.

(i) each disadvantaged region must be a clearly designated contiguous geographical area with a definable economic and administrative identity;

(ii) the region is considered as disadvantaged on the basis of neutral and objective criteria,[32] indicating that the region's difficulties arise out of more than temporary circumstances; such criteria must be clearly spelled out in law, regulation, or other official document, so as to be capable of verification;

(*footnote original*) [32] "Neutral and objective criteria" means criteria which do not favour certain regions beyond what is appropriate for the elimination or reduction of regional disparities within the framework of the regional development policy. In this regard, regional subsidy programmes shall include ceilings on the amount of assistance which can be granted to each subsidized project. Such ceilings must be differentiated according to the different levels of development of assisted regions and must be expressed in terms of investment costs or cost of job creation. Within such ceilings, the distribution of assistance shall be sufficiently broad and even to avoid the predominant use of a subsidy by, or the granting of disproportionately large amounts of subsidy to, certain enterprises as provided for in Article 2.

(iii) the criteria shall include a measurement of economic development which shall be based on at least one of the following factors:

- one of either income per capita or household income per capita, or GDP per capita, which must not be above 85 per cent of the average for the territory concerned;
- unemployment rate, which must be at least 110 per cent of the average for the territory concerned;

as measured over a three-year period; such measurement, however, may be a composite one and may include other factors.

(c) assistance to promote adaptation of existing facilities[33] to new environmental requirements imposed by law and/or regulations which result in greater constraints and financial burden on firms, provided that the assistance:

(*footnote original*) [33] The term "existing facilities" means facilities which have been in operation for at least two years at the time when new environmental requirements are imposed.

(i) is a one-time non-recurring measure; and

(ii) is limited to 20 per cent of the cost of adaptation; and

(iii) does not cover the cost of replacing and operating the assisted investment, which must be fully borne by firms; and

(iv) is directly linked to and proportionate to a firm's planned reduction of nuisances and pollution, and does not cover any manufacturing cost savings which may be achieved; and

(v) is available to all firms which can adopt the new equipment and/or production processes.

8.3 A subsidy programme for which the provisions of paragraph 2 are invoked shall be notified in advance of its implementation to the Committee in accordance with

the provisions of Part VII. Any such notification shall be sufficiently precise to enable other Members to evaluate the consistency of the programme with the conditions and criteria provided for in the relevant provisions of paragraph 2. Members shall also provide the Committee with yearly updates of such notifications, in particular by supplying information on global expenditure for each programme, and on any modification of the programme. Other Members shall have the right to request information about individual cases of subsidization under a notified programme.[34]

(*footnote original*) [34] It is recognized that nothing in this notification provision requires the provision of confidential information, including confidential business information.

8.4 Upon request of a Member, the Secretariat shall review a notification made pursuant to paragraph 3 and, where necessary, may require additional information from the subsidizing Member concerning the notified programme under review. The Secretariat shall report its findings to the Committee. The Committee shall, upon request, promptly review the findings of the Secretariat (or, if a review by the Secretariat has not been requested, the notification itself), with a view to determining whether the conditions and criteria laid down in paragraph 2 have not been met. The procedure provided for in this paragraph shall be completed at the latest at the first regular meeting of the Committee following the notification of a subsidy programme, provided that at least two months have elapsed between such notification and the regular meeting of the Committee. The review procedure described in this paragraph shall also apply, upon request, to substantial modifications of a programme notified in the yearly updates referred to in paragraph 3.

8.5 Upon the request of a Member, the determination by the Committee referred to in paragraph 4, or a failure by the Committee to make such a determination, as well as the violation, in individual cases, of the conditions set out in a notified programme, shall be submitted to binding arbitration. The arbitration body shall present its conclusions to the Members within 120 days from the date when the matter was referred to the arbitration body. Except as otherwise provided in this paragraph, the DSU shall apply to arbitrations conducted under this paragraph.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. General

(a) Expiry of Article 8

223. This provision has lapsed pursuant to Article 31. In this regard, see paragraph 391 below.

(b) The Doha Round

224. Paragraph 10.2 of the Doha Ministerial Decision on Implementation-Related Issues and Concerns[320] provides that the Doha Ministerial Conference take note of the proposal to treat certain measures by developing countries with a view to achieving legitimate development goals as non-actionable subsidies:

> "Takes note of the proposal to treat measures implemented by developing countries with a view to achieving legitimate development goals, such as regional growth, technology research and development funding, production diversification and development and implementation of environmentally sound methods of production as non-actionable subsidies, and agrees that this issue be addressed in accordance with paragraph 13 below.[321] During the course of the negotiations, Members are urged to exercise due restraint with respect to challenging such measures."

2. Article 8.2

(a) Relationship with other Articles

(i) Article 8.3

225. Referring to the Format for Notifications under Article 8.3 of the Agreement on Subsidies and Countervailing Measures, issued by the SCM Committee,[322] the SCM Committee stated that "With regard to the questions in this standard format on arrangements which may exist for monitoring, auditing and evaluation of assistance under a notified programme, it should be stressed that this standard format does not add to or detract from the relevant legal requirements in Article 8.2 of the SCM Agreement."[323]

3. Article 8.3

(a) "notified"

226. At its meeting of 22 February 1995, the Committee on Subsidies and Countervailing Measures adopted a Format for Notifications under Article 8.3 of the Agreement on Subsidies and Countervailing Measures,[324] to "assist WTO Members in making notifications under the first sentence of Article 8.3".[325]

(b) "updates of . . . notifications"

227. At its meeting of 23 October 1997, the Committee on Subsidies and Countervailing Measures adopted a Format for Updates of Notifications under Article 8.3

---

[320] WT/MIN(01)/17.

[321] (*footnote original*) Paragraph 13 of the Doha Ministerial Decision on Implementation reads as follows:

> "13. **Outstanding Implementation Issues** Agrees that outstanding implementation issues be addressed in accordance with paragraph 12 of the Ministerial Declaration (WT/MIN(01)/DEC/1)."

[322] G/SCM/14.

[323] G/SCM/14, para. 3.

[324] G/SCM/14.

[325] G/SCM/14, para. 1.

of the Agreement on Subsidies and Countervailing Measures,[326] which sets out the information which should be provided for each programme notified under Article 8.3.[327]

(c) Relationship with other Articles

228. With respect to the relationship with Article 8.2, see paragraph 225 above.

4. Article 8.5

(a) Procedures for arbitration

229. At its meeting of 2 June 1998, the SCM Committee adopted procedures for arbitration under Article 8.5 "with the aim of facilitating the operation of arbitration proceedings and enhancing transparency and predictability for all Members with respect to the Application of Article 8 of the Agreement".[328]

5. Relationship with other Articles

230. With respect to the relationship with Article 31, see paragraph 391 below.

IX. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Consultations and Authorized Remedies

9.1 If, in the course of implementation of a programme referred to in paragraph 2 of Article 8, notwithstanding the fact that the programme is consistent with the criteria laid down in that paragraph, a Member has reasons to believe that this programme has resulted in serious adverse effects to the domestic industry of that Member, such as to cause damage which would be difficult to repair, such Member may request consultations with the Member granting or maintaining the subsidy.

9.2 Upon request for consultations under paragraph 1, the Member granting or maintaining the subsidy programme in question shall enter into such consultations as quickly as possible. The purpose of the consultations shall be to clarify the facts of the situation and to arrive at a mutually acceptable solution.

9.3 If no mutually acceptable solution has been reached in consultations under paragraph 2 within 60 days of the request for such consultations, the requesting Member may refer the matter to the Committee.

9.4 Where a matter is referred to the Committee, the Committee shall immediately review the facts involved and the evidence of the effects referred to in paragraph 1. If the Committee determines that such effects exist, it may recommend to the subsidizing Member to modify this programme in such a way as to remove these effects. The Committee shall present its conclusions within 120 days from the date when the matter is referred to it under paragraph 3. In the event the recommendation is not followed within six months, the Committee shall authorize the requesting Member to take appropriate countermeasures commensurate with the nature and degree of the effects determined to exist.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

1. Expiry of Article 9

231. This provision has lapsed pursuant to Article 31. See paragraph 391 below.

2. Relationship with other Articles

232. With respect to the relationship with Article 31, see paragraph 391 below.

PART V: COUNTERVAILING MEASURES

X. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Application of Article VI of GATT 1994[35]

(*footnote original*) [35] The provisions of Part II or III may be invoked in parallel with the provisions of Part V; however, with regard to the effects of a particular subsidy in the domestic market of the importing Member, only one form of relief (either a countervailing duty, if the requirements of Part V are met, or a countermeasure under Articles 4 or 7) shall be available. The provisions of Parts III and V shall not be invoked regarding measures considered non-actionable in accordance with the provisions of Part IV. However, measures referred to in paragraph 1(a) of Article 8 may be investigated in order to determine whether or not they are specific within the meaning of Article 2. In addition, in the case of a subsidy referred to in paragraph 2 of Article 8 conferred pursuant to a programme which has not been notified in accordance with paragraph 3 of Article 8, the provisions of Part III or V may be invoked, but such subsidy shall be treated as non-actionable if it is found to conform to the standards set forth in paragraph 2 of Article 8.

Members shall take all necessary steps to ensure that the imposition of a countervailing duty[36] on any product of the territory of any Member imported into the territory of another Member is in accordance with the provisions of Article VI of GATT 1994 and the terms of this Agreement. Countervailing duties may only be imposed pursuant to investigations initiated[37] and conducted in accordance with the provisions of this Agreement and the Agreement on Agriculture.

[326] G/SCM/13.
[327] G/SCM/13, para. 1.
[328] Procedures for Arbitration under Article 8.5 of the *SCM Agreement*, G/SCM/19, para. 1.

(*footnote original*) [36] The term "countervailing duty" shall be understood to mean a special duty levied for the purpose of offsetting any subsidy bestowed directly or indirectly upon the manufacture, production or export of any merchandise, as provided for in paragraph 3 of Article VI of GATT 1994.
(*footnote original*) [37] The term "initiated" as used hereinafter means procedural action by which a Member formally commences an investigation as provided in Article 11.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

1. The Doha review mandate

233. Paragraph 10.3 of the Doha Ministerial Decision on Implementation Related Issues and Concerns[329] mandates the SCM Committee to continue the review of the countervailing duty provision of the *SCM Agreement* and requests that the Committee report to the General Council by 31 July 2002:

> "Agrees that the Committee on Subsidies and Countervailing Measures shall continue its review of the provisions of the Agreement on Subsidies and Countervailing Measures regarding countervailing duty investigations and report to the General Council by 31 July 2002."

234. As regards the above requirement to report to the General Council, the Chairman of the SCM Committee submitted a report[330] on 30 July 2002. The General Council took note of the report at its meeting on 8 and 31 July 2002.[331]

2. Footnote 36

(a) "offsetting"

235. Discussing the premise that "no countervailing duty may be imposed absent (countervailable) subsidization",[332] the Panel on *US – Lead and Bismuth II* considered that this premise "underlies the very purpose of the countervailing measures envisaged by Part V of the SCM Agreement".[333] The Panel continued with the statement that "footnote 36 to Article 10 does not envisage the imposition of countervailing duties when no (countervailable) subsidy is found to exist, for in such cases there would be no (countervailable) subsidy to 'offset'".[334]

236. In *US – Countervailing Measures on Certain EC Products*, the Panel noted that Article VI:3 of the GATT and Article 10, footnote 36 of the *SCM Agreement* refer to countervailing duties as "special duties" levied for the purpose of "offsetting" a subsidy. Furthermore, the Panel found that countervailing duties are not designed to counteract all market distortions or resource misallocations which might have been caused by subsidization.[335]

(b) "any subsidy bestowed directly or indirectly upon the manufacture"

237. In *US – Softwood Lumber IV*, in examining the "pass-through" issue, the Appellate Body quoted *inter alia* Article 10, footnote 36 of the *SCM Agreement* as one of the relevant legal provisions. In the view of the Appellate Body, the claims under the *SCM Agreement* are "largely derivative" of those under Article VI:3 of the *GATT 1994*.[336] Furthermore, the Appellate Body stated that the phrase "subsid[ies] bestowed . . . *indirectly*", as used in Article VI:3 of the GATT 1994, implies "that financial contributions by the government to the production of *inputs* used in manufacturing products subject to an investigation are not, in principle, excluded from the amount of subsidies that may be offset through the imposition of countervailing duties on the *processed product*".[337] Moreover, the Appellate Body stated:

> "In our view, it would not be possible to determine whether countervailing duties levied on the processed product are *in excess* of the amount of the total subsidy accruing to that product, without establishing whether, and in what amount, subsidies bestowed on the producer of the input flowed through, downstream, to the producer of the product processed from that input. Because Article VI:3 permits *offsetting* through countervailing duties no more than the subsidy determined to have been granted . . . directly or indirectly, on the manufacture [or] production . . . of such *products*, it follows that Members must not impose duties to offset an amount of the input subsidy that has not passed through to the countervailed processed products. Rather, "[i]t is only the amount by which an indirect subsidy granted to producers of inputs flows through to the processed product, together with the amount of subsidy bestowed directly on producers of the processed product, that may be offset through the imposition of countervailing duties."[338]

3. Relationship with Article VI of the GATT 1994

238. In its analysis of the relationship between Article VI of the *GATT 1994* and the *SCM Agreement*, the Appellate Body on *Brazil – Desiccated Coconut* relied

---

[331] WT/GC/M/75, Item 16.
[332] Panel Report on *US – Lead and Bismuth II*, para. 6.56.
[333] Panel Report on *US – Lead and Bismuth II*, para. 6.56.
[334] Panel Report on *US – Lead and Bismuth II*, para. 6.56.
[335] Panel Report on *US – Countervailing Measures on Certain EC Products*, paras. 7.41–7.43.
[336] Appellate Body Report on *US – Softwood Lumber IV*, paras. 134–137.
[337] Appellate Body Report on *US – Softwood Lumber IV*, para. 140.
[338] Appellate Body Report on *US – Softwood Lumber IV*, para. 141.

primarily on Article 10 and stated that "From reading Article 10, it is clear that countervailing duties may only be imposed in accordance with Article VI of the *GATT 1994* and the *SCM Agreement*."[339] In this determination, the Appellate Body relied also on Articles 32.1 and 32.3 of the *SCM Agreement*; see paragraph 392 below for Article 32.1 and paragraphs 399–400 below for Article 32.3 below.

239. In *US – Softwood Lumber IV*, the Appellate Body concluded that "in cases where logs are sold by a harvester/sawmill in arm's-length transactions to unrelated sawmills, it may not be assumed that benefits attaching to the *logs* (non-subject products) automatically pass through to the *lumber* (the subject product) produced by the harvester/sawmill". Therefore, a pass-through analysis is required in such situations.[340] It was on this basis that the Appellate Body upheld the Panel's finding that the Department of Commerce's failure to conduct a pass-through analysis in respect of arm's length sales of *logs* by tenured harvesters/sawmills to unrelated sawmills is inconsistent with Articles 10 and 32.1 of the *SCM Agreement* and Article VI of the *GATT 1994*.[341]

240. Furthermore, in relation to the pass-through analysis in respect of arm's-length sales of *lumber* by tenured harvesters/sawmills to unrelated remanufacturers, the Appellate Body reversed the Panel's findings and stated that the Department of Commerce's failure to conduct such analysis is not inconsistent with Article 10 of the *SCM Agreement* and Article VI:3 of the *GATT 1994*.[342]

241. For a further discussion on the relationship between Article VI of the *GATT 1994* and the *SCM Agreement*, see also paragraphs 412–414 below.

4. Relationship with other Articles

242. With respect to the relationship with Article 32.1 and 32.3, see paragraph 392 below.

XI. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Initiation and Subsequent Investigation

11.1 Except as provided in paragraph 6, an investigation to determine the existence, degree and effect of any alleged subsidy shall be initiated upon a written application by or on behalf of the domestic industry.

11.2 An application under paragraph 1 shall include sufficient evidence of the existence of (a) a subsidy and, if possible, its amount, (b) injury within the meaning of Article VI of GATT 1994 as interpreted by this Agreement, and (c) a causal link between the subsidized imports and the alleged injury. Simple assertion, unsubstantiated by relevant evidence, cannot be considered sufficient to meet the requirements of this paragraph. The application shall contain such information as is reasonably available to the applicant on the following:

(i) the identity of the applicant and a description of the volume and value of the domestic production of the like product by the applicant. Where a written application is made on behalf of the domestic industry, the application shall identify the industry on behalf of which the application is made by a list of all known domestic producers of the like product (or associations of domestic producers of the like product) and, to the extent possible, a description of the volume and value of domestic production of the like product accounted for by such producers;

(ii) a complete description of the allegedly subsidized product, the names of the country or countries of origin or export in question, the identity of each known exporter or foreign producer and a list of known persons importing the product in question;

(iii) evidence with regard to the existence, amount and nature of the subsidy in question;

(iv) evidence that alleged injury to a domestic industry is caused by subsidized imports through the effects of the subsidies; this evidence includes information on the evolution of the volume of the allegedly subsidized imports, the effect of these imports on prices of the like product in the domestic market and the consequent impact of the imports on the domestic industry, as demonstrated by relevant factors and indices having a bearing on the state of the domestic industry, such as those listed in paragraphs 2 and 4 of Article 15.

11.3 The authorities shall review the accuracy and adequacy of the evidence provided in the application to determine whether the evidence is sufficient to justify the initiation of an investigation.

11.4 An investigation shall not be initiated pursuant to paragraph 1 unless the authorities have determined, on the basis of an examination of the degree of support for, or opposition to, the application expressed[38] by domestic producers of the like product, that the application has been made by or on behalf of the domestic industry.[39]

[339] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 15.
[340] Appellate Body Report on *US – Softwood Lumber IV*, paras. 156–157.
[341] Appellate Body Report on *US – Softwood Lumber IV*, para. 159.
[342] Appellate Body Report on *US – Softwood Lumber IV*, para. 165.

The application shall be considered to have been made "by or on behalf of the domestic industry" if it is supported by those domestic producers whose collective output constitutes more than 50 per cent of the total production of the like product produced by that portion of the domestic industry expressing either support for or opposition to the application. However, no investigation shall be initiated when domestic producers expressly supporting the application account for less than 25 per cent of total production of the like product produced by the domestic industry.

(*footnote original*) [38] In the case of fragmented industries involving an exceptionally large number of producers, authorities may determine support and opposition by using statistically valid sampling techniques.
(*footnote original*) [39] Members are aware that in the territory of certain Members employees of domestic producers of the like product or representatives of those employees may make or support an application for an investigation under paragraph 1.

11.5 The authorities shall avoid, unless a decision has been made to initiate an investigation, any publicizing of the application for the initiation of an investigation.

11.6 If, in special circumstances, the authorities concerned decide to initiate an investigation without having received a written application by or on behalf of a domestic industry for the initiation of such investigation, they shall proceed only if they have sufficient evidence of the existence of a subsidy, injury and causal link, as described in paragraph 2, to justify the initiation of an investigation.

11.7 The evidence of both subsidy and injury shall be considered simultaneously (a) in the decision whether or not to initiate an investigation and (b) thereafter, during the course of the investigation, starting on a date not later than the earliest date on which in accordance with the provisions of this Agreement provisional measures may be applied.

11.8 In cases where products are not imported directly from the country of origin but are exported to the importing Member from an intermediate country, the provisions of this Agreement shall be fully applicable and the transaction or transactions shall, for the purposes of this Agreement, be regarded as having taken place between the country of origin and the importing Member.

11.9 An application under paragraph 1 shall be rejected and an investigation shall be terminated promptly as soon as the authorities concerned are satisfied that there is not sufficient evidence of either subsidization or of injury to justify proceeding with the case. There shall be immediate termination in cases where the amount of a subsidy is de minimis, or where the volume of subsidized imports, actual or potential, or the injury, is negligible. For the purpose of this paragraph, the amount of the subsidy shall be considered to be de minimis if the subsidy is less than 1 per cent ad valorem.

11.10 An investigation shall not hinder the procedures of customs clearance.

11.11 Investigations shall, except in special circumstances, be concluded within one year, and in no case more than 18 months, after their initiation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

1. Article 11.4

(a) "by or on behalf of the domestic industry"

(i) Requirement to make a determination

243. In *US – Offset Act (Byrd Amendment)*, the Appellate Body said that Article 11.4 of the *SCM Agreement* requires investigating authorities to "determine" whether an application for the initiation of an investigation has been "made by or on behalf of the domestic industry". If a sufficient number of domestic producers have "expressed support" and the thresholds set out in Article 11.4 of the *SCM Agreement* have therefore been met, the "application shall be considered to have been made by or on behalf of the domestic industry". In such circumstances, an investigation may be initiated. By contrast, there is no requirement that an investigating authority examine the motives of domestic producers that elect to support an investigation. Thus, an "examination" of the "degree" of support, and not the "nature" of support, is required. In other words, it is the "quantity", rather than the "quality", of support that is the issue.[343] The Appellate Body ruled:

> "A textual examination of Article 5.4 of the *Anti-Dumping Agreement* and Article 11.4 of the *SCM Agreement* reveals that those provisions contain no requirement that an investigating authority examine the motives of domestic producers that elect to support an investigation.[344] Nor do they contain any explicit requirement that support be based on certain motives, rather than on others. The use of the terms 'expressing support' and 'expressly supporting' clarify that Articles 5.4 and 11.4 require only that authorities 'determine' that support has been 'expressed' by a sufficient number of domestic producers. Thus, in our view, an 'examination' of the 'degree' of support, and not the 'nature' of support is required. In other words, it is the 'quantity', rather than the 'quality', of support that is the issue."[345]

244. In considering the "object and purpose" that had been identified by the Panel on *US – Offset Act (Byrd Amendment)*, the Appellate Body rejected the Panel's

[343] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, paras. 281–282.
[344] (*footnote original*) We note that the parties' submissions do not suggest otherwise.
[345] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 283.

analysis whereby it "appear[ed] to have found that the Offset Act defeat[ed] this 'object and purpose' because it implie[d] a return to the situation which existed before the introduction" of these provisions, in which an application could be "presumed" to have been made by or on behalf of the domestic industry. The Appellate Body, instead, said that Article 11.4 of the *SCM Agreement* does not permit investigating authorities to "presume" that industry support for an application exists. Rather, a sufficient number of domestic producers must have "expressed support" for an application. In this sense, the Appellate Body did not agree with the Panel that the Offset Act had "defeated" the object and purpose of Article 11.4 of the *SCM Agreement*, even if it were to have assumed that the Panel's understanding of the object and purpose was correct. In the same vein, the Appellate Body did not agree with the Panel that the Offset Act renders the quantitative threshold tests included in Article 11.4 of the *SCM Agreement* "irrelevant" and "completely meaningless" by saying:

> "[W]e do not agree with the Panel that the CDSOA has 'defeated' the object and purpose of Article 5.4 and 11.4, even if we were to assume that the Panel's understanding of such object and purpose was correct. For the same reason, we also do not agree with the Panel that the CDSOA renders the quantitative threshold test included in Articles 5.4 and 11.4 'irrelevant'[346] and 'completely meaningless'."[347, 348]

(ii) "evidence of industry-wide concern of injury"

245. In *US – Offset Act (Byrd Amendment)*, the Appellate Body said that while it agreed with the Panel that support expressed by domestic producers *may* be evidence of an "industry-wide concern of injury", it did not agree that such support on its own may be taken as evidence of such concern. The Appellate Body also noted that Article 11.4 of the *SCM Agreement* contains "no requirement for investigating authorities to examine the motives of producers that elect to support (or to oppose) an application".[349]

(iii) "the Act in effect mandates domestic producers to support the application"

246. The Appellate Body on *US – Offset Act (Byrd Amendment)* said that the Panel had no basis for stating that the Act in effect *mandates* domestic producers to support the application. That a measure provides an "incentive" to act in a certain way, said the Appellate Body, does not mean that it "in effect mandates" or "requires" a certain form of action.[350] It was on this basis that the Appellate Body reversed the Panel's finding that the Offset Act was inconsistent with Article 11.4 of the *SCM Agreement*.[351]

(b) "good faith"

247. In *US – Offset Act (Byrd Amendment)*, the Appellate Body considered the Panel's conclusion that the United States did not act in "good faith" with respect to its obligations under Article 11.4 of the *SCM Agreement*. The Appellate Body observed that Article 31(1) of the Vienna Convention on the Law of Treaties directs a treaty interpreter to interpret a treaty in *good faith* in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of the treaty's object and purpose. Furthermore, under Article 26 of the Vienna Convention on the Law of Treaties, performance of treaties is also governed by the principle of good faith. The Appellate Body has recognized the relevance of the principle of good faith in a number of cases, such as *US – Shrimp* and *US – Hot-Rolled Steel*. In *US – Offset Act (Byrd Amendment)*, the Appellate Body said that the evidence in the Panel record does not support the Panel's statement that the United States "may be regarded as not having acted in good faith". Therefore, the Appellate Body rejected the Panel's conclusion to this effect.[352] The Appellate Body said:

> "Nothing, however, in the covered agreements supports the conclusion that simply because a WTO Member is found to have violated a substantive treaty provision, it has therefore not acted in good faith. In our view, it would be necessary to prove more than mere violation to support such a conclusion."[353]

(c) Relationship with Article 5.4 of the Anti-Dumping Agreement

248. In *US – Offset Act (Byrd Amendment)*, the Appellate Body, further to noting that both Article 5.4 of the *Anti-Dumping Agreement* and Article 11.4 of the *SCM Agreement* are "identical" provisions, went on and analysed them together. See paragraph 243 above.

2. Article 11.9

(a) General

249. In *US – Carbon Steel*, the Panel noted that Article 11.9 sets out certain grounds for termination of countervailing duty proceedings. The Panel considered three

---

[346] (*footnote original*) Panel Report, para. 7.63.
[347] (*footnote original*) *Ibid.*, para. 7.66.
[348] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 289.
[349] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 291.
[350] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 293.
[351] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 294.
[352] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 299.
[353] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 298.

bases for termination: (i) insufficient evidence of either subsidization or of injury; (ii) negligible volume of subsidized imports; and (iii) negligible injury. The Panel stated that these bases were grounded in the notion of, and sought to limit countervailing duty proceedings to cases of, injurious subsidization:

> "We note that Article 11.9 sets out certain other grounds for termination of CVD proceedings as well: (i) insufficient evidence of either subsidization or of injury; (ii) negligible volume of subsidized imports; and (iii) negligible injury. It would seem clear to us that all three bases for termination are fundamentally grounded in the notion of, and seek to limit CVD proceedings to cases of, injurious subsidization. We consider that all grounds for termination of CVD proceedings – including de minimis subsidization – link expressly with the purpose of CVDs and with the object and purpose of the SCM Agreement as set out in Article VI of the GATT 1994. The recurrent theme, in our view, is that CVD proceedings serve to counter injurious subsidization and therefore may not continue if injurious subsidization does not (or is not likely to) exist. The nature of the other bases set out in Article 11.9 for termination of CVD proceedings supports our view that the rationale for the de minimis standard is that relating to non-injurious subsidization."[354]

(b) Non-application of "de minimis" standard to sunset reviews

250. The Appellate Body on *US – Carbon Steel* reversed the Panel's finding that concluded that the 1 per cent *de minimis* standard contained in Article 11.9 of the *SCM Agreement* (which applies to countervailing duty investigations) could be "implied" in Article 21.3 of the *SCM Agreement* on sunset reviews of countervailing duty determinations. In doing so, the Appellate Body observed that all the subdivisions of Article 11 relate to the authorities' initiation and conduct of a countervailing duty *investigation*, and in particular reflect rules that are of "a mainly procedural and evidentiary nature".[355] The Appellate Body considered:

> "Although the terms of Article 11.9 are detailed as regards the obligations imposed on authorities thereunder, none of the words in Article 11.9 suggests that the *de minimis* standard that it contains is applicable *beyond* the investigation phase of a countervailing duty proceeding. In particular, Article 11.9 does *not* refer to Article 21.3, nor to reviews that may follow the imposition of a countervailing duty."[356]

251. The Appellate Body on *US – Carbon Steel* criticized on several grounds the Panel's approach to the *de minimis* standard in Article 21.3 and observed that it "centred" on the premise that the Article 11.9 *de minimis* standard represents a threshold below which subsidization is always non-injurious. While the Appellate Body recognized that it would be "unlikely" that very low levels of subsidization could be shown to cause "material" injury, it considered that the *SCM Agreement* does not *per se* preclude such a possibility.[357] In this regard, the Appellate Body noted:

> "[T]here is nothing in Article 11.9 to suggest that its *de minimis* standard was intended to create a special category of '*non-injurious*' subsidization, or that it reflects a concept that subsidization at less than a *de minimis* threshold *can never* cause injury. For us, the *de minimis* standard in Article 11.9 does no more than lay down an agreed rule that if *de minimis* subsidization is found to exist in an original investigation, authorities are obliged to terminate their investigation, with the result that no countervailing duty can be imposed in such cases."[358]

252. The Appellate Body on *US – Carbon Steel* then examined Article 11.9 and other paragraphs of Article 11 and found that most of these provisions set forth rules of "a mainly procedural and evidentiary nature" and that "none of the words in Article 11.9 suggests that the *de minimis* standard that it contains is applicable *beyond* the investigation phase of a countervailing duty proceeding. In particular, Article 11.9 does *not* refer to Article 21.3, nor to reviews that may follow the imposition of a countervailing duty."[359]

253. The Appellate Body on *US – Carbon Steel* noted in particular the absence of textual cross-referencing between Article 21.3 and Article 11.9 and observed that:

> "[T]he technique of cross-referencing is frequently used in the *SCM Agreement* . . . In the light of the many express cross-references made in the *SCM Agreement*, we attach significance to the absence of any textual link between Article 21.3 reviews and the *de minimis* standard set forth in Article 11.9. We consider this to be noteworthy, having regard to the fact that both the adoption of a *de minimis* standard for investigations, and the introduction of a "sunset" provision, were regarded as important additions to the Tokyo Round Subsidies Code for improving GATT disciplines on subsidies and countervailing duties."[360]

254. The Appellate Body on *US – Carbon Steel* drew attention to the reference to Article 12 in Article 21.4 and noted the lack of reference to Article 11, "as an indication that the drafters intended that the obligations in Article 12, but not those in Article 11, would apply to reviews carried out under Article 21.3".[361] The Appellate

[354] Panel Report on *US – Carbon Steel*, para. 8.63.
[355] Appellate Body Report on *US – Carbon Steel*, paras. 66–67.
[356] Appellate Body Report on *US – Carbon Steel*, para. 68.
[357] Appellate Body Report on *US – Carbon Steel*, paras. 77–82.
[358] Appellate Body Report on *US – Carbon Steel*, para. 83.
[359] Appellate Body Report on *US – Carbon Steel*, paras. 67–68.
[360] Appellate Body Report on *US – Carbon Steel*, para. 69.
[361] Appellate Body Report on *US – Carbon Steel*, para. 72.

Body found that "Part V of the Agreement is aimed at striking a balance between the right to impose countervailing duties to offset subsidization that is causing injury, and the obligations that Members must respect in order to do so. While we agree that Part V strikes such a balance, this alone does not assist us in the task of determining whether the 1 percent *de minimis* standard in Article 11.9 is intended to be applied in reviews carried out pursuant to Article 21.3."[362]

255. The Appellate Body on *US – Carbon Steel* further considered that the Panel's decision to "imply" the *de minimis* standard in Article 21.3 was based on the fact that the Article 11.9 *de minimis* standard draws a threshold below which subsidization is non-injurious. The Appellate Body considered the Panel's approach to be wrong and indicated, *inter alia*, that the Panel had not explained why it thought it appropriate to rely on a 1987 Note prepared by the Secretariat for the Uruguay Round Negotiating Group on Subsidies and Countervailing Measures.[363]

> "We observe, first, that in taking this approach, the Panel did not explain why it thought that it was appropriate to rely on the 1987 Note, but simply stated that "it is useful to consider the rationale for the application of a de minimis standard to investigations, as reflected in a Note by the Secretariat prepared in April 1987".[364] In any event, it seems to us that the 1987 Note does not support the Panel's conclusion that the "rationale" for the *de minimis* standard in Article 11.9 is that a *de minimis* subsidy is considered to be non-injurious. As the Panel itself recognized, the 1987 Note sets forth *two* rationales for *de minimis* standards, but does not suggest which of them is more compelling or preferable. Nor was any evidence adduced before the Panel suggesting that the negotiators of the *SCM Agreement* considered these or other rationales and expressed a preference for any of them. The Panel chose to base its interpretation of Article 11.9 on only one of these rationales. Even if it were appropriate to rely on the 1987 Note in interpreting the *SCM Agreement* in accordance with the rules of interpretation set forth in the *Vienna Convention*, selective reliance on such a document does not provide a proper basis for the conclusion reached by the Panel in this regard."[365]

256. Moreover, the Appellate Body in *US – Carbon Steel* considered that "Article 15 of the *SCM Agreement*, which deals with injury and how it is to be determined, refers, in its paragraph 3, to the *de minimis* standard in Article 11.9 only for the purpose of cumulation of imports. Moreover, footnote 45 to Article 15 indicates that, in the *SCM Agreement*, the term "injury" is, "unless otherwise specified", [to] be taken to mean material injury to a domestic industry, threat of material injury to a domestic industry or material retardation of the establishment of such an industry and shall be interpreted in accordance with the provisions of [Article 15]":[366]

> "In defining the concept of injury, footnote 45 does not make any reference to the amount of subsidy involved. The Appellate Body also highlighted that "Article 1 of the *SCM Agreement* sets out a definition of "subsidy" that applies to the whole of that Agreement. This definition includes *all* such subsidies, regardless of their amount. None of the provisions in the *SCM Agreement* that uses the term "subsidization" confines the meaning of "subsidization" to subsidization at a rate equal to or in excess of 1 percent *ad valorem*, or to any other *de minimis* threshold.[367] It is also worth noting that, under Part II of the *SCM Agreement*, prohibited subsidies are prohibited regardless of the amount of the subsidy.
>
> [I]n our view, the terms "subsidization" and "injury" each have an independent meaning in the *SCM Agreement* which is not derived by reference to the other. It is *unlikely* that very low levels of subsidization could be demonstrated to *cause* "material" injury. Yet such a possibility is not, *per se*, precluded by the Agreement itself, as injury is not defined in the *SCM Agreement* in relation to any specific level of subsidization."[368]

257. The Appellate Body on *US – Carbon Steel* then considered the negotiating history of the SCM Agreement and confirmed its view on the meaning of Article 21.3:

> "[R]ecourse to the negotiating history of the *SCM Agreement* tends to confirm our view as to the meaning of Article 21.3. We note that the two issues, namely the application of a specific *de minimis* standard in investigations, and the introduction of a time-bound limitation on the maintenance of countervailing duties, were considered to be highly important and were the subject of protracted negotiations. . . . The final texts of Article 11.9 and of Article 21.3 were the result of a carefully negotiated compromise that drew from a number of different proposals, reflecting divergent interests and views. We further note in this respect that none of the participants in this appeal pointed to any document indicating that the inclusion of a *de minimis* threshold was ever considered in the negotiations on sunset review provisions leading to the text of Article 21.3."[369]

XII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Evidence

12.1 Interested Members and all interested parties in a countervailing duty investigation shall be given notice of the information which the authorities require and ample opportunity to present in writing all evidence which they consider relevant in respect of the investigation in question.

12.1.1 Exporters, foreign producers or interested Members receiving questionnaires used in a countervailing duty investigation shall be given at least 30 days for reply.[40] Due consideration should be given to any request for an extension of the 30-day period and, upon cause shown, such an extension should be granted whenever practicable.

(*footnote original*) [40] As a general rule, the time-limit for exporters shall be counted from the date of receipt of the questionnaire, which for this purpose shall be deemed to have been received one week from the date on which it was sent to the respondent or transmitted to the appropriate diplomatic representatives of the exporting Member or, in the case of a separate customs territory Member of the WTO, an official representative of the exporting territory.

12.1.2 Subject to the requirement to protect confidential information, evidence presented in writing by one interested Member or interested party shall be made available promptly to other interested Members or interested parties participating in the investigation.

12.1.3 As soon as an investigation has been initiated, the authorities shall provide the full text of the written application received under paragraph 1 of Article 11 to the known exporters[41] and to the authorities of the exporting Member and shall make it available, upon request, to other interested parties involved. Due regard shall be paid to the protection of confidential information, as provided for in paragraph 4.

(*footnote original*) [41] It being understood that where the number of exporters involved is particularly high, the full text of the application should instead be provided only to the authorities of the exporting Member or to the relevant trade association who then should forward copies to the exporters concerned.

12.2 Interested Members and interested parties also shall have the right, upon justification, to present information orally. Where such information is provided orally, the interested Members and interested parties subsequently shall be required to reduce such submissions to writing. Any decision of the investigating authorities can only be based on such information and arguments as were on the written record of this authority and which were available to interested Members and interested parties participating in the investigation, due account having been given to the need to protect confidential information.

12.3 The authorities shall whenever practicable provide timely opportunities for all interested Members and interested parties to see all information that is relevant to the presentation of their cases, that is not confidential as defined in paragraph 4, and that is used by the authorities in a countervailing duty investigation, and to prepare presentations on the basis of this information.

12.4 Any information which is by nature confidential (for example, because its disclosure would be of significant competitive advantage to a competitor or because its disclosure would have a significantly adverse effect upon a person supplying the information or upon a person from whom the supplier acquired the information), or which is provided on a confidential basis by parties to an investigation shall, upon good cause shown, be treated as such by the authorities. Such information shall not be disclosed without specific permission of the party submitting it.[42]

(*footnote original*) [42] Members are aware that in the territory of certain Members disclosure pursuant to a narrowly-drawn protective order may be required.

12.4.1 The authorities shall require interested Members or interested parties providing confidential information to furnish non-confidential summaries thereof. These summaries shall be in sufficient detail to permit a reasonable understanding of the substance of the information submitted in confidence. In exceptional circumstances, such Members or parties may indicate that such information is not susceptible of summary. In such exceptional circumstances, a statement of the reasons why summarization is not possible must be provided.

12.4.2 If the authorities find that a request for confidentiality is not warranted and if the supplier of the information is either unwilling to make the information public or to authorize its disclosure in generalized or summary form, the authorities may disregard such information unless it can be demonstrated to their satisfaction from appropriate sources that the information is correct.[43]

(*footnote original*) [43] Members agree that requests for confidentiality should not be arbitrarily rejected. Members further agree that the investigating authority may request the waiving

of confidentiality only regarding information relevant to the proceedings.

12.5 Except in circumstances provided for in paragraph 7, the authorities shall during the course of an investigation satisfy themselves as to the accuracy of the information supplied by interested Members or interested parties upon which their findings are based.

12.6 The investigating authorities may carry out investigations in the territory of other Members as required, provided that they have notified in good time the Member in question and unless that Member objects to the investigation. Further, the investigating authorities may carry out investigations on the premises of a firm and may examine the records of a firm if (a) the firm so agrees and (b) the Member in question is notified and does not object. The procedures set forth in Annex VI shall apply to investigations on the premises of a firm. Subject to the requirement to protect confidential information, the authorities shall make the results of any such investigations available, or shall provide disclosure thereof pursuant to paragraph 8, to the firms to which they pertain and may make such results available to the applicants.

12.7 In cases in which any interested Member or interested party refuses access to, or otherwise does not provide, necessary information within a reasonable period or significantly impedes the investigation, preliminary and final determinations, affirmative or negative, may be made on the basis of the facts available.

12.8 The authorities shall, before a final determination is made, inform all interested Members and interested parties of the essential facts under consideration which form the basis for the decision whether to apply definitive measures. Such disclosure should take place in sufficient time for the parties to defend their interests.

12.9 For the purposes of this Agreement, "interested parties" shall include:

(i) an exporter or foreign producer or the importer of a product subject to investigation, or a trade or business association a majority of the members of which are producers, exporters or importers of such product; and

(ii) a producer of the like product in the importing Member or a trade and business association a majority of the members of which produce the like product in the territory of the importing Member.

This list shall not preclude Members from allowing domestic or foreign parties other than those mentioned above to be included as interested parties.

12.10 The authorities shall provide opportunities for industrial users of the product under investigation, and for representative consumer organizations in cases where the product is commonly sold at the retail level, to provide information which is relevant to the investigation regarding subsidization, injury and causality.

12.11 The authorities shall take due account of any difficulties experienced by interested parties, in particular small companies, in supplying information requested, and shall provide any assistance practicable.

12.12 The procedures set out above are not intended to prevent the authorities of a Member from proceeding expeditiously with regard to initiating an investigation, reaching preliminary or final determinations, whether affirmative or negative, or from applying provisional or final measures, in accordance with relevant provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

No jurisprudence or decision of a competent WTO body.

XIII. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Consultations

13.1 As soon as possible after an application under Article 11 is accepted, and in any event before the initiation of any investigation, Members the products of which may be subject to such investigation shall be invited for consultations with the aim of clarifying the situation as to the matters referred to in paragraph 2 of Article 11 and arriving at a mutually agreed solution.

13.2 Furthermore, throughout the period of investigation, Members the products of which are the subject of the investigation shall be afforded a reasonable opportunity to continue consultations, with a view to clarifying the factual situation and to arriving at a mutually agreed solution.[44]

(*footnote original*) [44] It is particularly important, in accordance with the provisions of this paragraph, that no affirmative determination whether preliminary or final be made without reasonable opportunity for consultations having been given. Such consultations may establish the basis for proceeding under the provisions of Part II, III or X.

13.3 Without prejudice to the obligation to afford reasonable opportunity for consultation, these provisions regarding consultations are not intended to prevent the authorities of a Member from proceeding expeditiously with regard to initiating the investigation, reaching preliminary or final determinations, whether affirmative or negative, or from applying provisional or final measures, in accordance with the provisions of this Agreement.

13.4 The Member which intends to initiate any investigation or is conducting such an investigation shall permit, upon request, the Member or Members the

products of which are subject to such investigation access to non-confidential evidence, including the non-confidential summary of confidential data being used for initiating or conducting the investigation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

No jurisprudence or decision of a competent WTO body.

XIV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Calculation of the Amount of a Subsidy in Terms of the Benefit to the Recipient

For the purpose of Part V, any method used by the investigating authority to calculate the benefit to the recipient conferred pursuant to paragraph 1 of Article 1 shall be provided for in the national legislation or implementing regulations of the Member concerned and its application to each particular case shall be transparent and adequately explained. Furthermore, any such method shall be consistent with the following guidelines:

(a) government provision of equity capital shall not be considered as conferring a benefit, unless the investment decision can be regarded as inconsistent with the usual investment practice (including for the provision of risk capital) of private investors in the territory of that Member;

(b) a loan by a government shall not be considered as conferring a benefit, unless there is a difference between the amount that the firm receiving the loan pays on the government loan and the amount the firm would pay on a comparable commercial loan which the firm could actually obtain on the market. In this case the benefit shall be the difference between these two amounts;

(c) a loan guarantee by a government shall not be considered as conferring a benefit, unless there is a difference between the amount that the firm receiving the guarantee pays on a loan guaranteed by the government and the amount that the firm would pay on a comparable commercial loan absent the government guarantee. In this case the benefit shall be the difference between these two amounts adjusted for any differences in fees;

(d) the provision of goods or services or purchase of goods by a government shall not be considered as conferring a benefit unless the provision is made for less than adequate remuneration, or the purchase is made for more than adequate remuneration. The adequacy of remuneration shall be determined in relation to prevailing market conditions for the good or service in question in the country of provision or purchase (including price, quality, availability, marketability, transportation and other conditions of purchase or sale).

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

1. General

(a) "calculate the benefit to the recipient conferred pursuant to paragraph 1 of Article 1"

(i) "benefit"

258. The Panel on *US – Lead and Bismuth II* rejected the argument that "benefit" should be determined by reference to the market practice prevailing at the time that each of the four types of "financial contribution [under Article 1.1] . . . is bestowed".[370] Instead, the Panel stated that "[n]othing in the text of Article 14 restricts the analysis envisaged in sub-paragraphs (a)–(d) . . . to the time at which the relevant 'financial contribution' was bestowed. . . . Article 14 does not . . . guide Members as to when th[e] calculation of 'benefit' should take place."[371]

259. As regards the concept of a benefit in Article 1.1, see paragraphs 45–72 above.

2. Article 14(c)

260. In *Canada – Aircraft Credits and Guarantees*, the Panel noted the relevance of Article 14(c) of the *SCM Agreement* for the purpose of establishing the existence of a "benefit" in the framework of equity guarantees. It noted that a "benefit" could arise if there was a difference between the cost of equity with and without an equity guarantee programme, to the extent that such difference was not covered by the fees charged by the programme for providing the equity guarantee. If it is established that the programme's fees were not market-based, the Panel said, such a cost difference would not be covered by the programme's fees:

> "[A]lthough Article 14(c) is expressly concerned with 'benefit' in the context of loan guarantees, there are perhaps sufficient similarities between the operation of loan guarantees and equity guarantees for it to be appropriate to rely on Article 14(c) for the purpose of establishing the existence of 'benefit' in the context of equity guarantees in certain circumstances. Thus, a 'benefit'

[370] Panel Report on *US – Lead and Bismuth II*, para. 6.74.
[371] Panel Report on *US – Lead and Bismuth II*, para. 6.74.

could arise if there is a difference between the cost of equity with and without an *IQ* equity guarantee, to the extent that such difference is not covered by the fees charged by *IQ* for providing the equity guarantee. In our opinion, it is safe to assume that such cost difference would not be covered by *IQ*'s fees if it is established that *IQ*'s fees are not market-based."[372]

261. Regarding the loan guarantee programmes under consideration, the Panel on *Canada – Aircraft Credits and Guarantees* also referred to the findings of the Panel and the Appellate Body in *Canada – Aircraft*[373] and considered that Article 14(c) of the *SCM Agreement* provided "contextual guidance for interpreting the term 'benefit' in the context of loan guarantees". On this basis, the Panel stated that there would be a "benefit" when the cost-saving for the company's customer for securing a loan with a loan guarantee programme is not offset by the programme's fees; for example, if it was established that the programme's fees were not market-based.[374] The Panel stated:

"In our view, and taking into account the contextual guidance afforded by Article 14(c), we consider that an *IQ* loan guarantee will confer a "benefit" when "there is a difference between the amount that the firm receiving the guarantee pays on a loan guaranteed by [*IQ*] and the amount that the firm would pay on a comparable commercial loan absent the [*IQ*] guarantee. In this case the benefit shall be the difference between these two amounts adjusted for any differences in fees."[375]

3. Article 14(d)

(a) General

262. In *US – Softwood Lumber III*, the Panel noted that "Article 14(d) is the relevant provision in the SCM Agreement for measuring the amount of benefit to the recipient by determining whether the government has provided a good or service, within the meaning of Article 1.1(a)(1)(iii) SCM Agreement, for less than adequate remuneration."[376]

263. Regarding Article 14(d) and the notion of benefit, the Panel on *US – Softwood Lumber III* further clarified that the prevailing market conditions for the good or service in question in the country of provision or purchase are determinant:

"Article 14(d) SCM Agreement thus provides that the provision of goods by a government shall not be considered as conferring a benefit unless the provision is made for less than *adequate remuneration*. The adequacy of the remuneration charged by the government shall be determined '**in relation to the prevailing market conditions for the good or service in question in the country of provision or purchase (including price, quality, availability, marketability, transportation and other conditions of purchase or sale)**'. We find that the text of Article 14(d) SCM Agreement is very clear: the adequacy of remuneration is to be determined in relation to *prevailing market conditions* for the good or service in question *in the country of provision or purchase*."[377] (emphasis original)

264. The Panel on *US – Softwood Lumber III* further clarified the notion of prevailing market conditions in the country of provision of the goods under consideration in light of the language of Article 14(d). The Panel considered that the prevailing market conditions of Article 14(d) do not refer to a "theoretical market free of government interference". Rather, Article 14(d) provides that the "prevailing" market conditions in the country of provision of the goods are to form the basis for the comparison. For the Panel, the "ordinary meaning" of the term "prevailing" market conditions is the market conditions as "*as they exist*" or "*which are predominant*". (emphasis original)

"[T]here is no basis in the text of the SCM Agreement to conclude that the market conditions in the country of provision could mean anything else than the conditions prevailing in the market of that country, and not those prevailing in some other country. Article 14(d) SCM Agreement does not just refer to 'market conditions' in general, but explicitly to those prevailing 'in the country of provision' of the good. . . . the fact that a good may also be bought on a market outside the country of provision, does not, in our view, imply that the prices for those goods in that other country become part of the market conditions 'in the country of provision'. . . . In light of the clear language of Article 14(d) SCM Agreement, the 'availability' of the good, the 'conditions of purchase or sale', the 'price', are various aspects of the market conditions existing in the country of provision, and refer to the price for the good in that country, its availability in that country, the conditions of sale as they are prevailing in that country. In our view, the bracketed language in Article 14(d) SCM Agreement specifies what the market conditions referred to in the preceding sentence are, and, as is the case for the 'market conditions', they also all relate to the country of provision, and not some other country.

. . . The fact that in the different context of criteria for a similar measure to constitute a prohibited export subsidy there is an explicit requirement to look at commercially

[372] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.345.
[373] Appellate Body Report on *Canada – Aircraft*, para. 155, regarding the contextual relevance of Article 14 for the purpose of determining the existence of "benefit".
[374] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.397.
[375] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.398.
[376] Panel Report *US – Softwood Lumber III*, para. 7.43.
[377] Panel Report *US – Softwood Lumber III*, para. 7.44.

available world market prices, cannot mean that any reference to the 'market' in the SCM Agreement necessarily refers to the world market, or some portion thereof, particularly when the language in the provision clearly states otherwise. We note that the prices of *imported* goods in the market of provision can indeed form part of the prevailing market conditions in the sense of Article 14(d) SCM Agreement. But this is not the same as the price for those goods prevailing in the country of export. Nor does this imply that import prices necessarily can be the exclusive basis to determine prevailing market conditions.

In our view, however, the 'prevailing market conditions' of Article 14(d) SCM Agreement do not refer to a theoretical market free of government interference as the US seems to be suggesting. Article 14(d) SCM Agreement provides that the "prevailing" market conditions in the country of provision of the goods are to form the basis for the comparison. The ordinary meaning of the term "prevailing" market conditions is the market conditions '*as they exist*' or '*which are predominant*'. Considering that the only qualifier used to the "market conditions" in question is that they be 'prevailing', we are of the view that the text of Article 14(d) SCM Agreement does not in any way require the 'market' conditions to be those of a hypothetical undistorted or perfectly competitive market."[378]

265. The Panel concluded that the text of Article 14(d) does not require the "market" conditions to be those of a "hypothetical undistorted or perfectly competitive market":

"[T]he chapeau of Article 14 SCM Agreement clearly states that Article 14 SCM Agreement establishes guidelines for the calculation of "benefit" *to the recipient*.[379] . . . in order to calculate the benefit to the recipient, an authority is to compare the price the recipient paid the government with the prices prevailing in other market transactions. We do not consider that the goal of the examination of the benefit enjoyed by the recipient is to determine what the market price would have been absent the government's financial contribution . . . or to measure the trade distorting potential of the government's financial contribution. The text of Article 14 SCM Agreement does not require a general "*but for*" test to the prevailing market conditions. We are thus of the view that Article 14(d) SCM Agreement does not require that the authority construct a market price that could have existed but for the government's involvement, nor does it allow the authority to decline to use in-country prices because they may be affected by the government's financial contribution.

We consider that if the drafters of the SCM Agreement had wanted to exclude the use of market prices in case of price suppression due to the government's involvement, they would have explicitly provided so, but they have not. The opposite is the case. As we found above, when it comes to the market conditions, the only qualifier in the text of the Agreement is "prevailing". Thus, the market conditions are those that are actually existing in the country and are those faced by the recipient of the financial contribution. The reference prices are those that the producer would have had to pay if it had to buy the goods now provided by the government from a different and independent seller."[380]

266. The Panel on *US – Softwood Lumber III* clarified that the plain meaning of the text needed to be taken into account even in exceptional circumstances:

"[E]ven if in certain exceptional circumstances it may prove difficult in practice to apply Article 14(d) SCM Agreement, that would not justify reading words into the text of the Agreement that are not there or ignoring the plain meaning of the text. In our view, the text of Article 14 SCM Agreement leaves no choice to the investigating authority but to use as a benchmark the market, for the good (or service) in question, *as it exists* in the country of provision."[381]

267. The Panel on *US – Softwood Lumber III* noted moreover that with regard to domestic markets, each WTO Member has a different market with different qualitative requirements:

"[T]he domestic markets of the member countries of the WTO are not identical – nor are they expected to be – and there is nothing in the WTO or SCM Agreement indicating that, in order to qualify as such, markets must meet specific qualitative requirements . . . A contrary conclusion would lead to a result in which the importing country would have a very broad scope to choose another market, including its own, in order to determine benefit. Such a result would clearly distort the letter and purpose of Article 14(d) and vitiate its intended application."[382]

---

[378] Panel Report *US – Softwood Lumber III*, paras. 7.46, 7.48 and 7.50.

[379] (*footnote original*) We note that the US agrees that "As stated in the chapeau to Article 14, and confirmed by the Appellate Body, the benefit for purposes of paragraph 1 of Article 1 is the benefit to the recipient." US Answers to Questions from the Panel after the First Meeting, para. 41. The Appellate Body in the *Canada – Measures Affecting the Export of Civilian Aircraft* case interpreted the term "benefit" in the SCM Agreement in the following manner:

> "157. We also believe that the word 'benefit', as used in Article 1.1(b), implies some kind of comparison. This must be so, for there can be no 'benefit' to the recipient unless the 'financial contribution' *makes the recipient 'better off' than it would otherwise have been, absent that contribution.* In our view, the marketplace provides an appropriate basis for comparison in determining whether a 'benefit' has been 'conferred', because the trade distorting potential of a 'financial contribution' can be identified by determining whether the recipient has received a 'financial contribution' *on terms more favourable than those available to the recipient in the market*." (emphasis added) Appellate Body Report, *Canada – Measures Affecting the Export of Civilian Aircraft*, WT/DS70/AB/R, adopted 20 August 1999, para. 157.

[380] Panel Report *US – Softwood Lumber III*, paras. 7.51–7.52.

[381] Panel Report *US – Softwood Lumber III*, para. 7.53.

[382] Panel Report *US – Softwood Lumber III*, para. 7.58.

268. On this basis, the Panel found that the Member that had included its own data in the examination of the claimant's stumpage prices had acted inconsistently with Article 14 and 14(d) of the *SCM Agreement*.[383]

(b) Relationship with other Articles

269. With respect to the relationship with Article 1.1 and Article 1.1(b), see respectively paragraphs 79 and 73 above.

XV. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15
Determination of Injury[45]

(*footnote original*) [45] Under this Agreement the term "injury" shall, unless otherwise specified, be taken to mean material injury to a domestic industry, threat of material injury to a domestic industry or material retardation of the establishment of such an industry and shall be interpreted in accordance with the provisions of this Article.

15.1 A determination of injury for purposes of Article VI of GATT 1994 shall be based on positive evidence and involve an objective examination of both (a) the volume of the subsidized imports and the effect of the subsidized imports on prices in the domestic market for like products[46] and (b) the consequent impact of these imports on the domestic producers of such products.

(*footnote original*) [46] Throughout this Agreement the term "like product" ("produit similaire") shall be interpreted to mean a product which is identical, i.e. alike in all respects to the product under consideration, or in the absence of such a product, another product which, although not alike in all respects, has characteristics closely resembling those of the product under consideration.

15.2 With regard to the volume of the subsidized imports, the investigating authorities shall consider whether there has been a significant increase in subsidized imports, either in absolute terms or relative to production or consumption in the importing Member. With regard to the effect of the subsidized imports on prices, the investigating authorities shall consider whether there has been a significant price undercutting by the subsidized imports as compared with the price of a like product of the importing Member, or whether the effect of such imports is otherwise to depress prices to a significant degree or to prevent price increases, which otherwise would have occurred, to a significant degree. No one or several of these factors can necessarily give decisive guidance.

15.3 Where imports of a product from more than one country are simultaneously subject to countervailing duty investigations, the investigating authorities may cumulatively assess the effects of such imports only if they determine that (a) the amount of subsidization established in relation to the imports from each country is more than de minimis as defined in paragraph 9 of Article 11 and the volume of imports from each country is not negligible and (b) a cumulative assessment of the effects of the imports is appropriate in light of the conditions of competition between the imported products and the conditions of competition between the imported products and the like domestic product.

15.4 The examination of the impact of the subsidized imports on the domestic industry shall include an evaluation of all relevant economic factors and indices having a bearing on the state of the industry, including actual and potential decline in output, sales, market share, profits, productivity, return on investments, or utilization of capacity; factors affecting domestic prices; actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital or investments and, in the case of agriculture, whether there has been an increased burden on government support programmes. This list is not exhaustive, nor can one or several of these factors necessarily give decisive guidance.

15.5 It must be demonstrated that the subsidized imports are, through the effects[47] of subsidies, causing injury within the meaning of this Agreement. The demonstration of a causal relationship between the subsidized imports and the injury to the domestic industry shall be based on an examination of all relevant evidence before the authorities. The authorities shall also examine any known factors other than the subsidized imports which at the same time are injuring the domestic industry, and the injuries caused by these other factors must not be attributed to the subsidized imports. Factors which may be relevant in this respect include, inter alia, the volumes and prices of non-subsidized imports of the product in question, contraction in demand or changes in the patterns of consumption, trade restrictive practices of and competition between the foreign and domestic producers, developments in technology and the export performance and productivity of the domestic industry.

(*footnote original*) [47] As set forth in paragraphs 2 and 4.

15.6 The effect of the subsidized imports shall be assessed in relation to the domestic production of the like product when available data permit the separate identification of that production on the basis of such criteria as the production process, producers' sales and profits. If such separate identification of that production is not possible, the effects of the subsidized imports shall be assessed by the examination of the production of the narrowest group or range of products, which includes the like product, for which the necessary information can be provided.

15.7 A determination of a threat of material injury shall be based on facts and not merely on allegation, conjec-

[383] Panel Report *US – Softwood Lumber III*, para. 7.59.

ture or remote possibility. The change in circumstances which would create a situation in which the subsidy would cause injury must be clearly foreseen and imminent. In making a determination regarding the existence of a threat of material injury, the investigating authorities should consider, inter alia, such factors as:

(i) nature of the subsidy or subsidies in question and the trade effects likely to arise therefrom;

(ii) a significant rate of increase of subsidized imports into the domestic market indicating the likelihood of substantially increased importation;

(iii) sufficient freely disposable, or an imminent, substantial increase in, capacity of the exporter indicating the likelihood of substantially increased subsidized exports to the importing Member's market, taking into account the availability of other export markets to absorb any additional exports;

(iv) whether imports are entering at prices that will have a significant depressing or suppressing effect on domestic prices, and would likely increase demand for further imports; and

(v) inventories of the product being investigated.

No one of these factors by itself can necessarily give decisive guidance but the totality of the factors considered must lead to the conclusion that further subsidized exports are imminent and that, unless protective action is taken, material injury would occur.

15.8 With respect to cases where injury is threatened by subsidized imports, the application of countervailing measures shall be considered and decided with special care.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

1. Footnote 46

(a) "characteristics closely resembling"

270. In its "like product" analysis under footnote 46, the Panel on *Indonesia – Autos* emphasized the physical characteristics of the compared products and held that in its analysis, the Panel would also be guided by the "like product" analysis contained in the Appellate Body Report in *Korea – Alcoholic Beverages*:

> "In our view, the analysis as to which cars have 'characteristics closely resembling' those of the Timor logically must include as an important element the physical characteristics of the cars in question. This is especially the case because many of the other possible criteria identified by the parties are closely related to the physical characteristics of the cars in question. Thus, factors such as brand loyalty, brand image/reputation, status and resale value reflect, at least in part, an assessment by purchasers of the physical characteristics of the cars being purchased. Although it is possible that products that are physically very different can be put to the same uses, differences in uses generally arise out of, and assist in assessing the importance of, different physical characteristics of products. Similarly, the extent to which products are substitutable may also be determined in substantial part by their physical characteristics. Price differences also may (but will not necessarily) reflect physical differences in products. An analysis of tariff classification principles may be useful because it provides guidance as to which physical distinctions between products were considered significant by Customs experts. However, we do not see that the SCM Agreement precludes us from looking at criteria other than physical characteristics, where relevant to the like product analysis. The term 'characteristics closely resembling' in its ordinary meaning includes but is not limited to physical characteristics, and we see nothing in the context or object and purpose of the SCM Agreement that would dictate a different conclusion.
>
> Although we are required in this dispute to interpret the term 'like product' in conformity with the specific definition provided in the SCM Agreement, we believe that useful guidance can nevertheless be derived from prior analysis of 'like product' issues under other provisions of the WTO Agreement. Thus, we note the statement of the Appellate Body in *Alcoholic Beverages (1996)* that, in this context as in any other, the issue of 'like product' must be considered on a case-by-case basis, that in applying relevant criteria panels can only use their best judgment regarding whether in fact products are like, and that this will always involve an unavoidable element of individual, discretionary judgement."[384]

271. Further in its "like products" analysis under footnote 46, the Panel on *Indonesia – Autos* rejected the argument that it "must consider all passenger cars to be 'like' because any effort to differentiate between passenger cars with a multitude of differing characteristics would inevitably result in arbitrary divisions":[385]

> "We are aware that there are innumerable differences among passenger cars and that the identification of appropriate deciding lines between them may not be a simple task. However, this does not in our view justify lumping all such products together where the differences among the products are so dramatic. . . . We must endeavour to find some reasonable way to assess the relative importance of the various differences in the minds of consumers and to devise some sensible means to categorize passenger cars."[386]

[384] Panel Report on *Indonesia – Autos*, paras. 14.173–14.174.
[385] Panel Report on *Indonesia – Autos*, para. 14.176.
[386] Panel Report on *Indonesia – Autos*, para. 14.176.

272. The Panel on *Indonesia – Autos* decided that "One reasonable way . . . to approach the 'like product' issue is to look at the manner in which the automotive industry itself has analysed market segmentation."[387] The Panel opted for an analysis which "considered the physical characteristics of the cars in question when designing its segmentation"; it considered that "an approach, which segments the market based on a combination of size and price/market position, [is] a sensible one which is consistent with the criteria relevant to 'like product' analysis under the SCM Agreement".[388]

273. In *Indonesia – Autos*, Indonesia argued that the low price of its Timor car placed it in a "special market niche" and rendered it unlike other, more expensive, car models. The Panel noted that the complainants in the case before it were claiming that the Indonesian Timor was being sold at undercutting prices as a result of subsidization and rejected the argument by Indonesia:

> "We do not preclude that price might be a relevant consideration in performing 'like product' analysis, particularly where differences in price represent one way to assess the relative importance of differing physical characteristics to consumers. In this case, however, the complainants allege that the Timor is being sold at undercutting prices as a result of subsidization. If we were to conclude that the low price of the Timor in the Indonesian market were to render the Timor 'unlike' other models which are similar in physical characteristics to the Timor but priced higher, the result would be that, in cases where the subsidization and resulting price undercutting were sufficiently high, price undercutting claims under Article 6 could never prevail. Thus, we do not consider that the Timor's lower price is a basis to conclude that it is unlike the models alleged by the complainants to be 'like' the Timor."[389]

274. Considering whether "the difference between a product assembled and unassembled is sufficiently important that the unassembled product does not 'closely resemble' the assembled product",[390] the Panel on *Indonesia – Autos* stated:

> "We do not consider that an unassembled product *ipso facto* is not a like product to that product assembled. Recalling the view of the Appellate Body that tariff classification may be a useful tool in like product analysis [footnote omitted], we note that, under the General Rules for the Interpretation of the Harmonized System:
>
> Any reference in a heading to an Article shall be taken to include a reference to that Article complete or unfinished, provided that, as presented, the incomplete or unassembled Article has the essential character of the complete or unfinished article.
>
> We think that a comparable approach to the relation between assembled and unassembled products makes good sense in the context of this dispute."[391]

2. Relationship with other Articles

275. When reversing the Panel's findings that the *de minimis* standard contained in Article 11.9 was applicable to sunset review investigations, the Appellate Body in *US – Carbon Steel* considered Article 15 and its footnote 45 as support for its views. In this regard, see paragraph 256 above.

XVI. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16
Definition of Domestic Industry

16.1 For the purposes of this Agreement, the term "domestic industry" shall, except as provided in paragraph 2, be interpreted as referring to the domestic producers as a whole of the like products or to those of them whose collective output of the products constitutes a major proportion of the total domestic production of those products, except that when producers are related[48] to the exporters or importers or are themselves importers of the allegedly subsidized product or a like product from other countries, the term "domestic industry" may be interpreted as referring to the rest of the producers.

(*footnote original*) [48] For the purpose of this paragraph, producers shall be deemed to be related to exporters or importers only if (a) one of them directly or indirectly controls the other; or (b) both of them are directly or indirectly controlled by a third person; or (c) together they directly or indirectly control a third person, provided that there are grounds for believing or suspecting that the effect of the relationship is such as to cause the producer concerned to behave differently from non-related producers. For the purpose of this paragraph, one shall be deemed to control another when the former is legally or operationally in a position to exercise restraint or direction over the latter.

16.2. In exceptional circumstances, the territory of a Member may, for the production in question, be divided into two or more competitive markets and the producers within each market may be regarded as a separate industry if (a) the producers within such market sell all or almost all of their production of the product in question in that market, and (b) the demand in that market is not to any substantial degree supplied by producers of the product in question located elsewhere in the territory. In such circumstances, injury may be found to exist even where a major portion of the total domestic industry is not injured, provided there is a concentration of subsidized imports into such an isolated market and provided further that the subsidized imports are causing injury to the producers of all or almost all of the production within such market.

[387] Panel Report on *Indonesia – Autos*, para. 14.177.
[388] Panel Report on *Indonesia – Autos*, para. 14.178.
[389] Panel Report on *Indonesia – Autos*, para. 14.192.
[390] Panel Report on *Indonesia – Autos*, para. 14.196.
[391] Panel Report on *Indonesia – Autos*, para. 14.197.

16.3 When the domestic industry has been interpreted as referring to the producers in a certain area, i.e. a market as defined in paragraph 2, countervailing duties shall be levied only on the products in question consigned for final consumption to that area. When the constitutional law of the importing Member does not permit the levying of countervailing duties on such a basis, the importing Member may levy the countervailing duties without limitation only if (a) the exporters shall have been given an opportunity to cease exporting at subsidized prices to the area concerned or otherwise give assurances pursuant to Article 18, and adequate assurances in this regard have not been promptly given, and (b) such duties cannot be levied only on products of specific producers which supply the area in question.

16.4 Where two or more countries have reached under the provisions of paragraph 8(a) of Article XXIV of GATT 1994 such a level of integration that they have the characteristics of a single, unified market, the industry in the entire area of integration shall be taken to be the domestic industry referred to in paragraphs 1 and 2.

16.5 The provisions of paragraph 6 of Article 15 shall be applicable to this Article.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16

No jurisprudence or decision of a competent WTO body.

XVII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17
Provisional Measures

17.1 Provisional measures may be applied only if:

(a) an investigation has been initiated in accordance with the provisions of Article 11, a public notice has been given to that effect and interested Members and interested parties have been given adequate opportunities to submit information and make comments;

(b) a preliminary affirmative determination has been made that a subsidy exists and that there is injury to a domestic industry caused by subsidized imports; and

(c) the authorities concerned judge such measures necessary to prevent injury being caused during the investigation.

17.2 Provisional measures may take the form of provisional countervailing duties guaranteed by cash deposits or bonds equal to the amount of the provisionally calculated amount of subsidization.

17.3 Provisional measures shall not be applied sooner than 60 days from the date of initiation of the investigation.

17.4 The application of provisional measures shall be limited to as short a period as possible, not exceeding four months.

17.5 The relevant provisions of Article 19 shall be followed in the application of provisional measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

1. Article 17.3

(a) General

276. In *US – Softwood Lumber III*, the Panel found that the provisional measures were in violation of Article 17.3 (and 17.4) of the *SCM Agreement* because they were imposed less than 60 days after the date of initiation of the investigation and because they applied to imports for a period of more than four months. The Panel found that "Article 17.3 and 17.4 of the SCM Agreement are unambiguous, clearly specifying that provisional measures shall not be applied sooner than 60 days after initiation and their application shall be limited to maximum 4 months."[392]

(b) Relationship with other Articles

(i) Article 20

277. Furthermore, the Panel on *US – Softwood III* considered that regarding "the starting-point for the application of provisional and final measures, Article 20 of the SCM Agreement establishes two exceptions to the general rule of non-retroactivity of final countervailing duties and no exceptions to the general rule of non-retroactivity of provisional measures. Nothing in Article 20 SCM Agreement provides an exception to the rules relating to the minimum period between initiation and application of provisional measures or the maximum period of application of such measures as provided for in Articles 17.3 and 17.4 SCM Agreement."[393]

2. Article 17.4

(a) General

278. In *US – Softwood Lumber III*, the Panel considered that the text of Article 17.3 (and Article 17.4) is unambiguous. See paragraph 276 above.

(b) Period of application

279. The Panel on *US – Softwood Lumber III* rejected the argument that the period of application referred to

[392] Panel Report *US – Softwood Lumber III*, para. 7.100.
[393] Panel Report *US – Softwood Lumber III*, para. 7.100.

in Article 17.4 is the period during which cash deposits or bonds are taken, rather than the period during which the affected imports enter for consumption. For the Panel, this interpretation would allow for significantly more than four months' worth of entries to be covered by a provisional measure. The Panel considered that such an interpretation would effectively nullify the disciplines of Article 17, particularly in light of the obligation contained in Article 20.1:

> "We consider that the US argument that the period of application in Article 17.4 SCM Agreement refers to the period during which cash deposits or bonds are taken rather than the period during which the affected imports enter for consumption would have the effect of nullifying the provision, particularly in light of Article 20.1 SCM Agreement. We cannot accept such an interpretation which would reduce a provision of the treaty to redundancy or inutility.[394] The US interpretation would allow significantly more than 4 months worth of entries to be covered by a provisional measure. For example, under this interpretation, a decision under Article 17.1 SCM Agreement could be taken after 60 days, following which the importing country would wait say 3 months before 'applying' the provisional measures for 4 months, including retroactively to imports entering after the date of the decision. In our view this would render meaningless the disciplines imposed by Article 17 SCM Agreement."[395]

(c) Relationship with other Articles

(i) Article 20.1

280. In *US – Softwood Lumber III*, the Panel considered that Article 20 does not provide an exception to the maximum period of application of provisional measures in Article 17.4. See paragraph 279 above.

XVIII. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Undertakings

18.1 Proceedings may[49] be suspended or terminated without the imposition of provisional measures or countervailing duties upon receipt of satisfactory voluntary undertakings under which:

(*footnote original*) [49] The word "may" shall not be interpreted to allow the simultaneous continuation of proceedings with the implementation of undertakings, except as provided in paragraph 4.

(a) the government of the exporting Member agrees to eliminate or limit the subsidy or take other measures concerning its effects; or

(b) the exporter agrees to revise its prices so that the investigating authorities are satisfied that the injurious effect of the subsidy is eliminated. Price increases under such undertakings shall not be higher than necessary to eliminate the amount of the subsidy. It is desirable that the price increases be less than the amount of the subsidy if such increases would be adequate to remove the injury to the domestic industry.

18.2 Undertakings shall not be sought or accepted unless the authorities of the importing Member have made a preliminary affirmative determination of subsidization and injury caused by such subsidization and, in case of undertakings from exporters, have obtained the consent of the exporting Member.

18.3 Undertakings offered need not be accepted if the authorities of the importing Member consider their acceptance impractical, for example if the number of actual or potential exporters is too great, or for other reasons, including reasons of general policy. Should the case arise and where practicable, the authorities shall provide to the exporter the reasons which have led them to consider acceptance of an undertaking as inappropriate, and shall, to the extent possible, give the exporter an opportunity to make comments thereon.

18.4 If an undertaking is accepted, the investigation of subsidization and injury shall nevertheless be completed if the exporting Member so desires or the importing Member so decides. In such a case, if a negative determination of subsidization or injury is made, the undertaking shall automatically lapse, except in cases where such a determination is due in large part to the existence of an undertaking. In such cases, the authorities concerned may require that an undertaking be maintained for a reasonable period consistent with the provisions of this Agreement. In the event that an affirmative determination of subsidization and injury is made, the undertaking shall continue consistent with its terms and the provisions of this Agreement.

18.5 Price undertakings may be suggested by the authorities of the importing Member, but no exporter shall be forced to enter into such undertakings. The fact that governments or exporters do not offer such undertakings, or do not accept an invitation to do so, shall in no way prejudice the consideration of the case. However, the authorities are free to determine that a threat of injury is more likely to be realized if the subsidized imports continue.

18.6 Authorities of an importing Member may require any government or exporter from whom an undertaking has been accepted to provide periodically information relevant to the fulfilment of such an undertaking, and to permit verification of pertinent data. In case of violation of an undertaking, the authorities of the importing

[394] (*footnote original*) Appellate Body Report, *United States – Standards for Reformulated and Conventional Gasoline*, WT/DS/2/AB/R, adopted on 20 May 1996, p. 23.
[395] Panel Report *US – Softwood Lumber III*, para. 7.102.

Member may take, under this Agreement in conformity with its provisions, expeditious actions which may constitute immediate application of provisional measures using the best information available. In such cases, definitive duties may be levied in accordance with this Agreement on products entered for consumption not more than 90 days before the application of such provisional measures, except that any such retroactive assessment shall not apply to imports entered before the violation of the undertaking.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

No jurisprudence or decision of a competent WTO body.

XIX. ARTICLE 19

A. TEXT OF ARTICLE 19

Article 19

Imposition and Collection of Countervailing Duties

19.1 If, after reasonable efforts have been made to complete consultations, a Member makes a final determination of the existence and amount of the subsidy and that, through the effects of the subsidy, the subsidized imports are causing injury, it may impose a countervailing duty in accordance with the provisions of this Article unless the subsidy or subsidies are withdrawn.

19.2 The decision whether or not to impose a countervailing duty in cases where all requirements for the imposition have been fulfilled, and the decision whether the amount of the countervailing duty to be imposed shall be the full amount of the subsidy or less, are decisions to be made by the authorities of the importing Member. It is desirable that the imposition should be permissive in the territory of all Members, that the duty should be less than the total amount of the subsidy if such lesser duty would be adequate to remove the injury to the domestic industry, and that procedures should be established which would allow the authorities concerned to take due account of representations made by domestic interested parties[50] whose interests might be adversely affected by the imposition of a countervailing duty.

(*footnote original*) [50] For the purpose of this paragraph, the term "domestic interested parties" shall include consumers and industrial users of the imported product subject to investigation.

19.3 When a countervailing duty is imposed in respect of any product, such countervailing duty shall be levied, in the appropriate amounts in each case, on a non-discriminatory basis on imports of such product from all sources found to be subsidized and causing injury, except as to imports from those sources which have renounced any subsidies in question or from which undertakings under the terms of this Agreement have been accepted. Any exporter whose exports are subject to a definitive countervailing duty but who was not actually investigated for reasons other than a refusal to cooperate, shall be entitled to an expedited review in order that the investigating authorities promptly establish an individual countervailing duty rate for that exporter.

19.4 No countervailing duty shall be levied[51] on any imported product in excess of the amount of the subsidy found to exist, calculated in terms of subsidization per unit of the subsidized and exported product.

(*footnote original*) [51] As used in this Agreement "levy" shall mean the definitive or final legal assessment or collection of a duty or tax.

B. INTERPRETATION AND APPLICATION OF ARTICLE 19

1. Article 19.1

(a) Relationship with other Articles

(i) Article 4.7

281. The Panel on *Australia – Automotive Leather II (Article 21.5 – US)* relied, *inter alia*, on Article 19.1 in its finding that the phrase "withdraw the subsidy" under Article 4.7 referred to retroactive remedies (repayment). See paragraph 161 above.

(ii) Article 19.4

282. For the relationship with Article 19.4, see paragraphs 286–287 below.

2. Article 19.3

283. In *US – Softwood Lumber III*, the Panel recalled the relevant part of Article19.3 concerning the rights of any investigated exporter to an expedited review (unless he is being investigated for refusing to cooperate):

> "[T]he relevant part of Article 19.3 SCM Agreement, namely that any exporter whose exports were not actually investigated for reasons other than a refusal to cooperate is '*entitled*' to an expedited review to establish an individual countervailing duty rate must be conducted, upon request, for any exporter of the type referred to in Article 19.3 SCM Agreement."[396]

284. The Panel on *US – Softwood Lumber III* found the relevant Member's regulations to be silent on the issue of whether the regulations under consideration prohibit the investigating authorities from conducting such reviews in aggregate cases and stated that the fact that no regulation exists regarding the case of aggregate investigations "does not imply" that the Member is "required by law to deny any requests for expedited review where an aggregate countervailing duty rate has been applied". Therefore, the Panel concluded that the

[396] Panel Report *US – Softwood Lumber III*, para. 7.136.

laws and regulations that had been examined in the case did not mandate a violation of the requirement in Article 19.3 to conduct an expedited review. For this reason, the Panel also found that the Member is not required by law to violate Article 19.4 by levying countervailing duties in excess of the amount of the subsidy found:

> "We consider that the fact that no regulation exists regarding the apparently rare case of aggregate investigations does not imply that the USDOC is required by law to deny any requests for expedited review where an aggregate countervailing duty rate has been applied. In other words, the USDOC Regulations are simply silent on the issue.
>
> We thus agree with the US that the fact that the USDOC has not elected to codify specific rules for handling what could potentially be an extremely large number of expedited reviews in an aggregate case does not in any way diminish the Department's statutory authority to conduct such reviews. We therefore find that the fact that 19 C.F.R. § 351.214(k)(1) does not specifically address the possibility of expedited reviews in aggregate cases does not prohibit such reviews . . . We consider that the fact that no regulation exists regarding the apparently rare case of aggregate investigations, does not imply that exporters are denied by law the right to an expedited review where an aggregate countervailing duty rate was applied. The US laws and regulations cited by Canada thus do not mandate a violation of the requirement under Article 19.3 SCM Agreement to conduct an expedited review in order that the authority promptly establish an individual countervailing duty rate for any exporter whose exports are subject to a definitive countervailing duty but who was not actually investigated for reasons other than a refusal to cooperate. For this reason also, we do not find that the USDOC is required by law to violate Article 19.4 SCM Agreement in the softwood lumber case by inevitably levying countervailing duties in excess of the amount of the subsidy found.
>
> In sum, we find that the above-cited US laws and regulations concerning expedited reviews do not mandate a violation of Article 19.3 SCM Agreement, or thereby, of Article 19.4 SCM Agreement, and thus reject Canada's claims in this respect."[397]

285. Finally, the Panel on *US – Softwood Lumber III*, noting that no final determination had been made and that no reviews of such a determination had been requested at the time of the preliminary determination under review by the Panel, and given the Panel's findings that the Member's laws and regulations did not preclude the Member from acting consistently with Article 19.3 and Article 21, considered that with respect to expedited and administrative reviews "it is not appropriate to rule on a potential denial of a request for review if no such request has even been made. The WTO dispute settlement system allows a Member to challenge a law as such or its actual application in a particular case, but not its possible future application."[398]

3. Article 19.4

(a) General

286. Referring to the ordinary meaning of Article 19.4, the Panel on *US – Lead and Bismuth II* stated that "no countervailing duty may be imposed on an imported product if no (countervailable) subsidy is found to exist with respect to that imported product, since in such cases the amount of subsidy found to exist with respect to the imported product would be zero. Thus, like Article 19.1, Article 19.4 ... establishes a clear nexus between the imposition of a countervailing duty, and the existence of a (countervailable) subsidy."[399]

287. The Panel on *US – Lead and Bismuth II* concluded that "consistent with the fundamental premise underlying Articles 19.1, 19.4, and 21.1 of the SCM Agreement, and Article VI:3 of the GATT 1994, and consistent with the object and purpose of countervailing duties envisaged by Part V of the SCM Agreement, we consider that a countervailing duty may only be imposed on an imported product if it is demonstrated that a (countervailable) subsidy was bestowed directly or indirectly on the manufacture, production or export of that merchandise".[400]

(b) Relationship with other Articles

288. With respect to the relationship with Article 19.1, see paragraph 282 above.

289. With respect to the relationship with Article 19.3, see paragraphs 284–285 above.

290. With respect to the relationship with Article 21.1, see paragraph 287 above.

XX. ARTICLE 20

A. TEXT OF ARTICLE 20

Article 20
Retroactivity

20.1 Provisional measures and countervailing duties shall only be applied to products which enter for consumption after the time when the decision under paragraph 1 of Article 17 and paragraph 1 of Article 19, respectively, enters into force, subject to the exceptions set out in this Article.

---

[397] Panel Report *US – Softwood Lumber III*, paras. 7.133 and 7.140–7.142.
[398] Panel Report *US – Softwood Lumber III*, paras. 7.156–7.157.
[399] Panel Report on *US – Lead and Bismuth II*, para. 6.52.
[400] Panel Report on *US – Lead and Bismuth II*, para. 6.57.

20.2 Where a final determination of injury (but not of a threat thereof or of a material retardation of the establishment of an industry) is made or, in the case of a final determination of a threat of injury, where the effect of the subsidized imports would, in the absence of the provisional measures, have led to a determination of injury, countervailing duties may be levied retroactively for the period for which provisional measures, if any, have been applied.

20.3 If the definitive countervailing duty is higher than the amount guaranteed by the cash deposit or bond, the difference shall not be collected. If the definitive duty is less than the amount guaranteed by the cash deposit or bond, the excess amount shall be reimbursed or the bond released in an expeditious manner.

20.4 Except as provided in paragraph 2, where a determination of threat of injury or material retardation is made (but no injury has yet occurred) a definitive countervailing duty may be imposed only from the date of the determination of threat of injury or material retardation, and any cash deposit made during the period of the application of provisional measures shall be refunded and any bonds released in an expeditious manner.

20.5 Where a final determination is negative, any cash deposit made during the period of the application of provisional measures shall be refunded and any bonds released in an expeditious manner.

20.6 In critical circumstances where for the subsidized product in question the authorities find that injury which is difficult to repair is caused by massive imports in a relatively short period of a product benefiting from subsidies paid or bestowed inconsistently with the provisions of GATT 1994 and of this Agreement and where it is deemed necessary, in order to preclude the recurrence of such injury, to assess countervailing duties retroactively on those imports, the definitive countervailing duties may be assessed on imports which were entered for consumption not more than 90 days prior to the date of application of provisional measures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 20

1. Retroactive application of countervailing duties

291. The Panel on *US – Softwood Lumber III* noted that Article 20 only provides for the exceptional retroactive application of definitive duties but not of provisional duties:

> "As its text indicates, Article 20.1 SCM Agreement provides that provisional measures and countervailing duties shall only be applied to products entering the country following the imposition of such measures, '*subject to the exceptions set out in this Article*'. While Article 20.2 and Article 20.6 SCM Agreement provide for explicit exceptions in the case of the *definitive* countervailing duties, we find no similar exceptions relating to provisional measures. Article 20.2 SCM Agreement sets forth the circumstances in which definitive countervailing duties may be applied retroactively for the period during which provisional measures were applied. Similarly, in critical circumstances, Article 20.6 SCM Agreement allows for the definitive duties to be assessed on imports which entered the country from 90 days prior to the date of application of the provisional measures.
>
> . . .
>
> . . . In respect of the starting-point for the application of provisional and final measures, Article 20 SCM Agreement thus establishes two exceptions to the general rule of non-retroactivity of final countervailing duties and no exceptions to the general rule of non-retroactivity of provisional measures. Nothing in Article 20 SCM Agreement provides an exception to the rules relating to the minimum period between initiation and application of provisional measures or the maximum period of application of such measures as provided for in Article 17.3 and 17.4 SCM Agreement."[401]

292. On the basis of the "clear language in the SCM Agreement", the Panel on *US – Softwood Lumber III* found that "the general rule of non-retroactivity applies to provisional measures, without exceptions", and concluded that the retroactive application of the provisional measure imposed by the Member was inconsistent with Article 20.6 of the *SCM Agreement*.[402] The Panel agreed "that a Member is allowed to take measures which are necessary to preserve the right to later apply definitive duties retroactively. In our view, an effective interpretation of the right to apply definitive duties retroactively requires that a Member be allowed to take such steps as are necessary to preserve the possibility of exercising that right." The Panel considered that "what kind of measures may thus be taken by the Member concerned will have to be determined on a case-by-case basis".[403]

293. However, the Panel on *US – Softwood Lumber III* rejected the argument that suspension of liquidation and the posting of a cash deposit or bond are necessary for the Member's authorities to collect *definitive* duties retroactively, as is expressly permitted under Article 20.6 of the *SCM Agreement*. The Panel considered on the basis of an "effective treaty interpretation" that the express permission in Article 20.6 to apply definitive duties retroactively up to 90 days prior to the application of the provisional measures leads to the conclusion that Article 20.3 *does not* preclude the imposition of definitive duties on entries for which no cash deposit or bond was collected. The Panel held that:

[401] Panel Report *US – Softwood Lumber III*, paras. 7.93 and 7.100.
[402] Panel Report *US – Softwood Lumber III*, para. 7.94.
[403] Panel Report *US – Softwood Lumber III*, para. 7.95.

"Article 20.3 SCM Agreement states that if the amount guaranteed by the cash deposit is lower than the definitive countervailing duty, the difference shall not be collected. If the reverse is true, the excess amount shall be reimbursed and the bond released in an expeditious manner. Article 20.3 SCM Agreement thus concerns the wholly different issue of how to deal with a discrepancy between the provisional and the final rates of the countervailing duty. It does not address the retroactive imposition and collection of definitive duties for the period before the application of provisional measures. Article 20.6 SCM Agreement provides that definitive duties may in certain circumstances be assessed on imports which were entered for consumption from 90 days *prior to the date of application of provisional measures*.

The text thus clearly indicates that the Agreement allows for the retroactive application of definitive duties at a time when no provisional measures were in place and thus no provisional duties were collected. To accept the US argument that Article 20.3 SCM Agreement would preclude a Member from collecting definitive duties for the period prior to the date of application of provisional measures would mean that a Member doing what Article 20.6 SCM Agreement expressly allows for would be violating the Agreement nevertheless. We cannot accept an interpretation which leads to this contradictory result. We consider that the principle of effective treaty interpretation requires the treaty interpreter to 'read all applicable provisions of a treaty in a way that gives meaning to *all* of them, harmoniously'[404]"[405]

2. Relationship between paragraphs 1, 2 and 6 of Article 20

294. In this regard, see paragraphs 291–293 above.

3. Relationship with other Articles

(a) Article 17.3 and 17.4

295. The Panel on *US – Softwood Lumber III* considered that "Nothing in Article 20 SCM Agreement provides an exception to the rules relating to the minimum period between initiation and application of provisional measures or the maximum period of application of such measures as provided for in Articles 17.3 and 17.4 SCM Agreement."[406] See also paragraph 277 above.

XXI. ARTICLE 21

A. TEXT OF ARTICLE 21

Article 21
Duration and Review of Countervailing Duties and Undertakings

21.1 A countervailing duty shall remain in force only as long as and to the extent necessary to counteract subsidization which is causing injury.

21.2 The authorities shall review the need for the continued imposition of the duty, where warranted, on their own initiative or, provided that a reasonable period of time has elapsed since the imposition of the definitive countervailing duty, upon request by any interested party which submits positive information substantiating the need for a review. Interested parties shall have the right to request the authorities to examine whether the continued imposition of the duty is necessary to offset subsidization, whether the injury would be likely to continue or recur if the duty were removed or varied, or both. If, as a result of the review under this paragraph, the authorities determine that the countervailing duty is no longer warranted, it shall be terminated immediately.

21.3 Notwithstanding the provisions of paragraphs 1 and 2, any definitive countervailing duty shall be terminated on a date not later than five years from its imposition (or from the date of the most recent review under paragraph 2 if that review has covered both subsidization and injury, or under this paragraph), unless the authorities determine, in a review initiated before that date on their own initiative or upon a duly substantiated request made by or on behalf of the domestic industry within a reasonable period of time prior to that date, that the expiry of the duty would be likely to lead to continuation or recurrence of subsidization and injury.[52] The duty may remain in force pending the outcome of such a review.

(*footnote original*) [52] When the amount of the countervailing duty is assessed on a retrospective basis, a finding in the most recent assessment proceeding that no duty is to be levied shall not by itself require the authorities to terminate the definitive duty.

21.4 The provisions of Article 12 regarding evidence and procedure shall apply to any review carried out under this Article. Any such review shall be carried out expeditiously and shall normally be concluded within 12 months of the date of initiation of the review.

21.5 The provisions of this Article shall apply mutatis mutandis to undertakings accepted under Article 18.

B. INTERPRETATION AND APPLICATION OF ARTICLE 21

1. Article 21.1

(a) Relationship with other Articles

296. With respect to the relationship with Article 19.4, see paragraph 287 above.

---

[404] (*footnote original*) Appellate Body Report, *Korea – Definitive Safeguard Measure on Imports of Certain Dairy Products*, WT/DS98/AB/R, adopted on 12 January 2000, para. 81.
[405] Panel Report *US – Softwood Lumber III*, paras. 7.96–7.97.
[406] Panel Report *US – Softwood Lumber III*, para. 7.100.

2. Article 21.2

(a) General

297. In *Brazil – Desiccated Coconut*, the Panel found that, if the *SCM Agreement* is not applicable, the imposition of a countervailing duty is not covered by Article VI of the GATT 1994. However, the Panel opined that even measures to which the *WTO Agreement* is not "immediately applicable" will fall under the *SCM Agreement* through reviews pursuant to Article 21.2:

> "We recognize that these provisions regarding review are not comparable in effect to the immediate application of the WTO Agreement to all countervailing measures. The effect of reviews regarding the continued need for imposition of countervailing measures will likely be prospective and, depending on the date of imposition of the measure and the circumstances subsequent to its imposition, the exporting country Member may or may not be entitled to an immediate review. Nevertheless, it is clear from this provision that measures to which the WTO Agreement is not immediately applicable will nevertheless be brought under WTO disciplines over time pursuant to reviews under Article 21.2 of the SCM Agreement."[407]

(b) Types of review under Article 21.2

298. The Panel on *US – Softwood Lumber III* noted that Article 21.2 provides different kinds of reviews but is silent on administrative reviews:

> "Article 21.2 SCM Agreement deals with different kinds of review mechanisms, requiring the authority to provide for the right of interested parties to request the authorities to examine whether the continued imposition of the duty is necessary to offset subsidization, whether the injury would be likely to continue or recur if the duty were removed or varied, or both. Thus, the first type of review addresses the question of whether subsidization is present at all, while the second type of review, by its very terms, has to do primarily with injury questions, that is, the effect on the domestic industry of changing or removing entirely the countervailing duty. This second type of review thus does not have to do with finalizing the rate of countervailing duty during a particular period for which estimated duties have been collected, but rather with the underlying need and rationale, from the standpoint of the affected domestic industry, for maintaining a countervailing duty. In short, Article 21.2 SCM Agreement is silent on the question of 'administrative reviews'."[408]

(c) Reviews not yet requested

299. In *US – Softwood Lumber III*, the Panel considered that it was not appropriate to rule on a potential denial of a request for a review, where such a request had not been made:

> "The WTO dispute settlement system allows a Member to challenge a law as such or its actual application in a particular case, but not its possible future application."[409]

(d) "necessary to offset subsidization"

301. The Appellate Body on *US – Lead and Bismuth II* agreed with the Panel that "while an investigating authority may presume, in the context of an administrative review under Article 21.1, that a 'benefit' continues to flow from an untied, non-recurring 'financial contribution', this presumption can never be 'irrebuttable'".[410]

302. The Appellate Body on *US – Lead and Bismuth II* rejected the panel's implied view that "in the context of an administrative review under Article 21.2, an investigating authority must *always* establish the existence of a 'benefit' during the period of review *in the same way as* an investigating authority must establish a 'benefit' in an original investigation". The Appellate Body stated:

> "We believe that it is important to distinguish between the original investigation leading to the imposition of countervailing duties and the administrative review. In an original investigation, the investigating authority must establish that *all* conditions set out in the *SCM Agreement* for the imposition of countervailing duties are fulfilled. In an administrative review, however, the investigating authority must address those issues which have been raised before it by the interested parties or, in the case of an investigation conducted on its own initiative, those issues which warranted the examination."[411]

3. Article 21.3

(a) Self-initiation of sunset reviews

(i) General

303. The Appellate Body on *US – Carbon Steel* agreed with the Panel that Article 21.3 of the *SCM Agreement* does not prohibit the automatic self-initiation of sunset reviews by investigating authorities:

> "[O]ur review of the context of Article 21.3 of the *SCM Agreement* reveals no indication that the ability of authorities to self-initiate a sunset review under that provision is conditioned on compliance with the evidentiary

[410] Appellate Body Report on *US – Lead and Bismuth II*, para. 62, referring to the Panel Report on *US – Lead and Bismuth II*, para. 6.71.
[411] Appellate Body Report on *US – Lead and Bismuth II*, para. 63. With respect to the issue whether a national authority must conduct an investigation on its own initiative or whether it can limit its investigation to issues raised by the interested parties themselves, see the Chapter on the *Agreement on Safeguards*, Section IV.B.2(a).

standards set forth in Article 11 of the *SCM Agreement* relating to initiation of investigations. Nor do we consider that any other evidentiary standard is prescribed for the self-initiation of a sunset review under Article 21.3.

This is not to say that authorities may continue the countervailing duties after five years in the absence of evidence that the expiry of the duty would be likely to lead to continuation or recurrence of subsidization and injury. Article 21.3 prohibits the continuation of countervailing duties unless a review is undertaken and the prescribed determination, based on adequate evidence, is made.

For all of these reasons, we agree with the Panel that Article 21.3 of the *SCM Agreement* does not prohibit the automatic self-initiation of sunset reviews by investigating authorities.[412]"[413]

(ii) Evidentiary requirements for self-initiation of sunset reviews

304. The Appellate Body on *US – Carbon Steel* observed that Article 21.3 explicitly contemplates the termination of countervailing orders within five years, unless the prescribed determination is made in a review. It further considered that Article 21.3 requires initiation of such a review by the authorities ("on their own initiative") or based on "a duly substantiated request made by or on behalf of the domestic industry". The Appellate Body remarked that the terms "duly substantiated" are applicable to the authorization to initiate a review upon request, and not a self-initiation situation. Finally, the Appellate Body noted that Article 21.3 does not contain cross-references to evidentiary rules relating to self-initiation of an investigation, and considered that this omission did not mean that Article 11 evidentiary standards are applicable to the self-initiation of sunset reviews under Article 21.3. The Appellate Body considered:

"[W]e wish to underline the thrust of Article 21.3 of the *SCM Agreement*. An automatic time-bound termination of countervailing duties that have been in place for five years from the original investigation or a subsequent comprehensive review is at the heart of this provision. Termination of a countervailing duty is the rule and its continuation is the exception. The continuation of a countervailing duty must therefore be based on a properly conducted review and a positive determination that the revocation of the countervailing duty would 'be likely to lead to continuation or recurrence of subsidization and injury'. Where the level of subsidization at the time of the review is very low, there must be persuasive evidence that revocation of the duty would nevertheless lead to injury to the domestic industry. Mere reliance by the authorities on the injury determination made in the original investigation will not be sufficient. Rather, a fresh determination, based on credible evidence, will be necessary to establish that the continuation of the countervailing duty is warranted to remove the injury to the domestic industry.

. . .

Article 21.3 requires the termination of countervailing duties within five years unless the prescribed determination is made in a review. Article 21.3 contemplates initiation of this review in one of two alternative ways, as is made clear through the use of the word 'or'. Either the authorities may make their determination 'in a review initiated . . . on their own initiative'; *or*, *alternatively*, the authorities may make the determination 'in a review initiated . . . upon a *duly substantiated* request made by or on behalf of the domestic industry . . .'. The words 'duly substantiated' qualify only the authorization to initiate a review upon request made by or on behalf of the domestic industry. No such language qualifies the first method for initiating a sunset review, namely self-initiation of a review by the authorities.

We believe the absence of any such cross-reference to be of some consequence given that, as we have seen, the drafters of the *SCM Agreement* have made active use of cross-references, *inter alia*, to apply obligations relating to *investigations* to review proceedings. In our view, the omission of any express cross-reference thus serves as a further indication that the negotiators of the *SCM Agreement* did not intend the evidentiary standards applicable to the self-initiation of *investigations* under Article 11 to apply to the self-initiation of *reviews* under Article 21.3."[414]

305. While recognizing that the lack of an explicit limitation is "not dispositive of whether any such limitation exists", the Appellate Body in *US – Carbon Steel* also took into account the context of Article 21.3. In particular, the Appellate Body noted that Article 21.4 explicitly states that the detailed evidentiary and procedural rules contained in Article 12 regarding the *conduct* of an investigation apply to Article 21.3 reviews. As a result, it stated that this explicit cross-reference to Article 12 suggests that evidentiary rules regarding the *initiation* of an investigation contained in Article 11 "are not incorporated by reference into Article 21.3". For the Appellate Body, the fact that the Article 11 rules governing these matters are not incorporated by reference into Article 21.3 suggests that they do not apply to sunset reviews:

"Article 21.2 differs from Article 21.3 in that the former identifies certain circumstances in which the authorities are under an *obligation* to review ("shall review") whether the continued imposition of the countervailing duty is necessary. In contrast, the principal obligation in Article 21.3 is not, *per se*, to conduct a review, but rather

[412] (*footnote original*) Panel Report on *US – Carbon Steel*, para 8.49.
[413] Appellate Body Report on *US – Carbon Steel*, paras. 116–118.
[414] Appellate Body Report on *US – Carbon Steel*, paras. 88, 103 and 105.

to *terminate* a countervailing duty *unless* a specific determination is made in a review. We note that Article 21.2 sets down an explicit evidentiary standard for requests by interested parties for a review under that provision. In order to trigger the authorities' obligation to conduct a review, such requests must, *inter alia*, include 'positive information substantiating the need for review'. Article 21.2 does not, on its face, apply this same standard to the initiation by authorities 'on their own initiative' of a review carried out under that provision. Thus, Article 21.2 contemplates that, for reviews carried out pursuant to that provision, the self-initiation by the authorities of a review is not governed by the same standards that apply to initiation upon request by other parties.

As we have noted earlier, the fourth paragraph of Article 21 explicitly applies to Article 21.3 reviews the detailed rules set out in Article 12 of the *SCM Agreement* regarding evidence and procedure in the *conduct* of investigations. However, the rules on evidence and procedure contained in Article 12 do not relate to the *initiation* of such investigations. Rather, the rules relating to evidence needed to *initiate* an investigation are set out in Article 11, which is not referred to in Article 21.4. The fact that the rules in Article 11 governing such matters are not incorporated by reference into Article 21.3 suggests that they are not, *ipso facto*, applicable to sunset reviews."[415]

306. The Appellate Body on *US – Carbon Steel* concluded that there is no indication in the framework of Article 21.3 that the authorities' ability to self-initiate a sunset review is conditional upon compliance with evidentiary standards in Article 11 and that no other evidentiary standard is required for the self-initiation of a sunset review under Article 21.3.

"[O]ur review of the context of Article 21.3 of the *SCM Agreement* reveals no indication that the ability of authorities to self-initiate a sunset review under that provision is conditioned on compliance with the evidentiary standards set forth in Article 11 of the *SCM Agreement* relating to initiation of investigations. Nor do we consider that any other evidentiary standard is prescribed for the self-initiation of a sunset review under Article 21.3."[416]

(iii) De minimis standard

307. As regards the application of the *de minimis* standards to sunset reviews, see paragraphs 250–257 above.

(b) Determination of likelihood of continuation/recurrence of subsidization

(i) General

308. In findings not appealed to the Appellate Body, the Panel on *US – Carbon Steel* referred to Article 21.1 and 21.2 of the *SCM Agreement* and highlighted that Article 21.3 of the *SCM Agreement* puts into effect the purpose of the *SCM Agreement*, i.e. to regulate the imposition of countervailing duty measures:

"Article 21.3 reflects the application of the general rule set out in Article 21.1 – that a CVD shall remain in place only as long as necessary – in the specific instance where five years have elapsed since the imposition of a CVD. Article 21.2 reflects the same general rule in a different circumstance, when a reasonable period has elapsed since the imposition of the duty, and it is deemed necessary to review the need for the continued imposition of the duty. We also note that one of the principal objects of the SCM Agreement is to regulate the imposition of CVD measures. Article 21.3 effectuates that purpose by providing that after five years, a CVD should be terminated unless the investigating authorities determine that there is a likelihood of continuation or recurrence of subsidization and injury."[417]

(ii) Sufficient factual basis for the non-determination

309. The Panel on *US – Carbon Steel* considered any determination made by an investigating authority under the *SCM Agreement* must be properly substantiated even if there is no specific language in this regard in the Agreement itself. The Panel referred to the similarity with safeguards and anti-dumping investigations, and concluded that a determination of likelihood under Article 21.3 of the *SCM Agreement* must rest on a sufficient factual basis:

"In our opinion, although there is no specific language in the SCM Agreement to that effect, it goes without saying that any determination made by investigating authorities under the SCM Agreement must be properly substantiated in order for that determination to be legally justified. In this regard, the Appellate Body has stated in *US – Lamb*:

'[C]ompetent authorities must have a sufficient factual basis to allow them to draw reasoned and adequate conclusions concerning the situation of the "domestic industry".'[418]

We recognise that the Appellate Body's statement refers to the basis of an injury determination in a safeguard investigation. Yet, as far as the adequacy of the factual basis for a determination is concerned, we see no reason to distinguish between injury determinations in a safeguard investigation and a determination of the likelihood of continuation or recurrence of subsidization in a CVD sunset review.

We also note the decision of the Panel in *US – DRAMS* in which the Panel stated:

[415] Appellate Body Report on *US – Carbon Steel*, paras. 108 and 109.
[416] Appellate Body Report on *US – Carbon Steel*, para. 116.
[417] Panel Report on *US – Carbon Steel*, para. 8.91.
[418] (*footnote original*) Appellate Body Report on *US – Lamb*, para. 131.

> 'Accordingly, we must assess the essential character of the necessity involved in cases of continued imposition of an anti-dumping duty. We note that the necessity of the measure is a function of certain objective conditions being in place, *i.e.* whether circumstances require continued imposition of the anti-dumping duty. That being so, such continued imposition must, in our view, be essentially dependent on, and therefore assignable to, a foundation of positive evidence that circumstances demand it. In other words, the need for the continued imposition of the duty must be demonstrable on the basis of the evidence adduced.'[419]

Although the decision of the Panel was made as part of a review under Article 11.2 of the AD Agreement we believe this excerpt provides helpful guidance for our case relative to the adequacy of the factual basis for a determination.

Based on the two foregoing decisions, we consider that a determination of likelihood under Article 21.3 must rest on a sufficient factual basis.

An investigating authority's determination of the likelihood of continuation or recurrence of subsidization should rest on the evaluation of the evidence that it has gathered during the original investigation, the intervening reviews and finally the sunset review. In our view, a likelihood analysis based on this evidentiary framework would be consistent with the requirements of Article 21.3."[420]

310. In *US – Carbon Steel*, the Panel further considered that one of the components of the likelihood analysis was the assessment of the likely rate of subsidization:

> "In our view, one of the components of the likelihood analysis in a sunset review under Article 21.3 is an assessment of the likely rate of subsidization. We do not consider, however, that an investigating authority must, in a sunset review, use the same calculation of the rate of subsidization as in an original investigation. What the investigating authority must do under Article 21.3 is to assess whether subsidization is likely to continue or recur should the CVD be revoked. This is, obviously, an inherently prospective analysis. Nonetheless, it must itself have an adequate basis in fact. The facts necessary to assess the likelihood of subsidization in the event of revocation may well be different from those which must be taken into account in an original investigation. Thus, in assessing the likelihood of subsidization in the event of revocation of the CVD, an investigating authority in a sunset review may well consider, *inter alia*, the original level of subsidization, any changes in the original subsidy programmes, any new subsidy programmes introduced after the imposition of the original CVD, any changes in government policy, and any changes in relevant socio-economic and political circumstances."[421]

(c) Relationship with other paragraphs of Article 21

(i) Article 21.2 and 21.4

311. In *US – Carbon Steel*, the Panel reflected on the relationship between paragraphs 1, 2 and 3 of Article 21: see paragraph 308 above.

312. The Appellate Body on *US – Carbon Steel* noted the difference between paragraphs 2 and 3 of Article 21 as follows:

> "Article 21.2 differs from Article 21.3 in that the former identifies certain circumstances in which the authorities are under an *obligation* to review ('shall review') whether the continued imposition of the countervailing duty is necessary. In contrast, the principal obligation in Article 21.3 is not, *per se*, to conduct a review, but rather to *terminate* a countervailing duty *unless* a specific determination is made in a review. We note that Article 21.2 sets down an explicit evidentiary standard for requests by interested parties for a review under that provision. In order to trigger the authorities' obligation to conduct a review, such requests must, *inter alia*, include 'positive information substantiating the need for review'. Article 21.2 does not, on its face, apply this same standard to the initiation by authorities 'on their own initiative' of a review carried out under that provision. Thus, Article 21.2 contemplates that, for reviews carried out pursuant to that provision, the self-initiation by the authorities of a review is not governed by the same standards that apply to initiation upon request by other parties."[422]

313. In *US – Carbon Steel*, the Appellate Body further noted the differing scope of Article 21.3 and 21.4:

> "As we have noted earlier, the fourth paragraph of Article 21 explicitly applies to Article 21.3 reviews the detailed rules set out in Article 12 of the *SCM Agreement* regarding evidence and procedure in the *conduct* of investigations. However, the rules on evidence and procedure contained in Article 12 do not relate to the *initiation* of such investigations. Rather, the rules relating to evidence needed to *initiate* an investigation are set out in Article 11, which is not referred to in Article 21.4. The fact that the rules in Article 11 governing such matters are not incorporated by reference into Article 21.3 suggests that they are not, *ipso facto*, applicable to sunset reviews."[423]

[420] Panel Report on *US – Carbon Steel*, paras. 8.92–8.95.
[421] Panel Report on *US – Carbon Steel*, para. 8.96.
[422] Appellate Body Report on *US – Carbon Steel*, para. 108.
[423] Appellate Body Report on *US – Carbon Steel*, para. 109.

(d) Relationship with other Articles

(i) Article 11.6

314. The Appellate Body on *US – Carbon Steel* confirmed the Panel's finding in relation to the self-initiation of sunset reviews that "nothing in the text of Article 11.6 provides for its evidentiary standards to be implied in Article 21.3".[424] The Appellate Body on *US – Carbon Steel* commented:

> "Before leaving our analysis of the *text* of Article 21.3 of the *SCM Agreement*, we lastly note that the provision contains no explicit cross-reference to evidentiary rules relating to initiation, such as those contained in Article 11.6. We believe the absence of any such cross-reference to be of some consequence given that, as we have seen, the drafters of the *SCM Agreement* have made active use of cross-references, *inter alia*, to apply obligations relating to *investigations* to review proceedings. In our view, the omission of any express cross-reference thus serves as a further indication that the negotiators of the *SCM Agreement* did not intend the evidentiary standards applicable to the self-initiation of *investigations* under Article 11 to apply to the self-initiation of *reviews* under Article 21.3."[425]

315. The Panel on *US – Carbon Steel* considered that the terms of Article 21.3 have to be interpreted in light of their object and purpose and in context, which is the entire SCM Agreement and, in particular, Articles 11.6, 11.9 and 15.3 thereof.[426]

(ii) Article 11.9

316. The Appellate Body on *US – Carbon Steel* reversed the Panel's finding that the *de minimis* standard of Article 11.9 is implied in Article 21.3 and the Panel's finding of violations of the SCM Agreement.[427] The Appellate Body noted:

> "[T]he text of Article 21.3 does not mention any *de minimis* standard to be applied in sunset reviews. Nor does it make any express reference to the *de minimis* standard set forth in Article 11.9 of the *SCM Agreement*.
>
> [T]he lack of any indication, in the text of Article 21.3, that a *de minimis* standard must be applied in sunset reviews serves, at least at first blush, as an indication that no such requirement exists. However, as the Panel itself observed, the task of ascertaining the meaning of a treaty provision with respect to a specific requirement does not end once it has been determined that the text is silent on that requirement.[428] Such silence does not exclude the possibility that the requirement was intended to be included by implication."[429]

317. However, ultimately, the Appellate Body concluded:

> "[A] finding on our part that the *de minimis* standard of Article 11.9 is implied in sunset reviews under Article 21.3 would upset the delicate balance of rights and obligations attained by the parties to the negotiations, as embodied in the final text of Article 21.3. Such a finding would be contrary to the requirement of Article 3.2, repeated in Article 19.2 of the DSU, that our findings and recommendations 'cannot add to or diminish the rights and obligations provided in the covered agreements'."[430]

318. See paragraph 315 above.

(iii) Article 15.3

319. See paragraph 315 above.

(e) Relationship with other WTO Agreements

320. In *US – Carbon Steel*, the Panel considered that it saw no reason to differentiate between injury determination in a safeguard investigation and a determination of a likelihood of continuation or recurrence of subsidization. See paragraph 309 above.

XXII. ARTICLE 22

A. TEXT OF ARTICLE 22

Article 22

Public Notice and Explanation of Determinations

22.1 When the authorities are satisfied that there is sufficient evidence to justify the initiation of an investigation pursuant to Article 11, the Member or Members the products of which are subject to such investigation and other interested parties known to the investigating authorities to have an interest therein shall be notified and a public notice shall be given.

22.2 A public notice of the initiation of an investigation shall contain, or otherwise make available through a separate report,[53] adequate information on the following:

(*footnote original*) [53] Where authorities provide information and explanations under the provisions of this Article in a separate report, they shall ensure that such report is readily available to the public.

(i) the name of the exporting country or countries and the product involved;

(ii) the date of initiation of the investigation;

(iii) a description of the subsidy practice or practices to be investigated;

(iv) a summary of the factors on which the allegation of injury is based;

[424] Panel Report on *US – Carbon Steel*, para. 8.19
[425] Appellate Body Report on *US – Carbon Steel*, para. 105.
[426] Panel Report *US – Carbon Steel*, para. 8.47.
[427] Appellate Body Report on *US – Carbon Steel*, paras. 92–97.
[428] (*footnote original*) Panel Report, paras. 8.27–8.30.
[429] Appellate Body Report on *US – Carbon Steel*, paras. 64–65.
[430] Appellate Body Report on *US – Carbon Steel*, para. 91.

(v) the address to which representations by interested Members and interested parties should be directed; and

(vi) the time-limits allowed to interested Members and interested parties for making their views known.

22.3 Public notice shall be given of any preliminary or final determination, whether affirmative or negative, of any decision to accept an undertaking pursuant to Article 18, of the termination of such an undertaking, and of the termination of a definitive countervailing duty. Each such notice shall set forth, or otherwise make available through a separate report, in sufficient detail the findings and conclusions reached on all issues of fact and law considered material by the investigating authorities. All such notices and reports shall be forwarded to the Member or Members the products of which are subject to such determination or undertaking and to other interested parties known to have an interest therein.

22.4 A public notice of the imposition of provisional measures shall set forth, or otherwise make available through a separate report, sufficiently detailed explanations for the preliminary determinations on the existence of a subsidy and injury and shall refer to the matters of fact and law which have led to arguments being accepted or rejected. Such a notice or report shall, due regard being paid to the requirement for the protection of confidential information, contain in particular:

(i) the names of the suppliers or, when this is impracticable, the supplying countries involved;

(ii) a description of the product which is sufficient for customs purposes;

(iii) the amount of subsidy established and the basis on which the existence of a subsidy has been determined;

(iv) considerations relevant to the injury determination as set out in Article 15;

(v) the main reasons leading to the determination.

22.5 A public notice of conclusion or suspension of an investigation in the case of an affirmative determination providing for the imposition of a definitive duty or the acceptance of an undertaking shall contain, or otherwise make available through a separate report, all relevant information on the matters of fact and law and reasons which have led to the imposition of final measures or the acceptance of an undertaking, due regard being paid to the requirement for the protection of confidential information. In particular, the notice or report shall contain the information described in paragraph 4, as well as the reasons for the acceptance or rejection of relevant arguments or claims made by interested Members and by the exporters and importers.

22.6 A public notice of the termination or suspension of an investigation following the acceptance of an undertaking pursuant to Article 18 shall include, or otherwise make available through a separate report, the non-confidential part of this undertaking.

22.7 The provisions of this Article shall apply mutatis mutandis to the initiation and completion of reviews pursuant to Article 21 and to decisions under Article 20 to apply duties retroactively.

B. INTERPRETATION AND APPLICATION OF ARTICLE 22

1. Article 22.1 and 22.7

321. In *US – Carbon Steel*, the Appellate Body noted that Article 22.1 and 22.7 on notification and public notice obligations upon Members in the context of investigations or reviews do not contain any evidentiary requirements *per se*.

> "Article 22.1 imposes *notification and public notice obligations* upon Members that have decided, in accordance with all the requirements of Article 11, that the initiation of a countervailing duty investigation is justified. Article 22.1 does not itself establish any evidentiary rule, but only refers to a standard established in Article 11.9:
>
> Article 22.7 applies the provisions of Article 22 *'mutatis mutandis* to the initiation and completion of reviews pursuant to Article 21'. To us, in the same way that Article 22.1 imposes notification and public notice requirements on investigating authorities that have decided, in accordance with the standards set out in Article 11, to initiate an *investigation*, Article 22.1 (by virtue of Article 22.7) also operates to impose notification and public notice requirements on investigating authorities that have decided, in accordance with Article 21, to initiate a *review*. Similarly, in the same way that Article 22.1 does *not* itself establish evidentiary standards applicable to the initiation of an *investigation*, it does *not* itself establish evidentiary standards applicable to the initiation of sunset reviews. Such standards, if they exist, must be found elsewhere."[431]

2. Relationship with other Articles

322. With respect to the relationship with Article 11, see paragraph 321 above.

XXIII. ARTICLE 23

A. TEXT OF ARTICLE 23

Article 23
Judicial Review

Each Member whose national legislation contains provisions on countervailing duty measures shall main-

[431] Appellate Body Report on *US – Carbon Steel*, paras. 111–112.

tain judicial, arbitral or administrative tribunals or procedures for the purpose, inter alia, of the prompt review of administrative actions relating to final determinations and reviews of determinations within the meaning of Article 21. Such tribunals or procedures shall be independent of the authorities responsible for the determination or review in question, and shall provide all interested parties who participated in the administrative proceeding and are directly and individually affected by the administrative actions with access to review.

B. INTERPRETATION AND APPLICATION OF ARTICLE 23

No jurisprudence or decision of a competent WTO body.

PART VI: INSTITUTIONS

XXIV. ARTICLE 24

A. TEXT OF ARTICLE 24

Article 24
Committee on Subsidies and Countervailing Measures and Subsidiary Bodies

24.1 There is hereby established a Committee on Subsidies and Countervailing Measures composed of representatives from each of the Members. The Committee shall elect its own Chairman and shall meet not less than twice a year and otherwise as envisaged by relevant provisions of this Agreement at the request of any Member. The Committee shall carry out responsibilities as assigned to it under this Agreement or by the Members and it shall afford Members the opportunity of consulting on any matter relating to the operation of the Agreement or the furtherance of its objectives. The WTO Secretariat shall act as the secretariat to the Committee.

24.2 The Committee may set up subsidiary bodies as appropriate.

24.3 The Committee shall establish a Permanent Group of Experts composed of five independent persons, highly qualified in the fields of subsidies and trade relations. The experts will be elected by the Committee and one of them will be replaced every year. The PGE may be requested to assist a panel, as provided for in paragraph 5 of Article 4. The Committee may also seek an advisory opinion on the existence and nature of any subsidy.

24.4 The PGE may be consulted by any Member and may give advisory opinions on the nature of any subsidy proposed to be introduced or currently maintained by that Member. Such advisory opinions will be confidential and may not be invoked in proceedings under Article 7.

24.5 In carrying out their functions, the Committee and any subsidiary bodies may consult with and seek information from any source they deem appropriate. However, before the Committee or a subsidiary body seeks such information from a source within the jurisdiction of a Member, it shall inform the Member involved.

B. INTERPRETATION AND APPLICATION OF ARTICLE 24

1. Rules of procedure

323. At its meeting of 22 May 1996, the Council for Trade in Goods approved the rules of procedure for the SCM Committee.[432]

324. Pursuant to Article 32.7, the SCM Committee reports to the Council for Trade in Goods on an annual basis.[433]

2. Subsidiary bodies

(a) Permanent Group of Experts (PGE)

325. A decision taken on 13 June 1995 by the SCM Committee provided that "[t]he initial five persons elected to the Permanent Group of Experts shall serve staggered terms of office of 1, 2, 3, 4, and 5 years".[434] It further provided that "[T]he decisions as to which person shall serve which of these terms of office shall be decided by lot after the initial membership of the PGE has been established." The initial slate of experts was elected on 6 March 1996.[435] Since then, the SCM Committee has elected experts as required, according to the relevant process.[436] The PGE has not yet been called upon to perform any of its envisaged duties and the Committee has not yet approved any rules of procedure for the PGE.

(b) Informal Group of Experts (IGE)

326. By a decision of 13 June 1995, the Committee created an Informal Group of Experts[437] with the following terms of reference:[438]

> "To examine matters which are not specified in Annex IV to the Agreement or which need further clarification for the purposes of paragraph 1(a) of Article 6."

(c) Working Party on Subsidy Notifications

327. By a decision of 22 February 1995, the Committee created a Working Party on Subsidy Notifications.[439] The Working Party's work is generally reflected in Chairs' reports in the minutes of the SCM Committee meetings.

---

[432] G/C/M/10, section 1(iv). The text of the adopted rules of procedure can be found in G/L/144.
[433] The reports are contained in documents G/L/31, 31/Corr.1, 126, 201, 267, 341, 341/Corr.1, 408, 655/Corr. 1.
[434] G/SCM/4, para. 1.
[435] G/SCM/M/8; G/SCM/9.
[436] G/SCM/4.
[437] G/SCM/M/2, item O; G/SCM/5.
[438] For reports of the IGE, see documents G/SCM/W/415/Rev.2, G/SCM/M/16, item H, G/SCM/W/415/Rev.2/Suppl.1 and G/SCM/M/24 item E.
[439] G/SCM/M/1, item P; G/SCM/1.

3. Relationship with other Articles

328. With respect to the relationship with Article 32.7, see paragraph 324 above and Section XXXII below.

PART VII: NOTIFICATION AND SURVEILLANCE

XXV. ARTICLE 25

A. TEXT OF ARTICLE 25

Article 25
Notifications

25.1 Members agree that, without prejudice to the provisions of paragraph 1 of Article XVI of GATT 1994, their notifications of subsidies shall be submitted not later than 30 June of each year and shall conform to the provisions of paragraphs 2 through 6.

25.2 Members shall notify any subsidy as defined in paragraph 1 of Article 1, which is specific within the meaning of Article 2, granted or maintained within their territories.

25.3 The content of notifications should be sufficiently specific to enable other Members to evaluate the trade effects and to understand the operation of notified subsidy programmes. In this connection, and without prejudice to the contents and form of the questionnaire on subsidies,[54] Members shall ensure that their notifications contain the following information:

(*footnote original*) [54] The Committee shall establish a Working Party to review the contents and form of the questionnaire as contained in BISD 9S/193–194.

(i) form of a subsidy (i.e. grant, loan, tax concession, etc.);

(ii) subsidy per unit or, in cases where this is not possible, the total amount or the annual amount budgeted for that subsidy (indicating, if possible, the average subsidy per unit in the previous year);

(iii) policy objective and/or purpose of a subsidy;

(iv) duration of a subsidy and/or any other time-limits attached to it;

(v) statistical data permitting an assessment of the trade effects of a subsidy.

25.4 Where specific points in paragraph 3 have not been addressed in a notification, an explanation shall be provided in the notification itself.

25.5 If subsidies are granted to specific products or sectors, the notifications should be organized by product or sector.

25.6 Members which consider that there are no measures in their territories requiring notification under paragraph 1 of Article XVI of GATT 1994 and this Agreement shall so inform the Secretariat in writing.

25.7 Members recognize that notification of a measure does not prejudge either its legal status under GATT 1994 and this Agreement, the effects under this Agreement, or the nature of the measure itself.

25.8 Any Member may, at any time, make a written request for information on the nature and extent of any subsidy granted or maintained by another Member (including any subsidy referred to in Part IV), or for an explanation of the reasons for which a specific measure has been considered as not subject to the requirement of notification.

25.9 Members so requested shall provide such information as quickly as possible and in a comprehensive manner, and shall be ready, upon request, to provide additional information to the requesting Member. In particular, they shall provide sufficient details to enable the other Member to assess their compliance with the terms of this Agreement. Any Member which considers that such information has not been provided may bring the matter to the attention of the Committee.

25.10 Any Member which considers that any measure of another Member having the effects of a subsidy has not been notified in accordance with the provisions of paragraph 1 of Article XVI of GATT 1994 and this Article may bring the matter to the attention of such other Member. If the alleged subsidy is not thereafter notified promptly, such Member may itself bring the alleged subsidy in question to the notice of the Committee.

25.11 Members shall report without delay to the Committee all preliminary or final actions taken with respect to countervailing duties. Such reports shall be available in the Secretariat for inspection by other Members. Members shall also submit, on a semi-annual basis, reports on any countervailing duty actions taken within the preceding six months. The semi-annual reports shall be submitted on an agreed standard form.

25.12 Each Member shall notify the Committee (a) which of its authorities are competent to initiate and conduct investigations referred to in Article 11 and (b) its domestic procedures governing the initiation and conduct of such investigations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 25

1. General

(a) Questionnaire format for subsidy notifications

329. At its meeting of 28 October and 1 and 8 December 2003, the SCM Committee adopted a revised Questionnaire Format for Subsidy Notifications under Article 25 of the *SCM Agreement* and under Article XVI

of the *GATT 1994*,[440] which consists of general rules relating to the notifications and information to be provided in the notifications.

(b) Periodicity of submission and review of subsidy notifications

330. At its meeting on 8 May 2003, the Committee took note of the Chair's statement concerning Members' views that their resources would be best utilized by giving maximum priority to submitting new and full subsidy notifications every two years and by de-emphasizing the review of updating notifications in the intervening years.[441] This was a continuation of the situation described in the Chair's statement of 31 May 2001, of which the Committee had previously taken note.[442] The Committee adopted procedures for review of 2003 new and full subsidy notifications at its meeting on 8 May 2003.[443]

2. Article 25.7

331. The Panel on *Canada – Aircraft* rejected the argument made by Brazil that assistance under the Canada-Quebec Subsidiary Agreements on Industrial Development (agreements pledging support by the Government of Canada to industrial projects in Quebec) could conceivably be provided in the form of non-repayable contributions.[444] In making this assertion, Brazil was relying on the notification by Canada of these subsidiary agreements to the SCM Committee, made pursuant to Article 25.2 of the *SCM Agreement*; the Panel held that the mere notification by Canada of the programme under these subsidiary agreements was an insufficient basis for a finding of a *prima facie* case that subsidiary agreement assistance was provided in the form of non-repayable contributions.[445]

3. Article 25.11

(a) "shall report . . . all preliminary or final actions"

332. At its meeting of 13 June 1995, the SCM Committee adopted the requirements for the minimum information to be provided under Article 25.11 of the Agreement in the reports on all preliminary or final countervailing actions.[446]

(b) "semi-annual reports"

333. At its meeting of 13 June 1995, the SCM Committee issued guidelines for information to be provided in the semi-annual reports.[447]

(c) Relationship with other Articles

(i) Article 27.4

334. In the *Brazil – Aircraft* dispute, Brazil argued that when determining whether a developing country Member has increased the level of its export subsidies within the meaning of Article 27.4 of the *SCM Agreement*, the Panel or the Appellate Body should consider the Member's budgetary appropriations rather than actual expenditures. In making this argument, Brazil was relying on Article 25 of the *SCM Agreement*, which provides that notifications shall contain the "subsidy per unit or, in cases where this is not possible, the total amount or the annual amount budgeted for that subsidy. . .". The Appellate Body on *Brazil – Aircraft* considered Article 25 to be "considerably less useful as context in interpreting the phrase 'the level of its export subsidies' in Article 27.4".[448] It noted that "Article 25 has a fundamentally different purpose from Article 27 of the *SCM Agreement*. Whereas Article 25 aims to promote transparency by requiring Members to notify their subsidies, without prejudging the legal status of those subsidies, Article 27 imposes positive obligations on developing country Members with respect to export subsidies."[449]

XXVI. ARTICLE 26

A. TEXT OF ARTICLE 26

Article 26
Surveillance

26.1 The Committee shall examine new and full notifications submitted under paragraph 1 of Article XVI of GATT 1994 and paragraph 1 of Article 25 of this Agreement at special sessions held every third year. Notifications submitted in the intervening years (updating notifications) shall be examined at each regular meeting of the Committee.

26.2 The Committee shall examine reports submitted under paragraph 11 of Article 25 at each regular meeting of the Committee.

B. INTERPRETATION AND APPLICATION OF ARTICLE 26

335. As regards the procedures adopted for review of new and full subsidy notifications, see paragraph 330 above.

[440] G/SCM/6/Rev. 1. See G/SCM/48, para. 213.
[441] G/SCM/M/46, item R.4.

[449] Appellate Body Report on *Brazil – Aircraft*, para. 149.

PART VIII: DEVELOPING COUNTRY MEMBERS

XXVII. ARTICLE 27

A. TEXT OF ARTICLE 27

Article 27
Special and Differential Treatment of Developing Country Members

27.1 Members recognize that subsidies may play an important role in economic development programmes of developing country Members.

27.2 The prohibition of paragraph 1(a) of Article 3 shall not apply to:

(a) developing country Members referred to in Annex VII.

(b) other developing country Members for a period of eight years from the date of entry into force of the WTO Agreement, subject to compliance with the provisions in paragraph 4.

27.3 The prohibition of paragraph 1(b) of Article 3 shall not apply to developing country Members for a period of five years, and shall not apply to least developed country Members for a period of eight years, from the date of entry into force of the WTO Agreement.

27.4 Any developing country Member referred to in paragraph 2(b) shall phase out its export subsidies within the eight-year period, preferably in a progressive manner. However, a developing country Member shall not increase the level of its export subsidies,[55] and shall eliminate them within a period shorter than that provided for in this paragraph when the use of such export subsidies is inconsistent with its development needs. If a developing country Member deems it necessary to apply such subsidies beyond the eight-year period, it shall not later than one year before the expiry of this period enter into consultation with the Committee, which will determine whether an extension of this period is justified, after examining all the relevant economic, financial and development needs of the developing country Member in question. If the Committee determines that the extension is justified, the developing country Member concerned shall hold annual consultations with the Committee to determine the necessity of maintaining the subsidies. If no such determination is made by the Committee, the developing country Member shall phase out the remaining export subsidies within two years from the end of the last authorized period.

(*footnote original*) [55] For a developing country Member not granting export subsidies as of the date of entry into force of the WTO Agreement, this paragraph shall apply on the basis of the level of export subsidies granted in 1986.

27.5 A developing country Member which has reached export competitiveness in any given product shall phase out its export subsidies for such product(s) over a period of two years. However, for a developing country Member which is referred to in Annex VII and which has reached export competitiveness in one or more products, export subsidies on such products shall be gradually phased out over a period of eight years.

27.6 Export competitiveness in a product exists if a developing country Member's exports of that product have reached a share of at least 3.25 per cent in world trade of that product for two consecutive calendar years. Export competitiveness shall exist either (a) on the basis of notification by the developing country Member having reached export competitiveness, or (b) on the basis of a computation undertaken by the Secretariat at the request of any Member. For the purpose of this paragraph, a product is defined as a section heading of the Harmonized System Nomenclature. The Committee shall review the operation of this provision five years from the date of the entry into force of the WTO Agreement.

27.7 The provisions of Article 4 shall not apply to a developing country Member in the case of export subsidies which are in conformity with the provisions of paragraphs 2 through 5. The relevant provisions in such a case shall be those of Article 7.

27.8 There shall be no presumption in terms of paragraph 1 of Article 6 that a subsidy granted by a developing country Member results in serious prejudice, as defined in this Agreement. Such serious prejudice, where applicable under the terms of paragraph 9, shall be demonstrated by positive evidence, in accordance with the provisions of paragraphs 3 through 8 of Article 6.

27.9 Regarding actionable subsidies granted or maintained by a developing country Member other than those referred to in paragraph 1 of Article 6, action may not be authorized or taken under Article 7 unless nullification or impairment of tariff concessions or other obligations under GATT 1994 is found to exist as a result of such a subsidy, in such a way as to displace or impede imports of a like product of another Member into the market of the subsidizing developing country Member or unless injury to a domestic industry in the market of an importing Member occurs.

27.10 Any countervailing duty investigation of a product originating in a developing country Member shall be terminated as soon as the authorities concerned determine that:

(a) the overall level of subsidies granted upon the product in question does not exceed 2 per cent of its value calculated on a per unit basis; or

(b) the volume of the subsidized imports represents less than 4 per cent of the total imports of the like product in the importing Member, unless imports from devel-

oping country Members whose individual shares of total imports represent less than 4 per cent collectively account for more than 9 per cent of the total imports of the like product in the importing Member.

27.11 For those developing country Members within the scope of paragraph 2(b) which have eliminated export subsidies prior to the expiry of the period of eight years from the date of entry into force of the WTO Agreement, and for those developing country Members referred to in Annex VII, the number in paragraph 10(a) shall be 3 per cent rather than 2 per cent. This provision shall apply from the date that the elimination of export subsidies is notified to the Committee, and for so long as export subsidies are not granted by the notifying developing country Member. This provision shall expire eight years from the date of entry into force of the WTO Agreement.

27.12 The provisions of paragraphs 10 and 11 shall govern any determination of de minimis under paragraph 3 of Article 15.

27.13 The provisions of Part III shall not apply to direct forgiveness of debts, subsidies to cover social costs, in whatever form, including relinquishment of government revenue and other transfer of liabilities when such subsidies are granted within and directly linked to a privatization programme of a developing country Member, provided that both such programme and the subsidies involved are granted for a limited period and notified to the Committee and that the programme results in eventual privatization of the enterprise concerned.

27.14 The Committee shall, upon request by an interested Member, undertake a review of a specific export subsidy practice of a developing country Member to examine whether the practice is in conformity with its development needs.

27.15 The Committee shall, upon request by an interested developing country Member, undertake a review of a specific countervailing measure to examine whether it is consistent with the provisions of paragraphs 10 and 11 as applicable to the developing country Member in question.

B. INTERPRETATION AND APPLICATION OF ARTICLE 27

1. General

(a) The Doha Round

336. As regards the Doha Ministerial Decision on Implementation relating to developing countries and non-actionable subsidies, see paragraph 292 above. See also Section V.7 of the Chapter on the *WTO Agreement*.

(b) Relationship with item (k) of the Illustrative List

337. In *Canada – Aircraft Credits and Guarantees*, the Panel concluded that Article 27 of the *SCM Agreement* could not be rendered ineffective by item (k) of the Illustrative List because "Article 27 accords developing country Members special and differential treatment in respect of all export subsidies, whatever form they take. Thus, to the extent that an export credit constitutes an export subsidy, it falls within the scope of Article 27, and developing country Members are in principle entitled to special and differential treatment in respect of that export credit. We are therefore unable to interpret the second paragraph of item (k) in a manner that would render Article 27, in part at least, ineffective.[450]"[451]

2. Article 27.2

(a) "subject to compliance with the provisions in paragraph 4"

338. The Panel on *Brazil – Aircraft* rejected the argument that "Article 27 is *lex specialis* to Article 3, in that it provides special rules with regard to export subsidy programmes of developing country Members" and therefore the specific provisions in Article 27 "displace the general provisions of Article 3.1(a)".[452] Referring to the ordinary meaning of Article 27.2, the Panel stated the following:

> "It is evident to us from this language that Article 27 does not 'displace' Article 3.1(a) of the SCM Agreement unconditionally . . . . Rather, the prohibition of Article 3.1(a) shall not apply 'subject to compliance with the provisions of paragraph 4'. The exemption for developing country Members other than those referred to in Annex VII from the application of the Article 3.1(a) prohibition on export subsidies is clearly conditional on compliance with the provision in paragraph 4 of Article 27. Thus, we consider that, where the provisions in Article 27.4 have not been complied with, the Article 3.1(a) prohibition applies to such developing country Members."[453]

339. The Panel on *Brazil – Aircraft* was called upon to decide the allocation of the burden of proof for claims under Article 27.4 of the *SCM Agreement*. In doing so, the Panel referred to Article 27.7 as context for Article 27.2(b):

---

[450] (*footnote original*) *See United States – Standards for Reformulated and Conventional Gasoline*, Report of the Appellate Body, WT/DS2/AB/R-WT/DS4/AB/R, adopted 20 May 1996, p. 23, and *Japan – Alcoholic Beverages II*, Report of the Appellate Body, p. 12.

[451] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.179.

[452] Panel Report on *Brazil – Aircraft*, para. 7.39.

[453] Panel Report on *Brazil – Aircraft*, para. 7.40.

"The phrase 'subject to compliance with the provisions in paragraph 4' contained in Article 27.2(b) can, in our view, be seen as analogous to the phrase 'which are in conformity with paragraphs 2 through 5' contained in Article 27.7. This supports an interpretation of Article 27.2(b) that developing country Members are excluded from the scope of application of the substantive obligation in question provided that they comply with certain specified conditions."[454]

340. With respect to the issue of burden of proof under Article 27.4, see paragraphs 364–365 below.

(b) Exception for LDCs

341. In paragraph 10.5 of the Doha Ministerial Decision on Implementation-Related Issues and Concerns,[455] the Ministerial Conference reaffirms that LDCs are exempt from the prohibition on export subsidies in Article 3.1(a).

"Subject to the provisions of Articles 27.5 and 27.6, it is reaffirmed that least-developed country Members are exempt from the prohibition on export subsidies set forth in Article 3.1(a) of the Agreement on Subsidies and Countervailing Measures, and thus have flexibility to finance their exporters, consistent with their development needs. It is understood that the eight-year period in Article 27.5 within which a least-developed country Member must phase out its export subsidies in respect of a product in which it is export-competitive begins from the date export competitiveness exists within the meaning of Article 27.6."

(c) Relationship with other Articles

(i) Article 3.1(a)

342. With respect to the relationship with Article 3.1(a), see paragraph 338 above.

(ii) Article 27.3

343. In determining the burden of proof for Article 27.4, the Panel on *Brazil – Aircraft* referred to Article 27.2(b) in the context of Article 27.3. Specifically, it stated:

"As [context] for Article 27.2(b), [Article 27.3] supports the view that the relevant provisions of Article 27, which extend 'special and differential treatment to developing countries', serve to exclude, in a qualified or unqualified manner, certain developing countries from the scope of application of certain substantive obligations found elsewhere in the Agreement for specified periods of time."[456]

(iii) Article 27.4

344. With respect to the relationship with Article 27.4, see paragraphs 338–339 above.

(iv) Article 27.7

345. With respect to the relationship with Article 27.7, see paragraph 339 above.

3. Article 27.3

(a) General

346. The Panel on *Indonesia – Autos* rejected the argument that "the obligations contained in Article III:2 of *GATT 1994* and the *SCM Agreement* are mutually exclusive"[457] because "the SCM Agreement 'explicitly authorizes' Members to provide subsidies that are prohibited by Article III:2 of GATT".[458] The Panel stated:

"Assuming that such 'explicit authorization' is the correct conflict test in the WTO context, we find that, whether or not the SCM Agreement is considered generally to 'authorize' Members to provide actionable subsidies so long as they do not cause adverse effects to the interests of another member, the SCM Agreement clearly does not authorize Members to impose discriminatory product taxes. Nor does a focus on Article 27.3 suggest a different approach. Whether or not Article 27.3 of the SCM Agreement can be reasonably interpreted to 'authorize', explicitly or implicitly, the provision of subsidies contingent on the use of domestic over imported goods (an issue we do not here decide), Article 27.3 is unrelated to, and cannot reasonably be considered to 'authorize', the imposition of discriminatory product taxes."[459]

(b) Termination of transition period

347. The five-year and eight-year transition periods exempting developing countries and least developing countries respectively from the Article 3.1(b) prohibition on subsidies contingent on the use of domestic over imported goods terminated on 31 December 1999 and 31 December 2002, respectively.

(c) Relationship with other Articles

348. With respect to the relationship with Article 27.2(b), see paragraph 343 above.

(d) Relationship with other WTO Agreements

349. With respect to the relationship with Article III:2 of the *GATT 1994*, see paragraph 346 above.

4. Article 27.4

(a) "shall phase out its export subsidies"

350. The Panel on *Brazil – Aircraft* was faced with interpreting what it termed the "internal contradiction

[454] Panel Report on *Brazil – Aircraft*, para. 7.52.
[455] WT/MIN(01)/17.
[456] Panel Report on *Brazil – Aircraft*, para. 7.53.
[457] Panel Report on *Indonesia – Autos*, para. 14.97.
[458] Panel Report on *Indonesia – Autos*, para. 14.98.
[459] Panel Report on *Indonesia – Autos*, para. 14.98.

within the text of Article 27.4",[460] created, on the one hand, by "the *mandatory* language providing that a developing country Member 'shall phase out its export subsidies'" and, on the other, by "the hortatory language in the final clause encouraging Members to perform their phase-out in a progressive manner".[461] The Panel ultimately found that it was not necessary to resolve this issue. It held that the wording of Article 27.4 of the *SCM Agreement* does not specify in how many phases the elimination of subsidies should be carried out, what the time-period between these phased reductions should be, and how these phased reductions should be distributed within the eight-year period (the transition period granted to developing country Members). The Panel then found that it could not "conclude on the basis of Brazil's actions in the first four years since the date of entry into force of the WTO Agreement that Brazil has failed to comply with the phase-out requirement of Article 27.4 by reason of a failure to undertake phased reductions within the eight-year transition period".[462]

351. In the same context as in the preceding paragraph, the Panel on *Brazil – Aircraft* stated that "we do not consider that the absence of a termination date for PROEX [as of the date of the circulation of the Report, i.e. April 1999] demonstrates that Brazil is not in compliance with its obligation to eliminate its export subsidies by the end of the eight-year period".[463]

352. Instead, however, the Panel on *Brazil – Aircraft* determined that "Because, under the PROEX interest rate equalization scheme, bonds relating to an export transaction are not issued until it has been confirmed that an export transaction will in fact occur, this strongly suggests that Brazil will continue to issue bonds – and hence to grant new subsidies – after 31 December 2002."[464] The Panel regarded this as "sufficient to show, in advance, that Brazil has not complied with the condition of Article 27.4 that it 'phase out its export subsidies within the eight-year period'".[465]

(b) "a developing country Member shall not increase the level of its export subsidies"

(i) "Granting" of subsidies for the purposes of Article 27.4

353. In considering at what point in time payments can be considered "granted" for the purposes of Article 27.4, the Panel on *Brazil – Aircraft* had first found that the subsidy under the Brazilian PROEX programme does not take the form of a "potential direct transfer of funds" (the issuance of the letter of commitment), but rather the form of a "direct transfer of funds" when a payment is made or will be made.[466] The Panel then addressed the issue of when the grant of the subsidy by the Brazilian Government occurs; it held that the right to receive the PROEX payments only arises after the conditions relating to receipt of PROEX payments, and specifically the condition that the product in question actually be exported, has been fulfilled.[467] The Appellate Body first criticized the Panel for addressing the first issue:

> "The issue in this case is when the subsidies for regional aircraft under PROEX should be considered to have been 'granted' *for the purposes of calculating the level of Brazil's export subsidies under Article 27.4 of the SCM Agreement*. The issue is *not* whether or when there is a 'financial contribution', or whether or when the 'subsidy' 'exists', within the meaning of Article 1.1 of that Agreement.
>
> . . .
>
> . . . [W]e see the issue of the *existence* of a subsidy and the issue of the point at which that subsidy is *granted* as two legally distinct issues."[468]

354. The Appellate Body on *Brazil – Aircraft* then proceeded to agree with the findings of the Panel on the precise moment of the grant of subsidy under the PROEX programme:

> "We agree with the Panel that 'PROEX payments may be "granted" where the unconditional legal right of the beneficiary to receive the payments has arisen, even if the payments themselves have not yet occurred.' We also agree with the Panel that the export subsidies for regional aircraft under PROEX have not yet been 'granted' when the letter of commitment is issued, because, at that point, the export sales contract has not yet been concluded and the export shipments have not yet occurred. For the purposes of Article 27.4, we conclude that the export subsidies for regional aircraft under PROEX are 'granted' when all the legal conditions have been fulfilled that entitle the beneficiary to receive the subsidies."[469]

355. For the relationship between the meaning of the word "grant" in Article 27.4 and Article 3.2 and the distinction between the existence of a subsidy and the moment of its "granting", see paragraphs 136–138 above.

(ii) Constant or nominal values

356. In assessing whether a developing country Member's level of export subsidies has increased, the

[460] Panel Report on *Brazil – Aircraft*, para. 7.79.
[461] Panel Report on *Brazil – Aircraft*, para. 7.79.
[462] Panel Report on *Brazil – Aircraft*, para. 7.81.
[463] Panel Report on *Brazil – Aircraft*, para. 7.82.
[464] Panel Report on *Brazil – Aircraft*, para. 7.84.
[465] Panel Report on *Brazil – Aircraft*, para. 7.85.
[466] Panel Report on *Brazil – Aircraft*, para. 7.70.
[467] Panel Report on *Brazil – Aircraft*, para. 7.71.
[468] Appellate Body Report on *Brazil – Aircraft*, paras. 154–156.
[469] Appellate Body Report on *Brazil – Aircraft*, para. 158.

Panel on *Brazil – Aircraft* used constant dollars instead of nominal dollars. The Panel considered it "appropriate in this case to use constant dollars, as that will provide a more meaningful assessment"[470] and noted that in this case, "the conclusion with respect to this issue would be the same whether constant or nominal dollars are used".[471] The Appellate Body on *Brazil – Aircraft* agreed with the Panel's decision and noted that the Panel "did *not* make a legal finding that the level of a developing country Member's export subsidies must be measured, in every case, using a constant value. The Panel simply made a pragmatic observation that using constant dollars is appropriate *in this case*."[472] The Appellate Body also stated that "Moreover, in our view, to take no account of inflation in assessing the level of export subsidies granted by a developing country Member would render the special and differential treatment provision of Article 27 meaningless."[473]

(iii) Benchmark period

357. In *Brazil – Aircraft*, the parties disagreed "as to the benchmark period against which an examination as to whether a Member has increased the level of its export subsidies should be made".[474] Referring to footnote 55 of Article 27.4, the Panel stated:

> "[Footnote 55] offers for such Members a ceiling level of export subsidies based on their 1986 level. Implicit in this explanation is that, absent footnote 55, a developing country Member which granted no export subsidies *as of the date of entry into force of the WTO Agreement* would be prohibited from providing any export subsidies during the eight-year transition period. Thus, footnote 55 indicates that the relevant benchmark period against which the obligation not to increase the level of export subsidies should be measured is a period immediately preceding the date of entry into force of the WTO Agreement."[475]

(iv) Actual expenditures or budgeted amounts

358. Considering whether actual expenditures or budgeted amounts should be used when examining the level of export subsidies, the Panel on *Brazil – Aircraft* found that "the level of a Member's export subsidies in its ordinary meaning refers to the level of subsidies actually provided, not the level of subsidies which a Member planned or authorized its government to provide through its budgetary process".[476] The Panel continued as follows:

> "This reading is in our view confirmed by footnote 55 . . . . The verb 'grant' has been defined to mean, *inter alia*, 'to bestow by a formal act' and 'give, bestow, confer'. Thus, the verb 'grant' in its ordinary meaning implies the actual provision of a subsidy, not its mere budgeting."[477]

359. In its finding that actual expenditures rather than the budgeted amounts should be used when examining whether a developing country Member has increased the level of its subsidies within the meaning of Article 27.4, the Panel on *Brazil – Aircraft* added that "an expenditure-based measurement is consistent with the object and purpose of the SCM Agreement, which is to reduce economic distortions caused by subsidies".[478] The Appellate Body on *Brazil – Aircraft* agreed with the Panel's reasoning on the use of actual expenditures rather than the budgeted amounts when examining the level of subsidies of a developing country Member under Article 27.4 and stated:

> "To us, the word 'granted' used in this context means 'something actually provided'. Thus, to determine the amount of export subsidies 'granted' in a particular year, we believe that the actual amounts *provided* by a government, and not just those *authorized* or *appropriated* in its budget for that year, is the proper measure. A government does not always spend the entire amount appropriated in its annual budget for a designated purpose. Therefore, in this case, to determine the level of export subsidies for the purposes of Article 27.4, we believe that the proper reference is to actual expenditures by a government, and not to budgetary appropriations."[479]

(c) Footnote 55

360. With respect to footnote 55, see paragraphs 357–358 above.

(d) "use of subsidies inconsistent with its development needs"

361. Noting the difficulties for a panel to determine whether export subsidies are inconsistent with a developing country Member's development needs, the Panel on *Brazil – Aircraft* considered that "it is the developing country Member itself which is best positioned to identify its development needs and to assess whether its export subsidies are consistent with those needs. Thus, in applying this provision we consider that panels should give substantial deference to the views of the developing country Member in question."[480]

362. The Panel on *Brazil – Aircraft* considered that the burden is on the claiming party to demonstrate that,

[470] Panel Report on *Brazil – Aircraft*, para. 7.73.
[471] Panel Report on *Brazil – Aircraft*, para. 7.73.
[472] Appellate Body Report on *Brazil – Aircraft*, para. 162.
[473] Appellate Body Report on *Brazil – Aircraft*, para. 163.
[474] Panel Report on *Brazil – Aircraft*, para. 7.61.
[475] Panel Report on *Brazil – Aircraft*, para. 7.62.
[476] Panel Report on *Brazil – Aircraft*, para. 7.65.
[477] Panel Report on *Brazil – Aircraft*, para. 7.65.
[478] Panel Report on *Brazil – Aircraft*, para. 7.66.
[479] Appellate Body Report on *Brazil – Aircraft*, para. 148.
[480] Panel Report on *Brazil – Aircraft*, para. 7.89.

because the developing country Member "has not complied with the conditions set forth in Article 27.4, the Article 3.1(a) prohibition on export subsidies applies to [the developing country Member]".[481] The Panel concluded that "in order to prevail on this issue Canada must present evidence and argument sufficient to raise a presumption that the use of export subsidies by Brazil is inconsistent with Brazil's development needs".[482]

363. In *Brazil – Aircraft*, Canada argued that the Brazilian PROEX programme was inconsistent with Brazil's development needs, because the Brazilian value-added of the aircraft, according to Canada, was "relatively low". The Panel was unconvinced by this argument:

> "In our view, the fact that Brazil has a generally applicable rule regarding the relationship between the domestic content of an exported product and the extent of the PROEX interest rate equalization available with respect to that product does not mean that the deviation from that rule in a particular case is necessarily inconsistent with a developing country Member's development needs. Nor do we see any basis to conclude that PROEX payments on regional aircraft are necessarily inconsistent with Brazil's development needs merely because the Brazilian value-added of the aircraft being exported is relatively low. There could be any number of reasons why the provision of export subsidies might be consistent with a Member's development needs in such a case."[483]

(e) Burden of proof

364. In *Brazil – Aircraft*, the Panel and the Appellate Body were called upon to address the issue of allocation of the burden of proof under Article 27.4. More specifically, the question was raised as to who bore the burden of proof with respect to the conditions contained in Article 27.4, conditions which determine whether Article 3.1(a) applies to a developing country Member. The Panel opined that the fundamental issue in this respect was "whether the prohibition in Article 3.1(a) of the SCM Agreement *applies* to the developing country Member in question, rather than whether the developing country Member, having been found to be subject to the substantive obligations of Article 3.1(a), and having been found to have acted inconsistently with these obligations, can find justifying protection by invoking Article 27.2(b) in conjunction with Article 27.4".[484] Based on this reasoning, the Panel then found that the burden of proof under Article 27.4 is on the complaining Member, in this case Canada. The Appellate Body upheld this finding of the Panel, emphasizing that the fundamental issue was whether Article 3.1(a) was applicable to the developing country Member in question:

> "With respect to the *application* of the prohibition of export subsidies in Article 3.1(a) of the *SCM Agreement*, paragraphs 2 and 4 of Article 27 contain a carefully negotiated balance of rights and obligations for developing country Members. During the transitional period . . . certain developing country Members are *entitled* to the *non-application* of Article 3.1(a), *provided* that they comply with the specific obligation set forth in Article 27.4. Put another way, when a developing country Member complies with the conditions in Article 27.4, a claim of violation of Article 3.1(a) cannot be entertained during the transitional period, because the export subsidy prohibition in Article 3 simply *does not apply* to that developing country Member."[485]

365. The Panel on *Brazil – Aircraft* had opined that until non-compliance with the conditions set out in Article 27.4 is demonstrated, there is also, on the part of a developing country Member within the meaning of Article 27.2(b), no inconsistency with Article 3.1(a). The Panel therefore concluded that "it is for the Member alleging a violation of Article 3.1(a) of the SCM Agreement to demonstrate that the substantive obligation in that provision – the prohibition on export subsidies – applies to the developing country Member complained against".[486] The Appellate Body agreed with these conclusions:

> "Both from its title and from its terms, it is clear that Article 27 is intended to provide special and differential treatment for developing country Members, under specified conditions. In our view, too, paragraph 4 of Article 27 provides certain obligations that developing country Members must fulfill if they are to benefit from this special and differential treatment during the transitional period. On reading paragraphs 2(b) and 4 of Article 27 together, it is clear that the conditions set forth in paragraph 4 are *positive obligations* for developing country Members, *not* affirmative defences. If a developing country Member complies with the obligations in Article 27.4, the prohibition on export subsidies in Article 3.1(a) simply does not apply. However, if that developing country Member does *not* comply with those obligations, Article 3.1(a) *does* apply.
>
> For these reasons, we agree with the Panel that the burden is on the complaining party (*in casu* Canada) to demonstrate that the developing country Member (*in casu* Brazil) is not in compliance with at least one of the elements set forth in Article 27.4. If such non-compliance is demonstrated, then, and only then, does the prohibition of Article 3.1(a) *apply* to that developing country Member."[487]

(f) Extension of Article 27.4 transition period

366. On 26 October 2001, the Chairman of the SCM Committee issued a Report to the General Council, where he recommended that the SCM Committee continue to work on, among other things, seeking a solution for developing country Members with a small percentage share of exports in import markets and in global trade, within the framework of Article 27.4 of the *SCM Agreement* for extensions of the transition period for export subsidies.[488]

367. In paragraph 10.6 of the Doha Ministerial Decision on Implementation-Related Issues and Concerns, the Ministerial Conference directs the SCM Committee to extend the transition period under Article 27.4 as follows:

> "Having regard to the particular situation of certain developing-country Members, directs the Committee on Subsidies and Countervailing Measures to extend the transition period, under the rubric of Article 27.4 of the Agreement on Subsidies and Countervailing Measures, for certain export subsidies provided by such Members, pursuant to the procedures set forth in document G/SCM/39. Furthermore, when considering a request for an extension of the transition period under the rubric of Article 27.4 of the Agreement on Subsidies and Countervailing Measures, and in order to avoid that Members at similar stages of development and having a similar order of magnitude of share in world trade are treated differently in terms of receiving such extensions for the same eligible programmes and the length of such extensions, directs the Committee to extend the transition period for those developing countries, after taking into account the relative competitiveness in relation to other developing-country Members who have requested extension of the transition period following the procedures set forth in document G/SCM/39."[489]

368. The "Procedures for Extensions under Article 27.4 for Certain developing country Members",[490] to which paragraph 10.6 of the Doha Decision refers, provide for a set of procedures in respect of requests for extension of the transition period under Article 27.4 of the *SCM Agreement* for certain eligible programmes of a number of developing countries.

369. Further to the requests of a number of developing country Members pursuant to Article 27.4, including requests pursuant to paragraph 10.6 of the Doha Decision, the SCM Committee granted an extension of the pertinent transition period in respect of a number of export subsidy programmes of: Antigua and Barbuda,[491] Barbados,[492] Belize,[493] Costa Rica,[494] Dominica,[495] Dominican Republic,[496] El Salvador,[497] Fiji,[498] Grenada,[499] Guatemala,[500] Jamaica,[501] Jordan,[502] Mauritius,[503] Panama,[504] Papua New Guinea,[505] St. Lucia,[506] St. Kitts and Nevis,[507] St. Vincent and the Grenadines,[508] Uruguay,[509] Colombia[510] and Thailand.[511]

370. All extensions granted in 2002 related to calendar year 2003. Those extensions granted pursuant to the procedures in document G/SCM/39 had a possibility of an annual "fast track" extension, through 2007, on the basis of mandated annual review by the SCM Committee of standstill and transparency commitments of the Members concerned. Provided all the requirements are satisfied, the final two-year period of Article 27.4 would begin on 1 January 2008. The extensions granted pursuant to Article 27.4 above, and those granted pursuant to paragraph 10.6 of the Doha Implementation Decision, are subject to the particular considerations reflected in Article 27.4, paragraph 10.6 of the Decision and the terms of the relevant decisions taken by the Committee.

371. In 2003, the SCM Committee agreed to grant a continuation of the extension of the transition period in respect of certain export subsidy programmes. These requests were made by a number of developing country

---

488 G/SCM/38, pp. 1–4 and 6–18. On 2 August 2001, the Chairman of the General Council requested that the SCM Committee take up the issue of implementation of Article 27 of the *SCM Agreement* as it related to particular issues concerning developing country Members with small percentage share of exports in import markets and global trade. The SCM Committee was to report back by 30 September 2001. The Committee's Chairman's report (in document G/SCM/36 circulated on 2 October 2001) provided background information on the Committee's consideration and requested an extension to 26 October 2001, during which time the Committee would continue to work with a view to reaching a solution for developing country Members with a small percentage share of exports in import markets and global trade, within the framework of Article 27.4 for extension of transition period for export subsidies. During this time the Committee would seek to identify criteria for eligible countries and programmes, transparency elements, timeframes and any other relevant elements and operational aspects.

Members pursuant to Article 27.4, including requests pursuant to paragraph 10.6 of the Doha Decision and the procedures in G/SCM/39, and on the basis of the mandated review of standstill and transparency commitments of the Member concerned. These extensions were accorded to: Antigua and Barbuda,[512] Barbados,[513] Belize,[514] Costa Rica,[515] Dominica,[516] Dominican Republic,[517] El Salvador,[518] Fiji,[519] Grenada,[520] Guatemala,[521] Jamaica,[522] Jordan,[523] Mauritius,[524] Panama,[525] Papua New Guinea,[526] St. Lucia,[527] St. Kitts and Nevis,[528] St. Vincent and the Grenadines,[529] Uruguay[530] and Colombia.[531] All continuations of extensions granted in 2003 were in respect of calendar year 2004.

(g) Relationship with other Articles

372. With respect to the relationship with Article 3.1(a), see paragraph 364 above.

373. With respect to the relationship with Article 3.2, see paragraphs 136–138 above.

374. With respect to the relationship with Article 25, see paragraph 334 above.

375. With respect to the relationship with Article 27.2(b), see paragraphs 364–365 above.

5. Article 27.5 and 27.6

(a) Export competitiveness

376. During 2003, one request under Article 27.6(b) was made to the Secretariat to undertake calculations with respect to export competitiveness.[532]

(b) Review of the operation of Article 27.6

377. The SCM Committee addressed the mandated review of the operation of Article 27.6 at its November 1999 meeting and took note of statements made.[533]

(c) Period for establishment of export competitiveness under Article 27.5

378. In its Decision of 15 December 2000,[534] the General Council decided:

> "6.2 The Committee on Subsidies and Countervailing Measures (SCM Committee) shall examine as an important part of its work all issues relating to Articles 27.5 and 27.6 of the SCM Agreement, including the possibility to establish export competitiveness on the basis of a period longer than two years."[535]

379. In paragraph 10.5 of the Doha Decision on Implementation-Related Issues and Concerns, the Ministers confirmed that the eight-year period in Article 27.5 for the phasing out of export subsidies by LDCs begins from the date of their export competitiveness:

> "Subject to the provisions of Articles 27.5 and 27.6, it is reaffirmed that least-developed country Members are exempt from the prohibition on export subsidies set forth in Article 3.1(a) of the Agreement on Subsidies and Countervailing Measures, and thus have flexibility to finance their exporters, consistent with their development needs. It is understood that the eight-year period in Article 27.5 within which a least-developed country Member must phase out its export subsidies in respect of a product in which it is export-competitive begins from the date export competitiveness exists within the meaning of Article 27.6."

380. Two requests were made in 2002 for the Secretariat to conduct calculations with respect to export competitiveness under Article 27.6(b).[536]

6. Article 27.7

(a) Relationship with other Articles

381. With respect to the relationship with Article 27.2(b), see paragraph 339 above.

[536] The Secretariat Note in response to the request by Ecuador in respect of Colombia can be found in document G/SCM/46. The Secretariat Note in response to the request by Ecuador and Peru in respect of Thailand can be found in document G/SCM/48.

7. Article 27.8

(a) "in accordance with the provisions of paragraphs 3 through 8 of Article 6"

382. The Panel on *Indonesia – Autos* stated that while a complaining party is, pursuant to Article 27.8, deprived of the rebuttable presumption of serious prejudice under Article 6.1(a) when trying to prove serious prejudice by virtue of a subsidy granted to a developing country Member, Article 27.8 does not establish a legal standard for making a prima facie case higher than that normally applicable under Article 6:

> "We do not agree, however, that the complainants bear a heavier than usual burden of proof in this dispute or that the concept of 'like product' should be interpreted more narrowly than usual because Indonesia is a developing country Member. . . . [B]ecause Indonesia is a developing country Member, Article 27.8 requires complainants to demonstrate serious prejudice by positive evidence 'in accordance with the provisions of paragraphs 3 through 8 of Article 6' rather than taking advantage of the rebuttable presumption of serious prejudice that otherwise would have applied under Article 6.1(a). Article 27 does not, however, impose a higher burden of proof on complainants than that normally applicable under Article 6, nor does it provide that the term 'like product' is to be defined differently in the case of subsidization provided by a developing country Member."[537]

8. Article 27.9

383. The Panel on *Indonesia – Autos* described the provision in Article 27.9 as follows:

> "Article 27.9 provides that, *in the usual case*, developing country Members may not be subject to a claim that their actionable subsidies have caused serious prejudice to the interests of another Member. Rather, a Member may only bring a claim that benefits under GATT have been nullified or impaired by a developing country Member's subsidies or that subsidized imports into the complaining Member have caused injury to a domestic industry."[538] (emphasis in original)

9. Article 27.10

384. The Appellate Body on *US – Carbon Steel*, rejected the Panel's findings that *de minimis* subsidization is non-injurious subsidization and noted that Article 27.10 (and 27.11) of the *SCM Agreement* requires termination of a countervailing duty *investigation* with respect to a developing country Member when "the overall level of subsidies granted does not exceed" 2 or 3 per cent:

> "Articles 27.10 and 27.11 of the *SCM Agreement* require termination of a countervailing duty *investigation* with respect to a developing country Member whenever 'the overall level of subsidies granted does not exceed' 2 or 3 percent, depending on the circumstances. These provisions require authorities, in a countervailing duty investigation, to apply a higher *de minimis* subsidization threshold to imports from developing country Members. To accept the Panel's reasoning – that *de minimis* subsidization is non-injurious subsidization – would imply that, for the same product, imported into the same country, and affecting the same domestic industry, the *SCM Agreement* establishes different thresholds at which the same industry can be said to suffer injury, depending on the origin of the product."[539]

10. Article 27.11

(a) "notified"

385. At its meeting of 22 February 1995, the SCM Committee adopted a Format for Notifications under Article 27.11 of the *SCM Agreement*, which sets out the information to be provided in the notification.[540]

386. As regards the termination of a countervailing duty investigation with respect to developing country Members, see paragraph 384 above.

11. Article 27.13

(a) "notified"

387. At its meeting of 22 February 1995, the SCM Committee adopted a Format for Notifications under Article 27.13 of the Agreement on Subsidies and Countervailing Measures, which sets out the information and documents to be provided in the notification.[541]

PART IX: TRANSITIONAL ARRANGEMENTS

XXVIII. ARTICLE 28

A. TEXT OF ARTICLE 28

Article 28
Existing Programmes

28.1 Subsidy programmes which have been established within the territory of any Member before the date on which such a Member signed the WTO Agreement and which are inconsistent with the provisions of this Agreement shall be:

---

[537] Panel Report on *Indonesia – Autos*, para. 14.167.
[538] Panel Report on *Indonesia – Autos*, para. 14.156.
[539] Appellate Body Report on *US – Carbon Steel*, para. 82.
[540] Format for Notifications under Article 27.11 of the Agreement on Subsidies and Countervailing Measures, G/SCM/16.
[541] Format for Notifications under Article 27.13 of the Agreement on Subsidies and Countervailing Measures, G/SCM/15.

(a) notified to the Committee not later than 90 days after the date of entry into force of the WTO Agreement for such Member; and

(b) brought into conformity with the provisions of this Agreement within three years of the date of entry into force of the WTO Agreement for such Member and until then shall not be subject to Part II.

28.2 No Member shall extend the scope of any such programme, nor shall such a programme be renewed upon its expiry.

B. INTERPRETATION AND APPLICATION OF ARTICLE 28

1. Article 28.1

(a) "inconsistent with the provisions of this Agreement"

388. The Panel on *Indonesia – Autos* addressed the question of whether Indonesia had extended the scope of a subsidy programme which was "inconsistent" with the provisions of the *SCM Agreement*, contrary to the prohibition contained in Article 28.2. Under Article 27.3, the prohibition of Article 3.1(b) was not applicable to Indonesia at the time of the dispute; therefore, the Indonesian programme did not violate the *SCM Agreement*. Nevertheless, the United States argued that the term "inconsistent" under Article 28.1 was to be understood as distinct from the concept of "prohibited"; more specifically, the United States argued that a subsidy programme could be inconsistent with the provisions of the *SCM Agreement*, regardless of the applicability of Article 3 in a particular case. The Panel rejected this argument:

> "In the SCM Agreement . . . the drafters have chosen to express the concept of subsidies meeting the substantive conditions of Article 3 by referring to subsidies 'falling under the provisions of Article 3' (See Article 2.3). If they had intended to express the same concept in Article 28, they could have used comparable language."[542]

XXIX. ARTICLE 29

A. TEXT OF ARTICLE 29

Article 29
Transformation into a Market Economy

29.1 Members in the process of transformation from a centrally-planned into a market, free-enterprise economy may apply programmes and measures necessary for such a transformation.

29.2 For such Members, subsidy programmes falling within the scope of Article 3, and notified according to paragraph 3, shall be phased out or brought into conformity with Article 3 within a period of seven years from the date of entry into force of the WTO Agreement. In such a case, Article 4 shall not apply. In addition during the same period:

(a) Subsidy programmes falling within the scope of paragraph 1(d) of Article 6 shall not be actionable under Article 7;

(b) With respect to other actionable subsidies, the provisions of paragraph 9 of Article 27 shall apply.

29.3 Subsidy programmes falling within the scope of Article 3 shall be notified to the Committee by the earliest practicable date after the date of entry into force of the WTO Agreement. Further notifications of such subsidies may be made up to two years after the date of entry into force of the WTO Agreement.

29.4 In exceptional circumstances Members referred to in paragraph 1 may be given departures from their notified programmes and measures and their time-frame by the Committee if such departures are deemed necessary for the process of transformation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 29

No jurisprudence or decision of a competent WTO body.

PART X: DISPUTE SETTLEMENT

XXX. ARTICLE 30

A. TEXT OF ARTICLE 30

Article 30

The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding shall apply to consultations and the settlement of disputes under this Agreement, except as otherwise specifically provided herein.[543]

B. INTERPRETATION AND APPLICATION OF ARTICLE 30

1. List of disputes

389. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *SCM Agreement* were invoked:

[542] Panel Report on *Indonesia – Autos*, para. 14.261.

[543] In Marrakesh, the Ministerial Conference adopted a Declaration on Dispute Settlement pursuant to the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 or Part V of the Agreement on Subsidies and Countervailing Measures. See Section XXXIV.

	Case Name	Case Number	Invoked Articles
1	*Brazil – Desiccated Coconut*	WT/DS22	Article 32.3
2	*Brazil – Aircraft*	WT/DS46	Articles 3, 4.7, 27.4, 27.5 and Item (k)
3	*Indonesia – Autos*	WT/DS54, WT/DS55, WT/DS59, WT/DS64	Articles 1, 2, 5(c), 6.3(a), 6.3(c), 27.3, 27.9 and 28.2
4	*Canada – Aircraft*	WT/DS70	Articles 1, 3.1(a), 3.2, 27.4 and 4.7
5	*Canada – Dairy*	WT/DS103, WT/DS113	Articles 3.1 and 4.7
6	*US – FSC*	WT/DS108	Articles 1, 3.1(a), 3.1(b) and 4.7
7	*Australia – Automotive Leather II*	WT/DS126	Articles 1, 3.1(a) and 4.7
8	*US – Lead and Bismuth II*	WT/DS138	Articles 1, 10, 19.3, 19.4, 21 and 27.13
9	*Canada – Autos*	WT/DS139, WT/DS142	Articles 1, 3.1(a), 3.1(b) and 4.7
10	*US – Export Restraints*	WT/DS194	Articles 1.1, 10, 11, 17, 19 and 32.1
11	*US – Countervailing Measures on Certain EC Products*	WT/DS212	Articles 10, 14, 19.1, 19.4, 21.1, 21.2 and 21.3
12	*US – Carbon Steel*	WT/DS213	Article 21.3
13	*US – Offset Act (Byrd Amendment)*	WT/DS217	Articles 4.10, 5(b), 7.9, 18.3, 11.4, 32.1 and 32.5
14	*US – Section 129(c)(1) URAA*	WT/DS221	Articles 10, 19.4, 21.1, 32.1 and 32.5
15	*Canada – Aircraft Credits and Guarantees*	WT/DS222	Articles 1.1 (a) (1) (iii); 1.1(b); 3.1 (a), 4.7, 14 (d), 17.3, 17.4, 19.3, 19.4, 20.3, 21.2, 32.1 and Item (k) Illustrative List
16	*US – Softwood Lumber III*	WT/DS236	Articles 1, 3.1(a), 14(d), 17.3, 17.4, 19.3, 19.4, 20.6 and 21.2
17	*US – Softwood Lumber IV*	WT/DS257	Articles 1.2, 10, 11.4, 12.1, 12.3, 12.8, 14, 14(d), 19.1, 19.4 and 32.1 and 32.1
18	*US – Softwood Lumber VI*	WT/DS277	Articles 15.2, 15.4, 15.5 and 15.7

2. Standard of review

390. In *US – Lead and Bismuth II*, the United States claimed that under the *SCM Agreement*, the standards of review as set forth in Article 17.6 of the *Anti-Dumping Agreement* applied by virtue of a Ministerial Declaration which states that "[the] *Ministers recognize*, with respect to dispute settlement pursuant to the Agreement on Implementation of Article VI of GATT 1994 or Part V of the Agreement on Subsidies and Countervailing Measures, the need for the consistent resolution of disputes arising from anti-dumping and countervailing duty measures". Both the Panel and the Appellate Body rejected the United States' argument.[544] The Appellate Body opined that the Declaration is couched in hortatory language and does not specify any particular action to be taken or any particular standards of review to be applied. In its finding, the Appellate Body noted the provisions of Article 30 and concluded that the *SCM Agreement* does not "contain any 'special or additional rules' on the standard of review to be applied by panels".[545]

PART XI: FINAL PROVISIONS

XXXI. ARTICLE 31

A. TEXT OF ARTICLE 31

Article 31
Provisional Application

The provisions of paragraph 1 of Article 6 and the provisions of Article 8 and Article 9 shall apply for a period of five years, beginning with the date of entry into force of the WTO Agreement. Not later than 180 days before the end of this period, the Committee shall review the operation of those provisions, with a view to determining whether to extend their application, either as presently drafted or in a modified form, for a further period.

B. INTERPRETATION AND APPLICATION OF ARTICLE 31

1. Review of Articles 6.1, 8 and 9

391. The Committee on Subsidies and Countervailing Measures held a special meeting on 20 December 1999

[544] Panel Report on *US – Lead and Bismuth II*, paras. 6.17–6.19; Appellate Body Report on *US – Lead and Bismuth II*, paras. 49–51.

[545] Appellate Body Report on *US – Lead and Bismuth II*, para. 45. See also para. 426 of this Chapter.

to conclude the review under Article 31 which had commenced earlier in 1999. At that meeting, no consensus was reached by the Committee to extend Articles 6.1, 8 and 9, either as drafted or in modified form.[546] Articles 6.1, 8 and 9 have therefore lapsed. (See paragraphs 206, 233 and 231 above.)

XXXII. ARTICLE 32

A. TEXT OF ARTICLE 32

Article 32
Other Final Provisions

32.1 No specific action against a subsidy of another Member can be taken except in accordance with the provisions of GATT 1994, as interpreted by this Agreement.[56]

(*footnote original*) [56] This paragraph is not intended to preclude action under other relevant provisions of GATT 1994, where appropriate.

32.2 Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

32.3 Subject to paragraph 4, the provisions of this Agreement shall apply to investigations, and reviews of existing measures, initiated pursuant to applications which have been made on or after the date of entry into force for a Member of the WTO Agreement.

32.4 For the purposes of paragraph 3 of Article 21, existing countervailing measures shall be deemed to be imposed on a date not later than the date of entry into force for a Member of the WTO Agreement, except in cases in which the domestic legislation of a Member in force at that date already included a clause of the type provided for in that paragraph.

32.5 Each Member shall take all necessary steps, of a general or particular character, to ensure, not later than the date of entry into force of the WTO Agreement for it, the conformity of its laws, regulations and administrative procedures with the provisions of this Agreement as they may apply to the Member in question.

32.6 Each Member shall inform the Committee of any changes in its laws and regulations relevant to this Agreement and in the administration of such laws and regulations.

32.7 The Committee shall review annually the implementation and operation of this Agreement, taking into account the objectives thereof. The Committee shall inform annually the Council for Trade in Goods of developments during the period covered by such reviews.

32.8 The Annexes[547] to this Agreement constitute an integral part thereof.

B. INTERPRETATION AND APPLICATION OF ARTICLE 32

1. Article 32.1

(a) "in accordance with the provisions of GATT 1994, as interpreted by this Agreement"

392. The Panel on *Brazil – Desiccated Coconut* considered the relevance of Article 32.1 to the question of separability of Article VI of the *GATT 1994* and the *SCM Agreement*. The Panel emphasized that Article 32.1 makes evident that the *SCM Agreement* is an "interpretation" of the subsidies provisions contained in the *GATT 1994*. The Panel concluded that, as a result, the meaning of Article VI of *GATT 1994* cannot be established without reference to the provisions of the *SCM Agreement*, since Article VI of *GATT 1994* "might have a different meaning if read in isolation than if read in conjunction with the *SCM Agreement*". In addition, the Panel pointed out that the general interpretive note to Annex 1A of the WTO Agreement reveals the possibility of conflict between *GATT 1994* and the annexed agreements and that, therefore, there could also be conflicts "between GATT 1994 taken in isolation and GATT 1994 interpreted in conjunction with an [annexed] agreement".[548] The Appellate Body agreed with the findings of the Panel but took a slightly different approach in that it focused on the phrase "in accordance with the provisions of GATT 1994, as interpreted by this Agreement":

> "From reading Article 10, it is clear that countervailing duties may only be imposed in accordance with Article VI of the GATT 1994 and the *SCM Agreement*. A countervailing duty being a specific action against a subsidy of another WTO Member, pursuant to Article 32.1, it can only be imposed 'in accordance with the provisions of GATT 1994, as interpreted by this Agreement'. The ordinary meaning of these provisions taken in their context leads us to the conclusion that the negotiators of the *SCM Agreement* clearly intended that, under the integrated *WTO Agreement*, countervailing duties may only be imposed in accordance with the provisions of Part V of the *SCM Agreement* and Article VI of the GATT 1994, taken together . . ."[549]

393. In *US – Offset Act (Byrd Amendment)*, the Appellate Body concluded that it is inappropriate to rely on the reasoning from *US – 1916 Act*[550] to determine what

[546] See G/SCM/M/22. (See also G/SCM/M/18, item G, G/SCM/M/20, item E and G/SCM/M/24, item G.)
[547] See Sections XXXV, XXXVI, XXXVII, XXXVIII, XXXIX, XL and XLI.
[548] Panel Report on *Brazil – Desiccated Coconut*, para. 238.
[549] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 16.
[550] The Appellate Body found in *US – 1916 Act* that "Article VI, and, in particular, Article VI:2 [of the GATT 1994], read in conjunction with the *Anti-Dumping Agreement*, limit the permissible responses to dumping to definitive anti-dumping duties, provisional measures and price undertakings."

is meant by 'in accordance with the provisions of the GATT 1994' as that phrase relates to permissible responses to subsidies.[551] The Appellate Body also considered that "to be in accordance with the GATT 1994, as interpreted by the *SCM Agreement*, a response to subsidization must be either in the form of definitive countervailing duties, provisional measures or price undertakings, or in the form of multilaterally-sanctioned countermeasures resulting from resort to the dispute settlement system".[552] Consequently, the Appellate Body upheld the finding of the Panel that the Offset Act is a "non-permissible specific action against" dumping or a subsidy, contrary to Article 18.1 of the *Anti-Dumping Agreement* and Article 32.1 of the *SCM Agreement*.[553]

394. With respect to Article 32.3 and the term "this Agreement", see also paragraph 400 below.

395. With respect to the discussion on the applicability of Article VI of the *GATT 1994* in circumstances where the *SCM Agreement* does not apply, see also paragraphs 412–414 below.

(b) Relationship with other Articles

(i) Article 10

396. With respect to the relationship with Article 10, see paragraph 392 above.

(ii) Article 14

397. In *US – Softwood Lumber IV*, the Appellate Body reversed the Panel's decision that the United States had acted inconsistently with Article 32.1 of the *SCM Agreement*, although it concluded that it was unable to complete the legal analysis on whether the Department of Commerce's determination of benefit was consistent with Article14(d) of the *SCM Agreement*. Neither did the Appellate Body make findings on whether the Department of Commerce's "determination of the existence and amount of benefit in the underlying countervailing duty investigation" was consistent with Articles 14 and 14(d) and whether the imposition of countervailing duties at issue were consistent with Articles 10 and 32.1.[554]

2. Article 32.3

(a) Transitional rule

398. The Panel on *Brazil – Desiccated Coconut* described Article 32.3 as "a transition rule which defines with precision the temporal application of the SCM Agreement".[555] Addressing this temporal application of the *SCM Agreement*, the Appellate Body on *Brazil – Desiccated Coconut* examined Article 32.3 as "an express statement of intention" referred to in Article 28 of the *Vienna Convention*, concerning the non-retroactivity of treaties.[556] The Appellate Body stated:

> "The Appellate Body sees Article 32.3 of the *SCM Agreement* as a clear statement that for countervailing duty investigations or reviews, the dividing line between the application of the GATT 1947 system of agreements and the *WTO Agreement* is to be determined by the date on which the application was made for the countervailing duty investigation or review. . . . the Uruguay Round negotiators expressed an explicit intention to draw the line of application of the new *WTO Agreement* to countervailing duty investigations and reviews at a different point in time from that for other general measures. Because a countervailing duty is imposed only as a result of a sequence of acts, a line had to be drawn, and drawn sharply, to avoid uncertainty, unpredictability and unfairness concerning the rights of states and private parties under the domestic laws in force when the *WTO Agreement* came into effect."[557]

399. While discussing Article 32.3 with reference to the issue of separability of Article VI of the *GATT 1994* and the *SCM Agreement*, the Appellate Body on *Brazil – Desiccated Coconut* agreed that the transitional decisions approved by the Tokyo Round Subsidies and Countervailing Measures Committee and the Contracting Parties "do not modify the scope of rights and obligations under the *WTO Agreement*". Rather, the Appellate Body held these decisions "contribute to understanding the significance of Article 32.3 of the *SCM Agreement* as a transitional rule":[558]

> "Like the Panel, 'we are hesitant, in interpreting the WTO Agreement, to give great weight to the effect of decisions that had not yet been taken at the time the WTO Agreement was signed'. We agree with the Panel's statement that:
>
> > 'The availability of Article VI of GATT 1994 as applicable law in this dispute is a matter to be determined on the basis of the WTO Agreement, rather than on the basis of a subsequent decision by the signatories of the Tokyo Round SCM Code taken at the invitation of the Preparatory Committee.'[559]
>
> . . .

[551] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 266.
[552] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 273.
[553] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, para. 274.
[554] Appellate Body Report on *US – Softwood Lumber IV*, paras. 119–122.
[555] Panel Report on *Brazil – Desiccated Coconut*, para. 228.
[556] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 15.
[557] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 19.
[558] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 18.
[559] (*footnote original*) Panel Report on *Brazil – Desiccated Coconut*, para. 272.

> While we agree with the Panel that these transitional decisions are of limited relevance in determining whether Article VI of the GATT 1994 can be applied independently of the *SCM Agreement*, they reflect the intention of the *Tokyo Round SCM Code* signatories to provide a forum for dispute settlement arising out of disputes under the *Tokyo Round SCM Code* for one year after its legal termination date. At the time the *Tokyo Round SCM Code* signatories agreed to these decisions, they were fully cognizant of the implications of the operation of Article 32.3 of the *SCM Agreement*."[560]

(b) "this Agreement"

400. After a contextual analysis of Article 32.3, the Appellate Body on *Brazil – Desiccated Coconut* concluded that "[i]f Article 32.3 is read in conjunction with Articles 10 and 32.1 of the *SCM Agreement*, it becomes clear that the term 'this Agreement' in Article 32.3 means 'this Agreement and Article VI of the GATT 1994'".[561]

401. With respect to further discussion on the applicability of Article VI of the *GATT 1994* in circumstances where, pursuant to Article 32.3, the *SCM Agreement* does not apply, see paragraph 412 below.

(c) "investigations"

402. The Panel on *Brazil – Desiccated Coconut*, in a finding subsequently not addressed by the Appellate Body, rejected the argument that the reference in Article 32.3 to "investigations" limits the application of the *SCM Agreement* to the "procedural" aspects of investigations. Rather, the Panel concluded that "the concept of 'investigations' as expressed in Article 32.3 includes both procedural and substantive aspects of an investigation and the imposition of a countervailing measure pursuant thereto".[562] The Panel also held that "one object and purpose of Article 32.3 is to prevent WTO Members from having to redo investigations begun before the entry into force of the WTO Agreement in accordance with the new and more detailed procedural provisions of the SCM Agreement. In our view, however, this consideration is equally applicable to the substantive provisions of the SCM Agreement."[563]

(d) "reviews of existing measures"

403. The Panel on *Brazil – Desiccated Coconut*, in a finding subsequently not addressed by the Appellate Body, rejected the argument that Article 32.3 does not preclude the application of the *SCM Agreement* to the continued collection of duties after the date of entry into force of the WTO Agreement. It stated:

> "It is thus through the mechanism of reviews provided for in the SCM Agreement, and only through that mechanism, that the Agreement becomes effective with respect to measures imposed pursuant to investigations to which the SCM Agreement does not apply. If . . . a panel could examine in the light of the SCM Agreement the continued collection of a duty even where its imposition was not subject to the SCM Agreement, and if . . . that examination of the collection of the duty extended to the basis on which the duty was imposed, then in effect the determinations on which those duties were based would be subject to standards that did not apply – and which, in the case of determinations made before the WTO Agreement was signed, did not yet even exist – at the time the determinations were made. In our view, such an interpretation would be contrary to the object and purpose of Article 32.3 and would render that Article a nullity."[564]

3. Article 32.5

(a) "to ensure . . . the conformity of its laws . . . with the provisions of this Agreement"

404. In *US – Offset Act (Byrd Amendment)*, the Panel suggested that the United States bring the Offset Act into conformity with the *SCM Agreement* by "repealing" the Act. The Panel had found violations of Articles 5.4 and 18.1 of the *Anti-Dumping Agreement* and Articles 11.4 and 32.1 of the *SCM Agreement*; it had also found consequent violations of Article 18.4 of the *Anti-Dumping Agreement*, Article 32.5 of the *SCM Agreement*, and therefore Article XVI:4 of the *WTO Agreement*.[565] The Appellate Body upheld the Panel's findings of violations of Article 18.4 of the *Anti-Dumping Agreement*, Article 32.5 of the *SCM Agreement*, and also of Article XVI:4 of the *WTO Agreement*, based on the violations of Article 18.1 of the *Anti-Dumping Agreement* and Article 32.1 of the *SCM Agreement*.[566]

405. In *US – Countervailing Measures on Certain EC Products*, the Panel had found that the disputed legislation, Section 1677(5)(F), as interpreted by the US Court of Appeals for the Federal Circuit and the SAA, was inconsistent with the *SCM Agreement*, and, therefore, the United States had failed to ensure conformity with Article 32.5 of the *SCM Agreement* and Article XVI.4 of the WTO Agreement respectively. In this regard, the Panel was of the view that:

> "[T]ogether with the other provisions of the SCM Agreement, Article 32.5 as well as Article XVI.4 of the WTO Agreement require the United States to maintain a

[564] Panel Report on *Brazil – Desiccated Coconut*, para. 230.
[565] Panel Report on *US – Offset Act (Byrd Amendment)*, paras. 7.91–7.92.
[566] Appellate Body Report on *US – Offset Act (Byrd Amendment)*, paras. 300–301.

legislation, regulations and practices that guarantee that in cases of fair market value privatization at arm's-length no benefit *vis-à-vis* the privatized producer is determined to continue from prior subsidization or financial contributions bestowed on a state-owned producer."[567]

406. The Appellate Body, however, reversed the Panel's findings on the grounds that it did not consider that Section 1677(5)(F) had *per se* violated the *SCM Agreement*.[568]

4. Article 32.7

(a) Relationship with other Articles

407. With respect to the relationship with Article 24, see paragraph 324 above.

XXXIII. RELATIONSHIP WITH OTHER WTO AGREEMENTS

A. GATT 1994

1. Article III

(a) Absence of conflict between the *SCM Agreement* and Article III of the *GATT 1994*

408. Considering whether there is a general conflict between the *SCM Agreement* and Article III of the *GATT 1994*, the Panel on *Indonesia – Autos* stated:

> "As was the case under GATT 1947, we think that Article III of GATT 1994 and the WTO rules on subsidies remain focused on different problems. Article III continues to prohibit discrimination between domestic and imported products in respect of internal taxes and other domestic regulations, including local content requirements. It does not 'proscribe' nor does it 'prohibit' the provision of any subsidy *per se*. By contrast, the SCM Agreement prohibits subsidies which are conditional on export performance and on meeting local content requirements, provides remedies with respect to certain subsidies where they cause adverse effects to the interests of another Member and exempts certain subsidies from actionability under the SCM Agreement. In short, Article III prohibits discrimination between domestic and imported products while the SCM Agreement regulates the provision of subsidies to enterprises.
>
> . . .
>
> Accordingly, we consider that Article III and the SCM Agreement have, generally, different coverage and do not impose the same type of obligations. Thus there is no general conflict between these two sets of provisions."[569]

409. The Panel on *Indonesia – Autos* further acknowledged that while Article III of the *GATT 1994* and the *SCM Agreement* may overlap to a certain extent, the two sets of provisions serve different purposes:

> "[T]he only subsidies that would be affected by the provisions of Article III are those that would involve discrimination between domestic and imported products. While Article III of GATT and the SCM Agreement may appear to overlap in respect of certain measures, the two sets of provisions have different purposes and different coverage. Indeed, they also offer different remedies, different dispute settlement time limits and different implementation requirements. Thus, we reject . . . [the] argument that the application of Article III to subsidies would reduce the SCM Agreement to 'inutility'.
>
> . . .
>
> [T]he obligations contained in the WTO Agreement are generally cumulative, can be complied with simultaneously and . . . different aspects and sometimes the same aspects of a legislative act can be subject to various provisions of the WTO Agreement."[570]

(b) Absence of conflict between the *SCM Agreement* and Article III:2 of the *GATT 1994*

410. The Panel on *Indonesia – Autos* rejected the argument that "the obligations contained in Article III:2 of GATT and the SCM Agreement are mutually exclusive"[571] because "the SCM Agreement 'explicitly authorizes' Members to provide subsidies that are prohibited by Article III:2 of GATT".[572] The Panel stated:

> "We also recall that the obligations of the SCM Agreement and Article III:2 are not mutually exclusive. It is possible . . . to respect . . . obligations under the SCM Agreement without violating Article III:2 since Article III:2 is concerned with discriminatory product taxation, rather than the provision of subsidies as such. Similarly, it is possible . . . to respect the obligations of Article III:2 without violating . . . obligations under the SCM Agreement since the SCM Agreement does not deal with taxes on products as such but rather with subsidies to enterprises. At most, the SCM Agreement and Article III:2 are each concerned with different aspects of the same piece of legislation."[573]

411. As regards the relationship with Article 27.3 on a transition period for developing countries and least developing countries and Article III:2 of the *GATT 1994*, see also paragraph 346 above.

2. Article VI

412. In the *Brazil – Desiccated Coconut* dispute, the Panel was faced with the question "whether Article VI

---

[567] Panel Report on *US – Countervailing Measures on Certain EC Products*, para. 7.156.
[568] Appellate Body Report on *US – Countervailing Measures on Certain EC Products*, paras. 159–160.
[569] Panel Report on *Indonesia – Autos*, paras. 14.33 and 14.36.
[570] Panel Report on *Indonesia – Autos*, paras. 14.39 and 14.56.
[571] Panel Report on *Indonesia – Autos*, para. 14.97.
[572] Panel Report on *Indonesia – Autos*, para. 14.98.
[573] Panel Report on *Indonesia – Autos*, paras. 14.98–14.99.

creates rules which are separate and distinct from those of the SCM Agreement, and which can be applied without reference to that Agreement, or whether Article VI of GATT 1994 and the SCM Agreement represent an inseparable package of rights and disciplines that must be considered in conjunction".[574] In phrasing this issue, the Panel on *Brazil – Desiccated Coconut* made clear that the *SCM Agreement* did not supersede Article VI of the *GATT 1994* as the basis for the regulation by the *WTO Agreement* of countervailing measures. In making this finding, the Panel relied on the existence of the general interpretive note to Annex 1A of the *WTO Agreement* and on the fact that certain provisions of Article VI are not "replicated or elaborated" in the *SCM Agreement*.[575] The Appellate Body on *Brazil – Desiccated Coconut* confirmed the statement by the Panel that the *SCM Agreement* did not supersede Article VI of the *GATT 1994*.[576] In making this finding, the Appellate Body emphasized the integrated nature of the *WTO Agreement* and the annexed agreements. More specifically, the Appellate Body found that although the provisions of the *GATT 1947* were now incorporated into the *GATT 1994*, they did not represent the totality of rights and obligations of WTO Members in a given subject area:

> "The relationship between the GATT 1994 and the other goods agreements in Annex 1A is complex and must be examined on a case-by-case basis. Although the provisions of the GATT 1947 were incorporated into, and became a part of, the GATT 1994, they are not the sum total of the rights and obligations of WTO Members concerning a particular matter. For example, with respect to subsidies on agricultural products, Articles II, VI and XVI of the GATT 1994 alone do not represent the total rights and obligations of WTO Members. The *Agreement on Agriculture* and the *SCM Agreement* reflect the latest statement of WTO Members as to their rights and obligations concerning agricultural subsidies. The general interpretative note to Annex 1A was added to reflect that the other goods agreements in Annex 1A, in many ways, represent a substantial elaboration of the provisions of the GATT 1994, and to the extent that the provisions of the other goods agreements conflict with the provisions of the GATT 1994, the provisions of the other goods agreements prevail. This does not mean, however, that the other goods agreements in Annex 1A, such as the *SCM Agreement*, supersede the GATT 1994."[577]

413. The Appellate Body on *Brazil – Desiccated Coconut* noted that "The relationship between the *SCM Agreement* and Article VI of GATT 1994 is set out in Articles 10 and 32.1 of the *SCM Agreement*."[578] Apart from the integrated structure of the *WTO Agreement* and the annexed agreements, the Appellate Body therefore focused on these two provisions of the *SCM Agreement*. The Appellate Body then explicitly agreed with the Panel's statement that:

> "Article VI of GATT 1994 and the SCM Agreement represent a new and different package of rights and obligations, as among WTO Members, regarding the use of countervailing duties. Thus, Article VI and the respective SCM Agreements impose obligations on a potential user of countervailing duties, in the form of conditions that have to be fulfilled in order to impose a duty, but they also confer the right to impose a countervailing duty when those conditions are satisfied. The SCM Agreements do not merely impose additional substantive and procedural obligations on a potential user of countervailing measures. Rather, the SCM Agreements and Article VI together define, clarify and in some cases modify the whole package of rights and obligations of a potential user of countervailing measures."[579]

414. The Appellate Body on *Brazil – Desiccated Coconut* then proceeded to find that:

> "[C]ountervailing duties may only be imposed in accordance with Article VI of the GATT 1994 and the *SCM Agreement*. A countervailing duty being a specific action against a subsidy of another WTO Member, pursuant to Article 32.1, it can only be imposed 'in accordance with the provisions of GATT 1994, as interpreted by this Agreement'. The ordinary meaning of these provisions taken in their context leads us to the conclusion that the negotiators of the *SCM Agreement* clearly intended that, under the integrated *WTO Agreement*, countervailing duties may only be imposed in accordance with the provisions of Part V of the *SCM Agreement* and Article VI of the GATT 1994, taken together. If there is a conflict between the provisions of the *SCM Agreement* and Article VI of the GATT 1994, furthermore, the provisions of the *SCM Agreement* would prevail as a result of the general interpretative note to Annex 1A.
>
> . . .
>
> The fact that Article VI of the GATT 1947 could be invoked independently of the *Tokyo Round SCM Code* under the previous GATT system does not mean that Article VI of GATT 1994 can be applied independently of the *SCM Agreement* in the context of the WTO. The authors of the new WTO regime intended to put an end to the fragmentation that had characterized the previous system."[580]

3. Article XVI

415. With respect to the relationship with Article XVI:4 of the *GATT 1994*, see paragraphs 82–83 above.

[577] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 15.
[578] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 16.
[579] Panel Report on *Brazil – Desiccated Coconut*, para. 246; Appellate Body Report on *Brazil – Desiccated Coconut*, p. 17.
[580] Appellate Body Report on *Brazil – Desiccated Coconut*, pp. 16 and 18.

B. TRIMS AGREEMENT

416. The Panel on *Indonesia – Autos* considered the issue of whether a measure covered by the *SCM Agreement* can also be subject to the obligations contained in the *TRIMs Agreement*. The Panel first noted that the general interpretive note to Annex 1A of the *WTO Agreement* did not apply in this context and opined that it had to resort to the relevant provision of general international law. In so doing, the Panel emphasized the general international law presumption against conflicts:

> "We note first that the interpretive note to Annex IA of the WTO Agreement is not applicable to the relationship between the SCM Agreement and the TRIMs Agreement. The issue of whether there might be a general conflict between the SCM Agreement and the TRIMs Agreement would therefore need to be examined in the light of the general international law presumption against conflicts and the fact that under public international law a conflict exists in the narrow situation of mutually exclusive obligations for provisions that cover the same type of subject matter.
>
> In this context the fact that the drafters included an express provision governing conflicts between GATT and the other Annex 1A Agreements, but did not include any such provision regarding the relationship between the other Annex 1A Agreements, at a minimum reinforces the presumption in public international law against conflicts. With respect to the nature of obligations, we consider that, with regard to local content requirements, the SCM Agreement and the TRIMs Agreement are concerned with different types of obligations and cover different subject matters. In the case of the SCM Agreement, what is prohibited is the grant of a subsidy contingent on use of domestic goods, not the requirement to use domestic goods as such. In the case of the TRIMs Agreement, what is prohibited are TRIMs in the form of local content requirements, not the grant of an advantage, such as a subsidy."[581]

417. The Panel on *Indonesia – Autos* proceeded to emphasize the different types of obligations and the different subject matters covered by the *SCM Agreement* on the one hand and the *TRIMs Agreement* on the other. It explored how bringing a national measure into consistency with one of the agreements could nevertheless fail to remove the incompatibility with the other agreement. The Panel ultimately concluded that both the *TRIMs Agreement* and the *SCM Agreement* were applicable to the dispute before it:

> "A finding of inconsistency with Article 3.1(b) of the SCM Agreement can be remedied by removal of the subsidy, even if the local content requirement remains applicable. By contrast, a finding of inconsistency with the TRIMs Agreement can be remedied by a removal of the TRIM that is a local content requirement even if the subsidy continues to be granted. Conversely, for instance, if a Member were to apply a TRIM (in the form of local content requirement), as a condition for the receipt of a subsidy, the measure would continue to be a violation of the TRIMs Agreement if the subsidy element were replaced with some other form of incentive. By contrast, if the local content requirements were dropped, the subsidy would continue to be subject to the SCM Agreement, although the nature of the relevant discipline under the SCM Agreement might be affected. Clearly, the two agreements prohibit different measures. We note also that under the TRIMs Agreement, the advantage made conditional on meeting a local content requirement may include a wide variety of incentives and advantages, other than subsidies. There is no provision contained in the SCM Agreement that obliges a Member to violate the TRIMs Agreement, or vice versa.
>
> We consider that the SCM and TRIMs Agreements cannot be in conflict, as they cover different subject matters and do not impose mutually exclusive obligations. The TRIMs Agreement and the SCM Agreement may have overlapping coverage in that they may both apply to a single legislative act, but they have different foci, and they impose different types of obligations.
>
> . . .
>
> We find that there is no general conflict between the SCM Agreement and the TRIMs Agreement. Therefore, to the extent that the . . . programmes are TRIMs and subsidies, both the TRIMs Agreement and the SCM Agreement are applicable to this dispute.
>
> We consider . . . that the obligations contained in the WTO Agreement are generally cumulative, can be complied with simultaneously and that different aspects and sometimes the same aspects of a legislative act can be subject to various provisions of the WTO Agreement."[582]

C. DSU

1. Article 3.8

418. Most panel reports on subsidy disputes contain a paragraph in their recommendations providing that the findings at issue constitute a case of prima facie nullification or impairment of benefits pursuant to Article 3.8 of the *DSU*.[583]

---

[581] Panel Report on *Indonesia – Autos*, para. 14.50.

[582] Panel Report on *Indonesia – Autos*, paras. 14.51–14.52 and 14.55–14.56.

[583] For instance, the following cases have made a reference to Article 3.8 of the *DSU*: Panel Report on *Brazil – Aircraft*, para. 8.3; Panel Report on *Indonesia – Autos*, para. 15.2; Panel Report on *Canada – Aircraft*, para. 10.2; Panel Report on *Canada – Dairy*, para. 8.2; Panel Report on *US – FSC*, para. 8.2; Panel Report on *Australia – Automotive Leather II*, para. 10.2; Panel Report on *US – Lead and Bismuth II*, para. 7.2; Panel Report on *Canada – Autos*, para. 11.2; Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 8.2; Panel Report on *US – Softwood Lumber III*, para. 8.4. Panel Report on *US – Export Restraints*; Panel Report on *US – Carbon Steel*; and Panel Report on *US – Section 129(c)(1) URAA* do not make any reference to Article 3.8 of the *DSU*.

419. Regarding the different disciplines applicable to prohibited subsidies and other illegal measures as regards compliance with panel recommendations, see paragraphs 177 and 181 above.

2. Article 4

420. With respect to the relationship between Article 4.4 of the *SCM Agreement* and Article 4 of the *DSU*, see paragraphs 155–156 above.

3. Article 11

421. With respect to the relationship between Article 4.2 of the *SCM Agreement* and Article 11 of the *DSU*, see paragraph 149 above.

4. Article 13.2

422. With respect to the relationship between Article 4.2 of the *SCM Agreement* and Article 13.2 of the *DSU*, see paragraph 150 above.

5. Article 23.1

423. In *Canada – Aircraft Credits and Guarantees*, the Panel recalled the prospective nature of WTO dispute settlement remedies and that such an approach was also applicable to the *SCM Agreement*:

> "In any event, even if the WTO dispute settlement mechanism does only provide for prospective remedies, we note that it does so in respect of all cases, and not only those involving prohibited export subsidies. Article 23.1 of the DSU provides that Members shall resolve all disputes through the multilateral dispute system, to the exclusion of unilateral self-help. Thus, to the extent that the WTO dispute settlement system only provides for prospective remedies, that is clearly the result of a policy choice by the WTO Membership. Given this policy choice, and given the fact that Article 23.1 of the DSU applies to all disputes, including those involving (alleged) prohibited export subsidies, we see no reason why the (allegedly) prospective nature of WTO dispute settlement remedies should impact on our interpretation of the second paragraph of item (k)."[584]

D. AGREEMENT ON AGRICULTURE

424. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* noted that the WTO-consistency of an export subsidy for agricultural products has to be examined, in the first place, under the *Agreement on Agriculture*. In this case, the Appellate Body considered that it was unable to determine whether the measures at issue "conform[] fully" to Articles 9.1(c) or 10.1 of the *Agreement on Agriculture* and therefore declined to examine the claim under Article 3.1(a) of the *SCM Agreement*.[585] See paragraphs 126–128 above.

E. GATT SUBSIDIES CODE

425. The Panel on *Canada – Aircraft Credits and Guarantees* held that it did not consider that the object and purpose of the *SCM Agreement* was necessarily the same as the object and purpose of the GATT Subsidies Code. For the Panel, the *SCM Agreement* provides for more extensive special and differential treatment for developing countries than the GATT Subsidies Code did. In addition, the preamble to the Marrakesh Agreement Establishing the World Trade Organization, of which agreement the *SCM Agreement* is an integral part, recognizes "that there is need for positive efforts designed to ensure that developing countries, and especially the least developed among them, secure a share in the growth in international trade commensurate with the needs of their economic development". No such "need" was identified in the GATT Subsidies Code. In addition, all WTO Members are bound by the *SCM Agreement*, whereas only a number of GATT Contracting Parties were signatories of the GATT Subsidies Code. Furthermore, the provisions of the *SCM Agreement* – unlike those of the GATT Subsidies Code – are subject to binding dispute settlement under the *DSU*.[586]

XXXIV. RELATIONSHIP WITH MINISTERIAL DECISIONS AND DECLARATIONS

A. TEXT OF DECLARATION

Declaration on Dispute Settlement Pursuant to the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade or Part V of the Agreement on Subsidies and Countervailing Measures

Ministers,

Recognize, with respect to dispute settlement pursuant to the Agreement on Implementation of Article VI of GATT 1994 or Part V of the Agreement on Subsidies and Countervailing Measures, the need for the consistent resolution of disputes arising from anti-dumping and countervailing duty measures.

B. INTERPRETATION AND APPLICATION

1. Standard of review

426. The Appellate Body on *US – Lead and Bismuth II* rejected the argument that, "by virtue of the Declaration, the standard of review specified in Article 17.6 of

[584] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.170.
[585] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US)*, para. 125.
[586] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.171.

the *Anti-Dumping Agreement* also applies to disputes involving countervailing duty measures under Part V of the *SCM Agreement*".[587] The Appellate Body emphasized the hortatory language of the Declaration and the fact that the Declaration does not provide for the application of any particular standards of review to be applied. See also Section XI.B.6(d) of the Chapter on the *DSU*.

427. With respect to this issue, see also paragraph 390 above.

XXXV. ANNEX I

A. TEXT OF ANNEX I

ANNEX I
ILLUSTRATIVE LIST OF EXPORT SUBSIDIES

(a) The provision by governments of direct subsidies to a firm or an industry contingent upon export performance.

(b) Currency retention schemes or any similar practices which involve a bonus on exports.

(c) Internal transport and freight charges on export shipments, provided or mandated by governments, on terms more favourable than for domestic shipments.

(d) The provision by governments or their agencies either directly or indirectly through government-mandated schemes, of imported or domestic products or services for use in the production of exported goods, on terms or conditions more favourable than for provision of like or directly competitive products or services for use in the production of goods for domestic consumption, if (in the case of products) such terms or conditions are more favourable than those commercially available[57] on world markets to their exporters.

(*footnote original*) [57] The term "commercially available" means that the choice between domestic and imported products is unrestricted and depends only on commercial considerations.

(e) The full or partial exemption, remission, or deferral specifically related to exports, of direct taxes[58] or social welfare charges paid or payable by industrial or commercial enterprises.[59]

(*footnote original*) [58] For the purpose of this Agreement:
The term "direct taxes" shall mean taxes on wages, profits, interests, rents, royalties, and all other forms of income, and taxes on the ownership of real property;
The term "import charges" shall mean tariffs, duties, and other fiscal charges not elsewhere enumerated in this note that are levied on imports;
The term "indirect taxes" shall mean sales, excise, turnover, value added, franchise, stamp, transfer, inventory and equipment taxes, border taxes and all taxes other than direct taxes and import charges;
"Prior-stage" indirect taxes are those levied on goods or services used directly or indirectly in making the product;
"Cumulative" indirect taxes are multi-staged taxes levied where there is no mechanism for subsequent crediting of the tax if the goods or services subject to tax at one stage of production are used in a succeeding stage of production;
"Remission" of taxes includes the refund or rebate of taxes;
"Remission or drawback" includes the full or partial exemption or deferral of import charges.
(*footnote original*) [59] The Members recognize that deferral need not amount to an export subsidy where, for example, appropriate interest charges are collected. The Members reaffirm the principle that prices for goods in transactions between exporting enterprises and foreign buyers under their or under the same control should for tax purposes be the prices which would be charged between independent enterprises acting at arm's length. Any Member may draw the attention of another Member to administrative or other practices which may contravene this principle and which result in a significant saving of direct taxes in export transactions. In such circumstances the Members shall normally attempt to resolve their differences using the facilities of existing bilateral tax treaties or other specific international mechanisms, without prejudice to the rights and obligations of Members under GATT 1994, including the right of consultation created in the preceding sentence.

Paragraph (e) is not intended to limit a Member from taking measures to avoid the double taxation of foreign-source income earned by its enterprises or the enterprises of another Member.

(f) The allowance of special deductions directly related to exports or export performance, over and above those granted in respect to production for domestic consumption, in the calculation of the base on which direct taxes are charged.

(g) The exemption or remission, in respect of the production and distribution of exported products, of indirect taxes in excess of those levied in respect of the production and distribution of like products when sold for domestic consumption.

(h) The exemption, remission or deferral of prior-stage cumulative indirect taxes[60] on goods or services used in the production of exported products in excess of the exemption, remission or deferral of like prior-stage cumulative indirect taxes on goods or services used in the production of like products when sold for domestic consumption; provided, however, that prior-stage cumulative indirect taxes may be exempted, remitted or deferred on exported products even when not exempted, remitted or deferred on like products when sold for domestic consumption, if the prior-stage cumulative indirect taxes are levied on inputs that are consumed in the production of the exported product (making normal allowance for waste). This item shall be interpreted in accordance with the guidelines on consumption of inputs in the production process contained in Annex II.

[587] Appellate Body Report on *US – Lead and Bismuth II*, para. 48.

(*footnote original*) [60] Paragraph (h) does not apply to value-added tax systems and border-tax adjustment in lieu thereof; the problem of the excessive remission of value-added taxes is exclusively covered by paragraph (g).

(i) The remission or drawback of import charges in excess of those levied on imported inputs that are consumed in the production of the exported product (making normal allowance for waste); provided, however, that in particular cases a firm may use a quantity of home market inputs equal to, and having the same quality and characteristics as, the imported inputs as a substitute for them in order to benefit from this provision if the import and the corresponding export operations both occur within a reasonable time period, not to exceed two years. This item shall be interpreted in accordance with the guidelines on consumption of inputs in the production process contained in Annex II and the guidelines in the determination of substitution drawback systems as export subsidies contained in Annex III.

(j) The provision by governments (or special institutions controlled by governments) of export credit guarantee or insurance programmes, of insurance or guarantee programmes against increases in the cost of exported products or of exchange risk programmes, at premium rates which are inadequate to cover the long-term operating costs and losses of the programmes.

(k) The grant by governments (or special institutions controlled by and/or acting under the authority of governments) of export credits at rates below those which they actually have to pay for the funds so employed (or would have to pay if they borrowed on international capital markets in order to obtain funds of the same maturity and other credit terms and denominated in the same currency as the export credit), or the payment by them of all or part of the costs incurred by exporters or financial institutions in obtaining credits, in so far as they are used to secure a material advantage in the field of export credit terms.

Provided, however, that if a Member is a party to an international undertaking on official export credits to which at least twelve original Members to this Agreement are parties as of 1 January 1979 (or a successor undertaking which has been adopted by those original Members), or if in practice a Member applies the interest rates provisions of the relevant undertaking, an export credit practice which is in conformity with those provisions shall not be considered an export subsidy prohibited by this Agreement.

(l) Any other charge on the public account constituting an export subsidy in the sense of Article XVI of GATT 1994.

B. INTERPRETATION AND APPLICATION OF ANNEX I

1. Items (c), (d), (j) and (k)

(a) "Provided or mandated by governments"

428. The Appellate Body on *Canada – Dairy (Article 21.5 – New Zealand and US)* after observing that Article 9.1(c) of the *Agreement on Agriculture* does not require that payments be financed by virtue of government "mandate", or other "direction", but rather government "action", noted that in comparison, items (c), (d), (j) and (k) of the Illustrative List seemed to imply the need to find some type of government mandate in the context of determining the existence of a subsidy. The Appellate Body stated:

> "Article 9.1(c) of the *Agreement on Agriculture* may be contrasted with Article 9.1(e) of the *Agreement on Agriculture*, as well as with Article 1.1(a)(1)(iv) of the *SCM Agreement*, and items (c), (d), (j), and (k) of the Illustrative List of Export Subsidies (the 'Illustrative List') of the *SCM Agreement*. In these provisions, some kind of government mandate, direction, or control is an element of a subsidy provided through a third party."[588]

2. Item (d)

429. The Panel on *Brazil – Aircraft*, in a finding not subsequently addressed by the Appellate Body, described the test whether a measure is a prohibited export subsidy under item (d) as "a comparison of the terms and conditions of the goods or services being provided by the government with the terms and conditions that would otherwise be available *to the exporters receiving the alleged export subsidy*".[589] As a consequence, the Panel rejected the argument that the relevant test depends upon "whether the measure merely offsets advantages bestowed on competing products from another Member". The Panel noted that "the fact that a foreign competitor had access to the same goods or services on better terms than those available to the exporters in question would not be a defense".[590]

3. Items (e), (f), (g), (h) and (i)

430. Similarly to its finding with respect to item (d), the Panel on *Brazil – Aircraft*, in the context of items (e), (f), (g), (h) and (i), rejected the argument that whether a measure is a prohibited export subsidy should be decided based on whether the measure at issue merely serves to offset advantages bestowed on competing products from another Member.[591] Regarding items (e)

[588] Appellate Body Report on *Canada – Dairy (Article 21.5 – New Zealand and US II)*, footnote 113.
[589] Panel Report on *Brazil – Aircraft*, para. 7.25.
[590] Panel Report on *Brazil – Aircraft*, para. 7.25.
[591] Panel Report on *Brazil – Aircraft*, para. 7.25.

to (i), the Panel stated that "there is no hint that a tax advantage would not constitute an export subsidy simply because it reduced the exporter's tax burden to a level comparable to that of foreign competitors".[592]

4. Footnote 59 of Item (e)

(a) Fifth Sentence: "double taxation of foreign-source income"

(i) Scope of application

431. In the context of footnote 59, the Appellate Body in *US – FSC (Article 21.5 – EC)* considered that the fifth sentence of footnote 59 applies to measures taken by a Member to avoid taxation of income earned by a taxpayer of that Member in a foreign state:

> "'[D]ouble taxation' occurs when the same income, in the hands of the same taxpayer, is liable to tax in different States. The fifth sentence of footnote 59 applies to a measure taken by a Member to avoid such double taxation of 'foreign-source income'. In examining the phrase 'foreign-source income', we observe that, in ordinary usage, the word 'source' can refer to the place where a thing originates, and that the words 'source' and 'origin' can be synonyms. We consider, therefore, that the word 'source', in the context of the fifth sentence of footnote 59, has a meaning akin to 'origin' and refers to the place where the income is earned. This reading is supported by the combination of the words 'foreign' and 'source' as 'foreign' also refers to the place where the income is earned. Used in this way, the word 'foreign' indicates a source which is external to the Member adopting the measure at stake. Footnote 59, therefore, applies to measures taken by a Member to avoid the double taxation of income earned by a taxpayer of that Member in a 'foreign' State."[593]

(ii) Scope of discretion to avoid double taxation

432. The Appellate Body on *US – FSC* considered that Members have a discretion to avoid double taxation:

> "[I]t is 'implicit' in the requirement to use the arm's length principle that Members of the WTO are not obliged to tax foreign-source income, and also that Members may tax such income less than they tax domestic-source income. We would add that, even in the absence of footnote 59, Members of the WTO are *not* obliged, by WTO rules, to tax *any* categories of income, whether foreign- or domestic-source income. The United States argues that, since there is no requirement to tax export related foreign-source income, a government cannot be said to have 'foregone' revenue if it elects not to tax that income. It seems to us that, taken to its logical conclusion, this argument by the United States would mean that there could *never* be a foregoing of revenue 'otherwise due' because, in principle, under WTO law generally, *no* revenues are ever due and *no* revenue would, in this view, ever be 'foregone'. That cannot be the appropriate implication to draw from the requirement to use the arm's length principle."[594]

433. The Appellate Body on *US – FSC (Article 21.5 – EC)* noted that Members have the authority to determine their rules of taxation, provided they comply with WTO obligations. The Appellate Body upheld the Panel's findings that footnote 59 does not require Members to adopt particular legal standards to define when income is foreign-source for the purposes of their double taxation-avoidance measures and noted that footnote 59 does not give Members an unlimited discretion to avoid double taxation of "foreign-source income" through the grant of export subsidies. Accordingly, for the Appellate Body, the term "foreign-source income", as used in footnote 59, cannot be interpreted solely by reference to the rules of the Member taking the measure to avoid double taxation of foreign-source income:

> "It is, however, no easy matter to determine in every situation when income is susceptible of being taxed in two different States and, thus, when a Member may properly regard income as 'foreign-source income'. We have emphasized in previous appeals that Members have the sovereign authority to determine their own rules of taxation, provided that they respect their WTO obligations. Thus, subject to this important proviso, each Member is free to determine the rules it will use to identify the source of income and the fiscal consequences – to tax or not to tax the income – flowing from the identification of source. We see nothing in footnote 59 to the *SCM Agreement* which is intended to alter this situation. We, therefore, agree with the Panel that footnote 59 does not oblige Members to adopt any particular legal standard to determine whether income is foreign-source for the purposes of their double taxation-avoidance measures.
>
> At the same time, however, footnote 59 does not give Members an unfettered discretion to avoid double taxation of 'foreign-source income' through the grant of export subsidies. As the fifth sentence of footnote 59 to the *SCM Agreement* constitutes an exception to the prohibition on export subsidies, great care must be taken in defining its scope. If footnote 59 were interpreted to allow a Member to grant a fiscal preference for *any* income that a Member chooses to regard as foreign source, that reading would seriously undermine the prohibition on export subsidies in the *SCM Agreement*. That would allow Members, relying on whatever source rules they adopt, to grant fiscal export subsidies for income that may not actually be susceptible of being taxed in two jurisdictions. Accordingly, the term 'foreign-source

[592] Panel Report on *Brazil – Aircraft*, para. 7.25.
[593] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 137.
[594] Appellate Body Report on *US – FSC*, para. 98.

income', as used in footnote 59 cannot be interpreted by reference solely to the rules of the Member taking the measure to avoid double taxation of foreign-source income."[595]

(iii) Design, structure and architecture of double taxation to target foreign-source income

434. The Appellate Body on *US – FSC (Article 21.5 – EC)* also considered that measures falling under footnote 59 should not necessarily be "perfectly tailored" to the actual double tax burden, but that such measures must target "foreign-source income". Following the Panel's approach, the Appellate Body also examined the "design, structure and architecture" of the measures under consideration to determine if they fell under footnote 59.[596]

"The avoidance of double taxation is not an exact science. Indeed, the income exempted from taxation in the State of residence of the taxpayer might not be subject to a corresponding, or any, tax in a 'foreign' State. Yet, this does not necessarily mean that the measure is not taken to avoid double taxation of foreign-source income. Thus, we agree with the Panel, and the United States, that measures falling under footnote 59 are not required to be perfectly tailored to the actual double tax burden.

However, the fact that measures falling under footnote 59 to the *SCM Agreement* may grant a tax exemption even for income that is not taxed in another jurisdiction does not mean that such tax exemptions may be granted, under the fifth sentence of footnote 59, for *any* income. Footnote 59 prescribes that the income benefitting from a double taxation-avoidance measure must be 'foreign-source' and, as we have said, that means that the income must have links with a "foreign" State such that it could properly be subjected to tax in that State, as well as in the Member taking the double taxation-avoidance measure.

We also recognize that Members are not obliged by the covered agreements to provide relief from double taxation. Footnote 59 to the *SCM Agreement* simply preserves the prerogative of Members to grant such relief, at their discretion, for 'foreign-source income'. Accordingly, we do not believe that measures falling under footnote 59 must grant relief from *all* double tax burdens. Rather, Members retain the sovereign authority to determine for themselves whether, and to what extent, they will grant such relief."[597]

(b) "foreign-source income"

435. The Appellate Body on *US – FSC* analysed footnote 59 and rejected the argument that since there is no requirement to tax export-related foreign-source income, a decision not to tax that income cannot be said to constitute revenue "foregone." The Appellate Body noted that if it was to follow this approach, there could never be "a foregoing of revenue 'otherwise due'" because WTO law does not require the collection of any particular category of revenue. The Appellate Body considered that the arm's-length requirement in footnote 59 does not provide a solution because this principle operates independently of the choice that a Member makes on what categories of foreign-sourced income it will not tax or will tax less. The Appellate Body held:

"Furthermore, we do not believe that the requirement to use the arm's length principle resolves the issue that arises here. That issue is *not*, as the United States suggests, whether a Member is or is not obliged to tax a particular category of foreign-source income. As we have said, a Member is not, in general, under any such obligation. Rather, the issue in dispute is whether, *having decided to tax a particular category of foreign-source income*, namely foreign-source income that is 'effectively connected with a trade or business within the United States', the United States is *permitted to carve out an export contingent exemption from the category of foreign-source income that is taxed under its other rules of taxation*. Unlike the United States, we do not believe that the second sentence of footnote 59 addresses this question. It plainly does not do so expressly; neither, as far as we can see, does it do so by necessary implication. As the United States indicates, the arm's length principle operates when a Member chooses not to tax, or to tax less, certain categories of foreign-source income. However, the operation of the arm's length principle is unaffected by the choice a Member makes as to *which* categories of foreign-source income, if any, it will not tax, or will tax less. Likewise, the operation of the arm's length principle is unaffected by the choice a Member might make to grant exemptions from the generally applicable rules of taxation of foreign-source income that it has selected for itself. In short, the requirement to use the arm's length principle does not address the issue that arises here, nor does it authorize the type of export contingent tax exemption that we have just described. Thus, this sentence of footnote 59 does not mean that the FSC subsidies are not export subsidies within the meaning of Article 3.1(a) of the *SCM Agreement*."[598] (emphasis original)

436. For the Appellate Body in *US – FSC (Article 21.5 – EC)* the notion of "'foreign-source income', in footnote 59 to the *SCM Agreement*, refers to income

[595] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 139–140.

[596] The Panel on *US – FSC (Article 21.5 – EC)* held that the relationship between the measure and the purpose of avoiding the double taxation of foreign-source income must be "reasonably discernible". Panel report on *US – FSC (Article 21.5 – EC)*, para 8.95.

[597] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 146–148.

[598] Appellate Body Report on *US – FSC*, paras. 98–99.

generated by activities of a non-resident taxpayer in a 'foreign' State which have such links with that State so that the income could properly be subject to tax in that State".[599] The Appellate Body considered that the existence of a "foreign element" in itself does not necessarily indicate that "all" income from transactions covered by the measures under consideration constitute "foreign-source income". The Appellate Body concluded that in this case the methodology used did not accurately allocate covered income as foreign or domestic, with the result that the measure at stake "improperly combines domestic-source income and foreign-source income" in the calculation, causing it to "systematically" misallocate this income.[600] The Appellate Body held:

> "[T]he fact that a transaction involves some foreign element, such as the 'foreign economic process', does not necessarily mean that *all* of the income generated by such a transaction will be 'foreign-source income' within the meaning of footnote 59 to the *SCM Agreement*. . . . In our view, under footnote 59 to the *SCM Agreement*, the 'foreign-source income' arising in such a transaction is only that portion of the total income which is generated by and properly attributable to activities that do occur in a 'foreign' State.[601]
>
> . . .
>
> This reinforces our view that the approach embodied in the ETI measure can lead to very different allocations of income between domestic- and foreign-source in respect of precisely the same transaction. This implies to us that the different formulae for calculating QFTI result in a misallocation of income as between the domestic- and foreign-source and, through the election which the taxpayer can make between these formulae, allows the taxpayer to obtain the maximum benefit from the misallocation."[602]

(i) Recourse to international tax law

437. The Appellate Body on *US – FSC (Article 21.5 – EC)* acknowledged that in international tax law there is no agreed meaning for the term "foreign-source income" but that, on the basis of its recourse to international legal principles and its review of a number of bilateral and multilateral tax agreements, the term "foreign-source income" may be interpreted as follows:

> "Although there is no universally agreed meaning for the term 'foreign-source income' in international tax law, we observe that many States have adopted bilateral or multilateral treaties to address double taxation. . . .
>
> Although these instruments do not define 'foreign-source income' uniformly, it appears to us that certain widely recognized principles of taxation emerge from them. In seeking to give meaning to the term 'foreign-source income' in footnote 59 to the *SCM Agreement*, which is a tax-related provision in an international trade treaty, we believe that it is appropriate for us to derive assistance from these widely recognized principles which many States generally apply in the field of taxation. In identifying these principles, we bear in mind that the measure at issue seeks to address foreign-source income of United States citizens and residents – that is, income earned by these taxpayers in 'foreign' States where the taxpayers are not resident.
>
> We recognize, of course, that the detailed rules on taxation of non-residents differ considerably from State to State, with some States applying rules which may be more likely to tax the income of non-residents than the rules applied by other States. However, despite the differences, there seems to us to be a widely accepted common element to these rules. The common element is that a 'foreign' State will tax a non-resident on income which is generated by activities of the non-resident that have some link with that State. Thus, whether a 'foreign' State decides to tax non-residents on income generated by a permanent establishment or whether, absent such an establishment, it decides to tax a non-resident on income generated by the conduct of a trade or business on its territory, the 'foreign' State taxes a non-resident only on income generated by activities linked to the territory of that State. As a result of this link, the 'foreign' State treats the income in question as domestic-source, under its source rules, and taxes it. Conversely, where the income of a non-resident does not have any links with a 'foreign' State, it is widely accepted that the income will be subject to tax only in the taxpayer's State of residence, and that this income will not be subject to taxation by a 'foreign' State."[603]

(ii) Link between income of taxpayers and their activities in a foreign State

438. The Appellate Body on *US – FSC (Article 21.5 – EC)* noticed the need for a link between the taxpayer's income and their activities in a foreign State to establish

---

[599] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 145.

[600] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 154–156, 165–167, and 177–179.

[601] (*footnote original*) We note that Isenbergh states that, in the case of sale of goods by a producer, the income generated by the sales transaction is attributable to "easily distinguishable activities" which are "often combined", namely "production and sale" activities. Isenbergh indicates that in an international sales transaction, these production and sales activities may take place "in different countries". These activities, therefore, generate income that has different sources which are "compounded" unless the income from the different sources is separated. Isenbergh states that "ideally" the different "elements of the transaction" would be "disengaged" using arm's length pricing rules. The manufacturer would be treated as if it had sold the goods to an independent distributor at arm's length prices, who in turn resold the goods. This would "dissect" the transaction on the basis of the place where the different activities occurred. (J. Isenbergh, *supra*, footnote, Vol. I, para. 10.9, p. 10:16.)

[602] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 154 and 168.

[603] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 141–143.

whether there is a foreign source of income. The Appellate Body examined rules on foreign leasing and rental income and referred to additional aspects of the measures under consideration and considered that domestic-source income was improperly treated as exempt foreign-source income.[604] The Appellate Body took the view that:

> "[I]n the absence of an established link between the income of such taxpayers and their activities in a 'foreign' State, we do not believe that there is 'foreign-source income' within the meaning of footnote 59 of the *SCM Agreement*.
>
> . . . In our view, however, sales income cannot be regarded as 'foreign-source income', under footnote 59, for the sole reason that the property, subject-matter of the sale, is exported to another State, for use there. The mere fact that the buyer uses property outside the United States does not mean that the seller undertook activities in a 'foreign' State generating income there. Such an interpretation of footnote 59 would, in effect, allow Members to grant a tax exemption in favour of export-related income on the ground that the exportation by itself of the property renders the income 'foreign-source'. In our view, this reading would allow Members easily to evade the prohibition on export subsidies in Article 3.1(a) of the *SCM Agreement* and render this prohibition meaningless."[605]

439. The Appellate Body, in *US – FSC (Article 21.5 – EC)*, considered that the flexibility under footnote 59 does not properly extend to allowing Members to adopt allocation rules that systematically result in a tax exemption for income that has no connection with a "foreign" country and that would not be regarded as foreign-source:

> "We have said that avoiding double taxation is not an exact science and we recognize that Members must have a degree of flexibility in tackling double taxation. However, in our view, the flexibility under footnote 59 to the *SCM Agreement* does not properly extend to allowing Members to adopt allocation rules that systematically result in a tax exemption for income that has no link with a 'foreign' State and that would not be regarded as foreign-source under any of the widely accepted principles of taxation we have reviewed."[606]

(c) Burden of proof

440. The Appellate Body on *US – FSC* (*Article 21.5 – EC*) addressed the issue of the burden of proof under the fifth sentence of footnote 59 and upheld the findings of the Panel in this regard. In reviewing the Panel's findings, the Appellate Body considered whether the footnote provides the "proper scope" of the Article 3.1(a) obligations, or whether it determines an "exception" for a measure that is otherwise an export contingent subsidy.[607] The Appellate Body concluded that footnote 59 does not modify the scope of the definition of a "subsidy" in Article 1.1, the scope of item 1(e) of the Illustrative List, nor the meaning of export contingent subsidies under Article 3.1(a). The Appellate Body thus concluded that: (i) measures falling within the scope of footnote 59 may continue to be export subsidies under Article 1.1; and (ii) the fifth sentence of footnote 59 is an "exception" to the legal regime applicable to export subsidies under Article 3.1(a), by allowing Members to take or adopt measures to avoid the double-taxation of foreign-source income, while the latter may continue to be considered as export subsidies, within the meaning of Article 3.1(a). The Appellate Body also concluded that footnote 59 is an "affirmative defence" that may justify a prohibited export subsidy, and that the burden of proof is on the party invoking the exception:

> "We recall that, in the original proceedings in this dispute, we said that the fifth sentence of footnote 59 'does not purport to establish an exception to the general definition of a "subsidy" . . .'. Thus, a measure taken to avoid the double taxation of foreign-source income, falling within footnote 59, may be a 'subsidy' under the *SCM Agreement*.
>
> Article 3.1 of the *SCM Agreement* provides specific obligations with respect to two types of subsidy: subsidies contingent upon export performance and subsidies contingent upon the use of domestic over imported goods. Subsidies of these defined types are prohibited under Article 3 of the *SCM Agreement*. Item (e) of the Illustrative List identifies a particular measure which is deemed to be a prohibited export subsidy under Article 3.1(a).
>
> The fifth sentence of footnote 59 provides that item (e) 'is not intended to limit a Member from taking measures to avoid the double taxation of foreign-source income earned by its enterprises or the enterprises of another Member.' In the same way that we do not see the fifth sentence of footnote 59 as altering the scope of the definition of a 'subsidy' in Article 1.1 of the *SCM Agreement*, we do not see it as altering either the scope of item (e) of the Illustrative List or the meaning to be given to the term 'subsidies contingent . . . upon export performance' in Article 3.1(a) of the *SCM Agreement*. Thus, measures falling within the scope of this sentence of footnote 59 may continue to be export subsidies, much as they may continue to be subsidies under Article 1.1 of the *SCM Agreement*.

---

[604] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 169.

[605] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, paras. 175–176.

[606] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 185.

[607] Appellate Body Report on *US – FSC (Article 21.5 – EC)*, para. 128.

> The import of the fifth sentence of footnote 59 is that Members are entitled to 'take', or 'adopt' measures to avoid double taxation of foreign-source income, notwithstanding that they may be, in principle, export subsidies within the meaning of Article 3.1(a). The fifth sentence of footnote 59, therefore, constitutes an exception to the legal regime applicable to export subsidies under Article 3.1(a) by explicitly providing that when a measure is taken to avoid the double taxation of foreign-source income, a Member is entitled to adopt it.
>
> Accordingly, as we indicated in *US – FSC*, the fifth sentence of footnote 59 constitutes an affirmative defence that justifies a prohibited export subsidy when the measure in question is taken 'to avoid the double taxation of foreign-source income'.[608] In such a situation, the burden of proving that a measure is justified by falling within the scope of the fifth sentence of footnote 59 rests upon the responding party."[609]

(d) Relationship with other Articles

441. With respect to the relationship between footnote 59 and Article 3.1(a), see paragraphs 118 and 120 above.

5. Item (j)

442. In *Canada – Aircraft Credits and Guarantees*, the Panel concluded that in its view, "item (j) sets out the circumstances in which the grant of loan guarantees is *per se* deemed to be an export subsidy . . . Item (j) certainly does not provide . . . that all loan guarantees are *per se* prohibited by item (j)."[610]

6. Item (k)

(a) First paragraph of item (k) – "material advantage" clause

(i) General

443. In both *Brazil – Aircraft* and *Brazil – Aircraft (Article 21.5 – Canada)*, Brazil asserted that the first paragraph of item (k) could be interpreted in an *a contrario* manner, so as to establish that subsidies constituting "payments", "of all or part of the costs incurred by exporters or financial institutions in obtaining credits", but which were *not* "used to secure a material advantage in the field of export credit terms", would not be prohibited export subsidies within the meaning of Article 3.1(a). The Appellate Body on *Brazil – Aircraft* did not follow the Panel's findings to the extent that it did not make an explicit finding on whether or not it was permissible to use item (k) in an *a contrario* manner. Rather, the Appellate Body found that Brazil had not met its burden of proof of showing that the PROEX payments were not used to secure a material advantage in the field of export credit terms. In *Brazil – Aircraft (Article 21.5 – Canada)*, the Appellate Body made the same finding about the revised PROEX programme. In this report, however, the Appellate Body made an additional statement:

> "If Brazil had demonstrated that the payments made under the revised PROEX were not 'used to secure a material advantage in the field of export credit terms', and that such payments were 'payments' by Brazil of 'all or part of the costs incurred by exporters or financial institutions in obtaining credits', then we would have been prepared to find that the payments made under the revised PROEX are justified under item (k) of the Illustrative List. However, Brazil has not demonstrated that those conditions of item (k) are met in this case. In making this observation, we wish to emphasize that we are not interpreting footnote 5 of the *SCM Agreement*, and we do not opine on the scope of footnote 5, or on the meaning of any other items in the Illustrative List.
>
> However, we do not believe it is necessary for us to rule on these general questions in order to resolve this dispute. We, therefore, hold that the Article 21.5 Panel's finding that 'the first paragraph of item (k) cannot be used to establish that a subsidy which is contingent upon export performance within the meaning of Article 3.1(a) is "permitted"' is moot, and, thus, is of no legal effect."[611]

(ii) "payments of all or part of the costs incurred by exporters or financial institutions in obtaining credits"

444. In interpreting the phrase "payments of all or part of the costs incurred by exporters or financial institutions in obtaining credits", the Panel on *Brazil – Aircraft (Article 21.5 – Canada)* started with the ordinary meaning of the terms and opined that "the word 'credits' refers to 'export credits' as used earlier in the paragraph. Next, it also found that the costs involved must relate to *obtaining* export credits, not to providing them."[612] Finally, the Panel rejected an argument by Brazil that cost incurred by a financial institution in raising capital could be equated with the cost of "obtaining" export credits.[613] The Appellate Body on *Brazil – Aircraft (Article 21.5 – Canada)* did not believe that it was necessary to examine this issue (the Appellate Body had found that Brazil had not proven that the PROEX interest equalization payments were *not* used to secure a material advantage) and therefore did not address the Panel's findings. The Appellate Body stated that "These find-

613 Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 6.72.

ings of the Article 21.5 Panel are moot, and, thus, of no legal effect."[614] The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* reached the same conclusion as the Panel on *Brazil – Aircraft (Article 21.5 – Canada)* on this matter.[615]

445. With respect to the term "export credit practice" under the second paragraph of item (k), see paragraph 460 below.

(iii) "used to secure a material advantage"

General

446. The Panel on *Brazil – Aircraft* opined that a payment is used to "secure a material advantage in the field of export credit terms" when it provides the recipient with export credits on terms which are more favourable than those available in the absence of such payments, i.e. in the "marketplace". The Panel considered it "evident that PROEX payments result in the availability of export credit for Brazilian regional aircraft on terms which are more favourable than the terms that would otherwise be available with respect to the transaction in question".[616] In this context, the Panel on *Brazil – Aircraft* also recalled a statement by Brazil to the effect that PROEX would presumably always be more favourable to the purchaser than the terms it could obtain on its own.[617] However, the Appellate Body in *Brazil – Aircraft* rejected this interpretation by the Panel of the phrase "used to secure a material advantage".

"material"

447. More specifically, the Appellate Body in *Brazil – Aircraft* criticized the Panel for not adequately considering the term "material" and disagreed with equating the term "material advantage" under item (k) of the Illustrative List to the term "benefit" under Article 1.1(b):

> "We agree with the Panel's statement that the ordinary meaning of the word 'advantage' is 'a more favorable or improved position' or a 'superior position'. However, we note that item (k) does not refer simply to 'advantage'. The word 'advantage' is qualified by the adjective 'material'. As mentioned before, in its ultimate interpretation of the phrase 'used to secure a material advantage' which the Panel finally adopted and applied to the export subsidies for regional aircraft under PROEX, the Panel read the word 'material' out of item (k). This we consider to be an error.
>
> . . .
>
> We note that the Panel adopted an interpretation of the 'material advantage' clause in item (k) of the Illustrative List that is, in effect, the same as the interpretation of the term 'benefit' in Article 1.1(b) . . . . If the 'material advantage' clause in item (k) is to have *any* meaning, it must mean something different from 'benefit' in Article 1.1(b). It will be recalled that for any payment to be a 'subsidy' within the meaning of Article 1.1, that payment must consist of both a 'financial contribution' and a 'benefit'. The first paragraph of item (k) describes a type of subsidy that is deemed to be a prohibited export subsidy. Obviously, when a payment by a government constitutes a 'financial contribution' and confers a 'benefit', it is a 'subsidy' under Article 1.1. Thus, the phrase in item (k), 'in so far as they are used to secure a material advantage', would have no meaning if it were simply to be equated with the term 'benefit' in the definition of 'subsidy'. As a matter of treaty interpretation, this cannot be so. Therefore, we consider it an error to interpret the 'material advantage' clause in item (k) of the Illustrative List as meaning the same as the term 'benefit' in Article 1.1(b) of the *SCM Agreement*."[618]

Commercial Interest Reference Rate (CIRR) as market benchmark

448. Rather than considering the terms of export credits available to a purchaser in the absence of the PROEX interest equalization payments, the Appellate Body in *Brazil – Aircraft* held that the determination of whether a payment is "used to secure a material advantage" implies a comparison between the export credit terms available under the measure at issue and some other "market benchmark". The Appellate Body further viewed the second paragraph of item (k) as "useful context for interpreting the 'material advantage' clause in the text of the first paragraph".[619] In this respect, the Appellate Body stated that the Commercial Interest Reference Rate (the "CIRR"), defined in the Arrangement on Guidelines for Officially Supported Export Credits (the "OECD Arrangement"), could be "appropriately viewed as … a market benchmark" for assessing whether a payment "is used to secure a material advantage".[620]

449. The Appellate Body on *Brazil – Aircraft (Article 21.5 – Canada)* agreed with the Panel that a Member may under the first paragraph of item (k), as interpreted by the Appellate Body, establish that a payment is not used to secure a material advantage in the field of export credit terms, *even if it resulted in a below-CIRR interest rate.*[621] The Appellate Body then set forth the manner in which Brazil could prove that the PROEX interest

[620] Appellate Body Report on *Brazil – Aircraft*, para. 181.
[621] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, para. 63. See also Panel Report on *Brazil – Aircraft (Article 21.5 – Canada)*, paras. 6.84 and 6.92.

equalization payments did *not* secure a material advantage to Brazilian exporters:

> "To establish that subsidies under the revised PROEX are not 'used to secure a material advantage in the field of export credit terms', Brazil must prove *either*: that the net interest rates under the revised PROEX are at or above the relevant CIRR, the specific 'market benchmark' we identified in the original dispute as an 'appropriate' basis for comparison; *or*, that an alternative 'market benchmark', other than the CIRR, is appropriate, and that the net interest rates under the revised PROEX are at or above this alternative 'market benchmark'.
>
> . . . Brazil contends . . . that the revised PROEX is *not* 'used to secure a material advantage in the field of export credit terms' within the meaning of the first paragraph of item (k) of the Illustrative List.
>
> To prove this argument, Brazil must establish *both* of two elements: first, Brazil must prove that it has identified an appropriate 'market benchmark'; and, second, Brazil must prove that the net interest rates under the revised PROEX are at or above that benchmark."[622]

450. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)*, first interpreted the "material advantage" clause by referring to the Appellate Body report in *Brazil – Aircraft (Article 21.5 – Canada)* (see paragraph 449 above). The Panel concluded that if Brazil wanted to establish that the programme's payments were not used to secure a "material advantage", by reference to the CIRR, Brazil must show that export credits supported by PROEX III respect the CIRR and the applicable rules of the OECD Arrangement which relate to the application of the CIRR.[623] The Panel further held:

> "It could be argued that this interpretation of the 'material advantage' clause in effect re-creates in the first paragraph of item (k) the standard already provided for in the second paragraph of item (k), at least insofar as the interest rate benchmark used under the first paragraph of item (k) is the CIRR.[624] However, this is an unavoidable implication of the Appellate Body's adoption of the CIRR as an appropriate benchmark for determining the existence of a material advantage. . . . To the extent that the first paragraph of item (k) could be used *a contrario* to establish that a payment that is not used to secure a material advantage is not prohibited – an issue addressed below – we would, in other words, not only have re-created a safe haven in the first paragraph, but, in fact, would have deprived the second paragraph of *all* useful effect with respect to the export credit practices at issue in the first paragraph."[625]

451. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* found that given the nature of the CIRR as a constructed interest rate, a Member may also attempt to demonstrate that a rate *below* the CIRR would, at a particular point in time, constitute a more appropriate benchmark.[626] In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel further indicated that "to establish that PROEX III is not used to secure a material advantage in the field of export credit terms, Brazil must either: (i) demonstrate conformity with the relevant CIRR as well as with all those rules of the 1998 *OECD Arrangement* which operate to support or reinforce the CIRR; or (ii) identify an appropriate 'market benchmark', other than the CIRR, and establish that net interest rates resulting from PROEX III support are at or above that alternative 'market benchmark'".[627]

(b) First paragraph of item (k) as an affirmative defence

452. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* incorporated by reference its reasoning in *Brazil – Aircraft (Article 21.5 – Canada)* into its analysis and remained of the view that the relationship between the Illustrative List and Article 3.1(a) is governed by footnote 5 to the SCM Agreement, and that the first paragraph of item (k) does not "refer to" any measures as "not constituting export subsidies" within the meaning of the footnote as an affirmative defence. On this basis, the Panel concluded that the first paragraph of item (k) cannot, as a legal matter, provide an affirmative defence to a violation of Article 3.1(a).[628] As regards the use of the second paragraph see paragraph 472 below.

(c) Second paragraph of item (k) – "the safe haven"

(i) General

453. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)* set forth the propositions that a Member would need to prove in order to qualify, with respect to specific individual transactions, for the "safe haven" provided under the second paragraph of item (k):

> "[F]irst, it would need to be determined that the transaction was in the form of either direct credits/financing,

---

[622] Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)*, paras. 67–69.

[623] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.234–5.252

[624] (*footnote original*) See Article 21.5 Panel Report on *Brazil – Aircraft*, *supra*, para. 6.87. Of course, the second paragraph of item (k) is broader in scope than the first paragraph of item (k), which only refers to two types of export credit practices. To that extent, the second paragraph of item (k) retains independent meaning also on our interpretation of the "material advantage" clause.

[625] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.251.

[626] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.265.

[627] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.266.

[628] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.272–5.275.

refinancing or interest rate support with repayment terms of at least two years, at fixed interest rates, and therefore was subject to the *Arrangement* generally and to the CIRRs (or a sector-specific minimum interest rate, if applicable) specifically. Second, it would need to be determined whether the interest rate was at or above the CIRR (or the applicable sector-specific rate). Third, it would need to be determined which of the other provisions of the *Arrangement* that operate to reinforce the minimum interest rate rule applied to that particular transaction (a determination that would need to be made on a case-by-case, transaction-specific basis). Fourth, the details of the transaction would need to be examined to determine whether or not it respected all such additional provisions, and did not involve any derogations or matching of derogations."[629]

(d) "in the field of export credit terms"

454. With respect to the phrase "in the field of export credit terms", the Panel on *Brazil – Aircraft* held that in its ordinary meaning, that phrase would refer to "items directly related to export credits, such as interest rates, grace periods, transaction costs, maturities and the like".[630] Furthermore, the Panel opined that the term "field of export credit terms" did not encompass the price at which a product is sold.[631] Although the Appellate Body in *Brazil – Aircraft* made no specific reference to this statement by the Panel, it rejected the Panel's interpretation of the phrase "used to secure a material advantage"[632] which was made in the same context as the above statements on the term "in the field of export credit terms".[633]

(e) "international undertaking on official export credits"

455. In *Canada – Aircraft (Article 21.5 – Brazil)*, Canada claimed that as part of the revision of its subsidies programmes following the Appellate Body Report on *Canada – Aircraft*, it had implemented a new policy guideline for its Canada Account financing under which "any financing which does not comply with the OECD Arrangement would not be in the national interest". Canada argued that compliance with the OECD Arrangement meant that such financing would not be a prohibited export subsidy, according to the second paragraph of item (k). Although the Panel – whose report was not appealed – ultimately found against Canada, it did agree that the OECD Arrangement was an "international undertaking on official export credits" within the meaning of item (k):

> "[I]t is well accepted that the *OECD Arrangement* is an 'international undertaking on official export credits' in the sense of the second paragraph of item (k). Moreover, in practice the *OECD Arrangement* is at present the only international undertaking that fits this description. Thus, we understand the essence of the second paragraph of item (k) at least at present to be that 'an export credit practice' which is in 'conformity' with 'the interest rates provisions' of the *OECD Arrangement* 'shall not be considered an export subsidy prohibited by' the SCM Agreement."[634]

(f) "a successor undertaking"

456. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel had to decide which was the "successor undertaking" to the 1979 OECD Arrangement, i.e. the 1992 or 1998 version. The Panel started by interpreting the terms of "has been adopted" and concluded that it referred to the present of the addressees of the *SCM Agreement* rather than to an act of adoption prior to the entry into force of the *SCM Agreement*:

> "The parties differ, however, regarding whether the relevant 'successor undertaking' is the 1992 version of the *OECD Arrangement* or the 1998 version.
>
> . . .
>
> In interpreting the phrase 'a successor undertaking which has been adopted [. . .]', we focus first on the language 'has been adopted'. Brazil attaches great importance to the fact that that language is in the present perfect tense. The present perfect tense, Brazil maintains, refers to a time regarded as present. We agree. Brazil goes on to argue, however, that the relevant present is the time when the *SCM Agreement* entered into force. From this Brazil concludes that only those successor undertakings which had been adopted before the entry into force of the *SCM Agreement* are, textually, within the scope of the second paragraph of item (k). We are not persuaded by that view.
>
> It should be noted, moreover, that, on our interpretation, the language 'has been adopted' retains meaning and effect. Thus, the use of the present perfect tense tells Members that any time they seek to determine the relevant successor undertaking, they should consider only those successor undertakings which, at that time, have been adopted by the relevant OECD Members. In other words, Members are not allowed to rely on, nor are they bound by, the relevant provisions of a successor undertaking which has *not yet* been formally accepted by the relevant OECD Members. A successor undertaking which is merely being proposed for adoption or which exists only in draft form could not, therefore, constitute a successor undertaking which 'has been adopted'.

[629] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.153.
[630] Panel Report on *Brazil – Aircraft*, para. 7.28.
[631] Panel Report on *Brazil – Aircraft*, para. 7.28.
[632] Appellate Body Report on *Brazil – Aircraft*, para. 186.
[633] Appellate Body Report on *Brazil – Aircraft*, para. 286.
[634] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.78.

> On the basis of the foregoing considerations, we find that the phrase 'has been adopted' is properly read as referring to the present of its addressees rather than as referring to an act of adoption prior to the entry into force of the *SCM Agreement*, i.e. prior to 1 January 1995."[635]

457. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel continued its analysis by interpreting the term "successor undertaking" and concluded that the relevant successor undertaking was the most recent one, provided that it had been adopted. The Panel then found that the most recent adopted successor undertaking was the 1998 OECD Arrangement:

> "Turning next to the term 'successor undertaking', we note that, in its ordinary meaning, this term refers to an undertaking which 'succeeds [i.e. follows] another in [. . .] function'.[636] There can be no question, in our view, that both the 1992 and the 1998 version of the *OECD Arrangement* constitute 'successor' undertakings *to the OECD Arrangement in effect in 1979*.[637] It should be pointed out, in this regard, that the 1998 *OECD Arrangement* is the latest adopted version of the *OECD Arrangement* and, as such, is currently in effect, whereas the 1992 *OECD Arrangement* is no longer in effect. This raises the question of which successor undertaking is the *relevant* successor undertaking if there is more than one. The text of the second paragraph of item (k) does not explicitly answer that question.[638]
>
> We consider that the relevant successor undertaking is the *most recent* successor undertaking which has been adopted. It would not, in our view, have been rational for the drafters to consider, *without specifying so*, that, say, the fifth successor undertaking should be the relevant one. Indeed, the fact that the drafters used the simple and unqualified term "a successor undertaking" strongly suggests to us that they intended to incorporate, and thus give effect to, the relevant provisions of *all* adopted successor undertakings. This, however, would not logically be possible, unless effect is given also to the changes introduced by the most recent successor undertaking. On that basis, we find that, in the absence of other textual directives, the most recent successor undertaking is the relevant benchmark undertaking for purposes of the second paragraph of item (k), subject to the one condition that it must have been adopted.
>
> . . .
>
> In view of the foregoing, we conclude that the 'successor undertaking' at issue in the second paragraph of item (k) is the most recent successor undertaking which has been adopted prior to the time that the second paragraph is considered. For purposes of these proceedings, we conclude that the most recent successor undertaking which has been adopted is the 1998 *OECD Arrangement*.[639]"[640]

(g) OECD Arrangement

458. Considering that "in practice eligibility for item (k)'s safe haven from the prohibition on export subsidies is defined entirely in terms of the OECD Arrangement, at least for the time being",[641] the Panel on *Canada – Aircraft (Article 21.5 – Brazil)* stated the following:

> "We take note of the reference to 'a successor undertaking' in the second paragraph of item (k). In this regard, first, it is clear from this reference that to the extent that the [OECD] *Arrangement* today is the only undertaking of the kind referred to in the second paragraph of item (k), if in the future a 'successor undertaking' were to take effect, export credit practices conforming with the interest rate provisions of that undertaking also would be eligible for the safe haven in that paragraph. Thus, our detailed analysis of the *Arrangement* in its *present* form is not in any way intended to exclude this possibility. Second, for purposes of our analysis of the *Arrangement,* we assume that the *Sector Understandings* on Export Credits for Ships, for Nuclear Power Plant, and for Civil Aircraft, contained in Annexes I–III of the *Arrangement*, form an integral part of the *Arrangement* itself. Even if in the strict sense this were not the case (an issue that we do not here decide), in our view these *Sector Understandings* at a minimum would constitute 'successor undertakings' in the sense of the second paragraph of item (k), as the *Arrangement* as originally implemented in 1979 did not contain these Annexes. . . . The *Sector Understandings* were negotiated and implemented later, and incorporate by reference provisions of the *Arrangement*. Thus, if they are not formally integral to the *Arrangement*, there is no doubt that these *Understandings* at a minimum constitute successor undertakings, and thus, conformity with the 'interest rates provisions' of the *Understandings* would qualify an export credit practice for the safe haven in the second paragraph of item (k)."[642]

[635] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, paras. 5.73 and 5.75–5.79.

[636] (*footnote original*) The New Shorter Oxford English Dictionary, Vol. II, Oxford (1993), pp. 3127 and 3128.

[637] (*footnote original*) For the 1998 *OECD Arrangement*, see its Introduction, p. 7 ("Status").

[638] (*footnote original*) It is clear to us, however, that the drafters could not have left the addressees of the second paragraph free to choose among different successor undertakings. Were it otherwise, complainants could select the strictest successor undertaking with as much justification as respondents could select the most generous successor undertaking. The second paragraph would then fail to do what it is there to do, i.e. to inform Members regarding what their rights and obligations are.

[639] (*footnote original*) It should be reiterated here that the 1992 *OECD Arrangement* is no longer in effect.

[640] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.80–5.81 and 5.83.

[641] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.79.

[642] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.78, footnote 69.

459. As regards the discussion on whether the relevant successor undertaking to the 1979 OECD Arrangement was the 1992 or 1998 version, see paragraphs 456–457 above.

(h) "export credit practice"

460. In the context of Canada's defence under the second paragraph of item (k), the Panel on *Canada – Aircraft (Article 21.5 – Brazil)* considered that the phrase "export credit practice", must, in its ordinary meaning, be a relatively broad term.[643] The Panel, whose report was not appealed, continued:

> "[T]his term on its own suggests any practices that might be associated in some way with export credits (i.e., export financing). This certainly would involve export credits as such, but presumably other sorts of practices as well. The first paragraph of item (k) provides useful context in this regard. In particular, we note that the first paragraph refers exclusively to 'export credits' and 'credits', in contrast to the second paragraph's reference to 'export credit practices'. This supports the conclusion that the second paragraph of item (k) concerns a *broader* range of 'practices' than export credits as such."[644]

461. Following an analysis of the provisions of the OECD Arrangement, the Panel on *Canada – Aircraft (Article 21.5 – Brazil)* concluded that at the time of the dispute, only export credit practices in certain forms qualified for the "safe haven" under the second paragraph of item (k). Specifically, the Panel held that practices involving floating interest rates or support for export credits with shorter maturity were not eligible for this exception:

> "[T]he safe haven in the second paragraph of item (k) at present is potentially available *only* to export credit practices in the form of direct credits/financing, refinancing, and interest rate support at fixed interest rates with repayment terms of two years or more. In other words, any such practices involving floating interest rates, as well as official support for export credits with shorter maturity or in the forms of guarantees and insurance, because none are *subject to* the *Arrangement*'s 'interest rates provisions', most especially the CIRR but also the sector-specific minimum interest rates in the *Sector Understandings*, would not be eligible for the safe haven, as it simply would not be possible to judge their 'conformity' with the relevant interest rate provisions of the *Arrangement*, all of which pertain exclusively to fixed rates."[645]

462. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* held that based on "a reading which gives meaning to all of the terms used, the second paragraph suggests that export credit practices which are in conformity with the interest rates provisions of the relevant international undertaking *are* export subsidies – and, as such, would normally be prohibited under the provisions of Article 3 of the *SCM Agreement* –, but that they are nevertheless not *prohibited* under the *SCM Agreement*".[646]

463. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)*, in a finding upheld by the Appellate Body, considered that if "the second paragraph of item (k) makes available an exception, it must be possible to invoke it as an affirmative defence to a claim of violation.[647]"[648] See also paragraph 472 below.

(i) "in conformity" with "interest rates provisions"

(i) "interest rate provisions"

464. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel recalled that the only export credit practices that are subject to the OECD Arrangement are those which take the form of "official financing support", *i.e.*, "direct credits/financing, refinancing and interest rate support". Therefore, the Panel considered whether PROEX III payments are "official financing support". In this regard, the Panel noted that the OECD Arrangement does not define the term "interest rate support", but merely states that "interest rate support" is a form of official financing support. It concluded that official interest rate support will normally involve government payments to providers of export credits, and that for such payments to amount to "support", they need to be made with the "aim or effect of securing net borrowing rates for the recipients of export credits which are below those that they would have been without an official financing support":

> "The Panel notes that the 1998 *OECD Arrangement* does not define the term 'interest rate support'. It merely states that 'interest rate support' is a form of official financing support. Since the 1998 *OECD Arrangement* does not give a special meaning to the term 'interest rate support', we must read it in accordance with its ordinary meaning in context.

[644] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.80. See also Panel Report on *Canada – Aircraft (Article 21.5 – Canada II)*, paras. 5.65–5.66.

[645] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.106.

[646] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.61.

[647] (*footnote original*) See the Appellate Body Report on *United States – Measure Affecting Imports of Woven Wool Shirts and Blouses from India*, adopted 23 May 1997, WT/DS33/AB/R, p. 16; Article 21.5 Appellate Body Report on *Brazil – Aircraft*, *supra*, para. 66.

[648] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.63.

> We consider that, in its ordinary meaning, the term 'interest rate support' relates broadly to official support for one particular export credit term, namely the interest rate to be paid in connection with export credits. Moreover, as a matter of relevant context, it is clear from the 1998 *OECD Arrangement* that interest rate support is distinct from direct credits/financing, refinancing, export credit insurance and guarantees. From this it may be deduced that official interest rate support will normally involve government payments to providers of export credits. For such payments to amount to 'support', we think they need to be made with the aim or effect of securing net borrowing rates for the recipients of export credits which are lower than they would have been in the absence of official financing support."[649]

465. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* followed the interpretation of the Panel on *Canada – Aircraft (Article 21.5 – Brazil)* (see paragraph 466 below) and concluded that certain provisions of the OECD Arrangement explicitly pertain to interest rates as such. The Panel observed that the programme under consideration provided, *inter alia*, support for interest rates ("financing costs"), involved payments by the Brazilian Government to commercial providers of export credits, and was framed to lower the net interest rates charged by commercial lenders so that they were compatible with the interest rates in the international market. The Panel concluded that the programme support constituted "interest rate support", and was therefore an export credit practice subject to the interest rates provisions of the OECD Arrangement.[650]

(ii) "in conformity"

General

466. With respect to conformity with the interest rate provisions of export credit practices under the OECD Arrangement, the Panel on *Canada – Aircraft (Article 21.5 – Brazil)* concluded that "full conformity with the 'interest rates provisions' – in respect of 'export credit practices' subject to the CIRR – must be judged on the basis not only of full conformity with the CIRR but in addition full adherence to the other rules of the [OECD] *Arrangement* that operate to support or reinforce the minimum interest rate rule by limiting the generosity of the terms of official financing support".[651, 652]

"Concept of conformity" under the OECD Arrangement

467. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)* considered that the text of the OECD Arrangement provides the following guidance on how the term "conformity" should be understood:

> "In the first place, the *Arrangement* text provides explicitly that derogations from provisions of the *Arrangement*, and the matching of such derogations, do not 'conform' with the provisions of the *Arrangement*. Thus, any transaction that involves derogations or matching of derogations by definition cannot be in conformity with the *interest rate provisions* of the *Arrangement*, as . . . conformity with the interest rate provisions requires conformity not just with the minimum interest rate rule but also with the other provisions that support/reinforce that rule. As such, an otherwise eligible transaction involving derogations or matching of derogations could not qualify for the safe haven of the second paragraph of item (k). On the other hand, the *Arrangement* explicitly defines permitted exceptions and the matching of permitted exceptions, within the allowed limits, to be in compliance, i.e., in conformity with the relevant provisions of the *Arrangement*. Therefore, . . . making use of permitted exceptions, within the specified limits, would not disqualify an eligible transaction from the safe haven, so long as the transaction conformed with the minimum interest rate and all of the other applicable disciplines."[653]

468. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)* found that the Canadian Policy Guideline did not qualify for the "safe haven" under the second paragraph of item (k) of the Illustrative List. The Panel first held that it was "incumbent upon Canada to provide an explanation not only of what in its view constituted conformity with the interest rate provisions of the *OECD Arrangement*, but also how the Policy Guideline ensured such conformity".[654] The Panel then turned to the Policy Guideline and found:

> "[E]ven if the Policy Guideline contained all of the details that Canada has provided in its arguments concerning 'conformity' with the 'interest rates provisions' of the *Arrangement*, we would find on substantive grounds that it would not ensure that future Canada Account transactions would so conform. We note, however, that in fact the Policy Guideline contains no details at all, but simply indicates that transactions that 'do not comply' with 'the OECD Arrangement' will not be considered to be in the national interest. Thus, we find that the Policy Guideline is insufficient to accomplish what Canada says it will accomplish, namely to 'ensure that any future Canada Account financing transactions will be in conformity with the interest rate provisions of the [OECD] Arrangement and therefore the provisions referred to in the second paragraph of item (k)'.

---

[649] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.131–132.
[650] *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.133–134.
[651] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.114.
[652] The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* followed the interpretation of the Panel in *Canada – Aircraft (Article 21.5 – Brazil)*.
[653] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.126.
[654] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.142.

> In particular, the Policy Guideline is both generally worded and worded in the negative. In both of these aspects it seems to fall considerably short of what might reasonably be considered the minimum sufficient assurance which Canada wishes to provide. Concerning the generality of the wording, as just noted, the Policy Guideline simply refers to compliance with the *OECD Arrangement*. As has been discussed in detail, however, general conformity with whichever provisions of the *Arrangement* happen to apply to a given transaction would not appear to be sufficient to qualify for the relatively narrow safe haven in the second paragraph of item (k). Rather, only conformity with the *Arrangement*'s interest rate provisions, *which presupposes that those provisions apply* (i.e., that the practice in question is in the form of official financing support at fixed interest rates), along with conformity with the *Arrangement*'s other disciplines on financing terms, would qualify a practice for the safe haven."[655]

(j) Burden of proof

469. The Appellate Body Report on *Brazil – Aircraft (Article 21.5 – Canada)* found that "Brazil's argument under item (k) constituted an alleged 'affirmative defence' for which Brazil bore the burden of proof".[656] Referring to its report on *US – Wool Shirts and Blouses*, the Appellate Body confirmed that Brazil, as the party asserting a defence, bore the burden of proof of proving that the revised PROEX was justified under the first paragraph of item (k). (However, as noted in paragraph 443 above, the Appellate Body in *Brazil – Aircraft (Article 21.5 – Canada)* did not make a finding on whether the first paragraph of item (k) could in fact be used in an *a contrario* manner as an affirmative defence.) The Appellate Body then set forth in what manner Brazil could successfully prove that the revised subsidies scheme was not "used to secure a material advantage in the field of export credit terms":

> "To establish that subsidies under the revised PROEX are not 'used to secure a material advantage in the field of export credit terms', Brazil must prove *either*: that the net interest rates under the revised PROEX are at or above the relevant CIRR, the specific 'market benchmark' we identified in the original dispute as an 'appropriate' basis for comparison; *or*, that an alternative 'market benchmark', other than the CIRR, is appropriate, and that the net interest rates under the revised PROEX are at or above this alternative 'market benchmark'."[657]

470. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)* did not state explicitly that Canada bore the burden of proving that its measure qualified for the "safe haven" clause under the second paragraph of item (k) of the Illustrative List. However, the Panel termed Canada's invocation of the second paragraph of item (k) a "defence to Brazil's claim".[658]

471. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* concluded that, while the programme as such allows the Member to make payments in such a way that they do not secure a material advantage in the field of export credit terms, payments under the programme are not the payment by the Member of "all or part of the costs incurred by exporters or financial institutions in obtaining credits". Therefore, the Panel considered that the Member failed to demonstrate the required elements for its defence under the first paragraph of item (k):

> "[W]hile PROEX III, as such, allows Brazil to make PROEX III payments in such a way that they do not secure a material advantage in the field of export credit terms, PROEX III payments are not the payment by Brazil of 'all or part of the costs incurred by exporters or financial institutions in obtaining credits'. Brazil has, therefore, failed to demonstrate the required elements for its defence under the first paragraph of item (k). We have further concluded that, in any event, the first paragraph of item (k) cannot, as a legal matter, be invoked as an affirmative defence."[659]

(i) Second paragraph of item (k) as an affirmative defence

472. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel noted that the second paragraph of item (k) provides for an "exception" from any prohibition on export subsidies, such that it may be invoked as an affirmative defence to a claim of violation:

> "On a reading which gives meaning to all of the terms used, the second paragraph suggests that export credit practices which are in conformity with the interest rates provisions of the relevant international undertaking *are* export subsidies – and, as such, would normally be prohibited under the provisions of Article 3 of the *SCM Agreement* –, but that they are nevertheless not *prohibited* under the *SCM Agreement*.
>
> This interpretation leads us to the conclusion that the second paragraph of item (k) provides for an exception from any prohibition on export subsidies laid down elsewhere in the *SCM Agreement*. The fact that the second paragraph does not, itself, impose *obligations* supports that conclusion.
>
> Consistently with our view that the second paragraph of item (k) makes available an exception, it must be possible to invoke it as an affirmative defence to a claim of

[655] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, paras. 5.143–5.144.
[656] Appellate Body Report on *Brazil – Aircraft*, para. 65.

[658] Panel Report on *Canada – Aircraft (Article 21.5 – Brazil)*, para. 5.73.
[659] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.276.

violation. As is clear from relevant WTO jurisprudence, the burden of establishing an affirmative defence rests with the party raising it.[660]"[661]

(ii) "Matching of a derogation"

General

473. The Panel on *Canada – Aircraft (Article 21.5 – Brazil)* considered that: "Members' conformity with GATT/WTO rules [should not be] defined by the behaviour of non-Members". The Panel considered that this concern would arise even if the inclusion of the matching of a derogation in the item (k) safe haven would mean that matching Members were acting in accordance with their WTO obligations. This is because the inclusion of the matching of a derogation in the item (k) safe haven would not establish any objective benchmark against which to determine whether or not a Member is in accordance with its WTO obligations. In any given case, the benchmark would be set by reference to the terms and conditions of the non-conforming offer. To the extent that the non-conforming offer were made by a non-WTO Member, the benchmark for determining whether or not a matching Member acts in accordance with its WTO obligations would therefore be the non-conforming terms and conditions offered by the non-Member. Thus, the fact that the matching of a derogation is included in the second paragraph of item (k) would not remove the potential for a "Member's conformity with GATT/WTO rules [to be] defined by the behaviour of non-Members".[662]

474. The Panel on *Canada – Aircraft Credits and Guarantees* concluded that, as a matter of law, the matching of a derogation is not "in conformity with" the interest rates provisions of the OECD Arrangement and therefore cannot fall within the scope of the item (k) safe haven.[663] The Panel held:

> "Indeed, if one were to accept that the matching of a derogation could fall within the item (k) safe haven, one would effectively be accepting that a Member could be 'in conformity with' the 'interest rates provisions' of the *OECD Arrangement* even though that Member failed to respect the CIRR (or a permitted exception). In our view, such an interpretation would be unjustified."[664]

475. For the Panel on *Canada – Aircraft Credits and Guarantees*, the fact that the OECD Arrangement allows matching of derogations, or the *fact* that participants' view matching of derogations as a means of disciplining export credits, does not necessarily mean that the *SCM Agreement* should allow matching of derogations. The Panel considered that unlike the OECD Arrangement, the *SCM Agreement* is not an "informal" "gentleman's agreement". The SCM Agreement therefore does not need to allow recourse to the matching of derogations in order to instil discipline. The *SCM Agreement* is a binding instrument, and is therefore enforceable through the WTO dispute settlement mechanism.[665]

476. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* recalled that practices that follow "permitted exceptions" under the OECD Arrangement are "in conformity" with the interest rates provisions, whereas practices pursuant to "derogations" are not. The Panel on *Brazil – Aircraft (Article 21.5 – Canada II)* stated that "to accept, for purposes *of* the *SCM Agreement*, that even non-conforming departures from the provisions of the *OECD Arrangement* were covered by the safe haven, would, in effect, remove any disciplines on official financing support for export credits". For the Panel:

> "[T]he fact that the *OECD Arrangement* allows matching of derogations does not logically imply that it should also be allowed under the *SCM Agreement*. Indeed, the *OECD Arrangement* and the *SCM Agreement* are very different . . . In those circumstances, matching may serve an important deterrent and enforcement function and that rationale for matching does not apply to the *SCM Agreement* because the *SCM Agreement* is a binding instrument, and it is enforceable through the WTO dispute settlement mechanism."[666]

Burden of proof in the framework of a derogation

477. The Panel on *Canada – Aircraft Credits and Guarantees* considered that the transaction under consideration could not be justified under the safe haven and that consequently such financing is a prohibited export subsidy, contrary to Article 3.1(a) of the *SCM Agreement* because Canada has failed to *establish* that the matching of a derogation could, as a matter of law, be "in conformity with" the "interest rates provisions" of the *OECD Arrangement*.[667] For the Panel, the burden is on the Member affirming that the matching of a derogation from the OECD Arrangement could, as a "matter of law", be "in conformity with" the "interest rates provisions" of the OECD Arrangement, pursuant to the safe

[661] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.61–5.63.

[662] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.177.

[663] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.164.

[664] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.165.

[665] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.176.

[666] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, para. 5.115.

[667] Panel Report on *Canada – Aircraft Credits and Guarantees*, paras. 7.180–7.181.

haven. Only if the Member demonstrates this would the Panel then examine whether it had, in fact, complied with the "matching" requirement of the OECD Arrangement:

> "In order to avail itself of the item (k) safe haven, Canada must first establish that the matching of a derogation could, as a matter of law, be 'in conformity with' the 'interest rates provisions' of the *OECD Arrangement*. Only if Canada establishes that this is possible as a matter of law, will we need to consider whether Canada has met its burden of establishing that the Canada Account financing to Air Wisconsin is matching according to the provisions of the *OECD Arrangement*. Similarly, only if Canada establishes that matching a derogation could, as a matter of law, fall within the item (k) safe haven, will we need to address Brazil's arguments regarding Canada's alleged failure to comply with the procedural requirements of Articles 47(a) and 53 of the *OECD Arrangement*."[668]

(iii) Mandatory/discretionary distinction in the context of an affirmative defence under item (k) second paragraph

478. In *Brazil – Aircraft (Article 21.5 – Canada II)*, the Panel recalled that the programme had been challenged "as such", and that the mandatory/discretionary distinction was therefore relevant. Accordingly, the Panel considered whether the Member was *required* to apply the programme under consideration "in a manner that gives rise to a prohibited export subsidy". In doing so, the Panel first dealt with the preliminary issue of whether the distinction between mandatory and discretionary legislation is applicable in the context of an affirmative defence under the second paragraph of item (k):[669]

> "[T]he distinction between mandatory and discretionary legislation is applicable in the context of the second paragraph of item (k). It is of course correct that, in the present context, we are concerned not with conformity with a WTO *obligation*, but with conformity with conditions attached to a WTO *exception*. This fact alone does not, however, render the GATT/WTO distinction between mandatory and discretionary legislation inapplicable or inappropriate.
>
> In our understanding, the rationale underpinning the traditional GATT/WTO distinction between mandatory and discretionary legislation is that, when the executive branch of a Member is not required to act inconsistently with requirements of WTO law, it should be entitled to a presumption of good faith compliance with those requirements. We consider that that rationale is no less valid in the context of WTO exceptions than it is in the context of WTO obligations.
>
> We have stated above that the Member invoking an exception as an affirmative defence has the burden of establishing it. In our view, the allocation of the burden of proof is a procedural issue which is distinct from the substantive standard to be applied in assessing the conformity of legislation with a particular provision of the *WTO Agreement*.
>
> Accordingly, the task before us is to examine whether, under PROEX III, Brazil is *required* to act in a manner that is *not* in conformity with the interest rates provisions of the 1998 *OECD Arrangement* or, expressed otherwise, whether PROEX III allows compliance with the interest rates provisions."[670]

479. In *Canada – Aircraft Credits and Guarantees*, the Panel found that the fact that export credit agencies provide export subsidies does not answer the question of *mandatory* subsidization and that "the existence of item (k) does not eliminate the requirement for a complaining party to prove the mandatory nature of the programme in order to prevail on an 'as such' claim".[671]

480. As regards the relevance of the mandatory/discretionary distinction when challenging subsidy programmes "as such," see paragraphs 56–64 above.

(k) Relationship with other Articles

481. With respect to the relationship with Article 1.1(b), see paragraph 76 above.

XXXVI. ANNEX II

A. TEXT OF ANNEX II

ANNEX II
GUIDELINES ON CONSUMPTION OF INPUTS IN THE PRODUCTION PROCESS[61]

(*footnote original*) [61] Inputs consumed in the production process are inputs physically incorporated, energy, fuels and oil used in the production process and catalysts which are consumed in the course of their use to obtain the exported product.

I

1. Indirect tax rebate schemes can allow for exemption, remission or deferral of prior-stage cumulative indirect taxes levied on inputs that are consumed in the production of the exported product (making normal allowance for waste). Similarly, drawback schemes can allow for the remission or drawback of import charges levied on inputs that are consumed in the production of the exported product (making normal allowance for waste).

---

[668] Panel Report on Canada Aircraft Credits and Guarantees, para. 7.161.
[669] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.119–5.120.
[670] Panel Report on *Brazil – Aircraft (Article 21.5 – Canada II)*, paras. 5.123–5.126.
[671] Panel Report on *Canada – Aircraft Credits and Guarantees*, para. 7.82.

2. The Illustrative List of Export Subsidies in Annex I of this Agreement makes reference to the term "inputs that are consumed in the production of the exported product" in paragraphs (h) and (i). Pursuant to paragraph (h), indirect tax rebate schemes can constitute an export subsidy to the extent that they result in exemption, remission or deferral of prior-stage cumulative indirect taxes in excess of the amount of such taxes actually levied on inputs that are consumed in the production of the exported product. Pursuant to paragraph (i), drawback schemes can constitute an export subsidy to the extent that they result in a remission or drawback of import charges in excess of those actually levied on inputs that are consumed in the production of the exported product. Both paragraphs stipulate that normal allowance for waste must be made in findings regarding consumption of inputs in the production of the exported product. Paragraph (i) also provides for substitution, where appropriate.

II

In examining whether inputs are consumed in the production of the exported product, as part of a countervailing duty investigation pursuant to this Agreement, investigating authorities should proceed on the following basis:

1. Where it is alleged that an indirect tax rebate scheme, or a drawback scheme, conveys a subsidy by reason of over-rebate or excess drawback of indirect taxes or import charges on inputs consumed in the production of the exported product, the investigating authorities should first determine whether the government of the exporting Member has in place and applies a system or procedure to confirm which inputs are consumed in the production of the exported product and in what amounts. Where such a system or procedure is determined to be applied, the investigating authorities should then examine the system or procedure to see whether it is reasonable, effective for the purpose intended, and based on generally accepted commercial practices in the country of export. The investigating authorities may deem it necessary to carry out, in accordance with paragraph 6 of Article 12, certain practical tests in order to verify information or to satisfy themselves that the system or procedure is being effectively applied.

2. Where there is no such system or procedure, where it is not reasonable, or where it is instituted and considered reasonable but is found not to be applied or not to be applied effectively, a further examination by the exporting Member based on the actual inputs involved would need to be carried out in the context of determining whether an excess payment occurred. If the investigating authorities deemed it necessary, a further examination would be carried out in accordance with paragraph 1.

3. Investigating authorities should treat inputs as physically incorporated if such inputs are used in the production process and are physically present in the product exported. The Members note that an input need not be present in the final product in the same form in which it entered the production process.

4. In determining the amount of a particular input that is consumed in the production of the exported product, a "normal allowance for waste" should be taken into account, and such waste should be treated as consumed in the production of the exported product. The term "waste" refers to that portion of a given input which does not serve an independent function in the production process, is not consumed in the production of the exported product (for reasons such as inefficiencies) and is not recovered, used or sold by the same manufacturer.

5. The investigating authority's determination of whether the claimed allowance for waste is "normal" should take into account the production process, the average experience of the industry in the country of export, and other technical factors, as appropriate. The investigating authority should bear in mind that an important question is whether the authorities in the exporting Member have reasonably calculated the amount of waste, when such an amount is intended to be included in the tax or duty rebate or remission.

B. INTERPRETATION AND APPLICATION OF ANNEX II

1. Footnote 61

482. On 15 December 2000, the General Council adopted a decision that mandates the SCM Committee to examine as an important part of its work the issues of aggregate and generalized rates of remission of import duties and the definition of "inputs consumed in the production process", taking into account the particular needs of developing country Members.[672]

483. According to the SCM Committee Chairman's Reports to the General Council, reflecting the work undertaken pursuant to this mandate in relation to the issues of aggregate and generalized rates of remission of import duties, Members have engaged constructively with proponents including through sharing information on various Members' domestic duty drawback procedures. This said, for a number of Members, the system proposed represented an unworkable framework, due to its technical complexity as well as the general complexity of the issue of duty drawback, and their concerns over the accuracy and transparency of the proposed system.[673]

484. The said Reports indicate, in relation to the definition of inputs consumed in the production process,

[672] See paragraph 6.3 of the General Council Decision of 15 December 2000 (WT/L/384).

[673] G/SCM/34, p. 2; G/SCM/36, p. 9 and G/SCM/38, p. 23.

that divergent views remained and it is SCM Chairman's view that consensus could not be reached in the Committee, not because of lack of political will but because of an enormous amount of technical problems which could not be resolved in that process.[674]

XXXVII. ANNEX III

A. TEXT OF ANNEX III

ANNEX III
GUIDELINES IN THE DETERMINATION OF SUBSTITUTION DRAWBACK SYSTEMS AS EXPORT SUBSIDIES

I

Drawback systems can allow for the refund or drawback of import charges on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs. Pursuant to paragraph (i) of the Illustrative List of Export Subsidies in Annex I, substitution drawback systems can constitute an export subsidy to the extent that they result in an excess drawback of the import charges levied initially on the imported inputs for which drawback is being claimed.

II

In examining any substitution drawback system as part of a countervailing duty investigation pursuant to this Agreement, investigating authorities should proceed on the following basis:

1. Paragraph (i) of the Illustrative List stipulates that home market inputs may be substituted for imported inputs in the production of a product for export provided such inputs are equal in quantity to, and have the same quality and characteristics as, the imported inputs being substituted. The existence of a verification system or procedure is important because it enables the government of the exporting Member to ensure and demonstrate that the quantity of inputs for which drawback is claimed does not exceed the quantity of similar products exported, in whatever form, and that there is no drawback of import charges in excess of those originally levied on the imported inputs in question.

2. Where it is alleged that a substitution drawback system conveys a subsidy, the investigating authorities should first proceed to determine whether the government of the exporting Member has in place and applies a verification system or procedure. Where such a system or procedure is determined to be applied, the investigating authorities should then examine the verification procedures to see whether they are reasonable, effective for the purpose intended, and based on generally accepted commercial practices in the country of export. To the extent that the procedures are determined to meet this test and are effectively applied, no subsidy should be presumed to exist. It may be deemed necessary by the investigating authorities to carry out, in accordance with paragraph 6 of Article 12, certain practical tests in order to verify information or to satisfy themselves that the verification procedures are being effectively applied.

3. Where there are no verification procedures, where they are not reasonable, or where such procedures are instituted and considered reasonable but are found not to be actually applied or not applied effectively, there may be a subsidy. In such cases a further examination by the exporting Member based on the actual transactions involved would need to be carried out to determine whether an excess payment occurred. If the investigating authorities deemed it necessary, a further examination would be carried out in accordance with paragraph 2.

4. The existence of a substitution drawback provision under which exporters are allowed to select particular import shipments on which drawback is claimed should not of itself be considered to convey a subsidy.

5. An excess drawback of import charges in the sense of paragraph (i) would be deemed to exist where governments paid interest on any monies refunded under their drawback schemes, to the extent of the interest actually paid or payable.

B. INTERPRETATION AND APPLICATION OF ANNEX III

1. Relationship with other Articles

(a) Article 3.1(a)

485. With respect to export subsidies of Article 3.1(a), see paragraphs 88–128 above.

(b) Article 27.2(a)

486. With respect to the exceptions for developing and least-developed countries in Article 27.2(a), see paragraphs 338–345 above.

XXXVIII. ANNEX IV

A. TEXT OF ANNEX IV

ANNEX IV
CALCULATION OF THE TOTAL AD VALOREM SUBSIDIZATION (PARAGRAPH 1(a) OF ARTICLE 6)[62]

(*footnote original*) [62] In cases where the existence of serious prejudice has to be demonstrated.

1. Any calculation of the amount of a subsidy for the purpose of paragraph 1(a) of Article 6 shall be done in terms of the cost to the granting government.

[674] G/SCM/34, p. 2; G/SCM/36, p. 10 and G/SCM/38, p. 23.

2. Except as provided in paragraphs 3 through 5, in determining whether the overall rate of subsidization exceeds 5 per cent of the value of the product, the value of the product shall be calculated as the total value of the recipient firm's[63] sales in the most recent 12-month period, for which sales data is available, preceding the period in which the subsidy is granted.[64]

(*footnote original*) [63] The recipient firm is a firm in the territory of the subsidizing Member.
(*footnote original*) [64] In the case of tax-related subsidies the value of the product shall be calculated as the total value of the recipient firm's sales in the fiscal year in which the tax-related measure was earned.

3. Where the subsidy is tied to the production or sale of a given product, the value of the product shall be calculated as the total value of the recipient firm's sales of that product in the most recent 12-month period, for which sales data is available, preceding the period in which the subsidy is granted.

4. Where the recipient firm is in a start-up situation, serious prejudice shall be deemed to exist if the overall rate of subsidization exceeds 15 per cent of the total funds invested. For purposes of this paragraph, a start-up period will not extend beyond the first year of production.[65]

(*footnote original*) [65] Start-up situations include instances where financial commitments for product development or construction of facilities to manufacture products benefiting from the subsidy have been made, even though production has not begun.

5. Where the recipient firm is located in an inflationary economy country, the value of the product shall be calculated as the recipient firm's total sales (or sales of the relevant product, if the subsidy is tied) in the preceding calendar year indexed by the rate of inflation experienced in the 12 months preceding the month in which the subsidy is to be given.

6. In determining the overall rate of subsidization in a given year, subsidies given under different programmes and by different authorities in the territory of a Member shall be aggregated.

7. Subsidies granted prior to the date of entry into force of the WTO Agreement, the benefits of which are allocated to future production, shall be included in the overall rate of subsidization.

8. Subsidies which are non-actionable under relevant provisions of this Agreement shall not be included in the calculation of the amount of a subsidy for the purpose of paragraph 1(a) of Article 6.

B. INTERPRETATION AND APPLICATION OF ANNEX IV

1. Expiry

487. Article 6.1(a) of the *SCM Agreement*, which refers to Annex IV in footnote 14, has lapsed pursuant to Article 31. See paragraphs 198 and 391 above. See also information under the Informal Group of Experts under Article 24 in paragraph 326 above.

2. Relationship with other Articles

488. With respect to the relationship with Article 1.1(b), see paragraph 78 above.

XXXIX. ANNEX V

A. TEXT OF ANNEX V

ANNEX V
PROCEDURES FOR DEVELOPING
INFORMATION CONCERNING SERIOUS PREJUDICE

1. Every Member shall cooperate in the development of evidence to be examined by a Panel in procedures under paragraphs 4 through 6 of Article 7. The parties to the dispute and any third-country Member concerned shall notify to the DSB, as soon as the provisions of paragraph 4 of Article 7 have been invoked, the organization responsible for administration of this provision within its territory and the procedures to be used to comply with requests for information.

2. In cases where matters are referred to the DSB under paragraph 4 of Article 7, the DSB shall, upon request, initiate the procedure to obtain such information from the government of the subsidizing Member as necessary to establish the existence and amount of subsidization, the value of total sales of the subsidized firms, as well as information necessary to analyse the adverse effects caused by the subsidized product.[66] This process may include, where appropriate, presentation of questions to the government of the subsidizing Member and of the complaining Member to collect information, as well as to clarify and obtain elaboration of information available to the parties to a dispute through the notification procedures set forth in Part VII.[67]

(*footnote original*) [66] In cases where the existence of serious prejudice has to be demonstrated.
(*footnote original*) [67] The information-gathering process by the DSB shall take into account the need to protect information which is by nature confidential or which is provided on a confidential basis by any Member involved in this process.

3. In the case of effects in third-country markets, a party to a dispute may collect information, including through the use of questions to the government of the third-country Member, necessary to analyse adverse effects, which is not otherwise reasonably available from the complaining Member or the subsidizing Member. This requirement should be administered in such a way as not to impose an unreasonable burden on the third-country Member. In particular, such a Member is not expected to make a market or price analysis specially for that purpose. The information to be supplied is that which is already available or can be readily obtained by

this Member (e.g. most recent statistics which have already been gathered by relevant statistical services but which have not yet been published, customs data concerning imports and declared values of the products concerned, etc.). However, if a party to a dispute undertakes a detailed market analysis at its own expense, the task of the person or firm conducting such an analysis shall be facilitated by the authorities of the third-country Member and such a person or firm shall be given access to all information which is not normally maintained confidential by the government.

4. The DSB shall designate a representative to serve the function of facilitating the information-gathering process. The sole purpose of the representative shall be to ensure the timely development of the information necessary to facilitate expeditious subsequent multilateral review of the dispute. In particular, the representative may suggest ways to most efficiently solicit necessary information as well as encourage the cooperation of the parties.

5. The information-gathering process outlined in paragraphs 2 through 4 shall be completed within 60 days of the date on which the matter has been referred to the DSB under paragraph 4 of Article 7. The information obtained during this process shall be submitted to the panel established by the DSB in accordance with the provisions of Part X. This information should include, *inter alia*, data concerning the amount of the subsidy in question (and, where appropriate, the value of total sales of the subsidized firms), prices of the subsidized product, prices of the non-subsidized product, prices of other suppliers to the market, changes in the supply of the subsidized product to the market in question and changes in market shares. It should also include rebuttal evidence, as well as such supplemental information as the panel deems relevant in the course of reaching its conclusions.

6. If the subsidizing and/or third-country Member fail to cooperate in the information-gathering process, the complaining Member will present its case of serious prejudice, based on evidence available to it, together with facts and circumstances of the non-cooperation of the subsidizing and/or third-country Member. Where information is unavailable due to non-cooperation by the subsidizing and/or third-country Member, the panel may complete the record as necessary relying on best information otherwise available.

7. In making its determination, the panel should draw adverse inferences from instances of non-cooperation by any party involved in the information-gathering process.

8. In making a determination to use either best information available or adverse inferences, the panel shall consider the advice of the DSB representative nominated under paragraph 4 as to the reasonableness of any requests for information and the efforts made by parties to comply with these requests in a cooperative and timely manner.

9. Nothing in the information-gathering process shall limit the ability of the panel to seek such additional information it deems essential to a proper resolution to the dispute, and which was not adequately sought or developed during that process. However, ordinarily the panel should not request additional information to complete the record where the information would support a particular party's position and the absence of that information in the record is the result of unreasonable non-cooperation by that party in the information-gathering process.

B. INTERPRETATION AND APPLICATION OF ANNEX V

1. Relationship with other WTO Agreements

489. With respect to the drawing of adverse inferences, see also Section XI.B.3(d) of the Chapter on the *DSU*.

XL. ANNEX VI

A. TEXT OF ANNEX VI

ANNEX VI

PROCEDURES FOR ON-THE-SPOT INVESTIGATIONS PURSUANT TO PARAGRAPH 6 OF ARTICLE 12

1. Upon initiation of an investigation, the authorities of the exporting Member and the firms known to be concerned should be informed of the intention to carry out on-the-spot investigations.

2. If in exceptional circumstances it is intended to include non-governmental experts in the investigating team, the firms and the authorities of the exporting Member should be so informed. Such non-governmental experts should be subject to effective sanctions for breach of confidentiality requirements.

3. It should be standard practice to obtain explicit agreement of the firms concerned in the exporting Member before the visit is finally scheduled.

4. As soon as the agreement of the firms concerned has been obtained, the investigating authorities should notify the authorities of the exporting Member of the names and addresses of the firms to be visited and the dates agreed.

5. Sufficient advance notice should be given to the firms in question before the visit is made.

6. Visits to explain the questionnaire should only be made at the request of an exporting firm. In case of such a request the investigating authorities may place themselves at the disposal of the firm; such a visit may only be made if *(a)* the authorities of the importing Member notify the representatives of the government of the Member in question and *(b)* the latter do not object to the visit.

7. As the main purpose of the on-the-spot investigation is to verify information provided or to obtain further

details, it should be carried out after the response to the questionnaire has been received unless the firm agrees to the contrary and the government of the exporting Member is informed by the investigating authorities of the anticipated visit and does not object to it; further, it should be standard practice prior to the visit to advise the firms concerned of the general nature of the information to be verified and of any further information which needs to be provided, though this should not preclude requests to be made on the spot for further details to be provided in the light of information obtained.

8. Enquiries or questions put by the authorities or firms of the exporting Members and essential to a successful on-the-spot investigation should, whenever possible, be answered before the visit is made.

B. INTERPRETATION AND APPLICATION OF ANNEX VI

No jurisprudence or decision of a competent WTO body.

XLI. ANNEX VII

A. TEXT OF ANNEX VII

ANNEX VII
DEVELOPING COUNTRY MEMBERS REFERRED TO IN PARAGRAPH 2(a) OF ARTICLE 27

The developing country Members not subject to the provisions of paragraph 1(a) of Article 3 under the terms of paragraph 2(a) of Article 27 are:

(a) Least-developed countries designated as such by the United Nations which are Members of the WTO.

(b) Each of the following developing countries which are Members of the WTO shall be subject to the provisions which are applicable to other developing country Members according to paragraph 2(b) of Article 27 when GNP per capita has reached $1,000 per annum:[68] Bolivia, Cameroon, Congo, Côte d'Ivoire, Dominican Republic, Egypt, Ghana, Guatemala, Guyana, India, Indonesia, Kenya, Morocco, Nicaragua, Nigeria, Pakistan, Philippines, Senegal, Sri Lanka and Zimbabwe.

(*footnote original*) [68] The inclusion of developing country Members in the list in paragraph (b) is based on the most recent data from the World Bank on GNP per capita.

B. INTERPRETATION AND APPLICATION OF ANNEX VII

1. Annex VII(b)

(a) Rectification to include Honduras

490. On 15 December 2000, the General Council adopted a decision to include Honduras in Annex VII(b):

> "Taking into account the unique situation of Honduras as the only original Member of the WTO with a GNP per capita of less than US $1,000 that was not included in Annex VII(b) to the Agreement on Subsidies and Countervailing Measures (SCM Agreement), Members call upon the Director-General to take appropriate steps, in accordance with WTO usual practice, to rectify the omission of Honduras from the list of Annex VII(b) countries."[675]

(b) Graduation methodology

491. With regard to the graduation methodology from Annex VII(b), paragraph 10.1 of the Doha Ministerial Decision on Implementation-Related Issues and Concerns provides for a modification of a consecutive three-year period where the US$ GNP per capita requirement must be fulfilled accordingly:

> "Agree[d] that Annex VII(b) to the Agreement on Subsidies and Countervailing Measures includes the Members that are listed therein until their GNP per capita reaches US $1,000 in constant 1990 dollars for three consecutive years. This decision will enter into effect upon the adoption by the Committee on Subsidies and Countervailing Measures of an appropriate methodology for calculating constant 1990 dollars. If, however, the Committee on Subsidies and Countervailing Measures does not reach a consensus agreement on an appropriate methodology by 1 January 2003, the methodology proposed by the Chairman of the Committee set forth in G/SCM/38, Appendix 2 shall be applied. A Member shall not leave Annex VII(b) so long as its GNP per capita in current dollars has not reached US $1,000 based upon the most recent data from the World Bank."[676]

492. As of 1 January 2003, because no alternative methodologies were proposed, the methodology set out in Annex 2 of G/SCM/38 applies.

493. In 2002, four Members listed in Annex VII(b)[677] reserved rights, as provided for in G/SCM/39, to seek extensions of the transition period for the exemption from the prohibition on export subsidies in Article 3.1(a), in the event that they graduate from Annex VII during the period in which other Members have extensions in effect pursuant to G/SCM/39. See "Extension of Article 27.4 transition period" in paragraph 492 above.

494. As foreseen in paragraph 10.1 of the *Doha Ministerial Decision on Implementation-Related Issues and Concerns*, and in application of the methodology in G/SCM/38, the Secretariat has informed the Committee of updated calculations reflecting: (i) GNI per capita in constant 1990 dollars covering the three most recent

[675] Paragraph 6.1 of the General Council Decision of 15 December 2000 (WT/L/384). See Procès-Verbal of Rectification of the Agreement on Subsidies and Countervailing Measures, rectifying the text of Annex VII(b) to include Honduras in the list of countries (WT/LET/371, 20 January 2001).

[676] (WT/MIN(01)/17).

[677] Bolivia, Honduras, Kenya and Sri Lanka.

years for which data are available; and (ii) GNI per capita in current dollars for the years 2001 and 2002 (see documents G/SCM/110 and /Add. 1). In the most recent note, the Secretariat indicated that Annex VII(b) to the *SCM Agreement* includes the following Members that are listed therein until their GNP per capita reaches US $1,000 in constant 1990 dollars for three consecutive years: Bolivia, Cameroon, Congo, Côte d'Ivoire, Egypt, Ghana, Guyana, Honduras, India, Indonesia, Kenya, Nicaragua, Nigeria, Pakistan, Philippines, Senegal, Sri Lanka and Zimbabwe.

(c) Re-inclusion of Member in Annex VII(b)

495. With regard to re-inclusion in Annex VII(b), paragraph 10.4 of the Doha Ministerial Decision on Implementation-Related Issues and Concerns provides that "if a Member has been excluded from the list in paragraph (b) of Annex VII to the Agreement on Subsidies and Countervailing Measures, it shall be re-included in it when its GNP per capita falls back below US $1,000".[678]

XLII. OTHER ISSUES[679]

A. OBJECT AND PURPOSE OF THE SCM AGREEMENT

496. In *Brazil – Aircraft*, the Panel considered that the object and purpose of the *SCM Agreement* is to impose multilateral disciplines on subsidies which distort international trade:

> "In our view, the object and purpose of the SCM Agreement is to impose multilateral disciplines on subsidies which distort international trade. It is for this reason that the SCM Agreement prohibits two categories of subsidies – subsidies contingent upon exportation and upon the use of domestic over imported goods – that are specifically designed to affect trade."[680]

497. In *Canada – Aircraft*, the Panel stated that "the object and purpose of the SCM Agreement could more appropriately be summarized as the establishment of multilateral disciplines 'on the premise that some forms of government intervention distort international trade, [or] have the potential to distort [international trade]'".[681]

498. In *US – Export Restraints*, the Panel indicated its agreement with the Panels on *Brazil – Aircraft* and *Canada – Aircraft* with regard to their statements on the object of the *SCM Agreement* (see paragraphs 496–497 above).[682] The Panel concluded, however, that not every government action or intervention is to be considered as a subsidy that may distort trade and that, accordingly, the object and purpose of the *SCM Agreement* can only be in respect of 'subsidies' as defined in the Agreement:

> "It does not follow from those statements, however, that every government intervention that might in economic theory be deemed a subsidy with the potential to distort trade is a subsidy within the meaning of the SCM Agreement. Such an approach would mean that the 'financial contribution' requirement would effectively be replaced by a requirement that the government action in question be commonly understood to be a subsidy that distorts trade.
>
> [W]hile the object and purpose of the Agreement clearly is to discipline subsidies that distort trade, this object and purpose can only be in respect of 'subsidies' *as defined* in the Agreement. This definition, which incorporates the notions of 'financial contribution', 'benefit', and 'specificity', was drafted with the express purpose of ensuring that not every government intervention in the market would fall within the coverage of the Agreement."[683]

499. In *US – Carbon Steel*, the Appellate Body agreed with the Panel that the objectives and purposes of the *SCM Agreement* include "the establishment of a framework of rights and obligations relating to countervailing duties, and the creation of a set of rules which WTO Members must respect in the use of such duties".[684] The Appellate Body stated:

> "[W]e turn to the object and purpose of the *SCM Agreement*. We note, first, that the Agreement contains no preamble to guide us in the task of ascertaining its object and purpose. In *Brazil – Desiccated Coconut*, we observed that the '*SCM Agreement* contains a set of rights and obligations that go well beyond merely applying and interpreting Articles VI, XVI and XXIII of the GATT 1947.'[685] The *SCM Agreement* defines the concept of 'subsidy', as well as the conditions under which Members may not employ subsidies. It establishes remedies when Members employ prohibited subsidies, and sets out additional remedies available to Members whose trading interests are harmed by another Member's subsidization practices. Part V of the *SCM Agreement* deals with one such remedy, permitting Members to levy countervailing duties on imported products to offset the benefits of specific subsidies bestowed on the manufacture, production or export of those goods. However, Part V also conditions the right to apply such duties on the demonstrated existence of three substantive conditions (subsidization, injury, and a causal link between the two)

[678] (WT/MIN(01)/17).
[679] The *SCM Agreement* has no preamble.
[680] Panel Report on *Brazil – Aircraft*, para. 7.26.
[681] Panel Report on *Canada – Aircraft*, para. 9.119.
[682] Panel Report on *US – Exports Restraints*, para. 8.62.
[683] Panel Report on *US – Exports Restraints*, para. 8.63.
[684] Appellate Body Report on *US – Carbon Steel*, para. 74.
[685] (*footnote original*) Appellate Body Report on *Brazil – Desiccated Coconut*, at 181.

and on compliance with its procedural and substantive rules, notably the requirement that the countervailing duty cannot exceed the amount of the subsidy. Taken as a whole, the main object and purpose of the *SCM Agreement* is to increase and improve GATT disciplines relating to the use of both subsidies and countervailing measures.

We thus believe that the Panel properly identified, as among the objectives of the *SCM Agreement*, the establishment of a framework of rights and obligations relating to countervailing duties,[686] and the creation of a set of rules which WTO Members must respect in the use of such duties.[687] Part V of the Agreement is aimed at striking a balance between the right to impose countervailing duties to offset subsidization that is causing injury, and the obligations that Members must respect in order to do so."[688]

500. In the same vein, the Panel on *US – FSC (Article 21.5 – EC)* concluded that the United States' argument that a government could choose to bestow financial contributions in the form of fiscal incentives by, for example, manipulating the definition of the tax base to accommodate "exemptions" so that there would not be a foregoing of revenue "otherwise due", would have the effect of reducing paragraph (ii) of Article 1.1(a)(1) of the *SCM Agreement* to "redundancy and inutility" and "[a]s such, it is inherently contradictory to what may be viewed as the object and purpose of the *SCM Agreement* in terms of disciplining trade-distorting subsidies in a way that provides legally binding security of expectations to Members".[689] The Panel found that:

"In this regard, it is evident that the interpretation advanced by the United States would be irreconcilable with that object and purpose, given that it would offer governments '*carte-blanche*' to evade any effective disciplines, thereby creating fundamental uncertainty and unpredictability. In short, such an approach would eviscerate the subsidies disciplines in the *SCM Agreement*."[690]

501. In *US – Softwood Lumber IV* the Appellate Body, upholding the Panel's finding, rejected Canada's interpretation of the definition of "goods" as it excluded standing timber from the term, on the ground that such a narrow reading of Article 1.1(a)(1)(iii) would undermine the object and purpose of the *SCM Agreement*. The Appellate Body opined:

"[T]o accept Canada's interpretation of the term 'goods' would, in our view, undermine the object and purpose of the *SCM Agreement*, which is to strengthen and improve GATT disciplines relating to the use of both subsidies and countervailing measures, while recognizing, at the same time, the right of Members to impose such measures under certain conditions. It is in furtherance of this object and purpose that Article 1.1(a)(1)(iii) recognizes that subsidies may be conferred, not only through monetary transfers, but also by the provision of non-monetary inputs. Thus, to interpret the term 'goods' in Article 1.1(a)(1)(iii) narrowly, as Canada would have us do, would permit the circumvention of subsidy disciplines in cases of financial contributions granted in a form other than money, such as through the provision of standing timber for the sole purpose of severing it from land and processing it."[691]

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Having in mind the overall objective of the Members to improve and strengthen the international trading system based on GATT 1994;

Recognizing the need to clarify and reinforce the disciplines of GATT 1994, and specifically those of its Article XIX (Emergency Action on Imports of Particular Products), to re-establish multilateral control over safeguards and eliminate measures that escape such control;

Recognizing the importance of structural adjustment and the need to enhance rather than limit competition in international markets; and

Recognizing further that, for these purposes, a comprehensive agreement, applicable to all Members and based on the basic principles of GATT 1994, is called for;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. In *Korea – Dairy*, the Appellate Body referred to the Preamble of the *Agreement on Safeguards* as additional support for its finding that all provisions of both Article XIX of *GATT 1994* and the *Agreement on Safeguards* apply cumulatively and must be given their full meaning and legal effect:[1]

> "Our reading . . . is consistent with the desire expressed by the Uruguay Round negotiators in the Preamble to the *Agreement on Safeguards* 'to clarify and reinforce the disciplines of GATT 1994, and specifically those of its Article XIX . . ., to re-establish multilateral control over safeguards and eliminate measures that escape such control . . .' In furthering this statement of the object and purpose of the *Agreement on Safeguards*, it must always be remembered that safeguard measures result in the temporary suspension of treaty concessions or the temporary withdrawal of treaty obligations, which are fundamental to the WTO Agreement, such as those in Article II and Article XI of the GATT 1994."[2]

2. In a finding subsequently upheld by the Appellate Body, the Panel on *US – Lamb* rejected the United States argument that the term "domestic industry" under Article 4.1(c) should be defined on the basis of a "continuous line of production" and a "coincidence of economic interests". The Panel then referred to the object and purpose of the *Agreement on Safeguards*, as evidenced in the Preamble, as relevant context for its more restrictive approach to the concept of "domestic industry":

> "In our view, [our] reading of the industry definition is consistent with the object and purpose of the Safeguards Agreement. In particular, this reading is consistent with the Agreement's objectives of, on the one hand, creating a mechanism for effective, temporary protection from imports to an industry that is experiencing serious injury or threat thereof from imports in the wake of trade liberalization, and on the other hand, encouraging 'structural adjustment', and 'clarify[ing] and reinforc[ing] the disciplines of . . . Article XIX of GATT', in view of 'the need to enhance rather than limit competition in international markets'.
>
> If WTO law were not to offer a 'safety valve' for situations in which, following trade liberalization, imports increase so as to cause serious injury or threat thereof to a domestic industry, Members could be deterred from entering into additional tariff concessions and from engaging in further trade liberalization. It is for this reason that the safeguard mechanism in Article XIX has always been an integral part of the GATT. . . . [W]e note that SG Article XIX of GATT 1994 as well as SG Article 11.1 both refer to safeguard measures as 'emergency' measures, and the Appellate Body has characterized them as 'extraordinary' remedies.[3] A conceptual approach to defining the relevant domestic industry which would leave it to the discretion of competent national authorities how far upstream and/or downstream the production chain of a given 'like' end product to look in defining the scope of the domestic industry could easily defeat the Safeguards Agreement's purpose of reinforcing disciplines in the field of safeguards and enhancing rather than limiting competition."[4]

3. The Appellate Body on *US – Lamb* referred to the object and purpose of the *Agreement on Safeguards* in distinguishing between the concepts of "serious injury"

[1] With respect to Article XIX of *GATT 1994* in general and the term "unforeseen developments" in particular, see Section II.B.1 of this Chapter.
[2] Appellate Body Report on *Korea – Dairy*, para. 88. See also Appellate Body Report on *Argentina – Footwear*, para. 95.
[3] (*footnote original*) Appellate Body Report, *Argentina – Footwear*, para. 94.
[4] Panel Report on *US – Lamb*, paras. 7.76 and 7.77.

under the *Agreement on Safeguards* and "material injury" under the *Anti-Dumping Agreement* and the *Agreement on Subsidies and Countervailing Duties*:

> "We believe that the word 'serious' connotes a much higher standard of injury than the word 'material'. Moreover, we submit that it accords with the object and purpose of the *Agreement on Safeguards* that the injury standard for the application of a safeguard measure should be higher than the injury standard for anti-dumping or countervailing measures . . ."[5]

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
General Provision

This Agreement establishes rules for the application of safeguard measures which shall be understood to mean those measures provided for in Article XIX of GATT 1994.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Relationship with Article XIX of the GATT 1994

(a) General

4. In *Korea – Dairy*, the Appellate Body examined the relationship between Article XIX of the *GATT 1994* and the *Agreement on Safeguards* in light of, on the one hand, Article II of the *WTO Agreement*,[6] and, on the other, Articles 1 and 11.1(a) of the *Agreement on Safeguards*.[7] The Appellate Body concluded that any safeguard measure imposed after the entry into force of the *WTO Agreement* must comply with the provisions of both Article XIX and the *Agreement on Safeguards*:

> "The specific relationship between Article XIX of the GATT 1994 and the *Agreement on Safeguards* within the WTO Agreement is set forth in Articles 1 and 11.1(a) of the *Agreement on Safeguards*:
>
> . . .
>
> Article 1 states that the purpose of the *Agreement on Safeguards* is to establish 'rules for the application of safeguard measures which shall be understood to mean those measures provided for in Article XIX of GATT 1994.' . . . The ordinary meaning of the language in Article 11.1(a) – 'unless such action conforms with the provisions of that Article applied in accordance with this Agreement' – is that any safeguard action must conform with the provisions of Article XIX of the GATT 1994 as well as with the provisions of the *Agreement on Safeguards*. Thus, any safeguard measure[8] imposed after the entry into force of the WTO Agreement must comply with the provisions of both the *Agreement on Safeguards* and Article XIX of the GATT 1994."[9]

5. In *Argentina – Footwear (EC)*, the Appellate Body reversed a conclusion by the Panel in that dispute that "safeguard investigations and safeguard measures imposed after the entry into force of the WTO agreements which meet the requirements of the new *Agreement on Safeguards* satisfy the requirements of Article XIX of GATT".[10] The Appellate Body noted that Articles 1 and 11.1(a) of the *Agreement on Safeguards* described the precise nature of the relationship between Article XIX of *GATT 1994* and the *Agreement on Safeguards* within the *WTO Agreement*,[11] and then observed:

> "We see nothing in the language of either Article 1 or Article 11.1(a) of the *Agreement on Safeguards* that suggests an intention by the Uruguay Round negotiators to *subsume* the requirements of Article XIX of the GATT 1994 within the *Agreement on Safeguards* and thus to render those requirements no longer applicable. Article 1 states that the purpose of the *Agreement on Safeguards* is to establish 'rules for the application of safeguard measures which shall be understood to mean *those measures provided for* in Article XIX of GATT 1994.' . . . This suggests that Article XIX continues in full force and effect, and, in fact, establishes certain prerequisites for the imposition of safeguard measures. Furthermore, in Article 11.1(a), the ordinary meaning of the language 'unless such action *conforms with the provisions of that Article applied in accordance with this Agreement*' . . . clearly is that any safeguard action must *conform with* the provisions of Article XIX of the GATT 1994 *as well as* with the provisions of the *Agreement on Safeguards*. Neither of these provisions states that any safeguard action taken after the entry into force of the *WTO Agreement* need only conform with the provisions of the *Agreement on Safeguards*."[12][13]

---

[5] Appellate Body Report on *US – Lamb*, para. 124.

[6] For the Appellate Body's analysis under Article II of the *WTO Agreement*, see Chapter on the *WTO Agreement*, Section II.B.

[7] The issue of the relationship between Article XIX of the *GATT 1994* and the *Agreement on Safeguards* arose in these disputes in connection with claims raised regarding a failure to examine whether the import trends of the products under investigation were the result of "unforeseen developments" within the meaning of Article XIX:1(a) of the *GATT 1994*. For the interpretation of the phrase "If, as a result of unforeseen developments . . . concessions" in Article XIX:1(a) of the *GATT 1994*, see Chapter on the *GATT 1994*, Section XX.B.2 (a).

[8] (*footnote original*) With the exception of special safeguard measures taken pursuant to Article 5 of the *Agreement on Agriculture* or Article 6 of the *Agreement on Textiles and Clothing*.

[9] Appellate Body Report on *Korea – Dairy*, paras. 76–77. See also Appellate Body Report on *Argentina – Footwear (EC)*, para. 84.

[10] Panel Report on *Argentina – Footwear (EC)*, para. 8.69.

[11] Appellate Body Report on *Argentina – Footwear (EC)*, para. 82.

[12] (*footnote original*) We note that the provisions of Article 11.1(a) of the *Agreement on Safeguards* are significantly different from the provisions of Article 2.4 of the *Agreement on the Application of Sanitary and Phytosanitary Measures*, which state:

> "Sanitary or phytosanitary measures *which conform to* the relevant provisions of this Agreement *shall be presumed to be in accordance with* the obligations of the Members under the provisions of GATT 1994 which relate to the use of sanitary or phytosanitary measures, in particular the provisions of Article XX(b)." (emphasis added)

[13] Appellate Body Report on *Argentina – Footwear (EC)*, para. 83.

6. The Appellate Body on *Argentina – Footwear (EC)* further rejected the Panel's conclusion that because the clause "[i]f, as a result of unforeseen developments . . . concessions"[14] in Article XIX:1(a) had been expressly omitted from Article 2.1 of the Agreement on Safeguards, safeguard measures that meet the requirements of the Agreement on Safeguards will automatically also satisfy the requirements of Article XIX. The Appellate Body considered this conclusion inconsistent with the principles of effective treaty interpretation[15] and with the ordinary meaning of Articles 1 and 11.1(a) of the *Agreement on Safeguards*:

> "[I]t is clear from Articles 1 and 11.1(a) of the *Agreement on Safeguards* that the Uruguay Round negotiators did not intend that the *Agreement on Safeguards* would entirely replace Article XIX. Instead, the ordinary meaning of Articles 1 and 11.1(a) of the *Agreement on Safeguards* confirms that the intention of the negotiators was that the provisions of Article XIX of the GATT 1994 and of the *Agreement on Safeguards* would apply *cumulatively*, except to the extent of a conflict between specific provisions . . . We do not see this as an issue involving a conflict between specific provisions of two Multilateral Agreements on Trade in Goods. Thus, we are obliged to apply the provisions of Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994 *cumulatively*, in order to give meaning, by giving legal effect, to all the applicable provisions relating to safeguard measures."[16]

7. The Panel on *US – Lamb*, referring to the statements by the Appellate Body on the relationship between the *Agreement on Safeguards* and Article XIX of the *GATT 1994*, observed:

> "Thus the Appellate Body explicitly rejected the idea that those requirements of GATT Article XIX which are not reflected in the *Safeguards Agreement* could have been superseded by the requirements of the latter and stressed that all of the relevant provisions of the *Safeguards Agreement* and GATT Article XIX must be given meaning and effect."[17]

8. The Appellate Body on *US – Lamb* reiterated the conclusions drawn by the Appellate Body in *Argentina – Footwear (EC)* and in *Korea – Dairy* on the relationship between the *Agreement on Safeguards* and Article XIX of the *GATT 1994* and observed:

> "[A]rticles 1 and 11.1(a) of the Agreement on Safeguards express the full and continuing applicability of Article XIX of the GATT 1994, which no longer stands in isolation, but has been clarified and reinforced by the Agreement on Safeguards."[18]

9. The Panel on *Argentina – Preserved Peaches* also concluded that in disputes relating to safeguards measures, a panel must apply the *Agreement on Safeguards* and Article XIX of the *GATT 1994* cumulatively.[19]

10. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, reiterated that Article XIX of the *GATT 1994* and the *Agreement on Safeguards* apply "cumulatively" when assessing the WTO compatibility of safeguards measures taken by WTO Members:

> "[T]here is no reference to unforeseen developments in the Agreement on Safeguards. However, as repeatedly affirmed by the Appellate Body, Articles 1 and 11.1(a) of the Agreement on Safeguards express the continuing applicability of Article XIX of GATT which has been clarified and reinforced by the Agreement on Safeguards.[20] This interpretation ensures that the provisions of the Agreement on Safeguards and those of Article XIX are given their full meaning and their full legal effect within the context of the WTO Agreement.[21]"[22]

11. As regards the possibility of resorting to judicial economy in cases where it has been found that the requirements of Articles 2 and 4 of the *Agreement on Safeguards* have not been met, see Section XX.B.2(a)(iii) of the Chapter on the *GATT 1994*.

(b) "unforeseen developments"

12. With respect to the concept of "unforeseen developments" in Article XIX of *GATT 1994*, see Section XX.B.2 of the Chapter on the *GATT 1994*.

III. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Conditions

1. A Member[1] may apply a safeguard measure to a product only if that Member has determined, pursuant to the provisions set out below, that such product is being imported into its territory in such increased quantities, absolute or relative to domestic production, and under such conditions as to cause or threaten to cause serious injury to the domestic industry that produces like or directly competitive products.

[14] The discussion on "unforeseen developments"" can be found in Section XX.B.2(a)(i) of the Chapter on the *GATT 1994*.
[15] With respect to treaty interpretation in general, see the Chapter on the *DSU*, Section III.B.1(c).
[16] Appellate Body Report on *Argentina – Footwear (EC)*, para. 89.
[17] Panel Report on *US – Lamb*, para. 7.11.
[18] Appellate Body Report on *US – Lamb*, para. 70.
[19] Panel Report on *Argentina – Preserved Peaches*, para. 7.12.
[20] (*footnote original*) See for instance the Appellate Body Report in *Korea – Dairy* at para. 74: "We agree with the statement of the Panel that: It is now well established that the WTO Agreement is a 'Single Undertaking' and therefore all WTO obligations are generally cumulative and Members must comply with all of them simultaneously . . ." and para. 78: "Having found that the provisions of *both* Article XIX:1 of the GATT 1994 and Article 2.1 of the *Agreement on Safeguards* apply to any safeguard measure taken under the *WTO Agreement*".
[21] (*footnote original*) Appellate Body Reports, *Argentina – Footwear (EC)*, para. 95; *Korea – Dairy*, para. 85; *US – Lamb*, para. 71.
[22] Panel Reports on *US – Steel Safeguards*, para. 10.36

(*footnote original*) [1] A customs union may apply a safeguard measure as a single unit or on behalf of a member State. When a customs union applies a safeguard measure as a single unit, all the requirements for the determination of serious injury or threat thereof under this Agreement shall be based on the conditions existing in the customs union as a whole. When a safeguard measure is applied on behalf of a member State, all the requirements for the determination of serious injury or threat thereof shall be based on the conditions existing in that member State and the measure shall be limited to that member State. Nothing in this Agreement prejudges the interpretation of the relationship between Article XIX and paragraph 8 of Article XXIV of GATT 1994.

2. Safeguard measures shall be applied to a product being imported irrespective of its source.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

(a) The two basic inquiries

13. In *US – Line Pipe*, the Appellate Body referred to two basic inquiries that are conducted in interpreting the *Agreement on Safeguards*: (i) "Is there a right to apply a safeguard measure?"; and (ii) "If so, has that right been exercised, through the application of such a measure, within the limits set out in the treaty?" The Appellate Body emphasized that these two inquiries are "separate and distinct" and should not be "confused" by the treaty interpreter:

> "[There are] basic inquiries that are conducted in interpreting the *Agreement on Safeguards*. These two basic inquiries are: *first*, is there a right to apply a safeguard measure? And, *second*, if so, has that right been exercised, through the application of such a measure, within the limits set out in the treaty? These two inquiries are separate and distinct. They must not be confused by the treaty interpreter. One necessarily precedes and leads to the other. *First*, the interpreter must inquire whether there is a right, under the circumstances of a particular case, to apply a safeguard measure. For this right to exist, the WTO Member in question must have determined, as required by Article 2.1 of the *Agreement on Safeguards* and pursuant to the provisions of Articles 3 and 4 of the *Agreement on Safeguards*, that a product is being imported into its territory in such increased quantities and under such conditions as to cause or threaten to cause serious injury to the domestic industry. *Second*, if this first inquiry leads to the conclusion that there *is* a right to apply a safeguard measure in that particular case, then the interpreter must next consider whether the Member has applied that safeguard measure 'only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment', as required by Article 5.1, first sentence, of the *Agreement on Safeguards*. Thus, the right to apply a safeguard measure – even where it has been found to exist in a particular case and thus can be exercised – is not unlimited. Even when a Member has fulfilled the treaty requirements that establish the right to apply a safeguard measure in a particular case, it must do so 'only to the extent necessary. . . .'"[23]

14. The Appellate Body on *US – Line Pipe* considered the existence of "a natural tension between, on the one hand, defining the appropriate and legitimate scope of the right to apply safeguard measures and, on the other hand, ensuring that safeguard measures are not applied against 'fair trade' beyond what is necessary to provide extraordinary and temporary relief".[24] Moreover, it found this natural tension to be "inherent" in the "two basic inquiries" that are conducted in interpreting the *Agreement on Safeguards* (see paragraph 13 above in this regard).[25]

15. In *US – Steel Safeguards*, the Panel applied the two basic inquiries test under the *Agreement on Safeguards* as enunciated by the Appellate Body in *US – Line Pipe* (see paragraph 13 above) as follows:

> "Throughout its examination, this Panel has kept the two enquiries distinct. The Panel is of the view that, first, it must examine whether the United States had the *right* to take the safeguard measures. Second, should the Panel consider that the United States had the right to take such safeguard measures, the Panel would then assess whether the measures were applied (as regards the type of measure, their level and duration) only to the extent necessary to remedy or prevent serious injury and allow for readjustment.
>
> In examining whether the United States had a right to impose the specific safeguard measures at issue, the Panel will concern itself with the application of Articles 2, 3 and 4 of the Agreement on Safeguards and Article XIX of GATT 1994 (the latter being relevant in particular for the assessment of whether the United States was faced with unforeseen developments) in reviewing the report of the competent authority. In relation to the second enquiry, when assessing the appropriateness of such safeguards measures, the importing Member is obliged, when challenged by a WTO Member who has made a prima facie case of inconsistency with Article 5.1 of the Agreement on Safeguards, to justify before the Panel that the safeguard measures were imposed only to the extent necessary to prevent or remedy injury and allow for readjustment. Reversals of this burden of proof may take place."[26]

[23] Appellate Body Report on *US – Line Pipe*, para. 84.
[24] Appellate Body Report on *US – Line Pipe*, para. 83.
[25] Appellate Body Report on *US – Line Pipe*, para. 84.

2. Article 2.1

(a) Relationship with Article XIX of the GATT 1994

16. With respect to the relationship with Article XIX of the GATT 1994, see paragraphs 4–10 above.

(b) Findings under Article 4 and Article 2

17. The question whether a violation of Article 4 necessarily implies a violation of Article 2 of the *Agreement on Safeguards* has been addressed mainly at the panel level. The Appellate Body has confirmed these findings. The Panel Report in *Korea – Dairy* discussed the relationship between claims under Article 4 and claims under Article 2 of the *Agreement on Safeguards* and concluded that a violation of parts of Article 4 would constitute a violation of Article 2:

> "The European Communities raised various other arguments in support of its claims that Korea violated Article 4, and consequently Article 2, of the Agreement on Safeguards, namely that Korea did not adequately demonstrate the existence of serious injury and a causal link with the increased imports. We shall address the EC argument that Korea did not perform an adequate assessment of whether the products under investigation were being imported into its territory in such increased quantities and under such conditions as to cause serious injury to the domestic industry when we examine the European Communities' more specific claims of inadequate serious injury and causation assessments made pursuant to Article 4.1 and 4.2 of the Agreement on Safeguards. We note that a violation of Article 4.2 or 4.3 (sic) would constitute a violation of Article 2 of the Agreement on Safeguards."[27]

18. However, despite holding that a violation of Article 4 would necessarily imply a violation of Article 2 of the *Agreement on Safeguards*, the Panel on *Korea – Dairy* declined to reach a conclusion on Article 2, referring to the fact that this violation had not been argued by the complaining party:

> "Article 2.1 permits the application of a safeguard measure only if, inter alia, there has been a determination of serious injury pursuant to Article 4.2. Since we find that Korea's determination of serious injury does not meet the requirements of Article 4.2, the application of the safeguard measure at issue would necessarily also violate Article 2.1 of the *Agreement on Safeguards*. We note that in its request for establishment of a panel, the European Communities claims generally that Korea violated Articles 2.1, 4.2(a), 4.2(b), 5.1 and 12.1 to 12.3 of the *Agreement on Safeguards*. However, in its submissions, the European Communities did not argue specifically, nor did it submit any evidence, in support of its claim under Article 2.1, other than those relating to 'under such conditions' . . . Therefore, we do not reach any conclusion on the issue of whether Korea's determination of serious injury violates the provisions of Article 2.1 of the *Agreement on Safeguards*."[28]

19. The Panel on *Argentina – Footwear (EC)* considered Articles 2 and 4 largely in parallel:

> "[W]e conclude that Argentina's investigation did not demonstrate that there were increased imports within the meaning of Articles 2.1 and 4.2(a); that the investigation did not evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation of the domestic industry within the meaning of Article 4.2(a); that the investigation did not demonstrate on the basis of objective evidence the existence of a causal link between increased imports and serious injury within the meaning of Article 2.1 and 4.2(b); that the investigation did not adequately take into account factors other than increased imports within the meaning of Article 4.2(b); and that the published report concerning the investigation did not set forth a complete analysis of the case under investigation as well as a demonstration of the relevance of the factors examined within the meaning of Article 4.2(c).
>
> Therefore, we find that Argentina's investigation and determinations of increased imports, serious injury and causation are inconsistent with Articles 2 and 4 of the *Safeguards Agreement*. As such, we find that Argentina's investigation provides no legal basis for the application of the definitive safeguard measure at issue, or any safeguard measure."[29]

20. The Panel on *US – Wheat Gluten* also linked violations of Article 4 to Article 2.1, finding, *inter alia*:

> "In light of the findings made in section VIII above, we conclude that the definitive safeguard measure imposed by the United States on certain imports of wheat gluten based on the United States investigation and determination is inconsistent with Articles 2.1 and 4 of the *Agreement on Safeguards* in that:
>
> (i) the causation analysis applied by the USITC did not ensure that injury caused by other factors was not attributed to imports; and
>
> (ii) imports from Canada (a NAFTA partner) were excluded from the application of the measure after imports from all sources were included in the investigation for the purposes of determining serious injury caused by increased imports (following a separate inquiry concerning whether imports from Canada accounted for a 'substantial share' of total imports and whether they 'contributed importantly' to the 'serious injury' caused by total imports)."[30]

[27] Panel Report on *Korea – Dairy*, para. 7.53.
[28] Panel Report on *Korea – Dairy*, para. 7.86.
[29] Panel Report on *Argentina – Footwear (EC)*, paras. 8.279–8.280; See also Panel Report on *US – Wheat Gluten*, paras. 9.1–9.2 and Panel Report on *US – Lamb*, para. 8.1.
[30] Panel Report on *US – Wheat Gluten*, para. 9.2.

21. The Panel on *US – Lamb* also addressed the relationship between violations of Article 2 and Article 4, finding that the safeguard measure at issue was applied inconsistently with Articles 4.1(c) and 4.2(b) and subsequently holding:

> "[B]y virtue of the above violations of Article 4 of the Agreement on Safeguards, the United States also has acted inconsistently with Article 2.1 of the Agreement on Safeguards."[31]

22. The Appellate Body on *US – Lamb* confirmed that a violation of Article 4.1(c) necessarily also implies a violation of Article 2:

> "As a result, the imposition of the safeguard measure at issue was based on a determination of serious injury caused to an industry other than the relevant 'domestic industry'. In addition, that measure was imposed without a determination of serious injury to the 'domestic industry', which, properly defined, should have been limited only to packers and breakers of lamb meat. Accordingly, we uphold the Panel's finding, in paragraph 7.118 of the Panel Report, that the safeguard measure at issue is inconsistent with Articles 2.1 and 4.1(c) of the *Agreement on Safeguards*."[32]

23. The Appellate Body on *US – Lamb* made an even clearer statement with respect to Article 4.2(b) and Article 2:

> "In the absence of [an explanation by the investigating authority as to/concerning/regarding how it ensured that injury caused to the domestic industry by factors other than increased imports was not attributed to increased imports], we uphold, albeit for different reasons, the Panel's conclusions that the United States acted inconsistently with Article 4.2(b) of the *Agreement on Safeguards*, and, hence, with Article 2.1 of that Agreement."[33]

(c) "that such product is being imported . . . in such increased quantities"

(i) Relevance of quantity versus value of imports

24. The Panel on *Argentina – Footwear (EC)* acknowledged that both parties had referred to data on both the quantity and the value of imports in connection with this requirement, but observed:

> "The Agreement is clear that it is the data on import quantities . . . in absolute terms and relative to (the quantity of) domestic production that are relevant in this context, in that the Agreement refers to imports 'in such increased quantities' . . . Therefore, our evaluation will focus on the data on import quantities.[34]"[35]

(ii) Relationship between Article 2.1 and Article 4.2(a)

25. The Panel on *Argentina – Footwear (EC)*, in examining whether in the case at hand there were "increased imports in the sense of Articles 2.1 and 4.2(a) of the Agreement", noted that Article 2.1 "sets forth the conditions for the application of a safeguard measure", and that Article 4.2 "sets forth the operational requirements for determining whether the conditions in Article 2.1 exist".[36] The Panel in this connection made the following statement, subsequently expressly confirmed by the Appellate Body:

> "Thus, to determine whether imports have increased in 'such quantities' for purposes of applying a safeguard measure, these two provisions require an analysis of the rate and amount of the increase in imports, in absolute terms and as a percentage of domestic production."[37]

(iii) Nature and timing of the increase in imports

26. The Panel on *Argentina – Footwear (EC)* examined whether there is consistency with Articles 2.1 and 4.2(a) in making a finding of increased imports on the basis of a comparison between the volume of imports at the starting-point of an investigation period and the volume of imports at the end of that period ("end-point-to-end-point-comparison"). The Panel, later upheld in this respect by the Appellate Body, came to the conclusion that:

> "[I]n assessing whether an end-point-to-end-point increase in imports satisfies the increased imports requirement of Article 2.1, the sensitivity of the comparison to the specific years used as the end-points is important as it might confirm or reverse the apparent initial conclusion. If changing the starting-point and/or ending-point of the investigation period by just one year means that the comparison shows a decline in imports rather than an increase, this necessarily signifies an intervening decrease in imports at least equal to the initial increase, thus calling into question the conclusion that there are increased imports.
>
> In other words, if an increase in imports in fact is present, this should be evident both in an end-point-to-end-point comparison and in an analysis of intervening trends over the period. That is, the two analyses should be mutually reinforcing. Where as here their results diverge, this at least raises doubts as to whether imports have increased in the sense of Article 2.1."[38]

---

[31] Panel Report on *US – Lamb*, para. 8.1.
[32] Appellate Body Report on *US – Lamb*, para. 96.
[33] Appellate Body Report on *US – Lamb*, para. 188.
[34] (*footnote original*) We note that the trends in the data on import values generally confirm those on import quantities.
[35] Panel Report on *Argentina – Footwear (EC)*, para. 8.152.
[36] Panel Report on *Argentina – Footwear (EC)*, para. 8.140. The Appellate Body characterized Article 2.1 as a provision which sets forth the conditions for *imposing* a safeguard measure.
[37] Panel Report on *Argentina – Footwear (EC)*, para. 8.141. See Appellate Body Report on *Argentina – Footwear (EC)*, para. 144, confirming the Panel's finding.
[38] Panel Report on *Argentina – Footwear (EC)*, paras. 8.156–8.157. See Appellate Body Report on *Argentina – Footwear (EC)*, para. 129, confirming the Panel's finding.

27. In *Argentina – Footwear (EC)*, the Panel, in a finding subsequently confirmed by the Appellate Body, considered, in this connection, that an analysis of intervening trends of imports was indispensable:

> "[T]he question of whether any decline in imports is 'temporary' is relevant in assessing whether the 'increased imports' requirement of Article 2.1 has been met. In this context, we recall Article 4.2(a)'s requirement that 'the rate and amount of the increase in imports' be evaluated.[39] In our view this constitutes a requirement that the intervening *trends* of imports over the period of investigation be analysed. We note that the term 'rate' connotes both speed and direction, and thus intervening trends (up or down) must be fully taken into consideration. Where these trends are mixed over a period of investigation, this may be decisive in determining whether an increase in imports in the sense of Article 2.1 has occurred. In practical terms, we consider that the best way to assess the significance of any such mixed trends in imports is by evaluating whether any downturn in imports is simply temporary, or instead reflects a longer-term change."[40]

28. The Panel on *Argentina – Footwear (EC)* found that in the case before it the decline in the volume of imports could not be characterized as a temporary reversal of an increase in the volume of imports.[41] It then stated that:

> "[T]he Agreement requires not just an increase (i.e., any increase) in imports, but an increase in 'such . . . quantities' as to cause or threaten to cause serious injury. . . . the increase in imports must be judged in its full context, in particular with regard to its 'rate and amount' as required by Article 4.2(a). Thus, considering the changes in import levels over the entire period of investigation, as discussed above, seems unavoidable when making a determination of whether there has been an increase in imports 'in such quantities' in the sense of Article 2.1.
>
> . . .
>
> Where . . . the volume of imports has declined continuously and significantly during each of the most recent years of the period, more than a 'temporary' reversal of an increase has taken place (as reflected as well in the sensitivity of the outcome of the comparison to a one-year shift of its start or end year)."[42]

29. In applying this analytical standard to the facts of the case in *Argentina – Footwear (EC)*, the Panel came to a conclusion contrary to the determination effectuated by the Argentine authorities:

> "In sum, we find highly significant that the absolute volume of footwear imports and the ratio of those imports to domestic production, increased only until 1993, i.e., during the first two years of the period for which Argentina collected data, and declined continuously thereafter. We also find significant that these decreases were of such a magnitude that a one-year change in base year of the data series on the volume of imports transforms the increase relied upon by Argentina into a decline, and that the resolution applying the provisional measure refers only to anticipated increases in imports, showing that at that time, no increase in imports was present."[43]

30. In *Argentina – Footwear (EC)*, the Panel found, in interpreting the phrase "is being imported . . . in such quantities", that an investigation period of five years "can be quite useful" to the national authorities. The Panel also rejected the argument that the *Agreement on Safeguards* requires a "sharply increasing" trend in imports at the end of the investigation period. The Appellate Body reversed both of these findings. First, it did not find a five-year investigative period reasonable in the light of the phrase "is being imported" and emphasized the need to focus the investigation on the "recent past":

> "[T]he actual requirement, and we emphasize that this requirement is found in *both* Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994, is that 'such product *is being imported* . . . in such increased quantities' 'and under such conditions as to cause or threaten to cause serious injury to the domestic industry'. Although we agree with the Panel that the 'increased quantities' of imports cannot be just *any* increase, we do not agree with the Panel that it is reasonable to examine the trend in imports over a five-year historical period. In our view, the use of the present tense of the verb phrase 'is being imported' in both Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994 indicates that it is necessary for the competent authorities to examine recent imports, and not simply trends in imports during the past five years – or, for that matter, during any other period of several years.[44] In our view, the phrase 'is being imported' implies that the increase in imports must have been sudden and recent."[45]

---

[39] (*footnote original*) We recognize that Article 4.2(a) makes this reference in the specific context of the causation analysis, which in our view is inseparable from the requirement of imports in "*such* increased quantities" (emphasis added). Thus, we consider that in the context of both the requirement that imports have increased, and the analysis to determine whether these imports have caused or threaten to cause serious injury, the Agreement requires consideration not just of data for the end-points of an investigation period, but for the entirety of that period.

[40] Panel Report on *Argentina – Footwear (EC)*, para. 8.159. See Appellate Body Report in *Argentina – Footwear (EC)*, para. 129, confirming the Panel's finding.

[41] Panel Report on *Argentina – Footwear (EC)*, para. 8.160.

[42] Panel Report on *Argentina – Footwear (EC)*, paras. 8.161–8.162.

[43] Panel Report on *Argentina – Footwear (EC)*, para. 8.164.

[44] (*footnote original*) The Panel . . . recognizes that the present tense is being used, which it states "would seem to indicate that, whatever the starting-point of an investigation period, it has to *end* no later than the very recent past". (emphasis added) Here, we disagree with the Panel. We believe that the relevant investigation period should not only *end* in the very recent past, the investigation period should *be* the recent past.

[45] Appellate Body Report on *Argentina – Footwear (EC)*, para. 130.

31. With regard to the nature of the increase in imports, the Appellate Body in *Argentina – Footwear (EC)*, in contrast to the Panel, held that the increase in imports must have been recent, sudden, sharp and significant enough to cause or threaten to cause serious injury:

> "[T]he determination of whether the requirement of imports 'in such increased quantities' is met is not a merely mathematical or technical determination. In other words, it is not enough for an investigation to show simply that imports of the product this year were more than last year – or five years ago. Again, and it bears repeating, not just *any* increased quantities of imports will suffice. There must be '*such* increased quantities' as to cause or threaten to cause serious injury to the domestic industry in order to fulfil this requirement for applying a safeguard measure. And this language in both Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994, we believe, requires that the increase in imports must have been recent enough, sudden enough, sharp enough, and significant enough, both quantitatively and qualitatively, to cause or threaten to cause 'serious injury'."[46]

32. Subsequently, the Panel on *US – Wheat Gluten*, echoing the findings of the Appellate Body in *Argentina – Footwear (EC)*, interpreted the phrase "in such increased quantities":

> "[A]rticle XIX:1(a) of the GATT 1994 and Article 2.1 [of the *Agreement on Safeguards* ("SA")] do not speak only of an 'increase' in imports. Rather, they contain specific requirements with respect to the quantitative and qualitative nature of the 'increase' in imports of the product concerned. Both Article XIX:1(a) of the GATT 1994 and Article 2.1 SA require that a product is being imported into the territory of the Member concerned in such increased quantities (absolute or relative to domestic production) as to cause or threaten serious injury. Thus, not just any increase in imports will suffice. Rather, we agree with the Appellate Body's finding in *Argentina – Footwear Safeguard* that the increase must be sufficiently recent, sudden, sharp and significant, both quantitatively and qualitatively, to cause or threaten to cause serious injury."[47]

33. In *US – Line Pipe*, the Panel found, in a statement not reviewed by the Appellate Body, that the word "recent" implies a "retrospective analysis"; but that it does not imply an analysis of the conditions immediately preceding the authority's decision nor does it imply that the analysis must focus exclusively on conditions at the very end of the period of investigation:

> "[W]e note that the Appellate Body in *Argentina-Footwear Safeguard* found that 'the phrase "is being imported" implies that the increase in imports must have been sudden and recent'. According to Korea, the phrase 'is being imported . . . in such increased quantities' refers to 'the period immediately preceding the authority's decision'.[48] The word 'recent' – which was used by the Appellate Body in interpreting the phrase 'is being imported' – is defined as 'not long past; that happened, appeared, began to exist, or existed lately'. In other words, the word 'recent' implies some form of retrospective analysis. It does not imply an analysis of the conditions immediately preceding the authority's decision. Nor does it imply that the analysis must focus exclusively on conditions at the very end of the period of investigation. We consider that an analysis that compares the first semester of 1998 with the first semester of 1999 is not inconsistent with the requirement that the increase in imports be 'recent'."[49]

34. In *US – Line Pipe*, the Panel found, in a statement not reviewed by the Appellate Body, that "there is no need for a determination that imports are presently still increasing**.** Rather, imports could have 'increased' in the recent past, but not necessarily be increasing up to the end of the period of investigation or immediately preceding the determination":

> "[T]here remains the question of whether the finding of increased imports can be maintained in light of the decline in absolute imports from the first semester of 1998 to the first semester of 1999. In order to answer this question we recall our discussion regarding the meaning of 'recent', and our finding that 'recent' does not imply an analysis of the present. We are also of the view that the fact that the increase in imports must be 'recent' does not mean that it must continue up to the period immediately preceding the investigating authority's determination, nor up to the very end of the period of investigation. We find support for our view in Article 2.1, which provides 'that such product is being imported . . . in such increased quantities'. The Agreement uses the adjective 'increas**ed**', as opposed to 'increas**ing**'. The use of the word 'increas**ed**' indicates to us that there is no need for a determination that imports are presently still increas**ing**. Rather, imports could have 'increas**ed**' in the recent past, but not necessarily be increasing up to the end of the period of investigation or immediately preceding the determination. Provided the investigated product 'is being imported' at such increas**ed** quantities at the end of the period of investigation, the requirements of Article 2.1 are met.[50]"[51]

[48] (*footnote original*) Korea's reply to Question 1 from the Panel at the first substantive meeting (see Annex B-1).
[49] Panel Report on *US – Line Pipe*, para. 7.204.
[50] (*footnote original*) We observe that an increase in imports before the date of a determination, but not sustained at the date of the determination, could still cause actual serious injury at the time of the determination.
[51] Panel Report on *US – Line Pipe*, para. 7.207.

35. In light of the provisions in Article 2.1 and Article XIX:1(a),[52] the Panel on *US – Line Pipe* reasoned, in a statement not reviewed by the Appellate Body, that it is within its standard of review to examine the appropriateness of the methodology in evaluating the increase in the imports:

> "[I]n determining whether the US methodology for the analysis of the existence of increased imports complied with its obligations under the Agreement on Safeguards and the GATT 1994, our review will consist of an objective assessment, pursuant to Article 11 of the DSU, of whether the methodology selected is unbiased and objective, such that its application permits an adequate, reasoned and reasonable explanation of how the facts in the record before the ITC support the determination made with respect to increased imports."[53]

36. In *US – Line Pipe*, Korea had argued that the period of investigation of five years chosen by the United States authorities was in conflict with the requirements of Article 2.1 and Article XIX:1(a). The Panel, in a finding not reviewed by the Appellate Body, ruled that it is up to the discretion of the investigating authority of the importing Member to decide the "length of the period of investigation" and its "breakdown":

> "We note that the Agreement contains no requirements as to how long the period of investigation in a safeguards investigation should be, nor how the period should be broken down for purposes of analysis. Thus, the period of investigation and its breakdown is left to the discretion of the investigating authorities.
>
> In the case before us the period selected by the ITC was five years and six months, which is a period similar in length to the one used by the Argentine investigating authority in *Argentina – Footwear Safeguard*. However, we note that the Appellate Body, in the findings relied upon by Korea to argue the question of the length of the period of investigation, emphasized not the length of the period *per se,* but that there should be a focus on recent imports and not simply trends over the period examined. In the case of the line pipe investigation the ITC did not merely compare end points, or look at the overall trend over the period of investigation (as Argentina had done in the investigation at issue in *Argentina – Footwear Safeguard*). It analysed the data regarding imports on a year-to-year basis for the 5 complete years, and also considered whether there was an increase in interim 1999 as compared with interim 1998.
>
> . . . . .
>
> We are of the view that by choosing a period of investigation that extends over 5 years and six months, the ITC did not act inconsistently with Article 2.1 and Article XIX. This conclusion is based on the following considerations: first, the Agreement contains no specific rules as to the length of the period of investigation; second, the period selected by the ITC allows it to focus on the recent imports; and third, the period selected by the ITC is sufficiently long to allow conclusions to be drawn regarding the existence of increased imports."[54]

37. In *US – Line Pipe*, the Panel examined whether the United States authority was entitled to compare interim 1998 data with interim 1999 data in performing the analysis or whether it was, in addition, required to compare "the second half of 1998" with interim 1999 data.[55] The Panel found, in a statement not reviewed by the Appellate Body, that the *Agreement on Safeguards* does not prescribe such practice by the importing Member:

> "We recall that there are no provisions in the Safeguards Agreement which give any guidance on how the period of investigation should be broken down for purpose of analysis by the investigating authorities. In the case before us the period selected by the ITC would have allowed it to find that there was a decrease in the imports if the facts in the case supported such a finding. We do not believe that the methodology chosen by the ITC for the purposes of analysing whether or not there was an increase in imports was inherently biased or would have precluded it from performing a reasonable evaluation of the facts in the investigation. The United States asserts that the ITC acted according to its past practice, and that this shows that the methodology was objective and unbiased. We agree with the United States. The United States responds that a comparison of matching interim periods, in this case January–June, of different years, is the standard ITC practice.[56] According to the United States this standard practice helps eliminate the possible effect of any seasonal or cyclical distortions which may affect the comparison. Although the ITC concedes that line pipe is not a seasonal product, we are of the view that the methodology applied in the comparison was not chosen in order to manipulate the data and show a particular result. Nor is there any evidence of manipulation or bias resulting from an alleged inconsistency with the ITC's serious injury analysis. Although the ITC did make some observations that include or make reference to the second half of 1998 in its determination on serious injury or threat of serious injury, we do not consider that the ITC was comparing the situation in the first half of 1999 to that in the second half of 1998. The ITC was simply describing factual circumstances that existed in the second half of 1998 and

[52] Panel Report on *US – Line Pipe*, para. 7.193.
[53] Panel Report on *US – Line Pipe*, para. 7.194.

[55] Panel Report on *US – Line Pipe*, para. 7.192.
[56] The fact that the ITC conformed to its previous practice does not necessarily mean that the methodology used, or that such past practice, is in conformity with the Agreement. Nevertheless, it has not been established that the usual ITC practice regarding the period of investigation was not appropriate for the line pipe investigation.

the first half of 1999. The ITC was not drawing conclusions based on a comparison of those periods."[57]

38. The Panel on *Argentina – Preserved Peaches* concurred with the Panel on *US – Line Pipe* (see paragraph 33 above) that the word "recent" does not imply that the analysis must focus exclusively on conditions at the end of the period of analysis.[58] The Panel believed that a recent and sharp increase in imports is a necessary, but not a sufficient, condition to satisfy Article 2.1 of the *Agreement on Safeguards* and Article XIX:1(a) of the *GATT 1994*:

"The increase is not merely the product of a quantitative analysis, it must also be qualitative. This was the approach of the Appellate Body in the passage quoted above from *Argentina – Footwear (EC),* where it found that an increase in imports as required by Article 2.1 and Article XIX:1(a) must be recent, sudden, sharp and significant *enough*, both quantitatively and qualitatively. It is therefore not sufficient to find that an increase in imports is only recent, sudden, sharp and significant mathematically.

The qualitative analysis required was illustrated by the Appellate Body in *Argentina – Footwear (EC)* when it interpreted the requirement in Article 4.2(a) that the competent authorities evaluate the "rate and amount" of the increase in imports. They found that it meant that the competent authorities in that case should have considered the trends in imports over the period of investigation, rather than just comparing the end points, and to consider the sensitivity of their analysis to the particular end points of the investigation period used.[59]"[60]

39. In *Argentina – Preserved Peaches*, the Panel also concluded that there is no absolute formula to determine whether increased imports justify the application of a safeguard measure:

"[T]he point is that there is no fixed period of five years or any other length of time over which figures can simply be subtracted to yield an increase in imports in the sense of Article 2.1 and Article XIX:1(a). Accordingly, neither the mathematical increase in imports of preserved peaches in the last two years, nor the mathematical decrease over the whole five year period of analysis, is determinative."[61]

40. In *US – Steel Safeguards*, the Panel, in a finding upheld by the Appellate Body, concluded that "a finding that imports have increased pursuant to Article 2.1 can be made when an increase evidences a certain degree of recentness, suddenness, sharpness and significance".[62] In stating this, the Panel emphasized "that there are no absolute standards as regards *how* sudden, recent, and significant the increase must be in order to qualify as an 'increase' in the sense of Article 2.1 of the Agreement on Safeguards", but added that one cannot conclude "that any increase between any two identified points in time meets the requirements of Article 2.1 of the Agreement on Safeguards".[63]

41. In *US – Steel Safeguards*, the Panel, in a ruling explicitly confirmed by the Appellate Body, insisted that there are no absolute standards in judging how sudden, recent and significant the increase must be in order to qualify as an "increase" in the sense of Article 2.1 of the Agreement on Safeguards.[64] The Panel said that the evaluation is not to be done in the abstract. Instead according to the Panel "[a] *concrete* evaluation is what is called for" and, thus, a "competent authority must conduct an analysis considering all the features of the development of import quantities and that an increase in imports has a certain degree of being recent and sudden".[65] The Panel went on to state the importance of the analysis of the entire period of investigation:

"[A] competent authority's findings on increased imports, distinct from its causality and injury findings, *may be informed by the results of its entire investigation*. The competent authority's findings on the first requirement – increased imports – may have effects on the injury findings or on the causation findings, as prescribed by Article 4.2(a). As a competent authority considers the other conditions necessary for imposition of a safeguard, it determines, as directed by the Appellate Body in *Argentina – Footwear (EC)*, whether the increase in imports was recent enough, sudden enough, and significant enough to cause or threaten serious injury to the relevant domestic producers."[66]

42. In *US – Steel Safeguards*, the Panel, in findings upheld by the Appellate Body, addressed the question of how recently the imports must have increased and concurred with the Panel's view in *US – Line Pipe* (see paragraph 34 above) in stating as follows:

"As the Panel in *US – Line Pipe* did,[67] that Article 2.1 of the Agreement on Safeguards speaks of a product that 'is being imported ... in such increased quantities'. Thus, imports need not be increas*ing* at the time of the determination; what is necessary is that imports *have* increase*d*, if the products continue 'being imported' in (such) increase*d* quantities. The Panel, therefore, agrees with the *US – Line Pipe* Panel's view that the fact that the increase in imports must be 'recent' does not mean that

it must continue up to the period immediately preceding the investigating authority's determination, nor up to the very end of the period of investigation.[68] As pointed out by the Panel in *US – Line Pipe*,[69] the most recent data must be the focus, but should not be considered *in isolation* from the data pertaining to the less recent portion of the period of investigation. However, as indicated by the present continuous 'are being', there is an implication that imports, in the present, remain at higher (i.e. increased) levels.

Whether a decrease in imports at the end of the period of investigation, in the individual case, prevents a finding of increased imports in the sense of Article 2.1 of the Agreement on Safeguards will, therefore, depend on whether, despite the later decrease, a previous increase nevertheless results in the product (still) 'being imported in (such) increased quantities'. In this evaluation, factors that must be taken into account are the duration and the degree of the decrease at the end of the relevant period of investigation, as well as the nature, for instance the sharpness and the extent, of the increase that intervened beforehand.

To give an extreme example, a short and very recent slight decrease would not detract from an overall increase if imports have increased tenfold over the several years beforehand. Conversely, to give an opposite extreme example, one could no longer talk about a product that 'is being imported in (such) increased quantities', or in fact in *any* increased quantities at all, if, at the time of the determination, import numbers have plummeted nearly to zero or to a level below any past point in the period of investigation.[70]

The Panel believes that, in their investigation whether imports have increased in the recent period, and whether increased imports are causing serious injury to the domestic producers of like or directly competitive domestic products, competent authorities are required to consider the *trends* in imports over the period of investigation, as suggested by Article 4.2(a).[71] While Article 4.2(a) requires the evaluation of the 'rate and amount of the increase in imports . . . in absolute and relative terms', the Panel sees no basis for the argument that this rate must always accelerate or that the rate must always be positive at each point in time during the period of investigation."[72]

43. In *US – Steel Safeguards*, the Appellate Body reiterated the importance of trends over the entire period of investigation:

> "A determination of whether there is an increase in imports cannot, therefore, be made merely by comparing the end points of the period of investigation. Indeed, in cases where an examination does not demonstrate, for instance, a clear and uninterrupted upward trend in import volumes, a simple end-point-to-end-point analysis could easily be manipulated to lead to different results, depending on the choice of end points. A comparison could support either a finding of an increase or a decrease in import volumes simply by choosing different starting and ending points.
>
> For instance, if the starting point for the period of investigation were set at a time when import levels were particularly low, it would be more likely that an increase in import volumes could be demonstrated. The use of the phrase 'such increased quantities' in Articles XIX:1(a) and 2.1, and the requirement in Article 4.2 to assess the 'rate and amount' of the increase, make it abundantly clear, however, that such a comparison of end points will *not* suffice to demonstrate that a product 'is being imported in such increased quantities' within the meaning of Article 2.1. Thus, a demonstration of 'any increase' in imports between any two points in time is not sufficient to demonstrate 'increased imports' for purposes of Articles XIX and 2.1. Rather, as we have said, competent authorities are required to examine the trends in imports over the entire period of investigation.[73]"[74]

44. The Appellate Body on *US – Steel Safeguards* referred to the importance of an explanation concerning the trend in imports over the entire period of investigation:

> "In our view, what is called for in every case is an *explanation* of how the *trend* in imports supports the competent authority's finding that the requirement of 'such increased quantities' within the meaning of Articles XIX:1(a) and 2.1 has been fulfilled. It is this *explanation* concerning the *trend* in imports – over the entire period of investigation – that allows a competent authority to *demonstrate* that 'a product is being imported in such increased quantities'."[75]

45. In *US – Steel Safeguards*, the Appellate Body upheld the findings of the Panel that by not explaining the "most recent decrease" in absolute imports, the USITC had *not* provided an explanation concerning the overall *trend* in imports that had occurred during the period of investigation:

> "Again we recall that, in *Argentina – Footwear (EC)*, in clarifying the *Agreement on Safeguards*, we stated that 'authorities are required to examine trends'.[76] In our

[75] Appellate Body Report on *US – Steel Safeguards*, para. 374
[76] (*footnote original*) Appellate Body Report, *Argentina – Footwear (EC)*, para. 129.

view, by failing to address the decrease in imports that occurred between interim 2000 and interim 2001 (the most recent decrease), the United States did not – and could not – provide a reasoned and adequate explanation of how the facts supported its finding that imports of hot-rolled bar 'increased', as required by Article 2.1 of the *Agreement on Safeguards*. This failure to account for the decrease in absolute imports is all the more serious in the light of the fact that the intervening trend that was not addressed by the USITC occurred at the very end of the period of investigation. In *US – Lamb*, we found that the competent authority 'must assess' the data from the most recent past 'in the context of the data for the entire investigative period'.[77] As the Panel found, it is, precisely, those most recent data that the USITC failed to account for with respect to absolute imports."[78]

46. In *US – Steel Safeguards*, the Appellate Body confirmed that imports need not be increasing at the time of the determination and insisted on the investigating authority's obligation to examine the trends of imports over the entire period of investigation (see paragraph 43 above):

"We agree with the United States that Article 2.1 does *not* require that imports need to be increasing at the time of the determination. Rather, the plain meaning of the phrase 'is being imported in such increased quantities' suggests merely that imports must *have* increased, and that the relevant products continue 'being imported' in (such) increased quantities. We also do *not* believe that a decrease in imports at the end of the period of investigation would necessarily prevent an investigating authority from finding that, nevertheless, products continue to be imported 'in such increased quantities.'[79]"[80]

47. The Appellate Body on *US – Steel Safeguards* reiterated its ruling made in *Argentina – Footwear (EC)* (see paragraph 31 above) and emphasized the importance of reading "such increased quantities" in the context of Article XIX:1(a) of the *GATT 1994* and Article 2.1 of the *Agreement on Safeguards* which confirm that such increased imports must be linked to the ability of the relevant increased imports to cause serious injury or threat thereof:

"We reaffirm this finding [*Argentina – Footwear (EC)*]. In that appeal, we underlined the importance of reading the requirement of 'such increased quantities' in the context in which it appears in both Article XIX:1(a) of the GATT 1994 and Article 2.1 of the *Agreement on Safeguards*. That context includes the words 'to cause or threaten to cause serious injury'. Read in context, it is apparent that 'there must be "such increased quantities" as to cause or threaten to cause serious injury to the domestic industry in order to fulfill this requirement for applying a safeguard measure.'[81] Indeed, in our view, the term 'such', which appears in the phrase 'such increased quantities' in Articles XIX:1(a) and 2.1, clearly links the relevant increased imports to their ability to cause serious injury or the threat thereof. Accordingly, we agree with the United States that our statement in *Argentina – Footwear (EC)* that the 'increase in imports must have been recent enough, sudden enough, sharp enough and significant enough . . . to cause or threaten to cause serious injury',[82] was a statement about 'the entire investigative responsibility of the competent authorities under the Safeguards Agreement',[83] and that '[w]hether an increase in imports is recent, sudden, sharp and significant enough to cause or threaten serious injury are questions that are answered as the competent authorities proceed with the remainder of their analysis (i.e., their consideration of serious injury/threat and causation).'[84]"[85]

(iv) Absolute or relative increase in imports

48. In *US – Line Pipe*, the Panel faced the question of whether the finding of increased imports can be maintained in light of a decline in absolute imports during part of the investigation period. The Panel found, in a statement not reviewed by the Appellate Body, that decline in absolute imports at the end of period of investigation should not be considered in isolation, and does not preclude a finding of imports "in such increased quantities" for the purpose of Article 2.1:

"In a safeguard investigation, the period of investigation for examination of the increased imports tends to be the same as that for the examination of the serious injury to the domestic industry. This contrasts with the situation in an anti-dumping or countervailing duty investigation where the period for evaluating the existence of dumping or subsidization is usually shorter than the period of investigation for a finding of material injury. We are of the view that one of the reasons behind this difference is that, as found by the Appellate Body in *Argentina – Footwear Safeguard,* 'the determination of whether the requirement of imports "in such increased quantities" is met is not a merely mathematical or technical determination.' The Appellate Body noted that when it comes to a determination of increased imports 'the competent authorities are required to consider the *trends* in imports over the period of investigation'. The evaluation of

[77] (*footnote original*) Appellate Body Report, *US – Lamb*, para. 138.
[78] Appellate Body Report on *US – Steel Safeguards*, para. 388.
[79] (*footnote original*) We note that a decrease at the end of a period of investigation may, for instance, result from the seasonality of the relevant product, the timing of shipments, or importer concerns about the investigation. As we have said, the text of Article 2.1 does not necessarily prevent, in our view, a finding of "increased imports" in the face of such a decline.
[80] Appellate Body Report on *US – Steel Safeguards*, para. 367
[81] (*footnote original*) Appellate Body Report, *Argentina – Footwear (EC)*, para. 131.
[82] (*footnote original*) *Ibid.*
[83] (*footnote original*) United States' appellant's submission, para. 107.
[84] (*footnote original*) *Ibid.*
[85] Appellate Body Report on *US – Steel Safeguards*, para. 346

trends in imports, as with the evaluation of trends in the factors relevant for determination of serious injury to the domestic industry, can only be carried out over a period of time. Therefore, we conclude that the considerations that the Appellate Body has expressed with respect to the period relevant to an injury determination also apply to an increased imports determination.

In view of the considerations expressed above we do not believe that the analysis of data for the first semester of 1999 should be considered in isolation. We find the analysis of whether imports had increased on a yearly basis from 1994 to 1998 very relevant to the question of whether there were increased imports. Although we are aware that imports decreased for the first semester of 1999 when compared to the first semester of 1998, we note that regardless of the decrease for the first half of 1999, the ITC in their report found that imports of line pipe 'remained at a very high level in interim 1999'. This high level of imports for 1999 supports a finding that imports were still entering the United States 'in such increased quantities' as prescribed in Article 2.1. In other words, although Korea may be correct in arguing that absolute imports declined, this does not preclude a finding of imports 'in such increased quantities' for the purpose of Article 2.1. Based on the above considerations we conclude that the ITC was correct in its finding of an absolute increase in imports of line pipe."[86]

(d) "and under such conditions"

49. The Panel reports in *Korea – Dairy*,[87] *Argentina – Footwear (EC)*[88] and *US – Wheat Gluten*[89] have held that the phrase "under such conditions" in Article 2.1 does not constitute a separate analytical requirement in a safeguards investigation. Related to this, these Panel Reports observe that this phrase does not necessarily require an analysis of the prices of imported products and like or directly competitive products. The Appellate Body agreed with these findings in *US – Wheat Gluten*.[90]

50. The Panel on *Korea – Dairy* stated:

"We consider that the phrase 'and under such conditions' does not provide for an additional criterion or analytical requirement to be performed before an importing Member may impose a safeguard measure. We are of the view that the phrase 'and under such conditions' qualifies and relates both to the circumstances under which the products under investigation are imported and to the circumstances of the market into which products are imported, both of which must be addressed by the importing country when performing its assessment as to whether the increased imports are causing serious injury to the domestic industry producing the like or directly competitive products. In this sense, we consider that the phrase 'under such conditions' refers more generally to the obligation imposed on the importing country to perform an adequate assessment of the impact of the increased imports at issue and the specific market under investigation."[91]

51. In this connection, the Panel on *Argentina – Footwear (EC)* explained the relationship between the phrase "under such conditions" in Article 2.1 of the *Agreement on Safeguards* and the analysis under Article 4.2(a) and (b):

"In our view, the phrase 'under such conditions' does not constitute a specific legal requirement for a price analysis, in the sense of an analysis separate and apart from the increased import, injury and causation analyses provided for in Article 4.2. We consider that Article 2.1 sets forth the fundamental legal requirements (i.e., the conditions) for application of a safeguard measure, and that Article 4.2 then further develops the operational aspects of these requirements."[92]

52. In *Argentina – Footwear (EC)*, the Panel also considered the phrase "under such conditions" as referring to the conditions of competition between the imported product and the domestic like or directly competitive products in the importing country's market. The Panel held that the phrase "under such conditions" in fact refers to the substance of the causation analysis that must be performed under Article 4.2(a) and (b):

"We believe that the phrase 'under such conditions' would indicate the need to analyse the *conditions of competition* between the imported product and the domestic like or directly competitive products in the *importing country's market*. That is, it is these 'conditions of competition' in the importing country's market that will determine whether increased imports cause or threaten to cause serious injury to the domestic industry. The text of Article 2.1 supports this interpretation, as the relevant phrase in its entirety reads 'under such conditions *as to cause* or threaten to cause serious injury' (emphasis added). Seen another way, for a safeguard measure to be permitted, the investigation must demonstrate that conditions of competition in the importing country's market are such that the increased imports can and do cause or threaten to cause serious injury. Article 4.2(a) confirms this interpretation, in requiring that the competent authorities 'evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation of that industry', which is further reinforced by Article 4.2(b)'s requirement that the analysis be conducted on the basis of 'objective evidence'. In our view, these provisions give meaning to the phrase 'under such

[86] Panel Report on *US – Line Pipe*, paras. 7.209–7.210. See also the Panel Report on *Argentina – Preserved Peaches*, paras. 7.54–7.55.
[87] Panel Report on *Korea – Dairy*, para. 7.52.
[88] Panel Report on *Argentina – Footwear (EC)*, para. 8.249.
[89] Panel Report on *US – Wheat Gluten*, para. 8.108.
[90] Appellate Body Report on *US – Wheat Gluten*, para. 78.
[91] Panel Report on *Korea – Dairy*, para. 7.52.
[92] Panel Report on *Argentina – Footwear (EC)*, para. 8.249.

conditions', and support as well our view that for an analysis to demonstrate causation, it must address specifically the nature of the interaction between the imported and domestic products in the domestic market of the importing country. That is, we believe that the phrase 'under such conditions' in fact refers to the substance of the causation analysis that must be performed under Article 4.2(a) and (b)."[93]

53. In the view of the Panel on *Argentina – Footwear (EC)*, the factors underlying competition between domestic and imported like products are to be analysed within the context of the causation analysis:

"We note in this regard that there are different ways in which products can compete. Sales price clearly is one of these, but it is certainly not the only one, and indeed may be irrelevant or only marginally relevant in any given case. Other bases on which products may compete include physical characteristics (e.g., technical standards or other performance-related aspects, appearance, style or fashion), quality, service, delivery, technological developments, consumer tastes, and other supply and demand factors in the market. In any given case, other factors that affect the conditions of competition between the imported and domestic products may be relevant as well. It is these sorts of factors that must be analysed on the basis of objective evidence in a causation analysis to establish the effect of the imports on the domestic industry."[94]

54. The Panel on *US – Wheat Gluten* also effectively equated the phrase "under such conditions" with the causation analysis:

"We are of the view that the phrase 'under such conditions' does not impose a separate analytical requirement in addition to the analysis of increased imports, serious injury and causation. Rather, this phrase refers to the substance of the causation analysis that must be performed under Article 4.2(a) and (b) SA."[95]

55. The Panel on *Korea – Dairy* specifically addressed the issue of the analysis of price competition between domestic and imported like products in the context of the phrase "under such conditions":

"Although the prices of the imported products will most often be a relevant factor indicating how the imports do, in fact, cause serious injury to the domestic industry, we note that there is no explicit requirement in Article 2,[96] that the importing Member perform a price analysis of the imported products and the prices of the like or directly competitive products in the market of the importing country."[97]

56. In *US – Wheat Gluten*, the Appellate Body expressed its agreement with the Panel's analysis. Like the Panel, the Appellate Body considered the phrase "under such conditions" to refer to the analysis to be performed under Article 4.2. The Appellate Body also referred to the phrase "under such conditions" in Article 2.1 as support for its view that Article 4.2 contemplates an analysis of whether increased imports, in conjunction with other relevant factors,[98] cause serious injury:

"Article 2.1 reflects closely the 'basic principles' in Article XIX:1(a) of the GATT 1994 and also sets forth 'the conditions for imposing a safeguard measure', including those relating to causation. The rules on causation, which are elaborated further in the remainder of the *Agreement on Safeguards*, therefore, find their roots in Article 2.1. According to that provision, a safeguard measure may be applied if a 'product is being imported . . . *in such increased quantities* . . . *and under such conditions as to cause* . . .' serious injury. Thus, under Article 2.1, the causation analysis embraces two elements: the first relating to increased 'imports' specifically and the second to the 'conditions' under which imports are occurring.

Each of these two elements is, in our view, elaborated further in Article 4.2(a). While Article 2.1 requires account to be taken of the 'increased quantities' of imports, both in 'absolute' terms and 'relative to domestic production', Article 4.2(a) states, correspondingly, that 'the rate and amount of the increase in imports of the product concerned in absolute and relative terms, [and] the share of the domestic market taken by increased imports' are relevant.

As for the second element under Article 2.1, we see it as a complement to the first. While the first element refers to increased imports specifically, the second relates more generally to the 'conditions' in the marketplace for the product concerned that may influence the domestic industry. Thus, the phrase 'under such conditions' refers generally to the prevailing 'conditions', in the marketplace for the product concerned, when the increase in imports occurs. Interpreted in this way, the phrase 'under such conditions' is a shorthand reference to the remaining factors listed in Article 4.2(a), which relate to the overall state of the domestic industry and the domestic market, as well as to other factors 'having a bearing on the situation of [the] industry'. The phrase 'under such conditions', therefore, supports the view that, under Articles 4.2(a) and 4.2(b) of the *Agreement on Safeguards*, the competent authorities should determine whether the increase in imports, not alone, but in con-

[98] With respect to the analysis of other relevant factors, see paras. 192–203 of this Chapter.

junction with the other relevant factors, cause serious injury.[99]"[100]

57. The Appellate Body on *US – Steel Safeguards* concluded that assessing whether increased imports justify the application of a safeguard measure calls for the assessment of the "conditions" under which those imports occur:

> "We further note that Article XIX:1(a) of the GATT 1994 and Article 2.1 of the *Agreement on Safeguards* require that the relevant product 'is being imported in such increased quantities *and under such conditions* as to cause or threaten to cause serious injury'. The question whether 'such increased quantities' of imports will suffice as 'increased imports' to justify the application of a safeguard measure is a question that can be answered only in the light of 'such conditions' under which those imports occur. The relevant importance of these elements varies from case to case."[101]

(e) The relevance of price analysis when assessing the situation of the domestic industry

58. As the Panel on *Argentina – Footwear (EC)* reveals, a price analysis may be required in the specific circumstances of a particular case:

> "Therefore, in the present dispute, while the phrase 'under such conditions' does not require a price analysis per se, it nevertheless has an implication for the nature and content of a causation analysis, which may logically necessitate a price analysis in a given case. Moreover, the absence of an analysis of the conditions of competition in the domestic market for the product in question, in which the interaction of the imported with the domestic product is explained in the report on the investigation (including inter alia a price analysis where relevant), results in an incomplete analysis of the causal link."[102]

59. The Panel on *US – Wheat Gluten* also adopted an approach to price analysis as a non-mandatory, but potentially relevant point of analysis:

> "'Price' is not expressly listed in Article 4.2(a) [of the Agreement on Safeguards] as a 'relevant factor' having a bearing on the situation of the domestic industry. However, this is not to say that 'price' may not be a relevant factor in a given case. An imported product can compete with a domestic product in various ways in the market of the importing country. Clearly, the relative price of the imported product is one of these ways, but it is certainly not the only way, and it may be irrelevant or only marginally relevant in a given case.
>
> Therefore, in the context of safeguards measures, the relevance of 'price' will vary from case to case, in light of the particular circumstances and the nature of the particular product and domestic industry involved. Given that this is the nature of the 'price' factor under the Agreement on Safeguards, we consider that the phrase 'under such conditions' does not necessarily, in every case, require a price analysis."[103]

60. The Panel on *US – Steel Safeguards*, in findings not reviewed by the Appellate Body, was of the view that price is the most important factor when analysing conditions of competition:

> "A consideration of the various factors that have been mentioned provides context for the consideration of *price*, which, in the Panel's view, is an important, if not the most important, factor in analysing the conditions of competition in a particular market, although consideration of prices is not necessarily mandatory.[104] The Panel agrees with the argument advanced by the European Communities insofar as it submits that price will often be relevant to explain how the increased volume of imports caused serious injury. Indeed, we consider that relative price trends as between imports and domestic products will often be a good indicator of whether injury is being transmitted to the domestic industry (provided that the market context for such trends is borne in mind) given that price changes have an immediate effect on profitability, all other things being equal. In turn, profitability is a useful measure of the state of the domestic industry."[105]

61. After referring to the Panel Reports on *Argentina – Footwear (EC)* (see paragraph 53 above) and *US – Wheat Gluten* (see paragraph 59 above), the Panel on *US – Steel Safeguards* noted that pricing trends must always be considered in context:

> "With respect to the argument made by the European Communities that if imports are sold at a higher price than domestic products, it is unlikely that such imports are responsible for any serious injury, the Panel considers that the existence or absence of underselling by imports cannot, on its own, lead to a definitive conclusion regarding the presence or otherwise of a causal link between the increased imports and the serious injury. In our view, pricing trends must always be considered in context. It is only after this contextual consideration that conclusions can be drawn regarding the existence or otherwise of the causal link."[106]

---

[99] (*footnote original*) We do not, of course, exclude the possibility that "serious injury" could be caused by the effects of increased imports *alone*.

[104] (*footnote original*) The Panel agrees with the following comments made by the panel in *Korea – Dairy* at para. 7.51 in this regard: "Although the prices of the imported products will most often be a relevant factor indicating how the imports do, in fact, cause serious injury to the domestic industry, we note that there is no explicit requirement in Article 2, that the importing Member perform a price analysis of the imported products and the prices of the like or directly competitive products in the market of the importing country."

[105] Panel Report on *US – Steel Safeguards*, para.10.320.

[106] Panel Report on *US – Steel Safeguards*, para. 10.322.

(f) Scope of application of a safeguard measure in the case of a regional trade agreement

62. The Panel on *Argentina – Footwear (EC)* considered whether Argentina was permitted under the *Agreement on Safeguards* to take MERCOSUR imports into account in the analysis of injury factors and of a causal link between increased imports and the alleged (threat of) serious injury, and was at the same time permitted to exclude MERCOSUR countries from the application of the safeguard measure imposed.[107] Relying on footnote 1 to Article 2.1 and Article XXIV:8 of the GATT 1994, the Panel concluded that "in the case of a customs union the imposition of a safeguard measure only on third country sources of supply cannot be justified on the basis of a member-state-specific investigation that finds serious injury or threat thereof caused by imports from all sources of supply from within and outside a customs union".[108] Upon appeal, the Appellate Body reversed the legal reasoning and findings of the Panel relating to footnote 1 to Article 2.1 since it considered that footnote 1 to Article 2.1 did not apply to the safeguard measures imposed by Argentina in this case:

> "We question the Panel's implicit assumption that footnote 1 to Article 2.1 of the *Agreement on Safeguards* applies to the facts of this case. The ordinary meaning of the first sentence of footnote 1 appears to us to be that the footnote only applies when a customs union applies a safeguard measure 'as a single unit or on behalf of a member State'.
>
> MERCOSUR did not apply these safeguard measures, either as a single unit or on behalf of Argentina.
>
> . . .
>
> It is Argentina that is a Member of the WTO for the purposes of Article 2 of the *Agreement on Safeguards*, and it is Argentina that applied the safeguard measures after conducting an investigation of products being imported into *its* territory and the effects of those imports on *its* domestic industry. For these reasons, we do not believe that footnote 1 to Article 2.1 applies to the safeguard measures imposed by Argentina in this case. . . ."[109]

63. The Appellate Body on *Argentina – Footwear (EC)* also rejected the Panel's view that Article XXIV of *GATT 1994* was relevant to the issue before it. Recalling its finding in *Turkey – Textiles*, the Appellate Body reiterated that Article XXIV may serve as an "affirmative defence" and emphasized that Argentina had not argued expressly that Article XXIV provided it with such an affirmative defence:

> "This issue, as the Panel itself observed, is whether Argentina, after including imports from all sources in its investigation of 'increased imports' of footwear products into its territory and the consequent effects of such imports on its domestic footwear industry, was justified in excluding other MERCOSUR member States from the application of the safeguard measures. In our Report in *Turkey – Restrictions on Imports of Textile and Clothing Products*, we stated that under certain conditions, 'Article XXIV may justify a measure which is inconsistent with certain other GATT provisions.' We indicated, however, that this defence is available only when it is demonstrated by the Member imposing the measure that 'the measure at issue is introduced upon the formation of a customs union that fully meets the requirements of subparagraphs 8(a) and 5(a) of Article XXIV' and 'that the formation of that customs union would be prevented if it were not allowed to introduce the measure at issue.'
>
> In this case, we note that Argentina did not argue before the Panel that Article XXIV of the GATT 1994 provided it with a defence to a finding of violation of a provision of the GATT 1994. As Argentina did not argue that Article XXIV provided it with a defence against a finding of violation of a provision of the GATT 1994, and as the Panel did not consider whether the safeguard measures at issue were introduced upon the formation of a customs union that fully meets the requirements of subparagraphs 8(a) and 5(a) of Article XXIV, we believe that the Panel erred in deciding that an examination of Article XXIV:8 of the GATT 1994 was relevant to its analysis of whether the safeguard measures at issue in this case were consistent with the provisions of Articles 2 and 4 of the *Agreement on Safeguards*."[110]

(g) Parallelism

64. In *Argentina – Footwear (EC)*, the Appellate Body examined "whether . . . there is an implied '*parallelism* between the scope of a safeguard *investigation* and the scope of the *application* of safeguard measures'".[111] In this connection, the Appellate Body held:

> "Taken together, the provisions of Articles 2.1 and 4.1(c) of the *Agreement on Safeguards* demonstrate that a Member of the WTO may only apply a safeguard measure after that Member has determined that a product is being imported *into its territory* in such increased quantities and under such conditions as to cause or threaten to cause serious injury to *its* domestic industry *within its territory*. According to Articles 2.1 and 4.1(c), therefore, all of the relevant aspects of a safeguard investigation must be conducted by the Member that ultimately applies the safeguard measure, on the basis of increased imports entering its territory and causing or threatening to cause serious injury to the domestic industry within its territory.

---

[107] (*footnote original*) Panel Report on *Argentina – Footwear (EC)*, para. 8.75.
[108] (*footnote original*) Panel Report on *Argentina – Footwear (EC)*, para. 8.102.
[109] Appellate Body Report on *Argentina – Footwear (EC)*, paras. 106–108.
[110] Appellate Body Report on *Argentina – Footwear (EC)*, paras. 109–110.
[111] Appellate Body Report on *Argentina – Footwear (EC)*, para. 111.

While Articles 2.1 and 4.1(c) set out the conditions for imposing a safeguard measure and the requirements for the scope of a safeguard *investigation*, these provisions do not resolve the matter of the scope of *application* of a safeguard measure. In that context, Article 2.2 of the *Agreement on Safeguards* provides:

> 'Safeguard measures shall be applied to a product being imported irrespective of its source.'

As we have noted, in this case, Argentina applied the safeguard measures at issue after conducting an investigation of products being imported into Argentine territory and the effects of those imports on Argentina's domestic industry. In applying safeguard measures on the basis of this investigation in this case, Argentina was also required under Article 2.2 to apply those measures to imports from all sources, including from other MERCOSUR member States.

On the basis of this reasoning, and on the facts of this case, we find that Argentina's investigation, which evaluated whether serious injury or the threat thereof was caused by imports from *all* sources, could only lead to the imposition of safeguard measures on imports from *all* sources. Therefore, we conclude that Argentina's investigation, in this case, cannot serve as a basis for excluding imports from other MERCOSUR member States from the application of the safeguard measures."[112]

65. The Appellate Body on *Argentina – Footwear (EC)* also stressed that it was not ruling on:

> "[W]hether, as a general principle, a member of a customs union can exclude other members of that customs union from the application of a safeguard measure."[113]

66. In *US – Wheat Gluten*, the Appellate Body upheld the finding by the Panel in that dispute that the United States had acted inconsistently with Articles 2.1 and 4.2 of the *Agreement on Safeguards* when, after including imports from all sources in their investigation of increased imports of wheat gluten into the United States and the consequent effects of such imports on the domestic industry, the United States investigating authorities excluded imports from Canada from the application of the safeguard measure. This exclusion was based on a separate inquiry concerning whether Canada accounted for a substantial share of total imports and whether imports from Canada contributed "importantly" to the serious injury caused by imports. The Appellate Body reiterated its findings from *Argentina – Footwear (EC)* on the existence of parallelism between a safeguard investigation and the application of a safeguard measure:

> "[A]rticle 2.1 of the *Agreement on Safeguards* . . . provides that a safeguard measure may only be applied when 'such increased quantities' of a "*product* [are] *being imported* into its territory . . . under such conditions as to cause or threaten to cause serious injury to the domestic industry'. As we have said, this provision, as elaborated in Article 4 of the *Agreement on Safeguards*, sets forth the *conditions* for imposing a safeguard measure. Article 2.2 of the *Agreement on Safeguards*, which provides that a safeguard measure 'shall be applied to a *product being imported* irrespective of its source', sets forth the rules on the *application* of a safeguard measure.
>
> The same phrase – 'product . . . being imported' – appears in *both* these paragraphs of Article 2. In view of the identity of the language in the two provisions, and in the absence of any contrary indication in the context, we believe that it is appropriate to ascribe the *same* meaning to this phrase in both Articles 2.1 and 2.2. To include imports from all sources in the determination that increased imports are causing serious injury, and then to exclude imports from one source from the application of the measure, would be to give the phrase 'product being imported' a *different* meaning in Articles 2.1 and 2.2 of the *Agreement on Safeguards*. In Article 2.1, the phrase would embrace imports from *all* sources whereas, in Article 2.2, it would exclude imports from certain sources. This would be incongruous and unwarranted. In the usual course, therefore, the imports included in the determinations made under Articles 2.1 and 4.2 should correspond to the imports included in the application of the measure, under Article 2.2.[114]"[115]

67. Furthermore, the Appellate Body in *US – Wheat Gluten* rejected the United States argument that its safeguard measure was nevertheless justified because its authorities had conducted an additional investigation focusing specifically on imports from Canada:

> "In the present case, the United States asserts that the exclusion of imports from Canada from the scope of the safeguard measure was justified because, following its investigation based on imports from *all* sources, the USITC conducted an additional inquiry specifically focused on imports from Canada. The United States claims, in effect, that the scope of its initial investigation, *together with its subsequent and additional inquiry* into imports from Canada, did correspond with the scope of application of its safeguard measure.
>
> In our view, however, although the USITC examined the importance of imports from Canada separately, it did not

[112] Appellate Body Report on *Argentina – Footwear (EC)*, para. 111–113.

[113] Appellate Body Report on *Argentina – Footwear (EC)*, para. 114.

[114] (*footnote original*) The United States relies on Article 9.1 of the *Agreement on Safeguards* in support of its argument that the scope of the serious injury investigation need not correspond exactly to the scope of application of a safeguard measure. Article 9.1 is an exception to the general rules set out in the *Agreement on Safeguards* that applies only to developing country Members. We do not consider that it is of relevance to this appeal.

[115] Appellate Body Report on *US – Wheat Gluten*, paras. 95–96.

make any explicit determination relating to increased imports, *excluding imports from Canada*. In other words, although the safeguard measure was applied to imports from all sources, *excluding* Canada, the USITC did not establish explicitly that imports from these *same* sources, excluding Canada, satisfied the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*. Thus, we find that the separate examination of imports from Canada carried out by the USITC in this case was not a sufficient basis for the safeguard measure ultimately applied by the United States."[116]

68. The Appellate Body on *US – Line Pipe* reiterated its ruling in *US – Wheat Gluten* by stating as follows:

"As we then stated in *US – Wheat Gluten*, 'the imports included in the determinations made under Articles 2.1 and 4.2 should correspond to the imports included in the application of the measure, under Article 2.2.' We added that a gap between imports covered under the investigation and imports falling within the scope of the measure can be justified only if the competent authorities 'establish explicitly' that imports from sources covered by the measure 'satisf[y] the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*.' And, as we explained further in *US – Lamb*, in the context of a claim under Article 4.2(a) of the *Agreement on Safeguards*, 'establish[ing] explicitly' implies that the competent authorities must provide a '*reasoned and adequate explanation* of how the facts support their determination'."[117]

69. The Appellate Body on *US – Line Pipe* further concluded that by demonstrating the gap between imports covered under the investigation performed by the importing Member's competent authority and imports falling within the scope of the safeguard measure, the exporting Member established a prima facie case of the absence of "parallelism" with respect to the safeguard measure.[118]

"It is clear, therefore, that, in its investigation, the USITC considered imports from *all sources*, including imports from Canada and Mexico. Nevertheless, exports from Canada and Mexico were excluded from the safeguard measure at issue. Therefore, there is a gap between imports covered under the investigation performed by the USITC and imports falling within the scope of the measure.

In our view, Korea has demonstrated that the USITC considered imports from all sources in its investigation. Korea has also shown that exports from Canada and Mexico were excluded from the safeguard measure at issue. And, in our view, this *is* enough to have made a *prima facie* case of the absence of parallelism in the line pipe measure. Contrary to what the Panel stated,[119] we do not consider that it was necessary for Korea to address the information set out in the USITC Report, or in particular, in footnote 168 in order to establish a *prima facie* case of violation of parallelism. Moreover, to require Korea to rebut the information in the USITC Report, and in particular, in footnote 168, would impose an impossible burden on Korea because, as the exporting country, Korea would not have had any of the relevant data to conduct its own analysis of the imports."[120]

70. In addition, the Appellate Body in *US – Line Pipe* found that a footnote in the importing Member's safeguard determination report, which explained that it would have reached the same result had it excluded imports from FTA members in the investigation, does not meet the "establishes explicitly" requirement, and it is not a "reasoned and adequate explanation":

"Although footnote 168 contains a determination that imports from non-NAFTA sources increased significantly, footnote 168 does not, as we read it, establish *explicitly* that increased imports from non-NAFTA sources alone caused serious injury or threat of serious injury. Nor does footnote 168, as we read it, provide a *reasoned and adequate explanation* of how the facts would support such a finding. To be explicit, a statement must express distinctly all that is meant; it must leave nothing merely implied or suggested; it must be clear and unambiguous.

Footnote 168 does not express distinctly or state clearly and unambiguously how the facts would support a finding by the USITC that imports from non-NAFTA sources alone caused serious injury or threat of serious injury. Footnote 168 may, as the Panel found, provide a basis for a finding that imports from non-NAFTA sources, alone, caused serious injury, but this is not enough. Footnote 168 does not establish explicitly that imports from sources covered by the measure 'satisf[y] the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*.' Footnote 168 does not amount to a '*reasoned and adequate explanation* of how the facts support [the] determination.'"[121]

71. However, the Appellate Body in *US – Line Pipe* avoided ruling on whether Article 2.2 of the *Agreement on Safeguards* "permits a Member to exclude imports

[116] Appellate Body Report on *US – Wheat Gluten*, paras. 97–98.
[117] Appellate Body Report on *US – Line Pipe*, para. 181.
[118] Appellate Body Report on *US – Line Pipe*, para. 187. The Appellate Body found in *US – Line Pipe* that the importing Member violated Articles 2 and 4 of the *Agreement on Safeguards* by including FTA imports in the analysis of whether increased imports caused or threatened to cause serious injury, but excluding FTA imports from the application of the safeguard measure, without providing a reasoned and adequate explanation that establishes explicitly that imports from non-FTA sources by themselves satisfied the conditions for the application of a safeguard measure. Appellate Body report, para. 197.
[119] (*footnote original*) Panel Report on *US – Line Pipe*, para. 7.171.
[120] Appellate Body Report on *US – Line Pipe*, paras. 186–187.
[121] Appellate Body Report on *US – Line Pipe*, paras. 194–195.

originating in member states of a free-trade area from the scope of a safeguard measure", or on the question of whether Article XXIV of the *GATT 1994* permits excepting other members of an FTA from a safeguard measure. [122] For the latter question, the Appellate Body ruled as follows:

> "The question of whether Article XXIV of the GATT 1994 serves as an exception to Article 2.2 of the *Agreement on Safeguards* becomes relevant in only two possible circumstances. One is when, in the investigation by the competent authorities of a WTO Member, the imports that are exempted from the safeguard measure *are not considered* in the determination of serious injury. The other is when, in such an investigation, the imports that are exempted from the safeguard measure *are considered* in the determination of serious injury, *and* the competent authorities have *also* established explicitly, through a reasoned and adequate explanation, that imports from sources outside the free-trade area, alone, satisfied the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2." [123]

72. The Panel on *US – Steel Safeguards*, in a finding upheld by the Appellate Body,[124] recalled that the requirement of parallelism, as developed by panels and the Appellate Body, meant that the competent authorities must explicitly establish that imports covered by the safeguard measure satisfy the conditions for its application.[125] The Panel further added:

> "This implies that the competent authorities must provide a reasoned and adequate explanation of how the facts support their determination.[126] As the Appellate Body has also clarified, 'to be explicit, a statement must express distinctly all that is meant; it must leave nothing merely implied or suggested; it must be clear and unambiguous.'[127]
>
> The Panel believes that the requirement of parallelism also exists in the interest of the other Members. The other Members who are facing the safeguard measure should be able to assess its legality on the basis of the determination and explanations provided by the competent authorities. This function would not be fulfilled if the other Members were left with statements such as those to the effect that the exclusion of subsets of all imports would not change the conclusions and, elsewhere in the report, that certain imports are very small.
>
> Finally, the Panel notes the dispute between the parties as to whether competent authorities must consider imports from sources excluded by the measure as an 'other factor' in the sense of Article 4.2(b) of the Agreement on Safeguards, when they perform the exercise of establishing explicitly that imports from sources covered by the measure satisfy the requirements set out in Article 2.1 and elaborated in Article 4.2.
>
> As clarified by the Appellate Body, if the scope of the measure does not match the scope of the determination, competent authorities must 'establish *explicitly* that increased imports from non-[FTA] sources alone'[128] caused serious injury or threat of serious injury.[129] Increased imports from sources ultimately excluded from the application of the measure must hence be *excluded* from the analysis. The increase of these imports and their effect on the domestic industry cannot be used to support a conclusion that the product in question 'is being imported in such increased quantities so as to cause serious injury'. This makes it necessary – whether imports excluded from the measure are an 'other factor' or not – to account for the fact that excluded imports may have some injurious impact on the domestic industry. As said, this impact must not be used as a basis supporting the establishment of the Article 2.1 criteria." [130]

73. In *US – Steel Safeguards*, the Appellate Body indicated that the requirement of "parallelism" is found in the "parallel" language used in the first and second paragraphs of Article 2 of the *Agreement on Safeguards*:

> "The word 'parallelism' is not in the text of the *Agreement on Safeguards*; rather, the requirement that is

---

[122] The Panel in *US – Line Pipe* had interpreted the definition of a FTA in Article XXIV:8 "to mean that Members are authorised, under certain prescribed circumstances, to eliminate 'duties and other restrictive regulations of commerce (except, where necessary, those permitted under Articles XI, XII, XIII, XIV, XV and XX) . . . on substantially all the trade' between them and their free-trade area partners". The Panel further found that such an authorisation existed "despite the fact that the formation of a free-trade area will necessarily result in more favourable treatment for free-trade area partners than for non-free-trade area partners". The Panel concluded that the United States were entitled to rely on Article XXIV defence against Korea's claims of discrimination under Articles I, XIII and XIX (Panel Report on *US – Line Pipe*, paras. 7.140 and 7.146). However, the Appellate Body declared the Panel's findings in paragraphs 7.135 to 7.163 (which comprises the issues discussed above) moot and as having no legal effect (Appellate Body Report on *US – Line Pipe*, para. 199).

[123] Appellate Body Report on *US – Line Pipe*, para. 198.

[124] Appellate Body Report on *US – Steel Safeguards*, para. 450.

[125] Panel Report on *US – Steel Safeguards*, para. 10.595.

[126] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 181.

[127] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 194.

[128] (*footnote original*) In the view of the Panel, "alone", in this context, means: "to the exclusion of increased imports from other sources (i.e. sources excluded from the measure)"; it does not mean: "to the exclusion of other factors, i.e. non-increased imports in the sense of Article 4.2(b), second sentence". The Appellate Body has clarified that increased imports precisely need not, by themselves, cause serious injury (Appellate Body Report, *US – Wheat Gluten*, paras. 70 and 79; Appellate Body Report, *US – Lamb*, para. 170). There is no reason why this latter aspect should be any different in the context of parallelism, where the same test of Articles 2 and 4 is applied, only to a narrower base of imports. *See also* Appellate Body Report, *US – Wheat Gluten*, para 98: "establish explicitly that imports from these *same* sources, excluding Canada, satisfied the conditions for the application of a safeguard measure".

[129] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 194;

[130] Panel Report on *US – Steel Safeguards*, para. 10.595–10.598.

described as 'parallelism' is found in the 'parallel' language used in the first and second paragraphs of Article 2 of the *Agreement on Safeguards*."[131]

74. In *US – Steel Safeguards*, the Appellate Body concluded that the competent authority has an obligation to establish that imports from sources *other than* the excluded members satisfy, alone, and in and of themselves, the conditions for the application of a safeguard measure:

"[It was] incumbent on the USITC, in fulfilling the obligations of the United States under Article 2 of the *Agreement on Safeguards*, to justify this gap by establishing explicitly, in its report, that imports from sources covered by the measures – that is, imports from sources *other than* the excluded countries of Canada, Israel, Jordan, and Mexico – satisfy, *alone*, and in and of themselves, the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*. Further, and as we have already explained, to provide such a justification, the USITC was obliged by the *Agreement on Safeguards* to provide a reasoned and adequate explanation of how the facts supported its determination that imports from sources *other than* Canada, Israel, Jordan, and Mexico satisfy, *alone*, and in and of themselves, the conditions for the application of a safeguard measure."[132]

75. In *US – Steel Safeguards*, the Appellate Body clarified that imports *excluded* from the application of the safeguard measure must be considered a factor "other than increased imports" within the meaning of Article 4.2(b):

"Since the non-attribution requirement is part of the overall requirement, the competent authorities must explain how it ensured that it did not attribute the injurious effects of *factors other than included imports* – which subsume 'excluded imports' – to the imports included in the measure.

As a result, the phrase 'increased imports' in Articles 4.2(a) and 4.2(b) must, in our view, be read as referring to the same set of imports envisaged in Article 2.1, that is, *to imports included in the safeguard measure*. Consequently, imports *excluded* from the application of the safeguard measure must be considered a factor 'other than increased imports' within the meaning of Article 4.2(b). The possible injurious effects that these excluded imports may have on the domestic industry must not be attributed to imports included in the safeguard measure pursuant to Article 4.2(b). The requirement articulated by the Panel 'to account for the fact that excluded imports may have some injurious impact on the domestic industry' is, therefore, not, as the United States argues, an 'extra analytical step' that the Panel added to the analysis of imports from all sources. To the contrary, this requirement necessarily follows from the obligation in Article 4.2(b) for the competent authority to ensure that the effects of factors other than increased imports – a set of factors that subsumes *imports excluded from the safeguard measure* – are not attributed to imports included in the measure, in establishing a causal link between imports included in the measure and serious injury or threat thereof.

The non-attribution requirement is part of the overall requirement, incumbent upon the competent authority, to demonstrate the existence of a 'causal link' between increased imports (covered by the measure) and serious injury, as provided in Article 4.2(b).Thus, as we found in *US – Line Pipe*, 'to fulfill the requirement of Article 4.2(b), last sentence, the competent authorities must establish explicitly, through a reasoned and adequate explanation, that injury caused by factors other than increased imports is not attributed to increased imports'.

In order to provide such a reasoned and adequate explanation, the competent authority must explain how it ensured that it did not attribute the injurious effects of *factors other than included imports* – which subsume 'excluded imports' – to the imports included in the measure. As we explained in *US – Line Pipe* in the context of Article 3.1 and 'unforeseen developments' in this Report, if the competent authority does not provide such an explanation, a panel is not in a position to find that the competent authority ensured compliance with the clear and express requirement of non-attribution under Article 4.2(b) of the *Agreement on Safeguards*."[133]

76. The Appellate Body on *US – Steel Safeguards* determined that a series of separate and partial determinations cannot satisfy the requirement to establish explicitly that imports from sources covered by a measure, *alone*, satisfy the conditions for the application of a safeguard measure:

"The requirement of the *Agreement on Safeguards* to establish explicitly that imports from sources covered by a measure, *alone*, satisfy the conditions for the application of a safeguard measure cannot be fulfilled by conducting a *series of separate and partial* determinations.

For example, where a WTO Member seeks to establish explicitly that imports from *sources other than A and B* satisfy the conditions for the application of a safeguard measure, if that Member conducts a separate investigation, and makes a separate determination, on whether imports from sources *other than A* satisfy the relevant conditions, and then, subsequently, conducts *another* separate and distinct investigation, and makes a separate determination, on whether imports from sources *other than B* satisfy the relevant conditions, then these *two separate* determinations, in our view, do not demonstrate that imports from sources other than *A and B together* satisfy the requirements for the imposition of

[131] Appellate Body Report on *US – Steel Safeguards*, para. 439.
[132] Appellate Body Report on *US – Steel Safeguards*, para. 444.
[133] Appellate Body Report on *US – Steel Safeguards*, paras. 450–452.

a safeguard measure. By making these two separate determinations, that Member will, logically, for each of them, be basing its determination, in part, either on imports from A or on imports from B. If this were permitted, a determination on the application of a safeguard measure could be easily subjected to mathematical manipulation. This could not have been the intent of the Members of the WTO in drafting and agreeing on the *Agreement on Safeguards*.

We are, therefore, of the view that the Panel raised a valid methodological concern when it stated that 'it would . . . be required for the competent authorities to actually express the findings required under parallelism with regard to increased imports other than those from Canada, Mexico, Israel and Jordan.'[134]"[135]

77. The Appellate Body on *US – Steel Safeguards* added that even if the amount of imports that would be excluded is small, it still must be adequately explained by the competent authority:

"As we explained in *US – Wheat Gluten* and *US – Line Pipe*, a competent authority must establish, unambiguously, with a reasoned and adequate explanation, and *in a way that leaves nothing merely implied or suggested*, that imports from sources covered by the measure, *alone*, satisfy the requirements for the application of a safeguard measure. We are *not* suggesting that very low imports volumes, either from some, or from all, of the excluded sources at issue, are irrelevant for a competent authority's findings or the reasoned and adequate explanation underpinning such findings. We recognize that, where import volumes from excluded sources are very small, it is quite possible that the explanation underpinning the competent authority's conclusion need not be as extensive as in circumstances where the excluded sources account for a large proportion of total imports. Nevertheless, even if an explanation need not necessarily be extensive, the requisite explicit finding *must still be provided*. That finding must be contained in the authority's report, must be supported by a reasoned and adequate explanation, and – as we stated above – must address imports from all covered sources, excluding *all* of the non-covered sources. Nowhere in the *Agreement on Safeguards* is there any indication that these important principles can be disregarded in circumstances where imports from some or all sources are at low levels."[136]

(h) "cause or threaten to cause serious injury"

(i) Necessity of discrete determination of serious injury or of threat of serious injury

78. In *US – Line Pipe*, the Appellate Body held that a discrete finding of injury or threat of serious injury was not required under Article 2.1.[137] Although the Appellate Body agreed with the Panel that the definitions of "serious injury" and "threat of serious injury" are two distinct concepts, it reversed the Panel's finding[138] by clarifying that the crucial word "or" in the text of Article 2.1 could mean *either one or the other, or both in combination:*

"We emphasize that we are dealing here with . . . whether there is a right in a particular case to apply a safeguard measure. The question at issue is whether the right exists in this particular case. And, as the right exists if there is a finding by the competent authorities of a 'threat of serious injury' or – something *beyond* – 'serious injury', then it seems to us that it is irrelevant, *in determining whether the right exists*, if there is 'serious injury' or only 'threat of serious injury' – so long as there is a determination that there is *at least* a 'threat'. In terms of the rising continuum of an injurious condition of a domestic industry that ascends from a 'threat of serious injury' up to 'serious injury', we see 'serious injury' – because it is something *beyond* a 'threat' – as necessarily *including* the concept of a 'threat' and *exceeding* the presence of a 'threat' for purposes of answering the relevant inquiry: is there a right to apply a safeguard measure?

Based on this analysis of the most relevant context of the phrase 'cause or threaten to cause' in Article 2.1, we do not see that phrase as necessarily meaning *one or the other, but not both*. Rather, that clause could also mean *either one or the other, or both in combination*. Therefore, for the reasons we have set out, we do not see that it matters – for the purpose of determining whether there is a right to apply a safeguard measure under the *Agreement on Safeguards* – whether a domestic authority finds that there is 'serious injury', 'threat of serious injury', or, as the USITC found here, 'serious injury or threat of serious injury'. In any of those events, the right to apply a safeguard is, in our view, established."[139]

79. The Appellate Body on *US – Line Pipe* also found that a "threat of serious injury" finding sets a lower threshold for the right to apply a safeguard measure than a "serious injury" finding:

"In the sequence of events facing a domestic industry, it is fair to assume that, often, there is a continuous progression of injurious effects eventually rising and culminating in what can be determined to be 'serious injury'. Serious injury does not generally occur suddenly. Present serious injury is often preceded in time by an injury that threatens clearly and imminently to become serious injury, as we indicated in *US – Lamb*. Serious injury is, in

[134] (*footnote original*) Panel Report, para. 10.622.
[135] Appellate Body report on *US – Steel Safeguards*, para. 466–467.
[136] Appellate Body report on *US – Steel Safeguards*, para. 472.
[137] The issue arose from the USITC injury determination which was inconjunctive, "Line Pipe . . . is being imported into the United States in such increased quantities as to be a substantial cause of *serious injury or the threat of serious injury.*"
[138] The Panel concluded that the exporting Member could not have it both ways; it needed to find either serious injury or threat. Panel Report on *US – Line Pipe*, para.7.264.
[139] Appellate Body Report on *US – Line Pipe*, paras. 170–171.

other words, often the realization of a threat of serious injury. Although, in each case, the investigating authority will come to the conclusion that follows from the investigation carried out in compliance with Article 3 of the *Agreement on Safeguards*, the precise point where a 'threat of serious injury' becomes 'serious injury' may sometimes be difficult to discern. But, clearly, 'serious injury' is something *beyond* a 'threat of serious injury'.

In our view, defining 'threat of serious injury' separately from 'serious injury' serves the purpose of setting a *lower threshold* for establishing the *right* to apply a safeguard measure. Our reading of the balance struck in the *Agreement on Safeguards* leads us to conclude that this was done by the Members in concluding the Agreement so that an importing Member may act sooner to take preventive action when increased imports pose a 'threat' of 'serious injury' to a domestic industry, but have not yet caused 'serious injury'. And, since a 'threat' of 'serious injury' is defined as 'serious injury' that is 'clearly imminent', it logically follows, to us, that 'serious injury' is a condition that is above that *lower threshold* of a 'threat'. A 'serious injury' is *beyond* a 'threat', and, therefore, is *above* the threshold of a 'threat' that is required to establish a right to apply a safeguard measure."[140]

80. In addition, the Appellate Body in *US – Line Pipe* ruled that Article 5.2(b) is an "exception" to the general rule, and not relevant to the non-discrete determination of injury or threat thereof:

"Article 5.2(b) excludes quota modulation in the case of threat of serious injury. It is, in our view, the only provision in the *Agreement on Safeguards* that establishes a difference in the legal effects of 'serious injury' and 'threat of serious injury'. Under Article 5.2(b), in order for an importing Member to adopt a safeguard measure in the form of a quota to be allocated in a manner departing from the general rule contained in Article 5.2(a), that Member must have determined that there is 'serious injury'. A Member cannot engage in quota modulations if there is only a 'threat of serious injury'. This is an exception that must be respected. But we do not think it appropriate to generalize from such a limited exception to justify a general rule. In any event, this exceptional circumstance is not relevant to the line pipe measure. We find nothing in Article 5.2(b), viewed as part of the context of Article 2.1, that would support a finding that, in this case, the USITC acted inconsistently with the *Agreement on Safeguards* by making a non-discrete determination in this case."[141]

81. In conclusion, the Appellate Body in *US – Line Pipe* also cited the 1947 *US – Fur Felt Hats* case, in which it noted that the Working Party had "conducted a single analysis based on the presence of serious injury or threat of serious injury, and that it did not consider it necessary to make a discrete determination of serious injury or threat of serious injury":

"Following the *Vienna Convention* approach, we have also looked to the GATT *acquis* and to the relevant negotiating history of the pertinent treaty provisions. We have concluded that our view is reinforced by the jurisprudence under the GATT 1947. In the only relevant GATT 1947 case, *Report on the Withdrawal by the United States of a Tariff Concession under Article XIX of the General Agreement on Tariffs and Trade* ('*US – Fur Felt Hats')*, the Working Party established under the GATT 1947 was required to assess the consistency of a safeguard measure with Article XIX of the GATT 1947. The Working Party concluded that the available data presented supported the view 'that increased imports had caused or threatened some adverse effect to United States producers.' We note that the Working Party conducted a single analysis based on the presence of serious injury or threat of serious injury, and that it did not consider it necessary to make a discrete determination of serious injury or of threat of serious injury. The question of a discrete determination apparently was not an issue in that case."[142]

(i) Relationship with other Articles

82. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of the *GATT 1994* and with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards*, exercised judicial economy with respect to claims raised under Articles 2.2, 3.1, 5.1, 8, 11 and 12 of the *Agreement on Safeguards*.[143]

83. The Panel on *Argentina – Footwear (EC)* considered that, in light of its findings "concerning the investigation and the definitive measure" (the Panel had found a violation of Articles 2.1, 4.2(a), 4.2(b) and 4.2(c)), it did not find it necessary to make a finding concerning a claim under Article 6.[144]

84. The Appellate Body on *US – Line Pipe* ruled that Article 5.2(b) is an "exception" to general rules, and not relevant to the non-discrete determination of injury or threat thereof under Article 2.1. See paragraph 80 above.

(j) Relationship with other WTO Agreements

(i) Article XXIV of the GATT 1994

85. See paragraphs 63–71 and Section XXV.B.F. of the Chapter on the *GATT 1994*.

3. Article 2.2

(a) Scope of application of safeguard measures in the case of regional trade agreements

86. With respect to the scope of application of safeguard measures in the case of regional trade agreements, see paragraphs 62–67.

(b) Relationship with other Articles

87. The Panel on *US – Lamb*, after making findings of inconsistency with Articles 2.1, 4.1(c) and 4.2(b) of the *Agreement on Safeguards* (and with Article XIX:1(a) of the *GATT 1994*), exercised judicial economy with respect to claims raised under Article 2.2 (and Articles 3.1, 5.1, 8, 11 and 12) of the *Agreement on Safeguards*.[145]

(c) Relationship with other WTO Agreements

88. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of the *GATT 1994* (and with Articles 2.1, 4.1(c) and 4.2(b) of the *Agreement on Safeguards*), exercised judicial economy with respect to claims raised under Article 2.2 (and Articles 3.1, 5.1, 8, 11 and 12) of the *Agreement on Safeguards*.[146]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
Investigation

1. A Member may apply a safeguard measure only following an investigation by the competent authorities of that Member pursuant to procedures previously established and made public in consonance with Article X of GATT 1994. This investigation shall include reasonable public notice to all interested parties and public hearings or other appropriate means in which importers, exporters and other interested parties could present evidence and their views, including the opportunity to respond to the presentations of other parties and to submit their views, *inter alia*, as to whether or not the application of a safeguard measure would be in the public interest. The competent authorities shall publish a report setting forth their findings and reasoned conclusions reached on all pertinent issues of fact and law.

2. Any information which is by nature confidential or which is provided on a confidential basis shall, upon cause being shown, be treated as such by the competent authorities. Such information shall not be disclosed without permission of the party submitting it. Parties providing confidential information may be requested to furnish non-confidential summaries thereof or, if such parties indicate that such information cannot be summarized, the reasons why a summary cannot be provided. However, if the competent authorities find that a request for confidentiality is not warranted and if the party concerned is either unwilling to make the information public or to authorize its disclosure in generalized or summary form, the authorities may disregard such information unless it can be demonstrated to their satisfaction from appropriate sources that the information is correct.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. General

(a) Absence of a claim under Article 3

89. The Panel on *Korea – Dairy*, in a finding not reviewed by the Appellate Body, observed that the absence of a claim under Article 3 concerning the requirement to publish a report on a safeguard investigation did not preclude the possibility of claims relating to other aspects of an injury determination or safeguard measure:

> "[T]he absence of a claim under Article 3 of the Agreement on Safeguards means at most that the European Communities agrees that the report is WTO compatible for the purpose of Article 3.1 of the Agreement on Safeguards. The European Communities has the right to raise more specific claims under Article 4 of the Agreement on Safeguards and has done so. We consider that if a Member wants to challenge the WTO compatibility of the manner in which an 'injury' determination was performed, or the choice of an appropriate measure to be imposed, this Member does not have to challenge the publication of the final report as such."[147]

2. Article 3.1

(a) "investigation"

(i) Duty of national authorities

90. In *US – Wheat Gluten*, the Appellate Body referred to Article 3.1 as part of the context for the interpretation of the requirement of Article 4.2(a) to evaluate "all relevant factors". The Appellate Body addressed the question whether, and to what extent, national authorities must, in their investigation, seek out pertinent information on possible injury factors other than those explicitly raised as relevant by the parties to the national investigation. In the course of its discussion, the Appellate Body further considered the meaning, nature and focus of an investigation:

> "The ordinary meaning of the word 'investigation' suggests that the competent authorities should carry out a 'systematic inquiry' or a 'careful study' into the matter before them. The word, therefore, suggests a proper

[145] Panel Report on *US – Lamb*, para. 7.280.
[146] Panel Report on *US – Lamb*, para. 7.280.
[147] Panel Report on *Korea – Dairy*, para. 7.22.

degree of activity on the part of the competent authorities because authorities charged with conducting an inquiry or a study . . . must actively seek out pertinent information.

The nature of the 'investigation' required by the *Agreement on Safeguards* is elaborated further in the remainder of Article 3.1, which sets forth certain investigative steps that the competent authorities '*shall include*' in order to seek out pertinent information. . . . The focus of the investigative steps mentioned in Article 3.1 is on 'interested parties', who must be notified of the investigation, and who must be given an opportunity to submit 'evidence', as well as their 'views', to the competent authorities. The interested parties are also to be given an opportunity to 'respond to the presentations of other parties'. The *Agreement on Safeguards*, therefore, envisages that the interested parties play a central role in the investigation and that they will be a primary source of information for the competent authorities."[148]

91. The Appellate Body reversed the Panel on *US – Wheat Gluten*, which had held that national authorities need only consider other factors that are "clearly raised before them as relevant by the interested parties in the domestic investigation"[149] and held that national authorities may not limit their investigation to information submitted and claims raised by the parties:

"However, in our view, that does *not* mean that the competent authorities may limit their evaluation of 'all relevant factors', under Article 4.2(a) of the *Agreement on Safeguards*, to the factors which the interested parties have raised as relevant. The competent authorities must, in every case, carry out a full investigation to enable them to conduct a proper evaluation of all of the relevant factors expressly mentioned in Article 4.2(a) of the *Agreement on Safeguards*. Moreover, Article 4.2(a) requires the competent authorities – and *not the interested parties* – to evaluate fully the relevance, if any, of 'other factors'. If the competent authorities consider that a particular 'other factor' may be relevant to the situation of the domestic industry, under Article 4.2(a), their duties of investigation and evaluation preclude them from remaining passive in the face of possible short-comings in the evidence submitted, and views expressed, by the interested parties. . . . In that respect, we note that the competent authorities' 'investigation' under Article 3.1 is *not limited* to the investigative steps mentioned in that provision, but must simply '*include*' these steps. Therefore, the competent authorities must undertake additional investigative steps, when the circumstances so require, in order to fulfill their obligation to evaluate all relevant factors."[150]

92. The Appellate Body on *US – Wheat Gluten* did however set limits to the duty of the national authorities to undertake additional investigative steps:

"However, . . . we also reject the . . . argument that the competent authorities have an open-ended and unlimited duty to investigate all available facts that might possibly be relevant."[151]

93. In *US – Steel Safeguards*, the Panel concluded that the findings of three Commissioners were not based on an identically defined like product, and that this rendered the findings of the three Commissioners "irreconcilable". On the basis of this conclusion, the Panel had deduced that these findings could not provide a reasoned and adequate explanation for the USITC's single determination. The Appellate Body reversed this Panel conclusion on the grounds that USITC had not examined the conclusions reached by each Commissioner critically and in-depth:

"[W]e do not read Article 3.1 as necessarily precluding the possibility of providing multiple findings instead of a single finding in order to support a determination under Articles 2.1 and 4 of the *Agreement on Safeguards*. Nor does any other provision of the *Agreement on Safeguards* expressly preclude such a possibility. The *Agreement on Safeguards*, therefore, in our view, does not interfere with the discretion of a WTO Member to choose whether to support the determination of its competent authority by a single explanation or, alternatively, by multiple explanations by members of the competent authority. This discretion reflects the fact that, as we stated in *US – Line Pipe*, 'the *Agreement on Safeguards* does not prescribe the internal decision-making process for making [ ] a determination [in a domestic safeguard investigation]'.[152]

. . .

[R]ather, a panel must ascertain whether a reasoned and adequate explanation for the USITC's determination is contained in the report, even if only in one of the Commissioners' individual findings.

In our view, in the case before us, the Panel should, therefore, not have ended its enquiry after noting that the conclusions of Commissioners Bragg and Devaney were based on a product definition that differed from that on which Commissioner Miller based her conclusion. After making this correct observation, the Panel should have continued its enquiry by examining the views of the three Commissioners *separately*, in order to ascertain whether one of these sets of findings contained a reasoned and adequate explanation for the USITC's 'single institutional determination' on tin mill products.

It bears emphasizing that, in reviewing each of such findings separately, a panel is of course obliged to assess whether that particular finding provides a reasoned and

[148] Appellate Body Report on *US – Wheat Gluten*, paras. 53–54.
[149] Panel Report on *US – Wheat Gluten*, para. 8.121.
[150] Appellate Body Report on *US – Wheat Gluten*, para. 55.
[151] Appellate Body Report on *US – Wheat Gluten*, para. 56.
[152] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 158.

adequate explanation of how the facts support the competent authority's determination. As we held in *US – Lamb*, 'panels must [not] simply *accept* the conclusions of the competent authorities'; they must examine these conclusions 'critically' and 'in depth'.[153] Hence, in examining whether one of the multiple sets of explanations set forth by the competent authority, taken individually, provides a reasoned and adequate explanation for the competent authority's determination, a panel may have to address, *inter alia*, the question whether, *as a matter of WTO obligations*, findings by individual Commissioners made on the basis of a *broad* product grouping can provide a reasoned and adequate explanation for a 'single institutional determination' of the USITC concerning a *narrow* product grouping.[154]

. . .

[O]ur finding implies that a panel may not conclude that there is no reasoned and adequate explanation for a competent authority's determination by relying merely on the fact that distinct multiple explanations given by the competent authority are not based on an identically-defined like product.[155]"[156]

(ii) The conduct of the investigation – the obligation to consult interested parties

94. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, concluded that the relevant authority must consult with interested parties but that this consultation can be conducted by means of questionnaires:

"The Panel recalls that the European Communities, China, Norway and New Zealand argue that, because the issue of unforeseen developments was only discussed in the Second Supplementary Report which came out after the conclusion of the investigation, the interested parties were not given an opportunity to comment on the discussion.

. . .

[B]y inviting comments in response to the questionnaires, and addressing the issue during its public hearings,[157] the Panel is of the view that the United States has complied with its Article 3.1 obligation to provide 'appropriate means in which importers, exporters and other interested parties [can] present evidence and their views'.

The European Communities complains that 'there was no provisional reasoning on or explanation of unforeseen developments on which interested parties could comment'.[158] The Panel does not believe that Article 3 of the Agreement on Safeguards requires the competent authority to send to interested parties 'draft findings' of its demonstration relating to unforeseen developments in order to allow them to comment prior to the publication of the competent authority's report."[159]

(b) Internal decision-making process prior to determination

95. The Appellate Body on *US – Line Pipe* stated that it was not concerned with the way the investigating authority reach their safeguards determinations:

"We note also that we are not concerned with how the competent authorities of WTO Members reach their determinations in applying safeguard measures. The Agreement on Safeguards does not prescribe the internal decision-making process for making such a determination. That is entirely up to WTO Members in the exercise of their sovereignty. We are concerned only with the determination itself, which is a singular act for which a WTO Member may be accountable in WTO dispute settlement. It is of no matter to us whether that singular act results from a decision by one, one hundred, or – as here – six individual decision-makers under the municipal law of that WTO Member. What matters to us is whether the determination, however it is decided domestically, meets the requirements of the Agreement on Safeguards.

. . .

Article 5.1 does not establish a general procedural obligation to demonstrate compliance with Article 5.1, first sentence, at the time a measure is applied."[160]

96. In *US – Steel Safeguards*, the Panel, in a finding not reviewed by the Appellate Body, recalled that the *Agreement on Safeguards* is not concerned with the manner in which determinations are made:

"There is no provision on how or when the investigation is to be initiated or whether, in a specific Member, the initiation of the investigation should be undertaken by the King, the President or the industry. Nor does the Agreement on Safeguards dictate the manner in which determinations are to be arrived at. What matters is that, ultimately, there is a reported determination of the right to take a safeguards measure (pursuant to Articles 2, 3 and 4 of the Agreement on Safeguards and Article XIX of GATT 1994) and that, if, and when, challenged *prima*

---

[153] (*footnote original*) Appellate Body Report, *US – Lamb*, para. 106. (original emphasis)

[154] (*footnote original*) In this regard, we note that the fact that, pursuant to the domestic law of a WTO Member, a finding made on the basis of a *broad* product grouping is deemed to support a competent authority's determination which relates to a *narrower* product, does not, in and of itself, imply that this conclusion holds true also for the purposes of the *Agreement on Safeguards*.

[155] (*footnote original*) We also emphasize that our finding does not address the question whether the USITC and/or individual Commissioners correctly defined the "like product", the "imported product", or the "domestic industry".

[156] Appellate Body Report on *US – Steel Safeguards*, paras. 414–419.

[157] (*footnote original*) United States' first written submission, para. 954.

[158] (*footnote original*) European Communities' second written submission, para. 85.

[159] Panel Report on *US – Steel Safeguards*, para. 10.60 and 10.64–65.

[160] Appellate Body Report, *US – Line Pipe*, paras. 158 and 234.

facie before a WTO panel, the choice of safeguard measure (Articles 5, 7 and 9) can be justified."[161]

97. In *US – Steel Safeguards*, the Appellate Body considered whether a failure to comply with the appropriate standard of review was merely a procedural mistake inconsistent with Article 3.1 of *the Agreement on Safeguards*. The Appellate Body rejected the United States' allegation that a failure to provide an adequate and reasoned explanation pursuant to Article 3.1 of the *Agreement on Safeguards* does not imply a violation of Articles 2 and 4 of the *Agreement on Safeguards*:

"We turn now to the United States' argument that, since 'the Panel based many of its findings against the United States on its conclusions that the USITC Report failed to provide a "reasoned and adequate explanation' of certain findings",[162] it follows that there can only be a violation of Article 3.1, and not also of Articles 2 and 4 of the *Agreement on Safeguards*'. The United States adds that a failure to explain a finding does not automatically prove that the USITC had not performed the analysis necessary to make the finding.[163]

We recall again our earlier statements on the appropriate standard of review for panels in disputes that arise under the *Agreement on Safeguards*. When the Panel found that the USITC report failed to provide a 'reasoned and adequate explanation' of certain findings, the Panel was assessing compliance with the obligations contained in Articles 2 and 4 of the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994. As we said in *US – Lamb*, '[i]f a panel concludes that competent authorities, in a particular case, have not provided a reasoned or adequate explanation for their determination . . . [that] panel has . . . reached a conclusion that the determination is inconsistent with the specific requirements of [the relevant provision] of the *Agreement on Safeguards*.'[164] Thus, we do not agree with the United States that the lack of a reasoned and adequate explanation does not imply a violation of Articles 2 and 4 of the *Agreement on Safeguards*. (emphasis added)

Moreover, we cannot accept the United States' interpretation that a failure to explain a finding does not support the conclusion that the USITC 'did not actually *perform* the analysis correctly, thereby breaching Article 2.1, 4.2, or 4.2(b) [of the *Agreement on Safeguards*]'.[165] As we stated above, because a panel may not conduct a *de novo* review of the evidence before the competent authority, it is the *explanation* given by the competent authority for its determination that alone enables panels to determine whether there has been compliance with the requirements of Article XIX of the GATT 1994 and of Articles 2 and 4 of the *Agreement on Safeguards*. It may well be that, as the United States argues, the competent authorities have performed the appropriate analysis correctly.

However, where a competent authority has not provided a reasoned and adequate explanation to support its determination, the panel is not in a position to conclude that the relevant requirement for applying a safeguard measure has been fulfilled by that competent authority. Thus, in such a situation, the panel has no option but to find that the competent authority has not performed the analysis correctly."[166]

(c) The published report

(i) "To publish" versus "to make publicly available"

98. In *Chile – Price Band System*, in the context of similar obligations under the SCM and Anti-Dumping Agreements, the Panel distinguished between "to publish" and "to make publicly available", and ruled, in a finding not reviewed by the Appellate Body, that the Article 3.1 requirement to "publish" must be interpreted as meaning "to make generally available through an appropriate medium" as contrasted with "making publicly available":

"[W]e note that the Minutes of the relevant CDC sessions have not been 'published' through any official medium. Rather, they were transmitted to the interested parties and placed at the disposal of 'whoever wishes to consult them at the library of the Central Bank of Chile'. In order to determine whether it is sufficient under Article 3.1 of the Agreement on Safeguards to make the investigating authorities' report 'available to the public' in such a manner, we first refer to the dictionary meaning of 'to publish'. The term can mean 'to make generally known', 'to make generally accessible', or 'to make generally available through [a] medium'. We therefore turn to the context of Article 3.1 provided by similar publication requirements in the AD and SCM Agreements. We note that both Article 22 of the SCM Agreement ('public notice and explanation of determinations') and Article 12 of the AD Agreement ('public notice and explanation of determination') distinguish between giving 'public notice' and 'making otherwise available through a separate report', which must be 'readily available to the public'. In addition, we also note that various 'transparency' provisions in the covered agreements, such as Article III of the GATS, Article 63.1 of the TRIPS Agreement, and Article 2.11 of the TBT Agreement all distinguish between 'to publish' and 'to make publicly available'. In the light of these considerations, we find that the verb 'to publish' in Article 3.1 of the Agreement on Safeguards must be interpreted as meaning 'to make generally available through an appropriate medium', rather than simply 'making publicly available'. As regards the minutes of the relevant CDC sessions, we therefore

[161] Panel Report on *US – Steel Safeguards*, para. 10.17.
[162] (*footnote original*) United States' appellant's submission, para. 73.
[163] (*footnote original*) *Ibid.*, para. 74.
[164] Appellate Body Report, *US – Lamb*, para. 107.
[165] (*footnote original*) United States' appellant's submission, para. 73. (original emphasis)
[166] Appellate Body Report on *US – Steel Safeguards*, paras. 301–303.

find that they have not been generally made available through an appropriate medium so as to constitute a 'published' report within the meaning of Article 3.1 of the Agreement on Safeguards."[167]

(ii) Reasoned conclusions

99. In *US – Steel Safeguards*, the Appellate Body expressed the opinion that since the report must contain "reasoned conclusions", such report must therefore include, as suggested by the Panel, an explanation of the rationale for the determinations from the facts and data contained in the report of the competent authority:

"[W]e note that the definition of 'conclusion' is 'the result of a discussion or an examination of an issue' or a 'judgement or statement arrived at by reasoning: an inference; a deduction'. Thus, the 'conclusion' required by Article 3.1 is a 'judgement or statement arrived at by reasoning'. We further note that the word 'reasoned', which the United States defines in terms of the verb 'to reason', is, in fact, used in Article 3.1, last sentence, as an adjective to qualify the term 'conclusion'. The relevant definition of the intransitive verb 'to reason' is 'to think in a connected or logical manner; use one's reason in forming conclusions'. The definition of the transitive verb 'to reason' is 'to arrange the thought of in a logical manner, embody reason in; express in a logical form'. Thus, to be a 'reasoned' conclusion, the 'judgement or statement' must be one which is reached in a connected or logical manner or expressed in a logical form. Article 3.1 further requires that competent authorities must 'set forth' the 'reasoned conclusion' in their report. The definition of the phrase 'set forth' is 'give an account of, esp. in order, distinctly, or in detail; expound, relate, narrate, state, describe'. Thus, the competent authorities are required by Article 3.1, last sentence, to 'give an account of' a 'judgement or statement which is reached in a connected or logical manner or expressed in a logical form', 'distinctly, or in detail.'

Panels have a responsibility in WTO dispute settlement to assess whether a competent authority has complied with its obligation under Article 3.1 of the *Agreement on Safeguards* to 'set forth' 'findings and reasoned conclusions' for their determinations. The European Communities and Norway argue that panels could not fulfill this responsibility if they were left to 'deduce for themselves' from the report of that competent authority the 'rationale for the determinations from the facts and data contained in the report of the competent authority.'[168] We agree.

. . .

Thus, we see Article 4.2(c) as an elaboration of the requirement set out in Article 3.1, last sentence, to provide a 'reasoned conclusion' in a published report.

. . .

Article 4.2(c) is an elaboration of Article 3; moreover 'unforeseen developments' under Article XIX:1(a) of the GATT 1994 is one of the 'pertinent issues of fact and law' to which the last sentence of Article 3.1 refers. It follows that Article 4.2(c) also applies to the competent authorities' demonstration of 'unforeseen developments' under Article XIX:1(a)."[169]

100. In adding to its discussion on the "specifics" of any determination, the Appellate Body on *US – Steel Safeguards* concluded that the competent authority shall provide a conclusion supported by facts and reasoning:

"The issue in this case is not whether certain data referred to in the USITC report had, in fact, been 'considered' by the USITC. The USITC may indeed have 'considered' all the relevant data contained in its report or referred to in the footnotes thereto. However, it did not use those data to *explain* how 'unforeseen developments' resulted in increased imports. Rather, as the Panel found, 'the text to which the footnotes correspond is either totally unrelated to an explanation of unforeseen developments, or it deals generally with imports without specifying from where those imports came.'[170] Hence, what is wanting here is not the data, but the reasoning that uses those data to support the conclusion. The USITC did not, in our view, provide a conclusion that is supported by facts and reasoning, in short, a 'reasoned conclusion', as required by Article 3.1. Moreover, as we have stated previously, it was for the USITC, and not the Panel, to provide 'reasoned conclusions'. It is not for the Panel to do the reasoning for, or instead of, the competent authority, but rather to assess the adequacy of that reasoning to satisfy the relevant requirement. In consequence, we cannot agree with the United States that the Panel was 'required' to consider the relevant data to which the USITC referred in other sections of its report to support the USITC's finding that 'unforeseen developments' had resulted in increased imports; and, for the reasons mentioned, we do not see how our findings in *EC – Tube or Pipe Fittings* support the United States' view to that effect."[171]

(iii) "on all pertinent issues of law and fact"

101. In *US – Lamb*, the Appellate Body stated that a published report within the meaning of Article 3.1 must also contain a finding on the existence of "unforeseen developments" within the meaning of Article XIX:1(a) of the *GATT 1994*:

"Article 3.1 requires competent authorities to set forth findings and reasoned conclusions on 'all pertinent issues of fact and law' in their published report. As Article XIX:1(a) of the GATT 1994 requires that 'unforeseen developments' must be demonstrated, as a matter

[167] Panel Report on *Chile – Price Band System*, para. 7.128.
[168] (*footnote original*) European Communities' appellee's submission, para. 48; Norway's appellee's submission, para. 75.
[169] Appellate Body Report on *US – Steel Safeguards*, paras 287–290.
[170] (*footnote original*) Panel Reports, para. 10.133.
[171] Appellate Body Report on *US – Steel Safeguards*, para. 329.

of fact, for a safeguard measure to be applied, the existence of 'unforeseen developments' is, in our view, a 'pertinent issue[] of fact and law', under Article 3.1, for the application of a safeguard measure, and it follows that the published report of the competent authorities, under that Article, must contain a 'finding' or 'reasoned conclusion' on 'unforeseen developments'."[172]

(iv) Format of the report

102. The Panel on *US – Steel Safeguards*, in a finding upheld by the Appellate Body, concluded that the report may be presented in different parts or in any other format:

"The Panel agrees with the United States that nothing in the requirement to publish a report dictates the form that the report must take, provided that the report complies with all of the other obligations contained in the Agreement on Safeguards and Article XIX of GATT 1994. In the end, it is left to the discretion of the Members to determine the format of the report, including whether it is published in parts, so long as it contains all of the necessary elements, including findings and reasoned conclusions on all pertinent issues of fact and law. Together, these parts can form the report of the competent authority.

The Panel believes that a competent authority's report can be issued in different parts but such multi-part or multi-stage report must always provide for a coherent and integrated explanation proving satisfaction with the requirements of Article XIX of GATT 1994 and the Agreement on Safeguards, including the demonstration that unforeseen developments resulted in increased imports causing serious injury to the relevant domestic producers. Whether a report drafted in different parts or a multi-stage report constitutes 'the report of the competent authority' is to be determined on a case-by-case basis and will depend on the overall structure, logic and coherence between the various stages or the various parts of the report. If separate parts of the report are issued at different times, the discussion relating to unforeseen developments must, in all cases, be integrated logically in the overall explanation as to how the importing Member's safeguard measure satisfies the requirements of Article XIX of GATT 1994 and the Agreement on Safeguards. The publication of a report in many stages may produce added difficulties for the competent authorities to set forth coherent findings in a reasoned and adequate manner."[173]

(v) Timing of the report

103. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, explained that the timing of the explanation is a factor that can affect the reasonableness and adequacy of the explanation:

"The nature of the facts, including their complexity, will dictate the extent to which the relationship between the unforeseen developments and increased imports causing injury needs to be explained. The timing of the explanation [relating to unforeseen developments], its extent and its quality are all factors that can affect whether [that] explanation is reasoned and adequate."[174]

(d) Relationship with other paragraphs of Article 3

104. As regards the relationship of Article 3.1 with Article 3.2, see paragraph 110 below.

(e) Relationship with other Articles

105. In *US – Steel Safeguards*, the Panel and the Appellate Body discussed the relationship between Articles 3.1 and 4.2(c) of the *Agreement on Safeguards*:

"We note further, as context, that Article 4.2(c) of the *Agreement on Safeguards* requires the competent authorities to:

> . . . publish promptly, *in accordance with the provisions of Article 3*, a detailed analysis of the case under investigation as well as a demonstration of the relevance of the factors examined. (emphasis added)

We observe that this requirement is expressed as being 'in accordance with' Article 3, and not 'in addition' thereto. Thus, we see Article 4.2(c) as an elaboration of the requirement set out in Article 3.1, last sentence, to provide a 'reasoned conclusion' in a published report."[175]

(f) Relationship with other WTO Agreements

(i) Article XIX of the GATT 1994

106. In *US – Steel Safeguards*, the Panel and the Appellate Body discussed the relationship between Article XIX of the *GATT 1994* on unforeseen developments and Articles 3.1 and 4.2(c) of the *Agreement on Safeguards*:

"The United States argued at the oral hearing that 'Article 4.2(c) does not apply to the competent authorities' demonstration of unforeseen developments'[176] under Article XIX:1(a) of the GATT 1994. We disagree. Article 4.2(c) is an elaboration of Article 3; moreover 'unforeseen developments' under Article XIX:1(a) of the GATT 1994 is one of the 'pertinent issues of fact and law' to which the last sentence of Article 3.1 refers. It follows that Article 4.2(c) also applies to the competent authorities' demonstration of 'unforeseen developments' under Article XIX:1(a)."[177]

[176] (*footnote original*) United States' response to questioning at the oral hearing.
[177] Appellate Body Report on *US – Steel Safeguards*, para. 290.

(ii) Article 11 of the DSU

107. In *US – Steel Safeguards*, the Appellate Body reviewed the relationship between Article 11 of the *DSU* and Articles 3.1 and 4.2 of the *Agreement on Safeguards*:

> "It bears repeating that a panel will not be in a position to assess objectively, as it is required to do under Article 11 of the DSU, whether there has been compliance with the prerequisites that must be present before a safeguard measure can be applied, if a competent authority is not required to provide a 'reasoned and adequate explanation' of how the facts support its determination of those prerequisites, including 'unforeseen developments' under Article XIX:1(a) of the GATT 1994. A panel must not be left to *wonder* why a safeguard measure has been applied.
>
> It is precisely by 'setting forth findings and reasoned conclusions on all pertinent issues of fact and law', under Article 3.1, and by providing 'a detailed analysis of the case under investigation as well as a demonstration of the relevance of the factors examined', under Article 4.2(c), that competent authorities provide panels with the basis to 'make an objective assessment of the matter before it' in accordance with Article 11. As we have said before, a panel may not conduct a *de novo* review of the evidence or substitute its judgement for that of the competent authorities.[178] Therefore, the 'reasoned conclusions' and 'detailed analysis' as well as 'a demonstration of the relevance of the factors examined' that are contained in the report of a competent authority, are the only bases on which a panel may assess whether a competent authority has complied with its obligations under the *Agreement on Safeguards* and Article XIX:1(a) of the GATT 1994. This is all the more reason why they must be made explicit by a competent authority."[179]

3. Article 3.2

(a) Confidential information

108. In examining a claim concerning the omission from the published report of a safeguards investigation of certain information considered to be confidential by the investigating authorities, the Panel on *US – Wheat Gluten* interpreted the requirements of Article 3.2 concerning the treatment to be accorded to such confidential information:

> "Article 3.2 [of the *Agreement on Safeguards* ("SA")] places an obligation upon domestic investigating authorities not to disclose – including in their published report setting forth their findings and reasoned conclusions reached on all pertinent issues of fact and law and demonstrating the relevance of the factors examined – information which is 'by nature confidential or which is provided on a confidential basis' without permission of the party submitting it. Article 3.2 SA does not define the term 'confidential' nor does it contain any examples of the type of information that might qualify as 'by nature confidential' or 'information that is submitted on a confidential basis'.
>
> Article 3.2 SA requires that information that is by nature confidential or which is submitted on a confidential basis shall, upon cause being shown, be treated as such by the competent authorities. In the absence of a detailed elaboration or definition of the types of information that must be treated as confidential, we consider that the investigating authorities enjoy a certain amount of discretion in determining whether or not information is to be treated as 'confidential'. While Article 3.2 does not specifically address the nature of any policies pertaining to the treatment of such 'confidential' information which a Member's investigating authority may or must adopt, that provision does specify that such 'information shall not be disclosed without permission of the party submitting it'. The provision is specific and mandatory in this regard. This furnishes an assurance that the confidentiality of qualifying information will be preserved in the course of a domestic safeguards investigation, and encourages the fullest possible disclosure of relevant information by interested parties."[180]

109. The Panel on *US – Wheat Gluten* subsequently addressed the argument that certain aggregate data could not be considered to be "confidential" within the meaning of Article 3.2, and that, even if it was confidential, it could have been presented in percentages and indexes:

> "While the United States has described the USITC's efforts to characterize as much confidential information as possible in its Report without compromising the confidential nature of that information, the USITC might ideally have been more creative in trying to provide the essence of the confidential information in its findings in the published USITC Report. We draw attention to the provision in Article 3.2 SA that parties providing confidential information in a domestic safeguard investigation 'may be requested to furnish non-confidential summaries thereof or, if such parties indicate that such information cannot be summarized, the reasons why a summary cannot be provided . . .' The language of this provision is hortatory. However, this is one vehicle envisaged by the *Agreement on Safeguards* that may provide a greater degree of transparency while respecting the confidentiality of qualifying information.
>
> Nevertheless, given the small number of firms comprising the United States domestic industry (and the non-US producers and exporters) in this case; the fundamental importance of maintaining the confidentiality of sensitive business information in order to ensure the effectiveness of domestic safeguards investigations; the

[178] (*footnote original*) Appellate Body Report, *Argentina – Footwear (EC)*, para. 121.
[179] Appellate Body Report on *US – Steel Safeguards*, paras. 298–299.
[180] Panel Report on *US – Wheat Gluten*, paras. 8.19–8.20.

discretion implied in Article 3.2 SA for the investigating authorities to determine whether or not 'cause' has been shown for information to be treated as 'confidential'; and the specific and mandatory prohibition in that provision against disclosure by them of such information without permission of the party submitting it, we cannot find that the United States has violated its obligations under Articles 2.1 and 4 SA, nor specifically under Article 4.2(c), by not disclosing, in the published report of the USITC, information qualifying under the USITC policy as information 'which is by nature confidential or which is provided on a confidential basis', including aggregate data."[181]

(b) Relationship with other paragraphs of Article 3

110. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, addressed the issue of the relationship of Article 3.2 with Article 3.1:

"The Panel agrees that a competent authority is not barred from relying on data provided by individual parties on a confidential basis in the course of the investigation. Article 3.2 of the Agreement on Safeguards contains an obligation to treat such data as confidential, i.e. not to disclose it (without permission). In this sense, the Panel, therefore, takes a position similar to that of the Appellate Body in *Thailand – H-Beams*.[182] Competent authorities may rely on confidential data, even if these data are not disclosed to the public in their Reports.

However, Article 3.1 of the Agreement on Safeguards contains the obligation that competent authorities 'publish a report setting forth their findings and reasoned conclusions reached on all pertinent issues of fact and law.' Article 4.2(c) adds the obligation that competent authorities 'publish promptly, in accordance with the provisions of Article 3, a detailed analysis of the case under investigation as well as a demonstration of the relevance of the factors examined'. On the basis of these obligations and the obligation under Article 2.1, to make a determination, *inter alia*, that imports of the product in question have increased, competent authorities must provide a reasoned and adequate explanation of how the facts support the conclusion. In the view of the Panel, this requirement can, in an individual case, be limited by the obligation of Article 3.2 to protect confidential data.

However, we believe that Article 3.1 and 3.2 can be interpreted harmoniously.[183] The obligation of Article 3.1 cannot be interpreted so as to imply a violation of Article 3.2. In other words, a competent authority is obliged to provide these explanations to the fullest extent possible without disclosing confidential information. This implies that if there are ways of presenting data in a modified form (e.g. aggregation or indexing), which protects confidentiality, a competent authority is obliged to resort to these options. Conversely, the provision of no data at all is permitted only when all these methods fail in a particular case.

The Panel believes that even if competent authorities are permitted not to disclose the data yet, nevertheless, rely on it, they are still required to provide through means other than full disclosure of that data, a reasoned and adequate explanation. This obligation could be complied with through the kind of explanation that the USITC has provided on page 215 of its report,[184] i.e. an explanation in words and without numbers. However, this obligation also includes an explanation by the competent authority of why there was no possibility of presenting *any* facts in a manner consistent with the obligation of protecting confidential information. That explanation was not provided in the instant case."[185]

(c) Relationship with other WTO Agreements

(i) Articles 11 and 13 of the DSU

111. The Panel on *US – Wheat Gluten* commented on the relationship between Article 3.2 of the *Agreement on Safeguards* and Article 13 of the *DSU*. This Panel had taken certain steps to have access to certain information that had not been included in the published report of the investigation at issue on account of its confidential nature, but the parties were unable to reach agreement on the procedures proposed by the Panel for viewing this information.[186] In light of this disagreement between the parties, the Panel had decided not to adopt these procedures. The report then commented as follows:

"In our view, the protracted exchange of communications between the parties about the circumstances

[181] Panel Report on *US – Wheat Gluten*, paras. 8.23–8.24. See also Chapter on the *Anti-Dumping Agreement*, Sections VI.B.1and 4 and the Appellate Body Report on *Thailand – H-Beams*, para. 112.

[182] (*footnote original*) Appellate Body Report, *Thailand – H-Beams*, paras. 111, 112 and 119.

[183] (*footnote original*) *See* Appellate Body Report, *Korea – Dairy*, para. 81: "In light of the interpretive principle of effectiveness, it is the *duty* of any treaty interpreter to 'read all applicable provisions of a treaty in a way that gives meaning to *all* of them, harmoniously'." *See* also Appellate Body Report, *Argentina – Footwear (EC)*, para. 81; Appellate Body Report, *US – Gasoline*, p. *23; Appellate Body Report, *Japan – Alcoholic Beverages II*, p. *12; and Appellate Body Report, *India – Patents (US)*, para. 45.

[184] (*footnote original*) For instance, at page 215 of the USITC's Report, Vol. I, one can read the following analysis protecting confidential information:

> "The ratio of imports of stainless steel rod to domestic production also increased significantly during the period, increasing from *** percent in 1996 to *** percent in 2000. While the ratio fluctuated somewhat during the period of investigation, the largest single increase in the ratio (*** percentage points) occurred in 2000, the last full year of the period of investigation. The ratio of imports to domestic production decreased from *** percent of domestic production in interim 2000 to *** percent in interim 2001." (Footnotes omitted).

[185] Panel Report on *US – Steel Safeguards*, paras.10.272–10.275.

[186] Panel Report on *US – Wheat Gluten*, paras. 8.7–8.10.

under which the Panel should view the requested information demonstrates the existence of a serious systemic issue as to the relationship between, on the one hand, the confidentiality obligations under Article 3.2 SA of a Member's investigating authorities with respect to confidential information obtained in the course of a domestic safeguards investigation and, on the other hand, the duties of Members when faced with a panel request for such confidential information under Article 13 DSU. The Panel's efforts to develop a consensual approach to the conditions under which the Panel might view the requested information were ultimately unsuccessful."[187]

112. Although in *US – Wheat Gluten*, the Panel concluded that the record before it, without the confidential information, provided a sufficient basis for an objective assessment of the facts as required by Article 11 of the *DSU*, it cautioned that "the WTO dispute settlement system cannot function optimally if relevant information is withheld from a panel".[188] The Appellate Body on *US – Wheat Gluten* endorsed this finding:

"[We agree] with the panel that a 'serious systemic issue' is raised by the question of the procedures which should govern the protection of information requested by a panel under Article 13.1 of the DSU and which is alleged by a Member to be 'confidential'. We believe that these issues need to be addressed."[189]

113. The Appellate Body on *US – Wheat Gluten* also shared the concerns expressed by the Panel related to the proper functioning of the WTO dispute settlement system:

"[T]he refusal by a Member to provide information requested of it undermines seriously the ability of a panel to make an objective assessment of the facts and the matter, as required by Article 11 of the DSU. Such a refusal also undermines the ability of other Members of the WTO to seek the 'prompt' and 'satisfactory' resolution of disputes under the procedures 'for which they bargained in concluding the DSU'."[190]

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Determination of Serious Injury or Threat Thereof

1. For the purposes of this Agreement:

   (a) "serious injury" shall be understood to mean a significant overall impairment in the position of a domestic industry;

   (b) "threat of serious injury" shall be understood to mean serious injury that is clearly imminent, in accordance with the provisions of paragraph 2. A determination of the existence of a threat of serious injury shall be based on facts and not merely on allegation, conjecture or remote possibility; and

   (c) in determining injury or threat thereof, a "domestic industry" shall be understood to mean the producers as a whole of the like or directly competitive products operating within the territory of a Member, or those whose collective output of the like or directly competitive products constitutes a major proportion of the total domestic production of those products.

2. (a) In the investigation to determine whether increased imports have caused or are threatening to cause serious injury to a domestic industry under the terms of this Agreement, the competent authorities shall evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation of that industry, in particular, the rate and amount of the increase in imports of the product concerned in absolute and relative terms, the share of the domestic market taken by increased imports, changes in the level of sales, production, productivity, capacity utilization, profits and losses, and employment.

(b) The determination referred to in subparagraph (a) shall not be made unless this investigation demonstrates, on the basis of objective evidence, the existence of the causal link between increased imports of the product concerned and serious injury or threat thereof. When factors other than increased imports are causing injury to the domestic industry at the same time, such injury shall not be attributed to increased imports.

(c) The competent authorities shall publish promptly, in accordance with the provisions of Article 3, a detailed analysis of the case under investigation as well as a demonstration of the relevance of the factors examined.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. Article 4.1(a)

(a) "serious injury" as "significant overall impairment" in the position of the domestic industry

(i) "serious injury" as a high standard of injury

114. The Appellate Body on *US – Lamb* also described "serious injury" as a "very high standard of injury":

"The standard of 'serious injury' set forth in Article 4.1(a) is, on its face, very high. Indeed, in *United States* –

[187] Panel Report on *US – Wheat Gluten*, para. 8.11.
[188] Panel Report on *US – Wheat Gluten*, para. 8.12.
[189] Appellate Body Report on *US – Wheat Gluten*, para. 170.
[190] Appellate Body Report on *US – Wheat Gluten*, para. 171. Faced with a Member's refusal to grant access to confidential information, a WTO panel has the discretion, under Article 11 of the *DSU*, to draw inferences "adverse" to such Member's position in a particular dispute. With respect to adverse inferences in general, see Chapter on the *DSU*, Section XI.B.3(c).

Wheat Gluten Safeguard, we referred to this standard as 'exacting'. Further, in this respect, we note that the word 'injury' is qualified by the adjective 'serious', which, in our view, underscores the extent and degree of 'significant overall impairment' that the domestic industry must be suffering, or must be about to suffer, for the standard to be met.

. . .

[I]n making a determination on . . . the existence of 'serious injury' . . . panels must always be mindful of the very high standard of injury implied by these terms."[191]

115. Moreover, the Appellate Body, also on *US – Lamb*, juxtaposed the concept of "serious injury" in the *Agreement on Safeguards* and the concept of "material injury" contained in the *Anti-Dumping Agreement* and the *SCM Agreement*:

"We are fortified in our view that the standard of 'serious injury' in the *Agreement on Safeguards* is a very high one when we contrast this standard with the standard of 'material injury' envisaged under the *Anti-Dumping Agreement,* the *Agreement on Subsidies and Countervailing Measures* (the '*SCM Agreement*') and the GATT 1994. We believe that the word 'serious' connotes a much higher standard of injury than the word 'material'.[192] Moreover, we submit that it accords with the object and purpose of the *Agreement on Safeguards* that the injury standard for the application of a safeguard measure should be higher than the injury standard for anti-dumping or countervailing measures, since, as we have observed previously:

> '[t]he application of a safeguard measure does not depend upon 'unfair' trade actions, as is the case with anti-dumping or countervailing measures. Thus, the import restrictions that are imposed on products of exporting Members when a safeguard action is taken must be seen, as we have said, as extraordinary. And, when construing the prerequisites for taking such actions, their extraordinary nature must be taken into account.'[193]"[194]

(ii) Evaluation of all injury factors

116. In *Argentina – Footwear (EC)*, the Appellate Body discussed the relationship between the definition of "serious injury" in Article 4.1(a) and the requirement of an evaluation of "all relevant factors" in Article 4.2(a):

"[I]t is only when the overall position of the domestic industry is evaluated, in light of all the relevant factors having a bearing on a situation of that industry, that it can be determined whether there is 'a significant overall impairment' in the position of that industry. Although Article 4.2(a) technically requires that certain listed factors must be evaluated, and that all other relevant factors must be evaluated, that provision does not specify what such an evaluation must demonstrate. Obviously, any such evaluation will be different for different industries in different cases, depending on the facts of the particular case and the situation of the industry concerned. An evaluation of each listed factor will not necessarily have to show that each such factor is 'declining'. In one case, for example, there may be significant declines in sales, employment and productivity that will show 'significant overall impairment' in the position of the industry, and therefore will justify a finding of serious injury. In another case, a certain factor may not be declining, but the overall picture may nevertheless demonstrate 'significant overall impairment' of the industry. Thus, in addition to a technical examination of whether the competent authorities in a particular case have evaluated all the listed factors and any other relevant factors, we believe that it is essential for a panel to take the definition of 'serious injury' in Article 4.1(a) of the Agreement on Safeguards into account in its review of any determination of 'serious injury'."[195]

117. The Panel on *US – Wheat Gluten*, in a finding upheld by the Appellate Body, elaborated on the meaning of the term "serious injury":

"[A] determination as to the existence of such 'significant overall impairment' can be made only on the basis of an evaluation of the overall position of the domestic industry, in light of all the relevant factors having a bearing on the situation of that industry.

. . .

[W]e do not consider that a negative trend in every single factor examined is necessary in order for an industry to be in a position of significant overall impairment. Rather, it is the totality of the trends, and their interaction, which must be taken into account in a serious injury determination. Thus, such upturns in a number of factors would not necessarily preclude a determination of serious injury. It is for the investigating authorities to assess and weigh the evidence before them, and to give an adequate, reasoned and reasonable explanation of how the facts support the determination made."[196]

118. The Appellate Body on *US – Wheat Gluten* held that "serious injury" should be determined on the basis of all relevant factors:

"The term 'serious injury' is defined as 'a significant *overall* impairment in the position of a domestic industry'. (emphasis added) The breadth of this term also sug-

---

[191] Appellate Body Report on *US – Lamb*, paras. 124 and 126.
[192] (*footnote original*) We find support for our view that the standard of "serious injury" is higher than "material injury" in the French and Spanish texts of the relevant agreements, where the equivalent terms are, respectively, *dommage grave* and *dommage important*; and *daño grave* and *daño importante*.
[193] (*footnote original*) Appellate Body Report, *Argentina – Footwear Safeguard*, para. 94.
[194] Appellate Body Report on *US – Lamb*, para. 124.

[196] Panel Report on *US – Wheat Gluten*, paras. 8.80 and 8.85.

gests that all factors relevant to the overall situation of the industry should be included in the competent authorities' determination."[197]

119. In reviewing a determination of the existence of a threat of serious injury, the Panel on *US – Lamb* found that not each of the listed injury factors in Article 4.2 (a) need show a declining tendency. Rather, a determination of serious injury within the meaning of Article 4.1(b) requires an assessment of all injury factors "as a whole":

"[W]e do not exclude that in the particular circumstances of a case, e.g., prices remaining at a depressed level for a longer period may be sufficient for a determination on the whole that an industry is threatened with serious injury even if a given injury factor does not show a recent, sharp and sudden decline. Also, a threat finding does not require that, e.g., financial performance of each individual firm operating in the industry show a decline. A competent national authority may arrive at a threat determination even if the majority of firms within the relevant industry is not facing declining profitability, provided that an evaluation of the injury factors as a whole indicates threat of serious injury.

. . .

. . . Article 4.1(b) and 4.2(a) do not require the competent national authority to show that each listed injury factor is declining, i.e., point in the direction of serious injury or threat thereof. The competent national authority is required to make its determination in the light of the developments of injury factors *on the whole* in order to determine whether the relevant industry's condition is facing 'significant *overall* impairment' in the industry's condition is imminent."[198]

(b) "current" serious injury

120. The Panel on *US – Wheat Gluten* considered that, as the investigation of increased imports should focus on recent imports, serious injury should also be found to exist within the recent past. (The Appellate Body did not specifically address this finding.)

"[A]ny determination of serious injury must pertain to the recent past. This flows from the wording of the text of Article XIX:1(a) of the GATT 1994 and Article 2.1 SA, which requires an examination as to whether a product 'is being imported' 'in such increased quantities . . . and under such conditions as to cause or threaten serious injury. . .'. The use of the present tense of the verb in the phrase 'is being imported' in that provision indicates that it is necessary for the competent authorities to examine recent imports. It seems to us logical that if the increase in imports that the investigating authorities must examine must be recent, so also must be any basis for a determination by the authorities as to the situation of the domestic industry. Given that a safeguard measure will necessarily be based upon a determination of serious injury concerning a previous period, we consider it essential that current serious injury be found to exist, up to and including the very end of the period of investigation.[199]"[200]

2. Article 4.1(b)

(a) Serious injury "that is clearly imminent"; determination of a threat of serious injury "based on facts and not merely on allegation, conjecture or remote possibility"

121. The Panel on *US – Lamb* interpreted Article 4.1(b) to signify that an industry's overall impairment "needs to be 'ready to take place'[201] or 'be impending, soon to happen . . . event, especially danger or disaster'".[202] Next, the Panel stated that a determination of a threat of serious injury has to be based on facts and not on allegation, conjecture, or remote possibility. The Panel concluded (i) that a threat determination needs to be based on an analysis which takes objective and verifiable data from the recent past (i.e. the latter part of an investigation period) as a starting-point so as to avoid basing a determination on allegation, conjecture or remote possibility; (ii) that factual information from the recent past, complemented by fact-based projections concerning developments in the industry's condition, and concerning imports in the imminent future, needs to be taken into account in order to ensure an analysis of whether a significant overall impairment of the relevant industry's position is imminent in the near future; (iii) that the analysis needs to determine whether injury of a serious degree will actually occur in the near future unless safeguard action is taken.[203] The Appellate Body's approach largely coincided with the Panel's:

"[W]e note that th[e] term ['threat of serious injury'] is concerned with 'serious injury' which has not *yet* occurred, but remains a future event whose actual materialization cannot, in fact, be assured with certainty. We note, too, that Article 4.1(b) builds on the definition of 'serious injury' by providing that, in order to constitute a 'threat', the serious injury must be *'clearly imminent'*. The word 'imminent' relates to the moment in time when the 'threat' is likely to materialize. The use of this word implies that the anticipated 'serious injury' must be on the very verge of occurring. Moreover, we see the word 'clearly', which qualifies the word 'imminent', as an indication that there must be a high degree of likelihood that the anticipated serious injury will materialize

[197] Appellate Body Report on *US – Wheat Gluten*, para. 74.
[198] Panel Report on *US – Lamb*, paras. 7.188 and 7.203.
[199] (*footnote original*) Except, of course, in a case involving threat of serious injury, where the issue involves future injury.
[200] Panel Report on *US – Wheat Gluten*, para. 8.81.

[202] (*footnote original*) Oxford English Dictionary, at 1316.
[203] Panel Report on *US – Lamb*, paras. 7.127–7.129.

in the very near future. We also note that Article 4.1(b) provides that any determination of a threat of serious injury 'shall be based on facts and not merely on allegation, conjecture or *remote possibility*.' (emphasis added) To us, the word 'clearly' relates also to the factual demonstration of the existence of the 'threat'. Thus, the phrase 'clearly imminent' indicates that, as a matter of fact, it must be manifest that the domestic industry is on the brink of suffering serious injury."[204]

122. In *US – Lamb*, the Appellate Body also reiterated the strict standard of "serious injury" in the context of the "threat of serious injury":

"We recall that, in *Argentina – Footwear Safeguard*, we stated that 'it is essential for a panel to take the definition of "serious injury" in Article 4.1(a) of the *Agreement on Safeguards* into account in its review of any determination of "serious injury".'[205] The same is equally true for the definition of 'threat of serious injury' in Article 4.1(b) of that Agreement. Thus, in making a determination on either the existence of 'serious injury', or on a 'threat' thereof, panels must always be mindful of the very high standard of injury implied by these terms."[206]

123. The Panel on *US – Lamb* considered that a focus on the recent data available pertaining to the end of an investigation period was logical in view of the future-oriented nature of a threat of serious injury analysis:

"In our view, due to the future-oriented nature of a threat analysis, it would seem logical that occurrences at the beginning of an investigation period are less relevant than those at the end of that period. While the SG Agreement does not specify the appropriate duration of the time-period to be considered in an investigation, the Panel and Appellate Body in Argentina – Footwear both considered this issue to some extent. Both concluded that (for an actual serious injury finding) the most recent data were clearly the most relevant. In particular, the Appellate Body stated that 'the relevant investigation period should not only end in the very recent past, the investigation period should be the recent past'.

Given that a threat of serious injury pertains to imminent significant overall impairment, i.e., an event to take place in the immediate future, the same principle should hold true a fortiori for threat determinations compared with present serious injury determinations. This supports the view that the USITC was correct to focus on the most recent data available from the end of the investigation period. We also consider that data from 1997 and interim-1998 cover an adequate and reasonable time-period if complemented by projections extrapolating existing trends into the imminent future so as to ensure the prospective analysis which a threat determination requires.

Therefore, we consider that, by basing its determination on events at the end of the investigation period (i.e., one year and nine months) rather than over the course of the entire investigation period, the USITC analysed sufficiently recent data for making a valid evaluation of whether significant overall impairment was "imminent" in the near future. By the same token, we also consider that, by basing its determination at all on data about events from the recent past, rather than relying exclusively on projections for the various industry indicators into the future, the USITC made its threat determination on the basis of objective and quantifiable facts, and 'not merely on allegation, conjecture or remote possibility'."[207]

(b) Increased imports as a prerequisite for a determination of threat of serious injury

124. The Panel on *Argentina – Footwear (EC)* considered that a mere threat of increased imports is insufficient for the purposes of a determination of threat of serious injury (the Appellate Body did not explicitly address this issue):

"[I]f only a threat of increased imports is present, rather than actual increased imports, this is not sufficient. Article 2.1 requires an actual increase in imports as a basic prerequisite for a finding of either threat of serious injury or serious injury. A determination of the existence of a threat of serious *injury* due to a threat of increased *imports* would amount to a determination based on allegation or conjecture rather than one supported by facts as required by Article 4.1(b)."[208]

125. The Panel on *US – Lamb*, in a finding subsequently not reviewed by the Appellate Body, addressed the question whether, once imports have increased to already cause already some degree of injury, there is a requirement of *additional* increased imports in order to legitimately determine the existence of a threat of serious injury:

"The complainants further claim that the US reference to projections of future increases in imports in defending its threat analysis amounts to equating a 'threat of increased imports' with a 'threat of serious injury', which the *Argentina – Footwear* panel found not to be permissible.

. . .

We agree in general with the complainants' argument that a threat of increased imports as such cannot be equated with threat of serious injury. However, in our view, this is not what the USITC has done in this case. Moreover, we also deem it possible that imports continuing on an elevated level for a longer period without further increasing at the end of the investigation period

[204] Appellate Body Report on *US – Lamb*, para. 125.
[205] (*footnote original*) [Appellate Body Report on *Argentina – Footwear (EC)*,] para. 139.

[207] Panel Report on *US – Lamb*, paras. 7.192–7.194.
[208] Panel Report on *Argentina – Footwear (EC)*, para. 8.284.

> may, if unchecked, go on to cause serious injury (i.e., may threaten to cause serious injury). That is, if increased imports at a certain point in time cause less than serious injury, it is not necessarily true that a threat of serious injury can only be caused by a further increase, i.e., additional increased imports. In our view, in the particular circumstances of a case, a continuation of imports at an already recently increased level may suffice to cause such threat."[209]

(c) Relationship between a determination of the existence of serious injury and a determination of the existence of a threat of serious injury

126. The Panel on *Argentina – Footwear (EC)* observed that in the dispute before it, it was not necessary "to rule on the question of whether it is possible to make simultaneously findings of serious injury and threat of serious injury".[210]

(d) Relationship with Article 4.1(c)

127. In *US – Lamb*, the Panel held that the definition of domestic industry by the United States authorities was inconsistent with Article 4.1(c) of the *Agreement on Safeguards*. The Panel then explained its decision not to exercise judicial economy, but rather to proceed to examine other claims, including those pertaining to Article 4.1(b):

> "A finding that the industry definition used by the USITC is inconsistent with SG Article 4.1(c) would appear to compromise the investigation and determination overall. . . . [T]he Appellate Body focuses on the need for panels to address all claims and/or measures necessary to secure a positive solution to a dispute and adds that providing only a partial resolution of the matter at issue would be false judicial economy. It is in the spirit of the Appellate Body's statements in *Australia – Salmon* that we continue with an analysis of other claims in the alternative, assuming arguendo either (1) that the USITC's industry definition were consistent with the Safeguards Agreement or (2) that, as the United States argues in the alternative, the USITC would have made a finding of threat of serious injury even if the industry definition had been limited to packers and breakers."[211]

3. Article 4.1(c)

(a) "domestic industry" – "producers as a whole . . . of the like or directly competitive products"

128. In *US – Lamb* the Appellate Body concurred with the finding of the Panel in that dispute that in the context of an investigation in which the relevant like product was defined as lamb meat, the term "domestic industry" could not be interpreted as including growers and feeders of live lambs. The Appellate Body began by identifying the analytical approach towards defining "domestic industry":

> "Accordingly, the first step in determining the scope of the domestic industry is the identification of the products which are 'like or directly competitive' with the imported product. Only when those products have been identified is it possible then to identify the 'producers' of those products."[212]

129. The Appellate Body first considered the definition of "domestic industry" with reference to products:

> "[A] safeguard measure is imposed on a specific '*product*', namely, the imported product. The measure may only be imposed if that specific product ('such *product*') is having the stated effects upon the 'domestic industry that *produces like or directly competitive products*'. (emphasis added) The conditions in Article 2.1, therefore, relate in several important respects to specific products. In particular, according to Article 2.1, the legal basis for imposing a safeguard measure exists only when imports of a specific product have prejudicial effects on domestic producers of products that are 'like or directly competitive' with that imported product. In our view, it would be a clear departure from the text of Article 2.1 if a safeguard measure could be imposed because of the prejudicial effects that an imported product has on domestic producers of products that are *not* 'like or directly competitive products' in relation to the imported product."[213]

130. After addressing the definition of "domestic industry" with respect to products, the Appellate Body in *US – Lamb* then proceeded to consider the issue of producers:

> "As the Panel indicated, 'producers' are those who grow or manufacture an article; 'producers' are those who bring a thing into existence. This meaning of 'producers' is, however, qualified by the second element in the definition of 'domestic industry'. This element identifies the particular products that must be produced by the domestic 'producers' in order to qualify for inclusion in the 'domestic industry'. According to the clear and express wording of the text of Article 4.1(c), the term 'domestic industry' extends solely to the 'producers . . . *of the like or directly competitive products*'. (emphasis added) The definition, therefore, focuses exclusively on the producers of a very specific group of products. Producers of products that are not 'like or directly competitive products' do not, according to the text of the treaty, form part of the domestic industry."[214]

---

[209] Panel Report on *US – Lamb*, paras. 7.185–7.187.
[210] Panel Report on *Argentina – Footwear (EC)*, para. 8.285.
[211] Panel Report on *US – Lamb*, para. 7.119.
[212] Appellate Body on *US – Lamb*, para. 87.
[213] Appellate Body on *US – Lamb*, para. 86.
[214] Appellate Body on *US – Lamb*, para. 84.

131. In *US – Lamb*, the Appellate Body upheld the findings of the Panel and also concluded that the definition of "domestic industry" by the United States authorities was too broad:

> "There is no dispute that in this case the 'like product' is 'lamb meat', which is the imported product with which the safeguard investigation was concerned. The USITC considered that the 'domestic industry' producing the 'like product', lamb meat, includes the growers and feeders of live lambs. The term 'directly competitive products' is not, however, at issue in this dispute as the USITC did not find that there were any such products in this case.[215]
>
> "In this respect, we are not persuaded that the words 'as a whole' in Article 4.1(c), appearing in the phrase 'producers as a whole', offer support to the United States position. These words do not alter the requirement that the 'domestic industry' extends only to producers of 'like or directly competitive products'. The words 'as a whole' apply to 'producers' and, when read together with the terms 'collective output' and 'major proportion' which follow, clearly address the *number* and the *representative nature* of producers making up the domestic industry. The words 'as a whole' do not imply that producers of *other products*, which are *not* like or directly competitive with the imported product, can be included in the definition of domestic industry. Like the Panel, we see the words 'as a whole' as no more than 'a *quantitative* benchmark for the proportion of producers . . . which a safeguards investigation has to cover.'"[216]

132. The Appellate Body on *US – Lamb* expressed scepticism that the degree of integration of production processes within an industry should have any bearing on the determination of the "domestic industry".

> "Although we do not disagree with the Panel's analysis of the USITC Report, nor with the conclusions it drew from that analysis, we have reservations about the role of an examination of the degree of integration of production processes for the products at issue. As we have indicated, under the Agreement on Safeguards, the determination of the "domestic industry" is based on the 'producers . . . of the like or directly competitive products'. The focus must, therefore, be on the identification of the products, and their 'like or directly competitive' relationship, and not on the processes by which those products are produced.[217]"[218]

(b) "those whose collective output . . . constitutes a major proportion"

133. The Panel on *US – Wheat Gluten* addressed the link between the phrase "major proportion" and the question of data coverage:

> "[T]he Agreement expressly envisages that, in certain circumstances, the 'domestic industry' may consist of those domestic producers 'whose collective output of the like or directly competitive products constitutes a major proportion of the total domestic production of those products'. This implies that complete data coverage may not always be possible and is not required. While the fullest possible data coverage is required in order to maximize the accuracy of the investigation, there may be circumstances in a particular case which do not allow an investigating authority to obtain such coverage. In this case, the fact that the USITC record included full period data for only two domestic producers was partially a result of the fact that Heartland became part of the domestic industry only in 1996. Furthermore, the profitability data provided by ADM did not pertain specifically to the domestic industry under investigation and was therefore excluded.
>
> Moreover, the USITC found that '[p]rofitability reflected the trends in average unit value prices, which initially rose and then fell.' The USITC had before it data pertaining to unit value from all producers, including ADM. The concurrence in trends between these two factors supports the view that the profitability data used by the USITC was representative of the domestic industry's situation.
>
> On the basis of the information contained, or referred to, in the sections of the USITC Report relating to profits and losses and the statement by the USITC that the three domestic producers that provided usable financial data on wheat gluten 'accounted for the substantial majority of domestic production of wheat gluten', we find that the United States did not act inconsistently with Article 4.2(a) in terms of the coverage of the 'profits and losses' data."[219]

134. In contrast to the Panel's findings on *US – Wheat Gluten*, the Panel on *US – Lamb* held that the data gathered by the investigating authorities in the specific case were not sufficiently representative of those producers whose collective output constitutes a major proportion of the products in question:

> "[T]he crucial problem with the data used by the USITC relates to the representativeness of the questionnaire data where they were used (e.g., employment, financial

---

[215] (*footnote original*) We note that two Commissioners (Askey and Crawford) did not join in the findings of the USITC on this point. These two Commissioners both found that *live lambs*, produced by growers and feeders, are directly competitive with lamb *meat* and that, accordingly, the "domestic industry" includes the producers of these competing products. USITC Report, pp. I-8 and I-9, footnotes 7 (Commissioner Askey) and 8 (Commissioner Crawford). The United States has not argued, before the Panel or before us, that *live lambs* are directly competitive with lamb *meat*, and that issue, as we stated earlier, does not form part of this appeal.

[216] Appellate Body Report on *US – Lamb*, para. 91.

[217] (*footnote original*) We can, however, envisage that in certain cases a question may arise as to whether two articles are *separate products*. In that event, it may be relevant to inquire into the production processes for those products.

[218] Appellate Body Report on *US – Lamb*, para. 94.

[219] Panel Report on *US – Wheat Gluten*, paras. 8.54–8.56.

indicators), and not with the use of USDA data where available. In particular the low data coverage for growers and feeders (approximately six per cent), the lack of financial data for interim 1997 and 1998 for grower/feeders, and the uneven data coverage for packers and breakers (especially in the financial data as outlined above) raises serious doubts as to whether the data represent a 'major proportion' of the domestic industry, in the sense of SG Article 4.1(c)."[220]

135. The Panel on *US – Lamb* also pointed out that an incorrect determination of what constitutes the "domestic industry" will likely vitiate also the representativeness of data related to such incorrectly determined domestic industry:

"This lack of representativeness is likely compounded by the fact that the USITC defined the domestic industry broadly as including growers and feeders, as the conclusions drawn from the data pertaining to only a small proportion of US growers and feeders are central to the USITC's overall finding of threat of serious injury."[221]

136. The Panel on *US – Lamb* made clear that a national authority is not under an obligation to collect information from all domestic producers so as to ensure the representativeness of the data used for its final determination. Nevertheless, the Panel invoked, among other things, the need for a "statistically valid sample":

"We agree with the United States that the Safeguards Agreement does not specify any particular methodology to ensure the representativeness of data collected in an investigation. But we also note that the USITC itself concedes that the questionnaire responses do not constitute a statistically valid sample of the producers which, in the USITC's view, form an essential part of the domestic industry. While, again accepting arguendo the USITC's industry definition,[222] we recognize that in practical terms it would have been impossible for the USITC to collect data from all of the more than 70,000 growers, we nevertheless believe that the USITC could have obtained data from a larger percentage of the growers than it did or from a statistically valid sample, so as to ensure that the data collected were representative of growers as a whole. In any case, petitioners requesting the initiation of an investigation could not automatically be taken to represent a major proportion of the domestic industry.

In the light of the foregoing, we conclude that on the basis of the information made available by the United States in this dispute (and absent more detailed information on the exact coverage of the questionnaire responses), by industry segment and by injury factor, we are not persuaded that the data used as a basis for the USITC's determination in this case was sufficiently *representative* of 'those producers whose collective output . . . constitutes *a major proportion* of the total domestic production of those products' within the meaning of SG Article 4.1(c)."[223]

(c) Relationship with other Articles

137. With respect to the relationship with Article 4.1(b), see paragraph 127 above.

4. Article 4.2(a)

(a) "shall evaluate all relevant factors"

(i) Relationship between the requirement to evaluate all relevant factors and the definition of serious injury in Article 4.1(a)

138. With respect to the relationship between the requirement to evaluate all relevant factors and the definition of serious injury in Article 4.1(a), see paragraphs 116–118 above.

(ii) "All" relevant factors – factors relating to imports and factors relating to the domestic industry

139. In the context of reversing the interpretation by the Panel on *US – Wheat Gluten* of the requisite causal link between increased imports and serious injury, the Appellate Body held that a national authority should consider all the factors listed in Article 4.2(a), regardless of whether they relate to imports specifically or to the domestic industry more generally. The Appellate Body did not consider that Article 4.2(a) attached any special significance to any one of these factors in particular:

"The use of the word 'all' in the phrase 'all relevant factors' in Article 4.2(a) indicates that the effects of any factor may be relevant to the competent authorities' determination, irrespective of whether the particular factor relates to imports specifically or to the domestic industry more generally. This conclusion is borne out by the list of factors which Article 4.2(a) stipulates are, 'in particular', relevant to the determination. This list includes factors that relate *both to* imports specifically *and* to the overall situation of the domestic industry more generally. The language of the provision does not distinguish between, or attach special importance or preference to, any of the listed factors. In our view, therefore, Article 4.2(a) of the Agreement on Safeguards suggests that all these factors are to be *included* in the determination and that the contribution of each relevant factor is to be counted in the determination of serious injury according to its 'bearing' or effect on the situation of the domestic industry. Thus, we consider that Article

[220] Panel Report on *US – Lamb*, para. 7.218.
[221] Panel Report on *US – Lamb*, para. 7.219.
[222] (*footnote original*) Of course, only once the relevant domestic industry has been defined consistently with SG Article 4.1(c) is it logically possible to select producers representing a "major proportion" of the collective output of the like or directly competitive product in question, or to develop a valid statistical sample that would ensure that the data collected are representative of a major proportion of the domestic industry.
[223] Panel Report on *US – Lamb*, paras. 7.220–7.221.

4.2(a) does not support the Panel's conclusion that some of the 'relevant factors' – those related exclusively to increased imports – should be counted towards an affirmative determination of serious injury, while others – those not related to increased imports – should be excluded from that determination."[224]

140. In *US – Wheat Gluten*, after finding that the phrase "all relevant factors" under Article 4.2(a) refers to factors relating both to imports and to the domestic industry, the Appellate Body further held that the determination of "causality" under Article 4.2(b) must give the phrase "all relevant factors" the same meaning as under Article 4.2(a). The Appellate Body noted that Article 4.2(a) imposes an obligation to evaluate (and by implication to include) the effect of *all* the relevant factors on the domestic industry and went on to state that this obligation under Article 4.2(a) would be violated if the very *same* effects, caused by those *same* factors, were – with the exception of increased imports – to be excluded from consideration under Article 4.2(b).

"We believe that Articles 4.2(a) and 4.2(b) of the *Agreement on Safeguards* must be given a mutually consistent interpretation, particularly in light of the explicit textual connection between these two provisions. According to the opening clause of Article 4.2(b) – "The determination referred to in subparagraph (a) shall not be made unless . . ." – *both* provisions lay down rules governing a *single* determination, made under Article 4.2(a). In our view, it would contradict the requirement in Article 4.2(a) to evaluate – and, thereby, include in the determination – the 'bearing' or effect *all* the relevant factors have on the domestic industry, if those *same* effects, caused by those *same* factors, were, with the exception of increased imports, to be excluded under Article 4.2(b), as the Panel suggested."[225]

(iii) Requirement to consider all factors listed in Article 4.2(a)

141. The Panel on *Korea – Dairy* found, with respect to the list of factors contained in Article 4.2(a), that the national investigating authority was under an obligation to evaluate *all* of these factors:

"This provision sets out the general principle regarding the economic factors which need to be considered in a serious injury investigation, and provides a list of factors that are a priori considered to be especially relevant and informative of the situation of the domestic industry. The use of the wording 'in particular' makes it clear to us that, among 'all relevant factors' that the investigating authorities 'shall evaluate', the consideration of the factors listed is always relevant and therefore required, even though the authority may later dismiss some of them as not having a bearing on the situation of that industry."[226]

142. The Panel on *Argentina – Footwear (EC)* in a finding subsequently upheld by the Appellate Body, made a similar statement:

"We note, first, that the text of Article 4.2(a) of the Safeguards Agreement explicitly requires the evaluation of 'all relevant factors', in particular those listed in that article. Second, Article 6.4 of the ATC contains no such express requirement and recognises that 'none of these factors . . . can necessarily give decisive guidance. Nonetheless, the panels on *United States – Underwear* and *United States – Shirts and Blouses* ruled that each and every injury factor mentioned in Article 6.4 of the ATC has to be considered by the national authority. With regard to the obligation to evaluate 'all relevant factors' we consider these past panel reports relevant. Consequently, in accordance with the text of the *Safeguards Agreement* and past practice, we consider that an evaluation of all factors listed in Article 4.2(a) is required.

. . .

. . . we must consider, first, whether all injury factors listed in the Agreement were considered by Argentina as the text of Article 4.2(a) of the Agreement ('all relevant factors. . . . including . . . changes in the level of sales, production, productivity, capacity utilisation, profits and losses, and employment') is unambiguous that at a minimum each of the factors listed, in addition to all other factors that are 'relevant', must be considered."[227]

143. The Appellate Body on *Argentina – Footwear (EC)* agreed "with the Panel's interpretation that Article 4.2(a) of the *Agreement on Safeguards* requires a demonstration that the competent authorities evaluated, at a minimum, each of the factors listed in Article 4.2(a) as well as all other factors that are relevant to the situation of the industry concerned".[228]

144. The Panel on *US – Wheat Gluten* reiterates this standard:

"[T]he language in this provision is mandatory ('shall . . .'). Furthermore, this list is preceded by the term 'in particular. . .'. On the basis of the text of the provision, we therefore concur with the shared view of the parties that all of the factors listed in Article 4.2(a) must be evaluated. Of course, an examination of any one of those factors in a given case may lead the investigating authority to conclude that a particular factor is not probative in the circumstances of a particular industry or a particular case, and therefore is not relevant to the actual determination."[229]

(iv) Standard of review

145. In *Argentina – Footwear (EC)*, the Appellate Body reiterated its statement in *EC – Hormones*, and upheld the findings by the Panel that the *Agreement on Safeguards* is silent as to the appropriate standard of review. Therefore, the "objective assessment" requirement under Article 11 of the DSU sets forth the appropriate standard of review for examining the WTO-consistency of a safeguard measure. With respect to the application of the standard of review, the Appellate Body ruled that a panel is obliged to assess whether the importing authorities "had examined all the relevant facts and had provided a reasoned explanation of how the facts supported their determination". In addition to "an objective assessment of the facts", the Appellate Body in *Argentina – Footwear (EC)* held that a panel shall examine "the applicability of and conformity with the relevant covered agreements". Specifically, the Appellate Body found that Article 11 of the DSU requires a panel to correctly interpret and apply the substantive provisions of Articles 2 and 4 of the *Agreement on Safeguards*, in particular, those relating to the requirements of imports "in such increased quantities", "serious injury" to the domestic industry, and causation:

> "Although that case dealt with the panel's assessment of the facts, and this case deals with the Panel's assessment of the matter, more generally, the same reasoning applies here. The *Agreement on Safeguards*, like the *Agreement on the Application of Sanitary and Phytosanitary Measures*, is silent as to the appropriate standard of review. Therefore, Article 11 of the DSU, and, in particular, its requirement that, . . . a panel should make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements, sets forth the appropriate standard of review for examining the consistency of a safeguard measure with the provisions of the *Agreement on Safeguards*.
>
> Based on our review of the Panel's reasoning, we find that the Panel correctly stated the appropriate standard of review, as set forth in Article 11 of the DSU. And, with respect to its *application* of the standard of review, we do not believe that the Panel conducted a *de novo* review of the evidence, or that it substituted its analysis and judgement for that of the Argentine authorities. Rather, the Panel examined whether, as required by Article 4 of the *Agreement on Safeguards*, the Argentine authorities had considered all the relevant facts and had adequately explained how the facts supported the determinations that were made. Indeed, far from departing from its responsibility, in our view, the Panel was simply fulfilling its responsibility under Article 11 of the DSU in taking the approach it did. To determine whether the safeguard investigation and the resulting safeguard measure applied by Argentina were consistent with Article 4 of the *Agreement on Safeguards*, the Panel was obliged, by the very terms of Article 4, to assess whether the Argentine authorities had examined all the relevant facts and had provided a reasoned explanation of how the facts supported their determination.
>
> In addition to 'an objective assessment of the facts', we note, too, that part of the 'objective assessment of the matter' required of a panel by Article 11 of the DSU is an assessment of 'the applicability of and conformity with the relevant covered agreements'. Consequently, we must also examine whether the Panel correctly interpreted and applied the substantive provisions of Articles 2 and 4 of the *Agreement on Safeguards*, in particular, those relating to the requirements of imports 'in such increased quantities', 'serious injury' to the domestic industry, and causation."[230]

146. In *US – Lamb*, the Appellate Body articulated the standard of review for a national authority's determination of serious injury or threat thereof:

> "[I]n examining a claim under Article 4.2 of the *Agreement on Safeguards*, a panel's application of the appropriate standard of review of the competent authorities' determination has two aspects. First, a panel must review whether the competent authorities have, as a formal matter, evaluated *all relevant factors* and, second, a panel must review whether those authorities have, as a *substantive* matter, provided a *reasoned and adequate explanation* of how the facts support their determinations."[231]

147. The Appellate Body's application of its standard of review toward a national authority's determination of serious injury or threat thereof is illustrated by its findings in *US – Lamb*. Here, after criticizing the United States authorities' determination of threat of serious injury, the Appellate Body stated:

> "We wish to emphasize again that our remarks about the price data are not intended to suggest that the domestic industry was *not* threatened with serious injury. Rather, our conclusion is simply that the USITC has not adequately explained how the facts relating to prices support its determination, under Article 4.2(a), that the domestic industry *was* threatened with such injury."[232]

148. Although on *US – Lamb* the Appellate Body agreed with the Panel's articulation of the appropriate standard of review, it held that the Panel had not applied this standard correctly in that case. The Appellate Body took issue with the fact that the Panel had considered the evaluation of certain factors to be 'a sufficient basis' for the national authorities' determination, but did not

[230] Appellate Body Report on *Argentina – Footwear (EC)*, paras. 120–122.
[231] Appellate Body Report on *US – Lamb*, para. 141.
[232] Appellate Body Report on *US – Lamb*, para. 160.

engage in any substantive review of these factors. The Appellate Body found that the Panel had not applied the required standards of review because:

> "[B]y failing to review the USITC's determination in light of these detailed substantive arguments, [it] failed to examine critically whether the USITC had, indeed, provided a reasoned and adequate explanation of how the facts supported its determination that there existed a 'threat of serious injury'."[233]

149. The Appellate Body on *US – Cotton Yarn*, in the context of examination of a transitional textile safeguard under Article 6 of the ATC, found that a panel "must not conduct a *de novo* review of the evidence nor substitute their judgement for that of the competent authority", and summarized the standard of review for past safeguard disputes as follows:

> "Our Reports in these disputes under the *Agreement on Safeguards* spell out key elements of a panel's standard of review under Article 11 of the DSU in assessing whether the competent authorities complied with their obligations in making their determinations. This standard may be summarized as follows: panels must examine whether the competent authority has evaluated all relevant factors; they must assess whether the competent authority has examined all the pertinent facts and assessed whether an adequate explanation has been provided as to how those facts support the determination; and they must also consider whether the competent authority's explanation addresses fully the nature and complexities of the data and responds to other plausible interpretations of the data. However, panels must not conduct a *de novo* review of the evidence nor substitute their judgement for that of the competent authority."[234]

(v) "of an objective and quantifiable nature"

General

150. In its determination of what would constitute "factors of an objective and quantifiable nature" within the meaning of Article 4.2(a), the Appellate Body in *US – Lamb* opined that the requirement of objectivity and quantifiability applies, not only to *factors*, but also to *data*, the evaluation of which would "enable the measurement and quantification of these factors". The Appellate Body then specified that for data to be "objective and quantifiable", such data would have to be both *sufficient* and *representative* of the domestic industry:

> "We note that no provision of the Agreement on Safeguards specifically addresses the question of the extent of data collection, and in particular, whether competent authorities must have before them data that is representative of the domestic industry. However . . . competent authorities are obliged to 'evaluate' all relevant factors of an 'objective and quantifiable' nature . . . We recognize that the clause 'of an objective and quantifiable nature' refers expressly to 'factors', but not expressly to data. We are, however, convinced that factors can only be 'of an objective and quantifiable nature' if they allow a determination to be made, as required by Article 4.2(b) of the Agreement on Safeguards, on the basis of 'objective evidence'. Such evidence is, in principle, objective data. The words 'factors of an objective and quantifiable nature' imply, therefore, an evaluation of objective data which enables the measurement and quantification of these factors.
>
> [T]he requirement for competent authorities to evaluate the 'bearing' that the relevant factors have on the 'domestic industry ' and, subsequently, to make a determination concerning the overall 'situation of that industry', means that competent authorities must have a sufficient factual basis to allow them to draw reasoned and adequate conclusions concerning the situation of the 'domestic industry'. The need for such a sufficient factual basis, in turn, implies that the data examined, concerning the relevant factors, must be representative of the 'domestic industry'. Indeed, a determination made on the basis of insufficient data would not be a determination about the state of the 'domestic industry', as defined in the Agreement, but would, in reality, be a determination pertaining to producers of something less than 'a major proportion of the total domestic production' of the products at issue. Accordingly, we agree with the Panel that the data evaluated by the competent authorities must be sufficiently representative of the 'domestic industry' to allow determinations to be made about that industry."[235]

151. The Appellate Body on *US – Lamb* nevertheless stressed that data could fulfil the requirement of being representative even if they did not cover *all* domestic producers whose production constitutes a major proportion of the domestic industry:

> "We do not wish to suggest that competent authorities must, in every case, actually have before them data pertaining to all those domestic producers whose production, taken together, constitutes a major proportion of the domestic industry. In some instances, no doubt, such a requirement would be both impractical and unrealistic. Rather, the data before the competent authorities must be sufficiently representative to give a true picture of the 'domestic industry'. What is sufficient in any given case will depend on the particularities of the 'domestic industry' at issue."[236]

Nature and temporal focus of data in a threat analysis

152. In *US – Lamb*, the Appellate Body addressed what it calls the "tension between a future-oriented 'threat'

[233] Appellate Body Report on *US – Lamb*, para. 148.
[234] Appellate Body Report on *US – Cotton Yarn*, para. 74.
[235] Appellate Body Report on *US – Lamb*, paras. 130–131.
[236] Appellate Body Report on *US – Lamb*, para. 132.

analysis" on the one hand, and the "need for a fact-based determination of serious injury" on the other:

> "[W]e agree with the Panel that a threat determination is 'future-oriented'. However, Article 4.1(b) requires that a "threat" determination be based on "facts" and not on 'conjecture'. As facts, by their very nature, pertain to the present and the past, the occurrence of future events can never be definitively proven by facts. There is, therefore, a tension between a future-oriented 'threat' analysis, which, ultimately, calls for a degree of 'conjecture' about the likelihood of a future event, and the need for a fact-based determination. Unavoidably, this tension must be resolved through the use of facts from the present and the past to justify the conclusion about the future, namely that serious injury is 'clearly imminent'. Thus, a fact-based evaluation, under Article 4.2(a) of the *Agreement on Safeguards*, must provide the basis for a projection that there is a high degree of likelihood of serious injury to the domestic industry in the very near future.[237]"[238]

153. With respect to the temporal focus of data used in a threat analysis, the Appellate Body on *US – Lamb* held:

> "[W]e note that the *Agreement on Safeguards* provides no particular methodology to be followed in making determinations of serious injury or threat thereof. However, whatever methodology is chosen, we believe that data relating to the most recent past will provide competent authorities with an essential, and, usually, the most reliable, basis for a determination of a threat of serious injury. The likely state of the domestic industry in the very near future can best be gauged from data from the most recent past . . . [I]n principle, within the period of investigation as a whole, evidence from the most recent past will provide the strongest indication of the likely future state of the domestic industry."[239]

154. The Appellate Body, also on *US – Lamb*, nevertheless cautioned against the use of recent data in isolation from data pertaining to the entire period of investigation:

> "However, we believe that, although data from the most recent past has special importance, competent authorities should not consider such data in isolation from the data pertaining to the entire period of investigation. The real significance of the short-term trends in the most recent data, evident at the end of the period of investigation, may only emerge when those short-term trends are assessed in the light of the longer-term trends in the data for the whole period of investigation. If the most recent data is evaluated in isolation, the resulting picture of the domestic industry may be quite misleading. For instance, although the most recent data may indicate a decline in the domestic industry, that decline may well be a part of the normal cycle of the domestic industry rather than a precursor to clearly imminent serious injury. Likewise, a recent decline in economic performance could simply indicate that the domestic industry is returning to its normal situation after an unusually favourable period, rather than that the industry is on the verge of a precipitous decline into serious injury. Thus, we believe that, in conducting their evaluation under Article 4.2(a), competent authorities cannot rely exclusively on data from the most recent past, but must assess that data in the context of the data for the entire investigative period.[240]"[241]

(vi) "Rate and amount" of the increase; "changes" in the level of sales

155. The Panel on *Argentina – Footwear (EC)*, subsequently upheld on this point by the Appellate Body, read the requirement under Article 4.2(a) to evaluate the rate and amount of the increase in imports to mean a requirement to analyse the *trends* of imports over the period of investigation:

> "[W]e recall Article 4.2(a)'s requirement that 'the rate and amount of the increase in imports' be evaluated.[242] In our view this constitutes a requirement that the intervening *trends* of imports over the period of investigation be analysed. We note that the term 'rate' connotes both speed and direction, and thus intervening trends (up or down) must be fully taken into consideration. Where these trends are mixed over a period of investigation, this may be decisive in determining whether an increase in imports in the sense of Article 2.1 has occurred. In practical terms, we consider that the best way to assess the significance of any such mixed trends in imports is by evaluating whether any downturn in imports is simply temporary, or instead reflects a longer-term change."[243]

156. The Appellate Body on *Argentina – Footwear (EC)* affirmed this interpretation of the words "rate and amount" in Article 4.2(a) by agreeing:

---

[237] (*footnote original*) We observe that the projections made must relate to the overall state of the domestic industry, and not simply to certain relevant factors.

[238] Appellate Body Report on *US – Lamb*, para. 136.

[239] Appellate Body Report on *US – Lamb*, para. 137.

[240] (*footnote original*) We note that, at footnote 130 of our Report in *Argentina – Footwear Safeguard*, . . ., we said that "the relevant investigation period should not only *end* in the very recent past, the investigation period should *be* the recent past." In this Report, we comment on the relative importance, within the period of investigation, of the data from the end of the period, as compared with the data from the beginning of the period. The period of investigation must, of course, be sufficiently long to allow appropriate conclusions to be drawn regarding the state of the domestic industry.

[241] Appellate Body Report on *US – Lamb*, para. 138.

[242] (*footnote original*) We recognize that Article 4.2(a) makes this reference in the specific context of the causation analysis, which in our view is inseparable from the requirement of imports in "*such* increased quantities" (emphasis added). Thus, we consider that in the context of both the requirement that imports have increased, and the analysis to determine whether these imports have caused or threaten to cause serious injury, the Agreement requires consideration not just of data for the end-points of an investigation period, but for the entirety of that period.

[243] Panel Report on *Argentina – Footwear (EC)*, para. 8.159.

> "[W]ith the Panel that the specific provisions of Article 4.2(a) require that 'the *rate* and *amount* of the increase in imports . . . in absolute and relative terms' . . . must be evaluated. Thus, we do not dispute the Panel's view and ultimate conclusion that the competent authorities are required to consider the *trends* in imports over the period of investigation (rather than just comparing the end points) under Article 4.2(a)."[244]

157. In *US – Line Pipe*, the Panel found, in a statement not reviewed by the Appellate Body, that "there is no need for a determination that imports are presently still increasing. Rather, imports could have 'increased' in the recent past, but not necessarily be increasing up to the end of the period of investigation or immediately preceding the determination."[245] The Panel thus ruled that "a determination of either an absolute or relative increase in imports causing serious injury is sufficient to authorize a Member to adopt safeguard measures, even if it found the absolute increased imports determination by the importing Member was incorrect".[246] For a detailed discussion, see paragraph 48 above.

158. With respect to the coincidence between trends in injury factors and import trends, see paragraphs 178–180 below.

(vii) "productivity"

159. The Panel on *US – Wheat Gluten* held that the term "productivity" may refer to the overall productivity of an industry and encompasses productivity of both labour and capital (the Appellate Body did not address this particular finding):

> "[T]he Agreement on Safeguards provides no precise definition of the term 'productivity' that appears in Article 4.2(a) SA. The context of this term includes the rest of the text of Article 4.2(a) – and in particular, the phrase 'all relevant factors of an objective and quantifiable nature having a bearing on the situation of that *industry*' . . . We consider that this term, read in its context, may refer to the overall productivity of the *industry*.
>
> It is apparent to us from the USITC Report that the USITC gathered and analysed data on capital investment in the industry as well as data pertaining to worker productivity. In these Panel proceedings, the United States asserts that 'it is simple mathematics that if production declines (as it did in 1996–1997 from 1995 levels), while the amount of capital in the industry increases (as it did from the capital projects adding capacity), the productivity of capital will correspondingly decline.' We would have preferred a more integrated examination in the USITC Report of 'productivity' that explicitly encompassed *overall* industry productivity – particularly in light of the acknowledgement by the USITC that 'production of wheat gluten is extremely capital intensive and requires very few production workers'. Nevertheless, we consider that the data and statements pertaining to worker productivity, in conjunction with those on capital investments, in the overall context of the USITC Report, indicate that the USITC considered industry productivity as required by Article 4.2(a)."[247]

(viii) Factors not listed in Article 4.2(a)

160. In *US – Wheat Gluten*, the Appellate Body disagreed with the interpretation by the Panel in that dispute that, with regard to factors not enumerated in Article 4.2(a), competent authorities are obliged only to evaluate factors "clearly raised" as relevant by interested parties in a domestic investigation.[248] The Appellate Body first established a link between the requirement, under Article 4.2(a), to evaluate "all relevant factors" and the obligation, under Article 3.1, to conduct an investigation:

> "The word 'all' has a broad meaning which, if read alone, would suggest that the scope of the obligation on the competent authorities to evaluate 'relevant factors' is without limits or exceptions.[249] However, the word cannot, of course, be read in isolation. . . . the text of Article 4.2(a) itself imposes certain explicit qualifications on the obligation to evaluate 'all relevant factors' as it states that competent authorities need only evaluate factors which are 'objective and quantifiable' and which '[have] a bearing on the situation of that industry'.
>
> The obligation to evaluate 'relevant factors' must also be interpreted in light of the duty of the competent authorities to conduct an 'investigation' under the *Agreement on Safeguards*. The competent authorities must base their evaluation of the relevance, if any, of a factor on evidence that is 'objective and quantifiable'. The competent authorities will, in principle, obtain this evidence during the investigation they must conduct, under Article 3.1, into the situation of the domestic industry. The scope of the obligation to evaluate 'all relevant factors' is, therefore, related to the scope of the obligation of competent authorities to conduct an investigation.
>
> We turn, therefore, for context, to Article 3.1 of the *Agreement on Safeguards*, which is entitled '*Investigation*'."[250]

161. The Appellate Body on *US – Wheat Gluten* then reversed the Panel's finding that the competent authorities are obliged only to evaluate factors "clearly raised"

---

[244] Appellate Body Report on *Argentina – Footwear (EC)*, para. 129.
[245] Panel Report on *US – Line Pipe*, para. 7.207.
[246] Panel Report on *US – Line Pipe*, para. 7.211.
[247] Panel Report on *US – Wheat Gluten*, paras. 8.44–8.45.
[248] Panel Report on *US – Wheat Gluten*, paras. 8.69 and 8.121.
[249] (*footnote original*) *The New Shorter Oxford English Dictionary*, (Brown, ed.) (Clarendon Press, 1993), Vol. I, p. 52, indicates that, when the word "all" is used as an adjective preceding a noun in the plural form (as in "all . . . factors"), it means "The entire number of; the individual constituents of, without exception."
[250] Appellate Body Report on *US – Wheat Gluten*, paras. 51–53. See also paras. 90–92 of this Chapter.

as relevant by interested parties in a domestic investigation. Rather, the Appellate Body held that the investigating authorities must, where necessary, "undertake additional investigative steps . . . in order to fulfill their obligation to evaluate all relevant factors":

> "The competent authorities must, in every case, carry out a full investigation to enable them to conduct a proper evaluation of all of the relevant factors expressly mentioned in Article 4.2(a) of the *Agreement on Safeguards*. Moreover, Article 4.2(a) requires the competent authorities – and *not the interested parties* – to evaluate fully the relevance, if any, of 'other factors'. If the competent authorities consider that a particular 'other factor' may be relevant to the situation of the domestic industry, under Article 4.2(a), their duties of investigation and evaluation preclude them from remaining passive in the face of possible short-comings in the evidence submitted, and views expressed, by the interested parties. In such cases, where the competent authorities do not have sufficient information before them to evaluate the possible relevance of such an 'other factor', they must investigate fully that 'other factor', so that they can fulfill their obligations of evaluation under Article 4.2(a). In that respect, we note that the competent authorities' 'investigation' under Article 3.1 is *not limited* to the investigative steps mentioned in that provision, but must simply '*include*' these steps. Therefore, the competent authorities must undertake additional investigative steps, when the circumstances so require, in order to fulfill their obligation to evaluate all relevant factors.
>
> Thus, we disagree with the Panel's finding that the competent authorities need only examine 'other factors' which were '*clearly* raised before them as relevant by the interested parties in the domestic investigation.' (emphasis added) . . . However, as is clear from the preceding paragraph of this Report, we also reject the European Communities' argument that the competent authorities have an open-ended and unlimited duty to investigate all available facts that might possibly be relevant."[251]

(ix) Consideration of "all relevant factors" in the case of a segmented domestic industry

162. The Panel on *Korea – Dairy* held that while it is permissible to analyse distinct market segments in order to make a finding of serious injury to the whole domestic industry, the investigating authorities must nevertheless comply with certain requirements in this respect:

> "[T]he definition of the domestic industry in this case as comprising two different segments of the dairy products market has consequences for the evaluation of the situation of the industry. In assessing the serious injury to the whole domestic industry, we find that it is acceptable to analyse distinct market segments but, as stated above, all factors listed in Article 4.2 must be addressed. In considering each of the factors listed in Article 4.2, and any others found to be relevant by the authority, the investigating authority has two options: for each factor, the investigating authority can consider it either for all segments, or if it decides to examine it for only one or some segment(s), it must provide an explanation of how the segment(s) chosen is (are) objectively representative of the whole industry. . . . Our point here is that an analysis of only a segment of the domestic industry, without any explanation of its significance for the whole industry, will not satisfy the requirements of the Agreement on Safeguards."[252]

163. In *Argentina – Footwear (EC)*, the Panel addressed the argument that, since the investigation had been conducted on the basis of a division of the product under investigation into five product groups, the investigating authorities were required to prove serious injury in all segments in which safeguard measures were to be imposed:

> "We disagree with the European Communities that Argentina was required to conduct its injury and causation analysis on a disaggregated basis. In our view, since in this case the definition of the like or directly competitive product is not challenged, it is this definition that controls the definition of the 'domestic industry' in the sense of Article 4.1(c) as well as the manner in which the data must be analysed in an investigation. While Argentina could have considered the data on a disaggregated basis (and in fact did so in some instances), in our view, it was not required to do so. Rather, given the undisputed definition of the like or directly competitive product as all footwear, Argentina was required at a minimum to consider each injury factor with respect to all footwear.[253] By the same token the European Communities, having accepted Argentina's aggregate like product definition, has no basis to insist on a disaggregated analysis in which injury and causation must be proven with respect to each individual product segment.[254] Thus, in our review of the injury finding, we will consider the analysis and conclusions pertaining to the footwear industry in its entirety."[255]

---

[251] Appellate Body Report on *US – Wheat Gluten*, paras. 55–56. The Appellate Body also found, based on an examination of the evidence of record, that the factor which the investigating authorities had allegedly failed to evaluate was not a particular relevant factor requiring evaluation under Article 4.2(a) of the *Agreement on Safeguards*. Appellate Body Report on *US – Wheat Gluten*, paras. 57–58.

[252] Panel Report on *Korea – Dairy*, para. 7.58.

[253] (*footnote original*) Or, to the extent that Argentina relied on data for particular product segments as the basis for conclusions pertaining to the entire industry, it was required to explain how its analysis regarding those segments related to or was representative of the industry as a whole.

[254] (*footnote original*) We note that in any case, only if serious injury or a threat thereof exists with respect to the product market segments accounting for the bulk of the industry's output will injury be evident with respect to the industry as a whole. The European Communities appears to acknowledge this, in indicating that the share of a given product category of the total industry is relevant for the injury analysis of the entire industry. . . .

[255] Panel Report on *Argentina – Footwear (EC)*, para. 8.137.

164. The Panel on *US – Lamb* found that an investigation of the injury factors with respect to particular industry segments is sufficient, provided an adequate explanation of certain issues is furnished:

> "An initial issue before us is whether, accepting *arguendo* the USITC's industry definition, all factors need to be investigated in detail for *all* identified industry *segments* (i.e., growers, feeders, packers and breakers) or whether an investigation of certain injury factors with respect to *particular* segments only would be sufficient to meet the requirements of SG Article 4.2(a). In the light of the general standard of review, as it applies to contingent trade remedy cases, we consider the latter as sufficient if there is an adequate explanation in the report published by the USITC, of (i) why conclusive inferences from the data concerning *one* industry segment can be drawn for *another* industry segment, or (ii) why the factual constellation in the particular industry segment in the given case does *not* permit data collection (i.e., *not* a 'factor of a *objective* and *quantifiable* nature'), or (iii) renders a certain injury factor not probative in the circumstances of a particular industry segment (i.e., *not* a factor '*having a bearing* on the situation of that industry' within the meaning of SG Article 4.2(a))."[256]

165. The Panel on *US – Lamb* then noted with respect to the investigation at issue:

> "[W]here the USITC did not collect data concerning a particular injury factor with respect to all industry segments, the USITC report provides an adequate explanation for that. Either the USITC report explains how inferences can be drawn from the data collected with regard to *one* segment for *another* segment for which data were not collected, or it explains why, in the circumstances of the particular industry segment at issue, the collection of data of an objective and quantifiable nature was not possible, or it explains why a specific injury factor is not probative for that segment."[257]

(x) Consideration of trends

166. The Panel on *Argentina – Footwear (EC)* considered inconsistent with the requirement of an evaluation of "all relevant factors" what it characterized as "the investigation's almost exclusive reliance on end-point-to-end-point comparisons in its analysis of the changes in the situation of the industry". The Panel observed in this respect:

> "[I]f intervening trends are not systematically considered and factored into the analysis, the competent authorities are not fulfilling Article 4.2(a)'s requirement to analyse 'all relevant factors', and in addition, the situation of the domestic industry is not ascertained in full. For example, the situation of an industry whose production drops drastically in one year, but then recovers steadily thereafter, although to a level still somewhat below the starting level, arguably would be quite different from the situation of an industry whose production drops continuously over an extended period. An end-point-to-end-point analysis might be quite similar in the two cases, whereas consideration of the year-to-year changes and trends might lead to entirely opposite conclusions."[258]

(xi) Allocation methodology

167. In *US – Wheat Gluten*, the Panel stressed the importance of sound allocation methodologies, but acknowledged that the *Agreement on Safeguards* does not provide for one particular methodology in this context:

> "We recognize the fundamental importance of assuring that data gathered in the course of a safeguards investigation is accurate and that any allocation of costs and revenues reflects, to the greatest extent possible, the realities of the domestic industry concerned. However, we note that the Agreement on Safeguards does not set out precise rules on the collection and analysis of data, nor does it require the use of any particular allocation methodology with respect to financial data gathered by the investigating authorities in the course of the investigation.
>
> We note that the USITC paid attention to the allocation methodologies used by all domestic producers and in the questionnaire requested firms that did not maintain separate records for wheat gluten to make allocations and explain the methodology used. We also note that the USITC conducted certain procedures, including internal analysis by its staff as well as an on-site verification by a USITC auditor, in order to verify the accuracy and the adequacy of the financial information provided. We believe that, in support of the USITC statement concerning the 'careful review' and the finding that the methodologies were 'appropriate', the USITC Report could have included a description of such procedures and a more detailed explanation as to how and why the USITC considered the allocations to be 'appropriate', in addition to a characterization of the redacted confidential information."[259]

(b) Relationship with Article 4.2(b)

168. With respect to the relationship with Article 4.2(b), see paragraphs 140 above and 212–213 below.

5. Article 4.2(b)

(a) General approach to the causation analysis

169. The Panel on *Korea – Dairy* set forth the basic approach for determining "causation":

> "In performing its causal link assessment, it is our view that the national authority needs to analyse and deter-

[256] Panel Report on *US – Lamb*, para. 7.141.
[257] Panel Report on *US – Lamb*, para. 7.177.
[258] Panel Report on *Argentina – Footwear (EC)*, para. 8.216.
[259] Panel Report on *US – Wheat Gluten*, paras. 8.63–8.64.

mine whether developments in the industry, considered by the national authority to demonstrate serious injury, have been caused by the increased imports. In its causation assessment, the national authority is obliged to evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation of that industry. In addition, if the national authority has identified factors other than increased imports which have caused injury to the domestic industry, it shall ensure that any injury caused by such factors is not considered to have been caused by the increased imports.

To establish a causal link, Korea has to demonstrate that the injury to its domestic industry results from increased imports. In other words, Korea has to demonstrate that the imports of SMPP cause injury to the domestic industry producing milk powder and raw milk. In addition, having analysed the situation of the domestic industry, the Korean authority has the obligation not to attribute to the increased imports any injury caused by other factors."[260]

170. In *Argentina – Footwear (EC)*, the Panel set forth the following approach to the analysis of causation:

"Applying our standard of review, we will consider whether Argentina's causation analysis meets these requirements on the basis of (i) whether an upward trend in imports coincides with downward trends in the injury factors, and if not, whether a reasoned explanation is provided as to why nevertheless the data show causation; (ii) whether the conditions of competition in the Argentine footwear market between imported and domestic footwear as analysed demonstrate, on the basis of objective evidence, a causal link of the imports to any injury; and (iii) whether other relevant factors have been analysed and whether it is established that injury caused by factors other than imports has not been attributed to imports."[261]

171. Although the Appellate Body on *Argentina – Footwear (EC)* considered that the Panel should have exercised judicial economy as regards the causation-related claims, it saw no error in the Panel's interpretation of the causation requirements, or in its interpretation of Article 4.2(b) of the *Agreement on Safeguards*:

"We are somewhat surprised that the Panel, having determined that there were no 'increased imports', and having determined that there was no 'serious injury', for some reason went on to make an assessment of causation. It would be difficult, indeed, to demonstrate a 'causal link' between 'increased imports' that did not occur and 'serious injury' that did not exist. Nevertheless, we see no error in the Panel's interpretation of the causation requirements, or in its interpretation of Article 4.2(b) of the *Agreement on Safeguards*. Rather, we believe that Argentina has mischaracterized the Panel's interpretation and reasoning. Furthermore, we agree with the Panel's conclusions that 'the conditions of competition between the imports and the domestic product were not analysed or adequately explained (in particular price)'; and that 'other factors' identified by the CNCE in the investigation were not sufficiently evaluated, in particular, the tequila effect."[262]

172. The Panel on *US – Wheat Gluten* confirmed and repeated this general causation standard:

"We consider that an appropriate approach for a panel to take in assessing whether a Member has fulfilled the requirements of Article 4.2(a) and (b) SA with respect to causation consists of a consideration of: (i) whether an upward trend in imports coincides with downward trends in the injury factors, and if not, whether an adequate, reasoned and reasonable explanation is provided as to why nevertheless the data show causation; (ii) whether the conditions of competition between the imported and domestic product as analysed demonstrate the existence of the causal link between the imports and any injury; and (iii) whether other relevant factors have been analysed and whether it is established that injury caused by factors other than imports has not been attributed to imports."[263]

173. The Appellate Body on *US – Wheat Gluten* concluded that the contribution by increased imports must be sufficiently clear so as to establish the existence of "the causal link" required, but rejected the Panel's conclusion that the serious injury must be caused by the increased imports *alone* and that the increased imports had to be sufficient to cause "serious injury":

"In essence, the Panel has read Article 4.2(b) of the *Agreement on Safeguards* as establishing that increased imports must make a particular contribution to causing the serious injury sustained by the domestic industry. The level of the contribution the Panel requires is that increased imports, looked at '*alone*', '*in and of themselves*', or '*per se*', must be capable of causing injury that is 'serious'. It seems to us that the Panel arrived at this interpretation through the following steps of reasoning: first, under the first sentence of Article 4.2(b), there must be a 'causal link' between increased imports and serious injury; second, the non-'attribution' language of the last sentence of Article 4.2(b) means that the effects caused by increased imports must be *distinguished from* the effects caused by other factors; third, the effects caused by other factors must, therefore, be *excluded* totally from the determination of serious injury so as to ensure that these effects are not 'attributed' to the increased imports; fourth, the effects caused by

[260] Panel Report on *Korea – Dairy*, paras. 7.89–7.90.
[261] Panel Report on *Argentina – Footwear (EC)*, para. 8.229.
[262] (*footnote original*) Appellate Body Report on *Argentina – Footwear (EC)*, para. 145.
[263] Panel Report on *US – Wheat Gluten*, para. 8.91. See also Panel Report on *US – Lamb*, para. 7.232.

increased imports *alone*, excluding the effects caused by other factors, must, therefore, be capable of causing serious injury.

We begin our reasoning with the first sentence of Article 4.2(b). That sentence provides that a determination 'shall not be made unless [the] investigation demonstrates ... the existence of *the causal link* between increased imports ... and serious injury or threat thereof.' (emphasis added) Thus, the requirement for a determination, under Article 4.2(a), is that 'the causal link' exists. The word 'causal' means 'relating to a cause or causes', while the word 'cause', in turn, denotes a relationship between, at least, two elements, whereby the first element has, in some way, 'brought about', 'produced' or 'induced' the existence of the second element. The word 'link' indicates simply that increased imports have played a part in, or contributed to, bringing about serious injury so that there is a causal 'connection' or 'nexus' between these two elements. Taking these words together, the term 'the causal link' denotes, in our view, a relationship of cause and effect such that increased imports contribute to 'bringing about', 'producing' or 'inducing' the serious injury. Although that contribution must be sufficiently clear as to establish the existence of 'the causal link' required, the language in the first sentence of Article 4.2(b) does *not* suggest that increased imports be *the sole* cause of the serious injury, or that '*other* factors' causing injury must be excluded from the determination of serious injury. To the contrary, the language of Article 4.2(b), as a whole, suggests that 'the causal link' between increased imports and serious injury may exist, *even though other factors are also contributing, 'at the same time', to the situation of the domestic industry*.

It is precisely because there may be several factors, besides increased imports, contributing simultaneously to the situation of the domestic industry that the last sentence of Article 4.2(b) states that competent authorities 'shall not ... attribute' to increased imports injury caused by other factors. The opening clause of that sentence indicates, to us, that this sentence provides rules that apply when 'increased imports' and certain 'other factors' are, together, 'causing injury' to the domestic industry 'at the same time'. The last clause of the sentence stipulates that, in that situation, the injury caused by other factors 'shall not be *attributed* to increased imports'. (emphasis added) Synonyms for the word 'attribute' include 'assign' or 'ascribe'. Under the last sentence of Article 4.2(b), we are concerned with the proper 'attribution', in this sense, of 'injury' caused to the domestic industry by 'factors other than increased imports'. Clearly, the process of attributing 'injury', envisaged by this sentence, can only be made following a separation of the 'injury' that must then be properly 'attributed'. What is important in this process is separating or distinguishing the *effects* caused by the different factors in bringing about the 'injury'.

Article 4.2(b) presupposes, therefore, as a first step in the competent authorities' examination of causation, that the injurious effects caused to the domestic industry by increased imports are *distinguished from* the injurious effects caused by other factors. The competent authorities can then, as a second step in their examination, attribute to increased imports, on the one hand, and, by implication, to other relevant factors, on the other hand, 'injury' caused by all of these different factors, including increased imports. Through this two stage process, the competent authorities comply with Article 4.2(b) by ensuring that any injury to the domestic industry that was *actually* caused by factors other than increased imports is not 'attributed' to increased imports and is, therefore, not treated as if it were injury caused by increased imports, when it is not. In this way, the competent authorities determine, as a final step, whether 'the causal link' exists between increased imports and serious injury, and whether this causal link involves a genuine and substantial relationship of cause and effect between these two elements, as required by the *Agreement on Safeguards*."[264]

174. The Appellate Body on *US – Wheat Gluten* further reviewed the relationship between Article 2.1 and Article 4.2 of the *Agreement on Safeguards* in order to support its view that the competent authorities should determine whether the increase in imports, not alone, but in conjunction with the other relevant factors, cause serious injury:

> "Article 2.1 reflects closely the 'basic principles'[265] in Article XIX:1(a) of the GATT 1994 and also sets forth 'the conditions for imposing a safeguard measure',[266] including those relating to causation. The rules on causation, which are elaborated further in the remainder of the *Agreement on Safeguards*, therefore, find their roots in Article 2.1. According to that provision, a safeguard measure may be applied if a 'product is being imported ... *in such increased quantities* ... *and under such conditions as to cause* ...' serious injury. Thus, under Article 2.1, the causation analysis embraces two elements: the first relating to increased 'imports' specifically and the second to the 'conditions' under which imports are occurring.
>
> Each of these two elements is, in our view, elaborated further in Article 4.2(a). While Article 2.1 requires account to be taken of the 'increased quantities' of imports, both in 'absolute' terms and 'relative to domestic production', Article 4.2(a) states, correspondingly, that 'the rate and amount of the increase in imports of the product concerned in absolute and relative terms, [and] the share of the domestic market taken by increased imports' are relevant.

[264] Appellate Body Report on *US – Wheat Gluten*, paras. 66–69.
[265] (*footnote original*) Preamble to the *Agreement on Safeguards*.
[266] (*footnote original*) Appellate Body Report, *Argentina – Footwear Safeguards*, para. 112.

As for the second element under Article 2.1, we see it as a complement to the first. While the first element refers to increased imports specifically, the second relates more generally to the 'conditions' in the marketplace for the product concerned that may influence the domestic industry. Thus, the phrase 'under such conditions' refers generally to the prevailing 'conditions', in the marketplace for the product concerned, when the increase in imports occurs. Interpreted in this way, the phrase 'under such conditions' is a shorthand reference to the remaining factors listed in Article 4.2(a), which relate to the overall state of the domestic industry and the domestic market, as well as to other factors 'having a bearing on the situation of [the] industry'. The phrase 'under such conditions', therefore, supports the view that, under Articles 4.2(a) and 4.2(b) of the *Agreement on Safeguards*, the competent authorities should determine whether the increase in imports, not alone, but in conjunction with the other relevant factors, cause serious injury.[267]"[268]

175. In *US – Lamb*, the Appellate Body concluded that Article 4.2(b) requires a "demonstration" of the "existence" of a causal link, and it requires that this demonstration must be based on "objective data".[269]

176. In *US – Steel Safeguards*, the Panel, in a finding not reviewed by the Appellate Body,[270] discussed the standard for the assessment of a "causal link":

"[I]f a number of factors have caused serious injury, a causal link may be demonstrated if the increased imports have, in some way, contributed to 'bringing about', 'producing' or 'inducing' the serious injury.

It is clear to the Panel that, in order to meet the causation requirements in Article 4.2(b), it is not necessary for the competent authority to show that increased imports *alone* must be capable of causing serious injury.[271] Rather, if a number of factors have caused serious injury, a causal link may be demonstrated if the increased imports have, in some way, contributed to 'bringing about', 'producing' or 'inducing' the serious injury. In this regard, the Appellate Body in *US – Wheat Gluten* concluded that the contribution must be sufficiently clear as to establish the existence of 'the causal link' required[272] but rejected the panel's conclusion that the serious injury must be caused by the increased imports alone and that the increased imports had to be sufficient to cause 'serious' injury.[273]

. . . . . .

In our view, what is important for this Panel is whether the test *applied* by the USITC for each of the safeguard measures at issue meets the standard or threshold prescribed by the requirement that there be a 'genuine and substantial' relationship of cause and effect between the increased imports and the serious injury. We will discuss this further in the measure-by-measure analysis, which we undertake below.

Finally, the Panel recalls that serious injury within the meaning of Article 4.2(a) of the *Agreement on Safeguards* is to be determined with reference to the 'overall impairment in the position of the domestic industry'. Similarly, as further developed below, we believe that pursuant to Articles 2 and 4 of the Agreement on Safeguards, a competent authority must determine whether 'overall', a genuine and substantial relationship of cause and effect exists between increased imports and serious injury suffered by the relevant domestic producers."[274]

177. In *US – Steel Safeguards*, the Appellate Body decided to exercise judicial economy over the Panel's conclusion with respect to the causation requirements of the US Steel Safeguard measures. Yet since the United States was asking for further guidance on how to comply with the causation determination, the Appellate Body summed up what it considered to be relevant jurisprudence:

"Guidance may be found in our previous rulings. In *US – Line Pipe*, for example, we interpreted Article 4.2(b) of the *Agreement on Safeguards* as establishing:

> [T]wo distinct legal requirements for competent authorities in the application of a safeguard measure. First, there must be a *demonstration* of the *'existence* of the causal link between increased imports of the product concerned and serious injury or threat thereof'. Second, the injury caused by factors other than the increased imports must not be attributed to increased imports.[275] (emphasis added)

Moreover, in *US – Lamb*, when examining the requirement of Article 4.2(b) that the determination as to increased imports must be 'on the basis of objective evidence', we explained that 'objective evidence' means 'objective data'.[276] Thus, Article 4.2(b) requires a 'demonstration' of the 'existence' of a causal link, and it requires that this demonstration must be based on 'objective data'. Further, this 'demonstration' must be included in the report of the investigation, which should 'set[ ] forth the findings and reasoned conclusions, as required by Articles 3.1 and 4.2(c)' of the *Agreement on Safeguards*.[277]

---

[267] (*footnote original*) We do not, of course, exclude the possibility that "serious injury" could be caused by the effects of increased imports *alone*.
[268] Appellate Body Report, on *US – Wheat Gluten*, paras. 76–79.
[269] Appellate Body Report, *US – Lamb*, para. 130.
[270] The Appellate Body exercised judicial economy: see Appellate Body Report on *US – Steel Safeguards*, para. 483.
[271] (*footnote original*) Appellate Body Report, *US – Wheat Gluten*, para. 70.
[272] (*footnote original*) Appellate Body Report, *US – Wheat Gluten*, paras. 66 and 69.
[273] (*footnote original*) Appellate Body Report, *US – Wheat Gluten*, paras. 61 ff and 79.
[274] Panel Report on *US – Steel Safeguards*, paras. 10.290–293.
[275] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 208.
[276] (*footnote original*) Appellate Body Report, *US – Lamb*, para. 130.
[277] (*footnote original*) Appellate Body Report, *US – Line Pipe*, para. 236.

In *US – Line Pipe*, we also found that, in the context of 'non-attribution', competent authorities: (i) 'must "establish explicitly" that imports from sources covered by the measure "satisf[y] the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*"';[278] and (ii) must provide a 'reasoned and adequate explanation of how the facts support their determination'.[279]

In *US – Wheat Gluten*, we found that 'the term "causal link" denotes . . . a relationship of cause and effect'[280] between 'increased imports' and 'serious injury'. The former – the purported cause – contributes to 'bringing about', 'producing' or 'inducing' the latter[281] – the purported effect. The 'link' must connect, in a 'genuine and substantial'[282] causal relationship, 'increased imports', and 'serious injury'.

In sum, the *Agreement on Safeguards* – in Article 2.1, as elaborated by Article 4.2, and in combination with Article 3.1 – requires that competent authorities demonstrate the *existence* of a 'causal link' between 'increased imports' and 'serious injury' (or the threat thereof) on the basis of 'objective evidence'. In addition, the competent authorities must provide a reasoned and adequate explanation of how facts (that is, the aforementioned 'objective evidence') support their determination. If these requirements are not met, the right to apply a safeguard measure does not arise.

In *EC – Tube or Pipe Fittings*, we found that the non-attribution language of Article 3.5 of the *Anti-Dumping Agreement* does not require, *in each and every case*, an examination of the *collective* effects of other causal factors, in addition to an examination of the *individual* effects of those causal factors.[283] We explained there that an assessment of the collective effects of other causal factors 'is *not always* necessary to conclude that injuries ascribed to dumped imports are actually caused by those imports and not by other factors.'[284] We acknowledged, however, that 'there may be cases where, because of the specific factual circumstances therein, the failure to undertake an examination of the collective impact of other causal factors would result in the investigating authority improperly attributing the effects of other causal factors to dumped imports'.[285] We explained further that 'an investigating authority is not required to examine the collective impact of other causal factors, *provided that*, under the specific factual circumstances of the case, it fulfils its obligation not to attribute to dumped imports the injuries caused by other causal factors'.[286]

Lastly, it may be useful to refer to our finding in *EC – Tube or Pipe Fittings* in respect of the relevance of factors that 'had effectively been found not to exist'.[287] In that case, the competent authority had found, contrary to the submissions of the exporters, that the difference in costs of production between the imported product and the domestic product was virtually non-existent and thus did not constitute a 'factor other than dumped imports' causing injury to the domestic industry under Article 3.5 of the *Anti-Dumping Agreement*. Consequently, we found that there was no reason for the investigating authority to undertake the analysis of whether the alleged 'other factor' had any *effect* on the domestic industry under Article 3.5[288] because the alleged 'other factor' 'had effectively been found *not* to exist'.[289] In other words, we did not rule that minimal (or not significant) factors need not be considered by the competent authorities in conducting non-attribution analyses. Rather, we ruled that only factors that have been found to exist need be taken into account in the non-attribution analysis."[290]

(i) Coincidence of trends

178. In *Argentina – Footwear (EC)*, both the Panel and Appellate Body considered that the "*relationship* between the *movements* in imports (volume and market share) and the *movements* in injury factors" must be central to a causation analysis and determination. The Panel on *Argentina – Footwear (EC)*, in a finding upheld by the Appellate Body, recalled that Article 4.2(a) requires national authorities to analyse trends in both injury factors and imports, and related this finding to the context of causation. Furthermore, with respect to a "coincidence" between an increase in imports and a decline in the relevant injury factors, the Panel noted that this should 'normally' occur if causation is present:

> "In making our assessment of the causation analysis and finding, we note in the first instance that Article 4.2(a) requires the authority to consider the 'rate' (i.e., direction and speed) and 'amount' of the increase in imports and the share of the market taken by imports, as well as the 'changes' in the injury factors (sales, production, produc-

[278] (*footnote original*) We first made this assertion in *US – Wheat Gluten*, in the context of a discussion on parallelism. (Appellate Body Report, *US – Wheat Gluten*, para. 98.) In *US – Line Pipe*, we explained that the same reasoning would apply to Article 4.2(b), last sentence. (Appellate Body Report, *US – Line Pipe*, para. 216.)

[279] (*footnote original*) We made this assertion originally in *US – Lamb* in the context of a discussion of a claim under Article 4.2(a) of the *Agreement on Safeguards*. (Appellate Body Report, *US – Lamb*, para. 103.) In *US – Line Pipe*, we explained that the same reasoning would apply to Article 4.2(b), last sentence. (Appellate Body Report, *US – Line Pipe*, para. 216.)

[280] (*footnote original*) Appellate Body Report, *US – Wheat Gluten*, para. 67.

[290] Appellate Body Report on *US – Steel Safeguards*, paras. 485–491.

tivity, capacity utilisation, profits and losses, and employment) in reaching a conclusion as to injury and causation. As noted above we consider that this language means that the *trends* – in both the injury factors and the imports – matter as much as their absolute levels. In the particular context of a causation analysis, we also believe that this provision means that it is the *relationship* between the movements in imports (volume and market share) and the movements in injury factors that must be central to a causation analysis and determination.

In practical terms, we believe therefore that this provision means that if causation is present, an increase in imports normally should coincide with a decline in the relevant injury factors. While such a coincidence by itself cannot *prove* causation (because, *inter alia*, Article 3 requires an explanation – i.e., 'findings and reasoned conclusions'), its absence would create serious doubts as to the existence of a causal link, and would require a *very* compelling analysis of why causation still is present."[291]

179. As noted above, the Appellate Body on *Argentina – Footwear (EC)* agreed with the Panel and observed:

"We see no reason to disagree with the Panel's interpretation that the words 'rate and amount' and 'changes' in Article 4.2(a) mean that 'the *trends* – in both the injury factors and the imports – matter as much as their absolute levels.' We also agree with the Panel that, in an analysis of causation, 'it is the *relationship* between the *movements* in imports (volume and market share) and the *movements* in injury factors that must be central to a causation analysis and determination.' . . . Furthermore, with respect to a 'coincidence' between an increase in imports and a decline in the relevant injury factors, we note that the Panel simply said that this should 'normally' occur if causation is present."[292]

180. Besides the finding that coincidence in movements in imports and the movements in injury factors would "ordinarily" tend to support a finding of causation, the Panel on *US – Wheat Gluten* concurred with the Appellate Body on *Argentina – Footwear (EC)*, and ruled that the "absence of such coincidence would ordinarily tend to detract from such a finding and would require a compelling explanation as to why a causal link is still present".[293] Particularly, the Panel on *US – Wheat Gluten* was of the view that "*overall coincidence*" is what matters and not whether coincidence or lack thereof can be shown in relation to a few select factors which the competent authority has considered:

"[I]n light of the *overall* coincidence of the upward trend in increased imports and the negative trend in injury factors over the period of investigation, the existence of slight absences of coincidence in the movement of *individual* injury factors in relation to imports would not preclude a finding by the USITC of a causal link between increased imports and serious injury."[294]

181. After quoting the Panel and the Appellate Reports on *Argentina – Footwear (EC)* (see paragraph 178 above), the Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, pronounced on the term "coincidence":

"Firstly, that the term 'coincidence' refers to the relationship between the movements in imports and the movements in injury factors. The panel and Appellate Body made it clear that, in considering movements in imports, it is necessary to look at movements in import volumes and import market shares.[295] In our view, the word 'coincidence' in the current context refers to the *temporal* relationship between the movements in imports and the movements in injury factors. In other words, upward movements in imports should normally occur at the same time as downward movements in injury factors in order for coincidence to exist. We note that, below, we qualify these comments to take account of cases where a lag exists between the influx of imports and the manifestation of the effects of injury suffered by the domestic industry.

Secondly, the above indicates that the Appellate Body considers that 'coincidence' between movements or trends in imports and movements or trends in the relevant injury factors plays a 'central' role in determining whether or not a causal link exists. Indeed, both the panel and the Appellate Body in *Argentina – Footwear (EC)* stated that the relationship between the movements in imports and the movements in injury factors *must* be central to a causation analysis. We also note that the same panel, supported by the Appellate Body,[296] went on to state that '[I]n practical terms, we believe therefore that [Article 4.2(a)] means that if causation is present, an increase in imports *normally* should coincide with a decline in the relevant injury factors.'[297]"[298]

182. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, discussed the relationship between "a coincidence analysis" and "a causation analysis":

"The Panel is of the view that since coincidence is 'central' to a causation analysis, a competent authority should 'normally' undertake a coincidence analysis when determining the existence of a causal link. We believe that in situations where the effects of injurious factors

[291] Panel Report on *Argentina – Footwear (EC)*, paras. 8.237–8.238.
[292] Appellate Body Report on *Argentina – Footwear (EC)*, para. 144.
[293] Panel Report on *US – Wheat Gluten*, para. 8.95.
[294] Panel Report on *US – Wheat Gluten*, para. 8.101.
[295] (*footnote original*) Significantly, no mention was made by the panel and the Appellate Body in *Argentina – Footwear (EC)* to movements in import prices. We will discuss the relevance of this in the succeeding section of our findings dealing with "conditions of competition".
[296] (*footnote original*) Appellate Body Report, *Argentina – Footwear (EC)*, para. 144.
[297] (*footnote original*) Panel Report, *Argentina – Footwear (EC)*, para. 8.238.
[298] Panel Report on *US – Steel Safeguards*, paras. 10.299–10.300.

other than increased imports have not been attributed to increased imports,[299] overall clear coincidence between movements in imports and movements in injury factors will provide a competent authority with an adequate basis upon which to conclude that a genuine and substantial relationship of cause and effect between increased imports and serious injury exists.

As mentioned, the Panel is also of the view that *overall* coincidence is what matters and not whether coincidence or lack thereof can be shown in relation to a few select factors which the competent authority has considered. We refer in this regard to the panel's decision in *US – Wheat Gluten*, where it stated that:

> '[I]n light of the *overall* coincidence of the upward trend in increased imports and the negative trend in injury factors over the period of investigation, the existence of slight absences of coincidence in the movement of *individual* injury factors in relation to imports would not preclude a finding by the USITC of a causal link between increased imports and serious injury.'[300]"[301]

183. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, further addressed how a causal link must be established for the purposes of Article 4.2(b) in cases where there is an *absence of coincidence*:

> "By absence of coincidence we mean situations where coincidence does not exist or an analysis of coincidence has not been undertaken. In this regard, we agree with statements made by the panel and Appellate Body in *Argentina – Footwear (EC)* and the panel in *US – Wheat Gluten*, that coincidence in movements in imports and the movements in injury factors would ordinarily tend to support a finding of causation, while *the absence of such coincidence would ordinarily tend to detract from such a finding and would require a compelling explanation as to why a causal link is still present.*[302]
>
> We also recall that the panel in *Argentina – Footwear (EC)*, supported by the Appellate Body,[303] as well as the panel in *US – Wheat Gluten*,[304] noted that, in situations where a causal link exists, 'an increase in imports *normally* should coincide with a decline in the relevant injury factors' and 'coincidence . . . would *ordinarily* tend to support a finding of causation.' In our view, even when coincidence does not exist or an analysis of coincidence has not been undertaken, a competent authority may still be able to demonstrate the existence of a causal link if it can offer a compelling explanation that such causal link exists.
>
> The Panel emphasizes that the Appellate Body in *Argentina – Footwear (EC)* upheld the panel's statement that 'coincidence by itself *cannot prove* causation' (emphasis added).[305] The Panel considers that there are situations where a coincidence analysis may not suffice to prove causation or where the facts may not support a clear finding of coincidence and that, therefore, such situations may call for further demonstration of the existence of a causal link. Indeed, there may be situations where a competent authority, as part of its overall demonstration of the existence of a causal link, undertakes different analyses, with a view to proving that a genuine and substantial relationship of cause and effect exists between increased imports and serious injury."[306]

184. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, further elaborated four scenarios with regard to a coincidence analysis and how the competent authority should explain in order to satisfy the causal requirement under Article 4.2 of the *Agreement on Safeguards*:

> "In our view, there may be cases where: (i) a coincidence analysis has been undertaken and shows clear coincidence between movements in imports and movements in injury factors; (ii) as part of its overall demonstration of causal link, the competent authority has undertaken, *inter alia*, a coincidence analysis which, in and of itself, does not fully demonstrate the existence of a causal link and further analysis is undertaken; (iii) a coincidence analysis has been undertaken (with or without any other analysis) but it does not demonstrate any coincidence; and, finally, (iv) a coincidence analysis has not been undertaken but other analytical tools have been used with a view to proving a causal link.[307]
>
> We are of the view that in all cases, the competent authority must provide a reasoned and adequate explanation of its causal link findings. In the first case (i), assuming fulfilment of the non-attribution requirement, when clear coincidence exists, no further analysis is required of the competent authority and the Panel will confine its review to the coincidence analysis. In the second case (ii), the Panel will examine both the coincidence analysis and the other analysis undertaken by the competent authority with a view to assessing whether the competent authority has provided a reasoned and adequate explanation that, overall, a genuine and substantial relationship of cause and effects exists between increased imports and serious injury.

---

[307] (*footnote original*) These are situations that the Panel has encountered in this case. This is not to say that other situations may not exist.

> In cases (iii) and (iv), the competent authority should explain the absence of coincidence or why a coincidence analysis was not undertaken and provide, in particular, a compelling explanation as to why a causal link exists notwithstanding the absence of coincidence. Ultimately, it is for the competent authority to decide upon the analytical tool it considers most appropriate to perform this compelling analysis in demonstrating the existence of a causal link."[308]

185. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, examined whether or not coincidence can be considered to exist in cases where there is a temporal lag between the influx of imports and the manifestation of the effects of such an influx on the domestic industry:

> "More particularly, the United States has argued that a lag or delay in the manifestation of certain injury factors may be attributed to the delayed effect of increased imports on certain factors, such as employment and bankruptcy.[309] A number of the complainants argue, on the other hand, that the nature of the markets involved in the present case is such that such a lag effect could not exist. They submit that the effect of the increased imports should be felt immediately and that a lag of two years, which they submit existed in the present case, is too long.[310]
>
> The Panel considers that the argument by the United States of a lag between the increased imports and the manifestation of the effects of such increased imports on the domestic industry may have merit in certain cases. More particularly, in our view, there may be instances in which injury may be suffered by an industry at the same point in time as the influx of increased imports. However, the injury that is caused at that point in time may not become apparent until some later point in time. In other words, there may be a lag between the influx of imports and the manifestation of the injurious effects on the domestic industry of such an influx.
>
> We find support for this view from the panel's decision in *Egypt – Steel Rebar*. There, the panel rejected Turkey's contention that there must be a strict temporal connection between the dumped imports and any injury being suffered by the industry,[311] noting that this argument:
>
> > '[R]est[ed] on the quite artificial assumption that the market instantly absorbs, and reacts to, imports the moment they enter the territory of the importing company. Such an assumption implicitly rests on the existence of so-called 'perfect information' in the market (i.e., that all actors in the market are instantly aware of all market signals.)'[312]
>
> Nevertheless, we note that, in that case, the lag between the effects of imports on a market that the panel suggested was acceptable was, at most, a year in duration.
>
> The Panel considers that there are limits in temporal terms on the length of lags between increased imports and the manifestation of the effects that are acceptable for the purposes of a coincidence analysis under Article 4.2(b) of the Agreement on Safeguards. The limits that apply would, undoubtedly, vary from industry to industry and factor to factor. Generally speaking, the more rigid the market structure associated with a particular industry, the more likely a lag in effects would exist, at least in relation to some factors. Conversely, the more competitive the market structure, the less tenable it is that lagged effects could be expected. In addition, the Panel considers that while lags may be expected in relation to some factors (for example, employment), lags in the manifestation of effects are less likely to exist in relation to other injury factors such as production, inventories and capacity utilization, which, ordinarily, would react relatively quickly to changes taking place in the market, such as an influx of imports if increased imports are causing serious injury. If the competent authority does rely upon a lag as between the increased imports and the injury factors, we consider that such a lag must be fully explained by the competent authority on the basis of objective data."[313]

(ii) Conditions of competition between imported and domestic products[314]

186. In examining whether in the case at issue conditions of competition had been analysed, the Panel on *Argentina – Footwear (EC)* observed that a juxtaposition of statistics on imports and injury factors did not constitute an analysis of the conditions of competition between the imports and the domestic product;[315] that, in the absence of price comparisons between imported and domestic products, there was no factual basis for the statement that imports were cheaper than domestic products;[316] and that there was no evidence that lower-priced imports had any injurious effects on the domestic industry.[317] In the latter regard, the Panel stated:

> "[T]he report on the investigation contains no evidence to indicate that the effect of the prices of imported footwear on domestic producers' prices, production, etc., was specifically analysed, in spite of the fact that the causation finding was fundamentally based on price

[317] Panel Report on *Argentina – Footwear (EC)*, para. 8.261.

considerations. Rather, aggregate trends in broad statistical indicators were compared and conclusory statements made (e.g., that 'the decline in output was replaced by imports, essentially cheap imports'). This is not an analysis of the conditions of competition that is called for by Articles 2 and 4.2. . . ."[318]

187. In a footnote to this paragraph, the Panel on *Argentina – Footwear (EC)* addressed the relationship between the determination of like or directly competitive products on the one hand and the parameters of causation analysis on the other:

"We note in this regard that there would seem to be a relationship between the depth of detail and degree of specificity required in a causation analysis and the breadth and heterogeneity of the like or directly competitive product definition. Where as here a very broad product definition is used, within which there is considerable heterogeneity, the analysis of the conditions of competition must go considerably beyond mere statistical comparisons for imports and the industry as a whole, as given their breadth, the statistics for the industry and the imports as a whole will only show averages, and therefore will not be able to provide sufficiently specific information on the locus of competition in the market. With regard to the present case, we do not disagree that a quite detailed investigation of the industry was conducted, in which a great deal of statistical and other information was amassed. What in our view was missing was a detailed analysis, on the basis of objective evidence, of the imports and of how in concrete terms those imports caused the injury found to exist in 1995. In this regard, we note that Act 338 contains a section entitled 'Conditions of competition between the domestic products and imports'. This section does not contain such a detailed analysis, however, but rather summarizes questionnaire responses from domestic producers about their strategies for 'fending off foreign competition', and from importers and domestic producers concerning 'the sales mix' of domestic products and imports, including their overall views about quality and other issues concerning domestic and imported footwear, with the importers stressing the benefits of imports. This summary of subjective statements by questionnaire respondents does not constitute an analysis of the 'conditions of competition' by the authority on the basis of objective evidence."[319]

188. With respect to the standards set forth in the preceding excerpt, the Panel on *Argentina – Footwear (EC)* concluded that "the conditions of competition between the imports and the domestic product were not analysed or adequately explained (in particular price)".[320] The Appellate Body affirmed this conclusion.[321]

189. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, was of the view that while coincidence plays a central role in determining whether or not a causal link exists, other analytical tools may also come into play, in particular with reference to the conditions of competition as between imports and domestic products:

"As mentioned above, there may be cases, for instance, where a competent authority does not undertake a coincidence analysis or does so, but the facts do not support a finding of causal link on the basis of such an analysis. In such situations, reference could be made to the conditions of competition as between imports and domestic products with a view to providing a compelling explanation, in the absence of coincidence, as to why a causal link nevertheless exists. Indeed, in our view, consideration of the conditions of competition of the market in which the relevant imported and domestic products are being sold may generally prove insightful in respect of the issue of the causal relationship between increased imports and serious injury.

There may also be cases where a competent authority considers that it is necessary to *support* its coincidence analysis with another analysis because, for example, coincidence cannot be established with a sufficient degree of certainty. In such situations, the competent authority may rely upon analysis of the conditions of competition to reinforce its causal link demonstration. In such situations, a panel will review the conditions of competition analysis performed by the competent authority with a view to assessing whether it provided a reasoned and adequate explanation that, overall, a genuine and substantial relationship of cause and effects exists between increased imports and serious injury."[322]

190. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, further concluded that Articles 2.1 and 4.2(a) and (b) confirm the relevance of conditions of competition when determining causation:

"We believe that Articles 2.1 and 4.2(a) and (b) confirm the relevance of conditions of competition when determining causation. Article 2.1 calls for a determination that increased imports are occurring '*under such conditions* as to cause or threaten to cause serious injury.' The Appellate Body on *US – Wheat Gluten* interpreted the meaning of 'under such conditions' in Article 2.1 as follows:

'[T]he phrase "under such conditions" refers generally to the prevailing "conditions", in the marketplace for the product concerned, when the increase in imports occurs. Interpreted in this way, the phrase

[318] Panel Report on *Argentina – Footwear (EC)*, para. 8.261.
[319] Panel Report on *Argentina – Footwear (EC)*, para. 8.261, footnote 557.
[320] Panel Report on *Argentina – Footwear (EC)*, para. 8.278.
[321] Appellate Body Report on *Argentina – Footwear (EC)*, para. 145.
[322] Panel Report on *US – Steel Safeguards*, para. 10.314–10.315.

> "under such conditions" is a shorthand reference to the remaining factors listed in Article 4.2(a), which relate to the overall state of the domestic industry and the domestic market, as well as to other factors "having a bearing on the situation of [the] industry". The phrase "under such conditions", therefore, supports the view that, under Articles 4.2(a) and 4.2(b) of the *Agreement on Safeguards*, the competent authorities should determine whether the increase in imports, not alone, but in conjunction with the other relevant factors, cause serious injury.'[323]

We also note that the panels in *Argentina – Footwear (EC)* and *US – Wheat Gluten* considered the conditions of competition in the market between imported and domestic footwear in reviewing whether a causal link existed between increased imports and injury.[324] The Appellate Body on *Argentina – Footwear (EC)* explicitly supported the panel's analysis, stating that: '[W]e agree with the Panel's conclusions that "the conditions of competition between the imports and the domestic product were not analysed or adequately explained (in particular price)".'[325]"[326]

191. With respect to the factors that should be considered in a conditions of competition analysis for the purposes of Article 4.2(b), the Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, pointed out:

> "The factors referred to in Article 4.2(a) are relevant in defining the conditions of competition for the purposes of the causation analysis under Article 4.2(b), in the Panel's view, volume of imports, imports' market share, changes in the level of sales and profit and losses are of particular interest. In addition, we note that the panel in *Argentina – Footwear (EC)* referred to physical characteristics, quality, service, delivery, technological developments, consumer tastes, and other supply and demand factors in the market as factors that could be taken into consideration in assessing the conditions of competition in a market for the purposes of a causation analysis.[327]"[328]

(iii) Factors other than increased imports (non-attribution requirement)

192. The Panel on *Argentina – Footwear (EC)* emphasized the importance of a sufficient consideration of "other factors" in order to satisfy the requirements of Article 4.2(b):

> "We recall that Article 4.2(b) requires that '[w]hen factors other than increased imports are causing injury to the domestic industry at the same time, such injury shall not be attributed to increased imports.' Thus, as part of the causation analysis, a sufficient consideration of 'other factors' operating in the market at the same time must be conducted, so that any injury caused by such other factors can be identified and properly attributed."[329]

193. The Panel on *Argentina – Footwear (EC)* found that, in the investigation at issue, factors other than imports had not been sufficiently evaluated, in particular the effect of a domestic recession.[330] The Appellate Body noted in general that it saw "no error in the Panel's interpretation of the causation requirements, or in its interpretation of Article 4.2(b) of the *Agreement on Safeguards*" and agreed with the Panel's conclusion that the impact of the domestic recession had not been sufficiently evaluated.[331]

194. The Panel on *US – Wheat Gluten* interpreted the relationship between increased imports and "other factors" within the context of the causation analysis pursuant to Article 4.2(b) to mean that increased imports "in and of themselves" are causing serious injury. While not demanding that increased imports be the only factor present in a situation of serious injury, the Panel held that the increased imports must be "sufficient in and of themselves, to cause injury which achieves the threshold of 'serious' as defined in the Agreement".[332] The Panel then further clarified its approach to Article 4.2(b) by stating that "where a number of factors, one of which is increased imports, are sufficient *collectively* to cause a 'significant overall impairment of the position of the domestic industry', but increased imports alone are not causing injury that achieves the threshold of 'serious' within the meaning of Article 4.1(a) of the Agreement,[333] the conditions for imposing a safeguard measure are not satisfied."[334] Upon appeal, the Appellate Body reversed the interpretation of Article 4.2(b) by the Panel on *US – Wheat Gluten* that increased imports "alone", "in and of themselves", or "*per se*" must be capable of causing injury that is "serious".[335] According to the Appellate Body:

> "[T]he Panel arrived at this interpretation through the following steps of reasoning: first, under the first sentence of Article 4.2(b), there must be a 'causal link' between increased imports and serious injury; second,

[334] Panel Report on *US – Wheat Gluten*, para. 8.139.
[335] Appellate Body on *US – Wheat Gluten*, para. 79.

> the non-'attribution' language of the last sentence of Article 4.2(b) means that the effects caused by increased imports must be distinguished from the effects caused by other factors; third, the effects caused by other factors must, therefore, be excluded totally from the determination of serious injury so as to ensure that these effects are not 'attributed' to the increased imports; fourth, the effects caused by increased imports alone, excluding the effects caused by other factors, must, therefore, be capable of causing serious injury."[336]

195. The Appellate Body on *US – Wheat Gluten* first considered that the requirement of a "causal link" under Article 4.2(b) suggests a "clear contribution" and that, furthermore, increased imports need not be the sole cause of "serious injury":

> "The word 'causal' means 'relating to a cause or causes', while the word 'cause', in turn, denotes a relationship between, at least, two elements, whereby the first element has, in some way, 'brought about', 'produced' or 'induced' the existence of the second element.[337] The word 'link' indicates simply that increased imports have played a part in, or contributed to, bringing about serious injury so that there is a causal 'connection'[338] or 'nexus' between these two elements. Taking these words together, the term 'the causal link' denotes, in our view, a relationship of cause and effect such that increased imports contribute to 'bringing about', 'producing' or 'inducing' the serious injury. Although that contribution must be sufficiently clear as to establish the existence of 'the causal link' required, the language in the first sentence of Article 4.2(b) does *not* suggest that increased imports be *the sole* cause of the serious injury, or that '*other* factors' causing injury must be excluded from the determination of serious injury. To the contrary, the language of Article 4.2(b), as a whole, suggests that 'the causal link' between increased imports and serious injury may exist, *even though other factors are also contributing, 'at the same time', to the situation of the domestic industry*."[339]

196. With respect to its finding that increased imports need not be the sole cause of the serious injury, the Appellate Body on *US – Wheat Gluten* referred, as support, to the "non-attribution" requirement in the last sentence of Article 4.2(b):

> "It is precisely because there may be several factors, besides increased imports, contributing simultaneously to the situation of the domestic industry that the last sentence of Article 4.2(b) states that competent authorities 'shall not . . . attribute' to increased imports injury caused by other factors. The opening clause of that sentence indicates, to us, that this sentence provides rules that apply when 'increased imports' and certain 'other factors' are, together, 'causing injury' to the domestic industry 'at the same time'. The last clause of the sentence stipulates that, in that situation, the injury caused by other factors 'shall not be attributed to increased imports'. . . . Synonyms for the word 'attribute' include 'assign' or 'ascribe'. Under the last sentence of Article 4.2(b), we are concerned with the proper 'attribution', in this sense, of 'injury' caused to the domestic industry by 'factors other than increased imports'. Clearly, the process of attributing 'injury', envisaged by this sentence, can only be made following a separation of the 'injury' that must then be properly 'attributed'. What is important in this process is separating or distinguishing the effects caused by the different factors in bringing about the 'injury'."[340]

197. The Appellate Body on *US – Wheat Gluten* subsequently set out a three-stage process under Article 4.2(b):

> "Article 4.2(b) presupposes, therefore, as a first step in the competent authorities' examination of causation, that the injurious effects caused to the domestic industry by increased imports are *distinguished from* the injurious effects caused by other factors. The competent authorities can then, as a second step in their examination, attribute to increased imports, on the one hand, and, by implication, to other relevant factors, on the other hand, 'injury' caused by all of these different factors, including increased imports. Through this two stage process, the competent authorities comply with Article 4.2(b) by ensuring that any injury to the domestic industry that was *actually* caused by factors other than increased imports is not 'attributed' to increased imports and is, therefore, not treated as if it were injury caused by increased imports, when it is not. In this way, the competent authorities determine, as a final step, whether 'the causal link' exists between increased imports and serious injury, and whether this causal link involves a genuine and substantial relationship of cause and effect between these two elements, as required by the *Agreement on Safeguards*.
>
> The need to ensure a proper attribution of 'injury' under Article 4.2(b) indicates that competent authorities must take account, in their determination, of the effects of increased imports *as distinguished from* the effects of other factors. However, the need to distinguish between the effects caused by increased imports and the effects caused by other factors does *not* necessarily imply, as the Panel said, that increased imports *on their own* must be capable of causing serious injury, nor that injury caused by other factors must be *excluded* from the determination of serious injury."[341]

198. The Appellate Body reiterated its above-quoted approach to the causation analysis under Article 4.2(b) in *US – Lamb*:

---

[336] Appellate Body Report on *US – Wheat Gluten*, para. 66.
[337] (*footnote original*) The New Shorter Oxford English Dictionary, supra, footnote 43, Vol. I, pp. 355 and 356.
[338] (*footnote original*) Ibid., p. 1598.
[339] Appellate Body Report on *US – Wheat Gluten*, para. 67.
[340] Appellate Body Report on *US – Wheat Gluten*, para. 68.
[341] Appellate Body Report on *US – Wheat Gluten*, paras. 69–70.

> "As we held in *United States – Wheat Gluten Safeguard*, the *Agreement on Safeguards* does not require that increased imports be 'sufficient' to cause, or threaten to cause, serious injury. Nor does that Agreement require that increased imports 'alone' be capable of causing, or threatening to cause, serious injury."[342]

199. Also in *US – Lamb*, the Appellate Body again stressed the importance of the separation of injurious effects caused by increased imports on the one hand and other factors on the other hand:

> "Article 4.2(b) states expressly that injury caused to the domestic industry by factors other than increased imports 'shall not be attributed to increased imports.' In a situation where several factors are causing injury 'at the same time', a final determination about the injurious effects caused by increased imports can only be made if the injurious effects caused by all the different causal factors are distinguished and separated. Otherwise, any conclusion based exclusively on an assessment of only one of the causal factors – increased imports – rests on an uncertain foundation, because it assumes that the other causal factors are not causing the injury which has been ascribed to increased imports. The non-attribution language in Article 4.2(b) precludes such an assumption and, instead, requires that the competent authorities assess appropriately the injurious effects of the other factors, so that those effects may be disentangled from the injurious effects of the increased imports. In this way, the final determination rests, properly, on the genuine and substantial relationship of cause and effect between increased imports and serious injury.
>
> As we said in our Report in *United States – Wheat Gluten Safeguard*, the non-attribution language in Article 4.2(b) indicates that, logically, the final identification of the injurious effects caused by increased imports must follow a prior separation of the injurious effects of the different causal factors. If the effects of the different factors are not separated and distinguished from the effects of increased imports, there can be no proper assessment of the injury caused by that single and decisive factor. As we also indicated, the final determination about the existence of 'the causal link' between increased imports and serious injury can only be made *after* the effects of increased imports have been properly assessed, and this assessment, in turn, follows the separation of the effects caused by all the different causal factors."[343]

200. The Appellate Body acknowledged in *US – Lamb* that its methodology for complying with the non-attribution requirement was not expressly provided for in Article 4.2(b), emphasizing that these three steps

> "[s]imply describe a logical process for complying with the obligations relating to causation set forth in Article 4.2(b). These steps are not legal 'tests' mandated by the text of the Agreement on Safeguards, nor is it imperative that each step be the subject of a separate finding or a reasoned conclusion by the competent authorities. Indeed, these steps leave unanswered many methodological questions relating to the non-attribution requirement found in the second sentence of Article 4.2(b).
>
> . . . .
>
> We emphasize that the method and approach WTO Members choose to carry out the process of separating the effects of increased imports and the effects of the other causal factors is not specified by the Agreement on Safeguards. What the Agreement requires is simply that the obligations in Article 4.2 must be respected when a safeguard measure is applied."[344]

201. In *US – Lamb*, the Appellate Body applied its standard under Article 4.2(b) to the findings of USITC and found that the latter's causation analysis incorrectly considered whether increased imports were "an important cause, and a cause no less important than any other cause, of the threat of serious injury". The Appellate Body considered this approach insufficient in the light of Article 4.2(b) because the USITC had not ascertained that the injury caused by other factors, whatever the magnitude of the injury, was not attributed to increased imports. The Appellate Body specifically held that it was "impossible to determine whether the USITC properly separated the injurious effects of these other factors from the injurious effects of the increased imports. It is, therefore, also impossible to determine whether injury caused by these other factors has been attributed to increased imports as it had not assessed the injurious effects of these other factors."[345]

202. In *US – Wheat Gluten*, the Appellate Body considered that the text of Article 4.2(a), the relationship between Articles 4.2(a) and 4.2(b) and the phrase "significant overall impairment" in Article 4.1(a) indicated that both factors specifically relating to imports and factors relating to the overall situation of the domestic industry must be included in a determination of serious injury. See paragraphs 139–140 above.

203. While it reversed the Panel's legal interpretation of Article 4.2(b), the Appellate Body in *US – Wheat Gluten* found that in the investigation at issue, the competent authorities had acted inconsistently with Article 4.2(b) as a consequence of an inadequate examination of the role of increases in average capacity. The Appellate Body noted that under Article 4.2(b), it is essential for the competent authorities to examine whether factors other than increased imports are simultaneously

[342] Appellate Body Report on *US – Lamb*, para. 170.
[343] Appellate Body Report on *US – Lamb*, paras. 179–180.
[344] Appellate Body Report on *US – Lamb*, paras. 178 and 181.
[345] Appellate Body Report on *US – Lamb*, para. 186.

causing injury: "If the competent authorities do not conduct this examination, they cannot ensure that injury caused by other factors is not 'attributed' to increased imports."[346] The Appellate Body then concluded that, in the case at hand, the competent authority had "*not* demonstrated adequately, as required by Article 4.2(b), that any injury caused to the domestic industry by increases in average capacity has not been 'attributed' to increased imports and, in consequence, the USITC could not establish the existence of 'the causal link' Article 4.2(b) requires between increased imports and serious injury".[347]

204. In *US – Line Pipe*, the Appellate Body reaffirmed its ruling in *US – Wheat Gluten* and *US – Lamb* that to fulfil the Article 4.2(b) requirement,[348] competent authorities must separate and distinguish the injurious effects of the increased imports from the injurious effects of other factors, and *establish explicitly*, with a *reasoned and adequate explanation*, that injury caused by factors other than the increased imports was not attributed to increased imports.[349] Specifically, the last sentence of Article 4.2(b) establishes a "procedural obligation", which requires competent authorities to "identify the nature and extent of the injurious effects of the known factors other than increased imports, as well as explain satisfactorily the nature and extent of the injurious effects of those other factors as distinguished from the injurious effects of the increased imports":[350]

> "In addition, in *US – Wheat Gluten*, we stated in the context of parallelism that the competent authorities must 'establish explicitly' that imports from sources covered by the measure 'satisf[y] the conditions for the application of a safeguard measure, as set out in Article 2.1 and elaborated in Article 4.2 of the *Agreement on Safeguards*.'[351] We explained further in *US – Lamb*, in the context of a claim under Article 4.2(a) of the *Agreement on Safeguards*, that the competent authorities must provide a '*reasoned and adequate explanation* of how the facts support their determination'. We are of the view that, by analogy, the requirements elaborated in *US – Wheat Gluten* and in *US – Lamb*, also apply to the exercise contemplated in Article 4.2(b), last sentence, since in all those cases, the competent authorities are under a procedural obligation to provide an explanation as regards a determination.
>
> Thus, to fulfill the requirement of Article 4.2(b), last sentence, the competent authorities must establish explicitly, through a reasoned and adequate explanation, that injury caused by factors other than increased imports is not attributed to increased imports. This explanation must be clear and unambiguous. It must not merely imply or suggest an explanation. It must be a straightforward explanation in express terms."[352]

205. To complement its finding, the Appellate Body on *US – Line Pipe* found, although the text of the *Agreement on Safeguards* on causation is by no means identical to that of the *Anti-Dumping Agreement*, there are "considerable similarities between the two regarding non-attribution". Thus, the Appellate Body in *US – Line Pipe* ruled that its statements in *US – Hot-Rolled Steel* regarding Article 3.5 of the *Anti-Dumping Agreement* provide "guidance" in the interpretation of the similar language of the last sentence of Article 4.2(b):

> "Article 3.5 of the *Anti-Dumping Agreement* requires an identification of 'the nature and extent of the injurious effects of the other known factors'[353] as well as 'a satisfactory explanation of the nature and extent of the injurious effects of the other factors, as distinguished from the injurious effects of the dumped imports.'[354]
>
> These statements in *US – Hot-Rolled Steel* provide guidance for us here. As we noted in that appeal: '[a]lthough the text of the *Agreement on Safeguards* on causation is by no means identical to that of the *Anti-Dumping Agreement*, there are considerable similarities between the two Agreements as regards the non-attribution language.'[355] We then went on to say that 'adopted panel and Appellate Body reports relating to the non-attribution language in the *Agreement on Safeguards* can provide guidance in interpreting the non-attribution language in Article 3.5 of the *Anti-Dumping Agreement*.' We are of the view that this reasoning applies both ways. Our statements in *US – Hot-Rolled Steel* on Article 3.5 of the *Anti-Dumping Agreement* likewise provide guidance in interpreting the similar language in Article 4.2(b) of the *Agreement on Safeguards*."[356]

206. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, addressed the question of whether quantification and use of econometric models is required in order to satisfy the legal standard for causation (as well as for the appropriate remedy):

> "We note, first, that the text of the Agreement on Safeguards does not require quantification. However, in the Panel's view both the Agreement on Safeguards and relevant jurisprudence anticipate that quantification *may* occur. In addition, the Panel considers that quantification may be particularly desirable in cases involving complicated factual situations where qualitative analyses may

[346] Appellate Body Report on *US – Wheat Gluten*, para. 91.
[347] Appellate Body Report on *US – Wheat Gluten*, para. 91.
[348] Article 4.2(b), last sentence, requires that, when factors other than increased imports are causing injury at the same time as increased imports, competent authorities must ensure that injury caused to the domestic industry by other factors is not attributed to the increased imports.
[349] Appellate Body Report on *US – Line Pipe*, para. 217.
[350] Appellate Body Report on *US – Line Pipe*, para. 215.
[351] (*footnote original*) Appellate Body Report, *supra*, footnote 1, para. 98.
[352] Appellate Body Report on *US – Line Pipe*, paras. 216–217.
[353] (*footnote original*) Appellate Body Report, para. 227.
[354] (*footnote original*) Para. 226.
[355] (*footnote original*) Para. 230.
[356] Appellate Body Report on *US – Line Pipe*, paras. 213–214.

not suffice to more fully understand the dynamics of the relevant market.

In support, we note that Article 4.2(a) of the Agreement on Safeguards refers to 'factors of [a] quantifiable nature.' As explained in paragraph 10.318 above, we consider that Articles 4.2(a) and 4.2(b) must be read together and in a mutually consistent fashion. Therefore, the factors referred to in Article 4.2(a) must be taken into consideration in undertaking the non-attribution exercise (in addition to any other factors that may be relevant). In addition, the requirement in Article 4.2(a) that evaluated factors be of a 'quantifiable nature' implies that at least some of the factors assessed in the non-attribution exercise will be quantifiable and, in those circumstances, should be quantified.

. . .

The Panel considers that quantification could help in identifying the share of the overall injury caused by increased imports, as distinct from the injury caused by other factors, which would in turn yield a 'benchmark' for ensuring that the safeguard measure is imposed only to the extent necessary to prevent or remedy serious injury and allow for adjustments."[357]

207. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, determined that quantification may, in certain cases, be entailed in the obligation on competent authorities to establish non-attribution "explicitly" on the basis of a reasoned and adequate explanation:

"In addition, the Panel considers that quantification may, in certain cases, be entailed in the obligation on competent authorities to establish non-attribution 'explicitly' on the basis of a reasoned and adequate explanation.[358] In this regard, the Panel recalls that, as stated on several occasions by the Appellate Body, WTO Members are expected to interpret and apply their WTO obligations in good faith.[359] Moreover, in light of the obligations imposed on competent authorities to consider all plausible alternative explanations submitted by the interested parties, we believe that a competent authority may find itself in situations where quantification and some form of economic analysis are necessary to rebut allegedly plausible alternative explanations that have been put forward. While the wording of the provisions of the Agreement on Safeguards does not require quantification in the causal link analysis *per se*, the circumstances of a specific dispute may call for quantification."[360]

208. The Panel on *US – Steel Safeguards*, in a finding not reviewed by the Appellate Body, determined that quantification may not necessarily be determinative:

"Having said that quantification may be desirable, useful and sometimes necessary depending on the circumstances of a case, the Panel recognizes that quantification may be difficult and is less than perfect. Therefore, the Panel is of the view that the results of such quantification may not necessarily be determinative. We consider that an overall qualitative assessment that takes into account all relevant information, must always be performed. Nevertheless, in the Panel's view, even the most simplistic of quantitative analyses may yield useful insights into the overall dynamics of a particular industry and, in particular, into the nature and extent of injury being caused by factors other than increased imports to a domestic industry."[361]

209. As for the sequence of assessment of the various elements in the non-attribution analysis, the Panel on *US – Steel Safeguards*, in a finding subsequently not reviewed by the Appellate Body, was of the view that the *Agreement on Safeguards* does not prescribe any order:

"The Panel recalls the Appellate Body's comments in *US – Lamb*, where, in defining the steps that might be undertaken in the non-attribution analysis, it stated that 'these steps are not legal "tests" mandated by the text of the *Agreement on Safeguards*, nor is it imperative that each step be the subject of a separate finding or a reasoned conclusion by the competent authorities.'[362]

Accordingly, the Panel does not consider that the non-attribution exercise need necessarily precede a consideration of coincidence between the increased imports and the injury factors and the conditions of competition or *vice versa*. The Panel is of the view that the wording of Articles 2.1 and 4.2 does not require that non-attribution be undertaken in advance of or following any other analysis that may be undertaken with a view to establishing the existence of a causal link. Provided that the various elements entailed in a causation analysis are considered and analysed in coming to a conclusion on the existence or otherwise of a 'causal link', this should suffice. This much is clear from the Appellate Body's comments in *US – Wheat Gluten* and *US – Lamb*:

> '[L]ogically, the final identification of the injurious effects caused by increased imports must follow a prior separation of the injurious effects of the different causal factors. If the effects of the different factors are not separated and distinguished from the effects of increased imports, there can be no proper assessment of the injury caused by that single and decisive factor. As we also indicated, the final determination about the existence of 'the causal link'

[357] Panel Report on *US – Steel Safeguards*, para. 10.336–10.339.
[358] (*footnote original*) The Appellate Body in *US – Line Pipe* stated that a mere assertion that injury caused by other factors has not been attributed to increased imports does not establish explicitly with a reasoned and adequate explanation that injury caused by factors other than increased imports was not attributed to increased imports: Appellate Body Report, *US – Line Pipe*, para. 220.
[359] (*footnote original*) See, for example, Appellate Body Report, *US – Offset Act (Byrd Amendment)*, para. 297 *et seq.*
[360] Panel Report on *US – Steel Safeguards*, para. 10.340.
[361] Panel Report on *US – Steel Safeguards*, para. 10.341.
[362] (*footnote original*) Appellate Body Report, *US – Lamb*, para. 178.

between increased imports and serious injury can only be made *after* the effects of increased imports have been properly assessed, and this assessment, in turn, follows the separation of the effects caused by all the different causal factors.'[363]"[364]

(b) Relationship with other Articles

210. See paragraphs 49–57 above concerning the relationship with Article 2.1.

211. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of *GATT 1994* and with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards*, exercised judicial economy with respect to claims raised under Articles 2.2, 3.1, 5.1, 8, 11 and 12 of the *Agreement on Safeguards*.[365]

212. The Panel on *Korea – Dairy*, after finding that the determination of the existence of serious injury at issue in that dispute was inconsistent with Article 4.2, noted that, as a consequence, it was not necessary for the Panel to reach any findings as to whether Korea had demonstrated that increased imports were causing serious injury to the domestic industry. However, referring to the Appellate Body findings in *Australia – Salmon*, the Panel opted for offering "some general comments relevant to an analysis of a causal link between increased imports and injury, in the context of the Korean investigation".[366]

213. In *Argentina – Footwear (EC)*, the Appellate Body expressed its surprise that the Panel "having determined that there were no 'increased imports', and having determined that there was no 'serious injury', for some reason went on to make an assessment of causation". The Appellate Body found difficulty in understanding a "causal link" between "increased imports" that did not occur and "serious injury" that did not exist.[367]

(c) Relationship with other WTO Agreements

(i) Anti-Dumping Agreement

214. The Appellate Body on *US – Line Pipe* ruled that its statements in *US – Hot-Rolled Steel* regarding Article 3.5 of the *Anti-Dumping Agreement* provide guidance in the interpretation of the similar language of the last sentence of Article 4.2(b). See paragraph 205 above.

6. Article 4.2(c)

(a) Relationship with other Articles

215. In *Argentina – Footwear (EC)*, the Appellate Body rejected an argument that, in referring to Article 3, in the context of its reasoning on Article 4.2(a) and 4.2(c), the Panel had exceeded its terms of reference:[368]

"We have examined the specific paragraphs in the Panel Report cited by Argentina, and we see no finding by the Panel that Argentina acted inconsistently with Article 3 of the Agreement on Safeguards. In one instance, the Panel referred to Article 3 parenthetically in support of its reasoning on Article 4.2(a) of the Agreement on Safeguards. Every other reference to Article 3 cited by Argentina was made by the Panel in conjunction with the Panel's reasoning and findings relating to Article 4.2(c) of the Agreement on Safeguards. None of these references constitutes a legal finding or conclusion by the Panel regarding Article 3 itself.

We note that the very terms of Article 4.2(c) of the Agreement on Safeguards expressly incorporate the provisions of Article 3. Thus, we find it difficult to see how a panel could examine whether a Member had complied with Article 4.2(c) without also referring to the provisions of Article 3 of the Agreement on Safeguards. More particularly, given the express language of Article 4.2(c), we do not see how a panel could ignore the publication requirement set out in Article 3.1 when examining the publication requirement in Article 4.2(c) of the Agreement on Safeguards. And, generally, we fail to see how the Panel could have interpreted the requirements of Article 4.2(c) without taking into account in some way the provisions of Article 3. What is more, we fail to see how any panel could be expected to make an "objective assessment of the matter", as required by Article 11 of the DSU, if it could only refer in its reasoning to the specific provisions cited by the parties in their claims.

Consequently, we conclude that the Panel did not exceed its terms of reference by referring in its reasoning to the provisions of Article 3 of the Agreement *on* Safeguards. On the contrary, we find that the Panel was obliged by the terms of Article 4.2(c) to take the provisions of Article 3 into account. Thus, we do not believe that the Panel erred in its reasoning relating to the provisions of Article 3 of the *Agreement on Safeguards* in making its findings under Article 4.2(c) of that Agreement."[369]

216. See paragraphs 99 and 105 above in respect of the relationship with Article 3.1.

217. The Panel on *US – Wheat Gluten* considered the relationship between Article 4.2(c) and the confidentiality requirements of Article 3.2.[370]

"Given that the very terms of Article 4.2(c) expressly incorporate the provisions of Article 3, and given the

[370] With respect to confidentiality in general, see Chapter on the *DSU*, Section XXXVI.C(h).

specific and mandatory language of Article 3.2 dealing with the required treatment of information that is by nature confidential or is submitted on a confidential basis, the requirement in Article 4.2(c) to publish a 'detailed analysis of the case under investigation' and 'demonstration of the relevance of the factors examined' cannot entail the publication of 'information which is by nature confidential or which is provided on a confidential basis' within the meaning of Article 3.2 SA."[371]

218. With respect to this issue, see also paragraphs 108–109 above.

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Application of Safeguard Measures

1. A Member shall apply safeguard measures only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment. If a quantitative restriction is used, such a measure shall not reduce the quantity of imports below the level of a recent period which shall be the average of imports in the last three representative years for which statistics are available, unless clear justification is given that a different level is necessary to prevent or remedy serious injury. Members should choose measures most suitable for the achievement of these objectives.

2. (a) In cases in which a quota is allocated among supplying countries, the Member applying the restrictions may seek agreement with respect to the allocation of shares in the quota with all other Members having a substantial interest in supplying the product concerned. In cases in which this method is not reasonably practicable, the Member concerned shall allot to Members having a substantial interest in supplying the product shares based upon the proportions, supplied by such Members during a previous representative period, of the total quantity or value of imports of the product, due account being taken of any special factors which may have affected or may be affecting the trade in the product.

(b) A Member may depart from the provisions in subparagraph (a) provided that consultations under paragraph 3 of Article 12 are conducted under the auspices of the Committee on Safeguards provided for in paragraph 1 of Article 13 and that clear demonstration is provided to the Committee that (*i*) imports from certain Members have increased in disproportionate percentage in relation to the total increase of imports of the product concerned in the representative period, (*ii*) the reasons for the departure from the provisions in subparagraph (a) are justified, and (*iii*) the conditions of such departure are equitable to all suppliers of the product concerned. The duration of any such measure shall not be extended beyond the initial period under paragraph 1 of Article 7. The departure referred to above shall not be permitted in the case of threat of serious injury.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Article 5.1

(a) Scope of requirement to explain the necessity of a safeguard measure

219. In *Korea – Dairy*, the Appellate Body upheld the finding by the Panel in that dispute that the first sentence of Article 5.1 imposes an obligation on a Member applying a safeguard measure to ensure that the measure applied is commensurate with the goals of preventing or remedying serious injury and facilitating adjustment of the domestic industry, and that this obligation applies irrespective of the particular form of the safeguard measure.[372] However, the Appellate Body reversed the Panel's finding regarding the scope of the requirement to explain the necessity of a safeguard measure.[373] In this respect, the Appellate Body stated:

> "[The second sentence of Article 5.1] requires a 'clear justification' if a Member takes a safeguard measure in the form of a quantitative restriction which reduces the quantity of imports below the average of imports in the last three representative years for which statistics are available. We agree with the Panel that this 'clear justification' has to be given by a Member applying a safeguard measure *at the time of the decision*, *in its recommendations or determinations on the application of the safeguard measure*.
>
> However, we do not see anything in Article 5.1 that establishes such an obligation for a safeguard measure *other* than a quantitative restriction which reduces the quantity of imports below the average of imports in the last three representative years. In particular, a Member is *not* obliged to justify in its recommendations or determinations a measure in the form of a quantitative restriction which is consistent with 'the average of imports in the last three representative years for which statistics are available'.
>
> For these reasons, we do not agree with the Panel's broad finding in paragraph 7.109 that:
>
> > 'Members are required, in their recommendations or determinations on the application of a safeguard measure, to explain how they considered the facts before them and why they concluded, at the time of the decision, that the measure to be applied was necessary to remedy serious injury and facilitate the adjustment of the industry.'"[374]

[371] Panel Report on *US – Wheat Gluten*, para. 8.21.
[372] Appellate Body Report on *Korea – Dairy*, paras. 96 and 103.
[373] Appellate Body Report on *Korea – Dairy*, para. 103.
[374] Appellate Body Report on *Korea – Dairy*, paras. 98–100.

220. In *US – Line Pipe*, the Appellate Body reiterated its finding in *Korea – Dairy*, that Article 5.1 imposes a general "substantive obligation" to apply safeguard measures only to the "permissible extent", and a particular "procedural obligation" to provide a "clear justification" only in the specific case of quantitative restrictions reducing the volume of imports below the average of imports in the last three representative years.[375] The Appellate Body also reaffirmed its interpretation in *Korea – Dairy* that Article 5.1 does not establish a "general procedural obligation" to demonstrate compliance with Article 5.1, first sentence, at the time of application, in its recommendations or determinations on the application of the safeguard measure:

> "It is clear, therefore, that, apart from one exception, Article 5.1, including the first sentence, does not oblige a Member to justify, at the time of application, that the safeguard measure at issue is applied 'only to the extent necessary'. The exception we identified in *Korea – Dairy* lies in the second sentence of Article 5.1. That exception concerns safeguard measures in the form of quantitative restrictions, which reduce the quantity of imports below the average of imports in the last three representative years. That exception does not apply to the line pipe measure."[376]

221. Regarding the "permissible extent" of the application of a safeguard measure under Article 5.1,[377] the Appellate Body in *US – Line Pipe*, in the context of Article 4.2[378] and the objective and purpose of the Agreement, concluded that although the "serious injury" in Article 5.1 and Article 4.2 was "one and the same",[379] the phrase "only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment" in Article 5.1, first sentence, must be read as requiring that safeguard measures may be applied "only to the extent that they address serious injury attributed to increased imports,[380] not "*all* serious injury".[381] The Appellate Body, in particular, ruled that Article 4.2(b), as the context for Article 5.1, seeks to prevent investigating authorities from inferring a causal link between serious injury and increased imports as a result of injurious effects from other sources, and it is "a benchmark for ensuring that only an appropriate share of the overall injury is attributed to increased imports":

> "We observe here that the non-attribution language of the second sentence of Article 4.2(b) is an important part of the architecture of the *Agreement on Safeguards* and thus serves as necessary context in which Article 5.1, first sentence, must be interpreted. In our view, the non-attribution language of the second sentence of Article 4.2(b) has two objectives. First, it seeks, in situations where several factors cause injury at the same time, to prevent investigating authorities from inferring the required 'causal link' between increased imports and serious injury or threat thereof on the basis of the injurious effects caused by factors other than increased imports. Second, it is a benchmark for ensuring that only an appropriate share of the overall injury is attributed to increased imports. As we read the Agreement, this latter objective, in turn, informs the permissible extent to which the safeguard measure may be applied pursuant to Article 5.1, first sentence. Indeed, as we see it, this is the only possible interpretation of the obligation set out in Article 4.2(b), last sentence, that ensures its consistency with Article 5.1, first sentence. It would be illogical to require an investigating authority to ensure that the 'causal link' between increased imports and serious injury not be based on the share of injury attributed to factors other than increased imports while, at the same time, permitting a Member to apply a safeguard measure addressing injury caused by all factors.
>
> . . . .
>
> For all these reasons, we conclude that the phrase 'only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment' in Article 5.1, first sentence, must be read as requiring that safeguard measures may be applied only to the extent that they address serious injury attributed to increased imports."[382]

222. In addition, the Appellate Body on *US – Line Pipe* referred to the object and purpose of the *Agreement on Safeguards* and the rules of general international law on state responsibility to support its conclusion that the phrase "only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment" in Article 5.1, first sentence, must be read as requiring that safeguard measures may be applied "only to the extent that they address serious injury attributed to increased imports":

> "If the pain inflicted on exporters by a safeguard measure were permitted to have effects beyond the share of injury caused by increased imports, this would imply that an exceptional remedy, which is not meant to protect the industry of the importing country from unfair or illegal

[375] Appellate Body Report on *US – Line Pipe*, paras. 231 and 234. Since the safeguard measure in *US – Line Pipe* is a tariff, not a quantitative restriction, the Appellate Body upheld the panel's conclusion that an importing Member is not required to demonstrate, at the time of imposition, that the line pipe measure was "necessary to prevent or remedy serious injury and to facilitate adjustment". Appellate Body Report on *US – Line Pipe*, para. 235.

[376] Appellate Body Report on *US – Line Pipe*, para. 233.

[377] In specific, the issue is whether the permissible extent of a safeguard measure is limited to the injury that can be attributed to increased imports, or whether a safeguard measure may also address the injurious effects caused by other factors. Appellate Body Report on *US – Line Pipe*, para. 241.

[378] Article 4.2(b) requires exclusion of the impact of causes of injury other than increased imports.

[379] Appellate Body Report on *US – Line Pipe*, para. 249.

[380] Appellate Body Report on *US – Line Pipe*, para. 260.

[381] Appellate Body Report on *US – Line Pipe*, para. 250.

[382] Appellate Body Report on *US – Line Pipe*, para. 260.

trade practices, could be applied in a more trade-restrictive manner than countervailing and anti-dumping duties.

The object and purpose of the *Agreement on Safeguards* support this reading of the context of Article 5.1, first sentence. The *Agreement on Safeguards* deals only with *imports*. It deals only with measures that, under certain conditions, can be applied to *imports*. The title of Article XIX of the GATT 1994 is 'Emergency Action on *Imports* of Particular Products'. (emphasis added) It seems apparent to us that the object and purpose of both Article XIX of the GATT 1994 and the *Agreement on Safeguards* support the conclusion that safeguard measures should be applied so as to address only the consequences of *imports*. And, therefore, it seems apparent to us as well that the limited objective of Article 5.1, first sentence, is limited by the consequences of *imports*.

We recalled there that the rules of general international law on state responsibility require that countermeasures in response to breaches by States of their international obligations be proportionate to such breaches. Article 51 of the International Law Commission's Draft Articles on Responsibility of States for Internationally Wrongful Acts provides that 'countermeasures must be commensurate with the injury suffered, taking into account the gravity of the internationally wrongful act and the rights in question'.

For all these reasons, we conclude that the phrase 'only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment' in Article 5.1, first sentence, must be read as requiring that safeguard measures may be applied only to the extent that they address serious injury attributed to increased imports."[383]

(b) Adjustment plans

223. The Panel on *Korea – Dairy* rejected the view that Article 5.1 imposes an obligation to consider adjustment plans:

"We wish to make it clear that we do not interpret Article 5.1 as requiring the consideration of an adjustment plan by the authorities . . . The Panel finds no specific requirement that an adjustment plan as such must be requested and considered in the text of the *Agreement on Safeguards*. Although there are references to industry adjustment in two of its provisions, nothing in the text of the Agreement on Safeguards suggests that consideration of a specific adjustment plan is required before a measure can be adopted. Rather, we believe that the question of adjustment, along with the question of preventing or remedying serious injury, must be a part of the authorities' reasoned explanation of the measure it has chosen to apply. Nonetheless, we note that examination of an adjustment plan, within the context of the application of a safeguard measure, would be strong evidence that the authorities considered whether the measure was commensurate with the objective of preventing or remedying serious injury and facilitating adjustment."[384]

(c) Relationship with other Articles

224. The Panel on *Argentina – Footwear (EC)*, after finding that the safeguard investigation and determination leading to the imposition of the definitive safeguard measure at issue were inconsistent with Articles 2 and 4, exercised judicial economy with respect to claims under Article 5.[385]

225. The Panel on *US – Wheat Gluten*, after finding the measure at issue to be inconsistent with Articles 2.1 and 4.2 of the *Agreement on Safeguards*, exercised judicial economy with respect to claims under Article 5 of the *Agreement on Safeguards* (and under Articles I and XIX of the *GATT 1994*).[386] The Appellate Body upheld this exercise of judicial economy by the Panel. In so doing, the Appellate Body referred to its statements on judicial economy in *US – Wool Shirts and Blouses* and in *Australia – Salmon*, and recalled that in *Argentina – Footwear (EC)* it had found that, since inconsistency with Articles 2 and 4 deprived the measure at issue in that case of its legal basis, it was not necessary to complete the analysis of the Panel relating to Article XIX:1 of the *GATT 1994*.[387] Similarly, the Appellate Body also upheld the Panel's exercise of judicial economy with respect to the claims under Article I of the *GATT 1994* and Article 5 of the *Agreement on Safeguards*.[388]

226. The Panel on *US – Lamb*, after making findings of inconsistency with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards* (and with Article XIX:1(a) of the *GATT 1994*), exercised judicial economy with respect to claims raised under Article 5.1 (and Articles 2.2, 3.1, 8, 11 and 12) of the *Agreement on Safeguards*.[389] The Appellate Body upheld this exercise of judicial economy.[390]

(d) Relationship with other WTO Agreements

(i) GATT 1994

227. As regards the relationship with Article XIII of the *GATT 1994*, the Panel on *US – Line Pipe* held, in a statement not reviewed by the Appellate Body, that Article XIII does applies to tariff quota safeguard measures. In its view, "[i]f Article XIII did not apply to tariff quota safeguard measures, such safeguard measures would

[383] Appellate Body Report on *US – Line Pipe*, paras. 257 and 260.
[384] Panel Report on *Korea – Dairy*, para. 7.108.
[385] Panel Report on *Argentina – Footwear (EC)*, para. 8.289.
[386] Panel Report on *US – Wheat Gluten*, para. 8.220.
[387] Appellate Body Report on *US – Wheat Gluten*, paras. 179–182.
[388] Appellate Body Report on *US – Wheat Gluten*, paras. 184–185.
[389] Panel Report on *US – Lamb*, para. 7.280.
[390] Appellate Body Report, *US – Lamb*, paras. 193–195.

escape the majority of the disciplines set forth in Article 5":

> "[I]t is the paucity of disciplines governing the application of tariff quota safeguard measures in Article 5 of the Safeguards Agreement that supports our interpretation of Article XIII. If Article XIII did not apply to tariff quota safeguard measures, such safeguard measures would escape the majority of the disciplines set forth in Article 5. This is an important consideration, given the quantitative aspect of a tariff quota. For example, if Article XIII did not apply, quantitative criteria regarding the availability of lower tariff rates could be introduced in a discriminatory manner, without any consideration to prior quantitative performance.[391] In our view, the potential for such discrimination is contrary to the object and purpose of both the Safeguards Agreement, and the WTO Agreement. In this regard, the preamble of the Safeguards Agreement refers to the "need to clarify and reinforce the disciplines of GATT 1994" in the context of safeguards. We consider that the "disciplines of GATT 1994" surely include those providing for non-discrimination. In any event "the elimination of discriminatory treatment in international trade relations" is referred to explicitly in the preamble to the WTO Agreement. We further note that the preamble of the Safeguards Agreement also mentions that one of the objectives of the Safeguards Agreement is to "establish multilateral control over safeguards and eliminate measures that escape such control". We are of the view that non-application of Article XIII in the context of safeguards would result in tariff quota safeguard measures partially escaping the control of multilateral disciplines. This result would be contrary to the objectives set out in the preamble of the Safeguards Agreement."[392]

228. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of the *GATT 1994* (and with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards*), exercised judicial economy with respect to claims raised under Article 5.1 (and Articles 2.2, 3.1, 8, 11 and 12) of the *Agreement on Safeguards*.[393] The Appellate Body upheld this exercise of judicial economy.[394]

2. Article 5.2

(a) Article 5.2(b)

(i) "the departure referred to above shall not be permitted in the case of threat of serious injury"

229. In *US – Line Pipe*, the Appellate Body ruled that Article 5.2(b) is an "exception" to the general rule, and not relevant to the non-discrete determination of injury or threat thereof in the safeguard measure in *US – Line Pipe*:

> "Article 5.2(b) excludes quota modulation in the case of threat of serious injury. It is, in our view, the only provision in the *Agreement on Safeguards* that establishes a difference in the legal effects of 'serious injury' and 'threat of serious injury'. Under Article 5.2(b), in order for an importing Member to adopt a safeguard measure in the form of a quota to be allocated in a manner departing from the general rule contained in Article 5.2(a), that Member must have determined that there is 'serious injury'. A Member cannot engage in quota modulations if there is only a 'threat of serious injury'. This is an exception that must be respected. But we do not think it appropriate to generalize from such a limited exception to justify a general rule. In any event, this exceptional circumstance is not relevant to the line pipe measure. We find nothing in Article 5.2(b), viewed as part of the context of Article 2.1, that would support a finding that, in this case, the USITC acted inconsistently with the *Agreement on Safeguards* by making a non-discrete determination in this case."[395]

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Provisional Safeguard Measures

In critical circumstances where delay would cause damage which it would be difficult to repair, a Member may take a provisional safeguard measure pursuant to a preliminary determination that there is clear evidence that increased imports have caused or are threatening to cause serious injury. The duration of the provisional measure shall not exceed 200 days, during which period the pertinent requirements of Articles 2 through 7 and 12 shall be met. Such measures should take the form of tariff increases to be promptly refunded if the subsequent investigation referred to in paragraph 2 of Article 4 does not determine that increased imports have caused or threatened to cause serious injury to a domestic industry. The duration of any such provisional measure shall be counted as a part of the initial period and any extension referred to in paragraphs 1, 2 and 3 of Article 7.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. Relationship with other Articles

230. The Panel on *Argentina – Footwear (EC)* considered that, in light of its findings "concerning the investigation and the definitive measure" (the Panel had

[391] (*footnote original*) The same concern does not arise in respect of tariff measures – which also appear not to be covered by all Article 5 disciplines – because tariff measures affect all exporting Members equally.
[392] Panel Report on *US – Line Pipe*, para. 7.49
[393] Panel Report on *US – Lamb*, para. 7.280.
[394] Appellate Body Report, *US – Lamb*, paras. 193–195.
[395] Appellate Body Report on *US – Line Pipe*, para. 173.

found a violation of Articles 2.1, 4.2(a), 4.2(b) and 4.2(c)), it was not necessary to make a finding concerning a claim under Article 6.[396]

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Duration and Review of Safeguard Measures

1. A Member shall apply safeguard measures only for such period of time as may be necessary to prevent or remedy serious injury and to facilitate adjustment. The period shall not exceed four years, unless it is extended under paragraph 2.

2. The period mentioned in paragraph 1 may be extended provided that the competent authorities of the importing Member have determined, in conformity with the procedures set out in Articles 2, 3, 4 and 5, that the safeguard measure continues to be necessary to prevent or remedy serious injury and that there is evidence that the industry is adjusting, and provided that the pertinent provisions of Articles 8 and 12 are observed.

3. The total period of application of a safeguard measure including the period of application of any provisional measure, the period of initial application and any extension thereof, shall not exceed eight years.

4. In order to facilitate adjustment in a situation where the expected duration of a safeguard measure as notified under the provisions of paragraph 1 of Article 12 is over one year, the Member applying the measure shall progressively liberalize it at regular intervals during the period of application. If the duration of the measure exceeds three years, the Member applying such a measure shall review the situation not later than the mid-term of the measure and, if appropriate, withdraw it or increase the pace of liberalization. A measure extended under paragraph 2 shall not be more restrictive than it was at the end of the initial period, and should continue to be liberalized.

5. No safeguard measure shall be applied again to the import of a product which has been subject to such a measure, taken after the date of entry into force of the WTO Agreement, for a period of time equal to that during which such measure had been previously applied, provided that the period of non-application is at least two years.

6. Notwithstanding the provisions of paragraph 5, a safeguard measure with a duration of 180 days or less may be applied again to the import of a product if:

(a) at least one year has elapsed since the date of introduction of a safeguard measure on the import of that product; and

(b) such a safeguard measure has not been applied on the same product more than twice in the five-year period immediately preceding the date of introduction of the measure.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. Article 7.4

231. In dismissing a claim under Article 12 regarding an alleged failure to notify modifications of a definitive safeguard measure which increased the restrictiveness of that measure, the Panel Report in *Argentina – Footwear (EC)* observed:

> "[T]he *only* modifications of safeguard measures that Article 7.4 contemplates are those that *reduce* its restrictiveness (i.e., to eliminate the measure or to increase their pace of its liberalisation pursuant to a mid-term review). The Agreement does not contemplate modifications that *increase* the restrictiveness of a measure, and thus contains no notification requirement for such restrictive modifications.
>
> We note that the modifications of the definitive safeguard measure made by Argentina are not contemplated by Article 7, and thus Article 12 does not foresee notification requirements with respect to such modifications. Any *substantive* issues pertaining to these subsequent Resolutions would need to be addressed under Article 7, but the European Communities made no such claim."[397]

232. With respect to a failure to notify a modification of a safeguard measure that increased the restrictiveness of that measure, see paragraph 275 below.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Level of Concessions and Other Obligations

1. A Member proposing to apply a safeguard measure or seeking an extension of a safeguard measure shall endeavour to maintain a substantially equivalent level of concessions and other obligations to that existing under GATT 1994 between it and the exporting Members which would be affected by such a measure, in accordance with the provisions of paragraph 3 of Article 12. To achieve this objective, the Members concerned may agree on any adequate means of trade compensation for the adverse effects of the measure on their trade.

2. If no agreement is reached within 30 days in the consultations under paragraph 3 of Article 12, then the affected exporting Members shall be free, not later than 90 days after the measure is applied, to suspend, upon the expiration of 30 days from the day on which written

[396] Panel Report on *Argentina – Footwear (EC)*, para. 8.292.
[397] Panel Report on *Argentina – Footwear (EC)*, paras. 8.303–8.304.

notice of such suspension is received by the Council for Trade in Goods, the application of substantially equivalent concessions or other obligations under GATT 1994, to the trade of the Member applying the safeguard measure, the suspension of which the Council for Trade in Goods does not disapprove.

3. The right of suspension referred to in paragraph 2 shall not be exercised for the first three years that a safeguard measure is in effect, provided that the safeguard measure has been taken as a result of an absolute increase in imports and that such a measure conforms to the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. Article 8.1

(a) "in accordance with the provisions of paragraph 3 of Article 12"

233. In *US – Wheat Gluten*, the Appellate Body upheld a finding by the Panel in that dispute that the United States had failed to endeavour to maintain a substantially equivalent level of concessions and other obligations to that existing under *GATT 1994* between it and the exporting Members which would be affected by such a measure, in accordance with Article 12.3:

> "Article 8.1 imposes an obligation on Members to 'endeavour to maintain' equivalent concessions with affected exporting Members. The efforts made by a Member to this end must be 'in accordance with the provisions of ' Article 12.3 of the *Agreement on Safeguards*.
>
> In view of this explicit link between Articles 8.1 and 12.3 of the *Agreement on Safeguards*, a Member cannot, in our view, 'endeavour to maintain' an adequate balance of concessions unless it has, as a first step, provided an adequate opportunity for prior consultations on a proposed measure. We have upheld the Panel's findings that the United States did not provide an adequate opportunity for consultations, as required by Article 12.3 of the *Agreement on Safeguards*. For the same reasons, we also uphold the Panel's finding, in paragraph 8.219 of its Report, that the United States acted inconsistently with its obligations under Article 8.1 of the *Agreement on Safeguards*."[398]

234. In *US – Line Pipe*, the Appellate Body, referring to its Report in *US – Wheat Gluten*, upheld the Panel's finding that the obligation under Article 8.1 to "maintain a substantially equivalent level of concessions" is linked with the Members' consultation obligation under Article 12.3:

> "As we stated in *US – Wheat Gluten*, there must be sufficient time 'to allow for the possibility . . . for a meaningful exchange'.[399] This requirement presupposes that exporting Members will obtain the relevant information sufficiently in advance to permit analysis of the measure, and assumes further that exporting Members will have an adequate opportunity to consider the likely consequences of the measure before the measure takes effect. For it is only in such circumstances that an exporting Member will be in a position, as required by Article 12.3, to 'reach[] an understanding on ways to achieve the objective set out in paragraph 1 of Article 8' of 'maintain[ing] a substantially equivalent level of concessions and other obligations to that existing under GATT 1994'. We see this specific textual link between Article 12.3 and paragraph 1 of Article 8 as especially significant.
>
> . . .
>
> In our view, our reasoning in *US – Wheat Gluten* is also applicable in this case. Therefore, we agree with the Panel that the United States, 'by failing to comply with its obligations under Article 12.3, has also acted inconsistently with its obligations under Article 8.1 to endeavour to maintain a substantially equivalent level of concessions. . . .' We, therefore, uphold the Panel's finding that the United States acted inconsistently with its obligations under Article 8.1 of the *Agreement on Safeguards*."[400]

(b) Relationship with other Articles

235. With respect to the relationship with Article 12.3, see also paragraphs 269–270 below.

236. The Panel on *US – Lamb*, after making findings of inconsistency with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards* (and with Article XIX:1(a) of *GATT 1994*), exercised judicial economy with respect to claims raised under Article 8 (and Articles 2.2, 3.1, 5.1, 11 and 12) of the *Agreement on Safeguards*.[401]

(c) Relationship with other WTO Agreements

237. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of the *GATT 1994* (and with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards*), exercised judicial economy with respect to claims raised under Article 8 (and Articles 2.2, 3.1, 5.1, 11 and 12) of the *Agreement on Safeguards*.[402]

X. ARTICLE 9

A. TEXT OF ARTICLE 9

Article 9
Developing Country Members

1. Safeguard measures shall not be applied against a product originating in a developing country Member as

[398] Appellate Body Report on *US – Wheat Gluten*, paras. 145–146.
[399] (*footnote original*) Appellate Body Report, *US – Wheat Gluten*, para. 136.
[400] Appellate Body Report on *US – Line Pipe*, paras. 108 and 119.
[401] Panel Report on *US – Lamb*, para. 7.280.
[402] Panel Report on *US – Lamb*, para. 7.280.

long as its share of imports of the product concerned in the importing Member does not exceed 3 per cent, provided that developing country Members with less than 3 per cent import share collectively account for not more than 9 per cent of total imports of the product concerned.[2]

(*footnote original*) [2] A Member shall immediately notify an action taken under paragraph 1 of Article 9 to the Committee on Safeguards.

2. A developing country Member shall have the right to extend the period of application of a safeguard measure for a period of up to two years beyond the maximum period provided for in paragraph 3 of Article 7. Notwithstanding the provisions of paragraph 5 of Article 7, a developing country Member shall have the right to apply a safeguard measure again to the import of a product which has been subject to such a measure, taken after the date of entry into force of the WTO Agreement, after a period of time equal to half that during which such a measure has been previously applied, provided that the period of non-application is at least two years.

B. INTERPRETATION AND APPLICATION OF ARTICLE 9

1. Article 9.1

(a) Exclusion of developing country exporting less than "*de minimis*" levels

238. In *US – Line Pipe*, based upon the statistical evidence, the Appellate Body upheld the Panel's findings[403] and concluded that the importing Member acted inconsistently with Article 9.1 by failing to "take all reasonable steps it could, and exclude developing countries exporting less than *de minimis* levels in Article 9.1".[404] However, the Appellate Body in *US – Line Pipe* held that Article 9.1 does not indicate how a Member must comply with an obligation to provide specifically for "non-application" of a safeguard measure, and it is possible to comply with Article 9.1 "without providing a specific list of the Members excluded from the safeguard measure":

> "There is nothing, for example, in the text of Article 9.1 to the effect that countries to which the measure will not apply must be expressly excluded from the measure. Although the Panel may have a point in saying that it is 'reasonable to expect' an express exclusion, we see nothing in Article 9.1 that requires one.
>
> We agree also with the United States that it is possible to comply with Article 9.1 without providing a specific list of the Members that are either included in, or excluded from, the measure. Although such a list could, and would, be both useful and helpful by providing transparency for the benefit of all Members concerned, we see nothing in Article 9.1 that mandates one."[405]

239. In *US – Line Pipe*, concerning the safeguard measure which took the form of a supplemental duty, the Appellate Body clarified that "duties are 'applied [against a product] irrespective of whether they result in making imports more expensive, in discouraging imports because they become more expensive, or in preventing imports together". In this case, no evidence had been presented before the Panel that the importing Member made an effort "to make certain that *de minimis* imports from developing countries were excluded from the application of the measures":

> "On this point, we start by observing that Article 9.1 obliges Members not to *apply* a safeguard measure against *products* originating in developing countries whose individual exports are below a *de minimis* level of three percent of the imports of that product, provided that the collective import share of such developing countries does not account for more than nine percent of the total imports of that product. . . . . However, we note that Article 9.1 is concerned with the application of a safeguard measure on a *product*. And we note, too, that a duty, such as the supplemental duty imposed by the line pipe measure, does not need actually to be enforced and collected to be 'applied' to a product. In our view, duties are 'applied against a *product* ' when a Member imposes conditions under which that product can enter that Member's market – including when that Member establishes, as the United States did here, a duty to be imposed on over-quota imports. Thus, in our view, duties are 'applied' irrespective of whether they result in making imports more expensive, in discouraging imports because they become more expensive, or in preventing imports altogether.
>
> . . .
>
> [T]he available documents reveal no efforts whatsoever by the United States – apart from the claimed 'automatic' structure of the measure itself – to make certain that *de minimis* imports from developing countries were excluded from the application of the measure."[406]

[403] The Panel found that the safeguard measure did not contain any "express exclusion" of those developing countries which fit the description of *de minimis* imports in Article 9.1; and "in the absence of any other relevant documentation," the safeguard measure applied to developing countries with *de minimis* imports. The Panel also concluded that Article 9.1 contains an obligation not to apply a measure, while the safeguard measure in the *US – Line Pipe* "applies" to all developing countries in principle. Thus the United States had not complied with its obligations under Article 9.1 of the Agreement on Safeguards. Panel Report on *US – Line Pipe*, paras. 7.180–7.181.

[404] Appellate Body Report on *US – Line Pipe*, para. 132.

[405] Appellate Body Report on *US – Line Pipe*, paras. 127–128.

[406] Appellate Body Report on *US – Line Pipe*, paras. 129 and 132.

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Pre-existing Article XIX Measures

Members shall terminate all safeguard measures taken pursuant to Article XIX of GATT 1947 that were in existence on the date of entry into force of the WTO Agreement not later than eight years after the date on which they were first applied or five years after the date of entry into force of the WTO Agreement, whichever comes later.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

No jurisprudence or decision by a competent WTO body.

XII. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Prohibition and Elimination of Certain Measures

1. (a) A Member shall not take or seek any emergency action on imports of particular products as set forth in Article XIX of GATT 1994 unless such action conforms with the provisions of that Article applied in accordance with this Agreement.

(b) Furthermore, a Member shall not seek, take or maintain any voluntary export restraints, orderly marketing arrangements or any other similar measures on the export or the import side.[3,4] These include actions taken by a single Member as well as actions under agreements, arrangements and understandings entered into by two or more Members. Any such measure in effect on the date of entry into force of the WTO Agreement shall be brought into conformity with this Agreement or phased out in accordance with paragraph 2.

(*footnote original*) [3] An import quota applied as a safeguard measure in conformity with the relevant provisions of GATT 1994 and this Agreement may, by mutual agreement, be administered by the exporting Member.
(*footnote original*) [4] Examples of similar measures include export moderation, export-price or import-price monitoring systems, export or import surveillance, compulsory import cartels and discretionary export or import licensing schemes, any of which afford protection.

(c) This Agreement does not apply to measures sought, taken or maintained by a Member pursuant to provisions of GATT 1994 other than Article XIX, and Multilateral Trade Agreements in Annex 1A other than this Agreement, or pursuant to protocols and agreements or arrangements concluded within the framework of GATT 1994.

2. The phasing out of measures referred to in paragraph 1(b) shall be carried out according to timetables to be presented to the Committee on Safeguards by the Members concerned not later than 180 days after the date of entry into force of the WTO Agreement. These timetables shall provide for all measures referred to in paragraph 1 to be phased out or brought into conformity with this Agreement within a period not exceeding four years after the date of entry into force of the WTO Agreement, subject to not more than one specific measure per importing Member,[5] the duration of which shall not extend beyond 31 December 1999. Any such exception must be mutually agreed between the Members directly concerned and notified to the Committee on Safeguards for its review and acceptance within 90 days of the entry into force of the WTO Agreement. The Annex to this Agreement indicates a measure which has been agreed as falling under this exception.

(*footnote original*) [5] The only such exception to which the European Communities is entitled is indicated in the Annex to this Agreement.

3. Members shall not encourage or support the adoption or maintenance by public and private enterprises of non-governmental measures equivalent to those referred to in paragraph 1.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

1. Article 11.1(a)

(a) Relationship with Article XIX of the *GATT 1994*

240. With respect to the relationship with Article XIX of the *GATT 1994*, see paragraphs 4–9 above.

(b) Relationship with other Articles

241. The Panel on *US – Lamb*, after making findings of inconsistency with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards* (and with Article XIX:1(a) of *GATT 1994*), exercised judicial economy with respect to claims raised under Article 11 (and Articles 2.2, 3.1, 5.1, 8 and 12) of the *Agreement on Safeguards*.[407]

(c) Relationship with other WTO Agreements

242. The Panel on *US – Lamb*, after making findings of inconsistency with Article XIX:1(a) of *GATT 1994* (and with Articles 2.1, 4.1(c), and 4.2(b) of the *Agreement on Safeguards*), exercised judicial economy with respect to claims raised under Article 11 (and Articles 2.2, 3.1, 5.1, 8 and 12) of the *Agreement on Safeguards*.[408]

2. Article 11.2

243. At its meeting on 24 February 1995, the Committee on Safeguards decided that the information required

[407] Panel Report on *US – Lamb*, para. 7.280.
[408] Panel Report on *US – Lamb*, para. 7.280.

in the notifications of the exception under Article 11.2 of the *Agreement on Safeguards* should also be provided by signatories that were eligible to become original Members of the WTO within the same time-limits as those which apply to WTO Members.[409] The Committee also adopted a format for notifications of the exception under Article 11.2 of the *Agreement on Safeguards*[410] as well as a format for notifications on timetables for phasing out measures referred to in Article 11.1(b) or for bringing them into conformity with the *Agreement on Safeguards*.[411]

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Notification and Consultation

1. A Member shall immediately notify the Committee on Safeguards upon:

(a) initiating an investigatory process relating to serious injury or threat thereof and the reasons for it;

(b) making a finding of serious injury or threat thereof caused by increased imports; and

(c) taking a decision to apply or extend a safeguard measure.

2. In making the notifications referred to in paragraphs 1(b) and 1(c), the Member proposing to apply or extend a safeguard measure shall provide the Committee on Safeguards with all pertinent information, which shall include evidence of serious injury or threat thereof caused by increased imports, precise description of the product involved and the proposed measure, proposed date of introduction, expected duration and timetable for progressive liberalization. In the case of an extension of a measure, evidence that the industry concerned is adjusting shall also be provided. The Council for Trade in Goods or the Committee on Safeguards may request such additional information as they may consider necessary from the Member proposing to apply or extend the measure.

3. A Member proposing to apply or extend a safeguard measure shall provide adequate opportunity for prior consultations with those Members having a substantial interest as exporters of the product concerned, with a view to, *inter alia*, reviewing the information provided under paragraph 2, exchanging views on the measure and reaching an understanding on ways to achieve the objective set out in paragraph 1 of Article 8.

4. A Member shall make a notification to the Committee on Safeguards before taking a provisional safeguard measure referred to in Article 6. Consultations shall be initiated immediately after the measure is taken.

5. The results of the consultations referred to in this Article, as well as the results of mid-term reviews referred to in paragraph 4 of Article 7, any form of compensation referred to in paragraph 1 of Article 8, and proposed suspensions of concessions and other obligations referred to in paragraph 2 of Article 8, shall be notified immediately to the Council for Trade in Goods by the Members concerned.

6. Members shall notify promptly the Committee on Safeguards of their laws, regulations and administrative procedures relating to safeguard measures as well as any modifications made to them.

7. Members maintaining measures described in Article 10 and paragraph 1 of Article 11 which exist on the date of entry into force of the WTO Agreement shall notify such measures to the Committee on Safeguards not later than 60 days after the date of entry into force of the WTO Agreement.

8. Any Member may notify the Committee on Safeguards of all laws, regulations, administrative procedures and any measures or actions dealt with in this Agreement that have not been notified by other Members that are required by this Agreement to make such notifications.

9. Any Member may notify the Committee on Safeguards of any non-governmental measures referred to in paragraph 3 of Article 11.

10. All notifications to the Council for Trade in Goods referred to in this Agreement shall normally be made through the Committee on Safeguards.

11. The provisions on notification in this Agreement shall not require any Member to disclose confidential information the disclosure of which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

1. Notification formats adopted by the Committee on Safeguards

244. Formats for certain notifications under the *Agreement on Safeguards*, including notifications under Article 12, were approved by the Committee on Safeguards on 24 February 1995.[412] The Panel on *Korea – Dairy* noted that it was clear that the provisions of Article 12 prevailed over the notification formats adopted by the Committee:

[409] G/SG/M/1, Section E. With respect to the clarification made by the Chairman concerning the implication of the decision, see G/SG/M/1, para. 28.
[410] G/SG/M/1, Section H. The text of the adopted format can be found in G/SG/N/4.
[411] G/SG/M/1, Section H. The text of the adopted format can be found in G/SG/N/5.
[412] G/SG/1.

"It is clear that the provisions of Article 12 of the *Agreement on Safeguards* prevail over the Guidance issued by the Committee on Safeguards (which contains a disclaimer to that effect) and the Technical Cooperation Handbook on Notification Requirements (prepared by the Secretariat but which explicitly states that it 'does not constitute a legal interpretation of the notification obligations under the respective agreement(s)'). At issue in this case are the notifications required under Articles 12.1(a), (b) and (c)."[413]

2. Article 12.1

(a) "shall immediately notify"

245. The Panel on *Korea – Dairy* read a notion of "urgency" into the phrase "shall immediately notify . . ." in Article 12.1, but acknowledged that there is a need under this provision to balance the requirement for some minimum level of information in a notification against the requirement for "immediate" notification:

"The ordinary meaning of the term 'immediately'[414] introduces a certain notion of urgency. As discussed above, we believe that the text of Article 12.1, 12.2 and 12.3 makes clear that the notifications on the finding of serious injury and on the proposed measure shall in all cases precede the consultations referred to in Article 12.3. We note finally that no specific number of days is mentioned in Article 12. For us this implies that there is a need under the agreement to balance the requirement for some minimum level of information in a notification against the requirement for 'immediate' notification. The more detail that is required, the less 'instantly' Members will be able to notify. In this context we are also aware that Members whose official language is not a WTO working language, may encounter further delay in preparing their notifications."[415]

246. The same Panel also notes that:

"There is no basis in the wording of Article 12.1 to interpret the term 'immediately' to mean 'as soon as practically possible'."[416]

247. The Panel on *US – Wheat Gluten* quoted the above passage from the Panel Report in *Korea – Dairy* and emphasized the need of all Members to be kept informed, in a timely manner, of the different steps in a safeguard investigation:

"We consider that the text of Article 12.1 SA is clear and requires no further interpretation. The ordinary meaning of the requirement for a Member to notify immediately its decisions or findings prohibits a Member from unduly delaying the notification of the decisions or findings mentioned in Article 12.1 (a) through (c) SA. Observance of this requirement is all the more important considering the nature of a safeguards investigation. A safeguard measure is imposed on imports of a product irrespective of its source and potentially affects all Members. All Members are therefore entitled to be kept informed, without delay, of the various steps of the investigation."[417]

248. The Appellate Body on *US – Wheat Gluten* confirmed the above approach adopted by panels and added that "immediate notification" is notification that allows the Committee on Safeguards as well as WTO Members the "fullest possible period" to consider and react to a safeguard investigation:

"As regards the meaning of the word 'immediately' in the chapeau to Article 12.1, we agree with the Panel that the ordinary meaning of the word 'implies a certain urgency'. The degree of urgency or immediacy required depends on a case-by-case assessment, account being taken of the administrative difficulties involved in preparing the notification, and also of the character of the information supplied. As previous panels have recognized, relevant factors in this regard may include the complexity of the notification and the need for translation into one of the WTO's official languages. Clearly, however, the amount of time taken to prepare the notification must, in all cases, be kept to a minimum, as the underlying obligation is to notify 'immediately'.

'Immediate' notification is that which allows the Committee on Safeguards, and Members, the *fullest possible period* to reflect upon and react to an ongoing safeguard investigation. Anything less than 'immediate' notification curtails this period. We do not, therefore, agree . . . that the requirement of '*immediate*' notification is satisfied as long as the Committee on Safeguards and Members of the WTO have *sufficient* time to review that notification. In our view, whether a Member has made an 'immediate' notification does not depend on evidence as to how the Committee on Safeguards and individual Members of the WTO actually use that notification. Nor can the requirement of 'immediate' notification depend on an *ex post facto* assessment of whether individual Members suffered actual prejudice through an insufficiency in the notification period."[418]

(i) "Immediate" notification under Article 12.1(a)

249. Two panels have had the opportunity to make findings on whether notifications have amounted to "immediate" notifications under Article 12.1.(a). In *Korea – Dairy*, the Panel found that:

"[T]he 14-day period between Korea's initiation of the investigation and its presentation of the notification

[413] Panel Report on *Korea – Dairy*, para. 7.116.
[414] (*footnote original*) The New Webster Encyclopedic Dictionary defines immediately as "without delay, straightaway"; the New Shorter Oxford Dictionary defines it as "without delay, at once, instantly".
[415] Panel Report on *Korea – Dairy*, para. 7.128.
[416] Panel Report on *Korea – Dairy*, para. 7.134.
[417] Panel Report on *US – Wheat Gluten*, para. 8.194.
[418] Appellate Body Report on *US – Wheat Gluten*, paras. 105–106.

related thereto, does not respect the requirements for 'immediate' notification and is in violation of Article 12.1 of the *Agreement on Safeguards*."[419]

250. Similarly, the Panel on *US – Wheat Gluten* determined that:

"[T]he delay of 16 days between the initiation of the investigation and the notification thereof does not satisfy the requirement of immediate notification of Article 12.1(a) SA."[420]

251. The Appellate Body upheld the finding of the Panel on *US – Wheat Gluten*, but did not pronounce itself on the Panel's determination in *Korea – Dairy*.[421]

(ii) "Immediate" notification under Article 12.1(b)

252. In respect of a notification of a determination of serious injury, the Panel on *Korea – Dairy* states:

"[A] delay of 40 days . . . between the domestic publication of the injury finding and the date of that notification to the Committee on Safeguards . . . does not satisfy the requirements for an immediate notification and therefore is in violation of Article 12.1 of the Agreement on Safeguards."[422]

253. The Panel on *US – Wheat Gluten* found that:

"[T]he delay of 26 days between the finding of serious injury and the notification thereof does not satisfy the requirement of immediate notification of Article 12.1(b) SA."[423]

254. The Appellate Body upheld the finding of the Panel on *US – Wheat Gluten*, but did not pronounce itself on the Panel's determination on *Korea – Dairy*.[424]

(iii) "Immediate" notification under Article 12.1(c)

255. As regards a notification of a proposed safeguard measure, the Panel Report in *Korea – Dairy* stated:

"[W]e note that this notification took place more than 6 weeks after the decision on the proposed measure was taken . . . We consider that this delay does not meet the requirements for an 'immediate' notification and therefore is in violation of Article 12.1 of the Agreement on Safeguards."[425]

256. In respect of a notification of a final decision to take a safeguard measure, the Panel on *Korea – Dairy* stated:

"[W]e note that Korea notified on 24 March 1997 that on 1 March 1997 a final decision had been taken to impose a quota as a safeguard measure. We fail to see how this can be viewed as an immediate notification. As far as it covers Korea's final decision to take a safeguard measure, we find that the timing of the Korean notification of 24 March 1997 does not meet the requirements of Article 12.1 of the *Agreement on Safeguards*."[426]

257. The Appellate Body on *US – Wheat Gluten* reversed a Panel finding that a notification of a decision to apply a safeguard measure after the implementation of that decision was inconsistent with Article 12.1(c) of the *Agreement on Safeguards*.[427] The Panel had considered that Article 12.2 provides relevant context in determining the timeliness of notifications under Article 12.1(c), and reasoned that a notification under Article 12.1(c) must be of a "proposed measure" and its "proposed date of introduction". On this basis, the Panel concluded that a notification under Article 12.1(c) must be made before the implementation of the "proposed" safeguard measure. The Appellate Body reasoned as follows:

"In examining the ordinary meaning of Article 12.1(c), we observe that the relevant triggering event is the '*taking*' of a decision. To us, Article 12.1(c) is focused upon whether a 'decision' has *occurred*, or has been 'taken', and not on whether that decision has been *given effect*. On the face of the text, the timeliness of a notification under Article 12.1(c) depends only on whether the notification was immediate.

. . .

Article 12.2 is related to, and complements, Article 12.1 of the *Agreement on Safeguards*. Whereas Article 12.1 sets forth *when* notifications must be made during an investigation, Article 12.2 clarifies *what* detailed information must be contained in the notifications under Articles 12.1(b) and 12.1(c). We do not, however, see the content requirements of Article 12.2 as prescribing *when* the notification under 12.1(c) must take place. Rather, in our view, timeliness under 12.1(c) is determined by whether a decision to apply or extend a safeguard measure is notified 'immediately'. A *separate* question arises as to whether notifications made by the Member satisfy the content requirements of Article 12.2. Answering this separate question requires examination of whether, in its notifications under *either* Article 12.1(b) *or* Article 12.1(c), the Member proposing to apply a safeguard measure has notified 'all pertinent information', including the 'mandatory components' specifically enumerated in Article 12.2."[428]

258. The Appellate Body on *US – Wheat Gluten* then found that although the obligations under Article

[419] Panel Report on *Korea – Dairy*, para. 7.134.
[420] Panel Report on *US – Wheat Gluten*, para. 8.197.
[421] Appellate Body Report on *US – Wheat Gluten*, para. 112.
[422] Panel Report on *Korea – Dairy*, para. 7.137.
[423] Panel Report on *US – Wheat Gluten*, para. 8.199.
[424] Appellate Body Report on *US – Wheat Gluten*, para. 116.
[425] Panel Report on *Korea – Dairy*, para. 7.140.
[426] Panel Report on *Korea – Dairy*, para. 7.145.
[427] Panel Report on *US – Wheat Gluten*, paras. 8.200–8.207.
[428] Appellate Body Report on *US – Wheat Gluten*, paras. 120 and 123.

12.1(b), 12.1(c) and 12.2. were "related", they constituted "discrete obligations":

> "Thus, the obligations set forth under Articles 12.1(b), 12.1(c) and 12.2 relate to different aspects of the notification process. Although related, these obligations are discrete. A Member could notify 'all pertinent information' in its Articles 12.1(b) and 12.1(c) notifications, and thereby satisfy Article 12.2, but still act inconsistently with Article 12.1 because the relevant notifications were not made 'immediately'. Similarly, a Member could satisfy the Article 12.1 requirement of 'immediate' notification, but act inconsistently with Article 12.2 if the content of its notifications was deficient.
>
> In our view, in finding that the United States acted inconsistently with Article 12.1(c) *solely because* the decision to apply a safeguard measure was notified after that decision had been implemented, the Panel confused the separate obligations imposed on Members pursuant to Article 12.1(c) and Article 12.2 and, thereby, added another layer to the timeliness requirements in Article 12.1(c). Instead of insisting on 'immediate' notification, as stipulated by Article 12.1(c), the Panel required notification to be made *both* 'immediately' *and* before implementation of the safeguard measure. We see no basis in Article 12.1(c) for this conclusion."[429]

259. The Appellate Body on *US – Wheat Gluten* then found that the notification at issue was consistent with the requirement of immediate notification under Article 12.1(c). The United States had made the notification only five days after the President of the United States had "taken the decision" to apply the safeguard measure, a period the Appellate Body considered sufficient, also taking into account that the notification was made the day after the decision of the President of the United States had been published in the United States Federal Register.[430]

(b) Content of notifications under Article 12.1(a)

260. At its meeting on 24 February 1995, the Committee on Safeguards adopted a format for notifications under Article 12.1(a) of the *Agreement on Safeguards* on initiation of an investigation and the reasons for it.[431] The Committee also adopted formats for notifications required under Articles 12.1(b) and (c).[432]

261. At its meeting on 6 May 1996, the Committee on Safeguards adopted a format for notification of termination of a safeguards investigation where no safeguard measure is imposed.[433]

262. The Panel on *Korea – Dairy* noted the limited explicit requirements of Article 12.1(a) with respect to the content of notifications:

> "Regarding the 'content' of notifications under Article 12.1, we note that with regard to the notification of the initiation of an investigation, the terms of Article 12.1(a) only refer to the obligation to notify 'initiating an investigatory process relating to serious injury or threat thereof and the reasons for it'."[434]

263. In examining the conformity with Article 12.1(a) of the notification at issue, the Panel on *Korea – Dairy* rejected an argument "that such notification should necessarily include a discussion of all of the legal requirements for a safeguard action to be taken such as a discussion of the conditions of the markets, etc.":

> "We note that initiation is the beginning of the process, and the Agreement on Safeguards does not establish specific standards for the decision to initiate, as do Article 5 of the Agreement on the Implementation of Article VI of GATT 1994 and Article 11 of the Agreement on Subsidies and Countervailing Measures. Thus, to require a discussion in the notification of initiation of evidence regarding the elements that must be found to exist to impose a measure at the end of the investigation would impose a requirement at the initiation stage that is not required by the Agreement on Safeguards itself. We note in the first instance that whatever the relationship between the requirements of Article 12.2 regarding the contents of notifications and the contents of the investigation reports published pursuant to Articles 3.1 and 4.2, this question is not relevant to Article 12.1(a) notifications, as Article 12.2 specifically and exclusively addresses 'notifications referred to in paragraphs [12.]1(b) and [12.]1(c)'.
>
> The format agreed by the Committee for notifications under Article 12.1(a) is not legally binding, although helpful. The guidance in the format is general as to the kind of information to be provided, referring simply to examples of information on the reasons for initiation, and saying nothing about the level of detail of that information.
>
> Although Korea's notification could usefully have included a reference to allegations of serious injury and a cross-reference to any domestic publication(s) in Korea, we think that this notification was sufficient to inform WTO Members adequately of Korea's initiation of an investigation concerning a particular product, so that Members having an interest in the product could avail themselves of their right to participate in the domestic investigation process."[435]

[435] Panel Report on *Korea – Dairy*, paras. 7.131–7.133.

3. Article 12.2

(a) "all pertinent information"

264. The Panel on *Korea – Dairy* while analysing the meaning of the expression "all pertinent information" in Article 12.2 of the *Agreement on Safeguards*, *inter alia*, observed that the standard of what must be notified to the Committee under Article 12 of the *Agreement on Safeguards* differed from what must be published domestically pursuant to Articles 3 and 4.[436] The Panel found that the information contained in the notifications at issue was in conformity with Article 12.2.[437] In respect of one of these notifications, the Panel noted that "this notification contains sufficient information on what Korea considered to be evidence of injury caused by increased imports ...."[438] The Appellate Body, however, reversed the finding by the Panel that a notification provided by Korea under Article 12.1(b) of a determination of serious injury met the requirements of Article 12.2.[439] In this context, the Appellate Body interpreted Article 12.2 as follows:

> "[I]tems listed . . . as mandatory components of 'all pertinent information', constitute a minimum notification requirement that must be met if a notification is to comply with the requirements of Article 12.
>
> We do not agree with the Panel that 'evidence of serious injury' in Article 12.2 is determined by what the notifying Member considers to be sufficient information. What constitutes 'evidence of serious injury' is spelled out in Article 4.2(a) of the *Agreement on Safeguards* . . .
>
> . . .
>
> We believe that 'evidence of serious injury' in the sense of Article 12.2 should refer, at a minimum, to the injury factors required to be evaluated under Article 4.2(a). In other words, according to the text and the context of Article 12.2, a Member must, *at a minimum*, address in its notifications, pursuant to paragraphs 1(b) and 1(c) of Article 12, all the items specified in Article 12.2 as constituting 'all pertinent information', as well as the factors listed in Article 4.2 that are required to be evaluated in a safeguards investigation. We believe that the standard set by Article 12 with respect to the content of 'all pertinent information' to be notified to the Committee on Safeguards is an objective standard independent of the subjective assessment of the notifying Member."[440]

265. While it had found that the standard for determining "all pertinent information" could not be a subjective assessment by the notifying Member, the Appellate Body in *Korea – Dairy* emphasized at the same time that it did not interpret "evidence of serious injury" to mean that all details contained in the report of the national authorities should be included:

> "In concluding that there is a minimum objective standard, we do not mean to suggest that 'evidence of serious injury' should include all the details of the recommendations and reasoning to be found in the report of the competent authorities. We agree with the Panel that, if such had been the intention of the drafters of the *Agreement on Safeguards*, they would have simply referred back to Articles 3 and 4 when requiring 'evidence of serious injury' in Article 12.2. There is, however, an intermediate position between notifying the full content of the report of the competent authorities and giving the notifying Member the discretion to determine what may be included in a notification. To comply with the requirements of Article 12.2, the notifications pursuant to paragraphs 1(b) and 1(c) of Article 12 must, *at a minimum*, address all the items specified in Article 12.2 as constituting 'all pertinent information', as well as the factors listed in Article 4.2 that are required to be evaluated in a safeguards investigation.
>
> We are aware that the last sentence of Article 12.2 provides that the Council for Trade in Goods or the Committee on Safeguards may request such additional information as they may consider necessary from the Member proposing to apply a safeguard measure. . . . Contrary to what Korea argued and the Panel reasoned, such a request is not meant to fill in gaps created by omitting elements required under 'all relevant information' or 'evidence of serious injury'."[441]

266. The Appellate Body on *Korea – Dairy* accordingly reversed the Panel on this point and made the following concluding general statement regarding the object and purpose of the notification requirements at issue:

> "We believe that the purpose of notification is better served if it includes all the elements of information specified in Articles 12.2 and 4.2. In this way, exporting Members with a substantial interest in the product subject to a safeguard measure will be in a better position to engage in meaningful consultations, as envisaged by Article 12.3, than they would otherwise be if the notification did not include all such elements. And, the Committee on Safeguards can more effectively carry out its surveillance function set out in Article 13 of the *Agreement on Safeguards*. At the same time, providing the requisite information to the Committee on Safeguards does not place an excessive burden on a Member proposing to apply a safeguard measure as such information is, or should be, readily available to it."[442]

[441] Appellate Body Report on *Korea – Dairy*, paras. 109–110.
[442] Appellate Body Report on *Korea – Dairy*, para. 111.

(b) Notification of a proposed safeguard measure

267. The Panel on *Korea – Dairy* found that Article 12.1, 12.2 and 12.3, taken together, impose the obligation upon a Member to notify the details of a proposed safeguard measure before it is applied, so that affected Members may consult about it before it takes effect.[443]

268. The Appellate Body Report on *US – Wheat Gluten* subsequently found to the contrary. See paragraphs 257–259 above.

4. Article 12.3

(a) "adequate opportunity for prior consultations"

269. The Panel on *Korea – Dairy* rejected a claim that, by not providing "all pertinent information" in its notifications in advance of consultations, a Member had failed to provide "adequate opportunity for prior consultations" within the meaning of Article 12.3. The Panel had found the content of Korea's notifications in conformity with Article 12 (the Appellate Body subsequently reversed this latter finding, but did not address any of the following issues). The Panel then opined that consultations may be "adequate" even if prior notifications are incomplete,[444] since it considered that one of the purposes of consultations is to review the content of the relevant notifications. The Panel further noted that whether parties eventually reach a mutually agreed solution is not the only criterion for assessing the adequacy of consultations:[445]

> "In the present case we note that parties exchanged questions and answers. The European Communities claims that it has always been unsatisfied with the Koreans' answers and notifications (together with Korea's determination). This may be the case and would explain why it decided to pursue dispute settlement proceedings, but it does not prove that Korea did not consult in good faith for the purpose of informing interested Members of its investigation, its conclusion and its proposed actions. We note also that Korea did impose a measure at a level and for a duration different, and less restrictive, than initially proposed. Consultations were certainly fruitful in this respect, albeit not sufficient to satisfy the European Communities.
>
> We reject therefore the EC claim that Korea failed to provide adequate opportunity to consult. Moreover, it seems to us that such consultations have led to an important revision of the initial notification and that parties, at some point, entered into very serious negotiations and considered serious elements of a mutually agreed solution. The fact that this proposed settlement was not formalized through the acceptance by the relevant internal authorities of the European Communities is immaterial. What is relevant for the purpose of this EC claim, is the fact that the parties to these consultations were able to negotiate quite effectively, which, in our view, demonstrates that the consultations were adequate. For us, this is the purpose of any consultation process and the scope of the obligation contained in Article 12.3 of the *Agreement on Safeguards*, i.e. to favour efforts by the parties to reach a mutually agreed solution of their disagreement."[446]

270. In *US – Wheat Gluten*, the Appellate Body held that the Panel had erred in concluding that the United States had acted inconsistently with Article 12.3 insofar as the Panel had based this conclusion on an erroneous interpretation of Article 12.1(c),[447] but upheld the finding on the basis that there had been no opportunity for consultations on the final proposed measure. In this connection, the Appellate Body first considered that Article 12.3 provides that information on a proposed measure must be provided in advance of the consultation:

> "We note, first, that Article 12.3 requires a Member proposing to apply a safeguard measure to provide an 'adequate opportunity for prior consultations' with Members with a substantial interest in exporting the product concerned. Article 12.3 states that an 'adequate opportunity' for consultations is to be provided 'with a view to': reviewing the information furnished pursuant to Article 12.2; exchanging views on the measure; and reaching an understanding with exporting Members on an equivalent level of concessions. In view of these objectives, we consider that Article 12.3 requires a Member proposing to apply a safeguard measure to provide exporting Members with sufficient information and time to allow for the possibility, through consultations, for a meaningful exchange on the issues identified. To us, it follows from the text of Article 12.3 itself that information on the *proposed* measure must be provided in *advance* of the consultations, so that the consultations can adequately address that measure. Moreover, the reference, in Article 12.3, to 'the information provided under' Article 12.2, indicates that Article 12.2 identifies the information that is needed to enable meaningful consultations to occur under Article 12.3. Among the list of 'mandatory components' regarding information identified in Article 12.2 are: a precise description of the *proposed* measure, and its *proposed* date of introduction.
>
> Thus, in our view, an exporting Member will not have an 'adequate opportunity' under Article 12.3 to negotiate overall equivalent concessions through consultations unless, prior to those consultations, it has obtained, *inter alia*, sufficiently detailed information on the form

[443] See Panel Report on *Korea – Dairy*, para. 7.120.
[444] Panel Report on *Korea – Dairy*, para. 7.150.
[445] Panel Report on *Korea – Dairy*, para. 7.151.
[446] Panel Report on *Korea – Dairy*, paras. 7.152–7.153.
[447] Appellate Body Report on *US – Wheat Gluten*, para. 133.

of the proposed measure, including the nature of the remedy."[448]

271. The Panel on *US – Wheat Gluten* had found that no consultations had been held between the United States and the European Communities on the final measure that was approved by the President of the United States.[449] The Appellate Body noted:

"[T]he USITC Report set out a number of 'recommendations' to the President of the United States . . .

We note that the recommendations made by the USITC did *not* include specific numerical quota shares for the individual exporting Members concerned, and the recommendations imply, without providing details, that the individual quota shares could be less favourable to imports from the European Communities. We consider that these 'recommendations' did not allow the European Communities to assess accurately the likely impact of the measure being contemplated, nor to consult adequately on overall equivalent concessions with the United States.

Accordingly, we see no error in the Panel's conclusion that the United States notifications under Article 12.1(b) did not provide a description of the measure under consideration sufficiently precise as to allow the European Communities to conduct meaningful consultations with the United States, as required by Article 12.3 of the *Agreement on Safeguards*.[450]"[451]

272. The Appellate Body on *US – Line Pipe* reaffirmed its interpretation in *US – Wheat Gluten* that the appropriate inquiry for the obligation to provide adequate opportunity for prior consultation is whether the importing Member provided the exporting Members with "sufficient time" to allow for a "meaningful exchange" on the information and that the amount of time needed for a meaningful exchange must be addressed on a case-by-case basis.[452] The Appellate Body also found that failure of the exporting Member to request consultations during an inadequate time period does not excuse the importing Member's obligation to provide adequate opportunity for prior consultation:

"The obligation of an importing Member under Article 12.3 is to 'provide adequate opportunity for *prior* consultations'. (emphasis added) That obligation cannot be met if there is insufficient time prior to the application of the measure to have a *meaningful* exchange. The importing Member's failure to provide information about a safeguard measure to an exporting Member sufficiently in advance of that measure taking effect is not excused by the fact that the exporting Member did not request consultations during that inadequate time-period."[453]

5. Relationship with other Articles

(a) Articles 2 and 4

273. The Panel on *Argentina – Footwear (EC)* rejected the view that non-compliance with Article 12 *ipso facto* constitutes a basis for finding a violation of the substantive requirements of Articles 2 and 4, and *vice versa:*

"In our view, the notification requirements of Article 12 are separate from, and in themselves do not have implications for, the question of substantive compliance with Articles 2 and 4. Similarly, we consider that the substantive requirements of Articles 2 and 4 do not have implications for the question of compliance with Article 12. Article 12 serves to provide transparency and information concerning the safeguard-related actions taken by Members. We note in this context that notification under Article 12 is just the first step in a process of transparency that can include, *inter alia*, review by the Committee as part of its surveillance functions (Article 13.1(f)), requests for additional information by the Council for Trade in Goods or the Committee on Safeguards (Article 12.2), and/or eventual bilateral consultations with affected Members if application of a measure is proposed (Article 12.3). In this regard, the important point is that the notifications be sufficiently descriptive of the actions that have been taken or are proposed to be taken, and of the basis for those actions, that Members with an interest in the matter can decide whether and how to pursue it further.

. . .

Articles 12.2 and 12.3 in our view confirm that Members are not required to notify the full detail of their investigations and findings. Article 12.2 specifically provides for the possibility of requests for further information by the Council for Trade in Goods or the Committee on Safeguards. Article 12.3 provides, *inter alia*, for consultations, upon request, with other Members, to review the information contained in the notifications. Thus,

---

[448] Appellate Body Report on *US – Wheat Gluten*, paras. 136–137.
[449] Panel Report on *US – Wheat Gluten*, para. 8.217.
[450] (*footnote original*) We note that, in so finding, we do not consider it necessary to determine whether the United States notified a "proposed measure" to the European Communities as required by Article 12.2 of the *Agreement on Safeguards*, as the European Communities did not argue specifically that the United States had acted inconsistently with Article 12.2.
[451] Appellate Body Report on *US – Wheat Gluten*, paras. 140–142.
[452] Appellate Body Report on *US – Line Pipe*, para. 107. In particular, the Appellate Body addressed the issue whether the period from the initial Article 12.1(b) notification to the day the measure takes effect is relevant for assessing whether an adequate opportunity was provided for prior consultations. The Appellate Body found that notifications under Article 12.1(b) in this case were not sufficiently precise to allow the exporting Member to conduct meaningful consultation on the measure at issue. The Appellate Body concurred with the Panel's finding, that, as a matter of fact, these proposed measures "*differed substantially*" from the one announced and eventually applied in *US – Line Pipe*.
[453] Appellate Body Report on *US – Line Pipe*, para. 112.

these provisions specifically create opportunities for further information to be provided, upon request, concerning the details of the actions summarised in the notifications. Ultimately, should a violation of Articles 2 and 4 be alleged, it would be the more detailed information from the record of the investigation, and in particular the published report(s) on the findings and reasoned conclusions of that investigation, that would form the basis for evaluation of such an allegation."[454]

274. In *Korea – Dairy*, the Appellate Body interpreted the notification requirement of "all pertinent information" as requiring a "minimum objective standard" for such notification so as to reflect "an intermediate position between notifying the full content of the report of the competent authorities and giving the notifying Member the discretion to determine what may be included in a notification". The Appellate Body specifically identified the mandatory factors of all pertinent information as well as factors listed in Article 4.2 of the *Agreement on Safeguards* that should be covered in the notification:

"In order to determine the appropriate meaning of 'all pertinent information', we must examine this phrase in the light of the text and the context of Article 12 as well as the object and purpose of that Article. The text of Article 12.2 makes it clear that a Member proposing to apply a safeguard measure is required to provide the Committee on Safeguards with *all* pertinent, not just *any* pertinent, information. Moreover, it provides that such information *shall* include certain items listed immediately after the phrase 'all pertinent information', namely, evidence of serious injury or threat thereof caused by increased imports, a precise description of the product involved and the proposed measure, the proposed date of introduction, the expected duration of the measure and a timetable for progressive liberalization. These items, which are listed as mandatory components of 'all pertinent information', constitute a minimum notification requirement that must be met if a notification is to comply with the requirements of Article 12.

We do not agree with the Panel that 'evidence of serious injury' in Article 12.2 is determined by what the notifying Member considers to be sufficient information. What constitutes 'evidence of serious injury' is spelled out in Article 4.2(a) of the *Agreement on Safeguards* which provides:

'. . . the competent authorities shall evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation of that industry, in particular, the rate and amount of the increase in imports of the product concerned in absolute and relative terms, the share of the domestic market taken by increased imports, changes in the level of sales, production, productivity, capacity utilization, profits and losses, and employment.'

We believe that 'evidence of serious injury' in the sense of Article 12.2 should refer, at a minimum, to the injury factors required to be evaluated under Article 4.2(a). In other words, according to the text and the context of Article 12.2, a Member must, *at a minimum*, address in its notifications, pursuant to paragraphs 1(b) and 1(c) of Article 12, all the items specified in Article 12.2 as constituting 'all pertinent information', as well as the factors listed in Article 4.2 that are required to be evaluated in a safeguards investigation. We believe that the standard set by Article 12 with respect to the content of 'all pertinent information' to be notified to the Committee on Safeguards is an objective standard independent of the subjective assessment of the notifying Member.

In concluding that there is a minimum objective standard, we do not mean to suggest that 'evidence of serious injury' should include all the details of the recommendations and reasoning to be found in the report of the competent authorities. We agree with the Panel that, if such had been the intention of the drafters of the *Agreement on Safeguards*, they would have simply referred back to Articles 3 and 4 when requiring 'evidence of serious injury' in Article 12.2. There is, however, an intermediate position between notifying the full content of the report of the competent authorities and giving the notifying Member the discretion to determine what may be included in a notification. To comply with the requirements of Article 12.2, the notifications pursuant to paragraphs 1(b) and 1(c) of Article 12 must, *at a minimum*, address all the items specified in Article 12.2 as constituting 'all pertinent information', as well as the factors listed in Article 4.2 that are required to be evaluated in a safeguards investigation."[455]

(b) Article 7

275. The Panel on *Argentina – Footwear (EC)* concluded that it could not examine under Article 12 a claim regarding a failure to notify a modification of a safeguard measure that increased the restrictiveness of that measure:

"We note that the modifications of definitive safeguard measures foreseen in the Agreement (namely early elimination or faster liberalization potentially resulting from mid-term reviews under Article 7.4, and extension of measures beyond the initial period of application under Article 7. [sic] and 7.4), all are subject to notification requirements under Articles 12.5 and 12.1(c)/12.2, respectively.

In this context, we note that the *only* modifications of safeguard measures that Article 7.4 contemplates are those that *reduce* its restrictiveness (i.e., to eliminate the measure or to increase the pace of its liberalisation pursuant to a mid-term review). The Agreement does not

[454] Panel Report on *Argentina – Footwear (EC)*, paras. 8.298 and 8.300.

[455] Appellate Body Report on *Korea – Dairy*, paras. 107–109.

contemplate modifications that *increase* the restrictiveness of a measure, and thus contains no notification requirement for such restrictive modifications.

We note that the modifications of the definitive safeguard measure made by Argentina are not contemplated by Article 7, and thus Article 12 does not foresee notification requirements with respect to such modifications. Any *substantive* issues pertaining to these subsequent Resolutions would need to be addressed under Article 7, but the European Communities made no such claim. Where the situation at issue is primarily one of substance, i.e., modification of a measure in a way not foreseen by the Safeguards Agreement, we believe that we cannot address the alleged procedural violation concerning notification arising therefrom, as no explicit procedural obligation is foreseen. Therefore, we see no possibility for a ruling on this aspect of the European Communities' claim under Article 12."[456]

6. Article 12.6

276. At its meeting of 24 February 1995, the Committee adopted a format for notifications of laws, regulations and administrative procedures relating to safeguard measures.[457] Further, the Committee decided that all Members that had available relevant legislation and/or regulations which apply to safeguard measures covered by the Agreement should notify the full and integrated text of that legislation and/or those regulations to the Committee by 15 March 1995, with the understanding that if such legislation and/or regulations did not exist or were not yet available, the Member would inform the Committee of this fact, would explain the reasons therefor, and would provide an indicative date by which time a notification was expected.[458] Also, the Committee decided that notification of modifications to legislation should be submitted within 30 days after domestic publication of the modifications, with the understanding that if the deadline could not be met, the reason would be notified by the deadline, with an indication of when the modification would be notified.[459]

277. At its meeting on 6 May 1996, the Committee on Safeguards adopted procedures for future reviews of legislative notifications.[460]

278. As of 31 December 2004, 133 Members[461] had notified the Committee on Safeguards of their domestic safeguards legislation and/or regulations or made communications in this regard to the Committee.[462, 463] Thirty-one Members had not, as of that date, made such a notification. The extent of the non-compliance with this notification obligation, and the implications of this situation, were raised by the Chairman at the regular meetings of the Committee.[464]

7. Article 12.7

279. At its meeting on 24 February 1995, the Committee on Safeguards decided that the information required in the notifications under Article 12.7 of the *Agreement on Safeguards* should also be provided by signatories that were eligible to become original Members of the WTO within the same time-limits as those which apply to WTO Members.[465]

280. At its meeting on 24 February 1995, the Committee on Safeguards adopted a format for notifications of pre-existing Article XIX measures described in Article 10.[466] At the same meeting, the Committee also adopted a format for notifications of measures subject to the prohibition and elimination of certain measures under Article 11.1 of the *Agreement on Safeguards*.[467] With respect to reporting by Members regarding their progress in phasing out the pre-existing Article XIX measures and measures prohibited under Article 11, see paragraph 283 below.

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Surveillance

1. A Committee on Safeguards is hereby established, under the authority of the Council for Trade in Goods, which shall be open to the participation of any Member indicating its wish to serve on it. The Committee will have the following functions:

(a) to monitor, and report annually to the Council for Trade in Goods on, the general implementation of this Agreement and make recommendations towards its improvement;

---

[456] Panel Report on *Argentina – Footwear (EC)*, paras. 8.302–8.304.
[457] G/SG/M/1, Section H. The text of the adopted format can be found in G/SG/N/1. The Committee agreed that these notifications would be distributed as unrestricted documents. G/SG/M/1, Section I, paras. 37–38.
[458] G/SG/M/1, Section I, paras. 64–65.
[459] G/SG/M/1, Section I, paras. 64–65.
[460] G/SG/M/6, Section G. The text of the adopted format can be found in G/SG/W/116.
[461] There are currently 149 WTO Members, counting the EC and all its Member States separately. This figure is reduced to 124 if the EC and its 25 Member States are counted as a single Member.
[462] G/SG/N/1 and addenda.
[463] Section XVIII of this Chapter lists the status of notifications under Article 12.6 of the Agreement.
[464] G/SG/M/25 and G/SG/M/26.
[465] G/SG/M/1, Section E. With respect to the clarification made by the Chairman concerning the implication of the decision, see G/SG/M/1, para. 28.
[466] G/SG/M/1. Section H. The text of the adopted format can be found in G/SG/N/2.
[467] G/SG/M/1, Section H. The text of the adopted format can be found in G/SG/N/3.

(b) to find, upon request of an affected Member, whether or not the procedural requirements of this Agreement have been complied with in connection with a safeguard measure, and report its findings to the Council for Trade in Goods;

(c) to assist Members, if they so request, in their consultations under the provisions of this Agreement;

(d) to examine measures covered by Article 10 and paragraph 1 of Article 11, monitor the phase-out of such measures and report as appropriate to the Council for Trade in Goods;

(e) to review, at the request of the Member taking a safeguard measure, whether proposals to suspend concessions or other obligations are "substantially equivalent", and report as appropriate to the Council for Trade in Goods;

(f) to receive and review all notifications provided for in this Agreement and report as appropriate to the Council for Trade in Goods; and

(g) to perform any other function connected with this Agreement that the Council for Trade in Goods may determine.

2. To assist the Committee in carrying out its surveillance function, the Secretariat shall prepare annually a factual report on the operation of this Agreement based on notifications and other reliable information available to it.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

1. General

(a) Rules of procedure

281. At its meeting on 6 May 1996, the Committee on Safeguards adopted rules of procedure for its meetings, based on the rules of the General Council and the Council for Trade in Goods, and incorporating relevant changes to make them applicable to the Committee.[468] The Council for Trade in Goods subsequently approved the Committee's rules of procedure at its meeting of 22 May 1996.[469]

(b) Observers

282. At its meeting on 24 February 1995, the Committee on Safeguards decided that observer governments should provide the Committee with any information the observer government considers relevant to matters within the purview of the Agreement, including the text of laws and regulations regarding safeguard measures, and information regarding any safeguard measures taken by the observer government.[470]

2. Article 13.1

283. At its meeting on 24 February 1995, the Committee on Safeguards agreed that, in order to perform the task under Article 13.1(d), Members be asked to report at the end of each year on their progress in phasing out pre-existing Article XIX measures and measures subject to prohibition and elimination under Article 11.1 of the Agreement.[471]

284. At its meeting on 6 November 1995, the Committee on Safeguards decided that, in order to comply with the provisions of Articles 13.1 (b), (c) and (e), under which the Committee has to provide assistance to Members upon request, the Committee would address these matters on an *ad hoc* basis, if and when a request in these matters is received, rather than attempt to establish a procedure in advance of any requests for assistance.[472]

XV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Dispute Settlement

The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding shall apply to consultations and the settlement of disputes arising under this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

285. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *Agreement on Safeguards* were invoked:

Case Name	Case Number	Invoked Articles
1 *Korea – Dairy*	WT/DS98	Articles 2.1, 4.2(a), 4.2(b), 5.1 and 12.1–12.3
2 *Argentina – Footwear (EC)*	WT/DS121	Articles 2.1, 4.2(a), 4.2(b), 5.1, 6, 12.1 and 12.2
3 *US – Wheat Gluten*	WT/DS166	Articles 2.1, 4.2(a), 4.2(b), 8.1, 12.1(a), 12.1(b), 12.1(c), 12.2 and 12.3
4 *US – Lamb*	WT/DS177, WT/DS178	Articles 2.2, 3.1, 4.1, 4.1(a), 4.1(b), 4.2, 4.2(a), 8.1, 11.1(a), 12.2 and 12.6

[468] G/SG/M/6, Section I. The text of the adopted document can be found in G/SG/4.
[469] G/C/M/10, Section 1.
[470] G/SG/M/1, Section F.
[471] G/SG/M/1, Section J.
[472] G/SG/M/3, Section E.

Table (*cont.*)

Case Name	Case Number	Invoked Articles
5 *US – Line Pipe*	WT/DS202	Articles 2, 2.1, 2.2, 3, 3.1, 4, 4.1(b), 4.1(c), 4.2(a), 4.2(b), 4.2(c), 5, 5.1, 7, 7.1, 8, 8.1, 9, 9.1, 11, 12.1, 12.3, 14
6 *Chile – Price Band System*	WT/DS207	Articles 2.1, 3.1, 3.2, 4.1(a), 4.1(b), 4.2(a), 4.2(b), 4.2(c), 5.1, 6, 7, 12
7 *Argentina – Preserved Peaches*	WT/DS238	Article 2.1, 3.1, 4.1(b), 4.2(a), 4.2(b), 5.1, and 12.2
8 *US – Steel Safeguards*	WT/DS248, WT/DS249, WT/DS251, WT/DS252, WT/DS253, WT/DS254, WT/DS258, WT/DS259	Article 2.1, 2.2, 3, 3.1, 4.2(a), 4.2(b), 4.1(c), 5.1, 5.2, 7.1, 8.1, 9.1, 12.1, 12.2, and 12.3

XVI. ANNEX

A. TEXT OF THE ANNEX

ANNEX
EXCEPTION REFERRED TO IN PARAGRAPH 2 OF ARTICLE 11

Members concerned	Product	Termination
EC/Japan	Passenger cars, off road vehicles, light commercial vehicles, light trucks (up to 5 tonnes), and the same vehicles in wholly knocked-down form (CKD sets).	31 December 1999

B. INTERPRETATION AND APPLICATION OF THE ANNEX

No jurisprudence or decision by a competent WTO body.

– Notification accompanied with the mark * is a "nil" notification.
– "None" means that no notification has been submitted.
– This annual report includes a period when Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia were not Member States of the European Communities (i.e. prior to May 2004), as well as a period following the accession of these countries to the European Communities. Therefore, these Members' separate notifications are listed herein. See document G/SG/N/1//EEC/1/Suppl.2 for updated information on the current status of laws and regulations of the above-mentioned countries.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Recognizing the growing importance of trade in services for the growth and development of the world economy;

Wishing to establish a multilateral framework of principles and rules for trade in services with a view to the expansion of such trade under conditions of transparency and progressive liberalization and as a means of promoting the economic growth of all trading partners and the development of developing countries;

Desiring the early achievement of progressively higher levels of liberalization of trade in services through successive rounds of multilateral negotiations aimed at promoting the interests of all participants on a mutually advantageous basis and at securing an overall balance of rights and obligations, while giving due respect to national policy objectives;

Recognizing the right of Members to regulate, and to introduce new regulations, on the supply of services within their territories in order to meet national policy objectives and, given asymmetries existing with respect to the degree of development of services regulations in different countries, the particular need of developing countries to exercise this right;

Desiring to facilitate the increasing participation of developing countries in trade in services and the expansion of their service exports including, *inter alia*, through the strengthening of their domestic services capacity and its efficiency and competitiveness;

Taking particular account of the serious difficulty of the least-developed countries in view of their special economic situation and their development, trade and financial needs;

Hereby *agree* as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

No jurisprudence or decision of a competent WTO body.

PART I
SCOPE AND DEFINITION

II. ARTICLE I

A. TEXT OF ARTICLE I

Article I
Scope and Definition

1. This Agreement applies to measures by Members affecting trade in services.

2. For the purposes of this Agreement, trade in services is defined as the supply of a service:

(a) from the territory of one Member into the territory of any other Member;

(b) in the territory of one Member to the service consumer of any other Member;

(c) by a service supplier of one Member, through commercial presence in the territory of any other Member;

(d) by a service supplier of one Member, through presence of natural persons of a Member in the territory of any other Member.

3. For the purposes of this Agreement:

(a) "measures by Members" means measures taken by:

(i) central, regional or local governments and authorities; and

(ii) non-governmental bodies in the exercise of powers delegated by central, regional or local governments or authorities;

In fulfilling its obligations and commitments under the Agreement, each Member shall take such reasonable measures as may be available to it to ensure their observance by regional and local governments and authorities and non-governmental bodies within its territory;

(b) "services" includes any service in any sector except services supplied in the exercise of governmental authority;

(c) "a service supplied in the exercise of governmental authority" means any service which is supplied neither on a commercial basis, nor in competition with one or more service suppliers.

B. INTERPRETATION AND APPLICATION OF ARTICLE I

1. Scope of GATS

(a) Measures relating to judicial and administrative assistance

1. With respect to measures relating to judicial and administrative assistance in the context of Article II of *GATS*, as referenced in paragraph 20 below, at its meeting of 1 March 1995, the Council for Trade in Services agreed to adopt the conclusion of the Sub-Committee on Services concerning measures relating to judicial and administrative assistance.[1] The adopted conclusion, *inter alia*, states that none of the provisions of the *GATS* would apply to such measures.[2]

(b) Measures relating to the entry and stay of natural persons

2. With respect to the basis for drawing the distinction between "temporary" and "permanent" residency in the context of *GATS*, see paragraph 150 below.

(c) Electronic commerce

3. At its meeting of 25 September 1998, the General Council adopted the Work Programme on Electronic Commerce, which mandated the Council for Trade in Services to examine and report on the treatment of electronic commerce in the *GATS* legal framework.[3]

2. Article I:1

(a) "measures affecting trade in services"

4. The Panel on *EC – Bananas III* defined the scope of application of the *GATS* in the following terms:

> "[N]o measures are excluded *a priori* from the scope of the GATS as defined by its provisions. The scope of the GATS encompasses any measure of a Member to the extent it affects the supply of a service regardless of whether such measure directly governs the supply of a service or whether it regulates other matters but nevertheless affects trade in services."[4]

5. Based on its interpretation of the scope of the *GATS* set out in paragraph 4 above, the Panel on *EC – Bananas III* concluded that there was "no legal basis for an *a priori* exclusion of measures within the EC banana

[1] S/C/M/1, paras. 14–15.
[2] S/C/1, para. 6.
[3] WT/GC/M/30, section 4. The adopted Work Programme can be found in WT/L/274. With respect to the 1999 Interim Report to the General Council, see S/C/M/34, Section A. With respect to the 1999 Progress Report, which discusses, *inter alia*, the issue of public telecommunications transport networks and services within the context of the Work Programme on Electronic Commerce, see S/L/74.
[4] Panel Report on *EC – Bananas III*, para. 7.285.

import licensing regime from the scope of the GATS".[5] The Appellate Body upheld this finding and held that no provision of the Agreement "suggest[s] a limited scope of application for the GATS":

> "In addressing this issue, we note that Article I:1 of the GATS provides that '[t]his Agreement applies to measures by Members affecting trade in services'. In our view, the use of the term 'affecting' reflects the intent of the drafters to give a broad reach to the GATS. The ordinary meaning of the word 'affecting' implies a measure that has 'an effect on', which indicates a broad scope of application. This interpretation is further reinforced by the conclusions of previous panels that the term 'affecting' in the context of Article III of the GATT is wider in scope than such terms as 'regulating' or 'governing'. . . . We also note that Article I:3(b) of the GATS provides that '"services" includes *any service* in *any sector* except services supplied in the exercise of governmental authority' (emphasis added), and that Article XXVIII(b) of the GATS provides that the '"supply of a service" includes the production, distribution, marketing, sale and delivery of a service'. There is nothing at all in these provisions to suggest a limited scope of application for the GATS. . . . For these reasons, we uphold the Panel's finding that there is no legal basis for an *a priori* exclusion of measures within the EC banana import licensing regime from the scope of the GATS."[6]

6. In *Canada – Autos*, the Panel reiterated the statement of the Panel on *EC – Bananas III* that Article I of the *GATS* does not *a priori* exclude any measure from the scope of application of the Agreement. The Panel on *Canada – Autos* then went on to state that a determination of whether the measures at issue in the case before it were measures "affecting trade in services" within the meaning of Article I of *GATS* "should be done on the basis of the determination of whether these measures constitute less favourable treatment for the services and service suppliers of some Members as compared to those of others (Article II) and/or for services and service suppliers of other Members as compared to domestic ones (Article XVII)".[7] The Appellate Body reversed this finding, holding that whether a measure "affects" trade in services must be assessed before any further consistency of this measure with other *GATS* provisions is considered:

> "[T]he fundamental structure and logic of Article I:1, in relation to the rest of the GATS, require that determination of whether a measure is, in fact, covered by the GATS must be made before the consistency of that measure with any substantive obligation of the GATS can be assessed.
>
> Article II:1 of the GATS states expressly that it applies only to 'any measure covered by this Agreement'. This explicit reference to the scope of the GATS confirms that the measure at issue must be found to be a measure 'affecting trade in services' within the meaning of Article I:1, and thus covered by the GATS, *before* any further examination of consistency with Article II can logically be made. We find, therefore, that the Panel should have inquired, as a threshold question, into whether the measure is within the scope of the GATS by examining whether the import duty exemption is a measure 'affecting trade in services' within the meaning of Article I. In failing to do so, the Panel erred in its interpretative approach.
>
> . . .
>
> [W]e believe that at least two key legal issues must be examined to determine whether a measure is one 'affecting trade in services': first, whether there is 'trade in services' in the sense of Article I:2; and, second, whether the measure in issue 'affects' such trade in services within the meaning of Article I:1."[8]

7. After rejecting the notion that the question whether a measure "affected" trade in services could be ascertained by examining whether such a measure violated Article II or Article XVII of *GATS*, the Appellate Body in *Canada – Autos* then indicated the criteria which it considered relevant for determining whether a measure "affected" trade in services:

> "[T]he Panel . . . never examined whether or how the import duty exemption affects *wholesale trade service suppliers in their capacity as service suppliers*. Rather, the Panel simply stated:
>
> > 'Like the measures at issue in the *EC – Bananas III* case, the import duty exemption granted only to *manufacturer beneficiaries* bears upon conditions of competition in the supply of distribution services, regardless of whether it directly governs or indirectly affects the supply of such services.'[9] (emphasis added)
>
> We do not consider this statement of the Panel to be a sufficient basis for a legal finding that the import duty exemption 'affects' wholesale trade services of motor vehicles *as services*, or wholesale trade service suppliers *in their capacity as service suppliers*. The Panel failed to analyze the evidence on the record relating to the provision of wholesale trade services of motor vehicles in the Canadian market. It also failed to articulate what it understood Article I:1 to require by the use of the term 'affecting'. Having interpreted Article I:1, the Panel should then have examined all the relevant facts, including *who* supplies wholesale trade services of motor vehicles through commercial presence in Canada, and *how*

[5] Panel Report on *EC – Bananas III*, para. 7.286.
[6] Appellate Body Report on *EC – Bananas III*, para. 220.
[7] Panel Report on *Canada – Autos*, para. 10.234.
[8] Appellate Body Report on *Canada – Autos*, paras. 151–152 and 155.
[9] (*footnote original*) Panel Report, para. 10.239.

such services are supplied. It is not enough to make assumptions. Finally, the Panel should have applied its interpretation of 'affecting trade in services' to the facts it should have found.

The European Communities and Japan may well be correct in their assertions that the availability of the import duty exemption to certain manufacturer beneficiaries of the United States established in Canada, and the corresponding unavailability of this exemption to manufacturer beneficiaries of Europe and of Japan established in Canada, has an effect on the operations in Canada of wholesale trade service suppliers of motor vehicles and, therefore, 'affects' those wholesale trade service suppliers in their capacity as service suppliers. However, the Panel did not examine this issue. The Panel merely asserted its conclusion, without explaining how or why it came to its conclusion. This is not good enough."[10]

3. Article I:2(a)

(a) Relevance of where the supplier operates, or is present

8. The Panel on *Mexico – Telecoms* found that "the services at issue, in which United States suppliers link their networks at the border with those of Mexican suppliers for termination within Mexico, without United States' suppliers operating, or being present in some way, in Mexico, are services which are supplied cross-border within the meaning of Article I:2(a) of the GATS".[11] In examining Article I:2(a), the Panel found that this provision does not require that the service supplier must itself operate, or be present, in the territory into which the service is supplied:

"Subparagraph (a) describes what is referred to as 'cross-border', or 'mode 1', supply of trade in services. The ordinary meaning of the words of this provision indicate that the *service* is supplied from the territory of one Member into the territory of another Member. Subparagraph (a) is silent as regards the *supplier* of the service. The words of this provision do not address the service supplier or specify where the service supplier must operate, or be present in some way, much less imply any degree of presence of the supplier in the territory into which the service is supplied.

If we look at the wording of the other modes of supply, we note that the silence in subparagraph (a) as regards the presence of the supplier of the service is in marked contrast to the modes of supply described in subparagraphs (c) ('commercial presence') and (d) ('presence of natural persons'). In both cases, the presence of the service supplier within the territory where the service is supplied is specifically mentioned. The context provided by subparagraphs (c) and (d) therefore suggests that, where the presence of the service supplier was required to define a particular mode of supply, the drafters of the GATS expressed this clearly."[12]

(b) Relevance of ownership and control of the infrastructure used to supply the service

9. The Panel on *Mexico – Telecoms*, in examining the definition of basic telecommunications services contained in the GATS, found that the definition does not imply that the supplier of such services must itself own or control the entire network infrastructure over which the cross-border service is supplied:

"According to the definition, basic telecommunications services are services supplied 'between two or more points'. The definition nowhere indicates that a *single* supplier must undertake the transmission between the 'points'. The words 'between two or more points' suggest, in fact, the contrary. Transmission to the various 'points' requested by a customer requires ownership of or access to an expansive transmission infrastructure. It would be unreasonable to assume that the definition of telecommunications services applies only where a telecommunications supplier itself owns or controls a complete global infrastructure allowing it to reach every potential 'point' requested by its customers. Had WTO Members intended this to be the case, they surely would have made it explicit in the definition."[13]

10. The Panel on *Mexico – Telecoms* found further support for this view by examining the meaning of "public long-distance voice telephone services", contained in the UN 1991 Provisional Central Product Classification, and referenced in the GATS Sectoral List (W/120) used by Mexico and many other Members in scheduling their telecommunications commitments:

"This definition makes clear that the service of long-distance telephony consists of giving a customer access to both 'the supplier's and connecting operator's entire telephone network' (emphasis added). The definition of voice telephony services thus anticipates interworking of both operating networks in order for the service to be performed. No element of the definition implies or requires 'end-to-end' service by one and the same operator. Moreover, when more than one operator is involved, the service supplied to customers includes access to the 'entire networks' of both operators. The service supplied is not therefore the simple transmission of a voice message 'up to' a connecting operator's network; rather, the service is defined as spanning both operators' networks. It therefore follows that supply of the service involves call completion spanning both operators' networks."[14]

11. The Panel on *Mexico – Telecoms* specified that the cross-border supply of telecommunications services

[10] Appellate Body Report on *Canada – Autos*, paras. 164–166.
[11] Panel Report on *Mexico – Telecoms*, para. 7.45.
[12] Panel Report on *Mexico – Telecoms*, paras. 7.30–7.31.
[13] Panel Report on *Mexico – Telecoms*, para. 7.34.
[14] Panel Report on *Mexico – Telecoms*, para. 7.36.

could take place even if elements of the service were subcontracted or carried out with assets owned by another firm:

> "More generally, a supplier of services under the GATS is no less a supplier solely because elements of the service are subcontracted to another firm, or are carried out with assets owned by another firm. What counts is the service that the supplier offers and has agreed to supply to a customer. In the case of a basic telecommunications service, whether domestic or international, or supplied cross-border or through commercial presence, the supplier offers its customer the service of completing the customer's communications. Having done so, the supplier is responsible for making any necessary subsidiary arrangements to ensure that the communications are in fact completed. The customer typically pays its supplier the price of the end-to-end service, regardless of whether the supplier contracts with, or uses the assets of, another firm to supply the service."[15]

(c) Relevance of degree of interaction between different operators

12. Referring again to the definition of "public long-distance voice telephone services" in the UN 1991 Provision Central Product Classification, the Panel on *Mexico – Telecoms* stated that the reference in this definition to services "necessary to establish and maintain communications" suggested a high degree of interaction between operators in the cross-border supply of a telecommunications service:

> "We observe that basic telecommunications services supplied between Members do require, during the delivery of the service, a high degree of interaction between each other's networks, since the service typically involves a continuous, rapid and often two-way flow of intangible customer and operator data. The interaction results in a seamless service between the originating and terminating segments, which suggests that the service be considered as a single, cross-border service."[16]

(d) Relevance of supply by means of "linking" to another operator

13. In arriving at the conclusion discussed in paragraph 8 above, the Panel on *Mexico – Telecoms* considered Mexico's claim that the supplier itself must transmit the customer data from one Member to another Member:

> "If linking with another operator implied that the originating operator were no longer 'supplying' the service, an absurd consequence would result. Not only would telecommunications services delivered in this manner not be 'supplied' cross-border in the sense of Article I:2(a), they would also not be 'supplied' under any of the other modes of supply under the GATS. Nearly all telecommunications services currently supplied across borders would then fall outside the scope of the GATS. Present and future liberalization of this form of international telecommunications trade would not be possible within the WTO, without a new or amended treaty. Such an interpretation would be inconsistent with the fact that the GATS 'applies to . . . trade in services' (Article I:1), and that 'trade in services' is defined comprehensively as the supply of services through four modes of supply. The GATS creates a wide-ranging agreement covering all services and modes of supply, in order to allow progressive liberalization of trade in services between Members. This suggests that the supply of basic telecommunications services – the 'transmission of customer supplied information' – must include supply by means which involve or require linking to another operator to complete the service."[17]

4. Article I:2(c)

(a) Supply by a firm commercially present in one Member into the territory of another Member

14. The Panel on *Mexico – Telecoms* examined whether international services supplied by a firm in Mexico fell within the definition of services supplied through commercial presence. It found that there was no territorial requirement contained in paragraph 2(c) other than a commercial presence in the territory of any other Member:

> "The definition of services supplied through a commercial presence makes explicit the location of the service supplier. It provides that a service supplier has a commercial presence – any type of business or professional establishment – *in the territory* of any other Member. The definition is silent with respect to any other territorial requirement (as in cross-border supply under mode 1) or nationality of the service consumer (as in consumption abroad under mode 2). Supply of a service through commercial presence would therefore not exclude a service that originates in the territory in which a commercial presence is established (such as Mexico), but is delivered into the territory of any other Member (such as the United States).[18]

5. Relationship with the GATT 1994

15. In *Canada – Periodicals*, the Panel, in a finding subsequently not addressed by the Appellate Body, rejected the argument by Canada that Article III of the *GATT 1994* does not apply to a measure which is within the purview of the *GATS*:

> "Canada's argument is essentially that since Canada has made no specific commitments for advertising services

[15] Panel Report on *Mexico – Telecoms*, para. 7.42.
[16] Panel Report on *Mexico – Telecoms*, para. 7.38.
[17] Panel Report on *Mexico – Telecoms*, para. 7.41.
[18] Panel Report on *Mexico – Telecoms*, para. 7.375.

under GATS, the United States should not be allowed to 'obtain benefits under a covered agreement that have been expressly precluded under another covered agreement'. . . . Put another way, Canada seems to argue that if a Member has not undertaken market-access commitments in a specific service sector, that non-commitment should preclude all the obligations or commitments undertaken in the goods sector to the extent that there is an overlap between the non-commitment in services and the obligations or commitments in the goods sector. Canada claims that because of the existence of the two instruments – GATT 1994 and GATS – both of which may apply to a given measure, 'it is necessary to interpret the scope of application of each such as to avoid any overlap'.

We are not fully convinced by Canada's characterization of the Excise Tax as a measure intended to regulate trade in advertising services, in view of the fact that there is no comparable regulation on advertisements through other media and the fact that the tax is imposed on a 'per issue' basis. However, assuming that Canada intended to carve out Part V.1 of the Excise Tax Act from the coverage of its GATS commitments by not inscribing advertising services in its Schedule. . ., does that exonerate Canada from the Panel's scrutiny regarding the alleged violation of its obligations and commitments under GATT 1994?

In order to answer this question, we need to examine the structure of the WTO Agreement including its annexes. Article II:2 of the WTO Agreement is the relevant provision, which reads as follows:

> 'The agreements and associated legal instruments included in Annexes 1, 2 and 3 . . . are integral parts of this Agreement, binding on all Members' . . . ."[19]

16. Recalling the principle of effective treaty interpretation, the Panel then found that "obligations under *GATT 1994* and *GATS* can co-exist and that one does not override the other":

"According to Article 31(1) of the 1969 Vienna Convention on the Law of Treaties ('Vienna Convention'), a treaty must be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose. Furthermore, as the Appellate Body has repeatedly pointed out, 'one of the corollaries of the "general rule of interpretation" in the Vienna Convention is that interpretation must give meaning and effect to all the terms of the treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility.'. . .[20] The ordinary meaning of the texts of GATT 1994 and GATS as well as Article II:2 of the WTO Agreement, taken together, indicates that obligations under GATT 1994 and GATS can co-exist and that one does not override the other. If the consequences suggested by Canada were intended, there would have been provisions similar to Article XVI:3 of the WTO Agreement or the General Interpretative Note to Annex 1A in order to establish hierarchical order between GATT 1994 and GATS. The absence of such provisions between the two instruments implies that GATT 1994 and GATS are standing on the same plane in the WTO Agreement, without any hierarchical order between the two."[21]

17. The Panel on *Canada – Periodicals* finally rejected the notion that overlaps between the subject-matter of the *GATT 1994* and *GATS* should be avoided. Rather, it noted that certain types of services have long been associated with GATT disciplines, as evidenced, *inter alia*, by certain GATT Panel Reports:

"In this connection, Canada also argues that overlaps between GATT 1994 and GATS should be avoided. . . . We disagree. Overlaps between the subject matter of disciplines in GATT 1994 and in GATS are inevitable, and will further increase with the progress of technology and the globalization of economic activities. We do not consider that such overlaps will undermine the coherence of the WTO system. In fact, certain types of services such as transportation and distribution are recognized as a subject-matter of disciplines under Article III:4 of GATT 1994. It is also noteworthy in this respect that advertising services have long been associated with the disciplines under GATT Article III. As early as 1970, the Working Party on Border Tax Adjustment made the following observation:

'The Working Party noted that there was a divergence of views with regard to the eligibility for adjustment of certain categories of tax and that these could be subdivided into

> (a) 'Taxes occultes' which the OECD defined as consumption taxes on capital equipment, auxiliary materials and *services* used in the transportation and production of other taxable goods. Taxes on *advertising*, energy, machinery and transport were among the more important taxes which might be involved. . . . ;
>
> (b) Certain other taxes, . . .'. . .[22]

We also note that there are several adopted panel reports that examined the issue of services in the context of GATT Article III. For instance, the panel on *Canada – Import, Distribution and Sale of Certain Alcoholic Drinks by Provincial Marketing Agencies* addressed the issues of access to points of sale and restrictions on private

[19] Panel Report on *Canada – Periodicals*, paras. 5.14–5.16.
[20] (*footnote original*) Appellate Body Report on *United States – Standards for Reformulated and Conventional Gasoline*, adopted on 20 May 1996, WT/DS2/AB/R, p. 23. Also cited in the Appellate Body Report on *Japan – Taxes on Alcoholic Beverages*, p. 12.
[21] Panel Report on *Canada – Periodicals*, para. 5.17.
[22] (*footnote original*) "Border Tax Adjustments", Report of the Working Party adopted on 2 December 1970 (L/3464), BISD 18S/97, para. 15 (emphasis added).

delivery of beer. . . . The panel on *United States – Measures Affecting Alcoholic and Malt Beverages* also dealt with the issues of distribution of wine and beer. . . . More to the point, the panel on *Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes* specifically addressed the question of advertising . . .

In any event, since Canada admits that in the present case there is no conflict between its obligations under GATS and under GATT 1994. . ., there is no reason why both GATT and GATS obligations should not apply to the Excise Tax Act. Thus, we conclude that Article III of GATT 1994 is applicable to Part V.1 of the Excise Tax Act."[23]

18. On appeal, the Appellate Body on *Canada – Periodicals* did not find it necessary "to pronounce on the issue of whether there can be potential overlaps between the GATT 1994 and the GATS, as both participants agreed that it is not relevant in this appeal". The Appellate Body then held that the Canadian measure at issue, as an excise tax on certain periodicals, clearly applied to goods. The Appellate Body subsequently examined the measure under Article III:2 of the *GATT 1994*.[24]

19. While in *Canada – Periodicals* the Appellate Body did not find it necessary to pronounce on the question whether there could be overlaps between the scope of application of the *GATT 1994* and *GATS*, in *EC – Bananas III* the Appellate Body confirmed the approach of the Panel on *Canada – Periodicals*. The Appellate Body rejected the notion that the *GATT 1994* and *GATS* are "mutually exclusive agreements" and held that there was a "category of measures that could be found to fall within the scope of both the GATT 1994 and the GATS":

"The second issue is whether the GATS and the GATT 1994 are mutually exclusive agreements. The GATS was not intended to deal with the same subject matter as the GATT 1994. The GATS was intended to deal with a subject matter not covered by the GATT 1994, that is, with trade in services. Thus, the GATS applies to the supply of services. It provides, *inter alia*, for both MFN treatment and national treatment for services and service suppliers. Given the respective scope of application of the two agreements, they may or may not overlap, depending on the nature of the measures at issue. Certain measures could be found to fall exclusively within the scope of the GATT 1994, when they affect trade in goods as goods. Certain measures could be found to fall exclusively within the scope of the GATS, when they affect the supply of services as services. There is yet a third category of measures that could be found to fall within the scope of both the GATT 1994 and the GATS. These are measures that involve a service relating to a particular good or a service supplied in conjunction with a particular good. In all such cases in this third category, the measure in question could be scrutinized under both the GATT 1994 and the GATS. However, while the same measure could be scrutinized under both agreements, the specific aspects of that measure examined under each agreement could be different. Under the GATT 1994, the focus is on how the measure affects the goods involved. Under the GATS, the focus is on how the measure affects the supply of the service or the service suppliers involved. Whether a certain measure affecting the supply of a service related to a particular good is scrutinized under the GATT 1994 or the GATS, or both, is a matter that can only be determined on a case-by-case basis. This was also our conclusion in the Appellate Body Report in *Canada – Periodicals*."[25]

PART II
GENERAL OBLIGATIONS AND DISCIPLINES

III. ARTICLE II

A. TEXT OF ARTICLE II

Article II
Most-Favoured-Nation Treatment

1. With respect to any measure covered by this Agreement, each Member shall accord immediately and unconditionally to services and service suppliers of any other Member treatment no less favourable than that it accords to like services and service suppliers of any other country.

2. A Member may maintain a measure inconsistent with paragraph 1 provided that such a measure is listed in, and meets the conditions of, the Annex on Article II Exemptions.

3. The provisions of this Agreement shall not be so construed as to prevent any Member from conferring or according advantages to adjacent countries in order to facilitate exchanges limited to contiguous frontier zones of services that are both locally produced and consumed.

B. INTERPRETATION AND APPLICATION OF ARTICLE II

1. Scope

(a) Measures relating to judicial and administrative assistance

20. At its meeting of 1 March 1995, the Council for Trade in Services agreed to adopt the following conclusion of the Sub-Committee on Services concerning measures relating to judicial and administrative assistance:[26]

"At the end of the Uruguay Round it had been agreed by participants that Article II of the GATS (MFN) would

[23] Panel Report on *Canada – Periodicals*, paras. 5.18–5.19.
[24] Appellate Body Report on *Canada – Periodicals*, pp. 21–22.
[25] Appellate Body Report on *EC – Bananas III*, para. 221.
[26] S/C/M/1, para. 14.

not apply to measures relating to judicial and administrative assistance. This agreement was reflected in document MTN.GNS/W/177/Rev.1/Add.1 which states:

> 'It is agreed by participants that the provisions of Article II (Most-Favoured National Treatment) do not apply to measures relating to judicial and administrative assistance. In the light of this agreement, the former footnote to Article II has been deleted.'

The agreement was based on the view that discrimination between service suppliers of different Members arising from judicial and administrative assistance measures, apart from what is already stipulated by the provisions of the GATS, would not have any significant effect on conditions of competition between service suppliers. In the subsequent consultations it was agreed that the same logic could be applied to the whole of the GATS and that therefore none of the provisions of the GATS would apply to such measures."[27]

(b) Electronic commerce

21. With respect to the application of Article III to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[28]

2. Interpretation

22. In *Canada – Autos*, the Appellate Body explained how a Panel should proceed when examining the consistency of a measure with Article II:1 of the *GATS*. After determining whether the measure under examination affects trade in services, the examiner should make "factual findings as to treatment of wholesale trade services and service suppliers of motor vehicles of different Members commercially present" and, as the last step, apply Article II:1 to these facts:

> "The wording of this provision suggests that analysis of the consistency of a measure with Article II:1 should proceed in several steps. First, as we have seen, a threshold determination must be made under Article I:1 that the measure is covered by the GATS. This determination requires that there be 'trade in services' in one of the four modes of supply, and that there be also a measure which 'affects' this trade in services. We have already held that the Panel failed to undertake this analysis.
>
> If the threshold determination is that the measure is covered by the GATS, appraisal of the consistency of the measure with the requirements of Article II:1 is the next step. The text of Article II:1 requires, in essence, that treatment by one Member of 'services and service suppliers' of any other Member be compared with treatment of 'like' services and service suppliers of 'any other country'. Based on these core legal elements, the Panel should first have rendered its interpretation of Article II:1. It should then have made factual findings as to treatment of wholesale trade services and service suppliers of motor vehicles of different Members commercially present in Canada. Finally, the Panel should have applied its interpretation of Article II:1 to the facts as it found them."[29]

23. The Appellate Body on *Canada – Autos* subsequently disapproved of the Panel's application of Article II of *GATS* to the facts in the case before it. Specifically, the Appellate Body objected to what it considered to be the Panel's assumption that the application of an import duty exemption to manufacturers automatically affected "competition among wholesalers in their capacity as service suppliers":

> "Clearly, here the Panel is confusing the application of the import duty exemption to manufacturers with its possible effect on wholesalers. In our view, the Panel has conducted a 'goods' analysis of this measure, and has simply extrapolated its analysis of how the import duty exemption affects manufacturers to wholesale trade service suppliers of motor vehicles. The Panel surmised, without analysing the effect of the measure on wholesalers as service suppliers, that the import duty exemption, granted to a limited number of manufacturers, ipso facto affects conditions of competition among wholesalers in their capacity as service suppliers. As we stated earlier in respect of whether the measure at issue 'affects trade in services', the Panel failed to demonstrate how the import duty exemption granted to certain manufacturers, but not to other manufacturers, affects the supply of wholesale trade services and the suppliers of wholesale trade services of motor vehicles. In reaching its conclusions under Article II:1 of the GATS, the Panel has neither assessed the relevant facts – we see no analysis of any evidence relating to the supply of wholesale trade services of motor vehicles – nor has it interpreted Article II of the GATS and applied that interpretation to the facts it found."[30]

3. Article II:1

(a) "no less favourable treatment"

24. In *EC – Bananas III*, the European Communities argued that Article II of the *GATS* did not cover de facto discrimination; the European Communities claimed that if the drafters of the *GATS* had wished to make the "modification of competitive conditions" requirement an integral part of the "no less favourable treatment" test under the most-favoured-nation clause, they would have done so explicitly. The Panel rejected this argument, noting that Article XVII "is meant to provide for no less favourable conditions of competition regardless

[27] S/C/1, para. 6.
[28] S/L/74, para. 9.
[29] Appellate Body Report on *Canada – Autos*, paras. 170–171.
[30] Appellate Body Report on *Canada – Autos*, para. 181.

of whether that is achieved through the application of formally identical or formally different measures ... The absence of similar language in Article II is not, in our view, a justification for giving a different ordinary meaning in terms of Article 31(1) of the Vienna Convention to the words 'treatment no less favourable', which are identical in both Articles II:1 and XVII:1."[31] The Panel also opined that "if the standard of 'no less favourable treatment' in Article II were to be interpreted narrowly to require only formally identical treatment, that could lead in many situations to the frustration of the objective behind Article II which is to prohibit discrimination between like services and service suppliers of other Members".[32] The Appellate Body did not agree with this reasoning of the Panel, but reached the same conclusion as regards the applicability of Article II of *GATS* to de facto discrimination:

> "We find the Panel's reasoning on this issue to be less than fully satisfactory. The Panel interpreted Article II of the GATS in the light of panel reports interpreting the national treatment obligation of Article III of the GATT. The Panel also referred to Article XVII of the GATS, which is also a national treatment obligation. But Article II of the GATS relates to MFN treatment, not to national treatment. Therefore, provisions elsewhere in the GATS relating to national treatment obligations, and previous GATT practice relating to the interpretation of the national treatment obligation of Article III of the GATT 1994 are not necessarily relevant to the interpretation of Article II of the GATS. The Panel would have been on safer ground had it compared the MFN obligation in Article II of the GATS with the MFN and MFN-type obligations in the GATT 1994.
>
> Articles I and II of the GATT 1994 have been applied, in past practice, to measures involving *de facto* discrimination. . . .
>
> The GATS negotiators chose to use different language in Article II and Article XVII of the GATS in expressing the obligation to provide 'treatment no less favourable'. The question naturally arises: if the GATS negotiators intended that 'treatment no less favourable' should have exactly the same meaning in Articles II and XVII of the GATS, why did they not repeat paragraphs 2 and 3 of Article XVII in Article II? But that is not the question here. The question here is the meaning of 'treatment no less favourable' with respect to the MFN obligation in Article II of the GATS. There is more than one way of writing a *de facto* non-discrimination provision. Article XVII of the GATS is merely one of many provisions in the *WTO Agreement* that require the obligation of providing 'treatment no less favourable'. The possibility that the two Articles may not have exactly the same meaning does *not* imply that the intention of the drafters of the GATS was that a *de jure*, or formal, standard should apply in Article II of the GATS. If that were the intention, why does Article II not say as much? The obligation imposed by Article II is unqualified. The ordinary meaning of this provision does not exclude *de facto* discrimination. Moreover, if Article II was not applicable to *de facto* discrimination, it would not be difficult – and, indeed, it would be a good deal easier in the case of trade in services, than in the case of trade in goods – to devise discriminatory measures aimed at circumventing the basic purpose of that Article.
>
> For these reasons, we conclude that 'treatment no less favourable' in Article II:1 of the GATS should be interpreted to include *de facto*, as well as *de jure*, discrimination. We should make it clear that we do not limit our conclusion to this case. We have some difficulty in understanding why the Panel stated that its interpretation of Article II of the GATS applied '*in casu*'."[33]

25. In *Canada – Autos*, Canada argued that it was not possible to establish whether treatment no less favourable had been granted or not, due to vertical integration and exclusive distribution arrangements existing in the motor vehicle industry between manufacturers and wholesale trade service suppliers; Canada argued that these circumstances excluded any actual or potential competition at the wholesale trade level. The Panel found that these factual elements did not rule out the possibility of less favourable treatment:

> "We therefore *find* that vertical integration and exclusive distribution arrangements between manufacturers and wholesalers in the motor vehicle industry do not rule out the possibility that treatment less favourable may be granted to suppliers of wholesale trade services for motor vehicles. We also *find* that vertical integration and exclusive distribution arrangements do not preclude potential competition among wholesalers for the procurement of vehicles from manufacturers and actual inter-brand competition for sales to retailers."[34]

(b) "like services and service suppliers"

26. The Panel on *EC – Bananas III*, in a finding subsequently not reviewed by the Appellate Body, addressed the issue of likeness under Article II:

> "[I]n our view, the nature and the characteristics of wholesale transactions as such, as well as of each of the different subordinated services mentioned in the headnote to section 6 of the CPC, are 'like' when supplied in connection with wholesale services, irrespective of whether these services are supplied with respect to bananas of EC and traditional ACP origin, on the one hand, or with respect to bananas of third-country or non-traditional ACP origin, on the other. Indeed, it seems that each of the different service activities taken

[31] Panel Report on *EC – Bananas III*, para. 7.301.
[32] Panel Report on *EC – Bananas III*, para. 7.303.
[33] Appellate Body Report on *EC – Bananas III*, paras. 231–234.
[34] Panel Report on *Canada – Autos*, para. 10.254.

individually is virtually the same and can only be distinguished by referring to the origin of the bananas in respect of which the service activity is being performed. Similarly, in our view, to the extent that entities provide these like services, they are like service suppliers."[35]

27. The Panel on *Canada – Autos* reiterated this approach:

"We agree that to the extent that the service suppliers concerned supply the same services, they should be considered 'like' for the purpose of this case."[36]

(c) "aims-and-effects" test

28. In *EC – Bananas III*, the Appellate Body rejected the application of the so-called "aims-and-effects" test, which had been previously adopted by several GATT panels in interpreting GATT Article III, to the national treatment requirement contained in Article II or Article VII of *GATS*. See paragraph 76 below.

29. With respect to the "aims-and-effects" test under GATT Article III, see Chapter on the *GATT 1994*, Section IV.C.1(c).

4. Exemptions from Article II

(a) Annex on Article II Exemptions

30. See Section XXXIV.B.

(b) Exemptions in financial services

31. With respect to exemptions from Article II of *GATS* concerning financial services, see the Fifth Protocol to the *GATS*,[37] adopted by the Committee on Trade in Financial Services on 14 November 1997.[38]

(c) Exemptions in maritime transport services

32. With respect to this issue, see the Decision on Maritime Transport Services adopted by the Council for Trade in Services at its meeting of 28 June 1996, which suspends negotiations on maritime transport services; the Decision further states that such negotiations will resume with "the commencement of comprehensive negotiations on Services" and that Article II of *GATS* will enter into force with respect to "international shipping, auxiliary services and access to and use of port facilities" when these negotiations have been concluded.[39]

(d) Exemptions in basic telecommunications

33. With respect to this issue, see the Fourth Protocol to the *GATS*, adopted by the Council for Trade in Services at its meeting of 30 April 1996.[40]

IV. ARTICLE III

A. TEXT OF ARTICLE III

Article III
Transparency

1. Each Member shall publish promptly and, except in emergency situations, at the latest by the time of their entry into force, all relevant measures of general application which pertain to or affect the operation of this Agreement. International agreements pertaining to or affecting trade in services to which a Member is a signatory shall also be published.

2. Where publication as referred to in paragraph 1 is not practicable, such information shall be made otherwise publicly available.

3. Each Member shall promptly and at least annually inform the Council for Trade in Services of the introduction of any new, or any changes to existing, laws, regulations or administrative guidelines which significantly affect trade in services covered by its specific commitments under this Agreement.

4. Each Member shall respond promptly to all requests by any other Member for specific information on any of its measures of general application or international agreements within the meaning of paragraph 1. Each Member shall also establish one or more enquiry points to provide specific information to other Members, upon request, on all such matters as well as those subject to the notification requirement in paragraph 3. Such enquiry points shall be established within two years from the date of entry into force of the Agreement Establishing the WTO (referred to in this Agreement as the "WTO Agreement"). Appropriate flexibility with respect to the time-limit within which such enquiry points are to be established may be agreed upon for individual developing country Members. Enquiry points need not be depositories of laws and regulations.

5. Any Member may notify to the Council for Trade in Services any measure, taken by any other Member, which it considers affects the operation of this Agreement.[41]

[38] S/L/44.
[39] S/L/24, para. 4.
[40] S/L/19, para. 3.
[41] Paragraph 4 of the Annex on Telecommunications sets forth special provisions with regard to the application of Article III with respect to telecommunication services.

B. INTERPRETATION AND APPLICATION OF ARTICLE III

1. General

(a) Electronic commerce

34. With respect to the applicability of Article III to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[42]

(b) Accountancy services

35. With respect to transparency in domestic regulations in the field of accountancy services, see the Disciplines on Domestic Regulation in the Accountancy Sector, adopted by the Council for Trade in Services at its meeting of 14 December 1998.[43]

2. Article III:3

(a) Format for notifications

36. On 1 March 1995, the Council for Trade in Service approved the "Guidelines for Notifications under the General Agreement on Trade in Services".[44]

3. Article III:4

(a) Enquiry points

37. On 28 May 1996, the Council for Trade in Services adopted the "Decision on the Notification of the Establishment of Enquiry and Contact Points", which calls upon Members to notify the establishment of enquiry points pursuant to Paragraph 4 of Article III.[45]

V. ARTICLE III *BIS*

A. TEXT OF ARTICLE III *BIS*

Article III bis
Disclosure of Confidential Information

Nothing in this Agreement shall require any Member to provide confidential information, the disclosure of which would impede law enforcement, or otherwise be contrary to the public interest, or which would prejudice legitimate commercial interests of particular enterprises, public or private.

B. INTERPRETATION AND APPLICATION OF ARTICLE III BIS

No jurisprudence or decision of a competent WTO body.

VI. ARTICLE IV

A. TEXT OF ARTICLE IV

Article IV
Increasing Participation of Developing Countries

1. The increasing participation of developing country Members in world trade shall be facilitated through negotiated specific commitments, by different Members pursuant to Parts III and IV of this Agreement, relating to:

(a) the strengthening of their domestic services capacity and its efficiency and competitiveness, *inter alia* through access to technology on a commercial basis;

(b) the improvement of their access to distribution channels and information networks; and

(c) the liberalization of market access in sectors and modes of supply of export interest to them.

2. Developed country Members, and to the extent possible other Members, shall establish contact points within two years from the date of entry into force of the WTO Agreement to facilitate the access of developing country Members' service suppliers to information, related to their respective markets, concerning:

(a) commercial and technical aspects of the supply of services;

(b) registration, recognition and obtaining of professional qualifications; and

(c) the availability of services technology.

3. Special priority shall be given to the least-developed country Members in the implementation of paragraphs 1 and 2. Particular account shall be taken of the serious difficulty of the least-developed countries in accepting negotiated specific commitments in view of their special economic situation and their development, trade and financial needs.

B. INTERPRETATION AND APPLICATION OF ARTICLE IV

1. General

38. With respect to application of Article IV to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[46]

[46] S/L/74, para. 10.

2. Article IV:3

(a) Contact points

(i) General

39. With respect to the contact points provided for in paragraph 2, see the "Decision on the Notification of the Establishment of Enquiry and Contact Points" referenced in paragraph 37 above.

(ii) Accountancy services

40. With respect to contact points in accountancy services, see the Disciplines on Domestic Regulation in the Accountancy Sector, adopted by the Council for Trade in Services on 14 December 1998.[47]

VII. ARTICLE V

A. TEXT OF ARTICLE V

Article V
Economic Integration

1. This Agreement shall not prevent any of its Members from being a party to or entering into an agreement liberalizing trade in services between or among the parties to such an agreement, provided that such an agreement:

(a) has substantial sectoral coverage,[1] and

(*footnote original*) [1] This condition is understood in terms of number of sectors, volume of trade affected and modes of supply. In order to meet this condition, agreements should not provide for the a priori exclusion of any mode of supply.

(b) provides for the absence or elimination of substantially all discrimination, in the sense of Article XVII, between or among the parties, in the sectors covered under subparagraph (a), through:

(i) elimination of existing discriminatory measures, and/or

(ii) prohibition of new or more discriminatory measures,

either at the entry into force of that agreement or on the basis of a reasonable time-frame, except for measures permitted under Articles XI, XII, XIV and XIV bis.

2. In evaluating whether the conditions under paragraph 1(b) are met, consideration may be given to the relationship of the agreement to a wider process of economic integration or trade liberalization among the countries concerned.

3. (a) Where developing countries are parties to an agreement of the type referred to in paragraph 1, flexibility shall be provided for regarding the conditions set out in paragraph 1, particularly with reference to subparagraph (b) thereof, in accordance with the level of development of the countries concerned, both overall and in individual sectors and subsectors.

(b) Notwithstanding paragraph 6, in the case of an agreement of the type referred to in paragraph 1 involving only developing countries, more favourable treatment may be granted to juridical persons owned or controlled by natural persons of the parties to such an agreement.

4. Any agreement referred to in paragraph 1 shall be designed to facilitate trade between the parties to the agreement and shall not in respect of any Member outside the agreement raise the overall level of barriers to trade in services within the respective sectors or subsectors compared to the level applicable prior to such an agreement.

5. If, in the conclusion, enlargement or any significant modification of any agreement under paragraph 1, a Member intends to withdraw or modify a specific commitment inconsistently with the terms and conditions set out in its Schedule, it shall provide at least 90 days advance notice of such modification or withdrawal and the procedure set forth in paragraphs 2, 3 and 4 of Article XXI shall apply.

6. A service supplier of any other Member that is a juridical person constituted under the laws of a party to an agreement referred to in paragraph 1 shall be entitled to treatment granted under such agreement, provided that it engages in substantive business operations in the territory of the parties to such agreement.

7. (a) Members which are parties to any agreement referred to in paragraph 1 shall promptly notify any such agreement and any enlargement or any significant modification of that agreement to the Council for Trade in Services. They shall also make available to the Council such relevant information as may be requested by it. The Council may establish a working party to examine such an agreement or enlargement or modification of that agreement and to report to the Council on its consistency with this Article.

(b) Members which are parties to any agreement referred to in paragraph 1 which is implemented on the basis of a time-frame shall report periodically to the Council for Trade in Services on its implementation. The Council may establish a working party to examine such reports if it deems such a working party necessary.

(c) Based on the reports of the working parties referred to in subparagraphs (a) and (b), the Council may make recommendations to the parties as it deems appropriate.

8. A Member which is a party to any agreement referred to in paragraph 1 may not seek compensation

[47] S/L/64, paras. 3–4.

for trade benefits that may accrue to any other Member from such agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE V

1. Article V:1

41. The Panel on *Canada – Autos*, in a finding subsequently not addressed by the Appellate Body, considered that, with respect to an import duty exemption available to only a limited number of firms, Canada could not claim an exemption from its MFN obligation under Article II by invoking Article V:1. The Panel noted that the Canadian measures at issue did not grant more favourable treatment to *all* services and service suppliers of members of NAFTA:

> "Even assuming that the [Canadian measures at issue] could be brought within the scope of the services liberalization provisions of NAFTA, we note that the import duty exemption under the [measures at issue] is accorded to a small number of manufacturers/wholesalers of the United States to the exclusion of all other manufacturers/wholesalers of the United States and of Mexico. The [measures at issue], therefore, provide more favourable treatment to only some and not all services and service suppliers of Members of NAFTA, while, according to Article V:1(b), an economic integration agreement has to provide for 'the absence or elimination of substantially all discrimination, in the sense of Article XVII', in order to be eligible for the exemption from Article II of the GATS.
>
> Although the requirement of Article V:1(b) is to provide non-discrimination in the sense of Article XVII (National Treatment), we consider that once it is fulfilled it would also ensure non-discrimination between all service suppliers of other parties to the economic integration agreement. It is our view that the object and purpose of this provision is to eliminate all discrimination among services and service suppliers of parties to an economic integration agreement, including discrimination between suppliers of other parties to an economic integration agreement. In other words, it would be inconsistent with this provision if a party to an economic integration agreement were to extend more favourable treatment to service suppliers of one party than that which it extended to service suppliers of another party to that agreement.
>
> Moreover, it is worth recalling that Article V provides legal coverage for measures taken pursuant to economic integration agreements, which would otherwise be inconsistent with the MFN obligation in Article II. Paragraph 1 of Article V refers to 'an agreement liberalizing trade in services'. Such economic integration agreements typically aim at achieving higher levels of liberalization between or among their parties than that achieved among WTO Members. Article V:1 further prescribes a certain minimum level of liberalization which such agreements must attain in order to qualify for the exemption from the general MFN obligation of Article II. In this respect, the purpose of Article V is to allow for ambitious liberalization to take place at a regional level, while at the same time guarding against undermining the MFN obligation by engaging in minor preferential arrangements. However, in our view, it is not within the object and purpose of Article V to provide legal coverage for the extension of more favourable treatment only to a few service suppliers of parties to an economic integration agreement on a selective basis, even in situations where the maintenance of such measures may explicitly be provided for in the agreement itself."[48]

2. Article V:7

(a) Format for notifications

42. With respect to the format for notifications under paragraph 7, see the Guidelines for Notifications under the General Agreement on Trade in Services.[49]

(b) Reporting on the operation of regional trade agreements

43. On 20 February 1998, the Committee on RTAs made recommendations to the Council for Trade in Services with respect to the reporting on the operation of regional trade agreements to the Committee.[50] On 23 and 24 November 1998, the Council for Trade in Services took note of the recommended procedures, as general guidelines with respect to reports/information on regional trade agreements submitted to it.[51]

(c) Examination of specific agreements

(i) General

44. With respect to the procedures for the examination of specific agreements, see Section V.B.7(iv) of the Chapter on the *WTO Agreement.*

45. At its meeting on 29–30 March 2004, the Committee on RTAs agreed on a way forward regarding services agreements transmitted to it for examination: their factual examination would start once specific commitments had been agreed upon.[52]

---

[48] Panel Report on *Canada – Autos,* paras. 10.269–10.272.
[49] S/L/5.
[50] WT/REG/M/16, section B, in particular, paras. 4–39. The adopted recommendations can be found in WT/REG/5.
[51] S/C/M/31, section E. The procedures can be found in S/C/W/92.
[52] WT/REG/M/36, para.10. See the Committee's annual report (2004) for a list of such agreements: WT/REG/14 and WT/REG/14/Corr.1/Rev.1.

(ii) European Union

46. With respect to the enlargement of the European Union as a result of the accession of Austria, Finland and Sweden on 1 January 1995,[53] the Council for Trade in Services agreed that two issues, namely the Treaty of Accession of Austria, Finland and Sweden to the European Union and the Treaties establishing the European Union should be discussed separately. With respect to the first issue, the Council for Trade in Services on 30 March 1995 agreed to establish the Working Party on the Enlargement of the European Union.[54] With respect to the second issue, the Council for Trade in Services, at its meeting of 23 September 1996, decided to refer the Treaties establishing the European Union to the Committee on RTAs for examination pursuant to paragraph 7 of Article V of the *GATS*.[55]

(iii) Other agreements

47. Between 1 January 1995 and 31 December 2004, a total of 36 economic integration agreements had been notified to the Council for Trade in Services. The Council has adopted terms of reference for examination of all these agreements, to be carried out by the Committee on RTAs pursuant to paragraph 7(a) of Article V of the GATS. By 31 December 2004, 26 agreements were at various stages of examination in the Committee on RTAs; two agreements were yet to be considered by the Council for Trade in Services (see lists included in annex I below); and eight agreements had been terminated as a consequence of the enlargement of the European Union to include 10 new member States on 1 May 2004 (see Chapter on the *GATT 1994*, Article XXIX, and annex ii below):

C. ANNEX I

1. List of RTAs notified under Article V of the GATS for which factual examination has been completed

Agreement	Date	Terms of Reference for the Examination	Document series
Agreement Amending the Convention Establishing the European Free Trade Association	3-Dec-02	S/C/M/64	WT/REG154 S/C/N/207
Agreement between Japan and Singapore for a New-Age Economic Partnership	14-Nov-02	S/C/M/64	WT/REG140 S/C/N/206
Free Trade Agreement between Chile and Costa Rica	24-May-02	S/C/M/60	WT/REG136 S/C/N/191
Agreement between New Zealand and Singapore on a Closer Economic Partnership	19-Sep-01	S/C/M/56	WT/REG127 S/C/N/169
Free Trade Agreement between Chile and Mexico	14-Mar-01	S/C/M/52	WT/REG125 S/C/N/142
Free Trade Agreement between Canada and Chile	13-Nov-97	S/C/M/52	WT/REG38 S/C/N/65
European Economic Area	10-Oct-96	S/C/M/52	WT/REG138 S/C/N/28
Australia and New Zealand Closer Economic Relations Trade Agreement (Services)	22-Nov-95	S/C/M/14 S/C/M/52	WT/REG40 S/C/N/7, S/C/N/66
North American Free Trade Agreement	1-Mar-95	S/C/M/3	WT/REG4 S/C/N/4
Enlargement of the European Union – Accession of Austria, Finland and Sweden	20-Jan-95	S/C/M/6	WT/REG3 S/C/N/6

[53] Notified in WT/L/7.
[54] S/C/M/2, paras. 9–10.
[55] S/C/M/13, paras. 29–30.

2. List of RTAs notified under Article V of the GATS under factual examination

Agreement	Date	Terms of Reference for the Examination	Document series
Singapore-Australia Free Trade Agreement	1-Oct-03	S/C/M/69	WT/REG158 S/C/N/233
Caribbean Community Common Market	19-Feb-03	S/C/M/65	WT/REG155 S/C/N/229
Free Trade Agreement between the EFTA States and Singapore	24-Jan-03	S/C/M/65	WT/REG148 S/C/N/226
Free Trade Agreement between the United States and Jordan	18-Oct-02	S/C/M/63	WT/REG134 S/C/N/193
Free Trade Agreement between the European Communities and Mexico	21-Jun-02	S/C/M/61	WT/REG109 S/C/N/192
Free Trade Agreement between the EFTA States and Mexico	22-Aug-01	S/C/M/55	WT/REG126 S/C/N/166
Europe Agreement between the European Communities and Bulgaria	25-Apr-97	S/C/M/52	WT/REG1 S/C/N/55
Europe Agreement between the European Communities and Romania	9-Oct-96	S/C/M/52	WT/REG2 S/C/N/27
Treaties Establishing the European Union	10-Nov-95	S/C/M/14	WT/REG39 S/C/N/6

3. List of RTAs notified under Article V of the GATS for which factual examination has not yet commenced

Agreement	Date	Terms of Reference for the Examination	Document series
Enlargement of the European Union	28-Apr-04	S/C/M/73	WT/REG170 S/C/N/303
Free Trade Agreement between the Republic of Korea and Chile	19-Apr-04	S/C/M/73	WT/REG169 S/C/N/302
Free-Trade Agreement between Chile and El Salvador	17-Mar-04	S/C/M/72	WT/REG165 S/C/N/299
Closer Economic Partnership Arrangement between China and Macao, China	12-Jan-04	S/C/M/72	WT/REG163 S/C/N/265
Closer Economic Partnership Arrangement between China and Hong Kong, China	12-Jan-04	S/C/M/72	WT/REG162 S/C/N/264
Free Trade Agreement between the United States and Singapore	19-Dec-03	S/C/M/72	WT/REG161 S/C/N/263
Free Trade Agreement between the United States and Chile	19-Dec-03	S/C/M/72	WT/REG160 S/C/N/262

4. List of RTAs notified under Article V of the GATS which have not yet been considered by the Council for Trade in Services

Agreement	Date	Document series
Free Trade Agreement between the United States and Australia	23-Dec-04	WT/REG184 S/C/N/310
Free Trade Agreement between the EFTA States and Chile	10-Dec-04	WT/REG179 S/C/N/309

D. ANNEX II

1. RTAs notified under Article V of the GATS which have been terminated following the enlargement of the European Union on 1 May 2004

Agreement	Terms of Reference for the Examination	Notification of Termination	WTO Document series
Europe Agreement between the European Communities and Hungary	S/C/M/14	WT/REG/GEN/N/3	WT/REG50
Europe Agreement between the European Communities and Poland	S/C/M/14	WT/REG/GEN/N/3	WT/REG51
Europe Agreement between the European Communities and Slovak Republic	S/C/M/14	WT/REG/GEN/N/3	WT/REG52

European Communities – Lithuania Europe Agreement	S/C/M/60	WT/REG/GEN/N/3	WT/REG145
European Communities – Slovenia Europe Agreement	S/C/M/60	WT/REG/GEN/N/3	WT/REG146

VIII. ARTICLE V *BIS*

A. TEXT OF ARTICLE V *BIS*

Article V bis
Labour Markets Integration Agreements

This Agreement shall not prevent any of its Members from being a party to an agreement establishing full integration[2] of the labour markets between or among the parties to such an agreement, provided that such an agreement:

(*footnote original*) [2] Typically, such integration provides citizens of the parties concerned with a right of free entry to the employment markets of the parties and includes measures concerning conditions of pay, other conditions of employment and social benefits.

(a) exempts citizens of parties to the agreement from requirements concerning residency and work permits;

(b) is notified to the Council for Trade in Services.

B. INTERPRETATION AND APPLICATION OF ARTICLE V *BIS*

1. Article V *bis*:(b)

(a) Format for notifications

48. With respect to the format for notifications under subparagraph (b), see the Guidelines for Notifications under the General Agreement on Trade in Services.[56]

IX. ARTICLE VI

A. TEXT OF ARTICLE VI

Article VI
Domestic Regulation

1. In sectors where specific commitments are undertaken, each Member shall ensure that all measures of general application affecting trade in services are administered in a reasonable, objective and impartial manner.

2. (a) Each Member shall maintain or institute as soon as practicable judicial, arbitral or administrative tribunals or procedures which provide, at the request of an affected service supplier, for the prompt review of, and where justified, appropriate remedies for, administrative decisions affecting trade in services. Where such procedures are not independent of the agency entrusted with the administrative decision concerned, the Member shall ensure that the procedures in fact provide for an objective and impartial review.

(b) The provisions of subparagraph (a) shall not be construed to require a Member to institute such tribunals or procedures where this would be inconsistent with its constitutional structure or the nature of its legal system.

3. Where authorization is required for the supply of a service on which a specific commitment has been made, the competent authorities of a Member shall, within a reasonable period of time after the submission of an application considered complete under domestic laws and regulations, inform the applicant of the decision concerning the application. At the request of the applicant, the competent authorities of the Member shall

[56] S/L/5.

provide, without undue delay, information concerning the status of the application.

4. With a view to ensuring that measures relating to qualification requirements and procedures, technical standards and licensing requirements do not constitute unnecessary barriers to trade in services, the Council for Trade in Services shall, through appropriate bodies it may establish, develop any necessary disciplines. Such disciplines shall aim to ensure that such requirements are, *inter alia*:

(a) based on objective and transparent criteria, such as competence and the ability to supply the service;

(b) not more burdensome than necessary to ensure the quality of the service;

(c) in the case of licensing procedures, not in themselves a restriction on the supply of the service.

5. (a) In sectors in which a Member has undertaken specific commitments, pending the entry into force of disciplines developed in these sectors pursuant to paragraph 4, the Member shall not apply licensing and qualification requirements and technical standards that nullify or impair such specific commitments in a manner which:

(i) does not comply with the criteria outlined in subparagraphs 4(a), (b) or (c); and

(ii) could not reasonably have been expected of that Member at the time the specific commitments in those sectors were made.

(b) In determining whether a Member is in conformity with the obligation under paragraph 5(a), account shall be taken of international standards of relevant international organizations[3] applied by that Member.

(*footnote original*) [3] The term "relevant international organizations" refers to international bodies whose membership is open to the relevant bodies of at least all Members of the WTO.

6. In sectors where specific commitments regarding professional services are undertaken, each Member shall provide for adequate procedures to verify the competence of professionals of any other Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE VI

1. General

(a) Electronic commerce

49. With respect to application of Article VI to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[57]

2. Article V:4

(a) Professional services/domestic regulation

50. With respect to the Working Party on Professional Services and its successor, the Working Party on Domestic Regulation, see paragraphs 132–134 below.

(b) Disciplines in accountancy services

51. On 14 December 1998, with a view to ensuring that domestic regulations affecting trade in accountancy services met the requirements of Article VI:4, the Council for Trade in Services adopted the Disciplines on Domestic Regulation in the Accountancy Sector,[58] which had been recommended by the Working Party on Professional Services. These Disciplines contain, *inter alia*, the following provision under the heading "General Provisions":

> "Members shall ensure that measures not subject to scheduling under Articles XVI or XVII of the GATS, relating to licensing requirements and procedures, technical standards and qualification requirements and procedures, are not prepared, adopted or applied with a view to or with the effect of creating unnecessary barriers to trade in accountancy services. For this purpose, Members shall ensure that such measures are not more trade-restrictive than necessary to fulfil a legitimate objective. Legitimate objectives are, *inter alia*, the protection of consumers (which includes all users of accounting services and the public generally), the quality of the service, professional competence, and the integrity of the profession."[59]

(c) Relationship with Articles XVI and XVII

52. On 10 December 1998, the Working Party on Professional Services submitted a report to the Council for Trade in Services on the development of Disciplines on Domestic Regulation in the Accountancy Sector, including the informal note by the Chairman entitled "Discussion of Matters Relating to Articles XVI and XVII of the *GATS* in Connection with the Disciplines on Domestic Regulation in the Accountancy Sector".[60]

X. ARTICLE VII

A. TEXT OF ARTICLE VII

Article VII
Recognition

1. For the purposes of the fulfilment, in whole or in part, of its standards or criteria for the authorization,

[57] S/L/74, para. 11.
[58] S/C/M/32, section A. The adopted Disciplines can be found in S/L/64.
[59] S/WPPS/W/21, para. 2.
[60] S/WPPS/4.

licensing or certification of services suppliers, and subject to the requirements of paragraph 3, a Member may recognize the education or experience obtained, requirements met, or licences or certifications granted in a particular country. Such recognition, which may be achieved through harmonization or otherwise, may be based upon an agreement or arrangement with the country concerned or may be accorded autonomously.

2. A Member that is a party to an agreement or arrangement of the type referred to in paragraph 1, whether existing or future, shall afford adequate opportunity for other interested Members to negotiate their accession to such an agreement or arrangement or to negotiate comparable ones with it. Where a Member accords recognition autonomously, it shall afford adequate opportunity for any other Member to demonstrate that education, experience, licences, or certifications obtained or requirements met in that other Member's territory should be recognized.

3. A Member shall not accord recognition in a manner which would constitute a means of discrimination between countries in the application of its standards or criteria for the authorization, licensing or certification of services suppliers, or a disguised restriction on trade in services.

4. Each Member shall:

(a) within 12 months from the date on which the WTO Agreement takes effect for it, inform the Council for Trade in Services of its existing recognition measures and state whether such measures are based on agreements or arrangements of the type referred to in paragraph 1;

(b) promptly inform the Council for Trade in Services as far in advance as possible of the opening of negotiations on an agreement or arrangement of the type referred to in paragraph 1 in order to provide adequate opportunity to any other Member to indicate their interest in participating in the negotiations before they enter a substantive phase;

(c) promptly inform the Council for Trade in Services when it adopts new recognition measures or significantly modifies existing ones and state whether the measures are based on an agreement or arrangement of the type referred to in paragraph 1.

5. Wherever appropriate, recognition should be based on multilaterally agreed criteria. In appropriate cases, Members shall work in cooperation with relevant intergovernmental and non-governmental organizations towards the establishment and adoption of common international standards and criteria for recognition and common international standards for the practice of relevant services trades and professions.[61]

B. INTERPRETATION AND APPLICATION OF ARTICLE VII

1. General

53. With respect to application of Article VII to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[62]

2. Article VII:4

(a) Format for notifications

54. With respect to the format for notifications under paragraph 4, see the Guidelines for Notifications under the General Agreement on Trade in Services.[63]

3. Article VII:5

(a) Guidelines for Mutual Recognition Agreements or Arrangements in the Accountancy Sector

55. On 29 May 1997, the Council for Trade in Services approved the voluntary Guidelines for Mutual Recognition Agreements or Arrangements in the Accountancy Sector.[64]

XI. ARTICLE VIII

A. TEXT OF ARTICLE VIII

Article VIII
Monopolies and Exclusive Services Suppliers

1. Each Member shall ensure that any monopoly supplier of a service in its territory does not, in the supply of the monopoly service in the relevant market, act in a manner inconsistent with that Member's obligations under Article II and specific commitments.

2. Where a Member's monopoly supplier competes, either directly or through an affiliated company, in the supply of a service outside the scope of its monopoly rights and which is subject to that Member's specific commitments, the Member shall ensure that such a supplier does not abuse its monopoly position to act in its territory in a manner inconsistent with such commitments.

3. The Council for Trade in Services may, at the request of a Member which has a reason to believe that a monopoly supplier of a service of any other Member is acting in a manner inconsistent with paragraph 1 or 2,

[61] Paragraph 3 of the Annex on Financial Services relates to recognition in financial services.
[62] S/L/74, para. 11.
[63] S/L/5.
[64] S/C/M/19, paras. 4–7. The text of the approved Guidelines can be found in S/L/38.

request the Member establishing, maintaining or authorizing such supplier to provide specific information concerning the relevant operations.

4. If, after the date of entry into force of the WTO Agreement, a Member grants monopoly rights regarding the supply of a service covered by its specific commitments, that Member shall notify the Council for Trade in Services no later than three months before the intended implementation of the grant of monopoly rights and the provisions of paragraphs 2, 3 and 4 of Article XXI shall apply.

5. The provisions of this Article shall also apply to cases of exclusive service suppliers, where a Member, formally or in effect, (*a*) authorizes or establishes a small number of service suppliers and (*b*) substantially prevents competition among those suppliers in its territory.[65]

B. INTERPRETATION AND APPLICATION OF ARTICLE VIII

1. General

(a) Electronic commerce

56. With respect to application of Article VIII to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[66]

2. Article VIII:4

(a) Format for notifications

57. With respect to the format for notifications under paragraph 4, see the Guidelines for Notifications under the General Agreement on Trade in Services.[67]

XII. ARTICLE IX

A. TEXT OF ARTICLE IX

Article IX
Business Practices

1. Members recognize that certain business practices of service suppliers, other than those falling under Article VIII, may restrain competition and thereby restrict trade in services.

2. Each Member shall, at the request of any other Member, enter into consultations with a view to eliminating practices referred to in paragraph 1. The Member addressed shall accord full and sympathetic consideration to such a request and shall cooperate through the supply of publicly available non-confidential information of relevance to the matter in question. The Member addressed shall also provide other information available to the requesting Member, subject to its domestic law and to the conclusion of a satisfactory agreement concerning the safeguarding of its confidentiality by the requesting Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE IX

1. General

(a) Electronic commerce

58. With respect to application of Article IX to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[68]

XIII. ARTICLE X

A. TEXT OF ARTICLE X

Article X
Emergency Safeguard Measures

1. There shall be multilateral negotiations on the question of emergency safeguard measures based on the principle of non-discrimination. The results of such negotiations shall enter into effect on a date not later than three years from the date of entry into force of the WTO Agreement.

2. In the period before the entry into effect of the results of the negotiations referred to in paragraph 1, any Member may, notwithstanding the provisions of paragraph 1 of Article XXI, notify the Council on Trade in Services of its intention to modify or withdraw a specific commitment after a period of one year from the date on which the commitment enters into force; provided that the Member shows cause to the Council that the modification or withdrawal cannot await the lapse of the three-year period provided for in paragraph 1 of Article XXI.

3. The provisions of paragraph 2 shall cease to apply three years after the date of entry into force of the WTO Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE X

1. Working Party on GATS Rules

(a) Article X:1: first sentence

59. Negotiations on the question of emergency safeguard measures have been carried out in the Working Party on GATS Rules, established on 30 March 1995 by

[65] Paragraph 5 of the Annex on Telecommunications relates to the access to and use of public telecommunications transport networks and services.
[66] S/L/74, paras. 12–13.
[67] S/L/5.
[68] S/L/74, para. 12–13.

the Council for Trade in Services.[69] Members have postponed five times the deadline referred to in Article X:1. On 15 March 2004 in relation to the Fifth Decision on Negotiations on Emergency Safeguard Measures, Members decided the following:[70]

"1. The first sentence of paragraph 1 of Article X shall continue to apply.

2. Subject to the outcome of the mandate in paragraph 1, the results of such negotiations shall enter into effect on a date not later than the date of entry into force of the results of the current round of services negotiations.

3. Notwithstanding paragraph 3 of Article X, until the entry into effect of the results of the negotiations mandated under paragraph 1 of Article X, the provisions of paragraph 2 of that Article shall continue to apply."

(b) Identification, elaboration and consolidation of common elements for an emergency safeguard measure

60. On 14 March 2003, the Report by the Chairperson of the Working Party on GATS Rules[71] summarized the results of negotiations, noting that there had been some progress in the identification of issues relevant to the consideration and formulation of an emergency safeguard measure.

XIV. ARTICLE XI

A. TEXT OF ARTICLE XI

Article XI
Payments and Transfers

1. Except under the circumstances envisaged in Article XII, a Member shall not apply restrictions on international transfers and payments for current transactions relating to its specific commitments.

2. Nothing in this Agreement shall affect the rights and obligations of the members of the International Monetary Fund under the Articles of Agreement of the Fund, including the use of exchange actions which are in conformity with the Articles of Agreement, provided that a Member shall not impose restrictions on any capital transactions inconsistently with its specific commitments regarding such transactions, except under Article XII or at the request of the Fund.

B. INTERPRETATION AND APPLICATION OF ARTICLE XI

No jurisprudence or decision of a competent WTO body.

XV. ARTICLE XII

A. TEXT OF ARTICLE XII

Article XII
Restrictions to Safeguard the Balance-of-Payment

1. In the event of serious balance-of-payments and external financial difficulties or threat thereof, a Member may adopt or maintain restrictions on trade in services on which it has undertaken specific commitments, including on payments or transfers for transactions related to such commitments. It is recognized that particular pressures on the balance of payments of a Member in the process of economic development or economic transition may necessitate the use of restrictions to ensure, *inter alia,* the maintenance of a level of financial reserves adequate for the implementation of its programme of economic development or economic transition.

2. The restrictions referred to in paragraph 1:

(a) shall not discriminate among Members;

(b) shall be consistent with the Articles of Agreement of the International Monetary Fund;

(c) shall avoid unnecessary damage to the commercial, economic and financial interests of any other Member;

(d) shall not exceed those necessary to deal with the circumstances described in paragraph 1;

(e) shall be temporary and be phased out progressively as the situation specified in paragraph 1 improves.

3. In determining the incidence of such restrictions, Members may give priority to the supply of services which are more essential to their economic or development programmes. However, such restrictions shall not be adopted or maintained for the purpose of protecting a particular service sector.

4. Any restrictions adopted or maintained under paragraph 1, or any changes therein, shall be promptly notified to the General Council.

5. (a) Members applying the provisions of this Article shall consult promptly with the Committee on Balance-of-Payments Restrictions on restrictions adopted under this Article.

(b) The Ministerial Conference shall establish procedures[4] for periodic consultations with the objective of enabling such recommendations to be made to the Member concerned as it may deem appropriate.

(*footnote original*) [4] It is understood that the procedures under paragraph 5 shall be the same as the GATT 1994 procedures.

[69] S/C/M/2, paras. 23–25. See also the Reports of the Working Party on GATS Rules to the Council for Trade in Services: S/WPGR/1–6, S/WPGR/8, S/WPGR/12–13.
[70] S/L/159.
[71] S/WPGR/9.

(c) Such consultations shall assess the balance-of-payment situation of the Member concerned and the restrictions adopted or maintained under this Article, taking into account, *inter alia,* such factors as:

(i) the nature and extent of the balance-of-payments and the external financial difficulties;

(ii) the external economic and trading environment of the consulting Member;

(iii) alternative corrective measures which may be available.

(d) The consultations shall address the compliance of any restrictions with paragraph 2, in particular the progressive phase-out of restrictions in accordance with paragraph 2(e).

(e) In such consultations, all findings of statistical and other facts presented by the International Monetary Fund relating to foreign exchange, monetary reserves and balance of payments, shall be accepted and conclusions shall be based on the assessment by the Fund of the balance-of-payments and the external financial situation of the consulting Member.

6. If a Member which is not a member of the International Monetary Fund wishes to apply the provisions of this Article, the Ministerial Conference shall establish a review procedure and any other procedures necessary.

B. INTERPRETATION AND APPLICATION OF ARTICLE XII

1. Article XII:4

(a) Format for notifications

61. With respect to the format for notifications under paragraph 4, see the Guidelines for Notifications under the General Agreement on Trade in Services.[72]

XVI. ARTICLE XIII

A. TEXT OF ARTICLE XIII

Article XIII
Government Procurement

1. Articles II, XVI and XVII shall not apply to laws, regulations or requirements governing the procurement by governmental agencies of services purchased for governmental purposes and not with a view to commercial resale or with a view to use in the supply of services for commercial sale.

2. There shall be multilateral negotiations on government procurement in services under this Agreement within two years from the date of entry into force of the WTO Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIII

1. Working Party on GATS Rules

62. Negotiations on government procurement in services have been carried out in the Working Party on GATS Rules, established on 30 March 1995 by the Council for Trade in Services.[73] A Report by the Chairperson was circulated on 30 June 2003[74] taking account of the progress made in the negotiations.

XVII. ARTICLE XIV

A. TEXT OF ARTICLE XIV

Article XIV
General Exceptions

Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where like conditions prevail, or a disguised restriction on trade in services, nothing in this Agreement shall be construed to prevent the adoption or enforcement by any Member of measures:

(a) necessary to protect public morals or to maintain public order;[5]

(*footnote original*) [5] The public order exception may be invoked only where a genuine and sufficiently serious threat is posed to one of the fundamental interests of society.

(b) necessary to protect human, animal or plant life or health;

(c) necessary to secure compliance with laws or regulations which are not inconsistent with the provisions of this Agreement including those relating to:

(i) the prevention of deceptive and fraudulent practices or to deal with the effects of a default on services contracts;

(ii) the protection of the privacy of individuals in relation to the processing and dissemination of personal data and the protection of confidentiality of individual records and accounts;

(iii) safety;

(d) inconsistent with Article XVII, provided that the difference in treatment is aimed at ensuring the equitable or effective[6] imposition or collec-

[72] S/L/5.
[73] S/C/M/2, paras. 23–25. See also the Reports of the Working Party on GATS Rules to the Council for Trade in Services, S/WPGR/1–13.
[74] S/WPGR/11.

tion of direct taxes in respect of services or service suppliers of other Members;

(*footnote original*) [6] Measures that are aimed at ensuring the equitable or effective imposition or collection of direct taxes include measures taken by a Member under its taxation system which:

(i) apply to non-resident service suppliers in recognition of the fact that the tax obligation of non-residents is determined with respect to taxable items sourced or located in the Member's territory; or

(ii) apply to non-residents in order to ensure the imposition or collection of taxes in the Member's territory; or

(iii) apply to non-residents or residents in order to prevent the avoidance or evasion of taxes, including compliance measures; or

(iv) apply to consumers of services supplied in or from the territory of another Member in order to ensure the imposition or collection of taxes on such consumers derived from sources in the Member's territory; or

(v) distinguish service suppliers subject to tax on worldwide taxable items from other service suppliers, in recognition of the difference in the nature of the tax base between them; or

(vi) determine, allocate or apportion income, profit, gain, loss, deduction or credit of resident persons or branches, or between related persons or branches of the same person, in order to safeguard the Member's tax base.

Tax terms or concepts in paragraph (d) of Article XIV and in this footnote are determined according to tax definitions and concepts, or equivalent or similar definitions and concepts, under the domestic law of the Member taking the measure.

(e) inconsistent with Article II, provided that the difference in treatment is the result of an agreement on the avoidance of double taxation or provisions on the avoidance of double taxation in any other international agreement or arrangement by which the Member is bound.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIV

1. General

(a) Electronic commerce

63. With respect to application of Article XIV to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[75]

(b) Trade in services and the environment

64. On 1 March 1995, the Council for Trade in Services, pursuant to the Ministerial Decision on Trade in Services and the Environment, adopted the Decision on Trade in Services and the Environment.[76] The Decision stipulates, *inter alia*:

"In order to determine whether any modification of Article XIV of the Agreement is required to take account of such measures, [Ministers] request the Committee on Trade and Environment to examine and report, with recommendations if any, on the relationship between services trade and the environment including the issue of sustainable development. The Committee shall also examine the relevance of inter-governmental agreements on the environment and their relationship to the Agreement."[77]

XVIII. ARTICLE XIV *BIS*

A. TEXT OF ARTICLE XIV *BIS*

Article XIV bis
Security Exceptions

1. Nothing in this Agreement shall be construed:

(a) to require any Member to furnish any information, the disclosure of which it considers contrary to its essential security interests; or

(b) to prevent any Member from taking any action which it considers necessary for the protection of its essential security interests:

(i) relating to the supply of services as carried out directly or indirectly for the purpose of provisioning a military establishment;

(ii) relating to fissionable and fusionable materials or the materials from which they are derived;

(iii) taken in time of war or other emergency in international relations; or

(c) to prevent any Member from taking any action in pursuance of its obligations under the United Nations Charter for the maintenance of international peace and security.

2. The Council for Trade in Services shall be informed to the fullest extent possible of measures taken under paragraphs 1(b) and (c) and of their termination.

[75] S/L/74, para. 14.
[76] S/C/M/1. The adopted Decision can be found in S/L/4.

Article XV
Subsidies

1. Members recognize that, in certain circumstances, subsidies may have distortive effects on trade in services. Members shall enter into negotiations with a view to developing the necessary multilateral disciplines to avoid such trade-distortive effects.[7] The negotiations shall also address the appropriateness of countervailing procedures. Such negotiations shall recognize the role of subsidies in relation to the development programmes of developing countries and take into account the needs of Members, particularly developing country Members, for flexibility in this area. For the purpose of such negotiations, Members shall exchange information concerning all subsidies related to trade in services that they provide to their domestic service suppliers.

(*footnote original*) [7] A future work programme shall determine how, and in what time-frame, negotiations on such multilateral disciplines will be conducted.

2. Any Member which considers that it is adversely affected by a subsidy of another Member may request consultations with that Member on such matters. Such requests shall be accorded sympathetic consideration.

B. INTERPRETATION AND APPLICATION OF ARTICLE XV

1. Working Party on GATS Rules

(a) Report by the Chairperson

66. Negotiations on subsidies have been carried out in the Working Party on GATS Rules, established on 30 March 1995 by the Council for Trade in Services.[79] A Report by the Chairperson was circulated on 30 June 2003[80] summarizing the progress made in the negotiations.

(b) Checklist on subsidies

67. The Report[81] draws attention to a Checklist of Issues,[82] prepared by the Chairperson at the request of the Working Party, in order to help Members to address in a more systematic manner relevant questions under this agenda item. Members proceeded on the basis of the Checklist until July 2001, taking one item at each successive meeting. On 17 March 2003, the Chairperson circulated a revised version of the Checklist on Subsidies, as agreed by the Working Party at its February meeting.[83] The Chairperson invited Members to continue using the revised Checklist as a guide for identifying the content of possible disciplines.

PART III
SPECIFIC COMMITMENTS

XX. ARTICLE XVI

A. TEXT OF ARTICLE XVI

Article XVI
Market Access

1. With respect to market access through the modes of supply identified in Article I, each Member shall accord services and service suppliers of any other Member treatment no less favourable than that provided for under the terms, limitations and conditions agreed and specified in its Schedule.[8]

(*footnote original*) [8] If a Member undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in subparagraph 2(a) of Article I and if the cross-border movement of capital is an essential part of the service itself, that Member is thereby committed to allow such movement of capital. If a Member undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in subparagraph 2(c) of Article I, it is thereby committed to allow related transfers of capital into its territory.

2. In sectors where market-access commitments are undertaken, the measures which a Member shall not maintain or adopt either on the basis of a regional subdivision or on the basis of its entire territory, unless otherwise specified in its Schedule, are defined as:

(a) limitations on the number of service suppliers whether in the form of numerical quotas, monopolies, exclusive service suppliers or the requirements of an economic needs test;

(b) limitations on the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test;

---

[78] S/L/5.
[79] S/C/M/2, paras. 23–25. See also the Reports of the Working Party on GATS Rules to the Council for Trade in Services, S/WPGR/1–14.
[80] S/WPGR/10.
[81] S/WPGR/10.
[82] *Checklist on Subsidies*, Note from the Chairperson, Job No. 4519 (17 July 2000) and 4519/Rev.1 (6 October 2000).
[83] *Checklist on Subsidies*, Note from the Chairperson, JOB(03)/57.

(c) limitations on the total number of service operations or on the total quantity of service output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test;[9]

(*footnote original*) [9] Subparagraph 2(c) does not cover measures of a Member which limit inputs for the supply of services.

(d) limitations on the total number of natural persons that may be employed in a particular service sector or that a service supplier may employ and who are necessary for, and directly related to, the supply of a specific service in the form of numerical quotas or the requirement of an economic needs test;

(e) measures which restrict or require specific types of legal entity or joint venture through which a service supplier may supply a service; and

(f) limitations on the participation of foreign capital in terms of maximum percentage limit on foreign share-holding or the total value of individual or aggregate foreign investment.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVI

1. General

(a) Electronic commerce

68. With respect to application of Article XVI to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[84]

2. Article XVI:2

(a) "Temporal" qualifications

69. The Panel on *Mexico – Telecoms*, in examining a market access commitment made subject to a permit which would not be granted "until the corresponding regulations are issued", found:

> "The wording of the limitation, that 'permits for the establishment of a commercial agency [will not be issued] until the corresponding regulations are issued', does not specify that a numerical *quota* was to be imposed on the issuance of permits. Rather, the sentence seems to introduce a *temporal* qualification as to *when* establishment will be permitted – namely, after the issuance of the regulations.
>
> The six categories of measures in Article XVI:2 refer to the types of market access limitations that can be imposed on the supply of a service. However, none of the six categories relate to *temporal* limitations – such as dates for entry into force or for the implementation of commitments. This suggests that temporal limitations cannot constitute limitations on market access under Article XVI:2 of the GATS."[85]

70. The Panel on *Mexico – Telecoms* went on to say that the temporal qualifications in Mexico's scheduled commitments did not meet the requirements under Article XX:1(d) and (e), because a time frame was not specified.[86] In this regard, see Section XXIV.B.2 below.

(b) Routing requirement in telecommunications

71. The Panel on *Mexico – Telecoms*, observing that Mexico's GATS Schedule required that international telecommunications traffic "must be routed through the facilities" of a Mexican concessionaire, found that this "refers not to a requirement simply to use the equipment or physical assets of a Mexican concessionaire, but to supply the service on a facilities-basis, and not through capacity leased to the cross-border supplier".[87] With respect to the cross-border supply of telecommunications services, therefore:

> "This element of the routing restriction means, therefore, that supply of the service by means of one of the categories (over leased capacity) within Mexico is prohibited, and is subject to a zero quota in the sense of Article XVI:2(a), (b) and (c). We note that, while this limitation prohibits services that originate on a facilities basis from being terminated over leased circuits, it does not prevent these services from being supplied when they fall within the facilities-based category with respect to termination."[88]

72. Likewise, with respect to non-facilities-based services supplied cross-border, the Panel on *Mexico – Telecoms* found that the routing requirement "prohibits the cross-border supply upon termination within Mexico by means of the very 'leased capacity' which defines this type of service". The Panel therefore found:

> "While this element of the routing restriction does not expressly prohibit cross-border supply over leased capacity on the originating segment, it means that supply over leased capacity on the terminating segment is prohibited. Therefore, this element of the routing restriction prohibits end-to-end International Simple Resale (ISR), and effectively eliminates the possibility of any cross-border supply of services over leased capacity. In this sense, with respect to cross border services supplied by commercial agencies, the routing restriction falls within the scope of Article XVI:2(a), (b) and (c)."[89]

[85] Panel Report on *Mexico – Telecoms*, paras. 7.357–7.358.
[86] Panel Report on *Mexico – Telecoms*, para. 7.361.
[87] Panel Report on *Mexico – Telecoms*, para. 7.85.
[88] Panel Report on *Mexico – Telecoms*, para. 7.85.
[89] Panel Report on *Mexico – Telecoms*, para. 7.86.

3. Relationship with Article VI:4

73. With respect to the relationship between Articles VI:4 and XVI, see paragraph 52 above.

XXI. ARTICLE XVII

A. TEXT OF ARTICLE XVII

Article XVII
National Treatment

1. In the sectors inscribed in its Schedule, and subject to any conditions and qualifications set out therein, each Member shall accord to services and service suppliers of any other Member, in respect of all measures affecting the supply of services, treatment no less favourable than that it accords to its own like services and service suppliers.[10]

(*footnote original*) [10] Specific commitments assumed under this Article shall not be construed to require any Member to compensate for any inherent competitive disadvantages which result from the foreign character of the relevant services or service suppliers.

2. A Member may meet the requirement of paragraph 1 by according to services and service suppliers of any other Member, either formally identical treatment or formally different treatment to that it accords to its own like services and service suppliers.

3. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Member compared to like services or service suppliers of any other Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVII

1. General

(a) Electronic commerce

74. With respect to application of Article XVII to electronic commerce, see the Progress Report adopted by the Council for Trade in Services in the context of the Work Programme on Electronic Commerce on 19 July 1999.[90]

2. Likeness of services and service suppliers

75. The Panel on *EC – Bananas III*, in a finding not reviewed by the Appellate Body, addressed the issue of likeness under Article XVII:

> "[T]he nature and the characteristics of wholesale transactions as such, as well as of each of the different subordinated services mentioned in the headnote to section 6 of the CPC, are 'like' when supplied in connection with wholesale services, irrespective of whether these services are supplied with respect to bananas of EC and traditional ACP origin, on the one hand, or with respect to bananas of third-country or non-traditional ACP origin, on the other. Indeed, it seems that each of the different service activities taken individually is virtually the same and can only be distinguished by referring to the origin of the bananas in respect of which the service activity is being performed. Similarly, in our view, to the extent that entities provide these like services, they are like service suppliers."[91]

3. "aims-and-effects" test

76. In *EC – Bananas III*, the Appellate Body rejected the alleged relevance of the so-called "aims-and-effects" test in the context of Article XVII:

> "We see no specific authority either in Article II or in Article XVII of the GATS for the proposition that the 'aims and effects' of a measure are in any way relevant in determining whether that measure is inconsistent with those provisions. In the GATT context, the 'aims and effects' theory had its origins in the principle of Article III:1 that internal taxes or charges or other regulations 'should not be applied to imported or domestic products so as to afford protection to domestic production'. There is no comparable provision in the GATS. Furthermore, in our Report in *Japan – Alcoholic Beverages* the Appellate Body rejected the 'aims and effects' theory with respect to Article III:2 of the GATT 1994. The European Communities cites an unadopted panel report dealing with Article III of the GATT 1947, *United States – Taxes on Automobiles*, as authority for its proposition, despite our recent ruling."[92]

4. Footnote 10

77. In *Canada – Autos*, one of the measures at issue was the so-called Canada Value Added (CVA) requirement, according to which a tax duty exemption was granted, *inter alia*, only if the amount of Canadian value added in a manufacturer's local production of motor vehicles exceeded a certain level. One component of this CVA requirement was "maintenance and repair work executed in Canada on buildings, machinery and equipment used for production purposes". Canada argued that there can be no discrimination against these services supplied through modes 1 and 2, as cross-border supply and consumption abroad of these services are not technically feasible. Further, Canada pointed out that "the competitive disadvantage in the foreign provision of many services listed by the complainants as being affected by the CVA requirements is inherent in the foreign character of these services and, as stated in footnote 10 to Article XVII, should not be regarded as a national treatment restriction".[93] The Panel, in a finding

[90] S/L/74, paras. 17–18.
[91] Panel Report on *EC – Bananas III*, para. 7.322.
[92] Appellate Body Report on *EC – Bananas III*, para. 241.
[93] Panel Report on *Canada – Autos*, para. 10.298.

not reviewed by the Appellate Body, disagreed with Canada:

> "We consider that, although the supply of some repair and maintenance services on machinery and equipment through modes 1 and 2 might not be technically feasible, as they require the physical presence of the supplier, all other services listed by the complainants as being affected by the CVA requirements, including some consulting and advisory services relating to repair and maintenance of machinery, can be supplied through modes 1 and 2. We further consider that treatment less favourable granted to services supplied outside Canada cannot be justified on the basis of inherent disadvantages due to their foreign character. Footnote 10 to Article XVII only exempts Members from having to compensate for disadvantages due to foreign character in the application of the national treatment provision; it does not provide cover for actions which might modify the conditions of competition against services and service suppliers which are already disadvantaged due to their foreign character.
>
> We therefore find that lack of technical feasibility only excludes the supply of some repair and maintenance services on machinery and equipment through modes 1 and 2 from Canada's national treatment obligation. We also find that any eventual inherent disadvantages due to the foreign character of services supplied through modes 1 and 2 do not exempt Canada from its national treatment obligation with respect to the CVA requirements."[94]

5. Relationship with Article VI:4

78. With respect to the relationship with Article VI:4, see paragraph 52 above.

XXII. ARTICLE XVIII

A. TEXT OF ARTICLE XVIII

Article XVIII
Additional Commitments

Members may negotiate commitments with respect to measures affecting trade in services not subject to scheduling under Articles XVI or XVII, including those regarding qualifications, standards or licensing matters. Such commitments shall be inscribed in a Member's Schedule.

B. INTERPRETATION AND APPLICATION OF ARTICLE XVIII

1. "Reference Paper" on Basic Telecommunications

79. Special GATS negotiations in basic telecommunications, in which Members made commitments in market access and national treatment, were concluded in 1997. Many Members also took additional commitments under Article XVIII, by drawing upon the provisions of a negotiated "Reference Paper" containing pro-competitive regulatory principles applicable to the telecommunications sector. In the negotiations, Members could elect to insert any or all of the provisions of the model Reference Paper in their schedules, and could also insert modified versions of these provisions. The Reference Paper provisions contained in the schedules of individual Members may therefore differ from the model provisions below.

(a) Text of model Reference Paper

"Reference Paper

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

(a) are exclusively or predominantly provided by a single or limited number of suppliers; and

(b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

(a) control over essential facilities; or

(b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

(a) engaging in anti-competitive cross-subsidization;

(b) using information obtained from competitors with anti-competitive results; and

[94] Panel Report on *Canada – Autos*, paras. 10.300–10.301.

(c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided:

(a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;

(b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and

(c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

(a) at any time or

(b) after a reasonable period of time which has been made publicly known

to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

(a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and

(b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required."

(b) Section 1.1 – Anti-competitive practices

(i) Concept of "anti-competitive practices"

80. In examining the meaning of "anti-competitive practices", the Panel on *Mexico – Telecoms* stated that, on its own, the term is "broad in scope, suggesting actions that lessen rivalry or competition in the market".[95] Referring to the three examples ((a)–(c)) of such practices set out in Section 1.2 of the model Reference Paper, the Panel stated:

"All three examples show that 'anti-competitive practices' may also include action by a major supplier *with-*

[95] Panel Report on *Mexico – Telecoms*, para. 7.230.

out collusion or agreement with other suppliers. Cross-subsidization, misuse of competitor information, and withholding of relevant technical and commercial information are all practices which a major supplier can, and might normally, undertake on its own."[96]

81. The Panel on *Mexico – Telecoms* also supported its reasoning in paragraph 80 above by considering the concept of "major supplier":

"The use of the term 'major supplier' in Section 1, examined in the light of the definition of this term, suggests that the focus of 'anti-competitive practices' is on a supplier's 'ability to materially affect the terms of participation (having regard to price and supply)' – in other words, on monopolization or the abuse of a dominant position in ways that affect prices or supply. The definition of a major supplier in terms of suppliers 'alone or together' and the requirement in Section 1.1 of 'preventing suppliers from engaging in or continuing anti-competitive practices' also suggests that *horizontal coordination* of suppliers may be relevant. This is supported by the requirement in Section 1.1 of 'preventing suppliers from engaging in or continuing anti-competitive practices'."[97]

82. The Panel on *Mexico – Telecoms* was thus able to find that the term "anti-competitive practices" in Section 1 of Mexico's Reference Paper "includes practices in addition to those listed in Section 1.2, in particular horizontal practices related to price-fixing and market-sharing agreements".[98]

(ii) Practices required under a Member's law

83. In determining whether or not the actions by the major supplier of telecommunications services in Mexico constituted "anti-competitive practices" because it was required under national law to act in this way, the Panel on *Mexico – Telecoms* found that Section 1.2 contains an explicit example of an anti-competitive practice, cross-subsidization, which has typically been a government requirement. The Panel stated:

"Cross-subsidization was and is a common practice in monopoly regimes, whereby the monopoly operator is required by a government to cross subsidize, either explicitly or in effect, usually through government determination or approval of rates or rate structures. Once monopoly rights are terminated in particular services sectors, however, such cross-subsidization assumes an anti-competitive character. This provision, therefore, provides an example of a practice, sanctioned by measures of a government, that a WTO Member should no longer allow an operator to 'continue'. Accordingly, to fulfil its commitments with respect to 'competitive safeguards' in Section 1 of the Reference Paper, a Member would be obliged to revise or terminate the measures leading to the cross-subsidization. This example clearly suggests that not all acts required by a Member's law are excluded from the scope of anti-competitive practices."[99]

84. The Panel on *Mexico – Telecoms* pointed out further that obligations in the Reference Paper could and did refer to practices that were not dependent on their consistency with a Member's national law. The Panel stated:

"Section 2.1 illustrates that Members did not hesitate to undertake obligations, with respect to a major supplier, that defined an objective outcome – 'cost-oriented' interconnection. There is no reason to suppose, and no language to suggest, that the desired outcome in Section 1 – preventing major suppliers from engaging in anti-competitive practices – should depend entirely on whether a Member's own laws made such practices legal."[100]

85. The Panel on *Mexico – Telecoms* observed further that, although legal doctrines applicable under national law might protect a firm in compliance with a specific legislative requirement from the application of national competition law, these doctrines did not provide cover from international obligations. The Panel stated that:

"[P]ursuant to doctrines applicable under the competition laws of some Members, a firm complying with a specific legislative requirement of such a Member (e.g. a trade law authorizing private market-sharing agreements) may be immunized from being found in violation of the general domestic competition law. The reason for these doctrines is that, in most jurisdictions, domestic legislatures have the legislative power to limit the scope of competition legislation. International commitments made under the GATS 'for the purpose of preventing suppliers ... from engaging in or continuing anti-competitive practices'[101] are, however, designed to limit the regulatory powers of WTO Members. Reference Paper commitments undertaken by a Member are international obligations owed to all other Members of the WTO in all areas of the relevant GATS commitments. In accordance with the principle established in Article 27 of the Vienna Convention,[102] a requirement imposed by a Member under its internal law on a major supplier cannot unilaterally erode its international commitments made in its schedule to other WTO Members to prevent major suppliers from 'continuing anti-competitive practices'.[103] The pro-competitive obligations in Section 1 of the Reference Paper do not reserve any such unilateral

[102] (*footnote original*) See the Vienna Convention on the Law of Treaties, 1969, Art. 27. See also Ian Brownlie, *Principles of Public International Law* (Clarendon Press, 1998, 5th ed.), page 34.
[103] (*footnote original*) Section 1.1 of the Reference Paper.

right of WTO Members to maintain anti-competitive measures."[104]

86. The Panel on *Mexico – Telecoms* emphasized, however, that particular measures addressed in the case were exceptional, and that the autonomy of Members under Section 1 was not unduly circumscribed:

"Although we find that measures required by a Member under its internal laws may fall within the scope of Section 1, the measures addressed in the case before us are exceptional, and require a major supplier to engage in acts which are tantamount to anti-competitive practices which are condemned in domestic competition laws of most WTO Members, and under instruments of international organizations to which both parties are members. Section 1 is a voluntary, additional commitment to maintain certain 'appropriate' measures, which reserves a degree of flexibility for Members in accepting and implementing such an additional commitment."[105]

(iii) Types of measures constituting "anti-competitive practices"

Setting of uniform price by the major supplier

87. The Panel on *Mexico – Telecoms*, in examining the specific practices of the major supplier, stated that:

"the removal of price competition by the Mexican authorities, combined with the setting of the uniform price by the major supplier, has effects tantamount to those of a price-fixing cartel. We have previously found that horizontal practices such as price-fixing among competitors are 'anti-competitive practices' under Section 1 of Mexico's Reference Paper."[106]

Proportionate return system

88. The Panel on *Mexico – Telecoms*, in further examining the specific practices of the major supplier, found that "the allocation of market share between Mexican suppliers imposed by the Mexican authorities, combined with the authorization of Mexican operators to negotiate financial compensation between them instead of physically transferring surplus traffic, has effects tantamount to those of a market sharing arrangement between suppliers".

(iv) Maintaining "appropriate measures"

89. The Panel on *Mexico – Telecoms* described the meaning of "appropriate measures" in the following terms:

"We recognize that measures that are 'appropriate' in the sense of Section 1 of Mexico's Reference Paper would not need to forestall in every case the occurrence of anti-competitive practices of major suppliers. However, at a minimum, if a measure *legally requires* certain behaviour, then it cannot logically be 'appropriate' in *preventing* that same behaviour."

(c) Section 2.1 – Interconnection

(i) "on the basis of the specific commitments undertaken"

90. The Panel on *Mexico – telecoms*, in examining whether certain commitments triggered the interconnection obligation, found that:

"The wording of Section 2 of the Reference Paper as a whole suggests that the purpose of the interconnection obligation is to enable suppliers supplying a basic telecommunications service committed by a Member in its schedule not to be restricted by unduly onerous interconnection terms, conditions and rates imposed by a major supplier. It would not appear to be the purpose of Section 2 to provide the benefits of the interconnection to a supplier in any telecommunications subsector or mode of supply, simply because other subsectors and modes of supply have been committed. It would seem reasonable to conclude, therefore, that the right to interconnect accorded by Section 2.2 should apply where, *with respect to a particular subsector and mode of supply*, a Member's market access and national treatment commitments specifically accords the right to supply that service."[107]

(ii) Applicability to cross-border supply

91. The Panel on *Mexico – Telecoms* found that there was no language in Section 2 to suggest that interconnection obligations did not apply to the cross-border supply of international telecommunications services. The Panel noted that in Section 2 there is

"no reference to the entity that is entitled to be linked to the public telecommunications transport networks or services; no language thus exists that would circumscribe the scope, geographic or otherwise, of the basic telecommunications suppliers to be linked. This provision therefore could not be read to exclude suppliers outside of Mexico from 'linking' to public telecommunications transport networks and services in Mexico."[108]

92. The Panel on *Mexico – Telecoms* supported the above observation by noting that from legislative, commercial, contractual or technical points of view, there was no fundamental difference between national and international interconnection:

"In sum the ordinary meaning, in the heading of Section 2 of Mexico's Reference Paper, of the term 'interconnection' – that it does not distinguish between domestic and international interconnection, including through accounting rate regimes – is confirmed by an examination of any 'special meaning' that the term 'intercon-

[104] Panel Report on *Mexico – Telecoms*, para. 7.244.
[105] Panel Report on *Mexico – Telecoms*, para. 7.267.
[106] Panel Report on *Mexico – Telecoms*, para. 7.262.
[107] Panel Report on *Mexico – Telecoms*, para. 7.94.
[108] Panel Report on *Mexico – Telecoms*, para. 7.105.

nection' may have in telecommunications legislation, or by taking into account potential commercial, contractual or technical differences inherent in international interconnection. We find that any 'special meaning' of the term 'interconnection' in Section 2 of Mexico's Reference Paper does not justify a restricted interpretation of interconnection, or of the term 'linking', which would exclude international interconnection, including accounting rate regimes, from the scope of Section 2 of the Reference Paper."[109]

93. Further, the Panel on *Mexico – Telecoms* considered that the object and purpose of the *GATS* supported the inclusion of international interconnection within the disciplines of the Reference Paper:

"Trade in services is defined in Article I:2 to include the cross-border supply of a service 'from the territory of one Member into the territory of any other Member'. This mode of supply, together with supply through commercial presence, is particularly significant for trade in international telecommunications services. There is no reason to suppose that provisions that ensure interconnection on reasonable terms and conditions for telecommunications services supplied through the commercial presence should not benefit the cross-border supply of the same service, in the absence of clear and specific language to that effect."[110]

94. The Panel on *Mexico – Telecoms* found also that the existence of an explicitly non-binding understanding on accounting rates contained in the Report of the negotiating group report did not support the notion that international interconnection was excluded from the scope of the interconnection obligations in the Reference Paper. The Panel stated:

"In sum, the Understanding seeks to exempt a very limited category of measures, temporarily, and on a non-binding basis, from the scope of WTO dispute settlement. Simply because Members wished to shield a *certain type* of cross-border interconnection from dispute settlement, because of *possible* MFN inconsistencies (with respect to differential rates), it does not follow that they wished to shield *all* forms of cross-border interconnection from dispute settlement. The clear intention to do so is not expressed in the Understanding. This suggests that the content and purpose of the Understanding is of limited assistance in interpreting the scope of application of the term 'interconnection' in Section 2.1 of Mexico's Reference Paper."[111]

(iii) "major supplier"

95. In examining whether Telmex was a "major supplier", the Panel on *Mexico – Telecoms* analysed first whether there was a "relevant market":

"The fact that arrangements for interconnection and termination may take the form of 'joint service' agreements, and may not be price-oriented, does not change the fact that the market exists. Nor is it pertinent to the determination of the 'relevant market', as Mexico suggests, that most WTO Members have not undertaken market access commitments specifically in 'termination services'; facilities for the termination and interconnection are *essential* to the supply of the services at issue in this case.

Is this market for termination the 'relevant' market? For the purposes of this case, we accept the evidence put forward by the United States, and uncontested by Mexico, that the notion of demand substitution – simply put, whether a consumer would consider two products as 'substitutable' – is central to the process of market definition as it is used by competition authorities. Applying that principle, we find no evidence that a domestic telecommunications service is substitutable for an international one, and that an outgoing call is considered substitutable for an incoming one. One is not a practical alternative to the other. Even if the price difference between domestic and international interconnection would change, such a price change would not make these different services substitutable in the eyes of a consumer. We accept, therefore, that the 'relevant market for telecommunications services' for the services at issue – voice, switched data and fax – is the termination of these services in Mexico."[112]

(iv) "the ability to materially affect the terms of participation (having regard to price and supply)"

96. In examining further whether Telmex could affect the market to the extent required to be a major supplier, the Panel on *Mexico – Telecoms* found:

"[S]ince Telmex is *legally* required to negotiate settlement rates for the entire market for termination of the services at issue from the United States, we find that it has patently met the definitional requirement in Mexico's Reference Paper that it have 'the ability to materially affect the terms of participation', particularly 'having regard to price'."[113]

(v) "control over essential facilities" or "use of its position in the market"

97. The Panel on *Mexico – Telecoms* found that "The ability to impose uniform settlement rates on its competitors is the 'use' by Telmex of its special 'position in the market', which is granted to it under the ILD Rules."[114]

[109] Panel Report on *Mexico – Telecoms*, para. 7.117.
[110] Panel Report on *Mexico – Telecoms*, para. 7.121.
[111] Panel Report on *Mexico – Telecoms*, para. 7.138.
[112] Panel Report on *Mexico – Telecoms*, para. 7.151.
[113] Panel Report on *Mexico – Telecoms*, para. 7.155.
[114] Panel Report on *Mexico – Telecoms*, para. 7.159.

(d) Section 2.2(b) – Interconnection rates

(i) "cost-oriented"

98. In examining the ordinary meaning of the term "cost-oriented", the Panel on *Mexico – Telecoms* stated:

> "Rates that are 'cost-oriented' thus suggest rates that are *brought into a defined relation to known costs or cost principles*. Rates that are 'cost-oriented' would not need to equate exactly to cost, but should be founded on cost. The degree of flexibility inherent in the term 'cost-oriented' suggests, moreover, that more than one *costing methodology* could be used to calculate 'cost-oriented' rates."[115]

99. The Panel on *Mexico – Telecoms* found that the ordinary meaning of the phrase "cost-oriented" was confirmed by its special meaning in the telecommunications sector, in particular as expressed in a key ITU recommendation. The Panel stated:

> "In sum, Recommendation D.140 requires in its present form that the cost *elements* and the cost *model* both be clearly related to the cost of delivering the service. This special meaning of 'cost-orientated', in the context of the ITU, is thus consistent with the ordinary meaning of the term as it appears in Section 2.2(b) of Mexico's Reference Paper. As both parties to this dispute as well as most WTO Members are also members of the ITU, the special definition adds precision to the ordinary meaning by classifying allowable cost *elements*, and establishing the causality between the cost elements and the services provided. While leaving a margin of discretion to national authorities to choose the precise cost method by which to arrive at 'cost-oriented' rates, the ITU recommendations indicate that the term 'cost-oriented rates' can be understood as rates related to the cost *incurred in providing the service*."[116]

100. The Panel on *Mexico – Telecoms* further noted that the ITU stated in a report that "incremental cost methodologies are becoming the de facto standard for interconnection pricing around the world".[117] The Panel explained:

> "These methods focus on the additional future fixed and variable costs that are attributable to the service. Setting rates in line with long run incremental costs reflects the view that the regulator should require prices from dominant or major suppliers that most closely imitate a fully competitive market, where prices are driven down towards marginal or incremental costs.[118] The increasing use of incremental cost methodologies indicates the special meaning that the term 'cost-oriented' is acquiring among WTO Members."[119]

(ii) "reasonable"

101. In examining the further requirement that cost-oriented rates be "reasonable", the Panel on *Mexico – Telecoms* found that this term suggested something "judged to be *appropriate or suitable to the circumstances or purpose*".[120] The Panel explained that this meant that interconnection rates should

> "[r]eflect the overall objectives of the provision that the rates represent the costs incurred in providing the service. The word 'reasonable' thus emphasizes that the application of the cost model chosen by the Member reflects the costs incurred for the interconnection service. Flexibility and balance are also part of the notion of 'reasonable'."[121, 122]

(iii) "having regard to economic feasibility"

102. The Panel on *Mexico – Telecoms* found that the phrase "having regard to economic feasibility", which qualifies "cost-oriented rates",

> "[s]erves merely to underline that the major supplier is entitled to rates that allow it to undertake interconnection on an 'economic' basis, that is, to make a reasonable rate of return."[123]

(iv) Evaluating whether rates are "cost-oriented"

103. In evaluating whether in fact the rates were "cost-oriented", the Panel on *Mexico – Telecoms* found:

> "We think it is justified to presume that the aggregate price charged by Telmex for the use of network components, when used for purely domestic traffic, is an indication of the cost-oriented rate, in the sense of Section 2.2(b) of Mexico's Reference Paper, for the use of these same network components in terminating an international call."[124]

---

[115] Panel Report on *Mexico – Telecoms*, para. 7.168.
[116] Panel Report on *Mexico – Telecoms*, para. 7.174.
[117] (*footnote original*) *ITU, Trends in Telecommunications Reform: Interconnection Regulation*, 3rd edition, sec. 4.2.1.2, p. 40. This paragraph also states that countries that apply long run incremental cost methodologies include the United States, Australia, EC, Colombia, and South Africa, and that "numerous developing countries have adopted or proposed" some form of this model.
[118] (*footnote original*) *ITU, Trends in Telecommunications Reform: Interconnection Regulation*, 3rd edition, sec. 4.2.1.2, p. 40.
[119] Panel Report on *Mexico – Telecoms*, para. 7.175.
[120] Panel Report on *Mexico – Telecoms*, para. 7.182.
[121] (*footnote original*) The Appellate Body in *US – Hot-Rolled Steel* stated: ". . .The word 'reasonable' implies a degree of flexibility that involves consideration of all of the circumstances of a particular case. What is 'reasonable' in one set of circumstances may prove to be less than 'reasonable' in different circumstances. This suggests that what constitutes a reasonable period or a reasonable time, under Article 6.8 and Annex II of the *Anti-Dumping Agreement*, should be defined on a case-by-case basis, in the light of the specific circumstances of each investigation. In sum, a 'reasonable period' must be interpreted consistently with the notions of flexibility and balance that are inherent in the concept of 'reasonableness', and in a manner that allows for account to be taken of the particular circumstances of each case. This was in the context of the *Anti-Dumping Agreement*, but we believe it is equally pertinent in the context of GATS." *See* Appellate Body Report, *US – Hot-Rolled Steel*, paragraphs 84–85.
[122] Panel Report on *Mexico – Telecoms*, para. 7.182.
[123] Panel Report on *Mexico – Telecoms*, para. 7.184.
[124] Panel Report on *Mexico – Telecoms*, para. 7.191.

104. Applying this methodology (the difference between the aggregate price charged for the use of network components when used for purely domestic traffic, and the price charged for the use of these same network components in terminating an international call), the Panel on *Mexico – Telecoms* found:

> "The evidence reveals that the blended average difference in costs is in the order of 77%. Mindful of the fact that the cost-ceiling figures used are conservative (since they are based in part on *retail* rates for private lines, and Telmex's interconnection rates to cities without competition in call origination), we find that a difference of over 75% above Telmex's demonstrated cost-ceiling is unlikely to be within the scope of regulatory flexibility allowed by the notion of 'cost-oriented' rates, in the sense of Section 2.2(b) of Mexico's Reference Paper."[125]

105. In examining other methodologies for determining whether interconnection rates were "cost-oriented", the Panel on *Mexico – Telecoms* was not convinced that a comparison of international grey-market rates was "fully warranted". It reasoned that "such capacity may be priced at short-term incremental cost (well below long-term incremental cost as required under Mexican law for calculating interconnection charges) and may also result in lower service reliability and quality", even though any "substantial difference in costs" could go some way to support findings under other methodologies.[126] On the other hand, the Panel found that benchmarking which involved a "comparison of the market for wholesale transportation and termination of international calls" in different countries was a "valid method" for examining whether interconnection rates were cost-oriented.[127]

PART IV
PROGRESSIVE LIBERALIZATION

XXIII. ARTICLE XIX

A. TEXT OF ARTICLE XIX

Article XIX
Negotiations on Specific Commitments

1. In pursuance of the objectives of this Agreement, Members shall enter into successive rounds of negotiations, beginning not later than five years from the date of entry into force of the WTO Agreement and periodically thereafter, with a view to achieving a progressively higher level of liberalization. Such negotiations shall be directed to the reduction or elimination of the adverse effects on trade in services of measures as a means of providing effective market access. This process shall take place with a view to promoting the interests of all participants on a mutually advantageous basis and to securing an overall balance of rights and obligations.

2. The process of liberalization shall take place with due respect for national policy objectives and the level of development of individual Members, both overall and in individual sectors. There shall be appropriate flexibility for individual developing country Members for opening fewer sectors, liberalizing fewer types of transactions, progressively extending market access in line with their development situation and, when making access to their markets available to foreign service suppliers, attaching to such access conditions aimed at achieving the objectives referred to in Article IV.

3. For each round, negotiating guidelines and procedures shall be established. For the purposes of establishing such guidelines, the Council for Trade in Services shall carry out an assessment of trade in services in overall terms and on a sectoral basis with reference to the objectives of this Agreement, including those set out in paragraph 1 of Article IV. Negotiating guidelines shall establish modalities for the treatment of liberalization undertaken autonomously by Members since previous negotiations, as well as for the special treatment for least-developed country Members under the provisions of paragraph 3 of Article IV.

4. The process of progressive liberalization shall be advanced in each such round through bilateral, plurilateral or multilateral negotiations directed towards increasing the general level of specific commitments undertaken by Members under this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XIX

1. Article XIX:1

(a) Information exchange

106. On 9–13 December 1996 in Singapore, the Ministerial Conference endorsed the recommendation that the Council for Trade in Services would develop an information exchange programme,[128] as part of the requisite work to facilitate the negotiations of progressive liberalization of trade in services as mandated by paragraph 1 of Article XIX.[129] On 11 May 1998, the Council on Trade in Services agreed, on an *ad referendum* basis, on certain aspects concerning the structure and content of the exchange of information exercise.[130]

(b) GATS 2000 negotiations

107. At its meeting on 7–8 February 2000, the General Council took note of a statement by the Chairman recalling that the mandated negotiations had begun on

[125] Panel Report on *Mexico – Telecoms*, para. 7.203.
[126] Panel Report on *Mexico – Telecoms*, para. 7.207.
[127] Panel Report on *Mexico – Telecoms*, para. 7.208.
[128] S/C/3, para. 47.
[129] WT/MIN(96)/DEC, para. 19. See also S/C/M/17, para. 14.
[130] S/C/M/27, para. 3.

1 January 2000. The Council agreed that the negotiations be conducted in Special Sessions of the Council for Trade in Services.[131]

(c) Doha Declaration

108. On 9–14 November 2001 in Doha Ministers took note that work had already been undertaken in the negotiations, initiated in January 2000. They agreed that the conduct, conclusion and entry into force of the services negotiations would be treated as one part of the single undertaking.[132]

2. Article XIX:3

(a) GATS 2000 negotiations

109. At its meeting on 28 March 2001, the Council for Trade in Services adopted the Guidelines and Procedures for the Negotiations on Trade in Services,[133] which were subsequently reaffirmed by Ministers meeting in Doha on 9–14 November 2001.[134]

(b) Assessment of trade in services

110. At its meeting on 25 February 2000, the Council decided that the assessment of trade in services should be moved to the agenda of the Special Session. It was agreed that the assessment should be regarded as an ongoing process rather than a one-off exercise.[135]

3. Negotiations in specific services sectors

(a) Movement of natural persons

111. At its meeting of 21 July 1995,[136] the Council for Trade in Services decided to adopt the Third Protocol to the General Agreement on Trade in Services,[137] which had been proposed by the Negotiating Group on Movement of Natural Persons.

(b) Financial services

112. At its meeting of 21 July 1995, the Committee on Trade in Financial Services decided to adopt the Second Protocol to the General Agreement on Trade in Services.[138] Following the adoption of the Second Protocol, at its meeting of 21 July 1995, the Council for Trade in Services, so as to address the situation where the Second Protocol would not enter into force, adopted the Decision on Commitments in Financial Services[139] and the Second Decision on Financial Services,[140] both of which had been proposed by the Committee on Trade in Financial Services.[141]

113. On 12 and 14 November 1997, the Committee on Trade in Financial Services approved the final results of the negotiations on financial services, and adopted the Fifth Protocol to the General Agreement on Trade in Services.[142] Following the adoption of the Fifth Protocol, the Council for Trade in Services, at its meeting of 12 December 1997, so as to address the situation where the Fifth Protocol would not enter into force, adopted the Decision of December 1997 on Commitments in Financial Services,[143] which had been proposed by the Committee on Trade in Financial Services. The Fifth Protocol entered into force on 1 March 1999 and remained open for acceptance by the Members concerned until 15 June 1999.[144] However, some of those Members failed to accept the Protocol by that date. In order to allow for the acceptance of the Protocol after the expiry of the deadline, the Council for Trade in Services has periodically opened the Fifth Protocol for acceptance upon request by a Member. From September 1999 until 31 December 2004, nine WTO Members have accepted the Protocol.[145]

(c) Maritime transport services

114. At its meeting of 28 June 1996, the Council for Trade in Services adopted a Decision to suspend the negotiations on maritime transport services and to resume them with the commencement of comprehensive negotiations on services, in accordance with Article XIX of *GATS*, and to conclude them no later than at the end of this first round of progressive liberalization.[146]

[145] Costa Rica and Nigeria (S/L/76); Ghana (S/L/87); Kenya and Nigeria (S/L/89) and Bolivia (S/L/108), Dominican Republic (S/L/111); Uruguay (S/L/112); Poland (S/L/130).

[146] S/C/M/11, paras. 12–13. The text of the Decision can be found in S/L/24. The Council for Trade in Services noted in its report to the General Council, (S/C/3) paras. 32–33, dated 6 November 1996:

> "After the suspension of the negotiations, two Members, Iceland and Norway, consolidated their best offers, i.e. transformed their offers into specific commitments to be inscribed in their schedules. Two Members, Austria (in the context of its accession to the European Union) and the Dominican Republic, withdrew their commitments, while two Members, Canada and Malaysia, modified their commitments slightly. Currently, 35 Members have commitments on maritime transport services. This includes: 29 Members who made commitments in the Uruguay Round, 4 Members

The Group was to resume "with the commencement of comprehensive negotiations on Services".[147] A Special Session of the Council for Trade in Services formally launched the new negotiations on services on 25 February 2000.[148]

(d) Basic telecommunications

115. On 30 April 1996, the Council for Trade in Services decided to adopt the Decision on Commitments in Basic Telecommunications and the Fourth Protocol to the General Agreement on Trade in Services,[149] both of which had been proposed by the Negotiating Group on Basic Telecommunications.

(e) Professional services

116. With respect to the establishment of the Working Party on Professional Services, and its successor, the Working Party on Domestic Regulation, see paragraphs 132–134 below.

(i) Disciplines on domestic regulation

117. With respect to disciplines on domestic regulation, see paragraph 51 above.

XXIV. ARTICLE XX

A. TEXT OF ARTICLE XX

Article XX
Schedule of Specific Commitments

1. Each Member shall set out in a schedule the specific commitments it undertakes under Part III of this Agreement. With respect to sectors where such commitments are undertaken, each Schedule shall specify:

(a) terms, limitations and conditions on market access;

(b) conditions and qualifications on national treatment;

(c) undertakings relating to additional commitments;

(d) where appropriate the time-frame for implementation of such commitments; and

(e) the date of entry into force of such commitments.

2. Measures inconsistent with both Articles XVI and XVII shall be inscribed in the column relating to Article XVI. In this case the inscription will be considered to provide a condition or qualification to Article XVII as well.

3. Schedules of specific commitments shall be annexed to this Agreement and shall form an integral part thereof.

B. INTERPRETATION AND APPLICATION OF ARTICLE XX

1. General

(a) Committee on Specific Commitments

118. With regard to the establishment and terms of reference of the Committee on Specific Commitments under the *GATS*, see paragraph 137 below.

(b) Guidelines for Scheduling of Specific Commitments

119. At its meeting of 23 March 2001, the Council for Trade in Services adopted the Guidelines for the Scheduling of Specific Commitments.[150]

2. Article XX:1(d)

120. The Panel on *Mexico – Telecoms*, in examining a market access commitment made subject to a permit that would not be granted "until the corresponding regulations are issued", explained the role and application of paragraph (d):

> "We therefore consider that subparagraph (d) of Article XX:1 requires the specification of a time-frame for implementation should a Member wish to implement a commitment *after* its entry into force. Where a Member does not specify a time-frame, implementation must be deemed to be concurrent with the entry into force of the commitment."[151]

121. Referring to the circumstances of the case, the Panel on *Mexico – Telecoms* then pointed out that:

> "[E]ven if Mexico had needed time to complete the issuance of the regulations beyond the time of entry into force of its commitment on 5 February 1998, Mexico should, at the very minimum, have initiated that process leading to the issuance of the regulations. There is no evidence, however, that Mexico has taken *any* steps to comply with its commitment."[152]

(Papua New Guinea, Saint Christopher and Nevis, Sierra Leone and Slovenia) who acceded subsequently, and 2 Members (Iceland and Norway) who made commitments after the extended negotiations.

At the time of suspension of the negotiations, 56 governments (including the European Communities and their Member States) had elected to participate fully in the negotiations. Another 16 governments were participating in the process as observers. By that time 24 conditional offers had been submitted."

147 S/L/24.

148 S/CSS/M/1, paras. 4–35. The decision to hold the negotiations in Special Sessions of the Council for Trade in Services was tabled by the General Council on 7 February 2000. The text of the decision can be found in WT/GC/M/53.

149 S/C/M/9, paras. 2–3. The text of the adopted Fourth Protocol can be found in S/L/19. Also, the text of the adopted Fourth Protocol can be found in S/L/20.

150 S/C/M/52, para. 11. The text of the adopted Guidelines can be found in S/L/92.

151 Panel Report on *Mexico – Telecoms*, para. 7.371.

152 Panel Report on *Mexico – Telecoms*, para. 7.371.

122. With respect to the length of time in which implementation by Mexico could reasonably have been concluded, the Panel on *Mexico – Telecoms* stated:

> "We do not consider it necessary to rule on the length of a time period within which the implementation of Mexico's commitment might reasonably have been concluded, as more than five years have passed since the entry into force of Mexico's commitment, and Mexico still has indicated no date by which it intends to issue the relevant regulations and permits."[153]

123. The Panel on *Mexico – Telecoms* found that Mexico's refusal to authorize the supply of services by commercial agencies was inconsistent with the market access commitment inscribed in its schedule.

XXV. ARTICLE XXI

A. TEXT OF ARTICLE XXI

Article XXI
Modification of Schedules

1. (a) A Member (referred to in this Article as the "modifying Member") may modify or withdraw any commitment in its Schedule, at any time after three years have elapsed from the date on which that commitment entered into force, in accordance with the provisions of this Article.

(b) A modifying Member shall notify its intent to modify or withdraw a commitment pursuant to this Article to the Council for Trade in Services no later than three months before the intended date of implementation of the modification or withdrawal.

2. (a) At the request of any Member the benefits of which under this Agreement may be affected (referred to in this Article as an "affected Member") by a proposed modification or withdrawal notified under subparagraph 1(b), the modifying Member shall enter into negotiations with a view to reaching agreement on any necessary compensatory adjustment. In such negotiations and agreement, the Members concerned shall endeavour to maintain a general level of mutually advantageous commitments not less favourable to trade than that provided for in Schedules of specific commitments prior to such negotiations.

(b) Compensatory adjustments shall be made on a most-favoured-nation basis.

3. (a) If agreement is not reached between the modifying Member and any affected Member before the end of the period provided for negotiations, such affected Member may refer the matter to arbitration. Any affected Member that wishes to enforce a right that it may have to compensation must participate in the arbitration.

(b) If no affected Member has requested arbitration, the modifying Member shall be free to implement the proposed modification or withdrawal.

4. (a) The modifying Member may not modify or withdraw its commitment until it has made compensatory adjustments in conformity with the findings of the arbitration.

(b) If the modifying Member implements its proposed modification or withdrawal and does not comply with the findings of the arbitration, any affected Member that participated in the arbitration may modify or withdraw substantially equivalent benefits in conformity with those findings. Notwithstanding Article II, such a modification or withdrawal may be implemented solely with respect to the modifying Member.

5. The Council for Trade in Services shall establish procedures for rectification or modification of Schedules. Any Member which has modified or withdrawn scheduled commitments under this Article shall modify its Schedule according to such procedures.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXI

1. Article XXI:1(b)

(a) Format for notifications

124. With respect to the format for notifications under paragraph 1(b), see the Guidelines for Notifications under the General Agreement on Trade in Services.[154]

2. Article XXI:5

(a) Procedures for the rectification or modification of schedules

125. Since the conclusion of the Uruguay Round, an *ad hoc* certification procedure had been applied for the purpose of introducing changes or adding new commitments to Members' schedules, pending the adoption of a formal set of procedures under Article XXI (Modification of Schedules). On 20 July 1999, the Council for Trade in Services adopted the Procedures for the Implementation of Article XXI upon the recommendation of the Committee on Specific Commitments.[155] The Procedures are to be used whenever a Member intends to modify or withdraw a scheduled commitment.

126. On 14 April 2000, upon a recommendation of the Committee on Specific Commitments, the Council for Trade in Services adopted the Procedures for the Certification of Rectifications or Improvements to Schedules of Specific Commitments.[156] These Procedures are to be

[153] Panel Report on *Mexico – Telecoms*, para. 7.371.
[154] S/L/5.
[155] S/C/M/38, section D. The text of the adopted Procedures can be found in S/L/80. The text of the decision to adopt the Procedures can be found in S/L/79.
[156] S/C/M/42, para. 38–41. The text of the adopted Procedures can be found in S/L/84. The text of the decision to adopt the Procedures can be found in S/L/83.

used whenever a Member intends to undertake new commitments, improve existing ones, or introduce rectifications or changes of a purely technical nature that do not alter the scope or the substance of the existing commitments.

PART V
INSTITUTIONAL ARRANGEMENTS

XXVI. ARTICLE XXII

A. TEXT OF ARTICLE XXII

Article XXII
Consultation

1. Each Member shall accord sympathetic consideration to, and shall afford adequate opportunity for, consultation regarding such representations as may be made by any other Member with respect to any matter affecting the operation of this Agreement. The Dispute Settlement Understanding (DSU) shall apply to such consultations.

2. The Council for Trade in Services or the Dispute Settlement Body (DSB) may, at the request of a Member, consult with any Member or Members in respect of any matter for which it has not been possible to find a satisfactory solution through consultation under paragraph 1.

3. A Member may not invoke Article XVII, either under this Article or Article XXIII, with respect to a measure of another Member that falls within the scope of an international agreement between them relating to the avoidance of double taxation. In case of disagreement between Members as to whether a measure falls within the scope of such an agreement between them, it shall be open to either Member to bring this matter before the Council for Trade in Services.[11] The Council shall refer the matter to arbitration. The decision of the arbitrator shall be final and binding on the Members.

(*footnote original*) [11] With respect to agreements on the avoidance of double taxation which exist on the date of entry into force of the WTO Agreement, such a matter may be brought before the Council for Trade in Services only with the consent of both parties to such an agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXII

No jurisprudence or decision of a competent WTO body.

XXVII. ARTICLE XXIII

A. TEXT OF ARTICLE XXIII

Article XXIII
Dispute Settlement and Enforcement

1. If any Member should consider that any other Member fails to carry out its obligations or specific commitments under this Agreement, it may with a view to reaching a mutually satisfactory resolution of the matter have recourse to the DSU.

2. If the DSB considers that the circumstances are serious enough to justify such action, it may authorize a Member or Members to suspend the application to any other Member or Members of obligations and specific commitments in accordance with Article 22 of the DSU.

3. If any Member considers that any benefit it could reasonably have expected to accrue to it under a specific commitment of another Member under Part III of this Agreement is being nullified or impaired as a result of the application of any measure which does not conflict with the provisions of this Agreement, it may have recourse to the DSU. If the measure is determined by the DSB to have nullified or impaired such a benefit, the Member affected shall be entitled to a mutually satisfactory adjustment on the basis of paragraph 2 of Article XXI, which may include the modification or withdrawal of the measure. In the event an agreement cannot be reached between the Members concerned, Article 22 of the DSU shall apply.[157, 158]

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIII

1. Article XXIII:1

(a) Relationship with Article 3.8 of the DSU

127. In *EC – Bananas III*, the Appellate Body considered that the Panel had erred in extending the scope of the presumption of nullification or impairment in Article 3.8 of the *DSU* to violation claims made under the *GATS*:

> "We observe, first of all, that the European Communities attempts to rebut the presumption of nullification or impairment with respect to the Panel's findings of violations of the GATT 1994 on the basis that the United States has never exported a single banana to the European Community, and therefore could not possibly suffer any trade damage. The attempted rebuttal by the European Communities applies only to one complainant, the United States, and to only one agreement, the GATT 1994. In our view, the Panel erred in extending the scope of the presumption in Article 3.8 of the DSU to claims made under the GATS as well as to claims made by the Complaining Parties other than the United States."[159]

2. Disputes under GATS

128. The following table lists the disputes in which Panel and/or Appellate Body reports have been adopted where the provisions of *GATS* were invoked:

[157] Paragraph 4 of Annex on Air Transport Services relates to the dispute settlement in air transport services.
[158] Paragraph 4 of Annex on Financial Services relates to the dispute settlement in financial services.
[159] Appellate Body Report on *EC – Bananas III*, para. 250.

Case Name	Case Number	Invoked Articles
1 *EC – Bananas III*	WT/DS27	Articles II and XVII
2 *Canada – Autos*	WT/DS139, WT/DS142	Articles II, V and XVII

3. Decision on Certain Dispute Settlement Procedures for the General Agreement on Trade in Services

129. On 1 March 1995, pursuant to the Ministers' Decision on Certain Dispute Settlement Procedures for the General Agreement on Trade in Services, the Council for Trade in Services adopted the Decision on Certain Dispute Settlement Procedures for the General Agreement on Trade in Services,[160] which called for the establishment of a roster of panellists.[161] The text of the decision is as follows:

"Decision on Certain Dispute Settlement Procedures for the General Agreement on Trade in Services

Ministers,

Decide to recommend that the Council for Trade in Services at its first meeting adopt the decision set out below.

The Council for Trade in Services,

Taking into account the specific nature of the obligations and specific commitments of the Agreement, and of trade in services, with respect to dispute settlement under Articles XXII and XXIII,

Decides as follows:

1. A roster of panellists shall be established to assist in the selection of panellists.

2. To this end, Members may suggest names of individuals possessing the qualifications referred to in Paragraph 3 for inclusion on the roster, and shall provide a curriculum vitae of their qualifications including, if applicable, indication of sector-specific expertise.

3. Panels shall be composed of well-qualified governmental and/or non-governmental individuals who have experience in issues related to the General Agreement on Trade in Services and/or trade in services, including associated regulatory matters. Panellists shall serve in their individual capacities and not as representatives of any government or organisation.

4. Panels for disputes regarding sectoral matters shall have the necessary expertise relevant to the specific services sectors which the dispute concerns.

5. The Secretariat shall maintain the roster and shall develop procedures for its administration in consultation with the Chairman of the Council."

130. On 4 October 1995, the Council for Trade in Services decided that, given the comprehensive nature of the indicative list established by the DSB pursuant to Article 8(4) of the DSU, there was no need for the Council to establish a separate roster of serving panellists.[162]

XXVIII. ARTICLE XXIV

A. TEXT OF ARTICLE XXIV

Article XXIV
Council for Trade in Services

1. The Council for Trade in Services shall carry out such functions as may be assigned to it to facilitate the operation of this Agreement and further its objectives. The Council may establish such subsidiary bodies as it considers appropriate for the effective discharge of its functions.

2. The Council and, unless the Council decides otherwise, its subsidiary bodies shall be open to participation by representatives of all Members.

3. The Chairman of the Council shall be elected by the Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIV

1. Article XXIV.1

(a) Establishment of subsidiary bodies

(i) Committee on Trade in Financial Services

131. On 1 March 1995, pursuant to the Ministers' Decisions in Marrakesh, the Council for Trade in Services adopted the Decision on Institutional Arrangements for the General Agreement on Trade in Services,[163] thereby establishing the Committee on Trade in Financial Services.[164] Its responsibilities are listed in paragraph 2 of the Decision and comprise, *inter alia*, the duty:

"(a) to keep under continuous review and surveillance the application of the Agreement with respect to the sector concerned;

(b) to formulate proposals or recommendations for consideration by the Council in connection with any matter relating to trade in the sector concerned;

[160] S/C/M/1. The text of the adopted Decision can be found in S/L/2.
[161] S/L/2, para. 1.
[162] S/C/M/6, paras. 41–42.
[163] S/C/M/1, paras. 6–7. The text of the adopted Decision can be found in S/L/1.
[164] See Annual Reports S/FIN 1–6, 8–10, 14.

(c) if there is an annex pertaining to the sector, to consider proposals for amendment of that sectoral annex, and to make appropriate recommendations to the Council;

(d) to provide a forum for technical discussions, to conduct studies on measures of Members and to conduct examinations of any other technical matters affecting trade in services in the sector concerned;

(e) to provide technical assistance to developing country Members and developing countries negotiating accession to the Agreement Establishing the World Trade Organization in respect of the application of obligations or other matters affecting trade in services in the sector concerned; and

(f) to cooperate with any other subsidiary bodies established under the General Agreement on Trade in Services or any international organizations active in any sector concerned."[165]

(ii) Working Party on Professional Services and Working Party on Domestic Regulation

132. On 1 March 1995, pursuant to paragraph 2 of the Decision on Professional Services, the Council for Trade in Services established a Working Party on Professional Services.[166] With respect to disciplines on domestic regulation and mutual recognition guidelines, see paragraph 51 above.

133. The Working Party reported to the Council for Trade in Services on an annual basis.[167]

134. On 26 April 1999, the Council for Trade in Services discussed the issue of how to manage the two overlapping mandates under Article VI:4 which called upon the Council to develop disciplines on domestic regulation in all services sectors, and the Decision on Professional Services which called upon the Working Party on Professional Services (WPPS) to fulfill the same task for professional services.[168] For this purpose, at the same meeting, the Council for Trade in Services adopted a decision establishing the Working Party on Domestic Regulation (WPDR).[169] The WPDR would replace the WPPS and would be responsible for carrying out all the work foreseen under Article VI:4. It would give priority to the development of horizontal disciplines applicable to all services sectors, while retaining the possibility of developing further disciplines applicable to specific sectors or groups of sectors, including the development of general disciplines for professional services.[170]

135. The WPDR reports to the Council for Trade in Services on an annual basis.[171]

(iii) Working Party on GATS Rules

136. At its meeting of 30 March 1995, the Council for Trade in Services established a Working Party on GATS Rules to carry out the negotiating mandates contained in the *GATS* on "Emergency Safeguard Measures" (Article X), "Government Procurement" (Article XIII) and "Subsidies" (Article XV).[172]

(iv) Committee on Specific Commitments

137. On 4 October 1995, the Council for Trade in Services established the Committee on Specific Commitments.[173] At its meeting on 22 November 1995, the Council for Trade in Services adopted the Decision on the Terms of Reference for the Committee on Specific Commitments.[174]

(v) Negotiating Groups on Natural Persons, Maritime Transport Services and Basic Telecommunications

138. The Negotiating Group on Natural Persons, the Negotiating Group on Maritime Transport Services and the Negotiating Group on Basic Telecommunications were established by Ministerial Decisions at Marrakesh.

2. Rules of procedure of the Council for Trade in Services

(a) Rules of procedure

139. On 4 October 1995, the Council for Trade in Services adopted[175] the Rules of Procedure of the General Council, along with appropriate modifications.[176] See also the Chapter on the *WTO Agreement*, Section V.B.5(b).

(b) Observer status

140. At its meeting of 1 March 1995, the Council for Trade in Services took note of the decision by the General Council of 31 January 1995[177] in which it granted observer status to a number of governments and separate territories and also covered observership to the subsidiary bodies to the General Council, including the Council for Trade in Services.[178] The Council for

[165] S/L/1, para. 1.
[166] S/L/3.
[167] The reports are numbered S/WPPS/1–4.
[168] S/C/M/35, paras. 18–22.
[169] S/L/70.
[170] S/C/10, para. 25. Report (1999) of the Council for Trade in Services to the General Council.
[171] S/WPDR 1–7.
[172] S/C/M/2, paras. 22–25.
[173] S/C/M/6, paras. 22–25.
[174] S/L/16.
[175] S/L/15.
[176] S/C/M/6.
[177] WT/GC/M/1.
[178] S/C/M/1.

Trade in Services also took note of the decision of the General Council which agreed on an *ad hoc* arrangement whereby the IMF, the World Bank, the UN and UNCTAD were invited to participate as observers in the first meetings of the General Council and its subsidiary Councils.[179]

141. At its meeting on 14 April 2000, the Council for Trade in Services agreed to grant the World Health Organization and the World Tourism Organization observer status on an *ad hoc* basis.[180]

C. DECISION ON INSTITUTIONAL ARRANGEMENTS FOR THE GENERAL AGREEMENT ON TRADE IN SERVICES

142. With respect to institutional arrangements for the *GATS*, Ministers at the 1994 Marrakesh Ministerial conference adopted the following Decision:

"Decision on Institutional Arrangements for the General Agreement on Trade in Services

Ministers,

Decide to recommend that the Council for Trade in Services at its first meeting adopt the decision on subsidiary bodies set out below.

The Council for Trade in Services,

Acting pursuant to Article XXIV with a view to facilitating the operation and furthering the objectives of the General Agreement on Trade in Services,

Decides as follows:

1. Any subsidiary bodies that the Council may establish shall report to the Council annually or more often as necessary. Each such body shall establish its own rules of procedure, and may set up its own subsidiary bodies as appropriate.

2. Any sectoral committee shall carry out responsibilities as assigned to it by the Council, and shall afford Members the opportunity to consult on any matters relating to trade in services in the sector concerned and the operation of the sectoral annex to which it may pertain. Such responsibilities shall include:

(a) to keep under continuous review and surveillance the application of the Agreement with respect to the sector concerned;

(b) to formulate proposals or recommendations for consideration by the Council in connection with any matter relating to trade in the sector concerned;

(c) if there is an annex pertaining to the sector, to consider proposals for amendment of that sectoral annex, and to make appropriate recommendations to the Council;

(d) to provide a forum for technical discussions, to conduct studies on measures of Members and to conduct examinations of any other technical matters affecting trade in services in the sector concerned;

(e) to provide technical assistance to developing country Members and developing countries negotiating accession to the Agreement Establishing the World Trade Organization in respect of the application of obligations or other matters affecting trade in services in the sector concerned; and

(f) to cooperate with any other subsidiary bodies established under the General Agreement on Trade in Services or any international organizations active in any sector concerned."

XXIX. ARTICLE XXV

A. TEXT OF ARTICLE XXV

Article XXV
Technical Cooperation

1. Service suppliers of Members which are in need of such assistance shall have access to the services of contact points referred to in paragraph 2 of Article IV.

2. Technical assistance to developing countries shall be provided at the multilateral level by the Secretariat and shall be decided upon by the Council for Trade in Services.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXV

No jurisprudence or decision of a competent WTO body.

XXX. ARTICLE XXVI

A. TEXT OF ARTICLE XXVI

Article XXVI
Relationship with Other International Organizations

The General Council shall make appropriate arrangements for consultation and cooperation with the United Nations and its specialized agencies as well as with other intergovernmental organizations concerned with services.

[179] S/C/M/1.
[180] S/C/M/42, paras. 68–69.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXVI

1. Agreement between the International Telecommunication Union and the World Trade Organization

143. On 26 May 2000, the Council for Trade in Services adopted the Cooperation Agreement between the International Telecommunication Union and the World Trade Organization.[181] At its meeting on 10 October 2000, the General Council approved the Agreement between the ITU and WTO contained in document S/C/11 and consequently authorized the WTO Director-General to sign this Agreement.[182]

144. With respect to the relationship of the WTO with other international organizations in general, see the Chapter on the *WTO Agreement*, Section VI.B.

PART V
FINAL PROVISIONS

XXXI. ARTICLE XXVII

A. TEXT OF ARTICLE XXVII

Article XXVII
Denial of Benefits

A Member may deny the benefits of this Agreement:

(a) to the supply of a service, if it establishes that the service is supplied from or in the territory of a non-Member or of a Member to which the denying Member does not apply the WTO Agreement;

(b) in the case of the supply of a maritime transport service, if it establishes that the service is supplied:

  (i) by a vessel registered under the laws of a non-Member or of a Member to which the denying Member does not apply the WTO Agreement, and

  (ii) by a person which operates and/or uses the vessel in whole or in part but which is of a non-Member or of a Member to which the denying Member does not apply the WTO Agreement;

(c) to a service supplier that is a juridical person, if it establishes that it is not a service supplier of another Member, or that it is a service supplier of a Member to which the denying Member does not apply the WTO Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXVII

No jurisprudence or decision of a competent WTO body.

XXXII. ARTICLE XXVIII

A. TEXT OF ARTICLE XXVIII

Article XXVIII
Definitions

For the purpose of this Agreement:

(a) "measure" means any measure by a Member, whether in the form of a law, regulation, rule, procedure, decision, administrative action, or any other form;

(b) "supply of a service" includes the production, distribution, marketing, sale and delivery of a service;

(c) "measures by Members affecting trade in services" include measures in respect of

  (i) the purchase, payment or use of a service;

  (ii) the access to and use of, in connection with the supply of a service, services which are required by those Members to be offered to the public generally;

  (iii) the presence, including commercial presence, of persons of a Member for the supply of a service in the territory of another Member;

(d) "commercial presence" means any type of business or professional establishment, including through

  (i) the constitution, acquisition or maintenance of a juridical person, or

  (ii) the creation or maintenance of a branch or a representative office, within the territory of a Member for the purpose of supplying a service;

(e) "sector" of a service means,

  (i) with reference to a specific commitment, one or more, or all, subsectors of that service, as specified in a Member's Schedule,

  (ii) otherwise, the whole of that service sector, including all of its subsectors;

(f) "service of another Member" means a service which is supplied,

  (i) from or in the territory of that other Member, or in the case of maritime transport, by a vessel registered under the laws of that other Member, or by a person of that other Member which supplies the service through the operation of a vessel and/or its use in whole or in part; or

  (ii) in the case of the supply of a service through commercial presence or through the presence of natural persons, by a service supplier of that other Member;

[181] The text is contained in document S/C/9/Rev.1.
[182] WT/GC/M/58, pp. 14–15.

(g) "service supplier" means any person that supplies a service;[12]

(*footnote original*) [12] Where the service is not supplied directly by a juridical person but through other forms of commercial presence such as a branch or a representative office, the service supplier (i.e. the juridical person) shall, nonetheless, through such presence be accorded the treatment provided for service suppliers under the Agreement. Such treatment shall be extended to the presence through which the service is supplied and need not be extended to any other parts of the supplier located outside the territory where the service is supplied.

(h) "monopoly supplier of a service" means any person, public or private, which in the relevant market of the territory of a Member is authorized or established formally or in effect by that Member as the sole supplier of that service;

(i) "service consumer" means any person that receives or uses a service;

(j) "person" means either a natural person or a juridical person;

(k) "natural person of another Member" means a natural person who resides in the territory of that other Member or any other Member, and who under the law of that other Member:

(i) is a national of that other Member; or

(ii) has the right of permanent residence in that other Member, in the case of a Member which:

1. does not have nationals; or

2. accords substantially the same treatment to its permanent residents as it does to its nationals in respect of measures affecting trade in services, as notified in its acceptance of or accession to the WTO Agreement, provided that no Member is obligated to accord to such permanent residents treatment more favourable than would be accorded by that other Member to such permanent residents. Such notification shall include the assurance to assume, with respect to those permanent residents, in accordance with its laws and regulations, the same responsibilities that other Member bears with respect to its nationals;

(l) "juridical person" means any legal entity duly constituted or otherwise organized under applicable law, whether for profit or otherwise, and whether privately-owned or governmentally-owned, including any corporation, trust, partnership, joint venture, sole proprietorship or association;

(m) "juridical person of another Member" means a juridical person which is either:

(i) constituted or otherwise organized under the law of that other Member, and is engaged in substantive business operations in the territory of that Member or any other Member; or

(ii) in the case of the supply of a service through commercial presence, owned or controlled by:

1. natural persons of that Member; or

2. juridical persons of that other Member identified under subparagraph (i);

(n) a juridical person is:

(i) "owned" by persons of a Member if more than 50 per cent of the equity interest in it is beneficially owned by persons of that Member;

(ii) "controlled" by persons of a Member if such persons have the power to name a majority of its directors or otherwise to legally direct its actions;

(iii) "affiliated" with another person when it controls, or is controlled by, that other person; or when it and the other person are both controlled by the same person;

(o) "direct taxes" comprise all taxes on total income, on total capital or on elements of income or of capital, including taxes on gains from the alienation of property, taxes on estates, inheritances and gifts, and taxes on the total amounts of wages or salaries paid by enterprises, as well as taxes on capital appreciation.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXVIII

1. Article XXVIII(k)(ii)2

145. On 1 March 1995, the Council for Trade in Services took note of four communications to the effect that the concerned Members accord substantially the same treatment to their permanent residents as they accord to their nationals with respect to measures affecting trade in services and that they assume, with respect to those permanent residents, the same responsibilities that other members bear with respect to their nationals.[183] At its meeting of 2, 9 and 24 October 2003 the Council took note of a similar notification.[184]

XXXIII. ARTICLE XXIX

A. TEXT OF ARTICLE XXIX

Article XXIX
Annexes

The Annexes to this Agreement are an integral part of this Agreement.

[183] S/C/N/1, S/C/N/2, S/C/N/3 and S/C/N/5.
[184] S/C/N/232.

B. INTERPRETATION AND APPLICATION OF ARTICLE XXIX

No jurisprudence or decision of a competent WTO body.

XXXIV. ANNEX ON ARTICLE II EXEMPTIONS

A. TEXT OF THE ANNEX ON ARTICLE II EXEMPTIONS

Annex on Article II Exemptions

Scope

1. This Annex specifies the conditions under which a Member, at the entry into force of this Agreement, is exempted from its obligations under paragraph 1 of Article II.

2. Any new exemptions applied for after the date of entry into force of the WTO Agreement shall be dealt with under paragraph 3 of Article IX of that Agreement.

Review

3. The Council for Trade in Services shall review all exemptions granted for a period of more than 5 years. The first such review shall take place no more than 5 years after the entry into force of the WTO Agreement.

4. The Council for Trade in Services in a review shall:

(a) examine whether the conditions which created the need for the exemption still prevail; and

(b) determine the date of any further review.

Termination

5. The exemption of a Member from its obligations under paragraph 1 of Article II of the Agreement with respect to a particular measure terminates on the date provided for in the exemption.

6. In principle, such exemptions should not exceed a period of 10 years. In any event, they shall be subject to negotiation in subsequent trade liberalizing rounds.

7. A Member shall notify the Council for Trade in Services at the termination of the exemption period that the inconsistent measure has been brought into conformity with paragraph 1 of Article II of the Agreement.

List of Article II *Exemptions*

[The agreed list of exemptions under paragraph 2 of Article II is omitted.]

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON ARTICLE II EXEMPTIONS

1. Paragraph 3

146. At the meeting of the Council for Trade in Services of 18 October 1999, it was agreed that the first review of Article II (MFN) Exemptions had begun.[185]

2. Paragraph 4

147. The Council conducted a review of MFN exemptions at meetings held on 29 May 2000, 5 July 2000 and 5 October 2000.[186] The Council decided that a further review of MFN exemptions should take place no later than June 2004.[187]

3. Paragraph 7

148. With respect to the format for notifications required under paragraph 7 of the Annex on Article II Exemptions, see the Guidelines for Notifications under the *General Agreement on Trade in Services*.[188]

4. Terminations, reductions and rectifications of MFN exemptions

149. At its meeting of 5 June 2002, the Council for Trade in Services adopted Procedures for the Certification of Terminations, Reductions and Rectifications of Article II (MFN) Exemptions.[189]

XXXV. ANNEX ON MOVEMENT OF NATURAL PERSONS SUPPLYING SERVICES UNDER THE AGREEMENT

A. TEXT OF THE ANNEX ON MOVEMENT OF NATURAL PERSONS SUPPLYING SERVICES UNDER THE AGREEMENT

Annex on Movement of Natural Persons Supplying Services under the Agreement

1. This Annex applies to measures affecting natural persons who are service suppliers of a Member, and natural persons of a Member who are employed by a service supplier of a Member, in respect of the supply of a service.

2. The Agreement shall not apply to measures affecting natural persons seeking access to the employment market of a Member, nor shall it apply to measures regarding citizenship, residence or employment on a permanent basis.

3. In accordance with Parts III and IV of the Agreement, Members may negotiate specific commitments applying to the movement of all categories of natural persons supplying services under the Agreement. Natural persons covered by a specific commitment shall be allowed to supply the service in accordance with the terms of that commitment.

---

[185] S/C/M/40, para. 53.
[186] See S/C/M/44, S/C/M/45 and S/C/M/47.
[187] S/C/M/53, Section A.
[188] S/C/M/1, paras. 10–11. The approved Guidelines can be found in S/L/5.
[189] S/L/106.

4. The Agreement shall not prevent a Member from applying measures to regulate the entry of natural persons into, or their temporary stay in, its territory, including those measures necessary to protect the integrity of, and to ensure the orderly movement of natural persons across, its borders, provided that such measures are not applied in such a manner as to nullify or impair the benefits accruing to any Member under the terms of a specific commitment.[13]

(*footnote original*) [13] The sole fact of requiring a visa for natural persons of certain Members and not for those of others shall not be regarded as nullifying or impairing benefits under a specific commitment.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON MOVEMENT OF NATURAL PERSONS SUPPLYING SERVICES UNDER THE AGREEMENT

1. Measures relating to the entry and stay of natural persons

150. At its meeting of 1 March 1995, the Council for Trade in Services adopted a conclusion of the Sub-Committee on Services concerning measures relating to the entry and stay of natural persons.[190] The Sub-Committee had dealt with the question on what basis a distinction between "temporary" and "permanent" residency and employment should be made. The Sub-Committee, however, ultimately decided that the commitments set out in the individual countries' schedules were sufficiently clear, so that there was no need for further multilateral work on this issue.[191]

XXXVI. ANNEX ON AIR TRANSPORT SERVICES

A. TEXT OF THE ANNEX ON AIR TRANSPORT SERVICES

Annex on Air Transport Services

1. This Annex applies to measures affecting trade in air transport services, whether scheduled or non-scheduled, and ancillary services. It is confirmed that any specific commitment or obligation assumed under this Agreement shall not reduce or affect a Member's obligations under bilateral or multilateral agreements that are in effect on the date of entry into force of the WTO Agreement.

2. The Agreement, including its dispute settlement procedures, shall not apply to measures affecting:

(a) traffic rights, however granted; or

(b) services directly related to the exercise of traffic rights, except as provided in paragraph 3 of this Annex.

3. The Agreement shall apply to measures affecting:

(a) aircraft repair and maintenance services;

(b) the selling and marketing of air transport services;

(c) computer reservation system (CRS) services.

4. The dispute settlement procedures of the Agreement may be invoked only where obligations or specific commitments have been assumed by the concerned Members and where dispute settlement procedures in bilateral and other multilateral agreements or arrangements have been exhausted.

5. The Council for Trade in Services shall review periodically, and at least every five years, developments in the air transport sector and the operation of this Annex with a view to considering the possible further application of the Agreement in this sector.

6. Definitions:

(a) 'Aircraft repair and maintenance services' mean such activities when undertaken on an aircraft or a part thereof while it is withdrawn from service and do not include so-called line maintenance.

(b) 'Selling and marketing of air transport services' mean opportunities for the air carrier concerned to sell and market freely its air transport services including all aspects of marketing such as market research, advertising and distribution. These activities do not include the pricing of air transport services nor the applicable conditions.

(c) 'Computer reservation system (CRS) services' mean services provided by computerised systems that contain information about air carriers' schedules, availability, fares and fare rules, through which reservations can be made or tickets may be issued.

(d) 'Traffic rights' mean the right for scheduled and non-scheduled services to operate and/or to carry passengers, cargo and mail for remuneration or hire from, to, within, or over the territory of a Member, including points to be served, routes to be operated, types of traffic to be carried, capacity to be provided, tariffs to be charged and their conditions, and criteria for designation of airlines, including such criteria as number, ownership, and control.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON AIR TRANSPORT SERVICES

1. Paragraph 5

151. The Council conducted the review mandated under paragraph 5 of the Air Transport Annex at meet-

[190] S/C/M/1, para. 14.
[191] G/C/1, para. 6.

ings held on 28–29 September 2000, 4 December 2000, 9 October 2001 and 18 March 2002.[192] The Council decided at its meeting of 2, 9 and 24 October 2003 on the conclusion of the review and the start-date for the next one:

"The Council decides to conclude the first review mandated under paragraph 5 of the Annex on Air Transport Services. While noting that the Annex requires that a review be conducted at least every five years, the Council decides that the formal commencement of the second review shall take place at the last regular meeting of the Council for Trade in Services of 2005. This shall not prejudge Members' interpretation of paragraph 5 of the Annex."[193]

XXXVII. ANNEX ON FINANCIAL SERVICES

A. TEXT OF THE ANNEX ON FINANCIAL SERVICES

Annex on Financial Services

1. *Scope and Definition*

(a) This Annex applies to measures affecting the supply of financial services. Reference to the supply of a financial service in this Annex shall mean the supply of a service as defined in paragraph 2 of Article I of the Agreement.

(b) For the purposes of subparagraph 3(b) of Article I of the Agreement, 'services supplied in the exercise of governmental authority' means the following:

(i) activities conducted by a central bank or monetary authority or by any other public entity in pursuit of monetary or exchange rate policies;

(ii) activities forming part of a statutory system of social security or public retirement plans; and

(iii) other activities conducted by a public entity for the account or with the guarantee or using the financial resources of the Government.

(c) For the purposes of subparagraph 3(b) of Article I of the Agreement, if a Member allows any of the activities referred to in subparagraphs (b) (ii) or (b) (iii) of this paragraph to be conducted by its financial service suppliers in competition with a public entity or a financial service supplier, 'services' shall include such activities.

(d) Subparagraph 3(c) of Article I of the Agreement shall not apply to services covered by this Annex.

2. *Domestic Regulation*

(a) Notwithstanding any other provisions of the Agreement, a Member shall not be prevented from taking measures for prudential reasons, including for the protection of investors, depositors, policy holders or persons to whom a fiduciary duty is owed by a financial service supplier, or to ensure the integrity and stability of the financial system. Where such measures do not conform with the provisions of the Agreement, they shall not be used as a means of avoiding the Member's commitments or obligations under the Agreement.

(b) Nothing in the Agreement shall be construed to require a Member to disclose information relating to the affairs and accounts of individual customers or any confidential or proprietary information in the possession of public entities.

3. *Recognition*

(a) A Member may recognize prudential measures of any other country in determining how the Member's measures relating to financial services shall be applied. Such recognition, which may be achieved through harmonization or otherwise, may be based upon an agreement or arrangement with the country concerned or may be accorded autonomously.

(b) A Member that is a party to such an agreement or arrangement referred to in subparagraph (a), whether future or existing, shall afford adequate opportunity for other interested Members to negotiate their accession to such agreements or arrangements, or to negotiate comparable ones with it, under circumstances in which there would be equivalent regulation, oversight, implementation of such regulation, and, if appropriate, procedures concerning the sharing of information between the parties to the agreement or arrangement. Where a Member accords recognition autonomously, it shall afford adequate opportunity for any other Member to demonstrate that such circumstances exist.

(c) Where a Member is contemplating according recognition to prudential measures of any other country, paragraph 4(b) of Article VII shall not apply.

4. *Dispute Settlement*

Panels for disputes on prudential issues and other financial matters shall have the necessary expertise relevant to the specific financial service under dispute.

5. *Definitions*

For the purposes of this Annex:

(a) A financial service is any service of a financial nature offered by a financial service supplier of a Member. Financial services include all insurance and insurance-related services, and all banking and other financial services (excluding insurance). Financial services include the following activities:

[192] S/C/M/49, S/C/M/50, S/C/M/57 and S/C/M/62.
[193] S/C/M/68, paras. 115–116.

Insurance and insurance-related services

(i) Direct insurance (including co-insurance) :

(A) life

(B) non-life

(ii) Reinsurance and retrocession;

(iii) Insurance intermediation, such as brokerage and agency;

(iv) Services auxiliary to insurance, such as consultancy, actuarial, risk assessment and claim settlement services.

Banking and other financial services (excluding insurance)

(v) Acceptance of deposits and other repayable funds from the public;

(vi) Lending of all types, including consumer credit, mortgage credit, factoring and financing of commercial transactions;

(vii) Financial leasing;

(viii) All payment and money transmission services, including credit, charge and debit cards, travellers' cheques and bankers' drafts;

(ix) Guarantees and commitments;

(x) Trading for own account or for account of customers, whether on an exchange, in an over-the-counter market or otherwise, the following:

(A) money market instruments (including cheques, bills, certificates of deposits);

(B) foreign exchange;

(C) derivative products including, but not limited to, futures and options;

(D) exchange rate and interest rate instruments, including products such as swaps, forward rate agreements;

(E) transferable securities;

(F) other negotiable instruments and financial assets, including bullion.

(xi) Participation in issues of all kinds of securities, including underwriting and placement as agent (whether publicly or privately) and provision of services related to such issues;

(xii) Money broking;

(xiii) Asset management, such as cash or portfolio management, all forms of collective investment management, pension fund management, custodial, depository and trust services;

(xiv) Settlement and clearing services for financial assets, including securities, derivative products, and other negotiable instruments;

(xv) Provision and transfer of financial information, and financial data processing and related software by suppliers of other financial services;

(xvi) Advisory, intermediation and other auxiliary financial services on all the activities listed in subparagraphs (v) through (xv), including credit reference and analysis, investment and portfolio research and advice, advice on acquisitions and on corporate restructuring and strategy.

(b) A financial service supplier means any natural or juridical person of a Member wishing to supply or supplying financial services but the term 'financial service supplier' does not include a public entity.

(c) 'Public entity' means:

(i) a government, a central bank or a monetary authority, of a Member, or an entity owned or controlled by a Member, that is principally engaged in carrying out governmental functions or activities for governmental purposes, not including an entity principally engaged in supplying financial services on commercial terms; or

(ii) a private entity, performing functions normally performed by a central bank or monetary authority, when exercising those functions.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON FINANCIAL SERVICES

No jurisprudence or decision of a competent WTO body.

XXXVIII. SECOND ANNEX ON FINANCIAL SERVICES

A. TEXT OF THE SECOND ANNEX ON FINANCIAL SERVICES

Second Annex on Financial Services

1. Notwithstanding Article II of the Agreement and paragraphs 1 and 2 of the Annex on Article II Exemptions, a Member may, during a period of 60 days beginning four months after the date of entry into force of the WTO Agreement, list in that Annex measures relating to financial services which are inconsistent with paragraph 1 of Article II of the Agreement.

2. Notwithstanding Article XXI of the Agreement, a Member may, during a period of 60 days beginning four months after the date of entry into force of the WTO Agreement, improve, modify or withdraw all or part of the specific commitments on financial services inscribed in its Schedule.

3. The Council for Trade in Services shall establish any procedures necessary for the application of paragraphs 1 and 2.

B. INTERPRETATION AND APPLICATION OF THE SECOND ANNEX ON FINANCIAL SERVICES

No jurisprudence or decision of a competent WTO body.

XXXIX. ANNEX ON NEGOTIATIONS ON MARITIME TRANSPORT SERVICES

A. TEXT OF THE ANNEX ON NEGOTIATIONS ON MARITIME TRANSPORT SERVICES

Annex on Negotiations on Maritime Transport Services

1. Article II and the Annex on Article II Exemptions, including the requirement to list in the Annex any measure inconsistent with most-favoured-nation treatment that a Member will maintain, shall enter into force for international shipping, auxiliary services and access to and use of port facilities only on:

(a) the implementation date to be determined under paragraph 4 of the Ministerial Decision on Negotiations on Maritime Transport Services; or,

(b) should the negotiations not succeed, the date of the final report of the Negotiating Group on Maritime Transport Services provided for in that Decision.

2. Paragraph 1 shall not apply to any specific commitment on maritime transport services which is inscribed in a Member's Schedule.

3. From the conclusion of the negotiations referred to in paragraph 1, and before the implementation date, a Member may improve, modify or withdraw all or part of its specific commitments in this sector without offering compensation, notwithstanding the provisions of Article XXI.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON NEGOTIATIONS ON MARITIME TRANSPORT SERVICES

No jurisprudence or decision of a competent WTO body.

XL. ANNEX ON TELECOMMUNICATIONS

A. TEXT OF THE ANNEX ON TELECOMMUNICATIONS

Annex on Telecommunications

1. *Objectives*

Recognizing the specificities of the telecommunications services sector and, in particular, its dual role as a distinct sector of economic activity and as the underlying transport means for other economic activities, the Members have agreed to the following Annex with the objective of elaborating upon the provisions of the Agreement with respect to measures affecting access to and use of public telecommunications transport networks and services. Accordingly, this Annex provides notes and supplementary provisions to the Agreement.

2. *Scope*

(a) This Annex shall apply to all measures of a Member that affect access to and use of public telecommunications transport networks and services.[14]

(*footnote original*) [14] This paragraph is understood to mean that each Member shall ensure that the obligations of this Annex are applied with respect to suppliers of public telecommunications transport networks and services by whatever measures are necessary.

(b) This Annex shall not apply to measures affecting the cable or broadcast distribution of radio or television programming.

(c) Nothing in this Annex shall be construed:

(i) to require a Member to authorize a service supplier of any other Member to establish, construct, acquire, lease, operate, or supply telecommunications transport networks or services, other than as provided for in its Schedule; or

(ii) to require a Member (or to require a Member to oblige service suppliers under its jurisdiction) to establish, construct, acquire, lease, operate or supply telecommunications transport networks or services not offered to the public generally.

3. *Definitions*

For the purposes of this Annex:

(a) 'Telecommunications' means the transmission and reception of signals by any electromagnetic means.

(b) 'Public telecommunications transport service' means any telecommunications transport service required, explicitly or in effect, by a Member to be offered to the public generally. Such services may include, *inter alia*, telegraph, telephone, telex, and data transmission typically involving the real-time transmission of customer-supplied

information between two or more points without any end-to-end change in the form or content of the customer's information.

(c) 'Public telecommunications transport network' means the public telecommunications infrastructure which permits telecommunications between and among defined network termination points.

(d) 'Intra-corporate communications' means telecommunications through which a company communicates within the company or with or among its subsidiaries, branches and, subject to a Member's domestic laws and regulations, affiliates. For these purposes, 'subsidiaries', 'branches' and, where applicable, 'affiliates' shall be as defined by each Member. 'Intra-corporate communications' in this Annex excludes commercial or non-commercial services that are supplied to companies that are not related subsidiaries, branches or affiliates, or that are offered to customers or potential customers.

(e) Any reference to a paragraph or subparagraph of this Annex includes all subdivisions thereof.

4. *Transparency*

In the application of Article III of the Agreement, each Member shall ensure that relevant information on conditions affecting access to and use of public telecommunications transport networks and services is publicly available, including: tariffs and other terms and conditions of service; specifications of technical interfaces with such networks and services; information on bodies responsible for the preparation and adoption of standards affecting such access and use; conditions applying to attachment of terminal or other equipment; and notifications, registration or licensing requirements, if any.

5. *Access to and Use of Public Telecommunications Transport Networks and Services*

(a) Each Member shall ensure that any service supplier of any other Member is accorded access to and use of public telecommunications transport networks and services on reasonable and non-discriminatory terms and conditions, for the supply of a service included in its Schedule. This obligation shall be applied, *inter alia*, through paragraphs (b) through (f).[15]

(*footnote original*) [15] The term 'non-discriminatory' is understood to refer to most-favoured-nation and national treatment as defined in the Agreement, as well as to reflect sector-specific usage of the term to mean 'terms and conditions no less favourable than those accorded to any other user of like public telecommunications transport networks or services under like circumstances'.

(b) Each Member shall ensure that service suppliers of any other Member have access to and use of any public telecommunications transport network or service offered within or across the border of that Member, including private leased circuits, and to this end shall ensure, subject to paragraphs (e) and (f), that such suppliers are permitted:

(i) to purchase or lease and attach terminal or other equipment which interfaces with the network and which is necessary to supply a supplier's services;

(ii) to interconnect private leased or owned circuits with public telecommunications transport networks and services or with circuits leased or owned by another service supplier; and

(iii) to use operating protocols of the service supplier's choice in the supply of any service, other than as necessary to ensure the availability of telecommunications transport networks and services to the public generally.

(c) Each Member shall ensure that service suppliers of any other Member may use public telecommunications transport networks and services for the movement of information within and across borders, including for intra-corporate communications of such service suppliers, and for access to information contained in data bases or otherwise stored in machine-readable form in the territory of any Member. Any new or amended measures of a Member significantly affecting such use shall be notified and shall be subject to consultation, in accordance with relevant provisions of the Agreement.

(d) Notwithstanding the preceding paragraph, a Member may take such measures as are necessary to ensure the security and confidentiality of messages, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction on trade in services.

(e) Each Member shall ensure that no condition is imposed on access to and use of public telecommunications transport networks and services other than as necessary:

(i) to safeguard the public service responsibilities of suppliers of public telecommunications transport networks and services, in particular their ability to make their networks or services available to the public generally;

(ii) to protect the technical integrity of public telecommunications transport networks or services; or

(iii) to ensure that service suppliers of any other Member do not supply services unless permitted pursuant to commitments in the Member's Schedule.

(f) Provided that they satisfy the criteria set out in paragraph (e), conditions for access to and use of public telecommunications transport networks and services may include:

(i) restrictions on resale or shared use of such services;

(ii) a requirement to use specified technical interfaces, including interface protocols, for inter-connection with such networks and services;

(iii) requirements, where necessary, for the inter-operability of such services and to encourage the achievement of the goals set out in paragraph 7(a);

(iv) type approval of terminal or other equipment which interfaces with the network and technical requirements relating to the attachment of such equipment to such networks;

(v) restrictions on inter-connection of private leased or owned circuits with such networks or services or with circuits leased or owned by another service supplier; or

(vi) notification, registration and licensing.

(g) Notwithstanding the preceding paragraphs of this section, a developing country Member may, consistent with its level of development, place reasonable conditions on access to and use of public telecommunications transport networks and services necessary to strengthen its domestic telecommunications infrastructure and service capacity and to increase its participation in international trade in telecommunications services. Such conditions shall be specified in the Member's Schedule.

6. *Technical Cooperation*

(a) Members recognize that an efficient, advanced telecommunications infrastructure in countries, particularly developing countries, is essential to the expansion of their trade in services. To this end, Members endorse and encourage the participation, to the fullest extent practicable, of developed and developing countries and their suppliers of public telecommunications transport networks and services and other entities in the development programmes of international and regional organizations, including the International Telecommunication Union, the United Nations Development Programme, and the International Bank for Reconstruction and Development.

(b) Members shall encourage and support telecommunications cooperation among developing countries at the international, regional and sub-regional levels.

(c) In cooperation with relevant international organizations, Members shall make available, where practicable, to developing countries information with respect to telecommunications services and developments in telecommunications and information technology to assist in strengthening their domestic telecommunications services sector.

(d) Members shall give special consideration to opportunities for the least-developed countries to encourage foreign suppliers of telecommunications services to assist in the transfer of technology, training and other activities that support the development of their telecommunications infrastructure and expansion of their telecommunications services trade.

7. *Relation to International Organizations and Agreements*

(a) Members recognize the importance of international standards for global compatibility and inter-operability of telecommunication networks and services and undertake to promote such standards through the work of relevant international bodies, including the International Telecommunication Union and the International Organization for Standardization.

(b) Members recognize the role played by intergovernmental and non-governmental organizations and agreements in ensuring the efficient operation of domestic and global telecommunications services, in particular the International Telecommunication Union. Members shall make appropriate arrangements, where relevant, for consultation with such organizations on matters arising from the implementation of this Annex.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON TELECOMMUNICATIONS

1. Application to access and use by scheduled suppliers of basic telecommunications services

152. In examining which suppliers and services are entitled to access and use public telecommunications transport networks and services, the Panel on *Mexico – Telecoms* observed that:

> "[T]he wording of Section 2(a) does not specify that the provision is limited to measures affecting access to and use of public telecommunications transport networks and services by only *certain* services or service sectors. The ordinary meaning of the words in Section 2(a) suggests therefore that the scope of the Annex includes *all* measures that affect access to or use of public telecommunications transport networks and services with regard to *all* services, including basic telecommunications services."[194]

153. Likewise, referring to Section 5(a) of the Annex, the Panel on *Mexico – Telecoms* stated that:

> "Section 5 (a) of the Annex states that the obligation to ensure access to and use of public telecommunications transport networks and services shall apply for the

[194] Panel Report on *Mexico – Telecoms*, para. 7.278.

benefit of 'any service supplier of any other Member' for the supply of 'a service included in its schedule'. This language does not explicitly exclude suppliers of basic telecommunications services. On the contrary, Section 5(a) speaks of 'any' service supplier. It also speaks of a 'service included' in a Member's schedule which, in the case of any Member, can, and for many Members does, include basic telecommunications services. We consider this to be a further indication that the Annex is not limited in its application to exclude measures ensuring the access to and use of public telecommunications transport networks and services for the supply of any service, including basic telecommunications services."[195]

154. The Panel on *Mexico – Telecoms* observed further that it would be "unreasonable to suppose that the access and use of public telecommunications transport networks and services that is essential to the international supply of basic telecommunications services was not intended to be covered by the Annex". The Panel noted:

"If the Annex did not apply to measures affecting access to and use of public telecommunications transport networks and services for basic telecommunications services, Members could effectively prohibit any supply other than that which originated and terminated within the same suppliers' network, even where commitments were undertaken, thereby rendering most basic telecommunications commitments without economic value."[196]

2. Section 5(a)

(a) Relationship of paragraph (a) to the other parts of Section 5

155. The Panel on *Mexico – Telecoms*, in assessing the relationship between paragraph (a) and the other paragraphs of Section 5, stated:

"We note that the obligation in paragraph (a) 'shall be applied, *inter alia*, through paragraphs (b) through (f)'. . . . An obligation cannot be applied 'through' another provision if that obligation is read in isolation from that provision. For an obligation in one provision to be applied 'through' another provision, it is evident that the two provisions must be interrelated and must inform each other. We read paragraph (a), in other words, as containing an obligation that *informs* paragraphs (b) through (f), and must be read taking into account paragraphs (b) through (f)."[197]

156. In examining further the relationship between paragraph (a) and the other paragraphs of Section 5, the Panel on *Mexico – Telecoms* determined that the "reasonable and non-discriminatory" standard in paragraph (a) applies only to measures that are permissible under paragraph (e):

"We determined earlier that paragraph (a) should be read together with the other paragraphs of Section 5. We note that paragraph (a) addresses 'terms and conditions' for access to public telecommunications transport networks and services, which must be 'reasonable and non-discriminatory'. Paragraph (e) requires that no condition other than as necessary to achieve any of three policy objectives contained in subparagraphs (e)(i) to (iii) shall be imposed by a Member. We infer that whenever a condition is 'necessary' under paragraph (e), it must, in addition, be 'reasonable and non-discriminatory' under paragraph (a). Conversely, if a condition is not 'necessary' to fulfil at least one of the three policy objectives set out under subparagraphs (i) to (iii), paragraph (e) *prohibits* the imposition of such a condition, which suggests that there may be no need to analyse in that case whether that condition would otherwise be 'reasonable and non-discriminatory'.

. . .

We conclude that the obligation contained in Section 5(a) informs the other paragraphs of Section 5, and is likewise informed by elements of these paragraphs. We cannot therefore examine what constitutes 'reasonable terms and conditions' for access to and use of public telecommunications transport networks and services in isolation from the question of whether or not a particular condition may be imposed, an issue that is addressed in paragraph (e)."[198]

(b) Access and use "on reasonable . . . terms and conditions"

(i) Whether rates for access and use constitute "terms"

157. The Panel on *Mexico – Telecoms* stated that "the ordinary meaning of the word 'terms' suggests that it would include pricing elements, including rates charged for access to and use of public telecommunications transport networks and services".[199]

(ii) Whether rates for access and use are subject to examination as "reasonable" terms

158. The Panel on *Mexico – Telecoms* found that rates for access and use can be examined under Section 5 to establish whether or not they constitute "reasonable" terms. The Panel also found that "access to and use of public telecommunications transport networks and services on 'reasonable' terms includes questions of *pricing* of that access and use".[200]

[196] Panel Report on *Mexico – Telecoms*, para. 7.286.
[197] Panel Report on *Mexico – Telecoms*, para. 7.302.
[198] Panel Report on *Mexico – Telecoms*, paras. 7.306 and 7.309.
[199] Panel Report on *Mexico – Telecoms*, para. 7.325.
[200] Panel Report on *Mexico – Telecoms*, para. 7.333; see also paras. 7.331–7.332, and para. 164 of this Chapter.

(iii) Rates for access and use that are "reasonable"

159. The Panel on *Mexico – Telecoms*, in examining when rates for access and use are "reasonable", and applying the criterion to the facts of the case, stated:

> "We have previously noted that Mexico's Reference Paper contains obligations additional to those in the Annex. We consider therefore that rates charged for access to and use of public telecommunications transport networks and services may still be 'reasonable', even if generally higher than rates for interconnection that are cost-oriented in terms of Section 2.2(b) of Mexico's Reference Paper. . . .
>
> We have already determined in part B of these findings that the rates charged to interconnect United States suppliers of the services at issue to public telecommunications transport networks and services in Mexico exceed cost-oriented rates by a substantial margin.[201] We find that rates which exceed cost-based rates to this extent, and whose uniform nature excludes price competition in the relevant market of the telecommunications services bound under Mexico's Schedule, do not provide access to and use of public telecommunications transport networks and services in Mexico 'on reasonable . . . terms'."[202]

3. Section 5(b)

(a) Relationship of paragraph (b) to the other parts of Section 5

160. Recognizing that the relationship of paragraph (b) with the other parts of Section 5 was more "straightforward" than that of paragraph (a),[203] the Panel on *Mexico – Telecoms* stated:

> "The obligations in paragraph (b) apply 'subject to paragraphs (e) and (f)'. We understand this to mean that the obligations in paragraph (b) are *subordinated to*, and are, therefore, *qualified by*, paragraphs (e) and (f). The obligations in paragraph (b) are therefore *subject to* any condition that a Member may impose that is necessary to achieve one of the policy objectives set out in paragraph (e)(i) to (iii).[204] We recall that paragraph (b) is informed also by paragraph (a), and that the obligation in the latter provision to ensure reasonable and non-discriminatory access also applies to paragraph (b).
>
> (. . .)
>
> We conclude that an obligation arises for a Member under paragraph 5(b) subject to any term or condition that a Member may impose in a manner consistent with the provisions of paragraphs (a) and (e)."[205]

(b) Obligation to provide access to and use of private leased circuits

161. The Panel on *Mexico – Telecoms* stated that it

> "considers Mexico to have undertaken commitments on the supply of the services at issue by commercial agencies through commercial presence, for which access to and use of private leased circuits is not only relevant but, by Mexico's own definition in its schedule, is essential. Therefore, we find that Mexico has failed to ensure access to and use of private leased circuits for the supply of the committed services in a manner consistent with Section 5(b) of the Annex on Telecommunications."[206]

4. Sections 5(e) and (f)

(a) Whether rates for access and use constitute "conditions"

162. The Panel on *Mexico – Telecoms* noted that Section 5 (f), which lists examples of "conditions", does not refer to specific pricing measures.[207] It concluded that, since "whether or not to charge, or the existence of a price, does not appear to fit within the meaning of the language of 5(f) and its subparagraphs", pricing measures such as rates are not "conditions" within the meaning of Section 5(e).[208]

(b) Meaning of "necessary" in paragraph (e)

163. The Panel on *Mexico – Telecoms*, in considering the alternative case that rates for access and use were "conditions" as well as "terms", examined the meaning of the term "necessary". It noted that the meaning of "necessary" could range from "indispensable" to achieving a policy goal, to merely "making a contribution" to that policy goal.[209] The Panel found:

> "The interpretation of the word 'necessary' in Section 5(e) as meaning 'indispensable' would however leave no room for an analysis of whether terms were 'reasonable'. If cost-based rates were 'indispensable' to reach the policy objective, then these rates surely could not also be unreasonable. Such an interpretation would empty the 'reasonable' standard in Section 5(a) of much of its meaning."[210]

164. The Panel therefore concluded that the meaning of "necessary" in paragraph (e) was closer to "making a contribution" to a policy goal, since then "an examination under paragraph (a) of whether that rate was also 'reasonable' would still have meaning".[211]

---

[201] (*footnote original*) See para. 7.216.
[202] Panel Report on *Mexico – Telecoms*, paras. 7.334–7.335.
[203] Panel Report on *Mexico – Telecoms*, para. 7.307.
[204] (*footnote original*) For an interpretation of the words "subject to", see also Appellate Body Report, *Canada – Dairy*, paragraph 134.
[205] Panel Report on *Mexico – Telecoms*, paras. 7.308–7.309.
[206] Panel Report on *Mexico – Telecoms*, para. 7.381.
[207] Panel Report on *Mexico – Telecoms*, para. 7.326.
[208] Panel Report on *Mexico – Telecoms*, para. 7.327.
[209] Panel Report on *Mexico – Telecoms*, para. 7.338.
[210] Panel Report on *Mexico – Telecoms*, para. 7.341.
[211] Panel Report on *Mexico – Telecoms*, para. 7.342.

(c) Measures to prevent supply of an unscheduled service in paragraph (e)

165. The Panel on *Mexico – Telecoms* found that paragraph (e)(iii), permitting conditions to be imposed "to ensure that service suppliers of any other Member do not supply services unless permitted pursuant to commitments in the Members' Schedule", does not apply to a measure that simply prevents the supply of a service on which a scheduled commitment has been made.[212]

5. Section 5(g)

166. In response to the argument that Section 5(g) allowed Mexico as a developing country to place reasonable conditions on access and use, the Panel on *Mexico – Telecoms* observed:

> "Section 5(g) recognizes the *right* of developing countries *to inscribe* limitations in their schedules for the objectives recognized in Section 5(g). The Panel notes that Mexico's Schedule of Specific Commitments does not include any limitations referring to Section 5(g) or to the development objectives mentioned therein. Without such limitations in Mexico's Schedule, Section 5(g) does not permit a departure from specific commitments which Mexico has voluntarily and explicitly scheduled."[213]

6. Relationship between Annex obligations and Reference Paper commitments

167. The Panel on *Mexico – Telecoms* compared Annex obligations and Reference Paper commitments in the following terms:

> "The Panel noted that, although the obligations in the Annex and the Reference Paper may overlap in certain respects, there are clear differences between the two instruments. First, the Annex sets out general obligations for access to and use of public telecommunications transport networks and services, applicable to *all* Members and *all* sectors in which specific commitments have been undertaken. Reference Paper obligations, as additional commitments, are applicable only by Members that have included them in their schedules, and they apply only to basic telecommunications. Second, while the Annex applies to all operators of public telecommunications transport networks and services within a Member, regardless of their competitive situation, the Reference Paper obligations on interconnection apply only with respect to 'major suppliers'. Third, the Annex broadly deals with 'access to and use of' public telecommunications transport networks and services, while the Reference Paper focuses on specific 'competitive safeguards' and on 'interconnection'.[214]
>
> In spite of these differences, the Annex recognizes that its provisions relate to and build upon the obligations and disciplines contained in the Articles of the GATS – the Annex states expressly that it 'provides notes and supplementary provisions to the Agreement'.[215] Similarly, many of the provisions of the Reference Paper also draw from and add to existing obligations of the GATS, such as Articles III, VI, VIII and IX and the Annex on Telecommunications. Accordingly, there is a degree of overlap between the obligations of the Annex and the Reference Paper, despite their differences in scope, level of obligations, and specific detail provided. To the extent that the Reference Paper requires cost-oriented interconnection on reasonable terms and conditions, it supplements Annex Section 5, requiring additional obligations as regards 'major suppliers'. The Reference Paper commitments do not in this sense subtract from the Annex or render it redundant."[216]

XLI. ANNEX ON NEGOTIATIONS ON BASIC TELECOMMUNICATIONS

A. TEXT OF THE ANNEX ON NEGOTIATIONS ON BASIC TELECOMMUNICATIONS

Annex on Negotiations on Basic Telecommunications

1. Article II and the Annex on Article II Exemptions, including the requirement to list in the Annex any measure inconsistent with most-favoured-nation treatment that a Member will maintain, shall enter into force for basic telecommunications only on:

(a) the implementation date to be determined under paragraph 5 of the Ministerial Decision on Negotiations on Basic Telecommunications; or,

(b) should the negotiations not succeed, the date of the final report of the Negotiating Group on Basic Telecommunications provided for in that Decision.

2. Paragraph 1 shall not apply to any specific commitment on basic telecommunications which is inscribed in a Member's Schedule.

B. INTERPRETATION AND APPLICATION OF THE ANNEX ON NEGOTIATIONS ON BASIC TELECOMMUNICATIONS

No jurisprudence or decision of a competent WTO body.

---

[212] Panel Report on *Mexico – Telecoms*, para. 7.385.
[213] Panel Report on *Mexico – Telecoms*, para. 7.388.
[214] Panel Report on *Mexico – Telecoms*, para. 7.331.
[215] (*footnote original*) For example, footnote 2 of the Annex expressly refers to most favoured nation treatment (Article II) and national treatment (Article XVII). Section 4 (Transparency) builds upon Article III (Transparency). The Annex further elaborates on concepts contained in Articles VI (Domestic Regulation), VIII (Monopolies and exclusive service suppliers), and IX (Business practices).
[216] Panel Report on *Mexico – Telecoms*, paras. 7.331–7.332.

XLII. UNDERSTANDING ON COMMITMENTS IN FINANCIAL SERVICES

A. TEXT OF THE UNDERSTANDING ON COMMITMENTS IN FINANCIAL SERVICES

Understanding on Commitments in Financial Services

Participants in the Uruguay Round have been enabled to take on specific commitments with respect to financial services under the General Agreement on Trade in Services (hereinafter referred to as the 'Agreement') on the basis of an alternative approach to that covered by the provisions of Part III of the Agreement. It was agreed that this approach could be applied subject to the following understanding:

(i) it does not conflict with the provisions of the Agreement;

(ii) it does not prejudice the right of any Member to schedule its specific commitments in accordance with the approach under Part III of the Agreement;

(iii) resulting specific commitments shall apply on a most-favoured-nation basis;

(iv) no presumption has been created as to the degree of liberalization to which a Member is committing itself under the Agreement.

Interested Members, on the basis of negotiations, and subject to conditions and qualifications where specified, have inscribed in their schedule specific commitments conforming to the approach set out below.

A. Standstill

Any conditions, limitations and qualifications to the commitments noted below shall be limited to existing non-conforming measures.

B. Market Access

Monopoly Rights

1. In addition to Article VIII of the Agreement, the following shall apply:

Each Member shall list in its schedule pertaining to financial services existing monopoly rights and shall endeavour to eliminate them or reduce their scope. Notwithstanding subparagraph 1(b) of the Annex on Financial Services, this paragraph applies to the activities referred to in subparagraph 1(b)(iii) of the Annex.

Financial Services purchased by Public Entities

2. Notwithstanding Article XIII of the Agreement, each Member shall ensure that financial service suppliers of any other Member established in its territory are accorded most-favoured-nation treatment and national treatment as regards the purchase or acquisition of financial services by public entities of the Member in its territory.

Cross-border Trade

3. Each Member shall permit non-resident suppliers of financial services to supply, as a principal, through an intermediary or as an intermediary, and under terms and conditions that accord national treatment, the following services:

(a) insurance of risks relating to:

(i) maritime shipping and commercial aviation and space launching and freight (including satellites), with such insurance to cover any or all of the following: the goods being transported, the vehicle transporting the goods and any liability arising therefrom; and

(ii) goods in international transit;

(b) reinsurance and retrocession and the services auxiliary to insurance as referred to in subparagraph 5(a)(iv) of the Annex;

(c) provision and transfer of financial information and financial data processing as referred to in subparagraph 5(a)(xv) of the Annex and advisory and other auxiliary services, excluding intermediation, relating to banking and other financial services as referred to in subparagraph 5(a)(xvi) of the Annex.

4. Each Member shall permit its residents to purchase in the territory of any other Member the financial services indicated in:

(a) subparagraph 3(a);

(b) subparagraph 3(b); and

(c) subparagraphs 5(a)(v) to (xvi) of the Annex.

Commercial Presence

5. Each Member shall grant financial service suppliers of any other Member the right to establish or expand within its territory, including through the acquisition of existing enterprises, a commercial presence.

6. A Member may impose terms, conditions and procedures for authorization of the establishment and expansion of a commercial presence in so far as they do not circumvent the Member's obligation under paragraph 5 and they are consistent with the other obligations of the Agreement.

New Financial Services

7. A Member shall permit financial service suppliers of any other Member established in its territory to offer in its territory any new financial service.

Transfers of Information and Processing of Information

8. No Member shall take measures that prevent transfers of information or the processing of financial information, including transfers of data by electronic means, or that, subject to importation rules consistent with international agreements, prevent transfers of equipment, where such transfers of information, processing of financial information or transfers of equipment are necessary for the conduct of the ordinary business of a financial service supplier. Nothing in this paragraph restricts the right of a Member to protect personal data, personal privacy and the confidentiality of individual records and accounts so long as such right is not used to circumvent the provisions of the Agreement.

Temporary Entry of Personnel

9. (a) Each Member shall permit temporary entry into its territory of the following personnel of a financial service supplier of any other Member that is establishing or has established a commercial presence in the territory of the Member:

(i) senior managerial personnel possessing proprietary information essential to the establishment, control and operation of the services of the financial service supplier; and

(ii) specialists in the operation of the financial service supplier.

(b) Each Member shall permit, subject to the availability of qualified personnel in its territory, temporary entry into its territory of the following personnel associated with a commercial presence of a financial service supplier of any other Member:

(i) specialists in computer services, telecommunication services and accounts of the financial service supplier; and

(ii) actuarial and legal specialists.

Non-discriminatory Measures

10. Each Member shall endeavour to remove or to limit any significant adverse effects on financial service suppliers of any other Member of:

(a) non-discriminatory measures that prevent financial service suppliers from offering in the Member's territory, in the form determined by the Member, all the financial services permitted by the Member;

(b) non-discriminatory measures that limit the expansion of the activities of financial service suppliers into the entire territory of the Member;

(c) measures of a Member, when such a Member applies the same measures to the supply of both banking and securities services, and a financial service supplier of any other Member concentrates its activities in the provision of securities services; and

(d) other measures that, although respecting the provisions of the Agreement, affect adversely the ability of financial service suppliers of any other Member to operate, compete or enter the Member's market;

provided that any action taken under this paragraph would not unfairly discriminate against financial service suppliers of the Member taking such action.

11. With respect to the non-discriminatory measures referred to in subparagraphs 10(a) and (b), a Member shall endeavour not to limit or restrict the present degree of market opportunities nor the benefits already enjoyed by financial service suppliers of all other Members as a class in the territory of the Member, provided that this commitment does not result in unfair discrimination against financial service suppliers of the Member applying such measures.

C. National Treatment

1. Under terms and conditions that accord national treatment, each Member shall grant to financial service suppliers of any other Member established in its territory access to payment and clearing systems operated by public entities, and to official funding and refinancing facilities available in the normal course of ordinary business. This paragraph is not intended to confer access to the Member's lender of last resort facilities.

2. When membership or participation in, or access to, any self-regulatory body, securities or futures exchange or market, clearing agency, or any other organization or association, is required by a Member in order for financial service suppliers of any other Member to supply financial services on an equal basis with financial service suppliers of the Member, or when the Member provides directly or indirectly such entities, privileges or advantages in supplying financial services, the Member shall ensure that such entities accord national treatment to financial service suppliers of any other Member resident in the territory of the Member.

D. Definitions

For the purposes of this approach:

1. A non-resident supplier of financial services is a financial service supplier of a Member which supplies a financial service into the territory of another Member from an establishment located in the territory of another Member, regardless of whether such a financial service supplier has or has not a commercial presence in the territory of the Member in which the financial service is supplied.

2. 'Commercial presence' means an enterprise within a Member's territory for the supply of financial services

and includes wholly- or partly-owned subsidiaries, joint ventures, partnerships, sole proprietorships, franchising operations, branches, agencies, representative offices or other organizations.

3. A new financial service is a service of a financial nature, including services related to existing and new products or the manner in which a product is delivered, that is not supplied by any financial service supplier in the territory of a particular Member but which is supplied in the territory of another Member.

B. INTERPRETATION AND APPLICATION OF THE UNDERSTANDING ON COMMITMENTS IN FINANCIAL SERVICES

No jurisprudence or decision of a competent WTO body.

I. PREAMBLE

A. TEXT OF THE PREAMBLE

Members,

Desiring to reduce distortions and impediments to international trade, and taking into account the need to promote effective and adequate protection of intellectual property rights, and to ensure that measures and procedures to enforce intellectual property rights do not themselves become barriers to legitimate trade;

Recognizing, to this end, the need for new rules and disciplines concerning:

(a) the applicability of the basic principles of GATT 1994 and of relevant international intellectual property agreements or conventions;

(b) the provision of adequate standards and principles concerning the availability, scope and use of trade-related intellectual property rights;

(c) the provision of effective and appropriate means for the enforcement of trade-related intellectual property rights, taking into account differences in national legal systems;

(d) the provision of effective and expeditious procedures for the multilateral prevention and settlement of disputes between governments; and

(e) transitional arrangements aiming at the fullest participation in the results of the negotiations;

Recognizing the need for a multilateral framework of principles, rules and disciplines dealing with international trade in counterfeit goods;

Recognizing that intellectual property rights are private rights;

Recognizing the underlying public policy objectives of national systems for the protection of intellectual property, including developmental and technological objectives;

Recognizing also the special needs of the least-developed country Members in respect of maximum flexibility in the domestic implementation of laws and regulations in order to enable them to create a sound and viable technological base;

Emphasizing the importance of reducing tensions by reaching strengthened commitments to resolve disputes on trade-related intellectual property issues through multilateral procedures;

Desiring to establish a mutually supportive relationship between the WTO and the World Intellectual Property Organization (referred to in this Agreement as "WIPO") as well as other relevant international organizations;

Hereby agree as follows:

B. INTERPRETATION AND APPLICATION OF THE PREAMBLE

1. In *India – Patents (US)*, addressing the US claim that the Indian legal regime for patent protection for certain products was inconsistent with the *TRIPS Agreement*, the Appellate Body referred to a part of the preamble in its interpretation of Article 70.8(a):

> "The Panel's interpretation here [of Article 70.8(a)] is consistent also with the object and purpose of the TRIPS Agreement. The Agreement takes into account, inter alia, 'the need to promote effective and adequate protection of intellectual property rights'."[1]

PART I
GENERAL PROVISIONS AND BASIC PRINCIPLES

II. ARTICLE 1

A. TEXT OF ARTICLE 1

Article 1
Nature and Scope of Obligations

1. Members shall give effect to the provisions of this Agreement. Members may, but shall not be obliged to, implement in their law more extensive protection than is required by this Agreement, provided that such protection does not contravene the provisions of this Agreement. Members shall be free to determine the appropriate method of implementing the provisions of this Agreement within their own legal system and practice.

2. For the purposes of this Agreement, the term "intellectual property" refers to all categories of intellectual property that are the subject of Sections 1 through 7 of Part II.

3. Members shall accord the treatment provided for in this Agreement to the nationals of other Members.[1] In respect of the relevant intellectual property right, the nationals of other Members shall be understood as those natural or legal persons that would meet the criteria for eligibility for protection provided for in the Paris Convention (1967), the Berne Convention (1971), the Rome Convention and the Treaty on Intellectual Property in Respect of Integrated Circuits, were all Members of the WTO members of those conventions.[2] Any Member availing itself of the possibilities provided in paragraph 3 of Article 5 or paragraph 2 of Article 6 of the Rome Convention shall make a notification as foreseen in those provisions to the Council for Trade-Related Aspects of Intellectual Property Rights (the "Council for TRIPS").

(*footnote original*) [1] When "nationals" are referred to in this Agreement, they shall be deemed, in the case of a separate

[1] Appellate Body Report on *India – Patents (US)*, para. 57.

customs territory Member of the WTO, to mean persons, natural or legal, who are domiciled or who have a real and effective industrial or commercial establishment in that customs territory.
(*footnote original*) [2] In this Agreement, "Paris Convention" refers to the Paris Convention for the Protection of Industrial Property; "Paris Convention (1967)" refers to the Stockholm Act of this Convention of 14 July 1967. "Berne Convention" refers to the Berne Convention for the Protection of Literary and Artistic Works; "Berne Convention (1971)" refers to the Paris Act of this Convention of 24 July 1971. "Rome Convention" refers to the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations, adopted at Rome on 26 October 1961. "Treaty on Intellectual Property in Respect of Integrated Circuits" (IPIC Treaty) refers to the Treaty on Intellectual Property in Respect of Integrated Circuits, adopted at Washington on 26 May 1989. "WTO Agreement" refers to the Agreement Establishing the WTO.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1.1

(a) "free to determine the appropriate method of implementing"

2. In *India – Patents (US)*, the Appellate Body reviewed the Panel's decision that India did not meet its obligations under the *TRIPS Agreement* in that it failed to provide "a sound legal basis to preserve novelty and priority" of certain patent applications:

> "[W]hat constitutes such a sound legal basis in Indian law? To answer this question, we must recall first an important general rule in the *TRIPS Agreement*. Article 1.1 of the *TRIPS Agreement* states, in pertinent part:
>
> > 'Members shall be free to determine the appropriate method of implementing the provisions of this Agreement within their own legal system and practice.'
>
> Members, therefore, are free to determine how best to meet their obligations under the *TRIPS Agreement* within the context of their own legal systems. And, as a Member, India is 'free to determine the appropriate method of implementing' its obligations under the *TRIPS Agreement* within the context of its own legal system."[2]

3. In *Canada – Patent Term*, the Panel examined Canada's argument that Article 1.1 permitted it to maintain a term for patent protection of 17 years counting from the date of grant of a patent, in spite of the minimum requirement, under Articles 33 and 70, of granting patent protection for a period expiring 20 years from the date of filing of such application. The Panel noted the discretion of Members, under Article 1.1, to determine the appropriate method of implementing their obligations under the *TRIPS Agreement*, but emphasized that such discretion did not extend to choosing which obligation to comply with:

> ". . . Article 33 contains an obligation concerning the earliest available date of expiry of patents, and Article 62.2 contains a separate obligation prohibiting acquisition procedures which lead to unwarranted curtailment of the period of protection. We recognize that some curtailment is permitted by the text of these two provisions. However, Article 1.1 gives Members the freedom to determine the appropriate method of implementing those two specific requirements, but not to ignore either requirement in order to implement another putative obligation concerning the length of effective protection."[3]

2. Article 1.2

4. In *US – Section 211 Appropriations Act*, the Panel concluded that the categories of intellectual property covered by the *TRIPS Agreement* are those referred to in Article 1.2. The Appellate Body considered that the categories of intellectual property are not simply those that appear in the titles of Sections 1 through 7 of Part II but other subjects as well,:

> "The Panel interpreted the phrase '"intellectual property" refers to all categories of intellectual property that are the *subject* of Sections 1 through 7 of Part II' (emphasis added) as if that phrase read 'intellectual property means those categories of intellectual property appearing in the *titles* of Sections 1 through 7 of Part II.' To our mind, the Panel's interpretation ignores the plain words of Article 1.2, for it fails to take into account that the phrase 'the subject of Sections 1 through 7 of Part II' deals not only with the categories of intellectual property indicated in each section *title*, but with other *subjects* as well. For example, in Section 5 of Part II, entitled 'Patents', Article 27.3(b) provides that Members have the option of protecting inventions of plant varieties by *sui generis* rights (such as breeder's rights) instead of through patents. . . ."[4]

III. ARTICLE 2 AND INCORPORATED PROVISIONS OF THE PARIS CONVENTION (1967)

A. TEXT OF ARTICLE 2

Article 2
Intellectual Property Conventions

1. In respect of Parts II, III and IV of this Agreement, Members shall comply with Articles 1 through 12, and Article 19, of the Paris Convention (1967).[5]

2. Nothing in Parts I to IV of this Agreement shall derogate from existing obligations that Members may have

[2] Appellate Body Report on *India – Patents (US)*, para. 59.
[3] Panel Report on *Canada – Patent Term*, para. 6.94.
[4] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 335.
[5] The text of Articles 1–12 and 19 of the Paris Convention appears in Section LXXV.

to each other under the Paris Convention, the Berne Convention, the Rome Convention and the Treaty on Intellectual Property in Respect of Integrated Circuits.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2 AND INCORPORATED PROVISIONS OF THE PARIS CONVENTION (1967)

1. Article 2.1 of the TRIPS Agreement

5. In *US – Section 211 Appropriations Act*, the Appellate Body disagreed with the Panel's interpretation that Article 2.1 obliged Members to comply with Articles 1 through 12 and 19 of the Paris Convention (1967) only "in respect" of what is covered by Parts II, III and IV of the *TRIPS Agreement*. Instead, it found that Members do have an obligation to provide protection to trade names in accordance with Article 8 of the Paris Convention (1967) as incorporated by Article 2.1 of the TRIPS Agreement:

> "Article 2.1 explicitly incorporates Article 8 of the Paris Convention (1967) into the *TRIPS Agreement*.
>
> The Panel was of the view that the words 'in respect of' in Article 2.1 have the effect of 'conditioning' Members' obligations under the Articles of the Paris Convention (1967) incorporated into the *TRIPS Agreement*, with the result that trade names are not covered. We disagree.
>
> . . .
>
> [W]e reverse the Panel's finding in paragraph 8.41 of the Panel Report that trade names are not covered under the *TRIPS Agreement* and find that WTO Members do have an obligation under the *TRIPS Agreement* to provide protection to trade names."[6]

2. Article 2 of the Paris Convention (1967) as incorporated in the TRIPS Agreement

6. With respect to the national treatment obligation in Article 2(1) of the Paris Convention (1967) as incorporated in the *TRIPS Agreement*, see the discussion of the national treatment obligation in Article 3.1 of the *TRIPS Agreement* from *US – Section 211 Appropriations Act* in paragraphs 19–24 below.

3. Article 6 of the Paris Convention (1967) as incorporated in the TRIPS Agreement

7. In *US – Section 211 Appropriations Act*, in the course of considering claims under Article 6*quinquies* A(1) of the Paris Convention (1967) as incorporated in the *TRIPS Agreement*, and under Article 15.2 of the TRIPS Agreement, the Appellate Body explained that the general rule in Article 6(1) of the Paris Convention as incorporated in the *TRIPS Agreement* reserves considerable discretion to WTO Members but that that discretion must be exercised consistently with internationally agreed grounds for refusing – and not refusing – trademark registration:

> "In this respect, we recall, once again, that Article 6(1) of the Paris Convention (1967) reserves to each country of the Paris Union the right to determine *conditions for the filing and registration* of trademarks by its domestic legislation. The authority to determine such conditions by domestic legislation must, however, be exercised consistently with the obligations that countries of the Paris Union have under the Paris Convention (1967). These obligations include internationally agreed grounds for *refusing* registration, as stipulated in the Paris Convention (1967).
>
> The right of each country of the Paris Union to determine conditions for filing and registration of trademarks by its domestic legislation is also constrained by internationally agreed grounds for *not* denying trademark registration. This means, by implication, that the right reserved to each country of the Paris Union to determine, under Article 6(1), conditions for the filing and registration of trademarks includes the right to determine by domestic legislation conditions to *refuse* acceptance of filing and registration on grounds other than those explicitly prohibited by the Paris Convention (1967)."[7]

4. Article 6*bis* of the Paris Convention (1967) as incorporated in the TRIPS Agreement

8. In the same report, the Panel found that the obligation in paragraph 1 of Article 6*bis* to prohibit the use of a well-known trademark in certain situations did not apply to assertions of rights by an entity which had confiscated the well-known trademark, or its successor-in-interest, who was not considered the proper owner under national law:

> "We agree with the parties that a WTO Member is not required to give the benefit of Article 6*bis* to the confiscating entity or its successor-in-interest; the competent authority of a WTO Member may consider the well-known trademark as being the mark of the person who owned the trademark prior to the confiscation."[8]

5. Article 6*ter* of the Paris Convention (1967) as incorporated in the TRIPS Agreement

9. At its meeting of 11 December 1995, the Council for TRIPS decided on arrangements that apply with respect to implementation of the obligations under the TRIPS Agreement stemming from the incorporation of the provisions of Article 6*ter* of the Paris Convention (1967) which contains certain prohibitions relating to the registration and use as trademarks of state emblems,

---

[6] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 336, 337 and 341.
[7] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 175–176.
[8] Panel Report on *US – Section 211 Appropriations Act*, para. 8.120.

official hallmarks and emblems of intergovernmental organizations.[9]

10. Article 3 of the Agreement between the World Intellectual Property Organization and the World Trade Organization, done on 22 December 1995 (the "WIPO-WTO Agreement"), provides for procedures relating to communication of emblems and transmittal of objections under Article 6*ter* of the Paris Convention for the purposes of the *TRIPS Agreement*.[10]

6. Article 6*quinquies* of the Paris Convention (1967) as incorporated in the TRIPS Agreement

11. In *US – Section 211 Appropriations Act* the Appellate Body considered an argument that Article 6*quinquies* A(1) applied to more than merely the form of a trademark, and found that:

> "We also agree that the obligation of countries of the Paris Union under Article 6*quinquies* A(1) to accept for filing and protect a trademark duly registered in the country of origin 'as is' does not encompass matters related to ownership."[11]

7. Article 8 of the Paris Convention (1967) as incorporated in the TRIPS Agreement

12. In *US – Section 211 Appropriations Act*, the Appellate Body disagreed with the Panel's interpretation that Article 2.1 obliged Members to comply with Articles 1 through 12 and 19 of the Paris Convention (1967) only "in respect" of what is covered by Parts II, III and IV of the *TRIPS Agreement*. Instead, it found that Members do have an obligation to provide protection to trade names in accordance with Article 8 of the Paris Convention (1967) as incorporated by Article 2.1 of the TRIPS Agreement:

> "Article 8 of the Paris Convention (1967) covers only the protection of trade names; Article 8 has no other subject. If the intention of the negotiators had been to exclude trade names from protection, there would have been no purpose whatsoever in including Article 8 in the list of Paris Convention (1967) provisions that were specifically incorporated into the *TRIPS Agreement*. To adopt the Panel's approach would be to deprive Article 8 of the Paris Convention (1967), as incorporated into the *TRIPS Agreement* by virtue of Article 2.1 of that Agreement, of any and all meaning and effect. . . .
>
> . . .
>
> [W]e reverse the Panel's finding in paragraph 8.41 of the Panel Report that trade names are not covered under the *TRIPS Agreement* and find that WTO Members do have an obligation under the *TRIPS Agreement* to provide protection to trade names."[12]

13. In *US – Section 211 Appropriations Act*, the Appellate Body found that Article 8 of the Paris Convention (1967) as incorporated in the TRIPS Agreement does not determine who does or does not own a trade name:

> "We recall further our conclusion in . . . the section addressing Article 16.1 of the *TRIPS Agreement* that neither the Paris Convention (1967) nor the *TRIPS Agreement* determines who owns or who does not own a trademark. We believe that the Paris Convention (1967) and the *TRIPS Agreement* also do not determine who owns or does not own a trade name. Given our view that Sections 211(a)(2) and (b) relate to ownership, we conclude that these Sections are not inconsistent with Article 2.1 of the *TRIPS Agreement* in conjunction with Article 8 of the Paris Convention (1967)."[13]

8. Article 2.2 of the TRIPS Agreement

14. In *EC – Bananas (Article 22.6)*, the Arbitrators followed Ecuador's request under Article 22.2 of the *DSU* for suspension of concessions and obligations, including certain obligations under the *TRIPS Agreement*. In their award, the Arbitrators addressed, *inter alia*, the relationship between the WTO Agreement and the obligations of WTO Members to each other arising under the four conventions listed in Article 2:

> "This provision can be understood to refer to the obligations that the contracting parties of the Paris, Berne and Rome Conventions and the IPIC Treaty, who are also WTO Members, have between themselves under these four treaties. This would mean that, by virtue of the conclusion of the WTO Agreement, e.g. Berne Union members cannot derogate from existing obligations between each other under the Berne Convention. For example, the fact that Article 9.1 of the TRIPS Agreement incorporates into that Agreement Articles 1–21 of the Berne Convention with the exception of Article 6*bis* does not mean that Berne Union members would henceforth be exonerated from this obligation to guarantee moral rights under the Berne Convention."[14]

IV. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
National Treatment

1. Each Member shall accord to the nationals of other Members treatment no less favourable than that it accords to its own nationals with regard to the protection[3]

[9] Decision of the Council for TRIPS, document IP/C/7.
[10] The text of the Agreement can be found in IP/C/6.
[11] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 147.
[12] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 338 and 341.
[13] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 359.
[14] Decision by the Arbitrators on *EC – Bananas (Ecuador) (Article 22.6 – EC)*, para. 149.

of intellectual property, subject to the exceptions already provided in, respectively, the Paris Convention (1967), the Berne Convention (1971), the Rome Convention or the Treaty on Intellectual Property in Respect of Integrated Circuits. In respect of performers, producers of phonograms and broadcasting organizations, this obligation only applies in respect of the rights provided under this Agreement. Any Member availing itself of the possibilities provided in Article 6 of the Berne Convention (1971) or paragraph 1(b) of Article 16 of the Rome Convention shall make a notification as foreseen in those provisions to the Council for TRIPS.

(*footnote original*) [3] For the purposes of Articles 3 and 4, "protection" shall include matters affecting the availability, acquisition, scope, maintenance and enforcement of intellectual property rights as well as those matters affecting the use of intellectual property rights specifically addressed in this Agreement.

2. Members may avail themselves of the exceptions permitted under paragraph 1 in relation to judicial and administrative procedures, including the designation of an address for service or the appointment of an agent within the jurisdiction of a Member, only where such exceptions are necessary to secure compliance with laws and regulations which are not inconsistent with the provisions of this Agreement and where such practices are not applied in a manner which would constitute a disguised restriction on trade.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.1

(a) "treatment no less favourable than that it accords to its own nationals with regard to the protection of intellectual property"

15. *Indonesia – Autos* concerned the consistency of Indonesia's National Car Programme with several WTO agreements, including claims that the provisions of the programme discriminated against nationals of other WTO Members with respect to trademarks, in violation of Article 3.1 (the Panel Report was not appealed). With respect to the claim relating to the acquisition of trademarks, the Panel rejected the United States' claim that Indonesian law was according less favourable treatment to foreign nationals than to Indonesian nationals. The Panel saw the Indonesian law as merely stipulating, in a non-discriminatory manner, that only certain signs could be used as trademarks:

> "The issue to be examined therefore in regard to the United States' claim relating to the 'acquisition' of trademarks is whether, under the Indonesian law and practice which is before us, the treatment accorded to foreign nationals in respect of the acquisition of trademark rights, through the applicable procedures, is less favourable than that accorded to the Indonesian company in the National Car Programme. We do not consider that any evidence has been produced in this case to support such a claim. . . . The fact that only certain signs can be used as trademarks for meeting the relevant qualifications under the National Car Programme, and many others not, does not mean that trademark rights, as stipulated in Indonesian trademark law, cannot be acquired for these other signs in a non-discriminatory manner."[15]

16. Equally, with respect to the argument that less favourable treatment was being accorded by the regulations pertaining to the maintenance of trademarks, the Panel could not discern any less favourable treatment under Indonesian law for foreign nationals:

> "We do not accept this argument for the following reasons. First, no evidence has been put forward to refute the Indonesian statement that the system, in requiring a new, albeit Indonesian-owned, trademark to be created, applies equally to pre-existing trademarks owned by Indonesian nationals and foreign nationals. Second, if a foreign company enters into an arrangement with a Pioneer company, it would do so voluntarily, with knowledge of any consequent implications for its ability to maintain pre-existing trademark rights, as indeed the United States itself has acknowledged in its submissions to the Panel."[16]

17. The Panel in *Indonesia – Autos* also cautioned against construing the national treatment obligation under Article 3 of the *TRIPS Agreement* as addressing also issues of tariffs, subsidies or other measures with respect to domestic companies which could have an indirect impact on the maintenance of trademark rights by foreign nationals:

> "In considering this argument, we note that any customs tariff, subsidy or other governmental measure of support could have a 'de facto' effect of giving such an advantage to the beneficiaries of this support. We consider that considerable caution needs to be used in respect of 'de facto' based arguments of this sort, because of the danger of reading into a provision obligations which go far beyond the letter of that provision and the objectives of the Agreement. It would not be reasonable to construe the national treatment obligation of the TRIPS Agreement in relation to the maintenance of trademark rights as preventing the grant of tariff, subsidy or other measures of support to national companies on the grounds that this would render the maintenance of trademark rights by foreign companies wishing to export to that market relatively more difficult."[17]

18. The following passage in *Indonesia – Autos* illustrates the Panel's approach to the relationship

[15] Panel Report on *Indonesia – Autos*, para. 14.268.
[16] Panel Report on *Indonesia – Autos*, para. 14.271.
[17] Panel Report on *Indonesia – Autos*, para. 14.273.

between Article 3 and other provisions of the *TRIPS Agreement*:

> "As is made clear by the footnote to Article 3 of the TRIPS Agreement, the national treatment rule set out in that Article does not apply to use of intellectual property rights generally but only to 'those matters affecting the use of intellectual property rights specifically addressed in this Agreement'. In putting forward its claim on this point, the United States has developed arguments relating to the use of trademarks specifically addressed by Article 20 of the TRIPS Agreement. It is the first sentence of this Article, which is entitled 'Other Requirements', to which the United States has made reference. . . .
>
> The main issues before us in examining this claim of the United States are therefore: first, is the use of a trademark to which the Indonesian law and practices at issue relates 'specifically addressed' by Article 20; and, second, if so, does this aspect of the system discriminate in favour of Indonesian nationals and against those of other WTO Members."[18]

19. In *US – Section 211 Appropriations Act*, the Appellate Body considered a measure that, on a plain reading, afforded "differential treatment" between a Member's own nationals and nationals of other countries, and quoted from the GATT panel report in *US – Section 337*:

> "That panel reasoned that 'the mere fact that imported products are subject under Section 337 to legal provisions that are different from those applying to products of national origin is in itself not conclusive in establishing inconsistency with Article III:4 [of GATT].'
>
> That panel stated further that:
>
> > '[I]t would follow . . . that any unfavourable elements of treatment of imported products could be offset by more favourable elements of treatment, provided that the results, as shown in past cases, have not been less favourable. *[E]lements of less and more favourable treatment could thus only be offset against each other to the extent that they always would arise in the same cases and necessarily would have an offsetting influence on the other*.' (emphasis added)
>
> And that panel, importantly for our purposes, concluded that:
>
> > '. . . while the likelihood of having to defend imported products in two fora is small, the existence of the possibility is inherently less favourable than being faced with having to conduct a defence in only one of those fora'. (emphasis added)"[19]

20. In *US – Section 211 Appropriations Act*, the Appellate Body accepted that discriminatory treatment imposed by a measure could be offset in practice:

> "Yet, to fulfill the national treatment obligation, less favourable treatment must be offset, and thereby eliminated, in *every* individual situation that exists under a measure. Therefore, for this argument by the United States to succeed, it must hold true for *all* Cuban original owners of United States trademarks, and not merely for *some* of them."[20]

21. In the same report, the Appellate Body dismissed an argument that certain discriminatory treatment was offset in practice by another measure which provided unfavourable treatment to the Member's own nationals:

> "We disagree. We do not believe that Section 515.201 of the CACR would *in every case* offset the discriminatory treatment imposed by Sections 211(a)(2) and (b). For this argument by the United States to hold true in each and every situation, the scope of the phrase 'having an interest in' in Section 515.201 would necessarily have to overlap in coverage with the scope of the phrase 'used in connection with' in Sections 211(a)(2) and (b). However, the United States was unable to point to evidence substantiating that the different standards used in Section 515.201 and in Sections 211(a)(2) and (b) overlap completely. We are, therefore, not satisfied that Section 515.201 would offset the inherently less favourable treatment present in Sections 211(a)(2) and (b) in each and every case. And, because it has not been shown by the United States that it would do so in each and every case, the less favourable treatment that exists under the measure cannot be said to have been offset and, thus, eliminated."[21]

22. In the same report, the Appellate Body dismissed an argument that certain discriminatory treatment was offset in practice by the availability of a particular administrative procedure:

> "This [procedure] could eliminate less favourable treatment *in practice*. Yet, the very existence of the additional 'hurdle' that is imposed by requiring application to OFAC is, in itself, inherently less favourable. Sections 211(a)(2) and (b) do not apply to United States original owners; no application to OFAC is required. But Cuban original owners residing in the 'authorized trade territory' must apply to OFAC. Thus, such Cuban original owners must comply with an administrative requirement that does not apply to United States original owners. By virtue alone of having to apply to OFAC, even Cuban original owners that reside in the 'authorized trade territory' described in Section 515.332 are treated less favourably than United

[18] Panel Report on *Indonesia – Autos*, paras. 14.275–14.276.
[19] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 261–263, quoting from GATT Panel Report, *US – Section 337*, paras. 5.11, 5.12 and 5.19.
[20] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 286.
[21] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 294.

States original owners. So, in this second situation, the discrimination remains."[22]

23. In the same report, the Appellate Body dismissed an argument that a discretionary measure applicable only to nationals of foreign countries, but which had been consistently applied in a way which offset any discrimination, did not provide less favourable treatment. Although the Appellate Body agreed with the Panel that it could not assume that the discretionary executive authority would be exercised inconsistently with WTO obligations, it found that this measure violated the national treatment obligation in Article 2(1) of the Paris Convention (1967) (as incorporated in the *TRIPS Agreement*) and Article 3.1 of the *TRIPS Agreement*, for the following reason:

"The United States may be right that the likelihood of having to overcome the hurdles of both Section 515.201 of Title 31 CFR and Section 211(a)(2) may, echoing the panel in *US – Section 337*, be *small*. But, again echoing that panel, even the *possibility* that non-United States successors-in-interest face two hurdles is *inherently less favourable* than the undisputed fact that United States successors-in-interest face only one."[23]

24. In the same report, the Appellate Body applied to trade names its findings with regard to trademarks in respect of Article 2.1 of the *TRIPS Agreement* in conjunction with Article 2(1) of the Paris Convention, and Article 3.1 of the *TRIPS Agreement*.[24]

(b) Notification requirements

25. At its meeting of 27 February 1997, the Council for TRIPS referred to three options for meeting obligations to notify laws and regulations that correspond to the obligations of Articles 3, 4 and 5 of the *TRIPS Agreement*. It circulated a format as a practical aid in respect of one of those options.[25]

2. Relationship with other Articles

26. With respect to the relationship with Article 65.2, see the excerpt from the panel report referenced in paragraph 144 below.

3. Relationship with other WTO Agreements

27. In *US – Section 211 Appropriations Act*, the Appellate Body referred to GATT jurisprudence in interpreting Article 3 of the *TRIPS Agreement* for the following reason:

"As we see it, the national treatment obligation is a fundamental principle underlying the *TRIPS Agreement*, just as it has been in what is now the GATT 1994. The Panel was correct in concluding that, as the language of Article 3.1 of the *TRIPS Agreement*, in particular, is similar to that of Article III:4 of the GATT 1994, the jurisprudence on Article III:4 of the GATT 1994 may be useful in interpreting the national treatment obligation in the *TRIPS Agreement*."[26]

V. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Most-Favoured-Nation Treatment

With regard to the protection of intellectual property, any advantage, favour, privilege or immunity granted by a Member to the nationals of any other country shall be accorded immediately and unconditionally to the nationals of all other Members. Exempted from this obligation are any advantage, favour, privilege or immunity accorded by a Member:

(a) deriving from international agreements on judicial assistance or law enforcement of a general nature and not particularly confined to the protection of intellectual property;

(b) granted in accordance with the provisions of the Berne Convention (1971) or the Rome Convention authorizing that the treatment accorded be a function not of national treatment but of the treatment accorded in another country;

(c) in respect of the rights of performers, producers of phonograms and broadcasting organizations not provided under this Agreement;

(d) deriving from international agreements related to the protection of intellectual property which entered into force prior to the entry into force of the WTO Agreement, provided that such agreements are notified to the Council for TRIPS and do not constitute an arbitrary or unjustifiable discrimination against nationals of other Members.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. General

28. In *US – Section 211 Appropriations Act*, the Appellate Body applied analogous reasoning to claims under Articles 3.1 and 4 of the *TRIPS Agreement* in respect of the same measure. The measure, on its face, discriminated as

[22] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 289.
[23] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 265.
[24] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 352–356.
[25] IP/C/M/12, paras. 10–16. The format can be found in IP/C/9.
[26] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 242.

between the nationals of one other Member, and the nationals of all other countries. The Appellate Body dismissed an argument that the discrimination could be eliminated through an administrative procedure:

> "Cuban nationals that reside in a country that is part of the 'authorized trade territory', such as the Member States of the European Communities, can apply to OFAC to be 'unblocked'. This implies that Cuban nationals that reside in the 'authorized trade territory' face an additional administrative procedure that does not apply to non-Cuban foreign nationals who are original owners, because the latter are not 'designated nationals'. Therefore, as we stated earlier, treatment that is inherently less favourable persists."[27]

29. In *US – Section 211 Appropriations Act*, the Appellate Body dismissed an argument that certain discriminatory treatment applied to the nationals of one other Member was offset in practice by another measure that could provide unfavourable treatment to the nationals of all other countries:

> "The fact that Section 515.201 of Title 31 CFR *could* also apply to a non-Cuban foreign national does not mean, however, that it would offset *in each and every case* the discriminatory treatment imposed by Sections 211(a)(2) and (b) on Cuban original owners."[28]

30. In the same report, the Appellate Body applied to trade names its findings with regard to trademarks in respect of Article 4 of the *TRIPS Agreement*.[29]

2. Article 4(d)

(a) Notification requirements

31. At its meeting of 27 February 1997, the Council for TRIPS referred to three options for meeting obligations to notify laws and regulations that correspond to the obligations of Articles 3, 4 and 5 of the *TRIPS Agreement*. It circulated a format as a practical aid in respect of one of those options.[30]

VI. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Multilateral Agreements on Acquisition or Maintenance of Protection

The obligations under Articles 3 and 4 do not apply to procedures provided in multilateral agreements concluded under the auspices of WIPO relating to the acquisition or maintenance of intellectual property rights.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. Notification

32. With respect to notifications of laws and regulations relating to Articles 3, 4 and 5 of the *TRIPS Agreement*, see paragraph 25 above.

VII. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Exhaustion

For the purposes of dispute settlement under this Agreement, subject to the provisions of Articles 3 and 4 nothing in this Agreement shall be used to address the issue of the exhaustion of intellectual property rights.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

33. With respect to the exhaustion of intellectual property rights, see the Declaration on the TRIPS Agreement and Public Health, reproduced in Section LXXVIII below.

VIII. ARTICLE 7

A. TEXT OF ARTICLE 7

Article 7
Objectives

The protection and enforcement of intellectual property rights should contribute to the promotion of technological innovation and to the transfer and dissemination of technology, to the mutual advantage of producers and users of technological knowledge and in a manner conducive to social and economic welfare, and to a balance of rights and obligations.

B. INTERPRETATION AND APPLICATION OF ARTICLE 7

1. Relationship with other Articles

34. With respect to the relationship with Article 30, see the excerpt from the panel report referenced in paragraph 101 below.

35. With respect to the objectives and principles of the *TRIPS Agreement*, see the Declaration on the TRIPS

[27] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 314.
[28] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 317.
[29] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 352, 353 and 357.
[30] See document IP/C/9.

Agreement and Public Health, reproduced in Section LXXVIII below.

IX. ARTICLE 8

A. TEXT OF ARTICLE 8

Article 8
Principles

1. Members may, in formulating or amending their laws and regulations, adopt measures necessary to protect public health and nutrition, and to promote the public interest in sectors of vital importance to their socio-economic and technological development, provided that such measures are consistent with the provisions of this Agreement.

2. Appropriate measures, provided that they are consistent with the provisions of this Agreement, may be needed to prevent the abuse of intellectual property rights by right holders or the resort to practices which unreasonably restrain trade or adversely affect the international transfer of technology.

B. INTERPRETATION AND APPLICATION OF ARTICLE 8

1. Relationship with other Articles

36. With respect to the relationship with Article 30, see paragraph 101 below.

37. With respect to the objectives and principles of the *TRIPS Agreement*, see the Declaration on the TRIPS Agreement and Public Health, reproduced in Section LXXVIII below.

PART II
STANDARDS CONCERNING THE AVAILABILITY, SCOPE AND USE OF INTELLECTUAL PROPERTY RIGHTS

Section 1: Copyright and Related Rights

X. ARTICLE 9 AND INCORPORATED PROVISIONS OF THE BERNE CONVENTION (1971)

A. TEXT OF ARTICLE 9

Article 9
Relation to the Berne Convention

1. Members shall comply with Articles 1 through 21 of the Berne Convention (1971) and the Appendix thereto. However, Members shall not have rights or obligations under this Agreement in respect of the rights conferred under Article 6*bis* of that Convention or of the rights derived therefrom.

2. Copyright protection shall extend to expressions and not to ideas, procedures, methods of operation or mathematical concepts as such.

The text of Articles 1–21 of the Berne Convention and Appendix, other than Article 6bis *appears in Section LXXVI below.*

B. INTERPRETATION AND APPLICATION OF ARTICLE 9 AND INCORPORATED PROVISIONS OF THE BERNE CONVENTION (1971)

1. Relationship with the Berne Convention (1971)

38. In *US – Section 110(5) Copyright Act*, in examining the consistency of certain provisions of the US Copyright Act with the *TRIPS Agreement*, the Panel made a finding on the relationship between the *TRIPS Agreement* and the Berne Convention (1971):

> "Articles 9–13 of Section 1 of Part II of the TRIPS Agreement entitled 'Copyright and Related Rights' deal with the substantive standards of copyright protection. Article 9.1 of the TRIPS Agreement obliges WTO Members to comply with Articles 1–21 of the Berne Convention (1971) (with the exception of Article 6*bis* on moral rights and the rights derived therefrom) and the Appendix thereto. . . .
>
> We note that through their incorporation, the substantive rules of the Berne Convention (1971), including the provisions of its Articles 11*bis*(1)(iii) and 11(1)(ii), have become part of the TRIPS Agreement and as provisions of that Agreement have to be read as applying to WTO Members."[31]

39. The Panel also considered a provision of the Vienna Convention on the Law of the Treaties with respect to the *TRIPS Agreement* and the Berne Convention (1971).

> "We note that Article 30 of the Vienna Convention on the application of successive treaties is not relevant in this respect, because all provisions of the TRIPS Agreement – including the incorporated Articles 1–21 of the Berne Convention (1971) – entered into force at the same point in time."[32]

40. With respect to the relationship of the minor exceptions doctrine under the Berne Convention (1971) and the *TRIPS Agreement*, see also the excerpt from the panel report referenced in paragraph 52 below.

41. In *US – Section 110(5) Copyright Act*, the Panel emphasized the need, in the light of general principles of interpretation, to harmoniously interpret provisions

[31] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.17–6.18.
[32] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.41.

of the *TRIPS Agreement* and the Berne Convention (1971):

> "In the area of copyright, the Berne Convention and the TRIPS Agreement form the overall framework for multilateral protection. Most WTO Members are also parties to the Berne Convention. We recall that it is a general principle of interpretation to adopt the meaning that reconciles the texts of different treaties and avoids a conflict between them. Accordingly, one should avoid interpreting the TRIPS Agreement to mean something different than the Berne Convention except where this is explicitly provided for. This principle is in conformity with the public international law presumption against conflicts, which has been applied by WTO panels and the Appellate Body in a number of cases. We believe that our interpretation of the legal status of the minor exceptions doctrine under the TRIPS Agreement is consistent with these general principles."[33]

42. The Panel adopted the same approach to the interpretation of the *TRIPS Agreement* and the WIPO Copyright Treaty ("WCT") as it had applied with respect to the *TRIPS Agreement* and the Berne Convention (1971). The Panel stated as follows:

> "In paragraph 6.66 we discussed the need to interpret the Berne Convention and the TRIPS Agreement in a way that reconciles the texts of these two treaties and avoids a conflict between them, given that they form the overall framework for multilateral copyright protection. The same principle should also apply to the relationship between the TRIPS Agreement and the WCT. The WCT is designed to be compatible with this framework, incorporating or using much of the language of the Berne Convention and the TRIPS Agreement. The WCT was unanimously concluded at a diplomatic conference organized under the auspices of WIPO in December 1996, one year after the WTO Agreement entered into force, in which 127 countries participated. Most of these countries were also participants in the TRIPS negotiations and are Members of the WTO. For these reasons, it is relevant to seek contextual guidance also in the WCT when developing interpretations that avoid conflicts within this overall framework, except where these treaties explicitly contain different obligations."[34]

2. Article 11 of the Berne Convention (1971) as incorporated in the TRIPS Agreement

(a) Scope of Article 11

43. In *US – Section 110(5) Copyright Act*, the Panel was called upon to interpret Article 11 of the Berne Convention (1971). The Panel considered the scope of Article 11 as follows:

> "As in the case of Article 11*bis*(1) of the Berne Convention (1971), which concerns broadcasting to the public and communication of a broadcast to the public, the exclusive rights conferred by Article 11 cover public performance; private performance does not require authorization. Public performance includes performance by any means or process, such as performance by means of recordings (e.g., CDs, cassettes and videos).[35] It also includes communication to the public of a performance of the work."[36]

(b) Paragraph 1

44. In *US – Section 110(5) Copyright Act*, the Panel agreed with the parties that a particular type of communication was covered by the exclusive rights set forth in Article 11(1) of the Berne Convention (1971):

> "We share the understanding of the parties that a communication to the public by loudspeaker of a performance of a work transmitted by means other than hertzian waves is covered by the exclusive rights conferred by Article 11(1) of the Berne Convention (1971)."[37]

45. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators emphasized the difference between Members' respective obligations under Article 11(1)(ii) of the Berne Convention (1971) and right holders' exercise or exploitation of rights:

> "For purposes of the present dispute, this means that the United States is under an obligation to make available to EC right holders the exclusive rights set forth in Articles 11*bis*(1)(iii) and 11(1)(ii).[38] It is important to bear in mind, however, that, while it is for the *United States* to *provide* EC right holders with the exclusive rights set forth in Articles 11*bis*(1)(iii) and 11(1)(ii), it is for *EC right holders* to determine whether and how to *exercise* or *exploit* those rights."[39]

(c) Relationship between Article 11 of the Berne Convention (1971) and other Articles of this Convention.

46. In *US – Section 110(5) Copyright Act*, the Panel found Article 11 to be a *general* rule concerning the

---

[33] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.66.
[34] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.70.
[35] (*footnote original*) However, public performance by means of cinematographic works is separately covered in Article 14(1)(ii) of the Berne Convention. Public performance of a literary work or communication to the public of the recitation is covered by Article 11*ter* of the Berne Convention.
[36] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.24.
[37] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.51.
[38] (*footnote original*) Article 1.1 of the TRIPS Agreement makes clear that "Members shall give effect to the provisions of the [TRIPS] Agreement." Members must, therefore, implement in their domestic law the protection required by the TRIPS Agreement. Moreover, Article 1.3 of the TRIPS Agreement provides in relevant part that "Members shall accord the treatment provided for in this Agreement to the nationals of other Members." (footnote omitted) This confirms that the exclusive rights conferred by Articles 11*bis*(1)(iii) and 11(1)(ii) must be granted to EC right holders.
[39] Award of the Arbitrator on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 3.15.

communication of performances of works, while Article 11*bis* provided a *specific* rule concerning a particular type of communication:

> "Regarding the relationship between Articles 11 and 11*bis*, we note that the rights conferred in Article 11(1)(ii) concern the communication to the public of performances of works in general. Article 11*bis*(1)(iii) is a specific rule conferring exclusive rights concerning the public communication by loudspeaker or any other analogous instrument transmitting, by signs, sounds or images, the broadcast of a work."[40]

3. Article 11*bis* of the Berne Convention (1971) as incorporated in the TRIPS Agreement

(a) Paragraph 1

47. In *US – Section 110(5) Copyright Act*, in interpreting Article 11*bis*(1), the Panel addressed the three "separate exclusive" rights provided by Article 11*bis*(1) subparagraphs (i) through (iii):

> "In the light of Article 2 of the Berne Convention (1971), 'artistic' works in the meaning of Article 11*bis*(1) include non-dramatic and other musical works. Each of the subparagraphs of Article 11*bis*(1) confers a separate exclusive right; exploitation of a work in a manner covered by any of these subparagraphs requires an authorization by the right holder. For example, the communication to the public of a broadcast creates an additional audience and the right holder is given control over, and may expect remuneration from, this new public performance of his or her work.
>
> The right provided under subparagraph (i) of Article 11*bis*(1) is to authorize the broadcasting of a work and the communication thereof to the public by any other means of wireless diffusion of signs, sounds or images. It applies to both radio and television broadcasts. Subparagraph (ii) concerns the subsequent use of this emission; the authors' exclusive right covers any communication to the public by wire or by rebroadcasting of the broadcast of the work, when the communication is made by an organization other than the original one.
>
> Subparagraph (iii) provides an exclusive right to authorize the public communication of the broadcast of the work by loudspeaker, on a television screen, or by other similar means. Such communication involves a new public performance of a work contained in a broadcast, which requires a licence from the right holder."[41]

48. In *US – Section 110(5) Copyright Act (Article 25.3)*, the Arbitrators emphasized the difference between Members' respective obligations under Article 11*bis*(1)(iii) of the Berne Convention (1971) and right holders' exercise or exploitation of rights as follows:

> "For purposes of the present dispute, this means that the United States is under an obligation to make available to EC right holders the exclusive rights set forth in Articles 11*bis*(1)(iii) and 11(1)(ii).[42] It is important to bear in mind, however, that, while it is for the *United States* to *provide* EC right holders with the exclusive rights set forth in Articles 11*bis*(1)(iii) and 11(1)(ii), it is for *EC right holders* to determine whether and how to *exercise* or *exploit* those rights."[43]

(b) Paragraph 2

49. In *US – Section 110(5) Copyright Act*, the Panel addressed the authorization, provided by Article 11*bis*(2), to substitute a compulsory licence for an exclusive right under Article 11*bis* (1):

> "We also conclude that Article 11*bis*(2) of the Berne Convention (1971) as incorporated into the TRIPS Agreement allows Members to substitute a compulsory licence for an exclusive right under Article 11*bis*(1), or determine other conditions provided that they are not prejudicial to the right holder's right to obtain an equitable remuneration. Article 11*bis*(2) is not relevant for the case at hand, because the United States has not provided a right in respect of the uses covered by the present Section 110(5), the exercise of which would have been subjected to conditions determined in its legislation."[44]

(c) Relationship between Article 11*bis* of the Berne Convention (1971) and other Articles of the Convention

50. With respect to the relationship between Articles 11 and 11*bis* of the Berne Convention (1971) as incorporated in the *TRIPS Agreement*, see paragraph 46 above.

(d) Minor exceptions doctrine

51. In *US – Section 110(5) Copyright Act*, the Panel addressed the question whether the "minor exceptions doctrine" in the context of copyrights applied under the *TRIPS Agreement*. The Panel decided first to examine to what extent this doctrine formed part of the Berne Convention (1971) *acquis* and second, to assess whether that

---

[40] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.25.

[41] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.20–6.22.

[42] (*footnote original*) Article 1.1 of the TRIPS Agreement makes clear that "Members shall give effect to the provisions of the [TRIPS] Agreement." Members must, therefore, implement in their domestic law the protection required by the TRIPS Agreement. Moreover, Article 1.3 of the TRIPS Agreement provides in relevant part that "Members shall accord the treatment provided for in this Agreement to the nationals of other Members." (footnote omitted) This confirms that the exclusive rights conferred by Articles 11*bis*(1)(iii) and 11(1)(ii) must be granted to EC right holders.

[43] Award of the Arbitrator on *US – Section 110(5) Copyright Act (Article 25.3)*, para. 3.15.

[44] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.95.

doctrine had been incorporated into the *TRIPS Agreement*. With respect to the scope of the minor exceptions doctrine under the Berne Convention (1971), the Panel held:

> "The General Report of the Brussels Conference of 1948 refers to 'religious ceremonies, military bands and the needs of the child and adult education' as examples of situations in respect of which minor exceptions may be provided. The Main Committee I Report of the Stockholm Conference of 1967 refers also to 'popularization' as one example. When these references are read in their proper context, it is evident that the given examples are of an illustrative character. . . .
>
> . . . On the basis of the information provided to us, we are not in a position to determine that the minor exceptions doctrine justifies only exclusively non-commercial use of works and that it may under no circumstances justify exceptions to uses with a more than negligible economic impact on copyright holders. On the other hand, non-commercial uses of works, e.g., in adult and child education, may reach a level that has a major economic impact on the right holder. At any rate, in our view, a non-commercial character of the use in question is not determinative provided that the exception contained in national law is indeed *minor*. . . ."[45]

52. As the second step in its "minor exceptions analysis", the Panel examined to what extent this doctrine under the Berne Convention (1971) had been incorporated into the *TRIPS Agreement*:

> "Having concluded that the minor exceptions doctrine forms part of the 'context' of, at least, Articles 11*bis* and 11 of the Berne Convention (1971) by virtue of an agreement within the meaning of Article 31(2)(a) of the Vienna Convention, which was made between the Berne Union members in connection with the conclusion of the respective amendments to that Convention, we next address the second step of our analysis . . .
>
> . . .
>
> . . . we conclude that, in the absence of any express exclusion in Article 9.1 of the *TRIPS Agreement*, the incorporation of Articles 11 and 11*bis* of the Berne Convention (1971) into the Agreement includes the entire *acquis* of these provisions, including the possibility of providing minor exceptions to the respective exclusive rights."[46]

(e) Relationship between Article 11*bis*(2) of the Berne Convention (1971) and Article 13 of the TRIPS Agreement

53. With respect to the relationship between Article 11*bis*(2) of the Berne Convention (1971) and Article 13 of the *TRIPS Agreement*, see paragraphs 59–61 below.

4. Article 20 of the Berne Convention (1971) as incorporated in the TRIPS Agreement

54. In *US – Section 110(5) Copyright Act*, the Panel declined to address Article 20 of the Berne Convention (1971), because – contrary to the European Communities' argument – the United States was not claiming that the *TRIPS Agreement* authorizes exceptions inconsistent with the Berne Convention (1971):

> "In regard to the argument of the European Communities that the US interpretation of Article 13 is incompatible with Article 20 of the Berne Convention (1971) and Article 2.2 of the TRIPS Agreement because it treats Article 13 of the TRIPS Agreement as providing a basis for exceptions that would be inconsistent with those permitted under the Berne Convention (1971), we note that the United States is not arguing this but rather that Article 13 clarifies and articulates the standards applicable to minor exceptions under the Berne Convention (1971). Since the EC arguments in relation to these provisions would only be relevant if a finding that would involve inconsistency with the Berne Convention (1971) were being advocated, we do not feel it is necessary to examine them further."[47]

5. Appendix to the Berne Convention (1971) as incorporated in the TRIPS Agreement

55. At its meeting of 16 July 1998, the Council for TRIPS took note of the following statement by its Chairperson, in the light of informal consultations on the calculation of renewable periods of ten years under Article I(2) of the Appendix to the Berne Convention (1971):

> "The provisions of Article I(2) of the Appendix as incorporated into the TRIPS Agreement can be understood so that, for the purposes of the TRIPS Agreement, the relevant periods are calculated by reference to the same date, i.e. 10 October 1974, as for the purposes of the Berne Convention. This would mean that renewable periods of ten years would be the same for the purposes of both Agreements, and that, also under the TRIPS Agreement, the period of ten years currently running would expire on 10 October 2004."[48]

XI. ARTICLE 10

A. TEXT OF ARTICLE 10

Article 10
Computer Programs and Compilations of Data

1. Computer programs, whether in source or object code, shall be protected as literary works under the Berne Convention (1971).

2. Compilations of data or other material, whether in machine readable or other form, which by reason of the selection or arrangement of their contents constitute intellectual creations shall be protected as such. Such protection, which shall not extend to the data or material itself, shall be without prejudice to any copyright subsisting in the data or material itself.

B. INTERPRETATION AND APPLICATION OF ARTICLE 10

No jurisprudence or decision of a competent WTO body.

XII. ARTICLE 11

A. TEXT OF ARTICLE 11

Article 11
Rental Rights

In respect of at least computer programs and cinematographic works, a Member shall provide authors and their successors in title the right to authorize or to prohibit the commercial rental to the public of originals or copies of their copyright works. A Member shall be excepted from this obligation in respect of cinematographic works unless such rental has led to widespread copying of such works which is materially impairing the exclusive right of reproduction conferred in that Member on authors and their successors in title. In respect of computer programs, this obligation does not apply to rentals where the program itself is not the essential object of the rental.

B. INTERPRETATION AND APPLICATION OF ARTICLE 11

No jurisprudence or decision of a competent WTO body.

XIII. ARTICLE 12

A. TEXT OF ARTICLE 12

Article 12
Term of Protection

Whenever the term of protection of a work, other than a photographic work or a work of applied art, is calculated on a basis other than the life of a natural person, such term shall be no less than 50 years from the end of the calendar year of authorized publication, or, failing such authorized publication within 50 years from the making of the work, 50 years from the end of the calendar year of making.

B. INTERPRETATION AND APPLICATION OF ARTICLE 12

No jurisprudence or decision of a competent WTO body.

XIV. ARTICLE 13

A. TEXT OF ARTICLE 13

Article 13
Limitations and Exceptions

Members shall confine limitations or exceptions to exclusive rights to certain special cases which do not conflict with a normal exploitation of the work and do not unreasonably prejudice the legitimate interests of the right holder.

B. INTERPRETATION AND APPLICATION OF ARTICLE 13

1. General

(a) Scope

56. In *US – Section 110(5) Copyright Act*, the Panel rejected a suggested limitation of the scope of Article 13:

> "In our view, neither the express wording nor the context of Article 13 or any other provision of the TRIPS Agreement supports the interpretation that the scope of application of Article 13 is limited to the exclusive rights newly introduced under the TRIPS Agreement."[49]

57. With respect to the scope of Article 13, see paragraph 59 below.

58. In interpreting Article 13, the Panel in *US – Section 110(5) Copyright Act* outlined its interpretative approach to this provision, specified the conditions for limitations or exceptions to exclusive rights and found that these conditions apply cumulatively:

> "Article 13 of the TRIPS Agreement requires that limitations and exceptions to exclusive rights (1) be confined to certain special cases, (2) do not conflict with a normal exploitation of the work, and (3) do not unreasonably prejudice the legitimate interests of the right holder. The principle of effective treaty interpretation requires us to give a distinct meaning to each of the three conditions and to avoid a reading that could reduce any of the conditions to 'redundancy or inutility'. The three conditions apply on a cumulative basis, each being a separate and independent requirement that must be satisfied. Failure to comply with any one of the three conditions results in the Article 13 exception being disallowed. Both parties

[49] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.80.

agree on the cumulative nature of the three conditions. The Panel shares their view. It may be noted at the outset that Article 13 cannot have more than a narrow or limited operation. Its tenor, consistent as it is with the provisions of Article 9(2) of the Berne Convention (1971), discloses that it was not intended to provide for exceptions or limitations except for those of a limited nature. The narrow sphere of its operation will emerge from our discussion and application of its provisions in the paragraphs which follow."[50]

(b) Relationship with other Articles

59. In *US – Section 110(5) Copyright Act*, the Panel made a finding on the scope of application of Article 13 with respect to individual subparagraphs of Articles 11 and 11*bis* of the Berne Convention (1971):

"We conclude that Article 13 of the TRIPS Agreement applies to Articles 11*bis*(1)(iii) and 11(1)(ii) of the Berne Convention (1971) as incorporated into the TRIPS Agreement, given that neither the express wording nor the context of Article 13 or any other provision of the TRIPS Agreement supports the interpretation that the scope of application of Article 13 is limited to the exclusive rights newly introduced under the TRIPS Agreement."[51]

60. The Panel also clearly distinguished the different situations covered by Article 11*bis*(2) of the Berne Convention (1971) and Article 13 of the *TRIPS Agreement*, respectively:

"We believe that Article 11*bis*(2) of the Berne Convention (1971) and Article 13 cover different situations. On the one hand, Article 11*bis*(2) authorizes Members to determine conditions under which the rights conferred by Article 11*bis*(1)(i–iii) may be exercised. The imposition of such conditions may completely replace the free exercise of the exclusive right of authorizing the use of the rights embodied in subparagraphs (i–iii) provided that equitable remuneration and the author's moral rights are not prejudiced. However, unlike Article 13 of the TRIPS Agreement, Article 11*bis*(2) of the Berne Convention (1971) would not in any case justify use free of charge.

On the other hand, it is sufficient that a limitation or an exception to the exclusive rights provided under Article 11*bis*(1) of the Berne Convention (1971) as incorporated into the TRIPS Agreement meets the three conditions contained in its Article 13 to be permissible. If these three conditions are met, a government may choose between different options for limiting the right in question, including use free of charge and without an authorization by the right holder. This is not in conflict with any of the paragraphs of Article 11*bis* because use free of any charge may be permitted for minor exceptions by virtue of the minor exceptions doctrine which applies, *inter alia*, also to Article 11*bis*.

As regards situations that would not meet the above-mentioned three conditions, a government may not justify an exception, including one involving use free of charge, by Article 13 of the TRIPS Agreement. However, also in these situations Article 11*bis*(2) of the Berne Convention (1971) as incorporated into the TRIPS Agreement would nonetheless allow Members to substitute, for an exclusive right, a compulsory licence, or determine other conditions provided that they were not prejudicial to the right holder's right to obtain an equitable remuneration."[52]

61. In the same context, the Panel considered that a reading of Articles 11*bis*(2) of the Berne Convention (1971) and Article 13 of the *TRIPS Agreement* which did not differentiate the situations covered respectively by these provisions, would render Article 13 "somewhat redundant":

"We believe that our interpretation gives meaning and effect to Article 11*bis*(2), the minor exceptions doctrine as it applies to Article 11*bis*, and Article 13. However, in our view, under the interpretation suggested by the European Communities this would not be the case, e.g., in the following situations. If any *de minimis* exception from rights conferred by Article 11*bis*(1)(i–iii) were subject to the requirement to provide equitable remuneration within the meaning of Article 11*bis*(2), no exemption whatsoever from the rights recognized by Article 11*bis*(1) could permit use free of charge even if the three criteria of Article 13 were met. As a result, narrow exceptions or limitations would be subject to the three conditions of Article 13 in addition to the requirement to provide equitable remuneration. At the same time, broader exceptions or limitations which do not comply with the criteria of Article 13 could arguably still be justified under Article 11*bis*(2) as long as the conditions imposed ensure, *inter alia*, equitable remuneration. Such an interpretation could render Article 13 somewhat redundant because narrow exceptions would be subject to all the requirements of Article 13 and Article 11*bis*(2) on a cumulative basis, while for broader exceptions compliance with Article 11*bis*(2) could suffice. Both situations would lead to the result that any use free of charge would not be permissible. These examples are illustrative of situations where the terms and conditions of Article 13, Article 11*bis*(2) and the minor exceptions doctrine would not be given full meaning and effect."[53]

62. With respect to the relationship of Article 13 to Article 9(2) of the Berne Convention (1971) and Articles 17, 26.2 and 30 of the *TRIPS Agreement*, see footnote 104.

[50] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.97.
[51] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.94.
[52] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.87–6.89.
[53] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.90.

(c) "certain special cases"

63. In *US – Section 110(5) Copyright Act*, the Panel interpreted the meaning of the phrase "certain special cases", the first condition in Article 13:

> "In our view, the first condition of Article 13 requires that a limitation or exception in national legislation should be clearly defined and should be narrow in its scope and reach. On the other hand, a limitation or exception may be compatible with the first condition even if it pursues a special purpose whose underlying legitimacy in a normative sense cannot be discerned. The wording of Article 13's first condition does not imply passing a judgment on the legitimacy of the exceptions in dispute. However, public policy purposes stated by law-makers when enacting a limitation or exception may be useful from a factual perspective for making inferences about the scope of a limitation or exception or the clarity of its definition."[54]

64. The Panel also addressed the relevance of whether the measure at issue had as its declared aim a legitimate public policy:

> "As regards the parties' arguments on whether the public policy purpose of an exception is relevant, we believe that the term 'certain special cases' should not lightly be equated with 'special purpose'.[55] It is difficult to reconcile the wording of Article 13 with the proposition that an exception or limitation must be justified in terms of a legitimate public policy purpose in order to fulfill the first condition of the Article. We also recall in this respect that in interpreting other WTO rules, such as the national treatment clauses of the GATT and the GATS, the Appellate Body has rejected interpretative tests which were based on the subjective aim or objective pursued by national legislation.[56]"[57]

65. The Panel subsequently applied the above quoted standard under Article 13 to examine whether the United States' measure at issue in *US – Section 110(5) Copyright Act* met the first condition of "certain special cases":

> "[W]e first examine whether the exceptions have been clearly defined. Second, we ascertain whether the exemptions are narrow in scope, *inter alia*, with respect to their reach. In that respect, we take into account what percentage of eating and drinking establishments and retail establishments may benefit from the business exemption under subparagraph (B), and in turn what percentage of establishments may take advantage of the homestyle exemption under subparagraph (A). On a subsidiary basis, we consider whether it is possible to draw inferences about the reach of the business and homestyle exemptions from the stated policy purposes underlying these exemptions according to the statements made during the US legislative process."[58]

(d) "do not conflict with a normal exploitation of the work"

66. In *US – Section 110(5) Copyright Act*, in examining the second condition under Article 13, i.e. "do not conflict with a normal exploitation of the work", the Panel first sought a definition for the term "exploitation":

> "The ordinary meaning of the term 'exploit' connotes 'making use of' or 'utilising for one's own ends'. We believe that 'exploitation' of musical works thus refers to the activity by which copyright owners employ the exclusive rights conferred on them to extract economic value from their rights to those works."[59]

67. The Panel then proceeded to provide an interpretation of the term "normal":

> "We note that the ordinary meaning of the term 'normal' can be defined as 'constituting or conforming to a type or standard; regular, usual, typical, ordinary, conventional . . .'. In our opinion, these definitions appear to reflect two connotations: the first one appears to be of an empirical nature, i.e., what is regular, usual, typical or ordinary. The other one reflects a somewhat more normative, if not dynamic, approach, i.e., conforming to a type or standard. We do not feel compelled to pass a judgment on which one of these connotations could be more relevant. Based on Article 31 of the Vienna Convention, we will attempt to develop a harmonious interpretation which gives meaning and effect to both connotations of 'normal'.
>
> If 'normal' exploitation were equated with full use of all exclusive rights conferred by copyrights, the exception

---

[54] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.112.

[55] (*footnote original*) We note that the term "special purpose" has been referred to in interpreting the largely similarly worded Article 9(2) of the Berne Convention (1971). *See* Ricketson, *The Berne Convention*, op. cit., p. 482. We are ready to take into account "teachings of the most highly qualified publicists of the various nations" as a "subsidiary source for the determination of law". We refer to this phrase in the sense of Article 38(d) of the Statute of the International Court of Justice which refers to such "teachings" (or in French "la doctrine") as "subsidiary means for the determination of law". But we are cautious to use the interpretation of a term developed in the context of an exception for the reproduction right for interpreting the same terms in the context of a largely similarly worded exception for other exclusive rights conferred by copyrights.

[56] (*footnote original*) *See* Appellate Body Report on *Japan – Alcoholic Beverages*, pp. 19–23, for the rejection of the so-called "aims and effects" test in the context of the national treatment clause of Article III of GATT 1994. *See also* the Appellate Body Report on *EC – Bananas III*, paras. 241, 243, 246, for the rejection of the "aims-and-effects" test in the context of the national treatment clause of Article XVII of GATS.

[57] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.111.

[58] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.113.

[59] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.165.

clause of Article 13 would be left devoid of meaning. Therefore, 'normal' exploitation clearly means something less than full use of an exclusive right.[60]"[61]

68. The Panel then endorsed a differentiated examination of whether a limitation or an exception conflicts with the normal exploitation of a work:

"We agree with the European Communities that whether a limitation or an exception conflicts with a normal exploitation of a work should be judged for each exclusive right individually."[62]

69. The Panel also indicated that when assessing the meaning of "normal exploitation", it would consider both empirical and normative criteria:

"In our view, this test [whether there are areas of the market in which the copyright owner would ordinarily expect to exploit the work, but which are not available for exploitation because of this exemption] seems to reflect the empirical or quantitative aspect of the connotation of 'normal', the meaning of 'regular, usual, typical or ordinary'. We can, therefore, accept this US approach, but only for the empirical or quantitative side of the connotation. We have to give meaning and effect also to the second aspect of the connotation, the meaning of 'conforming to a type or standard'. We described this aspect of normalcy as reflecting a more normative approach to defining normal exploitation, that includes, *inter alia*, a dynamic element capable of taking into account technological and market developments. The question then arises how this normative aspect of 'normal' exploitation could be given meaning in relation to the exploitation of musical works.

. . .

Thus it appears that one way of measuring the normative connotation of normal exploitation is to consider, in addition to those forms of exploitation that currently generate significant or tangible revenue, those forms of exploitation which, with a certain degree of likelihood and plausibility, could acquire considerable economic or practical importance."[63]

70. After exploring the two different connotations of the term "normal exploitation", the Panel then set forth a test for "normal exploitation" based on the consideration of "economic competition" and "market conditions":

"We believe that an exception or limitation to an exclusive right in domestic legislation rises to the level of a conflict with a normal exploitation of the work (i.e., the copyright or rather the whole bundle of exclusive rights conferred by the ownership of the copyright), if uses, that in principle are covered by that right but exempted under the exception or limitation, enter into economic competition with the ways that right holders normally extract economic value from that right to the work (i.e., the copyright) and thereby deprive them of significant or tangible commercial gains.

In developing a benchmark for defining the normative connotation of normal exploitation, we recall the European Communities' emphasis on the potential impact of an exception rather than on its actual effect on the market at a given point in time, given that, in its view, it is the potential effect that determines the market conditions.

. . .

We base our appraisal of the actual and potential effects on the commercial and technological conditions that prevail in the market currently or in the near future. What is a normal exploitation in the market-place may evolve as a result of technological developments or changing consumer preferences. Thus, while we do not wish to speculate on future developments, we need to consider the actual and potential effects of the exemptions in question in the current market and technological environment.

We do acknowledge that the extent of exercise or non-exercise of exclusive rights by right holders at a given point in time is of great relevance for assessing what is the normal exploitation with respect to a particular exclusive right in a particular market. However, in certain circumstances, current licensing practices may not provide a sufficient guideline for assessing the potential impact of an exception or limitation on normal exploitation. For example, where a particular use of works is not covered

---

[60] (*footnote original*) In the context of exceptions to reproduction rights under Article 9(2) of the Berne Convention (1971) – whose second condition is worded largely identically to the second condition of Article 13 of the TRIPS Agreement – the Main Committee I of the Stockholm Diplomatic Conference (1967) stated:

> "If it is considered that reproduction conflicts with the normal exploitation of the work, reproduction is not permitted at all. If it is considered that reproduction does not conflict with the normal exploitation of the work, the next step would be to consider whether it does not unreasonably prejudice the legitimate interests of the author. Only if such is not the case would it be possible in certain special cases to introduce a compulsory licence, or to provide for use without payment. A practical example may be photocopying for various purposes. If it consists of producing a very large number of copies, it may not be permitted, as it conflicts with a normal exploitation of the work. If it implies a rather large number of copies for use in industrial undertakings, it may not unreasonably prejudice the legitimate interests of the author, provided that, according to national legislation, an equitable remuneration is paid. If a small number of copies is made, photocopying may be permitted without payment, particularly for individual or scientific use."

See the Records of the Intellectual Property Conference of Stockholm, 11 June – 14 July 1967. Report on the Work of the Main Committee I (Substantive Provisions of the Berne Convention: Articles 1–20). As reproduced in the Berne Convention Centenary, p. 197.

[61] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.166–6.167.

[62] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.173.

[63] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.178 and 6.180.

by the exclusive rights conferred in the law of a jurisdiction, the fact that the right holders do not license such use in that jurisdiction cannot be considered indicative of what constitutes normal exploitation. The same would be true in a situation where, due to lack of effective or affordable means of enforcement, right holders may not find it worthwhile or practical to exercise their rights."[64]

(e) "do not unreasonably prejudice the legitimate interests of the right holder"

71. In *US – Section 110(5) Copyright Act*, in examining the third condition under Article 13, i.e. the phrase "do not unreasonably prejudice the legitimate interests of the right holder", the Panel distinguished several steps in the analysis of this requirement:

"We note that the analysis of the third condition of Article 13 of the TRIPS Agreement implies several steps. First, one has to define what are the 'interests' of right holders at stake and which attributes make them 'legitimate'. Then, it is necessary to develop an interpretation of the term 'prejudice' and what amount of it reaches a level that should be considered 'unreasonable'."[65]

72. The Panel then proceeded to examine each of these terms in turn and began with their ordinary meaning:

"The ordinary meaning of the term 'interests' may encompass a legal right or title to a property or to use or benefit of a property (including intellectual property). It may also refer to a concern about a potential detriment or advantage, and more generally to something that is of some importance to a natural or legal person. Accordingly, the notion of 'interests' is not necessarily limited to actual or potential economic advantage or detriment.

The term 'legitimate' has the meanings of

'(a) conformable to, sanctioned or authorized by, law or principle; lawful; justifiable; proper;

(b) normal, regular, conformable to a recognized standard type.'

Thus, the term relates to lawfulness from a legal positivist perspective, but it has also the connotation of legitimacy from a more normative perspective, in the context of calling for the protection of interests that are justifiable in the light of the objectives that underlie the protection of exclusive rights.

We note that the ordinary meaning of 'prejudice' connotes damage, harm or injury. 'Not unreasonable' connotes a slightly stricter threshold than 'reasonable'. The latter term means 'proportionate', 'within the limits of reason, not greatly less or more than might be thought likely or appropriate', or 'of a fair, average or considerable amount or size'."[66]

73. After considering the ordinary meaning of the individual terms of the phrase "do not unreasonably prejudice the legitimate interests of the right holder", the Panel considered these terms more specifically:

"Given that the parties do not question the 'legitimacy' of the interest of right holders to exercise their rights for economic gain, the crucial question becomes which degree or level of 'prejudice' may be considered as 'unreasonable'. Before dealing with the question of what amount or which kind of prejudice reaches a level beyond reasonable, we need to find a way to measure or quantify legitimate interests.

In our view, one – albeit incomplete and thus conservative – way of looking at legitimate interests is the economic value of the exclusive rights conferred by copyright on their holders. It is possible to estimate in economic terms the value of exercising, e.g., by licensing, such rights. That is not to say that legitimate interests are necessarily limited to this economic value.

In examining the second condition of Article 13, we have addressed the US argument that the prejudice to right holders caused by the exemptions at hand are minimal because they already receive royalties from broadcasting stations. We concluded that each exclusive right conferred by copyright, *inter alia*, under each subparagraph of Articles 11*bis* and 11 of the Berne Convention (1971), has to be considered separately for the purpose of examining whether a possible conflict with a 'normal exploitation' exists.

The crucial question is which degree or level of 'prejudice' may be considered as 'unreasonable', given that, under the third condition, a certain amount of 'prejudice' has to be presumed justified as 'not unreasonable'. In our view, prejudice to the legitimate interests of right holders reaches an unreasonable level if an exception or limitation causes or has the potential to cause an unreasonable loss of income to the copyright owner."[67]

74. The Panel indicated that the "reasonableness" of the prejudice to the right holder should not be assessed only with respect to the parties of the dispute at hand:

"However, given our considerations above, our assessment of whether the prejudice, caused by the exemptions contained in Section 110(5), to the legitimate interests of the right holder is of an unreasonable level is not limited to the right holders of the European Communities."[68]

75. With respect to its methodology for examination of the existence of a prejudice, the Panel stated that it would consider information on market conditions and consider both actual and potential effects:

---

[64] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.183–6.184 and 6.187–6.188.
[65] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.222.
[66] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.223–6.225.
[67] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.226–6.229.
[68] Panel Report on *US – Section 110(5) Copyright Act*, para. 6.235.

"We will consider the information on market conditions provided by the parties taking into account, to the extent feasible, the actual as well as the potential prejudice caused by the exemptions, as a prerequisite for determining whether the extent or degree of prejudice is of an unreasonable level. In these respects, we recall our consideration above that taking account of actual as well as potential effects is consistent with past GATT/WTO dispute settlement practice.

. . .

[I]n considering the prejudice to the legitimate interests of right holders caused by the business exemption, we have to take into account not only the actual loss of income from those restaurants that were licensed by the CMOs at the time that the exemption become effective, but also the loss of potential revenue from other restaurants of similar size likely to play music that were not licensed at that point."[69]

XV. ARTICLE 14

A. TEXT OF ARTICLE 14

Article 14
Protection of Performers, Producers of Phonograms (Sound Recordings) and Broadcasting Organizations

1. In respect of a fixation of their performance on a phonogram, performers shall have the possibility of preventing the following acts when undertaken without their authorization: the fixation of their unfixed performance and the reproduction of such fixation. Performers shall also have the possibility of preventing the following acts when undertaken without their authorization: the broadcasting by wireless means and the communication to the public of their live performance.

2. Producers of phonograms shall enjoy the right to authorize or prohibit the direct or indirect reproduction of their phonograms.

3. Broadcasting organizations shall have the right to prohibit the following acts when undertaken without their authorization: the fixation, the reproduction of fixations, and the rebroadcasting by wireless means of broadcasts, as well as the communication to the public of television broadcasts of the same. Where Members do not grant such rights to broadcasting organizations, they shall provide owners of copyright in the subject matter of broadcasts with the possibility of preventing the above acts, subject to the provisions of the Berne Convention (1971).

4. The provisions of Article 11 in respect of computer programs shall apply *mutatis mutandis* to producers of phonograms and any other right holders in phonograms as determined in a Member's law. If on 15 April 1994 a Member has in force a system of equitable remuneration of right holders in respect of the rental of phonograms, it may maintain such system provided that the commercial rental of phonograms is not giving rise to the material impairment of the exclusive rights of reproduction of right holders.

5. The term of the protection available under this Agreement to performers and producers of phonograms shall last at least until the end of a period of 50 years computed from the end of the calendar year in which the fixation was made or the performance took place. The term of protection granted pursuant to paragraph 3 shall last for at least 20 years from the end of the calendar year in which the broadcast took place.

6. Any Member may, in relation to the rights conferred under paragraphs 1, 2 and 3, provide for conditions, limitations, exceptions and reservations to the extent permitted by the Rome Convention. However, the provisions of Article 18 of the Berne Convention (1971) shall also apply, *mutatis mutandis*, to the rights of performers and producers of phonograms in phonograms.

B. INTERPRETATION AND APPLICATION OF ARTICLE 14

No jurisprudence or decision of a competent WTO body.

Section 2: Trademarks

XVI. ARTICLE 15

A. TEXT OF ARTICLE 15

Article 15
Protectable Subject Matter

1. Any sign, or any combination of signs, capable of distinguishing the goods or services of one undertaking from those of other undertakings, shall be capable of constituting a trademark. Such signs, in particular words including personal names, letters, numerals, figurative elements and combinations of colours as well as any combination of such signs, shall be eligible for registration as trademarks. Where signs are not inherently capable of distinguishing the relevant goods or services, Members may make registrability depend on distinctiveness acquired through use. Members may require, as a condition of registration, that signs be visually perceptible.

2. Paragraph 1 shall not be understood to prevent a Member from denying registration of a trademark on other grounds, provided that they do not derogate from the provisions of the Paris Convention (1967).

3. Members may make registrability depend on use. However, actual use of a trademark shall not be a condition for filing an application for registration. An application shall not be refused solely on the ground that

[69] Panel Report on *US – Section 110(5) Copyright Act*, paras. 6.236 and 6.249.

intended use has not taken place before the expiry of a period of three years from the date of application.

4. The nature of the goods or services to which a trademark is to be applied shall in no case form an obstacle to registration of the trademark.

5. Members shall publish each trademark either before it is registered or promptly after it is registered and shall afford a reasonable opportunity for petitions to cancel the registration. In addition, Members may afford an opportunity for the registration of a trademark to be opposed.

B. INTERPRETATION AND APPLICATION OF ARTICLE 15

1. Article 15.1

76. In *US – Section 211 Appropriations Act*, the Appellate Body rejected an argument that Members must register trademarks that meet the requirements of Article 15.1:

> "It follows that the wording of Article 15.1 allows WTO Members to set forth in their domestic legislation conditions for the registration of trademarks that do *not* address the definition of either 'protectable subject-matter' or of what constitutes a trademark.
>
> . . .
>
> In our view, Article 15.1 of the *TRIPS Agreement* limits the right of Members to determine the 'conditions' for filing and registration of trademarks under their domestic legislation pursuant to Article 6(1) [of the Paris Convention (1967) as incorporated in the TRIPS Agreement] *only* as it relates to the distinctiveness requirements enunciated in Article 15.1."[70]

2. Article 15.2

77. In *US – Section 211 Appropriations Act*, the Appellate Body found that paragraph 2 of Article 15 permits Members to deny trademark registration on grounds other than those expressly provided for in the *TRIPS Agreement* and the Paris Convention (1967):

> "The specific reference to Article 15.1 in Article 15.2 makes it clear that the 'other grounds' for denial of registration to which Article 15.2 refers are different from those mentioned in Article 15.1. . . .
>
> . . .
>
> . . . a condition need not be expressly mentioned in the Paris Convention (1967) in order not to 'derogate' from it. Denial of registration on 'other grounds' would derogate from the Paris Convention (1967) only if the denial were on grounds that are inconsistent with the provisions of that Convention.
>
> [We] conclude also that 'other grounds' for the denial of registration within the meaning of Article 15.2 of the *TRIPS Agreement* are not limited to grounds expressly provided for in the exceptions contained in the Paris Convention (1967) or the *TRIPS Agreement*. . . ."[71]

XVII. ARTICLE 16

A. TEXT OF ARTICLE 16

Article 16
Rights Conferred

1. The owner of a registered trademark shall have the exclusive right to prevent all third parties not having the owner's consent from using in the course of trade identical or similar signs for goods or services which are identical or similar to those in respect of which the trademark is registered where such use would result in a likelihood of confusion. In case of the use of an identical sign for identical goods or services, a likelihood of confusion shall be presumed. The rights described above shall not prejudice any existing prior rights, nor shall they affect the possibility of Members making rights available on the basis of use.

2. Article 6*bis* of the Paris Convention (1967) shall apply, *mutatis mutandis*, to services. In determining whether a trademark is well-known, Members shall take account of the knowledge of the trademark in the relevant sector of the public, including knowledge in the Member concerned which has been obtained as a result of the promotion of the trademark.

3. Article 6*bis* of the Paris Convention (1967) shall apply, *mutatis mutandis*, to goods or services which are not similar to those in respect of which a trademark is registered, provided that use of that trademark in relation to those goods or services would indicate a connection between those goods or services and the owner of the registered trademark and provided that the interests of the owner of the registered trademark are likely to be damaged by such use.

B. INTERPRETATION AND APPLICATION OF ARTICLE 16

1. General

78. In its review under Article 24.2 concerning the application of the provisions from the Section of the *TRIPS Agreement* on geographical indications, the Council for TRIPS invited Members to respond to a Checklist of Questions, some of which relate to Article 16. See paragraph 87 below.

[70] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 156 and 165.
[71] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 171, 177 and 178.

2. Article 16.1

(a) "The owner"

79. In *US – Section 211 Appropriations Act*, the Appellate Body found that the *TRIPS Agreement* does not contain a provision that determines who owns or who does not own a trademark:

> "As we read it, Article 16 confers on the *owner* of a registered trademark an internationally agreed minimum level of 'exclusive rights' that all WTO Members must guarantee in their domestic legislation. These exclusive rights protect the owner against infringement of the registered trademark by unauthorized third parties.
>
> We underscore that Article 16.1 confers these exclusive rights on the 'owner' of a registered trademark. As used in this treaty provision, the ordinary meaning of 'owner' can be defined as the proprietor or the person who holds the title or dominion of the property constituted by the trademark. We agree with the Panel that this ordinary meaning does not clarify how the ownership of a trademark is to be determined. Also, we agree with the Panel that Article 16.1 does not, in express terms, define how ownership of a registered trademark is to be determined. Article 16.1 confers exclusive rights on the 'owner', but Article 16.1 does not tell us who the 'owner' *is*.
>
> . . .
>
> [W]e conclude that neither Article 16.1 of the *TRIPS Agreement*, nor any other provision of either the *TRIPS Agreement* and the Paris Convention (1967), determines who owns or who does not own a trademark."[72]

(b) "making rights available on the basis of use"

80. In *US – Section 211 Appropriations Act*, the Appellate Body rejected an argument that the holder of a trademark registration must, under Article 16.1, be considered the owner of the trademark until such time as it ceases to hold the registration:

> "We recall that the European Communities contends that the Panel created an artificial distinction between the owner of a registered trademark and the trademark itself. We disagree with the apparent equation by the European Communities of trademark registration with trademark ownership. Here, again, the European Communities appears to us to overlook the necessary legal distinction between a trademark system in which ownership is based on registration and a trademark system in which ownership is based on use. As we have noted more than once, United States law confers exclusive trademark rights, not on the basis of registration, but on the basis of use. There is nothing in Article 16.1 that compels the United States to base the protection of exclusive rights on registration. Indeed, as we have also observed more than once, the last sentence of Article 16.1 confirms that WTO Members may make such rights available on the basis of use. The United States has done so. Therefore, it necessarily follows that, under United States law, registration is *not* conclusive of ownership of a trademark. Granted, under United States law, the registration of a trademark does confer a *prima facie* presumption of the registrant's ownership of the registered trademark and of the registrant's exclusive right to use that trademark in commerce. But, while we agree with the Panel that the presumptive owner of the *registered* trademark must be entitled, under United States law, to the exclusive rights flowing from Article 16.1 unless and until the presumption arising from registration is successfully challenged through court or administrative proceedings, we do not agree with the European Communities' evident equation of registration with ownership."[73]

XVIII. ARTICLE 17

A. TEXT OF ARTICLE 17

Article 17
Exceptions

Members may provide limited exceptions to the rights conferred by a trademark, such as fair use of descriptive terms, provided that such exceptions take account of the legitimate interests of the owner of the trademark and of third parties.

B. INTERPRETATION AND APPLICATION OF ARTICLE 17

81. With respect to the relationship of Article 17 to Article 9(2) of the Berne Convention (1971) and Articles 13, 26.2 and 30 of the *TRIPS Agreement*, see footnote 104.

XIX. ARTICLE 18

A. TEXT OF ARTICLE 18

Article 18
Term of Protection

Initial registration, and each renewal of registration, of a trademark shall be for a term of no less than seven years. The registration of a trademark shall be renewable indefinitely.

B. INTERPRETATION AND APPLICATION OF ARTICLE 18

No jurisprudence or decision of a competent WTO body.

---

[72] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 186, 187 and 195.

[73] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 199.

XX. ARTICLE 19

A. TEXT OF ARTICLE 19

Article 19
Requirement of Use

1. If use is required to maintain a registration, the registration may be cancelled only after an uninterrupted period of at least three years of non-use, unless valid reasons based on the existence of obstacles to such use are shown by the trademark owner. Circumstances arising independently of the will of the owner of the trademark which constitute an obstacle to the use of the trademark, such as import restrictions on or other government requirements for goods or services protected by the trademark, shall be recognized as valid reasons for non-use.

2. When subject to the control of its owner, use of a trademark by another person shall be recognized as use of the trademark for the purpose of maintaining the registration.

B. INTERPRETATION AND APPLICATION OF ARTICLE 19

No jurisprudence or decision of a competent WTO body.

XXI. ARTICLE 20

A. TEXT OF ARTICLE 20

Article 20
Other Requirements

The use of a trademark in the course of trade shall not be unjustifiably encumbered by special requirements, such as use with another trademark, use in a special form or use in a manner detrimental to its capability to distinguish the goods or services of one undertaking from those of other undertakings. This will not preclude a requirement prescribing the use of the trademark identifying the undertaking producing the goods or services along with, but without linking it to, the trademark distinguishing the specific goods or services in question of that undertaking.

B. INTERPRETATION AND APPLICATION OF ARTICLE 20

82. The dispute in *Indonesia – Autos* occurred before the end of the transitional period for developing country Members to implement certain provisions of the *TRIPS Agreement*. However, the complaint raised Article 20 only in conjunction with two other articles to which the transitional period did not apply. With respect to the claim concerning national treatment under Article 3, the Panel did not consider the provisions of the relevant Indonesian law as "requirements" within the meaning of Article 20:

> "In taking up the first of these questions, [i.e. is the use of a trademark to which the Indonesian law and practices at issue relates 'specifically addressed' by Article 20] the issue to be considered initially is whether the Indonesian law and practices in question constitute a special requirement that might encumber the use of the trademarks of nationals of other WTO Members in terms of Article 20 of the TRIPS Agreement. The United States has put forward two basic arguments on this question, which are similar to the arguments it has put forward also in regard to the maintenance of trademarks .... The first argument is that a foreign company that enters into an arrangement with a Pioneer company would be encumbered in using the trademark that it used elsewhere for the model that was adopted by the National Car Programme. We do not accept that this argument establishes an inconsistency with the provisions of Article 20, for the reason ... that, if a foreign company enters into an arrangement with a Pioneer company it does so voluntarily and in the knowledge of any consequent implications for its ability to use any pre-existing trademark. In these circumstances, we do not consider the provisions of the National Car Programme as they relate to trademarks can be construed as 'requirements', in the sense of Article 20.
>
> The second United States argument is that non-Indonesian car companies are encumbered in using their trademarks in Indonesia by being put at a competitive disadvantage because the cars produced under the National Car Programme bearing the Indonesian trademark benefit from tariff, subsidy and other benefits flowing from that programme. In regard to this argument, we also feel that the points developed in our earlier discussion of the United States claims regarding the maintenance of trademarks are relevant, in particular in paragraph 14.273 above. Moreover, the United States has not explained to our satisfaction how the ineligibility for benefits accruing under the National Car Programme could constitute 'requirements' imposed on foreign trademark holders, in the sense of Article 20 of the TRIPS Agreement."[74]

83. The Panel made the same finding with respect to the claim concerning the commitment under Article 65.5:

> "The arguments put forward by the United States in support of its claim are essentially the same as those that have been considered in paragraphs 14.277 and 14.278 above. For the reasons set out in those paragraphs above, we find that the United States has not demonstrated that measures have been taken that reduce the degree of consistency with the provisions of Article 20 and which would therefore be in violation of Indonesia's obligations under Article 65.5 of the TRIPS Agreement."[75]

[74] Panel Report on *Indonesia – Autos*, paras. 14.277–14.278.
[75] Panel Report on *Indonesia – Autos*, para. 14.282.

XXII. ARTICLE 21

A. TEXT OF ARTICLE 21

Article 21
Licensing and Assignment

Members may determine conditions on the licensing and assignment of trademarks, it being understood that the compulsory licensing of trademarks shall not be permitted and that the owner of a registered trademark shall have the right to assign the trademark with or without the transfer of the business to which the trademark belongs.

B. INTERPRETATION AND APPLICATION OF ARTICLE 21

No jurisprudence or decision of a competent WTO body.

Section 3: Geographical Indications

XXIII. ARTICLE 22

A. TEXT OF ARTICLE 22

Article 22
Protection of Geographical Indications

1. Geographical indications are, for the purposes of this Agreement, indications which identify a good as originating in the territory of a Member, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin.

2. In respect of geographical indications, Members shall provide the legal means for interested parties to prevent:

(a) the use of any means in the designation or presentation of a good that indicates or suggests that the good in question originates in a geographical area other than the true place of origin in a manner which misleads the public as to the geographical origin of the good;

(b) any use which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention (1967).

3. A Member shall, *ex officio* if its legislation so permits or at the request of an interested party, refuse or invalidate the registration of a trademark which contains or consists of a geographical indication with respect to goods not originating in the territory indicated, if use of the indication in the trademark for such goods in that Member is of such a nature as to mislead the public as to the true place of origin.

4. The protection under paragraphs 1, 2 and 3 shall be applicable against a geographical indication which, although literally true as to the territory, region or locality in which the goods originate, falsely represents to the public that the goods originate in another territory.

B. INTERPRETATION AND APPLICATION OF ARTICLE 22

84. With respect to the review under Article 24.2 of the application of the provisions of the Section of the *TRIPS Agreement* on geographical indications, see paragraph 87 below.

XXIV. ARTICLE 23

A. TEXT OF ARTICLE 23

Article 23
Additional Protection for Geographical Indications for Wines and Spirits

1. Each Member shall provide the legal means for interested parties to prevent use of a geographical indication identifying wines for wines not originating in the place indicated by the geographical indication in question or identifying spirits for spirits not originating in the place indicated by the geographical indication in question, even where the true origin of the goods is indicated or the geographical indication is used in translation or accompanied by expressions such as "kind", "type", "style", "imitation" or the like.[4]

(*footnote original*) [4] Notwithstanding the first sentence of Article 42, Members may, with respect to these obligations, instead provide for enforcement by administrative action.

2. The registration of a trademark for wines which contains or consists of a geographical indication identifying wines or for spirits which contains or consists of a geographical indication identifying spirits shall be refused or invalidated, *ex officio* if a Member's legislation so permits or at the request of an interested party, with respect to such wines or spirits not having this origin.

3. In the case of homonymous geographical indications for wines, protection shall be accorded to each indication, subject to the provisions of paragraph 4 of Article 22. Each Member shall determine the practical conditions under which the homonymous indications in question will be differentiated from each other, taking into account the need to ensure equitable treatment of the producers concerned and that consumers are not misled.

4. In order to facilitate the protection of geographical indications for wines, negotiations shall be undertaken in the Council for TRIPS concerning the establishment of a multilateral system of notification and registration of geographical indications for wines eligible for protection in those Members participating in the system.

B. INTERPRETATION AND APPLICATION OF ARTICLE 23

1. General

85. With respect to the review under Article 24.2 of the application of the provisions of the Section of the

TRIPS Agreement on geographical indications, see paragraph 87 below.

2. Article 23.4

86. At its meeting of 27 February 1997, the Council for TRIPS agreed to initiate preliminary work on issues relevant to the negotiations specified in Article 23.4 of the *TRIPS Agreement* through an information-gathering activity.[76] In this connection, at its meeting of 19 September 1997, the Council requested the Secretariat to prepare a factual background note on existing international notification and registration systems for geographical indications relating to wines and spirits, according to an agreed outline.[77] At its meeting of 17 February 1999, the Council agreed to request the Secretariat to look to see what additional information it could provide on national and international systems for the protection of geographical indications relating to products other than wines and spirits, taking into account certain matters.[78]

XXV. ARTICLE 24

A. TEXT OF ARTICLE 24

Article 24
International Negotiations; Exceptions

1. Members agree to enter into negotiations aimed at increasing the protection of individual geographical indications under Article 23. The provisions of paragraphs 4 through 8 below shall not be used by a Member to refuse to conduct negotiations or to conclude bilateral or multilateral agreements. In the context of such negotiations, Members shall be willing to consider the continued applicability of these provisions to individual geographical indications whose use was the subject of such negotiations.

2. The Council for TRIPS shall keep under review the application of the provisions of this Section; the first such review shall take place within two years of the entry into force of the WTO Agreement. Any matter affecting the compliance with the obligations under these provisions may be drawn to the attention of the Council, which, at the request of a Member, shall consult with any Member or Members in respect of such matter in respect of which it has not been possible to find a satisfactory solution through bilateral or plurilateral consultations between the Members concerned. The Council shall take such action as may be agreed to facilitate the operation and further the objectives of this Section.

3. In implementing this Section, a Member shall not diminish the protection of geographical indications that existed in that Member immediately prior to the date of entry into force of the WTO Agreement.

4. Nothing in this Section shall require a Member to prevent continued and similar use of a particular geographical indication of another Member identifying wines or spirits in connection with goods or services by any of its nationals or domiciliaries who have used that geographical indication in a continuous manner with regard to the same or related goods or services in the territory of that Member either (*a*) for at least 10 years preceding 15 April 1994 or (*b*) in good faith preceding that date.

5. Where a trademark has been applied for or registered in good faith, or where rights to a trademark have been acquired through use in good faith either:

(a) before the date of application of these provisions in that Member as defined in Part VI; or

(b) before the geographical indication is protected in its country of origin;

measures adopted to implement this Section shall not prejudice eligibility for or the validity of the registration of a trademark, or the right to use a trademark, on the basis that such a trademark is identical with, or similar to, a geographical indication.

6. Nothing in this Section shall require a Member to apply its provisions in respect of a geographical indication of any other Member with respect to goods or services for which the relevant indication is identical with the term customary in common language as the common name for such goods or services in the territory of that Member. Nothing in this Section shall require a Member to apply its provisions in respect of a geographical indication of any other Member with respect to products of the vine for which the relevant indication is identical with the customary name of a grape variety existing in the territory of that Member as of the date of entry into force of the WTO Agreement.

7. A Member may provide that any request made under this Section in connection with the use or registration of a trademark must be presented within five years after the adverse use of the protected indication has become generally known in that Member or after the date of registration of the trademark in that Member provided that the trademark has been published by that date, if such date is earlier than the date on which the adverse use became generally known in that Member, provided that the geographical indication is not used or registered in bad faith.

8. The provisions of this Section shall in no way prejudice the right of any person to use, in the course of trade, that person's name or the name of that person's predecessor in business, except where such name is used in such a manner as to mislead the public.

[76] IP/C/M/12, para. 73.
[77] IP/C/M/15, para. 56 and Annex. The Secretariat note was circulated as IP/C/W/85.
[78] IP/C/M/22, para. 102. The additional information was circulated as IP/C/W/85/Add.1.

9. There shall be no obligation under this Agreement to protect geographical indications which are not or cease to be protected in their country of origin, or which have fallen into disuse in that country.

B. INTERPRETATION AND APPLICATION OF ARTICLE 24

1. Article 24.2

87. At its meeting of 12 May 1998, the Council for TRIPS, in its review under Article 24.2 of the application of the provisions of the section of the *TRIPS Agreement* on geographical indications, took note of a Checklist of Questions[79] and invited those Members already under an obligation to apply the provisions of the section on geographical indications to provide responses, it being understood that other Members could also furnish replies on a voluntary basis. Further, at its meeting of 16 July 1998, the Council for TRIPS took note of some additional questions and agreed that those questions be included in the Checklist.[80] At its meeting of 7–8 July 1999, the Council for TRIPS requested the Secretariat to prepare a paper summarizing the responses to the Checklist of Questions on the basis of an outline, on the understanding that it would be made explicit that the paper would be without prejudice to the rights and obligations of Members and that its purpose was merely to facilitate an understanding of the more detailed information that had been provided in national responses to the Checklist.[81]

Section 4: Industrial Designs

XXVI. ARTICLE 25

A. TEXT OF ARTICLE 25

Article 25
Requirements for Protection

1. Members shall provide for the protection of independently created industrial designs that are new or original. Members may provide that designs are not new or original if they do not significantly differ from known designs or combinations of known design features. Members may provide that such protection shall not extend to designs dictated essentially by technical or functional considerations.

2. Each Member shall ensure that requirements for securing protection for textile designs, in particular in regard to any cost, examination or publication, do not unreasonably impair the opportunity to seek and obtain such protection. Members shall be free to meet this obligation through industrial design law or through copyright law.

B. INTERPRETATION AND APPLICATION OF ARTICLE 25

No jurisprudence or decision of a competent WTO body.

XXVII. ARTICLE 26

A. TEXT OF ARTICLE 26

Article 26
Protection

1. The owner of a protected industrial design shall have the right to prevent third parties not having the owner's consent from making, selling or importing articles bearing or embodying a design which is a copy, or substantially a copy, of the protected design, when such acts are undertaken for commercial purposes.

2. Members may provide limited exceptions to the protection of industrial designs, provided that such exceptions do not unreasonably conflict with the normal exploitation of protected industrial designs and do not unreasonably prejudice the legitimate interests of the owner of the protected design, taking account of the legitimate interests of third parties.

3. The duration of protection available shall amount to at least 10 years.

B. INTERPRETATION AND APPLICATION OF ARTICLE 26

1. Article 26.2

88. With respect to the relationship of Article 26.2 to Article 9(2) of the Berne Convention (1971) and Articles 13, 17, and 30 of the *TRIPS Agreement*, see footnote 104.

Section 5: Patents

XXVIII. ARTICLE 27

A. TEXT OF ARTICLE 27

Article 27
Patentable Subject Matter

1. Subject to the provisions of paragraphs 2 and 3, patents shall be available for any inventions, whether products or processes, in all fields of technology, provided that they are new, involve an inventive step and are capable of industrial application.[5] Subject to paragraph 4 of Article 65, paragraph 8 of Article 70 and paragraph

[79] IP/C/M/18, para. 45. The Checklist of Questions was circulated as IP/C/13.
[80] IP/C/M/19, para. 42. The additional questions were circulated as IP/C/13/Add.1.
[81] IP/C/M/24, para. 39. The Secretariat note was circulated as IP/C/W/253 and subsequently updated and circulated as IP/C/W/253/Rev.1.

3 of this Article, patents shall be available and patent rights enjoyable without discrimination as to the place of invention, the field of technology and whether products are imported or locally produced.

(*footnote original*) [5] For the purposes of this Article, the terms "inventive step" and "capable of industrial application" may be deemed by a Member to be synonymous with the terms "non-obvious" and "useful" respectively.

2. Members may exclude from patentability inventions, the prevention within their territory of the commercial exploitation of which is necessary to protect *ordre public* or morality, including to protect human, animal or plant life or health or to avoid serious prejudice to the environment, provided that such exclusion is not made merely because the exploitation is prohibited by their law.

3. Members may also exclude from patentability:

(a) diagnostic, therapeutic and surgical methods for the treatment of humans or animals;

(b) plants and animals other than micro-organisms, and essentially biological processes for the production of plants or animals other than non-biological and microbiological processes. However, Members shall provide for the protection of plant varieties either by patents or by an effective *sui generis* system or by any combination thereof. The provisions of this subparagraph shall be reviewed four years after the date of entry into force of the WTO Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 27

1. Article 27.1

(a) "Without discrimination"

89. In *Canada – Pharmaceutical Patents*, in explaining its understanding of the term "without discrimination" in Article 27, the Panel advised against using the term "discrimination" whenever "more precise standards are available", given the potentially "infinite complexity" of the term:

> "The primary TRIPS provisions that deal with discrimination, such as the national treatment and most-favoured-nation provisions of Articles 3 and 4, do not use the term 'discrimination'. They speak in more precise terms. The ordinary meaning of the word 'discriminate' is potentially broader than these more specific definitions. It certainly extends beyond the concept of differential treatment. It is a normative term, pejorative in connotation, referring to results of the unjustified imposition of differentially disadvantageous treatment. Discrimination may arise from explicitly different treatment, sometimes called '*de jure* discrimination', but it may also arise from ostensibly identical treatment which, due to differences in circumstances, produces differentially disadvantageous effects, sometimes called '*de facto* discrimination'. The standards by which the justification for differential treatment is measured are a subject of infinite complexity. 'Discrimination' is a term to be avoided whenever more precise standards are available, and, when employed, it is a term to be interpreted with caution, and with care to add no more precision than the concept contains.
>
> . . .
>
> In considering how to address these conflicting claims of discrimination, the Panel recalled that various claims of discrimination, *de jure* and *de facto*, have been the subject of legal rulings under GATT or the WTO. These rulings have addressed the question whether measures were in conflict with various GATT or WTO provisions prohibiting variously defined forms of discrimination. As the Appellate Body has repeatedly made clear, each of these rulings has necessarily been based on the precise legal text in issue, so that it is not possible to treat them as applications of a general concept of discrimination. Given the very broad range of issues that might be involved in defining the word 'discrimination' in Article 27.1 of the TRIPS Agreement, the Panel decided that it would be better to defer attempting to define that term at the outset, but instead to determine which issues were raised by the record before the Panel, and to define the concept of discrimination to the extent necessary to resolve those issues."[82]

90. The Panel also attributed two different meanings to the term "*de facto* discrimination" under Article 27.1 in the following terms:

> "*[D]e facto* discrimination is a general term describing the legal conclusion that an ostensibly neutral measure transgresses a non-discrimination norm because its actual effect is to impose differentially disadvantageous consequences on certain parties, and because those differential effects are found to be wrong or unjustifiable. Two main issues figure in the application of that general concept in most legal systems. One is the question of *de facto* discriminatory effect – whether the actual effect of the measure is to impose differentially disadvantageous consequences on certain parties. The other, related to the justification for the disadvantageous effects, is the issue of purpose – not an inquiry into the subjective purposes of the officials responsible for the measure, but an inquiry into the objective characteristics of the measure from which one can infer the existence or non-existence of discriminatory objectives."[83]

91. With respect to the anti-discrimination rule in Article 27.1 and Articles 30 and 31, see paragraphs 94–95 below.

[82] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.94 and 7.98.
[83] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.101.

(b) "the field of technology"

92. In *Canada – Patent Term*, addressing a claim of discrimination in terms of the field of technology, the Panel stated that it had ascertained neither *de jure* nor *de facto* discrimination:

> "In sum, the Panel found that the evidence in record before it did not raise a plausible claim of discrimination under Article 27.1 of the TRIPS Agreement. It was not proved that the legal scope of Section 55.2(1) was limited to pharmaceutical products, as would normally be required to raise a claim of *de jure* discrimination. Likewise, it was not proved that the adverse effects of Section 55.2(1) were limited to the pharmaceutical industry, or that the objective indications of purpose demonstrated a purpose to impose disadvantages on pharmaceutical patents in particular, as is often required to raise a claim of *de facto* discrimination. Having found that the record did not raise any of these basic elements of a discrimination claim, the Panel was able to find that Section 55.2(1) is not inconsistent with Canada's obligations under Article 27.1 of the TRIPS Agreement. Because the record did not present issues requiring any more precise interpretation of the term 'discrimination' in Article 27.1, none was made."[84]

2. Article 27.3

93. At its meeting of 1–2 December 1998, the Council for TRIPS agreed to initiate the review due under Article 27.3(b) of the provisions of that subparagraph through an information-gathering exercise. In this connection, the Council invited Members that were already under an obligation to apply Article 27.3(b) to provide information on how the matters addressed in this provision were presently treated in their national law. Other Members were invited to provide such information on a best endeavours basis. While it was left to each Member to provide information as it saw fit, having regard to the specific provisions of Article 27.3(b), the Council requested the Secretariat to provide an illustrative list of questions relevant in this regard, in order to assist Members to prepare their contributions. The Council also requested the Secretariat to establish contact with the FAO, the Secretariat of the Convention on Biological Diversity and UPOV, to request factual information on their activities of relevance. It was understood that this information-gathering was without prejudice to the nature of the review provided for in Article 27.3(b).[85] At its meeting of 2–5 April 2001, the Council agreed that the Secretariat re-issue the illustrative list of questions and invited Members to provide their responses to it, if they had not yet done so.[86] At its meeting of 5–7 March 2002, the Council requested the Secretariat to update the synoptic tables annexed to its note with the list, based on the further information submitted by Members.[87]

3. Relationship with other Articles

94. In *Canada – Pharmaceutical Patents*, rejecting Canada's argument that Article 27.1 did not apply to exceptions granted under Article 30, the Panel addressed the relationship between these provisions:

> "The text of the TRIPS Agreement offers no support for such an interpretation. Article 27.1 prohibits discrimination as to enjoyment of 'patent rights' without qualifying that term. Article 30 exceptions are explicitly described as 'exceptions to the exclusive rights conferred by a patent' and contain no indication that any exemption from non-discrimination rules is intended. A discriminatory exception that takes away enjoyment of a patent right is discrimination as much as is discrimination in the basic rights themselves. The acknowledged fact that the Article 31 exception for compulsory licences and government use is understood to be subject to the non-discrimination rule of Article 27.1, without the need for any textual provision so providing, further strengthens the case for treating the non-discrimination rules as applicable to Article 30. Articles 30 and 31 are linked together by the opening words of Article 31 which define the scope of Article 31 in terms of exceptions not covered by Article 30.[88] Finally, the Panel could not agree with Canada's attempt to distinguish between Articles 30 and 31 on the basis of their mandatory/permissive character; both provisions permit exceptions to patent rights subject to certain mandatory conditions. Nor could the Panel understand how such a 'mandatory/permissive' distinction, even if present, would logically support making the kind of distinction Canada was arguing. In the Panel's view, what was important was that in the rights available under national law, that is to say those resulting from the basic rights and any permissible exceptions to them, the forms of discrimination referred to in Article 27.1 should not be present."[89]

95. Rejecting Canada's related arguments, the Panel also provided guidance as to the policy considerations contained in Article 27:

> "Nor was the Panel able to agree with the policy arguments in support of Canada's interpretation of Article 27. To begin with, it is not true that being able to discriminate against particular patents will make it possible to meet Article 30's requirement that the exception be 'limited'. An Article 30 exception cannot be made

[85] IP/C/M/21, para. 111. The Secretariat note was circulated as IP/C/W/122.

[86] IP/C/M/30, para.186. The illustrative list of questions and an informal note prepared by the Secretariat was reissued as IP/C/W/273.

[87] IP/C/M/37/Add 1, para. 195. The Secretariat note was updated and circulated as IP/C/W/273/Rev.1.

[88] (*footnote original*) Article 31 is titled "Other Use Without Authorization of the Rights Holder", and footnote 7 to Article 31 defines "other use" as "use" (derogations from exclusive patent rights) other than that allowed by Article 30.

[89] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.90.

'limited' by limiting it to one field of technology, because the effects of each exception must be found to be 'limited' when measured against each affected patent. Beyond that, it is not true that Article 27 requires all Article 30 exceptions to be applied to all products. Article 27 prohibits only discrimination as to the place of invention, the field of technology, and whether products are imported or produced locally. Article 27 does not prohibit bona fide exceptions to deal with problems that may exist only in certain product areas. Moreover, to the extent the prohibition of discrimination does limit the ability to target certain products in dealing with certain of the important national policies referred to in Articles 7 and 8.1, that fact may well constitute a deliberate limitation rather than a frustration of purpose. It is quite plausible, as the EC argued, that the TRIPS Agreement would want to require governments to apply exceptions in a non-discriminatory manner, in order to ensure that governments do not succumb to domestic pressures to limit exceptions to areas where right holders tend to be foreign producers."[90]

96. In *India – Patents (US)*, the Appellate Body addressed the relationship between Article 27 and Article 70.8 and held that the latter provision applies in a situation where a Member does not make available patents pursuant to the former provision:

"The introductory clause to Article 70.8 provides that it applies '[w]here a Member does not make available as of the date of entry into force of the WTO Agreement patent protection for pharmaceutical and agricultural chemical products commensurate with its obligations under Article 27 . . .' of the TRIPS Agreement. Article 27 requires that patents be made available 'for any inventions, whether products or processes, in all fields of technology', subject to certain exceptions. However, pursuant to paragraphs 1, 2 and 4 of Article 65, a developing country Member may delay providing product patent protection in areas of technology not protectable in its territory on the general date of application of the TRIPS Agreement for that Member until 1 January 2005. Article 70.8 relates specifically and exclusively to situations where a Member does not provide, as of 1 January 1995, patent protection for pharmaceutical and agricultural chemical products."[91]

97. With respect to the relationship of Section 5 of Part II and Article 70.2, see paragraph 165 below.

XXIX. ARTICLE 28

A. TEXT OF ARTICLE 28

Article 28
Rights Conferred

1. A patent shall confer on its owner the following exclusive rights:

(a) where the subject matter of a patent is a product, to prevent third parties not having the owner's consent from the acts of: making, using, offering for sale, selling, or importing[6] for these purposes that product;

(*footnote original*) [6] This right, like all other rights conferred under this Agreement in respect of the use, sale, importation or other distribution of goods, is subject to the provisions of Article 6.

(b) where the subject matter of a patent is a process, to prevent third parties not having the owner's consent from the act of using the process, and from the acts of: using, offering for sale, selling, or importing for these purposes at least the product obtained directly by that process.

2. Patent owners shall also have the right to assign, or transfer by succession, the patent and to conclude licensing contracts.

B. INTERPRETATION AND APPLICATION OF ARTICLE 28

98. In *Canada – Pharmaceutical Patents*, the Panel was called on to examine a complaint that a Canadian measure was in violation of Article 28.1:

"There was no dispute as to the meaning of Article 28.1 exclusive rights as they pertain to Section 55.2(2) of Canada's Patent Act. Canada acknowledged that the provisions of Section 55.2(2) permitting third parties to 'make', 'construct' or 'use' the patented product during the term of the patent, without the patent owner's permission, would be a violation of Article 28.1 if not excused under Article 30 of the Agreement. The dispute on the claim of violation of Article 28.1 involved whether Section 55.2(2) of the Patent Act complies with the conditions of Article 30."[92]

XXX. ARTICLE 29

A. TEXT OF ARTICLE 29

Article 29
Conditions on Patent Applicants

1. Members shall require that an applicant for a patent shall disclose the invention in a manner sufficiently clear and complete for the invention to be carried out by a person skilled in the art and may require the applicant to indicate the best mode for carrying out the invention known to the inventor at the filing date or, where priority is claimed, at the priority date of the application.

2. Members may require an applicant for a patent to provide information concerning the applicant's corresponding foreign applications and grants.

[90] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.91.
[91] Appellate Body Report on *India – Patents (US)*, para. 52.
[92] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.18.

B. INTERPRETATION AND APPLICATION OF ARTICLE 29

No jurisprudence or decision of a competent WTO body.

XXXI. ARTICLE 30

A. TEXT OF ARTICLE 30

Article 30
Exceptions to Rights Conferred

Members may provide limited exceptions to the exclusive rights conferred by a patent, provided that such exceptions do not unreasonably conflict with a normal exploitation of the patent and do not unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties.

B. INTERPRETATION AND APPLICATION OF ARTICLE 30

1. General

99. In *Canada – Pharmaceutical Patents*, the Panel addressed the basic structure of Article 30, outlined the conditions for its application and then found that these conditions apply cumulatively:

> "Article 30 establishes three criteria that must be met in order to qualify for an exception: (1) the exception must be 'limited'; (2) the exception must not 'unreasonably conflict with normal exploitation of the patent'; (3) the exception must not 'unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties'. The three conditions are cumulative, each being a separate and independent requirement that must be satisfied. Failure to comply with any one of the three conditions results in the Article 30 exception being disallowed.
>
> The three conditions must, of course, be interpreted in relation to each other. Each of the three must be presumed to mean something different from the other two, or else there would be redundancy. Normally, the order of listing can be read to suggest that an exception that complies with the first condition can nevertheless violate the second or third, and that one which complies with the first and second can still violate the third. The syntax of Article 30 supports the conclusion that an exception may be 'limited' and yet fail to satisfy one or both of the other two conditions. The ordering further suggests that an exception that does not 'unreasonably conflict with normal exploitation' could nonetheless 'unreasonably prejudice the legitimate interests of the patent owner'."[93]

100. For a similar analysis of Article 13, see paragraph 58 above.

101. The Panel then considered both the systemic importance of Article 30 within the *TRIPS Agreement* and the extent to which other provisions of the Agreement can impart meaning to Article 30:

> "In the Panel's view, Article 30's very existence amounts to a recognition that the definition of patent rights contained in Article 28 would need certain adjustments. On the other hand, the three limiting conditions attached to Article 30 testify strongly that the negotiators of the Agreement did not intend Article 30 to bring about what would be equivalent to a renegotiation of the basic balance of the Agreement. Obviously, the exact scope of Article 30's authority will depend on the specific meaning given to its limiting conditions. The words of those conditions must be examined with particular care on this point. Both the goals and the limitations stated in Articles 7 and 8.1 must obviously be borne in mind when doing so as well as those of other provisions of the TRIPS Agreement which indicate its object and purposes."[94]

2. "limited exceptions"

102. In *Canada – Pharmaceutical Patents*, the Panel addressed the question whether the "stockpiling" exception was exempted under Article 30, in the light of the requirement under Article 30 that exceptions to Article 28 be "limited". The Panel first agreed with the proposition that the "limited" character of an exception is to be assessed with respect to their impact on the rights of the patent owner:

> "The Panel agreed with the EC interpretation that 'limited' is to be measured by the extent to which the exclusive rights of the patent owner have been curtailed. The full text of Article 30 refers to 'limited exceptions to the exclusive rights conferred by a patent'. In the absence of other indications, the Panel concluded that it would be justified in reading the text literally, focusing on the extent to which legal rights have been curtailed, rather than the size or extent of the economic impact. In support of this conclusion, the Panel noted that the following two conditions of Article 30 ask more particularly about the economic impact of the exception, and provide two sets of standards by which such impact may be judged. The term 'limited exceptions' is the only one of the three conditions in Article 30 under which the extent of the curtailment of rights as such is dealt with."[95]

103. The Panel, however, rejected suggested approaches to measure the curtailment of the patent owner's rights by counting the number of rights impaired or by considering whether the exclusive right to sell during the patent term is affected:

> "The Panel does not agree, however, with the EC's position that the curtailment of legal rights can be measured by simply counting the number of legal rights impaired

[93] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.20–7.21.
[94] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.26.
[95] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.31.

by an exception. A very small act could well violate all five rights provided by Article 28.1 and yet leave each of the patent owner's rights intact for all useful purposes. To determine whether a particular exception constitutes a limited exception, the extent to which the patent owner's rights have been curtailed must be measured.

The Panel could not accept Canada's argument that the curtailment of the patent owner's legal rights is 'limited' just so long as the exception preserves the exclusive right to sell to the ultimate consumer during the patent term. Implicit in the Canadian argument is a notion that the right to exclude sales to consumers during the patent term is the essential right conveyed by a patent, and that the rights to exclude 'making' and 'using' the patented product during the term of the patent are in some way secondary. The Panel does not find any support for creating such a hierarchy of patent rights within the TRIPS Agreement. If the right to exclude sales were all that really mattered, there would be no reason to add other rights to exclude 'making' and 'using'. The fact that such rights were included in the TRIPS Agreement, as they are in most national patent laws, is strong evidence that they are considered a meaningful and independent part of the patent owner's rights."[96]

104. Subsequently, the Panel stated that while economic impact was addressed by two of the conditions under Article 30, the "limited exception" condition was not related to economic concerns:

"After analysing all three conditions stated in Article 30 of the TRIPS Agreement, the Panel was satisfied that Article 30 does in fact address the issue of economic impact, but only in the other two conditions contained in that Article. As will be seen in the analysis of these other conditions below, the other two conditions deal with the issue of economic impact, according to criteria that relate specifically to that issue. Viewing all three conditions as a whole, it is apparent that the first condition ('limited exception') is neither designed nor intended to address the issue of economic impact directly."[97]

3. "do not unreasonably conflict with a normal exploitation of the patent"

105. In *Canada – Pharmaceutical Patents*, the Panel addressed the meaning of the term "normal exploitation" contained in the second condition under Article 30, i.e. the phrase "do not unreasonably conflict with a normal exploitation of the patent".

"The Panel considered that 'exploitation' refers to the commercial activity by which patent owners employ their exclusive patent rights to extract economic value from their patent. The term 'normal' defines the kind of commercial activity Article 30 seeks to protect. The ordinary meaning of the word 'normal' is found in the dictionary definition: 'regular, usual, typical, ordinary, conventional'. As so defined, the term can be understood to refer either to an empirical conclusion about what is common within a relevant community, or to a normative standard of entitlement. The Panel concluded that the word 'normal' was being used in Article 30 in a sense that combined the two meanings.

The normal practice of exploitation by patent owners, as with owners of any other intellectual property right, is to exclude all forms of competition that could detract significantly from the economic returns anticipated from a patent's grant of market exclusivity. The specific forms of patent exploitation are not static, of course, for to be effective exploitation must adapt to changing forms of competition due to technological development and the evolution of marketing practices. Protection of all normal exploitation practices is a key element of the policy reflected in all patent laws. Patent laws establish a carefully defined period of market exclusivity as an inducement to innovation, and the policy of those laws cannot be achieved unless patent owners are permitted to take effective advantage of that inducement once it has been defined."[98]

106. After holding that the term "normal" referred to both what is common and to a "normative standard of entitlement", the Panel deliberated regarding what could be considered "normal" in the specific circumstances of the case at issue:

"Canada has raised the argument that market exclusivity occurring after the 20-year patent term expires should not be regarded as 'normal'. The Panel was unable to accept that as a categorical proposition. Some of the basic rights granted to all patent owners, and routinely exercised by all patent owners, will typically produce a certain period of market exclusivity after the expiration of a patent. For example, the separate right to prevent 'making' the patented product during the term of the patent often prevents competitors from building an inventory needed to enter the market immediately upon expiration of a patent. There is nothing abnormal about that more or less brief period of market exclusivity after the patent has expired.

The Panel considered that Canada was on firmer ground, however, in arguing that the additional period of de facto market exclusivity created by using patent rights to preclude submissions for regulatory authorization should not be considered 'normal'. The additional period of market exclusivity in this situation is not a natural or normal consequence of enforcing patent rights. It is an unintended consequence of the conjunction of the patent laws with product regulatory laws, where the combination of patent rights with the time demands of

[96] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.32–7.33.
[97] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.49.
[98] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.54–7.55.

> the regulatory process gives a greater than normal period of market exclusivity to the enforcement of certain patent rights. It is likewise a form of exploitation that most patent owners do not in fact employ. For the vast majority of patented products, there is no marketing regulation of the kind covered by Section 55.2(1), and thus there is no possibility to extend patent exclusivity by delaying the marketing approval process for competitors."[99]

107. In this context, the Panel found that "normal exploitation" could not simply refer back to the general concern to protect Article 28 exclusionary rights as such:

> "The Panel could not agree with the EC's assertion that the mere existence of the patent owner's rights to exclude was a sufficient reason, by itself, for treating all gains derived from such rights as flowing from 'normal exploitation'. In the Panel's view, the EC's argument contained no evidence or analysis addressed to the various meanings of 'normal' – neither a demonstration that most patent owners extract the value of their patents in the manner barred by Section 55.2(1), nor an argument that the prohibited manner of exploitation was "normal" in the sense of being essential to the achievement of the goals of patent policy. To the contrary, the EC's focus on the exclusionary rights themselves merely restated the concern to protect Article 28 exclusionary rights as such. This is a concern already dealt with by the first condition of Article 30 ('limited exception') and the Panel found the ultimate EC arguments here impossible to distinguish from the arguments it had made under that first condition."[100]

4. "do not unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties"

108. In *Canada – Pharmaceutical Patents*, with respect to the term "legitimate interests" in the third condition "do not unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties" under Article 30, the Panel first acknowledged the difficulty for Canada in proving a negative proposition:

> "The third condition of Article 30 is the requirement that the proposed exception must not 'unreasonably prejudice the legitimate interests of the patent owner, taking into account the legitimate interests of third parties'. Although Canada, as the party asserting the exception provided for in Article 30, bears the burden of proving compliance with the conditions of that exception, the order of proof is complicated by the fact that the condition involves proving a negative. One cannot demonstrate that no legitimate interest of the patent owner has been prejudiced until one knows what claims of legitimate interest can be made. Likewise, the weight of legitimate third party interests cannot be fully appraised until the legitimacy and weight of the patent owner's legitimate interests, if any, are defined. Accordingly, without disturbing the ultimate burden of proof, the Panel chose to analyse the issues presented by the third condition of Article 30 according to the logical sequence in which those issues became defined."[101]

109. The Panel then proceeded to examine whether the Canadian regulatory review's exception was compatible with the third condition under Article 30 – i.e. whether it did not "unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties". The exception at issue was an exception applicable specifically to producers of generic pharmaceuticals, enabling such producers to complete the burdensome and time-consuming marketing authorization procedure (up to two and a half years) prior to the expiration of the patent term of the relevant original product:

> "The ultimate issue with regard to the regulatory review exception's compliance with the third condition of Article 30 involved similar considerations to those arising under the second condition ('normal exploitation') – the fact that the exception would remove the additional period of de facto market exclusivity that patent owners could achieve if they were permitted to employ their rights to exclude 'making' and 'using' (and 'selling') the patented product during the term of the patent to prevent potential competitors from preparing and/or applying for regulatory approval during the term of the patent. The issue was whether patent owners could claim a 'legitimate interest' in the economic benefits that could be derived from such an additional period of de facto market exclusivity and, if so, whether the regulatory review exception 'unreasonably prejudiced' that interest."[102]

110. The Panel addressed the claim that "legitimate interests" should be identified with legal interests:

> "The word 'legitimate' is commonly defined as follows:
>
> (a) Conformable to, sanctioned or authorized by, law or principle: lawful; justifiable; proper;
>
> (b) Normal, regular, conformable to a recognized standard type.
>
> Although the European Communities' definition equating 'legitimate interests' with a full respect of legal interests pursuant to Article 28.1 is within at least some of these definitions, the EC definition makes it difficult to

[99] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.56–7.57.
[100] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.58.
[101] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.60.
[102] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.61.

make sense of the rest of the third condition of Article 30, in at least three respects. First, since by that definition every exception under Article 30 will be causing 'prejudice' to some legal rights provided by Article 28 of the Agreement, that definition would reduce the first part of the third condition to a simple requirement that the proposed exception must not be 'unreasonable'. Such a requirement could certainly have been expressed more directly if that was what was meant. Second, a definition equating 'legitimate interests' with legal interests makes no sense at all when applied to the final phrase of Article 30 referring to the 'legitimate interests' of third parties. Third parties are by definition parties who have no legal right at all in being able to perform the tasks excluded by Article 28 patent rights. An exceptions clause permitting governments to take account of such third party legal interests would be permitting them to take account of nothing. And third, reading the third condition as a further protection of legal rights would render it essentially redundant in light of the very similar protection of legal rights in the first condition of Article 30 ('limited exception')."[103]

111. After expressing its disagreement with the suggested definition of "legitimate interests" as "legal interests", as proposed by the European Communities, the Panel put forward its own definition of "legitimate interests":

"To make sense of the term 'legitimate interests' in this context, that term must be defined in the way that it is often used in legal discourse – as a normative claim calling for protection of interests that are 'justifiable' in the sense that they are supported by relevant public policies or other social norms. This is the sense of the word that often appears in statements such as 'X has no legitimate interest in being able to do Y'. We may take as an illustration one of the most widely adopted Article 30-type exceptions in national patent laws – the exception under which use of the patented product for scientific experimentation, during the term of the patent and without consent, is not an infringement. It is often argued that this exception is based on the notion that a key public policy purpose underlying patent laws is to facilitate the dissemination and advancement of technical knowledge and that allowing the patent owner to prevent experimental use during the term of the patent would frustrate part of the purpose of the requirement that the nature of the invention be disclosed to the public. To the contrary, the argument concludes, under the policy of the patent laws, both society and the scientist have a 'legitimate interest' in using the patent disclosure to support the advance of science and technology. While the Panel draws no conclusion about the correctness of any such national exceptions in terms of Article 30 of the TRIPS Agreement, it does adopt the general meaning of the term 'legitimate interests' contained in legal analysis of this type.

. . .

The text of the present, more general version of Article 30 of the TRIPS Agreement was obviously based on the text of Article 9(2) of the Berne Convention. Berne Article 9(2) deals with exceptions to the copyright holder's right to exclude reproduction of its copyrighted work without permission. The text of Article 9(2) is as follows:

> 'It shall be a matter for legislation in the countries of the Union to permit the reproduction of [literary and artistic] works in certain special cases, provided that such reproduction does not conflict with a normal exploitation of the work and does not unreasonably prejudice the legitimate interests of the author.'[104]

The text of Berne Article 9(2) was not adopted into Article 30 of the TRIPS Agreement without change. Whereas the final condition in Berne Article 9(2) ('legitimate interests') simply refers to the legitimate interests of the author, the TRIPS negotiators added in Article 30 the instruction that account must be taken of 'the legitimate interests of third parties'. Absent further explanation in the records of the TRIPS negotiations, however, the Panel was not able to attach a substantive meaning to this change other than what is already obvious in the text itself, namely that the reference to the 'legitimate interests of third parties' makes sense only if the term 'legitimate interests' is construed as a concept broader than legal interests."[105]

112. Another claim put forward in *Canada – Pharmaceutical Patents* called attention to the fact that patent owners whose innovative products are subject to marketing approval requirements suffer a loss of economic benefits to the extent that delays in obtaining government approval prevent them from marketing their product during a substantial part of the patent term (the same government approval which producers of generic pharmaceuticals, under the above-mentioned regulatory review exception, were able to obtain prior to the date of the expiry of the patent term). The Panel considered the relevant practice by some Members to ascertain whether the European Communities' policy concern was "a widely recognized policy norm":

"The Panel therefore examined whether the claimed interest should be considered a 'legitimate interest' within the meaning of Article 30. The primary issue was whether the normative basis of that claim rested on a widely recognized policy norm.

---

[103] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.68.

[104] (*footnote original*) The text of Berne Article 9(2) also served as the model for three other exceptions clauses in the TRIPS Agreement – Articles 13, 17 and 26.2, providing respectively for similar exceptions from obligations on copyright, trademarks and industrial designs. Article 13 is a nearly identical copy of Berne Article 9(2). Like Article 30, both Articles 17 and 26.2 made small changes to the text of Berne Article 9(2).

[105] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.69 and 7.71.

> The type of normative claim put forward by the EC has been affirmed by a number of governments that have enacted *de jure* extensions of the patent term, primarily in the case of pharmaceutical products, to compensate for the *de facto* diminution of the normal period of market exclusivity due to delays in obtaining marketing approval. According to the information submitted to the Panel, such extensions have been enacted by the European Communities, Switzerland, the United States, Japan, Australia and Israel. The EC and Switzerland have done so while at the same time allowing patent owners to continue to use their exclusionary rights to gain an additional, *de facto* extension of market exclusivity by preventing competitors from applying for regulatory approval during the term of the patent. The other countries that have enacted *de jure* patent term extensions have also, either by legislation or by judicial decision, created a regulatory review exception similar to Section 55.2(1), thereby eliminating the possibility of an additional *de facto* extension of market exclusivity."[106]

113. While finding some support for the European Communities' claim in the practice of a certain number of Member governments who had granted compensatory adjustment for the effective diminution of patent holder rights, the Panel held that such practice has not been universal:

> "This positive response to the claim for compensatory adjustment has not been universal, however. In addition to Canada, several countries have adopted, or are in the process of adopting, regulatory review exceptions similar to Section 55.2(1) of the Canadian Patent Act, thereby removing the *de facto* extension of market exclusivity, but these countries have not enacted, and are not planning to enact, any *de jure* extensions of the patent term for producers adversely affected by delayed marketing approval. When regulatory review exceptions are enacted in this manner, they represent a decision not to restore any of the period of market exclusivity due to lost delays in obtaining marketing approval. Taken as a whole, these government decisions may represent either disagreement with the normative claim made by the EC in this proceeding, or they may simply represent a conclusion that such claims are outweighed by other equally legitimate interests.
>
> . . .
>
> On balance, the Panel concluded that the interest claimed on behalf of patent owners whose effective period of market exclusivity had been reduced by delays in marketing approval was neither so compelling nor so widely recognized that it could be regarded as a 'legitimate interest' within the meaning of Article 30 of the TRIPS Agreement. Notwithstanding the number of governments that had responded positively to that claimed interest by granting compensatory patent term extensions, the issue itself was of relatively recent standing, and the community of governments was obviously still divided over the merits of such claims. Moreover, the Panel believed that it was significant that concerns about regulatory review exceptions in general, although well known at the time of the TRIPS negotiations, were apparently not clear enough, or compelling enough, to make their way explicitly into the recorded agenda of the TRIPS negotiations. The Panel believed that Article 30's 'legitimate interests' concept should not be used to decide, through adjudication, a normative policy issue that is still obviously a matter of unresolved political debate."[107]

5. Relationship with other Articles

114. With respect to the relationship of Article 30 to Article 9(2) of the Berne Convention (1971) and Articles 13, 17 and 26.2 of the *TRIPS Agreement*, see footnote 104 above.

XXXII. ARTICLE 31

A. TEXT OF ARTICLE 31

Article 31
Other Use Without Authorization of the Right Holder

Where the law of a Member allows for other use[7] of the subject matter of a patent without the authorization of the right holder, including use by the government or third parties authorized by the government, the following provisions shall be respected:

(*footnote original*) [7] "Other use" refers to use other than that allowed under Article 30.

(a) authorization of such use shall be considered on its individual merits;

(b) such use may only be permitted if, prior to such use, the proposed user has made efforts to obtain authorization from the right holder on reasonable commercial terms and conditions and that such efforts have not been successful within a reasonable period of time. This requirement may be waived by a Member in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. In situations of national emergency or other circumstances of extreme urgency, the right holder shall, nevertheless, be notified as soon as reasonably practicable. In the case of public non-commercial use, where the government or contractor, without making a patent search, knows or has demonstrable grounds to know that a valid patent is or will be used by or for

[106] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.77–7.78.
[107] Panel Report on *Canada – Pharmaceutical Patents*, paras. 7.79 and 7.82.

the government, the right holder shall be informed promptly;

(c) the scope and duration of such use shall be limited to the purpose for which it was authorized, and in the case of semi-conductor technology shall only be for public non-commercial use or to remedy a practice determined after judicial or administrative process to be anti-competitive;

(d) such use shall be non-exclusive;

(e) such use shall be non-assignable, except with that part of the enterprise or goodwill which enjoys such use;

(f) any such use shall be authorized predominantly for the supply of the domestic market of the Member authorizing such use;

(g) authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances which led to it cease to exist and are unlikely to recur. The competent authority shall have the authority to review, upon motivated request, the continued existence of these circumstances;

(h) the right holder shall be paid adequate remuneration in the circumstances of each case, taking into account the economic value of the authorization;

(i) the legal validity of any decision relating to the authorization of such use shall be subject to judicial review or other independent review by a distinct higher authority in that Member;

(j) any decision relating to the remuneration provided in respect of such use shall be subject to judicial review or other independent review by a distinct higher authority in that Member;

(k) Members are not obliged to apply the conditions set forth in subparagraphs (b) and (f) where such use is permitted to remedy a practice determined after judicial or administrative process to be anti-competitive. The need to correct anti-competitive practices may be taken into account in determining the amount of remuneration in such cases. Competent authorities shall have the authority to refuse termination of authorization if and when the conditions which led to such authorization are likely to recur;

(l) where such use is authorized to permit the exploitation of a patent ("the second patent") which cannot be exploited without infringing another patent ("the first patent"), the following additional conditions shall apply:

(i) the invention claimed in the second patent shall involve an important technical advance of considerable economic significance in relation to the invention claimed in the first patent;

(ii) the owner of the first patent shall be entitled to a cross-licence on reasonable terms to use the invention claimed in the second patent; and

(iii) the use authorized in respect of the first patent shall be non-assignable except with the assignment of the second patent.

B. INTERPRETATION AND APPLICATION OF ARTICLE 31

115. With respect to the grant of compulsory licences and what constitutes a national emergency or other circumstances of extreme urgency, see the Declaration on the TRIPS Agreement and Public Health, reproduced in Section LXXVIII below.

116. On 30 August 2003 the General Council adopted a Decision granting waivers from the obligations set out in paragraphs (f) and (h) of Article 31 of the *TRIPS Agreement* with respect to pharmaceutical products.[108]

XXXIII. ARTICLE 32

A. TEXT OF ARTICLE 32

Article 32
Revocation/Forfeiture

An opportunity for judicial review of any decision to revoke or forfeit a patent shall be available.

B. INTERPRETATION AND APPLICATION OF ARTICLE 32

No jurisprudence or decision of a competent WTO body.

XXXIV. ARTICLE 33

A. TEXT OF ARTICLE 33

Article 33
Term of Protection

The term of protection available shall not end before the expiration of a period of twenty years counted from the filing date.[8]

[108] See the minutes of the General Council meeting in WT/GC/M/82. The text of the waiver can be found in WT/L/540. This Decision was adopted by the General Council in the light of a statement read out by the Chairman, as reflected in paragraphs 29–31 of the minutes of the General Council meeting.

(*footnote original*) [8] It is understood that those Members which do not have a system of original grant may provide that the term of protection shall be computed from the filing date in the system of original grant.

B. INTERPRETATION AND APPLICATION OF ARTICLE 33

1. General

(a) Basic structure

117. In *Canada – Patent Term*, Canada argued that although it was making available a patent protection period of only 17 years from the date of the *grant* of the patent, contrary to the requirement under Article 33 of a 20-year protection period counting from the date of the *filing* of the patent application, the relevant Canadian law was not inconsistent with Article 33, because – due to the length of the application procedures – the *effective* patent protection period was in fact equal to 20 years, as required by Article 33. The Panel rejected this argument and found a violation of Article 33. On appeal, the Appeal Body first considered the ordinary meaning of Article 33:

> "In our view, the words used in Article 33 present very little interpretative difficulty. The 'filing date' is the date of filing of the patent application. The term of protection 'shall not end' before twenty years counted from the date of filing of the patent application. The calculation of the period of 'twenty years' is clear and specific. In simple terms, Article 33 defines the earliest date on which the term of protection of a patent may end. This earliest date is determined by a straightforward calculation: it results from taking the date of filing of the patent application and adding twenty years. As the filing date of the patent application and the twenty-year figure are both unambiguous, so too is the resultant earliest end date of the term of patent protection." [109]

118. As Article 33 requires that a Member "make available" a patent protection period of 20 years, the Appellate Body then considered the meaning of the term "available":

> "We agree with the Panel that, in Article 33 of the *TRIPS Agreement*, the word 'available' means 'available, as a matter of right', that is to say, available as a matter of legal right and certainty.
>
> . . .
>
> To demonstrate that the patent term in Article 33 is 'available', it is not sufficient to point, as Canada does, to a combination of procedures that, when used in a particular sequence or in a particular way, *may* add up to twenty years. The opportunity to obtain a twenty-year patent term must not be 'available' only to those who are somehow able to meander successfully through a maze of administrative procedures. The opportunity to obtain a twenty-year term must be a readily discernible and specific right, and it must be clearly seen as such by the patent applicant when a patent application is filed. The grant of the patent must be sufficient *in itself* to obtain the minimum term mandated by Article 33. The use of the word 'available' in Article 33 does not undermine but, rather, underscores this obligation." [110]

119. The Appellate Body agreed with the Panel that Article 33 does not embody a notion of "effective" protection:

> "The text of Article 33 gives no support to the notion of an 'effective' term of protection as distinguished from a 'nominal' term of protection. On the contrary, the obligation in Article 33 is straightforward and mandatory: to provide, as a specific right, a term of protection that does not end before the expiry of a period of twenty years counted from the filing date." [111]

(b) Relationship with other Articles

120. With respect to the relationship of Article 33 with Articles 1.1 and 62.2, see paragraph 3 above.

121. In *Canada – Pharmaceutical Patents*, the Panel did not examine an Article 33 complaint after having found a violation of Article 28.1. On the issue of judicial economy more generally, see Section XXXVI.F of the Chapter on the *DSU*.

XXXV. ARTICLE 34

A. TEXT OF ARTICLE 34

Article 34
Process Patents: Burden of Proof

1. For the purposes of civil proceedings in respect of the infringement of the rights of the owner referred to in paragraph 1(b) of Article 28, if the subject matter of a patent is a process for obtaining a product, the judicial authorities shall have the authority to order the defendant to prove that the process to obtain an identical product is different from the patented process. Therefore, Members shall provide, in at least one of the following circumstances, that any identical product when produced without the consent of the patent owner shall, in the absence of proof to the contrary, be deemed to have been obtained by the patented process:

   (a) if the product obtained by the patented process is new;

   (b) if there is a substantial likelihood that the identical product was made by the process and the owner of the patent has been unable through

[109] Appellate Body Report on *Canada – Patent Term*, para. 85.
[110] Appellate Body Report on *Canada – Patent Term*, paras. 90 and 92.
[111] Appellate Body Report on *Canada – Patent Term*, para. 95.

reasonable efforts to determine the process actually used.

2. Any Member shall be free to provide that the burden of proof indicated in paragraph 1 shall be on the alleged infringer only if the condition referred to in subparagraph (a) is fulfilled or only if the condition referred to in subparagraph (b) is fulfilled.

3. In the adduction of proof to the contrary, the legitimate interests of defendants in protecting their manufacturing and business secrets shall be taken into account.

B. INTERPRETATION AND APPLICATION OF ARTICLE 34

No jurisprudence or decision of a competent WTO body.

Section 6: Layout-Designs (Topographies) of Integrated Circuits

XXXVI. ARTICLE 35 AND INCORPORATED PROVISIONS OF THE IPIC TREATY

A. TEXT OF ARTICLE 35

Article 35
Relation to the IPIC Treaty

Members agree to provide protection to the layout-designs (topographies) of integrated circuits (referred to in this Agreement as "layout-designs") in accordance with Articles 2 through 7 (other than paragraph 3 of Article 6), Article 12 and paragraph 3 of Article 16 of the Treaty on Intellectual Property in Respect of Integrated Circuits and, in addition, to comply with the following provisions.

The text of Articles 2 through 7 (other than Article 6.3) and Articles 12 and 16.3 of the IPIC Treaty appears in Section LXXVII below.

B. INTERPRETATION AND APPLICATION OF ARTICLE 35 AND INCORPORATED PROVISIONS OF THE IPIC TREATY

No jurisprudence or decision of a competent WTO body.

XXXVII. ARTICLE 36

A. TEXT OF ARTICLE 36

Article 36
Scope of the Protection

Subject to the provisions of paragraph 1 of Article 37, Members shall consider unlawful the following acts if performed without the authorization of the right holder:[9] importing, selling, or otherwise distributing for commercial purposes a protected layout-design, an integrated circuit in which a protected layout-design is incorporated, or an article incorporating such an integrated circuit only in so far as it continues to contain an unlawfully reproduced layout-design.

(*footnote original*) [9] The term "right holder" in this Section shall be understood as having the same meaning as the term "holder of the right" in the IPIC Treaty.

B. INTERPRETATION AND APPLICATION OF ARTICLE 36

No jurisprudence or decision of a competent WTO body.

XXXVIII. ARTICLE 37

A. TEXT OF ARTICLE 37

Article 37
Acts Not Requiring the Authorization of the Right Holder

1. Notwithstanding Article 36, no Member shall consider unlawful the performance of any of the acts referred to in that Article in respect of an integrated circuit incorporating an unlawfully reproduced layout-design or any article incorporating such an integrated circuit where the person performing or ordering such acts did not know and had no reasonable ground to know, when acquiring the integrated circuit or article incorporating such an integrated circuit, that it incorporated an unlawfully reproduced layout-design. Members shall provide that, after the time that such person has received sufficient notice that the layout-design was unlawfully reproduced, that person may perform any of the acts with respect to the stock on hand or ordered before such time, but shall be liable to pay to the right holder a sum equivalent to a reasonable royalty such as would be payable under a freely negotiated licence in respect of such a layout-design.

2. The conditions set out in subparagraphs (a) through (k) of Article 31 shall apply *mutatis mutandis* in the event of any non-voluntary licensing of a layout-design or of its use by or for the government without the authorization of the right holder.

B. INTERPRETATION AND APPLICATION OF ARTICLE 37

No jurisprudence or decision of a competent WTO body.

XXXIX. ARTICLE 38

A. TEXT OF ARTICLE 38

Article 38
Term of Protection

1. In Members requiring registration as a condition of protection, the term of protection of layout-designs shall not end before the expiration of a period of 10 years counted from the date of filing an application for registration or from the first commercial exploitation wherever in the world it occurs.

2. In Members not requiring registration as a condition for protection, layout-designs shall be protected for a term of no less than 10 years from the date of the first commercial exploitation wherever in the world it occurs.

3. Notwithstanding paragraphs 1 and 2, a Member may provide that protection shall lapse 15 years after the creation of the layout-design.

B. INTERPRETATION AND APPLICATION OF ARTICLE 38

No jurisprudence or decision of a competent WTO body.

Section 7: Protection of Undisclosed Information

XL. ARTICLE 39

A. TEXT OF ARTICLE 39

Article 39

1. In the course of ensuring effective protection against unfair competition as provided in Article 10*bis* of the Paris Convention (1967), Members shall protect undisclosed information in accordance with paragraph 2 and data submitted to governments or governmental agencies in accordance with paragraph 3.

2. Natural and legal persons shall have the possibility of preventing information lawfully within their control from being disclosed to, acquired by, or used by others without their consent in a manner contrary to honest commercial practices[10] so long as such information:

(*footnote original*) [10] For the purpose of this provision, "a manner contrary to honest commercial practices" shall mean at least practices such as breach of contract, breach of confidence and inducement to breach, and includes the acquisition of undisclosed information by third parties who knew, or were grossly negligent in failing to know, that such practices were involved in the acquisition.

(a) is secret in the sense that it is not, as a body or in the precise configuration and assembly of its components, generally known among or readily accessible to persons within the circles that normally deal with the kind of information in question;

(b) has commercial value because it is secret; and

(c) has been subject to reasonable steps under the circumstances, by the person lawfully in control of the information, to keep it secret.

3. Members, when requiring, as a condition of approving the marketing of pharmaceutical or of agricultural chemical products which utilize new chemical entities, the submission of undisclosed test or other data, the origination of which involves a considerable effort, shall protect such data against unfair commercial use. In addition, Members shall protect such data against disclosure, except where necessary to protect the public, or unless steps are taken to ensure that the data are protected against unfair commercial use.

B. INTERPRETATION AND APPLICATION OF ARTICLE 39

No jurisprudence or decision of a competent WTO body.

Section 8: Control of Anti-Competitive Practices in Contractual Licences

XLI. ARTICLE 40

A. TEXT OF ARTICLE 40

Article 40

1. Members agree that some licensing practices or conditions pertaining to intellectual property rights which restrain competition may have adverse effects on trade and may impede the transfer and dissemination of technology.

2. Nothing in this Agreement shall prevent Members from specifying in their legislation licensing practices or conditions that may in particular cases constitute an abuse of intellectual property rights having an adverse effect on competition in the relevant market. As provided above, a Member may adopt, consistently with the other provisions of this Agreement, appropriate measures to prevent or control such practices, which may include for example exclusive grantback conditions, conditions preventing challenges to validity and coercive package licensing, in the light of the relevant laws and regulations of that Member.

3. Each Member shall enter, upon request, into consultations with any other Member which has cause to believe that an intellectual property right owner that is a national or domiciliary of the Member to which the request for consultations has been addressed is undertaking practices in violation of the requesting Member's laws and regulations on the subject matter of this Section, and which wishes to secure compliance with such legislation, without prejudice to any action under the law and to the full freedom of an ultimate decision of either Member. The Member addressed shall accord full and sympathetic consideration to, and shall afford adequate opportunity for, consultations with the requesting Member, and shall cooperate through supply of publicly available non-confidential information of relevance to the matter in question and of other information available to the Member, subject to domestic law and to the conclusion of mutually satisfactory agreements concerning the safeguarding of its confidentiality by the requesting Member.

4. A Member whose nationals or domiciliaries are subject to proceedings in another Member concerning alleged violation of that other Member's laws and regulations on the subject matter of this Section shall, upon

request, be granted an opportunity for consultations by the other Member under the same conditions as those foreseen in paragraph 3.

B. INTERPRETATION AND APPLICATION OF ARTICLE 40

No jurisprudence or decision of a competent WTO body.

PART III
ENFORCEMENT OF INTELLECTUAL PROPERTY RIGHTS

Section 1: General Obligations

XLII. ARTICLE 41

A. TEXT OF ARTICLE 41

Article 41

1. Members shall ensure that enforcement procedures as specified in this Part are available under their law so as to permit effective action against any act of infringement of intellectual property rights covered by this Agreement, including expeditious remedies to prevent infringements and remedies which constitute a deterrent to further infringements. These procedures shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

2. Procedures concerning the enforcement of intellectual property rights shall be fair and equitable. They shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays.

3. Decisions on the merits of a case shall preferably be in writing and reasoned. They shall be made available at least to the parties to the proceeding without undue delay. Decisions on the merits of a case shall be based only on evidence in respect of which parties were offered the opportunity to be heard.

4. Parties to a proceeding shall have an opportunity for review by a judicial authority of final administrative decisions and, subject to jurisdictional provisions in a Member's law concerning the importance of a case, of at least the legal aspects of initial judicial decisions on the merits of a case. However, there shall be no obligation to provide an opportunity for review of acquittals in criminal cases.

5. It is understood that this Part does not create any obligation to put in place a judicial system for the enforcement of intellectual property rights distinct from that for the enforcement of law in general, nor does it affect the capacity of Members to enforce their law in general. Nothing in this Part creates any obligation with respect to the distribution of resources as between enforcement of intellectual property rights and the enforcement of law in general.

B. INTERPRETATION AND APPLICATION OF ARTICLE 41

122. In *Canada – Patent Term*, the Panel rejected Canada's argument that, in light of a certain amount of delay in granting patent rights, the term of protection at issue met with the requirements under Article 33.[112] In its finding, which was subsequently not addressed by the Appellate Body, the Panel referred to Article 41.2 as it is applied to acquisition procedures by Article 62.4:

> "In our view, requiring applicants to resort to delays such as abandonment, reinstatement, non-payment of fees and non-response to a patent examiner's report would be inconsistent with the general principle that procedures not be unnecessarily complicated as expressed in Article 41.2 and applied to acquisition procedures by Article 62.4. By their very nature, the delays, which are not tied to any valid reason related to the examination and grant process, would be inconsistent with the general principle that procedures not entail 'unwarranted delays' as expressed in Article 41.2 and applied to acquisition procedures by Article 62.4.
>
> We noted in paragraphs 6.107 and 6.108 above that the Commissioner's powers to reinstate and restore applications under Section 30(2) and Section 73 were discretionary at all material times and not available as a matter of right to patent applicants. Canada argued, however, that despite the use of the word 'may' in Section 73, the payment of the necessary fee enabled the applicant to obtain reinstatement of his patent application as a matter of right. In other words, had the Commissioner exercised his discretion to refuse an application for reinstatement, an applicant would have been required to pay an additional fee and pursue legal proceedings against the Commissioner in a court of law in order for a term of protection expiring 20 years from the date of filing the application to be available. We find potential requirements that an applicant commence proceedings for a writ of mandamus and pay additional fees to be in breach of the general principle that procedures not be 'unnecessarily complicated or costly' as expressed in Article 41.2 and applied to acquisition procedures by Article 62.4."[113]

[112] With respect to the claim that an equivalent "effective" period of protection can fulfill the requirement of Article 33, see paragraphs 117–120 above.

[113] Panel Report on *Canada – Patent Term*, paras. 6.117–6.118.

Section 2: Civil and Administrative Procedures and Remedies

XLIII. ARTICLE 42

A. TEXT OF ARTICLE 42

Article 42
Fair and Equitable Procedures

Members shall make available to right holders[11] civil judicial procedures concerning the enforcement of any intellectual property right covered by this Agreement. Defendants shall have the right to written notice which is timely and contains sufficient detail, including the basis of the claims. Parties shall be allowed to be represented by independent legal counsel, and procedures shall not impose overly burdensome requirements concerning mandatory personal appearances. All parties to such procedures shall be duly entitled to substantiate their claims and to present all relevant evidence. The procedure shall provide a means to identify and protect confidential information, unless this would be contrary to existing constitutional requirements.

(*footnote original*) [11] For the purpose of this Part, the term "right holder" includes federations and associations having legal standing to assert such rights.

B. INTERPRETATION AND APPLICATION OF ARTICLE 42

1. "right holders"

123. In *US – Section 211 Appropriations Act*, the Appellate Body considered that the term "right holders" included not only persons who had been established as owners of rights but also persons who claimed to have legal standing to assert rights:

> "We agree with the Panel that the term 'right holders' as used in Article 42 is not limited to persons who have been established as owners of trademarks. Where the *TRIPS Agreement* confers rights exclusively on 'owners' of a right, it does so in express terms, such as in Article 16.1, which refers to the 'owner of a registered trademark'. By contrast, the term 'right holders' within the meaning of Article 42 also includes persons who claim to have legal standing to assert rights. This interpretation is also borne out by the fourth sentence of Article 42, which refers to 'parties'. Civil judicial procedures would not be fair and equitable if access to courts were not given to both complainants and defendants who purport to be owners of an intellectual property right."[114]

2. Rights covered by Article 42

124. In *US – Section 211 Appropriations Act*, the Appellate Body considered the nature of the rights covered by Article 42:

> "From all this, we understand that the rights which Article 42 obliges Members to make available to right holders are *procedural* in nature. These *procedural* rights guarantee an international minimum standard for nationals of other Members within the meaning of Article 1.3 of the *TRIPS Agreement*."

125. In *US – Section 211 Appropriations Act*, the Appellate Body considered the situation in which a requirement of substantive law made it impossible for a court to rule in favour of a claim to a trademark right and found:

> "There is nothing in the *procedural* obligations of Article 42 that prevents a Member, in such a situation, from legislating whether or not its courts must examine *each and every* requirement of substantive law at issue before making a ruling."[115]

126. In *US – Section 211 Appropriations Act*, the Appellate Body applied its findings in respect of Article 42 of the *TRIPS Agreement* with regard to holders of rights in trademarks and holders of rights in trade names as well.[116]

XLIV. ARTICLE 43

A. TEXT OF ARTICLE 43

Article 43
Evidence

1. The judicial authorities shall have the authority, where a party has presented reasonably available evidence sufficient to support its claims and has specified evidence relevant to substantiation of its claims which lies in the control of the opposing party, to order that this evidence be produced by the opposing party, subject in appropriate cases to conditions which ensure the protection of confidential information.

2. In cases in which a party to a proceeding voluntarily and without good reason refuses access to, or otherwise does not provide necessary information within a reasonable period, or significantly impedes a procedure relating to an enforcement action, a Member may accord judicial authorities the authority to make preliminary and final determinations, affirmative or negative, on the basis of the information presented to them, including the complaint or the allegation presented by the party adversely affected by the denial of access to information, subject to providing the parties an opportunity to be heard on the allegations or evidence.

[114] Appellate Body Report on *US – Section 211 Appropriations Act*, para. 217.
[115] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 221 and 226.
[116] Appellate Body Report on *US – Section 211 Appropriations Act*, paras. 222–231 and 358.

B. INTERPRETATION AND APPLICATION OF ARTICLE 43

127. In *India – Patents (EC)*, the European Communities claimed – similarly to the United States' claim in the earlier case *India – Patents (US)* – that India had failed to provide an exclusive marketing system pursuant to its obligation under Article 70.9 of the *TRIPS Agreement*. India argued that a generally available system was not required under Article 70.9; as support for its claim, India pointed to the provisions of Articles 42 [sic] to 48 of the *TRIPS Agreement*, where the judicial authorities of Members "shall have authority" to order certain actions and contrasted this wording with that of Article 70.9, which provides that marketing rights "shall be granted" when certain conditions are met. The Panel rejected this argument by India:

> "We do not share India's view that it can be deduced from the use of these words in those Articles that a system of general availability is not called for under Article 70.9. To infer this, one would have to hold that the omission of the words 'shall have the authority' in Articles 42–48 [sic] (so that a court was required to act in a certain way when prescribed conditions were met, rather than merely having the authority to do so) would mean that a Member would not be expected to give its judicial authorities in advance the authority to act in this way, for example to award an injunction, but could legislate to this effect when a specific occasion arose. Such an inference would obviously be absurd. Rather the function of the words 'shall have the authority' is to address the issue of judicial discretion, not that of general availability."[117]

XLV. ARTICLE 44

A. TEXT OF ARTICLE 44

Article 44
Injunctions

1. The judicial authorities shall have the authority to order a party to desist from an infringement, *inter alia* to prevent the entry into the channels of commerce in their jurisdiction of imported goods that involve the infringement of an intellectual property right, immediately after customs clearance of such goods. Members are not obliged to accord such authority in respect of protected subject matter acquired or ordered by a person prior to knowing or having reasonable grounds to know that dealing in such subject matter would entail the infringement of an intellectual property right.

2. Notwithstanding the other provisions of this Part and provided that the provisions of Part II specifically addressing use by governments, or by third parties authorized by a government, without the authorization of the right holder are complied with, Members may limit the remedies available against such use to payment of remuneration in accordance with subparagraph (h) of Article 31. In other cases, the remedies under this Part shall apply or, where these remedies are inconsistent with a Member's law, declaratory judgments and adequate compensation shall be available.

B. INTERPRETATION AND APPLICATION OF ARTICLE 44

128. With respect to the meaning of the words "shall have the authority" as used in Articles 43–48, see paragraph 127 above.

XLVI. ARTICLE 45

A. TEXT OF ARTICLE 45

Article 45
Damages

1. The judicial authorities shall have the authority to order the infringer to pay the right holder damages adequate to compensate for the injury the right holder has suffered because of an infringement of that person's intellectual property right by an infringer who knowingly, or with reasonable grounds to know, engaged in infringing activity.

2. The judicial authorities shall also have the authority to order the infringer to pay the right holder expenses, which may include appropriate attorney's fees. In appropriate cases, Members may authorize the judicial authorities to order recovery of profits and/or payment of pre-established damages even where the infringer did not knowingly, or with reasonable grounds to know, engage in infringing activity.

B. INTERPRETATION AND APPLICATION OF ARTICLE 45

129. With respect to the meaning of the words "shall have the authority" as used in Articles 43–48, see paragraph 127 above.

XLVII. ARTICLE 46

A. TEXT OF ARTICLE 46

Article 46
Other Remedies

In order to create an effective deterrent to infringement, the judicial authorities shall have the authority to order that goods that they have found to be infringing be, without compensation of any sort, disposed of outside the channels of commerce in such a manner as to avoid any harm caused to the right holder, or, unless this would be contrary to existing constitutional require-

[117] Panel Report on *India – Patents (EC)*, para. 7.66.

ments, destroyed. The judicial authorities shall also have the authority to order that materials and implements the predominant use of which has been in the creation of the infringing goods be, without compensation of any sort, disposed of outside the channels of commerce in such a manner as to minimize the risks of further infringements. In considering such requests, the need for proportionality between the seriousness of the infringement and the remedies ordered as well as the interests of third parties shall be taken into account. In regard to counterfeit trademark goods, the simple removal of the trademark unlawfully affixed shall not be sufficient, other than in exceptional cases, to permit release of the goods into the channels of commerce.

B. INTERPRETATION AND APPLICATION OF ARTICLE 46

130. With respect to the meaning of the words "shall have the authority" as used in Articles 43–48, see paragraph 127 above.

XLVIII. ARTICLE 47

A. TEXT OF ARTICLE 47

Article 47
Right of Information

Members may provide that the judicial authorities shall have the authority, unless this would be out of proportion to the seriousness of the infringement, to order the infringer to inform the right holder of the identity of third persons involved in the production and distribution of the infringing goods or services and of their channels of distribution.

B. INTERPRETATION AND APPLICATION OF ARTICLE 47

131. With respect to the meaning of the words "shall have the authority" as used in Articles 43–48, see paragraph 127 above.

XLIX. ARTICLE 48

A. TEXT OF ARTICLE 48

Article 48
Indemnification of the Defendant

1. The judicial authorities shall have the authority to order a party at whose request measures were taken and who has abused enforcement procedures to provide to a party wrongfully enjoined or restrained adequate compensation for the injury suffered because of such abuse. The judicial authorities shall also have the authority to order the applicant to pay the defendant expenses, which may include appropriate attorney's fees.

2. In respect of the administration of any law pertaining to the protection or enforcement of intellectual property rights, Members shall only exempt both public authorities and officials from liability to appropriate remedial measures where actions are taken or intended in good faith in the course of the administration of that law.

B. INTERPRETATION AND APPLICATION OF ARTICLE 48

132. With respect to the meaning of the words "shall have the authority" as used in Articles 43–48, see paragraph 127 above.

L. ARTICLE 49

A. TEXT OF ARTICLE 49

Article 49
Administrative Procedures

To the extent that any civil remedy can be ordered as a result of administrative procedures on the merits of a case, such procedures shall conform to principles equivalent in substance to those set forth in this Section.

B. INTERPRETATION AND APPLICATION OF ARTICLE 49

No jurisprudence or decision of a competent WTO body.

Section 3: Provisional Measures

LI. ARTICLE 50

A. TEXT OF ARTICLE 50

Article 50

1. The judicial authorities shall have the authority to order prompt and effective provisional measures:

(a) to prevent an infringement of any intellectual property right from occurring, and in particular to prevent the entry into the channels of commerce in their jurisdiction of goods, including imported goods immediately after customs clearance;

(b) to preserve relevant evidence in regard to the alleged infringement.

2. The judicial authorities shall have the authority to adopt provisional measures *inaudita altera parte* where appropriate, in particular where any delay is likely to cause irreparable harm to the right holder, or where there is a demonstrable risk of evidence being destroyed.

3. The judicial authorities shall have the authority to require the applicant to provide any reasonably available evidence in order to satisfy themselves with a sufficient degree of certainty that the applicant is the right holder

and that the applicant's right is being infringed or that such infringement is imminent, and to order the applicant to provide a security or equivalent assurance sufficient to protect the defendant and to prevent abuse.

4. Where provisional measures have been adopted *inaudita altera parte*, the parties affected shall be given notice, without delay after the execution of the measures at the latest. A review, including a right to be heard, shall take place upon request of the defendant with a view to deciding, within a reasonable period after the notification of the measures, whether these measures shall be modified, revoked or confirmed.

5. The applicant may be required to supply other information necessary for the identification of the goods concerned by the authority that will execute the provisional measures.

6. Without prejudice to paragraph 4, provisional measures taken on the basis of paragraphs 1 and 2 shall, upon request by the defendant, be revoked or otherwise cease to have effect, if proceedings leading to a decision on the merits of the case are not initiated within a reasonable period, to be determined by the judicial authority ordering the measures where a Member's law so permits or, in the absence of such a determination, not to exceed 20 working days or 31 calendar days, whichever is the longer.

7. Where the provisional measures are revoked or where they lapse due to any act or omission by the applicant, or where it is subsequently found that there has been no infringement or threat of infringement of an intellectual property right, the judicial authorities shall have the authority to order the applicant, upon request of the defendant, to provide the defendant appropriate compensation for any injury caused by these measures.

8. To the extent that any provisional measure can be ordered as a result of administrative procedures, such procedures shall conform to principles equivalent in substance to those set forth in this Section.

B. INTERPRETATION AND APPLICATION OF ARTICLE 50

No jurisprudence or decision of a competent WTO body.

Section 4: Special Requirements Related to Border Measures[12]

(*footnote original*) [12] Where a Member has dismantled substantially all controls over movement of goods across its border with another Member with which it forms part of a customs union, it shall not be required to apply the provisions of this Section at that border.

LII. ARTICLE 51

A. TEXT OF ARTICLE 51

Article 51
Suspension of Release by Customs Authorities

Members shall, in conformity with the provisions set out below, adopt procedures[13] to enable a right holder, who has valid grounds for suspecting that the importation of counterfeit trademark or pirated copyright goods[14] may take place, to lodge an application in writing with competent authorities, administrative or judicial, for the suspension by the customs authorities of the release into free circulation of such goods. Members may enable such an application to be made in respect of goods which involve other infringements of intellectual property rights, provided that the requirements of this Section are met. Members may also provide for corresponding procedures concerning the suspension by the customs authorities of the release of infringing goods destined for exportation from their territories.

(*footnote original*) [13] It is understood that there shall be no obligation to apply such procedures to imports of goods put on the market in another country by or with the consent of the right holder, or to goods in transit.
(*footnote original*) [14] For the purposes of this Agreement:

(a) "counterfeit trademark goods" shall mean any goods, including packaging, bearing without authorization a trademark which is identical to the trademark validly registered in respect of such goods, or which cannot be distinguished in its essential aspects from such a trademark, and which thereby infringes the rights of the owner of the trademark in question under the law of the country of importation;

(b) "pirated copyright goods" shall mean any goods which are copies made without the consent of the right holder or person duly authorized by the right holder in the country of production and which are made directly or indirectly from an article where the making of that copy would have constituted an infringement of a copyright or a related right under the law of the country of importation.

B. INTERPRETATION AND APPLICATION OF ARTICLE 51

No jurisprudence or decision of a competent WTO body.

LIII. ARTICLE 52

A. TEXT OF ARTICLE 52

Article 52
Application

Any right holder initiating the procedures under Article 51 shall be required to provide adequate evidence to satisfy the competent authorities that, under the laws of the country of importation, there is *prima facie* an infringement of the right holder's intellectual property right and to supply a sufficiently detailed description of

the goods to make them readily recognizable by the customs authorities. The competent authorities shall inform the applicant within a reasonable period whether they have accepted the application and, where determined by the competent authorities, the period for which the customs authorities will take action.

B. INTERPRETATION AND APPLICATION OF ARTICLE 52

No jurisprudence or decision of a competent WTO body.

LIV. ARTICLE 53

A. TEXT OF ARTICLE 53

Article 53
Security or Equivalent Assurance

1. The competent authorities shall have the authority to require an applicant to provide a security or equivalent assurance sufficient to protect the defendant and the competent authorities and to prevent abuse. Such security or equivalent assurance shall not unreasonably deter recourse to these procedures.

2. Where pursuant to an application under this Section the release of goods involving industrial designs, patents, layout-designs or undisclosed information into free circulation has been suspended by customs authorities on the basis of a decision other than by a judicial or other independent authority, and the period provided for in Article 55 has expired without the granting of provisional relief by the duly empowered authority, and provided that all other conditions for importation have been complied with, the owner, importer, or consignee of such goods shall be entitled to their release on the posting of a security in an amount sufficient to protect the right holder for any infringement. Payment of such security shall not prejudice any other remedy available to the right holder, it being understood that the security shall be released if the right holder fails to pursue the right of action within a reasonable period of time.

B. INTERPRETATION AND APPLICATION OF ARTICLE 53

No jurisprudence or decision of a competent WTO body.

LV. ARTICLE 54

A. TEXT OF ARTICLE 54

Article 54
Notice of Suspension

The importer and the applicant shall be promptly notified of the suspension of the release of goods according to Article 51.

B. INTERPRETATION AND APPLICATION OF ARTICLE 54

No jurisprudence or decision of a competent WTO body.

LVI. ARTICLE 55

A. TEXT OF ARTICLE 55

Article 55
Duration of Suspension

If, within a period not exceeding 10 working days after the applicant has been served notice of the suspension, the customs authorities have not been informed that proceedings leading to a decision on the merits of the case have been initiated by a party other than the defendant, or that the duly empowered authority has taken provisional measures prolonging the suspension of the release of the goods, the goods shall be released, provided that all other conditions for importation or exportation have been complied with; in appropriate cases, this time-limit may be extended by another 10 working days. If proceedings leading to a decision on the merits of the case have been initiated, a review, including a right to be heard, shall take place upon request of the defendant with a view to deciding, within a reasonable period, whether these measures shall be modified, revoked or confirmed. Notwithstanding the above, where the suspension of the release of goods is carried out or continued in accordance with a provisional judicial measure, the provisions of paragraph 6 of Article 50 shall apply.

B. INTERPRETATION AND APPLICATION OF ARTICLE 55

No jurisprudence or decision of a competent WTO body.

LVII. ARTICLE 56

A. TEXT OF ARTICLE 56

Article 56
Indemnification of the Importer and of the Owner of the Goods

Relevant authorities shall have the authority to order the applicant to pay the importer, the consignee and the owner of the goods appropriate compensation for any injury caused to them through the wrongful detention of goods or through the detention of goods released pursuant to Article 55.

B. INTERPRETATION AND APPLICATION OF ARTICLE 56

No jurisprudence or decision of a competent WTO body.

LVIII. ARTICLE 57

A. TEXT OF ARTICLE 57

Article 57
Right of Inspection and Information

Without prejudice to the protection of confidential information, Members shall provide the competent authorities the authority to give the right holder sufficient opportunity to have any goods detained by the customs authorities inspected in order to substantiate the right holder's claims. The competent authorities shall also have authority to give the importer an equivalent opportunity to have any such goods inspected. Where a positive determination has been made on the merits of a case, Members may provide the competent authorities the authority to inform the right holder of the names and addresses of the consignor, the importer and the consignee and of the quantity of the goods in question.

B. INTERPRETATION AND APPLICATION OF ARTICLE 57

No jurisprudence or decision of a competent WTO body.

LIX. ARTICLE 58

A. TEXT OF ARTICLE 58

Article 58
Ex Officio Action

Where Members require competent authorities to act upon their own initiative and to suspend the release of goods in respect of which they have acquired *prima facie* evidence that an intellectual property right is being infringed:

(a) the competent authorities may at any time seek from the right holder any information that may assist them to exercise these powers;

(b) the importer and the right holder shall be promptly notified of the suspension. Where the importer has lodged an appeal against the suspension with the competent authorities, the suspension shall be subject to the conditions, *mutatis mutandis*, set out at Article 55;

(c) Members shall only exempt both public authorities and officials from liability to appropriate remedial measures where actions are taken or intended in good faith.

B. INTERPRETATION AND APPLICATION OF ARTICLE 58

No jurisprudence or decision of a competent WTO body.

LX. ARTICLE 59

A. TEXT OF ARTICLE 59

Article 59
Remedies

Without prejudice to other rights of action open to the right holder and subject to the right of the defendant to seek review by a judicial authority, competent authorities shall have the authority to order the destruction or disposal of infringing goods in accordance with the principles set out in Article 46. In regard to counterfeit trademark goods, the authorities shall not allow the re-exportation of the infringing goods in an unaltered state or subject them to a different customs procedure, other than in exceptional circumstances.

B. INTERPRETATION AND APPLICATION OF ARTICLE 59

No jurisprudence or decision of a competent WTO body.

LXI. ARTICLE 60

A. TEXT OF ARTICLE 60

Article 60
De Minimis Imports

Members may exclude from the application of the above provisions small quantities of goods of a non-commercial nature contained in travellers' personal luggage or sent in small consignments.

B. INTERPRETATION AND APPLICATION OF ARTICLE 60

No jurisprudence or decision of a competent WTO body.

Section 5: Criminal Procedures

LXII. ARTICLE 61

A. TEXT OF ARTICLE 61

Article 61

Members shall provide for criminal procedures and penalties to be applied at least in cases of wilful trademark counterfeiting or copyright piracy on a commercial scale. Remedies available shall include imprisonment and/or monetary fines sufficient to provide a deterrent, consistently with the level of penalties applied for crimes of a corresponding gravity. In appropriate cases, remedies available shall also include the seizure, forfeiture and destruction of the infringing goods and of any materials and implements the predominant use of which has been in the commission of the offence. Members may provide for criminal procedures and penalties to be applied in other cases of infringement of intellectual property rights, in particular where they are committed wilfully and on a commercial scale.

B. INTERPRETATION AND APPLICATION OF ARTICLE 61

No jurisprudence or decision of a competent WTO body.

PART IV
ACQUISITION AND MAINTENANCE OF INTELLECTUAL PROPERTY RIGHTS AND RELATED *INTER-PARTES* PROCEDURES

LXIII. ARTICLE 62

A. TEXT OF ARTICLE 62

Article 62

1. Members may require, as a condition of the acquisition or maintenance of the intellectual property rights provided for under Sections 2 through 6 of Part II, compliance with reasonable procedures and formalities. Such procedures and formalities shall be consistent with the provisions of this Agreement.

2. Where the acquisition of an intellectual property right is subject to the right being granted or registered, Members shall ensure that the procedures for grant or registration, subject to compliance with the substantive conditions for acquisition of the right, permit the granting or registration of the right within a reasonable period of time so as to avoid unwarranted curtailment of the period of protection.

3. Article 4 of the Paris Convention (1967) shall apply *mutatis mutandis* to service marks.

4. Procedures concerning the acquisition or maintenance of intellectual property rights and, where a Member's law provides for such procedures, administrative revocation and *inter partes* procedures such as opposition, revocation and cancellation, shall be governed by the general principles set out in paragraphs 2 and 3 of Article 41.

5. Final administrative decisions in any of the procedures referred to under paragraph 4 shall be subject to review by a judicial or quasi-judicial authority. However, there shall be no obligation to provide an opportunity for such review of decisions in cases of unsuccessful opposition or administrative revocation, provided that the grounds for such procedures can be the subject of invalidation procedures.

B. INTERPRETATION AND APPLICATION OF ARTICLE 62

133. In *Canada – Patent Term*, Canada argued that Article 33, a provision calling for a minimum patent protection period, must be read in conjunction with Article 62.2, which recognizes the fact that the length of the patent-granting process invariably involves some curtailment of the period of protection. From the interplay of these two provisions, Canada argued that Article 33 embodies a notion of "effective" protection and that Article 33 can be complied with by making available a nominally shorter period of protection, while taking into consideration "effective" protection during the period of the patent approval proceedings.[118] The Appellate Body upheld the Panel's rejection of this argument:

> ". . . Article 62.2 deals with procedures relating to the acquisition of intellectual property rights. Article 62.2 does not deal with the duration of those rights once they are acquired. Article 62.2 is of no relevance to this case. This purely procedural Article cannot be used to modify the clear and substantive standard set out in Article 33 so as to conjecture a new standard of 'effective' protection. Each Member of the WTO may well have its own subjective judgement about what constitutes a 'reasonable period of time' not only for granting patents in general, but also for granting patents in specific sectors or fields of complexity. If Canada's arguments were accepted, each and every Member of the WTO would be free to adopt a term of 'effective' protection for patents that, in its judgement, meets the criteria of 'reasonable period of time' and 'unwarranted curtailment of the period of protection', and to claim that its term of protection is substantively 'equivalent' to the term of protection envisaged by Article 33. Obviously, this cannot be what the Members of the WTO envisaged in concluding the TRIPS Agreement. Our task is to interpret the covered agreements harmoniously. A harmonious interpretation of Article 33 and Article 62.2 must regard these two treaty provisions as distinct and separate Articles containing obligations that must be fulfilled distinctly and separately."[119]

134. With respect to the relationship of Article 62.2 with Articles 1.1 and 33, see paragraph 3 above.

PART V
DISPUTE PREVENTION AND SETTLEMENT

LXIV. ARTICLE 63

A. TEXT OF ARTICLE 63

Article 63
Transparency

1. Laws and regulations, and final judicial decisions and administrative rulings of general application, made effective by a Member pertaining to the subject matter of this Agreement (the availability, scope, acquisition,

[118] With respect to the claim that an equivalent "effective" period of protection can fulfill the requirement of Article 33, see paras. 117–120 of this Chapter.

[119] Appellate Body Report on *Canada – Patent Term*, para. 97.

enforcement and prevention of the abuse of intellectual property rights) shall be published, or where such publication is not practicable made publicly available, in a national language, in such a manner as to enable governments and right holders to become acquainted with them. Agreements concerning the subject matter of this Agreement which are in force between the government or a governmental agency of a Member and the government or a governmental agency of another Member shall also be published.

2. Members shall notify the laws and regulations referred to in paragraph 1 to the Council for TRIPS in order to assist that Council in its review of the operation of this Agreement. The Council shall attempt to minimize the burden on Members in carrying out this obligation and may decide to waive the obligation to notify such laws and regulations directly to the Council if consultations with WIPO on the establishment of a common register containing these laws and regulations are successful. The Council shall also consider in this connection any action required regarding notifications pursuant to the obligations under this Agreement stemming from the provisions of Article 6*ter* of the Paris Convention (1967).

3. Each Member shall be prepared to supply, in response to a written request from another Member, information of the sort referred to in paragraph 1. A Member, having reason to believe that a specific judicial decision or administrative ruling or bilateral agreement in the area of intellectual property rights affects its rights under this Agreement, may also request in writing to be given access to or be informed in sufficient detail of such specific judicial decisions or administrative rulings or bilateral agreements.

4. Nothing in paragraphs 1, 2 and 3 shall require Members to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises, public or private.

B. INTERPRETATION AND APPLICATION OF ARTICLE 63

1. Article 63.2

(a) Notification requirements

135. At its meeting of 21 November 1995, the Council for TRIPS adopted Decisions on the rules of procedure for notification under Article 63.2,[120] including a possible format for listing of "Other Laws and Regulations"[121] and a Checklist of Issues on Enforcement.[122]

136. Article 2 of the Agreement between the World Intellectual Property Organization and the World Trade Organization contains provisions relevant to notifications and translation of laws and regulations under Article 63.2.[123]

LXV. ARTICLE 64

A. TEXT OF ARTICLE 64

Article 64
Dispute Settlement

1. The provisions of Articles XXII and XXIII of GATT 1994 as elaborated and applied by the Dispute Settlement Understanding shall apply to consultations and the settlement of disputes under this Agreement except as otherwise specifically provided herein.

2. Subparagraphs 1(b) and 1(c) of Article XXIII of GATT 1994 shall not apply to the settlement of disputes under this Agreement for a period of five years from the date of entry into force of the WTO Agreement.

3. During the time period referred to in paragraph 2, the Council for TRIPS shall examine the scope and modalities for complaints of the type provided for under subparagraphs 1(b) and 1(c) of Article XXIII of GATT 1994 made pursuant to this Agreement, and submit its recommendations to the Ministerial Conference for approval. Any decision of the Ministerial Conference to approve such recommendations or to extend the period in paragraph 2 shall be made only by consensus, and approved recommendations shall be effective for all Members without further formal acceptance process.

B. INTERPRETATION AND APPLICATION OF ARTICLE 64

1. General

137. With respect to the interpretation and application of the provisions of Articles XXII and XXIII of the *GATT 1994* as elaborated and applied by the *DSU* to provisions of the *TRIPS Agreement*, see the Chapter on the *DSU*.

138. The following table lists the disputes in which panel and/or Appellate Body reports have been adopted where the provisions of the *TRIPS Agreement* were invoked:

	Case Name	Case Number	Invoked Articles
1	*India – Patents (US)*	WT/DS50	Articles 27, 63, 70.8 and 70.9

2. Article 64.3

139. On 14 November 2001, the Ministerial Conference adopted a Decision on Implementation-Related Issues and Concerns, which includes a moratorium for so-called "non-violation" and "situation" complaints under the TRIPS Agreement. Paragraph 11.1 of the Decision reads as follows:

> "The TRIPS Council is directed to continue its examination of the scope and modalities for complaints of the types provided for under subparagraphs 1(b) and 1(c) of Article XXIII of GATT 1994 and make recommendations to the Fifth Session of the Ministerial Conference. It is agreed that, in the meantime, Members will not initiate such complaints under the TRIPS Agreement."[124]

PART VI
TRANSITIONAL ARRANGEMENTS

LXVI. ARTICLE 65

A. TEXT OF ARTICLE 65

Article 65
Transitional Arrangements

1. Subject to the provisions of paragraphs 2, 3 and 4, no Member shall be obliged to apply the provisions of this Agreement before the expiry of a general period of one year following the date of entry into force of the WTO Agreement.

2. A developing country Member is entitled to delay for a further period of four years the date of application, as defined in paragraph 1, of the provisions of this Agreement other than Articles 3, 4 and 5.

3. Any other Member which is in the process of transformation from a centrally-planned into a market, free-enterprise economy and which is undertaking structural reform of its intellectual property system and facing special problems in the preparation and implementation of intellectual property laws and regulations, may also benefit from a period of delay as foreseen in paragraph 2.

4. To the extent that a developing country Member is obliged by this Agreement to extend product patent protection to areas of technology not so protectable in its territory on the general date of application of this Agreement for that Member, as defined in paragraph 2, it may delay the application of the provisions on product patents of Section 5 of Part II to such areas of technology for an additional period of five years.

5. A Member availing itself of a transitional period under paragraphs 1, 2, 3 or 4 shall ensure that any changes in its laws, regulations and practice made during that period do not result in a lesser degree of consistency with the provisions of this Agreement.

B. INTERPRETATION AND APPLICATION OF ARTICLE 65

1. General

140. In *Canada – Patent Term*, after upholding the Panel's finding that a term of protection available under the Canadian patent law was shorter than required under Article 33, the Appellate Body distinguished the content of TRIPS obligations from their temporal effect:

> "In conclusion, we wish to point out that our findings in this appeal have no effect whatsoever on the transitional arrangements found in Part VI of the TRIPS Agreement. The provisions in Part VI establish when obligations of the TRIPS Agreement are to be applied by a WTO Member and not what those obligations are. The issues raised in this appeal relate to what the obligations are, not to when they apply."[125]

2. Article 65.4

(a) "an additional period of five years"

141. In *India – Patents (US)*, the Panel linked Articles 27 and 65:

> "Article 27 requires that patents be made available in all fields of technology, subject to certain narrow exceptions. Article 65 provides for transitional periods for developing countries: in general five years from the entry into force of the WTO Agreement, i.e. 1 January 2000, and an additional five years to provide for product patents in areas of technology not so patentable as of 1 January 2000. Thus, in such areas of technology, developing countries are not required to provide product patent protection until 1 January 2005."[126]

142. In *India – Patents (EC)*, the Panel emphasized that its findings on the substance of the TRIPS obligations do not relate in any way to the transition period:

[124] The text of the Decision can be found in WT/MIN(01)/17.
[125] Appellate Body Report on *Canada – Patent Term*, para. 100.
[126] Panel Report on *India – Patents (US)*, para. 7.27.

"Since the matter has been addressed by India in its arguments and caused some confusion in the previous case, we would like to underline that the Panel's findings do not in any way foreshorten the transition period of until, at the latest, 1 January 2005 that India has for meeting its obligations under Articles 65.4 and 70.8(b) and (c)."[127]

3. Article 65.5

(a) "changes . . . do not result in a lesser degree of consistency"

143. In *Indonesia – Autos*, the Panel examined the claim of the United States that "Indonesia is in violation of its obligations under Article 65.5 of the TRIPS Agreement because provisions of the National Car Programme which were introduced by Indonesia during its transition period under the TRIPS Agreement put special requirements on nationals of other WTO Members in respect of the use of their trademarks which are inconsistent with the provisions of Article 20 of the TRIPS Agreement":

"The arguments put forward by the United States in support of its claim [under Article 65.5] are essentially the same as those that have been considered in paragraphs 14.277 and 14.278 above [in relation to Article 3, in conjunction with Article 20 on use of trademarks]. For the reasons set out in those paragraphs above, [that these are not 'requirements' in the sense of Article 20] we find that the United States has not demonstrated that measures have been taken that reduce the degree of consistency with the provisions of Article 20 and which would therefore be in violation of Indonesia's obligations under Article 65.5 of the TRIPS Agreement."[128]

4. Relationship with other Articles

144. In *Indonesia – Autos*, the Panel noted that the transition period under Article 65.2 does not apply to Article 3:

"[W]e note that Indonesia has been under an obligation to apply the provisions of Article 3 since 1 January 1996, Article 3 not benefiting from the additional four years of transition generally provided by Article 65.2 to developing country Members."[129]

145. The Panel in *India – Patents (US)* made clear that Article 70.8 is also one of the provisions of the *TRIPS Agreement* to which the transition period of Article 65 does not apply:

"However, these transitional provisions [in Article 65] are not applicable to Article 70.8, which ensures that, if product patent protection is not already available for pharmaceutical and agricultural chemical product inventions, a means must be in place as of 1 January 1995 which allows for the entitlement to file patent applications for such inventions and the allocation of filing and priority dates to them so that the novelty of the inventions in question and the priority of the applications claiming their protection can be preserved for the purposes of determining their eligibility for protection by a patent at the time that product patent protection will be available for these inventions, i.e. at the latest after the expiry of the transitional period."[130]

146. Certain provisions of the *TRIPS Agreement* contain obligations contingent upon the applicability of Article 65 (and 66). The Panel in *India – Patents (US)* held with respect to Article 70.9:

"As is the case with Article 70.8(a), the granting of exclusive marketing rights is a special obligation linked with the enjoyment by Members of the transitional arrangements under Articles 65 and 66 of the Agreement."[131]

LXVII. ARTICLE 66

A. TEXT OF ARTICLE 66

Article 66
Least-Developed Country Members

1. In view of the special needs and requirements of least-developed country Members, their economic, financial and administrative constraints, and their need for flexibility to create a viable technological base, such Members shall not be required to apply the provisions of this Agreement, other than Articles 3, 4 and 5, for a period of 10 years from the date of application as defined under paragraph 1 of Article 65. The Council for TRIPS shall, upon duly motivated request by a least-developed country Member, accord extensions of this period.

2. Developed country Members shall provide incentives to enterprises and institutions in their territories for the purpose of promoting and encouraging technology transfer to least-developed country Members in order to enable them to create a sound and viable technological base.

B. INTERPRETATION AND APPLICATION OF ARTICLE 66

1. Article 66.1

(a) Extension of transition period

147. On 27 June 2002, the Council for TRIPS adopted a decision extending the transition period under Article 66.1 for least-developed country Members for certain obligations with respect to pharmaceutical products, in the following terms:

[127] Panel Report on *India – Patents (EC)*, para. 8.1.
[128] Panel Report on *Indonesia – Autos*, para. 14.282.
[129] Panel Report on *Indonesia – Autos*, para. 14.266.
[130] Panel Report on *India – Patents (US)*, para. 7.27.
[131] Panel Report on *India – Patents (US)*, para. 7.59.

"1. Least-developed country Members will not be obliged, with respect to pharmaceutical products, to implement or apply Sections 5 and 7 of Part II of the TRIPS Agreement or to enforce rights provided for under these Sections until 1 January 2016.

2. This decision is made without prejudice to the right of least-developed country Members to seek other extensions of the period provided for in paragraph 1 of Article 66 of the TRIPS Agreement."[132]

(b) Relationship with other Articles

148. With respect to the relationship of Article 66.1 with Article 70.8(a) and 70.9, see paragraphs 145–146 above.

2. Article 66.2

149. On 19 February 2003, the Council for TRIPS adopted a decision establishing arrangements for the submission by developed country Members of annual reports on their implementation of Article 66.2 and their annual review by the Council for TRIPS.[133]

LXVIII. ARTICLE 67

A. TEXT OF ARTICLE 67

Article 67
Technical Cooperation

In order to facilitate the implementation of this Agreement, developed country Members shall provide, on request and on mutually agreed terms and conditions, technical and financial cooperation in favour of developing and least-developed country Members. Such cooperation shall include assistance in the preparation of laws and regulations on the protection and enforcement of intellectual property rights as well as on the prevention of their abuse, and shall include support regarding the establishment or reinforcement of domestic offices and agencies relevant to these matters, including the training of personnel.

B. INTERPRETATION AND APPLICATION OF ARTICLE 67

150. Article 4 of the Agreement between the World Intellectual Property Organization and the World Trade Organization contains provisions on legal-technical assistance and technical cooperation.[134]

PART VII
INSTITUTIONAL ARRANGEMENTS; FINAL PROVISIONS

LXIX. ARTICLE 68

A. TEXT OF ARTICLE 68

Article 68
Council for Trade-Related Aspects of Intellectual Property Rights

The Council for TRIPS shall monitor the operation of this Agreement and, in particular, Members' compliance with their obligations hereunder, and shall afford Members the opportunity of consulting on matters relating to the trade-related aspects of intellectual property rights. It shall carry out such other responsibilities as assigned to it by the Members, and it shall, in particular, provide any assistance requested by them in the context of dispute settlement procedures. In carrying out its functions, the Council for TRIPS may consult with and seek information from any source it deems appropriate. In consultation with WIPO, the Council shall seek to establish, within one year of its first meeting, appropriate arrangements for cooperation with bodies of that Organization.

B. INTERPRETATION AND APPLICATION OF ARTICLE 68

1. Rules of procedure of the Council for TRIPS

151. At its meetings of 24 May 1995 and 21 September 1995, the Council for TRIPS adopted its rules of procedure. At its meeting on 15 November 1995, the General Council approved those rules of procedure.[135]

2. Observer status

152. With respect to the entities that have been granted observer status in the Council for TRIPS, see below.

---

[132] The Council for TRIPS adopted this decision pursuant to the instruction of the Ministerial Conference in the Declaration on the TRIPS Agreement and Public Health (WT/MIN(01)/DEC/2, reproduced in Section LXXVIII below). See the minutes of the Council for TRIPS' meeting in IP/C/M/36. The text of the adopted decision can be found in IP/C/25. At the same meeting, the Council for TRIPS approved a draft waiver for least-developed country Members of obligations under Article 70.9 with respect to pharmaceutical products. See paragraph 164 below.

[133] The Council for TRIPS adopted this decision pursuant to the instruction of the Ministerial Conference in the Declaration on the TRIPS Agreement and Public Health (WT/MIN(01)/DEC/2, reproduced in Section LXXVIII below). See the minutes of the Council for TRIPS' meeting in IP/C/M/39. The text of the adopted decision can be found in IP/C/28.

[134] The text of the Agreement can be found in IP/C/6.

[135] IP/C/M/2, para 5; IP/C/M/3, para.2; WT/GC/M/8, para. 4. The rules of procedure can be found in IP/C/1.

(a) Organizations granted observer status

- Food and Agriculture Organization (FAO)
- International Monetary Fund (IMF)
- International Union for the Protection of New Varieties of Plants (UPOV)
- Organization for Economic Cooperation and Development (OECD)
- United Nations (UN)
- United Nations Conference on Trade and Development (UNCTAD)
- World Bank
- World Customs Organization (WCO)
- World Intellectual Property Organization (WIPO)

(b) Organizations having ad hoc observer status

- World Health Organization (WHO)

3. Cooperation with WIPO

153. At its meeting of 11 December 1995, the Council for TRIPS approved the text of a proposed agreement between the World Intellectual Property Organization and the World Trade Organization, and agreed to submit it to the General Council for its approval. At its meeting on 13 December 1995, the General Council approved the proposed agreement.[136] The Agreement was signed on behalf of the organizations on 22 December 1995 and entered into force on 1 January 1996.

LXX. ARTICLE 69

A. TEXT OF ARTICLE 69

Article 69
International Cooperation

Members agree to cooperate with each other with a view to eliminating international trade in goods infringing intellectual property rights. For this purpose, they shall establish and notify contact points in their administrations and be ready to exchange information on trade in infringing goods. They shall, in particular, promote the exchange of information and cooperation between customs authorities with regard to trade in counterfeit trademark goods and pirated copyright goods.

B. INTERPRETATION AND APPLICATION OF ARTICLE 69

1. Notification requirements

154. At its meeting of 21 September 1995 the Council for TRIPS adopted a common procedure for the notification of contact points that Members had established for the purposes of Article 69.[137]

LXXI. ARTICLE 70

A. TEXT OF ARTICLE 70

Article 70
Protection of Existing Subject Matter

1. This Agreement does not give rise to obligations in respect of acts which occurred before the date of application of the Agreement for the Member in question.

2. Except as otherwise provided for in this Agreement, this Agreement gives rise to obligations in respect of all subject matter existing at the date of application of this Agreement for the Member in question, and which is protected in that Member on the said date, or which meets or comes subsequently to meet the criteria for protection under the terms of this Agreement. In respect of this paragraph and paragraphs 3 and 4, copyright obligations with respect to existing works shall be solely determined under Article 18 of the Berne Convention (1971), and obligations with respect to the rights of producers of phonograms and performers in existing phonograms shall be determined solely under Article 18 of the Berne Convention (1971) as made applicable under paragraph 6 of Article 14 of this Agreement.

3. There shall be no obligation to restore protection to subject matter which on the date of application of this Agreement for the Member in question has fallen into the public domain.

4. In respect of any acts in respect of specific objects embodying protected subject matter which become infringing under the terms of legislation in conformity with this Agreement, and which were commenced, or in respect of which a significant investment was made, before the date of acceptance of the WTO Agreement by that Member, any Member may provide for a limitation of the remedies available to the right holder as to the continued performance of such acts after the date of application of this Agreement for that Member. In such cases the Member shall, however, at least provide for the payment of equitable remuneration.

5. A Member is not obliged to apply the provisions of Article 11 and of paragraph 4 of Article 14 with respect

[136] IP/C/M/5, para.9; WT/GC/M/9, Section 1(e). The text of the agreement can be found in IP/C/6.
[137] IP/C/M/3, para. 27.

to originals or copies purchased prior to the date of application of this Agreement for that Member.

6. Members shall not be required to apply Article 31, or the requirement in paragraph 1 of Article 27 that patent rights shall be enjoyable without discrimination as to the field of technology, to use without the authorization of the right holder where authorization for such use was granted by the government before the date this Agreement became known.

7. In the case of intellectual property rights for which protection is conditional upon registration, applications for protection which are pending on the date of application of this Agreement for the Member in question shall be permitted to be amended to claim any enhanced protection provided under the provisions of this Agreement. Such amendments shall not include new matter.

8. Where a Member does not make available as of the date of entry into force of the WTO Agreement patent protection for pharmaceutical and agricultural chemical products commensurate with its obligations under Article 27, that Member shall:

(a) notwithstanding the provisions of Part VI, provide as from the date of entry into force of the WTO Agreement a means by which applications for patents for such inventions can be filed;

(b) apply to these applications, as of the date of application of this Agreement, the criteria for patentability as laid down in this Agreement as if those criteria were being applied on the date of filing in that Member or, where priority is available and claimed, the priority date of the application; and

(c) provide patent protection in accordance with this Agreement as from the grant of the patent and for the remainder of the patent term, counted from the filing date in accordance with Article 33 of this Agreement, for those of these applications that meet the criteria for protection referred to in subparagraph (b).

9. Where a product is the subject of a patent application in a Member in accordance with paragraph 8(a), exclusive marketing rights shall be granted, notwithstanding the provisions of Part VI, for a period of five years after obtaining marketing approval in that Member or until a product patent is granted or rejected in that Member, whichever period is shorter, provided that, subsequent to the entry into force of the WTO Agreement, a patent application has been filed and a patent granted for that product in another Member and marketing approval obtained in such other Member.

B. INTERPRETATION AND APPLICATION OF ARTICLE 70

1. General

(a) Relationship between Article 70.1 and 70.2

155. In *Canada – Patent Term*, Canada argued that the grant of a patent term is an integral part of the act granting the patent in question. As such, Canada considered that the length of the patent terms falls within the scope of the term "act" contained in Article 70.1. From this, Canada concluded that the grant of the patent term is part of an act which occurred before the entry into force of the *TRIPS Agreement*, with the result that Article 33 did not apply. With respect to the relationship between Article 70.1 and 70.2, Canada argued that the phrase "except as otherwise provided for in this Agreement" demonstrates that Article 70.2 does not apply in this instance and that Article 70.1 takes precedence over Article 70.2. The Appellate Body rejected this argument:

> "Like the Panel, we see Articles 70.1 and 70.2 as dealing with two distinct and separate matters. The former deals with past 'acts', while the latter deals with 'subject-matter' existing on the applicable date of the TRIPS Agreement. Article 70.1 of the TRIPS Agreement operates only to exclude obligations in respect of 'acts which occurred' before the date of application of the TRIPS Agreement, but does not exclude rights and obligations in respect of continuing situations. On the contrary, 'subject matter existing . . . which is protected' is clearly a continuing situation, whether viewed as protected inventions, or as the patent rights attached to them. 'Subject matter existing . . . which is protected' is not within the scope of Article 70.1, and, therefore, the '[e]xcept as otherwise provided for' clause in Article 70.2 can have no application to it. Thus, for the sake of argument, even if there is a relationship between Article 70.1 and the opening proviso in Article 70.2, Canada's argument with respect to Old Act patents fails nonetheless, as we have concluded that the continuing rights relating to Old Act patents do not fall within the scope of Article 70.1.
>
> We wish to point out that our interpretation of Article 70 does not lead to a 'retroactive' application of the TRIPS Agreement. Article 70.1 alone addresses 'retroactive' circumstances, and it excludes them generally from the scope of the Agreement. The application of Article 33 to inventions protected under Old Act patents is justified under Article 70.2, not Article 70.1. A treaty applies to existing rights, even when those rights result from 'acts which occurred' before the treaty entered into force."[138]

[138] Appellate Body Report on *Canada – Patent Term*, paras. 69–70.

2. Article 70.1

(a) "acts which occurred before the date of application of the Agreement"

156. In *Canada – Patent Term*, in the context of juxtaposing the term "acts" under Article 70.1 and the term "subject-matter" under Article 70.2, the Appellate Body held with respect to the former:

> "Our main task is to give meaning to the phrase 'acts which occurred before the date of application' and to interpret Article 70.1 harmoniously with the rest of the provisions of Article 70. We are of the view that the term 'acts' has been used in Article 70.1 in its normal or ordinary sense of 'things done', 'deeds', 'actions' or 'operations'. In the context of 'acts' falling within the domain of intellectual property rights, the term 'acts' in Article 70.1 may, therefore, encompass the 'acts' of public authorities (that is, governments as well as their regulatory and administrative authorities) as well as the 'acts' of private or third parties. Examples of the 'acts' of public authorities may include, in the field of patents, the examination of patent applications, the grant or rejection of a patent, the revocation or forfeiture of a patent, the grant of a compulsory licence, the impounding by customs authorities of goods alleged to infringe the intellectual property rights of a holder, and the like. Examples of 'acts' of private or third parties may include 'acts' such as the filing of a patent application, infringement or other unauthorized use of a patent, unfair competition, or abuse of patent rights."[139]

157. The Appellate Body then reached a conclusion on the scope of application of Article 70.1:

> "We conclude, therefore, that Article 70.1 of the TRIPS Agreement cannot be interpreted to exclude existing rights, such as patent rights, even if such rights arose through acts which occurred before the date of application of the TRIPS Agreement for a Member. We, therefore, confirm the finding of the Panel that Article 70.1 does not exclude from the scope of the TRIPS Agreement Old Act patents [i.e. Canadian patents granted on the basis of patent applications filed before 1 October 1989] that existed on the date of application of the TRIPS Agreement for Canada."[140]

158. In reaching the previous conclusion, the Appellate Body relied both on the wording of Article 70.1 and on the object and purpose of the *TRIPS Agreement*:

> "The ordinary meaning of the term 'acts' suggests that the answer to this question must be no. An 'act' is something that is 'done', and the use of the phrase 'acts which occurred' suggests that what was done is now complete or ended. This excludes situations, including existing rights and obligations, that have *not* ended. Indeed, the title of Article 70, 'Protection of Existing Subject Matter', confirms contextually that the focus of Article 70 is on bringing within the scope of the *TRIPS Agreement* 'subject matter' which, on the date of the application of the Agreement for a Member, is existing and which meets the relevant criteria for protection under the Agreement.
>
> A contrary interpretation would seriously erode the scope of the other provisions of Article 70, especially the explicit provisions of Article 70.2. Almost any existing situation or right can be said to have arisen from one or more past 'acts'. For example, virtually all contractual and property rights could be said to arise from 'acts which occurred' in the past. If the phrase 'acts which occurred' were interpreted to cover all *continuing* situations involving patents which were granted before the date of application of the *TRIPS Agreement* for a Member, including such rights as those under Old Act patents, then Article 70.1 would preclude the application of virtually the whole of the *TRIPS Agreement* to rights conferred by the patents arising from such 'acts'. This is not consistent with the object and purpose of the *TRIPS Agreement*, as reflected in the Preamble of the Agreement."[141]

3. Article 70.2

(a) "subject matter existing at the date of application of this Agreement"

159. In *Canada – Patent Term*, the Appellate Body distinguished clearly between the term "acts" within Article 70.1 and the term "subject-matter" under Article 70.2. With respect to the latter term, the Appellate Body relied, *inter alia*, on the use of the term in other provisions of the *TRIPS Agreement*:

> "We agree with the Panel's reasoning that 'subject matter' in Article 70.2 refers, in the case of patents, to inventions. The ordinary meaning of the term 'subject-matter' is a 'topic dealt with or the subject represented in a debate, exposition, or work of art'. Useful context is provided by the qualification of the term 'subject matter', in the same sentence of Article 70.2, by the word 'protected', as well as by the phrase 'meet the criteria for protection under the terms of this Agreement' appearing later in the same sentence. As noted earlier, the title to Article 70 also uses the words 'Protection of Existing Subject Matter'. We can deduce, therefore, that the 'subject matter', for purposes of Article 70.2, is that which is 'protected', or 'meets the criteria for protection', under the terms of the TRIPS Agreement. As, in the present case, patents are the means of protection, then whatever patents protect must be the 'subject matter' to which Article 70.2 refers.
>
> Articles 27, 28, 31 and 34 of the *TRIPS Agreement* also use the words 'subject-matter' with respect to patents

[139] Appellate Body Report on *Canada – Patent Term*, para. 54.
[140] Appellate Body Report on *Canada – Patent Term*, para. 60.
[141] Appellate Body Report on *Canada – Patent Term*, paras. 58–59.

and provide an equally useful context for interpretation. Article 27, entitled 'Patentable Subject-matter', states: 'patents shall be available for any *inventions*' . . . . This Article identifies the criteria that an invention must fulfill in order to be eligible to receive a patent, and it also identifies the types of inventions that may be excluded from patentability even if they meet those criteria. On the other hand, in Articles 28, 31 and 34, the words 'subject-matter' relate to patents that are granted pursuant to the criteria in Article 27; that is to say, these Articles relate to inventions that are protected by patents granted, as distinguished from the 'patentable' inventions to which Article 27 refers. These Articles confirm the conclusion that *inventions* are the relevant 'subject-matter' in the case of patents, and that the 'subject-matter' in Article 70.2 means, in the case of patents, patentable or patented inventions. Article 70.2 thus gives rise to obligations in respect of all such inventions existing on the date of application of the *TRIPS Agreement* for a Member. In the appeal before us, where the measure in dispute is Section 45 of Canada's *Patent Act*, which applies to Old Act patents, the word 'subject-matter' means the inventions that were protected by those patents. We, therefore, confirm the conclusion of the Panel in this regard."[142]

4. Article 70.8

(a) "a means by which applications for patents for such inventions can be filed"

160. In *India – Patents (US)*, in reviewing the Panel's finding that the patent law of India was inconsistent with Article 70.8, the Appellate Body considered the meaning of the term "means" within the phrase "a means by which applications for patents for such inventions can be filed":

> "Article 70.8(a) imposes an obligation on Members to provide 'a means' by which mailbox applications can be filed 'from the date of entry into force of the WTO Agreement'. Thus, this obligation has been in force since 1 January 1995. The issue before us in this appeal is not whether this obligation exists or whether this obligation is now in force. Clearly, it exists, and, equally clearly, it is in force now. The issue before us in this appeal is: what precisely is the 'means' for filing mailbox applications that is contemplated and required by Article 70.8(a)?
>
> . . .
>
> We believe the Panel was correct in finding that the 'means' that the Member concerned is obliged to provide under Article 70.8(a) must allow for 'the entitlement to file mailbox applications and the allocation of filing and priority dates to them'. Furthermore, the Panel was correct in finding that the 'means' established under Article 70.8(a) must also provide 'a sound legal basis to preserve novelty and priority as of those dates'. These findings flow inescapably from the necessary operation of paragraphs (b) and (c) of Article 70.8."[143]

161. While the term "means" was held to include the notion of a "sound legal basis", the Appellate Body also found that such a "sound legal basis" did not have to provide for complete legal certainty with respect to the future grant of the relevant patent:

> "However, we do not agree with the Panel that Article 70.8(a) requires a Member to establish a means 'so as to eliminate any reasonable doubts regarding whether mailbox applications and eventual patents based on them could be rejected or invalidated because, at the filing or priority date, the matter for which protection was sought was unpatentable in the country in question'. India is entitled, by the 'transitional arrangements' in paragraphs 1, 2 and 4 of Article 65, to delay application of Article 27 for patents for pharmaceutical and agricultural chemical products until 1 January 2005. In our view, India is obliged, by Article 70.8(a), to provide a legal mechanism for the filing of mailbox applications that provides a sound legal basis to preserve both the novelty of the inventions and the priority of the applications as of the relevant filing and priority dates. No more."[144]

5. Article 70.9

(a) "exclusive marketing rights"

162. In *India – Patents (US)*, reviewing the Panel's finding that the patent law of India was inconsistent with Article 70.9, the Appellate Body addressed the relationship between Article 70.8(a) and 70.9:

> "By its terms, Article 70.9 applies only in situations where a product patent application is filed under Article 70.8(a). Like Article 70.8(a), Article 70.9 applies 'notwithstanding the provisions of Part VI'. Article 70.9 specifically refers to Article 70.8(a), and they operate in tandem to provide a package of rights and obligations that apply during the transitional periods contemplated in Article 65. It is obvious, therefore, that both Article 70.8(a) and Article 70.9 are intended to apply as from the date of entry into force of the WTO Agreement."[145]

163. In *India – Patents (EC)*, examining the EC claim under Article 70.9, the Panel addressed the argument by India that Article 70.9, referring only to the grant of "exclusive marketing rights", should be distinguished from e.g. the phrase "patents shall be available" under Article 27:

> "India essentially repeats its arguments in the previous case that the obligations under Article 70.9 should be

[142] Appellate Body Report on *Canada – Patent Term*, paras. 65–66.
[143] Appellate Body Report on *India – Patents (US)*, paras. 54 and 57.
[144] Appellate Body Report on *India – Patents (US)*, para. 58.
[145] Appellate Body Report on *India – Patents (US)*, para. 82.

distinguished from those under other provisions of the TRIPS Agreement because it uses the term 'exclusive marketing rights shall be granted . . .'. According to India, there is a material difference between this expression and such other expressions as 'patents shall be available . . .' in Article 27. We disagree. The Panel report in dispute WT/DS50 [*India – Patents (US)*] points out that the term 'right' connotes an entitlement to which a person has a just claim and that, as such, it implies general, non-discretionary availability in the case of those eligible to exercise it. It was held that an exclusive marketing right could not be 'granted' in a specific case unless it was 'available' in the first place. The Panel's view was upheld by the Appellate Body, and we do not see any reason to adopt a different position in the present case. In this connection, we would also note that India considers that exclusive marketing rights are to be granted in response to requests from those who are eligible. In our view, a request-based system of rights cannot operate effectively unless there is a mechanism in place that establishes general availability and enables such requests to be made."[146]

(b) Least-developed country Members

164. On 8 July 2002 the General Council adopted a waiver of the obligations of least-developed country Members under paragraph 9 of Article 70 with respect to pharmaceutical products until 1 January 2016.[147]

6. Relationship with other Articles

(a) Relationship between Section 5 of Part II and Article 70.2

165. In *Canada – Patent Term*, the Appellate Body addressed the relationship between Section 5 and Article 70.2:

"Article 70.2 applies the obligations of the TRIPS Agreement to 'all subject matter existing . . . and which is protected' on the date of application of the TRIPS Agreement for a Member. A Member is required, as from that date, to implement all obligations under the TRIPS Agreement in respect of such existing subject matter. This includes the obligation in Article 33. We see no basis in the text for isolating or insulating the obligation in Article 33 relating to the duration of a patent term from the other obligations relating to patents that are also found in Section 5 of the TRIPS Agreement. There is nothing whatsoever in Section 5 to indicate that the obligation relating to patent term in Article 33 differs in application in any respect from the other obligations in Section 5. An obligation that relates to duration must necessarily have a beginning and an end date. On that ground alone, it cannot be argued that the obligation is attached to, and arises uniquely from, certain 'acts'. Although Canada has not done so, it could just as easily be argued that the exclusive rights under Article 28 are also an 'integral part' of the 'act' of granting a patent, as those rights also can arise only from the grant and consequent existence of a patent."[148]

(b) Relationships between Articles 65 and 66 and Article 70.8 and 70.9

166. With respect to the relationship between Article 65 and Article 70.8, see paragraph 145 above. With respect to the relationship between Articles 65 and 66 and Article 70.9, see paragraph 146 above.

LXXII. ARTICLE 71

A. TEXT OF ARTICLE 71

Article 71
Review and Amendment

1. The Council for TRIPS shall review the implementation of this Agreement after the expiration of the transitional period referred to in paragraph 2 of Article 65. The Council shall, having regard to the experience gained in its implementation, review it two years after that date, and at identical intervals thereafter. The Council may also undertake reviews in the light of any relevant new developments which might warrant modification or amendment of this Agreement.

2. Amendments merely serving the purpose of adjusting to higher levels of protection of intellectual property rights achieved, and in force, in other multilateral agreements and accepted under those agreements by all Members of the WTO may be referred to the Ministerial Conference for action in accordance with paragraph 6 of Article X of the WTO Agreement on the basis of a consensus proposal from the Council for TRIPS.

B. INTERPRETATION AND APPLICATION OF ARTICLE 71

No jurisprudence or decision of a competent WTO body.

LXXIII. ARTICLE 72

A. TEXT OF ARTICLE 72

Article 72
Reservations

Reservations may not be entered in respect of any of the provisions of this Agreement without the consent of the other Members.

A. TEXT OF ARTICLE 73

Article 73
Security Exceptions

Nothing in this Agreement shall be construed:

(a) to require a Member to furnish any information the disclosure of which it considers contrary to its essential security interests; or

(b) to prevent a Member from taking any action which it considers necessary for the protection of its essential security interests;

(i) relating to fissionable materials or the materials from which they are derived;

(ii) relating to the traffic in arms, ammunition and implements of war and to such traffic in other goods and materials as is carried on directly or indirectly for the purpose of supplying a military establishment;

(iii) taken in time of war or other emergency in international relations; or

(c) to prevent a Member from taking any action in pursuance of its obligations under the United Nations Charter for the maintenance of international peace and security.

B. INTERPRETATION AND APPLICATION OF ARTICLE 73

No jurisprudence or decision of a competent WTO body.

LXXV. TEXT OF THE PROVISIONS OF THE PARIS CONVENTION (1967) INCORPORATED BY ARTICLE 2.1 OF THE TRIPS AGREEMENT

Article 1
[Establishment of the Union; Scope of Industrial Property][1]

(*footnote original*) [1] Articles have been given titles to facilitate their identification. There are no titles in the signed (French) text.

(1) The countries to which this Convention applies constitute a Union for the protection of industrial property.

(2) The protection of industrial property has as its object patents, utility models, industrial designs, trademarks, service marks, trade names, indications of source or appellations of origin, and the repression of unfair competition.

(3) Industrial property shall be understood in the broadest sense and shall apply not only to industry and commerce proper, but likewise to agricultural and extractive industries and to all manufactured or natural products, for example, wines, grain, tobacco leaf, fruit, cattle, minerals, mineral waters, beer, flowers, and flour.

(4) Patents shall include the various kinds of industrial patents recognized by the laws of the countries of the Union, such as patents of importation, patents of improvement, patents and certificates of addition, etc.

Article 2
[National Treatment for Nationals of Countries of the Union]

(1) Nationals of any country of the Union shall, as regards the protection of industrial property, enjoy in all the other countries of the Union the advantages that their respective laws now grant, or may hereafter grant, to nationals; all without prejudice to the rights specially provided for by this Convention. Consequently, they shall have the same protection as the latter, and the same legal remedy against any infringement of their rights, provided that the conditions and formalities imposed upon nationals are complied with.

(2) However, no requirement as to domicile or establishment in the country where protection is claimed may be imposed upon nationals of countries of the Union for the enjoyment of any industrial property rights.

(3) The provisions of the laws of each of the countries of the Union relating to judicial and administrative procedure and to jurisdiction, and to the designation of an address for service or the appointment of an agent, which may be required by the laws on industrial property are expressly reserved.

Article 3
[Same Treatment for Certain Categories of Persons as for Nationals of Countries of the Union]

Nationals of countries outside the Union who are domiciled or who have real and effective industrial or commercial establishments in the territory of one of the countries of the Union shall be treated in the same manner as nationals of the countries of the Union.

Article 4
[A to I. *Patents, Utility Models, Industrial Designs, Marks, Inventors' Certificates:* Right of Priority. – G. *Patents:* Division of the Application]

A.—

(1) Any person who has duly filed an application for a patent, or for the registration of a utility model, or

of an industrial design, or of a trademark, in one of the countries of the Union, or his successor in title, shall enjoy, for the purpose of filing in the other countries, a right of priority during the periods hereinafter fixed.

(2) Any filing that is equivalent to a regular national filing under the domestic legislation of any country of the Union or under bilateral or multilateral treaties concluded between countries of the Union shall be recognized as giving rise to the right of priority.

(3) By a regular national filing is meant any filing that is adequate to establish the date on which the application was filed in the country concerned, whatever may be the subsequent fate of the application.

B.—

Consequently, any subsequent filing in any of the other countries of the Union before the expiration of the periods referred to above shall not be invalidated by reason of any acts accomplished in the interval, in particular, another filing, the publication or exploitation of the invention, the putting on sale of copies of the design, or the use of the mark, and such acts cannot give rise to any third-party right or any right of personal possession. Rights acquired by third parties before the date of the first application that serves as the basis for the right of priority are reserved in accordance with the domestic legislation of each country of the Union

C.—

(1) The periods of priority referred to above shall be twelve months for patents and utility models, and six months for industrial designs and trademarks.

(2) These periods shall start from the date of filing of the first application; the day of filing shall not be included in the period.

(3) If the last day of the period is an official holiday, or a day when the Office is not open for the filing of applications in the country where protection is claimed, the period shall be extended until the first following working day.

(4) A subsequent application concerning the same subject as a previous first application within the meaning of paragraph (2), above, filed in the same country of the Union shall be considered as the first application, of which the filing date shall be the starting point of the period of priority, if, at the time of filing the subsequent application, the said previous application has been withdrawn, abandoned, or refused, without having been laid open to public inspection and without leaving any rights outstanding, and if it has not yet served as a basis for claiming a right of priority. The previous application may not thereafter serve as a basis for claiming a right of priority.

D.—

(1) Any person desiring to take advantage of the priority of a previous filing shall be required to make a declaration indicating the date of such filing and the country in which it was made. Each country shall determine the latest date on which such declaration must be made.

(2) These particulars shall be mentioned in the publications issued by the competent authority, and in particular in the patents and the specifications relating thereto.

(3) The countries of the Union may require any person making a declaration of priority to produce a copy of the application (description, drawings, etc.) previously filed. The copy, certified as correct by the authority which received such application, shall not require any authentication, and may in any case be filed, without fee, at any time within three months of the filing of the subsequent application. They may require it to be accompanied by a certificate from the same authority showing the date of filing, and by a translation.

(4) No other formalities may be required for the declaration of priority at the time of filing the application. Each country of the Union shall determine the consequences of failure to comply with the formalities prescribed by this Article, but such consequences shall in no case go beyond the loss of the right of priority.

(5) Subsequently, further proof may be required.

Any person who avails himself of the priority of a previous application shall be required to specify the number of that application; this number shall be published as provided for by paragraph (2), above.

E.—

(1) Where an industrial design is filed in a country by virtue of a right of priority based on the filing of a utility model, the period of priority shall be the same as that fixed for industrial designs

(2) Furthermore, it is permissible to file a utility model in a country by virtue of a right of priority based on the filing of a patent application, and vice versa.

F.—

No country of the Union may refuse a priority or a patent application on the ground that the applicant claims multiple priorities, even if they originate in different countries, or on the ground that an application claiming one or more priorities contains one or more elements that were not included in the application or applications whose priority is claimed, provided that, in both cases, there is unity of invention within the meaning of the law of the country.

With respect to the elements not included in the application or applications whose priority is claimed, the filing of the subsequent application shall give rise to a right of priority under ordinary conditions.

G.—

(1) If the examination reveals that an application for a patent contains more than one invention, the applicant may divide the application into a certain number of divisional applications and preserve as the date of each the date of the initial application and the benefit of the right of priority, if any.

(2) The applicant may also, on his own initiative, divide a patent application and preserve as the date of each divisional application the date of the initial application and the benefit of the right of priority, if any. Each country of the Union shall have the right to determine the conditions under which such division shall be authorized.

H.—

Priority may not be refused on the ground that certain elements of the invention for which priority is claimed do not appear among the claims formulated in the application in the country of origin, provided that the application documents as a whole specifically disclose such elements.

I.—

(1) Applications for inventors' certificates filed in a country in which applicants have the right to apply at their own option either for a patent or for an inventor's certificate shall give rise to the right of priority provided for by this Article, under the same conditions and with the same effects as applications for patents.

(2) In a country in which applicants have the right to apply at their own option either for a patent or for an inventor's certificate, an applicant for an inventor's certificate shall, in accordance with the provisions of this Article relating to patent applications, enjoy a right of priority based on an application for a patent, a utility model, or an inventor's certificate.

Article 4*bis*
[*Patents:* Independence of Patents Obtained for the Same Invention in Different Countries]

(1) Patents applied for in the various countries of the Union by nationals of countries of the Union shall be independent of patents obtained for the same invention in other countries, whether members of the Union or not.

(2) The foregoing provision is to be understood in an unrestricted sense, in particular, in the sense that patents applied for during the period of priority are independent, both as regards the grounds for nullity and forfeiture, and as regards their normal duration.

(3) The provision shall apply to all patents existing at the time when it comes into effect.

(4) Similarly, it shall apply, in the case of the accession of new countries, to patents in existence on either side at the time of accession.

(5) Patents obtained with the benefit of priority shall, in the various countries of the Union, have a duration equal to that which they would have, had they been applied for or granted without the benefit of priority.

Article 4*ter*
[*Patents:* Mention of the Inventor in the Patent]

The inventor shall have the right to be mentioned as such in the patent.

Article 4*quater*
[*Patents:* Patentability in Case of Restrictions of Sale by Law]

The grant of a patent shall not be refused and a patent shall not be invalidated on the ground that the sale of the patented product or of a product obtained by means of a patented process is subject to restrictions or limitations resulting from the domestic law.

Article 5
[A. *Patents:* Importation of Articles; Failure to Work or Insufficient Working; Compulsory Licences. – B. *Industrial Designs:* Failure to Work; Importation of Articles. – C. *Marks:* Failure to Use; Different Forms; Use by Co-proprietors. – D. *Patents, Utility Models, Marks, Industrial Designs:* Marking]

A.—

(1) Importation by the patentee into the country where the patent has been granted of articles manufactured in any of the countries of the Union shall not entail forfeiture of the patent.

(2) Each country of the Union shall have the right to take legislative measures providing for the grant of compulsory licenses to prevent the abuses which might result from the exercise of the exclusive rights conferred by the patent, for example, failure to work.

(3) Forfeiture of the patent shall not be provided for except in cases where the grant of compulsory licenses would not have been sufficient to prevent the said abuses. No proceedings for the forfeiture or revocation of a patent may be instituted before the expiration of two years from the grant of the first compulsory license.

(4) A compulsory license may not be applied for on the ground of failure to work or insufficient working before the expiration of a period of four years from the date of filing of the patent application or three years from the date of the grant of the patent,

whichever period expires last; it shall be refused if the patentee justifies his inaction by legitimate reasons. Such a compulsory license shall be non-exclusive and shall not be transferable, even in the form of the grant of a sub–license, except with that part of the enterprise or good/will which exploits such license.

(5) The foregoing provisions shall be applicable, mutatis mutandis, to utility models.

B.—

The protection of industrial designs shall not, under any circumstance, be subject to any forfeiture, either by reason of failure to work or by reason of the importation of articles corresponding to those which are protected.

C.—

(1) If, in any country, use of the registered mark is compulsory, the registration may be cancelled only after a reasonable period, and then only if the person concerned does not justify his inaction.

(2) Use of a trademark by the proprietor in a form differing in elements which do not alter the distinctive character of the mark in the form in which it was registered in one of the countries of the Union shall not entail invalidation of the registration and shall not diminish the protection granted to the mark.

(3) Concurrent use of the same mark on identical or similar goods by industrial or commercial establishments considered as co-proprietors of the mark according to the provisions of the domestic law of the country where protection is claimed shall not prevent registration or diminish in any way the protection granted to the said mark in any country of the Union, provided that such use does not result in misleading the public and is not contrary to the public interest.

D.—

No indication or mention of the patent, of the utility model, of the registration of the trademark, or of the deposit of the industrial design, shall be required upon the goods as a condition of recognition of the right to protection.

Article 5*bis*
[*All Industrial Property Rights:* Period of Grace for the Payment of Fees for the Maintenance of Rights; *Patents:* Restoration]

(1) A period of grace of not less than six months shall be allowed for the payment of the fees prescribed for the maintenance of industrial property rights, subject, if the domestic legislation so provides, to the payment of a surcharge.

(2) The countries of the Union shall have the right to provide for the restoration of patents which have lapsed by reason of non-payment of fees.

Article 5*ter*
[*Patents:* Patented Devices Forming Part of Vessels, Aircraft, or Land Vehicles]

In any country of the Union the following shall not be considered as infringements of the rights of a patentee:

1. the use on board vessels of other countries of the Union of devices forming the subject of his patent in the body of the vessel, in the machinery, tackle, gear and other accessories, when such vessels temporarily or accidentally enter the waters of the said country, provided that such devices are used there exclusively for the needs of the vessel;

2. the use of devices forming the subject of the patent in the construction or operation of aircraft or land vehicles of other countries of the Union, or of accessories of such aircraft or land vehicles, when those aircraft or land vehicles temporarily or accidentally enter the said country.

Article 5*quater*
[*Patents:* Importation of Products Manufactured by a Process Patented in the Importing Country]

When a product is imported into a country of the Union where there exists a patent protecting a process of manufacture of the said product, the patentee shall have all the rights, with regard to the imported product, that are accorded to him by the legislation of the country of importation, on the basis of the process patent, with respect to products manufactured in that country.

Article 5*quinquies*
[*Industrial Designs*]

Industrial designs shall be protected in all the countries of the Union.

Article 6
[*Marks:* Conditions of Registration; Independence of Protection of Same Mark in Different Countries]

(1) The conditions for the filing and registration of trademarks shall be determined in each country of the Union by its domestic legislation.

(2) However, an application for the registration of a mark filed by a national of a country of the Union in any country of the Union may not be refused, nor may a registration be invalidated, on the ground that filing, registration, or renewal, has not been effected in the country of origin.

(3) A mark duly registered in a country of the Union shall be regarded as independent of marks registered in the other countries of the Union, including the country of origin.

Article 6*bis*
[*Marks:* Well–Known Marks]

(1) The countries of the Union undertake, ex officio if their legislation so permits, or at the request of an interested party, to refuse or to cancel the registration, and to prohibit the use, of a trademark which constitutes a reproduction, an imitation, or a translation, liable to create confusion, of a mark considered by the competent authority of the country of registration or use to be well known in that country as being already the mark of a person entitled to the benefits of this Convention and used for identical or similar goods. These provisions shall also apply when the essential part of the mark constitutes a reproduction of any such well–known mark or an imitation liable to create confusion therewith.

(2) A period of at least five years from the date of registration shall be allowed for requesting the cancellation of such a mark. The countries of the Union may provide for a period within which the prohibition of use must be requested.

(3) No time limit shall be fixed for requesting the cancellation or the prohibition of the use of marks registered or used in bad faith.

Article 6*ter*
[*Marks:* Prohibitions concerning State Emblems, Official Hallmarks, and Emblems of Intergovernmental Organizations]

(1)

(a) The countries of the Union agree to refuse or to invalidate the registration, and to prohibit by appropriate measures the use, without authorization by the competent authorities, either as trademarks or as elements of trademarks, of armorial bearings, flags, and other State emblems, of the countries of the Union, official signs and hallmarks indicating control and warranty adopted by them, and any imitation from a heraldic point of view.

(b) The provisions of subparagraph *(a)*, above, shall apply equally to armorial bearings, flags, other emblems, abbreviations, and names, of international intergovernmental organizations of which one or more countries of the Union are members, with the exception of armorial bearings, flags, other emblems, abbreviations, and names, that are already the subject of international agreements in force, intended to ensure their protection.

(c) No country of the Union shall be required to apply the provisions of subparagraph *(b)*, above, to the prejudice of the owners of rights acquired in good faith before the entry into force, in that country, of this Convention. The countries of the Union shall not be required to apply the said provisions when the use or registration referred to in subparagraph *(a)*, above, is not of such a nature as to suggest to the public that a connection exists between the organization concerned and the armorial bearings, flags, emblems, abbreviations, and names, or if such use or registration is probably not of such a nature as to mislead the public as to the existence of a connection between the user and the organization.

(2) Prohibition of the use of official signs and hallmarks indicating control and warranty shall apply solely in cases where the marks in which they are incorporated are intended to be used on goods of the same or a similar kind.

(3)

(a) For the application of these provisions, the countries of the Union agree to communicate reciprocally, through the intermediary of the International Bureau, the list of State emblems, and official signs and hallmarks indicating control and warranty, which they desire, or may hereafter desire, to place wholly or within certain limits under the protection of this Article, and all subsequent modifications of such list. Each country of the Union shall in due course make available to the public the lists so communicated. Nevertheless such communication is not obligatory in respect of flags of States.

(b) The provisions of subparagraph *(b)* of paragraph (1) of this Article shall apply only to such armorial bearings, flags, other emblems, abbreviations, and names, of international intergovernmental organizations as the latter have communicated to the countries of the Union through the intermediary of the International Bureau.

(4) Any country of the Union may, within a period of twelve months from the receipt of the notification, transmit its objections, if any, through the intermediary of the International Bureau, to the country or international intergovernmental organization concerned.

(5) In the case of State flags, the measures prescribed by paragraph (1), above, shall apply solely to marks registered after November 6, 1925.

(6) In the case of State emblems other than flags, and of official signs and hallmarks of the countries of the Union, and in the case of armorial bearings, flags, other emblems. abbreviations, and names, of international intergovernmental organizations, these provisions shall apply only to marks registered more than two months after receipt of the communication provided for in paragraph (3), above.

(7) In cases of bad faith, the countries shall have the right to cancel even those marks incorporating State emblems, signs, and hallmarks, which were registered before November 6, 1925.

(8) Nationals of any country who are authorized to make use of the State emblems, signs, and hallmarks, of

their country may use them even if they are similar to those of another country.

(9) The countries of the Union undertake to prohibit the unauthorized use in trade of the State armorial bearings of the other countries of the Union, when the use is of such a nature as to be misleading as to the origin of the goods.

(10) The above provisions shall not prevent the countries from exercising the right given in paragraph (3) of Article 6*quinquies*, Section B, to refuse or to invalidate the registration of marks incorporating, without authorization, armorial bearings, flags, other State emblems, or official signs and hallmarks adopted by a country of the Union, as well as the distinctive signs of international intergovernmental organizations referred to in paragraph (1), above.

Article 6*quater*
[*Marks:* Assignment of Marks]

(1) When, in accordance with the law of a country of the Union, the assignment of a mark is valid only if it takes place at the same time as the transfer of the business or goodwill to which the mark belongs, it shall suffice for the recognition of such validity that the portion of the business or goodwill located in that country be transferred to the assignee, together with the exclusive right to manufacture in the said country, or to sell therein, the goods bearing the mark assigned.

(2) The foregoing provision does not impose upon the countries of the Union any obligation to regard as valid the assignment of any mark the use of which by the assignee would, in fact, be of such a nature as to mislead the public, particularly as regards the origin, nature, or essential qualities, of the goods to which the mark is applied.

Article 6*quinquies*
[*Marks:* Protection of Marks Registered in One Country of the Union in the Other Countries of the Union]

A.—

(1) Every trademark duly registered in the country of origin shall be accepted for filing and protected as is in the other countries of the Union, subject to the reservations indicated in this Article. Such countries may, before proceeding to final registration, require the production of a certificate of registration in the country of origin, issued by the competent authority. No authentication shall be required for this certificate.

(2) Shall be considered the country of origin the country of the Union where the applicant has a real and effective industrial or commercial establishment, or, if he has no such establishment within the Union, the country of the Union where he has his domicile, or, if he has no domicile within the Union but is a national of a country of the Union, the country of which he is a national.

B.—

Trademarks covered by this Article may be neither denied registration nor invalidated except in the following cases:

1. when they are of such a nature as to infringe rights acquired by third parties in the country where protection is claimed;

2. when they are devoid of any distinctive character, or consist exclusively of signs or indications which may serve, in trade, to designate the kind, quality, quantity, intended purpose, value, place of origin, of the goods, or the time of production, or have become customary in the current language or in the bona fide and established practices of the trade of the country where protection is claimed;

3. when they are contrary to morality or public order and, in particular, of such a nature as to deceive the public. It is understood that a mark may not be considered contrary to public order for the sole reason that it does not conform to a provision of the legislation on marks, except if such provision itself relates to public order.

This provision is subject, however, to the application of Article 10*bis*.

C.—

(1) In determining whether a mark is eligible for protection, all the factual circumstances must be taken into consideration, particularly the length of time the mark has been in use.

(2) No trademark shall be refused in the other countries of the Union for the sole reason that it differs from the mark protected in the country of origin only in respect of elements that do not alter its distinctive character and do not affect its identity in the form in which it has been registered in the said country of origin.

D.—

No person may benefit from the provisions of this Article if the mark for which he claims protection is not registered in the country of origin.

E.—

However, in no case shall the renewal of the registration of the mark in the country of origin involve an obligation to renew the registration in the other countries of the Union in which the mark has been registered.

F.—

The benefit of priority shall remain unaffected for applications for the registration of marks filed within the period fixed by Article 4, even if registration in the country of origin is effected after the expiration of such period.

Article 6*sexies*
[*Marks:* Service Marks]

The countries of the Union undertake to protect service marks. They shall not be required to provide for the registration of such marks.

Article 6*septies*
[*Marks:* Registration in the Name of the Agent or Representative of the Proprietor Without the Latter's Authorization]

(1) If the agent or representative of the person who is the proprietor of a mark in one of the countries of the Union applies, without such proprietor's authorization, for the registration of the mark in his own name, in one or more countries of the Union, the proprietor shall be entitled to oppose the registration applied for or demand its cancellation or, if the law of the country so allows, the assignment in his favor of the said registration, unless such agent or representative justifies his action.

(2) The proprietor of the mark shall, subject to the provisions of paragraph (1), above, be entitled to oppose the use of his mark by his agent or representative if he has not authorized such use.

(3) Domestic legislation may provide an equitable time limit within which the proprietor of a mark must exercise the rights provided for in this Article.

Article 7
[*Marks:* Nature of the Goods to which the Mark is Applied]

The nature of the goods to which a trademark is to be applied shall in no case form an obstacle to the registration of the mark.

Article 7*bis*
[*Marks:* Collective Marks]

(1) The countries of the Union undertake to accept for filing and to protect collective marks belonging to associations the existence of which is not contrary to the law of the country of origin, even if such associations do not possess an industrial or commercial establishment.

(2) Each country shall be the judge of the particular conditions under which a collective mark shall be protected and may refuse protection if the mark is contrary to the public interest.

(3) Nevertheless, the protection of these marks shall not be refused to any association the existence of which is not contrary to the law of the country of origin, on the ground that such association is not established in the country where protection is sought or is not constituted according to the law of the latter country.

Article 8
[*Trade Names*]

A trade name shall be protected in all the countries of the Union without the obligation of filing or registration, whether or not it forms part of a trademark.

Article 9
[*Marks, Trade Names:* Seizure, on Importation, etc., of Goods Unlawfully Bearing a Mark or Trade Name]

(1) All goods unlawfully bearing a trademark or trade name shall be seized on importation into those countries of the Union where such mark or trade name is entitled to legal protection.

(2) Seizure shall likewise be effected in the country where the unlawful affixation occurred or in the country into which the goods were imported.

(3) Seizure shall take place at the request of the public prosecutor, or any other competent authority, or any interested party, whether a natural person or a legal entity, in conformity with the domestic legislation of each country.

(4) The authorities shall not be bound to effect seizure of goods in transit.

(5) If the legislation of a country does not permit seizure on importation, seizure shall be replaced by prohibition of importation or by seizure inside the country.

(6) If the legislation of a country permits neither seizure on importation nor prohibition of importation nor seizure inside the country, then, until such time as the legislation is modified accordingly, these measures shall be replaced by the actions and remedies available in such cases to nationals under the law of such country.

Article 10
[*False Indications:* Seizure, on Importation, etc., of Goods Bearing False Indications as to their Source or the Identity of the Producer]

(1) The provisions of the preceding Article shall apply in cases of direct or indirect use of a false indication of the source of the good or the identity of the producer, manufacturer, or merchant.

(2) Any producer, manufacturer, or merchant, whether a natural person or a legal entity, engaged in the production or manufacture of or trade in such goods and established either in the locality falsely indicated as the source, or in the region where such locality is situated, or in the country falsely indicated, or in the country where the false indication of source is used, shall in any case be deemed an interested party.

Article 10*bis*
[*Unfair Competition*]

(1) The countries of the Union are bound to assure to nationals of such countries effective protection against unfair competition.

(2) Any act of competition contrary to honest practices in industrial or commercial matters constitutes an act of unfair competition.

(3) The following in particular shall be prohibited:

1. all acts of such a nature as to create confusion by any means whatever with the establishment, the goods, or the industrial or commercial activities, of a competitor;

2. false allegations in the course of trade of such a nature as to discredit the establishment, the goods, or the industrial or commercial activities, of a competitor;

3. indications or allegations the use of which in the course of trade is liable to mislead the public as to the nature, the manufacturing process, the characteristics, the suitability for their purpose, or the quantity, of the goods.

Article 10*ter*
[*Marks, Trade Names, False Indications, Unfair Competition:* Remedies, Right to Sue]

(1) The countries of the Union undertake to assure to nationals of the other countries of the Union appropriate legal remedies effectively to repress all the acts referred to in Articles 9, 10, and 10*bis*.

(2) They undertake, further, to provide measures to permit federations and associations representing interested industrialists, producers, or merchants, provided that the existence of such federations and associations is not contrary to the laws of their countries, to take action in the courts or before the administrative authorities, with a view to the repression of the acts referred to in Articles 9, 10 and 10*bis*, in so far as the law of the country in which protection is claimed allows such action by federations and associations of that country.

Article 11
[*Inventions, Utility Models, Industrial Designs, Marks:* Temporary Protection at Certain International Exhibitions]

(1) The countries of the Union shall, in conformity with their domestic legislation, grant temporary protection to patentable inventions, utility models, industrial designs, and trademarks, in respect of goods exhibited at official or officially recognized international exhibitions held in the territory of any of them.

(2) Such temporary protection shall not extend the periods provided by Article 4. If, later, the right of priority is invoked, the authorities of any country may provide that the period shall start from the date of introduction of the goods into the exhibition.

(3) Each country may require. as proof of the identity of the article exhibited and of the date of its introduction, such documentary evidence as it considers necessary.

Article 12
[Special National Industrial Property Services]

(1) Each country of the Union undertakes to establish a special industrial property service and a central office for the communication to the public of patents, utility models, industrial designs, and trademarks.

(2) This service shall publish an official periodical journal. It shall publish regularly:

(a) the names of the proprietors of patents granted, with a brief designation of the inventions patented;

(b) the reproductions of registered trademarks.

. . .

Article 19
[Special Agreements]

It is understood that the countries of the Union reserve the right to make separately between themselves special agreements for the protection of industrial property, in so far as these agreements do not contravene the provisions of this Convention.

. . .

LXXVI. TEXT OF THE PROVISIONS OF THE BERNE CONVENTION (1971) INCORPORATED BY ARTICLE 9.1 OF THE TRIPS AGREEMENT

Article 1
[*Establishment of a Union*][1]

(*footnote original*) Each Article and the Appendix have been given titles to facilitate their identification. There are no titles in the signed (English) text.

The countries to which this Convention applies constitute a Union for the protection of the rights of authors in their literary and artistic works.

Article 2

[*Protected Works:* 1. "Literary and artistic works"; 2. Possible requirement of fixation; 3. Derivative works; 4. Official texts; 5. Collections; 6. Obligation to protect; beneficiaries of protection; 7. Works of applied art and industrial designs; 8. News]

(1) The expression "literary and artistic works" shall include every production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression, such as books, pamphlets and other writings; lectures, addresses, sermons and other works of the same nature; dramatic or dramatico-musical works; choreographic works and entertainments in dumb show; musical compositions with or without words; cinematographic works to which are assimilated works expressed by a process analogous to cinematography; works of drawing, painting, architecture, sculpture, engraving and lithography; photographic works to which are assimilated works expressed by a process analogous to photography; works of applied art; illustrations, maps, plans, sketches and three-dimensional works relative to geography, topography, architecture or science.

(2) It shall, however, be a matter for legislation in the countries of the Union to prescribe that works in general or any specified categories of works shall not be protected unless they have been fixed in some material form.

(3) Translations, adaptations, arrangements of music and other alterations of a literary or artistic work shall be protected as original works without prejudice to the copyright in the original work.

(4) It shall be a matter for legislation in the countries of the Union to determine the protection to be granted to official texts of a legislative, administrative and legal nature, and to official translations of such texts.

(5) Collections of literary or artistic works such as encyclopaedias and anthologies which, by reason of the selection and arrangement of their contents, constitute intellectual creations shall be protected as such, without prejudice to the copyright in each of the works forming part of such collections.

(6) The works mentioned in this Article shall enjoy protection in all countries of the Union. This protection shall operate for the benefit of the author and his successors in title.

(7) Subject to the provisions of Article 7(4) of this Convention, it shall be a matter for legislation in the countries of the Union to determine the extent of the application of their laws to works of applied art and industrial designs and models, as well as the conditions under which such works, designs and models shall be protected. Works protected in the country of origin solely as designs and models shall be entitled in another country of the Union only to such special protection as is granted in that country to designs and models; however, if no such special protection is granted in that country, such works shall be protected as artistic works.

(8) The protection of this Convention shall not apply to news of the day or to miscellaneous facts having the character of mere items of press information.

Article 2*bis*

[*Possible Limitation of Protection of Certain Works:* 1. Certain speeches; 2. Certain uses of lectures and addresses; 3. Right to make collections of such works]

(1) It shall be a matter for legislation in the countries of the Union to exclude, wholly or in part, from the protection provided by the preceding Article political speeches and speeches delivered in the course of legal proceedings.

(2) It shall also be a matter for legislation in the countries of the Union to determine the conditions under which lectures, addresses and other works of the same nature which are delivered in public may be reproduced by the press, broadcast, communicated to the public by wire and made the subject of public communication as envisaged in Article 11*bis*(1) of this Convention, when such use is justified by the informatory purpose.

(3) Nevertheless, the author shall enjoy the exclusive right of making a collection of his works mentioned in the preceding paragraphs.

Article 3

[*Criteria of Eligibility for Protection:* 1. Nationality of author; place of publication of work; 2. Residence of author; 3. "Published" works; 4. "Simultaneously published" works]

(1) The protection of this Convention shall apply to:

(a) authors who are nationals of one of the countries of the Union, for their works, whether published or not;

(b) authors who are not nationals of one of the countries of the Union, for their works first published in one of those countries, or simultaneously in a country outside the Union and in a country of the Union.

(2) Authors who are not nationals of one of the countries of the Union but who have their habitual residence in one of them shall, for the purposes of this Convention, be assimilated to nationals of that country.

(3) The expression "published works" means works published with the consent of their authors, whatever may be the means of manufacture of the copies, provided that

the availability of such copies has been such as to satisfy the reasonable requirements of the public, having regard to the nature of the work. The performance of a dramatic, dramatico-musical, cinematographic or musical work, the public recitation of a literary work, the communication by wire or the broadcasting of literary or artistic works, the exhibition of a work of art and the construction of a work of architecture shall not constitute publication.

(4) A work shall be considered as having been published simultaneously in several countries if it has been published in two or more countries within thirty days of its first publication.

Article 4

[*Criteria of Eligibility for Protection of Cinematographic Works, Works of Architecture and Certain Artistic Works*]

The protection of this Convention shall apply, even if the conditions of Article 3 are not fulfilled, to:

(a) authors of cinematographic works the maker of which has his headquarters or habitual residence in one of the countries of the Union;

(b) authors of works of architecture erected in a country of the Union or of other artistic works incorporated in a building or other structure located in a country of the Union.

Article 5

[*Rights Guaranteed:* 1. and 2. Outside the country of origin; 3. In the country of origin; 4. "Country of origin"]

(1) Authors shall enjoy, in respect of works for which they are protected under this Convention, in countries of the Union other than the country of origin, the rights which their respective laws do now or may hereafter grant to their nationals, as well as the rights specially granted by this Convention.

(2) The enjoyment and the exercise of these rights shall not be subject to any formality; such enjoyment and such exercise shall be independent of the existence of protection in the country of origin of the work. Consequently, apart from the provisions of this Convention, the extent of protection, as well as the means of redress afforded to the author to protect his rights, shall be governed exclusively by the laws of the country where protection is claimed.

(3) Protection in the country of origin is governed by domestic law. However, when the author is not a national of the country of origin of the work for which he is protected under this Convention, he shall enjoy in that country the same rights as national authors.

(4) The country of origin shall be considered to be:

(a) in the case of works first published in a country of the Union, that country; in the case of works published simultaneously in several countries of the Union which grant different terms of protection, the country whose legislation grants the shortest term of protection;

(b) in the case of works published simultaneously in a country outside the Union and in a country of the Union, the latter country;

(c) in the case of unpublished works or of works first published in a country outside the Union, without simultaneous publication in a country of the Union, the country of the Union of which the author is a national, provided that:

(i) when these are cinematographic works the maker of which has his headquarters or his habitual residence in a country of the Union, the country of origin shall be that country, and

(ii) when these are works of architecture erected in a country of the Union or other artistic works incorporated in a building or other structure located in a country of the Union, the country of origin shall be that country.

Article 6

[*Possible Restriction of Protection in Respect of Certain Works of Nationals of Certain Countries Outside the Union:* 1. In the country of the first publication and in other countries; 2. No retroactivity; 3. Notice]

(1) Where any country outside the Union fails to protect in an adequate manner the works of authors who are nationals of one of the countries of the Union, the latter country may restrict the protection given to the works of authors who are, at the date of the first publication thereof, nationals of the other country and are not habitually resident in one of the countries of the Union. If the country of first publication avails itself of this right, the other countries of the Union shall not be required to grant to works thus subjected to special treatment a wider protection than that granted to them in the country of first publication.

(2) No restrictions introduced by virtue of the preceding paragraph shall affect the rights which an author may have acquired in respect of a work published in a country of the Union before such restrictions were put into force.

(3) The countries of the Union which restrict the grant of copyright in accordance with this Article shall give notice thereof to the Director General of the World Intellectual Property Organization (hereinafter designated as "the Director General") by a written declaration specifying the countries in regard to which protection is restricted, and the restrictions to which rights of authors

who are nationals of those countries are subjected. The Director General shall immediately communicate this declaration to all the countries of the Union.

Article 7

[*Term of Protection:* 1. Generally; 2. For cinematographic works; 3. For anonymous and pseudonymous works; 4. For photographic works and works of applied art; 5. Starting date of computation; 6. Longer terms; 7. Shorter terms; 8. Applicable law; "comparison" of terms]

(1) The term of protection granted by this Convention shall be the life of the author and fifty years after his death.

(2) However, in the case of cinematographic works, the countries of the Union may provide that the term of protection shall expire fifty years after the work has been made available to the public with the consent of the author, or, failing such an event within fifty years from the making of such a work, fifty years after the making.

(3) In the case of anonymous or pseudonymous works, the term of protection granted by this Convention shall expire fifty years after the work has been lawfully made available to the public. However, when the pseudonym adopted by the author leaves no doubt as to his identity, the term of protection shall be that provided in paragraph (1). If the author of an anonymous or pseudonymous work discloses his identity during the above-mentioned period, the term of protection applicable shall be that provided in paragraph (1). The countries of the Union shall not be required to protect anonymous or pseudonymous works in respect of which it is reasonable to presume that their author has been dead for fifty years.

(4) It shall be a matter for legislation in the countries of the Union to determine the term of protection of photographic works and that of works of applied art in so far as they are protected as artistic works; however, this term shall last at least until the end of a period of twenty-five years from the making of such a work.

(5) The term of protection subsequent to the death of the author and the terms provided by paragraphs (2), (3) and (4) shall run from the date of death or of the event referred to in those paragraphs, but such terms shall always be deemed to begin on the first of January of the year following the death or such event.

(6) The countries of the Union may grant a term of protection in excess of those provided by the preceding paragraphs.

(7) Those countries of the Union bound by the Rome Act of this Convention which grant, in their national legislation in force at the time of signature of the present Act, shorter terms of protection than those provided for in the preceding paragraphs shall have the right to maintain such terms when ratifying or acceding to the present Act.

(8) In any case, the term shall be governed by the legislation of the country where protection is claimed; however, unless the legislation of that country otherwise provides, the term shall not exceed the term fixed in the country of origin of the work.

Article 7*bis*

[*Term of Protection for Works of Joint Authorship*]

The provisions of the preceding Article shall also apply in the case of a work of joint authorship, provided that the terms measured from the death of the author shall be calculated from the death of the last surviving author.

Article 8

[*Right of Translation*]

Authors of literary and artistic works protected by this Convention shall enjoy the exclusive right of making and of authorizing the translation of their works throughout the term of protection of their rights in the original works.

Article 9

[*Right of Reproduction:* 1. Generally; 2. Possible exceptions; 3. Sound and visual recordings]

(1) Authors of literary and artistic works protected by this Convention shall have the exclusive right of authorizing the reproduction of these works, in any manner or form.

(2) It shall be a matter for legislation in the countries of the Union to permit the reproduction of such works in certain special cases, provided that such reproduction does not conflict with a normal exploitation of the work and does not unreasonably prejudice the legitimate interests of the author.

(3) Any sound or visual recording shall be considered as a reproduction for the purposes of this Convention.

Article 10

[*Certain Free Uses of Works:* 1. Quotations; 2. Illustrations for teaching; 3. Indication of source and author]

(1) It shall be permissible to make quotations from a work which has already been lawfully made available to the public, provided that their making is compatible with fair practice, and their extent does not exceed that justified by the purpose, including quotations from newspaper articles and periodicals in the form of press summaries.

(2) It shall be a matter for legislation in the countries of the Union, and for special agreements existing or

to be concluded between them, to permit the utilization, to the extent justified by the purpose, of literary or artistic works by way of illustration in publications, broadcasts or sound or visual recordings for teaching, provided such utilization is compatible with fair practice.

(3) Where use is made of works in accordance with the preceding paragraphs of this Article, mention shall be made of the source, and of the name of the author if it appears thereon.

Article 10*bis*

[*Further Possible Free Uses of Works:* 1. Of certain articles and broadcast works; 2. Of works seen or heard in connection with current events]

(1) It shall be a matter for legislation in the countries of the Union to permit the reproduction by the press, the broadcasting or the communication to the public by wire of articles published in newspapers or periodicals on current economic, political or religious topics, and of broadcast works of the same character, in cases in which the reproduction, broadcasting or such communication thereof is not expressly reserved. Nevertheless, the source must always be clearly indicated; the legal consequences of a breach of this obligation shall be determined by the legislation of the country where protection is claimed.

(2) It shall also be a matter for legislation in the countries of the Union to determine the conditions under which, for the purpose of reporting current events by means of photography, cinematography, broadcasting or communication to the public by wire, literary or artistic works seen or heard in the course of the event may, to the extent justified by the informatory purpose, be reproduced and made available to the public.

Article 11

[*Certain Rights in Dramatic and Musical Works:* 1. Right of public performance and of communication to the public of a performance; 2. In respect of translations]

(1) Authors of dramatic, dramatico-musical and musical works shall enjoy the exclusive right of authorizing:

(i) the public performance of their works, including such public performance by any means or process;

(ii) any communication to the public of the performance of their works.

(2) Authors of dramatic or dramatico-musical works shall enjoy, during the full term of their rights in the original works, the same rights with respect to translations thereof.

Article 11*bis*

[*Broadcasting and Related Rights:* 1. Broadcasting and other wireless communications, public communication of broadcast by wire or rebroadcast, public communication of broadcast by loudspeaker or analogous instruments; 2. Compulsory licences; 3. Recording; ephemeral recordings]

(1) Authors of literary and artistic works shall enjoy the exclusive right of authorizing:

(i) the broadcasting of their works or the communication thereof to the public by any other means of wireless diffusion of signs, sounds or images;

(ii) any communication to the public by wire or by rebroadcasting of the broadcast of the work, when this communication is made by an organization other than the original one;

(iii) the public communication by loudspeaker or any other analogous instrument transmitting, by signs, sounds or images, the broadcast of the work.

(2) It shall be a matter for legislation in the countries of the Union to determine the conditions under which the rights mentioned in the preceding paragraph may be exercised, but these conditions shall apply only in the countries where they have been prescribed. They shall not in any circumstances be prejudicial to the moral rights of the author, nor to his right to obtain equitable remuneration which, in the absence of agreement, shall be fixed by competent authority.

(3) In the absence of any contrary stipulation, permission granted in accordance with paragraph (1) of this Article shall not imply permission to record, by means of instruments recording sounds or images, the work broadcast. It shall, however, be a matter for legislation in the countries of the Union to determine the regulations for ephemeral recordings made by a broadcasting organization by means of its own facilities and used for its own broadcasts. The preservation of these recordings in official archives may, on the ground of their exceptional documentary character, be authorized by such legislation.

Article 11*ter*

[*Certain Rights in Literary Works:* 1. Right of public recitation and of communication to the public of a recitation; 2. In respect of translations]

(1) Authors of literary works shall enjoy the exclusive right of authorizing:

(i) the public recitation of their works, including such public recitation by any means or process;

(ii) any communication to the public of the recitation of their works.

(2) Authors of literary works shall enjoy, during the full term of their rights in the original works, the same rights with respect to translations thereof.

Article 12
[*Right of Adaptation, Arrangement and Other Alteration*]

Authors of literary or artistic works shall enjoy the exclusive right of authorizing adaptations, arrangements and other alterations of their works.

Article 13
[*Possible Limitation of the Right of Recording of Musical Works and Any Words Pertaining Thereto:* 1. Compulsory licences; 2. Transitory measures; 3. Seizure on importation of copies made without the author's permission]

(1) Each country of the Union may impose for itself reservations and conditions on the exclusive right granted to the author of a musical work and to the author of any words, the recording of which together with the musical work has already been authorized by the latter, to authorize the sound recording of that musical work, together with such words, if any; but all such reservations and conditions shall apply only in the countries which have imposed them and shall not, in any circumstances, be prejudicial to the rights of these authors to obtain equitable remuneration which, in the absence of agreement, shall be fixed by competent authority.

(2) Recordings of musical works made in a country of the Union in accordance with Article 13(3) of the Conventions signed at Rome on June 2, 1928, and at Brussels on June 26, 1948, may be reproduced in that country without the permission of the author of the musical work until a date two years after that country becomes bound by this Act.

(3) Recordings made in accordance with paragraphs (1) and (2) of this Article and imported without permission from the parties concerned into a country where they are treated as infringing recordings shall be liable to seizure.

Article 14
[*Cinematographic and Related Rights:* 1. Cinematographic adaptation and reproduction; distribution; public performance and public communication by wire of works thus adapted or reproduced; 2. Adaptation of cinematographic productions; 3. No compulsory licences]

(1) Authors of literary or artistic works shall have the exclusive right of authorizing:

(i) the cinematographic adaptation and reproduction of these works, and the distribution of the works thus adapted or reproduced;

(ii) the public performance and communication to the public by wire of the works thus adapted or reproduced.

(2) The adaptation into any other artistic form of a cinematographic production derived from literary or artistic works shall, without prejudice to the authorization of the author of the cinematographic production, remain subject to the authorization of the authors of the original works.

(3) The provisions of Article 13(1) shall not apply.

Article 14*bis*
[*Special Provisions Concerning Cinematographic Works:* 1. Assimilation to "original" works; 2. Ownership; limitation of certain rights of certain contributors; 3. Certain other contributors]

(1) Without prejudice to the copyright in any work which may have been adapted or reproduced, a cinematographic work shall be protected as an original work. The owner of copyright in a cinematographic work shall enjoy the same rights as the author of an original work, including the rights referred to in the preceding Article.

(2)

(a) Ownership of copyright in a cinematographic work shall be a matter for legislation in the country where protection is claimed.

(b) However, in the countries of the Union which, by legislation, include among the owners of copyright in a cinematographic work authors who have brought contributions to the making of the work, such authors, if they have undertaken to bring such contributions, may not, in the absence of any contrary or special stipulation, object to the reproduction, distribution, public performance, communication to the public by wire, broadcasting or any other communication to the public, or to the subtitling or dubbing of texts, of the work.

(c) The question whether or not the form of the undertaking referred to above should, for the application of the preceding subparagraph *(b)*, be in a written agreement or a written act of the same effect shall be a matter for the legislation of the country where the maker of the cinematographic work has his headquarters or habitual residence. However, it shall be a matter for the legislation of the country of the Union where protection is claimed to provide that the said undertaking shall be in a written agreement or a written act of the same effect. The countries whose legislation so provides shall notify the Director General by means of a written declaration, which will be immediately communicated by him to all the other countries of the Union.

(d) By "contrary or special stipulation" is meant any restrictive condition which is relevant to the aforesaid undertaking.

(3) Unless the national legislation provides to the contrary, the provisions of paragraph (2)*(b)* above shall not be applicable to authors of scenarios, dialogues and musical works created for the making of the cinematographic work, or to the principal director thereof. However, those countries of the Union whose legislation does not contain rules providing for the application of the said paragraph (2)*(b)* to such director shall notify the Director General by means of a written declaration, which will be immediately communicated by him to all the other countries of the Union.

Article 14*ter*

[*"Droit de suite" in Works of Art and Manuscripts:* 1. Right to an interest in resales; 2. Applicable law; 3. Procedure]

(1) The author, or after his death the persons or institutions authorized by national legislation, shall, with respect to original works of art and original manuscripts of writers and composers, enjoy the inalienable right to an interest in any sale of the work subsequent to the first transfer by the author of the work.

(2) The protection provided by the preceding paragraph may be claimed in a country of the Union only if legislation in the country to which the author belongs so permits, and to the extent permitted by the country where this protection is claimed.

(3) The procedure for collection and the amounts shall be matters for determination by national legislation.

Article 15

[*Right to Enforce Protected Rights:* 1. Where author's name is indicated or where pseudonym leaves no doubt as to author's identity; 2. In the case of cinematographic works; 3. In the case of anonymous and pseudonymous works; 4. In the case of certain unpublished works of unknown authorship]

(1) In order that the author of a literary or artistic work protected by this Convention shall, in the absence of proof to the contrary, be regarded as such, and consequently be entitled to institute infringement proceedings in the countries of the Union, it shall be sufficient for his name to appear on the work in the usual manner. This paragraph shall be applicable even if this name is a pseudonym, where the pseudonym adopted by the author leaves no doubt as to his identity.

(2) The person or body corporate whose name appears on a cinematographic work in the usual manner shall, in the absence of proof to the contrary, be presumed to be the maker of the said work.

(3) In the case of anonymous and pseudonymous works, other than those referred to in paragraph (1) above, the publisher whose name appears on the work shall, in the absence of proof to the contrary, be deemed to represent the author, and in this capacity he shall be entitled to protect and enforce the author's rights. The provisions of this paragraph shall cease to apply when the author reveals his identity and establishes his claim to authorship of the work.

(4)

(a) In the case of unpublished works where the identity of the author is unknown, but where there is every ground to presume that he is a national of a country of the Union, it shall be a matter for legislation in that country to designate the competent authority which shall represent the author and shall be entitled to protect and enforce his rights in the countries of the Union.

(b) Countries of the Union which make such designation under the terms of this provision shall notify the Director General by means of a written declaration giving full information concerning the authority thus designated. The Director General shall at once communicate this declaration to all other countries of the Union.

Article 16

[*Infringing Copies:* 1. Seizure; 2. Seizure on importation; 3. Applicable law]

(1) Infringing copies of a work shall be liable to seizure in any country of the Union where the work enjoys legal protection.

(2) The provisions of the preceding paragraph shall also apply to reproductions coming from a country where the work is not protected, or has ceased to be protected.

(3) The seizure shall take place in accordance with the legislation of each country.

Article 17

[*Possibility of Control of Circulation, Presentation and Exhibition of Works*]

The provisions of this Convention cannot in any way affect the right of the Government of each country of the Union to permit, to control, or to prohibit, by legislation or regulation, the circulation, presentation, or exhibition of any work or production in regard to which the competent authority may find it necessary to exercise that right.

Article 18

[*Works Existing on Convention's Entry Into Force:* 1. Protectable where protection not yet expired in country of origin; 2. Non-protectable where protection already expired in country where it is claimed; 3. Application of these principles; 4. Special cases]

(1) This Convention shall apply to all works which, at the moment of its coming into force, have not yet fallen into the public domain in the country of origin through the expiry of the term of protection.

(2) If, however, through the expiry of the term of protection which was previously granted, a work has fallen into the public domain of the country where protection is claimed, that work shall not be protected anew.

(3) The application of this principle shall be subject to any provisions contained in special conventions to that effect existing or to be concluded between countries of the Union. In the absence of such provisions, the respective countries shall determine, each in so far as it is concerned, the conditions of application of this principle.

(4) The preceding provisions shall also apply in the case of new accessions to the Union and to cases in which protection is extended by the application of Article 7 or by the abandonment of reservations.

Article 19

[*Protection Greater than Resulting from Convention*]

The provisions of this Convention shall not preclude the making of a claim to the benefit of any greater protection which may be granted by legislation in a country of the Union.

Article 20

[*Special Agreements Among Countries of the Union*]

The Governments of the countries of the Union reserve the right to enter into special agreements among themselves, in so far as such agreements grant to authors more extensive rights than those granted by the Convention, or contain other provisions not contrary to this Convention. The provisions of existing agreements which satisfy these conditions shall remain applicable.

Article 21

[*Special Provisions Regarding Developing Countries:* 1. Reference to Appendix; 2. Appendix part of Act]

(1) Special provisions regarding developing countries are included in the Appendix.

(2) Subject to the provisions of Article 28(1)*(b)*, the Appendix forms an integral part of this Act.

. . .

APPENDIX

[SPECIAL PROVISIONS REGARDING DEVELOPING COUNTRIES]

Article I

[*Faculties Open to Developing Countries:* 1. Availability of certain faculties; declaration; 2. Duration of effect of declaration; 3. Cessation of developing country status; 4. Existing stocks of copies; 5. Declarations concerning certain territories; 6. Limits of reciprocity]

(1) Any country regarded as a developing country in conformity with the established practice of the General Assembly of the United Nations which ratifies or accedes to this Act, of which this Appendix forms an integral part, and which, having regard to its economic situation and its social or cultural needs, does not consider itself immediately in a position to make provision for the protection of all the rights as provided for in this Act, may, by a notification deposited with the Director General at the time of depositing its instrument of ratification or accession or, subject to Article V(1)*(c)*, at any time thereafter, declare that it will avail itself of the faculty provided for in Article II, or of the faculty provided for in Article III, or of both of those faculties. It may, instead of availing itself of the faculty provided for in Article II, make a declaration according to Article V(1)*(a)*.

(2)

(a) Any declaration under paragraph (1) notified before the expiration of the period of ten years from the entry into force of Articles 1 to 21 and this Appendix according to Article 28(2) shall be effective until the expiration of the said period. Any such declaration may be renewed in whole or in part for periods of ten years each by a notification deposited with the Director General not more than fifteen months and not less than three months before the expiration of the ten-year period then running.

(b) Any declaration under paragraph (1) notified after the expiration of the period of ten years from the entry into force of Articles 1 to 21 and this Appendix according to Article 28(2) shall be effective until the expiration of the ten-year period then running. Any such declaration may be renewed as provided for in the second sentence of subparagraph (a).

(3) Any country of the Union which has ceased to be regarded as a developing country as referred to in paragraph (1) shall no longer be entitled to renew its declaration as provided in paragraph (2), and, whether or not it formally withdraws its declaration, such country shall be precluded from availing itself of the faculties referred to in paragraph (1) from the expiration of the ten-year period then running or from the expiration of a

period of three years after it has ceased to be regarded as a developing country, whichever period expires later.

(4) Where, at the time when the declaration made under paragraph (1) or (2) ceases to be effective, there are copies in stock which were made under a license granted by virtue of this Appendix, such copies may continue to be distributed until their stock is exhausted.

(5) Any country which is bound by the provisions of this Act and which has deposited a declaration or a notification in accordance with Article 31(1) with respect to the application of this Act to a particular territory, the situation of which can be regarded as analogous to that of the countries referred to in paragraph (1), may, in respect of such territory, make the declaration referred to in paragraph (1) and the notification of renewal referred to in paragraph (2). As long as such declaration or notification remains in effect, the provisions of this Appendix shall be applicable to the territory in respect of which it was made.

(6)

(a) The fact that a country avails itself of any of the faculties referred to in paragraph (1) does not permit another country to give less protection to works of which the country of origin is the former country than it is obliged to grant under Articles 1 to 20.

(b) The right to apply reciprocal treatment provided for in Article 30(2)*(b)*, second sentence, shall not, until the date on which the period applicable under Article I(3) expires, be exercised in respect of works the country of origin of which is a country which has made a declaration according to Article V(1)*(a)*.

Article II

[*Limitations on the Right of Translation:* 1. Licences grantable by competent authority; 2. to 4. Conditions allowing the grant of such licences; 5. Purposes for which licences may be granted; 6. Termination of licences; 7. Works composed mainly of illustrations; 8. Works withdrawn from circulation; 9. Licences for broadcasting organizations]

(1) Any country which has declared that it will avail itself of the faculty provided for in this Article shall be entitled, so far as works published in printed or analogous forms of reproduction are concerned, to substitute for the exclusive right of translation provided for in Article 8 a system of non-exclusive and non-transferable licenses, granted by the competent authority under the following conditions and subject to Article IV.

(2)

(a) Subject to paragraph (3), if, after the expiration of a period of three years, or of any longer period determined by the national legislation of the said country, commencing on the date of the first publication of the work, a translation of such work has not been published in a language in general use in that country by the owner of the right of translation, or with his authorization, any national of such country may obtain a license to make a translation of the work in the said language and publish the translation in printed or analogous forms of reproduction.

(b) A license under the conditions provided for in this Article may also be granted if all the editions of the translation published in the language concerned are out of print.

(3)

(a) In the case of translations into a language which is not in general use in one or more developed countries which are members of the Union, a period of one year shall be substituted for the period of three years referred to in paragraph (2)*(a)*.

(b) Any country referred to in paragraph (1) may, with the unanimous agreement of the developed countries which are members of the Union and in which the same language is in general use, substitute, in the case of translations into that language, for the period of three years referred to in paragraph (2)*(a)* a shorter period as determined by such agreement but not less than one year. However, the provisions of the foregoing sentence shall not apply where the language in question is English, French or Spanish. The Director General shall be notified of any such agreement by the Governments which have concluded it.

(4)

(a) No license obtainable after three years shall be granted under this Article until a further period of six months has elapsed, and no license obtainable after one year shall be granted under this Article until a further period of nine months has elapsed

(i) from the date on which the applicant complies with the requirements mentioned in Article IV(1), or

(ii) where the identity or the address of the owner of the right of translation is unknown, from the date on which the applicant sends, as provided for in Article IV(2), copies of his application submitted to the authority competent to grant the license.

(b) If, during the said period of six or nine months, a translation in the language in respect of which the application was made is published by the owner of the right of translation or with his authorization, no license under this Article shall be granted.

(5) Any license under this Article shall be granted only for the purpose of teaching, scholarship or research.

(6) If a translation of a work is published by the owner of the right of translation or with his authorization at a price reasonably related to that normally charged in the country for comparable works, any license granted under this Article shall terminate if such translation is in the same language and with substantially the same content as the translation published under the license. Any copies already made before the license terminates may continue to be distributed until their stock is exhausted.

(7) For works which are composed mainly of illustrations, a license to make and publish a translation of the text and to reproduce and publish the illustrations may be granted only if the conditions of Article III are also fulfilled.

(8) No license shall be granted under this Article when the author has withdrawn from circulation all copies of his work.

(9)

(a) A license to make a translation of a work which has been published in printed or analogous forms of reproduction may also be granted to any broadcasting organization having its headquarters in a country referred to in paragraph (1), upon an application made to the competent authority of that country by the said organization, provided that all of the following conditions are met:

(i) the translation is made from a copy made and acquired in accordance with the laws of the said country;

(ii) the translation is only for use in broadcasts intended exclusively for teaching or for the dissemination of the results of specialized technical or scientific research to experts in a particular profession;

(iii) the translation is used exclusively for the purposes referred to in condition (ii) through broadcasts made lawfully and intended for recipients on the territory of the said country, including broadcasts made through the medium of sound or visual recordings lawfully and exclusively made for the purpose of such broadcasts;

(iv) all uses made of the translation are without any commercial purpose.

(b) Sound or visual recordings of a translation which was made by a broadcasting organization under a license granted by virtue of this paragraph may, for the purposes and subject to the conditions referred to in subparagraph *(a)* and with the agreement of that organization, also be used by any other broadcasting organization having its headquarters in the country whose competent authority granted the license in question.

(c) Provided that all of the criteria and conditions set out in subparagraph *(a)* are met, a license may also be granted to a broadcasting organization to translate any text incorporated in an audio-visual fixation where such fixation was itself prepared and published for the sole purpose of being used in connection with systematic instructional activities.

(d) Subject to subparagraphs *(a)* to *(c)*, the provisions of the preceding paragraphs shall apply to the grant and exercise of any license granted under this paragraph.

Article III

[*Limitation on the Right of Reproduction:*
1. Licences grantable by competent authority;
2. to 5. Conditions allowing the grant of such licences; 6. Termination of licences;
7. Works to which this Article applies]

(1) Any country which has declared that it will avail itself of the faculty provided for in this Article shall be entitled to substitute for the exclusive right of reproduction provided for in Article 9 a system of non-exclusive and non-transferable licenses, granted by the competent authority under the following conditions and subject to Article IV.

(2)

(a) If, in relation to a work to which this Article applies by virtue of paragraph (7), after the expiration of

(i) the relevant period specified in paragraph (3), commencing on the date of first publication of a particular edition of the work, or

(ii) any longer period determined by national legislation of the country referred to in paragraph (1), commencing on the same date,

copies of such edition have not been distributed in that country to the general public or in connection with systematic instructional activities, by the owner of the right of reproduction or with his authorization, at a price reasonably related to that normally charged in the country for comparable works, any national of such country may obtain a license to reproduce and publish such edition at that or a lower price for use in connection with systematic instructional activities.

(b) A license to reproduce and publish an edition which has been distributed as described in subparagraph *(a)* may also be granted under the conditions provided for in this Article if, after the expiration of the applicable period, no authorized copies of that edition have been on sale for a period

of six months in the country concerned to the general public or in connection with systematic instructional activities at a price reasonably related to that normally charged in the country for comparable works.

(3) The period referred to in paragraph (2)*(a)(i)* shall be five years, except that

(i) for works of the natural and physical sciences, including mathematics, and of technology, the period shall be three years;

(ii) for works of fiction, poetry, drama and music, and for art books, the period shall be seven years.

(4)

(a) No license obtainable after three years shall be granted under this Article until a period of six months has elapsed

(i) from the date on which the applicant complies with the requirements mentioned in Article IV(1), or

(ii) where the identity or the address of the owner of the right of reproduction is unknown, from the date on which the applicant sends, as provided for in Article IV(2), copies of his application submitted to the authority competent to grant the license.

(b) Where licenses are obtainable after other periods and Article IV(2) is applicable, no license shall be granted until a period of three months has elapsed from the date of the dispatch of the copies of the application.

(c) If, during the period of six or three months referred to in subparagraphs *(a)* and *(b)*, a distribution as described in paragraph (2)*(a)* has taken place, no license shall be granted under this Article.

(d) No license shall be granted if the author has withdrawn from circulation all copies of the edition for the reproduction and publication of which the license has been applied for.

(5) A license to reproduce and publish a translation of a work shall not be granted under this Article in the following cases:

(i) where the translation was not published by the owner of the right of translation or with his authorization, or

(ii) where the translation is not in a language in general use in the country in which the license is applied for.

(6) If copies of an edition of a work are distributed in the country referred to in paragraph (1) to the general public or in connection with systematic instructional activities, by the owner of the right of reproduction or with his authorization, at a price reasonably related to that normally charged in the country for comparable works, any license granted under this Article shall terminate if such edition is in the same language and with substantially the same content as the edition which was published under the said license. Any copies already made before the license terminates may continue to be distributed until their stock is exhausted.

(7)

(a) Subject to subparagraph *(b)*, the works to which this Article applies shall be limited to works published in printed or analogous forms of reproduction.

(b) This Article shall also apply to the reproduction in audio-visual form of lawfully made audio-visual fixations including any protected works incorporated therein and to the translation of any incorporated text into a language in general use in the country in which the license is applied for, always provided that the audio-visual fixations in question were prepared and published for the sole purpose of being used in connection with systematic instructional activities.

Article IV

[*Provisions Common to Licences Under Articles II and III:* 1 and 2. Procedure; 3. Indication of author and title of work; 4. Exportation of copies; 5. Notice; 6. Compensation]

(1) A license under Article II or Article III may be granted only if the applicant, in accordance with the procedure of the country concerned, establishes either that he has requested, and has been denied, authorization by the owner of the right to make and publish the translation or to reproduce and publish the edition, as the case may be, or that, after due diligence on his part, he was unable to find the owner of the right. At the same time as making the request, the applicant shall inform any national or international information center referred to in paragraph (2).

(2) If the owner of the right cannot be found, the applicant for a license shall send, by registered airmail, copies of his application, submitted to the authority competent to grant the license, to the publisher whose name appears on the work and to any national or international information center which may have been designated, in a notification to that effect deposited with the Director General, by the Government of the country in which the publisher is believed to have his principal place of business.

(3) The name of the author shall be indicated on all copies of the translation or reproduction published under a license granted under Article II or Article III. The title of the work shall appear on all such copies. In the

case of a translation, the original title of the work shall appear in any case on all the said copies.

(4)

(a) No license granted under Article II or Article III shall extend to the export of copies, and any such license shall be valid only for publication of the translation or of the reproduction, as the case may be, in the territory of the country in which it has been applied for.

(b) For the purposes of subparagraph *(a)*, the notion of export shall include the sending of copies from any territory to the country which, in respect of that territory, has made a declaration under Article I(5).

(c) Where a governmental or other public entity of a country which has granted a license to make a translation under Article II into a language other than English, French or Spanish sends copies of a translation published under such license to another country, such sending of copies shall not, for the purposes of subparagraph *(a)*, be considered to constitute export if all of the following conditions are met:

(i) the recipients are individuals who are nationals of the country whose competent authority has granted the license, or organizations grouping such individuals;

(ii) the copies are to be used only for the purpose of teaching, scholarship or research;

(iii) the sending of the copies and their subsequent distribution to recipients is without any commercial purpose; and

(iv) the country to which the copies have been sent has agreed with the country whose competent authority has granted the license to allow the receipt, or distribution, or both, and the Director General has been notified of the agreement by the Government of the country in which the license has been granted.

(5) All copies published under a license granted by virtue of Article II or Article III shall bear a notice in the appropriate language stating that the copies are available for distribution only in the country or territory to which the said license applies.

(6)

(a) Due provision shall be made at the national level to ensure

(i) that the license provides, in favor of the owner of the right of translation or of reproduction, as the case may be, for just compensation that is consistent with standards of royalties normally operating on licenses freely negotiated between persons in the two countries concerned, and

(ii) payment and transmittal of the compensation: should national currency regulations intervene, the competent authority shall make all efforts, by the use of international machinery, to ensure transmittal in internationally convertible currency or its equivalent.

(b) Due provision shall be made by national legislation to ensure a correct translation of the work, or an accurate reproduction of the particular edition, as the case may be.

Article V

[*Alternative Possibility for Limitation of the Right of Translation:* 1. Regime provided for under the 1886 and 1896 Acts; 2. No possibility of change to regime under Article II; 3. Time limit for choosing the alternative possibility]

(1)

(a) Any country entitled to make a declaration that it will avail itself of the faculty provided for in Article II may, instead, at the time of ratifying or acceding to this Act:

(i) if it is a country to which Article 30(2)*(a)* applies, make a declaration under that provision as far as the right of translation is concerned;

(ii) if it is a country to which Article 30(2)*(a)* does not apply, and even if it is not a country outside the Union, make a declaration as provided for in Article 30(2)*(b)*, first sentence.

(b) In the case of a country which ceases to be regarded as a developing country as referred to in Article I(1), a declaration made according to this paragraph shall be effective until the date on which the period applicable under Article I(3) expires.

(c) Any country which has made a declaration according to this paragraph may not subsequently avail itself of the faculty provided for in Article II even if it withdraws the said declaration.

(2) Subject to paragraph (3), any country which has availed itself of the faculty provided for in Article II may not subsequently make a declaration according to paragraph (1).

(3) Any country which has ceased to be regarded as a developing country as referred to in Article I(1) may, not later than two years prior to the expiration of the period applicable under Article I(3), make a declaration to the effect provided for in Article 30(2)*(b)*, first sentence, notwithstanding the fact that it is not a country outside the Union. Such declaration shall take effect at the date on which the period applicable under Article I(3) expires.

Article VI

[*Possibilities of applying, or admitting the application of, certain provisions of the Appendix before becoming bound by it:* 1. Declaration; 2. Depository and effective date of declaration]

(1) Any country of the Union may declare, as from the date of this Act, and at any time before becoming bound by Articles 1 to 21 and this Appendix:

(i) if it is a country which, were it bound by Articles 1 to 21 and this Appendix, would be entitled to avail itself of the faculties referred to in Article I(1), that it will apply the provisions of Article II or of Article III or of both to works whose country of origin is a country which, pursuant to (ii) below, admits the application of those Articles to such works, or which is bound by Articles 1 to 21 and this Appendix; such declaration may, instead of referring to Article II, refer to Article V;

(ii) that it admits the application of this Appendix to works of which it is the country of origin by countries which have made a declaration under (i) above or a notification under Article I.

(2) Any declaration made under paragraph (1) shall be in writing and shall be deposited with the Director General. The declaration shall become effective from the date of its deposit.

LXXVII. TEXT OF THE PROVISIONS OF THE IPIC TREATY INCORPORATED BY ARTICLE 35 OF THE TRIPS AGREEMENT

. . .

Article 2
Definitions

For the purposes of this Treaty:

(i) "integrated circuit" means a product, in its final form or an intermediate form, in which the elements, at least one of which is an active element, and some or all of the interconnections are integrally formed in and/or on a piece of material and which is intended to perform an electronic function,

(ii) "layout-design (topography)" means the three-dimensional disposition, however expressed, of the elements, at least one of which is an active element, and of some or all of the interconnections of an integrated circuit, or such a three-dimensional disposition prepared for an integrated circuit intended for manufacture,

(iii) "holder of the right" means the natural person who, or the legal entity which, according to the applicable law, is to be regarded as the beneficiary of the protection referred to in Article 6,

(iv) "protected layout-design (topography)" means a layout-design (topography) in respect of which the conditions of protection referred to in this Treaty are fulfilled,

(v) "Contracting Party" means a State, or an Intergovernmental Organization meeting the requirements of item *(x)*, party to this Treaty,

(vi) "territory of a Contracting Party" means, where the Contracting Party is a State, the territory of that State and, where the Contracting Party is an Intergovernmental Organization, the territory in which the constituting treaty of that Intergovernmental Organization applies,

(vii) "Union" means the Union referred to in Article 1,

(viii) "Assembly" means the Assembly referred to in Article 9,

(ix) "Director General" means the Director General of the World Intellectual Property Organization,

(x) "Intergovernmental Organization" means an organization constituted by, and composed of, States of any region of the world, which has competence in respect of matters governed by this Treaty, has its own legislation providing for intellectual property protection in respect of layout-designs (topographies) and binding on all its member States, and has been duly authorized, in accordance with its internal procedures, to sign, ratify, accept, approve or accede to this Treaty.

Article 3
The Subject Matter of the Treaty

(1) *[Obligation to Protect Layout-Designs (Topographies)]*

(a) Each Contracting Party shall have the obligation to secure, throughout its territory, intellectual property protection in respect of layout-designs (topographies) in accordance with this Treaty. It shall, in particular, secure adequate measures to ensure the prevention of acts considered unlawful under Article 6 and appropriate legal remedies where such acts have been committed.

(b) The right of the holder of the right in respect of an integrated circuit applies whether or not the integrated circuit is incorporated in an article.

(c) Notwithstanding Article 2*(i)*, any Contracting Party whose law limits the protection of layout-designs (topographies) to layout-designs (topographies) of semiconductor integrated circuits shall be

free to apply that limitation as long as its law contains such limitation.

(2) *[Requirement of Originality]*

(a) The obligation referred to in paragraph (1)*(a)* shall apply to layout-designs (topographies) that are original in the sense that they are the result of their creators' own intellectual effort and are not commonplace among creators of layout-designs (topographies) and manufacturers of integrated circuits at the time of their creation.

(b) A layout-design (topography) that consists of a combination of elements and interconnections that are commonplace shall be protected only if the combination, taken as a whole, fulfills the conditions referred to in subparagraph *(a)*.

Article 4
The Legal Form of the Protection

Each Contracting Party shall be free to implement its obligations under this Treaty through a special law on layout-designs (topographies) or its law on copyright, patents, utility models, industrial designs, unfair competition or any other law or a combination of any of those laws.

Article 5
National Treatment

(1) *[National Treatment]*

Subject to compliance with its obligation referred to in Article 3(1)*(a)*, each Contracting Party shall, in respect of the intellectual property protection of layout-designs (topographies), accord, within its territory,

(i) to natural persons who are nationals of, or are domiciled in the territory of, any of the other Contracting Parties, and

(ii) to legal entities which or natural persons who, in the territory of any of the other Contracting Parties, have a real and effective establishment for the creation of layout-designs (topographies) or the production of integrated circuits,

the same treatment that it accords to its own nationals.

(2) *[Agents, Addresses for Service, Court Proceedings]*

Notwithstanding paragraph (1), any Contracting Party is free not to apply national treatment as far as any obligations to appoint an agent or to designate an address for service are concerned or as far as the special rules applicable to foreigners in court proceedings are concerned.

(3) *[Application of Paragraphs (1) and (2) to Intergovernmental Organizations]*

Where the Contracting Party is an Intergovernmental Organization, "nationals" in paragraph (1) means nationals of any of the States members of that Organization.

Article 6
The Scope of the Protection

(1) *[Acts Requiring the Authorization of the Holder of the Right]*

(a) Any Contracting Party shall consider unlawful the following acts if performed without the authorization of the holder of the right:

(i) the act of reproducing, whether by incorporation in an integrated circuit or otherwise, a protected layout-design (topography) in its entirety or any part thereof, except the act of reproducing any part that does not comply with the requirement of originality referred to in Article 3(2),

(ii) the act of importing, selling or otherwise distributing for commercial purposes a protected layout-design (topography) or an integrated circuit in which a protected layout-design (topography) is incorporated.

(b) Any Contracting Party shall be free to consider unlawful also acts other than those specified in subparagraph (a) if performed without the authorization of the holder of the right.

(2) *[Acts Not Requiring the Authorization of the Holder of the Right]*

(a) Notwithstanding paragraph (1), no Contracting Party shall consider unlawful the performance, without the authorization of the holder of the right, of the act of reproduction referred to in paragraph (1)*(a)(i)* where that act is performed by a third party for private purposes or for the sole purpose of evaluation, analysis, research or teaching.

(b) Where the third party referred to in subparagraph *(a)*, on the basis of evaluation or analysis of the protected layout-design (topography) ("the first layout-design (topography)"), creates a layout-design (topography) complying with the requirement of originality referred to in Article 3(2) ("the second layout-design (topography)"), that third party may incorporate the second layout-design (topography) in an integrated circuit or perform any of the acts referred to in paragraph (1) in respect of the second layout-design (topography) without being regarded as infringing the rights of the holder of the right in the first layout-design (topography).

(c) The holder of the right may not exercise his right in respect of an identical original layout-design (topography) that was independently created by a third party.

. . .

(4) *[Sale and Distribution of Infringing Integrated Circuits Acquired Innocently]*

Notwithstanding paragraph (1)*(a)*(ii), no Contracting Party shall be obliged to consider unlawful the performance of any of the acts referred to in that paragraph in respect of an integrated circuit incorporating an unlawfully reproduced layout-design (topography) where the person performing or ordering such acts did not know and had no reasonable ground to know, when acquiring the said integrated circuit, that it incorporates an unlawfully reproduced layout-design (topography).

(5) *[Exhaustion of Rights]*

Notwithstanding paragraph (1)*(a)*(ii), any Contracting Party may consider lawful the performance, without the authorization of the holder of the right, of any of the acts referred to in that paragraph where the act is performed in respect of a protected layout-design (topography), or in respect of an integrated circuit in which such a layout-design (topography) is incorporated, that has been put on the market by, or with the consent of, the holder of the right.

Article 7
Exploitation; Registration, Disclosure

(1) *[Faculty to Require Exploitation]*

Any Contracting Party shall be free not to protect a layout-design (topography) until it has been ordinarily commercially exploited, separately or as incorporated in an integrated circuit, somewhere in the world.

(2) *[Faculty to Require Registration; Disclosure]*

(a) Any Contracting Party shall be free not to protect a layout-design (topography) until the layout-design (topography) has been the subject of an application for registration, filed in due form with the competent public authority, or of a registration with that authority; it may be required that the application be accompanied by the filing of a copy or drawing of the layout-design (topography) and, where the integrated circuit has been commercially exploited, of a sample of that integrated circuit, along with information defining the electronic function which the integrated circuit is intended to perform; however, the applicant may exclude such parts of the copy or drawing that relate to the manner of manufacture of the integrated circuit, provided that the parts submitted are sufficient to allow the identification of the layout-design (topography).

(b) Where the filing of an application for registration according to subparagraph *(a)* is required, the Contracting Party may require that such filing be effected within a certain period of time from the date on which the holder of the right first exploits ordinarily commercially anywhere in the world the layout-design (topography) of an integrated circuit; such period shall not be less than two years counted from the said date.

(c) Registration under subparagraph *(a)* may be subject to the payment of a fee.

. . .

Article 12
Safeguard of Paris and Berne Conventions

This Treaty shall not affect the obligations that any Contracting Party may have under the Paris Convention for the Protection of Industrial Property or the Berne Convention for the Protection of Literary and Artistic Works.

. . .

Article 16
Entry Into Force of the Treaty

. . .

(3) *[Protection of Layout-Designs (Topographies) Existing at Time of Entry Into Force]*

Any Contracting Party shall have the right not to apply this Treaty to any layout-design (topography) that exists at the time this Treaty enters into force in respect of that Contracting Party, provided that this provision does not affect any protection that such layout-design (topography) may, at that time, enjoy in the territory of that Contracting Party by virtue of international obligations other than those resulting from this Treaty or the legislation of the said Contracting Party.

. . .

LXXVIII. TEXT OF THE DECLARATION ON THE TRIPS AGREEMENT AND PUBLIC HEALTH[149]

1. We recognize the gravity of the public health problems afflicting many developing and least-developed countries, especially those resulting from HIV/AIDS, tuberculosis, malaria and other epidemics.

2. We stress the need for the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement) to be part of the wider national and international action to address these problems.

3. We recognize that intellectual property protection is important for the development of new medicines. We also recognize the concerns about its effects on prices.

4. We agree that the TRIPS Agreement does not and should not prevent Members from taking measures to protect public health. Accordingly, while reiterating our

[149] Adopted by the Fourth Session of the WTO Ministerial Conference at Doha on 14 November 2001.

commitment to the TRIPS Agreement, we affirm that the Agreement can and should be interpreted and implemented in a manner supportive of WTO Members' right to protect public health and, in particular, to promote access to medicines for all.

In this connection, we reaffirm the right of WTO Members to use, to the full, the provisions in the TRIPS Agreement, which provide flexibility for this purpose.

5. Accordingly and in the light of paragraph 4 above, while maintaining our commitments in the TRIPS Agreement, we recognize that these flexibilities include:

(a) In applying the customary rules of interpretation of public international law, each provision of the TRIPS Agreement shall be read in the light of the object and purpose of the Agreement as expressed, in particular, in its objectives and principles.

(b) Each Member has the right to grant compulsory licences and the freedom to determine the grounds upon which such licences are granted.

(c) Each Member has the right to determine what constitutes a national emergency or other circumstances of extreme urgency, it being understood that public health crises, including those relating to HIV/AIDS, tuberculosis, malaria and other epidemics, can represent a national emergency or other circumstances of extreme urgency.

(d) The effect of the provisions in the TRIPS Agreement that are relevant to the exhaustion of intellectual property rights is to leave each Member free to establish its own regime for such exhaustion without challenge, subject to the MFN and national treatment provisions of Articles 3 and 4.

6. We recognize that WTO Members with insufficient or no manufacturing capacities in the pharmaceutical sector could face difficulties in making effective use of compulsory licensing under the TRIPS Agreement. We instruct the Council for TRIPS to find an expeditious solution to this problem and to report to the General Council before the end of 2002.

7. We reaffirm the commitment of developed-country Members to provide incentives to their enterprises and institutions to promote and encourage technology transfer to least-developed country Members pursuant to Article 66.2. We also agree that the least-developed country Members will not be obliged, with respect to pharmaceutical products, to implement or apply Sections 5 and 7 of Part II of the TRIPS Agreement or to enforce rights provided for under these Sections until 1 January 2016, without prejudice to the right of least-developed country Members to seek other extensions of the transition periods as provided for in Article 66.1 of the TRIPS Agreement. We instruct the Council for TRIPS to take the necessary action to give effect to this pursuant to Article 66.1 of the TRIPS Agreement.

(c) Article 4.7 of the SCM Agreement 1109

II. ARTICLE 2 1109
A. TEXT OF ARTICLE 2 1109
B. INTERPRETATION AND APPLICATION OF ARTICLE 2 1109
1. General 1109
2. Rules of procedure for DSB meetings 1110
3. Date of circulation 1110
4. Communications with the DSB 1110
5. Time-periods 1110
6. Rules of conduct 1110
7. Negotiations on the amendment of the DSU 1110

III. ARTICLE 3 1110
A. TEXT OF ARTICLE 3 1110
B. INTERPRETATION AND APPLICATION OF ARTICLE 3 1111
1. Article 3.2 1111
(a) "security and predictability" 1111
(b) "clarify the existing provisions" 1112
(c) "customary rules of interpretation of public international law" 1112
(i) Rules of "interpretation" 1112
(ii) Article 31 of the Vienna Convention: general rule of interpretation 1112
(iii) Article 31(3)(b) of the Vienna Convention: subsequent practice 1114
Panel reports 1114
Practice amongst Members 1114
(iv) Article 31.4: specialized meaning 1114
(v) Article 32 of the Vienna Convention: supplementary means of interpretation 1114
General 1114
Status of Article 32 1114
When to resort to Article 32 1115
Circumstances of the conclusion of a treaty 1115
Negotiating history 1115
Customs classification practice 1115
Agreements between Members 1116
Working documents of the GATT Secretariat 1116
"*In dubio mitius*" 1116
(vi) Good faith 1116
(vii) Principle of effective treaty interpretation 1118
(viii) Article 33 of the Vienna Convention: plurilingual treaties 1119
(ix) Presumption against conflict 1120
GATT 1994 and the Annex 1A Agreements 1120
Issue of *lex specialis* / conflict 1120
(x) Non-retroactivity of treaties 1121
(xi) State responsibility 1121
General 1121
Proportionality of countermeasures 1122
(xii) Legitimate expectations 1123
(xiii) Proportionality 1124
(xiv) Precautionary principle 1124
(xv) Estoppel 1125
(xvi) Status of adopted GATT/WTO Panel and Appellate Body Reports 1125
(d) "add to or diminish the rights and obligations" 1126
(e) Relationship with other Agreements 1126
(i) Article 17.6(ii) of the Anti-Dumping Agreement 1126
2. Article 3.3 1126
(a) "measures taken by another Member" 1126
3. Article 3.6 1126
(a) Notification of mutually agreed solutions 1126
4. Article 3.7 1128
(a) "whether action under these procedures would be fruitful" 1128
(b) "aim of the dispute settlement mechanism is to secure a positive solution to a dispute" 1128
(c) "suspending the application of concessions or other obligations" 1128
5. Article 3.8 1129
(a) Presumption of "nullification or impairment" 1129
(b) Relationship with other WTO Agreements 1131
(i) Article XXIII:1 of the GATS 1131
(ii) Article 5(b) of the SCM Agreement 1131
6. Article 3.10 1131
(a) "good faith . . . effort to resolve the dispute" 1131

IV. ARTICLE 4 1133
A. TEXT OF ARTICLE 4 1133
B. INTERPRETATION AND APPLICATION OF ARTICLE 4 1134
1. General 1134
(a) Importance of consultations 1134
(b) Consultations as a prerequisite for panel proceedings 1134
(c) Disclosure of information during consultations 1135
(d) Adequacy of consultations 1135
(e) Result of the consultations 1136
(f) Challenging a request for consultations 1136
2. Article 4.1 1137
3. Article 4.3 1137
4. Article 4.4 1137
(a) Notification of requests for consultations 1137
(b) Absence or addition of "claims" and/or "measures" in the request for consultations 1137

(c) Effect of the extension of the duration of identified measures after consultations 1138
(d) Relationship between request for consultations and request for the establishment of a panel 1139
5. Article 4.6 1139
(a) "consultations shall be confidential" 1139
(i) Information acquired during consultations 1139
In the same proceedings 1139
Information obtained in different proceedings 1139
Offers of settlement made during consultations 1139
(ii) Relevance of third party participation in confidentiality of information from consultations 1139
(b) "consultations shall be . . . without prejudice to the rights of any Member" 1140
6. Article 4.7 1140
7. Article 4.9 1140
8. Article 4.11 1140
C. RELATIONSHIP WITH OTHER ARTICLES 1140
1. Article 6 1140
D. RELATIONSHIP WITH OTHER WTO AGREEMENTS 1141
1. Article 8.10 of the ATC 1141
2. Article 17 of the Anti-Dumping Agreement 1141
3. Article 4.2 of the SCM Agreement 1141

V. ARTICLE 5 1141
A. TEXT OF ARTICLE 5 1141
B. INTERPRETATION AND APPLICATION OF ARTICLE 5 1141
1. WTO Director-General's offer of assistance 1141
2. Mediation outside the DSU 1141

VI. ARTICLE 6 1142
A. TEXT OF ARTICLE 6 1142
B. INTERPRETATION AND APPLICATION OF ARTICLE 6 1142
1. General 1142
(a) Multiple panels involving the same parties and same claims 1142
2. Article 6.2 1143
(a) General 1143
(i) Task of panels to examine requests for establishment 1143
(ii) Request must be sufficiently precise 1143
(b) Right to bring claims 1143
(i) Legal interest 1143
(ii) Right to bring claims under Article 17.4 of the Anti-Dumping Agreement 1144
3. Basic requirements under Article 6.2 1144
(a) General 1144
(b) "indicate whether consultations were held" and "matter referred to the DSB" 1145
(c) "identify the specific measures at issue" 1145
(i) "specific measures at issue" 1145
Nexus between "measure" and "Member" 1145
Scope: any act or omission attributable to a Member 1146
General 1146
Challenging legislation allegedly taken by a customs union 1146
Independent operational status test 1146
(ii) Legal instruments as measures 1146
General 1146
Legislation *as such* as a "measure" 1146
General 1146
Distinction to be drawn between laws "as such" and the specific application of laws when assessing measures 1147
Instruments with normative value 1148
Discretionary versus mandatory legislation rule 1149
Reference to previous GATT practice 1149
Relevant type of discretion for distinguishing between discretionary and mandatory legislation 1150
Assessment of whether or not legislation "mandates" action 1150
Should the mandatory or discretionary question be determined before a substantive finding? 1151
The relevance of the distinction between mandatory and discretionary legislation in the context of an affirmative defence 1152
Rejection of the mandatory versus discretionary distinction 1153
Application of tariffs as a measure 1155
Anti-dumping measures 1155
(iii) General practice as a measure 1155
(iv) Private action as a "measure" 1156
(v) Standard for sufficient "identification" 1158
Identification of measure 1158
Identification of products 1159
Identification of industry 1160
(vi) Measures falling within/outside the panel's terms of reference 1160
(d) "a brief summary of the legal basis of the complaint . . . sufficient to present the problem clearly" 1160
(i) Concept of "claim" 1160
(ii) Two-stage test 1161
(iii) Identification of the claims 1161
General 1161
Distinction between claims and arguments 1163
(iv) Claims falling within/outside the panel's terms of reference 1165
(v) "presenting the problem clearly" 1165
General 1165
Relevance of presenting the problem clearly 1165
(vi) Clarity of claims in written submissions 1166
(e) Demonstration of compliance with Article 6.2 requirements 1167
(f) Importance of timing of a specificity objection 1167
(i) Distinction between sufficiency of a panel request and establishing a prima facie case of violation 1167
(g) Relevance of the principle of good faith 1168
C. RELATIONSHIP WITH OTHER ARTICLES 1168
1. Article 4 1168
2. Articles 6.2 and 21.5 1168
D. RELATIONSHIP WITH OTHER WTO AGREEMENTS 1168
1. Relationship with Article 17 of the Anti-Dumping Agreement 1168
(a) The term "matter" under paragraphs 4 and 5 of Article 17 1168

(b) Anti-dumping measures 1168
(c) Legal basis for claims under Article 17 1168

VII. ARTICLE 7 1168
A. TEXT OF ARTICLE 7 1168
B. INTERPRETATION AND APPLICATION OF ARTICLE 7 1168
1. General 1168
(a) Importance of the terms of reference 1168
(b) Instances where a panel must address jurisdictional issues 1169
(c) Objections to the panel's jurisdiction 1169
(i) General 1169
(ii) Timing of the objections to the panel's jurisdiction 1169
2. Article 7.1 1170
(a) "the matter referred to the DSB" 1170
(i) Concept of "matter" 1170
(ii) Specific measures at issue 1170
General 1170
Terminated measures 1172
Before agreement on the Panel's terms of reference 1172
After agreement on the Panel's terms of reference 1174
Amended measures 1174
Measures amended before the establishment of the Panel 1174
Measures amended during the Panel proceedings 1174
Ambiguous, vague and unclear measures 1175
Measures in existence since before the entry into force of the WTO Agreements 1177
(iii) Claims 1177
General 1177
Claims not included in the terms of reference 1177
Claims included in terms of reference 1178
Claims not elaborated in the parties' first written submissions 1178
Abandoned claims 1178
Whether a party has made a specific claim 1179
3. Article 7.2 1180
4. Article 7.3 1181
(a) Special terms of reference 1181

VIII. ARTICLE 8 1181
A. TEXT OF ARTICLE 8 1181
B. INTERPRETATION AND APPLICATION OF ARTICLE 8 1182
1. Article 8.4: indicative list of panellists 1182
2. Articles 8.6 and 8.7: panel composition 1182

IX. ARTICLE 9 1182
A. TEXT OF ARTICLE 9 1182
B. INTERPRETATION AND APPLICATION OF ARTICLE 9 1182
1. Article 9.1: "a single panel should be established . . . whenever feasible" 1182
(a) Relationship with other paragraphs of Article 9 1183
(i) Article 9.2 1183
2. Article 9.2: separate reports 1183
(a) General 1183
(b) Timing of the request for separate reports 1183
(c) Panel discretion 1184
(d) Structure of separate reports 1185
(e) Relationship with other paragraphs of Article 9 1185
(i) Article 9.1 1185
3. Article 9.3: multiple panels 1185
(a) Duplication of panel with same complainant 1185
(b) Third-party rights for complainants in parallel proceedings 1185

X. ARTICLE 10 1187
A. TEXT OF ARTICLE 10 1187
B. INTERPRETATION AND APPLICATION OF ARTICLE 10 1187
1. Article 10 1187
(a) General 1187
2. Article 10.2 1187
(a) Enhanced third-party rights 1187
(b) "Substantial interest" 1189
3. Article 10.3 1189
(a) "Third parties shall receive the submissions of the parties to the dispute to the first meeting of the panel" 1189
4. Third-party rights in preliminary ruling proceedings 1189
5. Third-party rights under Article 22.6 1189
6. Authority of the panel to direct a Member to be a third party 1190
7. Essential parties 1190

XI. ARTICLE 11 1190
A. TEXT OF ARTICLE 11 1190
B. INTERPRETATION AND APPLICATION OF ARTICLE 11 1190
1. Standard of review under the DSU 1190
2. "objective assessment of the matter before it" 1191
(a) "the matter before it" 1191
(i) General 1191
(ii) Finding on a claim not made by the complainant 1191
(iii) Reference in Panel's reasoning to provisions not included in the claims 1191
(iv) Consideration of parties' arguments by the Panel 1192
(v) Due process implications 1192
(vi) Consultation of experts 1193
3. "objective assessment of the facts" 1193
(a) Extent of panels' duty/discretion to examine the evidence 1193
(i) Duty to examine all evidence 1193
(ii) Panels' discretion as trier and weigher of the facts 1193
(iii) Egregious error calling into question the good faith of a panel 1196
(b) Municipal law 1198
(c) Drawing adverse inferences 1201
(d) Timing of submission of evidence 1202
(e) Temporal scope of the review 1205
(f) Evidence obtained during consultations 1205
(g) Relationship with Article 13 1205
4. Objective assessment of whether the investigating authority's explanation is reasoned and adequate: not a "*de novo*" review 1205
5. "make such other findings" 1205
6. Standard of review in trade remedy cases 1205
(a) Agreement on Safeguards 1205
(i) Application of general standard of review under Article 11 of the DSU 1205

(ii) Objective assessment of whether the investigating authority's explanation is reasoned and adequate: not a "de novo" review 1205
(b) Transitional safeguard measure under the Agreement on Textiles and Clothing 1208
(i) Application of general standard of review under Article 11 of the DSU 1208
(c) Anti-dumping measures 1210
(d) Countervailing measures 1210
(i) Application of general standard of review under the DSU 1210
7. Dissenting/separate opinions 1210
8. Relationship with other Articles 1211
(a) Articles 12 and 13 1211
(b) Article 19 1211
9. Relationship with non-WTO law 1211

XII. ARTICLE 12 1212
A. TEXT OF ARTICLE 12 1212
B. INTERPRETATION AND APPLICATION OF ARTICLE 12 1213
1. Article 12.1: Working Procedures 1213
2. Article 12.2: flexibility 1213
3. Article 12.6 1213
(a) "submissions" 1213
(i) Legal right to have a submission considered by the Panel 1213
(ii) Meaning of the term "second written submission" 1213
(b) "Any subsequent written submissions shall be submitted simultaneously" 1213
4. Article 12.7 1213
(a) "basic rationale behind any findings and recommendations" 1213
5. Articles 12.8 and 12.9: deadlines for Panel review 1215
(a) General 1215
(b) Notification of delay in the issuance of a panel report to the parties 1215
6. Article 12.10 1218
(a) "the panel shall accord sufficient time for the developing country Member to prepare and present its argumentation" 1218
7. Article 12.11 1218
(a) Explicit indication in the panel's report of how special and differential provisions were taken into account 1218

XIII. ARTICLE 13 1219
A. TEXT OF ARTICLE 13 1219
B. INTERPRETATION AND APPLICATION OF ARTICLE 13 1219
1. Article 13.1 1219
(a) "right to seek information and technical advice from any individual or body" 1219
(b) Right to disregard information submitted 1221
(c) "A Member should respond promptly and fully to any request by a panel for such information as the panel considers necessary and appropriate" 1221
2. Article 13.2 1222
(a) "seek information from any relevant source" 1222

XIV. ARTICLE 14 1223
A. TEXT OF ARTICLE 14 1223
B. INTERPRETATION AND APPLICATION OF ARTICLE 14 1223

XV. ARTICLE 15 1223
A. TEXT OF ARTICLE 15 1223
B. INTERPRETATION AND APPLICATION OF ARTICLE 15 1223
1. Scope of the interim review 1223
2. Confidentiality of interim reports 1223
3. Introduction of new evidence at the interim review stage 1224

XVI. ARTICLE 16 1224
A. TEXT OF ARTICLE 16 1224
B. INTERPRETATION AND APPLICATION OF ARTICLE 16 1224
1. Article 16.4 1224
(a) Time-period under Article 16.4 1224

XVII. ARTICLE 17 1225
A. TEXT OF ARTICLE 17 1225
B. INTERPRETATION AND APPLICATION OF ARTICLE 17 1226
1. General 1226
2. Article 17.1 1226
(a) Establishment of the Appellate Body 1226
3. Article 17.2 1226
(a) Appointment of Members of the Appellate Body 1226
4. Article 17.5 1226
(a) "In no case shall the proceedings exceed 90 days" 1226
(b) Extension of deadline for circulation of Appellate Body Report 1228
5. Article 17.6: scope of appellate review 1228
(a) "issues of law . . . and legal interpretations" 1228
(i) Factual findings versus legal findings 1228
(ii) Relevance of the characterization of a finding by the Panel 1230
(iii) Statements of panels not amounting to "legal findings" 1230
(iv) Review of new issues 1231
(v) Review of new arguments 1231
(vi) Review of new facts 1231
(b) "Completing the analysis" 1231
6. Article 17.9: Working procedures of the Appellate Body 1235
(a) "Working procedures shall be drawn up by the Appellate Body" 1235
7. Article 17.11: concurring opinions (Rule 3.2) 1235
8. Article 17.13: "may uphold, modify or reverse the legal findings and conclusions of the panel" 1236

XVIII. ARTICLE 18 1236
A. TEXT OF ARTICLE 18 1236
B. INTERPRETATION AND APPLICATION OF ARTICLE 18 1236
1. Article 18.2 1236
(a) Disclosure of "written submissions" 1236
(i) Difference between "submissions" and "statements" 1236
(ii) Timing of the disclosure 1237
(b) Non-confidential versions of written submissions 1237
(c) Business confidential information (BCI) 1237
(d) Confidentiality implications of private counsel's intervention 1239

(i) General 1239
(ii) Joint representation 1241

XIX. ARTICLE 19 1242
A. TEXT OF ARTICLE 19 1242
B. INTERPRETATION AND APPLICATION OF ARTICLE 19 1242
1. Article 19.1 1242
(a) "bring the measure into conformity with that agreement" 1242
(i) Measure in force 1242
(ii) Measure no longer in existence 1242
(iii) Relevance of events that occurred during the proceedings 1242
(b) "the panel . . . may suggest ways in which the Member concerned could implement the recommendation" 1242
(i) Panel's discretion to suggest ways to implement 1242
General 1242
Suggestions made by Panel of ways to implement 1243
Panel declines to suggest ways to implement 1244
(ii) Choice of means of implementation 1246
(iii) Surveillance of implementation 1246
2. Article 19.2 1246
3. Relationship with other Articles 1246
(a) Article 11 1246
(b) Articles 16, 21 and 22 1246
4. Relationship with other WTO Agreements 1246
(a) Article 4.7 of the SCM Agreement 1246

XX. ARTICLE 20 1246
A. TEXT OF ARTICLE 20 1246
B. INTERPRETATION AND APPLICATION OF ARTICLE 20 1247

XXI. ARTICLE 21 1247
A. TEXT OF ARTICLE 21 1247
B. INTERPRETATION AND APPLICATION OF ARTICLE 21 1248
1. Article 21.1 1248
(a) "prompt compliance" 1248
(i) Concept of compliance 1248
(ii) Promptness of compliance 1248
Flexibility 1248
Time after adoption of report(s) 1249
Relationship with Article 21.3(c) 1249
2. Article 21.2 1249
(a) "interests of developing country Members" 1249
3. Article 21.3(c) 1251
(a) Mandate of the arbitrator 1251
(b) "reasonable period of time" 1251
(i) Availability of the reasonable period of time 1251
(ii) Concept of "reasonableness" 1252
(iii) Length of the reasonable period of time 1252
The 15-month guideline 1252
The shortest period possible 1252
Normal versus extraordinary legislative procedure 1253
DSB actions as precedents 1253
Burden of proof 1254
Examples of amendment of the "reasonable period of time" 1254
Length of "reasonable period of time" as awarded by Article 21.3(c) arbitration 1254
(iv) The application of WTO-inconsistent measures during the reasonable period of time 1255
(v) Exception: prohibited subsidies 1256
(c) "particular circumstances" 1256
(i) Concept of "particular circumstances" 1256
(ii) Relevance of "particular circumstances" 1256
(iii) Factors amounting to "particular circumstances" 1257
Complexity of enacting implementing legislation 1257
Role in society of the WTO-inconsistent measure 1257
Flexibility of the legislative system 1257
Rules on entry into force of legal instruments 1258
Institutional changes 1258
(iv) Factors not qualifying as "particular circumstances" 1258
General 1258
Example of factors not qualifying as "particular circumstances" 1258
Structural adjustments of the implementing Member's affected industries 1258
Limited powers of the executive branch 1259
Economic and financial consequences of implementation 1259
Choice of legislative implementation 1259
Scientific studies or consultations 1259
International treaty obligations 1260
Economic harm to the complainant's economic operators 1260
Changes other than those necessary to implement the DSB recommendations 1260
(v) Burden of proof 1261
(d) Relationship with Article 22 1261
(e) Participation by all the original parties 1261
(f) Relationship with other WTO Agreements 1261
(i) SCM Agreement 1261
4. Article 21.5 1261
(a) Function and scope of Article 21.5 proceedings 1261
(b) The "matter" in Article 21.5 proceedings 1263
(i) General 1263
(ii) Measures concerned by Article 21.5 panel proceedings: measures taken to comply 1263
Concept of "measures taken to comply" 1263
Scope of the measures taken to comply 1263
Panel's discretion to decide on scope of the measures taken to comply 1264
(iii) Claims in Article 21.5 proceedings 1264
General 1264
Claims already raised and decided during the original proceedings 1264
Claims different from or additional to those raised in the original proceedings: 1266
(c) "through recourse to these dispute settlement procedures" 1267
(i) General 1267
(ii) Timing of the establishment of Article 21.5 panels 1267
(iii) Parties' submissions 1267
(iv) Third-party rights: access to second written submissions by third parties 1268

(d) Burden of proof 1269
(e) List of disputes under Article 21.5 1269
5. Ad hoc agreements on procedures under Articles 21 and 22 concluded by parties 1270
(a) The sequencing issue 1270
(b) Sequencing solutions in ad hoc procedural agreements 1270
(i) Recourse to Article 21.5 before initiating Article 22 proceedings 1270
(ii) Simultaneous Articles 21.5 and 22 proceedings 1271
(iii) Agreement not to appeal the compliance report 1271
(iv) Withdrawal of Article 22 arbitration request 1271
(v) Direct recourse to Article 22 1271
(vi) Agreement not to object to arbitration under Article 22.6 1271
(vii) Non-application of the 30-day deadline in first sentence in Article 22.6 1272
(c) Consultations 1272
(d) Establishment of the panel 1272
(e) Appointment of panellists 1272
(f) Participation of experts 1273
(g) Cooperation to ensure time-limits for the work of the compliance panel and Appellate Body are respected 1273
(h) Non-prejudice of the parties' other rights 1273
(i) List of ad hoc agreements 1273
(j) Panel's scope of review of procedural agreements 1274
6. Relationship with other Articles 1274
(a) Article 6.2 1274
(b) Article 12.7 1275

XXII. ARTICLE 22 1275
A. TEXT OF ARTICLE 22 1275
B. INTERPRETATION AND APPLICATION OF ARTICLE 22 1277
1. General 1277
(i) Nature and purpose of countermeasures 1277
(ii) Bilateral procedural agreements 1278
(iii) Confidential information 1278
2. Article 22.1 1278
3. Article 22.2 1278
(a) Specificity in the request for suspension of concessions or other obligations 1278
(i) Application of Article 6.2 specificity requirement 1278
(ii) Minimum specificity requirements 1278
(b) "concessions or other obligations under the covered agreements" 1279
(i) Tariff "concessions" 1279
List of products 1279
"Carousel" type suspension 1280
(ii) "Obligations" 1281
Cases where the suspension of obligations was requested 1281
Whether the "obligations" to be suspended need to be specified 1281
4. Article 22.3 1282
(a) Scope of review by arbitrators under Article 22.3 1282
(b) "the complaining party shall apply the following principles and procedures" 1283
5. Article 22.3(a) 1283
(a) "general principle . . . complaining party should first seek to suspend concessions or other obligations with respect to the same sector(s)" 1283
(i) General 1283
(ii) Parallelism between violations and requests for suspension of concessions 1283

XXXVI. OTHER ISSUES IN WTO DISPUTE SETTLEMENT PROCEEDINGS 1352
A. ORDER OF ANALYSIS 1352
1. Provisions of different WTO Agreements 1352
(a) Test: Agreement that deals specifically and in detail with the measure at issue 1352
(i) GATT 1994 versus Licensing Agreement 1352
(ii) GATT 1994 versus SPS Agreement 1352
(iii) GATT 1994 versus TBT Agreement 1353
(iv) GATT 1994 versus Agreement on Agriculture 1354
(v) GATT 1994 versus SCM Agreement 1354
(vi) GATT 1994 versus TRIMs Agreement 1354
2. Provisions within the same Agreement 1354
(a) GATT 1994 1354
(i) Articles III and XI 1354
(b) GATS 1355
(i) Annex on Telecommunication and Member's Reference Paper on Commitments 1355
(c) SCM Agreement 1355
(i) Articles 1.1 and 3.1(a) 1355
(ii) Articles 3.1(a) and 27.4 1355
(d) TRIPS Agreement 1356
(i) Articles 33 and 70 1356
B. DUE PROCESS IN WTO DISPUTE SETTLEMENT PROCEEDINGS 1356
1. Standard panel working procedures as a tool to ensure due process 1356
2. Due process demands when identifying the measures and claims at issue 1356
3. Identification of appealed measures 1357
4. Right of response 1357
C. PRELIMINARY RULINGS 1358
1. General 1358

(a) Lack of regulation in standard working procedures 1358
(b) Absence of a requirement to rule on a preliminary basis 1358
(c) Preliminary ruling procedures followed in certain disputes 1358
(d) Participation of third parties in preliminary ruling proceedings 1358
(e) Preliminary rulings in Article 22.6 Arbitrations 1358
2. Parties' objections 1358
3. Issues that have been the object of a preliminary objection 1359
(a) Adequacy of consultations 1359
(b) Compliance of panel request with Article 6.2 requirements 1359
(c) Panel composition 1360
(d) Panel's jurisdiction 1360
(i) Measures withdrawn before establishment of the Panel 1360
(ii) Double fora 1360
(iii) Claims outside the panel's terms of reference 1360
(e) Clarity of claims in written submissions 1361
(f) Evidence 1361
(i) Timing of the submission of evidence 1361
(ii) Information not made available to the investigating authorities 1361
(g) Third-party rights 1361
(i) Third-party participation in preliminary proceedings 1361
(ii) Access to second written submissions by third parties in Article 21.5 proceedings 1361
(h) Confidentiality 1362
(i) Breach of confidentiality of the consultation process 1362
(ii) Disclosure of written submissions 1362
(iii) Non-confidential versions of written submissions 1362
(iv) Business confidential information 1362
(v) Confidentiality concerns when private counsel intervene 1362
(i) Private counsel 1362
(j) Panel's timetable 1363
(k) Executive summaries 1363
(l) Meaning of the term "second written submissions" 1363
(m) Timing for the filing of submissions in panel proceedings 1363
(n) *Amicus curiae* 1363
3. Timing 1363
(a) Promptness of objections 1363
(b) Timing of the preliminary ruling 1365
D. BURDEN OF PROOF 1365
1. The rule on burden of proof 1365
2. Evidence and arguments remain in equipoise 1366
3. Establishing a prima facie case 1366
(a) What is a prima facie case? 1366
(b) Source of evidence for a prima facie case 1366
(c) No need to state explicitly that a prima facie case has been made. 1367
4. Relevance of the difficulty of collecting information to prove a case 1367
5. Necessary collaboration of the parties 1367
6. Relationship between the burden of proof and a panel's fact-finding mandate 1367
7. Relevance of the mandatory/discretionary distinction 1368
8. Application of the burden of proof in the context of a given WTO Agreement 1368
(a) Burden of proof in the GATT 1994 1368
(b) Burden of proof under the Enabling Clause 1369
(c) Burden of proof in the SPS Agreement 1370
(i) Burden of proof in the context of Article 2.2 of the SPS Agreement 1370
(d) Burden of proof in the SCM Agreement 1371
(e) Burden of proof in the TRIPS Agreement 1372
(f) Burden of proof in the TBT Agreement 1372
(g) Burden of proof in the Agreement on Agriculture 1373
(h) Burden of proof in Article 21.3(c) arbitrations 1373
(i) Burden of proof in Article 21.5 compliance panel proceedings 1373
(j) Burden of proof in Article 22.6 arbitrations 1374
E. PRIVATE COUNSEL 1374
1. Presence of private counsel in oral hearings 1374
2. Confidentiality concerns 1375
3. Conflict of interest 1375
F. JUDICIAL ECONOMY 1376
1. Legal basis for the exercise of judicial economy 1376
2. Exercise of judicial economy with respect to arguments 1377
3. No obligation to exercise judicial economy 1377
4. Requirement for a panel to state it is exercising judicial economy 1378
5. "False" judicial economy 1378
G. *AMICUS CURIAE* BRIEFS 1379
1. Access to the dispute settlement process by non-WTO members 1379
2. Authority to admit *amicus curiae* briefs 1379
3. Appellate Body additional procedure for *amicus curiae* briefs 1381
4. Admission/rejection of *amicus curiae* briefs 1382

XXXVII. TIME-FRAMES IN RELATION TO PANEL AND APPELLATE BODY REPORTS 1384

I. ARTICLE 1

A. TEXT OF ARTICLE 1

Members hereby *agree* as follows:

Article 1
Coverage and Application

1. The rules and procedures of this Understanding shall apply to disputes brought pursuant to the consultation and dispute settlement provisions of the agreements listed in Appendix 1 to this Understanding (referred to in this Understanding as the "covered agreements"). The rules and procedures of this Understanding shall also apply to consultations and the settlement of disputes between Members concerning their rights and obligations under the provisions of the Agreement Establishing the World Trade Organization (referred to in this Understanding as the "WTO Agreement") and of

this Understanding taken in isolation or in combination with any other covered agreement.

2. The rules and procedures of this Understanding shall apply subject to such special or additional rules and procedures on dispute settlement contained in the covered agreements as are identified in Appendix 2 to this Understanding. To the extent that there is a difference between the rules and procedures of this Understanding and the special or additional rules and procedures set forth in Appendix 2, the special or additional rules and procedures in Appendix 2 shall prevail. In disputes involving rules and procedures under more than one covered agreement, if there is a conflict between special or additional rules and procedures of such agreements under review, and where the parties to the dispute cannot agree on rules and procedures within 20 days of the establishment of the panel, the Chairman of the Dispute Settlement Body provided for in paragraph 1 of Article 2 (referred to in this Understanding as the "DSB"), in consultation with the parties to the dispute, shall determine the rules and procedures to be followed within 10 days after a request by either Member. The Chairman shall be guided by the principle that special or additional rules and procedures should be used where possible, and the rules and procedures set out in this Understanding should be used to the extent necessary to avoid conflict.

B. INTERPRETATION AND APPLICATION OF ARTICLE 1

1. Article 1.1: "covered agreements"

1. In *Brazil – Desiccated Coconut*, the Appellate Body defined the term "covered agreements" as follows:

> "The 'covered agreements' include the *WTO Agreement*, the Agreements in Annexes 1 and 2, as well as any Plurilateral Trade Agreement in Annex 4 where its Committee of signatories has taken a decision to apply the *DSU*. In a dispute brought to the DSB, a panel may deal with all the relevant provisions of the covered agreements cited by the parties to the dispute in one proceeding."[1]

2. In *India – Patents (US)*, the Appellate Body examined the Panel's interpretation of various provisions of the TRIPS Agreement and noted that "as one of the covered agreements under the DSU, the *TRIPS Agreement* is subject to the dispute settlement rules and procedures of that Understanding".[2]

3. The Appellate Body on *EC – Poultry* considered the relationship between Schedule LXXX of the European Communities and the so-called "Oilseeds Agreement", which had been negotiated by the European Communities and ten other contracting parties, including Brazil. As a part of its agreement with Brazil, a "global" tariff-rate quota had been introduced by the European Communities and subsequently incorporated into the European Communities' Schedule LXXX. Subsequently, in the context of the interpretation of the European Communities' Schedule, the question of the relationship between Schedule LXXX and the Oilseeds Agreement arose. The European Communities argued that Schedule LXXX superseded and terminated the Oilseeds Agreement because the WTO Agreement was a later treaty relating to the same subject matter in accordance with Article 59.1 of the *Vienna Convention*; alternatively, the European Communities argued that the Oilseeds Agreement only applied to the extent compatible with Schedule LXXX, pursuant to Article 30.3 of the *Vienna Convention*. The Appellate Body stated:

> "In our view, it is not necessary to have recourse to either Article 59.1 or Article 30.3 of the *Vienna Convention*, because the text of the *WTO Agreement* and the legal arrangements governing the transition from the GATT 1947 to the WTO resolve the issue of the relationship between Schedule LXXX and the Oilseeds Agreement in this case. Schedule LXXX is annexed to the *Marrakesh Protocol to the General Agreement on Tariffs and Trade 1994* (the '*Marrakesh Protocol*'), and is an integral part of the GATT 1994. As such, it forms part of the multilateral obligations under the *WTO Agreement*. The Oilseeds Agreement, in contrast, is a bilateral agreement negotiated by the European Communities and Brazil under Article XXVIII of the GATT 1947, as part of the resolution of the dispute in *EEC – Oilseeds*. As such, the Oilseeds Agreement is not a 'covered agreement' within the meaning of Articles 1 and 2 of the DSU. Nor is the Oilseeds Agreement part of the multilateral obligations accepted by Brazil and the European Communities pursuant to the *WTO Agreement*, which came into effect on 1 January 1995. The Oilseeds Agreement is not cited in any Annex to the *WTO Agreement*. Although the provisions of certain legal instruments that entered into force under the GATT 1947 were made part of the GATT 1994 pursuant to the language in Annex 1A incorporating the GATT 1994 into the *WTO Agreement*, the Oilseeds Agreement is not one of those legal instruments."[3]

4. The Appellate Body on *Guatemala – Cement I* examined the Panel's interpretation of the relationship between Article 17 of the *Anti-Dumping Agreement* and the rules and procedures of the *DSU* (see also paragraph 7 below). In this context, the Appellate Body made the following general statement about Article 1.1 of the *DSU*:

> "Article 1.1 of the DSU establishes an integrated dispute settlement system which applies to all of the agreements

[1] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 13. With respect to the freedom of panels to rely, in their findings, on provisions other than those referred to by the parties in the request for establishment of a panel or in the terms of reference, see paras. 331–332 in this Chapter.
[2] Appellate Body Report on *India – Patents (US)*, para. 29.
[3] Appellate Body Report on *EC – Poultry*, para. 79.

listed in Appendix 1 to the DSU (the 'covered agreements'). The DSU is a coherent system of rules and procedures for dispute settlement which applies to 'disputes brought pursuant to the consultation and dispute settlement provisions of' the covered agreements. The *Anti-Dumping Agreement* is a covered agreement listed in Appendix 1 of the DSU; the rules and procedures of the DSU, therefore, apply to disputes brought pursuant to the consultation and dispute settlement provisions contained in Article 17 of that Agreement."[4]

5. In *India – Quantitative Restrictions*, India appealed the Panel's conclusion that the Panel was competent to review the justification of India's balance-of-payments (BOP) restrictions under Article XVIII:B of the *GATT 1994*. India argued that the Panel had erred by failing to give proper consideration to the "institutional balance" embodied in the WTO Agreement; according to India, BOP measures were within the exclusive competence of the BOP Committee and the General Council. India claimed that in view of the competence of the BOP Committee and the General Council with respect to balance-of-payments restrictions under Article XVIII:12 of *GATT 1994* and the *BOP Understanding*, the Panel erred in finding that the competence of panels to review the justification of balance-of-payments restrictions is "unlimited". The Appellate Body ruled:

> "We note that Appendix 1 to the DSU lists 'Multilateral Agreements on Trade in Goods', to which the GATT 1994 belongs, among the agreements covered by the DSU. A dispute concerning Article XVIII:B is, therefore, covered by the DSU.
>
> . . .
>
> Appendix 2 does not identify any special or additional dispute settlement rules or procedures relating to balance-of-payments restrictions. It does not mention Article XVIII:B of the GATT 1994, or any of its paragraphs. The DSU is, therefore, fully applicable to the current dispute."[5]

2. Article 1.2: "special or additional rules and procedures"

(a) General

6. The Appellate Body on *Guatemala – Cement I* stated that special and additional rules within the meaning of Article 1.2 of the *DSU* apply only in the case of "inconsistency" or a "difference" between these rules and the provisions of the *DSU*:

> "Article 1.2 of the DSU provides that the 'rules and procedures of this Understanding shall apply *subject to such special or additional rules and procedures* on dispute settlement contained in the covered agreements as are identified in Appendix 2 to this Understanding.' (emphasis added) It states, furthermore, that these special or additional rules and procedures 'shall prevail' over the provisions of the DSU '[t]o the extent that there is a *difference* between' the two sets of provisions. (emphasis added) Accordingly, if there is no 'difference', then the rules and procedures of the DSU apply *together with* the special or additional provisions of the covered agreement. In our view, it is only where the provisions of the DSU and the special or additional rules and procedures of a covered agreement c*annot* be read as *complementing* each other that the special or additional provisions are to *prevail*. A special or additional provision should only be found to *prevail* over a provision of the DSU in a situation where adherence to the one provision will lead to a violation of the other provision, that is, in the case of a *conflict* between them. An interpreter must, therefore, identify an *inconsistency* or a *difference* between a provision of the DSU and a special or additional provision of a covered agreement *before* concluding that the latter *prevails* and that the provision of the DSU does not apply."[6]

(b) Article 17 of the Anti-Dumping Agreement

7. In examining the relationship between Article 17 of the *Anti-Dumping Agreement* and the rules and procedures of the *DSU*, the Panel on *Guatemala – Cement I* found that Article 17 of the *Anti-Dumping Agreement* "provides for a coherent set of rules for dispute settlement specific to anti-dumping cases . . . that replaces the more general approach of the DSU". However, the Appellate Body disagreed with the Panel and held:

> "Article 17.3 of the *Anti-Dumping Agreement* is not listed in Appendix 2 of the DSU as a special or additional rule and procedure. It is not listed precisely because it provides the legal basis for consultations to be requested by a complaining Member under the *Anti-Dumping Agreement*. Indeed, it is the equivalent provision in the *Anti-Dumping Agreement* to Articles XXII and XXIII of the GATT 1994, which serve as the basis for consultations and dispute settlement under the GATT 1994, under most of the other agreements in Annex 1A of the *Marrakesh Agreement Establishing the World Trade Organization* (the '*WTO Agreement*'), and under the *Agreement on Trade-Related Aspects of Intellectual Property Rights* (the '*TRIPS Agreement*').
>
> . . .
>
> Clearly, the consultation and dispute settlement provisions of a covered agreement are not meant to *replace*, as a coherent system of dispute settlement for that agreement, the rules and procedures of the DSU. To read Article 17 of the *Anti-Dumping Agreement* as *replacing*

[4] Appellate Body Report on *Guatemala – Cement I*, para. 64.
[5] Appellate Body Report on *India – Quantitative Restrictions*, paras. 85–86. With respect to the competence of panels to review balance-of-payments restrictions, see also Chapter on *GATT*, Section XIX.D(b).
[6] Appellate Body Report on *Guatemala – Cement I*, para. 65. See also Appellate Body Report on *US – FSC*, para. 159.

the DSU system as a whole is to deny the integrated nature of the WTO dispute settlement system established by Article 1.1 of the DSU.

For these reasons, we conclude that the Panel erred in finding that Article 17 of the *Anti-Dumping Agreement* 'provides for a coherent set of rules for dispute settlement specific to anti-dumping cases . . . that replaces the more general approach of the DSU'."[7]

8. In *US – Hot-Rolled Steel*, the Appellate Body pointed out that Article 17.6 of the *Anti-Dumping Agreement* is identified in Article 1.2 and Appendix 2 of the *DSU* as one of the special or additional rules and procedures that prevail over the *DSU* to the extent that there is a difference between those provisions and the provisions of the *DSU*. Quoting its previous Report on *Guatemala – Cement I* (see paragraph 6 above), the Appellate Body considered the extent to which Article 17.6 of the *Anti-Dumping Agreement* can properly be read as "complementing" the rules and procedures of the *DSU* or, conversely, the extent to which Article 17.6 "conflicts" with the *DSU*. The Appellate Body concluded that there was no conflict between Articles 17.6(i) and 17.6 (ii) and the *DSU*.[8]

9. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body summed up the situation of Articles 17.4 to 17.7 of the *Anti-Dumping Agreement* as special or additional rules as follows:

"We recall, in this regard, that Article 1.1 of the DSU applies the rules and procedures contained in the DSU to 'disputes brought pursuant to the consultation and dispute settlement provisions of the agreements listed in Appendix 1', but that this general rule is, under Article 1.2 of the DSU, subject to the special or additional rules and procedures on dispute settlement identified in Appendix 2 to the DSU. The *Anti-Dumping Agreement* is listed as a covered agreement in Appendix 1 of the DSU. Articles 17.4 through 17.7 of the *Anti-Dumping Agreement* are listed as special or additional rules in Appendix 2 to the DSU."[9]

(c) Article 4.7 of the SCM Agreement

10. In *Australia – Automotive Leather II (Article 21.5 – US)*, both parties argued that Article 4.7 of the *SCM Agreement* should be read consistently with Article 19.1 of the *DSU*. The Panel concluded that Article 19.1 of the *DSU* is not the basis of the recommendation in a case involving prohibited subsidies. The Panel stated:

"Rather, the recommendation to 'withdraw the subsidy' is required by Article 4.7 of the SCM Agreement, which is a special or additional rule or procedure on dispute settlement, identified in Appendix 2 to the DSU. It is Article 4.7 which we must interpret and apply in this dispute. In this respect, we note Article 1.2 of the DSU . . . Thus, to the extent that 'withdraw the subsidy' requires some action that is different from 'bring the measure into conformity', it is that different action which prevails."[10]

II. ARTICLE 2

A. TEXT OF ARTICLE 2

Article 2
Administration

1. The Dispute Settlement Body is hereby established to administer these rules and procedures and, except as otherwise provided in a covered agreement, the consultation and dispute settlement provisions of the covered agreements. Accordingly, the DSB shall have the authority to establish panels, adopt panel and Appellate Body reports, maintain surveillance of implementation of rulings and recommendations, and authorize suspension of concessions and other obligations under the covered agreements. With respect to disputes arising under a covered agreement which is a Plurilateral Trade Agreement, the term "Member" as used herein shall refer only to those Members that are parties to the relevant Plurilateral Trade Agreement. Where the DSB administers the dispute settlement provisions of a Plurilateral Trade Agreement, only those Members that are parties to that Agreement may participate in decisions or actions taken by the DSB with respect to that dispute.

2. The DSB shall inform the relevant WTO Councils and Committees of any developments in disputes related to provisions of the respective covered agreements.

3. The DSB shall meet as often as necessary to carry out its functions within the time-frames provided in this Understanding.

4. Where the rules and procedures of this Understanding provide for the DSB to take a decision, it shall do so by consensus.[1]

(*footnote original*) [1] The DSB shall be deemed to have decided by consensus on a matter submitted for its consideration, if no Member, present at the meeting of the DSB when the decision is taken, formally objects to the proposed decision.

B. INTERPRETATION AND APPLICATION OF ARTICLE 2

1. General

11. With respect to the functions of the DSB, see Section V.B.3 of the Chapter on the *WTO Agreement*.

[7] Appellate Body Report on *Guatemala – Cement I*, paras. 64 and 67–68. See also Appellate Body Report on *US – Lead and Bismuth II*, para. 45; Appellate Body Report on *US – 1916 Act*, para. 70.
[8] Appellate Body Report on *US – Hot-Rolled Steel*, paras. 51 and 56–57.
[9] Appellate Body Report on *US – Corrosion Resistant Steel Sunset Review*, footnote 82 to para. 83.
[10] Panel Report on *Australia – Automotive Leather II (Article 21.5 – US)*, para. 6.41.

2. Rules of procedure for DSB meetings

12. As regards the rules of procedure for the meetings of the DSB, see Section XXXIV below.

3. Date of circulation

13. When there is a reference to the terms "date of circulation" or "issuance to all Members" or "issuance to the Members" in the *DSU* and its additional and special rules, the date to be used is the date printed on the WTO document to be circulated with the assurance of the Secretariat that the date printed on the document is the date on which this document is effectively put in the pigeon holes of delegations in all three working languages. This practice will be used on a trial basis and be subject to revision when necessary.[11]

4. Communications with the DSB

14. At its meeting on 31 May 1995, the DSB agreed that, for reasons of efficiency, communications under the DSU or any other covered agreements should always be sent to the Secretariat with a copy to the Chairman.[12]

5. Time-periods

15. At its meeting of 27 September 1995, the DSB agreed[13] to the following practice concerning the expiration of time-periods:

> "When, under the DSU (and its special or additional rules and procedures), a time-period within which a communication must be made or action taken by a Member to exercise or preserve its rights expires on a non-working day of the WTO Secretariat, any such communication or action will be deemed to have been made or taken on the WTO non-working day if lodged on the first working day of the WTO Secretariat following the day on which such time-period would normally expire."[14]

6. Rules of conduct

16. As regards the rules of conduct, see Section XXXIV below.

7. Negotiations on the amendment of the DSU

17. With respect to the negotiations on the improvement of the DSU at the Special Session of the DSB further to the Doha mandate, see Section XI.B.2 on the *WTO Agreement*.

III. ARTICLE 3

A. TEXT OF ARTICLE 3

Article 3
General Provisions

1. Members affirm their adherence to the principles for the management of disputes heretofore applied under Articles XXII and XXIII of GATT 1947, and the rules and procedures as further elaborated and modified herein.

2. The dispute settlement system of the WTO is a central element in providing security and predictability to the multilateral trading system. The Members recognize that it serves to preserve the rights and obligations of Members under the covered agreements, and to clarify the existing provisions of those agreements in accordance with customary rules of interpretation of public international law. Recommendations and rulings of the DSB cannot add to or diminish the rights and obligations provided in the covered agreements.

3. The prompt settlement of situations in which a Member considers that any benefits accruing to it directly or indirectly under the covered agreements are being impaired by measures taken by another Member is essential to the effective functioning of the WTO and the maintenance of a proper balance between the rights and obligations of Members.

4. Recommendations or rulings made by the DSB shall be aimed at achieving a satisfactory settlement of the matter in accordance with the rights and obligations under this Understanding and under the covered agreements.

5. All solutions to matters formally raised under the consultation and dispute settlement provisions of the covered agreements, including arbitration awards, shall be consistent with those agreements and shall not nullify or impair benefits accruing to any Member under those agreements, nor impede the attainment of any objective of those agreements.

6. Mutually agreed solutions to matters formally raised under the consultation and dispute settlement provisions of the covered agreements shall be notified to the DSB and the relevant Councils and Committees, where any Member may raise any point relating thereto.

7. Before bringing a case, a Member shall exercise its judgement as to whether action under these procedures would be fruitful. The aim of the dispute settlement mechanism is to secure a positive solution to a dispute. A solution mutually acceptable to the parties to a dispute and consistent with the covered agreements is clearly to be preferred. In the absence of a mutually agreed solution, the first objective of the dispute settlement mechanism is usually to secure the withdrawal of the measures concerned if these are found to be inconsistent with the provisions of any of the covered agreements. The provision of compensation should be resorted to only if the immediate withdrawal of the mea-

[11] WT/DSB/6.
[12] WT/DSB/M/5, section 7. WT/DSB/6.
[13] WT/DSB/M/7, section 10. With respect to the elections of officials, see WT/DSB/M/4.
[14] WT/DSB/6.

sure is impracticable and as a temporary measure pending the withdrawal of the measure which is inconsistent with a covered agreement. The last resort which this Understanding provides to the Member invoking the dispute settlement procedures is the possibility of suspending the application of concessions or other obligations under the covered agreements on a discriminatory basis vis-à-vis the other Member, subject to authorization by the DSB of such measures.

8. In cases where there is an infringement of the obligations assumed under a covered agreement, the action is considered *prima facie* to constitute a case of nullification or impairment. This means that there is normally a presumption that a breach of the rules has an adverse impact on other Members parties to that covered agreement, and in such cases, it shall be up to the Member against whom the complaint has been brought to rebut the charge.

9. The provisions of this Understanding are without prejudice to the rights of Members to seek authoritative interpretation of provisions of a covered agreement through decision-making under the WTO Agreement or a covered agreement which is a Plurilateral Trade Agreement.

10. It is understood that requests for conciliation and the use of the dispute settlement procedures should not be intended or considered as contentious acts and that, if a dispute arises, all Members will engage in these procedures in good faith in an effort to resolve the dispute. It is also understood that complaints and counter-complaints in regard to distinct matters should not be linked.

11. This Understanding shall be applied only with respect to new requests for consultations under the consultation provisions of the covered agreements made on or after the date of entry into force of the WTO Agreement. With respect to disputes for which the request for consultations was made under GATT 1947 or under any other predecessor agreement to the covered agreements before the date of entry into force of the WTO Agreement, the relevant dispute settlement rules and procedures in effect immediately prior to the date of entry into force of the WTO Agreement shall continue to apply.[2]

(*footnote original*) [2] This paragraph shall also be applied to disputes on which panel reports have not been adopted or fully implemented.

12. Notwithstanding paragraph 11, if a complaint based on any of the covered agreements is brought by a developing country Member against a developed country Member, the complaining party shall have the right to invoke, as an alternative to the provisions contained in Articles 4, 5, 6 and 12 of this Understanding, the corresponding provisions of the Decision of 5 April 1966 (BISD 14S/18), except that where the Panel considers that the time-frame provided for in paragraph 7 of that Decision is insufficient to provide its report and with the agreement of the complaining party, that time-frame may be extended. To the extent that there is a difference between the rules and procedures of Articles 4, 5, 6 and 12 and the corresponding rules and procedures of the Decision, the latter shall prevail.

B. INTERPRETATION AND APPLICATION OF ARTICLE 3

1. Article 3.2

(a) "security and predictability"

18. The Appellate Body on *Japan – Alcoholic Beverages II* examined whether the Japanese tax measure governing the taxation of alcoholic beverages violated Article III:2 of *GATT 1994*. After concurring with the Panel's finding that the Liquor Tax Law was not in compliance with Article III:2, the Appellate Body made the following general statement about WTO rules and the concept of "security and predictability":

> "WTO rules are reliable, comprehensible and enforceable. WTO rules are not so rigid or so inflexible as not to leave room for reasoned judgements in confronting the endless and ever-changing ebb and flow of real facts in real cases in the real world. They will serve the multilateral trading system best if they are interpreted with that in mind. In that way, we will achieve the 'security and predictability' sought for the multilateral trading system by the Members of the WTO through the establishment of the dispute settlement system."[15]

19. In *US – Section 301 Trade Act*, the Panel examined the European Communities' argument that Section 301 is inconsistent with Article 23 of the *DSU* as well as various articles of *GATT 1994*. In its examination, the Panel discussed the importance of the concept of "security and predictability" and stated:

> "Providing security and predictability to the multilateral trading system is another central object and purpose of the system which could be instrumental to achieving the broad objectives of the Preamble. Of all WTO disciplines, the DSU is one of the most important instruments to protect the security and predictability of the multilateral trading system and through it that of the market-place and its different operators. DSU provisions must, thus, be interpreted in the light of this object and purpose and in a manner which would most effectively enhance it. In this respect we are referring not only to preambular language but also to positive law provisions in the DSU itself."[16]

20. In *Chile – Alcoholic Beverages*, Chile claimed that the Panel's findings on the issues of "not similarly taxed" and "so as to afford protection" – which had found Chile to be in violation of its WTO obligations under Article

[15] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 31.
[16] Panel Report on *US – Section 301 Trade Act*, para. 7.75.

III:2 of *GATT 1994* – compromised the security and predictability of the multilateral trading system, as provided for in Article 3.2 of the *DSU*. Chile also claimed that the Panel had added to the rights and obligations of WTO Members under the *WTO Agreement*, contrary to Article 19.2 of the *DSU*. The Appellate Body rejected this argument. See paragraph 83 below.

(b) "clarify the existing provisions"

21. In *US – Wool Shirts and Blouses*, the Appellate Body examined whether a complaining party is entitled to a finding on each of the legal claims it makes to a panel. The Appellate Body stated:

> "Given the explicit aim of dispute settlement that permeates the *DSU*, we do not consider that Article 3.2 of the *DSU* is meant to encourage either panels or the Appellate Body to 'make law' by clarifying existing provisions of the *WTO Agreement* outside the context of resolving a particular dispute. A panel need only address those claims which must be addressed in order to resolve the matter in issue in the dispute."[17]

22. In *EC – Poultry*, the Appellate Body held that just as a panel is not required to address every legal claim made by a party, neither does it have an obligation to address every argument made by a party. See paragraph 333 below.

(c) "customary rules of interpretation of public international law"

(i) Rules of "interpretation"

23. In *Argentina – Poultry Anti-Dumping Duties*, Argentina raised as a preliminary issue that prior to bringing WTO dispute settlement proceedings against Argentina's anti-dumping measure, Brazil had challenged that measure before a MERCOSUR Ad Hoc Arbitral Tribunal. Argentina requested that, in light of the prior MERCOSUR proceedings, the Panel refrain from ruling on the claims raised by Brazil in the present WTO dispute settlement proceedings. In the alternative, Argentina asserted that the Panel should be bound by the ruling of the MERCOSUR Tribunal.[18] As regards the subsidiary claim, Argentina claimed that the earlier MERCOSUR ruling was part of the normative framework to be applied by the Panel as a result of Article 31.3(c) of the *Vienna Convention*, whereby "relevant rules of international law applicable in the relations between the parties" shall be taken into account for the purpose of treaty interpretation. The Panel disagreed with Argentina and pointed out that Article 3.2 of the *DSU* is concerned with international rules of treaty *interpretation* rather than of treaty *application:*

> "We note that Article 3.2 of the *DSU* is concerned with international rules of treaty interpretation. Article 31.3(c) of the *Vienna Convention* is similarly concerned with treaty interpretation. However, Argentina has not sought to rely on any law providing that, in respect of relations between Argentina and Brazil, the WTO agreements should be interpreted in a particular way. In particular, Argentina has not relied on any statement or finding in the MERCOSUR Tribunal ruling to suggest that we should interpret specific provisions of the WTO agreements in a particular way. Rather than concerning itself with the interpretation of the WTO agreements, Argentina actually argues that the earlier MERCOSUR Tribunal ruling requires us to rule in a particular way. In other words, Argentina would have us apply the relevant WTO provisions in a particular way, rather than interpret them in a particular way. However, there is no basis in Article 3.2 of the *DSU*, or any other provision, to suggest that we are bound to rule in a particular way, or apply the relevant WTO provisions in a particular way. We note that we are not even bound to follow rulings contained in adopted WTO panel reports,[19] so we see no reason at all why we should be bound by the rulings of non-WTO dispute settlement bodies. Accordingly, we reject Argentina's alternative arguments regarding Article 31.3(c) of the *Vienna Convention*.[20]"[21]

(ii) Article 31 of the Vienna Convention: general rule of interpretation

24. The Appellate Body on *US – Gasoline* stated that the "general rule of interpretation", contained in Article 31[22] of the *Vienna Convention* had attained the status of

---

[17] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 19. With respect to the issue of whether a Panel is required to address all legal claims raised by a party, see pp. 17–18 of the Report.

[18] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.17.

[19] (*footnote original*) See Appellate Body Report, *Japan – Taxes on Alcoholic Beverages* ("*Japan – Alcoholic Beverages II*"), WT/DS8/AB/R, WT/DS10/AB/R, WT/DS11/AB/R, adopted 1 November 1996, p. 14, DSR 1996:I, 125.

[20] (*footnote original*) Even if Argentina had relied on the MERCOSUR Tribunal ruling to argue that particular provisions of the WTO Agreement should be interpreted in a particular way, it is not entirely clear that Article 31.3(c) of the *Vienna Convention* would apply. In particular, it is not clear to us that a rule applicable between only several WTO Members would constitute a relevant rule of international law applicable in the relations between the "parties".

[21] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.41.

[22] Article 31 of the *Vienna Convention* reads:

> "1. A treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.
>
> 2. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes:
>
> (a) any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty;
>
> (b) any instrument which was made by one or more parties in connection with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.
>
> 3. There shall be taken into account, together with the context:

customary or general international law. The Appellate Body added that WTO law was not to be "read in clinical isolation from public international law":

> "The 'general rule of interpretation' set out above has been relied upon by all of the participants and third participants, although not always in relation to the same issue. That general rule of interpretation has attained the status of a rule of customary or general international law. As such, it forms part of the 'customary rules of interpretation of public international law' which the Appellate Body has been directed, by Article 3(2) of the *DSU*, to apply in seeking to clarify the provisions of the *General Agreement* and the other 'covered agreements' of the *Marrakesh Agreement Establishing the World Trade Organization* (the '*WTO Agreement*'). That direction reflects a measure of recognition that the *General Agreement* is not to be read in clinical isolation from public international law."[23]

25. In connection with applying the "customary rules of interpretation of public international law", the Appellate Body in *Japan – Alcoholic Beverages II* stated:

> "Article 31 of the *Vienna Convention* provides that the words of the treaty form the foundation for the interpretative process: 'interpretation must be based above all upon the text of the treaty'."[24]

26. The Panel on *US – Section 301 Trade Act* held that "the elements referred to in Article 31 – text, context and object-and-purpose as well as good faith – are to be viewed as one holistic rule of interpretation rather than a sequence of separate tests to be applied in a hierarchical order."[25] In contrast, the Appellate Body in *US – Shrimp* adopted the following approach:

> "A treaty interpreter must begin with, and focus upon, the text of the particular provision to be interpreted. It is in the words constituting that provision, read in their context, that the object and purpose of the states parties to the treaty must first be sought. Where the meaning imparted by the text itself is equivocal or inconclusive, or where confirmation of the correctness of the reading of the text itself is desired, light from the object and purpose of the treaty as a whole may usefully be sought."[26]

27. In *India – Patents (US)*, the Appellate Body emphasized that the principles of treaty interpretation "neither require nor condone" the importation into a treaty of "words that are not there" nor of "concepts that were not intended":

> "The duty of a treaty interpreter is to examine the words of the treaty to determine the intentions of the parties. This should be done in accordance with the principles of treaty interpretation set out in Article 31 of the *Vienna Convention*. But these principles of interpretation neither require nor condone the imputation into a treaty of words that are not there or the importation into a treaty of concepts that were not intended. . . .These rules must be respected and applied in interpreting the *TRIPS Agreement* or any other covered agreements. . . .Both panels and the Appellate Body must be guided by the rules of treaty interpretation set out in the *Vienna Convention*, and must not add to or diminish rights and obligations provided in the *WTO Agreement*."[27]

28. In *EC – Hormones*, the Appellate Body paraphrased its statement from *India – Patents(US)*, referenced in paragraph 27 above, in the following terms:

> "The fundamental rule of treaty interpretation requires a treaty interpreter to read and interpret the words actually used by the agreement under examination, not words the interpreter may feel should have been used."[28]

29. The Panel on *Canada – Pharmaceutical Patents* held that in the case of the *TRIPS Agreement*, the context of certain TRIPS provisions to which the Panel could have recourse for interpretative purposes also encompassed provisions of the international agreements on intellectual property incorporated into the *TRIPS Agreement*, such as the Berne Convention of 1971:

> "The Panel noted that, in the framework of the TRIPS Agreement, which incorporates certain provisions of the major pre-existing international instruments on intellectual property, the context to which the Panel may have recourse for purposes of interpretation of specific TRIPS provisions, in this case Articles 27 and 28, is not restricted to the text, Preamble and Annexes of the TRIPS Agreement itself, but also includes the provisions of the international instruments on intellectual property incorporated into the TRIPS Agreement, as well as any agreement between the parties relating to these agreements

(a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;

(b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;

(c) any relevant rules of international law applicable in the relations between the parties.

4. A special meaning shall be given to a term if it is established that the parties so intended."

[23] Appellate Body Report on *US – Gasoline*, p. 17. See also Appellate Body Report on *India – Patents (US)*, para. 46; Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 10–12; and Panel Report on *US – DRAMS*, para. 6.13.

[24] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 11.

[25] Panel Report on *US – Section 301 Trade Act*, para. 7.22.

[26] Appellate Body Report on *US – Shrimp*, para. 114. See also Panel Reports on *US – Section 301 Trade Act*, para. 7.22; *India – Patents (US)*, para. 7.18; *US – Underwear*, para. 7.18; Appellate Body Report on *Argentina – Footwear (EC)*, para. 91.

[27] Appellate Body Report on *India – Patents (US)*, paras. 45–46. See also Appellate Body Report on *India – Quantitative Restrictions*, footnote 23, para. 94.

[28] Appellate Body report on *EC – Hormones*, para. 181.

within the meaning of Article 31(2) of the Vienna Convention on the Law of Treaties. Thus, as the Panel will have occasion to elaborate further below, Article 9(2) of the Berne Convention for the Protection of Literary and Artistic Works (1971) (hereinafter referred to as the Berne Convention) is an important contextual element for the interpretation of Article 30 of the TRIPS Agreement."[29]

(iii) Article 31(3)(b) of the Vienna Convention: subsequent practice[30]

Panel reports

30. In *Japan – Alcoholic Beverages II*, the Panel found that "panel reports adopted by the Contracting Parties constitute subsequent practice in a specific case". The Appellate Body disagreed[31] and, in reversing the Panel's findings on this issue, considered "subsequent practice" to mean a "concordant, common and consistent" sequence of acts:

"Article 31(3)(b) of the *Vienna Convention* states that 'any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation' is to be 'taken into account together with the context' in interpreting the terms of the treaty. Generally, in international law, the essence of subsequent practice in interpreting a treaty has been recognized as a 'concordant, common and consistent' sequence of acts or pronouncements which is sufficient to establish a discernible pattern implying the agreement of the parties regarding its interpretation. An isolated act is generally not sufficient to establish subsequent practice; it is a sequence of acts establishing the agreement of the parties that is relevant."[32,33]

Practice amongst Members

31. In *Chile – Price Band System*, Argentina had argued before the Panel that Chile's price band system was a measure "of the kind which has been required to be converted into ordinary customs duties" and which, by the terms of Article 4.2 of the *Agreement on Agriculture* (see Section V.B.3(a) of the Chapter on the *Agreement on Agriculture*) Members are required not to maintain. As regards the interpretation of the phrase "measures which have been required to be converted into ordinary customs duties", Chile contended that it was "highly relevant" that no country that had had a price band system in place before the conclusion of the Uruguay Round had actually converted it into ordinary customs duties. The Appellate Body looked into the possibility that this practice could be considered "subsequent practice" pursuant to Article 31(3)(b) of the *Vienna Convention* and therefore a practice relevant to the interpretation of Article 4.2. The Appellate Body referred to its definition of "subsequent practice" in its Report in *Japan – Alcoholic Beverages II* (see paragraph 30 above) and noted that neither the Panel record nor the submissions of the parties suggested that there was a discernible pattern of acts or pronouncements implying an agreement among WTO Members on the interpretation of Article 4.2. The Appellate Body thus concluded that this practice of some Members alleged by Chile did not amount to a "subsequent practice" within the meaning of Article 31(3)(b) of the *Vienna Convention*.[34]

(iv) Article 31.4: specialized meaning

32. In *Mexico – Telecoms*, the Panel, in the process of considering the meaning of various telecommunications terms (such as linking and interconnection), decided that they were terms that may be given a "special meaning", according to Article 31.4 of the Vienna Convention, "if it is established that the parties so intended". The Panel concluded that, given that the provision at issue was a technical one that appeared in a specialized service sector, the Panel was "entitled to examine what 'special meaning' it may have in the telecommunications context".[35]

(v) Article 32 of the Vienna Convention: supplementary means of interpretation

General

Status of Article 32

33. In *Japan – Alcoholic Beverages II*, the Appellate Body recalled its statement in *US – Gasoline* that there is a need to achieve clarification by reference to the fundamental rule of treaty interpretation set out in Article 31(1) of the *Vienna Convention* and that this general rule "has attained the status of a rule of customary or general international law".[36] The Appellate Body then went on to state in *Japan – Alcoholic Beverages II* that Article 32 of the *Vienna Convention*,[37] which deals with

[29] Panel Report on *Canada – Pharmaceutical Patents*, para. 7.14.
[30] Article 31(3)(b) of the *Vienna Convention* provides that "any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation" is to be "taken into account together with the context" in interpreting the terms of the treaty.
[31] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 12.
[32] (*footnote original*) Yearbook of the International Law Commission, Vol. II, p. 222; Sinclair, *supra.*, footnote 24, p. 138.
[33] Appellate Body Report on *Japan – Alcoholic Beverages II*, pp. 12–13. See also Panel Report on *US – FSC*, para. 7.75.
[34] Appellate Body Report on *Chile – Price Band System*, paras. 213–214.
[35] Panel Report on *Mexico – Telecoms*, paras. 7.108–7.117.
[36] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 10.
[37] Article 32 of the *Vienna Convention* reads: "Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion, in order to confirm the meaning resulting from the application of Article 31, or to determine the meaning when the interpretation according to Article 31:
(a) leaves the meaning ambiguous or obscure; or
(b) leads to a result which is manifestly absurd or unreasonable."

the role of supplementary means of interpretation, "has also attained the same status".[38]

When to resort to Article 32

34. In *Canada – Dairy*, the Appellate Body, disagreeing with the Panel, considered that a certain notation in Canada's Schedule was not clear and thus, it was "appropriate to turn to 'supplementary means of interpretation' pursuant to Article 32 of the *Vienna Convention*".[39]

Circumstances of the conclusion of a treaty

Negotiating history

35. The Appellate Body on *EC – Computer Equipment* found that the "circumstances of [the] conclusion" of a treaty, which is a supplementary means of interpretation under Article 32 of the *Vienna Convention*, permits in certain cases the examination of the historical background against which the treaty was negotiated:

> "The application of these rules in Article 31 of the *Vienna Convention* will usually allow a treaty interpreter to establish the meaning of the term. However, if after applying Article 31 the meaning of the term remains ambiguous or obscure, or leads to a result which is manifestly absurd or unreasonable, Article 32 allows a treaty interpreter to have recourse to:
>
> > '. . . supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion.'
>
> With regard to 'the circumstances of [the] conclusion' of a treaty, this permits, in appropriate cases, the examination of the historical background against which the treaty was negotiated."[40]

36. In *US – Export Restraints*, the Panel recalled the decision of the Appellate Body in *Japan – Alcoholic Beverages II* (see paragraph 30 above) and stated that "pursuant to Article 32 of the *Vienna Convention*, negotiating history can thus be invoked as a supplementary means of interpretation, to confirm a conclusion reached on the basis of a textual and contextual analysis of a treaty".[41]

37. In *Egypt – Steel Rebar*, the Panel referred to the negotiating history of Annex II of the *Anti-Dumping Agreement* as confirmation of its views that the provisions of this Annex that address what information can be used as facts available "have to do with ensuring the reliability of the information used by the investigating authority":

> "It is clear that the provisions of Annex II that address what information can be used as facts available (which, along with the other provisions of Annex II, 'shall be observed') have to do with ensuring the reliability of the information used by the investigating authority. This view may further be confirmed, as foreseen in Article 32 of the Vienna Convention on the Law of Treaties,[42] by the negotiating history of Annex II. In particular, this Annex was originally developed by the Tokyo Round Committee on Anti-Dumping Practices, which adopted it on 8 May 1984 as a 'Recommendation Concerning Best Information Available in Terms of Article 6:8'.[43] During the Uruguay Round negotiations, the substantive provisions of the original recommendation were incorporated with almost no changes as Annex II to the AD Agreement. A preambular paragraph to the original recommendation, which was not retained when Annex II was created, in our view, provides some insight into the intentions of the drafters concerning its application. This paragraph reads as follows:
>
> > The authorities of the importing country have a right and an obligation to make decisions on the basis of the best information available during the investigation from whatever source, even where evidence has been supplied by the interested party. The Anti-Dumping Code recognizes the right of the importing country to base findings on the facts available when any interested party refuses access to or does not provide the necessary information within a reasonable period, or significantly impedes the investigation (Article 6:8). However, all reasonable steps should be taken by the authorities of the importing countries to avoid the use of information from unreliable sources.
>
> To us, this preambular language conveys that the *full* package of provisions in the recommendation, applicable in implementing Article 6:8 of the Tokyo Round Anti-Dumping Code, was intended, *inter alia,* to ensure that in using facts available (i.e., in applying Article 6:8), information from unreliable sources would be avoided."[44]

Customs classification practice

38. The Appellate Body on *EC – Computer Equipment* further considered that the classification practice of the European Communities was part of the "circumstances of the conclusion" of the WTO Agreement and that this may be used as a supplementary means of interpretation:

> "In the light of our observations on 'the circumstances of [the] conclusion' of a treaty as a supplementary means of interpretation under Article 32 of the *Vienna Convention*, we consider that the classification practice in the European Communities during the Uruguay Round is part of 'the circumstances of [the] conclusion' of the *WTO Agreement* and may be used as a supplementary

[43] ADP/21.
[44] Panel Report on *Egypt – Steel Rebar*, para. 7.154.

means of interpretation within the meaning of Article 32 of the *Vienna Convention*."[45]

39. With respect to the question whether the classification practice of one country, existing at the time of tariff negotiation, was relevant for the interpretation of a country's Schedule of concessions, the Appellate Body, in *EC – Computer Equipment*, emphasized that while of limited value, such unilateral practice was not irrelevant; also, the Appellate Body found that where such unilateral practice of one Member was inconsistent, it could not be considered relevant:

"We note that the Panel examined the classification practice of only the European Communities, and found that the classification of LAN equipment by the United States during the Uruguay Round tariff negotiations was not relevant. The purpose of treaty interpretation is to establish the *common* intention of the parties to the treaty. To establish this intention, the prior practice of only *one* of the parties may be relevant, but it is clearly of more limited value than the practice of all parties. In the specific case of the interpretation of a tariff concession in a Schedule, the classification practice of the importing Member, in fact, may be of great importance. However, the Panel was mistaken in finding that the classification practice of the United States was *not* relevant.

. . .

Then there is the question of the *consistency* of prior practice. Consistent prior classification practice may often be significant. Inconsistent classification practice, however, c*annot* be relevant in interpreting the meaning of a tariff concession."[46]

Agreements between Members

40. In *EC – Poultry*, the Appellate Body found that a bilateral agreement between two WTO Members could serve as "supplementary means" of interpretation for a provision of a covered agreement:

"[T]he Oilseeds Agreement may serve as a *supplementary means* of interpretation of Schedule LXXX pursuant to Article 32 of the *Vienna Convention*, as it is part of the historical background of the concessions of the European Communities for frozen poultry meat."[47]

Working documents of the GATT Secretariat

41. In *Mexico – Telecoms*, the Panel considered that an Explanatory Note issued by the GATT Secretariat as a working document for the Group of Negotiations on Services was part of the "circumstances" of the conclusion of the GATS, within the meaning of Article 32 of the Vienna Convention:

"In interpreting the scope of cross border supply in Article I:2(a) of the GATS, we need not decide whether the Explanatory Note provides 'context' (as an agreement or instrument made in connection with the conclusion of the GATS) under paragraph 2 of Article 31 of the Vienna Convention, or whether it can be 'taken into account', together with the context, as a subsequent agreement or practice under paragraph 3 of the same provision. In any case, we consider that the source, content and use of the Explanatory Note make it part of the 'circumstances' of the conclusion of the GATS, within the meaning of Article 32 of the Vienna Convention. We may therefore properly have recourse to the Explanatory Note to confirm our understanding of the ordinary meaning of Article I:2(a) of the GATS."[48]

"*In dubio mitius*"

42. In *EC – Hormones*, the Appellate Body referred to "the interpretative principle of *in dubio mitius*" as a supplementary means of interpretation "widely recognized in international law". It there stated that "the principle of *in dubio mitius* applies in interpreting treaties, in deference to the sovereignty of states. If the meaning of a term is ambiguous, that meaning is to be preferred which is less onerous to the party assuming an obligation, or which interferes less with the territorial and personal supremacy of a party, or involves less general restrictions upon the parties."[49]

(vi) Good faith

43. In *US – Shrimp*, the Appellate Body held that the chapeau of Article XX was "but one expression of good faith" and also reflected the notion of "*abus de droit*":

"The chapeau of Article XX is, in fact, but one expression of the principle of good faith. This principle, at once a general principle of law and a general principle of international law, controls the exercise of rights by states. One application of this general principle, the application widely known as the doctrine of *abus de droit*, prohibits the abusive exercise of a state's rights and enjoins that whenever the assertion of a right 'impinges on the field covered by [a] treaty obligation, it must be exercised bona fide, that is to say, reasonably.'[50] An abusive exer-

[47] Appellate Body Report on *EC – Poultry*, para. 83.
[48] Panel Report on *Mexico – Telecoms*, para. 7.44. The Panel also found that the Draft Model Schedule and the Note by the Chairman to the Scheduling Guidelines were, with respect to the GATS Protocol on Telecommunications, an important part of the "circumstances of its conclusion" within the meaning of Article 32 of the Vienna Convention. Panel Report on *Mexico – Telecoms*, para. 7.67.
[49] Appellate Body Report on *EC – Hormones*, footnote 154.
[50] (*footnote original*) B. Cheng, *General Principles of Law as applied by International Courts and Tribunals* (Stevens and Sons, Ltd., 1953), Chapter 4, in particular p. 125, elaborates:

> . . . A reasonable and bona fide exercise of a right in such a case is one which is appropriate and necessary for the purpose of the right (*i.e.*, in furtherance of the interests which the right is intended to protect). It should at the same time be *fair and*

> cise by a Member of its own treaty right thus results in a breach of the treaty rights of the other Members and, as well, a violation of the treaty obligation of the Member so acting. Having said this, our task here is to interpret the language of the chapeau, seeking additional interpretative guidance, as appropriate, from the general principles of international law."[51]

44. In *US – Hot-Rolled Steel*, the Appellate Body noted that the pervasive principle of good faith "informs the provisions of the *Anti-Dumping Agreement*, as well as the other covered agreements".[52]

45. In *US – Export Restraints*,[53] the Panel mentioned the decision of the Appellate Body in *US – Gasoline* which referred to "a fundamental rule of treaty interpretation [which] has received its most authoritative and succinct expression in [Article 31.1 of] the *Vienna Convention on the Law of Treaties* ('*Vienna Convention*')",[54] i.e. good faith.

46. In *EC – Computer Equipment*, the Appellate Body examined whether the Panel had erred in interpreting the meaning of a tariff concession in the European Communities Schedule in light of the "legitimate expectations" of an exporting Member (see Section on legitimate expectations, paragraphs 73–76 below). The Appellate Body disagreed with the Panel's finding that the tariff concession of a Member may be determined on the basis of the "legitimate expectation" of just one (namely the exporting) Member and emphasized that it was rather the *common intention* of the parties that should be ascertained. The Appellate Body stated:

> "[W]e do not agree with the Panel that interpreting the meaning of a concession in a Member's Schedule in the light of the 'legitimate expectations' of exporting Members is consistent with the principle of good faith interpretation under Article 31 of the *Vienna Convention*. Recently, in *India – Patents*, the panel stated that good faith interpretation under Article 31 required 'the protection of legitimate expectations'. We found that the panel had misapplied Article 31 of the *Vienna Convention*. . .
>
> The purpose of treaty interpretation under Article 31 of the *Vienna Convention* is to ascertain the *common* intentions of the parties. These *common* intentions cannot be ascertained on the basis of the subjective and unilaterally determined 'expectations' of *one* of the parties to a treaty. Tariff concessions provided for in a Member's Schedule – the interpretation of which is at issue here – are reciprocal and result from a mutually-advantageous negotiation between importing and exporting Members. A Schedule is made an integral part of the GATT 1994 by Article II:7 of the GATT 1994. Therefore, the concessions provided for in that Schedule are part of the terms of the treaty. As such, the only rules which may be applied in interpreting the meaning of a concession are the general rules of treaty interpretation set out in the *Vienna Convention*."[55]

47. In *US – Offset Act (Byrd Amendment)*, the Appellate Body, recalling its previous reports in *US – Shrimp* and *US – Hot-Rolled Steel*, acknowledged that "there is a basis for a dispute settlement panel to determine, in an appropriate case, whether a Member has not acted in good faith".[56] However, it further stressed that "[n]othing . . . in the covered agreements supports the conclusion that simply because a WTO Member is found to have violated a substantive treaty provision, it has therefore not acted in good faith. In our view, it would be necessary to prove more than mere violation to support such a conclusion."[57]

48. Interpreting the above considerations by the Appellate Body, the Panel in *Argentina – Poultry Anti-Dumping Duties* explained that "two conditions must be satisfied before a Member may be found to have failed to act in good faith. First, the Member must have violated a substantive provision of the WTO agreements. Second, there must be something 'more than mere violation'."[58]

49. As regards the application of the principle of good faith in the context of the obligation to engage in dispute settlement procedures in good faith in an effort

---

> *equitable as between the parties* and not one which is calculated to procure for one of them an unfair advantage in the light of the obligation assumed. A reasonable exercise of the right is regarded as compatible with the obligation. But the exercise of the right in such a manner as to prejudice the interests of the other contracting party arising out of the treaty is unreasonable and is considered as inconsistent with the bona fide execution of the treaty. . . .(emphasis added)

to resolve a dispute pursuant to Article 3.10 of the *DSU*, see Section III.B.6(a) below.

(vii) Principle of effective treaty interpretation

50. The Appellate Body on *US – Gasoline* considered the principle of effective treaty interpretation (*ut res magis valeat quam pereat*)[59] as "one of the corollaries of the 'general rule of interpretation' in the *Vienna Convention*". In particular, the Appellate Body stated:

> "One of the corollaries of the 'general rule of interpretation' in the *Vienna Convention* is that interpretation must give meaning and effect to all the terms of a treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility.[60]"[61]

51. In application of the principle of effective treaty interpretation as defined in paragraph 50 above, the Appellate Body in *US – Gasoline* found that the Panel had erroneously applied the same standard of discrimination to Article III:4 of *GATT 1994* and to the chapeau of Article XX of *GATT 1994*. The Appellate Body held that to do so would be to effectively deprive the chapeau of its meaning and found that such an approach would be contrary to the principle of giving "meaning and effect to all the terms of a treaty":

> "The enterprise of applying Article XX would clearly be an unprofitable one if it involved no more than applying the standard used in finding that the baseline establishment rules were inconsistent with Article III:4. That would also be true if the finding were one of inconsistency with some other substantive rule of the *General Agreement*. The provisions of the chapeau cannot logically refer to the same standard(s) by which a violation of a substantive rule has been determined to have occurred. To proceed down that path would be both to empty the chapeau of its contents and to deprive the exceptions in paragraphs (a) to (j) of meaning . . . One of the corollaries of the 'general rule of interpretation' in the *Vienna Convention* is that interpretation must give meaning and effect to all the terms of a treaty. An interpreter is not free to adopt a reading that would result in reducing whole clauses or paragraphs of a treaty to redundancy or inutility."[62]

52. In *Japan – Alcoholic Beverages II*, the Appellate Body referred to its ruling in *US – Gasoline* (see paragraph 50 above) and indicated that "a fundamental tenet of treaty interpretation flowing from the general rule of interpretation set out in Article 31 is the principle of effectiveness (*ut res magis valeat quam perea)*".[63] The Appellate Body concluded that "Article III:1 constitutes part of the context of Article III:2, in the same way that it constitutes part of the context of each of the other paragraphs in Article III. Any other reading of Article III would have the effect of rendering the words of Article III:1 meaningless, thereby violating the fundamental principle of effectiveness in treaty interpretation."[64]

53. In *US – Underwear*, the Appellate Body invoked the principle of effective interpretation to sustain its conclusion that the common, day-to-day, implication which arises from the language of Article 6.7 of the *Agreement on Textiles and Clothing* is that a restraint is to be applied in the future, after the consultations, should these prove fruitless and the proposed measure not be withdrawn.[65]

54. In *Korea – Dairy*, the Appellate Body recalled the principle of effective treaty interpretation as it had defined it in *US – Gasoline* (see paragraph 24 above) and concluded that:

> "In light of the interpretive principle of effectiveness, it is the *duty* of any treaty interpreter to 'read all applicable provisions of a treaty in a way that gives meaning to *all* of them, harmoniously.'[66] An important corollary of this principle is that a treaty should be interpreted as a whole, and, in particular, its sections and parts should be read as a whole.[67] Article II:2 of the *WTO Agree-*

[67] (*footnote original*) The duty to interpret a treaty as a whole has been clarified by the Permanent Court of International Justice in *Competence of the I.L.O. to Regulate Agricultural Labour* (1922), PCIJ, Series B, Nos. 2 and 3, p. 23. This approach has been followed by the International Court of Justice in *Ambatielos Case* (1953) *ICJ Reports*, p. 10; *Reservations to the Convention on the Prevention and Punishment of the Crime of Genocide* (1951) *ICJ Reports*, p. 15; and *Case Concerning Rights of United States Nationals in Morocco* (1952) *ICJ Reports*, pp. 196–199. See also I. Brownlie, *Principles of Public International Law*, 5th ed. (Clarendon Press, 1998), p. 634; G. Fitzmaurice, "The Law and Procedure of the International Court of Justice 1951–1954: Treaty Interpretation and Other Treaty Points", 33 *British Yearbook of International Law* (1957), p. 211 at p. 220; A. McNair, *The Law of Treaties* (Clarendon Press, 1961), pp. 381–382; I. Sinclair, *The Vienna Convention on the Law of Treaties* (Manchester University Press, 1984), pp. 127–129; M. O. Hudson, *La Cour Permanente de Justice Internationale* (Editions A Pedone, 1936), pp. 654–659; and L. A. Podesta Costa and J. M. Ruda, *Derecho Internacional Público*, Vol. 2 (Tipográfica, 1985), p. 105.

> *ment* expressly manifests the intention of the Uruguay Round negotiators that the provisions of the *WTO Agreement* and the Multilateral Trade Agreements included in its Annexes 1, 2 and 3 must be read as a whole."[68]

55. In *Korea – Dairy*, the Appellate Body applied the principle of effective treaty interpretation to the relationship between the *Agreement on Safeguards* and Article XIX of *GATT 1994* and concluded that "having said that *all of the provisions* of a treaty must be given meaning and legal effect, we believe that the clause in Article XIX:1(a) – 'as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . .' – must have meaning".[69] The Appellate Body therefore disagreed with the Panel on the latter's conclusion whereby the clause in Article XIX:1(a) of *GATT 1994* – "as a result of unforeseen developments and of the effect of the obligations incurred by a Member under this Agreement, including tariff concessions . . . does not add conditions for any measure to be applied pursuant to Article XIX but rather serves as an explanation of why an Article XIX measure may be needed".[70]

56. The same issue as referenced in paragraph 55 above arose in *Argentina – Footwear (EC)*. In this case, the Appellate Body also considered whether the Panel had reached a correct conclusion concerning the relationship between the *Agreement on Safeguards* and Article XIX of *GATT 1994*. The Appellate Body agreed with the Panel that "Article XIX of GATT and the Safeguards Agreement must *a fortiori* be read as representing an inseparable package of rights and disciplines which have to be considered in conjunction". However, the Appellate Body reversed the Panel's finding that the "*express omission* of the criterion of unforeseen developments in the [*Agreement on Safeguards*] (which otherwise transposes, reflects and refines in great detail the essential conditions for the imposition of safeguard measures provided for in Article XIX of GATT) must . . . have meaning".[71] The Appellate Body held:

> "[A] treaty interpreter must read all applicable provisions of a treaty in a way that gives meaning to *all* of them, harmoniously. And, an appropriate reading of this 'inseparable package of rights and disciplines' must, accordingly, be one that gives meaning to *all* the relevant provisions of these two equally binding agreements."[72]

57. In *Canada – Dairy*, the Appellate Body made it clear that a treaty interpreter cannot lightly assume that a WTO Member intended no specific purpose when inscribing a term in its schedule.

> "In interpreting the language in Canada's Schedule, the Panel focused on the verb 'represents' and opined that, because of the use of this verb, the notation was no more than a '*description*' of the 'way the size of the quota was determined'. The net consequence of the Panel's interpretation is a failure to give the notation in Canada's Schedule *any* legal effect as a 'term and condition'. If the language is *merely* a 'description' or a 'narration' of how the quantity was arrived at, we do not see what purpose it serves in being inscribed in the Schedule. The Panel, in other words, acted upon the assumption that Canada projected no identifiably necessary or useful qualifying or limiting purpose in inscribing the notation in its Schedule. The Panel thus disregarded the principle of effectiveness in its interpretive effort."[73]

58. In *US – Section 211 Appropriations Act*, the Appellate Body disagreed with the Panel's view that the words "in respect of" in Article 2.1 of the *TRIPS Agreement* have the effect of "conditioning" Members' obligations under the Articles of the Paris Convention (1967) incorporated into the *TRIPS Agreement*, with the result that trade names are not covered. In reference to its previous rulings in *US – Gasoline* (see paragraph 50 above) and *Japan – Alcoholic Beverages II* (see paragraph 52 above) concerning the principle of effective interpretation, the Appellate Body considered that to "adopt the Panel's approach would be to deprive Article 8 of the Paris Convention (1967), as incorporated into the *TRIPS Agreement* by virtue of Article 2.1 of that Agreement, of any and all meaning and effect".[74]

(viii) Article 33 of the Vienna Convention: plurilingual treaties

59. In *India – Quantitative Restrictions*, the Panel, when examining the meaning of certain terms in the Ad Note to Article XVIII:11 of the GATT 1994, noted that its interpretation was consistent with the Spanish and French versions of the Agreement.[75]

60. In *EC – Asbestos*, the Panel considered that "[a]s the WTO Agreement is a treaty with authentic texts in three languages, it is . . . important to bear in mind the spirit underlying the provisions of Article

33[76]".[77] The Appellate Body also referred to the different authentic languages and examined the term "similar" as compared to "*produits similaires*" and "*productos similares*" since both French and Spanish versions of the WTO Agreements, "together with the English version, are equally authentic[78]".[79]

61. In *Chile – Price Band System*, the Panel, when attempting to define the term "ordinary customs duty", had found that the dictionary meanings of the English term, on the one hand, and the French and Spanish corresponding terms, on the other hand, differed in the way they defined "ordinary". The Appellate Body, which disagreed with the Panel's interpretation of this term, noted that the Panel had interpreted the French and Spanish versions of the term "ordinary customs duty" to mean something different from the ordinary meaning of the English version of that term. In this regard, the Appellate Body stated that "It is difficult to see how, in doing so, the Panel took into account the rule of interpretation codified in Article 33(4)[80] of the *Vienna Convention* whereby 'when a comparison of the authentic texts discloses a difference of meaning . . ., the meaning which best *reconciles* the texts . . . shall be adopted' (emphasis added).[81]

(ix) Presumption against conflict

GATT 1994 and the Annex 1A Agreements

62. In *EC – Bananas III*, given the existence of claims raised under *GATT 1994*, the *Licensing Agreement* and the *TRIMs Agreement*, the Panel was required to consider the interpretative interrelationship of these three agreements. In so doing, it first referred to the *General Interpretative Note to Annex 1A* of the *WTO Agreement*, which provides that in the event of conflict between a provision of the *GATT 1994* and another Agreement of Annex 1A, the provision of the other Agreement prevails. Noting that both the *Licensing Agreement* and the *TRIMs Agreement* are agreements in Annex 1A to *WTO Agreement*, the Panel, in a finding not reviewed by the Appellate Body, concluded that, in the case before it, "no conflicting, i.e. mutually exclusive, obligations arise from the provisions of the three Agreements . . . ".[82] See paragraphs 902–911 below.

Issue of *lex specialis* / conflict

63. In *Indonesia – Autos*, Indonesia argued that the measures under examination were subsidies and therefore the *SCM Agreement*, being *lex specialis*, was the only "applicable law" (to the exclusion of other WTO provisions). The Panel recalled that a presumption against conflict existed in public international law:

> "We recall the Panel's finding in *Indonesia – Autos*, a dispute where
>
> > 'In considering Indonesia's defence that there is a general conflict between the provisions of the SCM Agreement and those of Article III of GATT, and consequently that the SCM Agreement is the only applicable law, we recall first that in public international law there is a presumption against conflict. This presumption is especially relevant in the WTO context[83] since all WTO agreements, including GATT 1994 which was modified by Understandings when judged necessary, were negotiated at the same time, by the same Members and in the same forum. In this context we recall the principle of effective interpretation pursuant to which all provisions of a treaty (and in the WTO system all agreements) must be given meaning, using the ordinary meaning of words.' "[84]

[76] (*footnote original*) The Panel also notes the importance attached by the Appellate Body to the principle of effectiveness (*ut res magis valeat quam pereat)* concerning the interpretation of the provisions of the WTO Agreement in several cases (see, for example, *United States – Standards for Reformulated and Conventional Gasoline,* adopted on 20 May 1996, WT/DS60/AB/R (hereinafter "*United States – Gasoline*"), op. cit., pp.18 and 23; *Guatemala – Cement*, op. cit., para. 75; *Argentina – Safeguards*, op. cit., para. 88. The Panel also notes in the *Reports of the Commission to the General Assembly, Yearbook of the International Law Commission,* 1966, Volume II, A/CN.4/SER.A/1966/Add.1, p. 219, that the International Law Commission indicates that:

> "[. . .] in so far as the maxim *ut res magis valeat quam pereat* reflects a true general rule of interpretation, it is embodied in Article [31], paragraph 1, which requires that a treaty shall be interpreted *in good faith* in accordance with the ordinary meaning to be given to its terms in the context of the treaty *and in the light of its object and purpose.* When a treaty is open to two interpretations one of which does and the other does not enable the treaty to have appropriate effects, good faith and the object and purposes of the treaty demand that the former interpretation should be adopted." [Italics in the original.]

[78] (*footnote original*) *WTO Agreement*, final, authenticating clause. See also Article 33(1) of the *Vienna Convention on the Law of the Treaties*, done at Vienna, 23 May 1969, 1155 UNTS 331; 8 *International Legal Materials* 679.

[79] Appellate Body Report on *EC – Asbestos*, para. 91.

[80] Article 33(4) of the *Vienna Convention* provides:

> "Except where a particular text prevails in accordance with paragraph 1, when a comparison of the authentic texts discloses a difference of meaning which the application of Articles 31 and 32 does not remove, the meaning which best reconciles the texts, having regard to the object and purpose of the treaty, shall be adopted."

[81] Appellate Body Report on *Chile – Price Band System*, para. 271.

[82] Panel Report on *EC – Bananas III*, paras. 7.157–7.163.

[83] (*footnote original*) In this context we note that the WTO Agreement contains a specific rule on conflicts which is however limited to conflicts between a specific provision of GATT 1994 and a provision of another agreement of Annex 1A. We do not consider this interpretative note in this section of the report because we are dealing with Indonesia's argument that there is a general conflict between Article III and the SCM Agreement, while the note is concerned with specific conflicts between a provision of GATT 1994 and a specific provision of another agreement of Annex 1A.

[84] Panel Report on *Indonesia – Autos*, para. 14.28. See also Panel Report on *Turkey – Textiles*, paras. 9.92–9.95.

64. As regards the presumption against conflict when in relation to special or additional rules and procedure, see paragraphs 6–8 above.

(x) Non-retroactivity of treaties

65. In *Brazil – Desiccated Coconut*, the Appellate Body discussed Article 28 of the *Vienna Convention*,[85] i.e. the provision containing the general principle of non-retroactivity of treaties:

> "The fundamental question in this case is one of the temporal application of one set of international legal norms, or the successor set of norms, to a particular measure taken during the period of co-existence of the GATT 1947 and the *Tokyo Round SCM Code* with the *WTO Agreement*. Article 28 of the *Vienna Convention* contains a general principle of international law concerning the non-retroactivity of treaties.
>
> . . .
>
> Article 28 states the general principle that a treaty shall not be applied retroactively 'unless a different intention appears from the treaty or is otherwise established'. Absent a contrary intention, a treaty cannot apply to acts or facts which took place, or situations which ceased to exist, before the date of its entry into force."[86]

66. In *EC – Hormones*, the Appellate Body examined the Panel's finding that the *SPS Agreement* should apply to the European Communities measures that were enacted before the entry into force of the *WTO Agreement* on 1 January 1995 because the measures continued to exist after that date and the *SPS Agreement* does not indicate any intention to limits its application to measures enacted after the entry into force of the *WTO Agreement*. The Appellate Body stated:

> "We agree with the Panel that the *SPS Agreement* would apply to situations or measures that did not cease to exist, such as the 1981 and 1988 Directives, unless the *SPS Agreement* reveals a contrary intention. We also agree with the Panel that the *SPS Agreement* does not reveal such an intention. The *SPS Agreement* does not contain any provision limiting the temporal application of the *SPS Agreement*, or of any provision thereof, to SPS measures adopted after 1 January 1995. In the absence of such a provision, it cannot be assumed that central provisions of the *SPS Agreement*, such as Articles 5.1 and 5.5, do not apply to measures which were enacted before 1995 but which continue to be in force thereafter. If the negotiators had wanted to exempt the very large group of SPS measures in existence on 1 January 1995 from the disciplines of provisions as important as Articles 5.1 and 5.5, it appears reasonable to us to expect that they would have said so explicitly. Articles 5.1 and 5.5 do not distinguish between SPS measures adopted before 1 January 1995 and measures adopted since; the relevant implication is that they are intended to be applicable to both."[87]

67. In *Canada – Patent Term*, the Appellate Body stated that Article 70.1 of the *TRIPS Agreement* excludes obligations in respect of "acts which occurred" before the date of the application of the *TRIPS Agreement* but does not exclude rights and obligations in respect of continuing situations. The Appellate Body, in noting that its interpretation did not lead to a retroactive application of the *TRIPS Agreement*, stated:

> "Article 28 of the *Vienna Convention* covers not only any 'act', but also any 'fact' or 'situation which ceased to exist'. Article 28 establishes that, in the absence of a contrary intention, treaty provisions do *not* apply to 'any situation which ceased to exist' before the treaty's entry into force for a party to the treaty. Logically, it seems to us that Article 28 also necessarily implies that, absent a contrary intention, treaty obligations *do* apply to any 'situation' which has *not* ceased to exist – that is, to any situation that arose in the past, but continues to exist under the new treaty. Indeed, the very use of the word 'situation' suggests something that subsists and continues over time; it would, therefore, include 'subject matter existing . . . and which is protected', such as Old Act patents at issue in this dispute, even though those patents, and the rights conferred by those patents, arose from 'acts which occurred' before the date of application of the *TRIPS Agreement* for Canada.
>
> This interpretation is confirmed by the Commentary on Article 28, which forms part of the preparatory work of the *Vienna Convention*:
>
> . . .
>
> We note that Article 28 of the *Vienna Convention* is not applicable if 'a different intention appears from the treaty or is otherwise established'. We see no such 'different intention' in Article 70. Despite some differences in wording and structure from Article 28, we do not see Article 70.1 as in any way establishing 'a different intention' within the meaning of Article 28 of the *Vienna Convention*."[88]

(xi) State responsibility

General

68. In *Turkey – Textiles*, the Panel noted that in public international law, Turkey could be held responsible for the measures taken by the customs union between Turkey and the European Communities. The Panel

[85] Article 28 of the *Vienna Convention* provides:

> "Unless a different intention appears from the treaty or is otherwise established, its provisions do not bind a party in relation to any act or fact which took place or any situation which ceased to exist before the date of the entry into force of the treaty with respect to that party."

[86] Appellate Body Report on *Brazil – Desiccated Coconut*, p. 14.
[87] Appellate Body Report on *EC – Hormones*, para. 128.
[88] Appellate Body Report on *Canada – Patent Term*, paras. 72–74.

noted and quoted the separate opinion of Judge Shahabuddeen in the *Nauru* case before the ICJ:

> "'[T]he [International Law Commission] considered, that *where States act through a common organ, each State is separately answerable for the wrongful act of the common organ*. That view, it seems to me, runs in the direction of supporting Nauru's contention that each of the three States in this case is jointly and severally responsible for the way Nauru was administered on their behalf by Australia, whether or not Australia may be regarded as technically as a common organ. . . ."[89] (Emphasis added.)[90]

69. The Panel on *Turkey – Textiles* also noted the International Law Commission's commentaries to the adopted report:

> "A similar conclusion is called for in cases of parallel attribution of a single course of conduct to several States, as when the conduct in question has been adopted by an organ common to a number of States. According to the principles on which the articles of chapter II of the draft are based, *the conduct of the common organ cannot be considered otherwise than as an act of each of the States whose common organ it is. If that conduct is not in conformity with an international obligation, then the two or more States will concurrently have committed separate, although identical, internationally wrongful acts*. It is self-evident that the parallel commission of identical offences by two or more States is altogether different from participation by one of those States in an internationally wrongful act committed by the other."[91] (Emphasis added.)[92]

70. In *US – Section 301 Trade Act*, although it eventually held that a statute "which . . . reserves the right for the Member concerned to do something which it has promised *not* to do under Article 23.2(a)" was a violation of Article 23.2(a) read together with Article 23.1 (see paragraph 3 below), the Panel made the following general statement on State responsibility:

> "[U]nder traditional public international law, legislation under which an eventual violation could, or even would, subsequently take place, does not normally in and of itself engage State responsibility. If, say, a State undertakes not to expropriate property of foreign nationals without appropriate compensation, its State responsibility would normally be engaged only at the moment foreign property had actually been expropriated in a given instance."[93]

Proportionality of countermeasures

71. In *US – Cotton Yarn*, the Appellate Body referred to the rules of general international law on state responsibility as supporting its conclusions on the reasons why a comparative analysis is needed as part of the attribution of serious damage analysis under Article 6.4, second sentence of the *Agreement on Textiles and Clothing*. The Appellate Body pointed out the need for proportionality as between the serious damage and the countermeasure imposed. It indicated that "[its] view is supported further by the rules of general international law on state responsibility, which require that countermeasures in response to breaches by states of their international obligations be commensurate with the injury suffered":

> "[T]he part of the total serious damage attributed to an exporting Member must be proportionate to the damage caused by the imports from that Member. Contrary to the view of the United States, we believe that Article 6.4, second sentence, does not permit the attribution of the totality of serious damage to one Member, unless the imports from that Member alone have caused all the serious damage.
>
> Our view is supported further by the rules of general international law on state responsibility, which require that countermeasures in response to breaches by states of their international obligations be commensurate with the injury suffered. In the same vein, we note that Article 22.4 of the DSU stipulates that the suspension of concessions shall be equivalent to the level of nullification or impairment. This provision of the DSU has been interpreted consistently as not justifying punitive damages. These two examples illustrate the consequences of breaches by states of their international obligations, whereas a safeguard action is merely a remedy to WTO-consistent 'fair trade' activity. It would be absurd if the breach of an international obligation were sanctioned by proportionate countermeasures, while, in the absence of such breach, a WTO Member would be subject to a disproportionate and, hence, 'punitive', attribution of serious damage not wholly caused by its exports. In our view, such an exorbitant derogation from the principle of proportionality in respect of the attribution of serious damage could be justified only if the drafters of the *ATC* had expressly provided for it, which is not the case."[94]

72. In *US – Line Pipe*, also in the context of the application of a safeguard, the Appellate Body emphasized the importance of the state responsibility rules which

---

[89] (*footnote original*) *Nauru* case, Separate Opinion of Judge Shahabuddeen, at 284. Clark, R., Book review of *Nauru: Environmental Damage Under International Trusteeship* (C. Weeramantry), *The International Lawyer* Vol. 28, No. 1, at 186.

[90] Panel Report on *Turkey – Textiles*, para. 9.42.

[91] (*footnote original*) See the *Yearbook of the International Law Commission*, 1978, Vol.II, Part Two, at 99. These commentaries were adopted by the Commission in its session of 8 May to 28 July 1978. Article 27 on state responsibility to which these commentaries refer was adopted at the ILC session of 6 May to 26 July 1996. These commentaries and the report were submitted in the same years to the United Nations General Assembly for its consideration.

[92] Panel Report on *Turkey – Textiles*, para. 9.43.

[93] Panel Report on *US – Section 301 Trade Act*, para. 7.80.

[94] Appellate Body Report on *US – Cotton Yarn*, paras. 119–120.

command the need for proportionality when imposing countermeasures:

> "If the pain inflicted on exporters by a safeguard measure were permitted to have effects beyond the share of injury caused by increased imports, this would imply that an exceptional remedy, which is not meant to protect the industry of the importing country from unfair or illegal trade practices, could be applied in a more trade-restrictive manner than countervailing and anti-dumping duties. On what basis should the *WTO Agreement* be interpreted to limit a countermeasure to the extent of the injury caused by unfair practices or a violation of the treaty but not so limit a countermeasure when there has not even been an allegation of a violation or an unfair practice?
>
> . . .
>
> We note as well the customary international law rules on state responsibility, to which we also referred in *US – Cotton Yarn*. We recalled there that the rules of general international law on state responsibility require that countermeasures in response to breaches by States of their international obligations be proportionate to such breaches. Article 51 of the International Law Commission's Draft Articles on Responsibility of States for Internationally Wrongful Acts provides that 'countermeasures must be commensurate with the injury suffered, taking into account the gravity of the internationally wrongful act and the rights in question'. Although Article 51 is part of the International Law Commission's Draft Articles, which do not constitute a binding legal instrument as such, this provision sets out a recognized principle of customary international law. We observe also that the United States has acknowledged this principle elsewhere. In its comments on the International Law Commission's Draft Articles, the United States stated that 'under customary international law a rule of proportionality applies to the exercise of countermeasures'."[95]

(xii) Legitimate expectations

73. In *Japan – Alcoholic Beverages II*, the Appellate Body held that adopted panel reports create legitimate expectations among WTO Members. See paragraph 80 below.

74. The Appellate Body on *India – Patents (US)* held that the principles of treaty interpretation "neither require nor condone" the importation into a treaty of "words that are not there" or "concepts that were not intended". See paragraph 27 above. The Appellate Body made this statement while reversing the Panel's finding that "[t]he protection of legitimate expectations of Members regarding the conditions of competition is a well-established GATT principle, which derives in part from Article XXIII"[96] and that, when interpreting the text of the *TRIPS Agreement*, "the legitimate expectations of WTO Members concerning the TRIPS Agreement must be taken into account".[97] The Appellate Body disagreed with the Panel that the legitimate expectations of Members and private rights holders concerning conditions of competition must always be taken into account in interpreting the *TRIPS Agreement* and stated that the concept of "reasonable expectations" belonged to the domain of non-violation complaints. The Appellate Body also criticized "the Panel's invocation of the 'legitimate expectations' of Members relating to conditions of competition [which] melds the legally distinct bases for 'violation' and 'non-violation' complaints under Article XXIII of the GATT 1994 into one uniform cause of action":

> "The doctrine of protecting the 'reasonable expectations' of contracting parties developed in the context of 'non-violation' complaints brought under Article XXIII:1(b) of the GATT 1947. Some of the rules and procedures concerning 'non-violation' cases have been codified in Article 26.1 of the DSU. 'Non-violation' complaints are rooted in the GATT's origins as an agreement intended to protect the reciprocal tariff concessions negotiated among the contracting parties under Article II.[98] In the absence of substantive legal rules in many areas relating to international trade, the 'non-violation' provision of Article XXIII:1(b) was aimed at preventing contracting parties from using non-tariff barriers or other policy measures to negate the benefits of negotiated tariff concessions. Under Article XXIII:1(b) of the GATT 1994, a Member can bring a 'non-violation' complaint when the negotiated balance of concessions between Members is upset by the application of a measure, whether or not this measure is inconsistent with the provisions of the covered agreement. The ultimate goal is not the withdrawal of the measure concerned, but rather achieving a mutually satisfactory adjustment, usually by means of compensation.
>
> . . . the *only* cause of action permitted under the *TRIPS Agreement* during the first five years after the entry into force of the *WTO Agreement* is a 'violation' complaint under Article XXIII:1(a) of the GATT 1994. This case involves allegations of violation of obligations under the *TRIPS Agreement*. However, the Panel's invocation of the 'legitimate expectations' of Members relating to conditions of competition melds the legally-distinct bases for 'violation' and 'non-violation' complaints under Article XXIII of the GATT 1994 into one uniform cause of action. This is not consistent with either Article XXIII of the GATT 1994 or Article 64 of the *TRIPS Agreement*. Whether or not 'non-violation' complaints should be available for

[95] Appellate Body Report on *US – Line Pipe*, paras. 257 and 259.
[96] Panel Report on *India – Patents (US)*, para. 7.20.
[97] Panel Report on *India – Patents (US)*, para. 7.22.
[98] (*footnote original*) See, in general, E.-U. Petersmann, "Violation Complaints and Non-violation Complaints in International Law" (1991) *German Yearbook of International Law* 175.

disputes under the *TRIPS Agreement* is a matter that remains to be determined by the Council for Trade-Related Aspects of Intellectual Property (the 'Council for TRIPS') pursuant to Article 64.3 of the *TRIPS Agreement*. It is *not* a matter to be resolved through interpretation by panels or by the Appellate Body."[99]

75. In *EC – Computer Equipment*, the Appellate Body examined whether the Panel had erred in interpreting the meaning of a tariff concession in the European Communities Schedule in light of the "legitimate expectations" of an exporting Member. The Appellate Body disagreed with the Panel's finding that the tariff concession of a Member may be determined on the basis of the "legitimate expectation" of just one (namely the exporting) Member and emphasized that it was rather the *common intention* of the parties which should be ascertained. See paragraph 46 above.

76. With respect to the issue of "legitimate expectations" under non-violation complaints, see Chapter on *GATT 1994*, Section XXIV.B.2(h).

(xiii) Proportionality

77. The Appellate Body has referred to the need for proportionality of countermeasures by reference to the international rules on state responsibility. See in this regard paragraphs 71–72 above.

(xiv) Precautionary principle

78. In *EC – Hormones*, the Appellate Body agreed with the Panel finding that the precautionary principle does not override the provisions of Articles 5.1 and 5.2 of the SPS Agreement and made the following observations about this principle:

"The status of the precautionary principle in international law continues to be the subject of debate among academics, law practitioners, regulators and judges. The precautionary principle is regarded by some as having crystallized into a general principle of customary international *environmental* law. Whether it has been widely accepted by Members as a principle of *general* or *customary international law* appears less than clear.[100] We consider, however, that it is unnecessary, and probably imprudent, for the Appellate Body in this appeal to take a position on this important, but abstract, question. We note that the Panel itself did not make any definitive finding with regard to the status of the precautionary principle in international law and that the precautionary principle, at least outside the field of international environmental law, still awaits authoritative formulation.[101]

It appears to us important, nevertheless, to note some aspects of the relationship of the precautionary principle to the *SPS Agreement*. First, the principle has not been written into the *SPS Agreement* as a ground for justifying SPS measures that are otherwise inconsistent with the obligations of Members set out in particular provisions of that Agreement. Secondly, the precautionary principle indeed finds reflection in Article 5.7 of the *SPS Agreement*. We agree, at the same time, with the European Communities, that there is no need to assume that Article 5.7 exhausts the relevance of a precautionary principle. It is reflected also in the sixth paragraph of the preamble and in Article 3.3. These explicitly recognize the right of Members to establish their own appropriate level of sanitary protection, which level may be higher (i.e., more cautious) than that implied in existing international standards, guidelines and recommendations. Thirdly, a panel charged with determining, for instance, whether "sufficient scientific evidence" exists to warrant the maintenance by a Member of a particular SPS measure may, of course, and should, bear in mind that responsible, representative governments commonly act from perspectives of prudence and precaution where risks of irreversible, e.g. life-terminating, damage to human health are concerned. Lastly, however, the precautionary principle does

[99] Appellate Body Report on *India – Patents (US)*, paras. 41–42.

[100] (*footnote original*) Authors like P. Sands, J. Cameron and J. Abouchar, while recognizing that the principle is still evolving, submit nevertheless that there is currently sufficient state practice to support the view that the precautionary principle is a principle of customary international law. See, for example, P. Sands, *Principles of International Environmental Law*, Vol. I (Manchester University Press, 1995) p. 212; J. Cameron, "The Status of the Precautionary Principle in International Law", in J. Cameron and T. O'Riordan (eds.), *Interpreting the Precautionary Principle* (Cameron May, 1994) 262, p. 283; J.Cameron and J. Abouchar, "The Status of the Precautionary Principle in International Law", in D. Freestone and E. Hey (eds.), *The Precautionary Principle in International Law* (Kluwer, 1996) 29, p. 52. Other authors argue that the precautionary principle has not yet reached the status of a principle of international law, or at least, consider such status doubtful, among other reasons, due to the fact that the principle is still subject to a great variety of interpretations. See, for example, P. Birnie and A. Boyle, *International Law and the Environment* (Clarendon Press, 1992), p. 98; L. Gündling, "The Status in International Law of the Precautionary Principle" (1990), 5:1,2,3 *International Journal of Estuarine and Coastal Law* 25, p. 30; A. de Mestral (et al), *International Law Chiefly as Interpreted and Applied in Canada*, 5th ed. (Emond Montgomery, 1993), p. 765; D. Bodansky, in *Proceedings of the 85th Annual Meeting of the American Society of International Law* (ASIL, 1991), p. 415.

[101] (*footnote original*) In *Case Concerning the Gabčíkovo-Nagymaros Project (Hungary/Slovakia)*, the International Court of Justice recognized that in the field of environmental protection ". . . new norms and standards have been developed, set forth in a great number of instruments during the last two decades. Such new norms have to be taken into consideration, and such new standards given proper weight . . .". However, we note that the Court did not identify the precautionary principle as one of those recently developed norms. It also declined to declare that such principle could override the obligations of the Treaty between Czechoslovakia and Hungary of 16 September 1977 concerning the construction and operation of the Gabčíkovo/Nagymaros System of Locks. See *Case Concerning the Gabčíkovo-Nagymaros Project (Hungary/Slovakia)*, I.C.J. Judgement, 25 September 1997, paras. 140, 111–114. Not yet reported in the I.C.J. Reports but available on internet at http://www.icj-cij.org/idecis.htm.

not, by itself, and without a clear textual directive to that effect, relieve a panel from the duty of applying the normal (i.e. customary international law) principles of treaty interpretation in reading the provisions of the *SPS Agreement*."[102]

(xv) Estoppel

79. In *Argentina – Poultry Anti-Dumping Duties*, Argentina invoked the principle of estoppel to justify its claim that the Panel had to recuse itself from the dispute. Argentina had raised as a preliminary issue that, prior to bringing WTO dispute settlement proceedings against Argentina's anti-dumping measure, Brazil had challenged that measure before a MERCOSUR Ad Hoc Arbitral Tribunal. Argentina requested that, in light of the prior MERCOSUR proceedings, that the Panel refrain from ruling on the claims raised by Brazil in the present WTO dispute settlement proceedings.[103] The United States, a third party, argued that there is no basis for a WTO panel to apply the principle of estoppel. The Panel did not take up the issue of whether this principle can be applied by a panel or not. In a footnote to the Report, the Panel simply said that since it had found that the conditions identified by Argentina for the application of the principle of estoppel[104] were not present, it did not consider it necessary to determine whether or not it would have had the authority to apply the principle of estoppel if the relevant conditions had been satisfied. Neither did the Panel consider it necessary to determine whether the three conditions proposed by Argentina were sufficient for the application of that proposal.[105]

(xvi) Status of adopted GATT/WTO Panel and Appellate Body Reports

80. In *Japan – Alcoholic Beverages II*, the Appellate Body, further to reversing the Panel's findings that adopted panel reports constituted subsequent practice in a specific case under Article 31.3(b) of the Vienna Convention (see paragraph 30 above), held that "[a]dopted panel reports are an important part of the GATT *acquis*":

> "Article XVI:1 of the *WTO Agreement* and paragraph 1(b)(iv) of the language of Annex 1A incorporating the GATT 1994 into the *WTO Agreement* bring the legal history and experience under the GATT 1947 into the new realm of the WTO in a way that ensures continuity and consistency in a smooth transition from the GATT 1947 system. This affirms the importance to the Members of the WTO of the experience acquired by the Contracting Parties to the GATT 1947 – and acknowledges the continuing relevance of that experience to the new trading system served by the WTO. Adopted panel reports are an important part of the GATT *acquis*. They are often considered by subsequent panels. They create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute. However, they are not binding, except with respect to resolving the particular dispute between the parties to that dispute. In short, their character and their legal status have not been changed by the coming into force of the *WTO Agreement*."[106]

81. In *US – Shrimp (Article 21.5 – Malaysia)* the Appellate Body referred to its ruling in *Japan – Alcoholic Beverages II* (see paragraph 80 above) and considered that the same reasoning applied to Appellate Body reports:

> "[W]e note that in our Report in *Japan – Taxes on Alcoholic Beverages*, we stated that:
>
> > Adopted panel reports are an important part of the GATT *acquis*. They are often considered by subsequent panels. They create legitimate expectations among WTO Members, and, therefore, should be taken into account where they are relevant to any dispute.
>
> This reasoning applies to adopted Appellate Body Reports as well. Thus, in taking into account the reasoning in an adopted Appellate Body Report – a Report, moreover, that was directly relevant to the Panel's disposition of the issues before it – the Panel did not err. The Panel was correct in using our findings as a tool for its own reasoning. Further, we see no indication that, in doing so, the Panel limited itself merely to examining the new measure from the perspective of the recommendations and rulings of the DSB."[107]

82. In *US – Softwood Lumber V*, the United States requested that the Appellate Body not import wholesale the findings and reasoning from the Appellate Body report on *EC – Bed Linen* on the grounds that it was not a party to that dispute, that the arguments raised in that case were different and that the United States' practice of zeroing was not at issue in that appeal. The complainant, Canada, disagreed. The Appellate Body, after referring to its prior reports on *Japan – Alcoholic Beverages II* and *US – Shrimp (Article 21.5 – Malaysia)* and to Article 3.2 of the *DSU*,

---

[102] Appellate Body Report on *EC – Hormones*, paras. 124–125.
[103] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.17.
[104] Argentina claimed that the principle of estoppel applies in circumstances where (i) a statement of fact which is clear and unambiguous, and which (ii) is voluntary, unconditional, and authorized, is (iii) relied on in good faith. Panel Report on *Argentina – Poultry Anti-Dumping Duties*, para. 7.37.
[105] Panel Report on *Argentina – Poultry Anti-Dumping Duties*, footnote 58.
[106] Appellate Body Report on *Japan – Alcoholic Beverages II*, p. 14.
[107] Appellate Body Report on *US – Shrimp (Article 21.5 – Malaysia)*, paras. 108–109.

indicated that they had given full consideration to the particular facts of the case before them and to the arguments raised by the United States on appeal, as well as to those raised by Canada and the third participants. The Appellate Body said that, in doing so, they "have taken into account the reasoning and findings contained in the Appellate Body Report in *EC – Bed Linen*, as appropriate".[108]

(d) "add to or diminish the rights and obligations"

83. In *Chile – Alcoholic Beverages*, Chile argued before the Appellate Body that the Panel's findings under Article III:2 of *GATT 1994* in connection with "not similarly taxed" and "so as to afford protection" added to the rights and obligations of Members in contravention of Articles 3.2 and 19.2 of the *DSU*. The Appellate Body stated:

> "In this dispute, while we have rejected certain of the factors relied upon by the Panel, we have found that the Panel's legal conclusions are not tainted by any reversible error of law. In these circumstances, we do not consider that the Panel has added to the rights or obligations of any Member of the WTO. Moreover, we have difficulty in envisaging circumstances in which a panel could add to the rights and obligations of a Member of the WTO if its conclusions reflected a correct interpretation and application of provisions of the covered agreements. Chile's appeal under Articles 3.2 and 19.2 of the DSU must, therefore, be denied."[109]

84. In *US – Certain EC Products*, the Appellate Body ruled that the purpose of dispute settlement is only to preserve the rights and obligations of Members:

> "[W]e observe that it is certainly not the task of either panels or the Appellate Body to amend the DSU or to adopt interpretations within the meaning of Article IX:2 of the *WTO Agreement*. Only WTO Members have the authority to amend the DSU or to adopt such interpretations. Pursuant to Article 3.2 of the DSU, the task of panels and the Appellate Body in the dispute settlement system of the WTO is 'to preserve the rights and obligations of Members under the covered agreements, and to *clarify the existing provisions* of those agreements in accordance with customary rules of interpretation of public international law.' (emphasis added) Determining what the rules and procedures of the DSU ought to be is not our responsibility nor the responsibility of panels; it is clearly the responsibility solely of the Members of the WTO."[110]

(e) Relationship with other Agreements

(i) Article 17.6(ii) of the Anti-Dumping Agreement

85. In *US – Hot-Rolled Steel*, the Appellate Body looked into the first sentence of Article 17.6(ii) of the *Anti-Dumping Agreement*, which provides that the Panel "shall" interpret the provisions of the *Anti-Dumping Agreement* "in accordance with customary rules of interpretation", and considered that it echoed closely Article 3.2 of the *DSU* (see paragraph 642 of the Chapter on the *Anti-Dumping Agreement*).[111]

2. Article 3.3

(a) "measures taken by another Member"

86. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body referred to Article 3.3 while defining which type of measures can, as such, be the subject of dispute settlement proceedings.

> "Article 3.3 of the DSU refers to 'situations in which a Member considers that any benefits accruing to it directly or indirectly under the covered agreements are being impaired by *measures taken by another Member*'. (emphasis added) This phrase identifies the relevant nexus, for purposes of dispute settlement proceedings, between the "measure" and a "Member". In principle, any act or omission attributable to a WTO Member can be a measure of that Member for purposes of dispute settlement proceedings.[112] The acts or omissions that are so attributable are, in the usual case, the acts or omissions of the organs of the state, including those of the executive branch.[113]"[114]

87. As regards the concept of measures subject to dispute settlement, see Section VI.B.3(c) below.

3. Article 3.6

(a) Notification of mutually agreed solutions

88. The mutually agreed solutions pursuant to Article 3.6 that have been notified to the DSB as of 31 December 2004 are:

---

[108] Appellate Body Report on *US – Softwood Lumber V*, para. 112.

4. Article 3.7

(a) "whether action under these procedures would be fruitful"

90. In the context of a discussion on legal interest, the Appellate Body on *EC – Bananas III* agreed with the Panel that "neither Article 3.3 nor 3.7 of the DSU nor any other provision of the DSU contain any explicit requirement that a Member must have a 'legal interest' as a prerequisite for requesting a panel". In this regard, see paragraph 158 below.

91. In *Mexico – Corn Syrup (Article 21.5 – US)*, Mexico challenged on appeal the Panel's silence regarding the alleged failure of the United States to satisfy its obligation under the first sentence of Article 3.7 of the *DSU* to exercise its judgement as to whether dispute settlement proceedings would be "fruitful". The Appellate Body then examined whether a failure to comply with the first sentence of Article 3.7 of the *DSU* would deprive a panel of its authority to deal with and dispose of a matter. The Appellate Body first indicated that "this sentence reflects a basic principle that Members should have recourse to WTO dispute settlement in good faith, and not frivolously set in motion the procedures contemplated in the DSU".[115] It went on to point out the self-regulating nature of that sentence and concluded that the Panel was not obliged to consider this issue on its own motion:

> "Given the 'largely self-regulating' nature of the requirement in the first sentence of Article 3.7, panels and the Appellate Body must presume, whenever a Member submits a request for establishment of a panel, that such Member does so in good faith, having duly exercised its judgement as to whether recourse to that panel would be 'fruitful'. Article 3.7 neither requires nor authorizes a panel to look behind that Member's decision and to question its exercise of judgement. Therefore, the Panel was not obliged to consider this issue on its own motion."[116]

(b) "aim of the dispute settlement mechanism is to secure a positive solution to a dispute"

92. The Appellate Body on *US – Wool Shirts and Blouses* referred to Article 3.7 of the *DSU* and emphasized that a requirement to address all legal claims raised by a party is not consistent with the aim of the WTO dispute settlement system, which is to settle disputes.[117]

(c) "suspending the application of concessions or other obligations"

93. In *US – Certain EC Products*, the Panel had found that the measure at issue constituted an unauthorized suspension of concessions and thus violated Article 3.7 (and Articles 22.6 and 23.2(c)) of the *DSU*.[118] The Appellate Body first described the workings of Article 3.7 and upheld the Panel's findings, indicating that, in its view, "if a Member has acted in breach of Articles 22.6 and 23.2(c) of the DSU, that Member has also, in view of the nature and content of Article 3.7, last sentence, necessarily acted contrary to the latter provision":

[115] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 73.
[116] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 74.
[117] Appellate Body Report on *US – Wool Shirts and Blouses*, p. 19.
[118] Panel Report on *US – Certain EC Products*, para. 6.73.

"Article 3.7 is part of Article 3 of the DSU, which is entitled 'General Provisions' and sets out the basic principles and characteristics of the WTO dispute settlement system. Article 3.7 itself lists and describes the possible temporary and definitive outcomes of a dispute, one of which is the suspension of concessions or other obligations to which the last sentence of Article 3.7 refers. The last sentence of Article 3.7 provides that the suspension of concessions or other obligations is a 'last resort' that is subject to DSB authorization.

The obligation of WTO Members not to suspend concessions or other obligations without prior DSB authorization is explicitly set out in Articles 22.6 and 23.2(c), not in Article 3.7 of the DSU. It is, therefore, not surprising that the European Communities did not explicitly claim, or advance arguments in support of, a violation of Article 3.7, last sentence. The European Communities argued that the 3 March Measure is inconsistent with Articles 22.6 and 23.2(c) of the DSU. We consider, however, that if a Member has acted in breach of Articles 22.6 and 23.2(c) of the DSU, that Member has also, in view of the nature and content of Article 3.7, last sentence, necessarily acted contrary to the latter provision.

Although we do not believe that it was necessary or incumbent upon the Panel to find that the United States violated Articles 3.7 of the DSU, we find no reason to disturb the Panel's finding that, by adopting the 3 March Measure, the United States acted inconsistently with 'Articles 23.2(c), 3.7 and 22.6 of the DSU'.[119]"[120]

94. With respect to the suspension of concessions, see Section XXII.B below.

5. Article 3.8

(a) Presumption of "nullification or impairment"

95. In *EC – Bananas III*, the European Communities appealed the Panel's finding that "the infringement of obligations by the European Communities under a number of WTO agreements, are a prima facie case of nullification or impairment of benefits in the meaning of Article 3.8 of the DSU". The Appellate Body observed that the European Communities, in its appeal, attempted to "rebut the presumption of nullification or impairment on the basis that the United States has never exported a single banana to the European Community, and therefore, could not possibly suffer any trade damage". The Appellate Body stated:

"[W]e note that the two issues of nullification or impairment and of the standing of the United States are closely related . . . .[T]wo points are made that the Panel may well have had in mind in reaching its conclusions on nullification or impairment. One is that the United States is a producer of bananas and that a potential export interest by the United States cannot be excluded; the other is that the internal market of the United States for bananas could be affected by the EC bananas regime and by its effects on world supplies and world prices of bananas . . . . They are . . . relevant to the question whether the European Communities has rebutted the presumption of nullification or impairment.

So, too, is the panel report in *United States – Superfund*, to which the Panel referred. In that case, the panel examined whether measures with 'only an insignificant effect on the volume of exports do nullify or impair benefits under Article III:2 . . .'. The panel concluded (and in so doing, confirmed the views of previous panels) that:

> 'Article III:2, first sentence, cannot be interpreted to protect expectations on export volumes; it protects expectations on the competitive relationship between imported and domestic products. A change in the competitive relationship contrary to that provision must consequently be regarded *ipso facto* as a nullification or impairment of benefits accruing under the General Agreement. A demonstration that a measure inconsistent with Article III:2, first sentence, has no or insignificant effects would therefore in the view of the Panel not be a sufficient demonstration that the benefits accruing under that provision had not been nullified or impaired even if such a rebuttal were in principle permitted.'[121]

The panel in *United States – Superfund* subsequently decided 'not to examine the submissions of the parties on the trade effects of the tax differential' on the basis of the legal grounds it had enunciated. The reasoning in *United States – Superfund* applies equally in this case."[122]

96. In *Turkey – Textiles*, Turkey argued that even if its quantitative restrictions on imports of textile and clothing products from India were in violation of WTO law, India had not suffered any nullification or impairment of its WTO benefits within the meaning of Article 3.8 of the *DSU*. Turkey pointed out that imports of textile and clothing from India had actually increased since the Turkish measures at issue had entered into force. The Panel, in a finding not reviewed by the Appellate Body, rejected this argument:

"We are of the view that it is not possible to segregate the impact of the quantitative restrictions from the impact of other factors. While recognizing Turkey's efforts to liberalize its import regime on the occasion of the formation of its customs union with the European Communities, it appears to us that even if Turkey were to demonstrate that India's overall exports of clothing

[119] (*footnote original*) Panel Report, para. 6.87.
[120] Appellate Body Report on *US – Certain EC Products*, paras. 119–121.
[121] (*footnote original*) GATT Panel Report on *US – Superfund*, para. 5.1.9.
[122] Appellate Body Report on *EC – Bananas III*, paras. 251–253.

and textile products to Turkey have increased from their levels of previous years, it would not be sufficient to rebut the presumption of nullification and impairment caused by the existence of WTO incompatible import restrictions. Rather, at minimum, the question is whether exports have been what they would otherwise have been, were there no WTO incompatible quantitative restrictions against imports from India. Consequently, we consider that even if the presumption in Article 3.8 of the DSU were rebuttable, Turkey has not provided us with sufficient information to set aside the presumption that the introduction of these import restrictions on 19 categories of textile and clothing products has nullified and impaired the benefits accruing to India under GATT/WTO."[123]

97. In *Guatemala – Cement II*, Guatemala argued that its alleged failure to issue proper notifications and its failure to provide the Mexican interested party with the full text of the application for anti-dumping investigations had not nullified or impaired Mexico's benefits accruing under the *Anti-Dumping Agreement*. The Panel declined to consider this preliminary objection by Guatemala, stating that "we will address the issue of nullification or impairment after we have considered whether Guatemala has acted consistently with its obligations under the AD Agreement".[124] Subsequently, the Panel held:

"Guatemala argues that in the case of the Article 5.5 notification it did not initiate the investigation until after Mexico had been notified and that it granted Cruz Azul an extension to respond to the questionnaire and thus Mexico was not impaired in the defence of its interests. We have already found that the initiation date was 11 January 1996 and thus notification under Article 5.5 was not provided until after initiation. There is no way to ascertain what Mexico might have done if it had received a timely notification. The extension of time for response to the questionnaire granted to Cruz Azul has no bearing on the fact that Mexico was not informed in time. Thus, we do not consider that Guatemala has rebutted the presumption of nullification or impairment with respect to violations of Article 5.5."

98. In *Argentina – Ceramic Tiles*, Argentina claimed that the European Communities had failed to demonstrate that Italian tile exporters were "prejudiced" by the failure of the Argentine anti-dumping authority to calculate individual anti-dumping margins. In this context, Argentina relied on the Appellate Body's findings in *Korea – Dairy*.[125] The Panel rejected the Argentine arguments:

"We note, however, that the Appellate Body Report in the *Korea – Dairy Safeguards* case, to which Argentina refers in support of its argument, dealt with the question of whether the request for establishment met the requirements of Article 6.2 of the DSU. The issue before the Appellate Body was whether Article 6.2 of the DSU was complied with or not. The Appellate Body, in deciding that question, concluded that one element to be considered was whether the defending Member was prejudiced in its ability to defend itself by a lack of clarity or specificity in the request for establishment. The Appellate Body did not address the question whether, once it had been established that a provision of the Agreement is violated, it needs in addition to be demonstrated that this violation had prejudiced the rights of the complaining party.[126] Thus, we do not agree that this Appellate Body decision supports Argentina's argument that the concept of harmless error has been accepted in WTO law.

. . .

Article 3.8 of the DSU thus provides that there is a presumption that benefits are nullified or impaired – i.e., there is a presumption of 'harm' – where a provision of the Agreement has been violated. Article 3.8 of the DSU also provides for the possibility that the Member found to have violated a provision may rebut the presumption. In light of the presumption of Article 3.8 of the DSU, the EC having established that Argentina has acted in a manner inconsistent with the AD Agreement, it is up to Argentina to show that the failure to determine an individual dumping margin has not nullified or impaired benefits accruing to the EC under the Agreement. Argentina has failed to adduce any evidence in this respect. Accordingly, we find that the presumption of nullification or impairment of benefits caused by the violation of Article 6.10 of the AD Agreement has not been rebutted by Argentina.[127]"[128]

99. In *US – Offset Act (Byrd Amendment)*, and in respect to adverse effects under Article 5(b) of the *SCM Agreement*, Mexico made arguments of both violation and non-violation nullification or impairment. In relation to claims of violation nullification or impairment, the Panel stated that any presumption arising under Article 3.8 of the *DSU* stemming from these violations

[123] Panel Report on *Turkey – Textiles*, para. 9.204.
[124] Panel Report on *Guatemala – Cement II*, para. 8.25.
[125] Appellate Body Report on *Korea – Dairy*, paras. 114–131.
[126] (*footnote original*) Appellate Body Report, *Korea – Dairy Safeguards*, para. 127: "Along the same lines, we consider that whether the mere listing of the articles claimed to have been violated meets the standard of Article 6.2 must be examined on a case-by-case basis. In resolving that question, we take into account whether the ability of the respondent to defend itself was prejudiced, given the actual course of the panel proceedings, by the fact that the panel request simply listed the provisions claimed to have been violated."
[127] (*footnote original*) We note that our view is similar to that of the Panel in the case of *Guatemala – Cement (II)* (Panel Report, *Guatemala – Cement (II)*, paras. 8.22 and 8.111–112), and Panel Report, *Guatemala – Anti-Dumping Investigation Regarding Portland Cement from Mexico* ("*Guatemala – Cement (I)*"), WT/DS60/R, adopted as reversed on other grounds by WT/DS60/AB/R, 25 November 1998, para. 7.42.
[128] Panel Report on *Argentina – Ceramic Tiles*, paras. 6.103 and 6.105.

would relate to nullification or impairment caused "*by the violation at issue*" (emphasis in original). The Panel rejected the argument by Mexico on the grounds that, for the purpose of Article 5(b) of the *SCM Agreement*, Mexico must demonstrate that "*the use of a subsidy*" caused nullification or impairment (emphasis in original).[129]

100. On the issue of whether Mexico could have reasonably anticipated at the conclusion of the Uruguay Round that the United States would pass the Offset Act, the Panel on *US – Offset Act (Byrd Amendment)* explained that there was a "presumption that Mexico could not reasonably have anticipated the introduction of [the Offset Act]", since it was introduced in the US Congress after the conclusion of the Uruguay Round negotiations.[130]

101. Because Mexico failed to establish that the Offset Act *per se* is a "specific" subsidy that causes "adverse effects", the Panel rejected Mexico's claim that the Offset Act is inconsistent with Article 5(b) of the *SCM Agreement*.[131] For more information regarding the nullification or impairment requirement in Article 5(b) of the *SCM Agreement*, see Section V.B.2(a) of the Chapter on the *SCM Agreement*.

(b) Relationship with other WTO Agreements

(i) Article XXIII:1 of the GATS

102. In *EC – Bananas III*, the Appellate Body considered that the Panel had erred in extending the scope of the presumption of nullification or impairment in Article 3.8 of the *DSU* to violation claims made under the GATS:

> "We observe, first of all, that the European Communities attempts to rebut the presumption of nullification or impairment with respect to the Panel's findings of violations of the GATT 1994 on the basis that the United States has never exported a single banana to the European Community, and therefore, could not possibly suffer any trade damage. The attempted rebuttal by the European Communities applies only to one complainant, the United States, and to only one agreement, the GATT 1994. In our view, the Panel erred in extending the scope of the presumption in Article 3.8 of the DSU to claims made under the GATS as well as to claims made by the Complaining Parties other than the United States."[132]

103. In the same vein, the Panel in *Mexico – Telecoms* indicated that the *GATS* does not require that, in the case of a violation complaint (Article XXIII:1 of the *GATS*), "nullification or impairment" of treaty benefits has to be claimed by the complaining WTO Member and examined by a Panel:

> "Unlike some other covered agreements (e.g. GATT Article XXIII:1 in connection with Article 3.8 of the DSU), the GATS does not require that, in the case of a violation complaint (GATS Article XXIII:1), 'nullification or impairment' of treaty benefits has to be claimed by the complaining WTO Member and examined by a Panel. Whereas Article XXIII:1 of the GATT specifically conditions access to WTO dispute settlement procedures on an allegation that a 'benefit' or the 'attainment of an objective' under that agreement are being 'nullified or impaired', the corresponding provision in the GATS (Article XXIII:1) permits access to dispute settlement procedures if a Member 'fails to carry out its obligations or specific commitments' under the GATS. In this respect, we note that the Appellate Body in *EC – Bananas III* stated that the panel in that case 'erred in extending the scope of the presumption in Article 3.8 of the DSU to claims made under the GATS'.[133] Having found that Mexico has violated certain provisions of the GATS, we are therefore bound by Article 19 of the DSU to proceed directly to the recommendation set out in that provision."[134]

(ii) Article 5(b) of the SCM Agreement

104. In this respect, see paragraph 99 above.

6. Article 3.10

(a) "good faith . . . effort to resolve the dispute"

105. In *US – FSC*, the United States requested that the Appellate Body dismiss the appeal on the basis that the request for consultations had not included a "statement of available evidence as required by Article 4.2 of the SCM Agreement".[135] The Appellate Body noted in this regard that one year passed between submission of the request for consultations by the European Communities and the first mention of this objection by the United States. The Appellate Body stated that in light of the fact that consultations were held on three occasions and that the United States did not raise objections at the two DSB meetings at which the request for the establishment of a panel was on the agenda, the United States could not now assert that the European Communities claims under Article 3 of the *SCM Agreement* should have been dismissed and that the Panel's finding on these issues should be reversed. The Appellate Body went on to state:

> "Article 3.10 of the DSU commits Members of the WTO, if a dispute arises, to engage in dispute settlement procedures 'in good faith in an effort to resolve the dispute'.

[133] (*footnote original*) *See* Appellate Body Report, *European Communities – Regime for the Importation, Sale and Distribution of Bananas* ("*EC – Bananas III*"), WT/DS27/AB/R, adopted 25 September 1997, DSR 1997:II, 591, at paragraph 250.
[134] Panel Report on *Mexico – Telecoms*, para. 8.4.
[135] Appellate Body Report on *US – FSC*, para. 36.

> This is another specific manifestation of the principle of good faith which, we have pointed out, is at once a general principle of law and a principle of general international law.[136] This pervasive principle requires both complaining and responding Members to comply with the requirements of the DSU (and related requirements in other covered agreements) in good faith. By good faith compliance, complaining Members accord to the responding Members the full measure of protection and opportunity to defend, contemplated by the letter and spirit of the procedural rules. The same principle of good faith requires that responding Members seasonably and promptly bring claimed procedural deficiencies to the attention of the complaining Member, and to the DSB or the Panel, so that corrections, if needed, can be made to resolve disputes. The procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes."[137]

106. The Appellate Body on *Thailand – H-Beams* confirmed the importance of the principle of good faith when indicating that panel proceedings were not about the development of litigation techniques:

> "In view of the importance of the request for the establishment of a panel, we encourage complaining parties to be precise in identifying the legal basis of the complaint. We also note that nothing in the DSU prevents a defending party from requesting further clarification on the claims raised in a panel request from the complaining party, even before the filing of the first written submission. In this regard, we point to Article 3.10 of the DSU which enjoins Members of the WTO, if a dispute arises, to engage in dispute settlement procedures 'in good faith in an effort to resolve the dispute'. As we have previously stated, the 'procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes'.[138]"[139]

107. In *EC – Tube or Pipe Fittings*, the European Communities had requested the Panel to refuse to consider certain of Brazil's claims on the grounds that these claims were defective as they were too vaguely defined in Brazil's first written submission. In the view of the European Communities, admission of these claims would constitute an infringement of the European Communities' rights of defence and a departure from the good faith standard in Article 3.10 of the *DSU* and from the due process requirement that underlies the *DSU*. The Panel, in a preliminary ruling, rejected the European Communities' request on the grounds that the opportunity would still exist for Brazil to provide further supporting evidence and argumentation in its subsequent submissions with a view to clarifying those allegations in the course of the Panel proceedings. The Panel found support for its ruling in the statement by the Appellate Body in its report on *US – FSC* that the "procedural rules of WTO dispute settlement are designed to promote, not the development of litigation techniques, but simply the fair, prompt and effective resolution of trade disputes".[140,141]

108. In *US – Carbon Steel*, the Appellate Body indicated that the assessment of whether the ability of a respondent to defend itself has been prejudiced can be considered well into the course of panel proceedings.

> "[I]n the interests of due process, parties should bring alleged procedural deficiencies to the attention of a panel at the earliest possible opportunity.[142] In this case, we see no reason to disagree with the Panel's view that the United States' objection was not raised in a timely manner. At the same time, however, as we have observed previously, certain issues going to the *jurisdiction* of a panel are so fundamental that they may be considered at any stage in a proceeding.[143]
>
> . . .
>
> As we have said previously, compliance with the requirements of Article 6.2 must be demonstrated on the face of the request for the establishment of a panel. Defects in the request for the establishment of a panel cannot be 'cured' in the subsequent submissions of the parties during the panel proceedings.[144] Nevertheless, in considering the sufficiency of a panel request, submissions and statements made during the course of the panel proceedings, in particular the first written submission of the complaining party, may be consulted in order to confirm the meaning of the words used in the panel request and as part of the assessment of whether the ability of the respondent to defend itself was prejudiced.[145] Moreover, compliance with the requirements of Article 6.2 must be determined on the merits of each case, having considered the panel request as a whole, and in the light of attendant circumstances.[146]"[147]

IV. ARTICLE 4

A. TEXT OF ARTICLE 4

Article 4
Consultations

1. Members affirm their resolve to strengthen and improve the effectiveness of the consultation procedures employed by Members.

2. Each Member undertakes to accord sympathetic consideration to and afford adequate opportunity for consultation regarding any representations made by another Member concerning measures affecting the operation of any covered agreement taken within the territory of the former.[3]

(*footnote original*) [3] Where the provisions of any other covered agreement concerning measures taken by regional or local governments or authorities within the territory of a Member contain provisions different from the provisions of this paragraph, the provisions of such other covered agreement shall prevail.

3. If a request for consultations is made pursuant to a covered agreement, the Member to which the request is made shall, unless otherwise mutually agreed, reply to the request within 10 days after the date of its receipt and shall enter into consultations in good faith within a period of no more than 30 days after the date of receipt of the request, with a view to reaching a mutually satisfactory solution. If the Member does not respond within 10 days after the date of receipt of the request, or does not enter into consultations within a period of no more than 30 days, or a period otherwise mutually agreed, after the date of receipt of the request, then the Member that requested the holding of consultations may proceed directly to request the establishment of a panel.

4. All such requests for consultations shall be notified to the DSB and the relevant Councils and Committees by the Member which requests consultations. Any request for consultations shall be submitted in writing and shall give the reasons for the request, including identification of the measures at issue and an indication of the legal basis for the complaint.

5. In the course of consultations in accordance with the provisions of a covered agreement, before resorting to further action under this Understanding, Members should attempt to obtain satisfactory adjustment of the matter.

6. Consultations shall be confidential, and without prejudice to the rights of any Member in any further proceedings.

7. If the consultations fail to settle a dispute within 60 days after the date of receipt of the request for consultations, the complaining party may request the establishment of a panel. The complaining party may request a panel during the 60-day period if the consulting parties jointly consider that consultations have failed to settle the dispute.

8. In cases of urgency, including those which concern perishable goods, Members shall enter into consultations within a period of no more than 10 days after the date of receipt of the request. If the consultations have failed to settle the dispute within a period of 20 days after the date of receipt of the request, the complaining party may request the establishment of a panel.

9. In cases of urgency, including those which concern perishable goods, the parties to the dispute, panels and the Appellate Body shall make every effort to accelerate the proceedings to the greatest extent possible.

10. During consultations Members should give special attention to the particular problems and interests of developing country Members.

11. Whenever a Member other than the consulting Members considers that it has a substantial trade interest in consultations being held pursuant to paragraph 1 of Article XXII of GATT 1994, paragraph 1 of Article XXII of GATS, or the corresponding provisions in other covered agreements,[4] such Member may notify the consulting Members and the DSB, within 10 days after the date of the circulation of the request for consultations under said Article, of its desire to be joined in the consultations. Such Member shall be joined in the consultations, provided that the Member to which the request for consultations was addressed agrees that the claim of substantial interest is well-founded. In that event they shall so inform the DSB. If the request to be joined in the consultations is not accepted, the applicant Member shall be free to request consultations under paragraph 1 of Article XXII or paragraph 1 of Article XXIII of GATT 1994, paragraph 1 of Article XXII or paragraph 1 of Article XXIII of GATS, or the corresponding provisions in other covered agreements.

(*footnote original*) [4] The corresponding consultation provisions in the covered agreements are listed hereunder:

Agreement on Agriculture, Article 19; Agreement on the Application of Sanitary and Phytosanitary Measures, paragraph 1 of Article 11; Agreement on Textiles and Clothing, paragraph 4 of Article 8; Agreement on Technical Barriers to Trade, paragraph 1 of Article 14; Agreement on Trade-Related Investment Measures, Article 8; Agreement on Implementation of Article VI of GATT 1994, paragraph 2 of Article 17; Agreement on Implementation of Article VII of GATT 1994, paragraph 2 of Article 19; Agreement on Preshipment Inspection, Article 7; Agreement on Rules of Origin, Article 7; Agreement on Import Licensing Procedures, Article 6; Agreement on Subsidies and Countervailing Measures, Article 30; Agreement on Safeguards, Article 14; Agreement on Trade-Related Aspects of Intellectual Property Rights, Article 64.1; and any corresponding consultation provisions in Plurilateral Trade Agreements as determined by the competent bodies of each Agreement and as notified to the DSB.

B. INTERPRETATION AND APPLICATION OF ARTICLE 4

1. General

(a) Importance of consultations

110. The Panel on *Brazil – Desiccated Coconut* considered the importance of consultations in the dispute settlement process and indicated that the Members' duty to consult is absolute and cannot be subject to the prior imposition of any terms and conditions by a Member:

> "The Philippines' request concerns a matter which this Panel views with the utmost seriousness. Compliance with the fundamental obligation of WTO Members to enter into consultations where a request is made under the DSU is vital to the operation of the dispute settlement system. Article 4.2 of the DSU provides that 'Each Member undertakes to accord sympathetic consideration to and afford adequate opportunity for consultation regarding any representations made by another Member concerning measures affecting the operation of any covered agreement taken within the territory of the former'. Moreover, pursuant to Article 4.6 of the DSU, consultations are 'without prejudice to the rights of any Member in any further proceedings'. In our view, these provisions make clear that Members' duty to consult is absolute, and is not susceptible to the prior imposition of any terms and conditions by a Member."[148]

111. In *Mexico – Corn Syrup (Article 21.5 – US)*, the Appellate Body stressed the importance of consultations:

> "We note that Mexico emphasizes the importance of consultations within the GATT and WTO dispute settlement systems. We agree with Mexico on the importance of consultations. Through consultations, parties exchange information, assess the strengths and weaknesses of their respective cases, narrow the scope of the differences between them and, in many cases, reach a mutually agreed solution in accordance with the explicit preference expressed in Article 3.7 of the DSU. Moreover, even where no such agreed solution is reached, consultations provide the parties an opportunity to define and delimit the scope of the dispute between them. Clearly, consultations afford many benefits to complaining and responding parties, as well as to third parties and to the dispute settlement system as a whole.
>
> The practice of GATT contracting parties in regularly holding consultations is testimony to the important role of consultations in dispute settlement. Article 4.1 of the DSU recognizes this practice and further provides that:
>
> > 'Members affirm their resolve to *strengthen and improve* the *effectiveness* of the consultation procedures employed by Members.' (emphasis added)
>
> A number of panel and Appellate Body reports have recognized the value of consultations within the dispute settlement process.[149]. . ."[150]

(b) Consultations as a prerequisite for panel proceedings

112. The Appellate Body on *Brazil – Aircraft* observed that "Articles 4 and 6 of the DSU, as well as paragraphs 1 to 4 of Article 4 of the *SCM Agreement*, set forth a process by which a complaining party must request consultations, and consultations must be held, before a matter may be referred to the DSB for the establishment of a panel."[151]

113. In *US – Certain EC Products*, the Appellate Body, further to referring to its Report on *Brazil – Aircraft* (see paragraph 112 above), found that an action which had not been subject to consultations because such action had not taken place at the time, was "not a measure at issue in this dispute and does not fall within the Panel's terms of reference".[152]

114. The Appellate Body on *Mexico – Corn Syrup (Article 21.5 – US)*, however, stressed the existence, further to Article 4.3, of certain limitations on consultations being a prerequisite to panel proceedings:

> "[A]s a general matter, consultations are a prerequisite to panel proceedings. However, this general proposition is subject to certain limitations . . .
>
> Article 4.3 of the DSU relates the responding party's conduct towards consultations to the complaining party's

---

[148] Panel Report on *Brazil – Desiccated Coconut*, para. 287.

[149] (*footnote original*) The important role of consultations in both the GATT and the WTO dispute settlement systems has repeatedly been acknowledged, both expressly and implicitly, by panels and by the Appellate Body. See, for example: Panel Report, *Uruguayan Recourse to Article XXIII*, adopted 16 November 1962, BISD 11S/95, para. 10; Panel Report, *United States – Imposition of Anti-Dumping Duties on Imports of Fresh and Chilled Atlantic Salmon from Norway*, adopted 27 April 1994, BISD 41S/Vol.I/229, para. 333; Panel Report, *Brazil – Measures Affecting Desiccated Coconut*, WT/DS22/R, adopted 20 March 1997, as upheld by the Appellate Body Report, WT/DS22/AB/R, DSR 1997:1, 189, para. 287; Panel Report, *European Communities – Bananas*, WT/DS27/R/ECU, adopted 25 September 1997, as modified by the Appellate Body Report, WT/DS27/AB/R, DSR 1997:III, 1085, paras. 7.17–7.20; Panel Report, *Korea – Taxes on Alcoholic Beverages* ("*Korea – Alcoholic Beverages*"), WT/DS75/R, WT/DS84/R, adopted 17 February 1999, as modified by the Appellate Body Report, WT/DS75/AB/R, WT/DS84/AB/R, para. 10.19; Appellate Body Report, *Brazil – Aircraft*, *supra*, footnote 30, para. 132; Panel Report, *Brazil – Aircraft*, WT/DS46/R, adopted 20 August 1999, as modified by the Appellate Body Report, WT/DS46/AB/R, para. 7.10; Panel Report, *United States – Safeguard Measures on Imports of Fresh, Chilled or Frozen Lamb Meat from New Zealand and Australia* ("*United States – Lamb Safeguard*"), WT/DS177/R, WT/DS178/R, adopted 16 May 2001, as modified by the Appellate Body Report, WT/DS177/AB/R, WT/DS178/AB/R, para. 5.40. See also the discussion of the role of consultations in disputes under the *Agreement on Textiles and Clothing* in Appellate Body Report, *United States – Restrictions on Imports of Cotton and Man-made Fibre Underwear*, WT/DS24/AB/R, adopted 25 February 1997, DSR 1997:I, 11, at 23–24.

[150] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 54–56.

[151] Appellate Body Report on *Brazil – Aircraft*, para. 131.

[152] Appellate Body Report on *US – Certain EC Products*, para. 70.

right to request the establishment of a panel. When the responding party does not respond to a request for consultations, or declines to enter into consultations, the complaining party may dispense with consultations and proceed to request the establishment of a panel. In such a case, the responding party, by its own conduct, relinquishes the potential benefits that could be derived from those consultations."[153]

115. The Appellate Body on *Mexico – Corn Syrup (Article 21.5 – US)* also referred to Article 4.7 when explaining the limitations on consultations being a prerequisite to panel proceedings:

"Article 4.7 also relates the conduct of the responding party concerning consultations to the complaining party's right to request the establishment of a panel. This provision states that the responding party may agree with the complaining party to forgo the potential benefits that continued pursuit of consultations might bring. Thus, Article 4.7 contemplates that a panel may be validly established notwithstanding the shortened period for consultations, as long as the parties agree. Article 4.7 does not, however, specify any particular form that the agreement between the parties must take."[154]

116. Finally, the Appellate Body on Mexico – Corn Syrup (Article 21.5 – US) referred to Article 6.2 in support of its reasoning:

"In addition, . . ., pursuant to Article 6.2 of the DSU, one of the requirements for requests for establishment of a panel is that such requests must 'indicate whether consultations were held'. The phrase '*whether* consultations were held' shows that this requirement in Article 6.2 may be satisfied by an express statement that *no consultations were held*. In other words, Article 6.2 also envisages the possibility that a panel may be validly established without being preceded by consultations."[155]

117. The Appellate Body on *Mexico – Corn Syrup (Article 21.5 – US)* thus concluded that, since the *DSU* recognizes situations where the absence of consultations does not deprive the panel of its authority, such absence is not a defect which, by its very nature, would deprive a panel of its authority. More importantly, the Appellate Body considered that the lack of consultations is not a defect a panel must examine even if both parties to the dispute remain silent thereon:

"Thus, the DSU explicitly recognizes circumstances where the absence of consultations would *not* deprive the panel of its authority to consider the matter referred to it by the DSB. In our view, it follows that where the responding party does not object, explicitly and in a timely manner, to the failure of the complaining party to request or engage in consultations, the responding party may be deemed to have consented to the lack of consultations and, thereby, to have relinquished whatever right to consult it may have had.

As a result, we find that the lack of prior consultations is not a defect that, by its very nature, deprives a panel of its authority to deal with and dispose of a matter, and that, accordingly, such a defect is not one which a panel must examine even if both parties to the dispute remain silent thereon. We recall that, in this case, Mexico neither pursued the potential benefits of consultations nor objected that the United States had deprived it of such benefits."[156]

(c) Disclosure of information during consultations

118. In *India – Patents (US)*, the United States argued that if India had disclosed, during consultations, the existence of certain administrative instructions, the United States would have included in its request for establishment of a Panel a claim under Article 63 of the *TRIPS Agreement*. With respect to disclosure of information during consultations, the Appellate Body noted that:

"All parties engaged in dispute settlement under the DSU must be fully forthcoming from the very beginning both as to the claims involved in a dispute and as to the facts relating to those claims. Claims must be stated clearly. Facts must be disclosed freely. This must be so in consultations as well as in the more formal setting of panel proceedings. In fact, the demands of due process that are implicit in the DSU make this especially necessary during consultations. For the claims that are made and the facts that are established during consultations do much to shape the substance and the scope of subsequent panel proceedings. If, in the aftermath of consultations, any party believes that all the pertinent facts relating to a claim are, for any reason, not before the panel, then that party should ask the panel in that case to engage in additional fact-finding."[157]

(d) Adequacy of consultations

119. In *EC – Bananas III*, the Panel indicated that the function of the panels as regards consultations is only to ascertain whether consultations, when required, were held:

"Consultations are . . . a matter reserved for the parties. The DSB is not involved; no panel is involved; and the consultations are held in the absence of the Secretariat.

---

[153] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 58–59.
[154] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 61.
[155] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, para. 62.
[156] Appellate Body Report on *Mexico – Corn Syrup (Article 21.5 – US)*, paras. 63–64.
[157] Appellate Body Report on *India – Patents (US)*, para. 94.

> While a mutually agreed solution is to be preferred, in some cases it is not possible for parties to agree upon one. In those cases, it is our view that the function of a panel is only to ascertain that the consultations, if required, were in fact held."[158]

120. In *Korea – Alcoholic Beverages*, Korea argued before the Panel that the complaining parties violated Articles 3.3, 3.7 and 4.5 of the *DSU* by not engaging in consultations in good faith to reach a mutually agreed solution. Korea maintained that there had been no meaningful exchange of facts because the complainants treated the consultations as one-sided question and answer sessions. Korea asserted that such an approach frustrated any reasonable chance for a settlement and considered the non-observance of specific provisions of the *DSU* as a "violation of the tenets of the WTO dispute settlement system". The Panel, in reference to the Panel on *EC – Bananas III* (see paragraph 119 above), confirmed that the panel does not have a mandate to investigate the adequacy of the consultation process that took place between the parties:

> "In our view, the WTO jurisprudence so far has not recognized any concept of 'adequacy' of consultations. The only requirement under the DSU is that consultations were in fact held, or were at least requested, and that a period of sixty days has elapsed from the time consultations were requested to the time a request for a panel was made. What takes place in those consultations is not the concern of a panel. The point was put clearly by the Panel in *Bananas III*, . . .
>
> . . .
>
> We do not wish to imply that we consider consultations unimportant. Quite the contrary, consultations are a critical and integral part of the DSU. But, we have no mandate to investigate the adequacy of the consultation process that took place between the parties and we decline to do so in the present case."[159]

121. The Panel on *Turkey – Textiles* confirmed this approach and expressly referred to the panel reports in *EC – Bananas III* and *Korea – Alcoholic Beverages* referenced in paragraphs 119–120 above:

> "[W]e note that in *EC – Bananas III* the panel concluded that the private nature of the bilateral consultations means that panels are normally not in a position to evaluate how the consultations process functions, but could only determine whether consultations, if required, did in fact take place.[160] In this case, the parties never consulted, as Turkey declined to do so without the presence of the European Communities.
>
> . . .
>
> We concur with [the finding of the Panel on *Korea – Alcoholic Beverages*]. We note also that our terms of reference (our mandate) are determined, not with reference to the request for consultations, or the content of the consultations, but only with reference to the request for the establishment of a panel.[161] Consultations are a crucial and integral part of the DSU and are intended to facilitate a mutually satisfactory settlement of the dispute, consistent with Article 3.7 of the DSU. However, the only function we have as a panel in relation to Turkey's procedural concerns is to ascertain whether consultations were properly requested, in terms of the DSU, that the complainant was ready to consult with the defendant and that the 60 day period has lapsed before the establishment of a panel was requested by the complainant. We consider that India complied with these procedural requirements and therefore we find it necessary to reject Turkey's claim."[162]

(e) Result of the consultations

122. In *EC – Bananas III*, the Panel dismissed the European Communities argument that consultations must produce an adequate explanation of a complainant's case:

> "As to the EC argument that consultations must lead to an adequate explanation of the Complainants' case, we cannot agree. Consultations are the first step in the dispute settlement process. While one function of the consultations may be to clarify what the case is about, there is nothing in the DSU that provides that a complainant cannot request a panel unless its case is adequately explained in the consultations. The fulfilment of such a requirement would be difficult, if not impossible, for a complainant to demonstrate if a respondent chose to claim a lack of understanding of the case, a result which would undermine the automatic nature of panel establishment under the DSU. The only prerequisite for requesting a panel is that the consultations have 'fail[ed] to settle a dispute within 60 days of receipt of the request for consultations . . .'.[163] Ultimately, the function of providing notice to a respondent of a complainant's claims and arguments is served by the request for establishment of a panel and by the complainant's submissions to that panel."[164]

(f) Challenging a request for consultations

123. For the requirement of good faith when challenging procedural deficiencies, see paragraph 105 above.

---

[158] Panel Report on *EC – Bananas III*, para. 7.19.
[159] Panel Report on *Korea – Alcoholic Beverages*, para. 10.19. See also Panel Report on *Turkey – Textiles*, para. 9.24.

[164] Panel Report on *EC – Bananas III (Guatemala and Honduras)*, para. 7.20.

124. With respect to challenging measures not listed on the request for consultations, see paragraphs 128–132 below.

2. Article 4.1

125. See paragraph 111 above.

3. Article 4.3

126. See paragraph 114 above.

4. Article 4.4

(a) Notification of requests for consultations

127. At its meeting on 19 July 1995, the DSB, with regard to the notification requirement contained in Article 4:4 of the *DSU*, agreed that delegations would send one single text of their notifications to the Secretariat (Council Division), simply specifying in that text the other relevant Councils or Committees to which they wished the notification to be addressed. The Secretariat would then distribute it to the specified relevant bodies.[165]

(b) Absence or addition of "claims" and/or "measures" in the request for consultations

128. The Panel on *Brazil – Aircraft* considered Brazil's objections to the Panel's consideration of certain measures included in the panel request which were based on the fact that they were enacted or implemented after the last consultations between the parties and, as a result, could not have been the subject of consultations. The Panel indicated that it was not governed by prior consultations:

> "We recall that our terms of reference are based upon Canada's request for establishment of a panel, and not upon Canada's request for consultations. These terms of reference were established by the DSB pursuant to Article 7.1 of the DSU and establish the parameters for our work.[166] Nothing in the text of the DSU or Article 4 of the SCM Agreement provides that the scope of a panel's work is governed by the scope of prior consultations. Nor do we consider that we should seek to somehow imply such a requirement into the WTO Agreement. One purpose of consultations, as set forth in Article 4.3 of the SCM Agreement, is to 'clarify the facts of the situation',[167] and it can be expected that information obtained during the course of consultations may enable the complainant to focus the scope of the matter with respect to which it seeks establishment of a panel. Thus, to limit the scope of the panel proceedings to the identical matter with respect to which consultations were held could undermine the effectiveness of the panel process."[168]

129. This view was confirmed by the Appellate Body in *Brazil – Aircraft* which indicated that it "[did] not believe, . . ., that Articles 4 and 6 of the DSU, or paragraphs 1 to 4 of Article 4 of the *SCM Agreement*, require a *precise and exact identity* between the specific measures that were the subject of consultations and the specific measures identified in the request for the establishment of a panel".[169]

130. The Panel on *EC – Bed Linen* considered that the absence in the request for establishment of a panel of a subject discussed during consultations simply indicated that a Member did not wish to pursue the matter further:

> "In the absence of any reference in the request for establishment to the treaty Article alleged to have been violated, the question of possible prejudice as a result of failure to state a claim with sufficient clarity simply does not arise. Moreover, we are of the view that the argument that there was no prejudice to the European Communities because Article 6 of the AD Agreement was mentioned in the request for consultations, and may even have been discussed during the consultations is, in this case, irrelevant. Consultations are part of the process of clarifying the matter in dispute between the parties. It is perfectly understandable, and indeed desirable, that issues discussed during consultations do not subsequently become claims in dispute. Thus, the absence of a subject that was discussed in the consultations from the request for establishment indicates that the complaining Member does not intend to pursue that matter further. Whether inadvertent or not, as a result of the omission of Article 6 from the request for establishment the defending Member, the European Communities, and third countries had no notice that India intended to pursue claims under Article 6 of the AD Agreement in this case, and were entitled to rely on the conclusion that it would not do so. Consequently, India would be estopped in any event from raising such claims."[170]

131. The Panel on *Canada – Aircraft* indicated (when considering Article 4.2 of the *SCM Agreement*) that the

[165] WT/DSB/M/6.

[166] (*footnote original*) See, e.g., *India – Patent Protection for Pharmaceutical and Agricultural Chemical Products*, adopted 16 January 1998, WT/DS50/AB/R, para. 92 ("The jurisdiction of a panel is established by that Panel's terms of reference, which are governed by Article 7 of the DSU").

[167] (*footnote original*) As the Appellate Body has noted, "the claims that are made and the facts that are established during consultations do much to shape the substance and the scope of subsequent panel proceedings." *India – Patent Protection for Pharmaceutical and Agricultural Chemical Products*, adopted 16 January 1998, WT/DS50/AB/R, para. 94.

[168] Panel Report on *Brazil – Aircraft*, para.7.9. See also *US – Steel Plate* where the Panel recalled the findings of the Panel and Appellate Body in *Brazil – Aircraft* (see Panel Report on *US – Steel Plate*, para.7.17) and rejected India's claim that a "practice" was not properly before the panel because it had not been identified in the request for consultations nor actually consulted about.

[169] Appellate Body Report on *Brazil – Aircraft*, para. 132.

[170] Panel Report on *EC – Bed Linen*, para. 6.16.

matter consulted on and the matter identified in the panel request will not necessarily be identical:

> "In our view, a panel's terms of reference would only fail to be determinative of a panel's jurisdiction if, in light of Article 4.1 – 4.4 of the SCM Agreement applied together with[171] Article 4.2 – 4.7 of the DSU, the complaining party's request for establishment were found to cover a 'dispute' that had not been the subject of a request for consultations. Article 4.4 of the SCM Agreement permits a Member to refer a 'matter' to the DSB if 'no mutually agreed solution' is reached during consultations. In our view, this provision complements Article 4.7 of the DSU, which allows a Member to refer a 'matter' to the DSB if 'consultations fail to settle a dispute'. Read together, these provisions prevent a Member from requesting the establishment of a panel with regard to a 'dispute' on which no consultations were requested. In our view, this approach seeks to preserve due process while also recognising that the 'matter' on which consultations are requested will not necessarily be identical to the 'matter' identified in the request for establishment of a panel. The two 'matters' may not be identical because, as noted by the Appellate Body in *India – Patents*, 'the claims that are made and the facts that are established during consultations do much to shape the substance and the scope of subsequent panel proceedings'.[172]"[173]

132. See excerpt from the Panel report on *Canada – Aircraft* contained in Article 4.4 of the *SCM Agreement* discussion in the Chapter on the *SCM Agreement*, Section IV.B.4(a).

(c) Effect of the extension of the duration of identified measures after consultations

133. The Panel on *Chile – Price Band System* addressed the issue of whether or not the extension of the duration of identified measures after consultations affected compliance with Article 4.4 of the *DSU*. Chile argued that none of the safeguard measures challenged by Argentina in the dispute fell within the Panel's jurisdiction. According to Chile, the provisional and definitive safeguard measures concerned were no longer in effect on the date of Argentina's request for establishment of the panel. The Panel responded (on an issue not subsequently appealed) as follows:

> "Chile raises two different objections regarding the Panel's jurisdiction with respect to the definitive safeguard measures and the extension of their duration: first, the definitive safeguard measures had 'expired before the request for establishment was made'; second, the 'extension measures' were not formally included in the request for consultations. We cannot accept either of those objections, for one and the same reason. Both of Chile's objections are based on the proposition that the extension of the period of application results in a measure distinct from the definitive safeguard measure. We disagree with this proposition. In our view, Article 7 of the Agreement on Safeguards makes it clear that what is at issue is not an extension 'of the safeguard measure', but, rather, an extension 'of the period of application of the safeguard measure' or of 'the duration of the safeguard measure'. Article 7 is entitled '*Duration* and Review *of Safeguard Measures*'. Article 7.1 provides . . .:
>
> > This language is sufficiently clear for us as to conclude that the 'extensions' are not distinct measures, but merely continuations in time of the definitive safeguard measures. As a result, we consider that the definitive safeguard measures were not terminated before the request for establishment, but, rather, that their duration was simply extended at that time. Thus, we need not further consider Chile's argument that we lack the authority to make findings in respect of the definitive measures on the grounds that they have expired.[174] For the same reason, we also consider the fact that the extension was not mentioned in the request for consultations irrelevant for the determination of our jurisdiction: pursuant to Article 4.4 of the DSU, Argentina had to, and did, identify the definitive safeguard measures in its request for consultations. The fact that the duration of the identified measures was extended by Chile after the request for consultations cannot affect Argentina's compliance with Article 4.4 of the DSU.[175]
>
> We note, moreover, that the 'extension' did not in any way amend the content of the safeguard measures and that there were, in fact, exchanges between Argentina and Chile during the period of consultations regarding the 'extension'. Chile must therefore have been fully informed about Argentina's intention to challenge the safeguard measures, *as extended in time*. Thus, even if the 'extension' were to be considered a separate measure, *quod non*, Chile's due process rights would not have been impinged upon.[176]"[177]

---

[171] (*footnote original*) According to the Appellate Body in *Guatemala – Anti-Dumping Investigation Regarding Portland Cement from Mexico*, wherever possible, special or additional rules and procedures for dispute settlement in Annex 1 of the DSU (such as Article 4.1 – 4.4 of the SCM Agreement) should be read so as to complement the provisions of the DSU (WT/DS60/AB/R, adopted 25 November 1998, paras. 64–66).

[172] (*footnote original*) *India – Patent Protection for Pharmaceuticals and Agricultural Chemical Products*, WT/DS50/AB/R, adopted 16 January 1998, para. 94.

[173] Panel Report on *Canada – Aircraft*, para. 9.12.

[174] (*footnote original*) We note, in any event, our view that panels do not lack the legal authority to make findings in respect of expired measures. *See* paras. 7.112–7.113, *supra*.

[175] (*footnote original*) Accordingly, we need not decide whether the failure to identify a measure in a request for consultations would deprive a panel of the legal authority to make findings in respect of a measure otherwise within its terms of reference.

[176] (*footnote original*) We note, however, that we are not examining the consistency of the extension decision with the requirements of Article 7.2 of the Agreement on Safeguards, as that is not within our Terms of Reference.

[177] Panel Report on *Chile – Price Band System*, paras. 7.116–7.120.

(d) Relationship between request for consultations and request for the establishment of a panel

134. See paragraphs 128–131 above and the excerpt from the report of the Appellate Body referenced in paragraph 144 below.

5. Article 4.6

(a) "consultations shall be confidential"

(i) Information acquired during consultations

In the same proceedings

135. In *Korea – Alcoholic Beverages*, Korea argued before the Panel that the complainants breached the confidentiality requirement of Article 4.6 of the *DSU* by making reference, in their submissions, to information supplied by Korea during consultations. The Panel, in a finding not reviewed by the Appellate Body, held that while confidentiality in consultations between parties to a dispute was "essential", it also found that "parties do not thereby breach any confidentiality by disclosing in those proceedings information acquired during the consultations":

> "We note that Article 4.6 of the DSU requires confidentiality in the consultations between parties to a dispute. This is essential if the parties are to be free to engage in meaningful consultations. However, it is our view that this confidentiality extends only as far as requiring the parties to the consultations not to disclose any information obtained in the consultations to any parties that were not involved in those consultations. We are mindful of the fact that the panel proceedings between the parties remain confidential, and parties do not thereby breach any confidentiality by disclosing in those proceedings information acquired during the consultations. Indeed, in our view, the very essence of consultations is to enable the parties to gather correct and relevant information, for purposes of assisting them in arriving at a mutually agreed solution, or failing which, to assist them in presenting accurate information to the panel. It would seriously hamper the dispute settlement process if the information acquired during consultations could not subsequently be used by any party in the ensuing proceedings. We find therefore, that there has been no breach of confidentiality by the complainants in this case in respect of information that they became aware of during the consultations with Korea on this matter."[178]

136. The Panel on *EC – Bed Linen* also referred to the finding of the Panel on *Korea – Alcoholic Beverages* referenced in paragraph 135 above. In that case, India presented transcripts of the consultation sessions held with the European Communities, so as to demonstrate the "bad faith" of the European Communities during consultations. Although the Panel concluded that the material submitted by India was not related to any specific legal claim and, as a result, was not relevant to the case, the Panel decided that it would not *a priori* exclude this evidence. *Inter alia*, the Panel recalled the findings of the Panel on *Korea – Alcoholic Beverages* that information obtained in consultations may be presented during subsequent panel proceedings.[179]

Information obtained in different proceedings

137. In *Australia – Automotive Leather II*, Australia, the defending party, demanded that information which the United States, the complaining party, had obtained during consultations preceding a previous panel requested by the United States (a panel which had been established, but never composed and, as a result, never became active) be declared inadmissible in the second proceeding. The Panel, further to referring to the findings of the Panel on *Korea – Alcoholic Beverages* (see paragraph 135 above), considered as follows:

> "Given that, in this case, the parties and the dispute are the same, no panel was actually composed or considered the dispute in the first-requested proceeding, and there are no third parties involved in either proceeding who might have learned information in the course of consultations, we cannot see any reason to exclude the United States Exhibit 2 from our consideration, merely because it was developed in the course of the consultations held pursuant to the first request.[180] Australia has failed to specify what other, if any, facts might have been derived by the United States from the earlier consultations, and so there is no basis for us to exclude any such facts."[181]

Offers of settlement made during consultations

138. In *US – Underwear*, Costa Rica had submitted to the Panel certain information relating to settlement offers made by the United States during the consultations. The Panel decided not to base its findings on such information. See paragraph 137 above.

(ii) Relevance of third party participation in confidentiality of information from consultations

139. The Panel on *Mexico – Corn Syrup* considered, *inter alia*, the effect of third party participation when

---

[178] Panel Report on *Korea – Alcoholic Beverages*, para. 10.23.

[179] Panel Report on *EC – Bed Linen*, paras. 6.32–6.35.

[180] (*footnote original*) There is nothing to indicate that there would have been any different answers had the same questions been asked by the United States during consultations held pursuant to the second request. We note Australia's view that there were no consultations held pursuant to the second request, although there was a meeting between the parties. Presumably, this view is based on Australia's position that the second request for consultations, and the second request for establishment, like this Panel which flowed from those requests, were inconsistent with the DSU.

[181] Panel Report on *Australia – Automotive Leather II*, para. 9.34.

referring to consultations and concluded that "the requirement to maintain the confidentiality of consultations is not violated by the inclusion of information obtained during consultations in the written submission of a party provided to a third party in the subsequent panel proceeding even if that third party did not participate in the consultations":

> "[I]t would seriously hamper the dispute settlement process if a party could not use information obtained in the consultations in subsequent panel proceedings merely because a third party which did not participate in the consultations chooses to participate in the panel proceedings.[182] As Mexico points out, third party participation in the panel proceedings cannot be vetoed by the parties to the proceeding. In our view, it would be anomalous if the decision of a Member to participate in a panel proceeding as a third party when it did not, or could not, participate as a third party in the underlying consultations had the effect of limiting the evidence that could be relied upon in the panel proceeding by precluding the introduction of information obtained during the consultations. Third parties are subject to the same requirement to maintain the confidentiality of panel proceedings as are parties. We therefore conclude that the requirement to maintain the confidentiality of consultations is not violated by the inclusion of information obtained during consultations in the written submission of a party provided to a third party in the subsequent panel proceeding even if that third party did not participate in the consultations."[183]

(b) "consultations shall be . . . without prejudice to the rights of any Member"

140. In *US – Underwear*, Costa Rica had submitted to the Panel certain information relating to settlement offers made by the United States during the consultations. The Panel considered that "the wording of Article 4.6 of the *DSU* makes it clear that offers made in the context of consultations are, in case a mutually agreed solution is not reached, of no legal consequence to the later stages of dispute settlement, as far as the rights of the parties to the dispute are concerned". Accordingly, the Panel decided to disregard such information.[184]

6. Article 4.7

141. See paragraph 115 above.

7. Article 4.9

142. In *Canada – Patent Term*, the United States submitted a request for expedited consideration of the dispute under Article 4.9 of the *DSU* on the grounds that the premature expiration of patents during the dispute settlement procedure caused irreparable harm to the patent owners. It referred to the alleged simplicity of the issues in dispute, the absence of third parties and other circumstances. The Panel indicated that due to other demands on its members' time, it could not accelerate the timetable prior to the first substantive meeting; however the Panel stated that it undertook to make every effort to issue its report as soon as possible after the second substantive meeting.[185]

8. Article 4.11

143. The Appellate Body on *EC – Bananas III* touched on Article 4.11 in its finding that no "legal interest" is required for a Member to bring a case under the *DSU*. See paragraph 158 below.

C. RELATIONSHIP WITH OTHER ARTICLES

1. Article 6

144. In response to Brazil's argument that a panel request must include only measures that were either identified in the request for consultations or raised subsequently during the consultations, the Appellate Body in *Brazil – Aircraft* stated:

> "We do not believe, however, that Articles 4 and 6 of the DSU, or paragraphs 1 to 4 of Article 4 of the *SCM Agreement*, require a *precise and exact identity* between the specific measures that were the subject of consultations and the specific measures identified in the request for the establishment of a panel. As stated by the Panel, '[o]ne purpose of consultations, as set forth in Article 4.3 of the SCM Agreement, is to "clarify the facts of the situation", and it can be expected that information obtained during the course of consultations may enable the complainant to focus the scope of the matter with respect to which it seeks establishment of a panel.'"[186]

145. See also paragraph 116 above.

---

[182] (*footnote original*) *See Korea – Alcohol Panel Report*, para. 10.23 (issue not raised on appeal). In *Korea – Alcohol*, the Panel faced the question that is raised by Mexico in this dispute – whether a party in a panel proceeding may refer to or rely on information it obtained during the consultations preceding the request for establishment of a panel. That Panel concluded that "[i]t would seriously hamper the dispute settlement process if the information acquired during consultations could not subsequently be used by any party in the ensuing proceedings". *Id.* We note the Panel's statement that the confidentiality requirement of Article 12.7 extends only so far as to require "parties to the consultations not to disclose any information obtained in the consultations to any parties that were not involved in those consultations". *Id.* However, *Korea–Alcohol* involved the same factual circumstances as this dispute with respect to the involvement of a third party to the Panel proceeding which had not participated in the consultations. The same "due process" considerations that underlie the Panel's decision in *Korea–Alcohol* are, in our view, relevant here.

[183] Panel Report on *Mexico – Corn Syrup*, para. 7.41.

[184] Panel Report on *US – Underwear*, para. 7.27.

[185] Panel Report on *Canada – Patent Term*, para. 1.5.

[186] Appellate Body Report on *Brazil – Aircraft*, para. 132. In this connection, the Panel on *Brazil – Aircraft* stated ". . .to limit the scope of the panel proceedings to the identical matter with respect to which consultations were held could undermine the effectiveness of the panel process".

D. RELATIONSHIP WITH OTHER WTO AGREEMENTS

1. Article 8.10 of the ATC

146. The Panel on *US – Wool Shirts and Blouses* discussed the role of panels under the *DSU* and the role of the TMB under the *ATC*. With respect to consultations, the Panel stated:

> "We note also that, according to Article 8.10 of the ATC, when the TMB process has been completed, a Member which remains unsatisfied with the TMB recommendations can request the establishment of a panel without having to request consultations under Article 4 of the DSU. This is to say that the TMB process can replace the consultation phase in the dispute settlement process under the DSU and is distinct from the formal adjudication process by panels."[187]

2. Article 17 of the Anti-Dumping Agreement

147. See the excerpts from the reports of the panels and Appellate Body referenced in the Chapter on the *Anti-Dumping Agreement*, Section XVII.B.

3. Article 4.2 of the SCM Agreement

148. See paragraph 112 above.

149. As regards the difference between Article 4.4 of the *DSU* and Article 4.2 of the *SCM Agreement*, see the excerpt from the Report of the Appellate Body in *US – FSC* referenced at Section IV.B.1(a) of the Chapter on the *SCM Agreement*.

V. ARTICLE 5

A. TEXT OF ARTICLE 5

Article 5
Good Offices, Conciliation and Mediation

1. Good offices, conciliation and mediation are procedures that are undertaken voluntarily if the parties to the dispute so agree.

2. Proceedings involving good offices, conciliation and mediation, and in particular positions taken by the parties to the dispute during these proceedings, shall be confidential, and without prejudice to the rights of either party in any further proceedings under these procedures.

3. Good offices, conciliation or mediation may be requested at any time by any party to a dispute. They may begin at any time and be terminated at any time. Once procedures for good offices, conciliation or mediation are terminated, a complaining party may then proceed with a request for the establishment of a panel.

4. When good offices, conciliation or mediation are entered into within 60 days after the date of receipt of a request for consultations, the complaining party must allow a period of 60 days after the date of receipt of the request for consultations before requesting the establishment of a panel. The complaining party may request the establishment of a panel during the 60-day period if the parties to the dispute jointly consider that the good offices, conciliation or mediation process has failed to settle the dispute.

5. If the parties to a dispute agree, procedures for good offices, conciliation or mediation may continue while the panel process proceeds.

6. The Director-General may, acting in an *ex officio* capacity, offer good offices, conciliation or mediation with a view to assisting Members to settle a dispute.

B. INTERPRETATION AND APPLICATION OF ARTICLE 5

1. WTO Director-General's offer of assistance

150. On 13 July 2001, the WTO Director-General[188] addressed a communication to the Members expressing his views that "Members should be afforded every opportunity to settle their disputes through negotiations whenever possible". In this communication,[189] the WTO Director-General noted that Article 5 of the *DSU*, which provides for the use of good offices, conciliation and mediation, had not been used and reminded Members that he was ready and willing to assist them as is envisaged under the terms of Article 5.6. The communication included a set of procedures for Members to use to request assistance under Article 5. The communication notes that these procedures are intended "purely to help Members resolve their differences and do not limit their treaty rights in any manner". It also assures Members that these procedures would not in any way limit the Director-General's availability to assist delegations more generally whenever they request his help.

151. With respect to a mediation outside the *DSU* but following procedures similar to those described in this communication, see paragraphs 152–153 below.

2. Mediation outside the DSU

152. On 10 October 2002, the WTO Director-General[190] issued a communication informing the Members that on 4 September 2002, the Philippines, Thailand and the European Communities had jointly requested mediation by himself or by a mediator appointed by

[187] Panel Report on *US – Wool Shirts and Blouses*, para. 7.19.
[188] The WTO Director-General issuing this communication was Mr Mike Moore.
[189] WT/DSB/25.
[190] The WTO Director-General issuing this communication was Dr Supachai Panitchpakdi.

him with their agreement. The purpose of the mediation was "to examine the extent to which the legitimate interests of the Philippines and Thailand are being unduly impaired as a result of the implementation by the European Communities of the preferential tariff treatment for canned tuna originating in ACP states. In the event that the mediator concludes that undue impairment has in fact occurred, the mediator could consider means by which this situation may be addressed."[191]

153. Although the requesting Members considered that the matter at issue was not a "dispute" within the terms of the *DSU*, they agreed that the mediator could be guided by procedures similar to those envisaged for mediation under Article 5 of the *DSU*, as described in a communication by the Director-General on Article 5 of the *DSU* (see paragraph 150 above). The mediation resulted in an amicable outcome reached by the parties based on an advisory opinion of the mediator.[192]

VI. ARTICLE 6

A. TEXT OF ARTICLE 6

Article 6
Establishment of Panels

1. If the complaining party so requests, a panel shall be established at the latest at the DSB meeting following that at which the request first appears as an item on the DSB's agenda, unless at that meeting the DSB decides by consensus not to establish a panel.[5]

(*footnote original*) [5] If the complaining party so requests, a meeting of the DSB shall be convened for this purpose within 15 days of the request, provided that at least 10 days' advance notice of the meeting is given.

2. The request for the establishment of a panel shall be made in writing. It shall indicate whether consultations were held, identify the specific measures at issue and provide a brief summary of the legal basis of the complaint sufficient to present the problem clearly. In case the applicant requests the establishment of a panel with other than standard terms of reference, the written request shall include the proposed text of special terms of reference.

B. INTERPRETATION AND APPLICATION OF ARTICLE 6

1. General

(a) Multiple panels involving the same parties and same claims

154. In *Australia – Automotive Leather I*, pursuant to a request made by the United States, a panel was established on 22 January 1998[193] and 22 June 1998[194] regarding the same matter. In the latter request for the establishment of a panel, the United States asked that its earlier request be withdrawn. At the DSB meeting held on 22 June 1998, the United States representative said that it had terminated the panel that had been established on 22 January 1998. Australia argued that the United States did not have the right to have a second panel established at the DSB meeting on 22 June 1998 and the DSB did not have the right under the *DSU* to establish such a panel against the wishes of Australia. Australia argued that the Panel was not properly established, and that therefore the Panel should terminate its work immediately. The Panel examined Australia's arguments and stated:

> "The establishment of a panel is the task of the DSB. It is by no means clear that, once the DSB has established a panel, as it did in this case at its meeting of 22 June 1998, the panel so established has the authority to rule on the propriety of its own establishment. Nothing in our terms of reference expressly authorizes us to consider whether the DSB acted correctly in establishing this Panel.
>
> . . .
>
> In our view, Australia is asking this Panel to read into the DSU an implicit prohibition on multiple panels between the same parties regarding the same matter that does not exist in the text of the DSU. Australia's arguments in support of its position arise out of policy considerations and address the object and purpose of the DSU. In light of the fundamental importance in the WTO dispute settlement system of the right to have a panel established to examine a matter, in the absence of a consensus not to do so, we do not consider it appropriate in this dispute to read such an implicit prohibition into the DSU. This is particularly true given that the policy concerns expressed by Australia are purely theoretical and do not arise in this case. Specifically, this is not a case where a complainant is actively pursuing two proceedings with respect to the same matter – the United States has made it very clear that it is not pursuing the first dispute. To the contrary, the United States has sought to terminate the first dispute, and it is Australia which has sought to prevent that result. Nor is this a case where a complainant has sought a second panel before a first panel has completed its work with respect to the same matter because it was dissatisfied with developments in the first panel. Although the first panel in this case was established, it was never composed and thus never began its work.
>
> For the foregoing reasons, we deny Australia's request to terminate this Panel, and will continue our work in accordance with our terms of reference."[195]

[191] WT/GC/66 and WT/GC/66/Add.1.
[192] WT/GC/71.
[193] WT/DS106/2.
[194] WT/DS126/2.
[195] Panel Report on *Australia – Automotive Leather II*, paras. 9.12 and 9.14–9.15.

2. Article 6.2

(a) General

(i) Task of panels to examine requests for establishment

155. In *EC – Bananas III*, the Appellate Body "recognize[d] that a panel request will usually be approved automatically at the DSB meeting following the meeting at which the request first appears on the DSB's agenda".[196] Thus, the Appellate Body concluded that "[a]s a panel request is normally not subjected to detailed scrutiny by the DSB, it is incumbent upon a panel to examine the request for the establishment of the panel very carefully to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU . . .".[197]

(ii) Request must be sufficiently precise

156. In *EC – Bananas III*, the Appellate Body held that there were two reasons why a panel request must be "sufficiently precise":

> "As a panel request is normally not subjected to detailed scrutiny by the DSB, it is incumbent upon a panel to examine the request for the establishment of the panel very carefully to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU. It is important that a panel request be sufficiently precise for two reasons: first, it often forms the basis for the terms of reference of the panel pursuant to Article 7 of the DSU; and, second, it informs the defending party and the third parties of the legal basis of the complaint."[198]

157. In *US – Carbon Steel*, the Appellate Body reiterated that the underlying requirements of Article 6.2 are first, to define the scope of a dispute, and second, to "serve the *due process* objective of notifying the parties and third parties of the nature of a complainant's case".[199]

> "As we have said previously, compliance with the requirements of Article 6.2 must be demonstrated on the face of the request for the establishment of a panel. Defects in the request for the establishment of a panel cannot be 'cured' in the subsequent submissions of the parties during the panel proceedings.[200] Nevertheless, in considering the sufficiency of a panel request, submissions and statements made during the course of the panel proceedings, in particular the first written submission of the complaining party, may be consulted in order to confirm the meaning of the words used in the panel request and as part of the assessment of whether the ability of the respondent to defend itself was prejudiced.[201] Moreover, compliance with the requirements of Article 6.2 must be determined on the merits of each case, having considered the panel request as a whole, and in the light of attendant circumstances.[202]"[203]

(b) Right to bring claims

(i) Legal interest

158. In *EC – Bananas III*, the European Communities argued that a complaining party must normally have a legal right or interest in the claim it is pursuing. The Appellate Body stated that no provision of the *DSU* contains any such explicit requirement. The Appellate Body also held that "a Member has broad discretion in deciding whether to bring a case against another Member under the DSU". While the Appellate Body stressed that Members are "self-regulating" in their decisions whether to bring a case, it also added that "[t]he United States is a producer of bananas, and a potential export interest by the United States cannot be excluded. The internal market of the United States for bananas could be affected by the European Communities banana regime, in particular, by the effects of that regime on world supplies and world prices of bananas":

> "We agree with the Panel that 'neither Article 3.3 nor 3.7 of the DSU nor any other provision of the DSU contain any explicit requirement that a Member must have a "legal interest" as a prerequisite for requesting a panel'. We do not accept that the need for a 'legal interest' is implied in the DSU or in any other provision of the *WTO Agreement*. It is true that under Article 4.11 of the DSU, a Member wishing to join in multiple consultations must have 'a substantial trade interest', and that under Article 10.2 of the DSU, a third party must have 'a substantial interest' in the matter before a panel. But neither of these provisions in the DSU, nor anything else in the *WTO Agreement*, provides a basis for asserting that parties to the dispute have to meet any similar standard. Yet, we do not believe that this is dispositive of whether, in this case, the United States has 'standing' to bring claims under the GATT 1994."[204]

159. The Appellate Body went on to state:

> "[W]e believe that a Member has broad discretion in deciding whether to bring a case against another Member under the DSU. The language of Article XXIII:1 of the GATT 1994 and of Article 3.7 of the DSU suggests, furthermore, that a Member is expected to be largely self-regulating in deciding whether any such action would be 'fruitful'.

200 (*footnote original*) Ibid., para. 143. [Appellate Body Report, *EC – Bananas III*]
201 (*footnote original*) See, for example, Appellate Body Report, *Korea – Dairy*, para. 127; Appellate Body Report, *Thailand – H-Beams*, para. 95.
202 (*footnote original*) Appellate Body Report, *Korea – Dairy*, paras. 124–127.
203 Appellate Body Report on *US – Carbon Steel*, para. 127.
204 Appellate Body Report on *EC – Bananas III*, para. 132.

> We are satisfied that the United States was justified in bringing its claims under the GATT 1994 in this case. The United States is a producer of bananas, and a potential export interest by the United States cannot be excluded. The internal market of the United States for bananas could be affected by the EC banana regime, in particular, by the effects of that regime on world supplies and world prices of bananas. We also agree with the Panel's statement that:
>
> > '. . . with the increased interdependence of the global economy, . . . Members have a greater stake in enforcing WTO rules than in the past since any deviation from the negotiated balance of rights and obligations is more likely than ever to affect them, directly or indirectly.'
>
> We note, too, that there is no challenge here to the standing of the United States under the GATS, and that the claims under the GATS and the GATT 1994 relating to the EC import licensing regime are inextricably interwoven in this case.
>
> Taken together, these reasons are sufficient justification for the United States to have brought its claims against the EC banana import regime under the GATT 1994. This does not mean, though, that one or more of the factors we have noted in this case would necessarily be dispositive in another case. We therefore uphold the Panel's conclusion that the United States had standing to bring claims under the GATT 1994."[205]

160. In *Korea – Dairy*, the Panel considered Korea's argument that there is a requirement for an economic interest to bring a matter to the Panel and that the European Communities had failed to meet that requirement:

> "In *EC – Bananas*, the Appellate Body stated that the need for a 'legal interest' could not be implied in the DSU or in any other provisions of the WTO Agreement and that Members were expected to be largely self-regulating in deciding whether any DSU procedure would be 'fruitful'. We cannot read in the DSU any requirement for an 'economic interest'. We also note the provisions of Article 3.8 of the DSU, pursuant to which nullification and impairment is presumed once violation is established."[206]

(ii) Right to bring claims under Article 17.4 of the Anti-Dumping Agreement

161. See the excerpts from the reports of the panels and Appellate Body referenced in Section XVII.B.5 of the Chapter on the *Anti-Dumping Agreement*.

3. Basic requirements under Article 6.2

(a) General

162. In *Korea – Dairy*, the Appellate Body analysed the requirements imposed by Article 6.2:

> "The request must: (i) be in writing; (ii) indicate whether consultations were held; (iii) identify the specific measures at issue; and (iv) provide a brief summary of the legal basis of the complaint sufficient to present the problem clearly. In its fourth requirement, Article 6.2 demands only a summary – and it may be a brief one – of the legal basis of the complaint; but the summary must, in any event, be one that is 'sufficient to present the problem clearly'. It is not enough, in other words, that 'the legal basis of the complaint' is summarily identified; the identification must 'present the problem clearly'."[207]

163. In *US – Carbon Steel*, the Appellate Body summarized its previous jurisprudence on the requirements of Article 6.2. The Appellate Body noted the importance of the two distinct requirements, namely, identification of the specific measures at issue, and the provision of a brief summary of the claims. Referring to *Guatemala – Cement I*, it concluded that both requirements "together, they comprise the 'matter referred to the DSB', which forms the basis for a panel's terms of reference under Article 7.1 of the DSU":

> "There are, therefore, two distinct requirements, namely identification of *the specific measures at issue*, and the provision of a *brief summary of the legal basis of the complaint* (or the *claims*). Together, they comprise the 'matter referred to the DSB', which forms the basis for a panel's terms of reference under Article 7.1 of the DSU.[208]
>
> The requirements of precision in the request for the establishment of a panel flow from the two essential purposes of the terms of reference. First, the terms of reference define the scope of the dispute. Secondly, the terms of reference, and the request for the establishment of a panel on which they are based, serve the *due process* objective of notifying the parties and third parties of the nature of a complainant's case.[209] When faced with an issue relating to the scope of its terms of reference, a panel must scrutinize carefully the request for establishment of a panel 'to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU.'[210]
>
> As we have said previously, compliance with the requirements of Article 6.2 must be demonstrated on the face of the request for the establishment of a panel. Defects in the request for the establishment of a panel cannot be 'cured' in the subsequent submissions of the parties

[209] (*footnote original*) Appellate Body Report, *Brazil – Desiccated Coconut*, at 186. See also Appellate Body Report, *EC – Bananas III*, para. 142.
[210] (*footnote original*) Appellate Body Report, *EC – Bananas III*, para. 142.

during the panel proceedings.[211] Nevertheless, in considering the sufficiency of a panel request, submissions and statements made during the course of the panel proceedings, in particular the first written submission of the complaining party, may be consulted in order to confirm the meaning of the words used in the panel request and as part of the assessment of whether the ability of the respondent to defend itself was prejudiced.[212] Moreover, compliance with the requirements of Article 6.2 must be determined on the merits of each case, having considered the panel request as a whole, and in the light of attendant circumstances.[213]"[214]

164. As regards the requirement that the request be sufficiently precise, see paragraphs 156–157 above.

(b) "indicate whether consultations were held" and "matter referred to the DSB"

165. In *Brazil – Desiccated Coconut*, the Panel examined the request of the Philippines to make a finding that Brazil's refusal to hold consultations was inconsistent with Articles 4.1, 4.2 and 4.3 of the *DSU*. The Panel recalled that Article 6.2 of the *DSU* requires that a request for the establishment of a panel "shall indicate whether consultations were held, identify the specific measures at issue and provide a brief summary of the legal basis of the complaint sufficient to present the problem clearly". The Panel stated:

> "The Philippines' request for establishment of a panel clearly fulfils the first requirement of Article 6.2, by indicating the Philippines' view that consultations were not held because Brazil refused to consult. . . .However, there is nothing in the request for establishment of a panel that would lead to the conclusion that the requested panel would be asked to make any finding regarding Brazil's failure to consult. . . .We therefore conclude that the Philippines' claim regarding Brazil's failure to consult is not within our terms of reference."[215]

166. In *Brazil – Aircraft*, the Panel considered that a preliminary objection could properly be sustained if a party established that the required consultations had not been held with respect to a dispute:

> "A party is not entitled to request establishment of a panel unless consultations have been held. Specifically, Article 4.7 of the DSU provides that a complaining party may request establishment of a panel only if 'consultations fail to settle a dispute'. Similarly, Article 4.4 of the SCM Agreement allows a 'matter' to be referred to the DSB for establishment of a panel only if consultations have failed to lead to a mutually agreed solution. Given that Article 6.1 of the DSU and Article 4.4 of the SCM Agreement essentially require the DSB to establish a panel automatically upon request of a party, a panel cannot rely upon the DSB to ascertain that requisite consultations have been held and to establish a panel only in those cases.[216] Accordingly, we consider that a panel may consider whether consultations have been held with respect to a 'dispute', and that a preliminary objection may properly be sustained if a party can establish that the required consultations had not been held with respect to a dispute. We do not believe, however, that either Article 4.7 of the DSU or Article 4.4 of the SCM Agreement requires a precise identity between the matter with respect to which consultations were held and that with respect to which establishment of a panel was requested."[217]

167. Regarding the term "matter referred to the DSB", see Section VII.B.2(a) below

(c) "identify the specific measures at issue"

(i) "specific measures at issue"

Nexus between "measure" and "Member"

168. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body referred to Article 3.3 of the *DSU* when defining what type of measures can be the subject of dispute settlement proceedings. The Appellate Body emphasized the nexus existing between the "measure" and a "Member" taking such measure:

> "Article 3.3 of the DSU refers to 'situations in which a Member considers that any benefits accruing to it directly or indirectly under the covered agreements are being impaired by *measures taken by another Member*'. (emphasis added) This phrase identifies the relevant nexus, for purposes of dispute settlement proceedings, between the 'measure' and a 'Member'."[218]

---

[211] (*footnote original*) *Ibid.*, para. 143.

[212] (*footnote original*) See, for example, Appellate Body Report, *Korea – Dairy*, para. 127; Appellate Body Report, *Thailand – H-Beams*, para. 95.

[216] (*footnote original*) As stated by the Appellate Body in a somewhat different context in *European Communities – Regime for the Importation, Sale and Distribution of Bananas*, adopted 25 September 1997, WT/DS27/AB/R, para. 142:

> "We recognize that a panel request will usually be approved automatically at the DSB meeting following the meeting at which the request first appears on the DSB's agenda. As a panel request is normally not subjected to detailed scrutiny by the DSB, it is incumbent upon a panel to examine the request for the establishment of the panel carefully to ensure its compliance with both the letter and the spirit of Article 6.2 of the DSU."

[217] Panel Report on *Brazil – Aircraft*, para. 7.10.

[218] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 81.

Scope: any act or omission attributable to a Member

General

169. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body further clarified that "In principle, any act or omission attributable to a WTO Member can be a measure of that Member for purposes of dispute settlement proceedings."[219]

170. The Appellate Body on *US – Corrosion-Resistant Steel Sunset Review* also indicated that those "acts or omissions that are so attributable are, in the usual case, the acts or omissions of the organs of the state, including those of the executive branch".[220,221]

Challenging legislation allegedly taken by a customs union

171. The Panel on *Turkey – Textiles* considered, *inter alia*, whether measures involving quantitative restrictions on imports from India should be properly regarded as measures imposed by Turkey or rather as measures taken collectively by the customs union between the European Communities and Turkey. In its analysis, the Panel made the following statement:

> "We also note that the measures are applied by Turkey and that they are mandatory, i.e. they leave no discretion to Turkish authorities but to enforce the measure. It is customary practice of GATT/WTO dispute settlement procedures to address applied measures. In addition, previous adopted GATT panels have always considered that mandatory legislation of a Member, even if not yet in force or not applied,[222] can be challenged by another WTO Member."[223]

Independent operational status test

172. In *US – Export Restraints*, Canada had argued that each of the elements that it cited in its request for establishment of a panel (a US Statute, a Statement of Administrative Action, a Preamble, and a US practice) individually constituted a measure that was susceptible to dispute settlement, and that, "taken together" as well, they constituted a measure.[224] The Panel enunciated the independent operational status test:

> "In considering whether any or all of the measures individually can give rise to a violation of WTO obligations, the central question that must be answered is whether each measure operates in some concrete way in its own right. By this we mean that each measure would have to constitute an instrument with a functional life of its own, i. e., that it would have to *do* something concrete, independently of any other instruments, for it to be able to give rise independently to a violation of WTO obligations. To determine whether each measure is operational on its own, we consider the status of each under US law."[225]

(ii) Legal instruments as measures

General

173. In *Japan – Agricultural Products II*, the Appellate Body interpreted the term "measure" as within the meaning of Annex B of the *SPS Agreement*. According to its terms, Annex B applies to all "measures" and lists "laws, decrees and ordinances" as three examples of such measures. The Appellate Body held that this term also included "other instruments which are applicable generally and are similar in character to the instruments explicitly referred to". In the case before it, the Appellate Body found that the Japanese "varietal testing requirement" was a "measure" within the meaning of Annex B of the *SPS Agreement*. See Chapter on *SPS Agreement*, paragraph 176.

174. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body clarified in a footnote that the scope of "laws, regulations and administrative procedures" cannot be determined by reference to how they are labelled in the Member's domestic law:

> "We observe that the scope of each element in the phrase "laws, regulations and administrative procedures" must be determined for purposes of WTO law and not simply by reference to the label given to various instruments under the domestic law of each WTO Member. This determination must be based on the content and substance of the instrument, and not merely on its form or nomenclature. Otherwise, the obligations set forth in Article 18.4 [of the Anti-Dumping Agreement] would vary from Member to Member depending on each Member's domestic law and practice."[226]

Legislation *as such* as a "measure"

General

175. In *US – Oil Country Tubular Goods Sunset Reviews*, the Appellate Body warned about the serious-

[219] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 81.

[220] (*footnote original*) Both specific determinations made by a Member's executive agencies and regulations issued by its executive branch can constitute acts attributable to that Member. See, for example, the Panel Report in *US – DRAMS*, where the measures referred to the panel included a USDOC determination in an administrative review as well as a regulatory provision issued by USDOC.

[221] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 81.

[226] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, footnote 87.

ness of "as such" challenges and urged complainants to "be *especially diligent* in setting out 'as such' claims in their panel requests as clearly as possible":

> "In our view, 'as such' challenges against a Member's measures in WTO dispute settlement proceedings are serious challenges. By definition, an 'as such' claim challenges laws, regulations, or other instruments of a Member that have general and prospective application, asserting that a Member's conduct – not only in a particular instance that has occurred, but in future situations as well – will necessarily be inconsistent with that Member's WTO obligations. In essence, complaining parties bringing 'as such' challenges seek to prevent Members *ex ante* from engaging in certain conduct. The implications of such challenges are obviously more far-reaching than 'as applied' claims.
>
> We also expect that measures subject to 'as such' challenges would normally have undergone, under municipal law, thorough scrutiny through various deliberative processes to ensure consistency with the Member's international obligations, including those found in the covered agreements, and that the enactment of such a measure would implicitly reflect the conclusion of that Member that the measure is not inconsistent with those obligations. The presumption that WTO Members act in good faith in the implementation of their WTO commitments is particularly apt in the context of measures challenged 'as such'. We would therefore urge complaining parties to be *especially diligent* in setting out 'as such' claims in their panel requests as clearly as possible. In particular, we would expect that 'as such' claims state unambiguously the specific measures of municipal law challenged by the complaining party and the legal basis for the allegation that those measures are not consistent with particular provisions of the covered agreements. Through such straightforward presentations of 'as such' claims, panel requests should leave respondent parties in little doubt that, notwithstanding their own considered views on the WTO-consistency of their measures, another Member intends to challenge those measures, as such, in WTO dispute settlement proceedings."[227]

Distinction to be drawn between laws "as such" and the specific application of laws when assessing measures

176. The Appellate Body observed in *US – 1916 Act* the existence of a long line of GATT cases that "firmly established" the principle that complaining parties were permitted to challenge measures "as such": and noted how, since the entry into force of the WTO, numerous panels had dealt with claims "as such":

> "Prior to the entry into force of the *WTO Agreement*, it was firmly established that Article XXIII:1(a) of the GATT 1947 allowed a Contracting Party to challenge legislation as such, independently from the application of that legislation in specific instances. While the text of Article XXIII does not expressly address the matter, panels consistently considered that, under Article XXIII, they had the *jurisdiction* to deal with claims against legislation as such.[228] In *examining* such claims, panels developed the concept that mandatory and discretionary legislation should be distinguished from each other, reasoning that only legislation that mandates a violation of GATT obligations can be found as such to be inconsistent with those obligations. We consider the application of this distinction to the present cases in section IV(B) below.
>
> Thus, that a Contracting Party could challenge legislation as such before a panel was well-settled under the GATT 1947. We consider that the case law articulating and applying this practice forms part of the GATT *acquis* which, under Article XVI:1 of the *WTO Agreement,* provides guidance to the WTO and, therefore, to panels and the Appellate Body. Furthermore, in Article 3.1 of the DSU, Members affirm 'their adherence to the principles for the management of disputes heretofore applied under Articles XXII and XXIII of GATT 1947'. We note that, since the entry into force of the *WTO Agreement*, a number of panels have dealt with dispute settlement claims brought against a Member on the basis of its legislation as such, independently from the application of that legislation in specific instances.[229]"[230]

177. The Appellate Body on *US – Carbon Steel* indicated Members may challenge the consistency with the

[230] Appellate Body Report on *US – 1916 Act*, paras. 60–61.

covered agreements of another Member's laws, as such, as distinguished from any specific application of those laws:

> "We note, first, that, in dispute settlement proceedings, Members may challenge the consistency with the covered agreements of another Member's laws, as such, as distinguished from any specific application of those laws. . .
>
> Thus, a responding Member's law will be treated as WTO-*consistent* until proven otherwise. The party asserting that another party's municipal law, as such, is inconsistent with relevant treaty obligations bears the burden of introducing evidence as to the scope and meaning of such law to substantiate that assertion.[231] Such evidence will typically be produced in the form of the text of the relevant legislation or legal instruments, which may be supported, as appropriate, by evidence of the consistent application of such laws, the pronouncements of domestic courts on the meaning of such laws, the opinions of legal experts and the writings of recognized scholars. The nature and extent of the evidence required to satisfy the burden of proof will vary from case to case."[232]

178. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body explained how the analysis should be done when a measure is challenged "as such":

> "When a measure is challenged 'as such', the starting point for an analysis must be the measure on its face. If the meaning and content of the measure are clear on its face, then the consistency of the measure as such can be assessed on that basis alone. If, however, the meaning or content of the measure is not evident on its face, further examination is required."[233]

Instruments with normative value

179. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body considered that instruments containing rules or norms could constitute a "measure", irrespective of how or whether those rules or norms are applied in a particular instance:

> "[I]n GATT and WTO dispute settlement practice, panels have frequently examined measures consisting not only of particular acts applied only to a specific situation, but also of acts setting forth rules or norms that are intended to have general and prospective application.[234] In other words, instruments of a Member containing rules or norms could constitute a "measure", irrespective of how or whether those rules or norms are applied in a particular instance. This is so because the disciplines of the GATT and the WTO, as well as the dispute settlement system, are intended to protect not only existing trade but also the security and predictability needed to conduct future trade. This objective would be frustrated if instruments setting out rules or norms inconsistent with a Member's obligations could not be brought before a panel once they have been adopted and irrespective of any particular instance of application of such rules or norms.[235] It would also lead to a multiplicity of litigation if instruments embodying rules or norms could not be challenged as such, but only in the instances of their application. Thus, allowing claims against measures, as such, serves the purpose of preventing future disputes by allowing the root of WTO-inconsistent behaviour to be eliminated."[236]

180. In *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body stressed the importance of an examination of the normative nature of the legal instrument at issue, the Sunset Bulletin Policy, when determining whether it is a measure subject to dispute settlement. The Appellate Body in this case did not apply the mandatory/discretionary rule (see paragraphs 190–193 below):

> "The Panel adopted a similar narrow approach in finding that the Sunset Policy Bulletin is not an 'administrative procedure' within the meaning of Article 18.4 of the *Anti-Dumping Agreement*. Having adopted the view that an administrative procedure is 'a pre-established rule for the conduct of an anti-dumping investigation',[237] the Panel assumed that a 'rule' means a 'mandatory rule' and used its previous finding that the Sunset Policy Bulletin is not a mandatory legal instrument to come to the conclusion that it therefore cannot be an administrative procedure. Again, the Panel did not consider the normative nature of the provisions of the Sunset Policy Bulletin, nor compare the type of norms that USDOC is required to publish in formal regulations with the type of norms it may set out in policy statements.[238] These inquiries would have assisted the Panel

[235] (*footnote original*) Panel Report, *US – Superfund*, para. 5.2.2.

[236] Appellate Body Report on *US – Corrosion-Resistant Steel Sunset Review*, para. 82.

[237] (*footnote original*) *Ibid.*, para. 7.134, referring to Panel Report, *US – Steel Plate*, para. 7.22.

[238] (*footnote original*) This examination would have assisted the Panel because, as we have explained, *supra*, para. 190, the phrase "laws, regulations and administrative procedures" in Article 18.4 denotes, collectively, the body of generally applicable rules, norms and standards adopted by Members in connection with the conduct of anti-dumping proceedings.

in determining whether the Sunset Policy Bulletin is, in fact, an 'administrative procedure' within the meaning of Article 18.4 of the *Anti-Dumping Agreement*."[239]

181. In *US – Oil Country Tubular Goods Sunset Reviews*, another anti-dumping case dealing with the United States Sunset Policy Bulletin (see *US – Corrosion-Resistant Steel Sunset Review*, paragraphs 174 and 178–180 above), the Appellate Body stressed that whether an instrument has legal value under domestic law is immaterial when establishing whether it can be a measure subject to dispute settlement. The Appellate Body, referring to its findings in *US – Corrosion-Resistant Steel Sunset Review*, explained that what matters is that the instrument has normative value, meaning: providing administrative guidance, creating expectations among the public and among private actors, and intended to have general and prospective application:

"We note the argument of the United States that the SPB is not a legal instrument under United States law. This argument, however, is not relevant to the question before us. The issue is not whether the SPB is a legal instrument within the domestic legal system of the United States, but rather, whether the SPB is a measure that may be challenged within the WTO system. The United States has explained that, within the domestic legal system of the United States, the SPB does not bind the USDOC and that the USDOC 'is entirely free to depart from [the] SPB at any time'.[240] However, it is not for us to opine on matters of United States domestic law. Our mandate is confined to clarifying the provisions of the *WTO Agreement* and to determining whether the challenged measures are consistent with those provisions. As noted by the United States, in *US – Corrosion-Resistant Steel Sunset Review*, the Appellate Body indicated that 'acts setting forth rules or norms that are intended to have general and prospective application' are measures subject to WTO dispute settlement.[241] We disagree with the United States' application of these criteria to the SPB. In our view, the SPB has normative value, as it provides administrative guidance and creates expectations among the public and among private actors.[242] It is intended to have general application, as it is to apply to all the sunset reviews conducted in the United States. It is also intended to have prospective application, as it is intended to apply to sunset reviews taking place after its issuance. Thus, we confirm – once again – that the SPB, as such, is subject to WTO dispute settlement."[243]

Discretionary versus mandatory legislation rule

Reference to previous GATT practice

182. In *US – 1916 Act (EC)*, the United States argued, *inter alia*, that, according to established GATT practice, the measure at issue, the so-called 1916 Act, could not be challenged "as such", i.e. independently of its application in a specific case, because it was "discretionary legislation". Specifically, the United States argued that the 1916 Act was non-mandatory because "(i) with respect to both civil and criminal proceedings, United States' courts had in the past interpreted and/or could in the future interpret the 1916 Act in a manner consistent with the WTO obligations of the United States and (ii) the United States Department of Justice had discretion whether to initiate criminal proceedings under the 1916 Act".[244] The Appellate Body recalled GATT practice in respect of this subject-matter:

"Prior to the entry into force of the *WTO Agreement*, it was firmly established that Article XXIII:1(a) of the GATT 1947 allowed a Contracting Party to challenge legislation as such, independently from the application of that legislation in specific instances. While the text of Article XXIII does not expressly address the matter, panels consistently considered that, under Article XXIII, they had the *jurisdiction* to deal with claims against legislation as such.[245] In *examining* such claims, panels developed the concept that mandatory and discretionary legislation should be distinguished from each other, reasoning that only legislation that mandates a violation of GATT obligations can be found as such to be inconsistent with those obligations.

Thus, that a Contracting Party could challenge legislation as such before a panel was well-settled under the

[244] Panel Report on *US – 1916 Act (EC)*, para. 6.82. See also Panel Report on *US – 1916 Act (Japan)*, para. 6.95.

[245] (*footnote original*) See, for example, Panel Report, *United States – Taxes on Petroleum and Certain Imported Substances* ("*United States – Superfund*"), adopted 17 June 1987, BISD 34S/136; Panel Report, United States – Section 337 of the Tariff Act of 1930, adopted 7 November 1989, BISD 36S/345; Panel Report, *Thailand – Restrictions on Importation of and Internal Taxes on Cigarettes* ("*Thailand – Cigarettes*"), adopted 7 November 1990, BISD 37S/200; Panel Report, *United States – Measures Affecting Alcoholic and Malt Beverages* ("*United States – Malt Beverages*"), adopted 19 June 1992, BISD 39S/206; and Panel Report, *United States – Tobacco*, supra, footnote 16. See also Panel Report, *United States – Wine and Grape Products*, supra, footnote 18, examining this issue in the context of a claim brought under the Tokyo Round Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade.

GATT 1947. We consider that the case law articulating and applying this practice forms part of the GATT *acquis* which, under Article XVI:1 of the *WTO Agreement,* provides guidance to the WTO and, therefore, to panels and the Appellate Body. Furthermore, in Article 3.1 of the DSU, Members affirm 'their adherence to the principles for the management of disputes heretofore applied under Articles XXII and XXIII of GATT 1947'. We note that, since the entry into force of the *WTO Agreement*, a number of panels have dealt with dispute settlement claims brought against a Member on the basis of its legislation as such, independently from the application of that legislation in specific instances.[246]"[247]

Relevant type of discretion for distinguishing between discretionary and mandatory legislation

183. Referring to the GATT Panel Report on *US – Tobacco*, the Appellate Body in *US – 1916 Act* emphasized that the type of discretion relevant for the distinction between discretionary and mandatory legislation was discretion vested with the executive branch. Also, the Appellate Body agreed with the Panel on *US – 1916 Act* in rejecting the argument that the United States Department of Justice enjoyed discretion within the meaning of established GATT practice:

"The practice of GATT panels was summed up in *United States – Tobacco*[248] as follows:

> '. . . panels had consistently ruled that legislation which mandated action inconsistent with the General Agreement could be challenged as such, whereas legislation which merely gave the discretion to the *executive authority* of a contracting party to act inconsistently with the General Agreement could not be challenged as such; only the actual application of such legislation inconsistent with the General Agreement could be subject to challenge.'[249] (emphasis added)

Thus, the relevant discretion, for purposes of distinguishing between mandatory and discretionary legislation, is a discretion vested in the *executive branch* of government.

The 1916 Act provides for two types of actions to be brought in a United States federal court: a civil action initiated by private parties, and a criminal action initiated by the United States Department of Justice. Turning first to the civil action, we note that there is no relevant discretion accorded to the executive branch of the United States' government with respect to such action. These civil actions are brought by private parties. A judge faced with such proceedings must simply *apply* the 1916 Act. In consequence, so far as the civil actions that may be brought under the 1916 Act are concerned, the 1916 Act is clearly mandatory legislation as that term has been understood for purposes of the distinction between mandatory and discretionary legislation.

The Panel, however, examined that part of the 1916 Act that provides for criminal prosecutions, and found that the discretion enjoyed by the United States Department of Justice to initiate or not to initiate criminal proceedings does not mean that the 1916 Act is a discretionary law. In light of the case law developing and applying the distinction between mandatory and discretionary legislation,[250] we believe that the discretion enjoyed by the United States Department of Justice is not discretion of such a nature or of such breadth as to transform the 1916 Act into discretionary legislation, as this term has been understood for purposes of distinguishing between mandatory and discretionary legislation. We, therefore, agree with the Panel's finding on this point."[251]

Assessment of whether or not legislation "mandates" action

184. In *US – DRAMS*, Korea challenged certain certification requirements under the United States' anti-dumping law. The provision challenged by Korea required exporters to certify, upon removal of anti-dumping duties, that they agreed to the reinstatement of the anti-dumping duties on the products of their company if, after revocation of the original anti-

[250] (*footnote original*) See, in particular, the reasoning in the Panel Report, *United States – Malt Beverages*, *supra*, footnote 34, para. 5.60.

[251] Appellate Body Report on *US – 1916 Act*, paras. 88–91. See also Panel Report on *US – Steel Plate,* paras. 7.88–7.89 and 8.3. In this case, the Panel concluded that the "practice" of the US authorities concerning the application of "total facts available" (Article 6.8 *Anti-Dumping Agreement*) is not a measure that can give rise to an independent claim of violation of the *Anti-Dumping Agreement*. See also Panel Report on *US – Section 129(c)(1) URAA*, para. 6.22.

dumping duties, the United States' authorities found dumping. The Panel rejected the Korean arguments, noting that the certification requirement was not a mandatory requirement for revocation under United States' anti-dumping law in general. The Panel held that other provisions of United States anti-dumping law and regulations of the United States authorities made revocation of an anti-dumping order possible contingent upon a different set of requirements, not including the certification requirement:

> "We note section 751(b) of the 1930 Tariff Act (as amended) and section 353.25(d) of the DOC's regulations, whereby an anti-dumping order may be revoked on the basis of 'changed circumstances'. We note that neither of these provisions imposes a certification requirement. In other words, an anti-dumping order may be revoked under these provisions absent fulfilment of the section 353.25(a)(2)(iii) certification requirement. We also note that Korea has not challenged the consistency of these provisions with the WTO Agreement. Thus, because of the existence of legislative avenues for Article 11.2-type reviews that do not impose a certification requirement, and which have not been found inconsistent with the WTO Agreement, we are precluded from finding that the section 353.25(a)(2)(iii) certification requirement in and of itself amounts to a mandatory requirement inconsistent with Article 11.2 of the AD Agreement."[252]

185. In *Canada – Aircraft*, Brazil argued that a programme of the so-called Export Development Corporation (EDC) mandated the grant of subsidies and challenged the programme as such, rather than merely specific applications of this programme. However, the Panel noted that Brazil had conceded that the EDC programme had been *interpreted* as requiring the programme to give Canadian exporters an "edge" and rejected Brazil's claim:

> "[W]e find nothing in Brazil's various submissions in support of this argument. The only factual evidence proffered by Brazil in support of its argument is the quote from EDC's mandate that EDC was established 'for the purposes of supporting and developing, directly or indirectly, Canada's export trade and Canadian capacity to engage in that trade and to respond to international business opportunities.' This statement by itself clearly cannot be viewed as a *requirement* to provide prohibited export subsidies. Nor has Brazil demonstrated otherwise that such support and development necessarily involves subsidization. Although such support and development might conceivably take the form of subsidization, there is nothing to suggest that this will necessarily be the case. In our view, a mandate to support and develop Canada's export trade does not amount to a mandate to grant subsidies, since such support and development could be provided in a broad variety of ways.
>
> We consider that Brazil effectively concedes that the EDC mandate does not require the grant of export subsidies when it states that the EDC mandate has been *interpreted* to require the EDC to fund projects that give 'Canadian exporters an edge when they bid on overseas projects.' For Brazil, this 'edge' necessarily refers to subsidization. Even if the grant of an 'edge' did imply the grant of subsidies, and even if in practice the EDC programme were applied so as to grant subsidies, this would not mean that, *in law*, the EDC mandate requires the grant of subsidies. Rather, in such circumstances the grant of subsidies would be the result of the exercise of the administering authority's discretion in *interpreting* its mandate. We again recall that the panel in *US – Tobacco* recollected 'that panels had consistently ruled that legislation which mandated action inconsistent with the General Agreement could be challenged as such, whereas legislation which merely gave the discretion to the executive authority . . . to act inconsistently with the General Agreement could not be challenged as such. . .'"[253]

Should the mandatory or discretionary question be determined before a substantive finding?

186. In *US – Export Restraints*, the question arose whether the Panel should first determine whether the measure at issue was mandatory or discretionary, and make a substantive finding only if it found the measure to be mandatory. The Panel declined to consider the mandatory/discretionary distinction as a threshold question. In the Panel's view, identifying and addressing the relevant WTO obligations first would facilitate its assessment of the manner in which the legislation at issue addressed those obligations, and whether any violation arose therefrom. In its analysis the Panel referred to the test developed by the GATT Panel on *US – Tobacco*:
